PREFACE

Digests

The Summary Digest consists of a short summary of each law enacted, and of each constitutional amendment, concurrent or joint resolution adopted by the Legislature in 1993.

The text of the Summary Digest is arranged numerically by chapter number.

Superior numbers following the title refer to a Governor's Message affecting that law. These are printed after the digests in the "Digest Chapters Superior Numbers" section.

Cross Reference Tables

Cross reference tables are arranged numerically by bill or resolution number and indicate the chapter number of each.

New General Laws

Lists new general laws passed in the years 1989–1993 which do not specifically amend, add to, or repeal any existing code or general law.

Index

A subject matter index to all measures, including constitutional amendments and resolutions, is included.

Statutory Record

This edition of the Summary Digest includes a statutory record for 1989–1993. Superior numbers following the *Effect* refer to a special condition affecting that section.

Cumulative statutory records for 10-year periods, 1979–1988, 1969–1978, 1959–1968 and 1949–1958, and for the 16-year period, 1933–1948, are published in separate volumes, which supplement the original statutory record, 1850–1932, published in 1933.

EFFECTIVE DATES

Regular Session

The 1993–94 Regular Session convened on December 7, 1992, and the interim study recess commenced on September 11, 1993. Statutes enacted in 1993, other than those taking immediate effect, will become effective January 1, 1994. In absence of other considerations, the provisions of a statute become operative on the date it takes effect. Digests indicate statutes taking immediate effect.

An urgency statute and a statute calling an election, providing for a tax levy, or making an appropriation for the usual current expenses of the state may take effect immediately. Such a statute becomes *effective* on the date it is filed with the Secretary of State.

However, any statute may, by its own terms, delay the *operation* of its provisions until the happening of some contingency, until a specified time, or until a vote of the electors at a statewide election. Also, a later statute or a general provision in a particular code may delay the operation of a statute to a time after its effective date.

The effective date of a joint or concurrent resolution is the date it is filed with the Secretary of State.

A constitutional amendment proposed by the Legislature and adopted by the people takes effect the day after the election unless the measure provides otherwise.

DIGESTS OF STATUTES ENACTED IN 1993

1993–94 REGULAR SESSION

BILL CHAPTERS

Ch. 1 (SB 92) Bergeson. Controlled substances: methamphetamine.

Existing law provides that any person who, with intent to manufacture methamphetamine or any specified analogs of methamphetamine, possesses ephedrine or pseudoephedrine, or any salts, isomers, or salts of isomers of ephedrine or pseudoephedrine, is guilty of a felony.

This bill would provide, in addition, that any person who, with intent to manufacture methamphetamine or any specified analogs of methamphetamine, possesses a substance containing ephedrine or pseudoephedrine, or any salts, isomers, or salts of isomers of ephedrine or pseudoephedrine, is guilty of a felony. This bill would impose a state-mandated local program upon local government by expanding the scope of an existing crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 2 (AB 32) Isenberg. Trial court funding.

(1) Existing law specifies the total fee for filing a first paper in civil actions and proceedings in superior court by a defendant, intervenor, respondent, or adverse party.

This bill would delete the limitation on the total fee for filing a first paper by a defendant, intervenor, respondent, or adverse party in a civil action or proceeding in superior court in a county where a fee is not collected for the court reporter fund.

(2) Existing law authorizes a surcharge of up to $50 on specified first papers and motions in superior court in Riverside County to cover certain costs relative to renovation of the Riverside County Courthouse.

This bill would expand that authorization to cover renovation of the Indio Branch Courthouse.

(3) Existing law defines "court operations" for purposes of the Brown-Presley Trial Court Funding Act.

This bill would revise that definition.

(4) Existing law specifies that funds accrued in the Trial Court Trust Fund during the 1992–93 fiscal year shall be allocated under the Brown-Presley Trial Court Funding Act to each option county in the months of January, April, June, and July, 1993, by the Legislature based on a formula derived from actual court expenditures, as specified.

This bill would, instead, specify the formula for these distributions, and specify that they are to be made in January, April, June, and August of 1993. The bill would also appropriate all funds accrued in the Trial Court Trust Fund on or before June 30, 1993, to the Controller for allocation and disbursement for these purposes.

(5) Existing provisions of the Brown-Presley Trial Court Funding Act provide for quarterly block grants to participating counties. Existing law declares the intent of the Legislature to eliminate this block grant funding following the 1992–93 fiscal year and to thereafter fund the state's share of trial court operations in the annual Budget Act. Existing law requires deduction from these block grants of specified amounts owing to the state in reimbursement of prescribed expenses or compensation of judges advanced by the state. Existing law requires these deductions to be credited by the Controller to the appropriation in augmentation of the Budget Act that is available to the Judicial Council for assignment of judges.

This bill would require monthly transfers of these reimbursements by the Controller to the Judicial Council (instead of deduction from the block grants) from specified funds appropriated to support the trial courts, and would make related changes. The bill would not change the purposes for which the reimbursements are to be used.

(6) Existing law also requires deduction from these block grants paid during the 1992–93 fiscal year of reimbursements for state-mandated local programs arising under the Trial Court Realignment and Efficiency Act of 1991, as amended.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete that requirement.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 3 (AB 240) Connolly. Discovery: expert witnesses.

Existing law requires a party desiring to depose certain expert witnesses who are designated in an exchange of information, including treating health care practitioners, to compensate the expert witness, as specified.

This bill would delete the requirement that these experts be designated in an exchange of information, and would add the requirement that a treating health care practitioner is to be asked to express an opinion during the deposition, for purposes of this provision.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 4 (SB 31) Johnston. Workers' compensation.

Existing law prescribes the evidentiary burden of proof for parties in workers' compensation claim cases.

This bill would require lien claimants to meet the same burden of proof in workers' compensation claim cases.

Existing law defines a medical-legal expense as any costs and expenses incurred for X-rays, laboratory fees, other diagnostic tests, medical reports, medical records, medical testimony, and interpreter's fees, for the purpose of proving or disproving a contested claim.

This bill would specify when a contested claim exists, and would provide that the costs of medical evaluations, diagnostic tests, and interpreters incidental to the production of a medical report do not constitute medical-legal expenses unless the medical report is capable of proving or disproving a disputed medical fact, the determination of which is essential to an adjudication of the employee's claim for benefits. This bill would also provide that these costs are not incurred earlier than the date of receipt, by specified parties, of all reports and documents required by the Administrative Director of the Division of Industrial Accidents incidental to those services.

Existing law provides that the fees for initial comprehensive medical-legal services are presumed reasonable if they comply with a schedule that the Administrative Director of the Division of Workers' Compensation is required to adopt.

This bill would repeal those provisions and would enact new provisions governing medical-legal fees. The bill would require the administrative director to adopt a medical-legal fee schedule, as specified, which would be prima facie evidence of the reasonableness of fees charged for medical-legal expenses, and would prohibit a provider from charging excess fees except in certain circumstances.

Existing law provides that all medical-legal expenses for which an employer is liable shall be paid, as specified, upon receipt by the employer of all reports and documents required by the administrative director.

This bill would provide that this law does not create a rebuttable presumption of entitlement to payment of an expense upon receipt by the employer of the required reports and documents.

This bill would specify that certain of its provisions are declaratory of existing law.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 5 (SB 32) Mello. Injunction: personal service contracts.

Under existing law, an injunction to prevent a breach of certain contracts for personal services may be granted only if the contract provides compensation for the services of at least $50,000 per annum.

This bill would reduce that amount to $6,000 until January 1, 1994.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 6 (SB 974) Alquist. Workers' compensation: subsequent injuries.

The Budget Act of 1992 appropriated money for the payment of compensation of subsequent injuries under the workers' compensation laws.

This bill would appropriate $2,020,000 from the General Fund in augmentation of that

NOTE: Superior numbers appear as a separate section at the end of the digests.

appropriation.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 7 (AB 5) W. Brown. Personal care services.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program.

Existing law authorizes the provision of personal care services, as defined, through the IHSS program.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law provides that personal care services, as defined, when provided to a categorically needy person, as defined, is a covered Medi-Cal benefit to the extent federal financial participation is available, subject to certain requirements. Protective supervision is one of the services included within the definition of personal care services under the Medi-Cal program.

This bill would specify that any person who is eligible to receive personal care services through the Medi-Cal program shall not be eligible to receive those services through the IHSS program, and would require that a personal care service provided in the IHSS program be equal to the level of the same service provided in the Medi-Cal program. It would also make other revisions in this Medi-Cal benefit.

This bill would delete protective supervision from the definition of personal care services available under the Medi-Cal program. It would also make other revisions in this Medi-Cal benefit.

The bill would require the department to adopt emergency regulations to establish the amount, scope, and duration of personal care services available under the Medi-Cal program whenever the department determines that General Fund expenditures for personal care services exceeds limitations established by the bill.

Counties are responsible for the determination of eligibility for benefits under the IHSS program and the Medi-Cal program. To the extent that this bill would increase the responsibilities of counties in making those determinations, this bill would impose a state-mandated local program.

The bill would make the authorization to provide personal care services through the Medi-Cal program inoperative on July 1, 1996, and would repeal that authorization January 1, 1997.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 8 (AB 46) Archie-Hudson. Postsecondary education.

(1) Existing provisions of the Education Code provide for the regulation of private postsecondary educational institutions.

This bill would revise and restate, with technical changes, various provisions relating to those private postsecondary educational institutions.

The bill also would delete various obsolete and duplicative provisions of law and would make technical changes relating generally to postsecondary education.

(2) Existing law authorizes the governing board of any community college district to establish revolving cash funds for use by presidents and other administrative officials designated by the governing board and acting in accordance with regulations prescribed by the governing board, for services or material and for making salary adjustments to correct errors in calculation or reporting of payroll.

This bill would repeal this express statutory authority.

NOTE: Superior numbers appear as a separate section at the end of the digests.

purpose is to promote economy, efficiency, and improved service in the transaction of the public business in the executive branch of state government and to make the operation of all state agencies and all expenditures of public funds more directly responsive to the wishes of the people by specified means.

This bill would create the Bureau of State Audits in state government under the direction of the Little Hoover Commission and headed by the State Auditor. The duties of the bureau would be to examine and report annually upon the financial statements prepared by the executive branch of the state, to perform other related assignments, including performance audits, that are mandated by statute, and to administer the Reporting of Improper Governmental Activities Act. The bureau would also be required to conduct audits of state and local government requested by the Joint Legislative Audit Committee to the extent that funding is available. The State Auditor would be appointed by the Governor to a 4-year term from a list of 3 qualified individuals submitted by the Joint Legislative Audit Committee.

This bill would continue in existence the Office of the Auditor General under the direction of the Joint Legislative Audit Committee, and its duties would be limited to the performance of special audits and investigations of public entities, including performance audits, that are requested by the Legislature.

This bill would abolish the Auditor General Fund and make the balance in the fund available for transfer to the State Audit Fund, which the bill would create as a continuously appropriated fund for the expenses of the State Auditor. The bill would also make available for transfer to the State Audit Fund the unexpended portion of the $5,000,000 appropriation to the Office of the Auditor General contained in the Budget Act of 1992.

This bill would revise the criteria required by legislative members for appointment to, and replacement on, the commission by the Speaker of the Assembly and the Senate Committee on Rules, and would change the name of the commission to the Milton Marks Commission on California State Government Organization and Economy.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 13 (AB 207) Snyder. California Walnut Commission.

Under existing law, there is in state government the California Walnut Commission. The commission is composed of 11 members.

This bill would provide for 2 additional members who are to be walnut producer-handlers, as defined. This bill would also make conforming changes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 14 (AB 384) Alpert. Schools: funding.

(1) Existing law requires the Superintendent of Public Instruction, at the request of a county superintendent of schools or school district, and with the approval of the Director of Finance, to calculate the days of attendance in schools and classes maintained by the county superintendent of schools or school district in a specified manner for the 1993–94 fiscal year or any subsequent fiscal year.

This bill would repeal that requirement and, instead, would require the Superintendent of Public Instruction, subject to the approval of the Director of Finance, to make a one-time adjustment to the base revenue limit of each school district or county office of education, upon request, for any fiscal year, as specified.

(2) This bill would require the State Department of Education to review and prepare findings regarding the potential impact of the provisions in (1) upon the equalization of funding between school districts, as specified, and would require the department to report those findings to the Director of Finance, as specified. The bill would make conforming changes.

(3) The Budget Act of 1992 apportions funds for transfer to Section A of the State School Fund and provides that the absence of any pupil may be claimed for apportionment credit, as specified, only if the absence is verified and recorded not more than 4 calendar weeks after its occurrence.

This bill would define 4 calendar weeks for this purpose.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 15 (AB 118) Sher. Fire protection: rewards.

(1) Under existing law, the Department of Forestry and Fire Protection is authorized to pay a reward of up to $5,000 for information leading to the arrest and conviction or commitment of any person who willfully and maliciously sets, or attempts to set, fire to any property within any established state responsibility area, and up to $10,000 if the fire or the attempt results in death or great bodily injury to anyone, including fire protection personnel, or if the fire causes substantial structural damage.

This bill would increase the maximum amount of those rewards to $10,000 and $25,000, respectively.

(2) Existing law requires the department to perform various fire protection duties. An item of the Budget Act of 1992 appropriates $20,000,000 from the General Fund to the department for its support and makes those funds specifically available for emergency fire suppression and detection costs and related revegetation.

This bill would appropriate $20,100,000 from the General Fund to the department for those specified purposes for expenditure in the 1992–93 fiscal year in augmentation of that item. The bill would authorize the Director of Finance to withhold authorization for expenditure until preliminary estimates of potential deficiencies are verified.

The bill would declare that these provisions make an appropriation for the usual current expenses of the state and shall go into immediate effect.

Ch. 16 (SB 116) Lockyer. Court-Appointed Special Advocate Program.

Existing law authorizes superior courts to implement a program of court-appointed special advocates to help define the interests of children in juvenile dependency proceedings and in proceedings for the termination of parental rights. The provisions authorizing this "CASA" program will expire on January 1, 1994.

This bill would extend those provisions indefinitely.

Ch. 17 (SB 295) Ayala. Colton Joint Unified School District: governing board.

Existing law prescribes the terms of the regular biennial election for the members of the governing board of a school district.

This bill would prescribe special terms for members of the governing board of the Colton Joint Unified School District for the November 2, 1993, and the November 7, 1995, elections, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 18 (AB 18) Archie-Hudson. Los Angeles Revitalization Zone: taxation: disaster relief: riots.

Existing law provides, until January 1, 1998, that the Los Angeles Revitalization Zone consists of specific geographic areas that suffered damage as a result of specified civil disturbances based on a map prepared and approved, as specified.

This bill would extend the operation of those provisions until December 1, 1998.

The Personal Income Tax Law and Bank and Corporation Tax Law provide, as specified, under either or both laws, among other things, a credit in an amount, not to exceed a specified limit, that is equal to the sales or use tax paid or incurred by a taxpayer engaged in a trade or business within the Los Angeles Revitalization Zone in connection with the purchase of qualified property, as defined; credits for certain wages paid to, or received by, specified employees who are residents of the Los Angeles Revitalization Zone; a deduction for specified net interest received by a taxpayer in payment of indebtedness of a person or entity engaged in a trade or business located in the Los Angeles Revitalization Zone; a deduction with respect to certain property that is acquired by purchase for exclusive use in a trade or business conducted within the Los Angeles Revitalization Zone; and a deduction for certain net operating losses incurred by a taxpayer engaged in the conduct of a trade or business within the Los Angeles Revitalization Zone.

This bill would provide, for purposes of the credit for sales and use tax paid, that qualified property does not include inventory and would provide specified limits for qualified property eligible for the credit and for carryover of the credit. It would, with respect to the credit for certain wages paid to, or received by, the specified employees

NOTE: Superior numbers appear as a separate section at the end of the digests.

change the period in which wages are paid or incurred, change the definition of construction work, and provide for specified new limits for carryover of the credit. It would provide that the deduction for net interest applies to indebtedness incurred solely in connection with activity within the Los Angeles Revitalization Zone. It would also provide new limits for carryover of net operating losses incurred by a taxpayer engaged in the conduct of a trade or business within the Los Angeles Revitalization Zone. This bill would also make technical changes to those tax provisions.

This bill would take effect immediately as a tax levy.

Ch. 19 (SB 361) Russell. Vehicles: Safety requirements.

Under existing law, any traffic officer may require the driver of a vehicle to stop and submit to an inspection, measurement, or weighing of the vehicle when there is reason to believe the vehicle is not safely loaded or that its height, width, length, or weight is unlawful. Under existing law, the weighing may be done either by means of portable or stationary scales and the officer may require that the vehicle be driven to the nearest scale facility, in the event the scales are within 5 miles.

This bill would require the scales to be within 5 road miles, rather than 5 miles, if the officer requires the vehicle to be driven to the nearest scale facility.

Ch. 20 (AB 83) Klehs. Local government: assessment districts.

Under existing law, the Mojave Water Agency is created by special act of the Legislature with prescribed boundaries, powers, and duties. Among other things, the agency is authorized to sell bonds and issue negotiable promissory notes, as provided. Existing law establishes the Gledhill Landscape and Lighting District, which is authorized, among other things, to make specified assessments. Existing law also provides for changes in the boundaries of local governmental agencies, including provisions that, when certain local governmental agencies are created, the tax or assessment levying authority of each agency is required to file a statement of the creation. The statement is required to include, among other things, a legal description of the agency's boundaries and a map or plat indicating the boundaries. The statement is required to be filed on or before January 1st of the year in which the assessments or taxes are to be levied with each assessor whose roll is used for the levy and with the State Board of Equalization. In the event that the statement and map or plat are not filed on or before the deadline, the creation of the agency is not effective for assessment or taxation purposes for the succeeding fiscal year, but the agency is allowed to borrow funds, as provided.

This bill would provide that notwithstanding certain of these provisions relating to filing requirements in connection with changes in boundaries, any improvement district of the Mojave Water Agency formed for the purpose of incurring bonded indebtedness, the formation of which was completed prior to 1991, and the formation of the Gledhill Landscape and Lighting District, shall be effective for assessment and taxation purposes, as provided.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 21 (AB 199) Hauser. Common interest developments: governing document amendments.

Existing law, which became inoperative on January 1, 1990, specified a procedure by which certain governing documents of a common interest development may be amended where those governing documents neither preclude amendment nor include provisions permitting amendment.

This bill would make those provisions operative again.

Ch. 22 (AB 85) Honeycutt. Firearms: discharge from a motor vehicle.

Existing law prohibits any person from maliciously and willfully discharging a firearm at an inhabited dwelling house, occupied building, occupied motor vehicle, occupied aircraft, inhabited housecar, as defined, or inhabited camper, as defined, a violation of which is a felony punishable by imprisonment in a state prison for 3, 5, or 7 years, or by imprisonment in the county jail.

Existing law also provides that any person convicted of the above offense shall be

NOTE: Superior numbers appear as a separate section at the end of the digests.

punished by, in addition and consecutive to the punishment for that violation, an additional term of 4 years, if as a result of the defendant personally and willfully and maliciously discharging the firearm at an occupied motor vehicle from another motor vehicle, the victim suffers injury, as specified. Existing law erroneously refers to the injury as "paralysis of paraparesis" of a major body part, including, but not limited to, the entire hand or foot.

This bill would correct this language to refer to "paralysis or paraparesis" of a major body part, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 23 (AB 467) Statham. Schools: classified employees.

Existing law entitles classified school employees to paid leave of absence for illness or injury, as specified. Existing law permits these employees to use a maximum of 6 days per school year of this earned leave of absence for personal necessity, as specified.

This bill would increase the maximum number of paid days of sick leave per school year that a classified school employee may use for personal necessity to 7.

Ch. 24 (AB 254) Rainey. County Employees Retirement Law of 1937: retirement boards: records.

The County Employees Retirement Law of 1937 sets forth the duties and powers of county retirement boards in administering its provisions.

This bill would authorize the boards to establish efficient records management procedures, which may include, but need not be limited to, the maintenance and disposal of records within their jurisdiction.

Ch. 25 (AB 255) Rainey. County retirement: additional member contributions.

An existing provision of the County Employees Retirement Law of 1937 authorizes members of county retirement systems, with specified exceptions, to make additional member contributions for the purpose of receiving additional retirement benefits, subject to the regulations of the county retirement board.

This bill would delete the exceptions, thereby making that provision applicable to all members of county retirement systems operated and maintained pursuant to that law.

Ch. 26 (AB 281) Collins. Seismic Safety Commission.

Existing law, the Seismic Safety Commission Act, provides for the Seismic Safety Commission that, among other things, annually reports to the Governor and Legislature on its findings, progress, and recommendations relating to earthquake hazard reduction.

The act requires the commission to consist of 15 members appointed by the Governor from prescribed organizations, including 4 members from nominees submitted by the League of California Cities and the County Supervisors Association of California, and confirmed by the Senate, one member appointed by the Senate Rules Committee, and one member appointed by the Speaker of the Assembly.

This bill would delete the requirement that the 15 members of the commission include 4 members from nominees submitted by the League of California Cities and the County Supervisors Association of California and would, instead, require the members of the commission to include 4 members from nominees submitted by the League of California Cities and the California State Association of Counties.

This bill would require one of the members from nominees submitted by the League of California Cities and the California State Association of Counties to be a building official.

Ch. 27 (AB 286) Aguiar. Bank and corporation taxes: payments: electronic funds transfer.

The existing Bank and Corporation Tax Law requires that any taxpayer whose tax liability exceeds specified amounts remit payment to the Franchise Tax Board by electronic funds transfer and permits any taxpayer that submits a request to the Franchise Tax Board that is granted to make payments by electronic funds transfer. Existing law requires that electronic funds transfer be accomplished by an automated clearinghouse

NOTE: Superior numbers appear as a separate section at the end of the digests.

debit, automated clearinghouse credit, or by Federal Reserve Wire Transfer (Fedwire). Existing law permits banking costs charged to the taxpayer and to the state for any Fedwire funds transfer to be charged to the taxpayer.

This bill would additionally permit electronic funds transfer to be accomplished by an international funds transfer, as defined. The bill would permit banking costs charged to the taxpayer and to the state for any international funds transfer to be charged to the taxpayer.

Ch. 28 (SB 47) Lockyer. Contracts: consumer rights.

Existing law requires specified retailers who sell merchandise which will be delivered to the consumer at a later date to specify, either at the time of the sale or at a later date, a 4-hour period within which delivery shall be made if the consumer's presence is required. Existing law also sets forth similar requirements for these retailers with regard to service and repair of merchandise. Chapter 693 of the Statutes of 1992, effective January 1, 1993, requires these retailers to specify the 4-hour period for delivery either at the time of the sale or at a later date prior to the delivery date.

This bill would also require these retailers to specify the 4-hour period for commencement of service or repair of merchandise prior to the date of service or repair.

Ch. 29 (SB 162) Presley. Peace officers: memorial ceremonies.

Existing law provides that peace officer memorial ceremonies, including the dedication of the memorial to California peace officers on the grounds of the State Capitol and any subsequent ceremonies, shall be conducted by the Peace Officers Research Association of California.

This bill, instead, would provide that these ceremonies shall be conducted by the California Peace Officers Memorial Foundation.

Ch. 30 (SB 164) Presley. Sex offenders: Sexual Habitual Offender Program.[1]

Existing law provides that, upon appropriation by the Legislature, funds in the Department of Justice Sexual Habitual Offender Fund may be expended by the Department of Justice to offset the costs incurred to implement the Sexual Habitual Offender Program.

This bill would appropriate the sum of $280,000 from the Department of Justice Sexual Habitual Offender Fund to the Department of Justice for the costs incurred in implementing the Sexual Habitual Offender Program.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 31 (SB 3) Greene. Income taxes: bank and corporation taxes.

The existing Revenue and Taxation Code contains the Personal Income Tax Law and the Bank and Corporation Tax Law which impose taxes, as specified.

This bill would make various changes to the Revenue and Taxation Code by deleting specified provisions in the Personal Income Tax Law and the Bank and Corporation Tax Law, relating to, among other things, administration, enforcement, and penalties, and adding substantially similar provisions under a new part to that code that would apply to either or both laws, as specified.

This bill would make conforming changes in various provisions of the Unemployment Insurance Code relating to unemployment compensation coverage, interest payable on employer contributions, interest due for overpayments of contributions, and withholding of taxes and penalties associated with withholding.

This bill would provide a specified operative date for the statute of limitations applicable to specified returns. This bill would also make certain requirements relating to federal audit adjustments apply as provided.

This bill would incorporate amendments to Section 23101.5 of the Revenue and Taxation Code made by SB 26 if both this bill and SB 26 are chaptered and this bill is chaptered last.

This bill would declare that it is to take effect immediately as an urgency statute, but all of its provisions, with certain exceptions, would become operative on January 1, 1994.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 32 (SB 209) Lewis. Mobilehome parks: removal of vehicles.

Existing law regulates the operation of mobilehome parks. Existing law also authorizes the removal of a vehicle from private property, as specified, if the property is posted prohibiting public parking.

This bill would specifically authorize the management of a mobilehome park to remove a vehicle other than a mobilehome from the park pursuant to the above provisions, if the park is so posted.

Ch. 33 (AB 379) Conroy. Alcoholic beverages: advertising.

Existing law generally prohibits a manufacturer of alcoholic beverages and a winegrower from paying, crediting, or compensating a retailer for advertising or paying or giving anything of value for the privilege of placing a sign or advertisement with a retail licensee. It authorizes, as an exception, the holder of a beer manufacturer's or winegrower's license to purchase advertising space and time from, or on behalf of, an on-sale retail licensee, subject to specified conditions including that the on-sale licensee is the owner of an outdoor stadium or a fully enclosed arena with a fixed seating capacity in excess of 10,000 seats located in a county of the 8th class.

This bill would expand that exception to include an on-sale licensee that is the owner of a fully enclosed arena with a fixed seating capacity in excess of 18,000 seats located in Orange County.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 34 (AB 1535) Caldera. Real estate: real estate brokers.

Existing law requires specified trust funds reports to be filed with the Real Estate Commissioner by real estate brokers who negotiate or collect payments or provide servicing with respect to certain loan transactions or real property sales contracts if the annual dollar volume thereof exceeds a prescribed threshold. Existing law also requires real estate brokers who are exempt from making these trust funds reports to the commissioner, because their annual dollar volume does not exceed that threshold, to complete these reports according to specified requirements, and retain them on file at the broker's office, where they would be available for inspection by representatives of the commissioner on 24 hours' notice.

This bill would change the requirements for completing those reports.

Ch. 35 (SB 26) Russell. Bank and corporation taxes.

The existing Bank and Corporation Tax Law provides that the Franchise Tax Board may make a determination that a corporation is not doing business in this state for purposes of the bank and corporation franchise tax if the corporation's only activities consist of the purchase of personal property or services, as specified, and the corporation does not have more than 100 employees in this state whose duties are limited to certain activities with respect to the property or services.

This bill would, in addition, authorize the board to make that determination if the corporation's activities consist of the purchase of personal property or services, as specified, if the corporation does not have more than 200 employees in this state whose duties are limited, as provided above, and the personal property or services are used for the construction or modification of a physical plant or facility located outside the state. This bill would provide that in the case of a corporation applying for, or relying on, the determination, the 100- or 200-employee limitation shall apply to all corporations within a unitary group. This bill would require a corporation to make a specified annual confirmation relative to the determination. This bill would require each taxpayer that sells property or services to a corporation with more than 100 employees in this state, with respect to which the determination has been made, to make a specified report. This bill would also make technical, nonsubstantive changes to those provisions.

This bill would take effect immediately as a tax levy.

Ch. 36 (SB 72) Kelley. Dairy products: cross-promotions.

Existing law prohibits the issuance of coupons, premiums, certificates, or similar devices to be redeemed in connection with the retail sale of dairy products classified as

NOTE: Superior numbers appear as a separate section at the end of the digests.

class 1, except yogurts, fromage frais or soft fresh cheese, lowfat fromage frais or lowfat soft fresh cheese, and nonfat fromage frais or nonfat soft fresh cheese. Existing law also provides that the allowance or gift of any money, credit, or compensation, or the lending of anything of value, to a wholesale customer for advertising or display in connection with the sale of dairy products classified as class 1, except flavored milks or yogurts, is an unlawful practice.

This bill would, until January 1, 1996, except from the provisions governing the issuance of coupons, kefir, fruit kefir, flavored milks, and fluid milk products to which cultures are added, and would, until January 1, 1996, except from the provisions prohibiting extra allowances to a wholesale customer for advertising kefir, fruit kefir, and fluid milk products to which cultures are added. The bill would also make technical corrections to conform to existing law. The bill would also provide that coupons redeemed with dairy products shall not themselves cause a product to be sold below cost under specified conditions. The bill would also permit persons to engage in cross-promotions, as defined, involving dairy products, under the conditions specified in the bill.

Existing law defines both class 1 and class 2 milk products. Existing law excludes any market milk, market skim milk, or market cream that is used in the manufacture of yogurt which is directly sold for use in states other than this state from the list of class 1 milk products.

This bill would delete that exclusion. The bill would also include yogurt in the list of class 2 milk products.

This bill would also declare that it would take effect immediately as an urgency statute.

Ch. 37 (SB 79) Marks. Child care: adjustment factors.

Existing state law establishes the Child Care and Development Services Act for the purpose of providing a system of child care and development services for children, as specified. Existing law requires that a provider agency's reported child days of enrollment be adjusted by specified factors if that agency provides child care for children with special needs, as defined, and has an assigned reimbursement rate at or below the standard reimbursement rate.

This bill would add a requirement that an agency that has an assigned reimbursement rate above the standard reimbursement rate have the rate adjusted by those specified factors not to exceed the adjusted standard reimbursement rate.

This bill would delete the term "children with special needs" and replace it with a reference to children who meet any of the specified criteria.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 38 (SB 235) Ayala. Water rights.

Existing law, which is to be repealed on January 1, 1994, requires the registration of an appropriation of water for a small domestic use and requires the State Water Resources Control Board to submit a prescribed report, by January 1, 1993, to the Governor and the Legislature.

This bill would delete the reporting provision. The bill would delete the repeal date, thereby continuing indefinitely the provisions requiring the registration of an appropriation of water for a small domestic use.

Ch. 39 (AB 37) Johnson. Special elections: costs.

(1) Under existing law, all expenses, authorized and necessarily incurred in the preparation for and conduct of elections as provided in the Elections Code, are to be paid from the several county treasuries, as specified.

This bill would specify that all expenses, authorized and necessarily incurred in the preparation for and conduct of elections proclaimed by the Governor to fill a vacancy in the office of Senator or Member of the Assembly, or to fill a vacancy in the office of United States Senator or Representative in the United States House of Representatives are to be paid by the state. The bill would also specify that if an election proclaimed by the Governor to fill a vacancy in one of those offices is consolidated with any other local election, only those additional expenses directly related to the election proclaimed by

NOTE: Superior numbers appear as a separate section at the end of the digests.

the Governor to fill a vacancy in the office are to be paid by the state. The bill would make these changes applicable to any election conducted for these purposes on or after January 1, 1993.

The provisions of the bill amending existing law would be repealed on January 1, 1996.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 40 (AB 613) Rainey. Economic poisons.

Existing law requires the Department of Pesticide Regulation in cooperation with the State Department of Health Services, to conduct an assessment of dietary risks associated with the consumption of produce and processed foods treated with pesticides. Existing law also requires the department and the State Department of Health Services to jointly review the existing federal and state pesticide registration and food safety system and determine if the existing programs adequately protect infants and children from dietary exposure to pesticide residues.

This bill would renumber these provisions in the Food and Agricultural Code without substantive change.

Ch. 41 (AB 682) Moore. Board of Pilot Commissioners.

Existing law requires each member of the Board of Pilot Commissioners for the Bays of San Francisco, San Pablo, and Suisun to be a citizen of the United States and a resident of one of the following counties: San Francisco, Alameda, Contra Costa, Marin, Sacramento, San Mateo, Santa Clara, Solano, San Joaquin, Napa, Sonoma, or Yolo.

This bill would, instead, only require the members who are pilots and the public members to be residents of those specified counties. The members who represent the shipping industry would be required to be residents of California.

Ch. 42 (AB 1351) Cannella. Department of Food and Agriculture: civil executive officer.

Under existing law, the Department of Food and Agriculture is under the control of a civil executive officer known as the Director of Food and Agriculture.

This bill would change the name of the civil executive officer to the Secretary of Food and Agriculture.

Ch. 43 (AB 1376) Collins. Institutionalization prevention programs: funding: parking fines.

Existing law authorizes counties to impose an assessment of $2 for every $10, or fraction thereof, of fines, forfeitures, or penalties collected for the unauthorized use of parking spaces designated for disabled persons.

This bill would, until January 1, 1995, require each county to deposit the funds derived from the assessment in its general fund, to be used for institutionalization prevention programs for older persons and for functionally impaired adults in that county.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 44 (AB 1934) Richter. Hazardous waste control: enforcement.

Existing law requires that civil actions brought under hazardous waste control laws be brought by the city attorney, the district attorney, or the Attorney General in the name of the people of the State of California.

This bill would include the county attorney among the persons who are authorized to bring those civil actions.

Ch. 45 (AB 1952) Weggeland. Earthquake prediction: grant awards.

Existing law provides that the Office of Competitive Technology, with the advice of the Division of Mines and Geology, shall make up to 5 grant awards to aid the development of technologies to predict or mitigate the impact of earthquakes. Existing law also authorizes the Division of Mines and Geology, with the advice of the Office of Competitive Technology, to make up to 5 grant awards for feasibility studies to evaluate new earthquake prediction technology, for the 1990–91 fiscal year.

This bill would eliminate these overlapping functions, and make the Office of Competitive Technology, with advice from the division, responsible for all grant awards in

NOTE: Superior numbers appear as a separate section at the end of the digests.

the areas of earthquake prediction and mitigation technology. This bill would also eliminate the 1990–91 fiscal year date restriction.

Ch. 46 (SB 389) Rosenthal. State park system: Santa Monica State Beach.

Existing law prohibits the term of a concession contract at a unit of the state park system from exceeding 20 years unless specifically authorized by statute.

Existing law authorizes the term of a concession contract entered into by the City of Santa Monica for the development of new public facilities at Santa Monica State Beach to be for a period not to exceed 60 years, as specified.

This bill would repeal those special provisions.

Ch. 47 (SB 424) Thompson. Food facilities: food sales from vehicles.

Existing law provides for the regulation of various types of food facilities, including vehicles, to ensure uniform health and sanitation standards for the protection of the public health. Existing law authorizes the sale of certain unpackaged foods from vehicles, as defined, if the storage, display, and dispensing methods are approved by the enforcement agency.

This bill would add cappuccino, hot chocolate, and other coffee- and cocoa-based drinks that may contain cream, milk, or similar dairy products and that are immediately served to the consumer to the list of unpackaged foods that may be sold from vehicles. By increasing the administration and enforcement responsibilities of local health officers, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 48 (SB 708) Committee on Revenue and Taxation. Property tax: exemption for disabled accessibility.

Existing provisions of Article XIII A of the California Constitution limit ad valorem taxes on real property to 1% of its full cash value, which is defined as the assessor's valuation of the real property as shown on the 1975–76 tax bill under "full cash value," or thereafter the appraised value of real property when purchased, newly constructed, or a change of ownership has occurred. Existing statutory provisions construe Article XIII A to exclude from the term "newly constructed" construction of any portion of a dwelling eligible for the homeowner's property tax exemption if the construction is to make the dwelling more accessible to a severely or permanently disabled permanent resident.

This bill would expressly bring under this exemption home additions that duplicate existing facilities and which are for the purpose of providing facilities for a disabled person, as specified.

Ch. 49 (AB 330) Baca. Alcoholic beverages.

Existing law requires an out-of-state beer manufacturer to have an out-of-state beer manufacturer's certificate in order to ship beer manufactured outside the state to licensed importers in the state. Existing law also requires an out-of-state vendor shipping beer into the state to hold a certificate of compliance. An applicant for an out-of-state beer manufacturer's certificate or a certificate of compliance must agree to comply with all laws and regulations of this state relating to the sale of alcoholic beverages.

This bill would require these applicants to agree to comply with all laws and regulations of this state relating to the sale of alcoholic beverages to the same extent as licensees.

Ch. 50 (AB 1490) Horcher. Developmentally disabled.

Existing law provides for the reimbursement of work-activity program facilities for the developmentally disabled, reduces the rate of reimbursement for those providers com-

NOTE: Superior numbers appear as a separate section at the end of the digests.

mencing November 1, 1992, to reflect a specified savings amount, and requires the increase of those rates effective July 1, 1993.

This bill would authorize the Department of Developmental Services to adjust that rate prior to July 1, 1993, if the utilization of federal funds permit it. The bill would also authorize the adjustment of the rate effective July 1, 1993, to remain in effect until July 1, 1996.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 51 (AB 1891) Polanco. Special education funding: contracts: transfers.

(1) Existing law authorizes county offices of education and school districts or groups of school districts to enter into contractual agreements for services relating to the education of individuals with exceptional needs.

This bill would subject that authorization to the requirement that the county office of education or school district that reports an instructional personnel service unit for funding be the agency that employs the personnel who staff the unit, with specified exceptions.

(2) Existing law prohibits special education programs that are already in operation in school districts from being transferred to the county superintendent of schools or to other school districts, or any combination thereof, without the approval of the Superintendent of Public Instruction, if the transfer would result in an increased entitlement to state aid.

This bill would delete the condition that the transfer result in an increased entitlement to state aid, but would prohibit the transfer until certain conditions are met, including the development of a detailed plan, and the agreement of the affected agencies, as specified.

(3) Under existing law, if the transfer referenced in (2) is approved, the superintendent is required to determine the additional costs to the state of the transfer, pursuant to a specified computation, and to permanently reduce the school district's or county superintendent's entitlements by an amount equal to any additional cost, as specified. The superintendent also is required to make cost calculations regarding transfers of educational programs for severely disabled pupils, as specified.

This bill would delete the provisions in (3) and instead require that the superintendent ensure that a transfer of a program does not result in an increase or decrease in cost to the state by requiring the superintendent to recalculate the appropriate support service ratio and instructional personnel service unit rates using a weighted average, as specified. The bill would require the superintendent to adjust permanently the base revenue limit of any school district that, as a result of a program transfer, no longer operates a special education program.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 52 (AB 2235) McDonald. Water Replenishment District of Southern California.

Under the Water Replenishment District Act, the operator of a groundwater-producing facility is required to file a quarterly statement with the water replenishment district stating the facility's total production, as specified. Under existing law, the producer is required to pay a quarterly replenishment assessment as imposed by the board of the district, and computed, as specified, based on the quarterly groundwater production statement.

This bill would, with respect to the Water Replenishment District of Southern California, require monthly groundwater production statements, as specified, and monthly payment of assessments.

Ch. 53 (SB 7) Kelley. Reclaimed water.

Existing law regulates the use of reclaimed water.

This bill would provide that described water suppliers may acquire, store, provide, sell, and deliver reclaimed water for any beneficial use, including, but not limited to, municipal, industrial, domestic, and irrigation uses, if the water use is in accordance with specified statewide reclamation criteria and regulations.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 54 (SB 169) Boatwright. State agencies: abolition.

(1) Existing law requires the California Fair and Exposition Revenue Bond Advisory Commission to perform various functions and duties for the purpose of assisting counties, districts, and fruit fairs in the planning, preparation, marketing, and sale of fair and exposition revenue bonds to reduce cost, protect the issuer's credit, and determine public benefits and detriments.

This bill would abolish the commission.

(2) Existing law requires the Small Business Bond Insurance Corporation to perform various functions and duties for the purpose of increasing the availability of long-term financing to small business in California through the provision of insurance or guarantees of the payment of bonds issued by or for the benefit of small businesses that utilize financing as a source of long-term capital.

This bill would abolish the corporation.

(3) Existing law requires the Hazardous Substance Cleanup Financing Authority to perform various functions and duties for the purpose of providing industry and private nonprofit entities within the state with an alternative method for financing the removal of hazardous substances to promote the health and welfare of the citizens of the state.

This bill would abolish the authority.

(4) This bill would also make conforming changes.

Ch. 55 (SB 80) Alquist. 1993–94 Budget.[2]

This bill would make appropriations for support of state government for the 1993–94 fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 56 (AB 2351) Committee on Ways and Means. State operations.

Existing law establishes advisory bodies to various state agencies, boards, and commissions.

This bill would merge or abolish 63 specified advisory bodies to various state agencies, boards, and commissions.

Existing law requires numerous applications and permits in connection with land use and development. Under existing law, the Office of Permit Assistance is established in the Governor's Office of Planning and Research to provide technical assistance to counties and cities in establishing and operating an expedited permit process. Existing law sets forth the various functions and duties of the office, including providing that the Office of Permit Assistance shall assist local agencies in the expedition of permit applications for energy projects.

This bill would create the Department of Permit Assistance, within the Trade and Commerce Agency. The department would replace the Office of Permit Assistance, and would assume all the office's functions and duties. The bill would replace references to the office with references to the department.

Ch. 57 (AB 535) Bates. Richmond Unified School District: loan repayment.

(1) Existing law provides for an emergency apportionment of $9,525,000 to the Richmond Unified School District, and for a loan of $19,000,000 to that school district pursuant to an order of the Superior Court of Contra Costa County. Existing law also provides for the disposition of excess property by a school district, as specified.

This bill would make the Richmond Unified School District, renamed as the West Contra Costa Unified School District, ineligible for any state school facilities funding, except as specified, for a period of 5 years from the time of enactment of this legislation, or until the final payment on its entire debt to the state is paid, whichever is later.

This bill would authorize the West Contra Costa Unified School District to lease, rent, sell, or otherwise utilize, excess school district real properties and facilities, the proceeds of which would be used for the exclusive purpose of repaying specified loans from the General Fund. The bill would consolidate the school district's outstanding debts into one loan obligation, and would set forth a loan payment schedule, thereby imposing a state-mandated local program.

This bill would waive all provisions of statute that impose a condition on the sale, use,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

or transfer of public agency lands and properties, as specified.

(2) This bill would make a legislative finding and declaration of unique circumstances.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 58 (AB 2117) Johnson. Contracting agencies' employees' health benefits: vesting in employer contributions for annuitants.

The existing Public Employees' Medical and Hospital Care Act authorizes the Board of Administration of the Public Employees' Retirement System to provide health benefits plan coverage to state and local public employees and annuitants and their family members. The act conditions the vesting of the right of state employees to the benefit of the applicable employer's contributions toward annuitants' health benefits costs upon having various minimum periods of service credit at retirement.

This bill would authorize the North Orange County Community College District and the Riverside County Superintendent of Schools and the exclusive representatives to agree that no right of the employees retiring for age and service to employer contributions payable for annuitant health care coverage arises until the employee is credited with 15 years or more of service with the employer, after which the employer would pay 100% of the contribution.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 59 (SB 443) Committee on Budget and Fiscal Review. State-mandated local programs.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would require the Commission on State Mandates to hear and decide on a priority basis, claims by local agencies that all affected agencies shall not be required to continue to implement or give effect to any mandated program when the maximum charges, fees, or assessments which it is allowed to levy are not sufficient to pay for the mandated new program or higher level of service. The provision would become inoperative July 1, 1995, and would be repealed on January 1, 1996.

Existing law imposes various duties and programs on local government agencies.

Existing law requires the state to reimburse a school district for school crossing guards when the city or county or city and county fails to adopt standards to provide school crossing guards.

Existing law permits a candidate to submit a petition containing the signatures of registered voters in lieu of a filing fee.

Existing law requires the treasurer of a local agency to make a specified report on the interest on investments.

Existing law requires a local agency to provide specified notices on the merger and unmerger of contiguous properties.

Existing state regulations require any public water system to observe specified maximum contaminant levels for turbidity.

Existing law requires coroners and medical examiners to engage the services of a dentist to assist in the identification of a body or human remains.

Existing law requires local agencies to destroy certain arrest and conviction records relating to marijuana offenses.

Existing law requires local public agencies to make copies of each employee's personnel file available at the place the employee reports to work, and to permit employees reasonable inspection of their personnel files.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires, in any case in which a defendant is convicted of a felony and a probation report is prepared, as specified, the probation officer to include in the report a statement of the comments of the victim concerning the offense.

Existing law, relating to missing persons reports, imposes certain requirements on local law enforcement agencies concerning the submission of dental and other records.

Existing law requires a court investigator, probation officer, or domestic relations investigator to make an investigation and file with the court a report and recommendation concerning each proposed guardianship of the person or guardianship of the estate.

Existing law requires each county in which is located an airport served by a scheduled airline, or the airport is not served by a scheduled airline but is operated for the benefit of the general public, to establish an airport land use commission or to adopt a resolution that the commission is not needed.

Existing law requires specified law enforcement agencies to develop, adopt, and implement a written policy for its officers to provide assistance to disabled motorists on highways within its primary jurisdiction.

Existing law requires the custodian of juvenile detention facilities to make any reports required by the Department of the Youth Authority or juvenile court with respect to the condition and operation of the facility.

Existing law requires the probation officer to make an investigation when application is made to commence specified proceedings in the juvenile court.

This bill would repeal or make permissive the above state-mandated local programs.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 60 (SB 452) Committee on Budget and Fiscal Review. Governmental operations.

(1) Existing law requires the Superintendent of Public Instruction to adopt rules and regulations for the monitoring of contractors who provide child care and development program services.

This bill would exempt any county agency that contracts with the state to provide child care and development program services from any rules and regulations adopted by the superintendent which provide for self-evaluation or self-assessment.

(2) Under existing law, governing boards of school districts that employ school crossing guards may be reimbursed for this purpose by a city, county, or city and county out of a special fund in which moneys from fines and forfeitures collected in municipal or justice courts are deposited. Existing law further requires that those governing boards be reimbursed in that manner when a city, county, or city and county fails or refuses to adopt standards under which the city, county, or city and county shall provide school crossing guards. Existing law also requires that, except as otherwise provided by written agreement, if the city, county, or city and county provides crossing guards, the city, county, or city and county shall pay for the cost of those guards.

This bill would repeal the requirement that governing boards of school districts be reimbursed when a city, county, or city and county fails or refuses to adopt standards under which the city, county, or city and county shall provide school crossing guards. This bill would also repeal the requirement that, except as otherwise provided by agreement, if the city, county, or city and county provides crossing guards, the city, county, or city and county shall pay for the cost of those guards.

(3) Existing law provides that if certain provisions of the Food and Agricultural Code relating to animal control have been adopted by the board of supervisors of any county, and the governing body of any city that is located within the county requests, by ordinance, the application of the provisions within the confines of the city, those sections shall also apply within the city.

This bill would also authorize a city to adopt those provisions and provide that nothing in the provisions of the Food and Agricultural Code related to animal control requires a county to enforce those provisions within the territorial limits of any city located within the county.

(4) Existing law establishes the Disaster Response-Emergency Operation Account in the Reserve for Economic Uncertainties, moneys in which are continuously appropriated, without regard to fiscal years, for allocation by the Director of Finance to state

NOTE: Superior numbers appear as a separate section at the end of the digests.

agencies for disaster response operation costs incurred by state agencies as a result of a state emergency proclamation by the Governor. This account will become inoperative on June 30, 1993, and as of January 1, 1994, will be repealed.

This bill would extend the operation of this account until June 30, 1996, and would extend its repeal date to January 1, 1997, thereby making an appropriation.

(5) Existing law requires the Office of Noise Control to adopt, in coordination with the Office of Planning and Research and each state department and agency as it deems appropriate, guidelines for the preparation and content of noise elements.

This bill would provide that the requirement that the office adopt guidelines for the preparation and content of noise elements would be inoperative during the 1993–94 fiscal year.

(6) Existing law, the California Solid Waste Reuse and Recycling Access Act of 1991, requires local agencies, by September 1, 1993, to adopt an ordinance for collecting and loading recyclable materials in development projects.

This bill would delay that requirement until September 1, 1994.

(7) This bill would also prohibit the imposition of certain civil penalties by the Integrated Waste Management Board for a period of 2 years.

(8) Existing law continuously appropriates funds for apportionments to cities and counties of a portion of the revenues derived from a per gallon tax on motor vehicle fuels in accordance with prescribed formulas. A city's or county's entitlement to the apportioned funds from the tax imposed at a rate of more than 9¢ per gallon is conditional upon its expenditure from its general fund for street and highway purposes of an amount not less than the annual average of its expenditures during the 1987–88, 1988–89, and 1989–90 fiscal years. Under existing law, this condition is not applicable for the 1992–93, 1993–94, and 1994–95 fiscal years.

This bill would make the condition also not applicable for the 1995–96 and 1996–97 fiscal years. Thus, this bill would make funds available to cities and counties that would not be eligible otherwise, thereby making an appropriation.

(9) Under existing law, at least once each 3 years, the records and accounts of the tax collector are required to be audited, as specified.

This bill would suspend this requirement from July 1, 1993, until July 1, 1994.

(10) Under the existing Vehicle License Fee Law delinquent vehicle license fees and related penalties are collected by the Department of Motor Vehicles by the seizure and sale of the vehicle to which the delinquent fees and penalties relate or by appropriate civil action.

This bill would transfer this collection duty from the department to the Franchise Tax Board on July 1, 1993.

(11) Existing law requires the county auditor to audit the books and accounts kept by the probation officer or other designated county officer with respect to juvenile court law, and to make a report to the judge of the court and to the board of supervisors of the county, as specified.

This bill would suspend this requirement from July 1, 1993, until July 1, 1994.

(12) Existing law requires specified employers who apply for a business license or for a renewal of a business license to complete and sign a declaration verifying workers' compensation coverage for their employees.

This bill would eliminate that requirement.

(13) This bill would also provide that if any of its provisions are invalid, that invalidity shall not affect other provisions or applications of the bill.

(14) This bill, in addition, would declare that it is to take effect immediately as an urgency statute.

Ch. 61 (AB 2031) Committee on Ways and Means. Public retirement systems.

(1) The existing Public Employees' Retirement Law provides for specified state employees an alternative noncontributory retirement plan designated the Second Tier.

This bill would authorize contracting agencies to provide an alternative Second Tier contributory retirement plan for local miscellaneous members who are covered by the federal Social Security Act if it is agreed to in a written memorandum of understanding entered into by an employer and representatives of employees.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) The existing County Employees Retirement Law of 1937 authorizes boards of supervisors to elect to be subject to various alternative retirement formulas.

This bill would authorize boards of supervisors to elect to be subject to a specified service retirement formula for employees who are covered by the federal Social Security Act if it is agreed to in a written memorandum of understanding entered into by an employer and representatives of employees.

Ch. 62 (AB 760) Statham. Personal income taxes: renter's credits.

The existing Personal Income Tax Law provides that qualified renters, as defined, shall be allowed a tax credit against the taxes imposed by that law.

This bill would suspend this renter's credit until January 1, 1995.

This bill would become operative only if SCA 9 is approved by both houses of the Legislature, as specified.

This bill would take effect immediately as a tax levy.

Ch. 63 (SB 271) Committee on Budget and Fiscal Review. Governmental operations.

(1) Existing law authorizes the Department of Finance, with the concurrence of the Controller, to establish additional funds as are necessary to properly manage and account for the financial activities and resources of the state, provided that certain requirements are met.

This bill would permit the department to abolish funds established under the above authority, and would permit the department, with the concurrence of the Controller, to abolish funds established by statute that have been inactive for a period of 4 years upon notification in writing to the Joint Legislative Budget Committee, and would provide that abolition shall become effective no earlier than 30 days after the date of this notification. It would also authorize the department, with the concurrence of the Controller, to reestablish these funds if these funds subsequently are found to be needed.

(2) Existing law requires that the accounting system established by the Department of Finance for the handling of public money shall provide, with respect to the General Fund and other governmental funds, for the accrual of expenditures as of the end of each fiscal year on the basis of payables incurred, including accrued interest on bonded indebtedness.

This bill would, instead, exclude accrued interest on general obligation bonded indebtedness from the accrual of expenditures as of the end of each fiscal year on the basis of payables incurred.

(3) This bill would establish the Deficit Retirement Fund in the State Treasury for the purpose of setting aside state moneys for the payment and redemption of registered reimbursement warrants issued in accordance with certain provisions, to fund in part the General Fund deficit accumulated prior to July 1, 1993, as specified. These provisions would be repealed as of July 1, 1995.

(4) These bills would make certain technical, nonsubstantive changes to existing law.

(5) This bill would also provide that if any of its provisions are invalid, that invalidity shall not affect other provisions or applications of the bill.

Ch. 64 (SB 627) Committee on Budget and Fiscal Review. Human services.

Existing law requires a county health officer to prepare a list of family planning and birth control clinics located in the county for distribution by the county clerk. Existing law requires the county health officer to furnish to all hospitals within the county and to all physicians and surgeons upon request copies of these lists.

This bill would provide that these requirements shall be inoperative from July 1, 1993, to June 30, 1994.

Existing law requires the State Department of Health Services to adopt regulations it deems necessary for the public health that apply to all pet birds whenever the Director of Health Services finds that psittacosis, or any other diseases transmissible to man from pet birds, have become a public health hazard to the extent that control measures are necessary or desirable.

This bill would provide that these provisions would not be operative during the

NOTE: Superior numbers appear as a separate section at the end of the digests.

1993–94 fiscal year.

Existing law establishes various health programs that are implemented by the counties under the supervision of the State Department of Health Services.

This bill would, except where prohibited by federal law, permit a county to eliminate or consolidate any health advisory boards that are required by state law or regulation, or in any existing contract with the department.

Existing law requires the medical director of a local Emergency Medical Services (EMS) agency to issue a certificate to or recertify an individual as an Emergency Medical Technician (EMT) I, II, or P, upon proof that the individual has met several requirements. Existing law authorizes a local EMS agency to establish a fee schedule for this certification.

This bill would delete the requirement that the medical director issue or recertify an individual as an EMT-P. This bill would prohibit a local EMS agency from collecting fees for the certification or recertification of an EMT-P.

Existing law requires an emergency medical care committee to be established in each county.

This bill would, instead, permit this committee to be established in each county.

Existing law requires each county to establish either a county advisory board on alcohol problems and an advisory board on drug programs or a drug and alcohol advisory board.

This bill would, instead, permit a county to establish these boards, and would repeal various related provisions.

Existing law provides that except in counties meeting specified conditions, the board of supervisors is authorized, and upon the petition of 100 electors of the county is required, to establish a county board of public welfare by the appointment of seven persons, not more than four of whom shall be of the same sex.

This bill would eliminate the requirement that a county board of public welfare be established upon the petition of 100 electors, as well as the requirement for the composition of the board.

Existing law requires local health departments, as defined, to provide services in occupational health to promote the health of employed persons, including educational, consultative, statistical, investigative, and other activities appropriate thereto.

This bill would instead, authorize, between July 1, 1993 and June 30, 1994, local health departments to provide these services to the extent permitted by federal law. This bill would on and after July 1, 1994, require the local health department to provide these services as required in existing law.

Existing law requires counties to compile and maintain a list of private and public agencies which provide charitable and social services in the county.

This bill would repeal that requirement.

Existing law provides for the recovery of public assistance grant overpayments.

This bill would, until January 1, 1997, require the State Department of Social Services to implement a program in any participating county, where the county is reimbursed for overpayment recoveries using a reimbursement calculation method that is based on the county's grant payment error rate.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which qualified aged, blind and disabled persons receive services to enable them to remain in their own homes and avoid institutionalization. The program is funded by a combination of federal, state, and local funds.

Existing law requires each county to submit an annual plan to the State Department of Social Services concerning the manner in which the county will expend its IHSS allocation.

This bill would eliminate the requirement for submission of an annual plan by each county.

Existing law requires each county to relieve and support all incompetent, poor, indigent persons, and those incapacitated by age, disease, or accident lawfully resident therein, when these persons are not supported and relieved by their relatives and friends, by their own means, or by state hospitals or other state or private institutions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

These programs are commonly referred to as county general assistance programs.

This bill would permit a county, in determining the eligibility for specified aliens who are general assistance applicants or recipients, to deem specified amounts of income and resources of a sponsor, or the sponsor's spouse, to the entry of an alien into the United States as available to the alien.

Existing law authorizes the State Department of Health Services to authorize the payment of state funds to defray the cost of projects under which city and county health agencies provide a program of scheduled visits by public health nurses to senior citizens by providing referral, counseling, and other support services to senior clients.

Existing law requires the department to develop and establish guidelines for submission and approval of the city and county project plans.

This bill would repeal that requirement.

Existing law provides for various audits and inspections of grants or subventions related to various health care programs.

This bill would require agencies responsible for conducting fiscal or program audits or inspections of grants or subventions pursuant to prescribed provisions of law, to the extent practicable and consistent with federal law, to endeavor to cooperate and consolidate efforts so as to conduct a single fiscal or compliance audit for any affected program.

Existing law contained in the California Health Care for the Indigent Program (CHIP) provides for the allocation of money from the Cigarette and Tobacco Products Surtax Fund to the counties to provide health care benefits.

Existing law requires, as a condition of county participation in the CHIP, a specified county financial maintenance of effort.

This bill would permit the reduction of the county maintenance of effort requirements.

Existing law requires, as a condition of deposit of funds from the Sales Tax Account of the Local Revenue Fund into a county's or city's local health or welfare trust fund account, a county or city to deposit specified revenues into the health account each month.

This bill would permit reduction for the 1993–94 and 1994–95 fiscal years to the level necessary to meet the minimum federal maintenance of effort requirements, except that this reduction would not be permitted to exceed $15,000,000 per fiscal year on a statewide basis.

This bill would specify the operative date of certain of its provisions.

This bill would provide that if any of its provisions are invalid, that invalidity shall not affect other provisions or applications of the bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 65 (SB 683) Committee on Budget and Fiscal Review. Property tax.

Existing law requires the state to make payment of subventions to local government at specified rates per acre to replace property tax revenues lost by reason of the required reduction in assessments of property restricted to use as open space.

This bill would revise the rates of these subventions to local government. This bill would also appropriate $20,902,290 from the General Fund for purposes of making the increased subventions, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 66 (SB 399) Hart. School funding.

(1) Existing law authorizes a county board of education to enroll in community schools pupils who have been expelled from a school while attending either continuing classes, opportunity classes, or alternative classes.

This bill would specify that community school apportionments may only be claimed for pupils enrolled in grades 7 to 12, inclusive.

(2) Existing law prescribes the revenue limits for each school district and county superintendent of schools in the state and requires the Controller to transfer specified sums from the General Fund to Section A of the State School Fund for apportionment to school districts and county superintendents of schools according to specified formulas. An existing provision in the Budget Act of 1992 provides that the appropriation for local

NOTE: Superior numbers appear as a separate section at the end of the digests.

school assistance in Item 6110-101-001 of that act is in lieu of the amount that would otherwise be appropriated for school apportionment pursuant to certain statutory formulas.

This bill would provide that the revenue limit for each school district for the 1993–94 fiscal year, as otherwise prescribed by statute, would be reduced by an 8.14% deficit factor, and that the revenue limit for each county superintendent of schools would be reduced by a 9.77% deficit factor. The bill would also specify information that the Superintendent of Public Instruction would be required to utilize in determining the amounts to be certified for purposes of apportionments and revenue limits.

This bill would also provide that the revenue limit for each school district for the 1994–95 fiscal year, as otherwise prescribed by statute, would be reduced by a deficit factor calculated, according to a specified formula, and the revenue limit for each year thereafter would be determined as if the revenue limit for the 1994–95 fiscal year had not been so reduced. The bill would also require the county superintendents of schools to increase or decrease the total revenue limits for school districts and county offices of education computed pursuant to the otherwise applicable statutes by the amount of specified employer contributions under the Public Employees' Retirement System, as specified.

(3) Existing law defines "increases in enrollment" for purposes of the constitutional provisions relating to allocations and apportionments of minimum funding requirements to school districts and community college districts.

This bill would include within the elements of that definition an adjustment for any average daily attendance audit findings.

(4) Existing law requires the governing board of any school district to grant without charge the use of any school facilities or grounds under its control, when an alternative location is not available, to nonprofit organizations, and clubs or associations organized to promote youth and school activities, as specified. The governing board is authorized to charge an amount not to exceed its direct costs for other uses of those school facilities or school grounds.

This bill would instead require the governing board of any school district to authorize that use by those entities and would authorize the governing board to charge an amount not to exceed its direct costs for that use of its school facilities.

(5) Existing law directs that the amount of state funding appropriated in each fiscal year, to comply with the minimum state school funding obligation set forth in Section 8 of Article XVI of the California Constitution, be distributed to school districts, as defined, to community college districts, and to state-operated schools in proportion to the enrollment in each of those segments of public education, as specified.

This bill would specify that this provision does not apply to the 1993–94 fiscal year.

(6) Existing law, as set forth in Section 8 of Article XVI of the California Constitution, requires the state to apply a minimum amount of funding for each fiscal year for the support of school districts, as defined, and community college districts. The amount of that minimum state school funding obligation for any fiscal year is determined, as specified, as the greater of a computation based upon the percentage of state funding allocated for that support for the 1986–87 fiscal year and a computation required to ensure that the total allocations to school districts and community college districts from state and local proceeds of taxes equal the amount of those allocations for the preceding fiscal year, as adjusted, taking into account a shift of property tax revenues enacted during the 1991–92 Regular Session.

This bill would set forth a revision in the calculation of that obligation, by requiring that the state funding allocated for that support for the 1986–87 fiscal year be calculated as if statutes enacted during the 1993–94 Regular Session that amend existing law to shift local property tax revenues from designated local agencies to school districts and community college districts had been in effect in the 1986–87 fiscal year.

(7) Existing statutory law requires that a supplemental appropriation be made for the support of school districts and community college districts if the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution is determined under a specified test.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would set forth a revision in the calculation of that statutory supplemental appropriation for the 1993–94 fiscal year by including in a specified definition certain appropriations that would have been made if a shift in property tax revenues during the 1993–94 Regular Session had not been enacted.

(8) Under existing law, within 9 months following the end of a fiscal year, the Superintendent of Public Instruction and the Director of Finance are required to recalculate, as necessary, and jointly certify all actual data relating to school districts for the prior fiscal year for purposes of the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution. Existing law specifies the procedure for resulting deficiency apportionments and provides that appropriations for deficiencies are deemed to be appropriations in the fiscal year in which the deficiencies occurred.

This bill would additionally provide that for purposes of the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution, prior year adjustments would be deemed to be appropriations in the fiscal year in which the prior year adjustments occurred.

(9) Under existing law, the Superintendent of Public Instruction is required to certify to the Controller certain amounts estimated to be apportioned to each school district during the current fiscal year, as specified.

This bill would provide that 10 working days prior to dates prescribed for certification of apportionments, the superintendent shall notify the Joint Legislative Budget Committee and the Department of Finance of the average daily attendance numbers and the local property tax revenues to be utilized in the respective certification.

(10) Under existing law, the amount of state school funding apportioned to each school district for each fiscal year is calculated, in part, according to the base revenue limit of that district, as adjusted, and the second principal apportionment regular average daily attendance for the district, except with regard to state funding for small school districts, as specified.

Average daily attendance in the regular public elementary and secondary schools, including continuation schools, is determined for this purpose by dividing the total number of days of attendance allowed in all full school months in each apportionment period by the number of days the schools are actually taught in all full school months in each period, as specified.

This bill would revise the method of calculating apportionments for certain school districts reorganized as of July 1, 1992, and the method of calculating average daily attendance for continuation schools and classes and pupils in Juvenile Court Schools.

This bill also would authorize the Superintendent of Public Instruction to deduct any funds that were required to be repaid to the federal government by the State Department of Education for federal audit exceptions for a school district or other agency, from the apportionment made to that district or agency, as specified.

(11) Existing law authorizes the Controller to reimburse school districts for costs, adjusted for inflation and increased for total average daily attendance, incurred in the operation of voluntary and court-ordered desegregation programs, or other costs mandated by the courts or by the federal government. The Controller's payment of those claims is based upon claims submitted by the districts on the basis of estimated costs, and on the basis of actual costs, as specified.

This bill would require the Controller to establish standards and procedures for the audit of claims based upon actual costs incurred by school districts, and would require the districts to subject their actual cost claims to audit in accordance with the standards and procedures as a prerequisite to reimbursement.

(12) Under existing law, the attendance of any pupil is not counted as a day of attendance, for purposes of a school district's eligibility on that basis for state funding, unless the pupil is in attendance for the minimum schoolday, as specified.

This bill would direct, for that purpose, that a pupil's attendance is counted as a day of attendance if he or she is present for any portion of that schoolday, except as specified. This bill would repeal this provision on July 1, 1996. This bill would authorize a school district or county office of education to claim the absence of a pupil for apportionment

NOTE: Superior numbers appear as a separate section at the end of the digests.

credit only if the reason for the absence is recorded within a specified amount of time.

(13) Existing law prescribes the method by which average daily attendance (ADA) is computed for purposes of determining a school district's revenue limit.

The bill would require the State Department of Education to restrict the apportionment of funds for community school and independent study ADA, as specified, and would prohibit school districts and county offices of education from receiving apportionments for pupils in independent study absent written permission, as specified, from the pupil's parent or guardian prior to the commencement of independent study.

(14) Existing law requires the governing board of each school district to take appropriate steps to ensure that a pupil's progress towards proficiency in basic skills is assessed in the English language during the regular instructional program in certain grades at certain times. Existing law also requires the principal to arrange a conference among the parent or guardian of any pupil who does not demonstrate sufficient progress toward mastery of basic skills upon exit from specified grades, and a specified certificated employee to discuss the results of the assessment and recommended actions to further the pupil's progress. The governing board is also required to provide the parent or guardian of that pupil with certain notices regarding that conference.

This bill would instead make those provisions relating to the conference and the notices discretionary on the part of the governing board.

(15) Existing law requires the Superintendent of Public Instruction to coordinate the development of model curriculum standards for the courses required for graduation from high school and for a vocational education course of study, as specified. The governing board of each school district is required, not less than every 3 years, to compare local curriculum, course content, and course sequence with those model curriculum standards.

This bill would eliminate the requirement that governing boards of school districts make that comparison.

(16) Existing law authorizes the governing board of a school district or a county office of education to offer independent study to meet the educational needs of pupils in accordance with specified requirements. Under existing law, a school district or county office of education is not eligible to receive apportionments for independent study unless it has adopted written policies regarding independent study, as specified, pursuant to rules and regulations adopted by the Superintendent of Public Instruction, as specified, and the pupil is identified in the written records of the district or county board by grade level, program placement, and the school of enrollment.

This bill would provide that no local education agency may claim state funding for the independent study of a pupil, whether characterized as home study or otherwise, if the agency has provided any funds or other thing of value to the pupil or his or her parent or guardian that the agency does not provide to pupils who attend regular classes or to their parents or guardians. The bill would provide that community school and independent study average daily attendance shall only be claimed by school districts and county superintendents of schools for pupils who are residents of the county in which the apportionment claim is reported, or who are residents of a county immediately adjacent to the county in which the apportionment claim is reported. The bill would also prohibit the Superintendent of Public Instruction from apportioning funds for the average daily attendance, through full-time independent study, of pupils enrolled in elementary school in a district outside their home district, due to the place of their parents' employment.

(17) Existing law, until January 1, 1995, provides that the governing board of each community college district shall charge certain students a $10 per unit per semester fee.

This bill would extend the operation of this fee until July 1, 1995, and increase the fee to $15 per unit per semester up to a maximum of $150 per student per semester.

(18) Existing law authorizes the Trustees of the California State University to increase fees for the 1992–93 academic year by an amount not to exceed 40% of the fee fixed for the 1991–92 academic year. Existing law requires the fee for the 1993–94 and 1994–95 academic years to be the same as the fee for the 1992–93 academic year.

This bill would delete the requirement that the fee for the 1993–94 and 1994–95

NOTE: Superior numbers appear as a separate section at the end of the digests.

academic years be the same as the fee for the 1992–93 academic year.

Existing law prohibits the amount of the fee increase for the 1992–93 academic year from being included in the base fee for the 1995–96 academic year.

The bill, instead, would require that the fee increase for the 1992–93 academic year be included in the base fee for the 1993–94 academic year, and each academic year thereafter.

(19) Existing law provides for a calculation, by the Chancellor of the California Community Colleges, of a state apportionment for community college districts.

This bill would revise that calculation taking into account certain tax revenues and fees available to the districts.

(19.5) Existing law requires the county auditor to, among other things, make certain adjustments to each proportionate share of property tax administrative costs with respect to a school entity and to reduce the property tax allocation to the school entity to reflect those adjustments. This bill would eliminate that duty of the county auditor and would make those revisions applicable to the entire 1993–94 fiscal year, regardless of the operative date of the bill.

(20) Existing law declares that the sum of $10,424,489,000, as appropriated in the Budget Act of 1991, for transfer to the State School Fund for the apportionment to school districts for the 1991–92 fiscal year be reduced by the amount of $1,083,000,000. Existing law also appropriates $1,083,000,000 from the General Fund for transfer to the State School Fund for apportionment to school districts as an emergency loan to be distributed to school districts for the 1991–92 fiscal year, as specified. Existing law further appropriates $1,083,000,000 from the General Fund for transfer to the State School Fund for apportionment to school districts for the 1992–93 fiscal year, as specified, but reduces the amount of that appropriation by the amount of $1,083,000,000 to discharge the emergency loan made to school districts for the 1991–92 fiscal year.

This bill would declare that $1,083,000,000 of the sum of $10,424,289,000, as appropriated in the Budget Act of 1991 for transfer to the State School Fund for the apportionment to school districts for the 1991–92 fiscal year, shall be deemed to be and is reclassified as an appropriation for the purposes of an emergency loan. The bill would require that emergency loan to be distributed to school districts for the 1991–92 fiscal year, as specified. The bill would also make conforming changes to the provision relating to discharge of the emergency loan and to other related provisions of law.

This bill would declare that if for any reason the reclassification of that sum as an emergency loan is not implemented, in whole or in part, then there shall be no emergency loan for distribution to school districts and no appropriation for repayment of the emergency loan.

This bill would declare that the provisions relating to the emergency loan are declaratory of existing law.

(21) Existing law requires that, in each of 2 subsequent fiscal years, as specified, the amounts otherwise appropriated in the Budget Act for that fiscal year for apportionment to school districts and county offices of education be reduced by the amount of $366,000,000, to discharge an emergency loan made for the 1992–93 fiscal year to school districts in the amount of $732,000,000. The appropriations to school districts and county offices of education for those fiscal years may be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

Existing law also requires that, in each of the 1993–94 and 1994–95 fiscal years, the amounts otherwise appropriated in the Budget Act for that fiscal year for apportionment to community college districts be reduced by the amount of $120,500,000, to discharge the emergency loan made for the 1992–93 fiscal year community college districts in the amount of $241,000,000. The appropriations to community college districts for those fiscal years may be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

This bill would repeal those provisions, but would enact other provisions relating to the repayment of the above-referenced loans (see (31)).

NOTE: Superior numbers appear as a separate section at the end of the digests.

(22) This bill would appropriate $118,000 to the Superintendent of Public Instruction for a specified apportionment to the Sacramento County Office of Education.

The bill also would appropriate $1,750,000 to the Superintendent of Public Instruction for apportionment to county offices of education for purposes relating to funding new programs or higher levels of service and county office fiscal and management assistance.

(23) This bill would appropriate $608,691,000 for transfer to Section A of the State School Fund for apportionment to school districts as an emergency loan for the 1993–94 fiscal year, and $178,000,000 for transfer to Section B of the State School Fund for apportionment to community college districts as an emergency loan for the 1993–94 fiscal year. The bill would specify that these appropriations may not be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(24) This bill would declare that the funds appropriated for specified categorical programs in the Budget Act of 1993 are in lieu of the amount that would otherwise be required to be appropriated pursuant to any other provision of law.

(25) Under existing law, the attendance of pupils who are engaged in required educational activities under specified supervision, is required to be included in the average daily attendance calculation of a school district or county office of education.

This bill would require, notwithstanding that provision, the attendance of pupils engaged in required educational activities in a specified program in El Dorado County to be included in the El Dorado County Office of Education's average daily attendance calculation for the 1989–90, 1990–91, and 1991–92 fiscal years.

(26) Existing law provides for reimbursement to school districts for the costs of desegregation programs, as specified.

This bill would define "the first full year of operations" for those purposes for the Oakland Unified School District.

(27) Under the Budget Act of 1990, specified funds were appropriated for child development programs.

This bill would transfer $25,423,000 of the funds appropriated in that act for specified child development to the unappropriated balance of the General Fund.

(28) Under the Budget Act of 1992, specified funds were appropriated as apportionments to local school districts for local assistance purposes.

This bill would appropriate $190,221,000 from the General Fund for transfer to the State School Fund as an emergency loan for the 1992-93 fiscal year, to be distributed in the same manner as those funds in the Budget Act of 1992. The bill would declare that the appropriation would not be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution. The bill would provide that an amount equal to that appropriation shall revert to the General Fund from funds appropriated in the Budget Act of 1992.

This bill would appropriate the amount of $190,221,000 for transfer to the State School Fund for apportionment to school districts for the 1993–94 fiscal year, but would reduce the amount of that appropriation by the amount of $190,221,000 to discharge the emergency loan made to school districts for the 1993–94 fiscal year. The bill would specify that this appropriation to school districts may be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution for the 1993–94 fiscal year.

(29) This bill would transfer $24,727,000 of funds appropriated in the Budget Act of 1992 for local school apportionment to the unappropriated balance of the General Fund. The bill would additionally reapply certain funds appropriated in that act to the state school funding obligation under Section 8 of Article XVI of the California Constitution for certain fiscal years other than for the 1992–93 fiscal year.

This bill would state that, subsequent to the reversion, of $24,727,000 appropriated pursuant to the Budget Act of 1992 to the General Fund, in the event there is a deficiency in the appropriations made in specified items of the Budget Act of 1992, the Superintendent of Public Instruction may transfer funds between those specified items.

(30) Existing law requires that each county superintendent of schools and each school

NOTE: Superior numbers appear as a separate section at the end of the digests.

district that maintains schools or classes for prisoners be allowed an amount equal to the actual current expenses of the program, but not to exceed 80% of the statewide average adult revenue limit.

This bill would provide that, for the 1993-94 fiscal year, that amount not exceed the statewide revenue limit at which those schools or classes were funded in the 1992-93 fiscal year, as specified.

(31) Existing law appropriates the amount of $732,000,000 for transfer to the State School Fund for apportionment to school districts as an emergency loan for the 1992–93 fiscal year, specifying that this appropriation may not be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

Existing law also appropriates the amount of $241,000,000 for transfer to the State School Fund, to be apportioned to community college districts for the 1992–93 fiscal year as an emergency loan, and specifies that this appropriation may not be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

This bill would require the appropriations made pursuant to that existing law and the appropriations described in (23) to be considered as one loan to be repaid from amounts appropriated for the purpose of meeting the minimum funding requirements for school districts and community colleges imposed by Section 8 of Article XVI of the California Constitution. The bill would also require that in certain years one or more of the appropriations made in the Budget Act for those fiscal years for apportionment to school districts, county offices of education, and community college districts be reduced, as specified in that Budget Act, according to a specified formula, in discharge of that consolidated loan. The bill would also require the Department of Finance to make certain calculations for that purpose.

(32) This bill would declare the intent of the Legislature that until either the loan payment described in (31) is made or until a certain amount is spent per pupil, as specified, that the aggregate sum of funds appropriated for the purposes of Section 8 of Article XVI of the California Constitution for education programs for kindergarten and grades 1 to 12, inclusive, (hereafter K-12) less any amounts appropriated for revenue limits for school districts and county offices of education and special education programs and services, not exceed the total amount appropriated for those K-12 programs provided pursuant to Section 8 of Article XVI of the California Constitution.

(33) Existing law requires the Controller, during each fiscal year, to transfer from the General Fund to Section A of the State School Fund for apportionment during the fiscal year a total amount, among other amounts, based upon per pupil in average daily attendance during the preceding fiscal year, as certified by the Superintendent of Public Instruction. Existing law requires those amounts to be expended according to a specified formula.

This bill would require, for the 1993-94 and 1994-95 fiscal years, the Superintendent of Public Instruction to certify to the Controller for those purposes amounts that do not exceed the amounts needed to fund school district revenue limits and county office of education revenue limits, as specified.

(34) This bill would require that any judicial action or proceeding to challenge, review, set aside, void, or annul the provisions of specified sections of this act be filed within 45 days of the effective date of the bill.

(35) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(36) Under existing law, as set forth in Section 8 of Article XVI of the California

NOTE: Superior numbers appear as a separate section at the end of the digests.

Constitution, the state school funding obligation established under that constitutional provision may be suspended for one year pursuant to an urgency statute, except for a portion of one of the funding formulas utilized for that purpose which may be suspended only by a provision included in the Budget Act.

Pursuant to the authority described above, this bill would suspend, for the 1993–94 fiscal year, the portion of the state school funding obligation established in Section 8 of Article XVI of the California Constitution that may be suspended by urgency statute, in the event that any appellate court of this state determines that any of specified provisions in the bill are unconstitutional, unenforceable, or otherwise invalid. The bill would declare that the amount of General Fund revenues appropriated for the support of school districts and community college districts that would otherwise be considered to be appropriated for the purposes of that section of the constitution would be limited for the 1993–94 fiscal year as specified.

(37) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 67 (SB 1012) Maddy. California State University: California Community Colleges: student fees.

(1) Existing law, which is to be repealed on January 1, 1995, requires the governing board of each community college district to charge each student, except as otherwise specified, a fee of $10 per unit per semester.

This bill would extend the operation of this fee until July 1, 1995, and increase the fee to $13 per unit per semester.

(2) Existing law requires that mandatory systemwide student fees at the California State University, the University of California, and the Hastings College of the Law be fixed at least 10 months prior to the fall term in which the fees become effective.

This bill would specify that this requirement does not apply to the imposition of student fees by the Trustees of the California State University for the 1993–94 academic year.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 68 (SB 1135) Committee on Budget and Fiscal Review. Local government finance.

Existing law requires a redevelopment agency, for the 1992–93 fiscal year, to allocate an amount of revenues determined in accordance with a formula to a fund established by a specified statute for allocation to school and community college districts.

This bill would require a redevelopment agency to make a similar allocation of revenues for the 1993–94 and 1994–95 fiscal years.

Existing property tax law requires the county auditor, in each fiscal year, to allocate property tax revenues to local agencies pursuant to specified formulas and procedures, and generally provides that each agency shall be allocated an amount equal to the total of the amount of its allocation in the prior fiscal year and a certain portion of the annual tax increment. Existing property tax law also requires, for the 1992–93 fiscal year, certain reductions in the amounts of property tax revenue allocated to the county, cities, and special districts for the purpose of transferring the amount of those reductions to the Educational Revenue Augmentation Fund for allocation to school districts, county offices of education, and community college districts.

This bill would require, for the 1993–94 fiscal year, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts similarly be reduced and transferred in amounts determined by formulas. This bill would also require for purposes of property tax revenue allocations for the 1993–94 fiscal year that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county and each city be reduced by specified per capita amounts for purposes of transferring the amounts of the reductions to the Educational Revenue Augmentation Fund. By imposing additional duties on local tax officials in connection with the allocation of property tax revenues, this bill would impose a state-mandated local program.

Existing property tax law generally establishes a Special District Augmentation Fund in each county, to consist of revenues contributed from special districts within the county, for purposes of augmenting the amount of property tax revenue allocated to each of those districts each fiscal year. Existing property tax law with respect to certain individual counties also provides for separate augmentation procedures and requirements specific to each of those counties.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would eliminate these general and specific revenue augmentation provisions

Existing law provides for the allocation of the amount of vehicle license fee revenues in excess of refunds and certain deductions and reserve amounts to the cities and counties in accordance with certain formulas and procedures.

This bill would additionally require, for the 1993–94 fiscal year only, that additional revenues be allocated to the cities and counties in amounts determined in accordance with the property tax revenue allocation reduction incurred by the cities and counties pursuant to other provisions of this bill. By revising an allocation of vehicle license fee revenues which are continuously appropriated, this bill would make an appropriation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 69 (SB 35) Committee on Budget and Fiscal Review. Human services.

Existing law requires, until June 30, 1993, the State Department of Social Services to develop guidelines and procedures to permit licensed child day care centers to create a special toddler program component, and to provide for the assistance of specially trained aides in the program.

This bill would extend these provisions to January 1, 1994.

Existing law provides that the state's share of cost of the child welfare program shall be 70% of the actual nonfederal expenditures for the program or the amount appropriated by the Legislature for that purpose, whichever is less. Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program. Existing law provides for the allocation of federal block grant funds for child welfare services and in-home supportive services.

This bill would revise the allocation of those funds, and would specify that federal block grant funds appropriated by the Legislature shall be considered a part of the state share of cost of providing those services, and not part of the federal expenditures for those programs.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. Each county is required to make eligibility determinations for the Medi-Cal program.

This bill would revise eligibility standards for Medi-Cal benefits for pregnant women and infants, would revise the availability of certain benefits under the Medi-Cal program, would revise procedures for entering into contracts with various providers of Medi-Cal benefits, and would revise the method of calculating the payment of disproportionate share providers of Medi-Cal benefits.

Existing law permits the State Department of Health Services to file a claim against the estate of recipients of Medi-Cal benefits in certain circumstances.

This bill would revise the circumstances under which the department would be required to seek reimbursement for these benefits.

This bill would limit the availability of certain benefits through the Medi-Cal program.

Existing law authorizes counties that meet certain population limitations to enter into a contract with the State Department of Health Services under which the department agrees to administer the program responsibilities for specified health services to county residents certified eligible for those services by the county, and specifies the financial risk of each participating county.

This bill would revise that risk factor for the 1993–94 fiscal year.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides for the Aid to Families with Dependent Children (AFDC) program, pursuant to which assistance, including cash grants and noncash benefits, is provided to eligible low-income individuals. The AFDC program is administered by county welfare departments under the supervision of the State Department of Social Services, and is funded in part by the federal government.

Existing law requires each county to administer, under the supervision of the State Department of Social Services, the distribution of food stamps under the Food Stamp Program, in accordance with state and federal law.

This bill would require the Director of Social Services to implement a comprehensive program for the simplification of administration of the AFDC, Medi-Cal, and Food Stamp programs. It would also authorize the department to conduct up to 5 demonstrations of alternatives to specified procedures in the administration of the AFDC and Food Stamp programs for recipients of AFDC assistance.

Under existing law, the state pays a portion of the nonfederal share of the county costs for administration of the AFDC and Food Stamp programs.

This bill would, subject to existing cost control plan requirements, permit the state to pay 100% of the nonfederal share of county AFDC and Food Stamp program administrative costs, when cost-effective, as determined by the state, of followup activities in the income eligibility and verification system for recipients.

Existing law authorizes the establishment, within the Food Stamp Program, of the Food Stamp Cash Out Demonstration Project in San Diego County, pursuant to a federal waiver to be obtained by the State Department of Social Services of not more than 5 years' duration.

This bill would permit the expansion of the program into other counties, and would permit the program to be operated through June 30, 1997.

Existing law authorizes, until January 1, 1995, the Director of Social Services to establish the Consolidated Public Assistance Eligibility Determination Project in not more than 5 counties, for the purpose of developing alternative methods of determining eligibility for AFDC and federal Food Stamp Program assistance.

This bill would, instead, require the permanent establishment of the program statewide and require the program to contain specified elements.

Existing law permits deductions from income for purposes of determining income available in computing the amount of a parent's child support obligation when a hardship, as defined, exists.

The bill would provide that a hardship would not exist, and no deduction from income would be granted, if AFDC payments are being made on behalf of a child or children of the parent seeking the hardship deduction, even if the other parent is receiving the AFDC payments.

Under existing law, the maximum aid payment levels under the AFDC program are reduced by 5.8% below the maximum aid payment levels in effect on June 30, 1992, with this provision to remain operative until July 1, 1996.

Under the State Supplementary Program (SSP) for the aged, blind, and disabled, payments are made to eligible individuals and married couples in specified amounts. Existing law requires, with specified exceptions, commencing November 1, 1992, the reduction of the maximum payment level for this program in effect on June 30, 1992, by 5.8%.

This bill would require that the maximum aid payment levels for these programs in effect on June 30, 1993, be reduced by 2.7% beginning the first of the month following 60 days after the enactment of the bill, and that on July 1, 1996, these maximum aid payment levels be increased by the dollar amount of the decrease in these payment levels that occurred during the 1992–93 fiscal year.

Existing law requires the pass along of specified cost-of-living increases in federal benefits for the aged, blind, and disabled for certain calendar years subject to specified conditions.

This bill would require that no pass along of any cost-of-living increase in these benefits shall be made in 1994, subject to specified conditions.

Existing law requires the State Department of Social Services to seek a federal waiver to extend a $30 and ⅓ earned income disregard for applicants of AFDC assistance.

This bill would require the department to implement the waiver without regard to time limitations for income earned after August 31, 1993.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides for an exemption from income, for purposes of determining AFDC eligibility, for work-related child care expenses if a specified condition is met. In addition, child care assistance is provided to AFDC recipients participating in the GAIN program.

This bill would require the supplemental child care payments be paid to AFDC recipients, to the maximum extent consistent with federal law and subject to federal financial participation.

This bill would permit the establishment of a restricted savings account for recipients of AFDC and food stamp assistance, subject to certain conditions. It would also permit the establishment of a demonstration program increasing the value of personal property that may be retained by an AFDC recipient.

This bill would authorize qualified applicants for, or recipients of, AFDC assistance to instead receive alternative assistance in the form of child care assistance and Medi-Cal coverage in lieu of a cash grant. It would also authorize the department to conduct up to 3 demonstrations of alternatives to specified procedures in the administration of the AFDC and Food Stamp programs for recipients of alternative assistance.

Existing law provides for an employment and training services program for AFDC recipients under the Greater Avenues for Independence (GAIN) program, which is administered by each county in conformance with regulations adopted by the State Department of Social Services. Certain individuals are exempted or temporarily deferred from registration from the GAIN program.

Existing law requires that custodial parents 16 or 17 years of age, with specified exceptions, who are required to register for the GAIN program participate in the program for the purpose of obtaining a high school diploma or its equivalent, subject to certain conditions.

This bill would revise various provisions relating to the exemptions and deferments of individuals, participation requirements, eligibility for and delivery of services, and funding requirements under the GAIN program.

Existing law requires all custodial parents 16 and 17 years of age required to register for the GAIN program, to participate in that program by working toward achieving a high school diploma or its equivalent, and attending school on a full-time basis. This requirement applies to parents 18 years of age, with specified exceptions.

This bill would enact provisions relating to teenage parents, to be known as the Cal-Learn Program. The Cal-Learn Program would be applicable to custodial parents and pregnant women under 19 years of age. It would revise various provisions relating to the delivery of services under the program. It would also provide for a supplement to, or a reduction in, a participant's aid grant based on his or her performance in school. These provisions would become operative on the date that, and only if, specified federal approval is obtained, but not sooner than January 1, 1994. The existing provisions relating to teenage parents would be inoperative during the period that the Cal-Learn Program provisions are operative.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either pursuant to employment by the recipient or by or through contract by the county, qualified aged, blind, and disabled persons are provided with services to enable them to remain in their own homes.

This bill would permit any county to issue invitations for bids for, and subsequently to enter into, managed care, capitated rate contracts to serve nonseverely impaired IHSS recipients becoming eligible after the start date of contracts. A county is authorized to permit an IHSS recipient eligible prior to the start date of contracts entered into under this provision to receive services from the contractor, if the recipient elects to do so.

This bill would authorize a county that has an existing IHSS contract that is not a managed care capitation contract to negotiate a managed care capitation contract on a sole source basis with the current contractor.

Existing law requires the state and each county to pay a share of the nonfederal costs

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of the IHSS program.

This bill would entitle counties entering into IHSS-managed care contracts or expanding contracts pursuant to these provisions, and that reduce monthly IHSS case expenditures under the contract by at least a specified amount, to obtain additional funding derived from state savings, as defined.

Existing law permits a county to provide for delivery of IHSS services through the creation by ordinance of a public authority or through contract with a nonprofit consortium.

This bill would require that a public authority created under these provisions meet specified requirements.

Existing law exempts a nonprofit consortium or public authority from liability for any action of any in-home supportive services personnel whom the consortium or authority did not either list on its registry of available service providers or otherwise refer to a recipient.

This bill would also apply this provision to omissions by these personnel. It would also make counties immune from liability resulting from implementation of these consortium or authority service delivery provisions.

Existing law creates the Local Revenue Fund, that is comprised of various accounts and subaccounts. The fund is continuously appropriated without regard to fiscal year.

One of the subaccounts in this fund is the Social Services Subaccount in the Sales Tax Account.

This bill would, in addition, create the In-Home Supportive Services Registry Model Subaccount in the Sales Tax Account for the purpose of implementing the provisions for the delivery of in-home supportive services by a public authority or nonprofit consortium. It would require the Controller on September 1, 1993, to transfer specified funds into this subaccount, including a specified amount from the Social Services Subaccount. It would also require, upon request of a county board of supervisors, that specified allocations of these funds be made to certain counties for the establishment of a nonprofit consortium or public authority, thus constituting an appropriation.

Existing law provides that personal care services, as defined, when provided to a categorically needy person, as defined, is a covered Medi-Cal benefit to the extent that federal financial participation is available, subject to certain requirements.

This bill would permit, to the extent permitted by federal law, federal personal care option services funding, along with required state and local matching funds, to be used for IHSS service delivery by a public authority created by a county or a nonprofit consortium contracting with a county.

The bill would require the State Department of Health Services to establish a ratesetting method for personal care option services in accordance with specified requirements.

The bill would also require that, by September 1, 1993, the department notify specified IHSS recipients that they are eligible to participate in the personal care option services program.

Existing law requires the Department of Rehabilitation to administer the provision of vocational rehabilitation services for disabled persons.

Existing law also requires the department to provide reimbursement to various programs providing habilitation services to developmentally disabled persons, with rates for these services to be established in accordance with specified requirements.

Existing law permits persons, when specified conditions are met, to be served mutually by the department's habilitation services and vocational rehabilitation services programs.

This bill would specify that, commencing July 1, 1993, rates for specified programs serving these persons would be increased to their July 1, 1992, levels.

This bill would require the Director of Social Services to seek any federal waivers necessary to implement applicable provisions. It would specify that provisions requiring federal waivers shall remain operative only for the duration of those waivers.

Existing law continuously appropriates from the General Fund moneys to reimburse counties for a share of AFDC aid grant costs. By making changes that broaden AFDC

NOTE: Superior numbers appear as a separate section at the end of the digests.

eligibility, the bill would constitute an appropriation.

By making changes in eligibility criteria for the AFDC, GAIN, and Food Stamp programs and by imposing other requirements on counties for the administration of these programs, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

The bill would authorize the adoption of emergency regulations by the State Department of Health Services and the State Department of Social Services in order to implement the bill, subject to specified limitations.

This bill would provide that if any of its provisions are invalid, that invalidity shall not affect other provisions or applications of the bill.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 70 (SB 86) Committee on Budget and Fiscal Review. Local justice systems.

(1) Under existing law, the orders and demands of the trustees of the law library are required to be verified and audited by the auditing officer before they are paid out of the law library fund.

This bill would suspend this audit requirement from July 1, 1993, until July 1, 1994.

(2) Existing law authorizes superior court departments and municipal and superior courts to charge a fee of $100 per ½ day of services provided to parties in civil cases, in addition to any other trial court fee required, for official reporting services, as specified.

This bill would instead authorize those courts and departments to charge a fee equal to the actual costs of providing the service.

(3) Existing law provides that in San Bernardino County, to the extent that the county's Consolidated Memorandum of Understanding for county employees designates specific days annually as unpaid furlough days for superior, municipal, and justice court employees in that county, the courts shall not be in session on those days except as ordered by the presiding judge upon a finding of a judicial emergency; but requires the courts to permit documents to be filed at a drop box on those days, and requires that a judicial officer be available to conduct arraignments and to sign documents on an emergency basis on those days.

This bill would repeal this provision and enact a similar provision for unpaid furlough days applicable to all counties, eliminating the limitation on the maximum number of unpaid furlough days which may be agreed upon, and requiring drop boxes to provide for a means to identify the day on which a document is deposited in the drop box.

(4) Existing law requires that the accounts of each superior, municipal, and justice court be audited at least biennially, as specified.

This bill would suspend this requirement from July 1, 1993, until July 1, 1994.

(5) Existing law, the Brown-Presley Trial Court Funding Act, provides that the Controller shall adopt appropriate regulations for recordkeeping, accounting, and reporting by an option county with respect to block grant disbursements, as specified. These option counties are required to submit to the Controller a report of all revenues, including filing fees, fines, and forfeitures, and all expenditures relating to court operations for the prior 12-month period, as specified.

This bill would instead require the Judicial Council to provide for the transmission of summary information concerning court revenues and expenditures to the Controller for inclusion in the Controller's annual report.

(6) Under existing law, the regulations defining a correctional treatment center, as defined, that is operated by a county, city, or city and county, shall not become effective prior to, or if effective, shall be inoperative until January 1, 1994, and until that time these correctional facilities are exempt from any licensing requirements.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would extend this January 1, 1994, date until January 1, 1996.

(7) Existing law provides that if a person is arrested who appears to be under the age of 18 years, and the arrest is for a violation of the Vehicle Code, as specified, the person shall appear before the juvenile court, a juvenile court referee, or a juvenile traffic hearing officer, as specified.

The bill would provide that, except as specified, a juvenile court may exercise the option of not requiring a mandatory appearance of a juvenile before the court for infractions contained in the Vehicle Code.

(8) Existing law directs all conservators to file a general plan with the court detailing how the personal and financial needs of the conservatee will be met and to provide notice of the filing of that plan.

This bill would repeal those provisions.

(9) SCA 3 of the 1993–94 Regular Session proposes to eliminate the existing provisions of the California Constitution relating to superior, municipal, and justice courts, and to instead provide for district courts, their establishment and jurisdiction, and the qualification and election of judges thereof, operative on July 1, 1995.

This bill would set forth the findings and declarations of the Legislature that the efficiencies that would result from the enactment and adoption of SCA 3 would yield substantial cost savings to both counties and the state.

(10) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 71 (SB 240) Committee on Budget and Fiscal Review. Public retirement.

The Public Employees' Retirement Law requires the state's employer contributions from the General Fund to the Public Employees' Retirement Fund to be appropriated and transferred semiannually, 6 months in arrears, on January 1 and July 1 of each fiscal year.

This bill would, instead, require that beginning July 1, 1994, those state employer contributions be appropriated and transferred annually, 12 months in arrears.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 72 (SB 1033) Committee on Budget and Fiscal Review. General assistance.

Existing law requires each county to relieve and support its incompetent, poor, indigent persons, and those incapacitated by age, disease, or accident. These programs are commonly known as county general assistance programs.

Existing law gives discretion to counties to adopt standards of aid, but provides that the standard of aid meet certain limitations.

This bill would authorize the county board of supervisors to establish a standard of aid that is different than that established in state law if the Commission on State Mandates makes a finding that state standards would result in a significant financial distress to the county.

Existing law provides that a county is not required to provide or pay for a service reduced or eliminated from the Medi-Cal program to a person otherwise eligible to receive services under the Medi-Cal program.

This bill would, in addition, provide that a county is not required to provide or pay for a service reduced or eliminated from the Medi-Cal program to a person otherwise eligible for the county's general assistance program.

Ch. 73 (SB 509) Committee on Budget and Fiscal Review. Taxation.

(1) The existing Sales and Use Tax Law imposes a tax on the gross receipts from the sale of, and the storage, use, or other consumption of, tangible personal property in this state at a rate of 6% until July 1, 1993, and at a rate of 5½% or less thereafter, depending upon the amount in the Special Fund for Economic Uncertainties or the receipt of notification by the State Board of Equalization from the Department of Finance of a final judicial determination, as specified.

This bill would increase the state sales and use tax by a rate of ½% from July 1, 1993, until January 1, 1994, thereby extending the 6% tax rate for 6 months. The bill would exempt from that ½% rate of tax the gross receipts from certain sales and uses of tangible personal property that are subject to a fixed price pursuant to a contract entered into

NOTE: Superior numbers appear as a separate section at the end of the digests.

prior to July 1, 1993. The bill would require that all revenues, less refunds, derived from that ½% rate of tax be transferred to the Local Public Safety Fund, which is created by the bill and continuously appropriated to qualified counties, as defined, for public safety services, for allocation in each qualified county to the county and cities within the county, as provided.

This bill would make certain legislative findings and declarations with regard to interim basis revenue for counties in order to maintain public safety services.

(2) Existing law authorizes the board of supervisors of any county to impose a transactions and use tax within that county at a rate of 0.25% or 0.5% if the ordinance or resolution proposing the tax is approved by a ⅔ vote of the members of the board and the tax is approved by a majority of the county's qualified voters.

This bill would modify the above authorization to instead allow a transactions and use tax to be imposed, as otherwise described above, at a rate of 0.25% or any multiple thereof.

(3) The existing Transactions and Use Tax Law provides, with a specified exception, that the combined rate of all taxes imposed pursuant to its provisions in any county shall not exceed 1.5%, and that no tax shall be considered in accordance with its provisions if, upon that tax's adoption, the combined rate will exceed 1.5%.

This bill would provide that the maximum allowed combined rate of all taxes imposed pursuant to the Transactions and Use Tax Law in the City and County of San Francisco shall not exceed .25% in excess of the 1.5% limitation.

(4) Existing law provides that certain transactions and use tax laws shall become operative on a specified date following adoption of an ordinance or certification of election results, as specified.

This bill would provide, notwithstanding those provisions, that certain transactions and use tax laws that are enacted, as specified, and approved by the voters at the election to be held on November 2, 1993, may be imposed on or after January 1, 1994.

(5) The California Constitution, as amended by Proposition 98 on November 8, 1988, and Proposition 111 on June 5, 1990, among other things, establishes a constitutionally guaranteed minimum level of state funding for school districts and community college districts using a specified formula based on General Fund proceeds of taxes and allocated local proceeds of taxes. Existing provisions of the Constitution provide that certain portions of that guaranteed minimum level of state funding may be suspended for one year by the Legislature.

The bill would specify that funds deposited in the Interim Public Safety Account in the Local Public Safety Fund would not be considered General Fund revenues, moneys, or proceeds of taxes or local proceeds of taxes, as specified, for purposes of those minimum school funding provisions. The bill would also suspend for one year certain portions of the guaranteed minimum level of state funding to the extent they conflict with provisions of this bill.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 74 (SB 711) Committee on Budget and Fiscal Review. Income taxes: bank and corporation taxes: credits: health care.

The existing Personal Income Tax Law and Bank and Corporation Tax Law allow a tax credit against the taxes imposed by those laws in an amount equal to specified amounts for payments by an eligible employer to provide health care coverage for eligible individuals and their dependents for taxable or income years beginning on or after February 1, 1993, with respect to amounts paid or incurred on or after January 1, 1994.

This bill would repeal those credits.

This bill would take effect immediately as a tax levy.

Ch. 75 (AB 102) Committee on Ways and Means. Taxation.

(1) Existing law authorizes a city, city and county, county, redevelopment agency, and district, as defined, to impose local sales and use or transactions and use taxes in conformity with state sales and use taxes imposed under the Sales and Use Tax Law. These local entities are required to contract with the State Board of Equalization for the

NOTE: Superior numbers appear as a separate section at the end of the digests.

board's services in performing all functions incident to the administration or operation of the sales and use or transactions and use tax ordinances of the local entities. The board is required to charge each local entity, as the cost of the board's services, a specified percentage of the tax revenue available for distribution to the local entity.

This bill would, instead, require the board to charge a city, city and county, county, redevelopment agency, or district for the board's services in administering the local entity's tax ordinance, an amount, as determined by the board with the concurrence of the Department of Finance, based on the total local entity cost, as specified.

This bill would make certain legislative findings and declarations regarding recommendations made by the Auditor General with respect to administration of those local taxes by the board.

(2) The existing Sales and Use Tax Law, Personal Income Tax Law, and Bank and Corporation Tax Law also provide specified procedures and requirements for the State Board of Equalization's and the Franchise Tax Board's approval or disapproval of a recommendation for settlement of a civil tax matter, and applies those provisions to civil tax matter disputes existing on July 1, 1992, with respect to which recommendations for settlement are first submitted to the Attorney General no later than June 30, 1993, and to either the State Board of Equalization or the Franchise Tax Board, as applicable, no later than September 15, 1993.

This bill would provide that a settlement pursuant to those procedures and requirements shall apply to civil tax matter disputes existing on July 1, 1993, with respect to which recommendations for settlement are first submitted to the Attorney General no later than June 30, 1994, and to either the State Board of Equalization or the Franchise Tax Board, as applicable, no later than September 15, 1994.

This bill would appropriate $2,511,000 from the General Fund to the Department of Finance for allocation to specified agencies for the costs incurred in implementing this bill, as provided.

(3) The existing Personal Income Tax Law and Bank and Corporation Tax Law allow a credit against the taxes imposed by those laws in an amount equal to specified amounts for payments by an eligible employer to provide health care coverage for eligible individuals and their dependents for taxable or income years beginning on or after February 1, 1993, with respect to amounts paid or incurred on or after January 1, 1994.

This bill would delete those credits.

(4) This bill would declare that it would take effect immediately as an urgency statute.

Ch. 76 (SB 543) Alquist. Budget Act of 1992: augmentation: contingencies or emergencies.[3]

(1) The Budget Act of 1992 appropriated $4,500,000 in equal amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies or emergencies upon written authorization from the Director of Finance.

This bill would appropriate $679,746,000, as scheduled, in augmentation of these Budget Act appropriations.

This bill would authorize the Director of Finance to withhold authorization for the expenditure of funds appropriated in the bill until preliminary estimates of potential deficiencies are verified.

(2) This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 77 (AB 518) Woodruff. Board of Registered Nursing: Report on clinical nurse specialists.

Existing law provides for the licensure of registered nurses, and the certification of nurse-midwives, nurse practitioners, and nurse anesthetists by the Board of Registered Nursing.

This bill would require the board to conduct a study regarding clinical nurse specialists and the use of the title "clinical nurse specialist," in consultation with certain organizations and interested parties. This bill would require the board to report the results of

NOTE: Superior numbers appear as a separate section at the end of the digests.

the study to the Legislature on or before January 1, 1995.

Ch. 78 (AB 657) Murray. Compton Unified School District.

(1) Existing law provides for emergency apportionments to school districts subject to specified conditions including, in certain circumstances, the repayment of an emergency loan over a period of no more than 10 years and the appointment by the Superintendent of Public Instruction of an administrator who would exercise the powers and responsibilities of the governing board of the school district.

This bill would appropriate $10,500,000 without regard to fiscal year, for apportionment by the Superintendent of Public Instruction as an emergency loan to the Compton Unified School District. The loan would be required to be repaid over a period of no more than 8 years. The Superintendent of Public Instruction would be required to appoint an administrator immediately who would exercise the powers and responsibilities of the Personnel Commission and the governing board of the school district. Conditions regarding repayment of the loan would impose a state-mandated local program.

(2) Existing law authorizes the Los Angeles County Office of Education to provide the Compton Unified School District with services regarding management assistance, program assistance, and effective schools, as specified. The teams assigned to provide these services are required to set forth recommendations for a plan of action.

This bill would require the administrator appointed by the Superintendent of Public Instruction to report to the Legislature by January 1, 1994, on the implementation of the recommendations contained in the "Report of Priority Corrective Actions for Compton Unified School District" issued May 4, 1993, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 79 (SB 128) Beverly. Securities: interdealer quotation system.

Existing law provides that before the National Association of Securities Dealers, Inc. automated quotation system is certified by the commissioner pursuant to specified provisions of current law, the commissioner shall determine and conclude that the National Association of Securities Dealers, Inc. has adopted and obtained Securities and Exchange Commission approval of corporate governance standards, including voting rights, which are substantially similar to the corporate governance standards in effect on the date of application by the association for either the New York or the American Stock Exchange. Existing law also provides that the certification of the interdealer quotation system of the National Association of Securities Dealers, Inc., shall remain in effect only until January 1, 1994, and shall be subject to applicable decertification proceedings.

This bill would repeal this provision of law and would state legislative intent that a national securities exchange or interdealer quotation system seeking certification from the Commissioner of Corporations adopt corporate governance listing standards or criteria consistent with the standards or criteria adopted by previously certified entities and in addition to specified requirements. This bill would also state legislative intent that previously certified entities routinely review the quantitative and the qualitative listing, delisting, and maintenance standards or criteria to enhance investor protection.

Ch. 80 (SB 542) Alquist. Budget Act of 1992: augmentation: contingencies or emergencies.

(1) The Budget Act of 1992 appropriated $4,500,000 in equal amounts from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies or emergencies upon written authorization from the Director of Finance.

This bill would appropriate $14,342,000 in augmentation of the appropriation from

NOTE: Superior numbers appear as a separate section at the end of the digests.

unallocated special funds in that Budget Act.

This bill would authorize the Director of Finance to withhold authorization for the expenditure of funds appropriated in the bill until preliminary estimates of potential deficiencies are verified.

(2) This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 81 (SB 672) Greene. Property taxation.

Existing law enables a county to adopt procedures utilizing a property tax losses reserve fund to cover losses which may occur in the amount of tax liens as a result of special sales of tax-defaulted property. Under existing law, whenever the property tax reserve fund reaches 4%, or in certain cases 3%, of the total of all property taxes and assessments levied that year on the secured roll, the moneys thereafter authorized to be credited to that fund are instead transferred to the county's general fund.

This bill would, as an alternative, permit a county to elect, as specified, to maintain the property tax losses reserve fund at a level of 50% of the total delinquent secured taxes and assessments, and to credit any excess in that fund at the end of the fiscal year to the county's general fund.

Ch. 82 (SB 1102) Calderon. Industrial loan companies: loans.

Existing law prohibits an industrial loan company from making loans to, or purchasing obligations from, persons who do not reside or have a place of business in this state unless those loans or obligations comply with specified conditions, or unless those loans or obligations do not exceed 20%, in the aggregate, of a company's total assets, as specified.

This bill would make that prohibition inapplicable to loans made to, or acquired from, persons who do not reside or have a place of business in this state where the loans are for the purchase or refinance of single- or multi-family residential property, are saleable in the secondary market, and which loans are owned by an industrial loan company for 90 days or less.

Ch. 83 (SB 1251) Torres. Peace officers.

Under existing law, security officers of the Department of General Services of the City of Los Angeles designated by the general manager of the department, among others, are peace officers whose authority extends to any place in the state for the purpose of performing their primary duty or when making an arrest, as specified, as to any public offense with respect to which there is immediate danger to person or property, or of the escape of the perpetrator of that offense, or as specified, if the primary duty of the peace officer is the enforcement of the law in or about properties owned, operated, or administered by the employing agency or when performing necessary duties with respect to patrons, employees, and properties of the employing agency.

Existing law also provides that, notwithstanding any other law, these peace officers shall not be authorized to carry firearms.

This bill would authorize these peace officers to carry firearms when a local emergency, as defined, has been proclaimed pursuant to and as provided in specified provisions. The bill would require that this authorization to carry firearms be approved by the mayor, and continue only while the local emergency remains in effect.

This bill also would require these peace officers to satisfactorily complete the introductory course of firearm training and any crowd and riot control training prescribed by the Commission on Peace Officer Standards and Training, and to requalify in the use of firearms every 6 months.

The bill also would declare that it is to become effective immediately as an urgency statute.

Ch. 84 (AB 371) Haynes. Agricultural land: preservation contracts.

Existing provisions of the Williamson Act authorize any city or county to enter into contracts, as provided, to limit the use of agricultural lands for the purposes of preserving those lands. Existing law also provides, as specified, for the nonrenewal or cancellation of those contracts, and for a report by the Department of Conservation to the Legisla-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ture on or before March 1 of each year regarding the implementation of the act by cities and counties.

This bill would change the date by which the report shall be made to May 1 of each year.

Ch. 85 (AB 374) Statham. Alcoholic beverages: licenses.

Existing law limits the number of on-sale general alcoholic beverage licenses which may be issued in any county based on the ratio of licenses to the specific number of inhabitants in the county. The law provides that premises owned by the state, any incorporated city, county, city and county, airport district, or other district or public corporation of the state, or premises leased to any city or county, shall be exempt from the limitation, provided the premises are operated as a bona fide public eating place, with specified exceptions. Existing law also provides that the original application fee for these licenses shall be a specified percentage of the average price paid for the same type of license in the county during the previous fiscal year, as determined by the Department of Alcoholic Beverage Control, but no less than $12,000 in the case of an original on-sale general license or original off-sale general license or $9,000 in the case of certain seasonal licenses.

This bill instead would provide that those premises shall be subject to an original license application fee of $6,000.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 86 (AB 381) Hannigan. Work release.

Under existing law, the board of supervisors of any county may authorize the sheriff or other specified officer to offer a voluntary work release program to perform certain manual labor in which one day of participation is in lieu of one day of confinement in a county correctional facility.

This bill would also permit persons who, because of a medical condition, physical disability, or age, are not able to perform manual labor to participate in a work release program involving any type of public sector work designated and approved by the sheriff or other official in charge of county correctional facilities.

Ch. 87 (AB 544) Jones. Vehicles: weight limits.

Existing law makes it an infraction to violate specified provisions relating to weighmasters, as defined, and provides a schedule of fines for those infractions. The existing schedule of fines is effective only until January 1, 1995, at which time it is to be replaced by an alternate schedule of fines. Existing law also requires the Department of Agriculture to prepare a statistical comparison to determine the impact of changing the schedule of fines for specified violations, and to submit this comparison to the Legislature not later than January 1, 1993.

This bill would delete the expiration date of the schedule of fines in existing law and would repeal the provisions relating to the alternate schedule of fines and the statistical comparison to be prepared by the department.

Ch. 88 (AB 549) Cannella. Taxation: sales and use taxes: medical identification tags.

Existing law exempts from sales and use taxes the gross receipts from the sale of, and the storage, use, or other consumption in this state of, medical alert tags furnished by a nonprofit organization.

This bill would change the description of these tags from medical alert tags to medical identification tags.

Ch. 89 (AB 582) Goldsmith. Agricultural land: cancellation of contracts.

Existing law permits a county or city to establish agricultural preserves, in which, pursuant to a contract with landowners, a county or city may limit the use of agricultural land for the purpose of preserving that land.

Existing law permits a contract to be canceled by a county board of supervisors or city council only if specified grounds are found to exist and pursuant to the request of a

NOTE: Superior numbers appear as a separate section at the end of the digests.

landowner.

The board or council, subsequent to the request for cancellation, may grant tentative approval if it finds grounds for cancellation.

Existing law requires that prior notice of the hearing and of the final decision be published in a newspaper of general circulation, and mailed to the specified landowners. Notice of the hearing and cancellation of the contract and a copy of the landowner's petition for cancellation are also required to be mailed to the Director of Conservation.

This bill would require that the notice of the hearing and the copy of the landowner's petition for cancellation be mailed to the Director of Conservation at least 10 working days prior to the hearing.

Since the bill would impose additional requirements upon cities and counties in contract cancellation proceedings, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,-000, shall be made from the State Mandates Claims Fund.

Ch. 90 (AB 612) Connolly. Juveniles.

Existing law authorizes a traffic hearing officer, under prescribed conditions, to hear and dispose of cases in which a minor is charged with specified offenses.

This bill would revise that list of offenses to include the unlawful purchase or possession of an aerosol container of paint, as specified.

Ch. 91 (AB 707) Epple. Secured transactions.

Under existing law, an unperfected security interest is generally subordinate to the rights of a transferee in bulk or a lien creditor. However, if the secured party files with respect to a purchase money security interest before or within 10 days after the debtor receives possession of the collateral, he or she takes priority over the rights of a transferee in bulk or of a lien creditor that arise between the time the security interest attaches and the time of filing.

This bill would extend that 10-day period for filing the security interest to 20 days.

Ch. 92 (AB 1318) Richter. State militia: armories.

Existing law authorizes the Director of General Services, with the approval of the Adjutant General and the Legislature, to lease or sell any real property held for armory purposes, requires that all proceeds of the sale or lease be deposited in the Armory Fund, and makes the fund available for the acquisition or construction of new or replacement armories, upon appropriation by the Legislature.

This bill would permit use of the fund, upon appropriation by the Legislature, for maintenance of existing armories, and would specify that acquisition or construction includes, but is not limited to, the cost of design.

Ch. 93 (AB 1348) Caldera. Witness fees.

Existing law requires parties who subpoena a city or county employee to reimburse certain costs to the city or county and requires the party to deposit in advance with the city or county $150 for each day the employee's attendance will be required under the subpoena.

This bill would authorize the court to relieve a party of the requirement of paying these charges and deposit for good cause.

Ch. 94 (AB 1660) Napolitano. Transit operators: fares: disabled persons.

Existing law requires transit operators, in certain circumstances, to offer fare discounts to handicapped and disabled passengers. Existing law also requires transit operators to

NOTE: Superior numbers appear as a separate section at the end of the digests.

honor an identification card that is valid for the discount requested and that has been issued to an individual with a handicap or disability by another transit operator.

This bill would clarify the application of that latter requirement.

Ch. 95 (AB 1781) Knowles. Solid waste.

Existing law, the California Integrated Waste Management Act of 1989, requires an owner or operator of a solid waste disposal site to provide evidence of financial ability to provide for the costs of closure and postclosure maintenance through the use of mechanisms set forth in federal regulations specifying financial assurance criteria or through the use of any other mechanisms approved by the California Integrated Waste Management Board.

This bill would update the citation to those federal regulations.

Ch. 96 (AB 2360) Mountjoy. Insurance: auto inspection.

Existing law generally requires automobile insurers to inspect vehicles before issuing a policy of collision or comprehensive insurance.

Under existing law, if the inspection is not conducted within a specified period of time, the collision or comprehensive coverage is suspended, except that it is not suspended as to the lienholder interest of a financial institution.

This bill would provide that it is also not suspended as to the lienholder interest of a licensed dealer.

Ch. 97 (AB 364) Tucker. Horseracing: quarter horse races: purses.

(1) Existing law permits the California Horse Racing Board to authorize, by regulation, the entry of thoroughbred and Appaloosa horses in quarter horse races at quarter horse meetings.

This bill would remove the requirement that the board act pursuant to regulation. The bill would specify the conditions under which thoroughbred or Appaloosa horses may be entered in quarter horse races, and would also permit an association planning to conduct quarter horse racing to conduct thoroughbred racing as part of its racing program under certain conditions.

(2) Existing law permits the board to authorize an association conducting a racing meeting in this state to accept wagers on the results of out-of-state feature races having a gross purse of at least $100,000 during the period the association is conducting the racing meeting on days when live races are being run if, among other things, the wagering is offered only within 36 hours of the running of the out-of-state feature race.

This bill would, instead, permit those wagers to be accepted within 7 days of the running of the out-of-state feature race.

(3) Existing law permits the board to authorize any licensed association or satellite wagering facility to accept wagers on races conducted in this state comprising the program of racing generally known as the Breeders' Cup and feature races conducted in this state having a gross purse of $50,000 or more, if, among other things, wagering is offered only within 36 hours of the commencement of the racing program with the Breeders' Cup program or with the feature race.

This bill would permit those wagers to be accepted within 7 days of the commencement of the racing program with the Breeders' Cup program or with the feature race.

(4) Under existing law, the board may authorize an association licensed to conduct a racing meeting to operate a satellite wagering facility for wagering on races conducted at its racetrack inclosure, subject to specified conditions. Also, the board may, with the approval of the Department of Food and Agriculture, permit a county fair, district agricultural association, or citrus fruit fair to operate a satellite wagering facility at its fairgrounds, subject to specified conditions.

This bill would permit the chairperson of the board to temporarily authorize the conduct of satellite wagering from any zone in the state or from any location outside this state if the live racing or audiovisual signals of any licensed association or fair are disrupted or interrupted so as to cause the cessation of the live racing or audiovisual signals, and the cause is a natural disaster outside the control of the association or fair conducting the racing or satellite wagering.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) Existing law provides that from the amount deducted for quarter horse purses, a sum equal to 25% is required to be paid as owners' premiums for California-bred quarter horses winning or placing at the meeting.

This bill would require those amounts to be distributed as breeder premiums and owners' and stallion awards.

(6) Existing law provides that an amount equal to 10% of specified deposits shall be deducted to compensate the Pacific Coast Quarter Horse Racing Association for its administrative costs.

This bill would, instead, specify that an amount up to, but not to exceed, 10% of those deposits shall be deducted for that purpose.

(7) Under existing law, in determining the purse earned in any qualifying race that is a stakes race, the amount earned is required to be based solely on the added money, with no consideration given to other sources of the purse, such as nomination, entry, or starting fees, bonuses, and sponsor contributions, or any combination thereof.

This bill would permit other sources of the purse to be considered in determining the purse earned in any qualifying race that is a stakes race.

(8) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 98 (SB 653) Dills. Gambling: draw poker.

(1) Existing law provides that, in counties with a population exceeding 4,000,000, every person who deals, plays, or carries on, opens, or causes to be opened, or who conducts, either as owner or employee, whether for hire or not, any game of draw poker, including lowball poker, is guilty of a misdemeanor.

(2) However, these provisions shall become operative in a county only if the board of supervisors by resolution directs that there be placed on the ballot, at a designated county election, the question of whether draw poker, including lowball poker, shall be prohibited in the county. Existing law also provides that if a majority of electors voting on the question vote affirmatively, draw poker shall be prohibited in both incorporated and unincorporated territory in the county.

This bill, instead, would provide that if a majority of electors voting on the question vote affirmatively, draw poker shall be prohibited in the unincorporated, rather than in both the incorporated and unincorporated, territory in the county.

(3) Existing law also provides that any county or city ordinances in any county prohibiting, restricting, or regulating the playing of draw poker and other acts relating to draw poker shall not be superseded until, pursuant to the provisions specified in (2) above, the electorate of the county determines that the provisions specified in (1) above prohibiting draw poker and specifying the punishment therefore shall be operative in the county.

This bill, instead, would apply these provisions to any county ordinance, rather than any county or city ordinances, in any county.

Ch. 99 (AB 258) Hannigan. Nuisance: agricultural processing activities.

Existing law provides that no defined agricultural processing activity, operation, facility, or appurtenances thereof, conducted or maintained for commercial purposes, in a manner consistent with proper and accepted customs and standards, and in operation for more than 3 years, shall become a nuisance by reason of changed conditions in the locality if it was not a nuisance at the time it began, except as specified with regard to environmentally significant substantial increases in activities or operations.

This bill would revise the definition of "agricultural processing activity, operation, facility, or appurtenances thereof," for purposes of this provision, to include the production and bottling of beer.

Ch. 100 (SB 463) Bergeson. Health and welfare.

(1) Under existing law, the Emergency Medical Services and the Prehospital Emergency Medical Care Services Personnel Act, each county may designate an emergency medical services agency, for the establishment and administration of an EMS program in the county. Existing law also establishes the Emergency Medical Services Authority, that, among other things, adopts regulations governing these emergency medical serv-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ices provisions.

Existing law specifies certain training and examination requirements of an emergency medical technician-paramedic (EMT-P), and requires the authority to develop, after approval of the Commission on Emergency Medical Services, minimum standards for the training and scope of practice for EMT-IIs and EMT-Ps.

This bill would require the authority to be the agency solely responsible for certification and recertification of EMT-Ps who meet the standards provided by law. It would provide for the temporary recertification by the authority of EMT-Ps whose certifications expire before the authority implements a recertification procedure, and of individuals who have either completed EMT-P training in California or are registered as EMT-Ps with the National Registry of Emergency Medical Technicians and who meet certain other requirements, to be valid only until the authority implements and applies the certification procedures, or in any case no later than December 31, 1993.

Existing law authorizes the medical director of a local EMS agency to place on probation any certificate holder or suspend or revoke any certificate issued under the provisions of law relating to emergency medical services.

This bill would, instead, authorize the local medical director to place on probation any certificate holder or suspend or revoke any EMT-I or EMT-II certificate or suspend or recommend to the authority the revocation of any EMT-P certificate issued under these provisions. It would authorize the authority to deny, suspend, or revoke certification as an EMT-P.

Existing law establishes and continuously appropriates the Emergency Medical Services Personnel Fund to the authority to, among other things, maintain the authority's testing and personnel registry program.

This bill would instead specify that the fund is for the maintenance of the authority's testing and personnel certification program.

This bill would require the authority to adopt emergency regulations to implement a state EMT-P certification program pursuant to its provisions.

This bill would specify that these provisions are operative only until December 31, 1993.

(2) Existing law provides for the allocation of sales tax revenues deposited into the Local Revenue Fund, a continuously appropriated fund, to local agencies for various welfare programs.

This bill would revise the allocation of money deposited into that continuously appropriated fund, thereby resulting in an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 101 (SB 329) Deddeh. Civil law.

Existing law prescribes the maximum allowable fees that may be charged on loans made by licensed personal property brokers, licensed consumer finance lenders, industrial loan companies, and holders of retail installment accounts and automobile conditional sales contracts, for the return by a depository institution of a dishonored check, negotiable order of withdrawal, or share draft.

This bill would increase the maximum allowable fees to $15, and extend this provision to loans made by licensed commercial finance lenders.

Ch. 102 (AB 285) Aguiar. Mobilehome parks: rule changes: prerequisites for lawsuits.

Under existing law, a mobilehome park rule may be amended at any time as to any particular homeowner with that homeowner's consent, or without consent if 6 months' advance notice is given to the homeowner or if 60 days' notice is given to the homeowner of a change in the rules applicable to recreational facilities. Under existing law, homeowners whose tenancies commence during this notice period may be given the notice before the inception of their tenancies.

This bill would require the mobilehome park management to meet with homeowners, their representatives, or both concerning any proposed change to the mobilehome park rules and to give 10 days' advance written notice of the meeting to each homeowner. Under the bill, once this requirement has been satisfied, the change may be adopted as

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified above. However, the bill would delete the requirement that written notice of the rule change be provided individually to each affected homeowner.

Ch. 103 (AB 288) Polanco. Insurance: notice of nonrenewal.

Existing law requires insurers issuing commercial policies of insurance, as specified, at least 45 days, but not more than 120 days, in advance of the end of the policy period, to give notice of nonrenewal, and the reasons therefor, or to condition renewal upon changed terms or conditions, or to increase the premium rate by more than 25%. Where the aggregate premium is $10,000 or less a notice of at least 60 days but not more than 120 days is required, as specified.

This bill would increase the minimum 45-day notice period to at least 60 days. It would delete the separate notice provision for policyholders whose aggregate premium is $10,000 or less.

This bill would provide that the provisions prohibiting notice of nonrenewal earlier than 120 days in advance of the end of the policy period do not apply to professional liability policies issued to health care providers.

Ch. 104 (AB 361) Baca. Elections: incumbent judges.

Existing law provides that in a county or judicial district election, where only the incumbent has filed nomination papers for the office of judge of the superior court, justice court, or municipal court, or constable of the justice court, the incumbent's name shall not appear on the ballot unless, within 10 days after the deadline for filing nomination papers for the office, a petition for a write-in campaign is filed. If the name of the incumbent does not appear either on the primary ballot or general election ballot, the elections official, on the day of the general election, is required to declare the incumbent reelected.

This bill would prohibit the elections official, after declaring the incumbent reelected, to issue the certificate of election before the day of the general election.

Ch. 105 (AB 646) Hannigan. County health care services: funding.

The Tobacco Tax and Health Protection Act of 1988 (Proposition 99) was adopted by the voters at the general election held on November 8, 1988, establishing the Cigarette and Tobacco Products Surtax Fund, containing certain accounts, including the Hospital Services Account, the Physician Services Account, the Health Education Account, the Research Account, the Public Resources Account, and the Unallocated Account, and requiring that money in those accounts be used for specified purposes.

Existing law provides for the California Healthcare for Indigents Program (CHIP), which is operative until July 1, 1994, and repealed on January 1, 1995, for the allocation of money from various accounts in the fund to the counties for the provision of health care services to eligible persons.

Existing law also requires each county to establish within its emergency medical services fund a Physician Services Account, and to deposit into that account funds appropriated by the Legislature for the purposes of that account, and would limit the use of those funds to emergency, obstetric, and pediatric services, as defined.

This bill would exempt Solano County from those limitations with respect to the use of unexpended 1990–91 fiscal year funds and 1991–92 fiscal year funds for the development of managed care systems to increase access for indigents to physician emergency services, not to exceed $400,000.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 106 (AB 70) Katz. Department of Motor Vehicles: hours.

Under existing law, generally, all offices of every state agency are required to be kept open for the transaction of business from 8 a.m. until 5 p.m. of each day from Monday to Friday, inclusive, other than legal holidays.

This bill would specifically authorize the Department of Motor Vehicles to reduce its hours of service for transacting business during the described time period in order to ensure that service for transacting business may be provided within existing resources before 8 a.m. or after 5 p.m., Monday to Friday, inclusive, or on Saturday. The bill would

NOTE: Superior numbers appear as a separate section at the end of the digests.

specify that this authorization shall not be exercised so as to do any of the following: conflict with specified provisions relating to a memorandum of understanding, require a full-time employee to work in excess of 5 consecutive days as part of a regular workweek of 40 hours, or relieve the department of any obligation under a specified memorandum of understanding.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 107 (AB 687) Johnson. Banks: deposits.

Existing law requires banks to notify depositors of specified information prior to maturity of a time deposit, and to maintain information about charges and interest on accounts, as specified, and to furnish statements to depositors concerning charges and interest on accounts.

This bill would repeal those provisions. The bill would also state legislative intent.

Ch. 108 (AB 743) Seastrand. Courts: traffic referees.

Existing law authorizes the judges of a municipal court having 3 or more judges to appoint one traffic referee who has specified qualifications, and sets forth the powers and duties of a traffic referee.

This bill would authorize the judges of the municipal court in Santa Barbara County to appoint a traffic referee or hearing officer who may hear traffic matters and exercise the powers of a traffic referee, at county expense, upon adoption of a specified resolution by the board of supervisors.

Ch. 109 (AB 809) Rainey. State employees: definitions.

Under existing law, state supervisory employees are excluded from the definition of "state employee," for purposes of collective bargaining but are included with respect to personnel provisions. Existing law defines a "supervisory employee" as one who is authorized to use his or her independent judgment, in the employer's interest, to take specified actions respecting other employees.

Existing law contains obsolete references to the State Employer-Employee Relations Act (the Ralph C. Dills Act under existing law) and individual sections in that act, relating to supervisory employees.

This bill would update these references consistent with existing law. This bill would also make technical, nonsubstantive changes.

The bill would also add employees of the Bureau of State Audits to the definition of state employee for purposes of laws relating to state personnel.

Ch. 110 (AB 1136) Knight. Transportation: Los Angeles County.

Existing law creates the Los Angeles County Metropolitan Transportation Authority as the successor to the Southern California Rapid Transit District and the Los Angeles County Transportation Commission. The authority is required to establish 3 organizational units to carry out its functions, including an operating organizational unit that is to carry out the operating responsibilities of the Southern California Rapid Transit District on all exclusive public mass transit guideway projects in the County of Los Angeles.

This bill would declare the Legislature's intent that neither a specified provision of law nor the creation of the authority or its operating unit shall impact the allocation of funds for purposes of certain claims made pursuant to the Mills-Alquist-Deddeh Act.

Ch. 111 (AB 1167) Polanco. Minors: crisis intervention services.

Existing law expresses legislative intent concerning the implementation of integrated children's services programs, at the local level, to provide specified types of services through the use of children's multidisciplinary services teams, as defined.

This bill would include crisis intervention services, as defined, as one of those services included in these integrated children's service program provisions.

Ch. 112 (AB 1271) Murray. Classified school and community college employees: personnel commission.

Under existing law, the term of office of school and community college district person-

NOTE: Superior numbers appear as a separate section at the end of the digests.

nel commissioners expires at noon on the 1st day of December, as specified, and no provision is made for the discharge of the duties of the office if there is a period of time between the expiration of a term of office and the appointment of a new commissioner.

This bill would authorize a commissioner whose term has expired to continue to discharge the duties of the office during this interim but for no more than 90 calendar days.

Ch. 113 (AB 1742) Margolin. Health insurance: small employer carriers.

Existing law imposes various requirements on health insurers and health plans with respect to small employer coverage.

Existing law prohibits a plan from using geographic rating regions smaller than an area in which the first 3 digits of all its ZIP Codes are in common.

This bill would specify that the restriction is applicable within a county.

Existing law requires health care service plans to market and sell all of the plan's small employer contracts to all small employers.

This bill would require health care service plans to market and sell all of the plan's contracts that are sold to small employers or associations with small employers to all small employers and would make related changes.

Existing law provides that coverage under a plan shall not take effect until 10 days after the small employer has received from the carrier or plan the sum of the risk adjusted risk rates, unless waived by the employer.

This bill would delete that provision and would instead provide that the carrier and plan shall notify the employer of the actual rates, would provide that during the first 30 days of coverage the employer may change to a different plan design, and would make related changes.

Existing law requires certain disclosures to be made in connection with the marketing of small employer health benefit plans.

This bill would also require agents or brokers to advise employers that a brochure summarizing plan benefits may be provided upon request, and would make related changes.

Existing law generally requires insurers and plans that market coverage to small employers to market all designs to all small employers. However, existing law provides that the carrier may cease enrolling new small employer groups if it certifies that the number of eligible employees and dependents, of the employers newly enrolled or insured during the current calendar year by the carrier equals or exceeds certain amounts.

This bill would provide that if that certification is approved, the small employer carrier shall not offer any health care service plan contract to any small employers during the remainder of the current year.

Existing law prescribes factors that may be used in determining premiums for small employers.

This bill would permit the use of composite rates for small employers with 10 or more employees.

Existing law, for purposes of small employer coverage and preexisting condition provisions, defines "health benefit plan" as any group or selected group policy or contract, as specified.

This bill would, for those purposes, define "health benefit plan" as any group or individual policy or contract, as specified.

The bill would revise waiting period provisions and make various other technical and conforming changes, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 114 (AB 1757) Caldera. Evidence: mediation.

Under existing law, with certain exceptions, evidence of anything said or of any admission made in the course of mediation is not admissible in evidence and disclosure of any such evidence may not be compelled in any civil action, and no document prepared for the purpose of, in the course of, or pursuant to, the mediation is admissible in evidence and disclosure of such a document may not be compelled in any civil action,

NOTE: Superior numbers appear as a separate section at the end of the digests.

unless the document otherwise specifies, provided that a specified confidentiality agreement is executed prior to the mediation. Existing law provides that no arbitrator shall be competent to testify in any subsequent civil proceeding as to any statement, conduct, decision, or ruling related to the arbitration, except as to a statement or conduct that could give rise to civil or criminal contempt, constitute a crime, be the subject of specified investigations regarding attorneys and judges, or give rise to certain disqualification proceedings regarding judges.

This bill would include mediators in the latter provision, except with regard to the mediation of visitation and custody issues, as specified.

Ch. 115 (AB 214) W. Brown. Housing: bond and loan insurance.

(1) Under existing law, the California Housing Insurance Fund is established to provide a program of loan insurance, administered by the California Housing Finance Agency, for various categories of housing, and including loan insurance in conjunction with seismic safety improvements of residential buildings.

This bill would create a bond and loan insurance program under which the agency would administer the California Housing Insurance Fund, which would be continued in existence as a continuously appropriated fund and renamed the California Housing Loan Insurance Fund, to insure loans made to owners of rental housing developments or residential structures and to insure bonds issued by governmental agencies for purposes of financing existing housing affordable for persons and families of certain income levels.

The bill also would permit the board of directors of the agency to establish a reverse mortgage insurance program. The bill would require premiums received from the insurance on the loans and bonds to be deposited in the continuously appropriated fund, and would thereby make an appropriation.

The bill would also permit the agency to administer a loan loss guarantee program in order to induce private lenders to make construction loans for seismic rehabilitation improvements as specified. The bill would require the premiums for a loan loss guarantee to be deposited in a Seismic Rehabilitation Loan Loss Guarantee Account within the fund.

This bill would permit the agency, upon appropriation by the Legislature of moneys sufficient to create necessary reserves, to issue rehabilitation loan loss guarantees on commercial buildings, as defined. The bill would authorize the agency, for the purpose of using this fund for a specified multifamily seismic retrofit program, to waive a specified limitation on commercial space in order to facilitate the seismic retrofit of lower income housing. The bill would require an applicant for these loan loss guarantees to submit evidence of his or her inability to obtain a rehabilitation loan commitment without a loan loss guarantee.

By adding new purposes of expenditure to an existing continuously appropriated fund, this bill would make an appropriation.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Appropriation: yes.

Ch. 116 (AB 215) W. Brown. Housing: first-time home buyers: California Housing Loan Insurance Fund: California Housing and Jobs Investment Bond Act.

Under existing law, known as the Cal-First Time Home Buyers Act, the California Housing Finance Agency is authorized to contract with qualified mortgage lenders and to pay a sum of money as consideration for a reduction of the effective interest cost to the purchasers of owner-occupied housing units below market interest rates to first-time buyers, as defined, who are required to repay these sums to the agency. Existing law establishes a buy-down mortgage plan, under which the agency is authorized to make commitments to qualified mortgage lenders in accordance with specified standards. Under existing law, the funds repaid by the first-time home buyers are deposited in the First-Time Home Buyers Fund, which is continuously appropriated to the agency for the purposes of the Cal-First Time Home Buyers Act. Under existing law, the First-Time Home Buyers Policy Committee is established within the California Housing Finance Agency and is authorized to adopt regulations with respect to the administration of the Cal-First Time Home Buyers Act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would repeal, as of the date the Director of Finance certifies, in writing, to the Secretary of State that all mortgages made, and all debts incurred, pursuant to the Cal-First Time Home Buyers Act on or before the date of the approval of the California Housing and Jobs Investment Bond Act by the California electorate, have been extinguished, the authority of the California Housing Finance Agency to carry out the purposes of the Cal-First Time Home Buyers Act, would repeal the provision establishing the First-Time Home Buyers Policy Committee, and would repeal the provisions constituting the buy-down mortgage plan. The bill would, instead, enact the California Housing and Jobs Investment Bond Act and require that the proceeds of bonds issued and sold pursuant to the bill be deposited in the California Housing Loan Insurance Fund, where these moneys would be continuously appropriated for the purpose of making financing opportunities available to first-time home buyers of low and moderate income in the state. The bill would provide for the submission of these provisions to the voters at the statewide election to be held on November 2, 1993, and, if it is not approved by the voters at that election, at the statewide general election to be held on November 8, 1994. The bill would further provide that these provisions would only become operative upon adoption by the people.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 117 (SB 983) Greene. Workers' compensation: collective bargaining agreements.

Existing law requires the enforcement of any collective bargaining agreement between an employer and a labor organization.

Existing law also requires the submission for arbitration of disputes between an employer and an employee involving specified issues.

This bill would require the Department of Industrial Relations and the courts of this state to recognize as valid and binding any provision in a collective bargaining agreement between a private employer or groups of employers engaged primarily in construction, construction maintenance, and related activities and a recognized or certified exclusive bargaining representative that establishes an alternative dispute resolution system, as specified, the use of an agreed list of providers of medical treatment, as specified, the use of an agreed, limited list of qualified medical evaluators and agreed medical evaluators, as specified, joint labor management safety committees, a light-duty, modified job or return-to-work program, as specified, or a vocational rehabilitation or retraining program, as specified.

This bill would disallow any collective bargaining agreement that diminishes the entitlement of an employee to compensation payments for total or partial disability, temporary disability, vocational rehabilitation, or medical treatment fully paid by the employer. It also would require that any agreement in violation of that provision be declared null and void.

The bill would provide that the premium rate for a policy of insurance issued pursuant to these provisions is not subject to certain restrictions relating to rates.

This bill would also impose specified reporting requirements on the Administrative Director of the Division of Workers' Compensation.

This bill would become operative only if AB 110, AB 119, AB 1300, and SB 484 are also enacted.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 118 (AB 119) Brulte. Workers' compensation: post termination benefits.

Existing law provides for the compensation under the workers' compensation laws of workers suffering a psychiatric injury occurring in the course of employment under certain circumstances.

This bill would generally require psychiatric injuries to have been predominantly caused by employment in order to be compensable, and would impose additional limitations.

This bill would also limit payment for post-termination injuries, as specified.

This bill would apply only to injuries occurring on or after the effective date of the bill.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would become operative only if AB 110, AB 1300, SB 484, and SB 983 are also enacted.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 119 (SB 484) Lockyer. Workers' compensation.

Existing law provides for the payment of workers' compensation benefits to employees injured in the course of employment. Existing law contains various provisions regulating workers' compensation.

This bill would appropriate $500,000 from the Workplace Health and Safety Revolving Fund to the Commission on Health and Safety and Workers' Compensation.

It would appropriate $4,600,000 as a loan from the General Fund to the Department of Corporations to cover startup personnel and operating expenses for the period from January 1, 1994, to June 30, 1995, inclusive, relating to implementation of the Workers' Compensation Health Care Provider Organization Act.

The bill would appropriate $2,000,000 from the Workers' Compensation Administration Fund and $4,000,000 from the General Fund to the Division of Workers' Compensation.

The bill would become operative only if AB 110, AB 119, AB 1300, and SB 983 are also enacted.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 120 (AB 1300) W. Brown. Workers' compensation.

Existing law requires qualified medical evaluators to be, among other things, board certified.

This bill would prohibit a healing arts licensee from performing any medical evaluation for which the evaluator is required to be certified as a qualified medical evaluator without having first obtained that certification. A violation of that requirement would constitute unprofessional conduct and grounds for disciplinary action.

Existing law provides that any contract for professional services secured by any attorney or law firm through a runner or capper is void. It provides for the recovery of certain compensation and fees with respect to a violation of that provision.

This bill would provide that any fees recovered be allocated in a specified manner.

Existing law provides that it is unlawful to, among other things, make or cause to be made any knowingly false or fraudulent material statement or material representation for the purpose of obtaining or denying workers' compensation benefits.

This bill would require that advertising of legal services for obtaining workers' compensation benefits, as specified, include the name of at least one attorney associated with the provision of those legal services. A violation of this requirement would be a misdemeanor. By creating a new crime the bill would impose a state-mandated local program. Under existing law, it is a crime to employ runners, cappers, steerers, or other persons to procure clients or patients to perform or obtain services or benefits pursuant to the workers' compensation laws.

This bill would also impose a civil penalty for those acts. It would permit the Attorney General or a district attorney to bring that civil action, and also permit the action to be brought by an interested person, subject to various restrictions.

Existing law prohibits certain false or fraudulent practices in connection with workers' compensation claims. The commission of any of these practices is a crime punishable as specified.

This bill would additionally authorize restitution to be ordered, including restitution for any medical evaluation or treatment services obtained or provided. It would prohibit any person convicted of workers' compensation fraud, as defined, from receiving or retaining compensation, as defined, where the compensation was owed or received as a result of certain unlawful conduct for which the recipient of the compensation was convicted.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides immunity for civil actions for certain reports by insurers and agents relating to fraudulent insurance claims.

This bill would specify that those provisions apply to reports concerning workers' compensation.

Existing law prohibits rebates or other consideration for referrals for workers' compensation services, but excepts physicians and attorneys.

This bill would eliminate that exception, and would make related changes.

The bill would also provide that except as otherwise permitted, any person who offers or delivers any rebate, refund, commission, preference, patronage, dividend, discount, or other consideration to any adjuster of claims for workers' compensation as inducement or reward for the referral or settlement of any claim, is guilty of a felony, and would similarly prohibit acceptance or receipt of such consideration by an adjuster of workers' compensation claims. Since it would create new crimes, it would impose a state-mandated local program.

This bill would also provide that any contract for professional services secured by any health care provider in violation of various provisions prohibiting false or fraudulent insurance or workers' compensation claims is void, and would provide for the divestiture of any fees received in connection with the contract.

Existing law makes certain false or fraudulent acts done in connection with a claim for workers' compensation a crime.

This bill would, in addition, provide a civil penalty for those acts and related acts to be assessed by the Director of Industrial Relations, as specified. The fines would be deposited into the Workers' Compensation Fraud Account in the Insurance Fund.

The bill would require a physician making a medical-legal report, upon request of a party, to provide a curriculum vitae and a statement concerning the percent of the physician's total practice time devoted to medical treatment.

Under existing law, it is a crime to make certain false or fraudulent insurance-related claims. Under existing law, it is a crime to knowingly present for payment any undercharges for health care benefits on behalf of a specific claimant unless any known overcharges for health care benefits for that claimant are presented for reconciliation at that same time.

This bill would specify that workers' compensation benefits are included as health care benefits for the purpose of that provision.

The bill would also define the term "victim" to include insurers and employers who are victims of workers' compensation fraud, for purposes of appearances and statements at sentencing proceedings, as specified.

The bill would require certain statements to be filed under penalty of perjury. Because the bill would expand the scope of the existing crime of perjury, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would become operative only if AB 110 and 119 and SB 484 and 983 are also enacted.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 121 (AB 110) Peace. Workers' compensation.

Existing law provides for a system of workers' compensation to provide compensation for persons injured in the course and scope of employment.

This bill would make various revisions in that law. Among other things, it would make the following changes:

(1) This bill would require notices of cancellation of workers' compensation insurance to comply with notice requirements, and to be based on certain occurrences. It would prohibit the cancellation of workers' compensation except for certain causes.

(2) Existing law regulates workers' compensation insurance rates and, among other

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

things, provides for minimum rates.

The bill would provide for a 7% reduction in insurance rates, as specified. The bill would make related changes.

(3) The bill would require insurers to maintain or provide occupational safety and health loss control consultation services.

(4) The bill would provide for the payment for additional expenses of public members of rating bureaus. The bill would require rating organizations to establish a policyholder ombudsman, and would provide for certain policyholder rights.

(5) The bill would establish the Cal-OSHA Targeted Inspection and Consultation Fund. It would provide for the establishment of a program for targeting employers in the high-hazard industries, and a program for identifying categories of occupational safety and health hazards. The bill would make related changes.

(6) The bill would delay the repeal date of provisions creating the Workers' Compensation Administration Revolving Fund from January 1, 1994, to January 1, 1999.

(7) The bill would require an examination for qualified medical evaluators, would further revise qualifications of those evaluators, and would make related changes.

(8) The bill would prohibit certain referrals by physicians. Since a violation of those provisions would be a crime, the bill would impose a state-mandated local program.

(9) The bill would revise various provisions relating to vocational rehabilitation. Among other things, it would limit payments for vocational rehabilitation programs, would revise the manner of the provision of those programs, would provide that if an employer offers certain modified work, the employer would not be required to provide vocational rehabilitation services, and would make related changes. The bill would provide for the arbitration of vocational rehabilitation disputes involving represented workers.

(10) The bill would require employees to be provided with information relating to the Americans with Disabilities Act.

(11) The bill would permit group self-insurance by employers.

(12) The bill would require insurers to reimburse employers for premium paid due to the inclusion of a successfully challenged payment, as specified. It would require insurers to discuss claims files with employers.

(13) The bill would revise the provisions relating to medical-legal evaluations to, among other things, provide for examinations by the treating physician, and would limit additional examinations. The bill would revise provisions relating to payment for those examinations. It would prohibit medical-legal examinations during the first 60 days, except as specified.

(14) The bill would provide for obtaining health coverage for workers' compensation from a health care organization. It would provide for the certification of those organizations. It would provide for the authorization for certain forms of those organizations by the Department of Corporations, operative August 1, 1994, and the payment of certain fees, which in some instances, would be immediately appropriated. Since certain of these provisions would be crimes, the bill would impose a state-mandated local program.

(15) The bill would require the administrative director to review and revise the schedule for the determination of the percentage of permanent disabilities.

(16) The bill would increase the level of benefits.

(17) The bill would revise provisions relating the medical fee schedule and the medical-legal fee schedule.

(18) The bill would revise provisions relating to claims forms, and would make additional procedural changes.

(19) The bill would authorize the Workers' Compensation Appeals Board to order payment of expenses incurred as the result of bad faith actions, as specified.

(20) The bill would make various related changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would become operative only if AB 119, AB 1300, SB 484, and SB 983 are also enacted.

(21) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 122 (SB 42) Johnston. State facilities: appropriations.

The State Building Construction Act of 1955 authorizes an appropriation of funds from the State Treasury in an amount as may be necessary to pay the monthly charges for certain energy conservation measures and the monthly rent of any agency occupying space in an office building authorized to be constructed under the act if the Department of Finance certifies to the Controller that the amount has not been included in the Budget Act for that fiscal year.

This bill would revise this authorization, except as specified, to include all facilities acquired and constructed under the act and those facilities leased by a state agency pursuant to a joint powers agreement and would additionally authorize these appropriations if the rental payments on these facilities and payments for certain energy conservation measures are due during a period that the state is operating without funds appropriated by the Budget Act for that fiscal year.

The bill, in addition, would declare that it is to take effect immediately as an urgency statute.

Ch. 123 (SB 546) Killea. Public Utilities Commission: annual audit of common carrier fees.

(1) Existing law generally requires the Public Utilities Commission to require the payment of fees by every common carrier and related business. Existing law requires that the total of these fees equal the amount of the commission's annual budget prorated to the extent of the commission's regulatory duties with respect to each class of carrier or related business or public utility for which each particular fee is established.

This bill would require the commission, commencing with the 1993–94 fiscal year, and in each subsequent fiscal year, to conduct an audit of the expenditure of the funds received pursuant to these provisions. The bill would require that the results of each audit be reported, in writing, commencing on or before February 15, 1995, with respect to the audit for the 1993–94 fiscal year, and on or before February 15 of each year thereafter, to the appropriate policy and budget committees of the respective houses of the Legislature.

(2) This bill would appropriate $2,900,000 from the Transportation Reimbursement Account to the Public Utilities Commission for the purpose of freight rail safety inspection and enforcement programs, to be expended in accordance with specified conditions. The bill would also require the commission to hire a minimum of 4 additional operating practices inspectors, exclusive of supervisory personnel, who are, or shall become, by July 1, 1994, federally certified, for the purpose of enforcing compliance by railroads operating in this state with state and federal safety regulations.

(3) The bill would require, commencing with the 1993–94 fiscal year, an annual audit of expenditures from the Transportation Rate Fund, as specified.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 124 (SB 345) Hill. Undocumented aliens.

Existing law provides that on or before July 1, 1993, the Department of Corrections shall implement and maintain procedures to identify inmates serving terms in state prison who are undocumented aliens subject to deportation. Existing law also provides, as specified, that the department shall refer to the United States Immigration and Naturalization Service the name and location of any inmate who may be an undocumented alien and who may be subject to deportation for a determination of whether the inmate is undocumented and subject to deportation.

This bill, in addition, would require the Department of Corrections to cooperate with the United States Immigration and Naturalization Service by providing the use of prison facilities, transportation, and general support, as needed, for the purposes of conducting and expediting deportation hearings and subsequent placement of deportation holds on

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

undocumented aliens who are incarcerated in state prison.

Ch. 125 (SB 371) Leslie. Carriers: charter-party carriers of passengers.

Under existing law, the furnishing of specified passenger transportation services by a charter-party carrier of passengers is subject to the jurisdiction and control of the Public Utilities Commission, and is required to be furnished pursuant to a certificate of public convenience and necessity or a permit issued by the commission. Existing law, to remain in effect until January 1, 1994, has established a class of certificate for persons who provide charter-party carrier services incidental to commercial river rafting, skiing, or to commercial balloon operations, and has authorized the commission to set the filing fee for that class of certificate. Existing law also requires the holders of that class of certificate to procure and continue in effect adequate liability protection, as specified.

This bill would continue these provisions in effect indefinitely, but would eliminate the authorization to transfer the fee paid for one class of certificate to that of another class, as specified. Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes as of January 1, 1994.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 126 (SB 459) Boatwright. Sexual harassment: peace officer victims.

Existing law prohibits any person from touching an intimate part of another person, if the touching is against the will of the person touched, and is for the specific purpose of sexual arousal, sexual gratification, or sexual abuse, which is sexual battery and punishable by a fine not exceeding $2,000, by imprisonment in a county jail, or both. Existing law provides for increased punishment of a fine not exceeding $3,000, imprisonment in a county jail, or both if the defendant was an employer and the victim was an employee of the defendant with the amount in excess of $2,000 to be distributed to the Department of Fair Employment and Housing for the purpose of enforcing the California Fair Employment and Housing Act, including, but not limited to, laws that proscribe sexual harassment in places of employment.

This bill would require the Commission on Peace Officer Standards and Training to develop, on or before August 1, 1994, complaint guidelines for specified entities that employ peace officers for peace officers who are victims of sexual harassment in the workplace.

Existing law requires the Commission on Peace Officer Standards and Training to adopt rules establishing minimum standards for training of peace officers, and to establish a certification program for peace officers.

This bill, additionally, would require the course of basic training for law enforcement officers, no later than January 1, 1995, to include instruction on sexual harassment in the workplace, as specified. This bill also would require all peace officers who have received their basic training before January 1, 1995, to receive supplementary training on sexual harassment in the workplace by January 1, 1997, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 127 (SB 468) Lockyer. Sentence enhancements: prior sex offenses.

Existing law provides specified sentence enhancements for any person who is found guilty of committing specified sex crimes, including, among other things, sodomy or oral copulation, as specified, by force, violence, duress, menace, or fear of immediate and unlawful bodily injury on the victim or another person, when the person has been convicted previously of any of those offenses, and specified acts of rape.

This bill would add to that list of specified offenses, rape, oral copulation, and sodomy, when the acts are accomplished against the victim's will by threatening to use the authority of a public official to incarcerate, arrest, or deport the victim or another, and the victim has a reasonable belief that the perpetrator is a public official.

Existing law provides that notwithstanding any other provision of law, probation shall not be granted to, nor shall the execution or imposition of sentence be suspended for, any person who commits specified sex crimes.

Existing law also provides that except in unusual cases where the interests of justice would best be served if the person is granted probation, probation shall not be granted to any person convicted of committing specified sex crimes.

This bill would revise these probation provisions by adding to that list of specified offenses, rape, sodomy, and oral copulation, when those acts are accomplished against the victim's will by threatening to use the authority of a public official to incarcerate, arrest, or deport the victim or another, and the victim has a reasonable belief that the perpetrator is a public official.

Ch. 128 (SB 479) Beverly. Corporations.

(1) Under the existing General Corporation Law, vote includes authorization by written consent subject to specified provisions.

This bill would reenact that definition of vote.

(2) Under existing law, before any corporation issues shares of any class or series of which the rights, preferences, and restrictions or number of shares or designation of shares are fixed by resolution of the board, an officers' certificate setting forth the resolution and other information shall be executed and filed.

This bill would additionally require, where the rights, preferences, and restrictions contain a supermajority vote provision, as specified, that the officers' certificate state that this provision has been approved by the shareholders, as specified.

(3) Existing law sets forth various requirements applicable after January 1, 1989, to a corporation with outstanding shares held of record by 100 or more persons for amendment of the articles or a certificate of determination containing a supermajority vote requirement.

This bill would provide that these provisions shall not apply to a corporation which files an amendment of articles or certificate of determination, on or after January 1, 1994, if, at the time of filing, the corporation has no class of equity securities registered under the Securities Exchange Act of 1934, as specified, outstanding shares of more than one class or series of stock, no supermajority vote provision, as specified, and outstanding securities held of record by fewer than 300 persons.

The bill would also provide that if the supermajority provision is not readopted as specified, then the particular corporate action or actions previously subject to the supermajority vote shall thereafter require a vote of only a majority of either the outstanding shares or the shares of the specified class or series which had previously been subject to the supermajority vote provision.

The bill would state legislative intent.

Ch. 129 (SB 483) Rosenthal. Household goods carriers.

Existing law prohibits a household goods carrier from engaging in the business of the transportation of used household goods and personal effects, office, store, and institution furniture and fixtures for compensation, by motor vehicle over any public highway in this state, unless there is in force a permit issued by the commission authorizing those operations.

This bill would prohibit a household goods carrier from engaging, or attempt to engage, in the business of the transportation of used household goods and personal

NOTE: Superior numbers appear as a separate section at the end of the digests.

effects, office, store, and institution furniture and fixtures for compensation, by motor vehicle over any public highway in this state, unless there is in force a permit issued by the commission authorizing these operations.

Since existing law makes a household goods carrier who violates these provisions guilty of a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 130 (SB 742) Committee on Budget and Fiscal Review. Local government finance.

SB 1135 of the 1993–94 Regular Session would, if enacted, require, for the 1993–94 fiscal year, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced and transferred to the Educational Revenue Augmentation Fund in each county for allocation to school districts, county offices of education, and community college districts in amounts determined by specified formulas.

This bill would also require that, for the purposes of these allocation reduction provisions in the 1993–94 fiscal year, the amount of the property tax revenue reduced be modified for any county or city and county that implements a specific alternative procedure for the distribution of these revenues. By imposing additional duties on local tax officials in connection with the allocation of property tax revenues, this bill would impose a state-mandated local program.

Existing law enables a county to adopt procedures to establish a tax losses reserve fund for the coverage of losses that may occur in the amount of property tax liens as a result of special sales of tax-defaulted property. Those procedures may be placed in effect in a county by a resolution of the board of supervisors of that county adopted not later than July 15 of the fiscal year for which it is first to apply, and remain in effect indefinitely unless discontinued, as specified.

This bill would provide that, for the 1993–94 fiscal year only, the procedure may be placed in effect in any county by resolution of the board of supervisors of that county adopted not later than October 15, and shall remain in effect unless otherwise discontinued, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would become operative only if SB 1135 is chaptered before this bill and adds Sections 97.035 and 11005.7 to the Revenue and Taxation Code.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 131 (SB 888) Hayden. Controlled substance offenses: sentencing: circumstances in aggravation.

Existing law provides that when a judgment of imprisonment is imposed and the statute specifies 3 possible terms, the court is required to impose a middle term unless there are circumstances in mitigation or aggravation of the crime which permit the imposition of the lower or upper term.

This bill would provide that upon conviction of specified controlled substance offenses involving minors, the fact that the minor was 11 years of age or younger shall be considered a circumstance in aggravation when imposing the term of imprisonment.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 132 (SB 903) Torres. Physicians and surgeons.

Existing law, the Medical Practice Act, requires any person who practices medicine in this state to be licensed as a physician and surgeon with limited prescribed exceptions.

Existing law provides an exemption from that licensing requirement for a physician and surgeon lawfully practicing medicine in another state or country who is practicing medicine in this state upon the invitation of the United States Olympic Committee and provided that several conditions are met, including the condition that the physician and surgeon provide medical services only to athletes or team personnel registered at the olympic training center or registered to compete in an event conducted under sanction of of the committee.

Existing law authorizes a team manager to give consent for medical treatment of any team member who is a minor.

This bill would include within this exemption a physician and surgeon who has been invited by the committee to provide medical services at training sites designated by the committee. This bill would also authorize a physician and surgeon exempt under these provisions to provide medical services to athletes or team personnel registered to train at the training sites designated by the committee.

This bill would, in addition, exempt from the act a physician and surgeon lawfully practicing medicine in another state or country who is practicing medicine in this state upon the invitation of the XV FIFA World Cup Organizing Committee and provided that these conditions are met. It would also authorize a team manager to give consent for medical treatment of any team member who is a minor.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 133 (SB 948) Watson. Vehicles: carpool lanes.

Existing law authorizes local authorities and the Department of Transportation to establish exclusive or preferential use of highway lanes for high-occupancy vehicles. Motorcycles may travel upon those highway lanes unless specifically prohibited by a traffic control device.

This bill would authorize a mass transit vehicle, as defined, or other specified vehicles owned or operated by any agency that provides public mass transit services, to be operated in those lanes, regardless of the number of persons in that vehicle, under specified circumstances.

Ch. 134 (SB 1042) Beverly. Crimes: threats to officials.

Existing law provides that every person who knowingly and willingly threatens the life of any elected state official, exempt appointee of the Governor, or judge, or the immediate family of such an official, appointee, or judge, with the specific intent that the statement is to be taken as a threat, and the apparent ability to carry out that threat by any means, is guilty of a public offense, punishable as specified.

This bill, instead, would provide that every person who knowingly and willingly threatens the life of, or threatens serious bodily harm to, any elected state official, exempt appointee of the Governor, or judge, or the immediate family of the official, appointee, or judge, with the specific intent that the statement is to be taken as a threat, and the apparent ability to carry out that threat by any means, is guilty of a public offense, punishable as specified. Because the bill would change the definition of a crime, it would impose a state-mandated local program.

For these purposes, the bill also would define "apparent ability to carry out that threat," and "serious bodily harm."

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 135 (SB 1097) Boatwright. Peace officers: background investigations.

Existing law requires each class of public officers or employees declared by law to be peace officers to meet certain minimum standards, including that the officers be of good

NOTE: Superior numbers appear as a separate section at the end of the digests.

moral character, as determined by a thorough background investigation.

This bill would require an employer, upon request of a law enforcement agency that is conducting a thorough background investigation for applicants not currently employed as a peace officer, to disclose employment information relating to a current or former employee if specified conditions are met. The bill would exempt employers who, in the absence of fraud or malice, disclose information in accordance with these provisions from civil liability, and would provide for the confidentiality of information disclosed by an employer, with a specified exception. This bill would also permit an employer to charge reasonable fees to cover actual costs incurred in copying and furnishing documents to law enforcement agencies as required by this act.

Ch. 136 (SB 1197) Kelley. Transportation: Riverside County: consultants.

Existing law sets forth a legislative validation of the process of selecting consultants for particular projects undertaken pursuant to the Riverside County Transportation Improvement Plan, and requires that the resultant numerically ranked list of consultants serve as the basis of negotiation and award of contracts by the Department of Transportation until September 19, 1992.

This bill would extend the applicability of that process and the resultant list to December 31, 1995, if specified conditions are met.

Ch. 137 (AB 59) Tucker. Disabled persons: parking: penalty. Existing law imposes a fine for a violation of provisions prohibiting unauthorized parking in

This bill would provide that $50 of every parking penalty received by a local entity pursuant to these provisions may be deposited by the treasurer of the local entity in a special account to be used for the sole purposes of altering existing public facilities to make them accessible to persons with disabilities in compliance with federal law and covering the actual administrative cost of setting aside $50 of every parking penalty received for that purpose.

Ch. 138 (AB 76) Conroy. Veterans.

(1) Under existing law, the California Veterans Board determines the policies for the operations of the Department of Veterans Affairs. Existing law requires the board to consist of 7 members, 6 of whom are veterans, as defined to include (a) any citizen of the United States who, in part, served in the active military, naval, or air service during prescribed periods, and permits one member, in lieu thereof, to be a veteran, as defined to include (b) any person who, in part, has served full time in the armed forces in time of national emergency or state of military emergency or during any expedition of armed forces.

This bill would require, on and after January 15, 1994, all of the members on the board to be veterans within the definition specified in (b) above. In addition, it would require one of these members to be retired from the active or reserve forces of the United States military service.

(2) Existing law authorizes the board to hold meetings at whatever times and places it decides, including, but not limited to, special meetings that may be called by the chairperson or by the secretary, as prescribed.

This bill would instead authorize special meetings to be called by the chairperson or the executive officer.

(3) Existing law authorizes the board of supervisors of any county to appoint a county veteran service officer to perform duties relating to the administration of benefits to veterans. Existing law repeals this provision on January 1, 1995, and effective January 1, 1995, authorizes the board of supervisors of each county to appoint a full-time county veteran service officer.

This bill would delete the requirement that the county veteran service officer be a full-time position.

Ch. 139 (AB 84) Conroy. Community college classified employees.

Under existing law, the workweek of a classified employee employed by a community college district is generally required to be 40 hours consisting of not more than 5

NOTE: Superior numbers appear as a separate section at the end of the digests.

consecutive working days and the workday is required to be 8 hours.

Existing law authorizes the governing board of a community college district to establish a 10 hour per day, 40 hour, 4 consecutive day workweek or a 9 hour per day, 80 hour per 2 week work schedule for all or certain classes of classified employees.

This bill would repeal the provisions summarized in the preceding paragraph and would, instead, authorize the governing board of a community college district to establish the workday and workweek schedules of classified employees if the establishment of those schedules has the concurrence of the employee organization, or in the absence of an employee organization, of the affected employee.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 140 (AB 162) Brulte. Property taxation: exemption: veterans.

Existing law with respect to property taxation implements the Legislature's authorization under the California Constitution to exempt, in whole or in part, the home of a person or a person's spouse, including an unmarried surviving spouse, if the person, because of injury incurred in military service, is blind in both eyes, has lost the use of 2 or more limbs, or is totally disabled. Existing law establishes, through the 1995–96 fiscal year, exemptions in the amount of $40,000 and $100,000 of the full value of an eligible person's residence, or in the amount of $60,000 and $150,000 where the eligible person's household income does not exceed the amounts specified in a certain statute. Commencing with the 1996–97 fiscal year, existing law limits all exemption amounts to the $40,000 and $60,000 amounts of full value specified above.

A constitutional amendment approved by the voters at the November 3, 1992, general election additionally authorizes the Legislature to exempt from property taxation, in whole or in part, the home of a person or that person's spouse, including an unmarried surviving spouse, where that person has, as a result of a service-connected disease or injury, died while on active duty in military service.

This bill would expand existing exemption statutes to implement the Legislature's additional exemption authority described above. It would establish, for the 1994–95 and 1995–96 fiscal years, an exemption in the amount of $100,000 of the full value of an eligible person's residence, or in the amount of $150,000 of the full value of an eligible person's residence where the eligible person's household income does not exceed amounts specified in a certain statute. Commencing with the 1996–97 fiscal year, it would limit the foregoing amounts to $40,000 and $60,000 of full value.

Section 2229 of the Revenue and Taxation Code provides that no new classification or exemption of property for purposes of ad valorem property taxation shall extend more than 5 years or shall exempt more than 75% of the value thereof. The section requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of the exemption.

This bill would provide that the requirements of Section 2229 of the Revenue and Taxation Code do not apply to the property tax exemption provided by the bill, and that no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to this bill.

Ch. 141 (AB 346) Tucker. Notary forms.

(1) Existing law provides for the use of a single, standard form for any certificate of acknowledgment taken within this state, as specified.

This bill would revise the requirements for the prescribed acknowledgment of a durable power of attorney for health care, and revise the certificate of acknowledgment specified in the Uniform Statutory Form Power of Attorney Act, to conform with the requirement for the single, standard form.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 142 (AB 368) Boland. Gambling: slot machines.

Under existing law, it is a defense to any prosecution involving the possession, sale, transportation, or manufacturing of gaming devices if the defendant shows that the device is an antique slot machine and was not operated for gambling purposes while in the defendant's possession. For these purposes, an "antique slot machine" means a slot

NOTE: Superior numbers appear as a separate section at the end of the digests.

machine manufactured in the United States of which ⅔ or more, by count, of the visible exterior metal components (excluding fasteners) are original equipment manufactured prior to 1956; provided, however, that if the machine has a front or top casting, or both, the front casting or the top casting must have been manufactured prior to 1956.

This bill, instead, would provide that for these purposes, an "antique slot machine" means a slot machine that is over 25 years of age.

Ch. 143 (AB 377) Vasconcellos. Claims against the state: appropriation.

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate $1,712,813.53 from specified funds to the Secretary of the State Board of Control to pay claims accepted by the State Board of Control.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 144 (AB 435) Sher. Air pollution: market-based incentives.

(1) Existing law authorizes air pollution control districts and air quality management districts to adopt a market-based incentive program to improve air quality, as specified.

This bill would make those provisions inapplicable to the implementation of market-based transportation control measures which do not involve emissions trading.

(2) Existing law requires the districts, in adopting any program for the use of market-based incentives to improve air quality, to find that the rules and regulations will result in an equivalent reduction in emissions at less cost than current command and control regulations, and provides additional specific criteria applicable to the South Coast Air Quality Management District.

This bill would revise those findings to require an equivalent or greater reduction in emissions at equivalent or less cost, and would express legislative intent regarding the application of those provisions in the south coast district.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 145 (AB 468) Jones. Economic poisons: groundwater protection data.

Existing law requires the Director of Pesticide Regulation to establish a list of economic poisons, entitled the Groundwater Protection List, which have the potential to pollute groundwater. Existing law requires any person who uses an economic poison on the list to report on the use of the poison to the county agricultural commissioner on a form prescribed by the director. Existing law also requires dealers of economic poisons to make quarterly reports of sales to the director.

This bill would limit the latter requirement of reporting sales of economic poisons to persons who are not required to file a pesticide use report.

Ch. 146 (AB 1107) Cortese. Solid waste: plan.

Existing law, the California Integrated Waste Management Act of 1989, requires each county to prepare and submit to the California Integrated Waste Management Board a countywide integrated waste management plan consisting of specified county and city elements. The act requires the plan or any plan amendment to be approved by the county and a majority of cities within the county, as specified, except a source reduction and recycling element.

This bill would also except from that approval process a household hazardous waste element and a nondisposal facility element.

Ch. 147 (AB 1140) Epple. Mobilehomes.

Existing law regulates the fees and charges imposed on mobilehome residents, as specified. Under existing law, the management of a mobilehome park must disclose to a homeowner who is responsible for payment of gas or electric service any condition by which a gas or electric meter on the homeowner's site measures gas or electric service for common area facilities or equipment, as specified.

This bill would expand that provision to require disclosure to the homeowner of any condition by which a watermeter on the homeowner's site measures water service. The

NOTE: Superior numbers appear as a separate section at the end of the digests.

bill would also recast an exception permitted under this provision for specified electric meters.

Ch. 148 (AB 1331) Epple. Family law: ex parte orders.

Existing law, operative January 1, 1994, specifies the procedures to be followed in obtaining, and the requirements for, an ex parte temporary restraining order issued pursuant to specified provisions of the Family Code.

This bill would require such an ex parte temporary restraining order to be issued or denied on the same day that the application is submitted to the court, or on the next day of judicial business if the application is filed too late in the day to permit effective review. The bill would make a related, conforming change, contingent on the enactment of AB 1500.

Ch. 149 (AB 1402) Morrow. Sureties: exoneration.

Existing law specifies that any reduction in the obligation of a principal debtor similarly reduces the obligation of a surety upon the debt. However, existing law also exonerates a surety where the creditor, without the consent of the surety and without indemnification of the surety by the principal debtor, alters the obligation of the principal debtor or the remedies against the debtor. These provisions on exoneraton have been held by the courts not to apply to the acceptance by a creditor of partial payment of the debt without more.

This bill would provide that an agreement by a creditor to accept from the principal debtor a sum less than that owed on the original obligation, without the consent of the surety and without any other change in the underlying agreement between the creditor and principal debtor, does not exonerate the surety for the lesser sum agreed upon.

The bill would also specify that if a surety is liable upon only a portion of the principal debtor's obligation and the principal debtor provides partial satisfaction of the obligation, the principal debtor may designate the portion of the obligation that is to be satisfied.

The bill would state that the above changes are declaratory of existing law.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 150 (AB 1515) Hauser. Food facilities: open-air barbecue facilities.

Existing law regulates the operation of an open-air barbecue facility. Existing law defines "open-air barbecue facility" to mean an unenclosed facility for barbecuing food that is operated by a food establishment, stationary mobile food preparation unit, or temporary food facility.

This bill would further define an "open-air barbecue facility" to mean a facility where the food is prepared out of doors by cooking directly over hot coals, heated lava, hot stones, gas flame, or other method approved by the State Department of Health Services, on equipment designed and maintained for use out of doors.

Ch. 151 (AB 1704) Horcher. Civil actions: common interest developments: limitation of actions.

Existing law authorizes the managing association of a common interest development to exercise certain powers, including the powers granted to a nonprofit mutual benefit corporation, except as specified, standing relating to certain proceedings, and other specified powers granted to these associations, unless the governing documents of the association provides otherwise.

This bill would give these associations the powers described above involving standing and other powers granted to these associations, without regard to the governing documents.

Existing law provides that, subject to certain provisions relating to creditor claims in the administration of estates of decedents, if an action against a person who dies before the expiration of the applicable limitations period survives, an action may be commenced within one year after the date of death, and no other limitations period applies. Under this provision, the one-year limitations period is not tolled or extended for any reason.

This bill would specify that these provisions are subject to existing provisions relating

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to the payment of claims, debts, and expenses from revocable trusts of deceased settlors.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 152 (AB 1740) Horcher. Public utilities: interexchange and local exchange telephone corporations: subpoenas.

Existing law provides that the disclosure of any information by a radiotelephone utility, as defined, in good faith compliance with the terms of a state or federal court warrant or order or administrative subpoena, as specified, is a complete defense against any civil action brought pursuant to existing law.

This bill would extend the scope of this provision to apply to interexchange telephone corporations and local exchange telephone corporations, as defined.

Ch. 153 (AB 2050) Frazee. Contract and purchase order awards: notification procedures.

Existing law requires that when, under a competitive bidding procedure, the state awards a contract for services or a consulting services contract to other than the low bidder, the state must notify the low bidder of this fact by telegram, 5 working days prior to the award of the contract. Under existing law, any bidder may protest the contract award, within specified time limits.

This bill would allow the notice to be made by telegram, electronic facsimile transmission, overnight courier, or personal delivery.

Existing law allows the Department of General Services when it receives purchase estimates for supplies or equipment during the last 90 days of the fiscal year and a purchase order for the supplies or equipment is pending, to make the award during the first 60 days of the following fiscal year.

This bill would extend the time that the department may award purchase estimates received during the last 90 days of a fiscal year to the first 90 days of the following year.

Ch. 154 (AB 2058) Margolin. Volunteer health professionals.

Existing law authorizes local public entities to insure and self-insure themselves and public employees against tort liability.

This bill would authorize counties, cities, cities and counties, and any other local public entity authorized to provide health care services, to insure or self-insure for medical or health-care tort claims against volunteer health professionals who provide uncompensated care for low-income patients in a community clinic or free clinic serving residents within the jurisdiction of the entity. The bill would not authorize coverage for liability covered by other insurance.

Ch. 155 (AB 2097) Takasugi. Taxation: tax settlement.[4]

The existing Sales and Use Tax Law, Personal Income Tax Law, and Bank and Corporation Tax Law provide specified procedures and requirements for the State Board of Equalization's and the Franchise Tax Board's approval or disapproval of a recommendation for settlement of a civil tax matter, and apply those provisions to civil tax matter disputes existing on July 1, 1992, with respect to which recommendations for settlement are first submitted to the Attorney General no later than June 30, 1993, and to either the State Board of Equalization or the Franchise Tax Board, as applicable, no later than September 15, 1993.

This bill would provide that a settlement pursuant to those procedures and requirements shall apply to civil tax matter disputes existing on July 1, 1993, with respect to which recommendations for settlement are first submitted to the Attorney General no later than June 30, 1994, and to either the State Board of Equalization or the Franchise Tax Board, as applicable, no later than September 15, 1994.

This bill would appropriate $2,511,000 from the General Fund to the Department of Finance for allocation to specified agencies for the costs incurred in implementing this bill, as provided.

This bill would declare that it would take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 156 (SB 873) Kopp. State ballot pamphlet.

Existing provisions of the Political Reform Act of 1974, as well as corresponding provisions in the Elections Code, require that the state ballot pamphlet contain, among other things, a complete copy of each ballot measure to be voted upon.

This bill would require that the ballot pamphlet also contain a section near the front of the pamphlet which provides a concise summary of the general meaning and effect of "yes" and "no" votes on each state measure. It would require that the summary statement be prepared by the Legislative Analyst. The bill would also require the statements to be made available for public examination and amendment pursuant to existing provisions of law.

This bill would provide that this provision shall remain in effect only until January 1, 1999, and as of that date is repealed, unless a later enacted statute, which is enacted before January 1, 1999, deletes or extends that date.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

The act also provides that, notwithstanding this vote requirement, the Legislature may amend specified provisions to add to the ballot pamphlet information regarding candidates or other information.

This bill, which would add this category of information to the ballot pamphlet, would therefore require a majority vote.

Ch. 157 (AB 799) T. Friedman. Juvenile offenders.

Existing law authorizes counties to establish juvenile ranches, camps, and forestry camps for the detention of juvenile offenders.

This bill would require the Department of the Youth Authority to establish and implement the Juvenile Offender Local Prevention and Corrections Program, to coordinate state and local efforts to confine, discipline, treat, and prevent juvenile offenders, and to provide partnership funding for county juvenile ranches, camps, and forestry camps.

The bill would also authorize eligible participating counties to receive state financial participation for the administration of county juvenile ranches, camps, and forestry camps.

The bill would also require the Department of the Youth Authority to work with counties to develop boot camp programs for the provision of services in a highly structured military style environment.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 158 (AB 392) Isenberg. Courts.

(1) Existing law establishes San Mateo County and Santa Clara County Pilot Projects, of specified duration, providing for a Family Law Evaluator and an Attorney Mediator, respectively, as specified.

This bill would repeal as of July 1, 1994, the $150 filing fee increase in San Mateo County with respect to specified family law case papers, which currently funds the Family Law Evaluator Pilot Project, as well as the provision specifying that the costs of the Santa Clara County Pilot Project shall be borne by an equalization of specified filing fees, unless that date is extended or deleted by a later enacted statute.

(2) Under existing law, the clerk of a municipal or justice court is responsible for mailing notice of entry by a municipal or justice court of judgment to the parties, but in certain superior court cases, this responsibility falls on the party submitting the proposed judgment or order.

This bill would make the party submitting an order or judgment for entry by any trial court responsible for mailing the notice to the parties, except as specified.

(3) Existing law specifies the priorities of claims against money received by a levying officer in satisfaction of a money judgment.

This bill would revise those priorities with respect to claims for specified court fees.

(4) Existing law specifies the time period for the remittance to a court of amounts owing for specified court fees by certain public agencies which recover judgments.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would shorten that time period and exempt fees collected by a levying officer and remitted to the court.

(5) Under existing law, courts and other public agencies may accept credit card payment of certain obligations.

This bill would authorize a public agency to charge a fee for this use of a credit card to defray costs of providing for payment by credit card, but would require the fee to be approved by the governing body responsible for the fiscal decisions of the public agency.

(6) Existing law provides for the destruction of court documents and county records, as specified.

This bill would authorize a board of supervisors to authorize the public defender, at the request of the public defender, to destroy nonfelony public defender records 8 years after final disposition of a case, notwithstanding the above provisions.

(7) Existing law prescribes the fees for filing or issuing certain court documents, as specified.

This bill would increase the fees for filing a notice of appeal from a municipal or justice court in a civil action or special proceeding, the issuance of specified writs for the enforcement of a court order or judgment, the fee for an order of sale, the fee for filing specified notices of motion, the fee for issuing an abstract of judgment, the fee for an exemplification of record or other paper on file, and the fee for filing an abstract of judgment from another court.

(8) Existing law provides for the establishment by the Judicial Council of a standing Trial Court Budgeting Committee, and specifies the powers and duties thereof.

This bill would rename this agency as the Trial Court Budget Commission, and would revise the powers and duties thereof.

(9) Existing law provides for the reimbursement by the receiving county to the state of specified expenses and half the salary of a judge sitting on assignment in the county.

This bill would eliminate this obligation to reimburse the state. The bill would also make conforming changes.

(10) Existing law establishes the Trial Court Trust Fund, the proceeds of which may only be expended, upon appropriation by the Legislature, for the purpose of funding trial court operations, as specified; and provides for the transmittal to the Controller for deposit in the fund of specified court fees. Existing law also requires prior approval of the Controller before any agency may change the amounts of filing fees allocated to other, specified funds.

This bill would revise the definition of court operations for the purpose of the expenditure of funds in the Trial Court Trust Fund; and would eliminate the transmittal of certain court fees, and require the transmittal of specified portions of certain court fees collected for small claims advisers, to the Controller for deposit in the fund. The bill would also prohibit any agency from changing the amounts of filing fees allocated to other, specified funds.

(11) Existing law sets forth the intent of the Legislature to provide specified funding to counties under the Brown-Presley Trial Court Funding Act, sets forth allocation charts and formulae for trial court funding block grants, establishes the Trial Court Improvement Fund, and specifies the purposes for which moneys in the fund may be expended.

This bill would revise the intent provisions and the allocation charts and formulae for trial court funding block grants, require the transfer of specified excess funds in the Trial Court Trust Fund to the Trial Court Improvement Fund to be expended upon appropriation, as specified, revise the purposes for which moneys in the Trial Court Improvement Fund may be expended, and make related changes.

(12) Existing law provides that certain peace officers, firefighters, and state employees who are subpoenaed as witnesses in a civil action when subpoenaed with respect to matters in the line of duty, shall receive their normal salary and other compensation, to be reimbursed by the party who called the witness.

This bill would add district attorney inspectors, probation officers, and building inspectors to these provisions.

(13) Existing law provides that a retired judge sitting on assignment in a trial court

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

shall receive compensation according to a formula based on the salary of a judge of the court in which he or she is sitting on assignment.

This bill would limit this provision to judges retired under the Judges' Retirement System.

(14) Existing law requires a deposit to be filed with the originating court upon the filing of a specified notice of appeal, to be credited as specified, with certain exceptions and provisions for refund.

This bill would increase the deposit, revise the provisions for credit of the deposit, and eliminate the exceptions and provisions for refund.

(15) Existing law authorizes a court to charge a reasonable fee, not to exceed $10, for a returned check.

This bill would authorize this fee to equal the actual costs incurred by the court to recover the court's processing and collection costs, and would make related changes.

(16) Existing law authorizes a board of supervisors, as specified, to establish the filing fee contributions to be used for the support of the county law library.

This bill would repeal that provision.

(17) Existing law provides for a criminal defendant to pay the costs of probation and presentence investigation in installment payments.

This bill would authorize a board of supervisors to establish a fee for processing these payments, as specified.

(18) Existing law provides for the distribution of base fines and forfeitures resulting from certain city arrests, as specified.

This bill would revise the distribution of these base fines and forfeitures in specified instances, and would make related changes.

(19) Existing law authorizes a county or court with a comprehensive program, until June 30, 1994, to identify and collect certain overdue fines and forfeitures to retain therefrom the costs of operating that program.

This bill would prohibit the retention of capital expenditures related to the cost of operating that program, and extend the program until June 30, 1997.

(20) Existing law requires court clerks to report convictions of specified offenses involving vehicles to the Department of Motor Vehicles on a specified form abstract. Existing law requires the abstract to, among other things, set forth the judgment.

This bill would specify that in the case of an infraction, where the court does not order a driver's license suspension or restriction, the abstract need not set forth the judgment, but only the conviction.

(21) Existing law specifies the authority of the Department of Motor Vehicles to destroy certain notices which have been on file for 5 years.

This bill would expand this provision to apply to further notices.

(22) Existing law sets forth the authority of the Department of Motor Vehicles to suspend a person's privilege to operate a motor vehicle.

This bill would require the department to suspend a person's privilege to operate a motor vehicle upon notification that the person has failed to comply with certain court orders as specified.

(23) Existing law establishes specified procedures for notifying the Department of Motor Vehicles of persons who have failed to appear in court or willfully failed to pay a lawfully imposed fine.

This bill would provide that, with specified exceptions, whenever any person has for a period of 15 or more days willfully failed to obey any court order concerning a Vehicle Code violation other than failure to appear or pay a fine, the Department of Motor Vehicles shall suspend the person's privilege to operate a motor vehicle until compliance with the court order is shown; the magistrate or clerk of the court may give notice of any noncompliance of a court order to the Department of Motor Vehicles; and the suspension shall not become effective until 45 days after the giving of written notice by the department to the person or until the end of any stay of suspension.

(24) The bill would declare that it is to take effect immediately as an urgency statute.

(25) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish

NOTE: Superior numbers appear as a separate section at the end of the digests.

procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 159 (AB 309) Honeycutt. Conditional sentence.

Existing law authorizes the court to give a person convicted of an offense a conditional sentence which is the suspension of the imposition or execution of a sentence and the order of revocable release in the community subject to the conditions established by the court without the supervision of the probation officer.

This bill would authorize the court to make a determination of the ability of the defendant to pay all or a portion of the reasonable cost of a conditional sentence, as specified, set the amount to be reimbursed, and order the defendant to pay that sum to the county, as specified.

This bill would incorporate additional changes in Section 1203.1b of the Penal Code proposed by AB 306, to be operative only if AB 306 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 160 (AB 19) Quackenbush. School districts: pupil attendance alternatives.

(1) Existing law requires each person subject to compulsory full-time education to attend the school in which the residency of either the parent or legal guardian is located, subject to specified exceptions. Existing law additionally prescribes the requirements for the admission of pupils residing in another school district pursuant to an agreement by the governing board of 2 or more school districts.

This bill would authorize the governing board of any school district to admit pupils residing in another school district to attend any school in that district, as specified. The bill would require each school district that elects to accept transfers to adopt a resolution to determine the number of transfers it will accept and to ensure that the pupils admitted under the policy are selected through a random, unbiased selection process.

The bill would authorize the district of residence or the district of choice to prohibit a transfer upon a determination that the transfer would negatively impact that district's court-ordered or voluntary desegregation plan or that district's racial and ethnic balance and would place additional conditions upon the administration of the transfers. The bill would authorize districts of residence to limit the number of pupils newly transferring out each year as specified.

The bill would require, commencing January 1, 1994, that an application for transfer be submitted by January 1 of the school year preceding the school year for which the pupil is to be transferred unless the deadline is waived. The bill also would prohibit the submittal of applications for that purpose after January 1, 1998.

The bill would require school districts that have elected to accept transfer pupils to approve or reject each application for transfer between districts within 90 days after receiving the application. This bill would require that transfers be granted for the entire school year and be automatically renewed for each succeeding year unless the school district of choice, through the adoption of a resolution, withdraws from participation in the program and no longer accepts any transfer pupils from other districts. High school transfers, however, would be automatically renewed even if a school district of choice withdraws from participation in the program. The bill would permit school districts of choice to revoke the transfer of any pupil who is recommended for expulsion.

The bill would credit the district, as to pupils admitted to a school district under this authority, with a corresponding increase in average daily attendance for state apportionment purposes and for purposes of certain computations under the Leroy F. Greene State School Building Lease-Purchase Law of 1976, including computations affecting allowable building area for school construction projects. The bill would require that state aid for categorical education programs for the pupil be apportioned to the school district of choice. The bill would require the admitting district, at the request of the pupil's

NOTE: Superior numbers appear as a separate section at the end of the digests.

parent or guardian, to provide pupil transportation within the district, to the extent the district otherwise provides transportation assistance to pupils.

The bill would require each school district to report annually to the Superintendent of Public Instruction regarding pupil applications and transfers between districts pursuant to the above authority and would require the superintendent to summarize and report that information to the Legislature.

The bill would require that the county board of education adopt a plan to conduct an outreach program to inform every parent of the attendance options described above, to the extent that funding is provided for that purpose.

The bill would repeal those provisions as of July 1, 2000.

The bill would impose an additional requirement for the maintenance by school districts of an accounting of the receipt and disposition of requests for alternative attendance and for the annual reporting of that information to the Superintendent of Public Instruction.

(2) Existing law requires that parents be notified by the governing board of a school district of their various statutory rights or responsibilities.

This bill would create a state-mandated local program by requiring the governing board of each school district to notify a pupil's parent or guardian of available attendance options, as specified.

(3) This bill would require the Superintendent of Public Instruction to evaluate and report on the interdistrict transfer program by January 1, 1999.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(5) The bill would become operative only if AB 1114 of the 1993–94 Regular Session is enacted.

Ch. 161 (AB 1114) Alpert. School districts: intradistrict attendance.

(1) Existing law requires the governing board of each school district, as a condition for the receipt of school apportionments from the State School Fund, to adopt rules and regulations establishing designated school district policies.

This bill, in addition, would require the governing board of each school district, as a condition for the receipt of those funds to adopt rules and regulations, on or before July 1, 1994, establishing a policy of open enrollment within the district for residents of the district, and would thereby impose a state-mandated local program. The bill would require that the open enrollment policy, subject to specified limitations, authorize the parent or guardian of each schoolage child to select the schools that the child shall attend, irrespective of the particular locations of his or her residences within the district.

(2) Existing law requires the governing board of each school district to notify the parent or guardian of its minor pupils regarding certain provisions relating to education at the beginning of the first semester or quarter of the regular school term.

This bill, in addition, would require the governing board to notify the parent or guardian of each schoolage child of attendance options available in the school district, as specified, including any special programmatic options available on an interdistrict and intradistrict basis, and would thereby impose a state-mandated local program.

This bill would provide that it shall become operative only if AB 19 of the 1993–94 Regular Session is enacted.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 162 (AB 112) Bronshvag. Robbery: inhabited floating homes.

Existing law makes it a crime, punishable as specified, to commit a robbery of an inhabited dwelling house, vessel, trailer coach, or portion of a building.

This bill would provide, in addition, that it is a crime to commit a robbery of an inhabited floating home, as defined. This bill would impose a state-mandated local program by expanding the scope of an existing crime. The bill would make other conforming and clarifying changes relating to residential robbery and residential burglary occurring in an inhabited floating home.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 163 (AB 175) Polanco. Hazardous substance cleanup: redevelopment agencies.

(1) Existing law, until January 1, 1994, authorizes a redevelopment agency, or a legislative body which has elected to exercise the powers granted to an agency, to take any action which the agency or the legislative body determines is necessary, as specified, to remedy or remove a release of hazardous substances on, under, or from a project area, under specified conditions. After that date, existing law requires a redevelopment agency or such a legislative body to obtain the written approval of the Department of Toxic Substances Control or a California regional water quality control board before removing or remedying hazardous waste from property within a project area. Existing law provides immunity from liability under specified state laws, with regard to remedial or removal actions commenced by an agency or legislative body before January 1, 1994, to an agency or legislative body which undertakes and completes a remedial or removal action on project property, as specified, and to any employee or agent of that agency or body and to other persons, as specified, and imposes liability, with regard to remedial or removal actions commenced by an agency or legislative body before January 1, 1994, upon the responsible party.

This bill would extend the operative date of the provision authorizing an agency or a legislative body to take any action to remedy or remove a release of hazardous substances on, under, or from a project area, until January 1, 1999, and would repeal that authorization as of January 1, 1999. The bill would require, after January 1, 1999, an agency or a legislative body to obtain the written approval of the department or a regional board before removing or remedying hazardous waste. The bill would extend the immunity and liability provisions to remedial or removal actions commenced by an agency or legislative body before January 1, 1999.

(2) The Governor's Reorganization Plan No. 1 of 1991, which took effect on July 17, 1991, among other things, created the Department of Toxic Substances Control and transferred to that department the toxic substances program of the State Department of Health Services.

This bill would conform the provisions specified in paragraph (1), above, to that program transfer.

Ch. 164 (AB 287) Aguiar. Juveniles.

Existing law authorizes the juvenile court to issue a warrant of arrest for a minor whenever a petition has been filed in the juvenile court alleging that a minor is habitually disobedient or truant, as specified, or that a minor has violated any law, except as specified, and praying for a hearing thereon, or whenever a subsequent petition has been filed praying for a hearing in the matter of a minor as described above and it appears to the court that the conduct and behavior of the minor may endanger the

NOTE: Superior numbers appear as a separate section at the end of the digests.

health, person, welfare, or property of himself or herself or others.

Existing law also authorizes the juvenile court, upon the adjudication of a minor as a ward of the court for violation of the law, as specified, to impose any and all reasonable conditions that it may determine fitting and proper to the end that justice may be done and the reformation and rehabilitation of the ward enhanced, to order that the minor be under the supervision of the probation officer, as specified, and to commit the minor to a juvenile home, ranch, camp, or forestry camp, or county juvenile hall.

This bill would provide that when a ward described above is placed under the supervision of the probation officer or committed to the care, custody, and control of the probation officer, and is required as a condition of probation to participate in community service or graffiti cleanup, the court may impose a condition that if the minor unreasonably fails to attend or unreasonably leaves prior to completing the assigned daily hours of community service or graffiti cleanup, a law enforcement officer may take the minor into custody for the purpose of returning the minor to the site of the community service or graffiti cleanup.

Ch. 165 (AB 294) Bornstein. Minors.

Existing law provides that an assault or battery by any person confined in an institution under the jurisdiction of the Department of the Youth Authority upon the person of any individual not confined in such an institution is punishable by a fine or by imprisonment not to exceed one year, or by both. Existing law also provides that such an assault or battery which inflicts serious bodily injury is punishable by imprisonment for up to 4 years.

This bill would revise the latter provision to provide that an assault by a person confined in an institution under the jurisdiction of the department upon the person of any individual not confined therein, with a deadly weapon or instrument, or by any means of force likely to produce great bodily injury, is a felony punishable by imprisonment for 2, 4, or 6 years.

Ch. 166 (AB 388) Statham. Beekeepers: notification of pesticide applications.

Existing law provides for the establishment of regions for the notification of apiary owners of pesticide applications, and the designation of a county agricultural commissioner as a coordinator for the region. Existing law provides that the coordinator may receive money from any source for deposit in the Department of Food and Agriculture Fund for expenditure for the purposes of the notification program, upon appropriation by the Legislature.

This bill would provide for the deposit of these funds in the Department of Pesticide Regulation Fund and would permit the coordinator, with the approval of the Director of Pesticide Regulation, to deposit the moneys in the county treasury to be expended for the purposes of the notification program upon appropriation therefor by the county board of supervisors.

Ch. 167 (AB 417) Klehs. Offsets: judgments: labor.

Existing law authorizes the Controller, in his or her discretion, to offset, among other things, amounts due a state agency from a person or entity, against any amount owing that person or entity by any state agency.

This bill would require the Controller to offset amounts due by a person or entity as a result of any judgment based on a final order of the Labor Commissioner with respect to employee complaints against employers that is not satisfied, as provided, against state income, franchise, and sales and use tax refunds and winnings in the California State Lottery, as specified, owed to the person or entity against whom the judgment was entered.

Ch. 168 (AB 427) Frazee. Contractors: underground storage tank installation or removal.

Existing law prohibits a contractor from bidding for the installation or removal of, or installing or removing, an underground storage tank, unless the contractor has passed the hazardous substance removal certification examination.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would correct the reference to hazardous substance certification examination. The bill would allow a contractor who is not certified to bid on or contract for the installation or removal of an underground tank, as long as the work is performed by a contractor who is certified.

Ch. 169 (AB 529) Morrow. Peace officers.

Existing law provides that certain persons who have been deputized or appointed by the proper authority as, among other things, a reserve or auxiliary sheriff or city police officer, a reserve deputy sheriff, a reserve police officer of a regional park district or of a transit district, a reserve deputy of the Department of Fish and Game, or a reserve special agent of the Department of Justice, are designated as peace officers for the duration of the person's specific assignment.

This bill would add reserve harbor or port police officers of a county, city, or district, as specified, to these provisions.

Ch. 170 (AB 534) Archie-Hudson. State contracts.

Existing law prescribes penalties on state agencies that fail to pay for property or services on the date required by contract.

This bill would provide that those provisions are applicable to all state agencies, including, but not limited to, the Public Employees' Retirement System, the State Teachers' Retirement System, the Department of General Services, and the Treasurer.

Ch. 171 (AB 543) Jones. Pest control operations.

Existing law provides that whenever a county agricultural commissioner suspends, for 10 days or less, a pest control operator registration, a pest control aircraft pilot registration, a pest control adviser registration, or a permit to use restricted materials, the party suspended may appeal to the Director of Pesticide Regulation within 10 days of mailing or personal service of the commissioner's order.

This bill would delete the language restricting the foregoing provisions to suspensions of 10 days or less. This bill would also provide for review of a decision of the director by administrative mandamus.

Ch. 172 (AB 563) Cortese. Wine Grape Inspection Advisory Committee.

(1) Existing law establishes the Wine Grape Inspection Advisory Committee with prescribed powers and duties to advise the Director of Food and Agriculture on all matters pertaining to grapes for wine and byproducts. Effective January 1, 1994, the membership of the committee will be reduced from 21 members to 17 members.

This bill would delay the operative date of that change until January 1, 1996.

(2) Existing law permits the director to inspect any transaction that involves the use of fresh grapes for wine and byproducts purposes for varietal and appellation integrity. These provisions will be repealed January 1, 1994.

This bill would continue that existing law to January 1, 1996, by extending that repeal date. Since a violation of these provisions is a misdemeanor, the bill would impose a state-mandated local program by extending the operation of an existing crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 173 (AB 695) Rainey. Property taxation.

Existing property tax law requires every person owning taxable personal property, other than as specified, having an aggregate cost of $30,000 or more, to file a signed property statement with the assessor.

This bill would limit this requirement to owners of taxable personal property having an aggregate cost of $30,000 or more for the initial assessment year or an aggregate cost of $100,000 or more for subsequent assessment years.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 174 (AB 701) Tucker. Public Employees' Retirement System: optional additional member contributions.

The existing Public Employees' Retirement Law permits state peace officer/firefighter members employed by the Department of Corrections, the Department of the Youth Authority, the Board of Prison Terms, or the Youthful Offender Parole Board to choose to make additional member contributions to PERS solely at their expense. All additional member contributions are required to be credited at the net earnings rate compounded each June 30, after deducting related administrative costs. Each employer is prohibited from making any related employer contributions or additional employer contributions. The law authorizes the distribution, upon retirement, of accumulated additional member contributions in a lump sum or to a private annuity through a nontaxable rollover.

This bill would make the authorization to participate in the additional member contributions program applicable, instead, to all state members.

Ch. 175 (AB 820) B. Friedman. Youth Authority commitments: disabled children.

Existing law authorizes the juvenile court to commit certain wards to the custody of the Youth Authority.

This bill would, subject to specified requirements, require prior transmission of a previously prepared individualized education program to the Department of the Youth Authority as a condition to the transfer to the Youth Authority of a juvenile identified as a defined individual with exceptional needs. By imposing additional requirements on local officials with respect to the transmittal of these plans to the Youth Authority, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 176 (AB 877) McDonald. Child and family support.

Under existing law, a state employee may authorize deductions from his or her salaries or wages for payment for the support, maintenance, or care of the employee's child, children, family, or former spouse for whom the employee has a duty of support. Existing law also provides that when a court orders a person to make payment for child or family support, the court may order that individual to make payment as authorized by the provision described above. These provisions are effective until January 1, 1994.

This bill would delete the repeal of these provisions, and would make a related change to correspond to the enactment of the Family Code.

Ch. 177 (AB 1051) Campbell. Indian education centers: sunset.

Under existing law, the Legislature is required to conduct a comprehensive review of certain education programs. These programs, as presently maintained, cease to be operative on various specified dates, unless the Legislature enacts legislation providing otherwise. If the Legislature does not enact that legislation, funding for the general purpose of the program may continue after the termination date, but relevant statutes and regulations are not operative. Under current law, the provisions governing Indian education centers ceased to be operative January 1, 1992.

This bill would delete the scheduled January 1, 1992, inoperative date and specify that all statutes and regulations relative to Indian education centers that became inoperative on that date shall become operative on January 1, 1994.

This bill would establish a new inoperative date of January 1, 1997, for Indian education centers.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 178 (AB 1221) Frazee. Fire protection: high rise structures.

(1) Existing law requires a licensed architect who submits final plans for a privately owned high rise structure to send a letter to the local fire agency acknowledging that, to the best of his or her information, knowledge, and belief, the plans take into consideration applicable high rise safety regulations.

This bill would delete that provision.

(2) Existing law requires a general contractor who constructs a privately owned high rise structure to certify, by letter to the State Fire Marshal and the local fire agency that the construction conforms to final plans for the structure that were acknowledged as described in (1).

This bill would delete that provision and make a conforming change.

Ch. 179 (AB 1247) Polanco. Highways: California Historic Parkways.

(1) Existing law creates a state highway system, that includes a system of freeways and a system of scenic highways.

This bill would create within the state scenic highway system a system of California Historic Parkways, consisting of freeways constructed prior to 1945 and meeting other specified criteria.

The bill would require the Department of Transportation, in consultation with the Office of Historic Preservation in the Department of Parks and Recreation, to design signage for use on California Historic Parkways. The bill would require the department to cause appropriate signs and markers to be placed and maintained along those portions of the highways which have been designated as California Historic Parkways. The bill would require a local agency, as defined, to coordinate planning with, and obtain approval from, the appropriate planning agency with regard to the construction of any agency facility that would be located within any California Historic Parkway. The bill would impose a state-mandated local program by imposing duties on those local agencies.

The bill would designate a segment of the Pasadena Freeway as a California Historic Parkway which the bill would name the Arroyo Seco Parkway.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 180 (AB 1284) McDonald. Rail passenger service: highway informational signs.

Existing law authorizes the Department of Transportation to place informational signs within the right-of-way of state highways that are parallel or adjacent to state-funded passenger rail routes in existence on January 1, 1982, to inform motorists of rail transportation services.

This bill would eliminate the restriction as to rail routes in existence on January 1, 1982, and would, instead, make the authorization applicable to any publicly funded passenger rail route, regardless of when it came into existence.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 181 (AB 1288) Moore. Sales and use taxes: relief from tax, interest, and penalties.

The existing Sales and Use Tax Law imposes specified taxes on the sale and use of tangible personal property, unless the sale or use is exempt from tax. That law provides for the making of returns, payment of taxes, and the imposition of interest and penalties for specified violations thereof.

This bill would provide under regulations prescribed by the State Board of Equaliza-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

tion that if both spouses' names appear on an application for a seller's permit, as specified, and a tax liability under the sales and use tax law is unreported or understated due to certain omissions of one spouse, and the other spouse did not know of, and had no reason to know of, the understatement, and certain other criteria are met, then the other spouse shall be relieved of liability for tax, interest, and penalties attributable to that understatement, as provided.

Ch. 182 (AB 1341) Umberg. Crimes: search warrants.

Existing law sets forth procedures for the issuance of search warrants either upon written affidavit or, in lieu of the written affidavit, upon an oral statement made to the magistrate under oath which shall be recorded and transcribed, as specified.

This bill, in addition, would provide that in lieu of the written affidavit requirement, the magistrate may take an oral statement under oath made using telephone and facsimile transmission equipment, as specified.

Ch. 183 (AB 1405) Morrow. Solid waste: diversion requirements.

Existing law, the California Integrated Waste Management Act of 1989, requires cities and counties to divert 25% of all solid waste from landfill or transformation facilities by January 1, 1995, and, with specified exceptions, to divert 50% by January 1, 2000, through source reduction, recycling, and composting activities. The act authorizes the California Integrated Waste Management Board to grant a one-year extension from those diversion requirements to any city or county if specified conditions are met.

This bill would also authorize the board to grant an extension from the diversion requirements, as specified, to a city that was incorporated after January 1, 1990, if specified conditions are met.

Ch. 184 (AB 1593) Cortese. Water transfers.

Existing law authorizes, under certain circumstances, a water supplier, defined to mean a local public agency, a private company supplying or storing water, or a mutual water company, to contract with other water suppliers to transfer, or store as part of a transfer, water.

This bill would authorize a water supplier to contract with other state or local water suppliers for those purposes.

Ch. 185 (AB 1562) Tucker. Horseracing: charity days.

Existing law requires each licensed racing association that conducts 14 or less weeks of racing to designate 3 racing days, and each licensed racing association that conducts more than 14 weeks of racing to designate 5 racing days during any one meeting, to be conducted as charity days. Existing law excepts from this requirement the California Exposition and State Fair or a county or district agricultural association fair.

This bill would, in addition, except from this requirement a licensed racing association that conducts 3 weeks of racing or less.

Ch. 186 (AB 1566) Goldsmith. Vehicles: registration fees: failure to pay.

Existing law, with specified exceptions, prohibits driving, moving, or allowing to stand upon a highway, or in, or on, an off-street parking facility, specified vehicles unless they are registered and the appropriate fees have been paid.

This bill would specifically apply that prohibition to a vehicle that is towed from a highway or off-street parking facility under the direction of a highway service organization engaged in providing emergency road service to that vehicle. The bill would exempt the operator of a tow truck providing that assistance to that vehicle from responsibility for the violation of existing law with respect to that vehicle. The bill would require the owner of an unregistered vehicle that is disabled and located on private property to obtain from the Department of Motor Vehicles, prior to having that vehicle towed, a permit in accordance with a specified provision of existing law.

Ch. 187 (AB 1609) Aguiar. Marketing of milk and other dairy products.

Existing law requires the Director of Food and Agriculture, upon the receipt of any verified complaint, to investigate any transaction that involves the violation of any

NOTE: Superior numbers appear as a separate section at the end of the digests.

provision of law relating to the marketing of milk and other dairy products.

This bill would permit, instead of require, the director to investigate those transactions upon the receipt of any verified complaint, and would permit the director to hold a hearing on the matter without regard to whether a verified complaint is received.

Ch. 188 (AB 1641) Cortese. Water resources.

Existing law authorizes a local or regional public agency authorized by law to serve water to sell, lease, exchange, or transfer, for use outside the agency, water that is surplus to the needs of the water users of the agency.

This bill would, in addition, authorize the local or regional public agency to sell, lease, exchange, or transfer, for use outside the agency, water, the use of which is voluntarily foregone, during the period of the transfer, by a water user of the agency.

Ch. 189 (AB 1648) Boland. Firearms: gun shows or events: dealer sales.

Under existing law, for purposes of processing private party sales or transfers, a licensed firearm dealer is permitted to take possession of the private party's firearm and commence preparation of the register of sale, delivery, or transfer at a gun show or event, as defined. A licensed dealer is also permitted under existing law to sell, lease, or transfer firearms other than pistols, revolvers, or other firearms capable of being concealed upon the person at gun shows or events, as specified.

This bill would delete the requirement that the sale, lease, or transfer be for the purpose of processing a private party sale or transfer and would instead authorize a licensed dealer to commence preparation of registers for the sale, delivery, or transfer of firearms at gun shows or events, as specified.

Ch. 190 (AB 1828) Sher. Joint powers agreements.

Existing law permits 2 or more public agencies, by agreement, to jointly exercise any power common to the contracting parties, if authorized by their legislative or governing bodies. Existing law authorizes an entity created by a joint powers agreement to issue revenue bonds to pay the cost and expenses of acquiring or constructing certain projects, as defined, for specified purposes.

This bill would additionally provide that the revenue bonds may be used to pay the cost and expenses of conducting a program and would add as an additional purpose programs, facilities, rights, properties, and improvements to reduce the demand for or to permit the efficient use of energy and water, as specified, as long as that cost may be charged to a capital account as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 191 (AB 1962) Morrow. State militia: disability retirement or discharge.

Existing law requires that when a board of officers finds that an officer is incapacitated for active service, and that the incapacity is the result of an incident of the service, upon approval of the decision by the Governor, the officer is retired from active service and placed on the retired list of officers, if the decision, approved by the Governor, is that the disability is not the result of any incident of service, the officer is retired or discharged from active service, as the Governor may determine. Existing law requires that any disability after fifteen years of commissioned service be deemed to have occurred as the result of an incident of the service.

This bill would delete the requirement that any disability after fifteen years of commissioned service be deemed to have occurred as the result of an incident of the service.

Ch. 192 (AB 2314) Polanco. Public contracts: minority, women, and disadvantaged business enterprises certification.

Under existing law, any state or local agency may elect to participate in the certification process, as defined, of minority, women, and disadvantaged business enterprises, for purposes of awarding public contract work. Existing law defines minority, women, and disadvantaged business enterprises, for purposes of certification. Existing law requires that the certification information obtained by state or local agencies be submitted to the Department of Transportation for inclusion in a computerized data bank. Under existing

NOTE: Superior numbers appear as a separate section at the end of the digests.

law, certification as a minority, woman, or disadvantaged business enterprise is granted for a period of 1 year.

This bill would lengthen the period of time certification as a minority, woman, or disabled business enterprise is granted, to 2 years.

Ch. 193 (SB 115) Beverly. Securities: small companies.

Under the existing Corporate Securities Law of 1968, it is unlawful for any person to offer or sell in this state any security, except as specified, unless the sale has been qualified, as specified, or unless the security or transaction is exempted, as specified. Included among exempted transactions is any offer of a security for which a registration statement under the federal Securities Act of 1933 has been filed but has not yet become effective, subject to certain conditions.

This bill would additionally exempt any offer of a security for which an offering statement under Regulation A of the Securities Act of 1933 has been filed but has not yet been qualified.

Under existing law, certain securities, whether or not eligible for qualification by coordination or notification, as specified, may be qualified by permit. Existing law authorizes an applicant to file a small company application for qualification of the sale of securities by permit if it meets certain conditions. One of these conditions requires that the applicant file an undertaking with the Corporations Commissioner that there will be no stock splits, stock dividends, spinoffs, or mergers for a period of 2 years from the close of the offering.

This bill would permit the commissioner, notwithstanding the undertaking, to approve a spinoff or merger pursuant to an application for qualification filed by an applicant.

Existing law authorizes the commissioner to charge and collect a specified fee for filing a small company application for qualification of securities by permit. Existing law permits the commissioner to charge an additional fee not to exceed $1,000 if the actual costs of processing the application exceeds the filing fee.

This bill would make that provision applicable in the cases where the costs, rather than the actual costs of processing the application fee, exceeds the filing fee and would permit the commissioner, in determining the costs, to use the estimated average hourly cost for all persons processing applications for the fiscal year.

Existing law authorizes the commissioner to charge a fee for any examination, audit, or investigation in connection with specified activities based upon actual compensation and expenses.

This bill would, instead, base this fee upon compensation and expenses, rather than actual compensation and expenses, and would authorize the commissioner, in determining the costs associated with an examination, audit, or investigation, to use the estimated average hourly cost for all persons performing examinations, audits, or investigations for the fiscal year.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 194 (SB 186) Committee on Local Government. Municipal improvements: assessments: bonds.

Existing law prescribes procedures for the levying of assessments by counties and cities upon real property, and for the issuance of bonds secured by assessments, to finance the cost of local streets and roads.

This bill would repeal one of those laws, the Street Opening Act of 1903, portions of which have been repealed previously. The bill would also make procedural and related changes in the Improvement Bond Act of 1915.

Ch. 195 (SB 259) Roberti. Department of Corrections: prisoners: religion.

Existing law provides that it is the intention of the Legislature that all prisoners shall be afforded reasonable opportunity to exercise religious freedom.

This bill would require the Department of Corrections to report to the Legislature on or before March 25, 1994, on the department's efforts to accommodate any special religious dietary needs of prison inmates.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 196 (SB 370) Leslie. Easements: repair.

Existing law requires the owner of any easement in the nature of a private right-of-way, or of any land to which such an easement is attached, to maintain the easement in repair, and provides for the sharing of the costs of repair pursuant to an agreement if an easement has more than one owner.

This bill would specify that these agreements are to be construed to contemplate snow removal if (1) not expressly precluded by the agreement, (2) snow removal is necessary for access to the properties served by the easement, and (3) snow removal is approved in advance by the owners or their elected representatives in the same manner as prescribed by the agreement for repairs.

Ch. 197 (SB 565) Alquist. Seismic safety.

Under existing law, the Alquist-Priolo Special Studies Zones Act, the State Geologist is required to delineate special studies zones, encompassing certain areas of earthquake hazard, and to compile maps delineating those zones. Cities and counties are required, prior to approval of a "project," as defined, to require a geologic report defining and delineating any hazard of surface fault rupture, unless the report is waived, as specified.

This bill would rename that act the Alquist-Priolo Earthquake Fault Zoning Act, would redesignate the special studies zones as earthquake fault zones, and would make related changes.

Ch. 198 (SB 829) Mello. Enterprise zones: disaster areas.

The Enterprise Zone Act prescribes the criteria for the designation of enterprise zones by the Department of Commerce.

This bill would require the department in designating new enterprise zones to include in its criteria the fact that jurisdictions have been declared disaster areas by the President of the United States within the last 7 years.

Ch. 199 (SB 859) Hughes. Local governments: Health Insurance Purchasing Alliance.

The existing statutes authorize the provision of various forms of group health benefits to local governmental employees and retirees and their dependents.

This bill would authorize the governing bodies of any 2 or more counties maintaining county retirement systems under the County Employees Retirement Law of 1937, to elect to form or participate in a Health Insurance Purchasing Alliance for their eligible employees and retirees and their eligible dependents. Certain other local public agencies would thereafter be authorized to join the program. This bill would require that the program be governed by a board of directors of specified composition, would provide for an advisory committee, and would prescribe the powers and duties of the board and the committee.

Ch. 200 (AB 82) Peace. Vehicles: sales: wholesale motor vehicle auction dealers.

Existing law requires the Department of Motor Vehicles to waive any renewal penalties that may be due when a legal owner or his or her agent repossesses a vehicle on which renewal fees are due, if the fees are paid within 60 days of taking possession.

This bill would require the department to waive any penalties when a repossessed vehicle is sold through a dealer conducting a wholesale vehicle auction, as specified, if all renewal fees that are due are paid not later than 60 days after the date of sale at the auction.

Ch. 201 (AB 181) Seastrand. Grand Army of the Republic.

Under existing law, a suitably furnished room is required to be set apart at the State Capitol for use as the headquarters and for the care and storage of books and papers of the Grand Army of the Republic.

This bill would delete those provisions, would acknowledge that many of these artifacts have been donated to the California National Guard Military Museum and Resource Center, and would require the Adjutant General to provide within the California National Guard Military Museum and Resource Center for the care and display of the

NOTE: Superior numbers appear as a separate section at the end of the digests.

display cabinet that was used at the State Capitol to display the books, papers, and other artifacts relating to the Grand Army of the Republic , and would permit the Adjutant General to make arrangements for use of the display cabinet in the public display of the artifacts throughout the state.

This bill would require that suitable facilities be provided at the State Capitol for storage or display of certain flags of the Grand Army of the Republic, and of Civil War era paintings, and other Civil War artifacts and memorabilia.

Ch. 202 (AB 297) Snyder. Podiatry.

Existing law permits a podiatrist to perform surgical treatment of the ankle and tendons at the level of the ankle only in a licensed general acute care hospital, as defined.

This bill would additionally permit a podiatrist to perform this surgical treatment in (1) a licensed surgical clinic if the podiatrist has surgical privileges, including the privilege to perform surgery on the ankle, in a licensed general acute care hospital and meets all the protocols of the clinic, (2) an ambulatory surgical center that is certified to participate in the federal Medicare program if the podiatrist has surgical privileges, including the privilege to perform surgery on the ankle, in a licensed general acute care hospital and meets all the protocols of the center, and (3) a freestanding physical plant housing outpatient services, as defined.

Ch. 203 (AB 385) Hannigan. Water quality.

Existing law requires the State Water Resources Control Board to establish annual fees applicable to all point and nonpoint dischargers who discharge into enclosed bays, estuaries, or any adjacent waters in the contiguous zone or the ocean.

This bill would prohibit the board from imposing these fees on dischargers who discharge from lands managed solely to provide habitat for waterfowl and other water-dependent wildlife.

Ch. 204 (AB 496) Cannella. Private schools: assessment tests.

Existing law requires the Superintendent of Public Instruction to design and implement a statewide pupil assessment program to implement specified testing requirements. The State Board of Education is required to require a testing program in all public school districts.

This bill would authorize any private school to adopt the pupil assessment program developed by the superintendent to use for testing pupils in that school. The State Department of Education would be required to calculate its cost of supplying the test materials and of distributing and grading the test to a school, which amount would be reimbursed to the department by any private school that chooses to use that test. The superintendent, or his or her designee, would be required to appoint a representative of the local public education community to proctor the administration of a pupil assessment test given at any private school.

Ch. 205 (AB 704) Sher. Reclaimed water.

(1) Existing law requires the State Department of Health Services to establish statewide reclamation criteria for each use of reclaimed water if the use requires the protection of public health.

This bill would require the department to establish statewide reclamation criteria that are uniform and would make conforming changes.

(2) Existing law requires the department or local health officer, if either entity finds that a contamination exists as a result of the use of reclaimed water, to order the contamination to be abated.

This bill would, for the purpose of that provision, provide that the use of reclaimed water in accordance with uniform statewide reclamation criteria does not cause, constitute, or contribute to, any form of contamination, unless the department or a California regional water quality control board determines that contamination exists.

(3) Existing law requires each regional board, under certain circumstances, and after consultation with the department, to prescribe requirements for the use of reclaimed water in accordance with the statewide water reclamation criteria.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the regional boards to consult with the department and any party who has requested in writing to be consulted before prescribing those requirements. The bill would require the requirements for a use of reclaimed water not addressed by the uniform statewide reclamation criteria to be considered on a case-by-case basis.

(4) Existing law authorizes the regional boards, after consulting with the department and holding a hearing, to issue a master reclamation permit to a supplier or distributor of reclaimed water in lieu of prescribing waste discharge requirements or water reclamation requirements.

This bill would require the regional boards to consult with the department and any party who has requested in writing to be consulted before issuing that permit. The bill would require permit conditions for a use of reclaimed water not addressed by the uniform statewide water reclamation criteria to be considered on a case-by-case basis.

(5) Existing law grants to the department and local health officers certain authority relating to the contamination of the waters of the state.

This bill would provide that those provisions do not affect the authority of a city or county to adopt and enforce regulations relating to the use of reclaimed water in accordance with prescribed state water reclamation law.

Ch. 206 (AB 732) Hauser. Driving offenses: restricted commercial driver's license.

(1) Under existing law, if the Department of Motor Vehicles has made an administrative review determining that a person refused to submit to or failed to complete a chemical test and there is reasonable cause to believe the person has violated certain alcohol-related driving offenses and the person has a commercial driver's license and has no separate violations of certain alcohol-related offenses, suspensions, or revocations, the department is required to suspend the person's driving privilege for 30 days and reissue the person a restricted commercial driver's license for driving to and from, and in the course and scope of, employment, as specified.

This bill would specify that the reissuance by the department of a restricted commercial driver's license includes any endorsements.

(2) Existing law authorizes the department to refuse to issue or renew, or revoke, the certificate or endorsement, as specified, of a person who commits any violation that results in a conviction assigned a violation point count of 2 or more, as specified, but provides an exception for a person who possesses a certificate to operate a transit bus, and operates only a transit bus, by prohibiting the department from refusing to issue or renew, or revoking, the certificate or endorsement of that person if the violation leading to the person's conviction occurred in his or her private vehicle and not in a commercial motor vehicle, as specified. Existing law authorizes the department to refuse to issue or renew, or revoke the certificate or endorsement of a person who has had his or her driving privilege suspended, revoked, or on probation for any reason involving unsafe operation of a motor vehicle, but provides an exception for a person who possesses a certificate to operate a transit bus, and operates only a transit bus, by prohibiting the department from refusing to issue or renew, or revoking, the certificate or endorsement of that person if that person's driving privilege has, within the preceding 3 years, been placed on probation only for any reason involving unsafe operation of a motor vehicle.

This bill would delete the exceptions for persons who possess a certificate to operate a transit bus, and operate only a transit bus. The bill would, instead, prohibit the department from refusing to issue or renew, or revoking, a person's hazardous materials or passenger transportation vehicle endorsement if the violation leading to the person's conviction on a violation assigned a point count of 2 or more occurred in his or her private vehicle and not in a commercial motor vehicle, as specified, or if that person's driving privilege has, within the preceding 3 years, been placed on probation only for any reason involving unsafe operation of a motor vehicle or if specified provisions of existing law regarding the suspension, reissuance, or restriction of a commercial driver's license apply.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 207 (AB 833) Cannella. Horseracing revenue: appropriation for state designated fairs: citrus fruit fairs.

(1) Existing law provides for the continuous appropriation of license fees from on-track wagering for various specific purposes.

This bill would provide that notwithstanding those provisions, for the 1993–94 fiscal year, those funds shall be utilized for capital outlay for fair projects involving public health and safety, for fair projects involving major and deferred maintenance, for fair projects necessary due to any emergency, for projects that are required by physical changes to the fair site, for projects that are required to protect the fair property or installation, such as fencing and flood protection, for the acquisition or improvement of any property or facility that will serve to enhance the operation of the fair, and for general operational support purposes and may be allocated by the Director of Food and Agriculture for those purposes to all state designated fairs, as defined. This bill would make an appropriation by requiring that continuously appropriated funds be used for a new purpose.

(2) Existing law defines "citrus fruit fair" as, among other things, a fair that has been conducted and carried on by an association for not less than 10 or more than 15 consecutive days during each calendar year for a period of not less than 20 consecutive years.

This bill would define "citrus fruit fair" as, among other things, a fair that has been conducted and carried on by an association for not less than 4 or more than 15 consecutive days during each calendar year for a period of not less than 20 consecutive years.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 208 (AB 1187) Aguiar. Vehicles: hours of service.

Existing law requires the Department of the California Highway Patrol to adopt regulations for specified vehicles engaged in intrastate commerce to establish hours-of-service requirements for drivers consistent with specified federal regulations. Existing law specifies exceptions to those requirements.

This bill would add to those exceptions a driver employed by a law enforcement agency, as defined, during an emergency or to restore the public peace.

Ch. 209 (AB 1188) Aguiar. Local transportation funds: intermodal facilities.

Existing law requires that a portion of the revenues derived from local sales and use taxes be transferred to the local transportation fund of the county and be allocated, as directed by the transportation planning agency, to fund claims submitted by cities, counties, county transportation commissions, and transit operators for specified purposes, including capital improvements and operating expenses for rail passenger service.

This bill would authorize those claimants to file a claim for an allocation of funds to construct and maintain intermodal transportation facilities.

Ch. 210 (AB 1260) Woodruff. Office of Emergency Services: rescue dogs: cross-training pilot project.

Existing law requires the Office of Emergency Services within the Governor's office to provide various services to encourage, assist, and provide instruction and training relating to disaster search and rescue dogs. Additionally, under existing law, the office conducted a study and determined the feasibility and effectiveness of cross-training existing law enforcement patrol or contraband detection dog teams, or both, to function also as disaster search dog teams.

This bill would require the Office of Emergency Services to conduct 2 projects, with any city or county electing to participate, to cross-train existing law enforcement dogs, to function as disaster search dogs as contemplated by existing law and consistent with the conclusions and recommendations of the study conducted by the Office of Emergency Services. These provisions would be operative until December 31, 1995.

Ch. 211 (AB 1425) Burton. Correctional facilities: death: report.

Existing law requires that any death that occurs in specified correctional facilities be reported, as specified, within a reasonable time, not to exceed 2 hours of its discovery, to specified local law enforcement agencies and officers, and other specified entities.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the Director of Corrections, upon entry of a prisoner into a state correctional facility, and at least every year thereafter, to obtain from the prisoner the name and last known address and telephone number of any person or persons to be notified in the event of the prisoner's death or serious illness or serious injury, as determined by the physician in attendance, and who are authorized to receive his or her body. The bill also would require the director to note the persons in the order of the prisoner's preference and to provide the prisoner with the opportunity to modify or amend the notification list at any time.

The bill also would require the director to use all reasonable means to contact the person or persons set forth in the notification list upon the death or serious illness or serious injury of the prisoner, as determined by the physician in attendance.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 212 (AB 1714) Umberg. Schools: pupil discipline.

Under existing law, a teacher, principal, principal's designee, or superintendent of schools may suspend, or the principal or superintendent of schools may recommend to the governing board of the school district expulsion of, a pupil for any of certain enumerated acts. Existing law states that suspension shall be imposed only when other means of correction fail to bring about proper conduct, except in certain circumstances.

This bill would authorize the principal of a school, the principal's designee, or the superintendent of schools, at his or her discretion, to require a pupil to perform community service on school grounds, as specified, during nonschool hours, instead of other prescribed disciplinary action.

Ch. 213 (AB 1964) Morrow. Orange County Water District.

(1) The Orange County Water District Act creates the Orange County Water District and provides for the election or appointment of the members of the board of directors of the agency from each of the 10 divisions of the agency. The act requires each director to be a resident of the district and an owner of land in the division the director represents.

This bill would require the board of the district, by resolution, to adjust the boundaries of the divisions in which the directors are elected, as prescribed, and would require the successor to each director in office on January 1, 1994, and each director thereafter, to be a resident and a registered voter in the division the director represents. The bill would make related changes. The bill would impose a state-mandated local program by imposing additional duties on the district.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 214 (AB 43) Quackenbush. Permanent absent voters.

Existing law provides that any voter who has specified physical impairments or conditions may submit an application to the county clerk for permanent absent voter status.

This bill would permit additional categories of voters to apply for permanent absent voter status, including a spouse who resides with and is the primary caregiver to a voter who has the specified impairments or conditions, and a nonspousal primary caregiver, as defined, of such a voter who resides with the voter.

This bill would make related technical changes. By expanding the duties of the county clerks, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made

NOTE: Superior numbers appear as a separate section at the end of the digests.

pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 215 (AB 737) Escutia. Pupils: minimum curriculum standards.

Existing law requires each school district maintaining any of grades 7 to 12, inclusive, to offer to all otherwise qualified pupils in those grades, a course of study fulfilling the requirements and prerequisites for admission to the California public universities.

Existing law also requires those school districts to offer to all otherwise qualified pupils a course of study that provides an opportunity for those pupils to attain entry-level employment skills in business or industry upon graduation from high schools. Existing law provides that any school district that adopts a required curriculum that meets or exceeds model standards developed by the State Board of Education shall be deemed to have fulfilled its responsibilities to provide an opportunity for those pupils to attain those entry-level employment skills.

This bill would clarify that each school district maintaining any of grades 7 to 12, inclusive, must provide all otherwise qualified pupils in those grades with a timely opportunity to enroll, within a 4-year period, in each course required to fulfill the requirements and prerequisites for admission to the California public institutions of postsecondary education prior to graduation from high school.

This bill would declare that it is declaratory of existing law.

Ch. 216 (AB 843) Hannigan. State-mandated local programs: cost savings.

Existing law requires the Commission on State Mandates to hear and decide upon claims by any state agency that a local agency or school district has realized a cost savings authorized by the state. If the commission determines that there is a cost savings authorized by the state, the commission is required to adopt certain parameters and guidelines with respect to the identification of these cost savings, and the Controller is required to reduce the payments to each local agency or school district for costs mandated by the state by 50% of the amount of cost savings authorized by the state realized by the local agency or school district in the preceding fiscal year, as specified.

This bill would repeal these provisions.

Ch. 217 (AB 2059) Margolin. Small group insurance.

Existing law contains provisions regulating small employer group insurance that regulates the provision of health insurance or similar coverage to small employer groups. In general, it requires health care service plans and insurers that sell small employer group coverage to fairly and affirmatively market that coverage to all small employer groups, and imposes additional requirements relating to rates, discontinuance, and other matters.

This bill would for that purpose include a guaranteed association within the definition of "small employer." For that purpose, it would define "guaranteed associations" to include certain nonprofit professional or industrial associations that include one or more small employers.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 218 (AB 1357) Karnette. Campaign statements.

Existing provisions of the Political Reform Act of 1974 provide that if a committee makes contributions during an odd-numbered year totaling $5,000 or more to elected state officers, among others, during specified time periods and those contributions are required to be reported in a lobbyist employer periodic report pursuant to a specific provision of law on or before the time for filing the odd-numbered year report, the committee shall not be required to file additional odd-numbered year statements for that period.

This bill would delete the reference to the specific provision of law that operates to exempt the reporting of contributions when the contributions are required to be reported in a lobbyist employer periodic report.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a ⅔ vote.

Ch. 219 (AB 1500) Speier. Family Code.

Chapter 162 of the Statutes of 1992 enacted the Family Code, operative January 1, 1994.

This bill would revise and recast provisions of the Business and Professions Code, Civil Code, Code of Civil Procedure, Education Code, Evidence Code, Government Code, Health and Safety Code, Penal Code, Probate Code, Revenue and Taxation Code, and Welfare and Institutions Code, that were amended or added in 1992, to conform those provisions to the Family Code, revise and recast provisions of the Family Code, and make other conforming, technical changes.

This bill would, among other things, make all of the following changes to existing law: (1) authorize a court to order the division of accumulated community property contributions and service credit in a retirement plan, on dissolution or nullification of a marriage or legal separation, as provided in the Judges' Retirement Law; (2) specifically include certain eligible adult children in provisions relating to child support; (3) with regard to child custody: (a) specify that procedures relating to custody of children apply to the determination of custody and visitation under the Uniform Parentage Act and the Domestic Violence Prevention Act, (b) restore certain functions of domestic relations case investigators deleted by Chapter 162, and denominate the persons making custody investigations as "court-appointed investigators," and (c) consolidate the requirements and procedures for the mediation of disputes involving stepparent and grandparent visitation and cases where custody or visitation is contested; (4) with regard to domestic violence: (a) define "domestic violence" to include violence against children, thereby expanding the application of some domestic violence provisions in this regard, and thereby requiring an increased level of service by local officials with regard to the registration and enforcement of domestic violence protective orders and for that reason imposing a state-mandated local program, (b) generally require ex parte restraining orders issued pursuant to the Family Code to be returnable within 20 days from the date of the order, instead of 15 days as required under existing law for injunctions generally, and (c) authorize the court to issue an ex parte order for visitation under the Domestic Violence Prevention Act whether or not the parties are married; and (5) specifically require the Judicial Council to conduct research on the effectiveness of current family law for the purpose of shaping future public policy.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 220 (SB 1117) Lockyer. Criminal procedure.

Under existing law, if the court permits the initial arraignment of a defendant held in specified facilities within the county to be conducted by 2-way electronic audiovideo

NOTE: Superior numbers appear as a separate section at the end of the digests.

communication, as specified, and if the defendant is represented by counsel, the attorney is required to be present with the defendant.

This bill would revise this provision to make it applicable to the initial court appearance and arraignment. The bill would also provide that if the defendant is represented by counsel at an initial hearing in superior court and the defendant does not plead guilty or nolo contendere, the attorney shall either be present with the defendant or present in court during the hearing, except as specified.

Ch. 221 (AB 226) Burton. Domestic violence diversion.

Existing law provides procedures for the diversion of defendants charged with misdemeanor domestic violence offenses. Existing law requires, among other things, that the defendant have no conviction for any offense involving violence within 7 years prior to the commission of the charged divertible offense, and that the defendant not have been diverted pursuant to these provisions within 5 years prior to the commission of the charged divertible offense, to be eligible for this diversion.

This bill would expand these diversion procedures, instead, to require that the defendant have no conviction for any offense involving violence, nor have been diverted under these provisions, within 10 years prior to the commission of the charged divertible offense, to be eligible for diversion.

Existing law, under these procedures, requires the court to inquire into the financial condition of the defendant and upon a finding that the defendant is able in whole or part to pay the expense of counseling, these provisions authorize the court to order the defendant to pay for all or part of the counseling expense.

This bill, instead, would require the court to order the defendant to pay for all or part of the expense to participate in a batterer's program, upon a finding of an ability to pay, as specified.

Existing law authorizes participation in diversion under these provisions for no less than 6 months nor longer than 2 years.

This bill would extend the minimum period of participation from 6 months to one year.

This bill, among other things, also would require the court to order a defendant diverted under these provisions to perform a specified amount of appropriate community service, as designated by the court.

Existing law under these provisions permits the prosecuting attorney, the court, or the probation department to initiate, after notice to the divertee, a hearing to determine whether criminal proceeding should be reinstated if it appears, among other specified circumstances, that the defendant has been convicted of any offense involving violence.

This bill, instead, would allow this procedure if it appears that the defendant has engaged in criminal conduct rendering the defendant unsuitable for diversion rather than if it appears the defendant has been convicted of any offense involving violence.

This bill, in addition, commencing July 1, 1994, would require the probation department to refer defendants only to batterer's programs that follow specified standards. This bill also would require the department to design and implement an approval and renewal process for the batterer's programs, as specified. This bill would grant the probation department sole authority to approve a batterer's treatment program. This bill would authorize the department to charge nongovernmental batterer programs a fee not to exceed $250 to cover its costs in administering the approval process proposed by this bill. This bill would impose a state-mandated local program by increasing the duties of the probation department.

Existing law authorizes a judge to require a defendant accused of a felony to pay an administrative fee, as part of an enrollment fee in specified domestic violence diversion programs to cover the cost of processing a request or application for diversion, not to exceed $100.

This bill would provide that the administrative fee shall apply to a defendant accused of an act charged as, or reduced to, a misdemeanor, rather than to a defendant accused of a felony. The bill would provide that the administrative fee also may be used to cover the costs of reporting to the court on a defendant's eligibility and suitability for diversion, the cost of supervising the defendant as a divertee, and for any duties required with

NOTE: Superior numbers appear as a separate section at the end of the digests.

regard to the reinstitution of criminal proceedings. The bill, in addition, among other things, would increase the maximum total amount of the administrative fee to $300.

This bill also would provide that its provisions are severable.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 222 (SB 485) Rosenthal. Public utilities.

Existing law makes any public utility, as defined, and any corporation other than a public utility, and any officers, agents, or employees of those entities which violate the Public Utilities Act guilty of a misdemeanor, and subject to specified fines.

This bill would increase specified fines.

Ch. 223 (AB 822) Statham. Vehicles: transfer of registration: waiver of fees.

Under existing law, the Department of Motor Vehicles is authorized to waive the fees and any penalties for the registration of a vehicle when a transferee or purchaser of a vehicle applies for a transfer of registration under specified circumstances if 2 conditions exist. Those 2 conditions are: (a) the license plate displays a current validating tab and (b) the transferee or purchaser submits to the department a registration card indicating that the vehicle is registered for a specified year.

This bill would delete the second condition.

Ch. 224 (AB 578) Bowler. Peace officers: identification certificate.

Under existing law, specified peace officers, including honorably retired peace officers, are exempt from the prohibition against carrying concealed in a vehicle or on the person a pistol, revolver, or other firearm capable of being concealed upon the person. Existing law requires the agency from which the officer retired to issue the officer an identification certificate and, if the agency approves of the officer carrying a concealed firearm, the agency shall have an endorsement on the identification certificate.

This bill would define the term "honorably retired" to expressly include peace officers who have qualified for, and have accepted, a service or disability retirement. It also would provide that the term "honorably retired" does not include an officer who has agreed to a service retirement in lieu of termination.

Under existing law, specified peace officers, including honorably retired peace officers, are exempt from the prohibition against a person carrying a loaded firearm on his or her person or in a vehicle while in any public place or on any public street in an incorporated city or in any public place or on any public street in a prohibited area of an unincorporated territory. Existing law also requires that a peace officer who has been honorably retired be issued an identification certificate by the agency from which the officer has retired.

This bill would clarify this provision by requiring that a peace officer who has been honorably retired be issued an identification certificate by the law enforcement agency from which the officer has retired.

Ch. 225 (AB 1755) Caldera. Grants and annuities.

Existing law permits certain organizations and persons to receive transfers of property conditioned upon their agreement to pay an annuity to the transferor or the transferor's nominee. Existing law prohibits any person from engaging in annuity transactions without first procuring a certificate of authority from the Insurance Commissioner.

This bill would require the commissioner to consider certain enumerated qualifications for applicants and to deny a certificate of authority to an applicant that is materially deficient with respect to those qualifications.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires a certificate holder to maintain funds sufficient to pay its annuity obligations, under a trust agreement in a separate account legally and physically segregated from the other assets of the certificate holder.

This bill would require any new certificate holder to maintain funds under a separate trust agreement for reserves held for the benefit of California annuitants, that is legally and physically segregated from the other assets of the certificate holder. This bill would require existing certificate holders to comply with this provision by January 1, 1998.

This bill would also require a certificate holder that manages and directs investment of reserve funds, to hold the California reserves in accordance with the requirements of the Insurance Code, as specified. If a bank manages or directs the investment of the California reserves, a trust agreement shall be executed with that institution that will act as a trustee.

Existing law requires a certificate holder to file an annual financial statement with the commissioner 90 days after the end of its fiscal year.

This bill would change the deadline for filing this financial statement to 120 days after the end of the certificate holder's fiscal year.

Ch. 226 (AB 1987) Horcher. Osteopathic medicine: examination: board certification.

Existing law provides for the licensure of osteopathic physicians and surgeons administered by the Osteopathic Medical Board of California. Existing law sets forth the requirements for licensure, including passage of a written licensing examination. Existing law authorizes the board to utilize an examination prepared by the Federation of State Medical Boards until December 31, 1993, for granting certificates of licensure based on reciprocity.

This bill would delete the December 31, 1993 limitation.

This bill would prohibit individuals that possess osteopathic physician's and surgeon's certificates from holding themselves out to be board certified unless that certification has been granted by the appropriate certifying board, as authorized by the American Osteopathic Association or the American Board of Medical Specialties, or is the result of certain approved postgraduate training.

This bill would revise certain terminology relating to osteopathic medicine.

Ch. 227 (SB 1005) Lockyer. Workers' compensation.

Existing law provides for a system of workers' compensation to provide compensation for persons injured in the course and scope of employment.

This bill would eliminate the Health and Safety Commission in the Department of Industrial Relations, and would establish a Commission on Health and Safety and Workers' Compensation.

The bill would also revise the composition, qualifications, and duties of the Industrial Medical Council.

Ch. 228 (SB 30) Johnston. Workers' compensation.

Existing law provides for the payment of workers' compensation benefits to employees injured in the course of employment. Existing law regulates workers' compensation insurance rates and, among other things, provides for minimum rates.

This bill would repeal existing rate provisions, and instead would prohibit the use of rates that impair or threaten the solvency of an insurer or create a monopoly. The bill would require insurers to file rates. These provisions would become operative on January 1, 1995.

This bill would require a specified notice to the policyholder for all policies issued or renewed for the first time between January 1, 1995, and January 1, 1996.

Ch. 229 (AB 1282) McDonald. Municipal elections: nomination: recall.

Existing law requires that 4 randomized alphabet drawings, as specified, be conducted by the Secretary of State to determine the order in which the names of candidates are printed on the ballot. It requires that the first drawing take place on the 62nd day before the April general law city elections and that the drawing apply to those elections and

NOTE: Superior numbers appear as a separate section at the end of the digests.

any other election held at the same time.

This bill would require that this drawing take place instead on the 82nd day before that date.

Existing law requires the city clerk to publish a notice of a municipal election in the city, as specified, not earlier than the 89th nor later than the 75th day before the election.

This bill would require that the notice be published not earlier than the 127th nor later than the 113th day before a municipal election.

Existing law requires the city clerk, in the case of a municipal election on any measure, to publish a synopsis of the measure in the city, as specified, and to consolidate the notice of election and the notice of the measure to be voted on into one notice.

This bill would require consolidation of the notice if the measure was placed on the ballot before the notice of election is published.

Existing law provides that nomination papers for a candidate for municipal elective office may be signed not earlier than the 89th and not later than the 68th day before a municipal election.

This bill would provide that those papers may be signed between the 113th and the 88th day before a municipal election.

Existing law requires nomination papers for a candidate for elective municipal office to be filed with the city clerk not later than 5 p.m. on the 68th day before the election.

This bill would require the nomination papers to be filed with the clerk during regular business hours, as posted, not later than the 88th day before the election.

Existing law provides that if nomination papers for an incumbent city officer are not filed by 5 p.m. on the 68th day before the election, voters have until 5 p.m. on the 63rd day before the election to nominate other candidates.

This bill would provide that if the nomination papers of an incumbent city officer are not filed by the 88th day before the election, during normal business hours, as posted, the voters shall have until the 83rd day before the election, during normal business hours, as posted, to nominate other candidates.

Existing law provides, generally, that if by 5 p.m. on the 63rd day prior to a regular municipal election no one or only one person has been nominated for an office elected on a citywide basis, among other things, the governing body shall appoint a person to office or direct an election to be held in the affected territory.

This bill would change this deadline to 5 p.m. on the 88th day prior to the regular municipal election, and would make this provision applicable where on the 83rd day the incumbent city officer fails to file nomination papers. It would also make this provision applicable where, by the 88th day, during normal business hours, as posted, no one or only one person has been nominated to an elective city office to fill a vacancy at a special election held pursuant to specified provisions of law.

This bill would repeal a related provision of law.

Existing law provides that if a city recall election prevails and the voters favor a special election to fill the vacancy, the legislative body shall call an election not less than 88 nor more than 103 days after the date of the order.

This bill would require the special election to be held not less than 114 nor more than 129 days after the date of the order.

Existing law provides that if a majority of the municipal legislative body is recalled at the same election, the clerk shall call a special election to fill the vacancies to be held within 89 days after the canvass of the votes of the recall election.

This bill would require the special election called by the clerk to be held not less than 114 nor more than 129 days after the canvass of the votes of the recall election.

Existing law requires a city council to fill by appointment a vacancy in the office of mayor and, if it fails to fill the vacancy within 30 days, to call an election to be held on the next established election date not less than 90 days thereafter.

This bill would require the election to be held on the next established election date not less than 114 days thereafter.

Existing law requires a city council to fill a vacancy in an elective city office by appointment or to call a special election within 30 days, and requires that the special election be held on the next regularly established election date not less than 90 days from

NOTE: Superior numbers appear as a separate section at the end of the digests.

the call of the special election.

This bill would require that the special election be held on the next regularly established election date not less than 114 days from the call of the special election.

Existing law authorizes a city to enact an ordinance requiring that a special election be called immediately to fill a vacancy in the city council or the office of mayor, and requires the ordinance to provide that the special election be held on the next regularly established election date not less than 90 days from the call of the special election.

This bill would require the ordinance to provide that the special election be held on the next regularly established election date not less than 114 days from the call of the special election.

The bill would authorize a specified election to fill vacancies on a city council to be consolidated with the November 2, 1993, statewide special election.

By adding to the duties of local elections officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would declare that it shall take effect immediately as an urgency statute.

Ch. 230 (SB 230) Marks. Postgovernment employment restrictions: designated employees.

Existing provisions of the Political Reform Act of 1974 prohibit a designated employee of a state administrative agency, among others, from representing any other person before any state administrative agency or officer or employee for which he or she worked for 12 months before leaving employment if the appearance or communication is for the purpose of influencing administrative action, as defined, among other things. Existing law also contains a definition of "legislative action" for purposes of certain prohibitions, applicable to former legislators, against influencing legislative action for a specified 12-month period.

This bill would include within the prohibition described above an appearance or communication that is made for the purpose of influencing legislative action.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a ⅔ vote.

Ch. 231 (SB 76) Committee on Appropriations. Claims against the state: appropriation.[5]

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate $2,380,263.63, as scheduled, to the Secretary of the State

NOTE: Superior numbers appear as a separate section at the end of the digests.

Board of Control to pay claims accepted by the State Board of Control.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 232 (SB 554) Beverly. Insurers: investments.

Existing law provides that specified provisions of the Insurance Code relating to authorized investments by insurers may be cited as the Insurance Company Investment Act of 1983.

This bill would delete that titling provision.

Existing law limits the investments that may be made by insurers. Existing law, among other things, authorizes certain domestic incorporated insurers to invest in hedging transactions and positions in interest rate futures contracts or options on interest rate futures contracts and in the purchase and sale of exchange traded options on stock indices, stock index futures contracts, or options on stock index futures contracts.

This bill would authorize any domestic incorporated insurer having admitted assets of a specified amount to purchase insurance futures contracts, purchase call options on insurance futures contracts, and sell put options on insurance futures contracts in bona fide hedging transactions, as specified. The bill would authorize the Insurance Commissioner to adopt rules and guidelines establishing standards and requirements relative to these practices. The bill would require the commissioner to issue a bulletin by June 30, 1994, setting forth the accounting, reporting, and valuation practices and procedures for insurance futures contracts, unless, prior to that date, accounting practices and procedures are officially promulgated by a specified association of insurance commissioners. The bill would also prohibit an insurer from engaging in these hedging transactions until a bulletin has been issued or these accounting practices and procedures are promulgated, whichever comes first.

Ch. 233 (SB 278) Beverly. Franchises.

Existing law authorizes a municipal legislative body to grant a franchise to any person, firm, or corporation to use or construct and use poles, wire conduits, and appurtenances for delivering electricity, or to use or lay and use pipes and appurtenances for distributing gas under terms and conditions provided by law.

This bill would require a transportation customer, as defined, who receives transportation service from an energy transporter, as defined, to pay a municipal surcharge as specified, for the use of public lands by a transportation customer.

Since existing law makes any public utility that violates specified provisions regulating public utilities guilty of a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 234 (SB 1020) Mello. Monterey County Water Resources Agency.

The Monterey County Water Resources Agency Act creates the Monterey County Water Resources Agency and prescribes its powers and purposes.

This will would authorize the agency to require the installation of flowmeters on groundwater extraction facilities and water distribution system service connections, as specified.

Ch. 235 (SB 1205) Hurtt. Special absentee voters: facsimile transmission.

Existing law provides procedures by which a special absentee voter, defined as including an elector who is a member of the armed forces of the United States or any auxiliary branch thereof, may apply for, and vote by means of, a special absent voter's ballot.

This bill would authorize a special absentee voter to register to vote and apply for an absent voter's ballot. It would require the elections official, upon request, to send to the special absentee voter either by mail or facsimile transmission the special absentee

NOTE: Superior numbers appear as a separate section at the end of the digests.

ballot, or if available, an absent's voter ballot.

By adding to the duties of local elections officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 236 (SB 66) Bergeson. Poison control centers.

Existing law requires the Emergency Medical Services Authority to establish minimum standards for the operation of poison control centers. The existing standards require centers to provide poison control services 24 hours a day and require certain staff of the centers to be licensed in the State of California.

This bill would authorize the authority to permit a poison control center, instead of providing poison control services directly, to contract with an entity in another state to provide poison control services during any part of the 24-hour period if the center is unable to provide poison control services 24 hours a day and if the entity in the other state provides substantially the same poison control services as required by the authority. The bill would prohibit the entity in the other state from being deemed not to provide substantially the same services solely because the staff of the other entity is licensed in the other state and not licensed in the State of California.

The bill would authorize the authority to permit a poison control center to provide poison control services for fewer than 24 hours a day, as the authority deems necessary.

Ch. 237 (SB 94) Roberti. School district budgets: format.

Under existing law, the governing board of each school district is required each year to hold a public hearing on the proposed budget of the district for that fiscal year. The proposed budget is required, for that purpose, to be made available for public inspection, and to show expenditures, cash balances, revenues, and other designated information.

This bill would require the State Department of Education, in the 1994–95 fiscal year, and in each fiscal year thereafter, to request a copy of certain budget information made available to the public by a sampling of school districts, and to communicate to all school districts any improvements suggested by the department to make the information more useful.

The bill also would appropriate $75,000 to the State Department of Education to contract for the development of a model accounting and budget structure, as specified, no later than July 1, 1994. The bill would require the department to submit the model structure, and a plan for the conversion of school districts and county offices of education to the structure, to the Legislature and the Department of Finance no later than September 1, 1994. The bill would provide for the selection of a 13-member advisory committee to assist the department in that regard.

Ch. 238 (SB 113) Thompson. Alcoholic beverages.

Existing law authorizes a licensed winegrower to, among other things, sell wine and brandy for consumption to consumers for on-premises consumption, as specified.

This bill would authorize a licensed winegrower to sell or serve beers, wines, and brandies, on premises, either in a bona fide eating place, as defined, or to guests during private events or private functions not open to the general public, as specified.

Existing law generally prohibits the sale or consumption of alcoholic beverages at a public schoolhouse. Existing law provides that this prohibition does not apply if the alcoholic beverage is wine and certain conditions apply including that the community college district maintains a specified viticulture program on no less than 300 acres owned by the district.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, instead, require that the viticulture program be maintained on no less than 5 acres of land owned by the district. The bill would also provide that the prohibition against the sale or consumption of alcoholic beverages at a public schoolhouse does not apply if the alcoholic beverage is acquired, possessed, or used at a professional minor league baseball game conducted at the stadium of a community college located in a county with a population of less than 250,000 inhabitants, as specified.

Ch. 239 (SB 127) Wright. Camarillo State Hospital: lease of land.

Existing law authorizes the Department of General Services, in cooperation with the State Department of Developmental Services and the State Department of Mental Health, to lease property within the boundaries of Camarillo State Hospital to Ventura County, and authorizes the county to sublease the property to specified types of organizations for housing and residential programs for mentally disordered persons, if, among other things, the necessary permits for the construction of housing are issued prior to January 1, 1993.

This bill would extend the deadline for the issuance of construction permits to January 1, 1995.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 240 (SB 136) Wright. Registered dispensing opticians.

Existing law provides that the right to dispense, sell, or furnish prescription lenses at retail to the person named in a prescription is limited to physicians and surgeons, optometrists, and registered dispensing opticians. Existing law provides for the registration and regulation of registered dispensing opticians, who, among other things, fit and adjust prescription lenses, and requires a separate certificate of registration for each address where business is conducted.

Existing law authorizes, until January 1, 1994, a registered dispensing optician to fit and adjust spectacle lenses in a health facility or at a business location, as defined, under prescribed conditions. Existing law provides that any person who violates the provisions of law pertaining to registered dispensing opticians is guilty of a misdemeanor.

This bill would delete the January 1, 1994, repeal date. Since this bill would extend the duration of existing criminal sanctions, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 241 (SB 241) Alquist. Local costs: claims.

Existing law requires the state to reimburse local agencies for state-mandated costs.

This bill would appropriate $115,162,000 from the General Fund to the Controller for the payment of claims for reimbursement of state-mandated costs.

The bill would declare that it is to take effect immediately, as an urgency statute.

Ch. 242 (SB 257) Killea. Hospice acute inpatient facilities.

Existing law creates the Special Hospital: Hospice Pilot Project, of 4 years in duration, consisting of up to 3 pilot projects, including one in San Diego. The purpose of the project is to determine the need of hospice patients for acute inpatient care, and hospice providers under the project provide palliative services to terminally ill patients and supportive care for the primary care giver and the family. The pilot project is established and administered by the State Department of Health Services. Participating facilities are required to obtain a license from the department, conform to certain standards, and submit annual reports to the Legislature concerning the operation of the pilot projects. These provisions are to be repealed on the 365th day after receipt of the last of these reports by the Legislature.

This bill would delete the 4-year duration and would extend the pilot program until January 1, 1997, except for the reporting requirements that would be extended until January 1, 1998.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 243 (SB 347) Dills. Vehicles: towing: regulation by the Public Utilities Commission.

Under the existing Highway Carriers' Act, the Public Utilities Commission regulates the operations and conditions of service of specified carriers of property for compensation.

Existing law excludes from that act and from the jurisdiction and control of the commission, among other things, the following: (a) the transportation other than by towing of not more than 3 vehicles, or not more than 2 vehicles in addition to one towed vehicle, when those vehicles are in transit to be repaired or dismantled, and (b) the transportation by towing of a vehicle that has been stolen or abandoned, or is otherwise unattended by any person with authority to move or authorize the movement of the vehicle, when directed by a peace officer.

This bill would instead exclude the following: (a) the transportation other than by towing of not more than 4 vehicles, or not more than 3 vehicles in addition to one towed vehicle, when those vehicles are in transit to be repaired or dismantled and (b) the transportation by towing of a vehicle that has been stolen or abandoned, or whenever directed by a peace officer.

Ch. 244 (SB 421) Craven. Manufactured housing: gas burning appliances.

Existing law specifies the construction and safety standards applicable to manufactured housing and mobilehomes. It imposes misdemeanor penalties for a knowing violation of those provisions.

This bill would provide that nothing in those provisions or applicable regulations shall prohibit the replacement in manufactured homes or mobilehomes of ovens, ranges, or clothes dryers with fuel gas burning ovens, ranges, or clothes dryers not specifically listed for use in a manufactured home or mobilehome.

This bill would impose a state-mandated local program by requiring that replacement fuel gas burning ovens, ranges, or clothes dryers installed in accordance with this bill bear a label in compliance with specified provisions of law.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 245 (SB 432) Greene. Controlled substances: prescriptions: hospice care facility.

Existing law generally requires that every prescription for a controlled substance classified in Schedule II be in writing, as specified. Existing law provides as an exception to this general requirement that when failure to issue a prescription for a controlled substance classified in Schedule II to a patient in a licensed skilled nursing facility, an intermediate care facility, or a licensed home health agency providing hospice care would, in the opinion of the prescriber, present an immediate hazard to the patient's health and welfare or result in intense pain and suffering to the patient, the prescription may be dispensed upon an oral prescription.

This bill, instead, would provide that any order for a controlled substance classified in Schedule II in a licensed skilled nursing facility, intermediate health care facility, or a licensed home health agency providing hospice care may be dispensed upon an oral prescription.

Existing law provides that, upon request, a skilled nursing facility, intermediate care facility, or licensed home health agency providing hospice care shall make available to the dispensing pharmacist copies of signed telephone orders, chart orders, or related documentation substantiating an oral prescription transaction.

This bill would provide, instead, that a skilled nursing facility, intermediate care facility, or licensed home health agency providing hospice care shall forward to the dispensing pharmacist a copy of any signed telephone order, chart order, or related documentation substantiating each oral prescription transaction.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 246 (SB 434) Morgan. Child day care programs.

(1) Existing law, the California Child Day Care Facilities Act, provides for the licensure and regulation of child day care facilities, which include infant centers, preschools, and extended day care facilities, by the State Department of Social Services.

Existing law requires the department to develop guidelines and procedures to authorize licensed child day care centers serving preschool children to create an optional toddler program. Existing law subjects the toddler program to basic conditions that are to remain in force and effect only until the department adopts regulations implementing these provisions, including the condition that all children in the center between 18 and 30 months are placed in the toddler program and that no children are placed in the preschool program before the age of 30 months.

Existing law requires the department to submit a report on the development of regulations to the Legislature no later than June 1, 1990, and requires the Senate Office of Research, in consultation with the Assembly Office of Research, to evaluate the toddler program and report this evaluation to the Legislature no later than December 30, 1992, as specified. Existing law makes these provisions inoperative on June 30, 1993, and would repeal them as of January 1, 1994.

This bill would delete the inoperative date, the repeal date, and the requirement that the office evaluate the program and report the evaluation.

This bill would delete the condition that all children in the center between 18 and 30 months are placed in the toddler program and that no children are placed in the preschool program before the age of 30 months. The bill would additionally subject this toddler program to the condition that no child is placed in the preschool program before the age of 30 months without parental permission. It would permit a child who is more than 30 months of age to participate with parental permission.

This bill would require the department to develop guidelines and procedures to authorize licensed child day care centers serving infants to create an optional toddler program. This bill would subject this program to basic conditions that would remain in force and effect only until the department adopts regulations implementing these provisions.

(2) Existing law, until June 30, 1993, requires the department to develop guidelines and procedures to permit an aide to assist a fully qualified child care teacher in the supervision of up to 18 preschool age children.

This bill would require the department to adopt these guidelines and procedures. This bill would provide that these provisions shall not become operative prior to July 1, 1993.

(3) This bill would take effect immediately as an urgency statute.

Ch. 247 (SB 446) Mello. Residential care facilities for the elderly: levels of care.

Existing law prohibits any person from operating or maintaining a residential care facility for the elderly without a valid license issued by the State Department of Social Services.

Existing law regulates when a bedridden resident, as defined, may be retained in a residential care facility for the elderly. Existing law repeals certain of these provisions on January 1, 1994, and makes alternative provisions operative on that date.

This bill would change the repeal and operative date of those alternative provisions to January 1, 1995.

Ch. 248 (SB 465) Marks. Community care facilities: foster homes: placement of adults with developmental disabilities.

Existing law provides for the licensure of community care facilities, including, among others, foster family homes, through the State Department of Social Services. Under existing law, foster family agencies certify foster family homes and find homes or other placements for children.

This bill would provide that a child with a developmental disability who is placed in a certified family home by a foster family agency that is operating under agreement with the regional center responsible for that child may remain in the certified family home after the age of 18 years, pursuant to an agreement made by specified involved parties. It would require the department to review the feasibility of instituting a licensure

NOTE: Superior numbers appear as a separate section at the end of the digests.

category to cover foster homes that are established specifically to care for and supervise developmentally disabled adults to prevent the institutionalization of those individuals.

This bill would also make technical, nonsubstantive changes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 249 (SB 495) Kelley. Health facilities: reporting small and rural hospitals.

(1) Existing law, the Health Data and Advisory Council Consolidation Act, requires every organization, and officers thereof, that operates, conducts, or maintains a health facility, including a small and rural hospital, as defined, to make reports containing prescribed data and file them with the Office of Statewide Health Planning and Development. Under the act, this data includes a statement detailing changes in financial position and capital financing status.

This bill would require this data to include a statement of cash-flow instead of a statement detailing changes in financial position and capital financing status.

(2) Existing law requires the office to collect from every health facility, except a health facility owned by the state, a special fee to produce revenues equal to the appropriation to pay for functions required to be performed by the office, the area and local health planning agencies, and the Advisory Health Council.

The act requires prescribed reports to be filed with the office by electronic media, as determined by the office.

This bill would require the office, upon the request of a small and rural hospital, as defined, that did not file financial reports with the office by electronic media as of January 1, 1993, on a case-by-case basis, to either exempt the small and rural hospital from any electronic filing requirements of the office regarding prescribed annual or quarterly financial reports or provide a one-time reduction of the above-described fee charged to the small and rural hospital by an amount equal to the costs incurred by the small and rural hospital to purchase the computer hardware and software necessary to comply with any electronic filing requirements of the office regarding these reports, but not to exceed the maximum amount assessed.

Ch. 250 (SB 578) Greene. Public transit: contracts: transit needs: claims for funds.

(1) Under existing law, contracts of the Sacramento Regional Transit District for the purchase of supplies, equipment, and materials in excess of $10,000 are required to be awarded by competitive bidding. Existing law authorizes the board of directors of the district, after a ⅔ vote of the membership, to purchase specified electronic equipment and apparatus and specialized rail transit equipment, not otherwise available to the general public, by competitive negotiation pursuant to prescribed procedures.

This bill would make the authorization to purchase through competitive negotiation applicable to certain replacement radio equipment and electric powered transit vehicles.

(2) Under the Mills-Alquist-Deddeh Act, a transportation planning agency, prior to making any allocation not directly related to public transportation services, specialized transportation services, or facilities for pedestrians or bicycles, is required, among other things, to identify the transit needs which have been considered as part of the transportation planning process, including specified matters.

This bill would impose a state-mandated local program by expanding the scope of matters to be considered in making the determination of transit needs to include the provision of paratransit and special transportation services under the federal Americans with Disabilities Act of 1990.

(3) The Mills-Alquist-Deddeh Act prescribes procedures and conditions for transit providers to claim an apportionment of funds. Generally, all transit operators and city or county governments, with responsibility for providing municipal services to a given area, collectively, may file claims for only those moneys that represent that area's apportionment.

This bill would, operative July 1, 1994, revise the conditions and procedures for claims under the act by the Sacramento Regional Transit District and the County of Sacramento. The bill would also require, as a condition to the filing of certain claims by the

NOTE: Superior numbers appear as a separate section at the end of the digests.

County of Sacramento, that certain determinations be made by the Sacramento Area Council of Governments.

(4) Existing law authorizes the Sacramento Regional Transit District to enter into agreements with public entities for the joint use of property, the establishment of through routes, joint fares, transfer of passengers, or pooling arrangements and to undertake certain other measures with respect to facilities and structures related to transit services.

This bill would broaden that authorization by allowing the district to also exercise other specified powers relating to agreements for the joint use or development of any property or rights, to contracting for the performance of authorized services, and to the undertaking of other measures with respect to facilities and structures related to transit services.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 251 (SB 585) Rogers. Dehydrated garlic and onions; county agriculture commissioners: annual report.

(1) Under existing law, county agricultural commissioners are required to make an annual report to the Director of Food and Agriculture on the condition of agriculture in their counties. Pursuant to statute enacted in 1990, the report is required to include information on what is being done to eradicate, control, or manage pests, and actions relating to the exclusion of pests. The statute enacted in 1990 also requires the commissioner to include in the annual report information relating to organic farming methods, biotechnology, integrated pest management, and biological control activities in the county. For the purposes of reimbursing local entities for costs mandated by these provisions, the 1990 statute also provides that if the Commission on State Mandates determines that the legislation contains costs mandated by the state, reimbursement for those costs shall be made pursuant to statutory procedures therefor and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would permit, rather than require, the commissioner to include in the annual report information relating to organic farming methods, biotechnology, integrated pest management, and biological control activities in the county. The bill would also repeal the provision directing reimbursement for those mandates according to the statutory provisions, and would instead state that no appropriation is provided with respect to these costs.

(2) Under existing law, the provisions in the Food and Agricultural Code relating to quality standards for dehydrating garlic and onions, and establishing the Garlic and Onion Dehydrator Advisory Committee will remain in effect only until January 1, 1994.

This bill would continue that existing law to January 1, 1999, by extending that repeal date. Since a violation of these provisions is a misdemeanor, this bill would impose a state-mandated local program by continuing in existence until January 1, 1999, a crime that would otherwise be repealed.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by the change proposed by paragraph (2) for a specified reason.

Ch. 252 (SB 587) Hughes. Hospitals: battery.

(1) Existing law generally provides that if a battery is committed against any person on school property or park property, the battery is punishable by a fine not exceeding

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

$2,000, or by imprisonment in the county jail not exceeding one year, or by both the fine and imprisonment.

This bill would make this provision applicable, in addition, if the battery is committed on the grounds of a public or private hospital, as defined.

(2) This bill would impose a state-mandated local program upon local governments by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 253 (SB 606) Rosenthal. Child support enforcement: county programs.

Existing law requires each county to operate a child support enforcement program that, among other things, is required to collect child support on behalf of recipients of the Aid to Families with Dependent Children program. Federal and state law also provide for incentives to be provided to counties, based upon their effectiveness in making child support collections, with these incentive programs being administered by the State Department of Social Services.

This bill would require the department to compile prescribed information, for the 1992–93 fiscal year and each fiscal year thereafter, on each child support enforcement program. It would require the information to be provided to specified officials and government agencies.

Ch. 254 (SB 613) Hayden. Santa Monica Mountains Conservancy Advisory Committee: Cities of Malibu and Calabasas.

(1) There is in existing law the Santa Monica Mountains Conservancy Advisory Committee, with 16 members appointed as specified.

This bill would add an additional member to the advisory committee jointly appointed by the City Councils of the Cities of Malibu and Calabasas, and would make related changes. By requiring the city councils to make that joint appointment, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 255 (SB 685) Wright. Auctioneers and auctions.

Existing law, the Auctioneer and Auction Licensing Act, provides an extensive scheme for the licensing and regulation of auctioneers and auctions in this state, under the jurisdiction of the California Auctioneer Commission.

This bill would suspend the licensing requirements for auctioneers and auction companies until the licensing provisions of the act are repealed or until a state agency or commission is designated to permit and enforce compliance with those provisions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 256 (SB 699) Roberti. Local transportation agencies: employees: retirement.

(1) Existing law authorizes the board of governors of the Southern California Rapid Transit District to establish a retirement system for unrepresented employees of the district, or to contract with the Public Employees' Retirement System to include those employees in that system. The retirement benefits of represented employees are required to be governed by the applicable collective bargaining agreement. Under existing law, the Los Angeles County Metropolitan Transportation Authority is the successor agency to the Southern California Rapid Transit District.

This bill would impose a state-mandated local program by requiring the authority to adopt employee retirement benefits pursuant to those provisions applicable to em-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ployees of the district.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 257 (SB 705) Committee on Revenue and Taxation. Sales and use taxes: jurisdiction: exemptions.

The existing Sales and Use Tax Law imposes a tax on the sale of, or the storage, use, or other consumption in this state of, tangible personal property and requires that retailers of tangible personal property obtain a permit from the State Board of Equalization. Existing law regards as a retailer engaged in business in this state any person or entity placing a commercial advertisement with any broadcaster, printer, outdoor advertising firm, advertising distributor, or publisher that broadcasts, publishes, or displays or distributes paid commercial advertising where that advertisement is intended to be disseminated primarily to consumers in this state, as specified.

This bill would delete those provisions that regard those persons or entities as retailers.

Existing law provides various exemptions from the imposition of sales and use taxes, including a general exemption for candy, confectionery, and snack foods.

This bill would delete obsolete provisions related to the sales and use taxation of candy, confectionery, and snack foods sold through vending machines or by specified nonprofit youth organizations.

Ch. 258 (SB 706) Committee on Revenue and Taxation. Income taxes: bank and corporation taxes: pollution control facilities.

The existing Personal Income Tax Law and Bank and Corporation Tax Law allow various deductions in computing income subject to taxation under these laws. Specifically, these laws allow, by reference to a specified federal statute, a deduction for amortization of pollution control facilities. Existing law requires the state certifying authority to certify to the federal certifying authority that the pollution control facility is constructed, reconstructed, erected, or acquired in conformity with the state program or requirements, as specified. Existing law defines the state certifying authority as the State Department of Health Services.

This bill would, instead, define the state certifying authority as the State Air Resources Board, in the case of air pollution, and the State Water Resources Control Board, in the case of water pollution.

The bill would also make various technical changes to the particular credit provisions of the Personal Income Tax Law and the Bank and Corporation Tax Law.

Ch. 259 (SB 716) Bergeson. Marine life refuges.

(1) Under existing law, specified fish, mollusks and crustaceans may be taken under the authority of a sportfishing license as authorized in the Fish and Game Code. In a marine life refuge, fish and forms of aquatic life are protected and may not be taken without a written permit from the Department of Fish and Game.

This bill would change the boundaries of the Laguna Beach Marine Life Refuge and the South Laguna Beach Marine Life Refuge.

The bill would also authorize the Director of Fish and Game to appoint a Director of the Dana Point Marine Life Refuge. The bill would prohibit payment of the compensation or expenses of that refuge director from state funds, except as specified. The bill would authorize the director of the refuge to issue permits to enter the refuge for the purpose of taking fish or marine plants under conditions determined by the department. The bill would require the director of the refuge to erect and maintain boundary signs containing specified information relating to the permit requirements of the refuge. The bill would, with specified exceptions, prohibit any entry of the intertidal zone in the refuge, as defined, to take or possess, and would prohibit the taking or possession of, any species of fish, plant, or invertebrate, possession of any contrivance designed to be used for catching fish, disturbing any native plant, fish, wildlife, aquatic organism, and the

NOTE: Superior numbers appear as a separate section at the end of the digests.

taking or disturbing of any natural geological feature. The bill would not prohibit persons from entering the intertidal zone for the purpose of entertainment, recreation, and education while having a minimum impact, as described, on the intertidal environment and the living organisms therein.

Existing law would make a violation of the prohibitions in the bill a crime. The bill would, thereby, impose a state-mandated local program by creating a new crime.

(2) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the department to carry out the Fish and Game Code. Because this bill would impose new duties on the department with respect to the Dana Point Marine Life Refuge, the bill would make an appropriation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 260 (SB 785) Wright. Hospital buildings.

Existing law establishes the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983. Existing law requires all fees paid under the act to be credited to the Hospital Building Account in the Architecture Public Building Fund.

This bill would instead require the fees to be credited to the Hospital Building Fund, which would be created by the bill.

Existing law requires the office to consult with the Department of General Services in approving any inspector for the inspection of hospital buildings and of the work of construction or alteration of hospital buildings.

This bill would delete that requirement.

Existing law requires the office to make certain rules and regulations, and adopt and submit building standards relating to seismic structural safety for hospital buildings.

This bill would, instead, require the office to make those rules and regulations, and propose and submit building standards relating to seismic safety for hospital buildings to the California Building Standards Commission for adoption and approval, pursuant to the law governing approval of building standards.

Existing law establishes the Building Safety Board in the office, with prescribed membership and duties.

This bill would change the name of the board to the "Hospital Building Safety Board" and would change its membership and duties.

Ch. 261 (SB 818) Thompson. School employees: administrators: termination.

Existing law requires that a certificated employee holding a position requiring an administrative or supervisory credential be notified, as specified, of his or her termination for the following school year by March 15 of that year. A school principal is required to be notified by March 1.

This bill would delete the requirement that school principals be notified by March 1.

Existing law authorizes the governing board of a school district to terminate the services of certificated employees during the time period between 5 days after the enactment of the Budget Act and August 15 of the fiscal year to which the Budget Act applies, according to a schedule of notice and hearing adopted by the governing board, if the district determines that its revenue limit has not increased by 2% or more and it is necessary, therefore, to decrease the district's permanent employees.

This bill would expressly include employees holding a position that requires an administrative or supervisory credential within the purview of that provision.

Ch. 262 (SB 839) Ayala. Accountants: retired licensee.

Existing law provides for the licensure of accountants.

This bill would provide for the issuance of a retired certified public accountant or retired public accountant seal to an individual who holds either an unexpired permit to practice public accountancy or an expired permit which remains subject to renewal. This bill would require an applicant for a retired certified public accountant or retired

NOTE: Superior numbers appear as a separate section at the end of the digests.

public accountant seal to pay an application fee, as specified.

Existing law continuously appropriates the money in the Accountancy Fund to the State Board of Accountancy for specified purposes.

Since this bill would provide a new source of revenue to the fund it would constitute an appropriation.

Ch. 263 (SB 868) Hart. Santa Barbara County Special Health Care Authority.

Existing law authorizes the Santa Barbara County Board of Supervisors to establish the Santa Barbara County Special Health Care Authority, for the provision of various health care services.

This bill would change the name of that authority to the Santa Barbara Regional Health Authority.

Existing law excludes dental services from the scope of services the authority may provide.

This bill would eliminate that exclusion.

Existing law authorizes the State Department of Health Services to enter into a contract with the authority for the implementation of a pilot program for the provision of Medi-Cal benefits, and excludes dental services from the scope of services the authority may provide.

This bill would authorize the authority to provide dental services for the provision of Medi-Cal services under the pilot program pursuant to its contract with the department.

Ch. 264 (SB 898) Mello. Public utilities: economic development.

Existing law requires the Public Utilities Commission to authorize public utilities to engage in programs to encourage economic development. It authorizes the commission to provide incentives for the benefit of industries or business entities located within the boundaries of enterprise zones or economic incentive areas.

This bill would authorize the commission to provide these incentives to industries or business entities located within the boundaries of an enterprise zone that engage in activities in connection with the conversion of Fort Ord to other uses.

Ch. 265 (SB 960) Craven. Mobilehome parks: change of use.

Existing law, until January 1, 1994, requires a local agency to which application has been made for the conversion of a mobilehome park for another use to inform the applicant in writing of specified provisions of law and local requirements imposing on the applicant a duty to notify residents and mobilehome owners of the mobilehome park of the proposed change of use. It prohibits the local agency from holding any hearing on the application or taking other action until the applicant has satisfactorily verified that the required notices have been given.

This bill would delete the provision repealing the above provisions on January 1, 1994.

By making the described duties upon the local agency permanent, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 266 (SB 970) Rosenthal. Adult adoption.

Existing law provides specified procedures for the adoption of adults. Under existing law, once an adult person is adopted, the legal relationship of parent and child between the adopted person and the birth parents is severed.

This bill would expressly provide that an adult stepparent of an adult may adopt that adult. This bill would also provide that the legal relationship of parent and child between

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

an adult adopted by a stepparent and the birth parent who is the spouse of the stepparent is not severed by the adoption.

Ch. 267 (SB 1039) Thompson. School district reorganization.

Existing law prescribes the procedure to reorganize school districts, including unification of school districts, that includes the involvement of the State Board of Education. Existing law also provides that whenever the boundaries of an elementary school district and a high school district become coterminous, the districts are merged into a new unified district.

This bill would, until January 1, 1996, provide that if the Healdsburg Union Elementary School District and the Healdsburg Union High School District unify, the Alexander Valley Union Elementary School District and the West Side Union Elementary School District would continue as independent elementary school districts within the boundaries of the newly unified district.

Ch. 268 (SB 1052) Watson. Certified nurse assistants: training.

Existing law requires skilled nursing facilities and intermediate care facilities to adopt a training program for nurse assistants that meets standards established by the State Department of Health Services. Existing law also provides for the certification of nurse assistants who meet prescribed qualifications. Existing law requires that certified nurse assistants complete 24 hours of approved in-service training every year, and makes the renewal of certification, which occurs every 2 years, conditional upon completion of the required training.

This bill would instead require that a certified nurse assistant complete 48 hours of in-service training every 2 years, and would require that at least 12 of the 48 hours be completed in each of the 2 years. This bill would also revise the approved sources from which the training may be obtained to include specifically in-service training taught by a director of staff development for a licensed skilled nursing or intermediate care facility who has been approved by the state department, or by other persons or programs approved by the department.

Ch. 269 (SB 1193) Boatwright. Structural pest control: requirements.

Existing law regulates inspections regarding wood destroying pests or organisms by a registered structural pest control company or licensee, as specified.

This bill would allow a registered company or licensee to enter into and maintain a control services agreement respecting work applicable to wood destroying pests or organisms, subject to specified requirements. The bill would define control services agreement as any agreement, including extended warranties, to have a licensee conduct over a period of time regular inspections and other activities related to the control or eradication of wood destroying pests and organisms.

Existing law requires every company, as specified, that engages in the practice of structural pest control to register with the Structural Pest Control Board.

This bill would prohibit the registration of companies that have an officer, director, qualifying manager, responsible managing employee, or an individual who otherwise exercises dominion or control over the company, who either (1) has a license or registration that is revoked or suspended at the time of the application because of disciplinary action, or (2) owns or has owned in the past more than a 10% interest in another sole proprietorship, partnership, corporation, or other organization that has its license or registration revoked or suspended at the time of the application because of disciplinary action.

Ch. 270 (AB 8) Connolly. Alcoholic beverages: beer kegs.

Existing law, the Alcoholic Beverage Control Act, provides that a person may not sell, furnish, give or cause to be sold, furnished, or given away, any alcoholic beverage to any person under the age of 21 years. It also provides that, in order to prevent a violation of the prohibition on furnishing alcohol to minors, a licensee may refuse to sell or serve alcoholic beverages to any person who is unable to produce adequate written evidence that he or she is over the age of 21 years.

This bill would require that every retail licensee in this state who sells keg beer for

NOTE: Superior numbers appear as a separate section at the end of the digests.

consumption off the licensed premises to place an identification tag, as specified, on that beer keg and would require the signing of a receipt identifying the purchaser, as specified. The retail licensee would be required to retain a copy of the receipt for 6 months, and have receipt records available for inspection by the Department of Alcoholic Beverage Control or other authorized law enforcement agency. The bill would authorize the department to charge a fee not to exceed the actual cost of supplying receipt forms and identification labels, which fees would be deposited in the Alcohol Beverage Control Fund.

This bill would create a new crime by providing that possession of a keg with knowledge that it is not identified, or the providing of false information by a purchaser of a beer keg is a misdemeanor. The bill would therefore impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 271 (AB 138) Eastin. Private works of improvement.

Existing law contains various provisions relating to contracts for the performance of private works of improvement, including provisions for the timely disbursement of retention proceeds. Under existing law, with respect to all contracts relating to the construction of any private work of improvement entered into on or after January 1, 1993, within 45 days after the date of completion, as defined, the retention withheld by the owner is required to be released. Under existing law, with respect to all contracts entered into on or after July 1, 1991, in the event of a dispute between the owner and the original contractor, or the original contractor and a subcontractor, the owner or original contractor, as the case may be, may withhold from the retention proceeds an amount not to exceed 150% of the disputed amount. The latter provisions will be repealed by their own terms on January 1, 1996.

This bill would provide that within 10 days of receipt of written notice by the owner from the original contractor or by the original contractor from the subcontractor, as the case may be, that any work in dispute has been completed in accordance with the terms of the contract, the owner or original contractor shall advise the notifying party of the acceptance or rejection of the disputed work. It would also specify that within 10 days of acceptance of the disputed work, the owner or original contractor, as the case may be, shall release the retained portion of the retention proceeds. These provisions would apply to contracts entered into on or after January 1, 1994. The bill would also delete the repealer from these provisions, extending their effect indefinitely.

Ch. 272 (AB 301) Katz. Transportation: vehicles: Omnibus Transportation Act.

(1) A provision of law which formerly required each county to annually submit to the Department of Transportation any additions or exclusions from its mileage of maintained county highways, was repealed by Chapter 1243 of the Statutes of 1992.

This bill would reinstate that provision.

(2) Under existing law, if a site proposed to be acquired for a community college building is within 2 miles of an airport boundary, the governing board of the community college district is required to give notice of the proposed acquisition to the Board of Governors of the California Community Colleges. The board of governors is required to immediately notify the Division of Aeronautics in the Department of Transportation of the proposed acquisition. The Division of Aeronautics is required to make an investigation and, within 25 days, report to the board of governors. The board of governors is required to investigate the proposed site and, within 30 days, submit a written report and recommendations concerning the acquisition to the governing board of the community college district. Existing law imposes specified restrictions regarding the site if the report of the board of governors does not favor acquisition of the site.

This bill would make those provisions applicable to a proposed site that is within 2 miles of an airport runway, or proposed runway, rather than within 2 miles of an airport

NOTE: Superior numbers appear as a separate section at the end of the digests.

boundary, and would change the 25-day and 30-day time limits referred to above to 30 and 35 days, respectively. The bill would delete a provision made obsolete by these changes.

(3) Existing law provides for the implementation of class A, B, C, and M driver's licenses and the corresponding elimination of class 1, 2, and 3 driver's licenses.

This bill would make conforming changes in various provisions of existing law relating to those licenses.

(4) Existing law creates, and describes the boundaries of the Sacramento Regional Transit District.

This bill would correct a reference in the description of the boundaries of the district.

(5) Existing law authorizes a peace officer or specified city or county employee to remove a vehicle under specified circumstances.

This bill would also authorize the removal of a vehicle which is stopped or left standing for more than 8 hours in a roadside rest area or view point, as defined.

(6) Existing law authorizes the Department of Transportation to place informational signs within the right-of-way of state highways that are parallel or adjacent to state-funded passenger rail routes in existence on January 1, 1982, to inform motorists of rail transportation services.

This bill would make that authorization applicable to any publicly funded passenger rail route. The bill would eliminate the January 1, 1982 date, thereby making those provisions applicable to any publicly funded passenger rail route, regardless of when it came into existence.

(7) Existing law prohibits any person from lending any certificate of ownership, registration card, license plate, special plate, or permit issued to him or her by the Department of Motor Vehicles if the person desiring to borrow it would not be entitled to its use. Existing law also prohibits any person from knowingly permitting the use of any of the items specified above by one not entitled to that use.

This bill would prohibit any person from lending any validation tab issued to him or her by the department if the person desiring to borrow it would not be entitled to its use. The bill would also prohibit any person from knowingly permitting the use of the validation tab by one not entitled to that use.

(8) Existing law requires that every application for a driver's license be signed and verified by the applicant before a person authorized to administer oaths.

This bill would limit the requirement specified above to original applications.

(9) Existing law permits, until January 1, 1994, the holder of a class C or class 3 license to be issued a specified restricted license to operate a 2-axle vehicle weighing 4,000 pounds or more unladen when towing a 5th-wheel travel trailer, as defined, of more than 10,000 pounds but not more than 15,000 pounds gross vehicle weight rating if the person has passed a specified examination. On and after January 1, 1994, existing law reduces the permissible rating of a 5th-wheel travel trailer for these purposes to 10,000 pounds or less gross vehicle weight rating.

This bill would continue the existing provisions of law by deleting the January 1, 1994, repeal date and would delete the provision reducing the permissible rating of a 5th-wheel travel trailer for the above-described purpose to 10,000 pounds or less on and after January 1, 1994. This bill would make related conforming changes.

(10) Existing law generally provides for the placement of stop signs at specified intersections and railroad grade crossings.

This bill would authorize a local authority to provide for the placement of a stop sign at any location on a highway under its jurisdiction where the stop sign would enhance traffic safety.

(11) Under existing law, a person who drives a motor vehicle is deemed to have given his or her consent to chemical testing, as specified.

This bill would make a technical, conforming change in existing law.

(12) Under existing law, persons operating a public storage area for vehicles are required to accept valid bank credit cards for payment of towing and storage by a registered owner or the owner's agent.

This bill would make a person operating or in charge of a storage facility who refuses

NOTE: Superior numbers appear as a separate section at the end of the digests.

to accept a valid bank credit card liable to the registered owner of the vehicle for 4 times the amount of the charges, but not more than $500.

(13) Existing law requires the Department of the California Highway Patrol to regulate the safe operation of specified vehicles.

This bill would specify that this provision does not apply to certain vehicle combinations including camp trailers, trailer coaches, and utility trailers, as prescribed.

(14) This bill would incorporate additional changes proposed by AB 846 in Section 12804.9 of the Vehicle Code, as specified, which would become effective if both bills are enacted.

(15) The bill would make other technical and clarifying changes, including conforming to federal law.

(16) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 273 (AB 306) Aguiar. Probation costs.

Existing law sets forth procedures under which a person released upon probation may be transferred to the care and custody of the probation officer of another county, or pursuant to the Uniform Act for Out-of-State Probationer or Parolee Supervision, may be released to enter another state.

Existing law also authorizes the court to order a probationer, pursuant to specified procedures, to pay all or a portion of the reasonable cost of probation, conducting the presentence investigation, and preparing the presentence report.

This bill, in addition, would authorize the court to order a probationer, under these procedures, to pay all or a portion of the reasonable cost of processing any transfer to supervision in another county and of processing any request for out-of-state supervision. This bill, among other related changes, also (1) would require the order of transfer committing a probationer to the care and custody of the probation officer of another county to contain an order for reimbursement of reasonable costs of processing the transfer to be paid to the sending county, as specified, and (2) would require a probationer to reimburse the county that has jurisdiction over his or her probation case for the reasonable cost of processing his or her request for interstate compact supervision, as specified, prior to the release of that probationer to enter another state.

This bill would incorporate additional changes in Section 1203.1b of the Penal Code proposed by AB 309, to be operative only if AB 309 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 274 (AB 425) Harvey. Vehicles: parking: public grounds.

(1) Existing law prohibits any person from driving any vehicle or animal, or stopping, parking, or leaving standing any vehicle or animal, whether attended or unattended, upon the driveways, paths, parking facilities, or the grounds of listed public entities, including, among other things, property under the possession or control of a housing authority, if specified requirements are met. Existing law defines "housing authority," for purposes of this prohibition, to include only housing authorities located within a county with a population of over 6,000,000 people.

This bill would include transit districts and certain joint powers entities within the listed public entities and would expand the definition of "housing authority," for the purposes of existing law, to include all housing authorities that meet those specified requirements of existing law, thus making this prohibition applicable to additional housing authorities. Because a violation of this prohibition, in combination with other sections of existing law, would constitute an infraction, this bill would create a state-mandated local program by expanding the definition of a crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 275 (AB 466) Baca. Veterans' homes: second home in southern California.

Existing law authorizes the Department of Veterans Affairs to establish and construct a 2nd veterans' home to be located in one or more sites in one of several specified counties in southern California.

This bill would, instead, authorize the department to establish and construct one or more state veterans homes to be located at those sites.

Existing law establishes a Governor's Commission on a Southern California Veterans Home to advise the Governor and the Legislature on the establishment of the home.

Under existing law the commission is required to report no later than July 1, 1992.

This bill would delete that date and would, instead, require annual reports. This bill would also require the commission to report to the Governor and Legislature in a timely manner concerning all development and construction activities associated with the Barstow Veterans' Home.

Under existing law the provisions relating to the commission are repealed as of July 1, 1993.

This bill would, instead, repeal these provisions as of January 1, 1995.

This bill would declare that it is to take effect immediately, as an urgency measure.

Ch. 276 (AB 498) Goldsmith. Civil procedure.

Existing law provides that a party to a cause of action may move for summary judgment if it is contended that the action has no merit or that there is no defense to the action or proceeding. The motion must be supported by affidavits, declarations, and other documents, as specified, including a separate statement setting forth plainly and concisely all material facts which the moving party contends are undisputed. Existing law imposes similar requirements on the party opposing the motion.

Existing law provides that once the plaintiff or cross-complainant has met his or her burden of showing that there is no defense to a cause of action, as specified, and once the defendant or cross-defendant has met his or her burden of showing that a cause of action has no merit, as specified, the burden shifts to the opposing party to show that a triable issue of one or more material facts exist as to that cause of action.

This bill would, instead, provide that the burden shifts to the opposing party to show that a triable issue of one or more material facts exist as to that cause of action or a defense thereto. The bill would prohibit the opposing party from relying on the mere allegations or denials of the pleadings to show that a triable issue of material fact exists, and would require the opposing party to set forth the specific facts showing that a triable issue of material fact exists as to that cause of action or a defense thereto.

The bill would also provide that the granting of a motion for summary adjudication shall not operate to bar any cause of action, affirmative defense, claim for damages, or issue of duty as to which summary adjudication was either not sought or denied. It would also prohibit a party, a witness, or the court from commenting upon the grant or denial of a motion for summary adjudication, or upon the failure of a party to seek summary adjudication as to any issue.

Ch. 277 (AB 641) Bornstein. California Seed Law.

(1) Under the California Seed Law, until July 1, 1995, the Director of Food and Agriculture is required to pay a specified assessment to counties pursuant to a specified formula as a subvention for costs incurred in their enforcement of that law. A county agricultural commissioner who chooses to participate in the subvention program is required to enter into a cooperative agreement with the director regarding enforcement of the law.

This bill would extend the operative date of those provisions to July 1, 1999, thereby making an appropriation by continuing the subventions until that date.

(2) Under that law, the director may, by regulation, establish methods and procedures for the conciliation or mediation of disputes between a labeler and any person concerning the conformance with label statements as required by the law.

This bill would provide that methods and procedures for the conciliation of disputes are mandatory, and a prerequisite to pursuing other dispute resolution mechanisms.

(3) Existing law requires the director, or permits any commissioner with the approval

NOTE: Superior numbers appear as a separate section at the end of the digests.

of the director, to establish a reasonable schedule of fees for the services under the law that they are authorized to perform.

This bill would, instead, permit the director, or any commissioner with the approval of the director, to annually enter into a cooperative agreement with a qualified seed certification agency for the services that they are authorized to perform.

Ch. 278 (AB 723) Sher. Mining: reporting requirements: financial assurances.

(1) Existing law, the Surface Mining and Reclamation Act of 1975, requires the Department of Conservation to quarterly publish in the California Regulatory Notice Register, or otherwise make available upon request to the Department of General Services or any other state agency, a list identifying specified surface mining operations.

This bill would require the Department of Conservation, at a minimum, to quarterly publish that list. The bill would revise provisions that require surface mining operations for which an appeal is pending to be listed to specify that the appeal shall not have been pending for more than 180 days.

(2) The act prohibits a state agency from purchasing or using minerals, as defined, produced from surface mining operations on specified federal lands that are subject to the act, unless the mine operator is identified in the list.

This bill would expand that prohibition to include minerals produced from specified surface mining operations on Indian lands. The bill would exempt specified construction or maintenance contracts from the prohibition until July 1, 1996.

(3) Existing law prohibits a member of the State Mining and Geology Board from participating in any action of the board that involves the member or any person who engages in surface mining operations with which the member is connected as a director, officer, or employee, or in which the member has a financial interest, as specified.

This bill would, instead, prohibit a member of the board from participating in, or attempting to influence, any action of the board that involves the member or any other person with whom the member is connected, as specified, including an action in which the member has a financial interest, as defined. The bill would define the term "ex parte communication" and would prohibit a member, or specified other persons, from making such a communication unless the member or specified other person complies with prescribed disclosure procedures.

The bill would prohibit a member from making, participating in making, or in any other way attempting to use his or her official position to influence a board decision about which the member has knowingly had an ex parte communication that was not reported as required.

The bill would, in addition to any other applicable penalty, subject any member who engages in an ex parte communication, or attempts to use his or her official position to influence a board decision about which the member has knowingly had an unreported ex parte communication, to a civil fine, not to exceed $7,500.

(4) The act generally prohibits a person from conducting a surface mining operation without a permit from, and a reclamation plan and financial assurances approved by, the lead agency for the operation. The act requires financial assurances to be approved by January 1, 1992, unless there is an appeal, as specified.

This bill would instead prohibit the operation unless the mine operator has appealed with regard to nonapproval of financial assurances by January 1, 1994, thereby extending the deadline for lead agency approval.

The bill would make technical, clarifying changes.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 279 (AB 782) Costa. Local government: finances.

Existing law requires the county auditor, when appropriations have not been finally determined and adopted at the beginning of a fiscal year, to approve payments for the support of the various budget units in accordance with specified authorizations.

This bill would provide, notwithstanding these requirements, that prior to the adoption of a final budget, the board of supervisors may impose more restrictive expenditure limitations.

This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 280 (AB 826) Bates. Child day care facilities.

Existing law, the California Child Day Care Facilities Act, requires the State Department of Social Services to license and regulate child day care facilities, as defined.

Existing law exempts certain facilities from the requirements of the act, including, but not limited to, any public recreation program, as defined, that, among other things, is operated only during hours other than normal school hours in the public school district in which the program is located, or is operated only during periods when students are normally not in session in the public school district in which the program is located and is in session for under 16 hours per week or for a total of 12 weeks or less during any 12-month period.

This bill would modify this exemption to also exclude any public recreation program, as defined, that is provided to children who are over the age of 4 years and 9 months and is operated for under 16 hours per week or for a total of 12 weeks or less during any 12-month period.

This bill would require the department to consider the hours and periods when students are not in session in the case of year-round schools.

Ch. 281 (AB 954) Ferguson. Orange County Flood Control District.

The Orange County Flood Control Act authorizes the Orange County Flood Control District to rent or lease property that is no longer required for purposes of the district if the board of the district adopts a resolution that meets certain requirements.

This bill would revise the requirements that are applicable to that resolution.

Ch. 282 (AB 1195) Moore. Real estate.

Existing law requires certain instruments before they are recorded to be acknowledged by the person executing them and the acknowledgment certified as prescribed by law, except as specified. Existing law also permits the execution to be proved by a subscribing witness or as provided in specified provisions of law and certified as prescribed by law.

This bill would exempt any mortgage, deed of trust, or security agreement from the provision permitting proof of execution of an instrument by a subscribing witness or as provided in specified provisions of law.

Ch. 283 (AB 1200) Nolan. Community college districts: parking service fees.

Existing law authorizes the governing board of a community college district to require students in attendance and employees of the district to pay a parking services fee in an amount, not to exceed $40 per semester or $20 per intersession, to be fixed by the board. Existing law excepts the Pasadena Community College District from that general provision and authorizes that district to require payment of a parking fee at a campus in excess of those amounts for the purpose of funding the construction of an oncampus parking structure if specified conditions are met.

This bill would also except the Glendale Community College District from that general provision and would authorize that district to require payment of a parking fee in an amount not to exceed the actual cost of constructing oncampus parking facilities, or $60 per semester, or $30 per intersession, whichever is less, if specified conditions are met.

Ch. 284 (AB 1237) Cannella. County retirement: service credit: member layoff periods.

An existing provision of the County Employees Retirement Law of 1937, which applies to counties only at the option of the board of supervisors, authorizes certain laid-off members who return to work within 12 months of the date of layoff, to purchase, under specified conditions, service credit for the layoff period, but not to exceed one year.

This bill would, instead, establish a maximum purchasable service credit of not to exceed one year for each layoff period.

Ch. 285 (AB 1340) Peace. Credit reporting.

(1) Existing law defines the term "consumer credit report" to exclude communica-

NOTE: Superior numbers appear as a separate section at the end of the digests.

tion of information from a credit application that is internal within the organization making the report or to an entity owned by, or affiliated by, corporate control with that person, if specified written notice is given.

This bill would revise that exclusion to encompass disclosures made in credit applications taken by telephone, as specified. It also would revise the definition of the term "firm offer of credit."

(2) Existing law requires consumer credit reporting agencies to provide specified notice and to disclose specified information to consumers pursuant to the Consumer Credit Reporting Agencies Act.

This bill would provide that any notice or disclosure required under the act shall be required to be made only to those consumers who have mailing addresses in California.

(3) Existing law requires consumer credit reporting agencies to disclose information regarding that consumer in a manner chosen by the consumer.

This bill would permit the consumer to choose the method of disclosure from among any reasonable means available to the consumer credit reporting agency.

(4) Existing law limits the furnishing of consumer credit reports by consumer credit reporting agencies to specified circumstances, including (a) in compliance with a lawful subpoena issued by a court of competent jurisdiction and (b) to a person whom it has reason to believe intends to use the information in connection with the rate for insurance involving the consumer.

This bill would eliminate those two provisions.

(5) Existing law provides a list of information that may not be included in consumer credit reports, including information concerning suits and judgments which antedate the report by more than 7 years from the date of entry.

This bill instead would prohibit the inclusion of information concerning suits and judgments which antedate the report by more than 7 years from the date of entry or renewal.

(6) Existing law precludes consumer credit reporting agencies from prohibiting disclosure by users of consumer credit reports of the contents to the consumer if the user may take specified adverse action against the consumer. Existing law exempts the consumer credit reporting agency from liability under the Consumer Credit Reporting Agencies Act where the user makes such a disclosure.

This bill would also exempt the user from liability under the that act for making such a disclosure of credit information and would make technical and clarifying changes.

(7) Under existing law, a consumer credit reporting agency receiving notice of a consumer's dispute concerning the accuracy or completeness of credit information is subject to certain procedural requirements, including, among other things, a requirement that becomes operative July 1, 1993, for furnishing prescribed notice to the consumer and certain persons designated by the consumer concerning information the consumer credit reporting agency deletes from the consumer's file. However, under the changes in the law that will become operative July 1, 1993, a consumer credit reporting agency will not be subject to this notice requirement if it deletes the disputed information from the consumer's file within 3 business days and notifies the consumer within 5 business days.

This bill would delete the above exemption. The bill would also permit a consumer credit reporting agency to require that disputes by consumers be in writing.

(8) Existing law defines the term "commercial credit report" to exclude consumer credit reports, investigative credit reports, and reports prepared for specified commercial insurance purposes.

This bill would additionally exclude from that definition: (a) reports containing information related to transactions or experiences between the subject of the report and the person making that report; (b) any authorization or approval of a specified extension of credit by the issuer of a credit card or similar device; and (c) any report in which a person who has been requested by a 3rd party to make a specific extension of credit to the subject conveys its decision with respect to that request.

(9) Under existing law, a credit services organization contract is required to provide an estimated time for performance not exceeding 60 days.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would increase that maximum time for performance to 90 days.

(10) This bill would declare that it is to go into effect immediately as an urgency statute.

Ch. 286 (AB 1452) Cannella. County retirement: optional settlements and death benefits.

The existing County Employees Retirement Law of 1937, provides for the payment to surviving spouses various optional settlements and death benefits.

This bill would authorize county boards of supervisors to elect, with respect only to persons first becoming members on or after the election, to increase, by 33⅓%, certain optional settlement and death benefit allowances payable to surviving spouses, that are currently limited to 60% of the members' retirement allowance and to decrease, by 20%, certain postretirement death benefits that continue the amount of the members' retirement allowance and the preretirement industrial death benefit of 50% of the members' final compensation. This bill would apply only to Los Angeles County.

Ch. 287 (AB 1534) Conroy. State militia: benefits.

Existing law provides that any officer or enlisted member of the National Guard, the unorganized militia when called into the active service of the state, or the organized militia when not in the active service of the United States, who is wounded, injured, disabled, or killed in the active service of the state in the line of duty, is entitled to receive certain worker's compensation benefits.

This bill would, instead, make this requirement applicable to any officer, warrant officer, or enlisted member of the National Guard, the organized militia, or the unorganized militia, when called into the active service of the state, pursuant to specified provisions of law.

Existing law makes these state benefits available pending determination as to the availability of similar federal benefits, and requires deduction for federal benefits when made available.

This bill would, instead, provide that any officer, warrant officer, or enlisted member, performing military duty of any nature pursuant to specified federal law is ineligible for these state benefits.

Existing law provides that any officer, warrant officer, or enlisted member on active duty with the Office of the Adjutant General who suffers disability or death in the line of duty, is entitled to receive, from the state, benefits or compensation comparable to members of the United States armed forces on active duty.

This bill would, instead, make this requirement applicable to any officer, warrant officer, or enlisted member on full-time active duty with the Office of the Adjutant General.

Existing law requires that any officer or enlisted member of the National Guard, the unorganized militia when called into the active service of the state, or the organized militia when not in the active service of the United States, who is wounded, injured, or disabled in the active service of the state in the line of duty, be retained on active duty and receive regular military pay and allowances for not to exceed 52 weeks, with specified exceptions. Existing law makes this requirement applicable to these persons transferred to any other state or local agency for the purposes of fulfilling active service requirements.

This bill would, instead, make this requirement applicable to any officer, warrant officer, or enlisted member of the National Guard, the organized militia, or the unorganized militia, when called into the active service of the state, pursuant to specified provisions of law, including, but not limited to, persons transferred to other state or local agencies.

Ch. 288 (AB 1736) Costa. Housing: State Housing Law: relocation of residential structures.

(1) Existing law, known as the State Housing Law, generally regulates the construction, maintenance, occupancy, and use of buildings used for human habitation.

This bill would amend the State Housing Law to require that, notwithstanding any

NOTE: Superior numbers appear as a separate section at the end of the digests.

other provision of law, a residential structure that is moved into, or within, the jurisdiction of a local agency or the department, shall not be treated, for the purposes of certain provisions of the 1991 Edition of the Uniform Building Code, as a new building or structure, but rather shall be treated, for the purposes of the State Housing Law, as being subject to those local ordinances or regulations governing the moving of apartment houses and dwellings that are required to permit the retention of existing materials and methods of construction so long as the apartment house or dwelling complies with the building standards for foundation applicable to new construction, and the apartment house or dwelling does not become or continue to be a substandard building.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 289 (AB 1827) Sher. Solid waste facilities: open burning.

(1) Existing federal law, the Resource Conservation and Recovery Act of 1976, regulates, among other things, the design and operation of solid waste landfills. Existing state law, the California Integrated Waste Management Act of 1989, is, among other things, intended to implement and enforce the federal act.

The state act requires any person owning or operating a solid waste landfill, as defined, when applying to become an operator, to certify to the California Integrated Waste Management Board and the local enforcement agency that the person has established a trust fund or equivalent financial arrangement acceptable to the board and will deposit annually into the fund or arrangement sufficient amounts to meet closure and postclosure maintenance costs, as specified, and prescribes related matters. The owner or operator is required to submit to the board, with the person's closure plan and postclosure maintenance plan, evidence of financial ability to provide for those costs in an amount equal to the estimated cost of closure and 15 years of postclosure maintenance in accordance with the plan.

This bill would increase from 15 to 30 the number of years for which an owner or operator must demonstrate financial ability for postclosure maintenance, and would make related changes for purposes of conforming with the federal act.

(2) The state act regulates the disposal of solid waste.

This bill would prohibit, on and after the effective date of specified federal regulations, the open burning of solid waste at any solid waste facility, except for the infrequent burning of agricultural wastes, silvicultural wastes, landclearing debris, diseased trees, or debris from emergency cleanup operations.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 290 (AB 1976) Jones. Fresno Metropolitan Flood Control Act.

(1) The Fresno Metropolitan Flood Control Act authorizes the Fresno County Board of Supervisors and the board of directors of the Fresno Metropolitan Flood Control District to choose, as a basis for a flood control assessment, a system to determine benefits based on use and services and benefits provided, as specified. The act requires the district to determine and submit to the board of supervisors benefit and land use categories and factors used to determine the assessment. The act authorizes landowners in the district to petition the board of directors, or the board of directors on its own motion, to review the land use categories and factors determined by the district, as specified.

This bill would instead require the district to determine and submit zones of benefit and land use categories to the board of supervisors. The bill would authorize the board of directors to review the zones of benefit and land use categories determined by the district, as specified.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 291 (AB 2069) Allen. County Employees Retirement Law of 1937: reemployment of members.

The County Employees Retirement Law of 1937 provides for the payment of retirement benefits to members according to formulas based on specified factors.

This bill would provide, at the option of the county board of supervisors, a method of computing retirement benefits for members who are retired for service and subsequently reemployed by the county or district from which they originally had been retired.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 292 (SB 301) Killea. Vehicles: penalty fees: registration fees.

Existing law requires that a delinquency penalty be added on any application for original or renewal of registration made later than midnight of the date of expiration or on or after the date penalties become due in an amount equal to 40% of the fees for a delinquency period of one year or less. Higher penalties are prescribed for delinquency periods of more than one year.

This bill would revise the delinquency penalty schedule on an application for renewal of registration for delinquency periods of one year or less as follows: (1) 10 days or less, 10% of the fee; (2) more than 10 days to and including 30 days, 20% of the fee; and (3) more than 30 days to and including one year, 60% of the fee.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 293 (AB 21) Umberg. Fiduciaries: self-dealing: use of estate funds.

(1) Under existing law, the relationship of guardian and ward and conservator and conservatee is a fiduciary relationship.

This bill would specify that, except as otherwise specifically provided, this relationship is governed by the law of trusts.

(2) Under existing law, there is no express prohibition against an attorney who serves as a guardian, conservator, or trustee from acting as an attorney for the estate or trust or which prohibits collecting additional legal fees therefor. Under existing law, an attorney who is the personal representative of a decedent's estate cannot act as attorney for the estate without approval of the court.

This bill would permit an attorney, certain of his or her relations, or his or her law firm to provide compensated legal services to an estate or trust for which the attorney serves as guardian, conservator, personal representative, or trustee only if approved by the court, as specified, upon making specified findings or, in the case of a trustee, by giving notice to specified persons, who may object to the dual compensation. These provisions would not apply, however, where the guardian, conservator, or trustee is related by blood or marriage to, or is a cohabitant with, the ward, conservatee, or settlor. The above provisions concerning trusts would apply to services rendered on and after January 1, 1994.

(3) Under existing law, there is nothing which precludes a person who is instrumental in the drafting of an instrument making a donative transfer for another from receiving a gift thereunder.

This bill, with certain exceptions, would invalidate a donative transfer to the person who drafted or transcribed such an instrument, or who caused the instrument to be drafted or transcribed, and persons having certain business and other relationships thereto. The bill would define persons to whom the bill invalidates those transfers as "disqualified persons." The bill would provide exceptions for transfers to persons related by blood or marriage to, or who cohabit with, the transferor or where the instrument is reviewed by an attorney not related to, or associated with, the drafter or proposed transferee, or where the transfer is approved by a court, as specified.

The bill would specify forms for attorney certification, for purposes of the above, which would certify that the transfer was not the product of fraud, menace, duress, or undue influence.

The bill would also specify that where a sole trustee is a disqualified person, as described above, it shall be presumed that he or she shall be removed by the court as trustee, except as specified. The bill would provide that any limitation or waiver of the obligation of a sole trustee who is a disqualified person to provide an accounting to certain beneficiaries, as specified, is against public policy and shall be void.

(4) An attorney violating certain provisions of the bill would be subject to professional discipline.

Ch. 294 (SB 359) Watson. Family planning services: chlamydia.

Existing law establishes the Office of Family Planning and requires family planning services to be offered to eligible individuals. Existing law provides that family planning services include, but are not limited to, medical treatment and procedures defined as family planning services under the published Medi-Cal scope of benefits, medical con-

NOTE: Superior numbers appear as a separate section at the end of the digests.

traceptive services, informational and educational services, and facilitating services such as transportation and child care services.

This bill would also include screening for chlamydia in the description of family planning services.

Ch. 295 (SB 774) Leslie. Crime victims.

(1) Under existing law, the Victims of Crime Program reimburses crime victims who apply for assistance for certain monetary losses directly resulting from the crimes committed against them. Existing law provides that the State Board of Control shall administer the program, including conducting hearings at which the board receives evidence and evaluates the application for assistance. Existing law also permits these hearings to be closed to the public when the application the board is evaluating is the result of a crime against a minor or a crime of sexual assault. Existing law provides that the closed hearing provision shall be operative only until January 1, 1994.

This bill would delete the January 1, 1994, repeal, and make permanent the closed hearing provision. This bill would also add hearings resulting from crimes of domestic violence to the closed hearing provision.

(2) Existing law addresses the procedures available to indemnify private citizens who are victims of crime.

This bill specifies that a victim of crime who has been overcompensated is liable for that amount except as delineated.

(3) Existing law provides that the State of California shall be subrogated to the rights of the victim to whom cash payments have been granted and that the victim or the victim's attorney must notify the Attorney General and the State Board of Control of all legal proceedings instituted on behalf of the victim for damages against the person or persons liable.

This bill requires the victim or his or her attorney to also notify the State Board of Control at any time they have reason to believe that a person from whom damages are sought is receiving a defense provided in whole or in part by an insurer or carrier as defined. This bill also provides that in the event of a judgment or award and the action is prosecuted by the victim alone, litigation expenses shall be paid first from the award then, upon application of the State Board of Control, lien amounts shall be paid.

(4) Existing law provides for a comprehensive collection program for fines and forfeitures.

This bill requires that any county that implements the comprehensive program shall, as part of that program, share any debt collection information acquired with state agencies entitled to proceeds from restitution fines and orders. This bill also authorizes Employment Development Department employees to disclose information relevant to the purposes and pursuant to the comprehensive collection program.

Ch. 296 (SB 1050) Russell. Children's services: alcohol- or drug-exposed and HIV positive children: demonstration project.

Existing law provides for various programs for children administered by the State Department of Social Services.

This bill would require, until January 1, 1995, the department to conduct a demonstration project in 4 participating counties, to provide certain services to children who are alcohol- or drug-exposed, as defined, or who are human immunodeficiency virus (HIV) positive, as defined, including selecting specialized foster family homes or relative caretakers for eligible children and monitoring the foster family homes. It would also provide for the expansion of the project to additional counties.

The bill would require each participating county to submit progress reports to the department, and would require the department to submit a preliminary report by January 1, 1994, and to submit a final report to the Legislature on the effectiveness of the demonstration project by November 30, 1994.

This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 297 (SB 1184) Roberti. Weapons: juveniles.

Under existing law, any person who is alleged to have committed specified offenses subject to the juvenile court law, is found to be a fit and proper subject to be dealt with under the juvenile court law, and is subsequently adjudged a ward of the juvenile court for committing a specified offense including murder or arson of an inhabited dwelling, shall not own or have in his or her possession or under his or her custody or control any firearm until the age of 30 years.

This bill would additionally include specified controlled substance offenses including, among others, possessing for sale or selling a substance containing 28.5 grams or more of cocaine, as specified. Because the violation of these provisions is a crime, this bill would establish a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 298 (AB 31) Connolly. Sentencing: violent felonies.

Existing law defines the term "violent felony" for the purpose of the enhancement of prison terms for new offenses because of prior prison terms.

This bill would add the offense of kidnapping a person under 14 years of age to the list of offenses that constitute a "violent felony" for the above purpose.

This bill would incorporate additional changes in Section 667.5 of the Penal Code proposed by AB 112, to be operative only if AB 112 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 299 (AB 178) Snyder. Crimes: career criminals.

Existing law imposes a term of imprisonment in the state prison for life whenever a person is convicted of a felony in which the person inflicted great bodily injury, as specified, or personally used force which was likely to produce great bodily injury where the person has served 2 or more prior prison terms for specified crimes including, among others, the crime of kidnapping for ransom, extortion, or robbery, or robbery involving the use of force or a deadly weapon. Under existing law, the offender is designated as a habitual offender and the person so sentenced is not eligible for release on parole for a period of at least 20 years, as specified, subject only to reduction in time served, as specified. Existing law also imposes a term of imprisonment in the state prison for life without the possibility of parole in these cases where the person has served 3 or more prior separate prison terms, as specified.

This bill would add to that list of specified felony cases for which the person must have served 2 or more, or 3 or more, prior prison terms, kidnapping as punished in a specified provision of the Penal Code.

Existing law imposes an additional term of 3, 4, or 5 years for any person who uses a firearm or any other deadly weapon, or an additional term of 1, 2, or 3 years for any person who is armed with a firearm or any other deadly weapon, in the commission of specified sex offenses.

This bill, instead, would impose those additional terms upon a person if the person uses, or is armed with, a firearm or a deadly weapon, rather than a firearm or any other deadly weapon, in the commission of those sex offenses.

This bill also would express the intent of the Legislature that this provision codifies the holding in People v. Steele, 235 Cal. App. 3d 788, with the result that the additional terms imposed pursuant to this provision apply to both loaded and unloaded firearms.

Ch. 300 (SB 242) Presley. Minors: LEAD program.

Existing law establishes within the Department of the Youth Authority a pilot project, called the LEAD program, providing an intensive correctional program for minors adjudged wards of the juvenile court on the basis of criminal conduct, as specified. The program terminates on June 30, 1997. A ward is eligible for participation in the program if the ward is at least 16 years of age and meets other criteria.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would change the age of eligibility for participation in the program to age 14 years.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 301 (AB 197) Burton. Domestic violence: court orders.

(1) Under the Family Code, which becomes operative January 1, 1994, a court may order mental health counseling, for a period of up to 6 months, as specified, for a party or parties to a proceeding for dissolution of marriage, for nullity of marriage, or for legal separation in which custody of, or visitation with, a minor child is at issue, and is required to set and apportion the cost thereof between the parties.

This bill would extend this authorization to a period of up to one year, and would require each party to bear the cost of his or her own counseling separately, except as specified. The bill would specifically authorize separate counseling in specified circumstances.

(2) Under the Family Code, which becomes operative January 1, 1994, after notice and a hearing, a court may order mental health counseling where it is shown that instances of domestic violence have occurred between residents of the same household, provided the court finds that the financial burden thereof does not otherwise jeopardize a party's other financial obligations, and requires the court to set and apportion the costs thereof between the parties. It also authorizes the court to order a restrained party to participate in batterer's treatment counseling.

This bill would remove the condition that the court find that the financial burden of the counseling does not otherwise jeopardize a party's other financial obligations, would require each party to bear the cost of his or her own counseling separately, except as specified, and would limit court-ordered batterer's treatment counseling to a period of up to one year. The bill would also authorize batterer's treatment counseling for up to one year pursuant to a temporary restraining order issued under the Uniform Parentage Act and would require each party to bear the cost of his or her own counseling separately, except as specified.

Ch. 302 (SB 821) Senate Judiciary Committee. Peace officer training.

Existing law requires every school peace officer, as specified, to complete a course of training approved by the Commission on Peace Officer Standards and Training relating directly to the role of school peace officers. Existing law requires any person employed as a school peace officer prior to the date that the Commission on Peace Officer Standards and Training approves the course of training to complete the course of instruction within three years from the date that the Commission on Peace Officer Standards and Training approves the course of training.

This bill, instead, would require that any person employed as a school peace officer under these circumstances complete the course of instruction by January 1, 1996.

Ch. 303 (AB 55) Hauser. Common interest developments: alternative dispute resolution.

Under existing law, the covenants and restrictions in the declaration of a common interest development are enforceable as equitable servitudes, and the prevailing party in any enforcement action is entitled to costs and attorney's fees.

This bill would generally require that, before a common interest development association or the owner of a separate interest therein brings an action solely for declaratory relief or injunctive relief, or for declaratory relief or injunctive relief in conjunction with a claim for monetary damages, other than association assessments, not to exceed $5,000, relating to the enforcement of the governing documents of the common interest development, the association or owner shall endeavor to submit the matter to alternative dispute resolution as provided in the bill. Under the bill, any party to such a dispute may request another party to submit to alternative dispute resolution by serving a prescribed Request for Resolution. The above requirements would not be applicable where the statute of limitations would run within 120 days, or to the filing of a cross-complaint. The bill would make anything said in the course of alternative dispute resolution under the bill inadmissible in any civil action in which testimony can be compelled unless consent-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ed to by both parties, and would preclude compelling testimony or disclosure of specified related documents and any statement or admission made in the course of the alternative dispute resolution.

The bill, with certain exceptions, would require that a certificate certifying compliance with the above requirements be filed with a civil action arising out of such a dispute. Failure to file the certificate, with certain exceptions, would render the plaintiff's complaint subject to a motion to strike or demurrer.

This bill would also allow the court to stay a pending action and refer it to alternative dispute resolution, upon stipulation of the parties. In any action for declaratory relief or injunctive relief related to enforcement of the governing documents of a common interest development, the bill would entitle the prevailing party to an award of attorney's fees and costs, but would require the court to consider the prevailing party's refusal to engage in alternative dispute resolution in making such an award of attorney's fees and costs. The bill would require common interest development associations to provide their members annually with a summary of the provisions of the bill, as specified, and would require any Request for Resolution sent to an owner by the association to also include a copy of the provisions of the bill.

Under the bill, the costs of the alternative dispute resolution would be borne by the parties.

Ch. 304 (AB 179) Snyder. Clinical laboratory tests.

Under existing law, the practices of chiropractic, clinical laboratory technology, dentistry, medicine, research psychoanalysis, speech pathology and audiology, optometry, occupational therapy, dietetics, physical therapy, nursing, vocational nursing, psychology, hearing aid dispensing, physician assisting, osteopathy, respiratory therapy, nursing home administration, pharmacy, psychiatric technology, veterinary medicine, acupuncture, marriage, family and child counseling, and social work are subject to licensure and regulation by the state.

Existing law provides that it is unlawful for any person licensed for one of those practices to charge, bill, or otherwise solicit payment from any patient, client, or customer, for any clinical laboratory test or service if the test or service was not actually rendered by that person or under his or her direct supervision, unless the patient, client, or customer is apprised at the first, or any subsequent, solicitation for payment of the name, address, and charges of the clinical laboratory performing the service.

This bill would delete the requirement that the patient, client, or customer be apprised for any subsequent solicitation for payment of the name, address, and charges. The bill would prohibit this provision from applying to a clinical laboratory of a health facility, as defined, or a health facility when billing for a clinical laboratory of the facility, or to any person licensed for one of those practices, if the standardized billing form used by the facility or person requires a summary entry for all clinical laboratory charges.

Existing law provides that it is unlawful for a person licensed for one of those practices to charge additional charges for any clinical laboratory service that is not actually rendered by the licensee to the patient and itemized in the charge. Existing law prohibits that provision from being construed to prohibit any itemized charge for any service actually rendered to the patient by the licensee.

This bill would also provide that the prohibition against additional charges is not to be construed to prohibit any summary charge for services actually rendered to a patient by a health facility, or by a person licensed for one of those practices if the standardized billing form used by the facility or person requires a summary entry for all clinical laboratory charges.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 305 (AB 246) Snyder. Controlled substances.

Under existing law, any person 18 years of age or over who violates specified controlled substance offenses by the use of a minor as agent or as otherwise specified, shall be punished by imprisonment in the state prison for 3, 6, or 9 years.

Existing law provides that any person 18 years of age or over who is convicted of a violation of the above-described offense shall receive an additional punishment of one

NOTE: Superior numbers appear as a separate section at the end of the digests.

year in state prison if the offense involved phencyclidine (PCP), methamphetamine, or an analog of these substances, and occurred upon the grounds of, or within, a church or synagogue, a playground, a public or private youth center, or a public swimming pool, as specified.

Existing law provides for an enhancement of 2 years in state prison if the offense involved PCP, methamphetamine, or any analog of these substances, and occurred upon, or within 1,000 feet of, the grounds of any public or private school, as specified.

This bill would add lysergic acid diethylamide (LSD) to the list of controlled substances in the above enhancement provisions.

This bill would incorporate additional changes in Section 11380.1 of the Health and Safety Code proposed by AB 312, to be operative only if AB 312 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 306 (AB 347) Hauser. Prisons: Del Norte County.

Under existing law, $1,190,000 was appropriated to the Controller for allocation as a loan to the County of Del Norte for the purpose of mitigating the impact of the late opening of Pelican Bay State Prison. Under existing law, the loan is to be repaid, in annual installments of at least 10% of the total amount to be repaid, within a period of not more than 10 years, plus interest, as specified. In addition, under existing law, the first payment on this loan was due July 1, 1991.

This bill, instead, would provide that the loan is to be repaid with interest, as specified, and that payment, including interest, shall be made in annual installments of $119,000 until the debt is fully paid.

This bill also would provide that the first payment is not due until July 20, 1995, rather than on July 1, 1991.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 307 (AB 669) Hannigan. Offenses: bicycles.

Existing law prohibits various activities in connection with operating a bicycle on a roadway or a highway.

This bill would authorize any local public entity that is authorized to employ peace officers, the California State University, and the University of California to establish a specified schedule of fines, including all penalty assessments and court costs, applicable to infractions committed by bicyclists within its jurisdiction. The bill would require the courts to utilize these schedules when adopted.

Ch. 308 (AB 731) Cortese. Horseracing: inclosure.

Under the existing Horse Racing Law, "inclosure" means all areas of a racing association's grounds to which admission can be obtained only by payment of an admission fee or upon presentation of authorized credentials. Existing law defines "inclosure-public" as the areas to which the public is admitted upon payment of admission fees but excluding restricted areas such as the jockey room, the racing strip, the receiving barn, and the stable area.

This bill would revise the definition of "inclosure" and "inclosure-public" and would define "inclosure-restricted."

This bill would also declare that it would take effect immediately as an urgency statute.

Ch. 309 (AB 944) Richter. Property tax apportionment: Nevada County.

Existing property tax law requires the county auditor, in each fiscal year, to allocate property tax revenues to each jurisdiction within the county, and generally requires that each jurisdiction be allocated an amount of revenue equal to the amount allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, plus a certain portion of the annual tax increment, as defined.

This bill would, for purposes of the 1993–94 fiscal year, apportion a specific amount of property tax revenues to the North San Juan Fire Protection District. This bill would also apportion to that district, for purposes of property tax revenue allocations in the 1994–95 fiscal year and each fiscal year thereafter, a specified percentage allocation of the annual

NOTE: Superior numbers appear as a separate section at the end of the digests.

tax increment. By requiring the modification of property tax revenue allocations during the 1993–94 fiscal year, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 310 (AB 1054) Conroy. Civil service: fire protection personnel.

Existing law provides for the inclusion of various personnel within the state civil service system.

This bill would include within the state civil service system all fire protection personnel employed at the Armed Forces Reserve Center in Los Alamitos. This provision would become operative only if the California National Guard completes the conversion of the fire protection personnel to state civil service by July 1, 1995, as specified. Further, the bill would become operative only if federal funds are made available to pay all costs resulting from the bill.

Ch. 311 (AB 1314) Connolly. Crimes: search or arrest warrants: disclosure.

Existing law requires that every district attorney, clerk, judge, or peace officer who, except by issuing or in executing a search warrant or warrant of arrest for a felony, willfully discloses the fact of the warrant prior to execution for the purpose of preventing the search or seizure of property or the arrest of any person be punished by imprisonment in the state prison or in a county jail for not exceeding one year.

Existing law provides that this provision shall not prohibit a disclosure made for the sole purpose of securing voluntary compliance with the warrant.

This bill would provide that this provision shall not prohibit a disclosure made by a district attorney or the Attorney General for the sole purpose of securing voluntary compliance with the warrant and would, in addition, provide that this provision shall not prohibit, upon the return of an indictment and the issuance of an arrest warrant, a disclosure of the existence of the indictment and arrest warrant by a district attorney or the Attorney General to assist in the apprehension of a defendant.

Ch. 312 (AB 1871) Polanco. Interstate and foreign highway carriers.

Existing law prohibits any highway carrier from engaging in interstate or foreign transportation of property within this state without registering with the commission and paying fees pursuant to a specified procedure, and specifies that the requirements imposed for the registration of interstate or foreign highway carriers of property and passengers shall not be in excess of the standards for registration promulgated under the provisions of the Interstate Commerce Act.

This bill would revise these procedures, eliminate the existing registration fees, and specify that the registration requirements imposed pursuant to the Interstate and Foreign Highways Carriers' Act shall not be construed to be in excess of the standards for registration promulgated under the provisions of the Interstate Commerce Act or under the provisions of the Intermodal Surface Transportation Efficiency Act of 1991. The bill would authorize the Public Utilities Commission to establish fees for registration and for use by other states of its registration system consistent with specified federal regulations.

The bill would provide that it shall not become operative unless and until the Interstate Commerce Commission has adopted and made effective final regulations embodying standards set forth in the federal Interstate Surface Transportation Efficiency Act of 1991.

Ch. 313 (AB 1712) Lee. Water conservation programs: rate structure design.

Existing law authorizes any public entity that supplies water at retail, as specified, to adopt an ordinance or resolution enforcing a water conservation program to reduce the quantity of water used by persons within the service area or area of jurisdiction of the entity for the purpose of conserving the water supplies of the public entity. "Public entity" is defined to mean, among other things, a city or any other political subdivision

NOTE: Superior numbers appear as a separate section at the end of the digests.

of the state.

This bill would extend the authorization to public entities that supply water at wholesale. The bill would also provide that, with regard to water delivered for other than agricultural uses, the ordinance or resolution may encourage conservation through rate structure design. The bill would revise the definition of "public entity" to specify that the reference to city includes a general law or chartered city and would specifically include within the definition, cities and counties, authorities, and any other municipal public corporation or district.

The bill would also set forth legislative findings and declarations.

Ch. 314 (AB 2304) Johnson. Title insurance.

Under existing law, the Corporate Securities Law of 1968 regulates transactions in securities.

This bill would provide that a title insurance company or underwritten title company engaged in the business of title insurance shall not be deemed to have participated in any acts prohibited by the Corporate Securities Law of 1968 solely by reason of engaging in the business of title insurance.

Ch. 315 (AB 41) Peace. Sentencing.

Under existing sentencing law, the term of imprisonment shall not exceed twice the number of years imposed by the trial court as the base term except in specified cases, including, but not limited to, instances in which a consecutive term of imprisonment is imposed, as specified, for 2 or more convictions for kidnapping, as defined, involving both separate victims and separate occasions.

This bill would revise this exception to instead include instances involving separate victims or the same victim on separate occasions. It also would provide that the term "separate occasion" means the defendant committed a second kidnapping offense involving the same victim after at least 24 hours elapsed following his or her release of the victim.

This bill would incorporate additional changes in Section 1170.1 of the Penal Code proposed by AB 25, to be operative only if AB 25 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 316 (SB 363) Mello. Health insurance: long-term care.

Under existing law, if long-term care health coverage is replaced, the sales commission is required to be calculated based on the difference between the annual premium of the replacement coverage and that of the original coverage.

This bill would provide that the sales commission that is paid by the insurer and that represents the percentage of the sale normally paid for first year sales of long-term care policies or certificates is required to be calculated in that manner. It would also provide that if the premium on the replacement product is less than or equal to the premium for the product being replaced, the sales commission shall be limited to the percentage of sale normally paid for renewal of long-term care policies or certificates.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 317 (AB 718) Mountjoy. State real property.

Existing law requires the Department of General Services to perform various functions and duties with respect to state property.

This bill would authorize the Director of General Services to sell, exchange, lease, or transfer specified parcels of state property. The bill would also exempt a sale, exchange, lease, or transfer from specified provisions of the California Environmental Quality Act, would require the reservation of mineral rights, as specified, and would provide that if the property is subsequently found to contain a Native American burial ground, this fact shall be reported to the Legislature and the property may revert to the state if the Legislature, by statute, so provides.

Ch. 318 (AB 763) Nolan. Disability insurance: eligibility.

Existing law excludes from the definition of employment for purposes of unemploy-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ment insurance coverage, service performed by an inmate of a custodial or penal institution.

This bill would additionally exclude from the definition of employment for purposes of unemployment insurance coverage, service performed by a ward of a custodial or penal institution.

Existing law provides for the payment of disability benefits to certain individuals when specified requirements are met. It includes service performed by an inmate of a state prison or institution under the jurisdiction of the Department of Corrections, as specified, among those activities defined as "employment" for purposes of disability insurance coverage.

This bill, among other things, would exclude from the definition of employment for purposes of disability insurance coverage, service performed by an inmate of a state prison or institution, and service performed for any public entity, nonprofit or for profit entity, organization, or business by an inmate of a state prison under the jurisdiction of the Department of Corrections, by an individual who is otherwise incarcerated in any jail or correctional facility, as specified, or by a ward in the custody of the California Youth Authority.

The bill would provide that, with respect to periods of incarceration commencing on or after January 1, 1994, an individual shall be ineligible for disability insurance benefits for any day during which the individual is incarcerated in any federal, state, or municipal penal institution, jail, medical facility, public or private hospital, or in any other place because of a criminal violation of a federal, state, or other municipal law or ordinance, as provided. It would provide that any individual who commits a crime shall be ineligible for disability insurance benefits if the individual is disabled due to an illness or injury caused by, or arising out of the commission of, arrest, investigation, or prosecution of any crime that results in a felony conviction rendered on or after January 1, 1994.

Ch. 319 (AB 1126) Johnson. Court-appointed counsel: access to information.

Existing law specifies procedures in which a person who is unable to employ counsel is assigned counsel in the superior, municipal, or justice court to represent the person in a criminal trial, proceeding, or appeal.

This bill would require court-appointed counsel and any court-appointed licensed private investigator assigned under these provisions to have the same rights and privileges to information as the public defender and the public defender investigator and would state the intent of the Legislature with regard to this provision.

This bill would incorporate additional changes in Section 987.2 of the Penal Code proposed by AB 1170, to be operative only if AB 1170 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 320 (AB 1152) Costa. Groundwater.

(1) Existing law authorizes a local agency that provides water service, or a prescribed local public agency under certain conditions, whose service area includes a groundwater basin, that is not subject to groundwater management, to adopt and implement a groundwater management plan, in accordance with specified procedures.

This bill would authorize a local public agency that provides flood control, groundwater management, or groundwater replenishment, or a local agency formed pursuant to the Water Code for the principal purpose of providing water service that has not yet provided that service, to adopt and implement a groundwater management plan in accordance with those specified procedures if certain requirements are met. The bill would authorize prescribed local agencies to amend their groundwater management programs, by ordinance or resolution, to include certain specified components.

(2) Existing law, generally, authorizes a local agency that adopts a groundwater arrangement plan pursuant to the above provisions to impose certain fees or assessments for groundwater management. However, a local agency may not impose fees or assessments on the extraction and replacement of groundwater pursuant to a groundwater remediation program required by other provisions of law.

This bill would prohibit a local agency from imposing these fees or assessments on the extraction and replacement of groundwater pursuant to a groundwater storage contract

NOTE: Superior numbers appear as a separate section at the end of the digests.

with the local agency.

(3) Existing law authorizes a local agency to enter into agreements with private parties for the purpose of implementing a coordinated groundwater management plan.

This bill would, in addition, authorize a local agency to enter into these agreements with public entities.

(4) Existing law defines local agency to mean any local public agency that provides water service to all or a portion of its service area.

This bill would include in that definition a joint powers authority formed by local public agencies that provide water service.

Ch. 321 (AB 2068) Conroy. Senior insurance.

Existing law provides that until December 31, 1993, certain provisions respecting disability insurance for persons 65 years of age or older shall not apply to transportation ticket policies and baggage insurance policy types allowable for sale by travel agents, as specified.

This bill would delete the above provision and would instead provide that provisions respecting that insurance shall not apply to transportation ticket policies and baggage insurance policy types allowable for sale by travel agents provided that a specified written notice is provided to every potential applicant for a transportation ticket policy at the time the sales presentation is made.

Ch. 322 (SB 884) Leslie. State lottery: amendment.

(1) The California State Lottery Act of 1984 contains provisions relating to the administration and operation of the state lottery. The act requires the California State Lottery Commission to promulgate rules and regulations specifying the types of lottery games to be conducted by the Lottery.

This bill would prohibit, notwithstanding the above requirement, changes on and after January 1, 1994, in the types of games or method of delivery of these games that incorporate technologies or mediums that did not exist, were not widely available, or were not commercially feasible at the time of the enactment of the act from being made unless certain conditions are met.

(2) As an initiative measure, the act provides that none of its provisions may be changed except to further its purpose by a bill passed by a ⅔ vote of each house of the Legislature and signed by the Governor.

This bill, which would declare that it furthers the purposes of the act, would therefore require a ⅔ vote.

Ch. 323 (SB 175) Kelley. Public records.

Under existing law, public records of state and local agencies are required to be open for inspection, with various exceptions.

This bill would provide that insurers and their agents, while they are investigating suspected fraud claims, shall have access to all relevant public records that are required to be open for inspection.

The bill would state legislative intent.

Ch. 324 (AB 101) Klehs. Taxation.

Existing law permits the State Board of Equalization to extend for a period not to exceed one month the time for making any return or paying any amount required to be paid under provisions of the Sales and Use Tax Law, as provided. Existing law requires any person to whom an extension is granted to pay, in addition to the tax, specified interest on the payment from the date on which the tax would have been due without the extension until the date of payment.

This bill would additionally permit the board to grant an extension for a period of more than one month if a budget for the state has not been adopted by July 1, and the person requesting the extension is a creditor of the state who has not been paid as a result of the state's failure to timely adopt a budget. This bill would provide that any extension granted pursuant to these provisions shall expire no later than the last day of the month in which the budget is adopted or one month from the due date of the return or

NOTE: Superior numbers appear as a separate section at the end of the digests.

payment, whichever comes later. It would require any person granted an extension pursuant to these provisions to pay, in addition to the tax, specified interest on the payment from the date on which the tax would have been due without the extension until the date of payment, except that no interest would be due on that portion of the payment equivalent to the amount due to the person from the state on the due date of the payment.

Ch. 325 (AB 211) Umberg. Transportation: high-speed rail system.

Existing law, which became inoperative on July 1, 1993, and will be repealed on January 1, 1994, creates the California-Nevada Super Speed Ground Transportation Commission, consisting of a California and a Nevada delegation, comprised, as specified, to provide for the construction and operation of a super speed rail system between southern California and Las Vegas, Nevada.

This bill would extend those provisions to January 1, 1996, and make other clarifying changes.

The bill would prohibit the California members of the commission from approving the submittal of an application for funding to any federal agency if that application is in conflict with, or in competition for, the funding of one or more corridors that are entirely within this state. The bill would require the commission to obtain the approval of the Intercity High-Speed Rail Commission, if there is a rail commission, before applying for any federal funds. The bill would also provide that all members of the California delegation to the commission, rather than only California-elected officials, are subject to the Political Reform Act of 1974.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 326 (AB 298) Snyder. Certificated and classified employees: transfer of leave credit.

Existing law provides that any certificated employee of any school district who has been employed for a period of not less than one calendar year, who subsequently accepts employment requiring certification qualifications at another school district at any time during or after the second year of employment with the first school district or within the school year succeeding a termination of employment, shall have the total amount of earned leave credit accrued for illness or injury at the previous employment transferred to the employing school district. Existing law also requires this transfer of earned leave credit for illness or injury under those circumstances for any certificated employee of any community college district who is subsequently employed by another community college district or by a school district.

This bill, in addition, would require the transfer of that earned leave credit accrued for illness or injury under those circumstances when any certificated employee of any school district subsequently accepts employment at a community college district, thereby imposing a state-mandated local program.

Existing law provides that any classified employee of any school district or county superintendent of schools who has been employed for a period of not less than one calendar year, who is terminated for reasons other than cause, except as specified, and who subsequently accepts employment at another school district or county superintendent of schools within one year of that termination, shall have the total amount of earned leave credit accrued for illness or injury at the previous employment transferred to the employing school district or county superintendent of schools. Existing law also requires this transfer of earned leave credit for illness or injury under those circumstances for any classified employee of any community college district or county superintendent of schools who is subsequently employed by another community college district or by a county superintendent of schools.

This bill, in addition, would require the transfer of that earned leave credit accrued for illness or injury under those circumstances when any classified employee of any school district subsequently accepts employment at a community college district or when any classified employee of any community college district subsequently accepts employment at a school district, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school

NOTE: Superior numbers appear as a separate section at the end of the digests.

districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 327 (AB 465) Peace. Check cashers.

Existing law requires every owner of a defined check casher's business to register his or her name, business name, social security number, and address with the Department of Justice. Existing law requires the department to establish a reasonable fee for registration.

This bill would instead require every owner of a check casher's business to obtain a permit from the Department of Justice to conduct a check casher's business. The bill would specify the requirements of the application for such a permit, and would require each applicant to be fingerprinted and to pay a specified fee. The bill would require each applicant to renew the permit annually, and would require the payment of a renewal fee.

Under the bill, an application for a permit or for renewal of a permit would be denied if the applicant has a felony conviction involving dishonesty, fraud, or deceit, provided the crime is substantially related to the qualifications, functions, or duties of a person engaged in the business of check cashing. The bill would require the department to adopt regulations to implement the provisions of the bill, to determine the amount of the fees required by the bill, and to prescribe forms for the applications and permit required by the bill.

Ch. 328 (SB 224) Hughes. Sex education: course content.

Existing law sets forth specified criteria that is required to be included in the content of sex education courses that discuss sexual intercourse in the public schools.

This bill would require information about sexual assault by an acquaintance and related issues to be included as a criterion in that course content.

Ch. 329 (SB 293) Craven. Mobilehome parks: for-sale signs.

Under existing law, signs advertising a mobilehome for sale may be posted in a window of the mobilehome or on a side of the mobilehome facing the street. Existing law limits the size of these signs, that may be posted as a matter of right, to 24 inches in width by 18 inches in height.

This bill would increase these dimensions to 24 inches in width by 36 inches in height, and would also authorize posting the signs on an H-frame or A-frame in front of the mobilehome with the sign face perpendicular to, but not extending into, a street. This bill would permit, as specified, the posting of signs conforming to these requirements advertising the display of a mobilehome for an "open house." The bill also would authorize tubes or holders for leaflets providing information on the mobilehome to be attached to the sign or mobilehome.

Ch. 330 (SB 889) Rosenthal. Santa Monica Community College District: parking service fees.

Existing law authorizes the governing board of a community college district to require students in attendance and employees of the district to pay a parking service fee in an amount, not to exceed $40 per semester or $20 per intersession, to be fixed by the board. Existing law excepts the Pasadena Community College District from that general provision and authorizes that district to require payment of a parking fee at a campus in excess of those amounts for the purpose of funding the construction of an oncampus parking structure if specified conditions are met.

This bill would also except the Santa Monica Community College District from that general provision and would authorize that district to require payment of a parking fee

NOTE: Superior numbers appear as a separate section at the end of the digests.

in an amount not to exceed the actual cost of constructing oncampus parking facilities or $60 per semester, whichever is less, if specified conditions are met.

Ch. 331 (SB 914) Leonard. Real estate: appraisers.

Existing law specifies standards and procedures for licensure as a real estate appraiser and certification as a state certified real estate appraiser. Existing law also provides that an individual who is not a state licensed or certified real estate appraiser may "assist in the preparation" of an appraisal under specified conditions.

This bill would delete the provision that defines "assists in the preparation."

Existing law requires the Director of the Office of Real Estate Appraisers to adopt regulations governing the process and procedure of applying for a real estate appraiser license and real estate appraiser certificate, including necessary experience requirements.

This bill would provide that a holder of a valid real estate broker license shall be deemed to have completed appraisal license application requirements upon proof that he or she has accumulated 1,000 hours of experience in the valuation of real property.

Existing law defines terms used in connection with agency listings for the transfer of real property, including, but not limited to, "property," "agent," "listing," and "exclusive agency listing."

This bill would define the term "appraiser" as one who is licensed or certified, as specified, and add it to the existing list of defined terms.

Existing law provides that a multiple listing service is a facility of cooperation of agents, as defined, operating through an intermediary which does not itself act as an agent, through which agents establish express or implied legal relationships with respect to listed properties.

This bill would, instead, provide that a multiple listing service is a facility of cooperation of agents or appraisers, operating through an intermediary which does not itself act as an agent or appraiser, through which agents establish express or implied legal relationships with respect to listed properties, or which may be used by agents and appraisers, pursuant to the rules of the service, to prepare market evaluations and appraisals of real property.

Existing law requires an agent who places a listing in the multiple listing service for compensation or in expectation of compensation to be responsible for the truth of all representations and statements in the listing of which that agent had knowledge or reasonably should have had knowledge to anyone injured by their falseness or inaccuracy.

This bill would, instead, require an agent or appraiser who places a listing or other information in the multiple listing service to be responsible for the truth of all representations and statements made by the agent or appraiser of which that agent or appraiser had knowledge or reasonably should have had knowledge to anyone injured by their falseness or inaccuracy.

Ch. 332 (SB 248) Presley. Riverside County Hospital: earthquake damage: appropriation.

Existing law, the Earthquake Safety and Public Buildings Rehabilitation Bond Act of 1990, provides for the issuance and sale of bonds for purposes of repair, reconstruction, retrofitting, replacement, or relocation of certain state and local government buildings.

This bill would appropriate $500,000 from the Earthquake Safety and Public Buildings Rehabilitation Fund of 1990 to the Controller for allocation to the County of Riverside for purposes of relocating the obstetrics and gynecology unit of the county hospital in the County of Riverside due to substantial earthquake damage. This bill would prohibit the Controller from allocating the funds until the county certifies that it has met a local matching requirement.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 333 (AB 871) McDonald. Transportation: property acquisition: eminent domain.

Existing law authorizes public agencies to enter into joint exercise of powers agree-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ments to jointly carry out powers, as specified in the agreement, that are held in common by each of the member agencies. The agreement may designate one of the member agencies, or create a separate entity, as the administering agency to exercise the joint powers. Under existing law, the Department of Transportation is authorized to exercise the power of eminent domain for specified purposes.

This bill would authorize the department to exercise the power of eminent domain in the name of the Alameda Corridor Transportation Authority, a joint exercise of powers agency created to carry out a specified transportation project, to acquire property of a railroad corporation necessary, incidental, or convenient for the construction of that project.

Ch. 334 (AB 1117) Bornstein. Campaign materials: unauthorized signatures.

(1) Existing law prohibits any person from publishing or causing to be published, with intent to deceive, any campaign advertisement, as defined, containing a signature that the person knows to be unauthorized. A violation of this provision is a public offense, punishable by imprisonment in the state prison or in a county jail, or by a fine not to exceed $50,000, or by both that fine and imprisonment.

This bill would limit punishment to a knowing and willful violation of this provision.

(2) Existing law also provides that any person whose signature is used in violation of the above provision, and any candidate for elective office whose election or defeat is expressly advocated in any campaign advertisement which violates this provision, shall have a civil cause of action against any person committing the violation.

Existing law defines a "signature," for these purposes, as a handwritten or mechanical signature, or a copy thereof.

This bill would extend the definition of a signature to include any representation of a person's name, including, but not limited to, a printed or typewritten representation that serves the same purpose as a handwritten or mechanical signature.

This bill would impose a state-mandated local program by changing the definition of a crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 335 (AB 615) Gotch. Child day care: smoking prohibition.

Existing law, the California Child Day Care Facilities Act, provides for the licensure and regulation of child day care facilities, which include day care centers and family day care homes, as defined. Under the act any person who willfully or repeatedly violates provisions of law pertaining to child day care facilities is guilty of a misdemeanor.

Existing law regulates the smoking of tobacco in various public places. Existing law authorizes a city or county to enforce its ordinance regulating the smoking of tobacco in a private residence that is licensed as a child day care facility during its hours of operation and in those areas of the facility where children are present.

This bill would prohibit smoking of tobacco in a private residence that is licensed as a family day care home during its hours of operation and in those areas of the facility where children are present. It would also prohibit the smoking of tobacco on the premises of a child day care center. Since this bill would change the definition of an existing crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 336 (AB 1858) Speier. Child day care facilities: baby walkers.

Existing law provides for the licensure and regulation of child day care facilities, which includes day care centers, large family day care homes, and small family day care homes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Violation of these provisions is a misdemeanor under existing law.

This bill would prohibit the keeping or using of a baby walker on the premises of a child day care facility. This bill would define a baby walker as an article described in the Federal Hazardous Substances Act regulations. The bill would exempt this provision from the misdemeanor sanction.

Ch. 337 (AB 426) Cortese. Endangered and threatened species: consultation.

(1) Existing law requires, until January 1, 1994, that each state lead agency consult with the Department of Fish and Game to ensure that any action authorized, funded, or carried out by that state lead agency is not likely to jeopardize the continued existence of any endangered or threatened species, and if jeopardy is found, the department is required to determine and specify reasonable and prudent alternatives consistent with conserving the species, as specified.

This bill would continue that existing law to January 1, 1999, by extending that termination date.

(2) Existing law continuously appropriates the funds in the Endangered and Rare Fish, Wildlife, and Plant Species Conservation and Enhancement Account in the Fish and Game Preservation Fund to the department for the costs of administering the provisions relating to endangered and rare species.

This bill would make an appropriation by continuing in effect the authority of the department to expend funds for the purposes described in (1) above.

Ch. 338 (AB 237) Rainey. Sentencing: victim attendance.

Existing law provides that the victim of any crime, or his or her parent or guardian if the victim is a minor, or the next of kin if the victim has died, has the right to attend all sentencing proceedings and shall be given adequate notice by the probation officer of all sentencing proceedings concerning the defendant.

This bill would extend this provision to apply to the victim's parents or guardians rather than parent or guardian if the victim is a minor.

Existing law also provides that the victim, or his or her parent or guardian if the victim is a minor, or the next of kin of the victim, has the right to appear, personally or by counsel, at the sentencing proceeding and to reasonably express his or her views, as specified.

This bill would provide that the victim, or up to two of the victim's parents or guardians if the victim is a minor, or the next of kin of the victim if the victim has died, has the right to appear at the sentencing proceeding for this purpose.

This bill would impose a state-mandated local program by increasing the duties of the probation department to notify more than one parent or guardian.

Existing law provides that the above-mentioned provisions added by initiative statute shall not be amended by the Legislature except by statute passed in each house by rollcall vote entered in the journal, ⅔ of the membership concurring, or by a statute that becomes effective only when approved by the electors.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 339 (AB 626) Polanco. Contracts.

Existing law provides that contracts for health studio services, defined to include contracts for instruction, training, or assistance in exercising, body building, and other such physical skills, cannot require payments or financing by the purchaser over a period in excess of 2 years from the date the seller and the buyer enter into the contract. The

NOTE: Superior numbers appear as a separate section at the end of the digests.

law provides, however, that while the term of the contract may not be measured by the life of the buyer, the services rendered to the buyer may extend over a period of up to 3 years from the date the parties enter into the contract.

This bill would revise and recast these provisions to provide that contracts for health studio services, may not exceed 3 years, and that these contracts may require payments or financing by the purchaser to a maximum of 3 years.

Ch. 340 (SB 601) Marks. Commission on Peace Officer Standards and Training: *high-speed vehicle pursuit training.*

Under existing law, the Commission on Peace Officer Standards and Training is required to adopt minimum standards for training specified peace officers, including city police officers and peace officer members of county sheriff's offices. The commission is required to implement a course of instruction for the training of law enforcement officers, among other subjects, in the handling of domestic violence complaints and missing person and runaway cases.

This bill would require the Commission on Peace Officer Standards and Training to implement, on or before November 1, 1994, a course or courses of instruction for the training of law enforcement officers in the handling of high-speed vehicle pursuits and to develop uniform, minimum guidelines for adoption by law enforcement agencies for response to high-speed vehicle pursuits, as specified. The bill would also require all law enforcement officers who have received their basic training before January 1, 1995, to participate in supplementary training on high-speed vehicle pursuit, as specified.

Ch. 341 (SB 12) Committee on Local Government. Validations.

This bill would enact the Second Validating Act of 1993, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 342 (SB 13) Committee on Local Government. Validations.

This bill would enact the Third Validating Act of 1993, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

Ch. 343 (SB 173) Deddeh. Real estate.

Existing law requires a lender in a loan transaction secured by real property to provide notice, as specified, to a loan applicant that, upon request, the applicant is entitled to receive a copy of the appraisal report, provided he or she has paid for the appraisal.

This bill would define certain terms for purposes of this provision. This bill would require an applicant's written request for a copy of an appraisal be received by the lender no later than 90 days after (1) the lender has provided notice of the action taken on the application, or (2) the application has been withdrawn. The bill would also require the lender to mail or deliver a copy of an appraisal within 15 days after receiving a written request from the applicant or within 15 days after receiving the appraisal, whichever occurs later.

Existing law provides that the above notice concerning a loan applicant's right to receive a copy of the appraisal shall be given at the time the applicant or borrower receives the good faith estimate, as specified.

This bill would require, where the loan is proposed to be secured by residential real property, the notice to be given no later than 15 days after the lender receives the written application and would specify the contents of the notice.

Existing law provides that in transactions involving a loan secured by nonresidential real property, the above notice is not required unless the loan involves purchase money financing or a refinancing of purchase money debt.

This bill would require, where the loan is proposed to be secured by nonresidential real property, the notice to be given within 15 days of receiving the appraisal. The bill would also provide that the notice shall specify that the applicant's request for a copy of the appraisal must be in writing and made within the required time limits, and that

NOTE: Superior numbers appear as a separate section at the end of the digests.

the applicant is only entitled to receive the appraisal for a specified purpose.

This bill would exempt from the notice requirements appraisals obtained by lenders on property owned by the lender and appraisals obtained by the lender in anticipation of modifying any existing loan agreement. The bill would also provide that, in the case of loans secured by residential real property, compliance with federal regulations, as specified, is deemed to be compliance with the notice requirements and another provision requiring the appraisal report to be given to the borrower.

Existing law provides that this requirement respecting right of access to appraisals is in addition to any right that may be created under any other provision of state or federal law.

This bill would instead provide that the requirement is in addition to any right of access to appraisals that exists under any other provision of state or federal law.

Ch. 344 (SB 178) Hughes. Criminal procedure: videotaping testimony: domestic violence.

Existing law authorizes the videotaping of the testimony at a preliminary hearing of a victim of specified sex crimes who is 15 years of age or less, or who is developmentally disabled, as specified, which testimony may be introduced in evidence at trial if the court finds that further testimony would cause the victim emotional trauma so that the victim is medically unavailable or otherwise unavailable within specified provisions of the Evidence Code.

This bill additionally would authorize the videotaping of the victim's testimony at a preliminary hearing in the case in which the defendant has been charged with spousal rape or inflicting corporal injury on specified persons resulting in a traumatic condition. This bill would provide that if the victim's prior testimony given at the preliminary hearing is admissible under the Evidence Code, then the videotape of that testimony may be introduced as evidence at trial.

Ch. 345 (AB 303) Epple. Domestic violence: court orders.

Existing law provides that every person guilty of contempt of court through the willful disobedience of any process or order lawfully issued by any court is guilty of a misdemeanor, punishable by imprisonment in a county jail for up to 6 months.

This bill would increase the punishment for contempt under the above provision, where it involves any willful and knowing violation of any protective or stay away court order related to a criminal proceeding involving domestic violence, to imprisonment in a county jail for not more than one year, or by a fine of not more than $1,000, or by both the imprisonment and the fine.

This bill also would provide that any willful and knowing violation of any protective or stay away court order (1) issued, upon good cause belief that intimidation or dissuasion of a victim or witness has occurred or is reasonably likely to occur, in a pending criminal proceeding involving domestic violence, as defined, (2) issued as a condition of probation after a conviction in a criminal proceeding involving domestic violence, as defined, or (3) issued under other specific conditions shall constitute contempt, punishable by imprisonment in a county jail for not more than one year, or by a fine of not more than $1,000, or by both the imprisonment and the fine. A violation of the above-described offenses that results in a physical injury would be punishable by imprisonment in a county jail for at least 48 hours, whether a fine or imprisonment is imposed, or the sentence is suspended.

This bill also would provide that a 2nd or subsequent conviction for a violation of the above-described offenses occurring within 7 years of a prior conviction for a violation of any of these offenses and involving an act of violence or "a credible threat" of violence, as defined, shall be punishable by imprisonment in a county jail not to exceed one year or in the state prison for 16 months or 2 or 3 years.

Because this bill would increase the punishment for a crime, it would impose a state-mandated local program.

This bill also, among other things, would authorize or require, as specified, the court to impose specified conditions of probation, if probation is granted upon conviction of the above-described offenses. Because this bill would increase the duties of probation

NOTE: Superior numbers appear as a separate section at the end of the digests.

officers with regard to the implementation of certain mandated conditions of probation, it would impose a state-mandated local program.

Existing law provides that when a contempt is not committed in the immediate view and presence of the court, or of the judge at chambers, an affidavit shall be presented to the court or judge of the facts constituting the contempt, or a statement of the facts by the referees or arbitrators, or other judicial officers. Existing law authorizes, in this case, the issuance of a warrant of attachment to bring the person charged to answer, or, without a previous arrest, the granting of a warrant of commitment, upon notice, or upon an order to show cause.

This bill would require the prosecuting agency of each county to assume the primary responsibility for the enforcement of the above-described orders that constitute contempt, as proposed by this bill, thereby imposing a state-mandated local program by increasing the duties of the district attorney.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 346 (AB 331) Baca. Child abuse reporting.

Existing law requires certain persons to report instances of known or suspected child abuse, as defined. Existing law provides that child abuse, for these purposes, does not include an amount of force that is reasonable and necessary for a peace officer to quell a disturbance threatening physical injury to person or damage to property, for purposes of self-defense, to obtain control of the child, or to apprehend an escapee. A failure to report pursuant to this provision is a misdemeanor.

This bill would provide, instead, that child abuse for these purposes does not include an injury caused by reasonable and necessary force used by a peace officer acting within the course and scope of his or her employment as a peace officer. This bill would also make related, conforming changes.

Because this bill would change the definition of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 347 (AB 366) Cortese. Local agencies: reorganizations: Santa Clara County.

Existing law prohibits, until January 1, 1994, the local agency formation commission from reviewing a reorganization, as defined, that includes an annexation to any city in Santa Clara County of unincorporated territory which is within the urban service area of the city if the reorganization is initiated by resolution of the legislative body of the city and prescribes the procedure to be followed for the reorganizations.

This bill would delete the January 1, 1994 repeal date of this provision.

Ch. 348 (AB 532) Morrow. Business solicitations.

Existing state law prohibits false or misleading statements or advertisements in the sale or solicitation of goods or services. Existing federal law provides that certain mail by nongovernmental entities that contains any term or symbol, as specified, that reasonably could be interpreted or construed as implying any federal government connection, approval, or endorsement, is nonmailable matter.

This bill would prohibit a nongovernmental entity from engaging in solicitations, as specified, by means of a mailing that contains a seal, insignia, trade or brand name, or

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

any other term or symbol that reasonably could be interpreted or construed as implying any state or local government connection, approval or endorsement, except as provided.

Existing law makes violation of various provisions of law relating to advertising a misdemeanor.

This bill, by adding the above provision to those provisions, would enlarge the scope of an existing crime and thereby constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 349 (AB 572) Johnson. Courts: records.

Existing law requires the clerk of the superior court to give notice to specified entities of the proposed destruction of any court papers and records which are open to public inspection and prescribes a procedure for the transfer of these papers and records to requesting entities, in lieu of their destruction.

This bill would repeal those provisions.

Ch. 350 (AB 654) Speier. Mausoleums and columbariums: construction standards.

Existing law requires that both community and private mausoleums and columbariums meet certain construction standards. Existing law requires the building department of every city or county or other designated department or officer to enforce these standards.

Existing law requires the application of different standards to community and private mausoleums and columbariums. Existing law requires application of the 1967 Editions of the Uniform Building Code and the Uniform Plumbing Code, and the 1968 Edition of the National Electric Code to the construction of these structures.

This bill would eliminate the distinction between community and private mausoleums. This bill would require the application of the 1991 Edition, with 1992 amendments, of the Uniform Building Code and the Uniform Plumbing Code, and of the 1990 Edition, with 1992 amendments, of the National Electrical Code.

Under existing law, the construction standards applied to columbariums and mausoleums include, among other things, standards for structural framework, load-bearing walls, floor slab construction, waterproofing, materials used in construction, and seismic safety.

This bill would revise these construction standards.

Existing law provides that violation of any of these provisions is a misdemeanor. By revising the construction standards, this bill would change the definition of a crime, thereby creating a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 351 (AB 660) Moore. Telephones: privacy.

Existing law, with specified exceptions, directs the Public Utilities Commission to require any call identification service offered by a telephone corporation, or by any other person or corporation that makes use of the facilities of a telephone corporation, to allow the caller, at no charge, to withhold, on an individual basis, the display of the caller's telephone number from the telephone instrument of the individual receiving the call. Existing law exempts "800" or "900" access code telephone service from this requirement until the commission determines the telephone corporation has the technical capability to comply.

This bill would require telephone subscribers to be annually notified that use of an "800" or "900" telephone number may result in the disclosure of the subscriber's telephone number to the called party.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would require the commission, by rule or order, to impose the responsibility for the notification with the telephone corporation that offers the caller identification service, in connection with an "800" or "900" service.

Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 352 (AB 668) Speier. Continuing care contracts: provider reserves.

Existing law empowers the State Department of Social Services to certify and regulate providers of continuing care. Existing law prohibits execution of continuing care contracts unless the provider has a certificate of authority issued by the department, and regulates the contents of the contract.

Existing law imposes requirements upon providers of continuing care, including, but not limited to, the requirement that any entity that has executed or assumed continuing care contracts maintain certain reserves based upon a prescribed mortality table. Existing law provides that the table shall be inoperative when the department adopts regulations to update the table.

This bill would require the department to adopt regulations to update the table by January 1, 1996, and would make additional changes of a technical nature.

This bill would require an annual report regarding the financial condition of a provider, that is required to be submitted by providers to the department, to include certain additional information.

Existing law requires the Committee on Continuing Care Contracts of the State Social Services Advisory Board to act in advisory capacity to the department regarding continuing care contracts.

This bill would revise the membership of the committee.

This bill would make other changes of a technical, nonsubstantive nature.

Ch. 353 (AB 1047) Epple. Alcoholic beverages: enforcement.

Existing law requires agents of the Department of Alcoholic Beverage Control to successfully complete the 4-week course on narcotics enforcement approved by the Commission on Peace Officer Standards and Training by June 1, 1993.

This bill would extend the completion date to June 1, 1995.

Ch. 354 (AB 1088) Knowles. County medical services.

Existing law authorizes certain counties to enter into contracts with the State Department of Health Services for the provision of health services under the County Medical Services Program, and requires that each county pay a specified amount as a condition of participation in that program.

This bill would revise the amounts that the Counties of Calaveras and Mono are required to pay to participate in that program.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 355 (AB 1189) Aguiar. State contracts: toxic substances.

The State Contract Act prescribes the procedures and requirements applicable to various state agency contracts.

This bill would exclude contracts made for specified emergency toxic substance work or remedial measures from the procedures and requirements of the State Contract Act if the work is immediately necessary to protect the health, safety, and welfare of the general public, as specified.

Ch. 356 (AB 1238) Quackenbush. Unemployment insurance: tax liens.

Existing law provides that unpaid amounts that are due under unemployment com-

NOTE: Superior numbers appear as a separate section at the end of the digests.

pensation provisions become enforceable tax liens, and prescribes dates on which these amounts become due and payable.

This bill would authorize the Director of Employment Development, if he or she believes that it will be in the best interest of the state, to enter into an agreement to accept partial payment in satisfaction of full liability for unpaid amounts due under unemployment compensation provisions under specified conditions. It would permit the director to allow the agreed upon amount to be paid in installments under a payment agreement not exceeding 5 years, as provided, and would establish various requirements and procedures for the negotiation and approval of these partial payment agreements generally.

Ch. 357 (AB 1266) Martinez. Firearms.

(1) Under existing law, any person who, among other things, manufactures, imports, keeps for sale, or possesses specified weapons, including, among others, any multiburst trigger activator or any unconventional pistol, is guilty of a felony. Existing law expressly exempts from this prohibition the possession prior to January 1, 1992, of a multiburst trigger activator, as specified.

This bill would delete this exception.

(2) For purposes of the provisions specified in (1), an unconventional pistol is defined as a pistol or revolver that does not have a rifled bore and has a barrel or barrels of less than 18 inches in length or has an overall length of less than 26 inches.

This bill would instead define an unconventional pistol as a firearm with the above specifications. By expanding the scope of an existing crime, this bill would create a state-mandated local program.

(3) Existing law defines a zip gun, for the purposes of the provisions specified in (1), as any weapon or device that meets specified criteria, including the criteria that the weapon have a barrel or barrels less than 18 inches in length or an overall length of less than 26 inches.

This bill would delete this criteria for the definition of a zip gun. By deleting this criteria, the bill would expand the scope of a crime, thereby creating a state-mandated local program.

(4) Existing law provides that any person who carries concealed upon his or her person any dirk or dagger is guilty of a felony.

The bill would define a dirk or dagger for these purposes to mean a knife or other instrument with or without a handguard that is primarily designed, constructed, or altered to be a stabbing instrument designed to inflict great bodily injury or death.

(5) Existing law defines a plastic firearm for the purposes of the prohibitions specified in (1).

This bill would refer to this type of firearm as an "undetectable firearm" instead of a "plastic firearm."

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 358 (AB 1276) Seastrand. Public Employees' Retirement System: benefits.

The Public Employees' Retirement Law provides for specified state employees an alternative, noncontributory retirement plan designated the Second Tier.

This bill would permit specified persons who were members on or before June 30, 1991, who were eligible to elect membership on or before June 30, 1991, or were employed in any position on or before June 30, 1991, that would lead to membership as a state member to be granted the right, under specified circumstances, to be subject to the system's contributory retirement plan rather than the Second Tier plan.

Ch. 359 (AB 1323) Speier. Contracts.

Existing law regulates the form and content of dating service and weight loss contracts. Existing law also provides that a buyer may cancel those contracts by sending a

NOTE: Superior numbers appear as a separate section at the end of the digests.

written notice of cancellation to the seller by certified mail or telegram, prior to midnight of the 3rd business day after the day on which the contract was signed, and requires that specified language to this effect appear on all contracts subject to this provision. Under existing law, a buyer who cancels a contract, as specified, is entitled to a refund of moneys paid pursuant to the contract, except that payment is required to be made for any services covered by the contract and received by the buyer prior to cancellation.

This bill would permit a buyer to give written notice of cancellation by any form of mail, by telegram, or by delivery, as specified. This bill would also provide that a buyer shall be permitted to cancel contracts governed by these provisions without penalty or obligation and require that language to this effect appear on the contracts.

Ch. 360 (AB 1569) Harvey. Solid waste landfills: closure and postclosure: regulations.

Existing law, the California Integrated Waste Management Act of 1989, requires, on or before January 1, 1989, or upon application to become an operator of a solid waste facility, the owner or operator of a solid waste landfill, as defined, to make a specified certification to the California Integrated Waste Management Board and the local enforcement agency regarding closure and postclosure maintenance of the solid waste landfill, including a certification that the owner or operator has established a trust fund or other financial arrangement to ensure adequate resources for closure and postclosure maintenance.

The act requires owners and operators of disposal sites to provide evidence of financial responsibility for closure and postclosure maintenance through the use of specified federal mechanisms or through the use of any other mechanisms approved by the board. The board is authorized to adopt regulations which reasonably condition the use of any such mechanisms, as specified.

This bill would require the board, by March 1, 1994, to review and revise those regulations to make the regulations consistent with the financial assurance criteria specified in certain federal regulations. The board would be required to minimize the cost of compliance with those regulations with regard to public solid waste landfills, as specified.

Ch. 361 (AB 1852) Murray. Occupational therapy.

Existing law requires any person representing himself or herself as an occupational therapist or occupational therapy assistant to meet certain specified qualifications. The law does not otherwise provide for the licensing or regulation of occupational therapists.

This bill would require a person representing himself or herself as an occupational therapist to meet certain requirements, including being a graduate of an occupational therapy curriculum accredited by specified organizations, and being certified, or eligible for certification, by the American Occupational Therapy Certification Board or having prescribed experience. This bill would require that a person representing himself or herself as an occupational therapy assistant also to be certified, or eligible for certification, by that board.

Ch. 362 (AB 1938) Statham. Alcoholic beverages: tied-house restrictions.

Existing provisions of the Alcoholic Beverage Control Act known as "tied-house" restrictions generally prohibit an on-sale alcoholic beverage licensee from having an ownership interest in an alcoholic beverage manufacturer, and establish a limited exception to these restrictions in a county of the first class.

This bill would authorize the holder of no more than 6 on-sale licenses to (1) own a corporate licensed beer manufacturer that produces 60,000 barrels or less a year and (2) serve on the board of directors and as an officer or employee of that manufacturer. The bill would specify that it does not apply to a county of the first class.

Ch. 363 (AB 2248) Collins. Pilots: exceptions.

Under existing law, any person who is not the master or owner, or who is not licensed as a pilot or inland pilot, with specified exceptions, and who acts as a pilot for ship movements or special operations on the waters of the Bays of San Francisco, San Pablo,

NOTE: Superior numbers appear as a separate section at the end of the digests.

and Suisun, is guilty of a misdemeanor.

This bill would also except from that prohibition persons piloting a vessel when a state licensed pilot is prevented from joining or refuses to join a vessel as specified.

Ch. 364 (AB 2277) Harvey. Developmental disabilities: regional centers.

Under existing law, the State Department of Developmental Services is required, within the limitations of funds appropriated, to contract with appropriate private nonprofit corporations for the establishment and operation of regional centers for persons with developmental disabilities and their families.

Existing law also specifies that one regional center shall be established and maintained to serve Kern County and portions of counties whose boundaries are contiguous with the boundaries of Kern County.

This bill would instead require that the department, within the limitations of funds appropriated, contract with an appropriate private nonprofit corporation or corporations to operate one regional center to serve the Counties of Inyo, Kern, and Mono, and one regional center to serve the Counties of Riverside and San Bernardino.

Ch. 365 (AB 2321) Haynes. Weights and measures: local sealers.

Existing law requires the Department of Food and Agriculture to inspect the work of local sealers at least once every 5 years.

This bill would, instead, require the department to inspect the work of local sealers at a frequency determined by the Director of Food and Agriculture.

Ch. 366 (AB 2324) Caldera. Housing: financial institutions.

Existing law, known as the Holden Act, generally requires the Secretary of Business, Transportation and Housing to monitor and investigate the building patterns and lending practices of financial institutions relating to housing. More specifically, the Holden Act prohibits a financial institution from discriminating in the availability of, or in the provision of, financial assistance for the purpose of rehabilitating, improving, or refinancing housing accommodations due, in whole or in part, to the consideration of conditions, characteristics, or trends in the neighborhood surrounding the housing accommodation unless the financial institution can demonstrate that the consideration in the particular case is required to avoid an unsafe or unsound business practice.

This bill would provide that nothing in that provision shall be construed to prohibit any financial institution from establishing a special loan program designed to engender equality in housing in accordance with the federal Fair Housing Act or similar state and federal laws, so long as the program promotes housing opportunities in ethnic minority or low-income neighborhoods.

Ch. 367 (AB 513) Knight. Superior courts: districts.

Existing law authorizes the board of supervisors of any county which has a population of not less than 4,000,000, as specified, to divide the county by ordinance into not more than 11 superior court districts within which one or more sessions of the superior court shall be held.

This bill would expand this authorization to 12 superior court districts, and make conforming changes.

Ch. 368 (AB 1307) Murray. Personnel commission: budget.

Existing law authorizes the governing board of a school district to determine the budget for the first year of the personnel commission of the school district. The governing board is authorized to advance funds to establish the work of the personnel commission.

This bill would instead require the personnel commission, in conjunction with the governing board of the school district, to determine the budget for the first year of the personnel commission of the school district. In the absence of an agreement between the personnel commission and the governing board, the bill would require the county superintendent of schools to determine the budget, as specified. In addition, the bill would require the governing board to provide funds to support the work of the commis-

NOTE: Superior numbers appear as a separate section at the end of the digests.

sion. The bill would thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 369 (AB 1344) Epple. Crimes: assault.

Under existing law, any person who commits an assault with a deadly weapon or instrument other than a firearm or by any means of force likely to produce great bodily injury shall be punished by imprisonment in the state prison, as specified, or in a county jail for not exceeding one year, or by a fine not exceeding $10,000, or by both the fine and imprisonment.

Existing law also provides, among other things, that any person who commits an assault upon the person of another, or upon the person of a peace officer or firefighter, as specified, with a semiautomatic rifle shall be punished by imprisonment in the state prison, as specified.

This bill, instead, would provide that any person who commits an assault upon the person of another, or upon the person of a peace officer or firefighter, as specified, with a semiautomatic firearm shall be punished by imprisonment in the state prison, as specified. Because this bill would change the definitions of crimes, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill also would make technical, nonsubstantive changes.

Ch. 370 (AB 1433) Margolin. Disproportionate share hospital revenues.

Existing law contained in the California Health Care for the Indigent Program (CHIP) provides for the allocation of money from the Cigarette and Tobacco Products Surtax Fund to the counties to provide health care benefits.

This bill would require counties to deposit all net disproportionate share hospital revenues, as defined, into a fund, and retain the revenues until utilized for the support of health care services rendered by disproportionate share hospitals, and would specify that certain of those revenues shall not be treated as revenues for purposes of computing county financial maintenance of effort requirements for the CHIP.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 371 (AB 1457) Bowen. Community service: fraudulent certification of completion.

Existing law authorizes the court to impose and require any or all of specified terms of imprisonment, fines, conditions, and other reasonable conditions of probation upon a person convicted of an offense, including, but not limited to, community service.

This bill would provide that every person who, with the intent to defraud, certifies that a person ordered by the court to participate in community service as a condition of probation has completed the number of hours of community service prescribed in the court order and the participant has not completed the prescribed number of hours, is guilty of a misdemeanor.

Because this bill creates a new crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 372 (AB 1832) Conroy. Perfusionists: definition of perfusion services.

Existing law prohibits any person from holding himself or herself out as a perfusionist after January 1, 1993, unless he or she meets certain educational and examination requirements. Existing law defines the practice of perfusion to include use of certain monitoring and analysis, and specifies that these provisions do not exempt perfusionists from certain laws pertaining to clinical laboratory technologists.

This bill would revise those provisions to authorize the performance and use of certain monitoring and analysis, and to specify that perfusionists are not exempt from certain nonpersonnel related requirements, including quality assurance and equipment maintenance requirements pertaining to clinical laboratory technologists.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 373 (AB 1846) Peace. Real estate.

Under existing law, provisions regulating transactions in trust deeds and real property sales contracts, and real property securities dealers, as specified, do not apply to any person whose business is that of acting as an authorized representative, agent, or loan correspondent of any person or employee thereof doing business relating to specified state and federal financial institutions and other entities, including pension trusts, or when making loans qualified for sale to those institutions.

This bill would additionally provide that those provisions do not apply to any person who is an approved lender, mortgagee, seller, or servicer for specified federal agencies or entities when making a loan to be sold to, or serviced on behalf of and subject to audit by, any of those agencies or entities with respect to those loans.

Ch. 374 (AB 1945) Campbell. Consumer warranties: motorized wheelchairs.

Existing law, with specified exceptions, requires every new or used assistive device sold at retail in this state to be accompanied by a written warranty that the device is specifically fit for the particular needs of the buyer. "Assistive device" is defined to include any apparatus which is used to assist a physically disabled person in the mitigation of an injury or disease, with certain exceptions. Under existing law, this warranty requires that upon nonconformity, the device may be returned to the seller within 30 days, or longer if a longer period is agreed upon, for adjustment, replacement, or refund of the purchase price.

Existing law also requires every manufacturer, distributor, or retailer making express warranties with respect to consumer goods to set forth the warranties in simple language. Under existing law, every manufacturer of consumer goods sold in this state for which an express warranty is made is required to maintain service and repair facilities, or designate authorized service and repair facilities, in this state. Existing law requires the goods to be serviced or repaired within 30 days, unless delay is caused by conditions beyond the control of the manufacturer.

Under existing law, if the manufacturer or its representative does not service or repair the goods to conform to the express warranties after a reasonable number of attempts, the manufacturer is required to either replace the goods or reimburse the buyer in an amount equal to the purchase price, less the amount directly attributable to use by the buyer. Existing law prescribes remedies for the violation of these provisions, including a civil penalty of 2 times the actual damages for willful failure to comply, and the award of attorney's fees and costs to a prevailing buyer.

This bill would require all new motorized wheelchairs sold at retail or leased in this state and paid for in whole or in part by Medi-Cal to be accompanied by the manufacturer's or lessor's written express warranty that the wheelchair is free of defects. Under the bill, the duration of the warranty would be for a period of at least one year from the date of the first delivery of the wheelchair to the consumer. If the written express warranty is not furnished to the consumer, the motorized wheelchair nonetheless would be deemed to be covered by the express warranty.

The bill would provide that the provisions of existing law described above for express

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

warranties would govern this express warranty for new motorized wheelchairs whether or not those provisions only apply to the sale, and not the lease, of goods. The bill would specify that no motorized wheelchair that has been returned by the consumer for failure to repair a nonconformity after a reasonable number of attempts, either in this state or in another state pursuant to a similar statute of that state, may be sold or leased again in this state unless the reasons for the return are fully disclosed to the prospective buyer or lessee. The bill would make related changes.

Ch. 375 (SB 104) Deddeh. Environmental quality: archaeological resources.

(1) Existing law, the California Environmental Quality Act, requires, until January 1, 1994, that a lead agency, as part of determining whether an environmental impact report or a negative declaration is required for a project, determine whether the project may have a significant effect on archaeological resources. The act requires that any environmental impact report prepared on the project consider unique archaeological resources, as defined, and not consider nonunique archaeological resources, as defined, and requires a negative declaration to be issued if it would otherwise be issued, but for the issue of nonunique archaeological resources. These provisions also require the project applicant to guarantee to pay ½ of the estimated cost of mitigating the significant effects on unique archaeological resources, subject to specified limitations as to the amount to be paid.

This bill would extend the operation of those provisions indefinitely, thereby imposing a state-mandated local program.

(2) The act provides that certain classes of projects may be exempt from the act on the basis that they have been determined not to have a significant effect on the environment, and prohibits specified projects, including those which may damage scenic resources or cause a substantial adverse change in the significance of an historical resource, as defined, from being exempted.

This bill would provide that it is not intended to affect or modify those requirements.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 376 (SB 233) Kopp. Transportation: funding: California Transportation Commission.

Under existing law, the California Transportation Commission is required every 2 years to adopt a 7-year state transportation improvement program for the allocation and expenditure of funds from the State Highway Account in the State Transportation Fund. Within each 5-year period beginning July 1, 1988, the funds, with the exception of those for specified programs, are required to be expended in accordance with the so-called county minimums and north-south split formulas.

This bill would delete the exception for funds for specified programs, and would require the funds to be programmed, rather than expended, in accordance with those formulas within each 4-year period, rather than each 5-year period. The bill would define the term "project costs" for this purpose. The bill would make related changes.

Ch. 377 (SB 244) Russell. Adoption: payment.

(1) Under existing law, it is a misdemeanor for any person or agency to offer to pay money or anything of value, or to pay money or anything of value, to a parent for the placement for adoption, for the consent to an adoption, or for cooperation in the completion of an adoption of the parent's child.

(2) Under existing law, it is also a misdemeanor, punishable by imprisonment in a county jail for 6 months or by a fine not exceeding $2,500, for any parent to obtain financial benefits relating to maternity-connected medical or hospital and necessary living expenses of the mother preceding and during confinement when there is an intent to not complete the adoption or not to consent to the adoption. In addition, it is a misdemeanor punishable by imprisonment in a county jail for 6 months or by a fine

NOTE: Superior numbers appear as a separate section at the end of the digests.

not exceeding $2,500 for any parent to obtain these financial benefits from 2 or more prospective adopting families of persons if either parent (a) knowingly fails to disclose to those families or persons that there are other prospective adopting families or persons interested in adopting the child, with knowledge that there is an obligation to disclose that information, and (b) knowingly accepts the above-specified financial benefits if the aggregate amount exceeds the reasonable maternity-connected medical or hospital and necessary living expenses of the mother preceding and during the pregnancy.

(3) This bill would change the penalty for violating the provisions specified in (2) above to a misdemeanor punishable by imprisonment in a county jail not exceeding one year or by a fine not exceeding $2,500.

Because this change in punishment could result in convicted persons being sentenced to more time in county jail, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 378 (SB 322) Morgan. Teacher credentialing.

(1) Existing law requires the Commission on Teacher Credentialing to review requests, from specified entities and persons, to waive provisions regarding teacher credentialing. Existing law also authorizes the commission to grant a waiver when it finds that the credential candidate or candidates will complete professional preparation equivalent to that prescribed under the provisions to be waived.

This bill would authorize the commission, in addition, to grant a waiver of the provisions regarding teacher credentialing when it finds that the candidate has completed the professional preparation equivalent to that prescribed under the provision to be waived or that a waiver is necessary to provide a local education agency one semester or less to address short-term shortages of fully qualified educators, as specified, to provide credential candidates additional time to complete a credential requirement, to allow school districts to implement education reform or restructuring, to temporarily relieve small, geographically isolated regions, and to provide other temporary exemptions when deemed appropriate by the commission.

(2) Existing law requires that candidates for preliminary services credentials with a specialization in administrative services possess a teaching or services credential, as specified. The preliminary services credential with a specialization in administrative services is valid for either 3 or 5 years, as specified.

This bill would include the designated subjects adult education and special subjects teaching credentials and the services credential with specialization in health for school nurse as credentials that satisfy the minimum requirements for a preliminary services credential with a specialization in administrative services. The bill would require candidates to be employed, as specified, in an administrative position in a public or private school. This credential would be valid for 5 years from the date of initial employment in a full- or part-time administrative position.

(3) Existing law requires that candidates for professional services credentials with a specialization in administrative services complete advanced study and field experiences or internship, as specified.

This bill would require instead the completion of a program of advanced preparation for which the Commission on Teacher Credentialing would adopt standards and criteria and which would include an individualized program of professional development, as specified.

(4) Existing law authorizes the holder of a services credential with a specialization in administrative services to perform services commensurate with his or her preparation, as specified.

This bill would authorize the holder to perform instead administrative services at all grade levels.

(5) Existing law provides that the Commission on Teacher Credentialing may issue or renew emergency teaching or specialist permits. Existing law further provides that

NOTE: Superior numbers appear as a separate section at the end of the digests.

a person holding an emergency teaching or specialist permit shall teach only with the assistance of a certificated employee who has at least 4 years of full-time teaching experience.

This bill would reduce to 3 years the number of years of full-time teaching experience necessary to assist a person holding an emergency teaching or specialist permit.

Ch. 379 (SB 341) Craven. Automotive repair: auto body repair.

Existing law authorizes the Director of Consumer Affairs to direct the Bureau of Automotive Repair to create an advisory committee to conduct a study, as specified, on auto body repair. Existing law also requires the director to report findings and recommendations to the Legislature by December 1, 1993.

This bill, instead, would require the director to report findings and recommendations to the Legislature by July 1, 1994.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 380 (SB 392) Russell. Escrow agents.

Existing law requires persons seeking employment with an escrow agent to complete an employment application that includes specified information. The application is required to be forwarded to the Commissioner of Corporations.

This bill would require the application to include the applicant's residence address for the past 10 years.

Ch. 381 (SB 810) Ayala. State employment: military leave.

Existing law establishes certain rights and benefits that accrue to civil service employees during and after leave for military service, including, but not limited to, appointment and reinstatement rights.

This bill would, instead, make these provisions apply to "executive branch" employees rather than "civil service" employees, would define "employee," "civil service employee," and "exempt employee" for this purpose, and would make conforming changes.

Existing law requires the appointing power, upon being presented with a copy of orders for active duty in the armed forces, to grant a military leave of absence for a period of active duty specified in the orders, not to exceed 4 years for a permanent or probationary employee, or 6 months for a limited-term or temporary employee.

This bill would make the 4-year maximum applicable to exempt employees, would delete the 6-month maximum, and would, instead, make the maximum for limited-term and temporary employees the remainder of the employee's appointment.

Existing law requires that an employee who is granted long-term, short-term, or emergency military leave of absence receive his or her salary or compensation for the first 30 days of active duty during the absence.

Existing law, in addition, requires that an employee who is granted short-term or emergency military leave of absence receive the same vacation, sick leave, and other civil service status, rights, and benefits as though he or she had remained in his or her position, and requires that the person's probationary period, if any, be extended by the length of the absence.

This bill would make this additional grant of status, rights, and benefits applicable to employees who are granted long-term military leave, and would require the granting of up to 6 months of leave credits.

Existing law requires a veteran who is reinstated from military leave to receive layoff seniority for the time spent on the leave on the same basis as if it were service in the class with the highest maximum salary to which he received appointment within one year after his return from the leave, and requires that seniority credits be forfeited in the event of a continuous break in service of 6 months or more.

This bill would, instead, require that a veteran who is reinstated from military leave receive layoff seniority for the time spent on the leave on the same basis as if it were service in the employee's former position, and would delete the requirement that the seniority credits be forfeited in the event of a continuous break in service of 6 months or more.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law, with certain exceptions, requires permanent or probationary employees on military leave, or who resign for the purpose of entering the recognized military service, to be reinstated to their former positions if they return to state service within specified timeframes.

This bill would, also, make this requirement applicable to exempt employees, and would require that reinstatement reestablish the employee's tenure and civil service reinstatement rights, if any, as they existed immediately prior to his or her military leave or resignation.

Existing law requires limited-term or temporary employees on short-term or emergency military leave, to be reinstated to their former civil service status if they return to state service within specified timeframes.

This bill would make this requirement applicable to absence due to any military leave.

Existing law specifies the rights and status of public officers and employees on military leave who are not subject to civil service.

This bill would with respect to state officers or employees, instead, make these provisions applicable to officers and employees who are not within the executive branch.

Existing law specifies the rights and status of public officers and employees that have resigned to serve or to continue to serve in the Armed Forces, and defines "public officers and employees" to include Members of the Legislature, officers of the judiciary, and all other state officers and employees not within the civil service.

This bill would, instead, make these provisions applicable to Members of the Legislature, officers of the judiciary, and all other state officers and employees who are not within the executive branch.

This bill would apply only to military leaves commencing after January 1, 1994, and would apply only to the extent permitted by federal law.

Ch. 382 (SB 848) Dills. Liens: future interest.

Existing law authorizes agreements to create a lien upon property not yet acquired by the party agreeing to give the lien, or not yet in existence. In these cases, the lien attaches when the property is acquired by that party, to the extent of the interest acquired.

This bill would provide that, for purposes of these lien provisions, an agreement by a beneficiary of a decedent's estate to give a lien on undistributed real property in the estate creates no lien until the property is distributed to the beneficiary. The bill also would provide that upon the recordation of an order confirming the sale of the real property, as specified, and the recording of a duly executed deed in accordance therewith, any expectancy of a lien is extinguished.

Ch. 383 (SB 965) Bergeson. Special license plates: fees.

(1) Existing law requires the Department of Motor Vehicles to issue, upon application and for additional fees, environmental and other special license plates. Existing law requires a person who is issued commemorative Olympic reflectorized license plates, as specified, to pay $100 for the issuance of the plates, $12 to transfer the plates to another vehicle, and $30 for duplicate or replacement plates.

This bill would increase the fees for transferring the plates and for duplicate or replacement plates. The bill would add a fee for the annual renewal of the plates. The fees would be deposited in the California Olympic Training Account.

(2) Existing provisions of the Government Code continuously appropriate the money in the California Olympic Training Account. Because this bill would increase the amount of money in the account, it would make an appropriation.

Ch. 384 (SB 1083) Calderon. Structural pest control.

Existing law provides for the licensure of persons as structural pest control operators and as field representatives, and provides for the regulation of those activities.

Under existing law, a license expires after 3 years.

This bill would authorize an individual licensed as both an operator and a field representative to request that both licenses expire on the same date.

Existing law provides for disciplinary action against operators who violate various

NOTE: Superior numbers appear as a separate section at the end of the digests.

provisions.

This bill would authorize the Structural Pest Control Board or a county agricultural commissioner to levy a fine against a registered structural pest control company acting as a prime contractor for work conducted under a Branch 1 license for certain major violations by subcontractors, which would be paid into the Education and Enforcement Account in the Structural Pest Control Education and Enforcement Fund, which is a continuously appropriated fund.

Ch. 385 (SB 1179) Watson. Medi-Cal: disproportionate share hospitals.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services, including both inpatient and outpatient hospital services.

Existing law permits hospitals that provide Medi-Cal outpatient services and that provide a disproportionate share of services to low-income persons to be provided with supplemental payments for Medi-Cal outpatient services.

This bill would revise the methodology for determining eligibility for, as well as the amount of, supplemental payments to disproportionate share hospitals providing Medi-Cal outpatient services.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 386 (SB 73) Hayden. Motor vehicles: chop shops: vehicle identification: crimes.

(1) Under existing law, the theft of a motor vehicle or motor vehicle part is a crime. Also, under existing law, it is a misdemeanor to intentionally deface, destroy, or alter the motor number, or other distinguishing number, or identification mark used for the registration of a motor vehicle, or to knowingly buy, sell, offer for sale, receive, or possess a vehicle or part from which any serial or identification number has been removed, defaced, altered, or destroyed. In addition, existing law also prohibits any person from willfully injuring or tampering with any vehicle or the contents of a vehicle or from breaking or removing any part of a vehicle without the owner's consent. Existing law does not make it a specific crime to own, operate, or conduct a "chop shop."

This bill would make it a felony or a misdemeanor, with prescribed punishment, to knowingly and intentionally own or operate a chop shop, as defined, or to engage in other specified conduct relative to vehicle identification numbers, as defined, of motor vehicles or parts with the intent to misrepresent the identity or prevent the identification of the vehicles or parts, or to buy, dispose of, sell, or transfer those vehicles or parts. The bill would make it a felony or a misdemeanor, as specified, to possess for sale, transfer, import, or export, under specified conditions, more than one motor vehicle or parts from more than one vehicle. Because this bill would enact new crimes, it would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 387 (SB 143) Morgan. Property taxation: taxpayer rights.

(1) Existing property tax law establishes various rules and duties with respect to the administration of property taxation by state and local taxing authorities.

This bill would require the board to encourage uniform statewide appraisal and assessment practices.

(2) Existing property tax law provides, subject to specified exceptions, that information and records in a county assessor's office that are not required by law to be kept or prepared by the assessor, and homeowners' exemption claims, are not public documents and shall not be open to public inspection. Pursuant to one of the exceptions to the foregoing general rule, existing law requires the assessor to provide, as specified and upon request, any market data, as defined, in his or her possession to an assessee or his

NOTE: Superior numbers appear as a separate section at the end of the digests.

or her designated representative.

This bill would, as specified, revise and recast the assessor's duty to provide, upon request, market data, as defined, to an assessee or his or her designated representative, and would additionally require the assessor, upon request, to permit that same party to inspect or copy information, documents, and records, as specified, other than market data. It would require the assessor to grant permission to the assessee or representative for inspection or copying as soon as reasonably possible, and would require that person to reimburse the assessor for the reasonable costs incurred in providing any requested copies.

(3) Existing property tax law authorizes a taxpayer and the county assessor to extend, as specified, the period within which an escape assessment may be levied if the taxpayer and assessor so agree in writing, prior to the expiration of that period.

This bill would prohibit a county assessor from levying an escape assessment before 10 days after mailing or otherwise delivering to the affected taxpayer a "Notice of Proposed Escape Assessment." It would additionally provide for the extension of the period within which an escape assessment may be levied, and of the period within which a refund claim may be filed for the same assessment year, where the assessor mails or otherwise delivers to a taxpayer any notice as described above as to any assessment year for which the period for levying an escape assessment will expire within 90 days of the date of mailing or delivery.

(4) Existing property tax law requires a county board of equalization to hear applications for a reduction in assessment where the issue is whether the property has been subject to a change in ownership, as statutorily defined.

This bill would expand the foregoing duty by requiring a county board of equalization to hear penalty issues arising under specified statutes where those issues arise from a timely filed application for reduction. It would require a county board of equalization to hear and decide those issues regardless of whether an application for reduction raises penalty issues only, and regardless of whether all nonpenalty issues raised by an application for reduction are resolved. It would also generally require the clerk of a county board of equalization, after the filing of an application for reduction, to set the matter for hearing and provide notice, as specified, of the time, date, and place of that hearing to the applicant, or the applicant's designated representative. By placing additional duties upon county boards of equalization, this bill would impose a state-mandated local program.

(5) Existing property tax law authorizes the tax collector to make a specified tax lien filing with the county recorder where either of certain conditions are present.

This bill would require the county recorder, within 30 days after the above lien filing, with respect to delinquent taxes on unsecured property, to send a notice of the filing to the assessee at the assessee's last known address. It would require the notice to contain the information to be contained in the lien filing, and would further require the notice to prominently display on its face a specified heading.

(6) Existing property tax law requires assessees to apply for reduction in assessments, and provides that no action for the refund of taxes shall be commenced or maintained unless a claim for refund has first been filed.

This bill would authorize an affected person, or his or her agent, and the assessor, to file a stipulation, as specified, with the county board of equalization, stating that issues in dispute with respect to an application do not involve valuation questions. It would provide that the filing and acceptance of the foregoing stipulation shall satisfy any requirement that an assessee file and prosecute an application for reduction to exhaust administrative remedies, but that the filing and acceptance of the stipulation shall not excuse or waive the requirement of timely filing a claim for refund.

(7) Existing property tax law provides for the payment of interest at specified rates on amounts of taxes refunded to taxpayers.

This bill would provide, notwithstanding existing provisions, that whenever the auditor has impounded property tax revenues pursuant to provisions added by this bill, and those revenues are ultimately used to provide a refund of tax to the affected taxpayer or taxpayers, interest due to the taxpayer or taxpayers shall be calculated and paid at

NOTE: Superior numbers appear as a separate section at the end of the digests.

the rate or rates, as provided, earned by the county on those revenues during the period of impoundment.

(8) Existing law provides for the Harris-Katz Taxpayers' Bill of Rights to govern the assessment, audit, and collection of sales and use taxes administered by the State Board of Equalization, and the Katz-Harris Taxpayers' Bill of Rights to govern the return, payment, and audit of income and bank and corporation taxes administered by the Franchise Tax Board. Each of the above enactments provides for a taxpayers' rights advocate responsible for the resolution of taxpayer complaints and problems.

This bill would establish the Morgan Property Taxpayers' Bill of Rights to govern the assessment, audit, and collection of property taxes in this state. It would provide for a property taxpayers' advocate to perform reviews and reports, as specified, with respect to educational and informational programs, various inquiries and problems, taxpayer complaints, and areas of recurring conflict between taxpayers and assessors. It would require the State Board of Equalization to annually hold a public hearing, as specified, to address a specified report of the advocate and to identify means to correct any problems identified therein. It would also, among other things, authorize a property taxpayer to request in writing from the assessor a written ruling, binding as provided, as to whether a particular transaction constitutes, in whole or in part, a change in ownership. It would, as specified, relieve a taxpayer from interest or penalties where the taxpayer reasonably relied upon the assessor's written ruling.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 388 (SB 356) Greene. School construction.

(1) The Leroy F. Greene State School Building Lease-Purchase Law of 1976 (Greene Act) provides for the acquisition, construction, reconstruction, or modernization of, or deferred maintenance on, school facilities by the state and the lease-purchase of those facilities by school districts. Existing law requires proceeds of specified bonds to be deposited in the State School Building Lease-Purchase Fund to provide aid to school districts in accordance with the Greene Act.

This bill would provide that the county superintendent of schools or county office of education would be eligible to receive any funds from the portion of the proceeds of any state bond act that are set aside for the construction, reconstruction, or modernization of, or deferred maintenance on, facilities to house special education pupils who are defined as severely handicapped, as specified, and eligible under a specified provision unless an approved regionalized facility plan, as specified, is filed with the State Allocation Board.

(2) Under the Greene Act, a school district is authorized to enter into an agreement with another governmental entity for the joint use of park and recreation facilities or commercial or industrial facilities.

This bill would specify that these park and recreation facilities may include an auditorium.

Ch. 389 (AB 164) Rainey. Coroners: motor vehicle accidents.

Existing law requires coroners to take blood and urine samples for alcoholic and barbituric acid tests when notified of a death of a person driving or riding in a motor vehicle or being struck by one.

This bill would require coroners to make alcoholic tests and authorize barbituric acid and amphetamine derivative tests when deemed appropriate.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 390 (AB 290) Boland. Sex crimes: limitations of actions.

(1) Existing law establishes statutory limitation periods for commencing criminal actions, as specified. Under those provisions, existing law generally requires the prosecution of a felony to be commenced within 3 years, except that if an offense is punishable by imprisonment for 8 years or more, prosecution is required to be commenced within 6 years.

(2) Existing law provides that notwithstanding other limitations of time, as specified, a criminal complaint may be filed within one year of the date of a report to a responsible adult or agency by a child under 17 years of age that the child is a victim of a specified felony or misdemeanor sex offense. These provisions apply only if the specified limitation period in (1) above has expired and the defendant has committed at least one violation of one of those sex crimes within its specified limitation period.

This bill would include in (2) above, the crime of continuous sexual abuse of a child, as specified, and the crime of penetration, however slight, of the genital or anal openings of any person by a penis or by any foreign object, substance, instrument, or device, as specified, under certain circumstances when it cannot be established whether penetration was by a penis or by a foreign object, substance, instrument, or device, thereby extending the statute of limitations in those instances.

This bill would revise (2) above to provide that notwithstanding other limitations of time, as specified, a criminal complaint may be filed within one year of the date of a report to a responsible adult or agency, as defined, by a child under 18, rather than under 17, years of age that the child is a victim of a specified felony or misdemeanor sex offense.

The bill also would provide that notwithstanding other limitations of time, as specified, a criminal complaint may be filed within one year of the date of a report to a law enforcement agency by a person of any age alleging that he or she, while under the age of 18 years, was the victim of a specified sex crime. These provisions would apply only if the specified limitation period in (1) above has expired, the crime involved substantial sexual conduct, as described, and there is independent evidence that clearly and convincingly corroborates the victim's allegation.

Ch. 391 (AB 328) Johnson. Political Reform Act of 1974: campaign statements.

Existing provisions of the Political Reform Act of 1974 provide that a candidate or officeholder who receives contributions and makes expenditures of less than $1,000 in a calendar year may file a short form campaign statement in lieu of specified semiannual campaign statements.

This bill would require every candidate or officeholder who has filed a short form campaign statement and who thereafter receives contributions or makes expenditures totaling $1,000 or more in a calendar year to send written notification to the Secretary of State, the local filing officer, and each candidate contending for the same office within 48 hours of receiving or expending a total of $1,000. It would provide that the written notification shall revoke the previously filed short form statement.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a ⅔ vote.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 392 (AB 917) Nolan. Vehicles: special license plates.

Under existing law, the Department of Motor Vehicles issues, for additional fees, environmental and other special license plates. A recipient of the Army Medal of Honor, Navy Medal of Honor, Air Force Medal of Honor, Army Distinguished Service Cross, Navy Cross, Air Force Cross, or Congressional Medal of Honor, may apply to the department for issuance of special "Legion of Valor" or "Congressional Medal of Honor" license plates, as appropriate, for his or her vehicle.

This bill would allow, upon the death of a person issued "Legion of Valor" or "Congressional Medal of Honor" license plates, his or her surviving spouse to retain the special license plates. The bill would require, upon the death of the spouse , that the retained plates be returned to the department either (1) within 60 days following that death or (2) upon expiration of the vehicle registration, whichever occurs first.

Ch. 393 (AB 1053) Tucker. Structural Fumigation Enforcement Program.

Existing law provides for the licensure and regulation of structural pest control operators. It also regulates the labeling, sale, and use of pesticides, including the registration of pesticides under the jurisdiction of the Department of Pesticide Regulation.

This bill would require the Director of the Department of Pesticide Regulation to contract with the Los Angeles County Agricultural Commissioner to perform increased structural fumigation inspection and enforcement, as a 2-year pilot project. The bill would authorize the director to levy a civil penalty against any person violating these provisions, as specified. These provisions would be repealed effective January 1, 1996.

Ch. 394 (AB 1216) Harvey. Bingo.

Existing law permits cities, counties, and cities and counties to allow by ordinance bingo games to be conducted by specified organizations for charitable purposes.

Existing law permits the use of bingo receipts for operating expenses. With respect to nonprofit organizations, the amount which may be used for operating expenses is 20% of the receipts before the deduction for prizes, or $1,000 per month, whichever is less, for the rental of property and for overhead, including the purchase of bingo equipment, administrative expenses, security equipment, and security personnel.

This bill would change the $1,000 limitation specified above to $2,000.

Ch. 395 (AB 1598) Knowles. Community services districts: powers.

Existing law establishes community services districts for enumerated purposes with specified powers, including police protection.

This bill would specifically authorize these districts to provide other security services.

Existing law permits designated community services districts to function in the manner of an architectural control committee regarding the enforcement of covenants, conditions, and restrictions applicable to tracts within the district.

This bill would add the Wallace Community Services District to the list of districts designated to function in this manner.

This bill would also authorize the Board of Directors of the Wallace Community Services District to adopt the additional purpose of supplying certain residents of the district with liquefied petroleum gas service under specified circumstances until the Pacific Gas and Electric Company provides that service. This bill would state various findings and declarations of the Legislature concerning the granting of this authority to the district, and the need for a special statute in these circumstances.

Existing law, with respect to the Bell Canyon and Lake Sherwood Community Services Districts, permits a district to adopt regulations by ordinance limiting access and use of roads owned by the district and not dedicated to public use and parks and recreational facilities of the district to landowners and residents of the district. Existing law makes the violation of any regulation adopted by an ordinance of this nature a misdemeanor.

This bill would extend that authority to the Wallace Community Services District. This extension of authority would create a new crime and thereby impose a state-mandated local program.

Existing law authorizes a community services district to fix, on or before the first day of August in each calendar year, a water standby or availability charge not to exceed $10

NOTE: Superior numbers appear as a separate section at the end of the digests.

per year for each acre of land, or $10 per year for each parcel of land less than an acre within the district to which water is made available for any purpose by the district, whether the water is actually used or not.

This bill would authorize a community services district to fix a water or sewer standby or availability charge for each acre of land or for each parcel of land less than an acre to which water or sewers are made available for any purpose by the district.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 396 (AB 1659) Napolitano. Los Angeles County retirement: definition of "compensation earnable": family law.

The County Employees Retirement Law of 1937 defines "compensation earnable" for the purposes of that law.

This bill would, at the option of the County of Los Angeles, for future members, exclude from that definition, cafeteria and flexible benefit plan contributions and transportation, car, or security allowances. It would, for the County of Los Angeles, include deferred compensation at the time it is earned, rather than when it is paid. This bill would make a related legislative finding and declaration.

This bill would also, in a provision applicable only in the County of Los Angeles, authorize a member's ex-spouse who is receiving payments from the system pursuant to court order dividing the community property interest in the member's retirement allowance, to designate one or more beneficiaries who shall receive those payments following the ex-spouse's death and require those payments to terminate on the death of the member.

Ch. 397 (AB 2099) Epple. Pharmacy: drug labeling.

Existing law, the Pharmacy Law, prohibits a pharmacist from dispensing any prescription except in a container correctly labeled with certain types of information. The Pharmacy Law requires the prescription to bear the name of the drug or device prescribed, directions for use, and date of issue, among other things. The Pharmacy Law provides that any person who knowingly violates any of its provisions, when no other penalty is provided, is guilty of a misdemeanor.

This bill would additionally require the container label to identify the condition for which the drug was prescribed if the patient requests it and the prescription identifies the condition. This bill would additionally require, upon the request of the patient or patients, the prescription to bear a legible, clear notice of the condition for which the drug is prescribed. Since this bill would change the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 398 (SB 605) Maddy. Health facilities.

Existing law, the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983, requires that the construction or alteration of a building, in which outpatient clinic services are provided and which is separated from a building in which hospital services are provided, is subject to plan review and inspection by a city, county, or city and county. Existing law provides that these provisions will have no force or effect on and after January 1, 1994.

This bill would extend, until January 1, 1997, the effective date of this plan review and inspection requirement for a city, county, or city and county, thereby imposing a state-mandated local program.

Existing law requires, as of January 1, 1994, those buildings to conform to applicable provisions of the California Building Standards Code and prohibits the building stand-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ards for those buildings from being more restrictive or comprehensive than comparable building standards established, or otherwise applied, by the Office of Statewide Health Planning and Development to clinics.

This bill would, instead, provide that these provisions shall become operative January 1, 1997.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 399 (SB 996) Calderon. Financial regulation.

Existing law authorizes a director or supervisory committee member of a credit union to be reimbursed for actual expenses incurred in the performance of his or her duties.

This bill would, instead, authorize that reimbursement if made pursuant to the requirements of regulations of the Commissioner of Corporations respecting the controlling of expense reimbursements, as specified.

Existing law provides that upon the recommendation of the board of directors, the members of any credit union may by an affirmative majority vote resolve to convert the credit union into a federal credit union.

This bill would, for those purposes, define "affirmative majority vote of such members," as specified.

The Personal Property Brokers Law and the Consumer Finance Lenders Law provide that credit insurance is not deemed to be a collateral sale, purchase, or agreement if provided in accordance with certain premium rate provisions contained in the California Code of Regulations. The statutory authorization for those provisions will be repealed effective January 1, 1994.

This bill would revise the reference to that statutory provision which will be repealed on January 1, 1994, to instead refer to a code section authorizing the Insurance Commissioner to adopt prima facie premium rate provisions, as specified.

Ch. 400 (AB 1666) Hoge. Alcoholic beverages.

Existing law provides that a winegrower or beer manufacturer may give or sell or give and sell wine or beer, respectively, at prices other than those contained in schedules filed with the Department of Alcoholic Beverage Control, to nonprofit charitable corporations or nonprofit incorporated trade associations exempt from payment of income taxes under the Internal Revenue Code of the United States.

This bill would extend this exception to a nonprofit charitable corporation or incorporated trade association exempt from payment of income taxes under specified provisions of the California Revenue and Taxation Code, and certain nonprofit corporations or associations exempt from payment of income tax under federal and state law, as specified, subject to specified conditions.

Ch. 401 (AB 2138) Hoge. Insurance: cancellation notice.

Existing law provides that the proof of mailing of a notice of cancellation to a lienholder or an additional interest on a policy shall be sufficient to terminate the interest of the parties provided the notice is mailed at least the maximum number of days prior to termination of the parties' interest.

This bill would provide that proof of delivery, as defined, of the notice also shall be sufficient to terminate the interest of the parties provided the notice is timely delivered.

Ch. 402 (AB 1668) Hoge. Unemployment insurance: contributions and reports: withholding.

Existing unemployment compensation law provides that an employer shall file with the Director of Employment Development a return and a report of wages and certain other information within prescribed time limits, and provides prescribed time limits for the due and delinquency dates for the payment of certain employer and worker contri-

NOTE: Superior numbers appear as a separate section at the end of the digests.

butions.

This bill would require each employer to furnish a written statement to each worker that has paid contributions in excess of the amounts required to be withheld with respect to wages pursuant to specified provisions, and to file a copy of this statement with the director. It would make an employer liable for the excess of worker contributions if he or she fails to furnish the statement required by these provisions.

This bill would authorize the director to extend those time limits if the Governor declares a state of emergency, as provided.

Existing unemployment compensation law provides that a notice given pursuant to specified provisions of that law may be served personally, or by mail, as provided.

This bill would provide that the notice may be served electronically or by a computerized service under certain circumstances.

Existing law requires every employer required to withhold estimated state income taxes and required to make certain contributions to the Unemployment Insurance Fund to file a withholding return and pay over the withheld amount, and provides that, for calendar years beginning prior to January 1, 1995, an employer, whose cumulative average 8th monthly payment made pursuant to those provisions during a 12-month period ending June 30 of the prior year is $50,000 or more, shall remit as provided, by way of electronic funds transfer, the total amount of state income taxes withheld during any 8th monthly period within 3 banking days following the close of each 8th monthly period during the calendar year beginning on January 1. For calendar years beginning on or after January 1, 1995, the threshold amount is reduced for purposes of the above to $20,000 or more.

This bill would require an employer, whose cumulative average payment for any deposit period meets the requisite threshold amounts to make the remittance within the number of banking days specified pursuant to certain provisions of federal income tax law, but would authorize a waiver of these remittance requirements by the department, as specified. It would also authorize the Director of Employment Development to extend the time limits for filing returns, reports, and statements relative to income tax withholding if the Governor declares a state of emergency, as provided.

This bill would also make various technical changes to the unemployment compensation law.

Ch. 403 (SB 200) Mello. State park system: Porter-Sesnon parcel.

Under existing law, the Department of Parks and Recreation has control over all units of the state park system, including state beaches.

This bill would amend and supplement the Budget Act of 1993 to appropriate a total of $1,000,000 to the department from specified bond funds for acquisition of the Porter-Sesnon property for New Brighton State Beach.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 404 (SB 904) Committee on Budget and Fiscal Review. Jails.

Existing law requires, among other things, that the money and property deposited in the inmate welfare fund in the county treasury be expended by the sheriff solely for the benefit, education, and welfare of the inmates confined within the jail.

This bill, instead, would require that the money and property deposited in the county inmate welfare fund be expended by the sheriff primarily, rather than solely, for the benefit, education, and welfare of the inmates confined within the jail. It also would provide that any funds that are not needed for the welfare of the inmates may be expended for the maintenance of county jail facilities, as described.

Ch. 405 (AB 1466) Statham. Elections: general elections: recall elections: notice of intention: signatures.

(1) Existing law defines "general election" as the election held throughout the state on the first Tuesday after the first Monday of November in each even-numbered year.

This bill would provide that "general election" shall also mean any statewide election held on the 2nd Tuesday of April of each even-numbered year, the first Tuesday after the first Monday in March of each odd-numbered year, or the first Tuesday after the first

NOTE: Superior numbers appear as a separate section at the end of the digests.

Monday in November of each odd-numbered year.

(2) Existing law requires that a notice of intention to recall an elected officeholder include the printed name, signature, and business or residence address of at least one but not more than 5 proponents of the recall, among other things.

This bill would instead require that the notice of intention include the name, signature, and business or residence address of each of the proponents of the recall, and that the minimum number of signatures equal 10, or the number of signatures required to have been filed on the nomination paper of the officer sought to be recalled, whichever is higher.

By revising and adding to the duties of the county clerk receiving a recall petition, this bill would impose a state-mandated local program.

(3) This bill would provide that, notwithstanding any other provision of law, the California Housing and Jobs Investment Bond Act shall appear on the November 2, 1993, general election ballot as Proposition 173.

(4) Existing law authorizes any election in Placer County or Stanislaus County to be conducted as an all-mail ballot election under specified conditions.

This bill would authorize, notwithstanding any other provision of law, any county authorized to conduct an all-mail ballot election to do so at the general election to be held on November 2, 1993.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 406 (SB 129) Kelley. Public utilities: water service.

Existing law provides for specified procedures to be followed by the Public Utilities Commission in hearings concerning the propriety of a public utility rate, classification, contract, practice, or rule.

This bill would set forth separate procedures to be followed by the commission with respect to rates, classifications, contracts, practices, or rules for the service of reclaimed water.

Ch. 407 (SB 428) Thompson. Land use: Subdivision Map Act: deadlines.

(1) Existing law, known as the Subdivision Map Act, establishes a statewide regulatory framework for controlling the subdividing of land. The act requires, generally, that a subdivider submit, and have approved by the city or county in the jurisdiction in which the land is situated, a tentative and a final subdivision map in connection with any division of land creating 5 or more parcels, and that a parcel map be filed in connection with divisions of land creating 4 or fewer parcels. The act prohibits the sale, leasing, or financing of any parcel of real property, or the construction of any building thereon, for which either a final subdivision map or parcel map is required, until that map, in full compliance with the act and any local ordinance enacted pursuant thereto, has been filed. The act provides for the expiration of tentative maps after specified periods of time.

This bill would extend by 24 months the expiration date of any tentative subdivision map for which a tentative map has been approved that has not expired on the effective date of the bill. This extension would be in addition to any other extension of the expiration date provided for in specified provisions of the Subdivision Map Act. The bill would provide that any legislative, administrative, or other approval by any agency of the State of California that pertains to a development project included in a map that is extended pursuant to the bill shall be extended by 24 months under specified conditions. Because the bill would require new procedures of cities and counties administering the Subdivision Map Act, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates

NOTE: Superior numbers appear as a separate section at the end of the digests.

Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 408 (AB 575) Johnson. Auto insurance.

Under existing law, a policy of automobile liability insurance is required to provide insurance to the named insured with respect to any vehicle covered by the policy.

This bill would require the policy to provide insurance to the named insured with respect to any owned or leased motor vehicle covered by the policy. The bill would define owned motor vehicle.

Ch. 409 (AB 2308) Woodruff. Peace officers.

Existing law, enacted by the Governor's Reorganization Plan No. 1 of 1991, provides for the Department of Toxic Substances Control in the California Environmental Protection Agency. The Toxic Substances Control Program that was previously within the State Department of Health Services was transferred to the Department of Toxic Substances Control by this reorganization plan.

Existing law enumerates specified persons, including investigators at the State Department of Health Services, who are peace officers whose authority extends to any place in the state for purposes of performing their primary duty or when making an arrest under specified provisions of law. The authority of these peace officers to carry firearms is subject to prior authorization and terms and conditions specified by the employing agency.

This bill would conform this provision to reflect changes made by the Governor's Reorganization Plan No. 1 of 1991 by adding to the list of peace officers to which this provision applies investigators of the Department of Toxic Substances Control and would provide that this change is declaratory of existing law.

Existing law requires the Commission on Peace Officer Standards and Training to adopt rules establishing minimum standards and training for peace officers who are employed by specified agencies, including, among others, the State Department of Health Services.

This bill would add to the list of specified agencies to which this provision applies the Department of Toxic Substances Control.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 410 (SB 27) Wright. Hazardous waste: storage: fees: standardized permits.

(1) Existing law requires hazardous waste storage facilities to operate under hazardous waste facilities permits issued by the Department of Toxic Substances Control and defines a storage facility to include facilities at which hazardous waste meets certain requirements, including if the hazardous waste is held at an onsite facility in tanks for any period of time, if the quantity of the hazardous waste exceeds 5,000 gallons or 45,000 pounds, whichever is greater, in any individual tank, or more than 50,000 gallons in the aggregate, or the hazardous waste is held in containers or tanks at a transfer facility for periods greater than 144 hours.

This bill would revise the definition of storage facility to specify that the hazardous waste held onsite is liquid hazardous waste which exceeds 5,000 gallons in any individual tank or more than 50,000 gallons of liquid hazardous waste in the aggregate, and would additionally include, as a storage facility, a transfer facility where handling occurs, other than the transfer of packed or containerized hazardous waste from one vehicle to another, thereby imposing a state-mandated local program by creating new crimes. The bill would also define liquid hazardous waste for these purposes.

(2) Existing law requires the State Board of Equalization to assess fees, in specified amounts, for applications for hazardous waste facilities permits, variances, or certifications, and requires that the fees be deposited in the Hazardous Waste Control Account

NOTE: Superior numbers appear as a separate section at the end of the digests.

in the General Fund.

Existing law requires each operator of a hazardous waste facility to pay the board a facility fee for each reporting period, for deposit in the account. Under existing law, the money in the account is available, upon appropriation, by the Legislature, to the department for hazardous waste management, and for removal and remedial actions to hazardous substance releases. A failure to pay those fees is a crime pursuant to other provisions of law. Existing law exempts the owners of hazardous waste facilities authorized by the department to operate pursuant to a permit-by-rule, or under a grant of conditional authorization, or facilities exempt from hazardous waste facilities permitting requirements, from the facility fee for specified activities.

Existing law requires an application for a hazardous waste facilities permit to include, until January 1, 1997, a disclosure statement, which is defined as a statement including certain information.

Existing law, the Wright-Polanco-Lempert Hazardous Waste Treatment Permit Reform Act of 1992, requires the department to adopt regulations specifying a standardized hazardous waste facilities permit application for offsite non-RCRA hazardous waste treatment or storage facilities and requires the standardized permit notification to be submitted to the department by April 1, 1993. The act requires the department to report on the effectiveness and environmental and public health impacts associated with the implementation of the act in the department's biennial report.

This bill would additionally require the biennial report to include specified information concerning the standardized permit program. The bill would define the conditions for series A, B, and C standardized permits and would change the date when the standardized permit notification is required to be submitted to October 1, 1993, for facilities existing on or before September 1, 1992. The bill would require those regulations to include a procedure imposing an administrative penalty upon an owner or operator of an offsite non-RCRA treatment or storage facility who does not submit a standardized permit notification to the department by that date and who continues to operate the facility without obtaining a hazardous waste facilities permit or other grant of authorization from the department after that date. The bill would also require the regulations to require a facility operating pursuant to a standardized permit to comply with the operating requirements governing interim status facilities, except as specified.

The bill would require the department to direct an owner or operator applying for a standardized permit to complete and file a phase I environment assessment, including a specified certification, with the application, except as specified. The department would also be required to establish an inspection program for certain non-RCRA facilities.

The bill would require a disclosure statement for a series C standardized application to instead include only specified information.

The bill would specify the amount of the facility fee to be paid by facilities operating pursuant to a standardized permit. The bill would require the board to assess specified fees for applications for standardized permits and modifications of those permits and would additionally require the board to assess a fee equal to the department's costs in reviewing and overseeing the corrective action program of the permit application and in reviewing and overseeing corrective action work at the facility. The bill would require that oversight fee to be paid within 30 days after the date of assessment. The bill would prohibit the department from otherwise assessing any fees for the department's costs in reviewing and overseeing a corrective action taken in conjunction with a hazardous waste facilities permit application.

The bill would exempt a qualified facility operating pursuant to a standardized permit from the facility fee for a specified period of time and would exempt a facility operating pursuant to a standardized permit from the facility fees for certain activities carried out before January 1, 1993.

Since the bill would increase the fees which are deposited in the account, the bill would impose a tax for purposes of Article XIII A of the California Constitution.

Since a failure to pay the fees would be a crime, pursuant to other provisions of law, the bill would impose a state-mandated local program.

(3) The bill would exempt a permanent household hazardous waste facility from the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

fees for applications for hazardous waste facilities permits, variances, or certification.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) The bill would provide that if Senate Bill 922 of the 1993–94 Regular Session of the Legislature is enacted and takes effect January 1, 1994, and amends Sections 25205.2, 25205.7, and 25205.12 of the Health and Safety Code, the changes made by the bill to Sections 25295.2, 25295.7, and 25295.12 of the Health and Safety Code would remain operative only until the date Senate Bill 922 becomes operative, at which time the amendments made by Senate Bill 922 to those sections would become operative, whether that bill is enacted prior to, or subsequent to, this bill.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 411 (SB 28) Wright. Hazardous waste: enforcement: recycling: permits: financial assurances.

(1) Existing law subjects recyclable materials to the requirements of hazardous waste control laws, unless the Department of Toxic Substances Control issues a variance or unless the material meets specified requirements, including if the material is oily waste, used oil, or spent nonhalogenated solvent which is managed by the owner or operator of a refinery which is processing primarily crude oil or a public utility, and, among other things, the material does not contain constituents other than those for which the material is being recycled which render the material hazardous under the regulations adopted by the department.

This bill would specify, for purposes of that exemption, that this requirement does not include oily waste, other than used oil, and those constituents are to be removed at the refinery prior to the use of the material.

(2) Existing law exempts from the requirements of the provisions regulating hazardous waste, and the regulations adopted pursuant to those provisions, except as specified, a person who generates or manages a treatability study sample, if specified conditions are met. The department is required to adopt emergency regulations regulating the management of treatability study samples and the conduct of treatability studies and existing law makes the provisions regulating treatability samples inoperative on the date these regulations become effective.

This bill would require the Office of Administrative Law to consider the adoption of these regulations as necessary for the immediate preservation of the public peace, health and safety, and general welfare and would require the emergency regulations to be repealed no more than 120 days after the regulation's effective date. The department would be required to adopt regulations concerning the generation and management of treatability samples on or before the date these emergency regulations are repealed.

(3) Existing law requires the department and any local health officer or a local public officer designated by the Director of Toxic Substances Control to enforce the standards and regulations concerning hazardous waste. Under existing law, until January 1, 1997, the department is authorized to delegate to local health officers in not more than 8 counties, as part of a 5-year pilot program, the department's authority to issue an order specifying a schedule for compliance or correction, including the imposition of civil penalties, with regard to specified enforcement actions against certain persons and facilities. Existing law defines the terms "authorized local public officer" and "designated local public officer."

This bill would authorize the department to also delegate this authority to issue orders and impose civil penalties to designated local public officers.

(4) Existing law prohibits the department from granting interim status for specified hazardous waste facilities, unless, among other things, the hazardous waste management activities at the facility are eligible for the department's standardized permit application and the facility was engaged in those activities on September 1, 1992.

This bill would allow the department to grant interim status to such a facility if the facility was authorized to engage in those activities on September 1, 1992.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) Existing law, the Wright-Polanco-Lempert Hazardous Waste Treatment Permit Reform Act of 1992, deems a generator who conducts specified treatment activities, upon notifying the department to be conditionally authorized to operate without obtaining a hazardous waste facilities permit or other grant of authorization, and also exempts from hazardous waste facilities permit requirements and corrective action requirements a generator who treats not more than specified amounts of hazardous waste, in any month, or generators conducting specified treatment processes, if specified requirements are met with regard to that hazardous waste. Existing law requires that a generator operating pursuant to a permit-by-rule or under a grant of conditional authorization pay a fee of $1,140 for the 1993 reporting period to the board. A violation of the act is a crime.

This bill would define terms and would revise the requirements for conducting treatment pursuant to a grant of conditional authorization or treatment exempted from hazardous waste facilities permit requirements. The bill would exempt the notification for exempt treatment and for fixed and transportable treatment units from certain requirements concerning the adoption of regulations and would require additional information to be included in those notifications.

The bill would additionally require owners and operators of a facility or a transportable treatment unit operating pursuant to a permit-by-rule to pay a fee of $1,140 for the 1993 reporting period to the board. The bill would require the fees for the 1993 reporting period to be submitted to the department when specified notifications are required to be submitted. The bill would make related changes.

(6) Existing law exempts conditionally authorized generators and generators exempted from hazardous waste facilities permit requirements from the financial assurance requirements for damage claims and from certain closure requirements. Until January 1, 1994, persons treating hazardous waste pursuant to a permit-by-rule are exempt from certain financial assurance requirements. The department is required to complete a specified assessment of methods of securing financial assurances for treatment units subject to conditional authorization by July 1, 1993.

This bill would exempt, until December 31, 1994, a facility or transportable treatment unit operating pursuant to a permit-by-rule from the standards and regulations concerning providing financial assurances for closure costs and third-party liability, and would require these assurances to be provided on and after January 1, 1995, except as specified. The bill would, until December 31, 1994, exempt a conditionally authorized generator from the standards and regulations for providing financial assurances for the cost of closing the treatment units and would require these assurances to be provided on and after January 1, 1995. The bill would exempt a conditionally authorized generator from the requirement of providing financial assurances for 3rd-party liability. The bill would also exempt a generator who is exempted from hazardous waste facilities requirements from the standards and regulations concerning providing those financial assurances. The bill would exempt these facilities and generators from requirements to provide financial assurances for postclosure maintenance, unless the department determines, pursuant to the regulations adopted by the department, that the facility or generator is required to obtain a postclosure permit. The bill would extend the date by which the department is required to complete the assessment of financial assurance methods to January 1, 1994.

(7) Since a violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program.

(8) Existing law, the Hazardous Substances Tax Law, specifies procedures for the collection of various fees and taxes related to the handling of hazardous waste and substances and prescribes specified criminal penalties for a violation of those provisions. Existing law requires generators of hazardous waste to pay a specified surcharge, which is deposited in the Hazardous Waste Control Account in the General Fund, to carry out the Hazardous Waste Source Reduction and Management Review Act of 1989.

The Hazardous Substances Tax Law requires that the fees paid by generators operating pursuant to a permit-by-rule or under a grant of conditional authorization be deposited in the Hazardous Waste Control Account in the General Fund, where the funds are available for expenditure by the department, upon appropriation by the Legislature, for

NOTE: Superior numbers appear as a separate section at the end of the digests.

various purposes related to hazardous waste regulation and the cleanup of hazardous substances.

This bill would include the fee imposed upon owners and operators of a facility or transportable treatment unit and conditionally authorized or exempted generators in the provisions of that law concerning the payment of the fees, thereby imposing a state-mandated local program by creating a new crime. The bill would specify the manner of payment of the surcharge and would allow the fee to be offset for a credit paid to specified local agencies for hazardous waste management programs.

Since the bill would increase the fees which are deposited in the Hazardous Waste Control Account, the bill would impose a tax for purposes of Article XIII A of the California Constitution.

(9) The bill would make related changes.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(11) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 412 (AB 2060) Weggeland. Hazardous waste environmental technologies: research and development.

(1) Under existing law, the Department of Toxic Substances Control is required to issue hazardous waste facilities permits to use and operate one or more hazardous waste management units at a facility which, in the judgment of the department, meets specified standards.

This bill would authorize the department to establish an administrative process to certify, in accordance with prescribed procedures and requirements, hazardous waste environmental technologies, as prescribed, that it determines will not pose a significant potential hazard to public health and safety or to the environment, if they are used under specified operating conditions and can be operated without specialized training and with minimal maintenance. The bill would require the department to implement a program to continually monitor and oversee manufacturers and users of technologies so certified, and would require the department to adopt regulations to implement the certification process. The bill would make related changes.

(2) Existing law, the Wright-Polanco-Lempert Hazardous Waste Treatment Permit Reform Act of 1992, deems a generator who conducts specified treatment activities, upon notifying the department to be conditionally authorized to operate without obtaining a hazardous waste facilities permit or other grant of authorization, and also exempts from hazardous waste facilities permit requirements and corrective action requirements a generator who treats not more than specified amounts of hazardous waste, in any month, or generators conducting specified treatment processes, if specified requirements are met with regard to that hazardous waste. A violation of the act is a crime.

This bill would define terms and would revise the requirements for conducting treatment pursuant to a grant of conditional authorization or treatment exempted from hazardous waste facilities permit requirements. The bill would authorize a generator to treat waste using a certified technology under a grant of conditional authorization or exemption. The bill would exempt the notification for exempt treatment and for fixed and transportable treatment units from certain requirements concerning the adoption of regulations and would require additional information to be included in those notifications.

(3) Existing law, the Hazardous Waste Reduction, Recycling, and Treatment Research and Demonstration Act of 1985, requires the Department of Toxic Substances Control to establish a Hazardous Waste Technologies, Research, Development, and Demonstration Program, consisting of specified elements, including, among other things, providing grants to universities, governmental agencies, and private organizations for the research and development of hazardous waste reduction, recycling, or treatment technologies, and for the commercial demonstration of those technologies.

This bill would require the department to require any university, governmental

NOTE: Superior numbers appear as a separate section at the end of the digests.

agency, or private organization which receives such a grant to agree to repay the department for the amount of the grant, if the grant results in the development of a commercially successful technology, as defined, and to additionally pay the department a percentage of any royalties derived from that technology, as negotiated between the department and the grant recipient. The bill would require the department to deposit in the Hazardous Waste Control Account in the General Fund any repayments or royalties received by the department, and would authorize the department to expend those funds, upon appropriation by the Legislature, to carry out the act.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 413 (AB 765) Goldsmith. Housing: State Housing Law: Mobilehome Parks Act: Manufactured Housing Communities Act: California Factory-Built Housing Law.

(1) Existing law, known as the State Housing Law, generally regulates the construction, use, maintenance, and occupancy of buildings used for human habitation. Existing law defines various words and phrases for the purposes of the State Housing Law.

This bill would add specified words and phrases to those defined for the purposes of the State Housing Law.

(2) The State Housing Law authorizes the building department of any city or county to approve the alternate use of any material, appliance, installation, device, arrangement, or method of construction not specifically prescribed by the California Building Standards Code or the State Housing Law if the proposed alternate use is approved in accordance with a specified procedure. This procedure authorizes the building department of any city or county to require tests, to be made at the expense of the owner or the owner's agent, by an approved testing agency.

This bill would authorize the building department of a city or county to approve the alternate use of a manufactured home or mobilehome. The bill would require tests by an approved testing agency to be made by an approved testing agency selected by the owner or the owner's agent, and would define "approved" and "testing agency" for this purpose.

(3) Existing law, known as the Mobilehome Parks Act, generally governs the operation of mobilehome parks, as defined.

This bill would amend the Mobilehome Parks Act to change the definition of mobilehome park so that it excludes an area or tract of land the structures on which consist of manufactured homes, as defined, that have been approved by a city, county, or city and county pursuant to the State Housing Law as an alternate use, as specified.

(4) The Mobilehome Parks Act provides that its provisions shall not be construed to prevent local authorities of any city, county, or city and county, within the reasonable exercise of their police powers, from taking any of various specified regulatory actions.

This bill would specify that the Mobilehome Parks Act not be construed to prevent local authorities from prescribing and enforcing set-back and separation requirements governing the installation of a manufactured home, mobilehome, or mobilehome accessory structure or building installed outside of a mobilehome park or special occupancy park, as long as these set-back and separation requirements are not greater than those permitted by applicable ordinances for other housing forms.

(5) Existing law, known as the Manufactured Housing Community Act, authorizes the Department of Housing and Community Development to adopt regulations for the construction, maintenance, occupancy, use, and design of manufactured housing communities, as defined.

This bill would amend the Manufactured Housing Community Act to change the definition of manufactured housing community so that it excludes an area or tract or land the structures on which consist of manufactured homes, as defined, that have been approved by a city, county, or city and county pursuant to the State Housing Law as an alternate use, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(6) Existing law, known as the California Factory-Built Housing Law, authorizes local jurisdictions to impose specified requirements on factory-built housing.

This bill would impose a state-mandated local program by requiring that local requirements imposed on factory-built housing pursuant to the California Factory-Built Housing Law not vary substantially from the requirements imposed on other residential buildings of similar size.

(7) Under existing law, residents of mobilehome parks are permitted to acquire ownership of the park through loans made under the Mobilehome Park Resident Ownership Program, as administered by the Department of Housing and Community Development. Among other eligibility requirements under that program, the department is required to verify that at least ⅔ of the park's residents support the plans for acquisition and conversion of the park.

This bill would prohibit the department from additionally requiring that more than a simple majority of households residing in the mobilehome park actually purchase, or open escrow to purchase, interests or spaces in the park as a condition of disbursement of funds for loans under the program.

(8) This bill would incorporate additional changes in Section 17951 of the Health and Safety Code, proposed by AB 1844, to be operative only if AB 1844 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(10) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 414 (AB 1895) Polanco. Arts Council: funding.

Existing law requires the Arts Council to participate in a special interest license plate program and specifies that the original issuance and renewal costs of these license plates is $20 and $10, respectively.

This bill would increase the original issuance and renewal costs of these license plates from $20 to $30 and from $10 to $15, respectively, effective July 1, 1994.

Ch. 415 (AB 2315) V. Brown. Water: storage facilities.

Existing law provides that the Tehama-Colusa Conduit unit of the Central Valley Project consists of a conduit or canal, equipped with related water facilities, extending south from the Sacramento River, at or near Red Bluff, through the Counties of Tehama, Glenn, and Colusa. Existing law requires the conduit to have the capacity the Department of Water Resources determines to be adequate for specified beneficial uses in the conduit's service area.

This bill would change the name of the conduit to the Tehama-Colusa Canal. The bill would include groundwater recharge facilities in the specified related water facilities, and extend the canal and its service area through the Counties of Yolo, Solano, and Napa. The bill would require the department to consider waterfowl refuges, wildlife, and fisheries among specified beneficial uses in determining, in cooperation with local public agencies in the service area, the canal's necessary capacity. The bill would authorize specified entities, or a joint powers authority created by an agreement between those entities, to construct, own, and operate the related water facilities. The bill would authorize any joint powers authority to additionally include the federal Bureau of Reclamation.

Ch. 416 (SB 1002) Craven. Real estate.

(1) Existing law defines real estate broker for purposes of the Real Estate Law. Existing law also licenses and regulates mineral, oil, and gas brokers.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that a real estate broker is also a person who acts for another for compensation with respect to specified activities involving mineral, oil, or gas property, or who engages in specified businesses as a principal involving mineral, oil, or gas property. The bill would provide that a real estate broker's license shall not be required to engage in specified activities with respect to a mineral, oil, or gas property. The bill would eliminate the examination requirement for mineral, oil, and gas brokers.

(2) Under the Real Estate Law, the holder of a license who fails to renew it prior to the expiration of the period for which it was issued and who has otherwise qualified for such license, may renew it within 2 years from such expiration upon proper application and the payment of a late renewal fee in an amount equal to 1⅓ times the regular renewal fee.

This bill would instead provide for a late renewal fee of 1½ times the regular renewal fee.

(3) The Real Estate Law provides for various examination fees, license fees, and subdivision public report application fees.

This bill would increase those fees for a specified period of time. Since these fees would be deposited into the continuously appropriated Real Estate Fund, the bill would make an appropriation. The bill would provide for the repeal of these provisions if any funds are transferred from the Real Estate Fund to the General Fund, as specified, and for the reenactment of the existing fee provisions. The bill would also provide for the repeal of these provisions and the reenactment of existing fee provisions, if the balance of funds in the Real Estate Fund exceeds a specified amount and the commissioner does not reduce these fees, as specified.

(4) Existing law provides for separate accounts in the Real Estate Fund which are known as the Education and Research Account and the Recovery Account and provides that 8% of any license fee collected shall be credited to the Education and Research Account and 12% shall be credited to the Recovery Account.

This bill would instead provide that the commissioner may, by regulation, require that up to 8%, or such lesser amount as he or she deems appropriate of any license fee collected, be credited to the Education and Research Account. The bill would also provide that 12% of the amount of any license fee collected shall be credited to the Recovery Account, unless the account contains a specified amount of funds, then any excess funds shall be credited to the Real Estate Fund.

(5) Existing law also authorizes the commissioner to transfer any amount over $400,000 in the Education and Research Fund Account to the Real Estate Fund.

This bill would provide that notwithstanding that provision, if at any time the amount of funds credited to the Real Estate Fund, including any amounts credited to the Education and Research Account and the Recovery Account, is less than 25% of the Real Estate Department's authorized expenditures for the following fiscal year, the commissioner may transfer any or all of the funds credited to the Education and Research Account to the Real Estate Fund. The bill would also provide that the commissioner may authorize the return to the Education and Research Account of all or part of any amount previously transferred to the Real Estate Fund.

(6) The bill would state legislative intent.

(7) The bill would make related changes.

Ch. 417 (AB 1623) Bowen. Condoms: manufacturers.

Existing law requires that all public elementary, junior high, and senior high school classes that teach sex education include course material and instruction regarding sexually transmitted disease. As part of this instruction, existing law requires pupils to receive statistics based on the latest medical information citing the failure and success rates of condoms in preventing AIDS and other sexually transmitted diseases.

Existing law also permits the State Department of Health Services to establish, maintain, and subsidize clinics, dispensaries, and prophylactic stations for the diagnosis, treatment, and prevention of venereal diseases.

This bill would require the department to annually obtain from the federal Food and Drug Administration condom testing data and make this information available.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 418 (SB 1082) Calderon. Environmental protection: regulations: unified hazardous waste program.

(1) Under existing law, various boards, offices, and departments are established within the California Environmental Protection Agency which is administered by the Secretary for Environmental Protection.

This bill would require, not later than December 31, 1997, the agency, and the offices, boards, and departments within the agency, to institute quality government programs, as defined, in order to achieve specified goals. The secretary would also be required to develop a model quality management program for use by local agencies at their discretion.

The bill would require, on and after December 31, 1998, the California Environmental Protection Agency, and each board, department, and office within the agency, to submit a yearly report to the Governor and Legislature, as part of the budget process, reporting on the extent to which they have attained their performance objectives, and on their continuous quality improvement efforts.

The bill would require those offices, boards, and departments, by December 31, 1995, to implement a fee accountability program that meets specified requirements.

The bill would require a board, department, or office which determines that the amount of a fee that is fixed in statute should be increased to notify the Legislature, but if the amount is not fixed in statute, the board, department, or office would be allowed to increase the fee only if it makes written findings in the record that it has implemented a fee accountability program. The bill would require the agency to conduct a study regarding the purposes to which revenue derived from fines and penalties is directed.

The bill would require the boards, departments, and offices within the agency, prior to establishing certain chemical risk assessment guidelines or policies or preparing a health evaluation, to convene a public workshop and revise the guidelines, policies, or evaluation, as specified. The bill would require the Director of Environmental Health Hazard Assessment to convene on advisory committee, by June 30, 1994, to conduct a comprehensive review of the policies, methods, and guidelines followed by the boards, departments, and offices within the agency for identifying and assessing chemical toxicity.

The bill would require, commencing January 1, 1994, each board, department, and office within the California Environmental Protection Agency, before adopting any major regulations, as specified, to evaluate whether there is a less costly alternative.

(2) Existing law specifies the responsibilities of the Secretary of Trade and Commerce.

This bill would authorize the Secretary of Trade and Commerce to evaluate the findings and determinations required of any state agency which proposes to adopt regulations and would require the secretary to submit written comments into the record of the agency if the secretary makes a specified determination.

The bill would require the Secretary of Trade and Commerce to advise the Governor and members of the cabinet of the potential impacts of regulations on the state's business, economy, and job base.

(3) The bill would require the Secretary for Environmental Protection, by January 1, 1996, to adopt implementing regulations and implement a unified hazardous waste and hazardous materials management regulatory program, in accordance with prescribed procedures and requirements, to consolidate the administration of specified statutory requirements for the regulation of hazardous wastes and materials. The bill would prescribe the respective responsibilities of certified unified program agencies, designated as specified. The bill would authorize a city or local agency which meets specified requirements to apply to the secretary to implement the unified program and would require every county, by January 1, 1996, to apply to the secretary to be certified to implement the unified program, thereby imposing a state-mandated local program. The bill would require the approval of the secretary, as prescribed, of an application for certification and would authorize the secretary to disapprove or withdraw certification under specified circumstances.

The bill would require each certified unified program agency to institute a single fee

NOTE: Superior numbers appear as a separate section at the end of the digests.

system established by the governing body of the agency at a level sufficient to pay the necessary and reasonable costs incurred by the agency in administering the program. The bill would require the fee to include a surcharge, the amount of which the secretary would be required to determine, to cover the necessary and reasonable costs of state agencies in carrying out the unified program. The bill would require the surcharge to be deposited in the Unified Program Account, which the bill would create in the General Fund, and would allow the revenues to be expended, upon appropriation by the Legislature, by any state agency for the purposes of implementing the unified program.

(4) The bill would require the Secretary for Environmental Protection, by January 1, 1995, to develop, in accordance with prescribed procedures, a hazardous waste facility regulation and permitting consolidation program providing for specified matters.

The bill would specify related matters.

(5) Existing law requires the State Air Resources Board to prepare a specified report upon receiving certain recommendations from the Office of Environmental Health Hazard Assessment regarding toxic air contaminants which is authorized to serve as the basis for certain regulatory actions regarding a particular substance. The report is required to be reviewed by a specified scientific review panel. If the scientific review panel determines that the health effects report is seriously deficient, the report is required to be returned to the board.

The bill would instead require the panel to return the report to the board if the report is not based upon sound scientific knowledge, methods, or practices.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 419 (SB 1185) Bergeson. Environmental quality: consolidated permits: land use.

(1) Under existing law, the California Environmental Protection Agency is administered by the Secretary for Environmental Protection. Specified state agencies are established within the agency.

This bill would require the secretary, on or before January 1, 1995, to establish an administrative process which may be used, at the request of a permit applicant, to designate a consolidated permit agency, as defined, for projects that require permits from 2 or more environmental agencies, as defined. The bill would impose a state-mandated local program by imposing these requirements on local agencies.

The bill would require the secretary to adopt, by December 31, 1994, regulations establishing an expedited appeals process by which a petitioner or applicant can appeal procedural violations with regard to the issuance of environmental permits, as defined. The bill would specify related duties of the secretary.

(2) The bill would require the secretary to submit, by April 1, 1996, a report to the appropriate policy committees and the fiscal committees of both houses detailing specified information concerning implementation of the act.

(3) Existing law further authorizes cities and counties to enact, by ordinance, special conditions or regulations for the purpose of protecting places, buildings, and objects of special historical or cultural value.

This bill would, until January 1, 1995, exempt noncommercial property owned by religious organizations from those provisions and would make a legislative finding and declaration that the bill addresses a matter of statewide interest and concern relating to religious freedom. The bill would state that the exemption applies to charter cities but shall not be construed to infringe on the authority of any legislative body to enforce special conditions and regulations on any property designated prior to January 1, 1994.

(4) Under existing law, if a public agency fails to act to approve or to disapprove a development project within specified time limits, the failure to act is deemed approval of the permit application if the public notice request by law has occurred, as prescribed.

This bill would authorize an applicant to submit an appeal in writing, in accordance with prescribed procedures and requirements, to an environmental agency for a deter-

NOTE: Superior numbers appear as a separate section at the end of the digests.

mination regarding the failure by the environmental agency to take timely action on the issuance or denial of the environmental permit in accordance with the specified time limits.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 420 (SB 5) Presley. Domestic violence: local fees.

Existing law requires the collection of a fee in addition to the basic fee for the issuance of a marriage license and for the issuance of an authorization for the performance of marriages without a license, in the amount of $19, for funding of domestic violence centers to be disposed of by the clerk under specified provisions.

This bill would increase the fee required to be collected for domestic violence centers to $23. It would specify that the fee shall be disposed of by the county clerk under specified provisions, including a requirement that $4 be allocated to develop and expand domestic violence centers to target underserved areas and populations to the extent feasible.

Ch. 421 (AB 2066) B. Friedman. Domestic violence.

Existing law provides that a battery committed against a noncohabiting former spouse, fiancé, fiancée, or a person with whom the defendant currently has, or has previously had, a dating relationship is a misdemeanor. Existing law also provides that if, after conviction of this offense, probation is granted, or the execution or imposition of the sentence is suspended, the defendant shall participate in, for no less than one year, and successfully complete, a batterer's treatment program, or if a batterer's treatment program is not available, another appropriate counseling program designated by the court.

This bill would provide that if probation is granted to, or the execution or imposition of the sentence is suspended for, a person who has been previously convicted under these provisions, that person shall be imprisoned for not less than 48 hours in addition to any other sentence under these provisions. This bill would impose a state-mandated local program by changing the penalty for a crime. This bill, in addition, would give the court, upon a showing of good cause, the option not to impose the mandatory minimum imprisonment under these provisions and permit the court to grant probation or order the suspension of the execution or imposition of the sentence, under these circumstances.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 422 (SB 449) Alquist. Hospital buildings: construction inspectors.

Existing law, known as the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983, requires the Office of Statewide Health Planning and Development to approve certain classes of inspectors of construction or alteration of hospital buildings. Existing law requires the office to consult with the Department of General Services in approving an inspector.

Existing law requires all fees paid pursuant to the act to be paid into the State Treasury and credited to the Hospital Building Account in the Architecture Public Building Fund, which is continuously appropriated for expenditure by the office for purposes of the act.

This bill would delete the requirement that the office consult with the department in approving an inspector.

The bill would limit the statewide office to approving only the classes of inspectors specified in existing law.

The bill would require the office to examine inspectors initially and periodically by

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

giving either a written examination or a written and oral examination.

The bill would authorize the office to charge a prescribed fee and would prohibit the office from approving an inspector if the inspector has not passed the written examination.

The bill would prohibit the office from approving as an inspector an employee of the office performing or supervising field inspectors for a period of one year after the inspector left employment of the office.

The bill would require the office to develop regulations for the testing and approval of inspectors.

By increasing fees deposited into a continuously appropriated fund, the bill would constitute an appropriation.

Ch. 423 (AB 750) Cannella. Schools: construction.

Under existing law, school districts allocated funds pursuant to the Leroy F. Greene State School Building Lease-Purchase Law of 1976 for the construction of school facilities are required to provide a local matching share of the total building cost of any project approved under that law, as specified.

This bill would suspend the local matching share requirement, as specified, if a school district with average daily attendance less than 1,000 that attempts to acquire land at no cost from the federal government is prevented from acquiring the land because it becomes necessary to enact federal legislation to effectuate that acquisition. The period of suspension would begin when the necessary federal legislation is introduced in the Congress and would end when the necessary federal legislation is enacted. During this period, the project would be ineligible for any allocation of funds for the costs of construction and any developer fees or other charges collected during this period would be disregarded in calculating the district's local matching share requirement for this project.

This bill would repeal these provisions on July 1, 1994, unless a later enacted statute deletes or extends that date.

Ch. 424 (AB 316) Alpert. School districts: physical education.

(1) Existing law establishes various programs for the purpose of providing in-service training to strengthen the instructional techniques of classroom teachers. Existing law also requires that teacher credential holders meet certain continuing education requirements.

This bill would declare the intent of the Legislature that any school district or county office of education that offers in-service training to credentialed staff members who provide health education, physical education, or science education to pupils include within that training, where appropriate, certain information relating to the use of anabolic steroids .

(2) Existing law requires instruction in physical education in an elementary school maintaining any of grades 1 to 8, inclusive, for a total period of time of not less than 200 minutes each 10 school days. Existing law also requires the State Department of Education to adopt certain rules and regulations relating to physical education instruction in elementary schools. Existing law further establishes the Physical Education Specialist Program under which the governing board of each school district maintaining an elementary school that elects to participate in the program employs persons holding certification qualifications as physical education specialists.

This bill would declare that it is the intent of the Legislature to encourage each school district maintaining an elementary school composed of any of grades 1 to 8, inclusive, to either (1) employ a physical education specialist to provide the physical education instruction required for all elementary classes, or (2) provide each teacher providing physical education instruction to any of grades 1 to 8, inclusive, within an elementary school within the district with yearly theoretical and practical training in developmental physical education as set forth in specified rules and regulations adopted by the State Department of Education, unless the teacher has successfully completed a college-level course in elementary physical education.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 425 (AB 265) O'Connell. Family day care homes.

(1) The existing California Child Day Care Facilities Act requires the State Director of Social Services to authorize the Counties of Ventura and Placer to operate a pilot project for a period not to extend beyond December 31, 1993, to test the feasibility of permitting 2 additional schoolage children to be cared for in family day care homes. Existing law provides in those counties, upon authorization from the director, that a large family day care home may provide care for up to 14 children if 2 of the children are 6 years of age or older, as specified, and a small family day care home may provide care for up to 8 children if 2 of the children are 6 years of age or older, as specified.

This bill would require the director to authorize, in addition to the Counties of Placer and Ventura, the Counties of Fresno, San Diego, and San Luis Obispo to operate this pilot project and would provide for the repeal of this authorization for all pilot projects on January 1, 1996.

(2) Existing law requires the department to submit an evaluation of the pilot project to the Senate Health and Human Services Committee and the Assembly Human Services Committee of the Legislature by March 1, 1993, as specified.

This bill would require the Assembly Office of Research to submit an evaluation of the pilot projects by March 30, 1995.

This bill would require the director, in consultation with the Child Development Programs Advisory Committee and the State Department of Education, to determine what standardized data the Assembly Office of Research shall collect from the counties for the evaluation and would require the director to notify the counties of what is to be collected by a prescribed time. It would require the pilot project counties to provide the data to the office, department, and the committee, thereby creating a state-mandated local program by imposing additional duties upon the Counties of Ventura and Placer.

(3) This bill would provide that for purposes of zoning, pilot project family day care homes serving 2 additional schoolage children shall still be considered as small and large family day care homes. This bill would also provide that for purposes of certain fire safety regulations, a pilot project large family day care home serving up to 13 or 14 children shall be considered as serving only 12 children.

(4) Existing law provides for the repeal of the pilot project provisions on December 31, 1993.

This bill would provide for the repeal of these provisions on January 1, 1996.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of the State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 426 (SB 655) Bergeson. Teacher credentialing.

(1) Existing law establishes an accreditation advisory council to the Commission on Teacher Credentialing, and provides for the composition of its membership.

This bill would delete the provisions regarding the advisory council and, instead, would establish a Committee on Accreditation with a specified membership. The bill would set forth the duties of the committee and the terms of committee members.

(2) Existing law requires the commission to adopt an accreditation framework on or before September 15, 1990, that sets forth the policies of the commission regarding the accreditation of preparation programs for teachers and other certified educators.

This bill would delete that provision and, instead, would specify the required elements of a system for accreditation of educator preparation and of the existing accreditation framework. The bill would specify the powers and duties of the commission regarding the accreditation system.

(3) Existing law authorizes the commission to establish and collect fees from postsecondary institutions to recover any additional costs resulting from the replacement of

NOTE: Superior numbers appear as a separate section at the end of the digests.

program approval with program accreditation. Existing law requires the commission and the advisory council to periodically report to the education policy committees of the Legislature regarding all of the above provisions. Existing law requires the commission to assume responsibility for verifying the quality and status of educator preparation under certain circumstances.

This bill would delete all of these provisions.

Ch. 427 (AB 68) Alpert. Crimes: vandalism.

Existing law sets forth various prohibitions concerning vandalism generally and vandalism to any church, synagogue, building owned and occupied by a religious educational institution, or other place primarily used as a place of worship where religious services are regularly conducted.

This bill, in addition, would provide that any person who willfully and maliciously injects into or throws upon, or otherwise defaces, damages, destroys, or contaminates, any structure, as defined, with butyric acid, or any other similar noxious or caustic chemical or substance, is guilty of a public offense, punishable as specified, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 428 (AB 141) Murray. Weapons.

Existing law prohibits the carrying of a concealed or loaded weapon by any person who is not exempted from this prohibition or who is not licensed to carry a concealed weapon.

Existing law exempts certain specified peace officers from this prohibition, and from a prohibition against carrying a loaded firearm in certain public places.

The bill would recast and revise these provisions that exempt certain peace officers from the prohibition on carrying a concealed or loaded firearm in certain public places. The bill would also provide that the identification certificate or endorsement issued to peace officers authorizing the officers to carry a concealed firearm shall also authorize the officer to carry a concealed and loaded firearm, as specified. The bill would make other related changes.

The bill would also include within the exemption relating to carrying concealed firearms and the exemption relating to carrying loaded firearms other honorably retired peace officers who during the course and scope of their employment as peace officers were authorized to, and did, carry firearms. Because any peace officer exempted from these provisions who has been honorably retired shall be issued an identification certificate by the agency from which the officer retired, this bill would create a state-mandated local program.

This bill would incorporate additional changes in Sections 12027 and 12031 of the Penal Code proposed by AB 578, to become operative only if AB 578 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 429 (AB 896) W. Brown. State real property.

(1) Existing law authorizes the Department of General Services to sell, exchange, hire, lease, lease-purchase, or lease-purchase with the option to purchase any real or personal property for use of any state agency, except as specified.

This bill would authorize the Director of General Services, notwithstanding any other provision of law, to enter into an amendment to the existing joint powers agreement with the San Francisco Redevelopment Agency in connection with the redevelopment

NOTE: Superior numbers appear as a separate section at the end of the digests.

of a specified area in the City and County of San Francisco. It would authorize the department to use and expend funds available to the joint powers authority for the redevelopment in accordance with any agreement between the department and the joint powers authority, as specified. This bill would authorize the joint powers authority to borrow from the Pooled Money Investment Account as specified.

(2) Existing law also authorizes the director to enter into an additional amendment to an existing joint powers agreement with the Community Redevelopment Agency of the City of Los Angeles, in connection with the financing, planning, acquisition, and construction of an additional office building and parking facilities at a specified site in Los Angeles.

This bill would further authorize the director to enter into specified agreements in connection with the renovation of an additional office building or buildings in connection with the above joint powers agreement. It would authorize the use of the "design-build" concept and permit borrowing, as specified.

(3) This bill would also authorize the director to sell or exchange any state-owned property to meet the intent of the bill.

(4) The bill, in addition, would make various findings, declarations, and statements of legislative intent with respect to the San Francisco/Oakland State Facilities Plan and its review by the Department of General Services.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 430 (SB 772) Petris. State real property: Department of General Services.

(1) Existing law requires the Department of General Services to perform various functions and duties with respect to state property.

This bill would authorize the Director of General Services to sell or exchange state-owned property, as specified, located in the City of Oakland.

(2) Existing law authorizes the Director of General Services to lease, lease-purchase, or lease with an option to purchase real property for the use of any state agency, but prohibits the director from entering into an office space lease-purchase agreement or a lease with an option to purchase with an initial option purchase price over $2,000,000, unless specifically authorized by the Legislature.

This bill would, notwithstanding any other provision of law, authorize the Director of General Services to enter into an amendment to an existing joint powers agreement with the Oakland Redevelopment Agency in connection with the development of approximately 700,000 gross square feet of new state-owned office space in the City of Oakland, as specified, to be named the Elihu M. Harris Building. The bill would authorize the director to use and expend any funds lawfully available to the joint powers authority for the purposes of this project, thereby making an appropriation. The bill would authorize a "design-build" concept to be utilized for the purposes of this project. The bill would authorize the joint powers authority to borrow from the Pooled Money Investment Account.

(3) Existing law appropriates to the Department of General Services $2,000,000 for environmental impact reports and schematic drawings for the Oakland State Office Building, $2,208,000 for design development for the Oakland State Office Building, $3,070,000 for environmental impact reports and schematic drawings for certain San Francisco State Office Buildings, and $3,904,000 for design development for those San Francisco State Office Buildings.

This bill would delete those appropriations and instead appropriate to the Department of General Services $1,250,000 for the Elihu M. Harris Building, and $2,000,000 for the San Francisco State Office Buildings, for preparation of a request for proposal for design-build projects and related documents as described in paragraph (2).

(4) Existing law authorizes the Director of General Services to enter into agreements respecting state agency office and parking facilities in San Bernardino and Riverside Counties.

This bill would delete that provision and would authorize the Director of General Services to enter into agreements to consolidate the offices of the Department of Transportation in the City of San Bernardino.

The bill would authorize the sale of revenue bonds for the acquisition of facilities.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) The bill would state legislative intent.
(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 431 (AB 2040) Weggeland. Underground storage tanks: loan program.

(1) Existing law requires the Department of Commerce to conduct a program to make loans to persons to upgrade, replace, or remove petroleum underground storage tanks to meet applicable local, state, or federal standards and to take corrective actions. Existing law defines tank for purposes of the program and requires the department to make loans only to small businesses, as defined in the Small Business Procurement and Contract Act. The loan application is required to include specified information. The maximum amount which the department is authorized to loan under the program for one project tank is $50,000 and the minimum amount which the department may loan an applicant is $30,000. The loan funds are prohibited from financing more than 90% of specified costs to upgrade, remove, or replace project tanks.

This bill would revise the definition of the term "tank" for purposes of the program to include specified vapor recovery systems and dispensers.

The bill would require a loan applicant to be a small business concern, as defined in the federal Small Business Act and specified federal regulations, if the principal office and the officers of the business are domiciled in this state. The bill would require the department to give priority to awarding loans to businesses which meet the definition of small business specified in the Small Business Procurement and Contract Act. The bill would prohibit the department from refusing to grant a loan to an applicant solely because the applicant has failed to obtain a permit for the underground storage tank. The bill would delete the maximum loan limit for one project tank, would decrease the minimum amount that may be loaned to an applicant to $10,000, and would allow loan funds to be used for up to 100% of those project tank costs.

(2) Under existing law, the Petroleum Underground Storage Tank Financing Account in the General Fund is available for expenditure by the department, upon appropriation by the Legislature, for making these loans. All interest accruing on interest payments from loan applicants or interest earned on funds in that account is required to be deposited in a subaccount of the account. The department is authorized to expend up to $150,000 from the account, upon appropriation by the Legislature, for administrative expenses in carrying out the program.

This bill would instead authorize the department to expend the interest earnings in the subaccount, upon appropriation by the Legislature, for administrative expenses in carrying out the program.

(3) Existing law, the Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, requires every owner of a petroleum underground storage tank who is required to obtain a permit to own or operate a tank to pay a specified storage fee, for deposit in the Underground Storage Tank Cleanup Fund. The act authorizes the State Water Resources Control Board to expend the money in the fund, upon appropriation by the Legislature, to implement specified laws relating to the regulation of petroleum underground storage tanks, including to reimburse eligible owners and operators for the costs of corrective action and to reimburse eligible owners and operators for costs related to the compensation of 3rd parties for bodily injury and property damages arising from an unauthorized release of petroleum into the environment from an underground storage tank. The board is required to award the claims in accordance with a specified priority ranking, which ranks first those owners of tanks located on property used only for residential use, or property which the owner demonstrates is not used for agricultural purposes, as specified, secondly, tank owners or operators which meet the eligibility requirements for small businesses of the loan program specified in (1) above, and thirdly, tank owners or operators which meet specified criteria concerning business operations.

This bill would revise the requirements for the 2nd ranking to instead make eligible small businesses which meet the definition in the Small Business Procurement and Contract Act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 432 (AB 1061) Costa. Underground storage tanks: claims.

(1) Existing law prohibits the ownership or operation of an underground storage tank used for the storage of hazardous substances unless a local agency issues a permit for its operation. Existing law also imposes various design, installation, monitoring, and release reporting requirements with regard to underground storage tanks. For purposes of that law, the term underground storage tank is defined as excluding certain tanks and structures.

This bill would additionally exempt from the definition of underground storage tank, until January 1, 1996, a tank holding hydraulic fluid for a closed loop mechanical system that uses compressed air or hydraulic fluid to operate lifts, elevators, and other similar devices. The bill would require the State Water Resources Control Board, by January 1, 1995, to submit a report to the Legislature concerning whether that exemption in the definition of underground storage tank should be permanently enacted into law.

(2) Existing law, the Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, requires every owner of a petroleum underground storage tank who is required to obtain a permit to own or operate a tank to pay a specified storage fee, for deposit in the Underground Storage Tank Cleanup Fund. The act is repealed, by its own terms on January 1, 1998. A failure to pay those fees is a crime, pursuant to other provisions of law. The act authorizes the State Water Resources Control Board to expend the money in the fund, upon appropriation by the Legislature, to implement specified laws relating to the regulation of petroleum underground storage tanks, including to reimburse eligible owners and operators for the costs of corrective action and to reimburse eligible owners and operators for costs related to the compensation of 3rd parties for bodily injury and property damages arising from an unauthorized release of petroleum into the environment from an underground storage tank. The board is prohibited from paying any claims which are greater than 5% of the total amount annually appropriated for the fund. The board is required to award the claims in accordance with a specified priority ranking, which ranks first those owners of tanks located on property used only for residential use, or property which the owner demonstrates is not used for agricultural purposes, as specified, secondly, tank owners or operators which meet eligibility requirements for small businesses, and thirdly, tank owners or operators which meet specified criteria concerning business operations.

The board is required to adopt emergency regulations to implement the act.

Existing law requires a state or local agency head to select professional services of private environmental services, among other types of professional services, on the basis of demonstrated competence and on the professional qualifications necessary for the services, as specified.

This bill would revise a statement of legislative intent regarding the payment of those claims.

The bill would additionally include, in the second ranking, a city, county, district, or nonprofit organization that has total annual revenues of less than $7,000,000, and would include in the third ranking, a city, county, district, or nonprofit organization that employs fewer than 500 full-time and part-time employees.

The bill would require the board to pay all other claims assigned to the second and third categories before paying the claim of a city, county, or district filed before the effective date of the bill, if the board makes a specified determination.

The bill would require the board, in any year in which the board is not otherwise authorized to award at least 15% of the total amount of funds committed for that year to tank owners or operators in specified categories due to specified priority ranking list award limitations, to allocate between 14% and 16% of the total amount of funds committed for that year to each category that is not otherwise entitled to at least that level of committed funding for that year. The bill would define terms and would allow the board to implement certain contracting procedures, as may be necessary, for the processing and awarding of these claims in accordance with the requirements for selecting professional services. The board would be required to determine if those procedures should be implemented if 25% or more of the funds have not been obligated. The bill would revise the definition of environmental services, for purposes of those contracting

NOTE: Superior numbers appear as a separate section at the end of the digests.

provisions, to include the processing and awarding of these claims.

The bill would allow the board to exempt a claim from the 5% limit of money allocated from the fund for the payment of the claims upon making specified determinations.

The bill would require the board to adopt a priority ranking list for awarding claims at least annually, rather than at least twice annually. The bill would require the adoption of any regulations filed with the Office of Administrative Law on or before January 1, 1995, to be deemed an emergency.

The bill would require the board, by September 30, 1994, and annually by September 30 thereafter, to prepare and submit a report to the Legislature which would describe the status of the fund and set forth recommendations for legislative changes to improve the act.

The bill would extend the date of the repeal of the act to January 1, 2005, thereby imposing a state-mandated local program by continuing the requirement to pay the fees required by the act, the violation of which is a crime.

(3) Under existing law, a claim against the fund is eligible only if the board finds that the claimant has complied with the permit requirements for underground storage tanks and with the financial responsibility requirements of the act.

The bill would permit the board to waive the permit and financial responsibility requirements as a requirement for participation in the fund under specified conditions.

(4) The bill would incorporate changes to Section 25299.52 of the Health and Safety Code proposed by this bill and AB 2040, which would become operative only if both bills are enacted and this bill is chaptered last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 433 (SB 1209) Bergeson. Department of Transportation: contracts for services.

(1) Existing law authorizes the Department of Transportation to contract for the services of engineers, architects, surveyors, planners, environmental specialists, and materials testing specialists to provide professional and technical services to the department whenever the director determines that specified guidelines are applicable. Existing law declares the Legislature's intent regarding these contracts.

This bill would enact additional findings and declarations and would enact provisions regarding those contracts that are specifically applicable to contracts in the cases of certain projects to support state transportation infrastructure funded by local resources, to retrofit highway structures in accordance with statutes enacted following the 1989 Loma Prieta Earthquake, and to ensure timely and cost-effective project delivery. The bill would also provide that the department is not required to staff at a level to provide services for other agencies and that the department may balance the need for outside contracting, as specified. The bill would provide that the department is not required to staff to a certain level.

The bill would require the department to prepare and adopt a specific affirmative action plan for its management and other personnel positions.

The bill would provide that certain contracts in force or awarded on or before July 1, 1993, for specified services, including but not limited to, contracts awarded but not executed, shall not be terminated but shall continue to their conclusion subject to the same terms and conditions of those contracts as they read on July 1, 1993.

The above provisions of this bill would be effective only until January 1, 1998.

The bill would require the department to encourage specified mentor-protege agreements between prime contractors and subcontractors.

(2) Under existing law, the department is required to establish statewide participation goals of not less than 15% for minority business enterprises, not less than 5% for women business enterprises, and not less than 3% for disabled veteran business enterprises. Existing law requires these goals to apply to the overall dollar amount expended

NOTE: Superior numbers appear as a separate section at the end of the digests.

each year by the department for specified engineering and related professional services.

This bill would recast this provision to instead require the department to contract out for these specified services in accordance with provisions generally applicable to all state agencies and departments regarding statewide participation goals.

(3) Existing law requires the department to include in its annual budget request permanent and temporary capital outlay support staffing at specified levels, as compared to its 1986–87 authorized permanent and temporary capital outlay support staffing level, and authorizes the department to contract out for staffing in excess of the 1986–87 authorized levels.

This bill would delete those provisions until January 1, 1998.

(4) Under existing law, any state or local agency may elect to participate in the certification process, as defined, of minority, women, and disadvantaged business enterprises, as those terms are defined, for purposes of awarding public contract work.

Existing law requires that the certification information obtained by state or local agencies be submitted within a reasonable amount of time to the Department of Transportation for inclusion in a computerized data bank.

This bill would require the participating state or local agency to complete the certification process within 60 working days after receipt of a completed application and would delete the requirement that the submission to the department occur within a reasonable amount of time.

Chapter 192 of the Statutes of 1993 amends Section 2053 of the Public Contract Code, effective January 1, 1994, to lengthen the period of time, from one year to 2 years, that certification as a minority, woman, or disadvantaged business enterprise is granted for purposes of provisions regarding the awarding of public contract work.

This bill would make the same change in Section 2053 of the Public Contract Code, effective on the operative date of this bill.

(5) The bill would require the Legislative Analyst to include in its recommendation to the Legislature of the Budget Act of 1997, a report on the cost-effectiveness of the Department of Transportation's use of contract employees rather than state employees.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 434 (AB 781) Frazee. Community services districts: Lake San Marcos.

Existing law provides for the creation and establishment of community services districts to provide various services, including police protection.

This bill would specifically authorize these districts to provide other security services.

Existing law provides that the people of any unincorporated territory may petition the board or boards of supervisors for the formation of a community services district.

This bill would permit qualified voters, as defined to include residents and nonresident landowners, of the Lake San Marcos area of San Diego County to petition the board of supervisors for the formation of a community services district for the purpose of contracting for security services, and to be eligible to be members of the board of directors of the community services district.

The bill would state that these provisions constitute necessary special legislation.

Ch. 435 (AB 980) Allen. School districts: dress codes.

Existing law has no specific provision authorizing school districts to require adherence to a dress code.

This bill would declare that gang-related apparel is hazardous to the health and safety of the school environment and that the governing board of any school district may adopt reasonable dress code regulations prohibiting pupils from wearing "gang-related apparel" if the board has determined that the regulations are necessary for health and safety purposes.

This bill would declare that school safety planning may include the establishment of a schoolwide dress code that would prohibit pupils from wearing "gang-related apparel" which could reasonably be determined to threaten the health and safety of the school environment, as specified, and would require that the dress code be enforced.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 436 (AB 1034) Campbell. Hazardous waste management plans.

Existing law authorizes a county to prepare a county hazardous waste management plan for the management of all hazardous waste produced in the county. A county is required to submit the final county hazardous waste management plan to the Department of Toxic Substances Control pursuant to a specified schedule, for review and approval, if specified determinations are made, or disapproval.

This bill would allow each county within the Association of Bay Area Governments region with an unapproved county hazardous waste management plan to submit the final plan adopted by the county to the department for review and approval or disapproval by January 15, 1994.

The bill would provide that each county within the Association of Bay Area Governments region which submitted a final plan adopted by the county to the department after June 24, 1991, and prior to January 1, 1994, to have timely submitted a county plan to the department for review and approval.

The bill would require the department, by July 1, 1994, to review and either approve or disapprove those plans in accordance with prescribed requirements.

The bill would make related legislative findings and declarations.

Ch. 437 (AB 1678) Bowen. Planning: general plans: reports.

(1) Existing law requires every city, county, or regional planning agency to file with the Governor's Office of Planning and Research an annual report, as specified, relating to transactions, recommendations, and legislation with respect to planning. Existing law requires that this report indicate the degree to which the approved general plan of the city, county, or regional planning agency complies with specified guidelines regarding preparation and content of the plan's mandatory elements. Existing law also requires that the city, county, or regional planning agency submit a copy of this report to the Department of Housing and Community Development within a specified time period.

This bill would repeal provisions related to this report, and would instead require a planning agency, after a legislative body adopts all or part of its general plan, to provide an annual report to the office and to the department, regarding specified aspects of the general plan, including the date of the plan's last revision. By imposing new reporting requirements on local planning agencies, the bill would create a state-mandated local program.

The bill would also require the Office of Planning and Research to notify a city or county and the Attorney General when the general plan of the city or the county has not been revised within specified times.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 438 (SB 272) Ayala. Local agency formation commission.

Existing law requires the local agency formation commission in each county, among other things, to determine and develop the sphere of influence of each local governmental agency within the county as part of the commission's planning and development responsibilities. Existing law specifies the determinations and procedures that the commission is to follow before adopting a sphere of influence for each local governmental agency within its jurisdiction that provides facilities or services related to development. Any person or local agency may file a written request with the executive officer of the commission requesting amendments to the sphere of influence adopted. The commission may approve or disapprove or modify the request for amendment.

This bill would establish a procedure, applicable exclusively to the agricultural preserve in the El Prado area of San Bernardino County for submitting one disapproved request for amendment of a sphere of influence for voter approval by the filing of an initiative petition. The act would be repealed on January 1, 2000, unless a later enacted statute deletes or extends that date.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 439 (AB 40) Margolin. State trust funds.

Existing law, on and after January 1, 1994, prohibits additional or new state trust money investments in business firms and financial institutions that are licensed in this state that engage in discriminatory business practices in furtherance or compliance with the Arab League's economic boycott of Israel. The prohibition is inapplicable to business firms and financial institutions which adopt resolutions implementing policies not to engage in those practices.

This bill would make the prohibition applicable to investments in foreign and domestic business firms and financial institutions, would prohibit renewal of those investments by financial institutions, and would make other conforming changes.

Ch. 440 (AB 216) Margolin. Retirement systems: investments.

Existing law authorizes commercial banks and savings associations to purchase bonds and other evidences of indebtedness unconditionally guaranteed by Canada, Israel, or Mexico.

This bill would authorize any state or local public retirement system to invest, subject to and consistent with the constitutional fiduciary standard, its assets in bonds or other evidences of indebtedness unconditionally guaranteed by any foreign government that meets specified standards and would authorize a portion of those investments to be used to purchase rated or unrated bonds, notes, or other instruments unconditionally guaranteed by Canada, Israel, or Mexico.

Ch. 441 (SB 268) Roberti. Economic conversion.

Existing law does not provide for a fund to support defense conversion related activities.

This bill would establish the Defense Conversion Matching Grant Program consisting, to the extent permitted by federal law, of $4,000,000 transferred from funds received by the state from the Petroleum Violation Escrow Account and would, upon order of the Director of Finance, transfer, on and after February 1, 1994, $1,500,000 of those funds to the Trade and Commerce Agency. The Office of Strategic Technology and regional technology alliances would be required to evaluate and rank competitive proposals for state financial assistance or endorsement for defense conversion projects.

The program would be repealed on January 1, 1999.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 442 (AB 648) Epple. New Business Incubator Enterprise Program.

Existing law does not contain provisions relating to a New Business Incubator Enterprise Program.

This bill would enact such a program, to be administered by the Small Business Development Board, and would require the board to determine those enterprises that are qualified to be New Business Incubator Enterprises, as defined.

The bill would not become operative unless AB 1246 is also enacted.

Ch. 443 (AB 938) Polanco. Economic development: technical assistance.

The Department of Commerce and the Secretary of the Trade and Commerce agency administer various economic development and technical assistance agencies and programs.

This bill would establish the California Procurement and Technical Assistance Network (CAPTAN) as a component within the existing statewide California Community Colleges Economic Development Network under the auspices of the Chancellor of the California Community Colleges and the Secretary of Trade and Commerce and prescribe the functions of the network.

The provisions would be implemented only upon the availability of sufficient nonstate funds.

Ch. 444 (AB 2222) Lee. Defense industry conversion.

Existing law establishes various state and local economic development agencies, committees, and councils.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would enact the California Defense Conversion Act of 1993 and would create the California Defense Conversion Council in the Trade and Commerce Agency with prescribed membership and powers and duties. The act would be repealed on January 1, 1999.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 445 (SB 458) Hart. Defense industry conversion.

Existing law establishes various state and local economic development agencies, committees, and councils.

This bill would enact the California Defense Conversion Act of 1993 and would create the California Defense Conversion Council in the Trade and Commerce Agency with prescribed membership and powers and duties. The act would be repealed on January 1, 1999.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 446 (AB 1246) Quackenbush. Competitive technology: technology programs.

Under existing law, the Trade and Commerce Agency includes the Office of Competitive Technology and the Competitive Technology Advisory Committee, which are responsible for the development and administration of the California Competitive Technology Program. The program's objective is to further the state's interests with respect to its position as a competitor in the world manufacturing market by promoting scientific and technological advancement. Under existing law, the Competitive Technology Program shall accept applications for grants to fund relevant projects. Existing law also contains obsolete references to the Department of Commerce, which administered programs relating to competitive technology before the establishment of the Trade and Commerce Agency.

This bill would change the name of the Office of Competitive Technology to the Office of Strategic Technology, and would rename the Competitive Technology Program the Challenge Grant Program. The bill would expand the functions and grant programs administered by the Office of Strategic Technology, and identify that office as the lead agency in the state regarding strategic technology. This bill would establish within the agency the Technology Planning Program, the Manufacturing Technology Program and to the Challenge Grant Program, to provide grants and technical assistance to California nonprofit organizations and public agencies. This bill would also replace references to the Department of Commerce with references to the Trade and Commerce Agency.

The bill would become operative only if AB 648, AB 2222, and SB 458 are all enacted on or before January 1, 1994.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 447 (AB 510) Collins. State officers: compensation.

Existing law authorizes the appointing power of any officer or employee not a member of the civil service to promulgate regulations governing vacations for these officers or employees, and in the absence of these regulations, provides that the rules of the department relating to the regulation and methods of accumulation of vacation for civil service employees shall govern.

This bill would prohibit the accrual of paid leave including, but not limited to, vacation, sick leave, and annual leave for specified state officers, notwithstanding the above provision. The bill would also permit the department to adopt regulations for the application of this provision to similar positions established in the future.

Ch. 448 (AB 870) Umberg. Mobilehome parks: rent increases.

Existing law requires the management of a mobilehome park to give a homeowner written notice of any increase in rent at least 60 days before the date of the increase.

This bill would instead require notice to be given at least 90 days prior to the increase.

Ch. 449 (AB 1747) Solis. Community colleges: faculty development.

(1) Existing law establishes the Community College Faculty and Staff Development

NOTE: Superior numbers appear as a separate section at the end of the digests.

Fund to support locally developed and implemented faculty and staff development programs. Existing law requires the Board of Governors of the California Community Colleges to allocate certain funds to community college districts to implement specified reforms and make authorized program and service improvements.

This bill would include within those program and service improvements the development and administration of a program that provides for reassignment of up to 20% of the time of individual tenured faculty member's teaching assignments, as determined by the governing board of each community college district, to counsel and assist newly hired faculty acquire teaching and classroom management skills. The bill would prohibit a governing board from approving reassignment time for more than 5% of the district's full-time equivalent tenured faculty in any one fiscal year. By imposing this requirement on community college districts, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 450 (SB 255) Boatwright. Independent adoption.

(1) Under existing law, it is unethical for an attorney to represent both the prospective adoptive parents and the birth parents of a child in negotiations or proceedings in connection with an adoption unless the attorney obtains written consent from both parties.

This bill would require the attorney retained by or representing the prospective adoptive parents in an independent adoption to inform the prospective adoptive parents in writing that the birth parent or parents can change their minds and that any moneys expended in negotiations or proceedings in connection with the child's adoption are not reimbursable. This bill would require that the prospective adoptive parents sign a statement indicating that they understand this information. The bill would also make a technical change contingent on the enactment of SB 792.

(2) Under existing law, prospective adoptive parents must file with the court a full accounting report of all disbursements made or agreed to be made by them or on their behalf in connection with the birth of the child or the adoption.

This bill would require that any request by a birth parent or birth parents for payment by the prospective adoptive parents of specified fees and expenses be in writing, and would require the birth parent or parents to provide the prospective adoptive parents with written receipts for any money provided to the birth parent or parents, which receipts are to be provided to the court when the accounting report is filed.

Ch. 451 (SB 270) Russell. Dependent children: placement.

Under existing law, in any case in which a dependent child of the juvenile court is removed from the physical custody of his or her parents, the court is required to give preferential consideration to a request by a relative of the child for placement of the child with the relative.

This bill would require that if the court does not place the child with a relative who has been considered for placement pursuant to this provision, the court shall state for the record the reasons placement with that relative was denied.

The bill would also incorporate further changes to Section 361.3 of the Welfare and Institutions Code proposed by SB 426, contingent upon its prior enactment.

Ch. 452 (SB 385) Greene. School construction: developer fees.

Under the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (the Greene Act), the total building cost portion of any state funding for any project approved under the Greene Act is reduced by the amount of the local matching share

NOTE: Superior numbers appear as a separate section at the end of the digests.

requirement, which corresponds to the product of the maximum developer fees that may be assessed, as specified, times the number of square feet of construction.

This bill would specify that the San Juan Unified School District may retain developer fees to construct the Gold River Elementary School instead of applying those fees as a matching share under the Greene Act due to that particular project being deemed to come within an exception to the matching share requirement.

This bill would make a legislative finding and declaration of unique circumstances in this regard.

Ch. 453 (SB 809) Ayala. Electricity rates.

Existing law requires every electrical corporation which serves a steel producer, frozen food processor, or other heavy-industry customer to prepare and file with the commission tariffs applying to service to these customers providing for rates lower than the system average rate, as defined, for specific service requirements of each customer, for incentives to achieve conservation, improvements in efficiency, and time-of-day load shifting.

This bill would require electrical corporations to make available to qualifying heavy industrial customers optional interruptible or curtailable service, at a rate to reflect a pricing incentive, as specified.

Since existing law makes any public utility who violates specified provisions regulating public utilities guilty of a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would provide for the repeal of its provisions on January 1, 1996, unless a later enacted statute, which is enacted before January 1, 1996, deletes or extends that date.

Ch. 454 (SB 992) Kelley. Agriculture: avocados: eggs.

(1) Existing law establishes the California Avocado Commission to promote the marketing and production of avocados. Existing law also provides that if the provisions governing the commission are suspended, all moneys remaining and held by the commission, collected by assessment and not required to defray the expenses of concluding and terminating operations of the commission, shall be returned on a pro rata basis to all persons from whom assessments were collected in the immediately preceding current marketing season; however, if the commission finds that the amounts are so small as to make impractical the computation and remitting of the refund, any moneys remaining, and any moneys remaining after payment of all expenses of winding up and terminating operations, are required to be paid into the State Treasury as unclaimed trust moneys.

This bill would require amounts too small to be refunded to be paid to any existing state or federally authorized avocado program. If there is no such program, the bill would require these amounts to be paid into the State Treasury as unclaimed trust moneys. This bill would also delete an obsolete cross-reference in the provisions relating to the commission.

(2) Existing law establishes the California Egg Commission to promote the marketing and production of eggs. Existing law provides for the levy of an assessment on egg handlers to support the activities of the commission. Existing law requires that a referendum be conducted every 5th year on the continuation of these provisions. Under existing law, the Director of Food and Agriculture is required to continue the operation of these provisions if 65% of the handlers representing a majority of the volume of eggs and egg products marketed vote in favor of continuation, or a majority of the handlers representing 65% of the volume of eggs and egg products marketed vote in favor of continuation.

This bill would make these provisions applicable to distributors, and for that purpose would define distributor. The bill would include a distributor as an additional member of the commission. The bill would provide for the suspension of these provisions if 65%

NOTE: Superior numbers appear as a separate section at the end of the digests.

of the handlers and distributors representing a majority of the volume of eggs and egg products marketed vote in favor of suspension, or if a majority of the handlers and distributors representing 65% of the volume of eggs and egg products marketed vote in favor of suspension.

(3) Existing law makes it a misdemeanor, among other things, when engaged in the handling of eggs or egg products or in the wholesale or retail trade of the handling of eggs or egg products, to fail or refuse to furnish to the commission or its duly authorized agents, upon request, information concerning the name and address of the persons from whom eggs or egg products have been received and the quantity so received.

This bill would also make any person engaged in the marketing of eggs who fails to disclose that information to the commission guilty of a misdemeanor. This bill would therefore impose a state-mandated local program by changing the definition of a crime.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 455 (AB 33) Murray. Compton Unified School District: state administrator.

(1) Existing law provides for emergency apportionments to school districts subject to specified conditions including, in certain circumstances, the repayment of an emergency loan over a period of no more than 10 years and the appointment by the Superintendent of Public Instruction of an administrator who would exercise the powers and responsibilities of the governing board of the school district.

Existing law requires the administrator appointed for the Compton Unified School District to report to the Legislature by January 1, 1994, on the implementation of the recommendations contained in the "Report of Priority Corrective Actions for Compton Unified School District" issued May 4, 1993, as specified.

This bill would require that administrator to implement the recommendations of that report, as specified, and would require the administrator to provide the superintendent with an annual progress report on that implementation. The bill would require the administrator to retain authority for the operation of the Compton Unified School District until the superintendent makes certain determinations.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 456 (AB 58) Peace. Actions and proceedings.

Existing law provides for specified motions by a defendant prior to pleading; requires, upon request, a statement of the nature and amount of damages claimed in certain superior court actions; specifies the grounds for answer or demurrer; provides for the dismissal of civil actions and the granting of default judgments; specifies that certain orders are open on appeal; limits the amount of a default judgment to the amount demanded in the complaint; and specifies the judgments or orders of a superior court from which an appeal may be taken, the circumstances in which an undertaking is required in order for the enforcement of a judgment or order to be stayed on appeal, and the compensation of specified expert witnesses who are deposed.

This bill would add a motion for dismissal, as specified, to the motions which may be made by a defendant prior to pleading; provide for a motion for judgment on the pleadings, as specified; revise the requirement for a statement of the nature and amount of damages; revise certain procedures for the dismissal of civil actions and the granting of default judgments; specify that additional orders are open on appeal; increase the threshold amount of monetary sanctions imposed by a superior court which may be appealed prior to final judgment; specifically limit the amount of a default judgment to the amount demanded in the complaint or the amount specified in a statement of damages filed in a personal injury or wrongful death action in superior court; and would

NOTE: Superior numbers appear as a separate section at the end of the digests.

revise the circumstances in which an undertaking is required in order for the enforcement of a judgment or order to be stayed on appeal, and instances in which attorney's fees are allowed as costs.

Ch. 457 (AB 201) Conroy. Sex offenders: DNA testing.

Under existing law, any person who is required to register as a sex offender shall, prior to discharge, parole, the granting of probation, or release, provide two specimens of blood and a saliva sample, as specified, for analysis of deoxyribonucleic acid (DNA) and other genetic typing analysis at the Department of Justice's DNA laboratory.

This bill would also permit the Department of Justice to provide samples from these specimens to local public DNA laboratories for law enforcement purposes, as specified. The bill would also authorize additional specimens to be collected and sent to a local public DNA laboratory for DNA analysis and other genetic typing analysis if specified conditions are met, including conditions relating to privacy and sample security.

Ch. 458 (AB 247) Hauser. Housing: manufactured homes: contractors.

(1) Existing law, known as the Mobilehomes-Manufactured Housing Act of 1980, regulates, among other things, the sale of mobilehomes, manufactured homes, and commercial coaches, as defined, by distributors and manufacturers. The act prohibits these distributors and manufacturers from selling manufactured homes, mobilehomes, or commercial coaches to persons not licensed under the act for resale of these items. Under existing law, general building contractors are not licensed under the act for resale, and they are thus prohibited from buying manufactured homes, mobilehomes, or commercial coaches for resale.

This bill would amend the Mobilehomes-Manufactured Housing Act of 1980 to authorize general building contractors, as defined, to buy manufactured homes, as defined, for resale under specified conditions. This bill would also make conforming changes in the law relating to manufactured home warranties so that resales made by general building contractors pursuant to the bill would be subject to these warranties.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 459 (AB 400) O'Connell. Equine protection.

Existing law provides that no investigator or other employee of the Department of Food and Agriculture, in enforcing the Equine Protection Act of 1991, is required to conduct any investigation that involves the theft of any animal. Existing law requires the investigation to be conducted by the law enforcement entity that filed the theft report.

This bill would, however, authorize an investigator of the equine protection program to assist the law enforcement entity that filed the theft report in the theft investigation.

Ch. 460 (AB 406) Escutia. Medi-Cal: prosthetic and orthotic devices.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law, until January 1, 1994, requires the State Department of Health Services to implement a pilot program in which no treatment authorization requests shall be required for the provision of prosthetic devices, including replacement or repair of these devices that do not exceed $500, and of orthotic devices that do not exceed $250.

Existing law also requires the State Department of Health Services to report on the pilot demonstration program by December 31, 1993.

This bill would prohibit the department from imposing a requirement of a prior authorization for those devices commencing March 1, 1994, if the report contains a conclusion that the pilot demonstration program was cost-effective or the report on the pilot demonstration program is not submitted to the appropriate committees of the Legislature by December 31, 1993.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 461 (AB 445) Costa. Firearms: machineguns: Department of Corrections.

Existing law prohibits the manufacture, sale, transportation, or possession of a machinegun, as defined, except as specified. Existing law exempts from this prohibition the sale to, purchase by, or possession of machineguns by, among others, sheriffs' offices, city marshals' offices, and the Department of Justice.

This bill would create an exception to this prohibition for the Department of Corrections, as specified, marshals' offices, and district attorneys' offices.

Ch. 462 (AB 438) Burton. Insurance fraud.

Existing law makes it a misdemeanor or a felony for any automotive repair dealer or its employees or agents to knowingly offer or give any discount intended to offset a deductible required by a policy of insurance covering a motor vehicle for making repairs to the motor vehicle.

This bill would except from this provision cases in which the amount of the repairs has been determined by the insurer and the repairs are performed in accordance with that determination or in accordance with provided estimates that are accepted by the insurer.

Because this bill would change the definition of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 463 (AB 453) Solis. Postsecondary education: Student Opportunity and Access Program.

Existing law, which is to be repealed on January 1, 1995, establishes the Student Opportunity and Access Program, commonly known as the Cal-SOAP. Under existing law, the Cal-SOAP is administered by the Student Aid Commission, which apportions funds for the support of projects designed to increase the accessibility of postsecondary educational opportunities to low-income and ethnic minority elementary and secondary school students. These projects are designed primarily to (a) increase the availability of information for low-income and ethnic minority students on the existence of postsecondary schooling and work opportunities, and (b) raise the achievement levels of low-income and ethnic minority students so as to increase the number of high school graduates eligible to pursue postsecondary learning opportunities.

This bill would continue that existing law to January 1, 2000, by extending that repeal date.

The bill also would delete 2 obsolete reporting requirements imposed on the Student Aid Commission and would, instead, require the California Postsecondary Education Commission to periodically review and evaluate the Cal-SOAP as part of the commission's regular assessment of outreach programs in the state.

Ch. 464 (AB 502) Moore. Dentistry.

(1) Existing law, the Dental Practice Act, authorizes the Board of Dental Examiners of California to revoke or suspend the license of a dentist for unprofessional conduct, among other things. Under existing law applicable to dentists as well as other healing arts practitioners, unprofessional conduct includes the clearly excessive prescribing or administering of drugs or treatment, or the clearly excessive use of diagnostic procedures, or the clearly excessive use of diagnostic or treatment facilities, as determined by a prescribed standard. Existing law provides that any person who violates this provision regarding unprofessional conduct is guilty of a misdemeanor.

This bill would provide that, in addition, it is unprofessional conduct for a person licensed under the act to require, either directly or through an office policy or knowingly permit the delivery of dental care that discourages necessary treatment or permits clearly excessive, incompetent, grossly negligent, or unnecessary treatment or repeated

NOTE: Superior numbers appear as a separate section at the end of the digests.

negligent acts.

(2) Existing law requires the Department of Corporations to conduct periodically an onsite medical survey of the health delivery system of each health care service plan, as defined. Existing law requires the Commissioner of Corporations to notify the plan of deficiencies found by the team conducting the survey. Existing law requires reports of all surveys, deficiencies, and correction plans to be open to public inspection. Existing law prohibits the public disclosure of deficiencies if they are corrected within 30 days of the date the plan was notified.

This bill would require the board to provide to the commissioner a copy of any accusation filed with the Office of Administrative Hearings for a violation of the act relating to the quality of care of any dental providers of a plan. The bill would also require the commissioner to provide the plan and the executive officer of the board with a copy of information regarding the quality of care of dental providers obtained in the preparation of the survey that the commissioner determines demonstrates clearly excessive treatment, incompetent treatment, grossly negligent treatment, repeated negligent acts, or unnecessary treatment. The bill would provide that the disclosure of these reports would not operate as a waiver of confidentiality. The bill would provide that there shall be no liability on the part of, and no cause of action shall rise against, the state, board, department, commissioner, or any officer, agent, employee, consultant, or contractor of the state, board, or department for the release of any false or unauthorized information pursuant to these provisions, unless the release is made with knowledge and malice.

Ch. 465 (AB 523) Allen. Lease of county property.

Under existing law, a county board of supervisors may lease county owned property, when the lease duration does not exceed 5 years and the monthly rental does not exceed $2,000, by alternative bidding procedures. Existing law permits the board of supervisors, by ordinance, to authorize appropriate county officers to execute these leases.

This bill would increase the lease duration to 10 years and raise the limits of the monthly rent to which the procedures prescribed by this bill are applicable to $5,000. The bill would also permit the board of supervisors to sublease commercial and industrial buildings that the county leases as specified and would make that authorization inoperative on July 1, 1999. The bill would permit the board of supervisors to act by resolution, rather than ordinance, in authorizing county officers to execute leases pursuant to the bill.

Ch. 466 (AB 541) Cannella. State civil service: leaves of absence.

Existing law, relating to state civil service employees, specifies the circumstances under which an employee who was separated from his or her employment may be reinstated.

This bill states that at the termination of any temporary separation, except termination of a permanent or probationary employee by layoff and termination by displacement, the employee shall be reinstated to his or her former position unless some other reinstatement right is specified for the particular temporary separation.

Existing law describes various circumstances when state civil service employees may be granted a leave of absence without pay.

This bill would revise those provisions to conform to the right of reinstatement to the former position provision described above.

Ch. 467 (AB 573) Johnson. Industrial loan companies.

Existing law authorizes the Commissioner of Corporations to, by rule, order, or regulation, permit loans to be made or entered into at places in California other than designated by an industrial loan company in its certificate of authorization if those loans can be so made consistent with the purposes of the Industrial Loan Law.

This bill would delete the limitation that the loans be made or entered into at places in California and would additionally make that authorization applicable to loans and obligations solicited and acquired at places other than designated by an industrial loan company in its certificate of authorization, subject to those same conditions. It would

NOTE: Superior numbers appear as a separate section at the end of the digests.

require, in addition, a written request to the commissioner for approval to solicit and make loans and acquire obligations at a place of business other than designated in its certificate of authorization, subject to specified conditions and requirements.

Ch. 468 (AB 631) Cannella. State Teachers' Retirement System: compensation and salary.

The State Teachers' Retirement Law defines the terms "compensation" and "salary" through specified inclusions and exclusions.

This bill would revise various inclusions and exclusions and would specify that the definition is for the purposes of determining benefits and contributions. This bill would also prohibit the making of ad hoc adjustments to compensation when the purpose is to enhance retirement benefits.

Ch. 469 (AB 729) Speier. Financial transactions.

Existing law provides for the licensing of security broker-dealers and the regulation of agents by the Commissioner of Corporations.

Existing law authorizes the Commissioner of Corporations to take disciplinary action against a broker-dealer if, among other things, the broker-dealer is subject to any order of the Securities and Exchange Commission, the securities administrator of another state, a securities association, the Commodity Futures Trading Commission, or board of trade taking certain disciplinary action.

This bill would provide for discipline if the broker-dealer is or has been subject to any order of those entities. The bill would also authorize discipline for a violation of the California Commodity Law of 1990 or a violation of orders of the commission or various other entities. The bill would authorize the commissioner to immediately revoke the certificate of a broker-dealer that fails to comply with any currently effective order of the commissioner necessary for the protection of any investor, except as specified.

This bill would make similar changes in the provisions applicable to investment advisers.

This bill would require the commissioner to make available to the public, information with respect to the licensure status or disciplinary record of a broker-dealer or agent.

This bill would, except as specified, require a broker-dealer or agent upon request to deliver a written notice to any client when a new account is opened, stating that the above specified information may be obtained from the Department of Corporations.

This bill would require the commissioner to provide to the public, copies of the above specified information relating to disciplinary records or licensure status of a broker-dealer or agent and would provide that no liability or cause of action shall exist against the state, the department, or specified employees of the department for the release of false or unauthorized information, unless that release is done with knowledge or malice.

Under existing law, fees collected, and fines imposed, under the California Commodity Law of 1990 are deposited in the Commodity Merchant Account of the General Fund.

This bill would provide that those fees and fines are deposited in the Corporations Fund.

Under existing law, operative until January 1, 1994, with respect to any foreign savings associations subject to state or federal supervision, as specified, and any broker-dealer registered, as specified, those entities shall not be considered to be doing business or selling, taking, or soliciting savings accounts in this state by reason of engaging in certain specified activities.

This bill would delete the repeal date of that provision thus extending those provisions indefinitely. It would repeal prior law scheduled to become operative January 1, 1994.

Existing law provides that with certain exceptions, public records, as defined, are open to inspection by the public. Existing law exempts from disclosure, records contained in or related to specified applications, reports, communications, or information, filed with, or prepared by, or on behalf of, any state agency responsible for the regulation or supervision of the issuance of securities. Existing law provides that whenever a state or local agency discloses a public record which is otherwise exempt from disclosure, to any member of the public, that disclosure constitutes a waiver of the exemption, unless otherwise specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that the above waiver of exemption provision does not apply to records relating to any person that is subject to the jurisdiction of the Department of Corporations, if the disclosures are made to the person that is the subject of the records for the purpose of corrective action by that person, or if a corporation, to an officer, director, or other key personnel of the corporation for the purpose of corrective action, or to any other person to the extent necessary to obtain information from that person for the purpose of an investigation by the department.

Existing law provides that with certain exceptions, public records, as defined, are open to inspection by the public.

This bill would provide that any information reported to the North American Securities Administrators Association/National Association of Securities Dealers' Central Registration Depository and compiled as disciplinary records which are made available to the Department of Corporations through a computer system, shall constitute a public record.

Ch. 470 (AB 738) Escutia. Railroad rights-of-way.

Under existing law, every railroad corporation is granted the right-of-way for the location, construction, and maintenance of its necessary works, and for every necessary adjunct thereto, as specified.

This bill would require the Secretary of Business, Transportation, and Housing, in collaboration with other public agencies, to develop recommended procedures and guidelines for valuation of railroad rights-of-way, and to transmit those recommendations to the Legislature and Governor on or before March 1, 1994.

Ch. 471 (AB 756) Honeycutt. State contracts: financial statements.

The State Contract Act requires prospective bidders on contracts exceeding $3,000,000 to complete financial ability and experience questionnaires and statements and exempts the Department of Transportation contracts from that requirement.

This bill would require bidders in any case to submit that information but only when requested, and would delete the exemption of the Department of Transportation. The bill would require prequalification to be required of all prospective bidders to a contract whenever it is required of any bidder to the contract.

Ch. 472 (AB 796) Sher. Political Reform Act of 1974: slate mailers.

Existing provisions of the Political Reform Act of 1974 prohibit a slate mailer organization, as defined, from sending a slate mailer, as defined, unless the mailer includes, among other things, a notice to the voters, as specified, that indicates the document was prepared by the slate mailer organization, and that it is not an official party organization. The notice must contain a statement that appearance in the mailer does not necessarily imply endorsement of others in the mailer, nor does it imply endorsement of or opposition to any issues set forth in the mailer.

This bill would impose these requirements upon a committee primarily formed to support or oppose one or more ballot measures if it sends a slate mailer.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a ⅔ vote.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 473 (AB 815) Jones. Health facility construction: loan insurance.

Under existing law, the California Health Facility Construction Loan Insurance Law, the Office of Statewide Health Planning and Development is required to implement a loan insurance program for the construction, improvement, and expansion of public and nonprofit corporation health facilities, as defined. Existing law continuously appropriates the Health Facility Construction Loan Insurance Fund to the office for the purposes of the loan insurance program. Existing law limits the loans that may be authorized by the office, but authorizes the office to exceed the limitation if the need for financing results from earthquakes or other natural disasters.

This bill would also authorize the office to exceed the limitation to refinance a preexisting office-guaranteed loan, if the refinancing results in savings to the health facility and increases the probability that a loan can be repaid. The bill would constitute an appropriation by changing the purposes for which a continuously appropriated fund is expended.

Ch. 474 (AB 855) Tucker. Controlled substances: drug program fee.

Existing law imposes a drug program fee in an amount not to exceed $100 for each separate controlled substance offense, as specified, to be deposited by the county treasurer in a drug program fund and allocated by the administrator of the county's drug program to drug abuse programs in the schools and the community, subject to the approval of the board of supervisors, as specified.

This bill would increase that drug program fee to an amount not to exceed $150.

Ch. 475 (AB 960) Bates. Community care facilities: temporary license suspensions: administrative hearing.

Existing law prohibits the operation of a community care facility, as defined, without a valid license issued by the State Department of Social Services. Existing law authorizes the department to suspend or revoke the license of a community care facility based on specified grounds, and pursuant to certain administrative hearing procedures.

Existing law also authorizes the Director of Social Services to temporarily suspend a facility's license prior to any hearing when the action is necessary to protect residents from physical or mental abuse, abandonment, or other substantial threat to health or safety. Under existing law, the department is required to notify the licensee, upon service of an order of temporary suspension, of the right to an interim hearing.

This bill would also require the department to notify the licensee of the right to seek review of the department's action in the superior court.

Under existing law, a licensee may request an interim hearing by mailing or delivering a request to the department within 10 days after service of the order of temporary suspension. Under existing law, the department is required to obtain from the Office of Administrative Hearings, a date and time for the hearing that is within 5 working days of receipt of the request, and is required to notify the licensee of that date and time.

This bill would instead provide that the licensee may request a hearing by mailing or delivering the request to the Office of Administrative Hearings within 5 days of service of the order. This bill would require the Office of Administrative Hearings to set the time and date of the hearing for a date that is within 10 working days of receipt of the request, and to notify the licensee. This bill would also require the Office of Administrative Hearings to post a public notice of the hearing at a prescribed location.

Existing law requires that evidence at the hearing be by affidavit only, and authorizes the evidence to be submitted upon information and belief.

This bill would delete these requirements and would instead require that the evidence be limited to the department's accusation and order of temporary license suspension.

This bill would provide that the department shall be deemed to have abused its discretion in issuing an order of temporary license suspension only if the accusation and order fail to allege specified conditions.

Existing law requires child day care facilities to pay prescribed fees for the issuance of an original license or for processing the application for a license. Under existing law, these fees also apply to any facility operated pursuant to a franchise agreement or other contract.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete this provision and would instead provide that the fees also apply to any for-profit corporation, person, firm, association, or partnership holding 25 or more day care center licenses.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 476 (AB 1002) Brulte. Redevelopment agencies: fiscal statements.

(1) Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in those communities. The Community Redevelopment Law requires each redevelopment agency to present an annual report to its legislative body within 6 months of the end of the agency's fiscal year. This annual report is required to contain, among other things, a fiscal statement, containing specified financial data, for the previous fiscal year. This fiscal statement is required to include, among other things, the amount of tax increment revenues paid to a taxing agency, other than a school or community college district, pursuant to a specified statute.

This bill would impose a state-mandated local program by requiring a redevelopment agency to also include in its fiscal statement the amount of tax increment revenues spent on behalf of a taxing agency, other than a school or community college district, pursuant to the specified statutes, and to itemize this amount per each individual capital improvement.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 477 (AB 1059) Murray. Redevelopment agencies: Low and Moderate Income Housing Fund.

(1) Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in those communities. Under the existing Community Redevelopment Law, a specified amount of tax increment revenues that are allocated to a redevelopment agency are required to be held in a separate Low and Moderate Income Housing Fund and used by the agency for the purpose of increasing, improving, and preserving the community's supply of low-income and moderate-income housing available at affordable cost to persons and families of specified income levels.

This bill would, notwithstanding any other provision of law, authorize a redevelopment agency of a city of less than 100,000 population that sustained property damage of more than $50,000,000 during the civil unrest that occurred between April 29, 1992, and May 3, 1992, and that has adopted a housing element meeting specified provisions of existing law, to set aside into the Low and Moderate Income Housing Fund an amount that is less than would be otherwise required, as specified.

The bill would define a deficit, in relation to the agency's deposit, and would impose a state-mandated local program by requiring the agency to adopt a plan to eliminate a deficit, as defined. The bill would provide that the amount of the deficit, as defined, shall be used to refinance and make payments on specified bonds, and that the bond proceeds shall be used for a specified purpose.

(2) The act would declare that it is to take effect immediately as an urgency statute.

Ch. 478 (AB 1089) Knowles. Rail transit projects: funding.

Under the Costa Rail Transportation Improvement Act, a bond act approved in 1990 and one to be submitted to the voters in 1994 each provide for the issuance of $1,000,000,000 in general obligation bonds, with the proceeds of those bonds, upon appropriation by the Legislature, to be available for capital improvements and acquisition of rolling

NOTE: Superior numbers appear as a separate section at the end of the digests.

stock for intercity rail, commuter rail, and urban rail transit on specified routes and in specified corridors.

This bill would include Jackson-Sacramento and Jackson-Stockton among the commuter rail transit projects eligible for funding from the proceeds of bonds issued under the approved 1990 bond act and the proposed 1994 bond act.

Ch. 479 (AB 1113) O'Connell. Vehicles: towing.

(1) Existing law provides that any person who "improperly causes a vehicle to be towed or removed," as defined, in order to create or acquire a lienhold interest, or who violates any other related provisions, as specified, shall forfeit all claims for towing, removal, or storage of the vehicle, and shall be liable for damages, attorney's fees, and court costs.

This bill would revise the definition of "improperly causes a vehicle to be towed or removed."

(2) Existing law defines "tow truck" for purposes of the Vehicle Code to mean, generally, a motor vehicle that has been altered or designed and equipped for, and primarily used in the business of, transporting vehicles by specified means or is otherwise primarily used to render assistance to others.

This bill would enlarge the scope of that definition to include a trailer for hire that is being used to transport a vehicle. Because existing law makes it a crime to violate, or fail to comply with provisions of the Vehicle Code, specifically applicable to tow trucks, the revision of the term "tow truck" by this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

(3) Existing law requires the lettering and numbers on tow trucks and automobile dismantlers' tow vehicles to be not less than 2½ inches in height.

This bill would instead require the lettering and numbers to be not less than 2 inches in height.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 480 (AB 1143) Campbell. State funds: California Theatre.

Existing law, Section 4 of Chapter 1241 of the Statutes of 1989, among other things, appropriated $309,000 from the Public Resources Account in the Cigarette and Tobacco Products Surtax Fund to the Department of Parks and Recreation for a grant to the City of Pittsburg for the relocation and restoration costs of Cornwall Station.

This bill would reappropriate that $309,000, or, if the appropriation has lapsed, appropriate that amount from that account, to the department for a grant to the city for the acquisition and restoration of the California Theatre.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 481 (AB 1169) Burton. Vehicles: removal.

Existing law authorizes specified peace officers and city and county employees to remove vehicles from highways under various specified circumstances.

This bill would also permit the removal, by peace officers and specified employees of a city, county, or city and county, of any vehicle parked on a highway or on public land when it appears that the primary purpose of parking the vehicle at that location is to advertise to the public the private sale of that vehicle; within the past 30 days, the vehicle is known to have been previously issued, a notice of parking violation, under local ordinance, which was accompanied by a specified notice; the notice of parking violation was issued at least 24 hours prior to the removal of the vehicle; and the city, county, or city and county has authorized the removal of the vehicle by resolution or ordinance.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 482 (AB 1231) Umberg. Crime: false financial statements.

(1) Under existing law, any person who knowingly makes or causes to be made, as

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified, any false statement in writing, with the intent that it shall be relied upon with respect to the financial condition, or means or ability to pay, of himself, herself, or any other person, firm, or corporation, as specified, for the purpose of procuring for the benefit of himself, herself, or specified others, among other things, the delivery of personal property, the payment of cash, the making of a loan or credit, or the extension of a credit is guilty of a public offense, punishable as specified.

(2) Existing law provides that any person who, knowing that a false statement in writing has been made with respect to the financial condition or means or ability to pay of himself, herself, or specified others, as specified, procures, upon the faith of that false statement, for the benefit of himself, herself, or specified others, any of the benefits specified in (1) is guilty of a public offense, punishable as specified.

(3) Under existing law, any person who, knowing that a statement in writing has been made with respect to the financial condition or means or ability to pay of himself, herself, or specified others, later represents in writing that the statement if again made would still be true, when in fact that statement if then made would be false, and procures upon the faith of that false statement for the benefit of himself, herself, or specified others any of the benefits specified in (1), is guilty of a public offense, punishable as specified.

(4) This bill would provide that a person, other than the loan applicant, who commits a public offense under (1), (2), or (3) in connection with an application for a loan to be secured by real property is guilty of a misdemeanor, punishable by a fine not exceeding $10,000, or by imprisonment in a county jail not exceeding one year, or by both the fine and imprisonment. The bill also would require the court to determine the amount of any economic loss to a victim caused by the criminal conduct of the defendant and, to the extent possible, order the defendant to make restitution to the victim in that amount. By creating a new crime, this bill would establish a state-mandated local program.

(5) This bill also would provide that an applicant for a loan to be secured by real property who violates (1), (2), or (3) is guilty of a misdemeanor, punishable by a fine not exceeding $10,000, or by imprisonment in a county jail not exceeding 6 months, or by both the fine and imprisonment. The bill also would provide that its provisions shall not be construed to preclude the application of any other law that may apply to a transaction. By creating a new crime, this bill would establish a state-mandated local program.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 483 (AB 1252) Mountjoy. Workers' compensation: judges.

Existing law authorizes the Workers' Compensation Appeals Board to appoint judges.

Existing law requires workers' compensation judges and settlement conference referees to subscribe to the California Code of Judicial Conduct adopted by the Conference of California Judges and provides that they shall not otherwise, directly or indirectly, engage in conduct contrary to that code.

This bill would require the Administrative Director of the Division of Workers' Compensation to adopt regulations to enforce that requirement, taking into account specified criteria.

The bill would replace the term "workers' compensation judge" in these provisions of existing law with the term "workers' compensation referee."

The bill would provide that honoraria or travel otherwise allowed in connection with any public or private conference, convention, meeting, social event, or like gathering, the cost of which is significantly paid for by attorneys who practice before the board, may not be accepted unless the administrative director has provided prior written approval.

This bill would also require the administrative director to require continuing education for workers' compensation referees. The bill would become operative only if both AB 110 and AB 1300 are also enacted.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 484 (AB 1255) Costa. Municipal courts: Fresno and Kings Counties.

(1) Existing law provides for the election of municipal court judges in Kings County by division, as specified.

This bill would provide that a candidate for municipal court judge in a particular division may reside in any other division in the Kings County Municipal Court District.

(2) Existing law establishes various municipal court districts and prescribes the number, compensation, and qualifications of the judges, officers, and employees thereof.

This bill would establish the Central Valley Municipal Court Judicial District, with 8 divisions, each having one judge, as specified, operative upon the consolidation of specified justice court districts by the Board of Supervisors of Fresno County; would prescribe the number, compensation, and qualifications of the officers and employees thereof; and would make related changes with respect to the adoption of local rules of court, and the selection of trial jurors in the district.

Ch. 485 (AB 1332) Gotch. Vehicles: forfeiture.

Under the Red Light Abatement Law, every building or place used for the purpose of, among other things, prostitution, and every building or place in, or upon, which acts of prostitution are held or occur is a nuisance which shall be enjoined, abated, and prevented, and for which damages may be recovered, whether it is a public or private nuisance.

Existing law also provides for the forfeiture of motor vehicles when used as an instrument to facilitate certain unlawful acts involving controlled substances or when unlawfully discharging or brandishing a firearm from, or at, an occupied vehicle under specified circumstances.

This bill would additionally authorize the County of San Diego, any city in that county, and the City of Oakland to adopt an ordinance establishing a 5-year pilot program implementing procedures for declaring any motor vehicle a public nuisance when used in the commission of an act of prostitution, as specified, and there is a conviction of the underlying offense, except in specified circumstances. The bill would also allow the ordinance to include procedures, as specified, to enjoin and abate the declared nuisance.

The bill would also set forth certain legislative findings and declarations.

Ch. 486 (AB 1359) Karnette. Community college district governing boards: elections.

Existing law authorizes the county committee on school district organization, upon petition of the governing board of any community college district, to provide for the establishment, rearrangement, or abolishment of trustee areas in any community college district. Under existing law, the resolution of the county committee approving a proposal to establish or abolish trustee areas constitutes an order of election and the proposal is required to be presented to the electors of the district. Under existing law, if a proposal for the establishment of trustee areas is approved by a majority of the voters voting at the election, any affected incumbent board member is required to serve out his or her term of office.

This bill would, notwithstanding any other provision of law, authorize the Long Beach Community College District to establish trustee areas that would be effective upon the expiration of the term of the member having the shortest remaining unexpired portion of a term on the date of the election approving the establishment of trustee areas, or the date of expiration of the term of any member elected to the board during the year of the election approving the establishment of trustee areas, whichever is shorter. The bill would specify that the term of any member serving on the board on the date of the election approving the establishment of trustee areas be shortened, as specified.

Ch. 487 (AB 1375) Collins. Schools: interscholastic athletics.

Existing law, until July 1, 1994, requires the State Department of Education, among other things, to exercise general supervision over courses of physical education in elementary and secondary schools. On and after July 1, 1994, the state department will

NOTE: Superior numbers appear as a separate section at the end of the digests.

continue to have this responsibility and will additionally be required to exercise general control over all athletic activities of the public schools.

This bill would enact the "B.T. Collins Interscholastic Athletic Act of 1993" and would delay the department having this additional responsibility to exercise general control over all athletic activities of the public schools until July 1, 1997.

Existing law, until July 1, 1994, states the intent of the Legislature that the California Interscholastic Federation ("CIF") implement specified policies regarding interscholastic athletics activities.

This bill would extend the operation of this provision until July 1, 1997. The bill would also extend from July 1, 1994, until July 1, 1997, specified authority of the department and school district governing boards with regard to interscholastic athletics.

This bill would require the CIF to complete a strategic long-range plan not later than January 1, 1995, as specified. The bill would require the department to report to the Legislature on or before January 1, 1996, on that plan and on other specified related issues.

Ch. 488 (AB 1398) Morrow. Driving offenses.

(1) Existing law requires a court to allow a defendant to elect to have a trial by written declaration for alleged infraction offenses of the Vehicle Code or any local ordinance adopted pursuant to that code, with specified exceptions, if the defendant resides more than 100 miles from the court or jurisdiction where the citation was issued. Existing law authorizes, but does not require, that election to be offered to a defendant who resides less than 100 miles from the court or jurisdiction where the citation was issued.

This bill would require the election to be offered to a defendant as specified above without regard to the distance from his or her residence to the court or jurisdiction where the citation was issued and the bill would require the submission of bail along with the written declaration. Because the bill would impose additional duties upon the courts, it would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 489 (AB 1399) Lee. Surrogate parents: appointment by educational agency.

Existing law requires a local educational agency to appoint a surrogate parent for a child in regard to the educational needs of the child when no parent for the child can be identified; when the local educational agency cannot discover the location of a parent; or when the child is adjudicated a dependent or ward of the court upon referral of the child to the local educational agency for special education and related services, or in cases where the child already has a valid individualized education program.

This bill would require the local educational agency to select, as a first preference, a relative caretaker, foster parent of the child, or court appointed special advocate as the surrogate parent, or, if these persons are unable or unwilling to be the surrogate parent, to select the surrogate parent of its choice. It would also require the local educational agency to appoint another surrogate parent if a child has been moved from the home of a relative caretaker or foster parent who has been appointed as a surrogate parent.

By requiring a higher level of service of local educational agencies in the appointment of surrogate parents, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new

NOTE: Superior numbers appear as a separate section at the end of the digests.

program or higher level of service that require reimbursement pursuant to these constitutional and statutory provisions.

Ch. 490 (AB 1407) Morrow. Tuition and fee waivers for dependents of veterans.

(1) Existing law prohibits any state-owned college, university, or other school from charging tuition or incidental fees to certain dependents of veterans, including any child of a veteran who has a service-connected disability, has been killed in service, or has died of a service-connected disability, where the annual income of the child, including the value of any support received from a parent, does not exceed $5,000.

This bill would, instead, prohibit the charging of tuition or fees, including enrollment fees, registration fees, differential fees, or incidental fees where the child's annual income, as specified, does not exceed $7,000. The bill would make this provision operative July 1, 1994.

The bill would expressly make that prohibition applicable to community colleges. To the extent this bill would impose additional duties on community colleges, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 491 (AB 1423) Conroy. Child abuse index information adoptions.

Existing law, effective January 1, 1994, specifies procedures for agency adoptions which require the State Department of Social Services or a licensed adoption agency to require each person filing an application for adoption to be fingerprinted and requires the department to secure from an appropriate law enforcement agency any criminal record of that person to determine whether the person has ever been convicted of a crime other than a minor traffic violation. The department or licensed adoption agency is also authorized to secure the person's full criminal record, if any.

Existing law also sets forth procedures for independent adoptions in which neither the department nor an agency licensed by the department is a party to, or joins in, the adoption petition. These procedures require, among other things, that a person desiring to adopt a child file a petition in the county in which he or she resides and require the Department of Social Services or a delegated county adoption agency to investigate the proposed independent adoption and make recommendations to the court. These procedures also provide for provisions similar to those above which require the department or the delegated county adoption agency to require each person filing an application for adoption to be fingerprinted and to secure the criminal record, as specified.

Existing law also requires the Department of Justice to make available to the State Department of Social Services, or the county licensing agencies which have contracted with the state for the performance of specified duties related to community care facilities and day care facilities, information maintained in a child abuse index concerning any person who is an applicant for licensure or any adult who resides or is employed in the home of an applicant for licensure, who is an applicant for employment in a position having supervisorial or disciplinary power over a child or children, or who will provide 24-hour care for a child or children in a residential home or facility, as specified.

This bill would authorize a licensed adoption agency, defined to include an agency licensed by the department to provide adoption services, including a licensed county adoption agency and a licensed private adoption agency, to receive, and would require the Department of Justice to make available to these agencies, child abuse index information concerning any person who submits an application for adoption. This bill would authorize the Department of Justice to charge a fee, as specified, for providing the information.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 492 (AB 1427) Peace. Escrow Agents' Fidelity Corporation.

Existing law provides that indemnification of escrow company members of Fidelity Corporation against loss by Fidelity Corporation shall be provided by a fidelity fund established by the corporation, a bond or insurance policy approved by the Commissioner of Corporations, or a combination of a fidelity fund and a bond or policy.

This bill would make the coverage of the combination of a fidelity fund and bond or insurance policy subject to other provisions of law specifying maximum coverage for members of Fidelity Corporation, as specified.

Existing law authorizes Fidelity Corporation to deny, revoke, or suspend a certificate of any person employed by an escrow agent based upon specified grounds. Existing law authorizes Fidelity Corporation to submit the fingerprints of applicants to the Department of Justice for the purpose of obtaining a criminal history information report.

This bill would also permit Fidelity Corporation to submit the fingerprints of officers and employees for the purpose of requesting and obtaining a report from the department.

Existing law provides that Fidelity Corporation is subrogated to the rights, claims, and remedies of a member up to the amount paid by the corporation and the insurer on behalf of the member. In a subrogation action the corporation has the first right to the proceeds of any judgment or settlement obtained against the subrogees up to a specified amount.

This bill would instead refer to principal obligors and any other party who is held liable jointly or severally, in whole or in part, with the principal obligors, rather than to subrogees, for those purposes.

Existing law authorizes Fidelity Corporation to conduct an examination or investigation of the business practices of a member's handling and processing of trust obligations or of the member's failure to pay an assessment, as specified.

This bill would provide that the investigation or examination reports prepared by duly designated representatives of the board of the Escrow Agents' Fidelity Corporation shall not be public records.

Existing law requires all members to annually furnish to the Commissioner of Corporations and Fidelity Corporation, the schedule of its escrow liability for each of its licensed locations, as specified.

This bill would require the member to also provide a list of officers, directors, stockholders, trustees, agents, managers, and employees.

Existing law requires any person subject to the Escrow Law who knows or should have known of a person's involvement in an abstraction or misappropriation of money, funds, trust obligations, or property deposited with a licensed escrow agent to report the abstraction or misappropriation in writing to the commissioner.

This bill would require that person to also provide that report in writing to Fidelity Corporation.

Ch. 493 (AB 1428) Bornstein. State government: hours and days of business: fairs and associations.

Existing law sets forth the hours and days of business during which state agencies are required to be kept open, subject to certain conditions.

This bill would exempt specified types of fairs and associations from these provisions.

Ch. 494 (AB 1430) Conroy. Stepparent adoption fees.

Existing law provides that a stepparent adopting a child of his or her spouse shall be liable for all reasonable costs incurred in connection with the stepparent adoption, up to a maximum of $200, but that this fee may be deferred, waived, or reduced by the probation officer, qualified court investigator, or county welfare department when the payment would cause economic hardship to the prospective adoptive parent which would be detrimental to the welfare of the adoptive child.

This bill would change the $200 limitation to $700 and authorize the court, as well as the above enumerated officials, to defer, waive, or reduce the fee.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 495 (AB 1459) Moore. Common carriers: vessels.

Under existing law, the Public Utilities Commission regulates common carriers, including vessels, as defined. Existing law requires "for-hire vessel operators," as defined, to procure accident liability protection, as specified.

This bill would exclude from the definition of "for-hire vessel operators," for the purposes of accident liability protection, common carriers by vessels, and would recast that definition.

This bill would also permit the commission, in the exercise of the jurisdiction conferred upon it by law, and consistent with the state and federal constitutions regarding impairment of the obligation of contracts, to grant certificates of public convenience and necessity, make decisions and orders, and prescribe rules affecting vessel common carriers notwithstanding the provisions of any ordinance, permit, or franchise of any city, county, or other political subdivision of this state, and would provide that in the case of conflict between any certificate, decision, order, or rule of the commission and any ordinance, permit, or franchise, the certificate, decision, order, or rule of the commission shall prevail.

Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 496 (AB 1817) McDonald. PERS school members: compensation reductions: service credit.

An existing provision of the Public Employees' Retirement Law that is repealed on January 1, 1995, authorizes contracting agencies that are forced to reduce the compensation of their employees as a direct result of a fiscal emergency and in a manner prescribed by the board, to preserve the retirement benefits of their employees at a level no lower than that achieved prior to the reduction.

This bill would make that provision applicable also to county superintendents of schools, school districts, and community college districts and would extend the repeal date from January 1, 1995, to January 1, 1996.

This bill would also authorize county superintendents of schools, school districts, and community college districts to provide that for all retirement purposes for school members in a personal leave program, credit for service shall be based on the amount of service that would have been accredited had the member not been in the personal leave program. This provision would be repealed on January 1, 1996.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 497 (SB 576) Greene. Curriculum: social science.

Existing law requires the State Department of Education to incorporate, into publications that provide examples of curriculum resources for teacher use, those materials developed by private sources that are age-appropriate and consistent with the subject frameworks on history and social science that deal with human rights violations, as specified.

This bill would require that materials developed by private sources that are age-appropriate and consistent with the subject framework on social science that deals with civil rights be incorporated into those publications.

Ch. 498 (AB 2081) Takasugi. Sales and use taxes: mailing lists.

The existing Sales and Use Tax Law imposes a tax on the sale of, or the storage, use, or other consumption in this state of, tangible personal property and provides various exemptions from that tax.

This bill would provide an exemption from those taxes for mailing lists, as defined, if a contract restricts the purchaser to a single use of the mailing list.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but would become operative as provided.

Ch. 499 (SB 111) Presley. Regional transit services: law enforcement.

Existing law, with regard to a public transportation system, as defined, specifies prohibitions against, among other things, the evasion of the payment of fares.

This bill would authorize a local or regional transit agency or joint powers agency operating a rail service pursuant to specified provisions in the Public Utilities Code to authorize by contract designated persons as conductors performing fare inspection duties who are employed by a railroad corporation that operates public rail commuter transit services for that agency to act as its agent in the enforcement of those laws specified above with regard to the evasion of the payment of fares if they complete specified training that shall be provided by the authorizing agency. This bill would provide that the employees acting as agents pursuant to this provision are public officers, not peace officers, have no authority to carry firearms or any other weapons, and may not exercise the powers of arrest of a peace officer while performing the duties authorized in these provisions.

This bill also would provide that, notwithstanding any other provision proposed by this bill, the primary responsibility of a conductor of a commuter passenger train shall be functions related to safe train operation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 500 (SB 121) Russell. Subdivision maps.

(1) Existing law, repealed by its own terms January 1, 1994, conclusively presumes specified parcels of subdivided land creating fewer than 5 parcels to be lawfully created pursuant to the Subdivision Map Act if at the time of the creation of the specified parcel there was compliance with any local ordinance or there was no local ordinance in effect regulating the division of land creating fewer than 5 parcels.

Existing law, as of January 1, 1994, will conclusively presume specified parcels of subdivided land creating fewer than 5 parcels to be lawfully created pursuant to the Subdivision Map Act only if there was no local ordinance regulating that type of division.

This bill would extend to January 1, 1995, the repeal date of the provisions that would have been repealed on January 1, 1994.

(2) Under existing law, any person owning real property, or a vendee of that person pursuant to a contract of sale of the real property, may request, and a local agency is required to determine, whether the real property complies with the Subdivision Map Act and local ordinances enacted pursuant thereto. If a local agency determines that the real property is not in compliance with that act or local ordinances enacted pursuant thereto, it is required under existing law to issue a certificate of compliance or a conditional certificate of compliance, subject to the imposition of any conditions that would have been applicable at the time the applicant acquired his or her interest in the property.

Existing law further provides that a recorded final map, parcel map, or official map constitutes a certificate of compliance with respect to the parcels of real property described therein.

Existing law, repealed by its own terms January 1, 1994, provides that an approved certificate of exception also constitutes a certificate of compliance with respect to the parcels of real property described therein.

This bill would continue in effect indefinitely the provisions which would be repealed on January 1, 1994.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 501 (SB 160) Kopp. Transportation: transit operations: funding.

Existing law requires the Metropolitan Transportation Commission to withhold allocations of operating funds from the Transportation Planning and Development Account in the State Transportation Fund to transit operators that have not made reasonable efforts to implement specified productivity improvements, and prohibits the commission from allocating any funds after January 1, 1994, unless the Legislature either extends that date or enacts new eligibility standards for operators subject to the jurisdiction of the commission.

This bill would delete that prohibition.

The bill would make other clarifying changes in existing law.

Ch. 502 (SB 177) Boatwright. Probation.

Existing law, in any case in which the defendant is convicted of an offense and granted probation, authorizes the court to make a determination of the ability of the defendant to pay all or a portion of the reasonable cost of probation and of conducting the presentence investigation and preparing the presentence report, as specified.

This bill would extend this provision to apply to any case in which the defendant is the subject of a preplea investigation and report with regard to the reasonable cost of conducting any preplea investigation and preparing any preplea report, as specified.

Existing law, under these provisions, requires the court to order the defendant to appear before a county officer designated by the court to make an inquiry into the ability of the defendant to pay. Existing law gives the defendant the right to a hearing regarding the defendant's ability to pay, as specified. Existing law, upon a finding that the defendant has the ability to pay all or a portion of the costs, authorizes the court to set the amount to be reimbursed and order the defendant to pay that sum to the county, as specified, or authorizes the court to order, with the consent of the defendant, the probation officer to set the amount of payment, not to exceed the maximum amount set by the court, and the manner in which the payment shall be made to the county.

This bill, instead, would authorize the probation officer, or his or her authorized representative, to make a recommendation to the court of the ability of the defendant to pay all or a portion of these costs. This bill would require the probation department of each county to develop a payment schedule for the reimbursement of the costs of preplea or presentence investigations based on income to be approved by the presiding judges of the municipal and superior courts. This bill also would require the probation department to inform the defendant that the recommendation is not final until ordered by the court and that the defendant is entitled to a hearing if the defendant does not agree with the recommendation. This bill would entitle the defendant to a hearing, as specified, for the court to determine the amount of payment and the manner in which the payments shall be made to the county if the defendant does not agree with the recommendation of the probation officer.

This bill would incorporate additional changes in Section 1203.1b of the Penal Code proposed by AB 306 or AB 309, or both, to be operative only if AB 306 or AB 309, or both, and this bill are chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

This bill would incorporate additional changes in Section 1203.1b of the Penal Code proposed by AB 392.

Ch. 503 (SB 194) Hughes. Local agencies: employees: whistleblowing.

(1) Existing law prohibits a local agency officer, manager, or supervisor from taking a reprisal action through any act of intimidation, restraint, coercion, or discrimination against any employee or applicant for employment who files a complaint with a local agency that discloses information regarding gross mismanagement or a significant waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety. Existing law defines "reprisal action" to mean any act of intimidation, restraint, coercion, or discrimination against any employee, or applicant for employment, who files a complaint pursuant to these provisions.

This bill would include the taking of any disciplinary action against an employee within the definition of reprisal action for purposes of these provisions. The bill would

NOTE: Superior numbers appear as a separate section at the end of the digests.

also include the firing of an employee within the definition of "disciplinary action" for purposes of these provisions. To the extent that this change would expand a local agency's definition of discipline under its personnel rules and regulations, this bill would impose a state-mandated local program.

(2) The bill would also make a technical, nonsubstantive change.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 504 (SB 286) Presley. Insurance: local agency building or construction contracts.

Existing law prohibits, with respect to competitively bid local public agency building or construction contracts, certain practices relating to insurance or surety requirements. Existing law exempts from these prohibitions the construction of any exclusive public mass transit guideway project in specified counties, and any exclusive public mass transit guideway project undertaken by the San Francisco Bay Area Rapid Transit District.

This bill also would exempt any water, wastewater, or reclamation project undertaken by a public agency serving a population exceeding 250,000, any exclusive public water storage or conveyance facility undertaken by a metropolitan water district that was organized under the Metropolitan Water District Act, any county medical center within San Bernardino County or Riverside County, or any construction project undertaken by the Harbor Department of the City of Los Angeles.

This bill would delete an obsolete exemption with respect to certain projects under design or construction on August 4, 1967.

Ch. 505 (SB 327) Kelley. Riverside County employees: hiring requirements.

Existing law requires that a criminal record be obtained for administrators and staff persons having contact with clients of various types of facilities licensed by the State Department of Social Services.

This bill would permit Riverside County to require that specified prospective county employees be fingerprinted, and to use the fingerprints to obtain a record of criminal convictions for each prospective employee from an appropriate law enforcement agency. It would, however, specify conditions under which information obtained by the county pursuant to the bill could be used in making employment decisions.

The bill would specify that its provisions shall not be construed to permit a county to avoid compliance with any requirements of law or regulations.

The bill would repeal its provisions on January 1, 1996.

Ch. 506 (SB 343) Morgan. Community colleges: letting of unneeded property: employment qualifications.

(1) Under existing law, the governing board of a community college district may let buildings, grounds, or space therein not needed for school classroom buildings, upon terms and conditions agreed upon by the governing board and lessee, for a period not exceeding 5 separate or consecutive calendar days or portions thereof in each fiscal year.

This bill would permit the governing board of a community college district to, instead, let buildings, grounds, or space therein for a period of more than 5 days but less than 5 years, as determined by the governing board, upon the condition that the agreement shall be subject to renegotiation and may be rescinded after 60 days' notice to the lessee if the governing board determines at any time during the term of the agreement that those facilities are needed for academic activities. The bill would provide that the fair market value of the lease of any buildings, grounds, or space therein, together with any personal property located thereon, shall not exceed $25,000, as certified by the governing

NOTE: Superior numbers appear as a separate section at the end of the digests.

board, and would require the governing board to provide an explanation of fair market value, as specified. The bill would also specify that the revenues derived pursuant to the agreement shall be for the exclusive use of the community college district whose facilities are the basis of the agreement, that the revenue shall be used to supplement, but not supplant, any state funding, and that the facilities shall be included as space actually available for use by the college in any calculations related to any plan for capital construction submitted to the Board of Governors of the California Community Colleges, as specified.

The bill would require public notice, as specified, of a governing board's intent to let district property.

The bill would specify that the authority granted to a governing board of a community college district pursuant to the bill would not apply to the letting of an entire campus. The bill would, in addition, require that the use of any buildings, grounds, or space therein, together with any personal property located thereon, let by the governing board be consistent with all applicable zoning ordinances and regulations.

(2) Existing law prescribes minimum qualifications for the faculty and administrative staff of community colleges.

This bill would generally require the board of governors to adopt regulations concerning the minimum qualifications for employment in the community colleges as a faculty member and as an educational administrator, among other specified employees.

(3) Under existing law, the board of governors is required to adopt regulations setting forth a process authorizing local governing boards to employ faculty members, instructional administrators, and student services administrators who do not meet specified minimum qualifications.

This bill would, instead, require the board of governors to adopt regulations authorizing local governing boards to employ faculty members and educational administrators who do not meet the specified minimum qualifications.

(4) Existing law establishes the minimum degree requirement for tenure as a community college faculty member as a bachelor's degree, or equivalent from an accredited institution, or an equivalent foreign degree, as determined by the board of governors, except that in the case of vocational faculty the minimum degree requirement for tenure does not commence until January 1, 1995.

This bill would delete the requirement that the board of governors determine whether a particular degree is equivalent to a bachelor's degree and would specify that the minimum degree requirement for tenure for vocational faculty would commence January 1, 1995, but only for persons hired on or after that date.

Ch. 507 (SB 416) Beverly. Cooperative corporations: physicians and surgeons.

Existing law authorizes unincorporated interindemnity or reciprocal or interinsurance contracts between members of a cooperative corporation whose members consist only of physicians and surgeons which contracts indemnify solely in respect to medical malpractice claims against members.

This bill would authorize interindemnity, reciprocal, or interinsurance contracts with respect to certain other claims in addition to medical malpractice claims, as specified, and would make related changes.

Ch. 508 (SB 545) Killea. Corporations: directors.

Existing law provides for the Secretary of State to file articles of incorporation and other corporate records in his or her office.

This bill would require the Secretary of State, by January 1, 1995, to develop and maintain a registry of distinguished women and minorities available to serve on boards of directors of corporations.

The bill would require the Secretary of State to make information contained in a reasonable number of registrants' transcripts available to corporations. The bill would authorize the secretary to grant access to a reasonable number of registrants' transcripts to other persons for certain purposes and to businesses providing data base access or search services, as specified.

The bill would also require the Secretary of State to charge fees for registering with

NOTE: Superior numbers appear as a separate section at the end of the digests.

and accessing the information in the registry, as specified, which fees shall be deposited into the Secretary of State's Business Fee Fund. The bill would require the secretary to report to the Legislature on the extent to which the registry has helped women and minorities progress toward achieving parity in corporate board appointments or elections, as specified.

The bill would state legislative intent.

Ch. 509 (SB 564) Alquist. Highway carriers: rates.

Existing law directs the Public Utilities Commission to require specified highway carriers for whom the commission does not establish minimum rates to pay specified reduced fees, and authorizes the commission to increase the fees on other carriers whose minimum rates are regulated up to a maximum of ½ percent of reported gross operating revenue, if necessary, to maintain adequate financing. The fees are deposited in the Transportation Rate Fund and are continuously appropriated to the commission for specified regulatory purposes.

This bill would permit the commission to increase these fees on carriers for whom the commission establishes minimum or maximum rates, thereby making an appropriation.

The bill would state that its provisions are declaratory of existing law.

Ch. 510 (SB 665) Russell. Child abuse and neglect reports.

(1) The Child Abuse and Neglect Reporting Act currently requires any child care custodian, as defined, health practitioner, employee of a child protective agency, or child visitation monitor who has knowledge of or observes a child, in his or her professional capacity or within the scope of his or her employment, whom he or she knows or reasonably suspects has been the victim of child abuse, to report the known or suspected child abuse to a child protective agency immediately or as soon as practically possible by telephone, and to prepare and send a written report thereof within 36 hours of receiving the information concerning the incident. Existing law provides that a violation of this reporting provision is a misdemeanor.

This bill would add animal control officers, humane society officers, and firefighters to the persons required to report known or suspected instances of child abuse to a child protective agency pursuant to this provision. This bill would impose a state-mandated local program by expanding the scope of an existing crime and by imposing new duties on public officials of local agencies deemed to be subject to the reporting requirement under this bill.

(2) Existing law provides that, on and after January 1, 1985, any person who enters into employment as a child care custodian, health practitioner, or with a child protective agency, prior to commencing employment, and as a prerequisite to employment, shall sign a statement, as specified, to the effect that he or she has knowledge of the provision in (1) above and will comply therewith.

This bill would add animal control officers, humane society officers, and firefighters to the list of persons required to sign a statement pursuant to this provision. This bill would impose a state-mandated local program by requiring public officials of local agencies to comply with the statement requirement under this bill.

(3) Existing law provides that no child care custodian, health practitioner, employee of a child protective agency, child visitation monitor, or commercial film and photographic print processor who reports a known or suspected instance of child abuse shall be civilly or criminally liable for any report required or authorized by law. It also provides that any child care custodian, health practitioner, employee of a child protective agency, or child visitation monitor who, pursuant to a request from a child protective agency, provides the requesting agency with access to the victim of a known or suspected instance of child abuse shall not incur civil or criminal liability as a result of providing the access.

Existing law also permits a child care custodian, health practitioner, employee of a child protective agency, child visitation monitor, or commercial film and photographic print processor to present a claim to the State Board of Control for reasonable attorneys' fees not exceeding $50,000 incurred in any action against that person for making a report required or authorized by law, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would add animal control officers, humane society officers, and firefighters to the list of persons who are provided immunity from civil or criminal liability and who may present a claim for reimbursement of reasonable attorneys' fees to the State Board of Control pursuant to these provisions.

(4) For purposes of the Child Abuse and Neglect Reporting Act, the bill also would define "animal control officer" and "humane society officer."

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

However, the bill also would provide that if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claim Fund.

Ch. 511 (SB 744) McCorquodale. Waste tire hauler registration.

Under existing law, the California Tire Recycling Act, within the California Integrated Waste Management Act of 1989, every person who leaves tires for disposal with a seller of new or used tires is required to pay a disposal fee, which is deposited in the California Tire Recycling Management Fund in the State Treasury. The California Integrated Waste Management Board is authorized to expend the money in the fund, upon appropriation in the annual Budget Act, for specified purposes concerning tire recycling and the disposal of used tires.

This bill would additionally authorize the board to expend the money in the fund, upon appropriation, to carry out the waste tire hauler registration program which this bill would enact. The bill would require every person who engages in the transportation of waste tires on and after January 1, 1995, to hold a valid waste tire hauler registration, except as specified, and would require any person engaged in the transportation of waste tires on and after January 1, 1995, to follow specified requirements. The bill would specify the information to be included in the application for waste tire hauler registration and the application for renewal of registration. The bill would specify grounds for the denial, suspension, or revocation of registration. The bill would also require the board to develop a waste tire manifest system for registered waste tire haulers and would require the manifest to be maintained by all parties for 3 years.

The bill would make a statement of legislative intent regarding the need for a uniform statewide program for the regulation of waste tire haulers, and would specify that its provisions preempt any local laws regulating the transportation of waste tires.

The bill would make any person who violates the bill's requirements liable for a civil penalty of up to $10,000. The bill would also provide for administratively imposed civil penalties, as specified. The board would be authorized to adopt regulations necessary to carry out the bill's requirements.

Ch. 512 (SB 777) Lewis. Insurance: excess funds investments.

Existing law permits a domestic incorporated insurer to invest excess funds in the purchase of, or loans upon, specified securities, subject to certain regulations and restrictions.

This bill would permit excess fund investments in securities evidencing an undivided interest in, the right to receive payments from, or payable primarily from distributions on a pool of financial assets held by an unaffiliated business entity, if specified conditions are met.

Existing law prohibits excess funds investments in any stock or obligation unless, in case of a loan, the amount loaned does not exceed 85% of the market value, at the date of the loan, of the collateral taken as security.

This bill would exempt the above authorized excess funds investments from this prohibition.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 513 (SB 793) Wright. Public Employees' Retirement System: partial disability retirement program.

The Public Employees' Retirement Law provides industrial disability retirement benefits without regard to age or service for certain state membership categories who are incapacitated for the performance of their present duties as a result of injury or disease arising out of and in the course of their employment. Certain new provisions are applicable only to state safety, state industrial, and state miscellaneous members employed in state bargaining units that have agreed in memorandums of understanding to be subject to them. Those provisions establish a new standard of being incapacitated for the performance of any employment with the state employer and require the disability to be of permanent or extended or uncertain duration, as determined by the Department of Personnel Administration. Those provisions require the retirement system to pay supplemental payments to those employees who are ineligible for industrial disability retirement under the new standard and accept alternative lower paying employment with the state and require the state employer to pay for those benefits in the same manner as all other state retirement benefits. Those members, who the Department of Personnel Administration determines are incapacitated under the new standard for the performance of duty in any state employment and retire for industrial disability, would receive a disability retirement allowance of 60% of their final compensation. That law also provides a monthly allowance to the eligible survivors of deceased members who had attained the minimum age for voluntary retirement prior to their death before retirement and provides an alternative death benefit for the eligible survivors of deceased members credited with 20 years or more of state service regardless of their age at the time of death before retirement.

This bill would change the name of the supplemental payment program to the partial disability retirement program, specify that the program applies only for illnesses or injuries that occur on or after January 1, 1993, and provide that the program payments are PERS benefits and are not to be considered "compensation" for PERS purposes.

This bill would authorize the Department of Personnel Administration to reinstate a person who was retired for industrial disability retirement, within 12 months after the retirement if it identifies an available position whose duties the person is able to perform, whereupon the person would be entitled to partial disability retirement payments.

This bill would make clarifying changes in the provisions relating to the alternative death benefit.

This bill would make other related, technical, and clarifying changes.

Ch. 514 (SB 795) Hart. Community colleges: nonprofit organizations: financial reports.

Existing law requires the Board of Governors of the California Community Colleges to adopt criteria and standards for periodic assessment of the fiscal condition of community college districts.

This bill would require each tax exempt organization, as specified, that is recognized by the governing board of a community college district as having a formal relationship with, and that is working on behalf of, the district or a community college within the district, to file a copy of its audited financial report for the previous fiscal year or its annual financial report for the previous fiscal year with the governing board on or before April 1 of each year.

Ch. 515 (SB 865) Kopp. Insurance.

Under existing law relating to production agencies, an organization may hold any license or licenses necessary to act as a life agent or a fire and casualty broker-agent.

This bill would provide that an organization may in addition hold any license or licenses necessary to act as a cargo shipper's agent. The bill would provide that a limited license may be issued to a natural person or to an organization who or which acts as an agent on behalf of cargo owners or shippers, or both. The bill would provide that a limited license shall authorize a cargo owner's or shipper's agent to procure cargo insurance only on behalf of a cargo owner or shipper for whom the agent is also arranging for the carriage of goods. The bill would also provide that the license shall authorize

NOTE: Superior numbers appear as a separate section at the end of the digests.

the agent to perform specified related activities. The bill would provide that a limited license shall be applied for and renewed in the same manner as a license for a fire and casualty broker-agent, except that an applicant for a limited license as a cargo shipper's agent need not pass a qualifying examination and is exempt from the prelicensing and continuing education requirements. The bill would authorize the Insurance Commissioner to make reasonable rules and regulations necessary for the administration of these provisions respecting the licensing and renewal of licenses of cargo shippers' agents.

Existing law provides for the issuance of bail licenses under the jurisdiction of the Insurance Commissioner.

This bill would require specified education requirements for applicants to be eligible to take the examination to hold a bail license. The bill would also require completion of specified continuing education requirements to renew a bail license. The bill would provide criminal penalties for any person who falsely represents to the commissioner that he or she has complied with these education requirements, thereby imposing a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 516 (SB 1065) Mello. Life insurance.

Existing law authorizes every individual life insurance policy to be returned by the owner for cancellation. The period of time set for return of the policy by the insurer shall not be less than 10 days nor more than 30 days. All premiums and policy fees paid are required to be returned to the owner if the policy is cancelled.

This bill would add additional provisions which permit a senior citizen, as defined, to cancel any policy of life insurance within 30 days following delivery, as specified. It would require those policies to contain a notice of that provision.

Those provisions would be inapplicable to individual life insurance policies issued in connection with a credit transaction or issued under a contractual policy change or conversion privilege provisions contained in a policy.

This bill would additionally make those provisions inapplicable to noncontributory employer group life insurance contracts.

The bill would also require offerings of life insurance policies to senior citizens that contain illustrations of nonguaranteed values to contain certain disclosures. It would require annual statements to senior citizen policyowners to disclose the current accumulation value and current cash surrender value and would require life insurance policies for senior citizens which contain a surrender charge period to disclose the surrender period and penalties associated therewith.

Ch. 517 (SB 1095) Killea. Nonmotorized transportation.

(1) Existing law provides for the construction and maintenance of separate nonmotorized transportation facilities, as defined, which parallel state highway rights-of-way, and authorizes the Department of Transportation to expend highway funds for those facilities, where the expenditure constitutes a highway purpose. Existing law requires the department, in its annual proposed budget, to include an amount of not less than $360,000 for the construction of nonmotorized transportation facilities to be used in conjunction with the state highway system.

This bill would create within the department a bicycle facilities coordinator to be responsible for the administration of the department's bicycle-related activities.

(2) The California Bikeways Act provides for the establishment of bikeways, as defined, and provides for funding from the Bicycle Lane Account and the Bikeway Account in the State Transportation Fund.

This bill would consolidate provisions of that act with provisions relating to nonmotorized transportation facilities, designate the new act the California Bicycle Transportation Act, and make other related changes.

(3) Under existing law, $9,000,000 is appropriated annually from the General Fund to

NOTE: Superior numbers appear as a separate section at the end of the digests.

the Bikeway Account, for allocation by the department for specified purposes.

This bill would delete that appropriation and would require the department to allocate funds from the Bicycle Lane Account for those purposes.

Ch. 518 (AB 208) Horcher. Attorneys: advertising.

Existing law prohibits the making or dissemination of untrue or misleading advertising to the public concerning the performance of professional services. Existing law also prohibits a person who is not an active member of the State Bar from advertising or holding himself or herself out as practicing or entitled to practice law.

This bill would enact a comprehensive regulatory scheme to, among other things, provide that no advertisement made by an attorney or law firm shall make various prohibited statements, and would require certain disclosures, as specified. The bill would enact related provisions.

Ch. 519 (AB 209) Horcher. Documents: preservation and disposition.

(1) Existing law specifies the duties of the clerk of the superior court with respect to the filing, preservation, copying, and destruction of documents, and provides for various fees in this regard.

This bill would require the clerk of the superior court to accept for deposit certain documents delivered by an attorney who held the document for safekeeping, as specified, thereby imposing a state-mandated local program by increasing the duties of local agencies. The bill would also authorize the clerk of the superior court to copy certain estate planning documents or store them on film or electronically, to destroy the original, and to charge specified fees for receiving, storing, and searching for these documents. The bill would further authorize the board of supervisors to increase the fees upon making a specified determination and would permit the superior court to reduce or waive those fees under specified circumstances.

(2) Under existing law, an attorney who holds the will or other documents of a client for safekeeping, does so in a fiduciary capacity. Existing law also requires the custodian of a will to deliver it to the clerk of the superior court having jurisdiction within 30 days after learning of the testator's death, and to mail a copy to the executor or a beneficiary, as specified.

This bill would regulate the transfer of estate planning and other documents held by an attorney for safekeeping, and would set forth the duties and liabilities of an attorney who holds documents for safekeeping. The bill would also provide for the court-ordered transfer of estate planning documents of a conservatee, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 520 (AB 217) O'Connell. Mobilehome parks.

The existing Mobilehome Residency Law provides for the establishment and observance of rules and regulations applicable to various aspects of mobilehome residence.

This bill would, with specified exceptions, apply these rules and regulations to owners and employees of mobilehome parks, to the same extent they are applied to residents and their guests.

Ch. 521 (AB 310) Woodruff. Tanning facilities.

Under existing law, the Filante Tanning Facility Act of 1988 regulates tanning facilities, as defined, which are used for tanning the skin. Existing law requires a tanning facility to report any patron injury requiring medical attention to the Department of Consumer Affairs. Under existing law, any violation of the act is a misdemeanor.

This bill would, under the jurisdiction of the State Board of Barbering and Cosmetology, require records of tanning facilities, as specified, to be open to inspection by the board, as specified. It would reduce a violation of the Filante Tanning Facility Act of 1988 from a misdemeanor to an infraction for a first violation of the act and set forth certain

NOTE: Superior numbers appear as a separate section at the end of the digests.

fine amounts. Violations of the act subsequent to the first violation would be misdemeanors, and continuing violations would constitute separate misdemeanors, thus imposing a state-mandated local program by increasing the penalty for a crime.

The bill would authorize the board to adopt regulations concerning the operation of tanning facilities in establishments licensed under the Barbering and Cosmetology Act.

The bill would also direct the board to conduct a study and report to the Legislature no later than July 1, 1994, with respect to certain tanning facility information.

Specified provisions of the bill would become effective July 1, 1994.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 522 (AB 421) Archie-Hudson. Insurance: third-party interest: policy period.

Existing law prohibits various unfair practices in the business of insurance.

This bill would prohibit a lender, mortgagee, or any third party having an interest in real or personal property from refusing to accept a policy issued by an admitted insurer solely because the policy is issued for a continuous period without a fixed expiration date even though the policy premium is due and payable every 6 months, provided the lender, mortgagee, or third party is entitled to receive notice of renewal or cancellation or nonrenewal, as specified.

Ch. 523 (AB 697) Bowen. Hazardous substance cleanup: discharges.

Existing law, the Carpenter-Presley-Tanner Hazardous Substance Account Act, requires the Department of Toxic Substances Control or a California regional water quality control board to prepare or approve remedial action plans, which specify, among other things, removal and remedial actions selected for the cleanup of all hazardous substance release sites identified and categorized pursuant to a specified procedure. Existing law requires the department and the State Water Resources Control Board to each develop, by July 1, 1992, policies and procedures to be used by each agency in overseeing the investigation and taking of removal and remedial actions at hazardous substance release sites, in the case of the department, and in overseeing the investigation of, and cleaning up or abating the effects of, discharges of a hazardous substance, in the case of the state board.

This bill would instead require the department and the state board to concurrently establish consistent policies and procedures to be used by each agency in overseeing the investigation and taking of removal and remedial actions at hazardous substance release sites, in the case of the department, and in overseeing the investigation of, and cleaning up or abating the effects of, discharges of a hazardous substance, in the case of the state board.

The bill would require the department and the state board to jointly review and revise the policies and procedures established prior to the enactment of this bill and to jointly develop, and send to the Legislature, recommendations for revisions to make consistent the hazardous substance release cleanup policies and procedures followed by the department, the state board, and the regional boards.

Ch. 524 (AB 734) Johnson. Bail.

(1) Under existing law, the undertaking or deposit of bail is forfeited under specified conditions including the failure of the defendant to surrender himself or herself in execution of the judgment. If the forfeiture exceeds $300, the clerk of the court is required under existing law to mail a notice of the forfeiture to the surety on the bond or the depositor.

This bill would revise and recast these bail provisions. The bill would specify that the bail would be forfeited if the defendant does not surrender himself or herself in execution of the judgment after appeal. The bill would also increase the forfeiture requiring notice under this provision to an amount in excess of $400.

(2) Existing law provides that if, within 180 days after the entry in the minutes of the

NOTE: Superior numbers appear as a separate section at the end of the digests.

defendant's failure to appear, or if mailing of the notice of the forfeiture to the surety on the bond is required within 180 days of the mailing, the defendant appears and excuses the neglect or shows to the satisfaction of the court that the failure to appear was not with connivance of the bail, the court shall direct that the forfeiture be set aside and the bail or deposit exonerated.

This bill would provide an additional 5 days to the above 180-day requirement with respect to the mailing of the notice of the forfeiture to the surety on the bond. Additionally, the bill would delete the requirement that the defendant excuse the neglect or show that the failure to appear was not with connivance of the bail.

(3) Existing law provides, with respect to Vehicle Code violations, that if at the time a case is called for arraignment or trial the defendant does not appear, the magistrate or court, respectively, may declare the bail forfeited and may, in its discretion, order that no further proceedings be had in the case, except as specified.

This bill would provide that if the defendant has posted surety bail and the magistrate has ordered the bail forfeited and that no further proceedings shall be had in the case, the bail retains the right to obtain relief from the forfeiture as provided in (1) and (2) above if the amount of the bond, money, or property deposited exceeds $700.

Ch. 525 (AB 807) Andal. Department of Motor Vehicles: confidential records.

Existing law requires the Department of Motor Vehicles to maintain confidential the records of home addresses of specified public officers and employees and their spouses and children.

This bill would add specified officers and employees of the Board of Prison Terms, the Parole Hearings Division of the Department of Corrections, and the Youthful Offender Parole Board to the list of individuals whose records are confidential and would make other related changes.

Ch. 526 (AB 878) Collins. Residential care facilities for the elderly.

Existing law requires the State Department of Social Services to secure criminal record information as a condition of licensure of residential care facilities for the elderly, but authorizes the State Director of Social Services to grant an exemption from disqualification from licensure under certain circumstances. Existing law requires the State Department of Social Services, if it is determined on the basis of fingerprints submitted to the Department of Justice that a person has been convicted of certain offenses, to notify the licensee of a facility to act immediately to terminate the person's employment, remove the person from the facility, or bar the person from entering the facility.

This bill would require the State Department of Social Services to make that notification to the licensee in writing within 15 calendar days of the receipt of notification from the Department of Justice.

The bill would require the director to notify the applicant for licensure of his or her decision to grant an exemption from disqualification for licensure in writing within 60 days of receipt of certain information.

Existing law requires a licensee of a residental care facility for the elderly to provide written notice to the State Department of Social Services and to each resident of the licensee's intent to sell the facility at least 60 days prior to transfer, or at the time a bona fide offer is made, whichever is longer. Existing law prohibits a sale of the facility until 60 days from the date of the notice. Existing law also sets forth similar requirements relating to voluntary transfer of continuing care facilities.

This bill would instead require the notice to be given at least 30 days prior to transfer, or at the time a bona fide offer is made, whichever is longer. The bill would prohibit a sale of the facility until 30 days from the date of the notice. This bill would exclude those facilities that provide continuing care from the requirements applicable to other residential care facilities for the elderly.

Ch. 527 (AB 908) Horcher. Civil proceedings: probate: decedents' estates: sureties.

(1) Under existing law, a beneficiary of property in a decedent's estate may assign any or all of his or her interest therein prior to distribution, but the court may refuse to order

NOTE: Superior numbers appear as a separate section at the end of the digests.

distribution in accordance with the assignment under certain circumstances, upon its own motion or the motion of the personal representative, any interested person, or the public administrator.

Existing law authorizes agreements to create a lien upon property not yet acquired by the party agreeing to give the lien, and in these cases the lien attaches when the property is acquired by that party, to the extent of the interest acquired.

This bill would specify that, for purposes of these lien provisions, an agreement by a beneficiary of a decedent's estate to give a lien on undistributed real property in the estate creates no lien until the property is distributed to that beneficiary. The bill also provides that, upon the estate recording an order confirming a sale of the property, any expectancy of such a lien in the real property is extinguished.

(2) Existing law provides that the aggregate liability of a surety to all persons for the condition of a bond is limited to the amount of the bond.

This bill would specify that the application of this provision is modified by a provision relating to the mode of payment on a bond, the liability of a surety for costs, and the effect of partial payment of a claim by a surety.

(3) Existing law specifies the effect on a spouse's interest in community property where a married person executes a provision for a nonprobate transfer of community property on death with the written consent of the spouse and thereafter executes a specified modification of the provision without the written consent of the spouse.

This bill would specify that this provision does not apply to the exercise of a power of appointment under a trust.

(4) Existing law limits the compensation of an attorney for the personal representative of a decedent's estate to an amount based on the size of the estate for ordinary services, but permits the court to authorize additional compensation that is just and reasonable for extraordinary services.

This bill would authorize the attorney for the personal representative to provide extraordinary services on a contingent fee basis if approved by the court as just and reasonable, to the advantage of the estate, and in the best interests of persons interested in the estate.

Ch. 528 (AB 1032) Aguiar. Vehicles: franchises.

Existing law requires every vehicle franchisor to properly fulfill every warranty agreement made by it and adequately and fairly compensate each of its franchisees for labor and parts used to fulfill that warranty when the franchisee has fulfilled warranty obligations of repair and servicing and to file a copy of its warranty reimbursement schedule or formula with the New Motor Vehicle Board. Existing law prescribes procedures to be followed by franchisors, franchisees, and the board regarding claims for warranty reimbursement.

This bill would require that any claim not specifically disapproved in writing within 30 days from receipt by the franchisor be deemed approved on the 30th day. The bill would authorize franchisors to conduct audits of franchisee warranty records on a reasonable basis, and would require that franchisee claims not be disapproved except for good cause, as specified.

The bill would also prescribe procedures to be followed by franchisors and franchisees regarding franchisee claims for payment under the terms of a franchisor incentive program.

Ch. 529 (AB 1137) Knight. Intestate succession.

(1) Existing law delineates the rules for intestate succession and specifies the manner of establishment of a parent-child relationship for the purpose of those provisions.

This bill would specify that a prior adoptive parent and child relationship is treated as a natural parent and child relationship for the purposes of the rule that, except as specified, an adoption severs the relationship of parent and child between an adopted person and a natural parent. It also would clarify the circumstances in which a wholeblood sibling of an adoptee may inherit through the adoptee on the basis of a parent and child relationship.

(2) Under existing law, with certain exceptions, the relationship of parent and child

NOTE: Superior numbers appear as a separate section at the end of the digests.

may be established, for the purpose of determining intestate succession, (1) by a court order declaring paternity and entered under the Uniform Parentage Act during the father's lifetime or (2) by clear and convincing evidence that the father openly and notoriously held out the child as his own during the father's lifetime.

This bill would instead provide that paternity may be established by court order as specified in (1) above, by clear and convincing evidence that the father has openly held out the child as his own, or by clear and convincing evidence of paternity if it was not possible for the father to openly hold out the child as his own.

Ch. 530 (AB 1249) Horcher. Probate.

Existing law provides that if a 3rd person acts (1) in good faith, (2) for a valuable consideration, and (3) without actual knowledge that a trustee is exceeding the trustee's powers or improperly exercising them, the 3rd person is fully protected in dealing with or assisting the trustee just as if the trustee has and is properly exercising the power the trustee purports to exercise, and the 3rd person may assume without inquiry the existence of a trust power and its proper exercise.

Existing law also provides that a trustee may, voluntarily or upon the demand of a 3rd person, execute an affidavit stating that the trustee has the power sought to be exercised and is properly exercising it. Under existing law, a 3rd person, who relies on the trustee's affidavit without actual knowledge that the trustee is exceeding the trustee's powers or improperly exercising those powers, is fully protected in dealing with or assisting the trustee just as if the trustee has and is properly exercising the power the trustee purports to exercise. A 3rd person who refuses to accept the exercise of a trustee's power covered by the affidavit is liable, except as specified, for attorney's fees incurred in an action or proceeding to confirm the trustee's qualifications or powers.

This bill would repeal the latter provisions and provide, instead, for a certification of trust which may be presented by a trustee, in lieu of a copy of the trust instrument, to establish the existence or terms of a trust. This bill would provide that the certification of trust may confirm specified facts or contain specified information. The bill would provide, however, that the certification of trust shall not be required to contain dispositive provisions of the trust.

This bill would also provide that a person who acts in reliance upon information contained in the certification of trust, without actual knowledge, may not be held liable to any person for so acting and may assume, without inquiry, the existence of facts contained in the certification. The bill would also provide that any person who demands the trust documents in addition to a certification of trust, except in specified circumstances, shall be liable for damages incurred as a result of the refusal to accept the certification of trust in lieu of the documents if the court determines that the person acted in bad faith in requesting the trust documents.

Ch. 531 (AB 1283) McDonald. Intermodal corridors of economic significance.

Under existing law, the Department of Transportation has full possession and control of all state highways and all property and rights in property acquired for state highway purposes. The department is authorized and directed to lay out and construct all state highways between the termini designated by law and on the locations as determined by the California Transportation Commission.

This bill would enact the Intermodal Corridors of Economic Significance Act and require the department, in cooperation with regional transportation planning agencies, to identify significant transportation arteries that are intermodal corridors of economic significance, as specified, including at least one that serves 2 or more major seaports.

Ch. 532 (AB 1311) Areias. Equipment dealers.

Existing law regulates business relations between independent dealers and manufacturers, wholesalers, and distributors of agricultural, utility, and industrial equipment.

This bill would revise the definition of "net price" for purposes of these provisions.

Existing law requires all these suppliers to provide an opportunity annually for dealers to return a portion of their surplus parts inventory for credit. Existing law provides that the minimum lawful credit to be allowed for returned parts shall be 95% of the net cost,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

as listed in the supplier's current returnable parts list, as specified.

This bill would instead provide a minimum lawful credit for returned parts of 95% of the net price, as listed in the supplier's current returnable parts list, as specified.

Existing law also provides for an equipment repurchase lien on equipment or the proceeds from the sale of equipment that is subject to repurchase when payment of the reasonable or agreed charge is overdue for a specified period. In order to establish this lien, an equipment dealer is required to send a written notice to the lien debtor containing specified information, including a statement that the lien claimant shall file a notice of claim of lien upon the debtor's failure to perform, as specified.

This bill would instead require a statement that the lien claimant may file a notice of claim of lien upon the debtor's failure to perform, as specified.

Existing law provides that the lien created by the law relating to equipment dealers is subject to specified provisions of the Commercial Code, except as specified.

This bill would, in addition, provide that a security agreement is not necessary to make an equipment repurchase lien created under the law relating to equipment dealers enforceable, that an equipment repurchase lien shall not continue in the repurchased equipment following the disposition thereof, and that the right of an equipment dealer to enforce the lien shall be governed by the law relating to equipment dealers and shall not be governed by specified provisions of the Commercial Code. The bill also would define the terms "secured party," "debtor," and "collateral" for these purposes.

Ch. 533 (AB 1502) Hauser. Relocation assistance: business and farm operations: leases.

Under existing law, whenever a program or project to be undertaken by a public entity will result in the displacement of any person, the displaced person is entitled to payment for actual moving and related expenses as the public entity determines to be reasonable and necessary, including, among other things, actual and reasonable expenses in moving himself or herself, his or her family, business, or farm operation, or his or her personal property.

This bill would specify that no provision of law governing this relocation assistance requirement is to be construed to require a public entity to provide any relocation assistance to a lessee if the property acquired for a program or project is subject to a lease for purposes of conducting farm operations and the public entity agrees to assume all of the terms of that lease.

Ch. 534 (AB 1505) Bowler. Alcohol and drug programs.

Existing law requires the State Department of Alcohol and Drug Programs to be the single state agency authorized to receive any federal funds payable directly to the state by the Alcohol, Drug Abuse, and Mental Health Administration to implement certain alcohol and drug programs.

This bill would change the name to the Substance Abuse and Mental Health Services Administration.

Existing law requires the department to perform specified functions.

This bill would require the department to require any individual, public or private organization, or government agency, receiving federal grant funds, to comply with all federal statutes, regulations, guidelines, and terms and conditions of the grants. The bill would set forth possible consequences for failure to comply, and would require the department to adopt related emergency regulations. The bill would provide that subsequent amendments to the initial adoption of emergency regulations shall only be deemed an emergency in specified circumstances.

Ch. 535 (AB 1531) Sher. General Subject: Vehicles: dealers: advertising.

(1) Existing law prohibits various activities in connection with the advertising or sale of motor vehicles by, among others, vehicle dealers licensed by the Department of Motor Vehicles.

This bill would prohibit licensed dealers from using a simulated check, as defined, in an advertisement for the sale or lease of a vehicle. Because a violation of this provision would be a misdemeanor, the bill would impose a state-mandated local program by

NOTE: Superior numbers appear as a separate section at the end of the digests.

creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 536 (AB 1554) Epple. Crimes: cellular radio telephones.

Existing law provides that every person who, without the consent of all parties to a communication, intercepts or receives and intentionally records, or assists in the interception or reception and intentional recordation of, a communication transmitted between two cellular telephones, a cellular telephone and a landline telephone, two cordless telephones, a cordless telephone and a landline telephone, or a cordless telephone and a cellular telephone, shall be punished as specified.

This bill would revise these provisions of existing law to refer to cellular radio telephones, rather than to cellular telephones.

For purposes of existing law specified above, "cellular telephone" is not defined, but "cellular radio telephone" is defined to mean a wireless telephone authorized by the Federal Communications Commission to operate in the frequency bandwidth reserved for cellular radio telephones exclusively within a state, county, city and county, or city correctional facility.

This bill, instead, would provide that for purposes of existing law specified above, "cellular radio telephone" means a wireless telephone authorized by the Federal Communications Commission to operate in the frequency bandwidth reserved for cellular radio telephones.

Because this change in existing law would expand the scope of an existing crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill also would declare that it is to take effect immediately as an urgency statute.

Ch. 537 (AB 1653) Speier. Care facilities.

Existing law requires an elder or dependent adult care custodian, health practitioner, or employee of a county adult protective services agency, or a local law enforcement agency to file reports, under specified circumstances, on various kinds of elder or dependent adult abuse. Existing law requires as a condition of licensure of a community care facility, residential community care facility for the elderly, or a child day care facility by the State Department of Social Services, that the department secure a criminal record disclosure on certain persons involved in a facility.

This bill would, in addition, require the Department of Justice to secure a criminal record of a person to determine whether the person has been convicted of specified offenses, if (1) an employer of the person requests the determination and submits fingerprints of the person to the Department of Justice and (2) the person is an employee to which the mandatory elder or dependent adult reporting requirements apply.

The bill would provide for notification of the employer by the Department of Justice.

The bill would also prescribe the manner and timing of the criminal record disclosure.

The bill would require the Department of Justice to charge a fee to the employer.

Existing law requires the Department of Justice to provide the State Department of Social Services with the criminal record information on persons involved with community care, residential care for the elderly, and child day care facilities within 30 calendar days from the receipt of the fingerprints.

This bill would express the intent of the Legislature that the Department of Justice charge a fee to perform these criminal record checks in compliance with the 30 calendar day requirement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 538 (AB 1662) Moore. Telephones: telecommunications devices.

Existing law requires the commission to design and implement programs whereby each telephone corporation shall provide a telecommunications device capable of servicing the needs of individuals who are deaf or hearing impaired, as specified, and to establish a rate recovery mechanism through a surcharge to be in effect until January 1, 1995. These programs are required to be identified on subscribers' bills as "communication services funds for deaf and disabled."

This bill would remove the requirement that the funds be identified on subscribers' bills specifically as "communication services funds for deaf and disabled."

Ch. 539 (AB 1789) Harvey. Dentistry: fictitious name permit.

Existing law, the Dental Practice Act, provides that it is grounds for disciplinary action, including criminal penalties, for a licensed dentist to practice or offer to practice dentistry under a false, assumed, or fictitious name, unless issued a permit by the Board of Dental Examiners.

The act requires the board to issue a permit, under prescribed conditions, to an association or partnership or corporation or group of three or more dentists authorizing the practice of dentistry under a false, assumed, or fictitious name. The act provides for fees to be assessed regarding the issuance of this permit.

This bill would provide that, on and after July 1, 1995, any dentist or pair of dentists may practice dentistry under any false, assumed, or fictitious name if, and only if, the dentist or pair of dentists hold a permit. It would, in addition, require the board to issue a permit to a dentist or pair of dentists authorizing the practice of dentistry under a false, assumed, or fictitious name under prescribed conditions. This bill would repeal these provisions regarding false, assumed, or fictitious name permits for individual dentists or pairs of dentists as of January 1, 1999.

Under existing law, all moneys collected pursuant to the act, except as provided, are deposited in the State Dentistry Fund, which is continuously appropriated.

Since this bill would broaden the class of persons paying fees for the issuance of these permits, this bill would constitute an appropriation by adding more revenue into the fund.

Ch. 540 (AB 1849) Connolly. Vehicles: offenses: removal.

(1) Existing law authorizes any peace officer, as defined, upon the complaint of any person, to remove a vehicle parked within a residence or business district from a highway or from public or private property if an alarm device has been activated within the vehicle, the peace officer is unable to locate the owner of the vehicle within 45 minutes from the time of arrival at the vehicle's location, and the alarm device has not been silenced prior to removal.

This bill would, additionally, authorize the removal of a vehicle under the circumstances described above when the vehicle is parked within 500 feet of any occupied building of a school, community college, or university during normal hours of operation. The bill would also authorize the removal of a vehicle under all of the specified circumstances if a horn has been activated within the vehicle.

(2) Existing law prohibits any person from selling, offering for sale, or operating any motor vehicle equipped with red or amber glazing material in any partitions, windows, windshields, or wind deflectors. Violation of this provision, in combination with other provisions of existing law, is an infraction.

This bill would, instead, prohibit the activities described above when the motor vehicle is equipped with red, blue, or amber translucent aftermarket materials in any of the specified areas of the vehicle. Because a violation of this provision would be an infraction, the bill would impose a state-mandated local program by creating a new crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this

NOTE: Superior numbers appear as a separate section at the end of the digests.

bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 541 (AB 1902) Knowles. Real estate brokers: educational requirements.

Existing law requires an applicant for a real estate broker license to successfully complete one of several specified courses on subjects relating to real estate.

This bill would include among the list of specified courses, a course on mortgage loan brokering and lending.

Existing law requires real estate licensees to comply with continuing education requirements. These include requiring an applicant for license renewal to successfully complete 45 clock hours of education on specified subjects.

This bill, upon the initial renewal of all real estate licenses after December 31, 1995, would require a real estate broker, as part of the 45 clock hours of education, to complete a three-hour course in trust fund accounting and handling and a three-hour course in fair housing.

This bill would also require a real estate broker, for all subsequent renewals after the initial renewal, to successfully complete 45 clock hours of education in specified courses, during the four-year period preceding the renewal application.

Ch. 542 (AB 2042) Weggeland. Criminal procedure.

Under existing law, when an action is dismissed by a magistrate, as specified, the prosecutor may make a motion in the superior court within 15 days to compel the magistrate to reinstate the complaint or a portion of the complaint and to reinstate the custodial status of the defendant under the same terms and conditions as when the defendant last appeared before the magistrate.

This bill would additionally apply the above provision if the magistrate dismisses a specified action because a judgment of conviction for specified offenses, including reckless driving, was declared invalid on constitutional grounds, as specified.

Ch. 543 (AB 2063) Weggeland. Limited partnerships.

Existing law, the California Revised Limited Partnership Act, permits the merger of limited partnerships with other business entities, such as corporations and general partnerships, including situations in which the surviving entity is a business entity other than a limited partnership. Existing provisions of the California General Corporation Law permits California corporations to merge with other corporations but does not contain provisions providing for the merger of California corporations with limited partnerships.

This bill would enact provisions to amend the General Corporation Law to permit those mergers. This bill would provide that the surviving entity of a merger may be either a corporation or a limited partnership. This bill would require a corporation and a limited partnership that desire to merge to comply with specified requirements, including, among others, approval of an agreement of merger containing specified information, and the filing of specified documents, including the agreement of merger with the Secretary of State.

This bill would require the approval, as specified, of the shareholders of a constituent corporation, as defined, of a merger in which the surviving entity is a limited partnership and would provide for dissenting shareholder status for those shareholders in specified circumstances.

Under existing law, the admission of a general partner or an election to continue the business of the limited partnership after a general partner ceases to be a general partner, other than as specified, if there is no remaining or surviving general partner, may only be taken by the affirmative vote of all of the limited partners.

This bill would instead provide that this action may be taken by the affirmative vote of a majority in interest of the limited partners or that greater interest provided in the partnership agreement.

This bill would specify certain filing fees and make other technical and conforming changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 544 (AB 2092) Takasugi. Compensation: compensating time off.

Under the existing federal Fair Labor Standards Act of 1938, as amended, no employer may employ any employee, except as specified, for a workweek longer than forty hours, unless the employee receives compensation for the excess hours at a rate not less than 1½ times the employee's regular rate of compensation. The federal act also provides that employees of a public agency which is a state, a political subdivision of a state, or an interstate governmental agency, may receive, in lieu of overtime compensation, compensating time off at a rate not less than 1½ hours for each hour of employment for which overtime compensation is required. Federal law does not provide for compensating time off in lieu of overtime compensation for employees in private industry.

Under existing California law, the Department of Personnel Administration is authorized to provide for cash overtime compensation to state employees at a rate not to exceed 1½ times the regular rate of pay, or the department may provide for compensating time off at a rate not to exceed 1½ hours of time off for each hour of overtime worked. Existing law also provides, except as specified, that granting compensating time off to state employees in lieu of cash compensation is not prohibited where the compensating time off can be granted within 12 calendar months following the month in which the overtime was worked and without impairing the services rendered by the employing state agency. Existing California law does not provide for compensating time off in lieu of overtime compensation for employees in private industry.

This bill would provide that, subject to specified conditions, any employee may receive compensating time off, as specified, in lieu of overtime compensation. This bill would further provide that an employee may accrue up to 240 hours of compensating time, and would require the payment of overtime compensation for overtime hours of work accrued in excess of that maximum. This bill would not apply to any employee who is exempt from the overtime provisions of the California wage orders or who is subject to specified wage orders affecting certain industries.

Ch. 545 (AB 2245) Pringle. Social services: asset verification.

Existing law, operative only if a specified report required under existing law is submitted to the Legislature, would require the State Department of Health Services to annually inform the Franchise Tax Board of the names and social security numbers of applicants and recipients under specified public social services programs. The existing law also would authorize the Franchise Tax Board to inform the State Department of Health Services and the State Department of Social Services of applicants for, or recipients receiving unearned income, and the amount and type of the unearned income, and to provide those departments with specified identifying information, including both the payer's name and federal employer identification number, and would also require those departments to utilize board records to match unearned income against the reported income of benefit applicants and recipients.

This bill would repeal the requirement for the submission of the report referred to above, as well as the study upon which the report was to be based, and the requirement that the other provisions referred to above only become operative if the report is submitted to the Legislature. Thus, this bill would make those other provisions operative on January 1, 1994.

Ch. 546 (AB 2284) Pringle. Vehicles: drivers' licenses.

(1) Under existing law, the examination for a driver's license administered by the department is required to include specified testing of the applicant.

This bill would authorize the department to conduct studies to develop and identify examinations and tests to more accurately identify persons who, due to physical or mental factors, or both, are not competent or qualified to safely operate a motor vehicle, and to require any person applying for an original driver's license or renewal of a driver's license or any person subject to reexamination, to submit to one or more tests or examinations that are part of the study. The bill would provide for the use of the results of the study and would make the results confidential. The bill would make a conforming change in existing law known as the California Public Records Act.

(2) Existing law authorizes the Director of Motor Vehicles to renew driver's licenses

NOTE: Superior numbers appear as a separate section at the end of the digests.

by mail for a 4-year period for those drivers meeting prescribed conditions during a specified 4-year or 2-year period.

This bill would recast the above to allow the director to renew by mail driver's licenses for persons whose records for the 2 years immediately preceding the determination of eligibility for the renewal shows the following: (a) no notification of failures to appear in court in response to certain notices, (b) a total violation point count not greater than one, and (c) no suspension of the driving privilege because the person had 0.08% or more, by weight, of alcohol in his or her blood.

(3) Existing law requires certain fees to be paid to the department sufficient in amount to pay the actual costs of the issuance, reissuance, or return of a suspended or revoked license.

This bill would additionally allow the department to require the payment of a fee sufficient to pay the actual costs of providing notices to the person regarding the suspension or revocation of the person's driving privilege.

Ch. 547 (AB 2369) Statham. Bank and corporation taxes: exempt organizations.

The existing Bank and Corporation Tax Law provides that clubs organized and operated exclusively for pleasure, recreation, and other nonprofitable purposes, no part of the net earnings of which inures to the benefit of any private shareholder, are exempt from the taxes imposed by that law.

This bill would provide, instead, that clubs organized for pleasure, recreation, and other nonprofitable purposes, substantially all of the activities of which are for those purposes, and no part of the net earnings of which inures to the benefit of any private shareholder, are exempt from the taxes imposed by that law.

This bill would take effect immediately as a tax levy.

Ch. 548 (SB 800) Presley. Interception of wire communications.

Existing law governs the interception of wire communications by law enforcement officers investigating certain controlled substance violations under specified judicial authorization procedures. Specifically, it allows a judge, upon application, to authorize interception of wire communications if he or she determines, among other things, that probable cause exists to believe that an individual is committing, has committed, or is about to commit one of various specified offenses involving controlled substances, or conspiring to commit any of those crimes.

Existing law provides that the above provisions shall remain in effect only until January 1, 1994, and as of that date are repealed.

This bill would, instead, provide that the above provisions shall remain in effect only until January 1, 1999, and as of that date are repealed.

Because this bill would extend the operation of a crime, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 549 (SB 1175) Hurtt. Controlled substances: illegal disposal.

(1) Existing law, the California Uniform Controlled Substances Act, makes any manufacturer of a controlled substance who disposes of any hazardous substance that is a controlled substance or a chemical used in the manufacture of a controlled substance in violation of any law regulating the disposal of hazardous substances or hazardous waste guilty of a public offense which is punishable, as specified.

This bill would additionally require a person convicted of that offense to pay a penalty equal to the amount of the actual cost of any gross evidence removal of hazardous substances or hazardous waste that is incurred by an agency as a result of the illegal disposal. The bill would require the court to transmit these penalties to the county treasurer for deposit in a special account in the county treasury. The county treasurer would be required to pay that money at least once a month to the agency that incurred

NOTE: Superior numbers appear as a separate section at the end of the digests.

the cost for the gross evidence removal, thereby imposing a state-mandated local program. The county would be authorized to retain up to 5% of the penalty for administrative costs attributable to the collection and disbursement of the penalty.

The bill would require the county treasurer to transfer funds in the amount of the penalty collected to the Treasurer if the Department of Justice has incurred the cost for the gross evidence removal and would require the Treasurer to deposit the money in the Controlled Substance Disposal Account, which the bill would create in the General Fund in the State Treasury. The Department of Justice would be authorized to expend the money in the account, upon appropriation by the Legislature, to cover the cost of gross evidence removals.

The bill would define terms for purposes of those provisions.

Since the bill would increase the penalty for a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 550 (AB 98) Harvey. Driving offenses: habitual traffic offenders.

(1) Existing law designates as an habitual traffic offender any person who is convicted of causing injury to another person while driving under the influence of alcohol or drugs and doing any act forbidden by law or neglecting any duty imposed by law, if the conviction occurs within 7 years of 2 or more convictions of specified traffic violations. Existing law punishes an habitual traffic offender by imprisonment in the state prison for a term of 2, 3, or 4 years and by a fine, as specified.

This bill would, if the act or neglect proximately causes great bodily injury, as defined, and the offense occurred within 7 years of 2 or more separate specified violations, impose a term of imprisonment of 2, 3, or 4 years and a specified fine, thereby imposing a state-mandated local program by creating a new crime. The bill would additionally impose a 3-year prison enhancement upon a person described in this paragraph who has been convicted of 4 or more separate specified violations within the 7-year period.

The bill would also require the court to require any person convicted of either the current offense or the offense created by this bill to participate in an alcohol or drug program, or both, that is available at the state prison during the person's confinement.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 551 (AB 104) Quackenbush. Controlled substances.

Existing law, the Juvenile Drug Trafficking and Schoolyard Act of 1988, provides that any person 18 years of age or over who is convicted of specified controlled substance offenses with regard to cocaine and heroin or of a conspiracy to commit one of those offenses, where the violation takes place upon the grounds of, or within 1,000 feet of, a public or private elementary, vocational, junior high, or high school during hours that the school is open for classes or school-related programs, or at any time when minors are using the facility where the offense occurs, shall receive an additional punishment of 3, 4, or 5 years.

This bill would modify this provision to apply instead to a conviction of specified offenses involving cocaine base, heroin, and methamphetamine where the offenses take place under these circumstances.

Ch. 552 (AB 105) Murray. Terrorism: county probation department personnel.

Existing law provides that any person who explodes, ignites, or attempts to explode or ignite any destructive device or any explosive, or who commits arson, in or about any of the places listed within these provisions, for the purpose of terrorizing another or in

NOTE: Superior numbers appear as a separate section at the end of the digests.

reckless disregard of terrorizing another is guilty of a felony, and shall be punished, as specified.

This bill would include any building or facility regularly occupied by county probation department personnel in which the employees perform official duties of the probation department within the above-described offense. Because the bill would expand the scope of an existing crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 553 (AB 106) Martinez. Sentencing: threatening crime victims and witnesses.

Under existing law, the term of imprisonment shall not exceed twice the number of years imposed by the trial court as the base term unless the defendant stands convicted of a violent felony, as defined, a consecutive sentence is being imposed under specified provisions, an enhancement is imposed under specified provisions, or the defendant stands convicted of felony escape from an institution in which he or she is lawfully confined.

This bill additionally would exempt from the requirement that the term of imprisonment shall not exceed twice the number of years imposed by the trial court as the base term the situation where a consecutive term of imprisonment is imposed for 2 or more convictions of willfully and maliciously communicating to a victim or witness of a crime for which a person was convicted a credible threat to use force or violence, as specified.

Ch. 554 (AB 146) Richter. Prison weapons: manufacture.

Existing law prohibits a person confined in a state prison or under specified circumstances while in the custody of prison personnel from possessing or carrying upon his or her person or having under his or her custody or control specified instruments or weapons, a violation of which is punishable by imprisonment in the state prison for 2, 3, or 4 years to be served consecutively.

This bill, in addition, would extend this provision to prohibit the manufacture of, or attempt to manufacture, the specified instruments or weapons mentioned above, a violation of which would be punishable by imprisonment in the state prison for 16 months, 2 or 3 years to be served consecutively.

Because this bill would create a new crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 555 (AB 191) Umberg. Sex offenders: registration.

(1) Existing law requires a person convicted of certain enumerated sex offenses to register with law enforcement officials in the city, county, or city and county where he or she is domiciled, and with the chief of police on any University of California or California State University campus where he or she is domiciled. Under existing law, any person who is required to register and who fails to register is guilty of a misdemeanor.

Existing case law holds that, although existing law requires registration of an adult sex offender after conviction of assault with intent to commit rape or sodomy, it does not expressly require registration after conviction of assault with intent to commit oral copulation.

This bill would expressly require any person convicted of the offenses of assault with intent to commit oral copulation, assault with intent to commit rape or penetration of the genital or anal openings of any person by a foreign object, or assault with intent to commit lewd or lascivious acts with a child under 14 years of age to register as an adult sex offender. To the extent this bill would expand the scope of an existing crime and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

impose additional responsibilities on local law enforcement officials, it would impose a state-mandated local program.

In addition, the bill would specify that it is the Legislature's intent in enacting this provision to abrogate the holding of People v. Saunders, 232 Cal. App. 3d 1592.

(2) Existing law provides that any employee of a law enforcement agency who personally receives a report from any person, alleging that the person making the report has been the victim of a sex offense, as specified, shall inform the person reporting that his or her name will become a matter of public record unless he or she requests that it not become a matter of public record pursuant to the California Public Records Act.

Existing law specifies that no law enforcement agency shall disclose to any person, except the prosecutor, the address of a person who alleges to be the victim of a sex offense. Existing law also specifies that no law enforcement agency shall disclose to any person, except the prosecutor, the name of a person who alleges to be the victim of a sex offense, if that person has elected to exercise his or her right as specified above and as provided in a specified section of the Government Code.

This bill would amend these latter provisions to provide that no law enforcement agency shall disclose this information to any person, except the prosecutor or other persons or public agencies where authorized or required by law, rather than except the prosecutor.

(3) This bill would incorporate additional changes in Section 290 of the Penal Code proposed by AB 187, to be operative only if AB 187 and this bill are both chaptered, this bill becomes effective on or before January 1, 1994, AB 187 becomes effective on January 1, 1994, and this bill is chaptered last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be payable from the State Mandates Claims Fund.

(5) This bill also would declare that it is to take effect immediately as an urgency statute.

Ch. 556 (AB 312) Gotch. Controlled substance offenses: child day care facilities.

Existing law makes it a felony, punishable by imprisonment in the state prison for 3, 6, or 9 years, for a person 18 years of age or older to engage in specified unlawful acts involving a minor with respect to specified controlled substances and provides for additional terms of imprisonment in the state prison if the offense involved specified controlled substances and occurred in specified locations during specified hours. Existing law also provides that if a minor is found to be a person under the jurisdiction of the juvenile court by reason of engaging in specified controlled substance offenses in specified locations during specified hours, the court shall generally require, as a condition of probation, that the minor perform not more than 100 hours of community service.

This bill would provide that the provisions relating to additional terms of imprisonment for adults and the performance of community service for minors, for those adults and minors who engage in specified controlled substance offenses in specified locations during specified hours, shall apply, in addition, to controlled substance offenses which occur in child day care facilities, as defined. The bill would make conforming changes.

The bill would incorporate additional changes in Section 11380.1 of the Health and Safety Code, proposed by AB 246, to be operative only if AB 246 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 557 (AB 514) Gotch. Criminal street gangs.

Under existing law, the California Street Terrorism Enforcement and Prevention Act, any person who is convicted of a public offense punishable as a felony or a misdemeanor, which is committed for the benefit of, at the direction of, or in association with, any

NOTE: Superior numbers appear as a separate section at the end of the digests.

criminal street gang, with the specific intent to promote, further, or assist in any criminal conduct by gang members, shall be punished by imprisonment in the county jail not to exceed one year or by imprisonment in the state prison for 1, 2, or 3 years with a minimum sentence of 180 days in the county jail. The California Street Terrorism Enforcement and Prevention Act is repealed as of January 1, 1997.

This bill, in addition, would provide, until January 1, 1997, that (1) any adult who utilizes physical violence to coerce, induce, or solicit another person who is under 18 years of age to actively participate in any criminal street gang, as defined, the members of which engage in a pattern of criminal gang activity, as defined, shall be punished by imprisonment in the state prison for 1, 2, or 3 years, (2) any adult who threatens a minor with physical violence on 2 or more separate occasions within any 30-day period with the intent to coerce, induce, or solicit the minor to actively participate in a criminal street gang, as defined, the members of which engage in a pattern of criminal gang activity, as defined, shall be punished by imprisonment in the state prison for 1, 2, or 3 years or in a county jail for up to one year, and (3) a minor who is 16 years of age or older who commits either of the above offenses is guilty of a misdemeanor. This bill would impose a state-mandated local program because it would create a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 558 (AB 526) V. Brown. Crimes: kidnapping.

Existing law makes it a felony punishable by imprisonment in the state prison, as specified, for a person to commit the offenses of sodomy, lewd and lascivious acts, and oral copulation, as specified, with a person under 14 years of age and more than 10 years younger than the person.

This bill would define a "habitual child molester" as a person who has previously served at least one prison term for a violation of the above-mentioned offenses who for the purpose of committing that sexual offense, kidnapped the victim, who was under the age of 14 years at the time of the offense, and the person is convicted in the present proceeding of the same offense against at least 2 separate victims. The bill, among other things, would provide that a habitual child molester, as defined, shall be punished by 25 years in the state prison, with a minimum period of incarceration of 20 years or, at the request of the prosecutor and in lieu of this punishment, according to specified other provisions, to the extent they apply.

This bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 559 (AB 538) Richter. Crimes: video recordings.

Existing law requires any person who sells or rents video recordings of harmful matter to create an area within his or her business establishment for the placement of video recordings of harmful matter and for any material which advertises the sale or rental of these video recordings, to be labeled "adults only." A violation of this provision is an infraction punishable by a fine not to exceed $100.

This bill would provide that any person who rents a video recording and alters the video recording by adding harmful matter, and who then returns the video recording to a video rental store, shall be guilty of a misdemeanor, thereby imposing a state-mandated local program. This bill also would provide that it shall be a defense in any prosecution for a violation of this provision that the video rental store failed to post a sign, reasonably visible to all customers, delineating this provision.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish proce-

NOTE: Superior numbers appear as a separate section at the end of the digests.

dures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 560 (AB 935) Rainey. Youth Authority: parole: victim's rights.

Existing provisions of law require that notice of any hearing to consider the parole of any person under the control of the Youth Authority for the commission of specified offenses be provided to specified public officials and the attorney for the person. Existing law also provides that, upon request, written notice of any hearing to consider the parole of any person under the control of the Youth Authority shall be sent at least 30 days before the hearing to the victim or the victim's next of kin, and that the victim or next of kin has the right to appear at the hearing, personally or by counsel, to express his or her views.

This bill would revise and recast these and related provisions, clarifying the rights of the notified persons as to permissible statements and attendance at the hearing, and would additionally provide that a representative designated by the victim or next of kin may exercise the right described above on behalf of the victim or next of kin. Such a representative would be either the person's legal counsel or a family or household member of the victim. The bill would authorize the victim or next of kin, or his or her representative, to submit a statement recorded on videotape if none of these persons appear personally at the hearing.

The bill would amend a provision of law added by initiative measure which by its terms requires a ⅔ vote of each house for amendment by the Legislature.

Ch. 561 (AB 1539) Honeycutt. Pupil records: access by law enforcement.

Existing law makes various provisions for the protection of the privacy of pupil records. Existing law prohibits a school district from permitting access to pupil records without written parental consent or under judicial order, except under limited circumstances. Existing law also requires that when a pupil transfers from one school district to another or to a private school, or transfers from a private school to a school district within the state, the pupil's permanent record or copy thereof be transferred by the former district or private school upon a request from the district or private school where the pupil intends to enroll.

This bill would require school districts to provide designated peace officers, as defined, with any information specific to a particular child's identity and location that relates to the transfer of that pupil's records when probable cause exists that the pupil has been kidnapped, that the pupil's abductor may have enrolled the pupil in a school, and that the law enforcement agency has begun an active investigation.

This bill, by placing new responsibilities on school districts relating to the release of pupil records to designated law enforcement officials, would thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

The bill would become operative on the July 1 following the date on which the bill takes effect.

Ch. 562 (AB 1760) Cannella. Controlled substances: false compartments.

Under existing law, any retailer or wholesaler who sells any chemical or drug or laboratory apparatus or device with the knowledge or intent that it will be used to unlawfully manufacture, compound, convert, process, or prepare a controlled substance for unlawful sale or distribution is guilty of a misdemeanor or felony, punishable as

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified.

This bill would provide that any person who possesses, uses, or controls a false compartment, as defined, with the intent to store, conceal, smuggle, or transport a controlled substance within the false compartment shall be punished by imprisonment in a county jail for a term of imprisonment not to exceed one year or by imprisonment in the state prison. By creating a new crime, this bill would establish a state-mandated local program.

The bill would also provide that any person who designs, constructs, builds, alters, or fabricates a false compartment for, or installs or attaches a false compartment to, a vehicle with the intent to store, conceal, smuggle, or transport a controlled substance shall be punished by imprisonment in the state prison for 16 months or 2 or 3 years. By creating a new crime, this bill would establish a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 563 (SB 883) Leslie. Air pollution: trip reduction plans: south coast district board.

(1) Under existing law, the Lewis-Presley Air Quality Management Act, the South Coast Air Quality Management District is governed by a district board consisting of 12 members, 5 of whom are mayors or members of a city council appointed in accordance with prescribed procedures. The terms of those members are 4 years and until a successor is appointed, and the appointing authority is required to fill any vacancy within 60 days.

This bill would permit a south coast district board member who is a mayor or member of a city council from Orange County to be reappointed within 60 days after the expiration of his or her term and would provide that the office becomes vacant if the member is not so reappointed.

(2) Existing law requires air pollution control districts and air quality management districts to include prescribed transportation control measures in plans to attain and maintain state ambient air quality standards. Existing law prohibits the south coast district from requiring any employer with fewer than 100 employees at a single worksite to submit a trip reduction plan.

This bill would prohibit until January 1, 1997, all of those districts, except districts which meet specified criteria, from requiring any employer with fewer than 100 employees at a single worksite to implement a trip reduction program or to submit a trip reduction plan. The bill would make legislative findings and declarations.

Ch. 564 (SB 43) McCorquodale. Mental health: state and local bodies.

(1) Existing law establishes local mental health boards to perform various duties in the oversight of community mental health services in the state. Existing law specifies that in counties under 80,000 population, the board may be established as an advisory board or commission, depending on the preference of the county.

This bill would, instead, specify that a local mental health board may be established as an advisory board or commission in any county, depending on the preference of the county.

(2) Existing law establishes the State Planning Council, for the purpose of fulfilling mental health planning requirements mandated by federal law. Existing law requires the Director of Mental Health to appoint 9 of the council's 40 members, to include specified numbers of representatives from various organizations.

This bill would rename the council the California Mental Health Planning Council. It would remove the limitation on the number of members of the council appointed by the director, and on the number of representatives from all but one of the organizations. It would establish a 3-year term for members.

(3) Existing law requires the council to, among other things, assess the impact of realignment on the delivery of mental health services in the state, and to report to the Legislature prior to fiscal committee deliberations for the 1992–1993 fiscal year and

NOTE: Superior numbers appear as a separate section at the end of the digests.

submit a final report no later than January 15, 1993.

This bill would, instead, require the council to report to the Legislature and other specified entities on the effect of realignment on the delivery of services no later than January 1, 1995.

(4) Existing law repeals various provisions relating to the council on January 1, 1995.

This bill would extend the repeal date to January 1, 1996, and repeal the provisions relating to the establishment and membership of the council as of that date.

(5) This bill would also make various technical changes.

Ch. 565 (SB 214) McCorquodale. Fresh poultry products: definition.

(1) Existing law makes it unlawful to mislabel poultry meat.

This bill would prohibit any person who processes, butchers, slaughters, packs, repacks, or sells poultry or poultry meat for wholesale distribution or sale, or who engages in the business of buying, selling, or reselling poultry or poultry meat on commission for wholesale distribution or sale from advertising, labeling, describing, otherwise holding out, or selling as "fresh" any poultry or poultry meat whose internal temperature ever has been equal to or below 25 degrees Fahrenheit or that ever has been stored in the aggregate for 24 hours or more at an average ambient temperature of 25 degrees Fahrenheit or below. Since under existing law a violation of this provision would be a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 566 (SB 467) Hill. Redevelopment agencies: allocations to the Educational Revenue Augmentation Fund.

(1) Existing law requires each redevelopment agency to allocate, during the 1992–93 fiscal year, a specified amount of its revenues, determined in accordance with a specified formula, to the Educational Revenue Augmentation Fund established for allocation to school and community college districts.

This bill would, for any redevelopment agency that apportioned 33% or more of its tax increment to a county in the 1990–91 fiscal year, require the Director of Finance to reduce the amount of the allocation owed by the agency pursuant to this provision by an amount equal to the percentage of the tax increment allocated by that agency to a county in the 1990–91 fiscal year. The amount of this reduction would be allocated by the county to the Educational Revenue Augmentation Fund within 30 days of the effective date of the bill. The bill would require the Director of Finance to transfer from the Educational Revenue Augmentation Fund to an agency any amount that he or she determines to be owed from the fund to that agency pursuant to the bill, thereby making an appropriation. By placing new duties upon the county auditor, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 567 (AB 47) Areias. University of California: San Joaquin Valley campus.

Under existing law, no provision is made for the establishment of a University of California campus in the Central Valley region of California. Existing law creates the

NOTE: Superior numbers appear as a separate section at the end of the digests.

June 1990 Higher Education Capital Outlay Bond Fund for the purpose of funding aid to, among other institutions, the University of California, for, among other things, the acquisition of sites upon which new facilities are to be constructed and to provide funds for the payment of preconstruction costs.

This bill would appropriate $1,500,000 from that fund to the University of California for the purpose of preparing environmental studies and environmental impact reports related to the selection of a site for a new campus of the University of California in the Central Valley region of California.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 568 (AB 957) Cannella. Sales and use taxes: poultry litter.

The existing California Sales and Use Tax Law imposes a state sales or use tax on the sale or use of tangible personal property in the state, unless that sale or use is exempted from that tax.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would exempt from state and local sales and use taxes wood shavings, sawdust, rice hulls, or other products that are used as litter in poultry and egg production, as specified.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, however, its operative date would depend on its effective date.

Ch. 569 (AB 1186) Aguiar. School funding: year-round scheduling.

Under existing law, state school funding apportionments to school districts are calculated, in part, according to the average daily attendance in each district, which is based upon the number of days in which classes are taught in the district.

This bill would permit a school district to exclude, from the calculation for that purpose of the number of days taught, the number of days taught in any school year in late entry makeup classes, as defined, in programs of year-round scheduling, as to any pupil who entered the program of year-round scheduling after September 1 of that school year, if the track in which the pupil is enrolled began instruction in July or August of that school year and subject to specified limits.

Ch. 570 (AB 1837) Statham. Employment: minors.

Existing law provides that, except as provided in specified provisions of existing law, no minor 15 years of age or younger shall be employed more than 8 hours in one day, or more than 40 hours in one week, or before 7 a.m., or after 7 p.m., except that from June 1 through Labor Day, that minor may work until 9 p.m. Existing law further provides that no minor 16 or 17 years of age shall be employed more than 8 hours in one day, or more than 48 hours in one week, or before 5 a.m., or after 10 p.m. on any day preceding a schoolday, but may work until 12:30 a.m. on any evening preceding a nonschoolday. Existing law provides that these provisions are inapplicable to any minor employed to deliver newspapers to consumers.

This bill would add a new exception to that provision for children employed in the entertainment industry. It would prohibit any minor from being employed in that industry for more than 8 hours in one day, or more than 48 hours in one week, or before 5 a.m., or after 10 p.m. on any day preceding a schoolday, but would allow a minor to work until 12:30 a.m. on any evening preceding a nonschoolday. This bill would make a violation of its provisions punishable as a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

This bill would also delete an erroneous cross-reference to a provision of existing law.

The California Constitution requires the state to reimburse local agencies and school

NOTE: Superior numbers appear as a separate section at the end of the digests.

districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 571 (SB 503) Torres. Gangs: Hope in Youth Campaign.

Under existing law, the Gang Violence Suppression Program was established in the Office of Criminal Justice Planning to provide financial and technical assistance for, among other entities, community-based organizations that are primarily engaged in the suppression of gang violence.

This bill would appropriate $1,600,000 from the General Fund to the Los Angeles Area Hope in Youth Campaign to be used to assist in the development of alternatives to gangs for youth, as specified. The bill would declare legislative findings relating to this appropriation.

The bill would also require the Office of Criminal Justice Planning to evaluate the program and to provide a report to the Legislature on or before May 1, 1994, and would require that 5% of the total funds appropriated be set aside for the purposes of program monitoring, evaluation, and administration to be performed by the Office of Criminal Justice Planning.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 572 (AB 1041) Archie-Hudson. Medi-Cal: disproportionate share hospitals.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law provides for supplemental reimbursement of hospitals that serve a disproportionate share of Medi-Cal recipients.

Existing law requires the department to issue a disproportionate share list that serves as a basis for disproportionate share hospital payments.

This bill would revise the terms used in the list of factors that are contained in the list.

The bill would also specify the definition of terms used in the calculation of the basis for allocating funds from the Medi-Cal Inpatient Payment Adjustment Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 573 (SB 456) Presley. Medi-Cal.

(1) Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law provides that any medically needy aged, blind, or disabled person who was eligible for benefits for categorically needy persons under the Medi-Cal program under specified provisions of law, and who, but for reductions made pursuant to a specified provision of law, would be eligible to receive benefits, shall remain eligible to receive benefits as long as he or she meets other applicable requirements, regardless of the availability of federal financial participation for the otherwise applicable share of cost.

This bill would, instead, specify that any medically needy aged, blind, or disabled person who was categorically needy for the month of August 1993, and was discontinued as of September 1, 1993, and who, but for the specified reduction, would be eligible to receive benefits without a share of cost, shall remain eligible to receive benefits without a share of cost as if that person were categorically needy, regardless of the availability of federal financial participation for the share of cost paid from state funds pursuant to this provision.

(2) Existing law authorizes disproportionate share hospitals to negotiate with the California Medical Assistance Commission for distributions from the Emergency Services and Supplemental Payments Fund, which includes specified types of funds.

This bill would specify that the fund also includes moneys appropriated to the fund, or appropriated for poison control center grants and transferred to the fund, pursuant

NOTE: Superior numbers appear as a separate section at the end of the digests.

to the annual Budget Act.

This bill would amend the Budget Act of 1993 to authorize this transfer for the 1993–94 fiscal year, thus making an appropriation.

(3) Existing law establishes the Medi-Cal Inpatient Adjustment Fund, a continuously appropriated fund, to be used as the source for the nonfederal share of payments to eligible hospitals under the Medi-Cal program, according to specified criteria.

This bill would revise the criteria pursuant to which payments to hospitals from the fund are determined. By revising the use of a continuously appropriated fund, this bill would make an appropriation.

The bill would also appropriate $10,000,000 of a specified transfer of moneys between the fund and the Health Care Deposit Fund to the department for Medi-Cal managed care programs.

(4) This bill would incorporate additional amendments to Section 14163 of the Welfare and Institutions Code proposed by AB 1041, contingent upon the prior enactment of that bill. It would also make changes in Section 14163 as amended by that bill in regard to the computation of transfer amounts.

(5) Existing law provides for the adoption of emergency regulations by the department of the administration of prepaid health plans providing Medi-Cal services.

Existing law contains specified provisions including exemptions from certain provisions of the Administrative Procedure Act, applicable to the adoption of these emergency regulations.

This bill would, effective January 1, 1995, make changes in these provisions.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 574 (SB 44) Morgan. Education: partnership academies.

(1) Existing law establishes the partnership academies program in this state as a school-business partnership program to provide occupational training to educationally disadvantaged high school students. Under existing law, the Superintendent of Public Instruction was required to issue grants to school districts maintaining high schools from the 1987–88 fiscal year until the 1990–91 fiscal year to plan, establish, and maintain academies.

This bill states the intent of the Legislature to expand the number of academies in this state's high schools and to broaden the program, as specified.

(2) Existing law requires the superintendent to issue grants to school districts for academy expenses at specified levels depending on the year of operation from 1987–88 until 1990–91.

This bill would revise those levels and require that the grants be issued from 1993–94 until 1996–97. Additional conditions for pupil participation in academy programs would also be imposed.

(3) Existing law required the superintendent to contract for a review of the effectiveness of partnership academies and report the results to the Legislature by January 1, 1991.

This bill deletes that requirement and instead requires the superintendent to contract for a 4-year independent review of the effectiveness of the newly funded academies with preliminary results reported after the 1994–95 fiscal year and a final evaluation performed after the 1996–97 fiscal year.

Ch. 575 (SB 118) Maddy. Horseracing: distribution of amounts to horsemen's organizations: appeals to the California Horse Racing Board.

(1) Under existing law, for racing meetings other than thoroughbred meetings, if no contract has been signed between the association conducting the racing meeting and the organization representing the horsemen by the time the racing meeting commences, the California Horse Racing Board is required, within 15 days after the commencement of the racing meeting, to determine the amounts payable to the horsemen's organization for administrative expenses and services, and to provide for the direct payment of those amounts.

This bill would instead require the board to make that determination within 20 days

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

after the commencement of the racing meeting. This provision would be repealed January 1, 1995.

(2) Existing law requires any horsemen's association to be incorporated under the laws of the State of California in order to receive a distribution pursuant to the Horse Racing Law.

This bill would require each horsemen's association to provide for the representation of both owners and trainers on its board of directors. The hill would also require the California Horse Racing Board to approve the organization's bylaws.

(3) Under existing law, the horsemen at a racing association or fair must consent to the transmission of the audiovisual signal to a satellite wagering facility, and to the acceptance of wagers in that race at the facility. Existing law also provides that if consent is withheld, that action may be appealed to the board.

This bill would require the board to hold a hearing if that action is appealed to the board.

Ch. 576 (SB 208) Lewis. Sentencing: murder: credits.

Existing law imposes a term of imprisonment in the state prison for life whenever a person is convicted of a felony in which the person inflicted great bodily injury, as specified, or personally used force which was likely to produce great bodily injury where the person has served 2 prior prison terms for specified crimes, including, among others, the crime of murder, attempted murder, voluntary manslaughter, mayhem, and specified sex crimes. Under existing law, the offender is designated as a habitual offender and the person so sentenced is not eligible for release on parole for a period of at least 20 years, as specified, subject only to reduction in time served, as specified.

This bill would expressly specify that a person convicted of murder and sentenced pursuant to these provisions is eligible only for good behavior and participation credits, as specified.

This bill would also contain a declaration of legislative intent.

Ch. 577 (AB 864) Quackenbush. Horseracing: satellite wagering.

(1) Existing law permits the California Horse Racing Board to authorize any licensed association or satellite wagering facility to accept wagers on races conducted in this state comprising the program of racing generally known as the Breeders' Cup and feature races conducted in this state having a gross purse of $50,000 or more.

This bill would delete the authorization to accept wagers on races conducted in this state comprising the program of racing generally known as the Breeders' Cup. The bill would permit fairs and licensed associations to accept wagers on any featured race in this state having a gross purse of $20,000 or more if wagering is offered under the conditions specified in the bill. Under existing law, all revenues distributed to the state as license fees from horseracing are required to be deposited in the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes. The bill would, by authorizing additional wagering by fairs, increase the amount of continuously appropriated license fees, thereby making an appropriation. The bill would also authorize the imposition of a state tax for the purposes of Article XIII A of the California Constitution.

(2) This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 578 (AB 584) Cortese. Air pollution: trucks.

Existing law requires the State Air Resources Board to develop a test procedure and to adopt regulations prohibiting the use of heavy-duty motor vehicles which have excessive smoke emissions, and provides for the enforcement of those provisions, including requiring the vehicle owner to immediately correct deficiencies, and to pay a specified civil penalty. Existing law provides that a cited vehicle owner may request an administrative hearing within 30 days.

This bill would extend the period for requesting a hearing to 45 days.

The bill would prescribe additional criteria relating to the adoption and use of smoke testing standards, procedures, and measuring equipment.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 579 (AB 1062) Costa. Air pollution: San Joaquin Valley.

(1) Under existing law, if the San Joaquin Valley Unified Air Pollution Control District (unified district) is abolished, the San Joaquin Valley Air Quality Management District (valley district) is to be created. A member of the valley district board, if created, would rotate with a board member of one of the other air pollution control or air quality management districts as a member of the State Air Resources Board, which currently consists of 9 members, including one public member.

This bill would increase the membership of the state board to 11 members by adding another public member, and by adding on a permanent basis a member of the governing board of the unified district, or, if the unified district ceases to exist, a member of the governing board of the valley district, if created. The bill would thereby impose a state-mandated local program by requiring a district to make that appointment.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 580 (SB 193) Marks. Employment: occupational safety and health: violations: appeals.

Existing law designates specified provisions of the Government Code as the Family Rights Act of 1991.

This bill would provide that those provisions shall be known, and may be cited, as the Moore-Brown-Roberti Family Rights Act.

Existing law authorizes the Division of Occupational Safety and Health within the Department of Industrial Relations, after inspection or investigation, to issue to an employer a citation with respect to an alleged violation.

This bill would require the Division of Occupational Safety and Health to also issue a citation if, after inspection or investigation, the division finds an employer has falsified any materials posted in the workplace or distributed to employees related to the California Occupational Safety and Health Act. It would require a copy of the citation to be displayed, as provided. It would provide that any employer served with a citation pursuant to this act may appeal to the Occupational Safety and Health Appeals Board pursuant to specified provisions of existing law. The bill would specify that the provisions of this act are in addition to any other criminal penalty or civil remedy that may be applicable.

This bill would also provide that if, upon inspection or investigation, the Division of Occupational Safety and Health finds no violations pursuant to specified provisions of law, it shall issue a written notice to the employer specifying the areas inspected and stating that no violations were found. It would require the Director of Industrial Relations to prescribe procedures for the issuance of this notice.

Ch. 581 (AB 1178) Epple. Stalking.

(1) Existing law prohibits a person from stalking, defined as willfully, maliciously, and repeatedly following or harassing, as defined, another person and making a credible threat, as defined, with the intent to place that person in reasonable fear of death or great bodily injury or place that person in reasonable fear of the death or great bodily injury of his or her immediate family, punishable as a misdemeanor.

This bill would, instead, require that the person act with the intent to place that person in reasonable fear for his or her safety, or the safety of his or her immediate family, as defined. This bill also would, instead, make the first offense a felony or a misdemeanor.

Because this bill would change the definition of a crime, it would impose a state-mandated local program.

(2) Existing law makes the above offense a misdemeanor or a felony where it violates a temporary restraining order or an injunction, or both, in effect prohibiting the same behavior against the same party.

This bill, instead, would make a violation when there is a temporary restraining order, as specified, a felony, punishable by imprisonment in the state prison for 2, 3, or 4 years.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law makes a 2nd or subsequent conviction under (1) above occurring within 7 years of a prior conviction against the same victim and involving an act of violence or a credible threat of violence, as defined, a misdemeanor or a felony.

This bill would delete this provision.

Existing law makes a person convicted of a felony under (1) above who commits a 2nd or subsequent violation of that provision against the same victim and involving an act of violence or a "credible threat" of violence, as defined, guilty of a felony, punishable by imprisonment in the state prison for 16 months or 2 or 3 years.

This bill would delete the requirements that this offense be against the same victim and involve an act of violence or a credible threat of violence. This bill also, instead, would make a violation under this provision, punishable by imprisonment in the state prison for 2, 3, or 4 years.

Because this bill would change the definition of a crime, it would impose a state-mandated local program.

This bill would redefine "harasses" and "credible threat" for the purpose of these provisions.

(4) Existing law authorizes the Director of Corrections to certify to the Director of the State Department of Mental Health or the State Department of Developmental Services that it is his or her opinion that the rehabilitation of a mentally ill, mentally deficient, or insane person confined in a state prison may be expedited by treatment at a state hospital under their jurisdiction. Upon this certification, the director of the appropriate department is required to evaluate the prisoner and based on the director's determination that it is appropriate the prisoner is transferred to a state hospital, as specified.

This bill would require the court to consider whether a defendant convicted under the above stalking provisions would benefit from treatment and placement pursuant to this provision and if so, this bill would require the court to recommend that the Department of Corrections initiate placement of the defendant in treatment pursuant to this provision. This bill also would require the Director of Corrections to consider any recommendation of the court submitted pursuant to this provision and to certify in accordance with this provision with regard to the defendant, if appropriate.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 582 (AB 1548) Alpert. Exemplary damages: stalking.

Existing law establishes the crime of stalking, as specified. Existing law also provides for the award of punitive damages, in addition to actual damages, in certain civil actions where the defendant has been proven guilty of oppression, fraud, or malice.

This bill would establish the tort of stalking, as specified, provide that a person guilty of the tort of stalking may be held liable to the victim thereof in a civil action for general, special, and punitive damages, in addition to specified equitable remedies.

Ch. 583 (AB 284) Speier. Stalking.

(1) Existing law requires, among other things, that no fees be charged for the issuance of any temporary restraining order, unless the order had been dissolved 3 times previously.

This bill would, instead, require that there be no filing fee for a petition or response relating to a protective order, restraining order, or a permanent injunction restraining violence or threats of violence in any specified action.

(2) Existing law provides, among other things, that there is no filing fee for a petition or response filed in a proceeding brought pursuant to the Domestic Violence Prevention Act.

This bill would provide that there is no filing fee for a petition, response, or modification of a protective order filed in a proceeding brought pursuant to the Domestic Violence Prevention Act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law provides that every person guilty of contempt of court through the willful disobedience of any process or order lawfully issued by any court is guilty of a misdemeanor, punishable by imprisonment in a county jail for up to 6 months.

This bill would provide, in addition, that any person who is guilty of contempt in violation of the above provision by willfully contacting a victim by phone, mail, or directly and who has been previously convicted of stalking, as defined, shall be punished by imprisonment in a county jail for not more than one year, by a fine of $5,000, or by both that fine and imprisonment. Because this bill would change the definition of a crime, it would impose a state-mandated local program.

(4) Existing law provides that any willful and knowing violation of any specified court order, including, but not limited to, an order enjoining any party from molesting, attacking, striking, threatening, sexually assaulting, battering, harassing, contacting repeatedly by mail with intent to harass, or disturbing the peace of the other party, or other named family and household members, when obtained pursuant to specified provisions of law, is a misdemeanor, punishable as specified.

This bill would, in addition, provide that any willful and knowing violation of a temporary restraining order, preliminary injunction, or injunction, when obtained pursuant to specified provisions of law, is a misdemeanor, punishable as specified.

(5) Existing law provides that every person who willfully commits a trespass by any of specified acts is guilty of a misdemeanor.

This bill would include refusing or failing to leave a battered women's shelter at any time after being requested to leave by a managing authority of the shelter among the specified acts that constitute trespass. In addition, the bill would provide that a person who is convicted of violating this provision shall be punished by imprisonment in a county jail for not more than one year, thereby imposing a state-mandated local program, and that the court may order a defendant who is convicted of violating this provision to make restitution to a battered woman in an amount equal to the relocation expenses of the battered woman and her children if those expenses are incurred as a result of trespass by the defendant at a battered women's shelter.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) This bill would incorporate additional changes in Section 166 of the Penal Code proposed by AB 303, to be operative only if AB 303 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

(8) This bill would incorporate additional changes in Section 273.6 of the Penal Code proposed by SB 739, to be operative only if SB 739 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

(9) This bill would incorporate additional changes in Section 602 of the Penal Code proposed by AB 504, to be operative only if AB 504 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 584 (AB 92) Richter. Vehicles: motorcycles.

Existing law defines a "motorcycle" as any motor vehicle other than a tractor having a seat or saddle for the use of the rider and designed to travel on not more than 3 wheels in contact with the ground, except that 4 wheels may be in contact with the ground if 2 of the wheels are a functional part of a sidecar, and weighing less than 1,500 pounds or, if electrically powered, weighing not more than 2,500 pounds and having a maximum speed of 45 miles per hour.

This bill would make clarifying changes in that definition and would exempt from the above definition a motor vehicle that otherwise meets the requirements of the definition, has a partially or completely enclosed seating area for the driver and passenger, and is used by local public agencies for the enforcement of parking control provisions. The bill would make the exemption inoperative if the Director of Transportation receives notice of a determination by the National Highway Traffic Safety Administration that implementation of the exemption would subject California to a transfer of funds

NOTE: Superior numbers appear as a separate section at the end of the digests.

pursuant to a specified provision of federal law and submits that notice to the Secretary of State, or January 1, 1997, whichever occurs first.

Ch. 585 (AB 10) Costa. Prisons.

(1) Existing law authorizes the construction of correctional facilities, as specified.

This bill, in addition, would authorize the Department of Corrections to construct and establish, a combination medium and maximum security prison together with a Level I support services facility either on the grounds of the California State Prison-Corcoran to be known as the California State Prison-Kings County at Corcoran II or in the vicinity of Delano to be known as the California State Prison-Kern County at Delano II, as specified.

The bill would authorize the necessary funding for the construction of these facilities to be obtained through lease-purchase financing methods. The bill would specify that funds derived from this method are continuously appropriated, as specified, for purposes of acquiring and constructing or refinancing these prisons with $276,500,000 available for capital outlay for the California State Prison-Kings County at Corcoran II and$243,500,-000 available for capital outlay for the California State Prison-Kern County at Delano II.

(2) This bill would authorize the Department of Corrections to construct and establish a secure substance abuse treatment facility, for inmates who have a history of substance abuse and meet specified criteria. The bill would require the department to monitor the progress of parolees released from these facilities and to report to the Legislature annually on or before January 1 as to, among other information, the rate of recidivism and relapse to substance abuse of the inmates released from these facilities.

The bill would provide that the necessary funding for the construction of the secure substance abuse treatment facility be obtained through lease-purchase financing arrangement, as specified. The bill would provide that funds derived from this financing are continuously appropriated to the State Public Works Board on behalf of the Department of Corrections for the purpose of acquiring and constructing or refinancing the prison facility. The bill would also provide that of the funds derived from lease-purchase financing, $93,000,000 shall be available for capital outlay for these facilities.

(3) The bill would also appropriate$13,000,000 from the 1990 Prison Construction Fund to the Department of Corrections with $6,500,000 of these funds for the California State Prison-Kings County at Corcoran II and the California State Prison-Kern County at Delano II and $6,500,000 for the Secure Substance Abuse Treatment Facility to be available for specified purposes, including site acquisition, environmental studies, construction, and specified equipment.

(4) The bill would also require the Department of Corrections to submit a report to the Legislature on or before December 31, 1994, detailing the substance abuse, academic, and vocational education programs to be operated at the prisons specified in (1) above. The bill would specify that the department may not open more than 500 beds as authorized in (1) until the beds authorized in (2) are occupied and funded, as specified. The bill would require the Department of Corrections, in conjunction with the California Department of Education and with input from affected local education agencies, to develop and report to the Legislature on or before June 30, 1994, a recommended methodology for determining the level of mitigation the department shall provide to local education agencies impacted by prison sitings.

(5) Existing law authorizes the establishment and construction of a joint-use correctional facility consisting of a state prison reception center and a separately located minimum security facility situated on the existing grounds of San Quentin for the joint use of the Department of Corrections and the County of Marin, as specified.

This bill would delete these provisions.

(6) Existing law provides that it is in the interest of public safety for the state to provide for the supervision and surveillance of parolees.

This bill would additionally include within the above statement, with respect to the supervision and surveillance of parolees, the judicious use of revocation actions.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 586 (AB 313) Ferguson. Controlled substances: minors.

Existing law provides that every person 18 years of age or over who engages in specified controlled substance offenses involving a minor and specified controlled substances, including cocaine base, shall be punished by imprisonment in the state prison for 3, 6, or 9 years.

This bill would provide, in addition, that any person 18 years of age or older who is convicted for a 2nd or subsequent time of violating the above provision with respect to cocaine base, where the previous conviction resulted in a prison sentence, shall, as a full and separately served enhancement to the punishment imposed for the 2nd or subsequent conviction, be punished by imprisonment in the state prison for 1, 2, or 3 years. The bill would further provide that if the 2nd or subsequent violation, as described above, involved a minor who is 14 years of age or younger, the defendant shall, as a full and separately served enhancement, be punished by imprisonment in the state prison for 1, 2, or 3 years, at the discretion of the court.

Ch. 587 (AB 2009) Snyder. Sex offenses.

Existing law provides that any person who willfully and lewdly commits any lewd or lascivious act, as specified, (1) upon or with the body, or any part or member thereof, of a child under the age of 14 years, with the intent of arousing, appealing to, or gratifying the lust or passions or sexual desires of that person or of the child, or (2) by use of force, violence, duress, menace, or fear of immediate and unlawful bodily injury on the victim or another person, is guilty of a felony.

Existing law provides that probation shall not be granted to, nor shall the execution or imposition of sentence be suspended for, nor shall a finding bringing the defendant within these provisions be stricken, as specified, for any person who violates the above offense under specified circumstances or who is convicted of kidnapping the child victim, as specified, and who kidnapped the victim for the purpose of committing the above offense.

Existing law provides that any person who either resides in the same home with the minor child or has recurring access to the child, who over a period of time, not less than 3 months in duration, engages in 3 or more acts of substantial sexual conduct, as defined, with a child under the age of 14 years at the time of the commission of the offense, or 3 or more acts of lewd or lascivious conduct in violation of the above provision with a child under the age of 14 years at the time of the commission of the offense, is guilty of the offense of continuous sexual abuse of a child, punishable by imprisonment in the state prison for 6, 12, or 16 years.

This bill would extend the above provision prohibiting the granting of probation to apply to the offense of continuous sexual abuse of a child as well as lewd and lascivious acts, as specified. This bill also would revise certain of the specified circumstances that apply to a violation of these offenses and make a person ineligible for probation.

Ch. 588 (AB 327) Murray. Criminal procedure: serious felonies.

Existing law, added by initiative statute, prohibits plea bargaining, except under specified circumstances, in any case in which the indictment or information charges, among other offenses, any listed serious felony, and provides that any person convicted of a serious felony who has previously been convicted of a serious felony, as specified, is subject to a 5-year enhancement for each such prior conviction charged and tried separately.

This bill would include within the list of serious felonies any conspiracy to commit specified controlled substance offenses involving the selling, furnishing, administering, giving, or offering to sell, furnish, administer, or give to a minor heroin, cocaine base, or cocaine as these offenses apply to a provision which authorizes, where the substance exceeds 3 pounds, various enhancements and where the defendant conspirator was substantially involved in the planning, direction, or financing of the underlying offense.

Existing law provides that the above-mentioned provisions added by initiative statute shall not be amended by the Legislature except by a statute passed in each house by a rollcall vote entered in the journal, ⅔ of the membership concurring, or by a statute that becomes effective only when approved by the electors.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would incorporate additional changes in Section 1192.7 of the Penal Code proposed by SB 60, to be operative only if SB 60 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

Ch. 589 (AB 2211) *Committee on Judiciary.* Maintenance of the codes.

Existing law directs the Legislative Counsel to advise the Legislature from time to time as to legislation necessary to maintain the codes.

This bill would restate existing provisions of law to effectuate the recommendations made by the Legislative Counsel to the Legislature for consideration during 1993 and would not make any substantive change in the law.

Ch. 590 (SB 41) Presley. Habitual sexual offenders.

Existing law sets forth specified punishments for sex crimes, including, among others, the crimes of rape, sodomy, oral copulation, and penetration with a foreign object.

This bill would include legislative findings and declarations and would define a "habitual sexual offender." The bill also would provide that a habitual sexual offender who previously has served at least one prison term for one or more of specified sex offenses and was convicted in the present proceeding of 2 separate offenses against 2 separate victims shall be punished by 25 years in the state prison; and a habitual sexual offender who previously has served at least one prison term for one or more of specified offenses and was convicted in the present proceeding of at least 3 separate offenses against at least 3 separate victims shall be punished by imprisonment in the state prison for 25 years to life. This bill also would provide that a person who comes under the definition of a habitual sexual offender, in the alternative, shall be punished, as specified.

Ch. 591 (AB 25) Burton. Enhancements: sex offenses involving minor.

Under existing law, (1) it is a felony, punishable by 3, 6, or 8 years in the state prison, for any person to willfully and lewdly commit any lewd or lascivious act, as specified, upon or with the body, or any part or member thereof, of a child under the age of 14 years, with the intent of arousing, appealing to, or gratifying the lust or passions or sexual desires of that person or of the child; and (2) it is a felony, punishable by 6, 12, or 16 years in the state prison, for any person who either resides in the same home with a minor child or has recurring access to the child to engage in continuous sexual abuse of the child, as specified.

This bill would provide that any adult who, prior to or during the commission or attempted commission of the above sex offenses, exhibits to the minor any matter, the production of which involves the use of a person under the age of 14 years personally engaging in or simulating sexual conduct, with the intent of arousing, appealing to, or gratifying the lust, passions, or sexual desires of that person or of the minor, or with the intent, or for the purpose, of seducing the minor, shall, in addition and consecutive to the punishment for the offenses specified above, be punished by an additional term of one year, if convicted of the commission or attempted commission of the felony specified in (1) above, or 2 years, if convicted of the commission or attempted commission of the felony specified in (2) above. The bill would make conforming changes.

This bill would incorporate additional changes in Section 1170.1 of the Penal Code proposed by AB 41, to be operative only if AB 41 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 592 (AB 1330) Epple. Sentencing.

Under existing law, the term of imprisonment shall not exceed twice the number of years imposed by the court as the base term unless, among other things, specified enhancements are imposed including the enhancement for furnishing or offering to furnish a firearm to another during the commission of a felony or attempted commission for the purpose of aiding, abetting, or enabling the other person to commit a felony.

This bill would additionally provide that the term of imprisonment shall not exceed twice the number of years unless a penalty enhancement is imposed because the person was arrested for a secondary offense, as specified, that is alleged to have been committed while that person was released from custody on a primary offense, as specified, if both

NOTE: Superior numbers appear as a separate section at the end of the digests.

the primary and secondary offenses were serious felonies, as specified.

This bill would incorporate additional changes in Section 1170.1 of the Penal Code proposed by AB 25 or AB 41, or both, to be operative only if AB 25 or AB 41, or both, and this bill are chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 593 (AB 2046) Margolin. Clinical laboratory tests.

(1) Under existing law, the practices of chiropractic, clinical laboratory technology, dentistry, medicine, research psychoanalysis, speech pathology and audiology, optometry, occupational therapy, dietetics, physical therapy, nursing, vocational nursing, psychology, hearing aid dispensing, physician assisting, osteopathy, respiratory therapy, nursing home administration, pharmacy, psychiatric technology, veterinary medicine, acupuncture, marriage, family and child counseling, and social work are subject to licensure and regulation by the state.

Existing law prohibits any person licensed for one of those practices to charge, bill, or otherwise solicit payment from any patient, client, or customer, for any clinical laboratory service if the service was not actually rendered by that person or under his or her direct supervision, unless the patient, client, or customer is apprised at the first solicitation for payment of the name, address, and charges of the clinical laboratory performing the service.

This bill would require, commencing July 1, 1994, a clinical laboratory to provide, upon request, to each of its referring providers, as defined, a schedule of fees for prescribed services. The bill would require, commencing July 1, 1994, a clinical laboratory that provides a list of laboratory services to a referring provider or to a potential referring provider to include a schedule of fees for the laboratory services listed.

(2) Since violation of these prohibitions would constitute a misdemeanor under existing provisions of law, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would incorporate additional changes in Section 655.5 of the Business and Professions Code, proposed by AB 179, to be operative only if AB 179 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

Ch. 594 (AB 1821) Costa. Motorcycles: all-terrain vehicles.

(1) Existing law defines a "motorcycle" as any motor vehicle other than a tractor having a seat or saddle for the use of the rider and designed to travel on not more than 3 wheels in contact with the ground, except that 4 wheels may be in contact with the ground if 2 of the wheels are a functional part of a sidecar, and weighing less than 1,500 pounds or, if electrically powered, weighing not more than 2,500 pounds and having a maximum speed of 45 miles per hour.

This bill would make clarifying changes in that definition.

(2) Existing law authorizes the New Motor Vehicle Board to, among other things, adopt rules and regulations relating to persons holding licenses as new motor vehicle dealers, manufacturers, and distributors. Existing law exempts from those provisions transactions involving off-highway motor vehicles subject to identification, as defined, including all-terrain vehicles, as defined.

This bill would extend the authority of the board to include transactions involving all-terrain vehicles.

(3) This bill also would incorporate additional changes in Section 400 of the Vehicle Code proposed by AB 92 to be operative only if AB 92 and this bill are both chaptered and become operative on or before January 1, 1994, and this bill is chaptered last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 595 (AB 187) Solis. Sex offenses.

(1) Existing law defines rape of a person who is the spouse of a perpetrator as an act of sexual intercourse accomplished against the will of the spouse by means of force or fear of immediate and unlawful bodily injury on the spouse or another, or where the act is accomplished against the victim's will by threatening to retaliate in the future against the victim or any other person, and there is a reasonable possibility that the perpetrator will execute the threat. This crime is punishable either by imprisonment in a county jail for not more than one year, or in the state prison for 3, 6, or 8 years.

This bill would delete the current definition of spousal rape and, instead, would define spousal rape in substantially the same manner as the definition of rape, except as specified. In addition, the bill would make the crime of spousal rape, punishable by imprisonment in the state prison for 3, 6, or 8 years, rather than punishable either by imprisonment in a county jail for not more than one year, or in the state prison for 3, 6, or 8 years.

(2) Under existing law, rape may be accomplished with a person who is at the time unconscious of the nature of the act if this fact is known to the accused.

This bill would also provide that spousal rape may be accomplished with a person who is at the time unconscious of the nature of the act if this fact is known to the accused. This bill would define the phrase "unconscious of the nature of the act" for purposes of other specified sex offenses including rape, spousal rape, and sodomy.

(3) Existing law requires persons convicted of certain enumerated sex offenses, including rape, to register with the chief of police of the city in which the person is domiciled or the sheriff of the county in which the person is domiciled if in an unincorporated area. Under existing law, any person who is required to register and who fails to register is guilty of a misdemeanor.

This bill would require persons convicted of violating the provisions concerning spousal rape involving the use of force or violence for which the person is sentenced to state prison, to register under these provisions. To the extent this bill would expand the scope of an existing crime and impose new responsibilities on local law enforcement officials, it would impose a state-mandated local program.

(4) This bill would incorporate additional changes in Section 290 of the Penal Code proposed by AB 191, to be operative only if AB 191 and this bill are both chaptered, this bill becomes effective on January 1, 1994, AB 191 becomes effective on or before January 1, 1994, and this bill is chaptered last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be payable from the State Mandates Claims Fund.

Ch. 596 (SB 22) Russell. Crime: unlawful sexual intercourse.

Existing law provides that unlawful sexual intercourse is sexual intercourse with a female under the age of 18 years who is not the wife of the perpetrator.

This bill would instead provide that unlawful sexual intercourse is sexual intercourse with a person who is not the spouse of the perpetrator, if the person is a minor, which the bill defines as a person under the age of 18 years.

The bill would also provide that any person who engages in an act of unlawful sexual intercourse with a minor who is not more than 3 years older or younger than the perpetrator is guilty of a misdemeanor; any person who engages in an act of unlawful sexual intercourse with a minor who is more than 3 years younger than the perpetrator is guilty of either a misdemeanor or a felony, and shall be punished by imprisonment in a county jail not exceeding one year, or by imprisonment in the state prison; and any person over the age of 21 years who engages in an act of unlawful sexual intercourse with a minor who is under 16 years of age is guilty of either a misdemeanor or a felony, and

NOTE: Superior numbers appear as a separate section at the end of the digests.

shall be punished by imprisonment in a county jail not exceeding one year, or by imprisonment in the state prison for 2, 3, or 4 years. Because this bill would create a new crime, it would establish a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 597 (SB 374) Hill. Crimes: graffiti.

(1) Existing law provides that any person who writes, sprays, scratches, or otherwise affixes graffiti on or in the facilities or vehicles of a governmental entity or a public transportation system, as specified, or on or in the facilities of or vehicles operated by entities subsidized by the Department of Transportation, or on or in any leased or rented facilities and vehicles for which these entities or facilities incur costs of less than $250 for cleanup, repair, or replacement is guilty of an infraction, punishable by a fine not to exceed $250 and by community service for a total time not to exceed 48 hours over a period not to exceed 30 days, as specified.

This bill, instead, would provide that the infraction is punishable by a fine not to exceed $500 and by a minimum of 24 hours of community service for a total time not to exceed 48 hours over a period not to exceed 30 days, as specified.

(2) Existing law provides that, except as provided in (1) above, any person who writes, sprays, scratches, or otherwise affixes graffiti on any real or personal property not his or her own is guilty of an infraction, punishable by a fine not to exceed $250 if the amount of the defacement, damage, or destruction is less than $250.

This bill, instead, would provide that, when the amount of the defacement, damage, or destruction is less than $250, the infraction is punishable by a fine not to exceed $500.

(3) Existing law provides that upon conviction of acts of vandalism consisting of writing graffiti, as specified in (2), the court may, in addition to any other punishment imposed under these provisions, order the defendant to complete community service, not to exceed 48 hours for the first conviction. Upon the 2nd and subsequent conviction, the court may order the defendant to complete community service, not to exceed 96 hours.

This bill, instead, would provide that upon conviction of acts of vandalism consisting of writing graffiti, the court, in addition to any other punishment imposed under these provisions, shall order the defendant to complete a minimum of 24 hours of community service, not to exceed 48 hours for the first offense. The bill also would provide that upon the 2nd subsequent conviction, the court shall order the defendant to complete a minimum of 48 hours of community service not to exceed 96 hours. Because these provisions could result in requiring counties to incur additional expenses for supervising persons required to perform community service work under these provisions, the bill would impose a state-mandated local program.

(4) This bill would further amend Sections 640.5 and 640.6 of the Penal Code as proposed by AB 1179, to become operative only if this bill and AB 1179 are both enacted and become effective on January 1, 1994, and this bill is enacted last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 598 (SB 292) Roberti. Crimes: weapons.

(1) Existing law provides that every person who draws or exhibits a replica of a firearm, as defined, in a threatening manner against another, as specified, is guilty of a misdemeanor punishable by imprisonment in a county jail for not less than 30 days. A replica of a firearm is defined under existing law as a device with the apparent capability of expelling a projectile by the force of air or an explosion and which is reasonably perceived by the person against whom the device is drawn or exhibited to be an actual

NOTE: Superior numbers appear as a separate section at the end of the digests.

firearm, including starter pistols and air guns.

This bill would provide that the above-described offense applies to imitation firearms instead of a replica of a firearm. The bill would define an imitation firearm, for the purposes of this offense, as a replica of a firearm that is so substantially similar in physical properties to an existing firearm as to lead a reasonable person to conclude that the replica is a firearm. By changing the definition of an existing crime, this bill would create a state-mandated local program.

(2) Under existing law, any person who sells, manufactures, or distributes an imitation firearm, as defined, except as specified, is liable for a civil fine of not more than $10,000 for each violation, as specified.

This bill additionally would provide that any person who purchases, ships, transports, or receives, by mail order or in any other manner, any imitation firearm is also liable for the above-described civil penalty. The bill also would revise the definition of an imitation firearm , among other things, to exclude any firearm that contains, or has affixed to it, a marking approved by the Secretary of Commerce, as specified.

(3) Existing law, with limited exceptions, prohibits persons from bringing or possessing specified weapons, including a dirk, dagger, or a knife having a blade longer than 3½ inches, upon the grounds of, or within, a public school providing instruction in kindergarten or any of grades 1 to 12, inclusive.

This bill would extend that prohibition to private schools. The bill also would include knives having a blade longer than 2½ inches, instead of 3½ inches, and an ice pick, except as specified, in this list of specified prohibited weapons. Because these provisions would expand the scope of an existing crime, the bill would impose a state-mandated local program. The bill also would include a definition of a dirk or dagger.

(4) Under existing law, any person, except as specified, who brings or possesses, within any courtroom or building designated as a courthouse or court building in this state or at any meeting required to be open to the public, as specified, certain weapons including a firearm, any tear gas weapon, or any taser or stun gun, as defined, is guilty of a public offense, punishable as specified.

This bill would revise and recast the above prohibition, instead, to provide that any person, except as specified, who brings or possesses any of those weapons within any state or local public building, as defined, or at any meeting required to be open to the public, as specified, is guilty of a public offense, punishable as specified. In addition, the bill would provide that notwithstanding the specified exception regarding peace officers, the above prohibition shall apply to any person who brings or possesses any of those weapons within any courtroom if he or she is a party to an action pending before the court.

This bill also would prohibit any person from bringing or possessing any instrument that expels a metallic projectile, such as a BB or pellet, through the force of air pressure, CO_2 pressure, or spring action, or any spot marker gun or paint gun upon the grounds of, or within, any public or private school or any state or local government building, as defined. Because these provisions would create a new crime, the bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 599 (SB 647) Leslie. Crimes: weapons.

Existing law, with limited exceptions, prohibits persons from bringing or possessing specified weapons on the grounds of, or within, a public school providing instruction in kindergarten or any of grades 1 to 12, inclusive.

This bill would extend that prohibition to private schools. The bill also would prohibit the bringing or possessing of an instrument that expels a metallic projectile, such as a BB or a pellet gun, through the force of air pressure, CO_2 pressure, or spring action, or any spot marker gun on the grounds of, or within any public or private school providing instruction in kindergarten or any of grades 1 to 12, inclusive. Because these provisions

NOTE: Superior numbers appear as a separate section at the end of the digests.

would expand the scope of an existing crime, the bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 626.10 of the Penal Code proposed by SB 292, to be operative only if SB 292 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 600 (AB 242) Alpert. Firearms: prohibited classes.

Under existing law any person who has been convicted of a misdemeanor violation of specified offenses, including assault or battery, and within 10 years of the conviction owns, or has in his or her possession or under his or her custody or control, any firearm is guilty of a public offense punishable by imprisonment in the state prison or in a county jail not exceeding one year, by a fine not exceeding $1,000, or by both that imprisonment and fine. However, existing law provides that any person who is subject to this prohibition and whose continued employment or livelihood is dependent on the ability to legally possess a firearm may petition the court for relief from the prohibition until January 1, 1993.

This bill would add offenses involving the infliction of corporal injury of a spouse and specified other persons to the above offenses and the offense of stalking. The bill would also add the willful and knowing violation of certain court orders involving domestic violence, as specified. By expanding the scope of an existing crime, this bill would create a state-mandated local program.

This bill would also revise the provisions permitting a person to obtain relief from the above-described prohibition to instead provide that any person who has been convicted of the above-described domestic violence offenses whose employment or livelihood is dependent on the ability to legally possess a firearm may petition the court once for relief from this prohibition, as specified. In granting relief from the prohibition, the court would be required to make specified findings, including, among others, a finding by a preponderance of the evidence that the person would be likely to use a firearm in a safe and lawful manner.

Under existing law, any person who is alleged to have committed specified offenses subject to the juvenile court law, is found to be a fit and proper subject to be dealt with under the juvenile court law, and is subsequently adjudged a ward of the juvenile court for committing a specified offense including murder or arson of an inhabited dwelling, shall not own or have in his or her possession or under his or her custody or control any firearm until the age of 30 years.

This bill would additionally include specified controlled substance offenses including, among others, possessing for sale or selling a substance containing 28.5 grams or more of cocaine, as specified. Because the violation of these provisions is a crime, this bill would establish a state-mandated local program.

This bill would incorporate additional changes in Section 12021 of the Penal Code, proposed by AB 685, to be operative only if both bills are enacted and become effective on January 1, 1994, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 601 (SB 724) McCorquodale. Criminal street gangs.

(1) Existing law, the Street Terrorism Enforcement and Prevention Act, operative until January 1, 1997, provides that any person who actively participates in any criminal street gang with knowledge that its members engage in or have engaged in a pattern of criminal gang activity, and who willfully promotes, furthers, or assists in any felonious

NOTE: Superior numbers appear as a separate section at the end of the digests.

criminal conduct by members of that gang, shall be punished by imprisonment in a county jail not to exceed one year, or by imprisonment in the state prison for 1, 2, or 3 years.

This bill would increase the punishment for this offense to imprisonment in a county jail not to exceed one year, or by imprisonment in the state prison for 16 months, or 2 or 3 years.

(2) Existing law provides that a person who is convicted of a felony committed for the benefit of, at the direction of, or in association with any criminal street gang, with the specific intent to promote, further, or assist in criminal conduct by gang members, shall, upon conviction of the felony, be punished by an additional, consecutive term of 1, 2, or 3 years. However, if the underlying felony is committed on the grounds of, or within 1,000 feet of, a public or private elementary, vocational, junior high, or high school, as specified, the additional term shall be 2, 3, or 4 years.

(3) Existing law provides that a person who is convicted of a public offense punishable as a felony or a misdemeanor committed for the benefit of, at the direction of, or in association with any criminal street gang, with the specific intent to promote, further, or assist in criminal conduct by gang members, shall be punished, as specified. It also provides that if the court grants probation or suspends the execution of sentence imposed upon the defendant, it shall require as a condition thereof that the defendant serve 180 days in a county jail.

This bill would, instead, provide that if the court grants probation or suspends the execution of sentence imposed upon the defendant for a violation of (1) above, or in cases involving a true finding of the enhancement enumerated in (2) above, the court shall require as a condition thereof that the defendant serve a minimum of 180 days in a county jail.

(4) Existing law defines "pattern of criminal gang activity," for the purposes of the Street Terrorism Enforcement and Prevention Act, as any ongoing organization, association, or group of 3 or more persons, whether formal or informal, having as one of its primary activities the commission of one or more of the offenses specified in (5) below, having a common name or common identifying sign or symbol, and whose members individually or collectively engage in or have engaged in a pattern of criminal street gang activity.

(5) Existing law specifies, for the purposes of (4) above, relating to the definition of a "pattern of criminal gang activity," the commission, attempted commission, or solicitation of 2 or more of the offenses of assault with a deadly weapon or by means of force likely to produce great bodily injury, robbery, unlawful homicide or manslaughter, specified controlled substance offenses, shooting at an inhabited dwelling or occupied motor vehicle, arson, and the intimidation of witnesses and victims, as defined.

This bill would extend this provision to include the additional offenses of burglary, rape, looting, moneylaundering, kidnapping, mayhem, aggravated mayhem, torture, grand theft when the value of the money, labor, or real or personal property exceeds $10,000, specified felony extortion, felony vandalism, and discharging or permitting the discharge of a firearm from a motor vehicle, as defined. Because this bill would change the definition of a crime by expanding the activities that bring a person within the scope of criminal street gang activity, it would impose a state-mandated local program.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 602 (AB 1608) Aguiar. Criminal street gangs: penalties.

Existing law provides that any person who is convicted of a public offense punishable as a felony or a misdemeanor, which is committed for the benefit of, at the direction of, or in association with, any criminal street gang, as defined, with the specific intent to promote, further, or assist in any criminal conduct by gang members, shall be punished by imprisonment in a county jail for at least 180 days but not to exceed one year, or by imprisonment in the state prison for 1, 2, or 3 years, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that any person who actively participates in any criminal street gang with knowledge that its members engage in or have engaged in a pattern of criminal gang activity, and who willfully promotes, furthers, or assists in any felonious criminal conduct by members of that gang, shall be punished by imprisonment in the county jail for not to exceed one year, or by imprisonment in the state prison for 1, 2, or 3 years.

Existing law also provides that any person who has been previously convicted of a violent offense, as defined, who owns or has in his or her possession or under his or her custody or control any firearm is guilty of a felony. Under this provision, if probation is granted, or if the imposition or execution of sentence is suspended, it is required that the defendant serve at least 6 months in a county jail as a condition of probation or suspension of the sentence.

This bill would add to the list of violent offenses for this purpose any felony violation of the above provisions relating to participation in a criminal street gang. Because this bill would change the punishment for a crime, it would impose a state-mandated local program.

The bill would incorporate additional changes to Section 12021.1 of the Penal Code proposed by SB 60 and AB 1957, to be operative only if all 3 bills, or a combination thereof, are enacted and become operative on or before January 1, 1994, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 603 (AB 663) Baca. Corrections: house repairs or yard services for senior citizens.

Existing law authorizes the court to impose and require any or all of specified terms of imprisonment, fines, and other reasonable conditions of probation.

This bill would require probation officers or their designated representatives to consider whether any defendant who has been convicted of a nonviolent and nonserious offense and ordered to participate in community service as a condition of probation shall be required to engage in the performance of repairs to senior centers through contact with local senior service organizations in the performance of community service.

Existing law authorizes the board of supervisors of any county to authorize the sheriff or other official in charge of the county correctional facilities to offer voluntary participation in a work release program, pursuant to specified criteria, in which one day of participation will be in lieu of one day of confinement. Under existing law, the work release program shall consist of any of specified components, including, but not limited to, manual labor in support of nonprofit organizations, as defined, as approved by the sheriff or other official in charge of the correctional facilities.

This bill would add to the list of components that a work release program is authorized to include the performance of repairs to senior centers through contact with local senior service organizations, as approved by the sheriff or other official in charge of the correctional facilities.

This bill would incorporate additional changes in Section 4024.2 of the Penal Code proposed by AB 381, to be operative only if both bills are enacted and become operative on January 1, 1994, and this bill is enacted last.

Ch. 604 (AB 839) Baca. Graffiti.

Existing law prohibits a person, firm, or corporation, except a parent or legal guardian, from selling or giving or in any way furnishing to another person, who is in fact under the age of 18 years, any aerosol container of paint that is capable of defacing property without first obtaining bona fide evidence of majority and identity. Existing law provides that this prohibition shall not apply to the furnishing of 6 ounces or less of an aerosol container of paint to a minor for the minor's use or possession under the supervision of the minor's parent, guardian, instructor, or employer.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill, in addition, would authorize the furnishing of aerosol containers of paint or related substances for use in school-related activities that are part of the instructional program when used under controlled and supervised situations within the classroom or on the site of a supervised project, as specified.

Ch. 605 (AB 1179) Epple. Vandalism.

(1) Existing law provides that every person who, except in self-defense, in the presence of any other person, draws or exhibits any deadly weapon whatsoever, other than a firearm, in a rude, angry, or threatening manner, or who in any manner, unlawfully uses the same in any fight or quarrel is guilty of a misdemeanor, punishable by imprisonment in a county jail for not less than 30 days; and where the deadly weapon is a firearm, whether loaded or unloaded, the person is guilty of a misdemeanor, punishable by imprisonment in a county jail for not less than 3 months.

This bill, in addition, would provide that it is a violation of this provision to act as described above when the other person is in the process of cleaning up graffiti or vandalism, punishable as specified.

(2) Existing law prohibits certain specified acts with respect to false and fraudulent insurance claims and provides that, except in the interest of justice, a person placed on probation for violating the provisions shall be required to perform some community service, specifically, the removal of graffiti.

This bill would delete the requirement that a person placed on probation for violating these provisions perform community service, specifically, the removal of graffiti.

(3) Existing law prohibits a person from maliciously defacing, with paint or other liquid, damaging, or destroying any real or personal property not his or her own, except as specified, a violation of which is vandalism, punishable as a misdemeanor if the amount of defacement, damage, or destruction is less than $5,000 and punishable as a misdemeanor or felony if the amount of defacement, damage, or destruction is $5,000 or more.

This bill, instead, would provide that every person who maliciously sprays, scratches, writes on, or otherwise defaces, or who damages or destroys any real or personal property not his or her own, except as specified, shall be guilty of vandalism, punishable as specified above. The bill also would create a permissive inference that a person who violates this provision with respect to real property belonging to any public entity, as defined, or the federal government, neither owned the property nor had the permission of the owner to deface, damage, or destroy the property.

This bill, in addition, with regard to a person who has been convicted of the above offense, specified graffiti offenses, or any combination of these offenses, on 2 separate occasions, and incarcerated pursuant to a sentence, a conditional sentence, or a grant of probation for at least one of the convictions, who is subsequently convicted of that offense, would authorize the court to order, as a condition of probation, the defendant subject to punishment pursuant to this provision to perform community service not to exceed 300 hours over a period not to exceed 240 days during a time other than during his or her hours of school attendance or employment. Because this bill would change the punishment for a crime, it would impose a state-mandated local program.

(4) Existing law provides that it is a misdemeanor for any person under the age of 18 years to possess an aerosol container of paint for the purpose of defacing property while on any public highway, street, alley, or way, or other public place, regardless of whether that person is or is not in any automobile, vehicle, or other conveyance, punishable by imprisonment in a county jail not to exceed 6 months, a fine not to exceed $1,000, or by both that imprisonment and fine.

This bill would authorize the court to order, as a condition of probation, that the defendant perform community service not to exceed 100 hours over a period not to exceed 90 days during a time other than during his or her hours of school attendance or employment. This penalty would increase to community service not to exceed 200 hours over a period not to exceed 180 days if the person has a prior conviction of this offense and community service not to exceed 300 hours over a period not to exceed 240 days if the person has 2 prior convictions of this offense. Because this bill would change the punishment for a crime, it would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) Existing law specifies prohibitions with regard to the possession of specified burglar tools.

This bill would provide that it is a misdemeanor to possess specified instruments with the intent to commit vandalism or graffiti, punishable as specified.

(6) Existing law makes it an infraction to affix graffiti on or in the facilities or vehicles of a governmental entity or public transportation system as defined, or of or in the facilities of or vehicles operated by entities subsidized by the Department of Transportation, or on or in any leased or rented facilities or vehicles for which any of these entities incur costs of less than $250 for cleanup, repair, or replacement, punishable by a fine not to exceed $250 and by community service not to exceed 48 hours over a period not to exceed 30 days during a time other than during hours of school attendance or employment.

This bill would increase the punishment for this offense to a fine not to exceed $250 and community service not to exceed 100 hours over a period not to exceed 90 days during a time other than during hours of school attendance or employment.

(7) Existing law makes it an infraction for a person to affix graffiti on any real or personal property not his or her own, punishable by a fine not to exceed $250 or by that fine and community service not to exceed 48 hours for the first conviction and not to exceed 96 hours for a 2nd or subsequent conviction.

This bill would increase the punishment for a violation of this offense to a fine not to exceed $250 or that fine and community service not to exceed 100 hours over a period not to exceed 90 days during a time other than during hours of school attendance or employment.

This bill, in addition, would make any offense in (6) and (7) above a misdemeanor, punishable by imprisonment in a county jail not to exceed 6 months, by a fine not to exceed $1,000, or by both that imprisonment and fine if the person has been convicted previously of any of those offenses or of specified vandalism or graffiti offenses. This bill would authorize the court to order, as a condition of probation, the defendant subject to punishment under this provision to perform community service not to exceed 200 hours over a period not to exceed 180 days during a time other than during his or her hours of school attendance or employment.

This bill would make any offense in (6) or (7) above a misdemeanor, punishable by imprisonment in a county jail not to exceed one year, if the person has been previously convicted of any of those offenses, of specified vandalism or graffiti offenses, or of any combination of those offenses, on 2 separate occasions and having been incarcerated pursuant to a sentence, a conditional sentence, or a grant of probation for at least one of the convictions, is subsequently convicted of any offense in (6) or (7). This bill would authorize the court to order, as a condition of probation, the defendant subject to punishment under this provision to perform community service not to exceed 300 hours over a period not to exceed 240 days during a time other than during his or her hours of school attendance or employment. This bill would make conforming changes.

Because this bill would change the punishment for a crime, it would impose a state-mandated local program.

This bill, additionally, would provide that any person who violates (3), (6), or (7) above regarding vandalism and graffiti offenses on or within 100 feet of a highway, or its appurtenances, as specified, is guilty of a misdemeanor, punishable by imprisonment in a county jail not exceeding 6 months, or by a fine not exceeding $1,000, or by both that imprisonment and fine for the first offense, and by imprisonment in a county jail not exceeding one year, or by a fine not exceeding $1,000, or by both that imprisonment and fine for the 2nd offense. This bill also would authorize the court to order, as a condition of probation, the defendant to perform community service, during a time other than during his or her hours of school attendance or employment, not to exceed 100 hours over a period not to exceed 90 days for the first offense, not to exceed 200 hours over a period not to exceed 180 days for the 2nd offense, and not to exceed 300 hours over a period not to exceed 240 days for the 3rd offense. Because this bill would change the punishment for a crime, it would impose a state-mandated local program.

(8) Existing law authorizes the court to impose and require any or all of specified

NOTE: Superior numbers appear as a separate section at the end of the digests.

terms of imprisonment, fines, and other reasonable conditions of probation.

This bill would require the court to consider, except as specified, whether any defendant who has been convicted of a nonviolent and nonserious offense and ordered to participate in community service as a condition of probation shall be required to engage in the removal of graffiti in the performance of that community service. This bill would provide that offenses in violation of the Dangerous Weapons' Control Law and involving the use of dangerous or deadly weapons, the use or attempted use of violence against the person of another or involving injury to a victim, or the annoying or molesting of children are not nonserious offenses for the purposes of this provision.

(9) Existing law authorizes the board of supervisors of any county to authorize the sheriff or other official in charge of the county correctional facilities to offer voluntary participation in a work release program, pursuant to specified criteria in which one day of participation will be in lieu of one day of confinement. Under existing law, the work release program shall consist of any of specified components, including, but not limited to, manual labor in support of nonprofit organizations, as defined, as approved by the sheriff or other official in charge of the correctional facility.

This bill would add to the list of components that a work release program is authorized to include the performance of graffiti cleanup for local governmental entities, as approved by the sheriff or other official in charge of the correctional facilities.

(10) Existing law authorizes, for each conviction of a person for violations involving vandalism, as specified, by defacing property with paint or any other liquid, committed while the person was 13 years of age or older, the court to suspend the person's driving privilege for one year or, if the person does not yet have the privilege to drive, to delay issuing the privilege to drive for one year, as specified.

This bill would extend this provision to apply to vandalism involving defacing property by spraying, scratching, or writing on a surface.

(11) This bill would incorporate additional changes to Section 417 of the Penal Code proposed by AB 1268, to become operative only if both bills are chaptered and become effective on January 1, 1994, and this bill is chaptered last.

(12) This bill would incorporate additional changes to Section 594.1 of the Penal Code proposed by AB 839, to become operative only if both bills are chaptered and become effective on January 1, 1994, and this bill is chaptered last.

(13) This bill would incorporate additional changes to, and further amend, Sections 640.5 and 640.6 of the Penal Code as proposed by SB 374, to become operative only if both bills are chaptered and become effective on January 1, 1994, and this bill is chaptered last.

(14) This bill would incorporate additional changes to Section 1203.1 of the Penal Code proposed by AB 663, to become operative only if both bills are chaptered and become effective on January 1, 1994, and this bill is chaptered last.

(15) This bill would incorporate additional changes to Section 4024.2 of the Penal Code proposed by AB 381 and AB 663, to become operative if all three bills, or a combination thereof, are chaptered and become operative on January 1, 1994, and this bill is chaptered last.

(16) This bill would incorporate additional changes to Section 13202.6 of the Vehicle Code proposed by AB 2365, to become operative only if both bills are chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

(17) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 606 (AB 166) Hauser. Firearms.

(1) Existing law defines a "wholesaler," with respect to specified exemptions from the prohibition on carrying a concealed firearm without a license, as not including a person dealing exclusively in grips, stocks, and other nonmetal parts of firearms.

This bill would revise this definition to provide that "wholesaler" does not include a person dealing exclusively in grips, stocks, and other parts of firearms that are not frames

NOTE: Superior numbers appear as a separate section at the end of the digests.

or receivers thereof.

(2) Under existing law, the prohibition on carrying a concealed firearm, as specified, does not apply to the transportation of a firearm by a person when going directly to, or coming directly from, a gun show, swap meet, or similar event to which the public is invited, for the purposes of displaying that firearm in a lawful manner.

This bill, in addition, would provide that the exemption applies to the transportation of a firearm by a person when going directly to, or coming directly from, a gun show or event, as defined, for the purpose of lawfully transferring that firearm, as specified.

The bill also would provide that the exemption applies to the transportation of a firearm by a person complying with specified provisions concerning transfers of firearms by operation of law or by a person who is moving out of the state with the firearm.

(3) Under existing law, no person shall sell, lease, or transfer firearms unless he or she has been issued a license, except as specified.

This bill also would revise existing law to provide that commencing March 1, 1994, the Department of Justice shall keep a centralized list of all persons licensed pursuant to these provisions and shall make information about an individual dealer available, upon request, for specified purposes.

This bill also would empower local licensing authorities to charge certain fees for licenses issued pursuant to these provisions.

This bill also would exempt from this licensure requirement, (a) the delivery, sale, or transfer of an unloaded firearm by one wholesaler to another wholesaler, as specified, and (b) the sale, delivery, or transfer of a firearm by persons who reside outside this state and are licensed outside this state under specified federal laws to dealers if the sale, delivery, or transfer is in accordance with those federal laws.

(4) Existing law provides that commencing October 1, 1993, no pistol, revolver, or other firearm capable of being concealed upon the person shall be delivered unless the purchaser or transferee presents a basic firearm safety certificate.

This bill would delay the operative date of these provisions to April 1, 1994.

(5) Existing law provides that no firearm shall be delivered unless the purchaser or transferee either is personally known to the dealer or presents clear evidence of his or her identity and age to the dealer. A violation of this provision is a misdemeanor.

This bill, instead, would require that the purchaser or transferee present clear evidence of his or her identity and age to the dealer thus, expanding the scope of an existing crime and creating a state-mandated local program.

(6) Existing law provides that every licensed firearms dealer shall keep a register in which prescribed information concerning a firearms transaction shall be entered.

This bill would exclude from this provision the delivery, sale, or transfer of an unloaded firearm that is not a pistol, revolver, or other firearm capable of being concealed upon the person by a licensed dealer to himself or herself.

(7) Under existing law, the Department of Justice may charge the dealer a fee sufficient to reimburse specified costs to the department with respect to the department's examination and determination that the purchaser or transferee is not a person prohibited from owning or possessing a firearm, as specified. Among other things, existing law provides that only one fee shall be charged for a single transaction on the same date for the sale or transfer of any number of firearms by the dealer to the purchaser or transferee.

This bill, in addition, would provide that in a single transaction on the same date for the sale or transfer of any number of firearms that are pistols, revolvers, or other firearms capable of being concealed upon the person, the department shall charge a reduced fee pursuant to this provision for the 2nd and subsequent firearms which are part of that sale or transfer. The bill also would specify that these provisions shall become operative on January 1, 1994.

(8) Existing law provides that a party may sell, deliver, or otherwise transfer a firearm to a licensed firearms dealer without waiting to deliver the firearm until the conclusion of specified waiting periods.

This bill would delete these provisions.

(9) Existing law provides that specified firearms licensing requirements and transfer

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

restrictions shall not apply to, among other things, the delivery, sale, or transfer (a) of firearms that are not pistols, revolvers, or other firearms capable of being concealed upon the person by a dealer to another dealer, as specified, (b) of firearms by dealers to persons who reside outside this state who are licensed under federal law, as specified, and (c) of firearms to a wholesaler if the firearms are being returned to the wholesaler and are intended as merchandise in the wholesaler's business.

This bill would change those provisions to apply only to unloaded firearms that are not pistols, revolvers, or other firearms capable of being concealed upon the person or unloaded firearms.

In addition, the bill would, among other things, provide that:

(a) Specified firearms licensing requirements and transfer restrictions shall not apply to the delivery, sale, or transfer of an unloaded firearm that is not a pistol, revolver, or other firearm capable of being concealed upon the person by a dealer to himself or herself.

(b) Specified firearms transfer restrictions shall not apply to the delivery, sale, or transfer of unloaded firearms to a wholesaler as merchandise in the wholesaler's business by manufacturers or importers licensed to engage in that business, as specified, or by another wholesaler if the delivery, sale, or transfer is made in accordance with specified federal law.

(c) Specified firearms waiting periods shall not apply to the delivery, sale, or transfer of a pistol, revolver, or other firearm capable of being concealed upon the person by a dealer when the dealer is delivering the firearm to another dealer and it is not intended as merchandise in the receiving dealer's business or when the dealer is delivering the firearm to himself or herself and it is not intended as merchandise in his or her business.

(d) Specified firearms licensing requirements and transfer restrictions shall not apply to the delivery, sale, or transfer of specified firearms, machineguns, and assault weapons regulated pursuant to specified provisions of the Penal Code.

(10) Existing law provides an alternative to completing the sale or transfer of a firearm through a licensed dealer, as specified. Under these provisions, the Department of Justice shall prescribe the Law Enforcement Firearms Transfer Form (LEFT) which shall include a specified format.

This bill, among other things, would provide that under this alternative, one firearm "transaction" means a single sale or transfer of any number of firearms that are not pistols, revolvers, or other firearms capable of being concealed upon the person between the same 2 persons.

(11) Existing law provides that a person who is a peace officer, as specified, may, if authorized by and under the terms and conditions that are specified by his or her employing agency, purchase, possess, or transport any less lethal weapon, as defined, or ammunition therefor, for official use in the discharge of his or her duties.

This bill, among other things, would include in the definition of "less lethal weapon" an assault weapon, as specified.

(12) Existing law requires the Department of Justice to establish a basic firearms safety course of specified content and provides for the issuance of basic firearms safety certificates.

Existing law also establishes fees for the issuance of basic firearms safety courses and certificates to be deposited in the Firearms Safety Training Fund Special Account, a continuously appropriated account. Existing law also provides that the Department of Finance shall transfer funds from an unspecified nongeneral fund special account used by the Department of Justice to the Firearms Safety Training Fund Special Account as a loan of those funds, to be repaid, as specified.

This bill, among other things, would revise these latter provisions to provide, instead, that the Department of Finance shall transfer funds from any general or nongeneral fund special account used by the Department of Justice to the Firearms Safety Training Fund Special Account as a loan of those funds. The bill would make an appropriation by authorizing the transfer of funds from any general fund account to the continuously appropriated Firearms Safety Training Fund Special Account. The bill also would specify that any loan shall, in any event, be repaid within 4 years.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that if a licensed firearms dealer or his or her employee, or where the managing officer or partner is certified as a basic firearms safety course instructor, he or she shall also comply with specified provisions. One of these provisions specifies that if the firearm is a pistol, revolver, or other firearm capable of being concealed upon the person, it shall not be delivered unless the dealer provides the purchaser or transferee written instructions at the time of delivery on how to operate the firearm, including, but not limited to, methods of loading and unloading the firearm, and the location of any safety on the firearm and how the safety operates.

This bill would delete this provision.

(13) Existing law requires each applicant for admission to a basic course of training certified by the Commission on Peace Officer Standards and Training who is not sponsored by a law enforcement agency or is not a peace officer employed by a state or local agency, department, or district, to submit written certification from the Department of Justice that he or she has no criminal background that would disqualify him or her from owning, possessing, or controlling any pistol, revolver, or other firearm capable of being concealed on the person, pursuant to specified provisions of law.

This bill would require those applicants to submit written certification from the Department of Justice that he or she has no criminal background that would disqualify him or her from owning, possessing, or controlling a firearm, rather than any pistol, revolver, or other firearm capable of being concealed on the person, pursuant to specified provisions of law.

(14) Under existing law, whenever a person who has been detained or apprehended for examination of his or her mental condition or who is one of specified persons is found to own or have in his or her possession or under his or her control any firearm or other deadly weapon, the firearm or other deadly weapon shall be confiscated by any law enforcement agency or peace officer, who shall retain custody of the firearm or other deadly weapon. Existing law provides that upon the release of the person without judicial commitment, the confiscating law enforcement agency has 10 days, unless good cause is shown, to initiate a petition to determine whether the return of the firearm or other deadly weapon would be likely to result in endangering the person or others, as specified. Under existing law, the person then has 30 days to respond to the court clerk to confirm his or her desire for a hearing. If the person responds and requests a hearing, the court clerk is required, under existing law, to set a hearing no sooner than 30 days from receipt of the request. If the law enforcement agency does not initiate proceedings within the 10-day period, it is required to make the weapon available for return.

This bill would apply these provisions to the release of a person, rather than to the release of a person without judicial commitment.

(15) This bill also would make other related and technical, nonsubstantive changes.

(16) This bill would incorporate additional changes in Section 12071 of the Penal Code, proposed by AB 1648, to be operative only if AB 1648 and this bill are both chaptered and become effective on or before January 1, 1994 and this bill is chaptered last.

(17) This bill also would provide that any amendment to Section 6254 of the Government Code made by SB 60, SB 798, or AB 1957, which takes effect on or before January 1, 1994, shall prevail over amendments to that section made by this bill, whether the bill is chaptered before or after this bill.

(18) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(19) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 607 (SB 529) Presley. Child abuse.

(1) Existing law provides that any person who willfully inflicts upon any child any cruel or inhuman corporal punishment or injury resulting in a traumatic condition is guilty of a felony, punishable by imprisonment in the state prison for 2, 4, or 6 years, or in a county jail for not more than one year, or by a fine of up to $6,000, or by both that

NOTE: Superior numbers appear as a separate section at the end of the digests.

imprisonment and fine.

This bill would provide that any person who is found guilty of violating these provisions shall receive a 4-year enhancement for a prior conviction of that offense provided that no additional term shall be imposed under this provision for any prison term served prior to a period of 10 years in which the defendant remained free of both prison custody and the commission of an offense that results in a felony conviction.

(2) Existing law provides that any person who, with the intent to inflict such injury, personally inflicts great bodily injury on any person other than an accomplice in the commission or attempted commission of a felony shall, in addition and consecutive to the punishment prescribed for the felony or attempted felony of which he or she has been convicted, be punished by an additional term of 3 years, unless infliction of great bodily injury is an element of the offense of which he or she is convicted.

This bill, in addition, would provide that any person found to have inflicted great bodily injury pursuant to these provisions which causes the victim to become comatose due to brain injury or to suffer paralysis, as defined, of a permanent nature, shall be punished by an additional and consecutive term of 5 years.

The bill also would provide that the court shall impose additional terms of imprisonment under either of the above provisions, but may not impose both terms for the same offense.

(3) This bill would incorporate additional changes in Section 273d of the Penal Code proposed by SB 935, to be operative only if this bill and SB 935 are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

(4) This bill would incorporate additional changes in Section 12022.7 of the Penal Code proposed by AB 1549, to be operative only if AB 1549 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 608 (AB 1549) Epple. Crimes: enhancements: great bodily injury.

Existing law provides for an additional term of 3 years to be imposed when, during the commission or attempted commission of a felony, a person inflicts great bodily injury on any person other than an accomplice with the intent to do so, unless infliction of great bodily injury is an element of the offense of which he or she is convicted.

This bill would provide for an additional term of 5 years to be imposed when, in the commission or attempted commission of a felony, a person inflicts great bodily injury on another person who is 70 years of age or older other than an accomplice with the intent to do so, unless infliction of great bodily injury is an element of the offense of which he or she is convicted.

This bill would incorporate additional changes in Section 12022.7 of the Penal Code proposed by SB 529 or AB 1957, or both, to be operative only if SB 529 or AB 1957, or both, and this bill are chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

Ch. 609 (SB 310) Ayala. Murder: punishment.

(1) Existing law describes murder of the 1st degree as all murders which, among other things, are committed in the perpetration of, or attempt to perpetrate, certain enumerated felonies and specified sex crimes.

This bill would add to the list of specified crimes a murder which is perpetrated by means of discharging a firearm from a motor vehicle, intentionally at another person outside of the vehicle with the intent to inflict death.

(2) Under existing law, every person guilty of murder in the 2nd degree shall suffer confinement in the state prison for a term of 15 years to life except if the victim was a peace officer in which case the person shall suffer confinement in the state prison for a term of 25 years to life.

This bill additionally would provide that every person guilty of murder in the 2nd degree shall suffer confinement in the state prison for a term of 20 years to life if the killing was perpetrated by means of shooting a firearm from a motor vehicle, intentionally at another person outside of the vehicle with the intent to inflict great bodily injury.

(3) Existing law provides that any person who is convicted of a felony or an attempt to commit a felony, including murder or attempted murder, in which that person

NOTE: Superior numbers appear as a separate section at the end of the digests.

discharged a firearm at an occupied motor vehicle that caused great bodily injury or death to the person of another, shall be punished by an additional term of imprisonment in the state prison for 5 years.

This bill, in addition, would provide that the additional term may be imposed in cases of murder, if the killing was perpetrated by means of shooting a firearm from a motor vehicle, as specified.

(4) This bill would amend an initiative measure that may be further amended by a ⅔ vote of the Legislature. This bill also would provide that certain provisions amending an initiative statute shall become effective only when submitted to, and approved by, the voters.

The bill would incorporate additional changes in Sections 189 and 12202.5 of the Penal Code proposed by SB 60, to be operative only if SB 60 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

Ch. 610 (AB 6) Burton. Crime: carjacking.

(1) Existing law requires state and local law enforcement agencies to disclose specified information to specified persons regarding an incident caused by specified crimes.

This bill would add carjacking to the list of specified crimes for which specified information must be disclosed for an incident caused thereby.

(2) Existing law provides that murder that is committed in the perpetration of, or attempt to perpetrate, certain offense, including robbery, burglary, or kidnapping is murder of the first degree.

This bill would additionally provide that murder committed in the perpetration of, or attempt to perpetrate, a carjacking is also murder of the first degree.

(3) Under existing law, robbery, which is the felonious taking of personal property in the possession of another, from his or her person or immediate presence, and against his or her will, accomplished by means of force or fear, is punishable by imprisonment for a term of 3, 4, or 6 years for 1st degree robbery, as defined, and 2, 3, or 5 years for 2nd degree robbery.

This bill would provide that carjacking, as defined, is punishable by imprisonment in the state prison for 3, 5, or 9 years. By creating a new crime, this bill would establish a state-mandated local program.

(4) Under existing law, every person who extorts any money or other property from another under circumstances not amounting to robbery, by means of force or any threat, as specified, is punishable as prescribed.

This bill would also provide that the circumstances not amount to carjacking.

(5) Existing law provides that every person who, having been convicted of specified offenses including petit theft or grand theft and having served a term for that offense in any penal institution or having been imprisoned as a condition of probation for that offense, is subsequently convicted of petit theft, is punishable for the subsequent offense by imprisonment in the county jail not exceeding one year or in the state prison.

This bill would include carjacking as one of the above prior offenses.

(6) Under existing law, the court shall impose a 3-year term of imprisonment for each prior separate prison term served by the defendant if the prior term was for a "violent felony" as specified to include, among other offenses, murder, robbery perpetrated in an inhabited dwelling house, and kidnapping. Existing law also provides for other specified enhancements.

This bill would include carjacking as a violent felony for purposes of the above enhancement. The bill would also include carjacking for purposes of enhancements that may be imposed if specified crimes are committed against certain persons, including a person who is 65 years of age or older.

(7) Under existing sentencing law, when 2 or more specified enhancements may be imposed for any single offense, only the greatest enhancement shall apply except in specified cases such as robbery or burglary in which case the court may impose an enhancement for weapons, as specified, and an enhancement for great bodily injury, as specified.

This bill would add carjacking to the above offenses in which the court may impose both an enhancement for weapons and an enhancement for great bodily injury.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(8) Existing law prohibits plea bargaining if a serious felony is charged, except as specified. Under existing law, a serious felony includes, among other offenses, murder, burglary of an inhabited dwelling house, or grand theft involving a firearm.

This bill would include carjacking as a serious felony for purposes of the prohibition on plea bargaining.

Existing law provides that the above-mentioned provisions added by initiative statute shall not be amended by the Legislature except by a statute passed in each house by a rollcall vote entered in the journal, ⅔ of the membership concurring, or by a statute that becomes effective only when approved by the electors.

(9) Existing law provides that probation shall not be granted to, nor shall the execution or imposition of sentence be suspended for, specified offenses, including robbery or burglary.

This bill would include carjacking within the above prohibition as to granting probation and suspending the execution or imposition of sentence. The bill would also include carjacking in other prohibitions as to granting probation including, among others, the prohibition with respect to the commission or attempted commission of certain crimes against, among other persons, a person 60 years of age or older.

(10) Under existing law, probation shall not be granted to, nor shall the execution or imposition of sentence be suspended for, nor shall a finding bringing the defendant within these prohibitions be stricken, as specified, if the person, with the intent to inflict such injury, personally inflicts great bodily injury on the person of another in the commission or attempted commission of specified crimes, including robbery or burglary of the 1st degree.

This bill would include carjacking within the above provisions.

(11) Existing law provides that any person previously convicted of specified offenses including murder, rape, or robbery who owns or has in his or her possession or under his or her control any firearm, is guilty of a felony.

This bill would include carjacking within the above offense.

(12) Under existing law, any person who uses a deadly or dangerous weapon in the commission or attempted commission of a felony shall, upon conviction, in addition and consecutive to the punishment prescribed for the offense, be punished by an additional term of one year, except as specified.

This bill would provide that if the person has been convicted of carjacking or attempted carjacking the additional term shall be one, 2, or 3 years.

(13) Existing law provides that any person who personally uses a firearm in the commission or attempted commission of a felony shall, upon conviction, in addition and consecutive to the punishment prescribed for the offense, be punished by an additional term of imprisonment in the state prison for 3, 4, or 5 years, except as specified.

This bill would provide that if the person has been convicted of carjacking or attempted carjacking the additional term shall be 4, 5, or 6 years.

(14) Existing law provides that the commission of any of one or more specified offenses by a minor when he or she was 16 years of age or older raises a presumption that the minor is not a fit and proper subject to be dealt with under the juvenile court law, unless the juvenile court makes a finding of fitness, as specified.

This bill would add to those provisions the crime of carjacking while armed with a dangerous or deadly weapon.

Because this bill would impose increased duties on local criminal justice systems that are equivalent to those imposed by the establishment of a new crime, it would create a state-mandated local program.

(15) This bill would, among other things, also include the offense of carjacking for the following purposes: to determine those persons who are liable to punishment in this state for a crime, as part of the definition of a pattern of criminal gang activity, required confinement in a state hospital in cases involving felonies of violence, and, to determine whether members of the public shall be admitted to certain juvenile hearings.

(16) This bill would incorporate additional changes to Section 6254 of the Government Code, various sections of the Penal Code, and various sections of the Welfare and Institutions Code, proposed by AB 25, AB 31, AB 41, AB 112, AB 166, AB 170, AB 178,

NOTE: Superior numbers appear as a separate section at the end of the digests.

AB 306, AB 327, AB 852, AB 1330, AB 1500, AB 1608, AB 1630, AB 1957, SB 310, SB 443, SB 724, SB 739, SB 798, and SB 1131 to be operative only if each of these bills, or a combination of these bills, and this bill are chaptered and become effective on or before January 1, 1994 and this bill is chaptered last.

(17) This bill would provide that it shall become operative only if SB 60 is enacted and becomes effective on or before January 1, 1994.

(18) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(19) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 611 (SB 60) Presley. Crime: carjacking.

(1) Existing law requires state and local law enforcement agencies to disclose specified information to specified persons regarding an incident caused by specified crimes.

This bill would add carjacking to the list of specified crimes for which specified information must be disclosed for an incident caused thereby.

(2) Existing law provides that murder that is committed in the perpetration of, or attempt to perpetrate, certain offenses, including robbery, burglary, or kidnapping, is murder of the first degree.

This bill would additionally provide that murder committed in the perpetration of, or attempt to perpetrate, a carjacking is also murder of the first degree.

(3) Under existing law, any person who kidnaps or carries away any individual to commit robbery shall be punished by imprisonment in the state prison for life with possibility of parole.

This bill would provide that any person who during the commission of a carjacking kidnaps another person who is not a principal in the commission of the carjacking shall be punished by imprisonment in the state prison for life with possibility of parole.

(4) Existing law defines robbery as the felonious taking of personal property in the possession of another, from his or her person or immediate presence, and against his or her will, accomplished by means of force or fear.

This bill would define carjacking as the felonious taking of a motor vehicle in the possession of another from his or her person or immediate presence, or from the person or immediate presence of a passenger, against his or her will, and with intent either to permanently or temporarily deprive the person in possession of his or her possession, accomplished by means of force or fear. Carjacking would be punishable by imprisonment in the state prison for 3, 5, or 9 years. By creating a new crime, this bill would establish a state-mandated local program.

(5) Under existing law, every person who extorts any money or other property from another under circumstances not amounting to robbery, by means of force or any threat, as specified, is punishable as prescribed.

This bill would also provide that the circumstances not amount to carjacking.

(6) Existing law provides that every person who, having been convicted of specified offenses including petit theft or grand theft and having served a term for that offense in any penal institution or having been imprisoned as a condition of probation for that offense, is subsequently convicted of petit theft, is punishable for the subsequent offense by imprisonment in a county jail not exceeding one year or in the state prison.

This bill would include carjacking as one of the above prior offenses.

(7) Under existing law, the court shall impose a 3-year term of imprisonment for each prior separate prison term served by the defendant if the prior term was for a "violent felony" as specified to include, among other offenses, murder, robbery perpetrated in an inhabited dwelling house, and kidnapping. Existing law also provides for other specified enhancements.

This bill would include carjacking as a violent felony for purposes of the above enhancement. The bill would also include carjacking for purposes of enhancements that may be imposed if specified crimes are committed against certain persons, including a person who is 65 years of age or older.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(8) Under existing sentencing law, when 2 or more specified enhancements may be imposed for any single offense, only the greatest enhancement shall apply except in specified cases such as robbery or burglary in which case the court may impose an enhancement for weapons, as specified, and an enhancement for great bodily injury, as specified.

This bill would add carjacking to the above offenses in which the court may impose both an enhancement for weapons and an enhancement for great bodily injury.

(9) Existing law prohibits plea bargaining if a serious felony is charged, except as specified. Under existing law, a serious felony includes, among other offenses, murder, burglary of an inhabited dwelling house, or grand theft involving a firearm.

This bill would include carjacking as a serious felony for purposes of the prohibition on plea bargaining.

(10) Existing law provides that probation shall not be granted to, nor shall the execution or imposition of sentence be suspended for specified offenses, including robbery or burglary.

This bill would include carjacking within the above prohibition as to granting probation and suspending the execution or imposition of sentence. The bill would also include carjacking in other prohibitions as to granting probation including, among others, the prohibition with respect to the commission or attempted commission of certain crimes against, among other persons, a person 60 years of age or older.

(11) Under existing law, probation shall not be granted, nor shall the execution or imposition of sentence be suspended, nor shall a finding bringing the defendant within these prohibitions be stricken, as specified, if the person, with the intent to inflict such injury, personally inflicts great bodily injury on the person of another in the commission or attempted commission of specified crimes including robbery or burglary of the 1st degree.

This bill would include carjacking within the above provisions.

(12) Existing law provides that any person previously convicted of specified offenses including murder, rape, or robbery who owns or has in his or her possession or under his or her control any firearm, is guilty of a felony.

This bill would include carjacking within the above offense.

(13) Under existing law, any person who uses a deadly or dangerous weapon in the commission or attempted commission of a felony shall, upon conviction, in addition and consecutive to the punishment prescribed for the offense, be punished by an additional term of one year, except as specified.

This bill would provide that if the person has been convicted of carjacking or attempted carjacking the additional term shall be 1, 2, or 3 years.

(14) Existing law provides that any person who personally uses a firearm in the commission or attempted commission of a felony shall, upon conviction, in addition and consecutive to the punishment prescribed for the offense, be punished by an additional term of imprisonment in the state prison for 3, 4, or 5 years, except as specified.

This bill would provide that if the person has been convicted of carjacking or attempted carjacking the additional term shall be 4, 5, or 6 years.

(15) This bill would, among other things, also include the offense of carjacking for the following purposes: to determine those person who are liable to punishment in this state for a crime, as part of the definition of criminal profiteering activity, and a pattern of criminal gang activity, and for purposes of career criminal apprehension efforts.

(16) Under existing law, a minor 16 years or older is presumed to be not a fit and proper subject to be dealt with under the juvenile court law if the minor is alleged to have violated specified offenses including murder, arson of an inhabited building, or rape with force or violence or threat of great bodily harm unless the juvenile court concludes, based upon specified evidence, that the minor would be amenable to the care, treatment, and training program available through the facilities of the juvenile court based upon the court's evaluation of specified criteria.

This bill would add carjacking, as specified, to these offenses.

(17) Existing law provides that the above-mentioned provisions in (8) added by initiative statute, shall not be amended by the Legislature except by a statute passed in

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

each house by a rollcall vote entered in the journal, ⅔ of the membership concurring, or by a statute that becomes effective only when approved by the electors.

(18) This bill would incorporate additional changes to Section 6254 of the Government Code, various sections of the Penal Code, and various sections of the Welfare and Institutions Code, proposed by AB 25, AB 31, AB 41, AB 112, AB 166, AB 170, AB 178, AB 306, AB 327, AB 852, AB 1330, AB 1500, AB 1608, AB 1630, AB 1957, SB 310, SB 443, SB 724, SB 739, SB 798, and SB 1131 to be operative only if each of these bills, or a combination of these bills, and this bill are chaptered and become effective on or before January 1, 1993, and this bill is chaptered last.

(19) This bill would provide that it shall become operative only if AB 6 is enacted and becomes effective on or before January 1, 1994.

(20) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(21) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 612 (AB 685) Murray. Firearms: prohibited persons.

Existing law provides that any person who has, among other things, been convicted of a violation of the offense of drawing or exhibiting a firearm in a rude, angry, or threatening manner, as specified, and who owns or has in his or her possession or under his or her custody or control any firearm is guilty of a felony.

This bill would instead provide that any person who has 2 or more convictions of drawing or exhibiting a firearm in a rude, angry, or threatening manner, as specified, and who owns or has in his or her possession or under his or her custody or control any firearm is guilty of a felony.

Under existing law, any person who is subject to the prohibition on owning, possessing, or having a firearm under his or her custody or control because of specified misdemeanor convictions prior to January 1, 1992, and whose continued employment or livelihood is dependent on the ability to legally possess a firearm may, until January 1, 1993, petition the court for relief from the prohibition. Existing law specified that it was the intent of the Legislature to permit persons who were convicted of specified offenses prior to January 1, 1992, to seek relief from the prohibition.

This bill would instead, among other things, permit any person who is subject to the prohibition because of a conviction prior to January 1, 1991, to petition the court only once for relief from this prohibition. The bill would provide immunity from liability to law enforcement officials from false arrest arising from enforcement of the prohibition against persons who have been granted relief, as specified. This bill would delete this statement of legislative intent.

Under existing law, any person who is alleged to have committed specified offenses subject to the juvenile court law, is found to be a fit and proper subject to be dealt with under the juvenile court law, and is subsequently adjudged a ward of the juvenile court for committing a specified offense including murder or arson of an inhabited dwelling, shall not own or have in his or her possession or under his or her custody or control any firearm until the age of 30 years.

This bill would additionally include specified controlled substance offenses including, among others, possessing for sale or selling a substance containing 28.5 grams or more of cocaine, as specified. Because the violation of these provisions is a crime, this bill would establish a state-mandated local program.

This bill would incorporate additional changes in Section 12021 of the Penal Code, proposed by AB 242, to be operative only if both bills are enacted and become operative on January 1, 1994, and this bill is enacted last.

The bill would incorporate additional changes to Section 12021.1 of the Penal Code proposed by AB 1608, AB 1957, and SB 60, to be operative only if all 4 bills, or a combination thereof, are enacted and become operative on or before January 1, 1994, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school

NOTE: Superior numbers appear as a separate section at the end of the digests.

districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 613 (AB 1540) Caldera. Benefit assessments: municipal bonds.

The Improvement Bond Act of 1915 authorizes the legislative body of a city to determine to issue serial bonds, term bonds, or both, secured by assessments, to finance certain municipal improvements, and prescribes the form, content, and registration of the bonds, procedures for their redemption, and the payment of interest thereon. Bonds issued under the act may be redeemed prior to maturity upon payment to the registered owner of the principal and accrued interest together with a redemption premium of 5% of the principal.

This bill would require the legislative body, if it determines to issue term bonds, to provide for mandatory prior redemption of those bonds without premium.

Ch. 614 (AB 481) Connolly. Vehicles: impound: administrative costs.

(1) Existing law authorizes a city, county, or city and county to adopt an ordinance establishing procedures for the abatement and removal, as public nuisances, of abandoned, wrecked, dismantled, or inoperative vehicles or parts thereof from private or public property, and for the recovery or assumption by the local authority, of costs of administration and removal.

This bill would authorize a city, county, or city and county to adopt an ordinance or resolution establishing procedures for the release of properly impounded vehicles and for the imposition of a charge on the registered owner or the agent of that owner equal to its administrative costs relating to the removal, impound, storage, or release of the vehicles and would authorize the waiver of these costs upon verifiable proof that the vehicle was stolen. The bill would require persons to pay the charges imposed in specified cases and would create liens in the amount of the administrative costs. The bill would specify that these local charges are in addition to any other charges authorized or imposed under the Vehicle Code.

The bill would also authorize the removal of a vehicle that is stopped or left standing for more than 8 hours in a roadside rest area or view point, as defined.

(2) This bill would incorporate additional changes proposed by AB 780 in Section 22651 of the Vehicle Code, as specified, which would become effective if both bills are enacted.

Ch. 615 (AB 519) O'Connell. Insurance.

Existing law authorizes, under certain conditions, an insurer to invest in and acquire or loan upon securities and investments in a foreign country and provides that with respect to a life insurer having admitted assets of not less than one hundred million dollars ($100,000,000) as of the December 31, preceding, the investment shall not exceed in the aggregate 4% of the total admitted assets of the life insurer as of the preceding December 31. Those insurers are also required to comply with all other applicable state and federal laws relating to loans and investments.

This bill would make that provision applicable to insurers rather than life insurers.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 616 (AB 2119) Johnson. Insurance.

Existing law provides that a domestic life insurer having admitted assets aggregating in value not less than $100,000,000 may make excess funds investments in participation certificates, as specified.

This bill would, subject to the same conditions, authorize any domestic insurer having admitted assets aggregating in value not less than $100,000,000 to make those excess funds investments in participation certificates.

Existing law authorizes any domestic incorporated life insurer or casualty insurer having admitted assets of at least $1,000,000,000, after investing an amount equal to its required minimum paid-in capital in specified securities, to invest in, for purposes of

NOTE: Superior numbers appear as a separate section at the end of the digests.

bona fide hedging transactions, the purchase and sale of exchange traded options on stock indices, stock index futures contracts, or options on stock index futures contracts. With respect to existing common stocks owned by it, a life or casualty insurer may, for purposes of hedging, buy put options, as specified.

This bill would make the above provisions applicable to any domestic incorporated insurer and would additionally authorize those insurers to sell call options, as specified.

Existing law authorizes an insurer, under certain circumstances, to invest in or otherwise acquire or loan upon securities and investments in a foreign country which are substantially of the same kinds, classes and investment grades as those eligible for investment under the Insurance Code, subject to specified conditions, including a requirement for a life insurer having admitted assets of not less than $100,000,000, that the investment shall not exceed in the aggregate 4% of the total admitted assets of the life insurer as of a specified date, as specified.

This bill would make that provision applicable to any insurer having admitted assets of not less than $100,000,000.

Existing law specifies certain information which must appear on the declarations page of a policy of residential property insurance, including a requirement that if the policy includes code upgrade coverage it must be stated on the declarations page denoting applicable limits.

This bill would, in the alternative, authorize disclosure on separate disclosure forms attached to the declarations page, as specified.

Ch. 617 (AB 14) Hauser. Commercial fishing.

(1) Existing law requires the Director of Fish and Game to make a grant in installments to a sea urchin diver's organization for specified purposes. The grant is required to be funded by a special landing tax on sea urchins until March 1, 1994. Existing law also requires that the grant funds be distributed 60% to the Sea Urchin Resources Enhancement Program and 40% to research and management activities relating to the sea urchin resource.

This bill would extend that grant provision and the related landing tax to March 1, 1996, and would require the distribution to be 50% for each of those purposes.

(2) Existing law prohibits the transport of eggs or fry of golden trout out of the state.

This bill would repeal that prohibition.

(3) Under existing law, the moneys in the Fisheries Restoration Account are appropriated to the Department of Fish and Game for expenditure in fiscal years 1991–92 to 1993–94, inclusive. Existing law generally authorizes the department to expend those funds for the construction, operation, and administration of various projects designated in the plan developed by the Department of Fish and Game in accordance with the Salmon, Steelhead Trout, and Anadromous Fisheries Program Act, and projects designed to restore and maintain fishery resources and their habitat that have been damaged by past water diversions and projects and other development activities.

Existing law specifically authorizes the department to expend up to $800,000 of the funds in the account during those fiscal years to acquire heavy equipment and $2,000,000 to complete watershed assessments and fisheries restoration planning in coastal waterways.

This bill would delete the express authorization for the department to expend funds for heavy equipment, watershed assessments, and fisheries restoration, and would, instead, include the completion of watershed assessments and fisheries restoration planning within the general authorization for the department to expend funds for various projects.

(4) Existing law requires the department to establish and adjust a quota for the landing of sardines for commercial purposes when the spawning population exceeds 20,000 tons. One-third of that quota is required to be allocated for landings north of San Simeon Point in San Luis Obispo County and ⅔ for landings south of that point.

This bill would require the department to determine the portion of that quota that has not been taken by September 30 and, on or before October 15, to reallocate the remaining untaken portion, as specified.

(5) Existing law requires persons who purchase or receive live marine species indige-

NOTE: Superior numbers appear as a separate section at the end of the digests.

nous to California for commercial purposes from, among others, a licensed commercial fisherman who takes specified organisms or a registered aquaculturist, to obtain a marine aquaria receiver's permit from the department.

This bill would delete the requirement that a person who purchases or receives live marine species indigenous to California for commercial purposes from those persons obtain a marine aquaria receiver's permit. The bill would also recast the provision authorizing the department to establish the fee for that license. The bill would also delete an exception from the general authorization to take fish for commercial purposes of certain species for pet industry or hobby purposes. The bill would also delete obsolete provisions relating to sea urchins.

(6) Existing law requires, until April 1, 1993, any person landing groundfish subject to federal groundfish regulations adopted pursuant to the Magnuson Fishery Conservation and Management Act for commercial purposes to keep a copy of the landing receipt on board the fishing vessel for 30 days following the date of landing.

This bill would make these provisions operative until April 1, 1995. Because a violation of this provision is a crime pursuant to other provisions of existing law, the bill would impose a state-mandated local program.

(7) Existing law requires a person licensed to conduct commercial business in fish, as specified, and every commercial fisherman who sells fish taken from the waters of this state or brought into this state in fresh condition to persons not licensed to receive fish for commercial purposes, to complete a landing receipt for those fish. Existing law also requires every commercial fisherman or his or her designee, who transports, causes to be transported, or delivers to another person for transportation, any fish, except herring, taken from the waters of this state or brought into this state in fresh condition, to fill out a transportation receipt at the time the fish are brought ashore. Existing law specifies the contents of the landing receipt, including any other statistical information the department may prescribe.

This bill would, additionally, until April 1, 1997, authorize groundfish transportation receipts to be issued by the department to licensed fish receivers to transport groundfish species, as specified, and would authorize those receivers to use those groundfish transportation receipts under specified conditions. The bill would also change the contents of the landing receipts to, instead, include any other information the department may prescribe. Because a violation of any of those provisions is a crime pursuant to other provisions of existing law, the bill would impose a state-mandated local program.

(8) Existing law requires, until January 1, 1995, that any person who lands Dungeness crabs in California possess a Dungeness crab permit issued by the department. The permits are designated as nontransferable and are available only to persons who landed crab commercially in this state in their own names between August 5, 1982 and August 5, 1992. Existing law also, generally, makes any limited entry fishery permit transferable to the survivors of a permittee and, under specified conditions, transferable to a working partner of a permittee.

This bill would also require the department to issue a permit to a person who has a commercial fishing license and one year's experience as a crew member on a crab vessel, who has invested $5,000, or more, in equipment, gear, or a vessel, as specified, and who is ineligible to participate in any other state's crab fishery, upon finding of hardship by a review panel. The bill would require an applicant for hardship to pay a nonrefundable review fee of $250 which other provisions of existing law would require to be deposited in the Fish and Game Preservation Fund, a continuously appropriated fund. The bill would, thereby, make an appropriation.

(9) Existing law permits the taking of squid year-round, except in Districts 16 and 17 and in Tomales Bay.

This bill would restrict attracting squid by lights from a vessel in District 10, unless the vessel is used for that taking or is a seine skiff, as defined, of that vessel.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

reason.

(11) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 618 (AB 123) Andal. Vehicles: grape gondolas.

Under the Private Carriers' Registration Act, every private carrier is required to apply for and be granted registration by the Public Utilities Commission, and to pay specified registration fees.

This bill would specifically exempt grape gondolas used under prescribed conditions from these requirements.

Ch. 619 (AB 276) Richter. Hazardous waste: certification number.

(1) Existing law authorizes the Department of Toxic Substances Control to impose an annual verification fee upon all hazardous waste generators, transporters, and facility operators and requires the department to establish an identification number certification system to annually verify the accuracy of specified information related to generators, transporters, and hazardous waste facilities. The system is authorized to include, but is not limited to, the verification of certain information, including a description of the type and quantity of hazardous wastes produced annually by the firm or organization. A violation of the laws regulating hazardous waste is a crime.

This bill would instead require the department to establish that system to biennially verify the accuracy of the information, except that the department would be authorized to implement an annual certification under specified conditions. The bill would require the system to include verification only of specified information and would delete the requirement for a description of the type and quantity of hazardous wastes produced. The bill would require specified information concerning the firm or organization, including the number of employees of the firm or organization, whether the firm or organization produces RCRA hazardous waste or non-RCRA hazardous waste, whether the firm or organization is engaged in certain hazardous waste activities, and waste codes for the 4 largest hazardous waste streams.

Since a failure to report that information would be a crime pursuant to other provisions of law, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 620 (AB 552) Snyder. Economic poisons: licenses.

(1) Existing law provides for the licensure as a pesticide dealer of any person, including any manufacturer, distributor, or retailer who sells pesticides to users for an agricultural use, sells to users any method or device for the control of agricultural pests, or solicits sales of pesticides by making agricultural use recommendations through field representatives, or other agents.

This bill would change the name of that license to a pest control dealer license. The bill would also require each pest control dealer to have and maintain, at the principal office, and at each branch location, a designated agent, as specified, qualified to actively supervise all operations conducted at that location. Since under existing law, a violation of this requirement would be a misdemeanor, this bill would impose a state-mandated local program by creating a new crime. The bill would also change the name of the agricultural pest control license to the pest control business license.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 621 (AB 592) Areias. Commercial sales: weights and measures: Fair Packaging and Labeling Act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Under existing law, by regulation, the Director of Food and Agriculture may establish tolerances and specifications for commercial weighing and measuring apparatus for use in the state similar to the tolerances and specifications recommended by the National Bureau of Standards.

This bill would require the director to establish the tolerances and specifications by adoption of a specified national standard for those purposes, except as specifically modified, amended, or rejected by regulation. The bill would authorize the director to establish tolerances and specifications for commercial weighing and measuring devices not included in the national standard.

(2) The existing Fair Packaging and Labeling Act contains various definitions to govern its application.

This bill would repeal those definitions.

(3) The existing Fair Packaging and Labeling Act prohibits any person engaged in the packaging or labeling of any commodity from distributing the commodity unless the net quantity of contents is separately and accurately stated on the label.

This bill would, operative February 14, 1994, require that statement to be in both the inch-pound system of measurement, and the metric system. The bill would except from that requirement nonconsumer packages, foods packaged at the retail store level, and the sale or distribution of products whose labels have been printed before February 14, 1994. Since under existing law, a violation of this provision would be a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

(4) The existing Fair Packaging and Labeling Act requires the director to establish regulations to carry out the act and for the testing of packages to verify the net quantity statements. Existing law also contains various provisions concerning statements of net quantity and statements of weight.

This bill would make the provisions concerning statements of net quantity and statements of weight inoperative on February 14, 1994, and would repeal them on January 1, 1995. The bill would also, operative February 14, 1994, require the director to adopt by reference certain labeling requirements recommended by the National Conference on Weights and Measures.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 622 (AB 609) Cannella. Credit cards: use of cardholder information.

Existing law does not restrict the distribution by credit card issuers of marketing information on holders of the issuer's credit cards.

This bill would, with certain exceptions, require credit card issuers to provide notice to their cardholders prior to disclosing defined marketing information concerning a consumer, and notice to all new cardholders, that a cardholder may prohibit release of personally identifying marketing information either by returning a preprinted form supplied by the issuer or telephoning a toll-free number. Under the bill, the notice would not have to be provided to cardholders that had previously elected to prohibit release of that marketing information. The bill would provide for termination of such an election. The bill would specify that compliance with federal disclosure requirements respecting use of personal information would also constitute compliance with the bill.

The bill would become operative July 1, 1994.

Ch. 623 (AB 637) Bates. Regional centers: service delivery alternatives.

Existing law provides for the delivery of services to persons with developmental disabilities through regional centers pursuant to contracts with the State Department of Developmental Services.

This bill would, until June 30, 1998, authorize a regional center, with the approval of the department in consultation with specified entities, to implement regional center service delivery alternatives for consumers living in the community, to contain specified components.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 624 (AB 772) Areias. Economic poisons: pest control operations: qualified applicator.

(1) Existing law requires various persons who engage in the business of agricultural pest control operations to be licensed or hold a certificate issued by the Department of Pesticide Regulation.

This bill would provide that any person whose license or certificate is revoked, or whose application for such a license or certificate is denied for reasons other than his or her failure to satisfy examination requirements, is ineligible to apply or reapply for the same kind of license or certificate for a period of 3 years from the effective date of the decision to deny or revoke the license or certificate. This bill would also make it unlawful for any person to act in a supervisory capacity or position for a pest control business, except as specified, unless the person has a qualified applicator license. Since under existing law, a violation of this provision would be a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

(2) Under existing law, a qualified applicator license may be refused, revoked, or suspended by the Director of Pesticide Regulation for various specified reasons.

This bill would additionally permit the director to refuse, revoke, or suspend a license for failure to ensure that the responsibilities of the pest control business specified in regulations are carried out, and for failure to supervise operations, activities, and employees of the pest control business in a manner that ensures compliance with the provisions of the Food and Agricultural Code pertaining to pesticides. This bill would also permit the director to suspend or place conditions on the license of a qualified applicator pending a hearing if the director finds that continuance of the license endangers the public welfare or safety.

(3) Existing law makes it unlawful for any person to operate any aircraft in pest control unless the pilot operating the aircraft holds a valid pest control aircraft pilot's certificate, designating the pest control aircraft pilot's status as either a journeyman or an apprentice. Existing law provides that a journeyman's certificate shall not be issued to the holder of an apprentice certificate until the applicant has served as an apprentice for one year and until the applicant presents to the director satisfactory documentary proof consisting of a declaration or affidavit by the holder of a journeyman's certificate attesting to the applicant's completion of a specified number of hours of operation of aircraft in pest control activities.

This bill would require the performance of those hours of operation in pest control activities to have been performed under the attesting journeyman's direct and personal supervision.

(4) Under existing law, the director or the county agricultural commissioner may issue a cease and desist order to the persons responsible, upon a finding that the use, handling, delivery, or sale of an economic poison violates the law, and that the activity, if allowed to continue, presents an immediate hazard or will cause irreparable damage.

This bill would permit the director or commissioner to bring an action to enjoin the violation or threatened violation of such an order.

(5) Existing law provides that the certificate of a qualified applicator of pesticides may be refused, revoked, or suspended by the director, after hearing, for certain reasons.

This bill would provide that the certificate of a qualified applicator may also be refused, revoked, or suspended by the director for failure to supervise pesticide applications in a manner that ensures compliance with statutory law and regulation.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 625 (AB 733) Conroy. Escrow agents.

(1) Existing law prohibits any person who has been convicted of specified criminal violations, or has been held liable in a civil action by final judgment, or administrative action by any public agency for certain violations within the past 10 years, from serving in any capacity as an officer, director, stockholder, trustee, agent, or employee of an

NOTE: Superior numbers appear as a separate section at the end of the digests.

escrow agency, or in any position involving any duties with an escrow agent, in the state. Existing law requires any person who seeks employment by, or an ownership interest in, or other participation in the business of a licensed escrow agent to authorize Fidelity Corporation and the Commissioner of Corporations, or both, to have access to that person's state summary criminal history information. Existing law contains various related provisions.

This bill would make those prohibitions upon holding escrow positions applicable to criminal convictions of, or pleas of nolo contendere to, specified crimes within the past 10 years, and to civil and administrative judgments within the past 7 years based on specified conduct. The bill would exempt from the above provisions any person whose office, employment, ownership interest, or other participation in the business of a licensed escrow agent commenced prior to January 1, 1992. The bill would delete certain criminal charges and would provide that an offense does not include a conviction for which the person has obtained a certificate of rehabilitation from a court of competent jurisdiction as allowed by the Penal Code or a similar certificate obtained in a foreign jurisdiction. The bill would provide that these provisions are severable.

(2) Existing law requires the commissioner to notify the escrow agent of information that employment would be in violation of those provisions.

This bill would require written notice to the escrow agent and the person seeking employment.

(3) Existing law authorizes the commissioner to impose discipline against certain persons connected with escrow agents if the person has been convicted of or pleaded nolo contendere to a crime, or held liable in a civil action or administrative action involving findings or certain criminal conduct.

This bill would instead authorize discipline if the person has been convicted of or pleaded nolo contendere to a crime or been held liable in a civil action by final judgment, or any administrative judgment by any public agency, if the crime or civil or administrative judgment is one of the offenses described in (1) above or any other offense reasonably related to the qualifications, functions, or duties of a person engaged in the escrow business.

The bill would make related changes.

Ch. 626 (AB 812) Conroy. Los Alisos Water District.

(1) Under existing law, districts organized pursuant to the California Water District Law are landowner voting districts, but the voting procedure may be changed to that of a resident voting district upon petition by registered voters when at least 50% of the assessable area within the district is developed for residential, industrial, or commercial use.

This bill would impose a state-mandated local program by requiring all elections within the Los Alisos Water District to be conducted as resident voter elections and by requiring the general district election of that district to be held on the first Tuesday after the first Monday of November in each even-numbered year instead of in each odd-numbered year. The bill would require the terms of office of the directors to be shortened , as prescribed.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 627 (AB 848) Hannigan. Vallejo Sanitation and Flood Control District.

(1) The Vallejo Sanitation and Flood Control District Act creates the Vallejo Sanitation and Flood Control District and authorizes the district to appoint and employ employees to serve at the pleasure of the board. The act requires the compensation to be prescribed in the order of appointment. The act authorizes the district to combine 2 or more offices in its discretion.

This bill would, instead, authorize the board to employ staff and would delete the provision relating to their service at the pleasure of the board. The bill would require

NOTE: Superior numbers appear as a separate section at the end of the digests.

the board to prescribe, by resolution, the compensation for each classification of employees of the district, thereby imposing a state-mandated local program by imposing additional requirements on the district. The bill would authorize the board to combine, eliminate, or add staff positions and would authorize the engineer-manager to appoint or hire employees for positions created by the board.

(2) The act requires each district trustee to receive, pursuant to a board resolution, compensation of up to $75 for each meeting attended if those meetings do not exceed 3 in any month. The act requires the trustees to hold regular meetings and authorizes them to hold special meetings by written order with 24-hour written notice to any trustee not joining the order. The act requires the county treasurer to be the treasurer of the district.

This bill would increase the compensation to $100 for each meeting and would limit compensation to a total of $600 for 6 meetings in any calendar month. The bill would require the trustees to be compensated for attendance at any meeting at the request of the board as its representative, thereby imposing a state-mandated local program by imposing additional duties on the district. The bill would eliminate the 24-hour notice requirement relating to special meetings and would require the meetings of the board, advisory groups, or committees of the board to comply with the Ralph M. Brown Act. The bill would require the district's finance director or its chief financial officer to be the treasurer of the district, thereby imposing a state-mandated local program by imposing additional duties on the district.

(3) The act authorizes the district to acquire and construct improvements authorized by special assessment proceedings in accordance with various provisions of law.

This bill would, in addition, authorize the district to acquire and construct improvements authorized by special tax proceedings, or by both special assessment and special tax proceedings, and would make additional provisions of law applicable to the district.

(4) Existing law requires certain work of the district exceeding $4,000 in cost to be undertaken by contract in accordance with prescribed procedures.

This bill would make technical, nonsubstantive changes in those provisions.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 628 (AB 851) Speier. Advertising: unlawful practices.

Existing law regulates the information-access service business, as defined, and prohibits certain unlawful acts, including prohibiting any person from engaging in specified acts in order to encourage any caller to utilize an information-access service.

This bill would prohibit additional specified acts that encourage callers to utilize an information-access service. Since a violation of these provisions is a misdemeanor, this bill would create a state-mandated local program by creating new crimes.

Existing law prohibits the operation of a sweepstakes in this state through the use of a 900 number, as defined, unless the information provider registers with the Department of Justice, as specified. Existing law makes violation of this provision a misdemeanor.

This bill would prohibit an information provider that operates a sweepstakes, from making reference to that registration to the public, or to imply that such registration represents approval of the information provider's sweepstakes by the Department of Justice. Since a violation of this provision is a misdemeanor, this bill would create a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 629 (AB 1170) Epple. Criminal procedure: indigent defense.

Under existing law, in Los Angeles and Orange Counties, the court is required to utilize the services of the public defender to provide criminal defense services for indigent defendants. However, if the public defender is unavailable and the county and the courts have contracted with responsible attorneys or with a panel of attorneys to provide criminal defense services, the court is required to utilize the services of the contract-attorneys prior to assigning any other private counsel.

This bill would include San Diego County within the above provisions. The bill would further provide that if the public defender is not available and the county and the courts have contracted with one or more attorneys, as specified, to provide criminal defense services, the court shall use the services of the county-contracted attorneys prior to assigning any other private counsel. However, if the county has created a second public defender and contracted with other attorneys to provide defense services for indigent defendants, and if the quality of representation provided by the second public defender is comparable to that provided by the public defender, the court shall utilize the second public defender and then the contract-attorneys before assigning any other private counsel.

This bill would incorporate additional changes in Section 987.2 of the Penal Code proposed by AB 1126, to be operative only if AB 1126 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 630 (AB 1451) Umberg. Hazardous waste and materials: reporting.

(1) Existing law requires the Office of Emergency Services, by January 1, 1994, in consultation with administering agencies, to adopt by regulation a single comprehensive hazardous material reporting form for businesses to submit to administering agencies for purposes of reporting hazardous material inventories.

This bill would additionally require the office to adopt by January 1, 1995, a format, as specified, to allow persons subject to 2 or more specified reporting requirements to meet those requirements in one document. The bill would require the office to adopt the format in consultation with administering agencies and the Information Management Subcommittee of the Chemical Emergency Planning and Response Commission and in cooperation with the State Water Resources Control Board, the Department of Fish and Game, and the Department of Toxic Substances Control.

The bill would permit the operator of a marine facility and the owners or operators of specified storage tanks to elect to use the format adopted by the office in meeting specified planning requirements. The bill would also permit businesses that handle hazardous materials or are required to prepare and submit a risk management and prevention program (RMPP) to elect to use the format.

(2) Under existing law, a business that handles hazardous materials is required to review, and revise if necessary, the RMPP at least every 3 years.

This bill would instead require that review and revision of the RMPP at least every 3 to 5 years, as determined by the administering agency.

Ch. 631 (AB 1897) Bornstein. Commercial coaches: safety regulations.

(1) Existing law, known as the Mobilehomes-Manufactured Housing Act of 1980, authorizes the Department of Housing and Community Development to adopt regulations for the construction of commercial coaches and special purpose commercial coaches, as defined, and of manufactured homes and mobilehomes, as defined, that are not subject to the National Manufactured Housing Construction and Safety Act of 1974, as specified. With regard to commercial coaches, existing law requires the regulations adopted by the department to adopt by reference, with appropriate additions or deletions therefrom, specified model construction codes.

This bill would require the department to adopt regulations containing the requirements for the construction, alteration, or conversion of commercial coaches that are included in 4 specified uniform codes. The bill would also require the department to adopt by regulation the most recent editions of these uniform codes, as specified, with appropriate additions or deletions. Since violation of the regulations adopted pursuant to the provisions enacted by the bill would be punishable as a misdemeanor, the bill

NOTE: Superior numbers appear as a separate section at the end of the digests.

would impose a state-mandated local program.

(2) This bill would require that no municipality shall prohibit the use of a commercial coach that bears a valid decal and insignia, based on the date the insignia was issued.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 632 (AB 1915) Boland. Jurors: publication of information.

Existing law requires the superior court to make the names of qualified jurors available to the public upon request, unless the court determines that a compelling governmental interest requires that the information be kept confidential or its use limited in whole or in part. Existing law authorizes any person to petition the court for access to juror information that has been sealed, and requires the court to grant the petition in the absence of an express finding of continuing risk.

This bill would require the court, prior to discharging the jury in a criminal case, to advise the jurors of their right to request the sealing of personal juror identifying information. The bill would require the court to give 10 days' advance notice of a hearing on a petition for access to sealed personal juror identifying information to affected former jurors, by personal service or first-class mail, and would authorize those former jurors to appear at the hearing in person or through counsel to protest the granting of the petition. The bill would authorize a former juror to request the hearing be closed in order to protect his or her anonymity.

Ch. 633 (AB 2008) Alpert. Vehicles: air pollution.

(1) Existing law requires a certificate of compliance or noncompliance with motor vehicle emission standards upon the registration or transfer of registration of specified vehicles powered by internal combustion engines that are registered within an area designated for program coverage.

This bill would define the term "registered within an area designated for program coverage" to include any vehicle registered pursuant to the Vehicle Code in this state when the registered owner's mailing or residence address is not located within this state, or when the address at which the vehicle is garaged is not located within this state. Because a violation of the registration provisions of existing law is currently an infraction, the bill would impose a state-mandated local program by expanding the scope of an existing crime.

(2) Existing law authorizes a nonresident daily commuter to operate a vehicle on the state highways without being registered in this state if specified conditions are met.

This bill would exempt a resident of a foreign country from the above authorization.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 634 (AB 2025) Bowen. Nonprofit corporations: liability of directors and officers.

Existing law provides that there is no personal liability to a 3rd party for monetary damages on the part of a volunteer director or volunteer executive officer of a nonprofit public benefit corporation caused by the director's or officer's negligent act or omission in the performance of that person's duties, as specified, if certain conditions are met, including the condition that the damages are covered pursuant to a liability insurance policy, as specified, or if not covered by insurance, that the directors of the corporation and the person made all reasonable efforts in good faith to obtain available liability insurance.

This bill would provide that the requirement of a good faith effort to obtain available liability insurance, is satisfied for a corporation that is a charitable corporation, as speci-

NOTE: Superior numbers appear as a separate section at the end of the digests.

fied, with an annual budget of less than $25,000 if it makes at least one inquiry per year and the insurance is not available at a specified price, as specified.

Ch. 635 (AB 2202) Conroy. Radioactive materials: licensing.

(1) Existing law, the Radiation Control Law, regulates sources of ionizing radiation and authorizes the State Department of Health Services to grant licenses to receive, possess, or transfer radioactive materials, or devices or equipment utilizing radioactive materials. A violation of the Radiation Control Law is a crime.

This bill would require the department to direct a licensee or an applicant for such a license to provide a specified financial surety to the department and would require the department to adopt regulations specifying the amount and type of financial surety required. The bill would require the department to deposit the money received from the financial surety in the Financial Surety Account, which the bill would create in the Radiation Control Fund. The money in the fund would be continuously appropriated to the department for expenditure for specified purposes relating to taking corrective action with regard to radioactive materials and for long-term maintenance and surveillance, with respect to the facility or operations of the licensee who provided the financial surety.

The bill would require the department to mandate, as a condition of issuing the license, that the licensee take corrective action with regard to radioactive materials at the licensee's facility.

Since a violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 636 (AB 2345) Ferguson. Commercial mail receiving agency.

Existing federal law provides that information contained in Postal Service Form 1583 shall not be available to the public but permits the names and addresses of postal customers to be furnished to federal, state, or local government agencies, as specified.

This bill would require a commercial mail receiving agency to establish positive identification of any person filing the form, as specified.

This bill would require a commercial mail receiving agency to maintain a copy of any Postal Service Form 1583 filed with the United States Postal Service, and to make that copy available, upon request of any law enforcement agency conducting an investigation, to the agency for purposes of that investigation and copying.

This bill would provide that violation of this provision is an infraction, punishable as specified. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 637 (SB 324) Watson. Parenting education.

Existing law requires the adopted course of study for grade 7 or 8 to include a one-semester course, or its equivalent, in parenting skills and education, as specified.

This bill would allow a pupil to be exempted from the one-semester course if the pupil demonstrates mastery of the course content. The bill would provide that when the parenting skills and education curriculum is incorporated within courses other than consumer and home economics, these courses are not subject to the consumer and home economics model performance standards and framework and that teachers of these courses are not required to meet the qualifications specified for teachers of consumer and home economics.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 638 (SB 346) Boatwright. Industrial loan companies: loan terms.

Existing law provides that an industrial loan company may make loans and acquire or discount obligations having a term in excess of 7 years secured primarily by real property, or secured solely or primarily by real property, as specified, if all of the loans and obligations in excess of 7 years do not in the aggregate exceed 70% of the company's total assets. Those loans with a term in excess of 10 years and 30 days are required to be repaid in substantially equal installments during their term.

This bill would, for those purposes, provide that any loan or obligation guaranteed or insured by any federal or state agency shall be considered as having a term of less than 7 years. It would also increase the term of loans which must be repaid in substantially equal installments from 10 years and 30 days to 15 years and 30 days, and make related changes.

Ch. 639 (SB 400) Hughes. PERS: optional variations of optional settlements 2 and 3 regarding predeceasing designated beneficiaries.

The existing Public Employees' Retirement Law provides for the so-called "pop-up" variations of optional settlements 2 and 3, which require that when the designated beneficiary predeceases the retired member, his or her retirement allowance would then increase to the amount that would have been paid if the member had not elected the optional settlement. That law conditions the pop-up upon the beneficiary either predeceasing the member or waiving entitlement to the benefit.

This bill would add the additional condition of the filing with the Board of Administration of a judgment of marriage dissolution or annulment or legal separation that awards the total interest in PERS to the member and the member elects this benefit.

Ch. 640 (SB 369) Kopp. Mental health services: Short-Doyle Medi-Cal: managed care contracts.

Existing law provides for specified community mental health services to be provided to Medi-Cal eligible persons under the Short-Doyle Medi-Cal program. Providers of these services are subject to regulation by the State Department of Mental Health, and are reimbursed by the State Department of Health Services.

Existing law authorizes the State Department of Health Services to contract with managed care providers for the provision of health care services to Medi-Cal beneficiaries, subject to certain conditions.

This bill would authorize the State Department of Mental Health, in consultation with the State Department of Health Services, to field test in 2 to 5 counties, at the counties' option, major components of a capitated, integrated service system of Short-Doyle Medi-Cal mental health managed care. It would require the department to report to the Legislature on various aspects of the field test no later than July 1, 1995.

Ch. 641 (SB 500) Hill. Performance and Results Act of 1993.

Existing law does not provide a program for state agencies and departments relating to improving the delivery of governmental services through the use of strategic planning and performance measurement.

This bill would enact the Performance and Results Act of 1993 that would require the Department of Finance to develop a performance budgeting pilot project, in accordance with specified principles, involving at least 4 state departments, including the Stephen P. Teale Consolidated Data Center, the Department of Parks and Recreation, the Department of General Services, and the Department of Consumer Affairs, or other departments substituted by the Department of Finance, to be implemented during the 1994–95 fiscal year.

This bill would require the Department of Finance to submit a report to the Chairperson of the Joint Legislative Budget Committee on or before January 1, 1996, on the pilot program, containing specified items of information.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 642 (SB 616) Russell. Transportation: Los Angeles County Metropolitan Transportation Authority: contracts.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law creates the Los Angeles County Metropolitan Transportation Authority as the successor to the Los Angeles County Transportation Commission and the Southern California Rapid Transit District. Existing law prescribes the powers and the duties of the authority and, among other things, authorizes it to enter into contracts.

This bill would expressly authorize the authority to enter into contracts with private entities for the planning, design, construction, and operation of (1) transit systems, and (2) facilities on real property owned or to be owned by the authority, except with respect to specified transit systems and related works of improvement.

The bill would prescribe a procedure that the authority would be required to utilize in awarding those contracts.

Ch. 643 (SB 633) Deddeh. Physician assistant: state of emergency.

Existing law, the Physician Assistant Practice Act, authorizes a physician assistant, as defined, to perform medical services, as set forth by the regulations adopted by the Division of Allied Health Professions of the Medical Board of California, when the services are rendered under the supervision of a licensed physician and surgeon or physicians and surgeons approved by the division.

This bill would authorize a physician assistant to perform these medical services when the services are rendered during any state of war emergency, state of emergency, or state of local emergency, as defined, at the request of certain officials or agencies, or pursuant to the terms of a mutual aid operation plan, even if the approved supervising physician is not available, so long as a licensed physician is available to render appropriate supervision. This bill would prohibit application of this authority in certain circumstances.

This bill would, specify that appropriate supervision does not require the personal or electronic availability of a supervising physician if that availability is not possible or practical due to the emergency. The bill would authorize physician local health officers to act as supervising physicians during emergencies without being subject to the requirement of approval by the board. This bill would also exempt physicians supervising physician assistants under emergency conditions from the limitation on the number of physician assistants that may be supervised.

This bill would incorporate additional changes in Section 3502 of the Business and Professions Code, proposed by AB 221, to be operative only if AB 221 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 644 (SB 761) Hayden. Los Angeles County Metropolitan Transportation Authority: conflict of interest.

(1) Existing provisions of the Political Reform Act of 1974 prohibit a public official at any level of state or local government from making, participating in the making, or in any way attempting to use the official's official position to influence a governmental decision in which the official knows or has reason to know that he or she has a financial interest.

This bill would also prohibit an alternate member to the Los Angeles County Metropolitan Transportation Authority, except one appointed by the Los Angeles County City Selection Committee, from making, participating in the making, or in any way attempting to use his or her appointed position to influence an authority decision in which the alternate member knows or has reason to know that the regular member, whom the alternate member represents, has a financial interest.

(2) The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would, therefore, require a ⅔ vote.

Ch. 645 (SB 764) Kopp. Actions and proceedings.

(1) Existing law establishes special procedures in actions against an attorney for a civil conspiracy with his or her client arising from any attempt to contest or compromise a claim, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specify that this provision establishes a special proceeding of a civil nature, and any order made under this provision which determines the rights of a petitioner or an attorney against whom a pleading has been or is proposed to be filed, shall be appealable as a final judgment in a civil action.

The bill would declare that this provision does not constitute a change in, but is declaratory of, existing law.

(2) Under existing law, a court may award attorney's fees to a successful party in an action which has resulted in the enforcement of an important right affecting the public if certain conditions are met, but these attorney's fees cannot be awarded to a public entity.

This bill would permit award of attorney's fees to public entities under these provisions, as specified, if the award is against another public entity.

Ch. 646 (SB 871) Johnston. Insurance: rate hearings.

Existing law provides that the Insurance Commissioner shall notify the public of any application by specified insurers for a rate change, and provides that the application is deemed approved 60 days after public notice, except as specified. Existing law provides, however, for rate change applications made after July 1, 1993, that a rate change application is deemed approved 180 days after the application is received by the commissioner unless that application has been disapproved by a final order of the commissioner subsequent to a hearing or extraordinary circumstances exist.

This bill would define "receive" for that purpose to mean the date delivered to the Department of Insurance. The bill would provide that the provision relating to applications being deemed approved after 180 days applies to any refilings, modifications, or supplements to any rate application after July 1, 1993, with respect to rate applications originally made before July 1, 1993.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 647 (SB 952) Dills. Vehicles: unlawful acts.

(1) Under existing law, a violation of the Anti-Gridlock Act of 1987 (unlawful vehicle entry in an intersection or marked crosswalk) is a parking violation and is not a violation of a law relating to the safe operation of a vehicle. Existing law generally requires that any conviction involving the safe operation of a motor vehicle be given a value of one point for determining a driver's violation point count for purposes of suspension or revocation of his or her driver's license.

This bill would specify that no violation points shall be given for a conviction of the Anti-Gridlock Act of 1987. The bill would also specify that a violation of that act shall constitute either a stopping violation or a parking violation depending upon who issues the notice of violation.

(2) Existing law makes it unlawful for the owner, or any other specified person, to cause the operation of a vehicle upon a highway in any manner contrary to law or for any owner to request, cause, or permit the operation of a vehicle in a specified manner. Whenever the owner or lessee is prosecuted for a violation, the court may, on the request of the owner or lessee, take appropriate steps to make the driver of the vehicle, or any other person who directs the loading, maintenance, or operation of the vehicle, a codefendant. In the event the codefendant is held solely responsible and found guilty, the court may dismiss the charge against the owner or lessee.

This bill would recast the language to apply it to any person, including any person who gives false or erroneous information in a written federal certification of gross weight. The bill would create a rebuttable presumption, and would impose a state-mandated local program by expanding the scope of an existing crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 648 (SB 994) Kelley. Dentistry: group advertising and referral services.

Existing law provides that it is not unlawful to participate in or operate a group advertising and referral service for dentists if certain conditions are met, including a requirement that participating dentists charge no more than their usual and customary fees to any patient referred and that the service register with the Board of Dental Examiners of California. Existing law authorizes the board to adopt regulations necessary to enforce and administer these provisions.

This bill would provide that it is not unlawful to participate in or operate a group advertising and referral service for dentists if, in addition to the above-described conditions, (1) on and after July 1, 1994, any print, radio, and television advertising by the service clearly and conspicuously discloses that member dentists pay a fee to the service whenever this occurs and (2) the advertising conforms with provisions of existing law regarding advertising by dentists.

This bill would also authorize the board to suspend or revoke the registration of any service that fails to comply with the requirements of (1). This bill would prohibit a service from reregistering with the board if its registration is under suspension. It would also prohibit a service from reregistering with the board if it had its registration revoked less than one year after that revocation.

Ch. 649 (SB 1041) Craven. Housing: California Housing Finance Agency.

Under existing law, the California Housing Finance Agency may institute any action or proceeding, as specified, against any housing sponsor receiving or assuming a loan administered by the agency, in order to enforce the terms and provisions of any contract between the agency and the housing sponsor, to foreclose its mortgage, or to otherwise protect the public interest or the occupants of the housing development.

This bill would specify that any action taken by the agency to first foreclose against any collateral provided by a borrower to secure a loan made by the agency does not, under specified conditions, constitute a money judgment or a deficiency judgment or other action, as prescribed. The bill would state that this change is declaratory of existing law.

The bill would also authorize the award of costs and reasonable attorney's fees, to be determined in the court's discretion, to the prevailing party in any action instituted pursuant to this section.

Ch. 650 (SB 1056) McCorquodale. Improvement acts: assessments: bonds: call for redemption.

The Municipal Improvement Act of 1913 permits the legislative body of a municipality to install various improvements, to collect an assessment within the improvement district to pay for the improvements, and to issue bonds to finance the improvements.

This bill would authorize the Orange County Board of Supervisors to call for the redemption of all or a portion of bonds so issued if acquisition or construction of the improvement is delayed beyond the expected date. The bill would require the board to cause any annual assessment installments occurring after the redemption to be reduced to the maximum extent permitted by law. The bill would permit the board to subsequently issue bonds for the ones called and to deposit the proceeds in the improvement fund.

Ch. 651 (SB 1138) Kelley. Horseracing: breeders awards: owner premiums: stallion awards.

(1) Existing law provides for the distribution of a certain percentage of the parimutuel pool for on-track and off-track wagering resulting from thoroughbred racing as breeder awards, owner premiums, and stallion awards. Existing law defines "qualifying race" for the purpose of determining the amounts of owner premiums to include all nonclaiming races in this state, and certain claiming races, as defined, conducted in this state, and, for the purpose of determining stallion awards, to include those races and all graded stakes races conducted within the United States.

This bill would redefine "qualifying race," for the purpose of determining owner premiums and stallion awards, to limit the nonclaiming races and certain claiming races

NOTE: Superior numbers appear as a separate section at the end of the digests.

to those conducted in this state during racing meetings where more than ½ of the races on every racing program are for thoroughbreds.

(2) Existing law provides that after certain deductions, the official registering agency shall for computational purposes distribute annually the balance of the deposits made for breeder awards, owner premiums, and stallion awards in the following manner: 55% for breeder awards; 20% for owner premiums; 20% for stallion awards; and 5% to the California-bred race fund.

This bill would provide for 15% for owner premiums instead of 20%, and 10% for the California Cup Day and other California-bred races instead of 5%.

(3) Under existing law, the Legislature declares that the California Cup Day is an event that should be undertaken as a pilot project to promote the thoroughbred industry in this state.

This bill would delete the language proposing that the California Cup Day be undertaken as a pilot project.

Ch. 652 (SB 1142) Rosenthal. Clinical laboratory bioanalysts.

Existing law requires an applicant for a clinical laboratory bioanalyst's license to successfully pass a written, oral, and practical examination conducted by the State Department of Health Services or a committee designated by the department.

This bill would instead require the applicant to successfully pass only a written and oral examination.

Ch. 653 (AB 1731) Brulte. Sales and use taxes: exemptions: qualified organizations.

The existing Sales and Use Tax Law imposes a tax on the sale of, or the storage, use, or other consumption in this state of, tangible personal property. Existing law provides various exemptions and partial exemptions from that tax, including a partial exemption for sales, made on an irregular or intermittent basis, of tangible personal property made or produced by members of specified organizations. Under that partial exemption, those organizations are treated as a consumer, and not as a retailer for purposes of the sales and use tax.

This bill would additionally provide a partial exemption for any qualified organization, as defined, with respect to the sale of tangible personal property if (1) the tangible personal property is of a handcrafted nature and is designed, created, or made by individuals with developmental disabilities who are members of, or receive services from, the organization, (2) the price of each item sold does not exceed $10, (3) the organization's sales are made on an irregular or intermittent basis, and (4) the organization's profits from those sales are used exclusively in furtherance of the purposes of the organization.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 654 (SB 256) Maddy. Health care.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Under existing law, providers may enter into a contract with the State Department of Health Services to provide health care.

Existing law authorizes counties to establish a special commission in order to meet the problems of the delivery of publicly assisted medical care and to demonstrate ways of

NOTE: Superior numbers appear as a separate section at the end of the digests.

promoting quality care and cost efficiency, and establishes procedures for the payment of liabilities of a commission upon its termination.

This bill would revise the procedures and means of payment of liabilities of the commission upon termination thereof, and would specify that the liabilities of the commission, upon termination, shall not become the liabilities of the county.

Existing law specifies that a member of certain county commissions on publicly assisted medical care, including San Mateo County and other designated county commissions, shall not be deemed to be interested in a contract entered into by the commission within the meaning of provisions relating to conflicts of interest if the member meets certain qualifications.

This bill would apply those provisions to county commissions on publicly assisted medical care authorized by this bill.

Existing law limits the provision of health care under the Medi-Cal program to providers that meet various requirements.

This bill would specify that covered Medi-Cal benefits may include certain health services provided by certain educational agencies.

Ch. 655 (AB 2136) Eastin. Solid waste: disposal and codisposal site cleanup program.

(1) Existing law, the California Integrated Waste Management Act of 1989, requires each operator of a solid waste facility to pay a quarterly fee to the State Board of Equalization, and the revenue from the fees is required to be deposited in the Integrated Waste Management Account in the Integrated Waste Management Fund, which may be expended by the California Integrated Waste Management Board, upon appropriation by the Legislature, to carry out the act.

This bill would require the board to initiate a program, on January 1, 1994, for the cleanup of solid waste disposal sites and solid waste at codisposal sites, as defined, where the responsible party either cannot be identified or is unable or unwilling to pay for timely remediation, and where cleanup is needed to protect public health and safety and the environment. The bill would require the board, in prioritizing sites for cleanup, to consider, among other things, the degree of risk posed to the public health and safety and the environment, the solvency of the owner of the site, and the ability of the board to adequately clean up the site with available funds. The bill would require the board, on or before March 31, 1995, and annually thereafter, in conjunction with the annual report required by the act, to report to the Governor and the Legislature on the program, and would prescribe the contents of the report. The bill would require the board to seek repayment of the funds expended pursuant to these provisions from the responsible parties.

The bill would create the Solid Waste Disposal Site Cleanup Trust Fund in the State Treasury, and would continuously appropriate the money in the fund to the board for purposes of carrying out the program. The bill would limit, during the 1994–95 fiscal year and each fiscal year thereafter, to $5,000,000, the amount that may be expended by the board from the trust fund. The bill would require the board, of the amount appropriated by The Budget Act of 1993 to the board from the Integrated Waste Management Account for 10-Planning and Enforcement, as the budget item would be amended by AB 1220, to expend $300,000 for administrative costs incurred in implementing the program. By changing the purposes for which those appropriated funds may be expended, the bill would make an appropriation. The bill would state legislative intent regarding funding the program for the 1993–94 fiscal year.

(2) The bill would become operative only if A.B. 1220 is also enacted and takes effect.

Ch. 656 (AB 1220) Eastin. Solid waste: regulation: fees.

(1) Existing law, the California Integrated Waste Management Act of 1989, requires the California Integrated Waste Management Board to adopt regulations which set forth minimum standards for solid waste management and require assurance of financial ability to pay for specified injury and property damage claims resulting from the operation of a disposal facility. The board is required to inspect each solid waste facility in the state each year.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under the act, each operator of a solid waste facility is required to pay a quarterly fee to the State Board of Equalization, based upon the amount of solid waste disposed of at each site, but the fee is prohibited from exceeding $1 per ton. The revenue from the fee is required to be deposited in the Integrated Waste Management Account in the Integrated Waste Management Fund and may be expended by the board, upon appropriation by the Legislature, to carry out the act.

This bill would prohibit regulations of the board from including aspects of solid waste handling or disposal which are solely within the jurisdiction of the State Air Resources Board or the State Water Resources Control Board or a California regional water quality control board, and would provide that, if an owner or operator of a solid waste landfill is in compliance with certain air pollution requirements, the owner or operator is deemed to be in compliance with the board's landfill gas migration regulations. The bill would require the board and the State Water Resources Control Board to develop, by January 1, 1994, a work plan for combining specified financial assurance requirements.

The bill would enact the Solid Waste Disposal Regulatory Reform Act of 1993, which would make a statement of legislative intent and would require the board and the State Water Resources Control Board to develop an implementation plan by July 1, 1994, to implement the bill and to adopt emergency regulations for implementation of the bill.

The bill would delete the requirement that the board annually inspect each solid waste facility and would instead require the board to inspect the types and numbers of facilities determined necessary by the board. The bill would require the board, in conjunction with an inspection conducted by the local enforcement agency, to conduct at least one inspection every 18 months of each solid waste landfill and transformation facility in the state.

The bill would revise the manner of review for closure plans and postclosure maintenance plans for solid waste landfills and would deem a solid waste landfill owner or operator which meets the board's closure and postclosure maintenance regulations to meet all state requirements for the adoption of a closure plan and postclosure maintenance plan. The bill would require the board and the State Water Resources Control Board to revise certain regulations, by June 30, 1994, to consolidate the closure and postclosure maintenance requirements of the board and the State Water Resources Control Board. The bill would revise the act's enforcement requirements with regard to the issuance of solid waste facilities permits, the inventory of solid waste facilities which violate state minimum standards, the referral of violations, and the taking of specified enforcement actions by the board.

The bill would decrease the quarterly fee for solid waste disposal to 75¢ per ton of solid waste disposed of at each disposal site for the 1993–94 fiscal year, and would require, beginning October 1, 1993, each disposal facility to forward 18 ¢ per ton of that fee to the State Board of Equalization and to apply the remaining 57 ¢ toward specified purposes, and would prescribe related matters. The bill would, for the 1994–95 fiscal year, require the fee for solid waste disposed of to be$1.34 per ton, and, commencing with the 1995–96 fiscal year, would require the amount of the fee established by the board to be an amount that would generate sufficient revenues, as specified, but in an amount not to exceed $1.40 per ton. The bill would require the board to expend the funds in the Integrated Waste Management Account, upon appropriation by the Legislature, to issue grants to local enforcement agencies to carry out solid waste landfill permit and inspection programs and to cities, counties, or other local agencies for specified purposes with regard to the disposal of hazardous waste at solid waste disposal sites. The board would be required, upon appropriation by the Legislature, to allocate an amount of up to $60,000 to the Department of Toxic Substances Control from the account for expenditure for the 1993–94 fiscal year to develop and maintain a data base of household hazardous waste collection events, and would require the board to annually allocate up to $16,300 thereafter. The bill would additionally authorize the money in the account to be used for costs incurred by the State Water Resources Control Board and the California regional water quality control boards to regulate solid waste landfills and would make a declaration of legislative intent in that regard.

(2) Existing law, the Solid Waste Disposal Site Hazardous Reduction Act of 1989,

NOTE: Superior numbers appear as a separate section at the end of the digests.

requires operators of solid waste landfills to pay an annual fee to the State Board of Equalization, for deposit in the Solid Waste Disposal Site Cleanup and Maintenance Account in the Integrated Waste Management Fund. The money in that account is available, upon appropriation by the Legislature, for entering into loan guarantee agreements with owners and operators of solid waste landfills and making grants to cities, counties, or other local agencies for specified local programs and for an annual grant to the State Water Resources Control Board to assist in solid waste landfill permit and inspection programs, including for the taking of emergency corrective action.

This bill would repeal that act, thereby abolishing that account, and would require the board to offset the amount of the quarterly fee deposited in the Integrated Waste Management Account by the amount of funds appropriated by the Legislature in the Budget Act of 1993 from the abolished Solid Waste Disposal Site Cleanup and Maintenance Account. The bill would require any funds remaining in the abolished Solid Waste Disposal Site Cleanup and Maintenance Account to be transferred to the Integrated Waste Management Account in the Integrated Waste Management Fund.

(3) Existing law, the Solid Waste Disposal Site Cleanup and Maintenance Fee Law, specifies procedures for the collection of the fees imposed upon the disposal of solid waste. A violation of that law is a crime.

This bill would rename the law the Integrated Waste Management Fee Law and would make revisions to that law with regard to the repeal of the annual solid waste disposal fee, as specified in (2) above. Since a failure to pay the increased quarterly disposal fee which would be imposed by the bill would be a crime pursuant to that law, the bill would impose a state-mandated local program.

(4) The bill would amend the Budget Act of 1993 to revise amounts appropriated for support of the board. The bill would require the board to expend $5,750,000 from specified appropriations for a specified program for source reduction, public education, and market development programs.

(5) The bill would appropriate $75,000 to the board from the California Used Oil Recycling Fund for expenditure during the 1993–94 fiscal year for the purpose of implementing a pilot program for funding claims submitted by state agencies for providing price preferences for the purchase of recycled products.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) The bill would become operative only if AB 2136 is also enacted and takes effect.

(8) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 657 (SB 112) Roberti. Breast cancer: written summary of treatment alternatives.

Existing law provides that failure of a physician and surgeon to inform a patient of alternative efficacious methods of treatment for breast cancer, by means of a standardized written summary developed by the State Department of Health Services on the recommendation of the Cancer Advisory Council, is unprofessional conduct. Existing law provides that this standardized written summary is to be printed and made available by the Medical Board of California. Existing law requires that the department review the summary at least once every 5 years and revise the summary if the department determines new or revised information should be included. Existing law requires that certain information be included in the summary the next time it is revised.

This bill would instead require that the department review the written summary commencing no later than January 1, 1995, and every 3 years thereafter, and would require that specified additional information be included in the next revision of the written summary. This bill would make additional clarifying changes.

This bill would require the board to establish a distribution system for the written summary that is linked to the physician and surgeon license renewal process.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 658 (AB 601) Speier. Breast cancer: prostate cancer: treatment: posting of notice.

Existing law provides that failure of a physician and surgeon to inform a patient of alternative efficacious methods of treatment for breast cancer, by means of a standardized written summary developed by the State Department of Health Services on the recommendation of the Cancer Advisory Council, is unprofessional conduct. Existing law provides that this standardized written summary is to be printed and made available by the Medical Board of California.

This bill would require that every person or entity who owns or operates a health facility or clinic, or who is licensed as a physician and surgeon, cause a sign or notice, with prescribed wording relating to this required breast cancer treatment information, to be posted where breast cancer screening or biopsy is performed by a physician and surgeon as an outpatient service, or in a reasonably proximate area to where that screening or biopsy is performed.

Existing law also requires the department to develop a standardized written summary concerning the medically viable and efficacious alternative methods of treatment of prostate cancer. Under existing law, physicians are urged to make the summary available to patients when appropriate.

This bill would require that every person or entity who owns or operates a health facility or clinic, or who is licensed as a physician and surgeon and rents or owns the premises where his or her practice is located, cause a sign or notice, with prescribed wording relating to prostate cancer treatment, to be posted where screening or treatment of prostate cancer is performed, or in a reasonably proximate location to where that screening or treatment is performed.

Ch. 659 (AB 525) Speier. Tissue donors: sperm donors: breast cancer research.

Existing law authorizes health care providers, as defined, to disclose medical information regarding a patient to specified individuals and entities in certain circumstances.

This bill would authorize a health care provider to disclose medical information to a tissue bank processing the tissue of a decedent for the purpose of aiding the transplant.

Existing law prohibits the transfer of any tissues, as defined, into the body of another person unless the donor of the tissues has been screened and found nonreactive for evidence of infection with certain communicable diseases.

This bill would revise these provisions to authorize the recipient of sperm, from a donor known to the recipient, to waive a second or repeat screening of that donor if the recipient is informed of the requirements for testing donors under California law and signs a written waiver. This bill would revise the definition of "transplantation" to include the transfer of tissue from a donor to the body of that donor.

Existing law requires every tissue bank operating in California to have a current valid license. Existing law exempts, among other things, the collection or implantation of tissue by an individual physician and surgeon from or into his or her patient. Existing law excludes the processing and storage of the tissue from this exemption.

This bill would provide that the processing and storage of the tissue is excluded from the exemption, except the processing and storage of semen by an individual physician and surgeon in certain circumstances.

Existing law requires certain money from the California Breast Cancer Research Fund to be allocated to the State Department of Health Services, upon appropriation by the Legislature, for conducting research relating to breast cancer.

This bill would require the department to allocate $20,000 annually of that money to promote the fund.

Ch. 660 (AB 478) B. Friedman. Cigarette tax increase: Breast Cancer Act of 1993.

The existing Cigarette and Tobacco Products Tax Law imposes a tax at a rate of 5 mills on every distributor for the distribution of each cigarette and also imposes a cigarette and tobacco products surtax at a rate of 12½ mills per cigarette and at a rate for tobacco products equivalent to 17½ mills per cigarette.

This bill would increase the tax on cigarettes by one mill per cigarette or 2¢ per package of 20 cigarettes for distributions on and after January 1, 1994. It would also

NOTE: Superior numbers appear as a separate section at the end of the digests.

impose compensating floor stocks and indicia adjustment taxes on cigarettes on the operative date of this bill and would make other related technical changes.

Existing law creates the Cigarette Tax Fund and the Cigarette and Tobacco Products Surtax Fund into which the proceeds of cigarette and tobacco products taxes are deposited and are appropriated, or may only be appropriated, for certain purposes.

This bill would provide that the revenue resulting from the bill's increase in cigarette taxes and the imposition of compensatory floor stock taxes on cigarettes shall be deposited in the Breast Cancer Fund, which the bill would create. This bill would provide that the moneys in that fund shall, upon appropriation by the Legislature, be allocated to the State Board of Equalization for reimbursement of all costs incurred in connection with the compensating floor stocks and indicia adjustment taxes and the balance shall be allocated for purposes of breast cancer research, detection services, and education, as provided.

This bill would make certain legislative findings and declarations regarding breast cancer.

This bill would take effect immediately as a tax levy, but it would not become operative until January 1, 1994.

Ch. 661 (AB 2055) B. Friedman. Taxes: insurance and cigarette taxes.

The California Constitution imposes an annual tax on each insurer doing business in this state at a rate of 2.35% of the amount of gross premiums, less return premiums. The existing Bank and Corporation Tax Law requires that taxpayers whose tax liability exceeds specified amounts remit payment by electronic funds transfer. The existing Sales and Use Tax Law requires that persons whose estimated tax liability exceeds specified amounts per month remit amounts due by electronic funds transfer.

This bill would require that on and after January 1, 1994, and before January 1, 1995, each insurer and other entities that pay insurance taxes whose annual taxes exceed $50,000 make payment by electronic funds transfer, as defined. The bill would require that on and after January 1, 1995, each insurer and other entities that pay insurance taxes whose annual taxes exceed $20,000 make payment by electronic funds transfer. This bill would also impose a penalty of 10% of the taxes due on any person required to remit taxes by electronic funds transfer who remits those taxes by means other than an appropriate electronic funds transfer.

AB 478 of the 1993–94 Regular Session would, if enacted, provide that revenues derived from an increase in cigarette taxes and the imposition of compensating floor stock taxes be deposited in the Breast Cancer Fund for allocation, upon appropriation by the Legislature, to the University of California and the State Department of Health Services, as provided.

This bill would repeal the compensating floor stock taxes, and revise and clarify the allocations, upon appropriation by the Legislature, of the revenues derived from the tax increase to include, among other things, allocations to the Breast Cancer Research Program and the Breast Cancer Control Program, which would be established by this bill for specified purposes related to breast cancer research and control.

Ch. 662 (AB 2352) Baca. Firearms: assault weapons.

Under existing law, a person who has registered an assault weapon may possess that weapon only under specified conditions, such as while on a target range, unless the person obtains a permit.

This bill would, in addition, permit a person who has a registered assault weapon to possess that weapon while on publicly owned land if the possession and use of assault weapons, as specified, is specifically permitted by the managing agency of the land.

This bill would incorporate additional changes in Section 12285 of the Penal Code, proposed by SB 180 and SB 1128 to be operative only if SB 180 and SB 1128 and this bill, or a combination, are chaptered and become effective January 1, 1994, and this bill is chaptered last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 663 (AB 54) Sher. Solid waste.

(1) Existing law, the California Integrated Waste Management Act of 1989, requires the California Integrated Waste Management Board to file an annual report of specified content regarding administration of the act with the Legislature. The act requires the board to develop model programs and materials to assist rural counties and cities in complying with specified requirements of the act.

This bill would require the board to include in the annual report a report on the development of those programs and materials and recommendations for providing technical assistance to rural counties and cities, as specified.

(2) The act requires each county to prepare and submit to the board a countywide integrated waste management plan, including specified county and city elements. The act requires the plan and any plan amendment to be approved by the counties and by the cities within the counties, as specified, with the exception of the source reduction and recycling element.

This bill would also except from that approval the household hazardous waste element and the nondisposal facility element.

(3) Existing law, with certain exceptions, including the Department of Commerce, requires licensure of defined commercial finance lenders.

This bill would also exempt the board from licensure as a commercial finance lender.

(4) Existing law requires the Department of Housing and Community Development and the State Fire Marshal to adopt and submit building standards for approval by the State Building Standards Commission and publication in the California Building Standards Code.

This bill would exclude from the definition of building standards for these purposes any regulation adopted by the board.

(5) The bill would make clarifying and technical changes.

Ch. 664 (AB 248) Tucker. Notaries public.

Existing law authorizes the Secretary of State to refuse to appoint any person as a notary public or to revoke or suspend the commission of any notary public on specified grounds and provides that each person affected has a right to a hearing on those matters.

The bill would authorize the Secretary of State to impose civil penalties not to exceed $1,500 for certain prohibited acts and would provide that the person affected has a right to a hearing prior to the imposition of the penalty.

The bill would require the civil penalties received to be transferred to the General Fund and expresses legislative intent that the moneys defray expenditures of enforcement.

Ch. 665 (AB 457) Areias. Solid waste: local enforcement agencies.

Existing law, the California Integrated Waste Management Act of 1989, required the California Integrated Waste Management Board, on or before August 1, 1991, to prepare and adopt certification regulations for local enforcement agencies, and requires these regulations to include, among other things, requirements regarding staff resources.

This bill would delete that deadline and would require the board to adopt specified regulations regarding staff resources for a "specified enforcement agency," which would be defined to mean a local enforcement agency which has a population of less than 50,000 persons.

Ch. 666 (AB 503) Rainey. Mobilehome parks: improvements: notice.

Existing law requires mobilehome park rental agreements, among other things, to contain a provision specifying that it is the responsibility of the management to maintain physical improvements in the common facilities in good working order and condition.

This bill would require these rental agreements to specify that the management shall have a reasonable time to make repairs after management knows or should have known of a sudden or unforeseeable breakdown or deterioration of the improvements.

Under existing law, the management of a mobilehome park may terminate or refuse to renew a tenancy in a mobilehome park only for specified reasons, and only upon written notice to the homeowner, given at least 60 days prior to the date of termination.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, a copy of the notice is required to be sent to the legal owner, each junior lienholder, and the registered owner, if other than the homeowner, within 10 days after the notice to the homeowner. If the homeowner has not paid the rent due within 3 days of the notice, a copy of the notice is required to again be sent to the legal owner, each junior lienholder, and the registered owner, if other than the homeowner, by certified or registered mail with return receipt requested within 10 days after notice to the homeowner.

This bill would provide that the management has the option of sending the first notice described above by regular mail, or by certified or registered mail with return receipt requested. The bill would specify that the second notice described above would only be required if the rent is not paid within 3 days and the copy of the first notice was not sent by certified or registered mail with return receipt requested.

The bill would also make related, technical changes.

Ch. 667 (AB 521) Allen. Ecological reserves.

Existing law permits the Department of Fish and Game, with the approval of the Fish and Game Commission, to obtain, accept on behalf of the state, or otherwise acquire land, or land and water, or land and water rights, suitable for the purpose of establishing ecological reserves. Any property obtained by the department pursuant to that provision may be designated by the commission as an ecological reserve. For those purposes, "ecological reserve" is defined as land or land and water areas that are to be preserved in a natural condition.

This bill would also define "ecological reserve" as land or land and water areas that are to be provided some level of protection, as determined by the commission.

Ch. 668 (AB 536) Bates. School property.

Under existing law, the governing board of any school district may sell any real property belonging to the school district or may lease for a term not exceeding 99 years, any real property together with any personal property located thereon, belonging to the school district that is not or will not be needed by the district for school classroom buildings at the time of delivery of title or possession.

This bill would state that, notwithstanding any other provision of specified law, in connection with a sale or sale back or lease or leaseback of school district property, no proceeds obtained by the school district from the sale of the sale back or leaseback agreement, as specified, shall be used for general operating purposes.

The bill would also authorize the West Contra Costa Unified School District, formerly known as the Richmond Unified School District, to enter into, in accordance with prescribed procedures and subject to specified requirements, an agreement to lease real property and to use the proceeds from the lease to terminate the Lease-Purchase Agreement, dated May 1, 1988, between the Richmond Unified School District Financing Corporation and the Richmond Unified School District. The bill would prescribe related matters.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 669 (AB 556) Lee. Adult education.

(1) Existing law sets forth a method for computing the amounts allowed each fiscal year to each county superintendent of schools who maintained schools or classes for prisoners in the 1981–82 fiscal year and each fiscal year thereafter based upon the prior year statewide average revenue limit per unit of average daily attendance for adults and the current fiscal year average daily attendance, multiplied by 0.8.

Existing law sets forth a method for computing the amounts allowed each fiscal year to each school district maintaining a secondary school or county superintendent of schools, for the expenses of the district or county superintendent relating to maintaining adult education classes for prisoners in any county jail, or county industrial farm, or county or joint county road camp. Existing law limits the amount allowed per each unit of average daily attendance to 0.8 of the statewide average revenue limit for adults.

This bill would require that for the 1993–94 and 1994–95 fiscal years in no event shall the amount allowed per unit of average daily attendance exceed the statewide average

NOTE: Superior numbers appear as a separate section at the end of the digests.

revenue limit at which adults in correctional facilities were funded in the 1992–93 fiscal year, as adjusted by a specified cost-of-living adjustment.

(2) Existing law, operative July 1, 1993, prohibits adult education programs, courses, and classes from being used to supplant the regular high school curriculum for high school pupils enrolled in adult education programs, courses, and classes. Existing law provides that a pupil may be enrolled in an adult education program, course, or class only if certain requirements are met, including, among other things, that the adult education program cannot be scheduled in the pupil's regular high school program due to scheduling conflicts and that the adult education program, course, or class is not offered in the regular high school curriculum.

This bill would revise those requirements to require that the adult education program, course, or class is not offered in the regular high school curriculum. The bill would, in addition, require that the adult education program, course, or class supplement and enrich the high school pupil's education experience.

(3) Under existing law, a school district may expend funds from the district's Adult Education Fund only in a specified manner and, except as specified, a school district is prohibited from transferring more than 5% of a district's annual revenue that is deposited in that fund to the district's general fund for the expenditures the district incurs in operating its adult education program.

This bill would instead authorize a school district to expend funds from its Adult Education Fund only for direct instruction costs, as defined, direct support costs, as defined, and indirect costs, as defined. The bill would authorize school districts, as an alternative to expending funds from the Adult Education Fund for direct support costs and indirect costs, to instead transfer not more than 8% of the annual revenue deposited in the district's Adult Education Fund to the district's general fund for adult education expenditures.

(4) Existing law sets forth a formula for calculating each school district's adult education revenue limit per unit of average daily attendance, based upon, among other things, the funded average daily attendance for the 1988–89 fiscal year for independent study pupils, as specified.

This bill would modify that calculation to use the funded average daily attendance for the second principal apportionment made in the 1991–92 fiscal year for independent study pupils, as specified.

(5) Existing law requires the Superintendent of Public Instruction to determine an authorized limit of adult education average daily attendance for all high school districts and unified high school districts that operated and claimed an adult education state apportionment for the 1992–93 fiscal year, by using a certain formula based upon, among other things, certain percentages of the district's authorized daily attendance.

This bill would modify the calculation by changing a percentage used in that calculation.

(6) Existing law, for the purposes of funding adult education, sets forth a formula for calculating average daily attendance for independent study pupils, as specified, for the 1992–93 fiscal year, by using the same divisor used for adult education pursuant to a specified provision of law.

This bill would modify that calculation to use the same divisor used for adult education.

(7) This bill would also make technical changes to related provisions of law.

(8) This bill would require the Superintendent of Public Instruction, in consultation with the Department of Finance and the Legislative Analyst, to conduct a study of the educational programs provided to adults in correctional facilities by school districts and county superintendents of schools and to report to the Joint Legislative Budget Committee on or before August 15, 1994.

(9) This bill would declare the intent of the Legislature to make changes in state apportionments for adult education programs for the entire 1993–94 fiscal year and would require that all steps necessary to effect the required adjustments be taken.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 670 (AB 1213) Rainey. Adult classes: county jails.

(1) Existing law requires that, from funds appropriated for allocation to county superintendents of schools who maintained schools or classes for prisoners in the 1981–82 fiscal year and also maintains them in subsequent fiscal years, the Superintendent of Public Instruction shall allow an amount equal to the actual current expense of the programs, but not to exceed an amount calculated in a specified manner, based upon 80% of the adult revenue limit per unit of average daily attendance for adults.

This bill would specify that for the 1993–94 and 1994–95 fiscal years, in no event shall the amount allowed per unit of average daily attendance exceed the statewide average revenue limit at which adults in correctional facilities were funded in the 1992–93 fiscal year, as adjusted by a specified cost-of-living adjustment.

(2) Existing law authorizes certain adult education programs to receive funds from the adult education fund, including, among other programs, adult education in elementary and secondary basic skills, as specified, and adult programs in health and safety education.

This bill would require that schools or classes maintained for adults in correctional facilities meet the requirements of those adult education programs as a condition to claiming average daily attendance for those schools or classes.

Existing law requires that classes relating to AIDS prevention education, personal and public safety, and the nature of alcohol, narcotics and specified restricted dangerous drugs and other dangerous substances meet certain requirements.

This bill would require that education programs in health and safety education offered to adults in correctional facilities meet the relevant requirements for those classes.

(3) Under existing law, the Superintendent of Public Instruction is required to allocate to each school district or county superintendent of schools that maintains adult education classes for prisoners an amount equal to the actual current expense of maintaining those classes, but not more than 80% of the statewide average revenue limit for adults per unit of average daily attendance.

This bill would specify that for the 1993–94 and 1994–95 fiscal years, in no event shall the amount allowed per unit of average daily attendance exceed the statewide average revenue limit at which adults in correctional facilities were funded in the 1992–93 fiscal year, as adjusted by a specified cost-of-living adjustment.

This bill, in addition, commencing with the 1994–95 fiscal year and each fiscal year thereafter, would limit the average daily attendance calculation for schools or classes for adults in correctional facilities to a school district's adult education average daily attendance, as specified, unless the Legislature approves the increase for that fiscal year in the annual Budget Act.

This bill, commencing with the 1994–95 fiscal year, would provide that a school district or county superintendent of schools that did not offer schools or classes for adults in correctional facilities in the 1993–94 fiscal year and that subsequently offers those schools or classes may not claim or receive apportionments for more than 20 units of average daily attendance for the first year those classes are offered.

(4) Under existing law, a day of attendance in classes maintained for adults in any county jail, or any county industrial farm or county or joint county road camp, is 180 minutes, however, no pupil in that adult class may be credited with more than one day of attendance in any calendar day, nor with more than 15 hours of attendance during any one school week. Existing law also prohibits a pupil participating in independent study from being credited with more than one day of average daily attendance per calendar day.

This bill would authorize a school district or county superintendent of schools to credit a pupil with more than one day of attendance in any calendar day and more than 15 hours of attendance during any one school week in specified circumstances, unless that pupil is in independent study. The bill would also provide that a school district or county superintendent choosing this alternative may not, in calculating and reporting its units of average daily attendance for that fiscal year, exceed the number of units of average daily attendance actually reimbursed for the 1992–93 fiscal year, as specified.

This bill would prohibit one adult in a correctional facility from generating more than

NOTE: Superior numbers appear as a separate section at the end of the digests.

one day of attendance if it would result in denying classes to another adult in the same correctional facility.

This bill also would provide that a school district or county superintendent of schools may expend funds allocated to it for the purposes of classes for adults in correctional facilities, only for the direct instructional charges of those classes and for related direct and indirect support costs.

The bill would provide that its provisions would apply to the 1993–94 fiscal year unless otherwise specified.

Ch. 671 (AB 597) Mountjoy. Aeronautics funds.

Existing law requires the Department of Transportation to establish individual revolving fund subaccounts for eligible airports in the Aeronautics Account in the State Transportation Fund and permits the department to advance funds to the subaccount of an individual airport, as specified.

Existing law requires that any balance remaining in the Aeronautics Account in the State Transportation Fund, after payments credited to individual airport subaccounts, is required to be used at the discretion of the California Transportation Commission for airport and aviation purposes, subject to specified requirements relating to matching funds by recipient public entities.

This bill would remove the authorization for the department to advance funds to the airport subaccounts, and would revise the amounts credited to those accounts, as specified.

This bill would permit, at the discretion of the commission, any balance remaining in the Aeronautics Account, after the individual airport subaccount payments to be used to provide a portion of the local match for federal Airport Improvement Program grants, subject to specified conditions.

Ch. 672 (AB 604) Hauser. Historical resources.

Existing law requires a certified resolution establishing the historical designation for an individual property by the State Historical Resources Commission or a local agency, or unit thereof, to be recorded with the county recorder in order for the final approval of the historical resources designation to be effective.

This bill would delete the requirement for recordation prior to final approval of the historical resources designation. The bill would define the term "historical resources designation."

Ch. 673 (AB 636) Bates. Special needs children: placement from regional centers.

(1) Existing law provides for the delivery of specified services to persons with developmental disabilities through regional centers.

Existing law authorizes counties to place, and requires the State Department of Social Services to develop a program for the placement of, children with special health care needs, including children with developmental disabilities and certain types of medical conditions, in specialized foster care homes. Specialized foster care homes are defined to include, among others, certified family homes that have accepted placement of a child with special health care needs who has been relinquished for adoption to the placing agency.

This bill would revise the scope of medical conditions requiring in-home health care for these purposes.

This bill would also authorize regional centers to place children with special health care needs. It would include certified family homes that have accepted placement of a child with developmental disabilities and special health care needs from a regional center or as a dependent or ward of the court within, and delete certified family homes that have accepted placement of a child relinquished for adoption from, the definition of specialized family homes for purposes of these provisions.

This bill would extend that authorization for the placement of those children to include their placement in small family homes and group homes.

(2) Existing law defines an individualized health care plan team as specified individuals who develop an individualized health care plan for a child with special health care

NOTE: Superior numbers appear as a separate section at the end of the digests.

needs in foster care. The team is required to, among other things, delineate the coordination of health and related services for the child in the plan prior to placement.

This bill would revise the definition of a child with special health care needs and would revise the structure of an individualized health care plan team.

(3) Existing law prohibits group homes from providing care to children with special needs, as defined, except on a short-time basis, as determined by the State Department of Social Services, and requires those group homes providing care to those children as of January 1, 1992, to apply for small family home licensure and to comply with other requirements.

This bill would revise those limitations.

(4) The Budget Act of 1993 appropriated funds to the State Department of Social Services for specified purposes in the implementation of the Aid to Families with Dependent Children program.

This bill would authorize the Director of Finance, upon recommendation of the Director of Social Services, to transfer amounts of those appropriated funds to items of the Budget Act of 1993 for county administration and implementation of specified children's services programs, to provide incentives and assistance to counties in the area of specialized care. By reallocating the uses of appropriated funds, this bill would result in an appropriation.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 674 (AB 708) Epple. Vehicles: driving offenses: fines.

(1) Existing law authorizes a judgment that a person convicted of an infraction, pursuant to the Vehicle Code, be punished by a fine to also provide for the payment to be made within a specified time or in specified installments.

This bill would, in addition, require the court, upon the request of the defendant, to make a determination of the defendant's ability to pay all or a portion of the reasonable cost of probation, fines, and restitution, of conducting the presentence investigation, and of preparing the presentencing report, as specified. The bill would provide procedures for making that determination, would require the court to set the amount to be reimbursed, and would require the court to order the defendant to pay that amount, if the court determines that the defendant has the ability to pay. This provision would impose new duties upon the courts and would thus create a state-mandated local program.

(2) Existing law prescribes penalties, including fines, for numerous vehicular offenses.

This bill would, in the case of specified violations relating to rules of the road and driving under the influence, double the fine, in the case of misdemeanors, and increase the fine, as specified, in the case of infractions, if the violation is committed by the driver of a vehicle within a highway construction or maintenance area during any time when traffic is regulated or restricted by the Department of Transportation or local authorities pursuant to existing law.

The bill would require that, whenever practical, signs be placed to notify motorists of the increased penalties. This requirement would impose a state-mandated local program upon affected local authorities.

(3) This bill would incorporate additional changes in Section 42003 of the Vehicle Code proposed by SB 114, to be operative only if SB 114 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 675 (AB 712) Sher. Oil recycling: reporting: false exemption claims.

(1) Existing law, the California Oil Recycling Enhancement Act, a part of the California Integrated Waste Management Act of 1989, requires the California Integrated Waste Management Board to adopt a recycling program that promotes and develops alternatives to the illegal disposal of used oil. The act requires the board to establish reporting periods for the reporting of accumulated industrial and lubricating oil sales and used oil recycling rates, as specified, and requires the board to issue a report on its determinations within 70 days of the end of each reporting period.

This bill would, instead, require the board to issue the report on its determinations within 120 days of the end of each reporting period, and would delete an obsolete provision.

(2) The act requires every oil manufacturer, as defined, to pay quarterly 4¢ to the board for each quart, or 16¢ for each gallon, of lubricating oil sold or transferred in this state or imported into this state for use in the state in that quarter, unless exempt as specified, and prescribes civil and criminal penalties for violations of the act. The act requires the revenues of the payments and specified penalties and fines to be deposited in the California Used Oil Recycling Fund, and the money in the fund is continuously appropriated to the board and to the Department of Conservation for specified purposes. The act requires the excess amounts over those expenditures to be transferred to the Used Oil Market and Collection Promotion Account, to be available, upon appropriation by the Legislature, to the board for the used oil recycling program.

This bill would delete the provisions creating the account and after all required expenditures have been made, would make the balance remaining in the fund available to the board for specified purposes.

This bill would make it a misdemeanor to make a false claim of exemption, as specified, punishable as prescribed, thereby imposing a state-mandated local program by creating a new crime. The bill would provide for distribution of the fine imposed for that violation, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 676 (AB 803) Gotch. Communicable disease: tuberculosis.

(1) Existing law requires the State Department of Health Services to maintain a program for the control of tuberculosis.

This bill would authorize the State Director of Health Services and a local health officer to order examinations for tuberculosis infection, as defined, of certain persons.

The bill would require the department to be the lead agency for all tuberculosis control and prevention activities at the state level.

The bill would, with certain exceptions, prohibit a person known to have active tuberculosis disease, as defined, or a person for whom the medical staff has reasonable grounds to believe has active tuberculosis disease from being discharged from a licensed health facility, or penal institution, or transferred, until certain notification and in some situations, treatment plan approval requirements are met.

The bill would require a health care provider who provides treatment to, or a person in charge of a health facility or clinic providing outpatient treatment for, a person with active tuberculosis, to report to the local health officer, as prescribed. The bill would require the health care provider to examine, or cause to be examined all household contacts of the person, as specified.

This bill would require a health officer to notify the medical officer of the parole region when there are reasonable grounds to believe that a parolee under the jurisdiction of the Department of Corrections has active tuberculosis disease. By imposing new duties upon a local entity, this bill would impose a state-mandated local program.

(2) Existing law requires a local health officer to use every available means to ascertain the existence of, and investigate, all reported or suspected cases of tuberculosis in the infection stages, to make examinations and isolate, or quarantine and isolate certain

NOTE: Superior numbers appear as a separate section at the end of the digests.

persons, following local rules and regulations, and to make an examination order and isolation or quarantine order under certain circumstances, as prescribed.

This bill would in addition authorize the local health officer, under prescribed conditions, to issue an order authorizing removal to, or admission into, a health facility or other treatment facility, an order requiring completion of an appropriate prescribed course of medication, an order to follow a course of directly observed therapy, or an order for exclusion from the workplace. The bill would authorize a health officer to issue an order for isolation of persons with infectious tuberculosis in their residence. The order would be required to include certain information, including payer source. The bill would authorize a health officer to issue an order authorizing removal to, or admission into, a health facility or other treatment facility, as prescribed. The bill would exclude persons incarcerated in a state correctional institution from being subject to one of those orders.

The bill would prohibit anything in that provision from being construed to permit or require forcible administration of medication.

This bill would authorize a health officer to remove to, or detain in, a hospital or other place for examination or treatment persons subject to an order under this act, as prescribed.

(3) Existing law provides that any person who violates or fails to comply with an order of a health officer directing his or her isolation or examination is guilty of a misdemeanor.

This bill would instead provide that any person who violates or fails to comply with any order described in (2) is guilty of a misdemeanor. By changing the definition of a crime, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

Moreover, this bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 677 (AB 823) Bates. Delinquent child support.

(1) Existing law requires financial institutions to disclose specified information upon the receipt from a district attorney of a written request referring to a child support order. Existing law authorizes a district attorney to request that information only when he or she has received a sworn declaration.

This bill would authorize that request upon receipt of certain physical evidence.

(2) Existing law requires the State Department of Social Services to implement the Statewide Automated Child Support System to provide a single registry of all child support orders in the state, and to develop, during the 1992–93 fiscal year, an implementation plan for the Child Support Registry. Existing law also requires local implementation of the Child Support Registry system by forwarding certain information on child support obligations to the department.

This bill would require the department to report to the clerk of each county when the Statewide Automated Child Support System is operational, would revise the procedures to be followed by the county clerk with respect to filing data with the registry, and would require the department to conduct a study of the feasibility of alternate models of a single statewide registry and report to the appropriate committees of the Legislature.

Existing law requires the State Department of Social Services to contract with the Judicial Council to prepare and adopt the Child Support Order and Data Form and the Child Support Arrears Form, and requires the Judicial Council to complete the preparation of the forms by a specified date.

This bill would extend the date by which the forms must be completed to January 1, 1995.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 678 (AB 907) Goldsmith. Expert witnesses: fees.

Existing law provides for the compensation of an expert witness, other than a party or an employee of a party, who is either deposed by a party or required to testify before any court, tribunal, or arbiter in any civil action or proceeding.

Under existing law, the party desiring to take the deposition of, or requiring the appearance of, the expert witness may deem the compensation of the expert witness unreasonable and move for an order setting the compensation.

This bill would prescribe guidelines for the court in determining the fee for expert witnesses, as specified, where a party has moved for an order setting compensation of an expert witness. It also would make a related change.

Ch. 679 (AB 912) Polanco. Milk and milk products inspection services.

(1) Existing law requires the Director of Food and Agriculture to test milk and milk products for inhibitory substances.

This bill would instead require the director to test milk and milk products for the presence of drug residues, and to adopt, by regulation, official drug residue testing methods for the detection of drug residue in bulk milk tanks and tankers, and milk and milk products. The bill would permit the director to adopt, by regulation, official drug residue testing methods and procedures for industry testing of raw milk prior to processing. The bill would permit the director to suspend or revoke the license or permit of a licensee or permittee who fails or refuses to complete a drug residue prevention program, or who has been found to have produced milk in violation of specified drug residue provisions on 3 or more occasions within a 12-month period. The bill would also provide for a civil penalty, as specified, for any dairy producer found to have produced milk in violation of the drug residue provisions.

(2) Existing law requires every person that is engaged in the production of market milk outside the jurisdiction of an approved milk inspection service and every person engaged in the processing, manufacture, or distribution of milk, milk products, or products resembling milk products to pay an inspection fee to the director.

This bill would also require every person that is engaged in the processing, manufacture, or freezing of ice cream, ice milk, sherbet, or any similar frozen product, to pay an inspection fee to the director.

(3) Existing law provides that a license for all frozen milk products and all imitation frozen milk products is $100 for the calendar year for which the license is issued; the fee for the renewal of this license is $100, plus $3 for each additional 10,000 gallons or fraction of 10,000 gallons over and above 20,000 gallons that were manufactured during the preceding year.

This bill would reduce the fee for the renewal of this license to $100, plus $1 for each additional 10,000 gallons or fraction of 10,000 gallons over and above 20,000 gallons that were manufactured during the preceding year.

(4) Existing law requires the director to adopt a polling plan for market milk, including the allocation to each producer within any pool of a pool quota. Existing law requires that the pool quota be adjusted by each component to reflect any additional pool quota, determined from the amount of new class 1 solids not fat usage which developed during the preceding annual period which exceeded the previous highest identical annual period since January 1, 1986.

This bill would, instead, require that the pool quota be adjusted by each component to reflect any additional pool quota, determined from the amount of new class 1 and class 2 solids not fat usage which developed during the preceding annual period which exceeded the previous highest identical annual period since the 1988-89 fiscal year.

Ch. 680 (AB 1020) Peace. Bank and corporation taxes: suspension and revivor.

The existing Bank and Corporation Tax Law provides, with specified exceptions, that the corporate powers, rights, and privileges of a domestic taxpayer may be suspended, and the exercise of the corporate powers, rights, and privileges of a foreign taxpayer may be forfeited if any of specified conditions occur. It also provides for relief from suspension or forfeiture and from voidability of contracts pursuant to certain requirements and procedures, including the filing of an application for relief from contract voidability and

NOTE: Superior numbers appear as a separate section at the end of the digests.

an application for revivor.

This bill would provide that if an application for relief from voidability is filed for a period in which an application for revivor is filed, the period for which relief is requested shall begin and end on particular dates and daily penalties shall be assessed during the relief period, depending on whether the revivor certificate has or has not been issued. This bill would provide that it shall be operative with respect to applications for relief filed on or after January 1, 1994, except as specified.

Ch. 681 (AB 1133) Frazee. Occupational safety and health: railroads.

Existing law prohibits any common carrier operating more than 4 trains each way per day on any main railroad track or branch line in California from running any passenger, mail, or express train that is not manned by at least one conductor and other personnel, as specified, with certain exceptions.

This bill would specify that the prohibition does not apply to the San Diego Metropolitan Transit Development Board or the North San Diego County Transit Development Board. It would provide that with respect to commuter train service provided by the San Diego Metropolitan Transit Development Board or the North San Diego County Transit Development Board, there shall be at least one qualified crewmember inside the train car set during revenue service, as defined. By requiring the San Diego Metropolitan Transit Development Board and the North San Diego County Transit Development Board to have at least one qualified crewmember inside the train car set during revenue service, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 682 (AB 1134) Honeycutt. Courts.

(1) Existing law specifies the number, classification, and compensation of municipal and superior court personnel in Orange County and municipal court personnel in San Bernardino and San Diego Counties.

This bill would revise the number, classification, and compensation of municipal and superior court personnel in Orange County and municipal court personnel in San Bernardino and San Diego Counties, as specified. The bill would also establish positions and compensation for personnel of the San Diego County Municipal Court Information Services Unit.

(2) Existing law specifies the duties of sheriffs with respect to superior courts, marshals with respect to municipal courts, and constables with respect to justice courts. Existing law provides for one marshal of the San Bernardino County Municipal Court District. Existing law also requires the consolidation of court-related services provided by the sheriff and marshal within San Bernardino County pursuant to an election conducted among the judges of the superior and municipal courts of that county.

This bill would provide for the consolidation of services provided to the municipal and superior courts in San Bernardino County in the Marshal of San Bernardino County, and for the number and compensation of the employees of the marshal. The bill would also create the Court Services Oversight Committee, consisting of 7 judges from the municipal and superior courts, which would review and approve the marshal's budget and have the authority to recommend the discipline or dismissal of the marshal to all the judges of the municipal and superior courts, among other specified duties.

(3) The bill would not become operative unless AB 2207 is enacted and becomes effective on or before January 1, 1994.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs or mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act

NOTE: Superior numbers appear as a separate section at the end of the digests.

for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be payable from the State Mandates Claims Fund.

Ch. 683 (AB 1176) Epple. Destructive devices: explosives: permits.

(1) Under existing law, in order to possess or transport any destructive device, including explosives, as defined, a permit must be obtained from the Department of Justice.

This bill would provide that the Department of Justice shall not issue permits to possess or transport destructive devices to any person who (1) has been convicted of a felony, (2) is addicted to the use of any narcotic drug, (3) is a mental patient in any hospital or institution, or (4) has been adjudicated by a court to be a danger to others as a result of a mental disorder or mental illness, as specified.

(2) Existing law governs the issuance of permits for explosives.

This bill would prohibit the issuance of a permit for explosives to persons who meet any of the criteria specified in (1) above, require an issuing authority to inquire with the Department of Justice for the purposes of determining whether a person who is applying for a permit meets any of those criteria, require the department to either grant or deny clearance for a permit to be issued pursuant to the determination, and prohibit the department from disclosing the contents of a person's records to any person who is not authorized to receive the information in order to ensure confidentiality.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 684 (AB 1192) Cannella. PERS: contracting agencies.

(1) An existing provision of the Public Employees' Retirement Law, which applies to contracting agencies only at their option, authorizes certain laid-off local members who return to work within 12 months of the date of layoff, to purchase, under specified conditions, public service credit for the period of the layoff, but not to exceed one year.

This bill would, instead, establish a maximum purchasable service credit of not to exceed one year for each layoff period.

(2) The existing Public Employees' Retirement Law provides for the termination by contracting agencies of agreements with PERS, under specified conditions, and the transfer of employees, retirees, liabilities, and certain assets to a county retirement system established under the County Employees Retirement Law of 1937. Among the required conditions are requirements of a related agreement between the governing body of the affected contracting agency and PERS, that both retirees and employees be transferred to such a county, that the amount transferred not exceed the amount of the accumulated contributions credited to the agency and its employees, and that any amount representing the difference between the value of interests of the contracting agency and its employees and their credited accumulated contributions be credited to the reserve against deficiencies.

This bill would authorize any city that has transferred firefighting or law enforcement functions and related personnel to a county or district maintaining a retirement system under the County Employees Retirement Law of 1937 to enter into an agreement for termination of its participation in PERS with respect to the transferred members, the inclusion of those persons in that county system, and the transfer to the county retirement system of both the city's and those employees' accumulated contributions to the Public Employees' Retirement Fund and all of the related liability of the PERS. These provisions would apply only to Santa Barbara County at the option of the board of

NOTE: Superior numbers appear as a separate section at the end of the digests.

supervisors of that county and would be repealed on January 1, 1998.

Ch. 685 (AB 1201) Cortese. Department of Water Resources: loans.

Under the Water Conservation Bond Law of 1988, the Department of Water Resources may make loans to local agencies, upon approval of the Legislature by statute, to aid in the construction of eligible projects and to aid in the funding of prescribed conservation programs and groundwater recharge facilities.

This bill would make an appropriation by authorizing loans from the 1988 Water Conservation Fund to specified entities for specified water conservation projects, local water supply projects, and groundwater recharge projects. The bill would require the department to determine eligibility for, and the amount of, the loans in accordance with that bond law.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 686 (AB 1219) Boland. Property.

(1) Existing law generally requires a trustee, mortgagee, or beneficiary to file a notice of default before a power of sale may be exercised.

This bill would also permit authorized agents of those parties to file the required notice of default. This bill would also provide that this provision shall not become operative if both this bill and AB 259 are enacted and affect Section 5730 of the Business and Professions Code, and this bill is chaptered last.

(2) Under existing law, any person may request a copy of a notice of default and a notice of sale under any deed of trust or mortgage with power of sale upon real property or an estate for years therein. Existing law permits publication of the notice of default where special notice need not or cannot be given, as specified, or, in lieu of publication, personal delivery of a copy of the notice of default to the trustor or mortgagor. Existing law also requires that a notice of sale be given before property is sold pursuant to a power of sale.

This bill would permit the notice of default to be posted in a conspicuous place on the property and mailed to the last known address of the trustor, in lieu of publication, as specified. The bill would also specify the typeface to be used in a notice of sale.

(3) Existing law specifies the remedies available when there is a default on an obligation secured by real property. Under existing law, if a trustor, mortgagor, or other person authorized to cure the default does cure the default, the beneficiary or mortgagee is directed to execute and deliver to the trustee a notice of rescission rescinding the notice of default and demand for sale, as specified.

This bill would provide that an agent for the beneficiary or mortgagee, as an alternative to the beneficiary or mortgagee, may execute and deliver the notice of rescission to the trustee.

(4) Existing law specifies the maximum trustee's and attorney's fees payable in connection with specified provisions relating to a default on an obligation secured by a deed of trust or a mortgage on real property or an estate for years therein. Under existing law, the maximum fee is $200 for any portion of the unpaid principal sum secured of $50,000 or less, plus ½ of 1% of the unpaid principal sum secured exceeding $50,000, and as specified.

This bill would instead provide that the maximum fee is $240 with respect to any portion of the unpaid principal secured which is $50,000 or less, plus ½ of 1% on the unpaid principal secured exceeding $50,000, and as specified.

(5) Existing law specifies the maximum trustee's or attorney's fees payable in connection with the sale of property pursuant to the power of sale contained in a mortgage. Under existing law, the maximum fee is $300 for any portion of an unpaid principal sum secured of $50,000 or less, plus 1% of any portion of the unpaid principal sum exceeding $50,000, and as specified, before the property is sold, and $300, or 1% of the unpaid principal sum secured, whichever is greater, upon the sale of the property.

This bill would increase that maximum fee to $350 with respect to any portion of an unpaid principal sum secured which is $50,000 or less, for trustee's or attorney's fees incurred before the sale of the property. The bill would also increase those maximum fees to $350 or 1% of the unpaid principal sum secured, whichever is greater, upon the

NOTE: Superior numbers appear as a separate section at the end of the digests.

sale of the property.

(6) Existing law permits a maximum of 3 postponements of sale proceedings for property under a power of sale, excluding any postponements of sale made upon the order of a court, by operation of law, or by mutual agreement of any trustor and any beneficiary, or any mortgagor and any mortgagee, as specified.

This bill would provide an additional exclusion from the application of this provision for one postponement which is based upon a reasonable belief by the trustee that a petition for bankruptcy has been filed.

(7) Under existing law, a notary public is directed to obtain the thumbprint of the party signing a deed, quitclaim deed, or deed of trust, as specified, before notarizing that document.

This bill would exempt trustees' deeds resulting from a decree of foreclosure or a nonjudicial foreclosure, and deeds of reconveyance from that provision.

(8) Existing law excludes specified real estate sales from provisions regulating auctions.

This bill would make clarifying changes to those provisions.

(9) This bill would also incorporate further changes to Section 2924f of the Civil Code proposed by AB 1196, contingent upon its prior enactment.

(10) This bill would incorporate further changes to Section 2934a of the Civil Code proposed by SB 313, contingent upon its prior enactment.

Ch. 687 (AB 1225) Knowles. Water districts: bidding requirements.

Existing law provides that when the work required consists of channel protection, maintenance work, or emergency work necessitated by impending flood damage, necessary work may be done by force account without advertising for bids.

This bill would give the Placer County Water Agency the power to bypass the bid solicitation process in other specified emergency situations, when the board, the members present voting unanimously, so authorizes, and substantial evidence supporting the need for this action is provided.

This bill would state that it is to take effect immediately as an urgency statute.

Ch. 688 (AB 1242) V. Brown. Services for emotionally disturbed children.

(1) Existing law provides that qualified handicapped children are eligible for special education services in the least restrictive educational environment.

This bill would establish a pilot project for students eligible for these services who, upon being discharged from the Program for Children and Youth at Napa State Hospital, are placed in a public school program and intensive foster care, in accordance with findings of a joint team, to be composed of the individualized education program team and an interagency review team, as specified in the bill.

The bill would require the Superintendent of Public Instruction to make a specified apportionment to any school district or county office for any pupil participating in the pilot project, with this apportionment to be used for special education services.

(2) Existing law provides for various programs for children placed in foster care, and also provides for various services for which these children and their families are eligible.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which each county provides payments for foster care services rendered to eligible children, in accordance with a specified rate structure. The state reimburses each county for 40% of the costs of these payments, out of funds continuously appropriated for this purpose.

Existing law also requires the State Department of Social Services, until June 30, 1995, to implement, in any county in which the board of supervisors consents to participation, an intensive foster care program for specified emotionally disturbed children.

This bill would, in addition, require the department to implement an intensive foster care pilot project, for specified emotionally disturbed children who have been placed in and discharged from the Program for Children and Youth at Napa State Hospital.

The bill would provide for a rate structure for the pilot project under which foster parents could receive payments in excess of the amount that would have been received under existing AFDC-FC program provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Since state funds are continuously appropriated to reimburse counties for a share of the cost of these payments, the bill would constitute an appropriation.

(4) The bill would make its provisions inoperative on September 30, 1996, and repeal them on January 1, 1997.

Ch. 689 (AB 1572) Rainey. Public Employees' Retirement System: terminating agencies.

The Public Employees' Retirement Law confers various powers and duties upon terminating contracting agencies.

This bill would authorize the Board of Administration to enter into an agreement with the governing body of a terminating contracting agency that will cease to exist in order to ensure that the final compensation used in the calculation of benefits of its employees shall be calculated in the same manner as the benefits of employees of nonterminating contracting agencies and that the necessary related adjustments in the employer's contribution rate shall be made by the board prior to the termination date to ensure that benefits are adequately funded or any other actuarially sound payment technique is agreed to by the governing body of the terminating agency and the board.

Ch. 690 (AB 1643) Speier. School cafeterias.

Existing law requires that a school district cafeteria fund be used only for those expenditures authorized by the governing board as necessary for the operation of school cafeterias, as specified. Existing law also permits the governing board to establish cafeteria accounts in one or more banks for the deposit of specified receipts and for specified expenditures.

This bill would permit the governing board to authorize the expenditures from the cafeteria fund and cafeteria account only for those charges defined or reported, as specified. The bill would prohibit a food service program from being charged more than once for expenditures for the same service. The bill would require any charges to, or transfers from, a food service program to be accompanied by a written explanation. The bill would require the State Department of Education to adjust a school district's regular apportionment and child nutrition allowance if the department and the Department of Finance concur that the district has improperly transferred funds from the district's cafeteria fund or cafeteria account to the district's general fund and the district fails to retransfer to the cafeteria fund or cafeteria account twice the amount improperly transferred to its general fund.

Ch. 691 (AB 1705) Woodruff. Medi-Cal: drug equalization payments.

Existing law provides for the Medi-Cal program, which is administered pursuant to rules and regulations adopted by the State Department of Health Services, pursuant to which medical benefits, including pharmacy services, are provided to public assistance recipients and certain other low-income persons.

Existing law requires the State Department of Health Services to enter into contracts with drug manufacturers for drugs for the Medi-Cal program, and requires that those contracts provide for the payment of equalization amounts, as defined.

This bill would require the department to provide for an annual written report of Medi-Cal pharmacy costs or Medi-Cal drug costs, as defined, to include specified information on equalization payment amounts.

Ch. 692 (AB 1854) Cannella. Unclaimed property.

(1) Under existing provisions of the Code of Civil Procedure, the Unclaimed Property Fund is continuously appropriated. However, a later enacted provision set forth in the Government Code requires that fund and other funds to be appropriated in the Budget Act.

This bill would make an appropriation by amending the provisions of the Code of Civil Procedure to provide that, notwithstanding the Government Code provision, the Unclaimed Property Fund is continuously appropriated.

(2) Existing law sets forth a comprehensive body of laws providing for the escheat of unclaimed property to the state. Under existing law, banking and financial organiza-

NOTE: Superior numbers appear as a separate section at the end of the digests.

tions in possession of unclaimed property are directed to make reasonable efforts to notify apparent owners of unclaimed property that their interest shall escheat to the state, as specified.

This bill would require business associations to make reasonable efforts to notify the owners of an interest in the business association that their interest shall escheat to the state, as specified. The bill would also make nonsubstantive conforming changes in the law.

(3) Under existing law, escheated securities listed on an established stock exchange are required to be sold at the prevailing prices on that exchange.

This bill would require the sale to be made within one year following receipt of the securities by the Controller.

(4) Existing provisions of the Budget Act of 1993 prohibit the Controller from using appropriated moneys to provide published or mailed notice of unclaimed property in accordance with prescribed provisions.

This bill would authorize use of up to $35,000 of moneys appropriated by the Budget Act of 1993 to provide mailed notice, as specified. By changing the permissible uses of an existing appropriation, the bill would constitute an appropriation measure. The bill would also declare the intent of the Legislature that the Controller generate $43,000,000 during the 1993–94 fiscal year in addition to amounts estimated in the Governor's Budget proposed in January of 1993.

Ch. 693 (AB 1887) Statham. Redevelopment: Shasta Dam Area Redevelopment Project: transfer of territorial jurisdiction.

(1) Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in those communities. If all or part of the territory included within a redevelopment project area within the jurisdiction of a county redevelopment agency is annexed to a city or included within the boundaries of a new city, the Community Redevelopment Law authorizes the transfer of territorial jurisdiction over that redevelopment project area to the city redevelopment agency, as specified.

This bill would, pursuant to findings and declarations of the Legislature with regard to the Shasta Dam Area Redevelopment Project, transfer territorial jurisdiction for that project from the redevelopment agency of the County of Shasta to the redevelopment agency of the City of Shasta Lake under the terms and conditions agreed upon by the city and county. Notwithstanding the requirements of specified provisions of the Community Redevelopment Law, the bill would make this transfer effective as of the effective date of the bill.

(2) The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to unique circumstances applicable only to the City of Shasta Lake and the County of Shasta, as set forth in the bill, a general statute cannot be made applicable and a special statute is necessary.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 694 (AB 2057) Margolin. Clinical laboratories.

(1) Existing law provides that for purposes of the laws governing clinical laboratory technology, certain specified licensees, as defined by the State Department of Health Services, are licensees who work and supervise clinical laboratory fields only in the clinician's area of specialization.

This bill would include in this definition of specified licensees persons licensed as "clinical molecular biologists" and "clinical cytogeneticists." This bill would require the State Department of Health Services to adopt regulations identifying the areas of specialization for these licensees and the clinical laboratories they may direct.

(2) Existing law provides that, for purposes of the laws governing clinical laboratory technology, certain specified licensees, as defined by the department, are licensees who perform technical procedures limited to the scope of their licenses and are not licensed to direct laboratories.

This bill would expand those enumerated licensees to include "clinical im-

NOTE: Superior numbers appear as a separate section at the end of the digests.

munohematologist technologists," "clinical molecular biologist technologists," "clinical cytogeneticist technologists," and "clinical histocompatibility technologists." This bill would also require the department to adopt regulations defining the added sciences.

(3) Existing law requires the department to administer a statewide program for prenatal testing for genetic disorders and birth defects.

This bill would declare that regulations specifying the licensure qualifications of persons performing genetic testing are essential to the proper administration of the genetic testing under the program.

(4) Existing law requires an applicant for a clinical bioanalyst's license to pass successfully a written, oral, and practical examination, in addition to prescribed education and experience requirements.

This bill would require the applicant to pass successfully only a written and oral examination.

(5) Existing law authorizes the department to issue clinical laboratory technologist's licenses limited to certain fields.

This bill would include the fields of molecular biology, cytogenetics, or other laboratory specialties as determined by the department.

(6) This bill would require the department, when it determines that a new limited technologist license category is necessary, to adopt regulations identifying the category and its area of specialization. Prior to the implementation of the regulations, the bill would authorize the department to issue a license without examination to applicants who have previously met the standards of education and training.

(7) Existing law prohibits a clinical laboratory technologist trainee license from being issued for a period in excess of 2 years after completion of the minimum required practical training period in clinical laboratory work.

This bill would delete that prohibition.

(8) This bill would require the department to adopt regulations to implement its provisions.

(9) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 695 (AB 2172) Hauser. Land use: regional housing needs.

Existing law requires every city, county, and city and county to revise the housing element of its general plan as frequently as is appropriate, but not less than every 5 years, to reflect the results of the periodic review of the housing element. Existing law provides deadlines for the first and second revisions of housing elements for specified councils of governments, and further provides that subsequent revisions shall be completed not less often than at 5-year intervals, following the second revision.

This bill would create a state-mandated local program by modifying the deadlines by which specified councils of governments must complete the third and fourth revisions of the housing elements of their general plans.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 696 (AB 2243) Pringle. Public assistance: central benefit issuance system.

Existing law provides for public assistance programs, including the Aid to Families with Dependent Children (AFDC) program and the Food Stamp Program. These programs are administered by each county in accordance with federal and state law, and under regulations adopted by the State Department of Social Services. Each county is required to pay a share of the administrative costs of these programs, as well as a share of the aid grant costs for the AFDC program.

Existing law requires the department to implement, if specified conditions are met,

NOTE: Superior numbers appear as a separate section at the end of the digests.

a statewide automated welfare system for public assistance programs. The department is also permitted to test this system in several counties prior to statewide implementation.

This bill would permit the department to establish a central benefit issuance system in one or more counties, whereby public assistance grants and cash payments under the Food Stamp Program may be issued to the recipient by the Controller, including cases of emergency or immediate need.

The bill would create the Central Benefit Issuance Fund, whose moneys would be continuously appropriated, without regard to fiscal years, to the department for implementation of the bill. Participating counties would be required to pay any share of costs owing to the state into this fund.

By requiring a county to participate in the central benefits issuance system, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 697 (AB 2282) Conroy. Medi-Cal: nursing facility services.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services, including nursing facility services.

Under the Medi-Cal program, nursing facilities are required to provide preadmission screening for certain eligible patients and to seek reimbursement for specified services through the treatment authorization process.

This bill would require the department to develop, collect, and maintain a data base of certain information, required preadmission screening, annual residential reviews, and treatment authorization request forms for specified purposes, subject to federal funding, and to develop and implement an integrated preadmission screening and prior authorization system for nursing facility services, according to specified criteria, subject to federal approval and financial participation.

Ch. 698 (SB 21) Russell. Hospital districts: transfer of assets.

Existing law authorizes a hospital district to transfer any part of its assets, at fair market value, or in the absence of adequate consideration if the transfer is for the benefit of the communities served by the district, to one or more nonprofit corporations to operate and maintain the assets. Existing law requires the elected board of the district to place the proposition of the transfer on the next general election ballot and requires the approval of a majority of the voters of the district.

This bill would instead require that the elected board, by resolution, submit a measure proposing the transfer to the voters of the district, that the measure be placed on the ballot of a special election held upon the request of the district or the ballot of the next regularly scheduled election occurring at least 88 days after the resolution of the board, and that the transfer be approved if a majority of the voters voting on the measure vote in its favor. By authorizing the district to request a special election, this bill would require counties to perform additional duties, thereby imposing a state-mandated local program.

Existing law requires each district involved in a general election in an affected county to reimburse the county for the actual costs incurred by the county clerk in conducting the election for that district.

This bill would require districts that request a special election to reimburse counties for the costs of that special election.

Existing law provides that a transfer shall be deemed to be at fair market value if fair

NOTE: Superior numbers appear as a separate section at the end of the digests.

and reasonable payment is made by the nonprofit corporation to the district.

This bill would instead provide that a transfer shall be deemed to be at fair market value if an independent consultant with specified expertise determines that fair and reasonable consideration is to be received by the district for the assets transferred.

This bill would also revise the provisions that must be included in a transfer agreement made in the absence of adequate consideration, and would prohibit a transfer of assets to a private nonprofit organization that is owned or controlled by a religious creed, church, or sectarian denomination in the absence of adequate consideration.

This bill would require the district board, if the district board has previously transferred less than 50% of the district's assets under those provisions, to hold a public hearing and make a described finding before additional assets may be transferred.

Existing law exempts a hospital district that discussed and adopted a board resolution authorizing the development of a business plan for an integrated delivery system prior to September 1, 1992, from specified provisions including those relating to approval by the voters.

This bill would also exempt certain lease agreements or transfer agreements in effect on September 1, 1992, from the amendments made by this bill, and would require that notwithstanding those exemptions, substantial amendments proposed to be made to a transfer by an exempted district shall be fully discussed in open and public meetings. This bill would also require that amendments to exempted transfer agreements that would result in a transfer of 50% or more of the district's assets, in sum or by increment, shall be subject to the voter approval requirements.

Existing law authorizes a hospital district to lease and operate the facilities of another hospital district, or to create a leasehold interest in its own facilities, upon the making of certain findings by the district's board of directors and under certain circumstances.

This bill would require that leases made pursuant to these provisions be subject to the requirements applicable to transfer agreements for the transfer of 50% or more of a district's assets.

Existing law also authorizes the board of directors of a district to provide for the operation and maintenance of any hospital of the district through tenants or by entry into a lease agreement that the board believes will serve the best interest of the district, and requires that the lease be in accordance with certain requirements applicable to transfer agreements for the transfer of 50% or more of a district's assets.

This bill would require that a lease under these provisions for the operation of 50% or more of the district's hospital that is part of or contingent upon a transfer of 50% or more of the district's assets as described be subject to the requirements applicable to transfer agreements for the transfer of 50% or more of a district's assets.

This bill would provide that a transfer of the district's assets would not be subject to various transfer requirements in existing law and as amended by this bill if, at the time of transfer, certain conditions exist, including the condition that the district has entered into a loan insured by the state and is in default of its loan obligations.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, for certain costs, no reimbursement is required by this act for specified reasons.

Moreover, this bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 699 (SB 77) Committee on Appropriations. Judgments and settlement claims against the state: appropriation.

Existing law requires the Attorney General to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state.

This bill would appropriate $18,660,013, as scheduled, to pay judgments and settlement claims against the state. Of the amount appropriated, $17,250,000 would be from the

NOTE: Superior numbers appear as a separate section at the end of the digests.

General Fund to the Director of Finance to pay judgments and settlement claims in the case of Board of Administration of the Public Employees' Retirement System, et al. v. Davis, et al., (Super. Ct. Sacramento Co., No. 363359), $1,100,000 would be from the Motor Vehicle Account in the State Transportation Fund to the Attorney General for judgments and settlement claims in the case of Connie Jean Hoke v. Joseph Edward Underhill, (Super. Ct. San Bernardino Co., No. 250100), and $310,013 would be from the 1992 Higher Education Capital Outlay Bond Fund to the Trustees of the California State University for judgments and settlement claims in the case of Commercial Decontamination Inc. v. Trustees of the California State University, et al., (Super. Ct. Los Angeles Co., N6. EAC76127).

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 700 (SB 353) Ayala. Barbering and cosmetology.

Existing law provides for the licensing of barbers, cosmetologists, estheticians, manicurists, electrologists, apprentices, barber instructors, and cosmetology instructors. Existing law also provides for a preapplication for admission for examination of students of approved cosmetology, electrology, or barbering schools who have completed specified course hours and curriculum requirements.

This bill would require the State Board of Barbering and Cosmetology to administer the licensing examination not later than 10 working days after graduation from an approved cosmetology, electrology, or barbering school to students who have submitted an application for admission for examination under the preapplication procedure.

This bill would also require the Department of Consumer Affairs to monitor specified matters and to report to the Legislature, as specified.

Ch. 701 (SB 358) Torres. Employment: language interpreters.

Existing law requires that, effective January 1, 1994, language interpreters utilized in medical examinations conducted for the purpose of determining compensation or monetary award in an administrative adjudication be certified pursuant to a specified provision, except as provided.

This bill would instead make these provisions relating to the certification of medical examination interpreters effective July 1, 1994.

Existing law requires that, commencing July 1, 1994, each certified medical examination interpreter shall pay a renewal fee, as specified.

This bill would instead require payment of this renewal fee commencing July 1, 1995.

Under existing law, a person who works for another may be an employee or an independent contractor, depending upon various factors, such as the nature of the work and the extent of control over the work.

This bill would require the Employment Development Department, not later than October 1, 1994, to adopt regulations to clarify the factors by which the employment status of language interpreters will be determined.

Ch. 702 (SB 420) Mello. Residential care facilities for the elderly.

(1) Existing law requires the State Department of Social Services to license residential care facilities for the elderly, as defined. Existing law requires the State Department of Social Services to establish 6 model projects for persons with dementia, including, but not limited to, Alzheimer's disease. Three of these facilities are required to use secured perimeters, and the other 3 are required to use door alarms or wrist bands to provide a functionally secured environment. Existing law provides that these projects will continue until January 1, 1994.

This bill would, instead, provide that these projects will continue until January 1, 1996, and would provide that these provisions would remain in effect only until January 1, 1996.

(2) Existing law requires the State Department of Social Services to report its findings and recommendations to the Legislature by January 1, 1993.

This bill would require, after release of this report, the Health and Welfare Agency to convene an advisory group to recommend standards for a secured perimeter program by January 1, 1995.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 703 (SB 862) Hughes. Counterfeiting.

(1) Existing law provides that any person who, without the consent of the registrant, willfully manufactures, or intentionally sells any counterfeit of a mark registered with the Secretary of State and registrable or incontestable under federal law, as specified, shall, upon conviction, if the person is an individual, be fined by not more than $5,000 or imprisoned in a county jail for not more than one year, or both; or if the person is a corporation, be fined by not more than $100,000.

This bill, instead, would provide, that any person who, without the consent of the registrant, willfully manufactures, intentionally sells, or knowingly possesses for sale, as specified, any counterfeit of a mark registered with the Secretary of State or registered on the Principle Register of the United States Patent and Trademark Office, shall, upon conviction, be punished as specified. Because the bill would expand the scope of an existing crime, the bill would impose a state-mandated local program.

(2) This bill also would provide that an owner, officer, employee, or agent who provides, rents, leases, licenses, or sells real property upon which a violation of the provisions in (1) above occurs shall not be subject to a criminal penalty pursuant to those provisions, unless he or she sells, or possesses for sale, articles bearing a counterfeit mark in violation of those provisions. The bill also would provide that these provisions shall not be construed to abrogate or limit any civil rights or remedies for a trademark violation.

(3) Under these provisions, existing law also provides that if, in any action brought under these provisions, the court determines that a mark is counterfeit, the court may order the destruction of all those marks, all means of making the marks, and all goods, articles, or other matter bearing the marks, which are in the possession or control of the court or of the defendant; or, after obliteration of the counterfeit mark, the court may dispose of those materials by ordering their transfer to the State of California, an eleemosynary institution, or the owner of the registered service marks or trademarks.

This bill, instead, would provide that in any action brought under these provisions resulting in a conviction or a plea of nolo contendere, the court shall order the forfeiture and destruction of all of those marks and of all goods, articles, or other matter bearing the marks, and the forfeiture and destruction or other disposition of all means of making the marks, and any and all electronic, mechanical, or other devices for manufacturing, reproducing, transporting, or assembling these marks, which were used in connection with, or which were part of, any violation of these provisions, except certain vehicles, as specified. Because these provisions would increase the responsibilities of local governmental entities with regard to the forfeiture and destruction of forfeited property, the bill would impose a state-mandated local program.

(4) Existing law provides that when any person takes, damages, or destroys any property in the commission or attempted commission of a felony, with the intent to cause that taking, damage, or destruction, the court shall impose additional terms of imprisonment, as specified.

This bill would provide that this provision shall apply, but shall not be limited, to property taken pursuant to (1), (2), and (3) above and other provisions of existing law, as specified, regarding misappropriation of recorded music for commercial advantage or private financial gain, transporting, or causing to be transported, articles containing unauthorized recordation of sounds of live performances, or failure to disclose the origin of a recording or audiovisual work in specified circumstances.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be payable from the State Mandates Claims Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 704 (SB 953) Wright. Hazardous waste: oil spill response.

Existing law, the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, provides for oil spill response actions.

This bill would require the administrator for oil spill response in the Department of Fish and Game and the Director of Toxic Substances Control to jointly develop, by July 1, 1994, a preincident process, providing for specified activities, for the handling and transport of materials used or recovered during an oil spill response.

Ch. 705 (SB 990) Kelley. Water quality: designated waste.

The Porter-Cologne Water Quality Control Act requires the State Water Resources Control Board to classify wastes and disposal sites to ensure the protection of water quality. The state board is required to adopt standards and regulations for waste disposal sites. Existing regulations define "designated waste."

This bill would include a similar definition in the Water Code.

The bill would authorize the state board, after consultation with the California Integrated Waste Management Board and the Department of Toxic Substances Control, to adopt policies with regard to designated wastes, as prescribed.

Ch. 706 (SB 1121) Thompson. Forest practices.

Under existing law, the Z'berg-Nejedly Forest Practice Act of 1973, generally, no person may conduct timber operations on timberland unless the person has submitted a timber harvesting plan to the Department of Forestry and Fire Protection. Existing law, in effect until January 1, 1994, authorizes the effective period of a timber harvesting plan on which work has been commenced but not completed to be extended, as specified.

The act requires a timber owner or owner's agent to file a report, as specified, with the department, within one month after completion of the work described in the timber harvesting plan or nonindustrial timber harvest notice, excluding specified work, and provides, until January 1, 1994, that a report on a portion of the area covered by the plan which has been completed may be filed annually, if all the work described in the plan has not been completed. Until January 1, 1994, the Director of Forestry and Fire Protection is required, within 6 months of the receipt of the work completion report, as defined, to determine by inspection whether the work described in the report, excluding specified work, has been properly completed, as prescribed, and requires that a timber owner or owner's agent file a stocking report within 5 years after completion of timber operations on an area identified in a work completion report.

This bill would extend those provisions indefinitely and would make clarifying and technical changes in those provisions.

Ch. 707 (SB 1133) Hart. Education: instructional materials.

Existing law requires any standards and criteria the State Board of Education adopts regarding the selection and adoption of instructional materials to be filed as regulations with the Secretary of State upon affidavit of the Superintendent of Public Instruction.

This bill would declare that the Legislature reaffirms that the policies and procedures concerning the development of curriculum frameworks and the adoption of instructional materials are required to be adopted pursuant to the provisions that generally govern the adoption of administrative regulations. The bill would require the State Board of Education to adopt as regulations those policies and procedures. The bill would also require the board to adopt the content of curriculum frameworks and evaluation criteria and worksheets developed to supplement curriculum frameworks in accordance with those regulations, but the content of the frameworks, evaluation criteria, and worksheets would not be subject to the provisions that generally govern the adoption of administrative regulations.

This bill would become operative on January 1, 1995, if it becomes effective on or before that date.

Ch. 708 (SB 755) Kelley. Natural community conservation planning.

Existing law authorizes the Department of Fish and Game to enter into agreements

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

with any person for the purpose of preparing and implementing a natural community conservation plan to provide comprehensive management and conservation of multiple wildlife species. Existing law authorizes the department to prepare nonregulatory guidelines for the development and implementation of those plans and specifies the contents of those guidelines, including, but not limited to, coordinating with local, state, and federal agencies.

This bill would expressly require the guidelines to include coordination with the Trade and Commerce Agency.

Ch. 709 (SB 675) Greene. Property taxation: change in ownership exclusion: filing of claim.

Existing provisions of the California Constitution generally limit ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975–76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. Other provisions of the California Constitution exclude from the terms "purchased" and "change in ownership" the purchase or transfer of the principal residence of the transferor, or the purchase or transfer of the first $1,000,000 of the full cash value of all other real property, in the case of a purchase or transfer between parents and their children, as defined by the Legislature.

Existing statutory law that implements the constitutional exclusion generally requires that a claim for that exclusion be filed with a county assessor within 3 years after the date of the purchase or transfer for which the claim is filed.

This bill would provide that a claim for the exclusion shall be deemed timely filed if it is filed within 6 months after the date of the mailing of a specified notice of assessment arising from the purchase or transfer for which the claim is filed. This bill would specify that this provision is applicable to a purchase or transfer of real property that occurred on or after November 6, 1986. This bill would also make other clarifying changes.

Ch. 710 (AB 130) Tucker. Recorder fees.

Existing law authorizes the board of supervisors of any county to charge a $1 filing fee for every document filed to defray the cost of converting the county recorder's document storage system to micrographics, and prescribes the fees for recording documents with county recorders.

This bill authorizes the board of supervisors to charge an additional $1 fee if the resolution doing so requires the recorder's office to establish specified days of operation or requires that specified documents be indexed within a specified period of time.

This bill would also authorize a county board of supervisors to set the fees for a certificate under seal and for copies of records or papers on file in the office of the recorder in an amount necessary to cover the direct and indirect costs of delivering the service or product.

Ch. 711 (AB 675) Moore. Fair employment.

Existing provisions of the California Fair Employment and Housing Act make it an unlawful employment practice, with certain exceptions, for an employer, certain entities, or any other person to harass an employee or applicant on the basis of sex, among other factors.

This bill would make certain legislative findings and declarations, and would clarify that, for purposes of the foregoing provisions, harassment because of sex includes sexual harassment, gender harassment, and harassment based on pregnancy, childbirth, or related medical conditions.

This bill would incorporate additional amendments to Section 12940 of the Government Code proposed by SB 946, contingent upon the prior enactment of that bill.

Ch. 712 (AB 1734) Areias. Prison financing: school districts: mitigation costs.

Existing law provides that funds derived from the lease-purchase financing methods for the California State Prison-Monterey County (Soledad) and California State Prison-

NOTE: Superior numbers appear as a separate section at the end of the digests.

Madera County (Central California Women's Facility), respectively, deposited in the State Treasury, are continuously appropriated to the State Public Works Board on behalf of the Department of Corrections for the purpose of acquiring and constructing or refinancing those prison facilities. Existing law provides that these funds shall be available for specified purposes.

This bill would add to the purposes for which these funds, as specified, can be used the mitigation costs of school districts. Because this bill would make the moneys from the above continuously appropriated funds available for a new purpose, it would make an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 713 (AB 2037) Peace. Dams.

Existing law regulates the construction and operation of dams and provides that certain structures, including circular tanks constructed of steel or concrete, or both, are not dams for purposes of those provisions.

This bill would revise those provisions by excluding from the definition of a dam prescribed noncircular tanks. The bill would require the owner of a structure that meets certain requirements to comply with a specified provision of the Government Code and to employ a registered civil engineer to supervise the structure, as prescribed. The bill would prescribe related matters.

Ch. 714 (AB 2379) Committee on Ways and Means. County retirement: optional service retirement formula.

The existing County Employees Retirement Law of 1937, in a provision that was enacted by Chapter 61 of the Statutes of 1993, authorizes boards of supervisors to elect to be subject to a specified service retirement formula for employees who are covered by the federal Social Security Act if it is agreed to in a written memorandum of understanding entered into by an employer and representative of employees.

This bill would eliminate the condition in that provision that the county employees be covered by the federal Social Security Act.

Ch. 715 (SB 1011) Watson. Vandalism.

Existing law prohibits a person from maliciously defacing, with paint or other liquid, damaging, or destroying any real or personal property not his or her own, except as specified, a violation of which is vandalism, punishable as a misdemeanor if the amount of defacement, damage, or destruction is less than $5,000 and punishable as a misdemeanor or felony if the amount of defacement, damage, or destruction is $5,000 or more.

This bill, in addition, notwithstanding the above provision, would make it a misdemeanor or a felony for a person having been convicted previously of the above offense for maliciously defacing with paint or any other liquid any real or personal property not his or her own on 2 separate occasions and having been incarcerated pursuant to a sentence, a conditional sentence, or grant of probation for at least one of the convictions, to be subsequently convicted of that offense. Because this bill would change the punishment for a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 716 (AB 282) Hauser. County Medical Services Program: risk limitations.

Existing law establishes the County Medical Services Program, under which qualifying counties may enter into a contract with the State Department of Health Services under which the department agrees to administer specified county responsibilities for the provision of health services, in accordance with various requirements, including a specified fee that must be paid by each county. In order to qualify, a county must either have contracted with the department to operate a similar predecessor program or have a population of less than 300,000, as determined in accordance with the 1990 decennial

NOTE: Superior numbers appear as a separate section at the end of the digests.

census.

Existing law specifies that, as a condition of participation, each qualifying county must pay to the department a specified amount, in 12 equal monthly payments.

This bill would permit a county, due to financial hardship, to request that these payments be delayed, with these requests being subject to the approval of the Small County Advisory Committee.

This bill would specify that, commencing in the 1991–92 fiscal year and for fiscal years thereafter, for any county that enters the County Medical Services Program, the amount required to be paid by the county would be determined, on a prorated basis, according to the number of months of participation, pursuant to contract, in the County Medical Services Program.

This bill would incorporate additional changes in Section 16809.3 of the Welfare and Institutions Code, proposed by AB 1088, to be operative only if AB 1088 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 717 (AB 363) Tucker. Horseracing.

Existing law prohibits a person licensed to conduct a racing meeting from paying or distributing to, or on behalf of, any horse owner, any agent, or person or organization representing any horse owner or owners, purses, or any other type of consideration to, or for, the benefit of horsemen, other than that expressly provided in the Horse Racing Law.

This bill would permit a licensed racing association and the horsemen's organization that represents horsemen participating in a racing meeting to enter into an agreement for the supplementing of purses due to the activities of a gaming club conducted during a racing meeting on the association's property.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 718 (AB 674) O'Connell. Marshal: courts: Santa Barbara County.

(1) Existing law specifies the duties of sheriffs with respect to superior courts, marshals with respect to municipal courts, and constables with respect to justice courts. Existing law also specifies the number, compensation, and qualifications of personnel of the marshals' offices in Santa Barbara County.

This bill would delete the provisions for the number, compensation, and qualifications of current personnel of the marshals' offices in Santa Barbara County, and would provide for the consolidation of court services provided to municipal and justice courts by the marshals and constables in Santa Barbara County under a single Marshal of Santa Barbara County, as specified, thereby imposing a state-mandated local program by requiring new duties of local officials. These provisions would be operative on the date that the office of 2 of the current marshal positions in Santa Barbara County become vacant, as specified.

(2) Existing law provides that certain persons who have been deputized or appointed by the proper authority as, among other things, a reserve or auxiliary sheriff or city police officer, a reserve deputy sheriff, a reserve police officer of a regional park district or of a transit district, a reserve deputy of the Department of Fish and Game, or a reserve special agent of the Department of Justice, are designated as peace officers for the duration of the person's specific assignment.

This bill would add reserve deputy marshals to these provisions.

(3) This bill would incorporate additional changes in Section 830.6 of the Penal Code proposed by AB 529, to become operative only if both bills are enacted and become effective on January 1, 1994, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 719 (AB 835) Lee. General plan: review.

Existing law requires a local planning agency, prior to action by a legislative body to adopt or substantially amend a general plan, to refer the proposed action to specified entities.

This bill would impose a state-mandated local program by requiring, in addition, the referral of the proposed action to the Bay Area Air Quality Management District for a proposed action within the boundaries of the district.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 720 (AB 892) Frazee. Urban water management planning.

Existing law requires every urban water supplier, as defined, to prepare and adopt an urban water management plan, and requires the plan to include specified elements.

This bill would revise the requirements relating to the elements to be included in the plan.

Ch. 721 (AB 1019) Umberg. Hazardous waste: small business assistance.

Existing law requires the Department of Toxic Substances Control to establish a small business assistance pilot project, until December 1, 1993, by making a grant of $400,000 to a county to develop a pilot project to develop a specified environmental educational program and to design and develop a collection system to dispose of hazardous waste generated by small businesses, as specified. A county was required to submit the grant application by May 1, 1991, and the department was required to notify the applicant of the approval or denial of the grant application by October 1, 1994. Existing law requires the grant recipient to submit a report to the department by October 1, 1993, describing the implementation of the project. Existing law requires the department to submit that report to the Legislature by December 1, 1993, including any recommendations. Existing law would repeal the program on January 1, 1994.

This bill would expand the program by requiring the department to issue a 2nd grant to another county to develop a pilot project, as specified, and would extend the program termination date to January 1, 1997.

The bill would require the 2nd project grant application to be submitted on or before May 1, 1994, and would require department approval on or before October 1, 1994. The bill would require the 2nd grant recipient to submit its report to the department on or before October 1, 1996.

The bill would appropriate up to $250,000 from the Hazardous Waste Control Account in the General Fund to the department to fund the 2nd pilot project. The bill would provide, however, that the appropriation would be available for expenditure only to the extent that sufficient funds remain in the Hazardous Waste Control Account after all appropriations have been made from the Hazardous Waste Control Account in the 1993–94 Budget Act. The bill would prohibit the department from making a grant from these funds unless an amount equal to $1 for every $2 of the grant is made available to the county from other public or private sources, for the pilot project.

Ch. 722 (AB 1035) Archie-Hudson. Rail transit traffic safety.

Existing law authorizes the establishment of transportation commissions and transportation authorities, as specified, to deal with local transportation and improvement needs.

This bill would contain legislative findings and declarations regarding the necessity for rail transit safety programs and would authorize in each county with a population greater than 500,000 in which a transportation commission or authority has been established and it owns or operates rail transit facilities, the commission or authority to provide and disseminate appropriate educational materials, as specified, to traffic schools to aid in reducing the number of rail-related traffic accidents.

Existing law prohibits specified activities with regard to trespassing on railroad property and railroad crossings.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the court to order any person convicted of specified rail transit related traffic offenses to attend a traffic school which offers, as a part of its curriculum, a film developed or caused to be developed by a transportation commission or authority on rail transit safety. This bill would also authorize the court to order a person cited for these specified violations to pay additional fines, as specified, to be allocated as specified. This bill would limit application of this provision to counties with a population greater than 500,000.

Existing law makes it a misdemeanor for a person to ride, drive, or propel any vehicle upon and along the track of any railroad through or over its private right-of-way, without the authorization of its superintendent or other officer in charge.

This bill would make it a misdemeanor for a person to ride, drive, or propel any vehicle upon and along the track of any railline owned or operated by a county transportation commission or transportation authority without the authorization of the commission or authority. Because this bill would create a new crime, it would impose a state-mandated local program.

Existing law makes a person who enters or remains upon the property of any railroad without the permission of the owner of the land, the owner's agent, or the person in lawful possession and whose entry or presence or conduct upon the property interferes with, interrupts, or hinders, or which, if allowed to continue, would interfere with, interrupt, or hinder the safe and efficient operation of any locomotive, railway car, or train, guilty of a misdemeanor.

This bill would specify a similar prohibition with regard to any rail transit related property owned or operated by a county transportation commission or transportation authority. Because this bill would create a new crime, it would impose a state-mandated local program.

Existing law requires the Department of Motor Vehicles to publish a synopsis or summary of the laws regulating the operation of vehicles and the use of the highways.

This bill would require the California Driver's Handbook published by the department in compliance with the above requirement to include language regarding rail transit safety.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 723 (AB 1160) Caldera. Securities: local authority obligations.

Under existing law, it is unlawful to offer or sell a security unless the security is qualified or exempt from qualification requirements.

This bill would provide that it is unlawful for any person to offer or sell in this state any security constituting a fractional interest in a lease, installment sale, or other obligation of a city, county, city and county, school district, special district, or other local agency of this state without obtaining the prior written consent of the city, county, city and county, school district, special district, or other local agency to that offer or sale, except as specified. A violation would be a crime, thereby imposing a state-mandated local program.

This bill would incorporate additional changes in Section 25540 of the Corporations Code proposed by SB 955, to be operative only if SB 955 and this bill are both enacted and become effective on or before January 1, 1994, and this bill is chaptered last. These changes would become operative on the effective date of SB 955.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 724 (AB 1196) Johnson. Property.

(1) Existing law regulates the procedure for the foreclosure of a mortgage or deed of trust. Existing law requires the posting and publishing, as specified, of a notice of sale, which must include a description of the property, before the sale of property subject to foreclosure. Existing law also requires that the notice of sale be recorded with the county recorder at least 14 days prior to the date of the sale.

Existing law provides that, in addition to any other description of the property, the notice shall describe the property by giving its street address, if any, or other common designation, if any. If the property has no street address or other common designation, the notice shall contain the name and address of the beneficiary at whose request the sale is to be conducted and a statement that directions may be obtained from the beneficiary, as specified.

This bill would provide instead that, in addition to any other description of the property, the notice shall describe the property by giving its street address, if any, other common designation, if any, and a county assessor's parcel number. The bill would also provide that, if the property has no street address or other common designation, the notice shall contain a legal description of the property and the name and address of the beneficiary at whose request the sale is to be conducted and a statement that directions may be obtained from the beneficiary, as specified.

Existing law provides that the validity of the notice and sale shall not be affected by specified erroneous or omitted information if a legal description of the property is given.

This bill would revise the existing provision upholding the validity of the notice and sale despite erroneous or omitted information to make that provision applicable when a legal description or a county assessor's parcel number and either a street address or other common designation is given.

(2) Existing law provides that the trustee's sale shall be deemed final upon acceptance of the last and highest bid, subject to rescission for failure of consideration.

This bill would provide that the trustee's deed shall be deemed perfected as of 8 a.m. on the actual date of sale if the trustee's deed is recorded within 15 calendar days of the sale. The bill would also make other conforming changes to the law.

(3) Existing law specifies the manner by which property may be transferred.

This bill would provide for a recorded notice of nonacceptance of a recorded deed executed by the holder of a security interest, and specify the information regarding the property which shall be included in that notice. This bill would impose additional duties on county recorders, thereby creating a state-mandated local program.

(4) The bill would also incorporate further changes to Section 2924f of the Civil Code proposed by AB 1219, contingent upon its prior enactment.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 725 (AB 1228) Bates. Income taxes: gain or loss: involuntary conversions.

The existing Personal Income Tax Law, in conformity with certain federal income tax laws, provides that no gain shall be recognized if property is compulsorily or involuntarily converted into money or into property not similar or related in service or use to the converted property and within a specified 2-year period the taxpayer replaces the converted property, as specified.

This bill would provide that specified recently enacted federal provisions relating to special rules for the recognition of gain or loss with respect to principal residences damaged by presidentially declared disasters shall apply, as provided.

This bill would take effect immediately as a tax levy.

Ch. 726 (AB 1486) Speier. Child day care facilities: violations: civil penalties.

Existing law provides for the licensing, by the State Department of Social Services, of facilities that provide day care for children, including day care centers and family day care homes. Existing law authorizes the department to impose civil penalties for certain

NOTE: Superior numbers appear as a separate section at the end of the digests.

violations of the licensing requirements and their corresponding regulations. Existing law requires that the department notify day care centers and family day care homes in writing of all deficiencies in complying with the licensing provisions, and set reasonable lengths of time for compliance.

Existing law, applicable to day care centers, authorizes the department to levy a civil penalty for each day until the center is in compliance.

This bill would provide similar authority for the department with regard to family day care homes.

Existing law, which states that it does not become operative unless the Director of Motor Vehicles and the Director of Social Services make a determination regarding the sufficiency of "Have a Heart, Be a Star, Help Our Kids" license plate revenues, provides that civil penalties shall be imposed only after the licensee fails to correct the violation within a time period specified in a plan of correction developed pursuant to certain regulations and an evaluator makes a finding that the violation is a serious threat to the health and safety of the children, and requires the licensing agency to give due consideration to the appropriateness of the penalty considering the alleged violation and specified factors.

This bill would revise these provisions to authorize the imposition of civil penalties only after the licensee fails to correct the violation within a time period specified in a plan of correction developed pursuant to provisions of the bill, and when an evaluator makes a finding that the violation presents specified risks, and would instead require that the department and the licensee, in developing a plan of correction, consider those factors that were required to be considered when determining the appropriateness of penalties.

Existing law, which states that it is conditionally operative as described above, authorizes the imposition of a civil penalty of no more than $25 per day for any violation of the licensing provisions.

This bill would revise this provision to authorize civil penalties of $25 per day for uncorrected violations that present an imminent or potential risk to the health and safety of children in care.

Existing law, which states that it is conditionally operative as described above, prescribes a procedure for a licensee to contest a citation or the proposed assessment of a civil penalty through an initial appeal by informal conference.

This bill would repeal this procedure.

Under existing law, which states that it is conditionally operative as described above, revenues from the payment of civil penalties under these provisions are required to be deposited in the Child Health and Safety Fund, and to be expended exclusively for orientation, training, and education of family day care providers.

This bill would repeal those requirements.

This bill would also eliminate the requirement that all those provisions be conditionally operative, and would instead authorize the department to implement them to the extent funding is available in accordance with certain priorities.

Existing law, which states that it is conditionally operative as described above, requires the State Department of Social Services to establish a child care ombudsman program, authorizes the department to issue citations to facilities that are in violation of licensing requirements, and requires the department to make certain announced and unannounced site visits to day care facilities.

This bill would revise these provisions to instead of providing for their conditional operation authorize the department to implement them to the extent funding is available in accordance with certain priorities.

Existing law authorizes one or more public agencies and one or more private entities that provide child care or operate child day care facilities to enter into a joint powers agreement to form an insurance pooling arrangement for specified purposes. Existing law also authorizes certain public and nonprofit entities to elect to finance their liability for unemployment compensation benefits in accordance with certain requirements.

This bill would prohibit a day care related joint powers entity from making this election unless each of the member entities individually satisfies the requirements for

NOTE: Superior numbers appear as a separate section at the end of the digests.

making the election.

Under existing law, 50% of the moneys in the Child Health and Safety Fund are to be allocated in accordance with specified priorities. Existing law also requires the Division of Licensing of the department to regulate child care licensees through an organizational unit that is separate from that used to regulate other licensees of the department.

This bill would authorize the department, in order to implement those priorities and to complete implementation of the separate regulatory unit for child care licensees, to fund appropriate administrative support costs as necessary.

This bill would declare that it shall take effect immediately as an urgency statute.

Ch. 727 (AB 1522) Areias. Civil actions: witnesses: public employees.

Existing law sets forth procedures for subpoenaing the attendance of specified public employees, including firefighters, at civil trials and depositions, and for the payment and reimbursement of their compensation and traveling expenses, as specified.

This bill would specify that firefighters, for purposes of these provisions, includes volunteer firefighters. The bill would provide that a volunteer firefighter who is subpoenaed to appear as a witness in connection with a matter regarding an event or transaction which he or she has perceived or investigated in the course of his or her duties shall be deemed to be entitled to reasonable compensation evidenced by the compensation paid to firefighters in jurisdictions with similar geographic and economic characteristics, for the purpose of payment and reimbursement for time spent traveling to and from the location of the proceeding and time spent attending the proceeding, except where he or she will be compensated by his or her regular employer. By requiring local agencies to apply these rules for payment to volunteer firefighters, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 728 (AB 1728) Polanco. Local public assistance funding.

Existing law provides for the allocation of state funds, and makes certain provisions in effect prior to the revision of that allocation under the realignment of state and local public assistance program responsibilities inoperative, with specified exceptions, and repeals all of those prior existing provisions, both operative and inoperative, on January 1, 2000.

This bill would make operative until January 1, 2000, that provision of prior state funding allocations that authorizes the State Department of Health Services to adopt regulations necessary to implement the prior funding allocation system, to the extent it authorizes regulations existing as of June 30, 1991, regarding counties that may contract with the state for the provision of local health care.

Existing law contained in the California Health Care for the Indigent Program (CHIP) provides for the allocation of money from the Cigarette and Tobacco Products Surtax Fund to the counties to provide health care benefits.

Existing law requires that counties meet a specified level of maintenance of effort as a condition of receiving an allocation of CHIP funds.

This bill would authorize the reduction of the level of maintenance of effort required of a county that contracts with the State Department of Health Services for the operation of a public health service in that county.

Existing law provides for the allocation of state funds to local jurisdictions for the provision of various health and social service programs.

Existing law requires each county and city receiving those state funds to establish a local health and welfare trust fund with a mental health account, a social services

NOTE: Superior numbers appear as a separate section at the end of the digests.

account, and a health account.

This bill would require each city receiving those state funds to establish a local health and welfare trust fund that is comprised of a health account and a mental health account.

Existing law requires each county to periodically file with the Controller reports of trust fund deposits and expenditures within 45 days after the end of the quarter.

This bill would extend that requirement to 60 days after the end of the quarter, would apply it to cities, and would also apply it to trust fund deposits and disbursements.

This bill would also require the Controller to provide a remittance advice with each distribution of state funds to local agencies that identifies the account in the local health and welfare trust fund into which the funds shall be deposited.

This bill would make the operation of provisions of this bill subject to certain limitations.

Under existing law, the operative effect of provisions of Chapter 89 of the Statutes of 1991 are subject to a determination by the Commission on State Mandates or a court of appellate jurisdiction as to whether any provision of that act is a state-mandated local program and exceeds a statewide cost of $1,000,000.

This bill would revise that contingency requirement.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 729 (AB 1743) Margolin. Health insurance: closed blocks.

Existing law makes no provision prohibiting health care service plans and disability insurers from "closing a block of business," as defined.

This bill would so require. With respect to a health care service plan, a willful violation of its provisions would expand the applicability of existing criminal penalty provisions thus imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 730 (AB 1788) Hauser. Commercial fishing.

(1) Existing law prohibits taking of specified groups or species of marine life for commercial purposes and prohibits taking of adult garibaldi under the terms of a marine aquaria collector's permit from April 1 to July 31, inclusive. Existing law also prohibits the taking of any organisms under the terms of a marine aquaria collector's permit until January 1, 1995, on the north side of Santa Catalina Island, as specified.

This bill would delete marine plants from that prohibition. The bill would also prohibit the taking of garibaldi under the terms of a marine aquaria collector's permit from February 1 to October 31, inclusive. The bill would also prohibit the taking of any organisms under the terms of a marine aquaria collector's permit anywhere around Santa Catalina Island until January 1, 2000, and on the north side thereafter. Because a violation of the bill would be a crime pursuant to other provisions of existing law, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 731 (AB 1847) Woodruff. Job Training Partnership Act.

Existing law provides for procedures and criteria for determining the eligibility of persons provided services with federal funds received through the federal Job Training Partnership Act (JTPA), as specified.

This bill would define a school dropout for purposes of participation and reporting of participation in state programs funded under the JTPA, and would require the signature of a parent, guardian, or other responsible adult to authorize a minor to participate in

NOTE: Superior numbers appear as a separate section at the end of the digests.

JTPA programs.

Existing law provides that the Governor shall give consideration to and may approve a request to be a JTPA service delivery area from any unit of general local government or consortium of contiguous units of general local government, with an aggregate population below 200,000, that served as a prime sponsor under the Comprehensive Employment and Training Act or that serves a substantial portion of a labor market area.

This bill would delete the aforementioned provisions relating to requests to be a JTPA service delivery area.

Existing law requires the appropriate local elected officials, in their administration and management of the services system established under provisions relating to the JTPA, to act in a manner that promotes and supports the powers, duties, and functions of the local private industry council, as specified.

This bill would provide that the unit of general local government or each unit of general local government that is a member of a consortium, as described, that has been designated by the Governor as a service delivery area pursuant to specified state provisions and the JTPA, shall be liable to the agency designated by the Governor for all funds not expended in accordance with specified state provisions, and would require the service delivery area to return to that agency all of those funds.

Existing law authorizes governmental units, where it is determined to be impractical because of population size or geographical remoteness for an individual unit of general local government to establish a services system pursuant to provisions relating to the JTPA, or where governmental units share common interests, needs, and resources, to establish through a joint powers agreement a consortium empowered to fulfill certain JTPA requirements.

This bill would instead require local government entities, when contiguous units of general local government form a consortium designated by the Governor as a service delivery area pursuant to a specified provision, to establish a joint powers entity through a joint powers agreement that empowers the entity to fulfill requirements relating to the JTPA.

Existing law requires that, to the extent feasible and to the extent that employment and training services are available, employment and training services be provided to Work Incentive Program registrants that are not available under the Work Incentive Program or the Employment Preparation Program, as specified, and requires the Employment Development Department, with the advice of various other state and local government entities, to develop intake and assessment forms and procedures, as provided.

This bill would delete these provisions relating to the provision of employment and training services to Work Incentive Program registrants.

Existing law requires the State Job Training Council to be the entity responsible for establishing specified rules, regulations, and procedures with respect to state implementation of the JTPA, and, in this connection, refers to service delivery areas rather than counties. It requires appropriate local elected officials in each JTPA service delivery area to act in a manner that promotes and supports the powers, duties, and functions of the local private industry council, as defined.

This bill would make various changes to the composition of the service delivery area's private industry council, as specified.

Existing law requires that each service delivery area prepare a plan with respect to the use of JTPA funds that contains specified components, including assurance that economically disadvantaged women and minorities will be served with federal JTPA funds, as specified.

This bill would make various changes with respect to the provisions required to be included in the service delivery area plans.

Existing law requires the Employment Development Department to develop and maintain those fiscal control, accounting, auditing, and debt collection procedures that are necessary to assure proper disbursal of and accounting for the state and federal funds appropriated for purposes and requirements relating to job training.

This bill would bar a service provider from receiving JTPA funds if the state or a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

service delivery area has established a final debt against a JTPA service provider and the service provider has not paid the final debt, or established a payment plan within 60 days after the final debt is established, and would require the department to publish a list of service providers who are barred from receiving JTPA funds by May 1 of each year.

This bill would also make various changes to conform to federal law governing the JTPA.

Ch. 732 (AB 1906) Conroy. Public utilities: natural gas.

Existing law authorizes the Public Utilities Commission to supervise and regulate every public utility in the state and to do all things necessary and convenient in the exercise of its power and jurisdiction, including the approval of utility expenses and the establishment of rates.

The bill would require the commission to require every gas corporation to revise its transportation tariffs and conditions of service to eliminate all components that assess shippers of gas produced in California for the costs of interstate transmission of gas produced outside of the state, as specified.

Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 733 (AB 1909) O'Connell. Solid waste: market development programs.

Existing law, the California Integrated Waste Management Act of 1989, authorizes the California Integrated Waste Management Board to assist local agencies in the development of markets for postconsumer waste materials, as defined, by, among other things, making low-interest loans, based on specified conditions, to local agencies, as designated, for the purpose of developing markets for postconsumer waste material, and prescribes related matters.

This bill would repeal and recast those provisions of law, and would require the board, using existing resources, to develop a comprehensive market development plan, as prescribed, that would stimulate market demand within the state for postconsumer waste material and secondary waste material, as defined. The bill would, until July 1, 1997, provide for the designation of recycling market development zones, provide for a loan program, create in the Integrated Waste Management Account a Recycling Market Development Revolving Loan Subaccount, and prescribe related matters. The bill would require the board to report on its loan program in the annual report that the board is required to file on or before March 31, 1996, with the Legislature, and to report on its progress in developing and implementing the market development plan in the annual report.

The bill would authorize the board to sell loans made pursuant to the act, with a specified exception, on the secondary market and to pool its loans, and would restrict the use of the proceeds therefrom.

Ch. 734 (AB 1951) Statham. Water: dam fees.

Existing law requires certain dam owners to pay an annual fee based on the height of the dam.

This bill would require the Department of Water Resources to limit the total annual fee per dam to not more than $75, if specified conditions apply.

Ch. 735 (AB 2079) Margolin. Health care service plans.

(1) Under existing law, the Knox-Keene Health Care Service Plan Act of 1975, health care service plans are regulated by the Commissioner of Corporations. Existing law requires a health care service plan whose license has been surrendered or revoked to submit to the commissioner on or before 105 days after the effective date of the surrend-

NOTE: Superior numbers appear as a separate section at the end of the digests.

er or revocation a closing audit report.

This bill would instead require this health care service plan to submit to the commissioner a closing audit report on or before 105 days after notice of the surrender or revocation. It would prohibit the commissioner from consenting to a surrender and would prohibit an order of revocation as being considered final until the closing audit report has been filed and all concerns raised by the commissioner therefrom have been resolved by the plan. It would also authorize the commissioner to waive this requirement for good cause.

(2) Existing law authorizes the commissioner to summarily suspend or revoke the license of a plan under prescribed conditions.

This bill would, in addition, authorize summary suspension or revocation for failure of a plan to maintain a deposit, insurance, or guaranty arrangement required by the act and for failure to maintain a deposit required by regulations adopted by the Department of Corporations.

(3) Under existing law, the act contains comprehensive provisions regulating health care service plan contracts that supplement medicare, including the requirement that the plan use a disclosure form to disclose information about benefits, services, and terms of the plan contract. Existing law exempts a federally qualified health maintenance organization from these provisions. Under existing law, the willful violation of the act or any rule or order thereunder is a misdemeanor.

This bill would delete the exemption for federally qualified health maintenance organizations, and would instead exempt from these comprehensive provisions regulating health care service plans (1) a contract or other arrangement of a health care service plan that offers benefits under federal law or under a demonstration project authorized pursuant to federal law and (2) a contract of one or more employers or labor organizations, or of the trustees of a fund, for employees or former employees, or members or former members, of the labor organizations. By changing the definition of a crime, this bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 736 (AB 2091) Takasugi. Oil spills: authorized discharges.

Existing law requires the Office of Oil Spill Prevention administrator to direct prevention, removal, abatement, response, containment, and cleanup efforts related to oil spills in the marine waters of the state, as specified. Existing law requires the State Water Resources Control Board and Regional Water Quality Control Boards to issue waste discharge requirements and dredged or fill material permits as required or authorized by the Federal Water Pollution Control Act with any more stringent effluent standards or limitations that are needed to prevent nuisance, protect beneficial uses, or implement water quality control plans.

This bill would require the administrator, by May 15, 1994, to enter into a memorandum of understanding with the executive director of the state board to address discharges, other than dispersants, that are related to the response, containment, and cleanup of an existing or threatened oil spill conducted in accordance with specified provisions of existing law.

The bill would require the memorandum of understanding to address any permits, requirements, or authorizations that are required for those discharges, and would require the memorandum of understanding to be consistent with requirements that protect state water quality and beneficial uses and with specified laws regarding water quality, and to expedite efficient oil spill response.

Ch. 737 (AB 2104) Harvey. Economic poisons: penalties.

Existing law permits a county agricultural commissioner to levy a civil penalty against a person violating the provisions of the Food and Agricultural Code, or the regulations adopted pursuant thereto, relating to pest control operations and agricultural chemicals,

NOTE: Superior numbers appear as a separate section at the end of the digests.

in lieu of civil prosecution by the Director of Pesticide Regulation, and sets forth a procedure for levying the penalty, and for appeals to the director therefrom.

This bill would change the procedure for levying the penalty and for appeals to the director in the following instances: (1) the person charged with the violation would be required to be given notice of the proposed penalty in the written notice of the proposed action, which this bill would require to be sent to the person by certified mail; (2) the person would be given the opportunity to be heard if request is made for a hearing within 20 days after receiving the notice of the proposed action; (3) the director would be required to decide the appeal on the record of the hearing, as prescribed, and would be required to affirm the decision if there is substantial evidence to support the commissioner's decision; and (4) on appeal, among other things, the director could increase the amount of the civil penalty if the penalty is not greater than the penalty proposed in the commissioner's notice of proposed action.

Ch. 738 (AB 2121) Alpert. Fishery management plans.

(1) The California Constitution authorizes the Legislature to delegate to the Fish and Game Commission such powers relating to the protection and propagation of fish and game as the Legislature sees fit. Existing law also provides for the taking of fish for commercial and recreational purposes under specified conditions.

This bill would require the Department of Fish and Game to develop a fishery management plan, as defined, for the white sea bass fishery as a pilot program. The bill would declare that it shall not be construed to deny access to the white sea bass fishery for purposes of commercial fishing or sportfishing. The department would be permitted to formulate additional plans for fisheries of other high priority marine fish species. The bill would require the white sea bass fishery management plan to be submitted to the commission on or before June 30, 1995, for review and adoption, and to the Legislature for specified purposes. The bill would require the department to seek specified assistance with respect to the preparation of the plans.

The bill would require the commission, after holding a public hearing, to adopt a plan or return it to the department for revision and resubmission. If the commission adopts a plan, the bill would require the commission to adopt recommended actions in the plan as regulations.

(2) Under existing law, the Fish and Game Preservation Fund is continuously appropriated to the department and the commission to carry out the Fish and Game Code. Because this bill would impose new duties on the department and the commission, the bill would make an appropriation.

Ch. 739 (AB 2148) Conroy. Public Utilities Commission: rate regulation.

Existing law authorizes the Public Utilities Commission, after a hearing, to fix, by order, reasonable rates or classifications, among other things, for any public utility.

This bill would prohibit a public utility from changing a group of customers from one rate schedule to another rate schedule, if the change would result in an increase of more than 10% in the rate charged to the affected customers, without first giving notice to the customers.

Existing law makes a violation of the Public Utilities Act subject to criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on utilities who violate the provisions of this bill.

Ch. 740 (AB 2154) Jones. Petroleum: automotive fuels.

Existing law requires the Department of Food and Agriculture to adopt by reference in the latest standards established by the American Society for Testing and Materials (ASTM), for gasoline, diesel fuel, kerosene, fuel oil, and automotive spark-ignition engine fuel, except as specified.

This bill would, instead, require the department to establish specifications for gasoline or automotive spark-ignition engine fuel, and for compression-ignition engine fuel, kerosene, and fuel oil and to adopt by reference the latest standards established by a recognized consensus organization or standards writing organization, as specified, and would impose new specifications on gasoline.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law defines gasoline, as specified.

This bill would revise the definition of gasoline, as specified. This bill would define the term "compression-ignition engine fuel" and would revise the definition of "automotive spark-ignition engine fuel," as specified.

Existing law makes it unlawful to sell or deliver for the purpose of sale, among other products, diesel fuel unless it conforms to the department's specifications.

This bill would, instead, make it unlawful to sell or deliver for the purpose of sale, compression-ignition engine fuel unless it conforms to the department's specifications.

This bill would incorporate additional changes in Section 13440 of the Business and Professions Code, proposed by SB 219, to be operative only if SB 219 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

Existing law makes any violation of provisions relating to the sale of petroleum products a misdemeanor.

This bill would impose a state-mandated local program by adding new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 741 (AB 2160) Harvey. Alcohol and drug programs.

Existing law designates the Department of Alcohol and Drug Programs as the sole authority in state government to license alcoholism or drug recovery or treatment facilities serving adults.

Existing law establishes certain licensure criteria, including a demonstration by the applicant that the facility possesses adequate administrative, fiscal, and operational capability to achieve its stated goals and objectives, and an inspection by the department, or an agent who has no financial interest, as defined for the purposes of the Political Reform Act of 1974, in any alcoholism or drug abuse recovery facility, to determine if the facility is clean, safe, healthful, and free of alcohol or illicit drugs.

This bill would repeal those licensure requirements, and would instead require that applicants for licensure complete a written application, obtain a fire clearance, and pay a prescribed fee. This bill would additionally require licensees to, at a minimum, provide for maintenance of records and development of written procedures.

This bill would also require licensees to provide recovery, treatment, or detoxification services.

This bill would authorize the department to issue a single license to a residential facility, or a facility wherein separate buildings are integral components of a single treatment facility, upon receipt of a completed application, and after review and determination that the facility can comply with licensure requirements. This bill would prohibit the operation of a facility beyond the conditions and limitations specified on the license.

This bill would provide that a license is valid for 2 years, and would provide for the automatic expiration of the license for failure to apply for renewal or to pay the required fee.

Existing law requires licensure and establishes qualifications for various health professionals, including, but not limited, to physicians and surgeons, psychologists, and social workers.

Existing law grants the department the sole authority to determine qualifications of personnel working within an alcoholism or drug abuse recovery and treatment program receiving prescribed funding.

This bill would grant the department sole authority to establish the minimum qualifications of the licensee or designated administrator, or the staff, of providers of recovery, treatment, or detoxification services.

This bill would grant current licensees one year from the date regulations are adopted by the department in accordance with the bill, to comply with the requirements of the bill and those regulations, and would authorize the department to take certain enforce-

NOTE: Superior numbers appear as a separate section at the end of the digests.

ment actions.

Existing law authorizes the department to assess civil penalties of $200 per day for operation of an alcoholism or drug abuse recovery or treatment facility without a license, or for refusal to seek licensure, or for continued operation after a license has been denied.

This bill would repeal that authorization and would instead require the department to conduct a site visit to investigate allegations of violations of the requirements of licensure, and if a violation is found, to take prescribed actions, including issuing a written notice of violation, notifying the facility of the licensure requirements, and notifying the facility that civil penalties will be assessed or that the case will be referred for a civil proceeding.

Existing law also authorizes the department to levy civil penalties for violations of any of the provisions relating to licensure. Under existing law, a facility that is cited for repeating the same violation within 12 months of a first violation, or within 12 months of a repeat violation that was within 12 months of the first violation, is subject to increased penalties. Existing law requires that the department allow the facility a minimum of 30 days to correct the deficiency prior to the assessment of any civil penalty.

This bill would authorize the department to also levy civil penalties for violation of the regulations relating to the licensure requirements. This bill would instead make repeat violations that occur within 24 months of a first or a previous violation subject to increased penalties. This bill would repeal the requirement that facilities have 30 days to correct the deficiency and would instead require the department to provide the licensee with notice to correct the deficiency within the time period specified in the notice.

Existing law authorizes the suspension or revocation of a license by the director on specified grounds. Existing law requires that upon receipt of a notice of defense to the accusation by the licensee, the director shall set the matter for hearing within 15 days, and the hearing shall be held as soon as possible, but not later than 30 days after receipt of the notice. Existing law also requires that the temporary suspension shall be deemed vacated if the director fails to make a final determination on the merits within 30 days after the original hearing is completed.

This bill would repeal the 30-day requirement for holding the hearing and would instead require that the hearing be held as soon as possible.

This bill would instead deem the temporary suspension vacated if the director fails to make a final determination within 30 days after the department receives the proposed decision from the Office of Administrative Hearings.

This bill would authorize any employee or agent of the department to enter and inspect any building, premises, and records, at a reasonable time, with or without notice, in order to secure information regarding compliance with licensure requirements.

This bill would require that a license terminate prior to its expiration date upon the occurrence of certain events or conditions.

This bill would make conforming changes and other changes of a technical nature.

Ch. 742 (AB 2197) Baca. Public utilities: energy use.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities.

This bill would authorize the commission to develop programs, as specified, for cooperative activities between utilities and commercial, industrial, institutional, and governmental customers that have the purpose and effect of reducing the energy bills of those customers, this provision to be repealed on January 1, 1999.

The bill would make legislative findings and declarations with respect to energy conservation policies and antitrust laws, as specified.

Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 743 (AB 2264) Andal. Teacher credentials: school safety instruction.

Existing law establishes the minimum requirements individuals must satisfy before obtaining a multiple or single subject teaching credential, a services credential with a specialization in pupil personnel services, and a preliminary services credential with a specialization in administrative services. Existing law also establishes professional growth requirements that teachers are required to satisfy in order to maintain a valid teaching credential.

This bill would require the Commission on Teacher Credentialing to adopt standards that address principles of school safety, including, but not limited to, school management skills emphasizing crisis intervention and conflict resolution, developing and maintaining a positive and safe school climate, developing school safety plans, and developing ways to identify and defuse situations that may lead to violence.

This bill would also provide that effective January 1, 1996, instruction in principles of school safety shall be required of all candidates for a multiple or single subject teaching credential, a services credential with a specialization in pupil personnel services, and a preliminary services credential with a specialization in administrative services, except as specified.

Ch. 744 (AB 2309) Woodruff. Health insurance.

Existing law authorizes a disability insurance policy to provide for payment of all or a portion of a health care provider's charges without requiring that the insured first pay the expenses.

This bill would require group health care service plans to authorize and permit assignment of a Medi-Cal beneficiary's benefits to the State Department of Health Services.

With respect to a health care service plan, a willful violation of this provision would be a misdemeanor, thus imposing a state-mandated local program.

Existing law provides for the direct payment of group insurance medical benefits by a disability insurer to the person or persons furnishing hospitalization or medical or surgical aid, as specified.

This bill, as respects those group disability insurance benefits, would qualify those reimbursement provisions and would additionally authorize direct payment to the person or persons having paid for the hospitalization or medical or surgical aid, as defined, or, in the case of a Medi-Cal beneficiary, to the State Department of Health Services. The bill would provide for direct payment to the custodial parent or the State Department of Health Services with respect to group nonprofit hospital service plans, as specified, and make related changes.

Existing law establishes the California Partnership for Long-Term Care Pilot Program to link private long-term care insurance and health care service plan contracts with In-Home Supportive Services and Medi-Cal.

This bill would extend the period during which resource protection is provided. The bill would also revise contract provisions to permit contracting on a bid or nonbid basis, in addition to negotiating contracts, as specified.

Existing law prohibits the State Department of Health Services, as specified, from implementing the California Partnership for Long-Term Care unless a private grant is received to pay the administrative costs of the program.

This bill would delete that prohibition.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 745 (SB 788) Watson. Wage assignments for support: enforcement by contempt.

(1) Existing law establishes the Family Code, which provides, among other things, for the obligations of child and spousal support. Existing law also sets forth the responsibility of certain persons to provide support for families receiving public social services, as specified, and provides that willful failure to obey a support order or other court order is punishable as a contempt of court, including by imprisonment.

This bill would specify that a contempt of court for failure to obey a court order issued pursuant to the Family Code or specified provisions of the Welfare and Institutions Code shall also be punishable by an order to complete community service in lieu of, or in addition to, a fine or imprisonment, as specified, and, in certain cases, would subject the contemnor to payment of a specified administrative fee. The bill would also make conforming changes.

The bill would impose a state-mandated local program by establishing a mandatory program for the punishment of specified persons found to be in contempt of court.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 746 (AB 934) Rainey. Contempt.

(1) Existing law establishes the Family Code, which provides, among other things, for the obligations of child and spousal support. Existing law also sets forth the responsibility of certain persons to provide support for families receiving public social services, as specified, and provides that willful failure to obey a support or other court order is punishable as a contempt of court, including by imprisonment.

This bill would specify that a contempt of court for failure to obey a court order issued pursuant to the Family Code or specified provisions of the Welfare and Institutions Code shall also be punishable by an order to complete community service in lieu of or in addition to a fine or imprisonment, as specified, and, in certain cases, would subject the contemner to payment of a specified administrative fee.

The bill would impose a state-mandated local program by establishing a mandatory program for the punishment of specified persons found to be in contempt of court.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 747 (AB 1738) Horcher. Unemployment compensation: elective coverage.

(1) Existing law permits any individual who is self-employed, who is not an employer, and who receives the major part of his or her remuneration from the trade, business, or occupation in which he or she is self-employed, to file a written election with the Director of Employment Development to be covered by unemployment disability compensation provisions. Existing law requires the director to not approve that election upon finding certain circumstances.

This bill would additionally provide that the director shall not approve the election if the individual is unable to work at the time of the election, as specified, due to injury or illness; if the major portion of the individual's remuneration is not derived from his or her trade, business, or occupation; if the individual is unable to provide a specified federal income tax document containing specified information; or if a prior election has been terminated, as specified.

(2) Existing law permits an employing unit not otherwise subject to unemployment compensation benefits to file with the Director of Employment Development a written election to be covered by unemployment compensation provisions. Existing law permits the director to terminate that elective coverage agreement upon finding certain circumstances. Existing law also permits the director to terminate elective disability coverage

NOTE: Superior numbers appear as a separate section at the end of the digests.

agreements of self-employed individuals upon finding certain circumstances.

This bill would permit the director to terminate those elective coverage agreements when the employing unit or the self-employed individual is found to have filed a false statement, as specified. This bill would also permit the director to terminate existing elective disability coverage agreements if the director finds that the major portion of a self-employed individual's remuneration is not derived from his or her trade, business, or occupation, or if the individual reports a net profit of less than $4,600 on a specified federal income tax document. This bill would delete provisions that prohibit any refund of contributions upon termination of an elective coverage agreement.

(3) Existing law requires the director to not approve an elective coverage agreement and permits the director to terminate an elective coverage agreement upon finding that the employing unit or self-employed individual is not normally and continuously engaged in a regular trade, business, or occupation.

This bill would provide that "normally and continuously engaged in a regular trade, business, or occupation" means regularly performing services and engaging in an uninterrupted pattern of work, as specified, and, in the case of a specified individual in a trade, business, or occupation that requires a valid and active license, that the individual has been issued that license.

(4) Existing law permits an employing unit to terminate elective coverage on January 1 of any calendar year if the agreement has been in effect for 2 calendar years and the employing unit files a written application for termination on or before January 31.

This bill would extend those provisions to a self-employed individual and permit the termination of specified agreements on January 1, 1994, if the self-employed individual files a written application with the director on or before June 30, 1994.

(5) Existing law provides that benefits for individuals covered by an elective coverage agreement are deemed to have received specified remuneration.

This bill would revise those provisions and would provide a specified formula for calculating the amount of remuneration in the case of a self-employed individual for contributions on or after July 1, 1994. The bill would require that benefits payable for periods of disability commencing on or after January 1, 1995, be based on a specified statutory table that provides a weekly benefit amount based on remuneration.

(6) Existing law requires the director to declare the rate of contributions for elective coverage agreements on or before November 30 of each calendar year, pursuant to a specified formula.

This bill would revise that formula, as specified.

(7) Existing law requires each employer to file with the Director of Employment Development within the time required for payment of employer unemployment insurance contributions, a return and a report of wages paid to his or her workers according to a prescribed form.

This bill would require specified domestic service employers electing to report and pay voluntary employer contributions under a specified provision to submit the above-described report of wages on the first day of the calendar month following the close of each calendar quarter.

(8) Existing law requires all employers in the state to file with the Employment Development Department information on the hiring of any person or any changes in certain types of employment status of that person, and submit a report within 30 days of the hiring, rehiring, or return to work of any person on whom the employer is required to report pursuant to these provisions. It requires the department to retain information collected pursuant to these provisions for no more than 90 days after the end of the calendar quarter.

This bill would provide that a report submitted pursuant to a specified statute relating to the payment of employer contributions for unemployment insurance shall not be accepted in lieu of the report required by these provisions. It would also require the department to retain information collected pursuant to these provisions for no more than 180 days, except for purposes of enforcement of a specified provision.

Existing law requires the department to give written notice of failure to any employer who fails to report as required by these provisions. It requires that a $250 civil penalty

NOTE: Superior numbers appear as a separate section at the end of the digests.

per month per person be assessed against any employer who is given 3 notices pursuant to these provisions for any violation occurring after the 3rd notice has been given, and continuing until a report is received by the department.

This bill would instead require the department to provide written notice to any employer for the employer's first failure to report any new hire, rehire, or return to work of an employee, and would provide that, for each subsequent failure to report as required by these provisions that occurs after the date the employer receives notice from the department of his or her first failure to report, an employer would be subject to a penalty of $250.

(9) Existing law requires that specified employer contributions, the amount of benefits received by any individual that is deducted from an award or settlement made by the employer under a specified provision relating to backpay awards resulting from wrongful discharge, and, except as provided, worker contributions required under a specified provision, be paid on the first day of the calendar month following the close of each calendar quarter.

This bill would permit specified domestic service employers, except as provided, to elect to report and pay voluntary employer contributions and worker contributions required under specified provisions annually, but would require an employer to pay these voluntary contributions on the first day of January following the close of the prior calendar year. It would provide that any domestic service employer, as defined, who pays more than $20,000 in wages annually, shall not be entitled to the aforementioned election, and that, if at any time during the year the total wages paid by the employer exceed $20,000, the election shall be terminated and the employer shall be required to file quarterly returns for the remainder of the year.

(10) Existing law requires that an individual who is otherwise eligible may receive disability benefits after a waiting period of 7 days during which no benefits are payable. However, if the individual is unemployed and disabled for more than 14 days, that waiting period is waived. Existing law also provides that if the individual is confined in a hospital, as specified, for at least one day, or received treatment in a hospital surgical unit or a surgical clinic that requires a stay of less than 24 hours, any unexpired full days of the waiting period are waived.

This bill would provide that no benefits shall be paid to any otherwise eligible individual covered by an elective coverage agreement during the 7-day waiting period without regard to those exceptions.

(11) Existing law provides that the maximum amount of benefits payable to an individual during any one disability benefit period is 52 times his or her weekly benefit amount, as defined.

This bill would provide instead that the maximum amount of benefits payable to an individual covered by an elective coverage agreement during any one disability benefit period is 39 times his or her weekly benefit amount.

(12) Existing law requires every employer required to withhold estimated state income taxes to file a withholding return and pay over the withheld amount, and provides that return and payment shall be made on a quarterly basis, as provided.

This bill would require every employer electing to file a single annual return under a specified provision governing the payment of unemployment insurance contributions by domestic service employers, to report and pay any estimated state income taxes required to be withheld on an annual basis due and payable on the first day of January following the close of the prior calendar year.

(13) This bill would require the Employment Development Department, not later than the last day of the first legislative session after which the cumulative balance of contributions for elective coverage minus disbursements equals or exceeds 20% of annual disbursements, to submit to the Legislature an actuarial analysis evaluating the fiscal impact and advisability of increasing the benefit amount of disability insurance benefits payable to claimants covered under specified provisions governing elective coverage, to a total of 52 times the weekly benefit amount or 100% of a claimant's base period wages, whichever is less. It would also require the department, not later than July 1, 1994, to complete a study and submit a report to the Legislature on the feasibility of allowing

NOTE: Superior numbers appear as a separate section at the end of the digests.

claimants covered under specified provisions governing elective coverage, to elect coverage in excess of the maximum weekly benefit amount provided for in a specified provision governing unemployment insurance disability benefits at rates sufficient to cover the costs of that excess coverage.

(14) This bill would make other related technical conforming changes to those provisions.

Ch. 748 (SB 4) Johnston. Disability insurance.

The existing unemployment compensation disability law generally requires each worker to pay contributions at specified rates to the Disability Fund which is continuously appropriated for the purpose of providing disability benefits to workers who are unemployed due to injury or sickness not related to work. It provides that the rate of worker contributions for calendar years 1993 and 1994 shall not exceed 1.25%, except as provided.

This bill would instead provide for a worker contribution rate of not to exceed 1.3%. It would also authorize the Director of the Employment Development Department, at his or her discretion, to increase or decrease, by not to exceed 0.1%, the rate of worker contributions determined pursuant to the aforementioned provisions, up to a maximum worker contribution rate of 1.3%, if he or she determines the adjustment is necessary to reimburse the Disability Fund for disability benefits paid or estimated to be paid to individuals covered by these provisions or to prevent the accumulation of funds in excess of those needed to maintain an adequate fund balance. By providing for increases in worker contributions that are deposited in the Disability Fund, a continuously appropriated fund, this bill would make an appropriation.

Existing law provides that an individual shall be deemed disabled on any day in which, because of his or her physical or mental condition, he or she is unable to perform his or her regular or customary work.

This bill would provide that, for purposes of these provisions relating to eligibility for disability benefits, if an individual participates in a vocational rehabilitation plan, as specified, regular or customary work shall, upon completion of the plan, mean only that employment for which the individual has been retrained under the vocational rehabilitation plan.

Existing law provides for a waiver, under specified circumstances, of a waiting period during which time no disability payments are payable.

This bill would repeal the aforementioned provisions relating to the waiver of a waiting period for disability payments.

Existing law makes an individual ineligible for unemployment insurance disability benefits for any day of unemployment and disability the individual receives, or is entitled to receive, temporary disability indemnity or temporary disability benefits, as provided, in the form of cash payments.

This bill would additionally make an individual ineligible for unemployment disability insurance benefits for any day for which the individual receives, or is entitled to receive, permanent disability benefits for the same injury or illness under the workers' compensation law of this state, any other state, or the federal government.

Existing law provides a schedule of the weekly benefit amounts payable for unemployment disability benefits based on the amount of wages paid an individual for employment by employers in the highest calendar quarter and specifies that, for periods of disability commencing on or after January 1, 1991, the weekly benefit amount shall not exceed $343 or the maximum workers' compensation temporary disability indemnity weekly benefit amount, whichever is less.

This bill would, instead, decrease to $336 the maximum weekly benefit amount for periods of disability commencing on or after January 1, 1991.

Existing law requires that a claimant establish medical eligibility for each uninterrupted period of disability by filing a first claim for disability benefits, and for subsequent periods of uninterrupted disability after the period covered by the initial certificate or any preceding continued claim, by filing a continued claim for those benefits supported by the certificate of a treating physician or practitioner containing specified information. It requires that the first and any continuing claim of an individual who obtains care and

NOTE: Superior numbers appear as a separate section at the end of the digests.

treatment outside this state, be supported by a certificate of a treating physician or practitioner duly licensed or certified by the state or foreign country in which the claimant is receiving the care and treatment.

This bill would make various changes with respect to the information required to be included in the certificate of a treating physician or practitioner. It would also authorize the Employment Development Department, if a physician or practitioner licensed by and practicing in foreign country is under investigation by the department for filing false claims and the department does not have legal remedies to conduct a criminal investigation or prosecution in that country, to suspend the processing of all further certifications until the physician or practitioner fully cooperates and continues to cooperate with the investigation, and would prohibit a physician or practitioner licensed by and practicing in a foreign country who has been convicted of filing false claims with the department from filing a certificate in support of a claim for disability benefits for a period of 5 years.

Ch. 749 (SB 90) McCorquodale. Historical resources: California Heritage Fund.

Under existing law, the State Office of Historic Preservation is in the Department of Parks and Recreation and is under the direction of the State Historic Preservation Officer who is appointed by the Governor. Under existing law, the State Historical Resources Commission is vested with specified duties pertaining to the preservation of historical resources.

This bill would create the California Heritage Fund in the State Treasury and require funds received by the office for the purposes of historical resources preservation to be deposited in the fund. The money in the fund would be available, upon appropriation by the Legislature, except that funds from private sources would be continuously appropriated to the office, for historical resources preservation projects.

The bill would specify the powers and duties of the office, including authority to acquire real property, or any interest therein, and historical resources, or any interest therein, and to lease, rent, sell, exchange, or otherwise transfer any real property.

The bill would require the office to make grants, in accordance with prescribed requirements, to public agencies and nonprofit organizations for historical resource preservation projects, as prescribed, and for historical resource management projects, as specified. The bill would authorize the office to award grants for archaeological resource preservation projects and related purposes in accordance with prescribed requirements and to loan funds to nonprofit organizations for the temporary acquisition of an archaeological resource that will subsequently be acquired by a public entity.

The bill would prescribe related duties of the office and the commission and would prescribe criteria for projects to be funded pursuant to the bill.

Ch. 750 (SB 120) Kopp. Highways: lease of property.

Existing law authorizes the Department of Transportation to acquire real property for highway purposes, and prescribes the manner of disposing of property acquired but not needed for highway purposes. Existing law also authorizes the department to lease to public or private entities the use of areas above or below state highways (airspace), for any term not to exceed 99 years, and requires the department to deposit the proceeds in the State Highway Account in the State Transportation Fund.

This bill would authorize airspace under a freeway, or property acquired for highway purposes, in San Francisco, to be leased by the department to San Francisco or another political subdivision or a state agency, for purposes of an emergency shelter or feeding program, for $1 per month and payment of an annual administrative fee of $500, or more if the department determines a higher fee is necessary for the department's administrative costs. The bill would declare that the lease of airspace or real property for this use serves a public purpose.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 751 (SB 222) Boatwright. Telephones: automatic dialing devices: access to unlisted numbers.

Existing law, with specified exceptions, prohibits the operation of an automatic dialing-announcing device. Telephone calls that may be placed through those devices are

NOTE: Superior numbers appear as a separate section at the end of the digests.

required to meet certain requirements. Existing law also prohibits a telephone or telegraph corporation selling or licensing lists of residential subscribers from including the telephone number of any subscriber assigned an unpublished or unlisted access number, as defined, without his or her consent, except in specified instances.

This bill would exempt from these prohibitions the operation of an automatic dialing-announcing device by, or access to unlisted numbers by, public law enforcement agencies, public fire protection agencies, public health agencies, public environmental health agencies, city or county emergency services planning agencies, or private for-profit agencies operating under contract with, and at the direction of, one or more of these agencies in specified instances relating to the provision of public service, public health, or emergency information relating to an actual or threatened incident affecting residents in a defined area, as specified. The bill would require that any information or records provided to a private for-profit agency pursuant to the bill be held in confidence, as specified. The bill would provide that no telephone corporation, nor any official or employee thereof, shall be subject to criminal or civil liability for the release of customer information as authorized by the bill.

Ch. 752 (SB 261) Beverly. Ports: habitat mitigation.

Existing law requires any project, as defined, undertaken or approved by a state or local governmental entity, to be reviewed for impact on the environment and, under specified conditions, modified to consider the mitigation of adverse impacts on the environment.

This bill would require any public agency with authority to approve or deny port projects that result in the filling of subtidal habitats within the ocean ports of California or habitats in the water of inland ports of California to approve, as mitigation for those fill projects, any subtidal or in-water mitigation project proposed by the port authority that the public agency determines provides appropriate and adequate mitigation for the adverse impacts on the affected subtidal or in-water habitat in a manner consistent with other law that is then existing.

Ch. 753 (SB 303) Beverly. Coastal resources: filing fees.

Under existing law, the California Coastal Act of 1976, the California Coastal Commission is authorized to require a reasonable filing fee and the reimbursement of expenses for the processing of any application for a coastal development permit under the act.

This bill would, with respect to any appeal of an action taken by a local government pursuant to specified provisions, require the executive director of the commission, within 5 working days of receipt of an appeal from any person other than members of the commission or any public agency, to determine whether the appeal is patently frivolous. The bill would, if the executive director determines that an appeal is patently frivolous, prohibit the filing of the appeal until a filing fee in the amount of $300 has been deposited with the commission, but would require the fee to be refunded if the commission subsequently finds that the appeal raises a substantial issue.

Ch. 754 (SB 313) Lewis. Deeds of trust: mortgages.

Existing law sets forth the procedures for the substitution of trustees under a deed of trust upon real property or an estate for years therein.

This bill would make technical changes in those procedures by allowing reference in the substitution to the instrument number where the trust deed is recorded, as an alternative to the book and page where it is recorded, and by revising the procedure for substitution with respect to multiple deeds of trust, as specified. The latter change would only be operative until January 1, 1998, when existing law would be restored.

Existing law sets forth the procedures to be followed after a mortgage or the obligation secured by a deed of trust has been satisfied. Existing law, operative until January 1, 1995, specifies that the fee charged by the trustee, beneficiary, or mortgagee for services involved in a reconveyance, upon satisfaction of the obligation secured by a mortgage or deed of trust, is conclusively presumed to be reasonable if it does not exceed $65.

This bill would extend the operation of the provisions establishing that conclusive presumption until January 1, 1998.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would also incorporate further changes to Section 2934a of the Civil Code proposed by AB 1219, contingent upon its prior enactment.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 755 (SB 444) Rosenthal. Property.

Existing law regulates the amount and application of security deposits given by tenants to landlords, and provides that a landlord or a landlord's successors in interest may be subject to damages, not to exceed $200, in addition to actual damages, plus specified interest, for the bad faith claim or retention of the security deposit. Existing law requires a landlord to furnish a tenant an itemized statement indicating the security received and its disposition, and to return any remaining portion of the security, within 2 weeks after the tenant has vacated the premises.

This bill instead would provide that the bad faith claim or retention of the security deposit by a landlord or a landlord's successors in interest may subject that party to statutory damages of up to $600, in addition to actual damages. It would also permit the court to award damages whenever the facts warrant regardless of whether the injured party has specifically requested relief. The bill also would extend to 3 weeks the time for the landlord to furnish the statement regarding the security and to return any remaining portion.

(2) Existing law provides that a successful plaintiff in an unlawful detainer proceeding, upon a showing of malice, may be awarded either the damages and rent found due, or punitive damages of up to 3 times the amount of damages and rent found due.

This bill would revise this provision to provide instead that the plaintiff may be awarded statutory damages of up to $600, or actual damages, including rent found due, or both.

Ch. 756 (SB 471) Committee on Energy and Public Utilities. Energy resources: loans: residue conversion.

(1) Existing law, the Warren-Alquist State Energy Resources Conservation and Development Act, requires the State Energy Resources Conservation and Development Commission to prepare and submit a report annually to the Legislature containing a summary of the loans and grants made by the commission in the preceding fiscal year that exceeded $10,000.

This bill would repeal that requirement.

(2) Existing law, the State Agricultural and Forestry Residue Utilization Act of 1979, requires the commission, as lead agency, to implement a program to demonstrate residue conversion technologies at appropriate locations throughout the state. The act provides for the establishment of the State Agricultural and Forestry Residue Utilization Account in the General Fund and for the use of the money in the account, as specified.

This bill would repeal that act.

Ch. 757 (SB 619) Beverly. Transportation: carriers: weight restrictions.

(1) Existing law establishes a lien in favor of carriers for freightage, services rendered for the shipper or consignee, care of the property, and money advanced by the carrier at the request of the shipper or consignee to discharge a prior lien.

This bill, with certain exceptions, would establish a carrier's lien for certain penalties and costs incurred by the carrier and arising from the erroneous certification of gross cargo weight by the owner, beneficial owner, or person responsible for making the certification under specified federal law. The bill would require the court, upon request as specified, in any matter charging a vehicle weight violation, to make the person who issued such an incorrect weight verification a codefendant and would authorize the court to dismiss the charges against the original defendant if the court finds that the person issuing the incorrect weight verification misrepresented the gross cargo weight and that person is held solely responsible and found guilty. By changing the defendants, the bill would impose a state-mandated local program by changing the scope of an existing crime.

(2) Existing law requires persons who operate vehicles, or combinations of vehicles, in the transportation of hazardous material to carry in the vehicle while en route any

NOTE: Superior numbers appear as a separate section at the end of the digests.

shipping papers required to accompany the vehicle in accordance with Department of Motor Vehicles regulations, and to display certain paper upon demand of any member of the California Highway Patrol or certain city police officers.

This bill would additionally require persons operating vehicles, or combinations of vehicles, having a gross cargo weight of more than 10,000 pounds, to carry a federal certification of actual gross cargo and a reasonable description of the transported contents. The bill would further require the certificate be displayed upon demand and to be open to inspection to any member of the California Highway Patrol or certain city police officers. The bill would set forth a rebuttable presumption. The bill would require a vehicle operator to provide to a person engaged in loading a container or trailer with agricultural products the tare weight of a tractor, container, or trailer to be loaded under specified conditions. Because existing law makes it an infraction to violate, or fail to comply with the Vehicle Code, the bill would expand the scope of that crime, thereby imposing a state-mandated local program.

(3) Existing law makes it unlawful for a vehicle owner or any other person, to cause the operation of a vehicle upon a highway in any manner contrary to law, or for any owner to request, cause, or permit operation of the vehicle in violation of registration and equipment requirements or size, weight, and load restrictions or regulations or local ordinances adopted pursuant to the Vehicle Code.

This bill would clarify that the above provisions apply to any person, including any person who gives false or erroneous information in a written federal certification of gross weight. The bill would create a rebuttable presumption, and would impose a state-mandated local program by expanding the scope of an existing crime.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 758 (SB 792) Bergeson. Independent adoptions.

Existing law sets forth a comprehensive statutory scheme regulating independent adoptions. Chapter 1353 of the Statutes of 1992 substantially revised some of these provisions, effective January 1, 1994.

This bill would revise the provisions on independent adoptions to, among other things: revise the definition of adoption service provider; require the State Department of Social Services to report violations of adoption regulations to the appropriate licensing authority; provide that the adoption placement agreement and the waiver of the right to revoke consent of the birth parent, if signed by the birth parent outside California, shall be signed before the adoption service provider or a notary or other person authorized to perform notarial acts, as specified, instead of in the manner in which consents are taken in the other state; revise the requirement for a postplacement interview of a birth parent by the adoption service provider providing him or her with the advisement of rights, to instead require an adoption service provider to offer to provide that interview; require the department or delegated county adoption agency to interview a birth parent, upon request, within 10 days of receiving a copy of the petition and names and addresses of persons to be interviewed; and make other related, conforming, and clarifying changes.

The bill would revise provisions concerning unprofessional conduct of licensed clinical social workers and licensed clinical social worker corporations.

These changes would become operative on January 1, 1995, and the changes proposed by this bill and by Chapter 1353 of the Statutes of 1992 (as revised by the bill) would apply to adoption petitions filed on or after that date. Adoption petitions filed before, but pending on, January 1, 1995, would be governed by the law in effect on December 31, 1994.

The bill would delete a provision added by Chapter 1353 of the Statutes of 1992 that authorized the Board of Behavioral Science Examiners to certify specified clinical social workers as adoption service providers, as of January 1, 1994. The bill would also delete certain findings and declarations of the Legislature.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 759 (SB 876) Hart. Emergencies: nuclear radiation.

(1) Existing law, the Radiation Protection Act of 1988, is designed to carry out recommendations for revisions to state and local plans, concerning preparations for nuclear powerplant accidents, as made by the Task Force on California Nuclear Emergency Response. The act requires the State Department of Health Services to perform various functions in this respect. The act also imposes certain duties upon state and local law enforcement agencies, the Department of Transportation, local agencies sharing responsibility for emergency planning, and public or private utilities, in conjunction with the statewide implementation of radiation emergency response.

Existing law authorizes the expenditure of specified funds in the Nuclear Planning Assessment Special Account, upon appropriation by the Legislature, for purposes of the act, as specified. The allocation of the funds is repealed by its own provisions on January 1, 1994, unless a later enacted statute, that is chaptered on or before that date, is enacted.

This bill would make a statement of legislative intent and would repeal the requirement that the Office of Emergency Services investigate the consequences of a serious nuclear powerplant accident and revise the State Nuclear Powerplant Emergency Response Plan. The bill would delete the requirement that each utility operating a nuclear powerplant pay a specified amount to the Controller. The bill would revise the allocation of money from the special account, to allocate funds to the State Department of Health Services and to the office in specified accounts for specified purposes for the period from January 1, 1994, to July 1, 1999. That allocation formula would become operative on July 1, 1999.

The bill would repeal the Radiation Protection Act of 1988 and would enact the Radiation Protection Act of 1993. The bill would define terms, would require the office to be responsible for the coordination and integration of all emergency planning programs and response plans, and would specify the duties of the office with respect to implementing the State Nuclear Power Emergency Response Plan. The bill would require the department to have the lead technical role in the ingestion pathway and recovery and reentry phases of a nuclear powerplant emergency and to maintain communication plans and a radiation emergency screening team. The bill would require local governments to develop and maintain radiological emergency response and preparedness plans and to take specified actions during a nuclear powerplant emergency. The bill would also specify related duties with regard to utilities and other state agencies.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 760 (SB 902) Rogers. Public entity operation of employee health plan.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, with certain exceptions, requires licensure from the Commissioner of Corporations before any person may engage in the business of a plan, as defined, or receive advance or periodic consideration in connection with a plan from, or on behalf of, any persons.

Existing law provides an exception to the Knox-Keene Act licensure requirement for a health care service plan operated by any city, county, city and county, public entity, or political subdivision, that provides services only to its employees, their dependents, and retirees, but not the general public, provides funding for the program, and reimbursement on a fee-for-service basis. This exemption is in effect only until January 1, 1994, and existing law requires that the Senate Office of Research conduct a study and report to the Legislature no later than December 31, 1991, relating to this exemption.

The bill would extend the repeal date for this exemption to January 1, 1996.

This bill would also grant an exemption, until January 1, 1996, to a health care service plan operated by a joint labor management trust governed by a board of trustees if

NOTE: Superior numbers appear as a separate section at the end of the digests.

certain conditions apply, including a prescribed declaration under penalty of perjury, thereby creating a new crime which imposes a state-mandated local program. The bill would require the Assembly Office of Research to conduct a study and submit it to the Legislature no later than January 1, 1995, relating to this exemption.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 761 (SB 933) Kopp. Search warrants: motions to suppress evidence.

Under existing law, if a defendant's motion to return property or suppress evidence is made at a special hearing in the superior court and is granted, and if the people have additional evidence relating to the motion and not presented at the special hearing, the people have the right to show good cause at the trial why the prior ruling at the special hearing should not be binding, or they may seek appellate review, as provided, unless the court, prior to the time the review is sought, has dismissed the case, as provided.

This bill would additionally provide that if the case has been dismissed either by the court or by the people on their own motion, the people may file a new complaint or seek an indictment, and the ruling at the special hearing shall not be binding in any subsequent proceeding. However, it also would provide that if a defendant's motion to return property or suppress evidence in a felony matter has been granted twice, the people may not file a new complaint or seek an indictment in order to relitigate the motion or relitigate the matter de novo at a special hearing in the superior court, unless the people discover additional evidence relating to the motion that was not reasonably discoverable at the time of the 2nd suppression hearing.

Ch. 762 (SB 955) Presley. Corporations: securities.

Existing law, the Corporate Securities Act of 1968, provides that it is unlawful for any person to offer or sell in this state any security in an issuer transaction, as specified, unless the sale is qualified or exempted.

This bill would provide that the offer or sale of such a security in a manner that varies or differs from, exceeds the scope of, or fails to conform with either a material term or material condition of qualification of the offering as set forth in the permit or qualification order, or a material representation as to the manner of offering which is set forth in the application for qualification shall be an unqualified offer or sale. The bill would thus impose a state-mandated local program by expanding the scope of an existing crime.

Existing law provides for certain fines and penalties relative to willful violations of certain provisions of this act.

This bill would increase those fines, as specified.

The bill would state legislative intent.

This bill would incorporate additional changes in Section 25540 of the Corporations Code proposed by AB 1160, to be operative only if AB 1160 and this bill are both enacted and become effective on or before January 1, 1994, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 763 (SB 1051) McCorquodale. Pharmacy: oral consultation.

Existing law, the Pharmacy Law, prohibits a person from conducting a pharmacy in this state unless he or she has obtained a certificate, license permit, or registration from the California State Board of Pharmacy. The Pharmacy Law provides that any person who knowingly violates any of its provisions, when no other penalty is provided, is guilty of a misdemeanor.

The Pharmacy Law requires a pharmacist to inform a patient orally or in writing of

NOTE: Superior numbers appear as a separate section at the end of the digests.

the harmful effects of a drug dispensed by prescription if the drug poses a substantial risk to the person consuming the drug when taken in combination with alcohol or if the drug may impair a person's ability to drive a motor vehicle, whichever is applicable, and the board determines that the drug requires the warning.

The Pharmacy Law requires any pharmacy located outside this state that ships, mails, or delivers any controlled substances or dangerous drugs or devices into this state pursuant to a prescription to register with the board, disclose information regarding the pharmacy to the board, and meet other conditions. Under the Pharmacy Law, one of those conditions is the requirement that the pharmacy, within a prescribed time period, provide toll-free telephone service to facilitate communication between patients in this state and a pharmacist at the pharmacy who has access to the patient's records. It also requires the toll-free number to be disclosed on a label affixed to each container of drugs dispensed to patients in this state.

This bill would require the board to adopt specified regulations that apply the same requirements or standards for oral consultation to out-of-state pharmacies that ship, mail, or deliver controlled substances or dangerous drugs or devices to residents of this state, as are applied to in-state pharmacies when the pharmacy ships, mails, or delivers any controlled substances or dangerous drugs or devices to residents of this state.

Since violation of the provisions of this bill would be a misdemeanor under existing provisions of law, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 764 (SB 1059) Mello. Local agencies: development fees and conditions.

Existing law provides for the future growth of the state, including the development of state land use policies, and the exercise of planning and land use functions on the state and local level.

This bill would request the Governor to direct one or more state agencies to examine the extent to which local agencies establish procedures to comply with specified existing law procedures relating to development fees and conditions.

Ch. 765 (SB 1178) Kopp. Physicians and surgeons: dentists: refund of overpayments by patients.

Existing law regulates the practice of medicine and dentistry.

This bill would require a physician and surgeon and a dentist to refund any amount paid by a patient for services rendered that constitutes a duplicate payment, as prescribed. The bill would provide that violation of this provision constitutes unprofessional conduct.

Ch. 766 (SB 1220) Hill. State warrants.

(1) Existing law provides that whenever the Controller deems that it will increase the stability or the price of registered warrants to obtain, prior to or after sale, a legal opinion as to the validity of the warrants from attorneys other than the Attorney General, the Controller may obtain a legal opinion. Existing law requires that payment for these legal services be made only upon filing of a verified demand by the attorneys who have rendered the opinion and the approval of the Board of Control.

This bill would eliminate this requirement.

(2) Existing law provides that whenever the Controller draws a warrant upon the Treasurer payable out of the General Fund in an amount in excess of the balance remaining in the unapplied money in the General Fund, as specified, the Controller shall upon the same day present it to the Treasurer who shall endorse it in accordance with certain procedures, thereby creating registered warrants.

This bill would permit the Treasurer to delegate endorsement of these warrants to the Controller, and would require the Controller to supply the Treasurer with a daily list

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of the numbers of the warrants so registered.

This bill would also make other related changes with respect to warrants, as specified.

Ch. 767 (AB 1264) Martinez. Teacher credentialing.

Existing law authorizes the Commission on Teacher Credentialing to approve an institution of higher education whose teacher education program meets the standards the commission prescribes to recommend the issuance of credentials to persons who have successfully completed the teacher education program. Existing law also authorizes the commission to adopt an accreditation framework that may include general standards for the overall accreditation of education units and appropriate standards that apply to professional specialties. Existing law requires an applicant for a teaching or services credential to satisfy specified requirements.

This bill would require the commission to adopt standards and requirements that emphasize the preparation of prospective teachers and other certificated educators to serve as active partners with the parents and guardians of their pupils. The bill would also require that the standards address the roles of parents and guardians in the educational process, strategies for involving and working with parents and guardians, and the changing conditions of childhood and adolescence, including, but not limited to, the changing family structure and ethnic and cultural diversity.

This bill would specify that its provisions will not apply to any person holding a valid credential on December 31, 1993. This bill would also prohibit the commission from revoking or restricting a credential that was valid prior to the effective date of this bill unless certain specified requirements are met.

Ch. 768 (SB 252) Kopp. Arbitration.

(1) Existing law authorizes the court, upon motion, to enter a judgment in a civil action according to the stipulation of the parties, in writing or orally before the court.

This bill would revise that provision to refer to a writing signed by the parties outside the presence of the court or orally on the record before the court, for settlement of the case, and would authorize entry of a stipulated judgment, upon motion, based upon the terms of the settlement. The bill would also authorize the court to retain jurisdiction over the parties, at their request, as specified.

(2) Existing law specifies grounds upon which a party to judicial arbitration proceedings may request disqualification of the arbitrator. Under existing law, this request is required to be made within 5 days after the arbitrator is named.

This bill would require such an arbitrator to disqualify himself or herself on specified grounds and would permit a party to the arbitration to request this disqualification any time before conclusion of the arbitration.

(3) Existing law prohibits a plaintiff in a civil action from obtaining pretrial discovery of certain information relevant to a claim for exemplary damages, unless the court enters a prescribed order.

This bill would similarly require court approval for pretrial discovery in judicial arbitration proceedings.

(4) Existing law regulating arbitration specifies grounds for vacation of an arbitration award.

This bill would specify that certain grounds for disqualification of a judge also disqualify an arbitrator under a private arbitration agreement if a party makes a demand prior to the conclusion of the arbitration, unless otherwise agreed by the parties. Failure of an arbitrator subject to this disqualification to remove himself or herself would be grounds for vacation of the arbitration award. However, these provisions would not apply to arbitration under specified collective agreements.

Ch. 769 (SB 253) Kopp. Campaign statements.

Existing provisions of the Political Reform Act of 1974 provide that for a filer required to file a campaign statement in connection with the qualification of a measure which extends into two calendar years, the period over which a cumulative amount of contributions received or expenditures made is calculated shall end on the closing date for the campaign statement as required by a specified provision of law.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would instead provide that the period over which the cumulative amount is calculated shall end on December 31 of the second calendar year. It would repeal the existing provision setting the closing date for the campaign statement.

Existing provisions of the act define the term "jurisdiction" for purposes of the act. It provides that the jurisdiction of a member of a regional zone conservation commission shall be the permit area in which the commission has jurisdiction.

This bill would delete the definition of the jurisdiction of a member of a regional zone conservation commission.

Existing law specifies the dates by which semiannual campaign statements shall be filed by a committee primarily formed to support or oppose the qualification, passage, or defeat of a state ballot measure. It excepts from this requirement a committee during a semiannual period in which the committee is required to file preelection statements pursuant to specified provisions of law.

This bill would also except from the filing requirement a committee following the election at which the measure is voted upon, unless the committee makes contributions or expenditures to support or oppose the qualification or passage of another ballot measure.

Existing law prohibits a member of a state board or commission, among others, from accepting an honorarium if the member would be required to report the receipt of income or gifts on a statement of economic interests.

This bill would make a technical change in this provision.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a ⅔ vote.

Ch. 770 (SB 318) Rosenthal. Cellular radiotelephone service.

Existing law provides that a person who knowingly, willfully, and with intent to defraud a person providing telephone or telegraph services, avoids or attempts to avoid, or aids, abets, or causes another to avoid the lawful charge, in whole or in part for telephone or telegraph services, as specified, is guilty of a misdemeanor or felony, as prescribed.

This bill would impose a state-mandated local program by making any person who uses, or under specified conditions, possesses or manufactures a telecommunication device, as defined, intending to avoid the payment of any lawful charge for service to the device, guilty of a crime, and punishable as specified.

Under existing law, telephone services, including cellular radiotelephone service, is furnished by telephone corporations subject to the jurisdiction of the Public Utilities Commission.

This bill would require the commission to require cellular telephone service providers to report to the commission, within a year after enactment of the bill, and thereafter as specified by the commission, on activities associated with customer fraud. The bill would express legislative findings and declarations, as well as legislative intent, with regard to the issue of cellular fraud.

The bill would also require the commission to require cellular telephone service providers to provide their subscribers with a notice warning subscribers about problems associated with fraud, and informing them about ways to protect against fraud.

Because violations of orders, decisions, rules, or other requirements of the Public

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Utilities Commission are misdemeanors, this bill would also impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 771. (SB 326) Dills. Public Employees' Retirement System: state safety members.

The Public Employees' Retirement Law defines "state safety member" in terms of employees employed by specified state departments in specified job classifications and provides higher retirement benefit formulas and higher employer and employee contribution rates for state safety members than for state miscellaneous members.

This bill would include certain classifications of employees of the Department of Corrections, the Department of the Youth Authority, and the Office of Emergency Services within the state safety membership category, thereby increasing the amount of the state's continuously appropriated periodic employer contributions, which would constitute a General Fund appropriation.

This bill also would retitle job classifications and delete obsolete job classifications.

Ch. 772 (SB 332) Mello. Fish and game: cattle: violations: forfeitures.

(1) Under existing law, for specified violations of the Fish and Game Code, the court may order forfeiture of any device or apparatus that is used in committing the offense, and for other specified violations, the court is required to order the forfeiture of those implements.

This bill would, additionally, permit a court to order forfeiture of any device or apparatus used in a violation of the prohibition against the unlawful taking of specified mammals in violation of that code. The bill would require the court to consider specified factors in determining the extent of the forfeiture penalties authorized under the bill.

Other provisions of existing law would require forfeited items to be sold and the proceeds deposited in the Fish and Game Preservation Fund, which is continuously appropriated to the Department of Fish and Game to carry out the Fish and Game Code. By increasing the amount of funds to be deposited in that fund, the bill would make an appropriation.

(2) Under existing law, in any civil action for the wrongful taking, possessing, harboring, or transporting of cattle, for the driving of cattle off their usual range, or for the killing or slaughter of cattle without the consent of the owner or the person lawfully in possession of the cattle, the detriment caused by the offense is 4 times the value of the cattle at the time of the offense with interest, and the cost of the pursuit of the cattle.

This bill would authorize the judge before whom a person is tried for wrongful taking, possessing, killing, or slaughter of cattle without the consent of the owner or the person lawfully in possession of those cattle, upon conviction, to order the forfeiture of any device or apparatus that is designed to be, or is capable of being, used to commit the offense charged, and which was used in committing the offense charged.

The bill would also make those provisions applicable to juvenile actions, would require the devices or apparatus ordered forfeited to be sold, used, or destroyed by the Department of Food and Agriculture, and would make a plea of nolo contendere or no contest, or a forfeiture of bail, a conviction for those purposes. The bill would expressly not impair the right of the department to commence any other proceeding for forfeiture pursuant to any other law.

Existing law requires the receipts from the forfeiture collected by the department to be deposited in the Department of Food and Agriculture Fund and continuously appropriates those funds to the department to administer and enforce various provisions of law relating to cattle protection.

By increasing the amount of funds in a continuously appropriated fund, this bill would make an appropriation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 773 (SB 336) Boatwright. Regional water quality control boards: executive officers: conflict of interest.

Existing law prohibits a person from being a member of the State Water Resources Control Board or a regional water quality control board if he or she receives, or has received during the previous 2 years, a significant portion of his or her income directly or indirectly from any person subject to certain waste discharge requirements or from certain applicants for waste discharge requirements.

This bill would prohibit a regional board executive officer from making, participating in making, or using his or her official position to influence, any decision of the regional board or any decision made on behalf of the regional board, affecting any person or entity subject to waste discharge requirements if the executive officer has received, during the previous 2 years, 10% or more of his or her income, as defined, from that person or entity.

Ch. 774 (SB 382) Killea. Child development and preschool programs.

(1) Under existing law, the provisions governing child care and development and preschool programs will cease to be operative on June 30, 1994.

This bill would repeal that termination date and an obsolete provision. The bill would impose a state-mandated local program by extending indefinitely the period of time over which provisions of the programs that impose duties on school districts and other local agencies will apply.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 775 (SB 497) Kelley. Water quality.

Existing law creates the State Water Quality Control Fund and continuously appropriates the money in that fund to pay for water pollution control facilities and water reclamation facilities. Existing law creates the State Water Pollution Control Revolving Fund and continuously appropriates the money in that fund to provide loans to applicants to pay for water pollution control facilities and water reclamation facilities in accordance with the Federal Water Pollution Control Act.

This bill would require, upon the order of the State Water Resources Board, that the money in the State Water Quality Control Fund be transferred to the State Water Pollution Control Revolving Fund, thereby making an appropriation.

Ch. 776 (SB 506) Hayden. University of California: faculty.

Existing law delineates the missions and functions of the institutions of public higher education.

This bill would express legislative intent that instruction be continually improved, that courses required for normal progress to a baccalaureate degree be provided and given priority, and that the average teaching responsibilities of certain faculty be increased, as specified.

The bill would require the Legislative Analyst to review and analyze a specified report and to make an annual report to the Legislature, as specified.

Ch. 777 (SB 515) Lewis. Carriers: household goods.

Under existing law, it is unlawful for any household goods carrier to charge or collect any lesser rate than the minimum rate or greater rate than the maximum rate established by the commission under the Household Goods Carriers Act.

This bill would authorize any household goods carriers to charge or collect rates that are greater than the maximum rate established by the commission under that act, as

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified.

Because violation of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 778 (SB 526) Presley. Robert Presley Institute of Corrections Research and Training.

Existing law provides for the Robert Presley Institute of Corrections Research and Training within state government.

This bill would repeal these provisions and, instead, would provide for the Robert Presley Center of Crime and Justice Studies within the University of California to be maintained on the Riverside campus of the university, as specified.

The bill also would provide that these provisions would not apply to the University of California unless the regents adopt a resolution to make the provisions applicable.

Ch. 779 (SB 593) Alquist. California State University.

(1) Existing law authorizes the Trustees of the California State University to acquire real property and to construct and improve student health centers with funds derived from a fee imposed by the trustees to provide for the acquisition, construction, and improvement of the facilities. Except as otherwise provided, existing law requires that revenues received by the trustees be transmitted to the Treasurer and deposited in the State Treasury to the credit of the State University Facilities Revenue Fund. Under existing law, all revenues received by the trustees from the facilities fee, to the extent not pledged in connection with bonds or notes issued pursuant to the State University Revenue Bond Act of 1947, are appropriated without regard to fiscal years to the trustees for the acquisition, construction, and improvement of student health centers.

This bill would additionally authorize the trustees to deposit into the State University Facilities Revenue Fund any revenue from fees for health services and health facilities maintenance collected by the trustees in the 1993–94 and 1994–95 fiscal years. The bill would continuously appropriate that amount, without regard to fiscal years, to the trustees for the operation of student health centers.

(2) Existing law authorizes the head of a state agency, upon recommendation of the Attorney General or other attorney authorized to represent the state, to settle, adjust, or compromise any pending action if the Director of Finance certifies that a sufficient appropriation for the payment of claims exists. Existing law also requires the Controller to draw a warrant for the payment of any final judgment or settlement against the state if the Director of Finance certifies that a sufficient appropriation for the payment of the judgment or settlement exists.

This bill would, notwithstanding those provisions, authorize the trustees to settle, adjust, or compromise any pending action, without the need for a recommendation, certification, or approval from any other state officer or entity. The bill would require the Controller to draw a warrant for the payment of any settlement, adjustment, or compromise, or final judgment against the trustees if the trustees certify that a sufficient appropriation for the payment of the settlement, adjustment, or compromise, or final judgment exists.

(3) Existing law establishes a procedure for the payment of claims for money or damages against the state or for money or damages on express contract or for an injury for which the state is liable.

This bill would, notwithstanding those provisions, authorize the trustees to pay any claim for money or damages on express contract, or for an injury for which the trustees or their officers or employees are liable, without approval of the State Board of Control, as specified.

(4) Existing law authorizes any state agency or employee charged by law with the

NOTE: Superior numbers appear as a separate section at the end of the digests.

collection of any state taxes, licenses, fees, or money owing to the state for any reason to be discharged by the State Board of Control from accountability for the collection of the taxes, licenses, fees, or money if it is uncollectible or the amount does not justify the cost of collection. Under existing law, a discharge of a state agency or employee does not release any person from the payment of any tax, license, fee, or other money that is due and owing the state.

This bill would authorize the trustees to discharge from accountability the sum of $1,000 or less owing to the California State University if the trustees determine that the money is uncollectible or the amount does not justify the cost of collection. The bill would specify that a discharge of accountability by the trustees does not release any person from the payment of any money due the university.

(5) Existing law authorizes the trustees to approve any transfer of funds within functions for which funds are appropriated for the support of the California State University.

This bill would, instead, authorize the trustees, with regard to funds appropriated for the support of the California State University, to approve any transfer of funds between general fund appropriations, unless restricted by the Budget Act or any other act, and within and between any category designated in any schedule set forth for the appropriation.

(6) Existing law authorizes the trustees to approve the substitution of one item of equipment for another within budgetary functions and the use of savings in equipment allotments.

This bill would delete that authorization.

(7) Existing law authorizes the trustees to approve travel and the payment of allowances and expenses related to travel, moving, and the relocation of employees in accordance with the allowances established by the trustees and within funds appropriated for that purpose.

This bill would delete the requirement that the payment be within funds appropriated for that purpose.

(8) Existing law authorizes the trustees to establish new positions and make changes in existing positions and the position payroll roster. Existing law requires that all new positions and significant changes, as defined by the Department of Finance, in grade or class of existing positions be shown as administrative adjustments in the subsequent budgetary submissions and requires that they be subject to review during the legislative budget process.

This bill would delete these 2 requirements. The bill would require that any significant changes be reported to the Department of Finance, the Joint Legislative Budget Committee, and appropriate legislative fiscal committees on an annual basis.

(9) The bill would authorize the trustees to transfer money from one special fund to another special fund, as defined, or to the general fund, in order to meet the commitments of the California State University if the transferred moneys are returned, with interest, to the special fund of origin in time to fulfill the purposes of the special fund.

(10) The bill would require the California State University to adhere to uniform accounting standards in accordance with Generally Accepted Accounting Principles (GAAP) for institutions of higher education. The bill would require the university, in the 1993–94 fiscal year, on 5 campuses representing the diversity of the system in both size of student body and campus budget to have an independent audit of all funds performed and an independent audit report prepared. The bill would require the university to report to the Legislature and the Governor, following the completion of the independent audit, on the results of the audit and on the need to fund future audits through the Budget Act on an annual basis systemwide.

The bill would require that the independent audit report and other specified audits be submitted to the Joint Legislative Audit Committee, the Joint Legislative Budget Committee, the Department of Finance, the appropriate legislative fiscal and policy committees, the trustees, and each campus of the California State University. In addition, the bill would require that a copy of the audit reports be available for public inspection in the library of each campus. The bill would require that costs associated

NOTE: Superior numbers appear as a separate section at the end of the digests.

with the annual audits be funded from existing resources.

(11) Existing law provides for the formation of California State University auxiliary organizations.

This bill would provide that all bonds, notes, borrowings, or other evidences of indebtedness of an auxiliary organization and interest thereon or income therefrom are exempt from all taxation in the state other than estate and generation skipping transfer taxes.

(12) Existing law prohibits the encumbrance of moneys in any fund on and after July 1, 1994, which, by any statute other than a Budget Act, is continuously appropriated unless the Legislature, by statute, specifies that the moneys in the fund are appropriated for encumbrance, with specified exceptions.

This bill would make that prohibition operative July 1, 1993, instead of July 1, 1994. The bill would also make that prohibition inapplicable to moneys of the California State University that are in proprietary or fiduciary funds and that are continuously appropriated without regard to fiscal years.

Ch. 780 (SB 644) Presley. Victims of crime: mental health services.

(1) Existing law authorizes the State Board of Control to provide assistance to victims of crime for the pecuniary losses they suffer as a direct result of criminal acts.

This bill would permit a victim or a derivative victim, as defined, to file an application for assistance with the board within one year after either the date of the crime or the victim attains the age of 18 years, whichever is later, with that time period subject to extension by the board for up to 3 years. This bill would require the application for assistance to be verified under penalty of perjury by the victim or derivative victim. By expanding the scope of the existing crime of perjury, this bill would impose a state-mandated local program.

(2) Existing law provides that an emergency award shall be available for a victim if the victim incurs a loss of income or support or if the victim requires emergency medical treatment.

This bill would revise procedures for an applicant for an emergency award.

(3) Existing law requires the board to consider an application for benefits at a hearing. Existing law authorizes the board to exclude from the hearing all persons, except as specified, if the application under consideration is the result of either a crime against a minor or a crime of sexual assault.

This bill would expressly require the board to grant an applicant for benefits a hearing to contest a staff recommendation to deny an application for benefits or to deny an application to submit a late claim.

This bill would specify that the hearing is to be informal and need not be conducted according to technical evidentiary rules. The board would be authorized to rely on any relevant evidence, as described. This bill would include applications filed as a result of the crime of domestic violence among the circumstances in which the board may exclude persons from the hearing.

(4) Existing law permits a victim of crime to file with the board an application for assistance containing specified information, and board staff is required to review, approve, or deny applications in accordance with prescribed procedures.

This bill would require the board, notwithstanding the above procedures, to develop not later than April 1, 1994, a simplified and expedited procedure, as specified, for paying claims of a qualified provider, as defined, of mental health services to children and their families who qualify as victims of crime in need of services, and would authorize the expedited procedure to be instituted when certain conditions are met.

(5) Existing law requires the board, if the application for assistance is approved, to determine what type of state assistance will best aid the victim. Assistance, among other things, includes cash payment to a provider of psychological or psychiatric treatment or mental health counseling services. However, the total award to or on behalf of the victim shall not exceed $23,000, unless federal funds are available or the crime involved a sexual assault, as specified.

This bill would authorize the board to reimburse a victim or derivative victim for the expense of out-patient mental health counseling that is necessary as a direct result of the crime, as specified, and would authorize the board to reimburse, in an amount not

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

exceeding the rates or limitations established by the board, an individual who pays or assumes the obligation to pay medical or burial expenses incurred as a result of the crime. This bill would limit the authority of the board to make a cash payment to the victim for loss of wages and to a derivative victim, as described, for loss of support, as described.

This bill would limit, notwithstanding the above provisions, the amount of the total award to or on behalf of the victim for claims for mental health services filed on or after January 1, 1994, in excess of the authorized amount if the claim is based on dire or exceptional circumstances that require more extensive treatment, as approved by the board.

(6) Existing law authorizes the board to make additional payments to specified victims of crimes involving sexual assault and who were minors at the time the additional payments are made.

This bill would repeal this provision.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 781 (SB 693) Mello. Corrections.

Existing law requires the Director of Corrections to implement, in every state prison, literacy programs that are designed to ensure that, upon parole, inmates are able to achieve a 9th-grade reading level.

This bill, in addition, would require the Director of Corrections to implement a 2-year correctional education program commencing on January 1, 1994, and ending on December 31, 1995, that increases inmate assignments through adoption of a pilot project cell study program, as specified.

Existing law provides for the reduction in time served of an inmate in the custody of the Director of Corrections through worktime credits by performance in work, training, and education programs established by the Director of Corrections.

This bill would provide that an inmate participating in a cell study program, as proposed by this bill, shall demonstrate improved literacy based upon preprogram and postprogram testing as a condition to any reduction in the time served through worktime credit.

The bill also would provide that representatives from the Department of Corrections and the employee bargaining unit shall evaluate the pilot project and submit a report to the Legislature by July 30, 1996, as specified, and would authorize the department to initiate a system of negative timekeeping with regard to the participation of inmates in inmate work, training, and education assignments.

Ch. 782 (SB 939) Dills. Pawnbrokers.

(1) Existing law requires that whenever property in possession of a pawnbroker, secondhand dealer, or coin dealer is subject to a hold and the property is required by a peace officer in a criminal investigation, those persons, upon reasonable notice, shall produce the property, as specified.

This bill would remove the requirement that the property be subject to a hold.

(2) Existing law requires a loan contract made by a pawnbroker to set forth the period and date on which the loan is due and payable, and requires every pawnbroker to retain every article pledged for a period of 4 months after the date on which the loan became due or payable.

This bill would instead require the loan contract to provide a 4-month loan period, and to set forth the loan period and the date on which it is due and payable. It would specify a redemption notice to be contained in the contract. It would require a pawnbroker to retain a pledged article without regard to the date on which the loan became due and payable, for a 4-month period.

(3) Existing law provides for regulation of the activities and compensation of pawn-

NOTE: Superior numbers appear as a separate section at the end of the digests.

brokers, and sets a fee schedule relative to pledged items.

This bill would provide a comprehensive scheme for the licensure of pawnbrokers by a chief of police, sheriff, or police commissioner, as specified, under the jurisdiction of the Department of Justice. As a condition precedent to the issuance or renewal of a pawnbroker's license, a surety bond would be required to be filed in the sum of $20,000, as specified, for the benefit of pledgors. It would also require an applicant to have a tangible net worth of $100,000 in the form of liquid assets, not including real property, readily available for use in the business for which the application is made, or to post a nonrevocable surety bond in that amount, except as specified. A financial statement to that effect shall be made under penalty of perjury. It would also prohibit the transfer or assignment of a license.

The bill would impose a state-mandated local program by imposing new duties on local officials and by creating a new crime. A violation of other provisions of the bill would be a misdemeanor under existing law. In expanding the application of this crime, the bill would also impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 783 (SB 961) Morgan. Taxation: personal income tax: resident defined.

Existing law defines resident for personal income tax purposes to include individuals domiciled in this state who are outside the state for a temporary or transitory purpose.

This bill would provide that for any taxable year beginning on or after January 1, 1994, any individual absent from the state under an employment-related contract for an uninterrupted period of at least 18 consecutive months, except for returns not exceeding an aggregate of 45 days in a taxable year, would be considered outside the state for other than a temporary or transitory purpose. It would also provide that any spouse who is absent from the state for at least 18 consecutive months to accompany that individual would also be considered outside the state for other than a temporary or transitory purpose. This provision would not apply to any individual who has income from certain intangible property in excess of $200,000 in any taxable year in which the employment-related contract is in effect, or to any individual if the principal purpose of his or her absence from the state is to avoid any personal income tax.

This bill would take effect immediately as a tax levy.

Ch. 784 (SB 1094) Killea. Forestry: professional foresters.

Existing law provides for the registration of professional foresters and for certified specialists and qualified but exempt certificants to perform specified services pertaining to forestry.

This bill would redefine the term forestry for these purposes to, among other things, include the science and practice of managing forested landscapes, as defined, and the treatment of forest cover. The bill would prescribe related matters.

(2) Existing law establishes the qualifications for programs, by federal agencies, to certify persons considered as qualified but exempt from registration for activities on federal lands.

This bill would delete those provisions providing for qualified but exempt certificants.

(3) Under existing law, the licenses and specialty certificates expire on July 1 of each year.

This bill would make the licenses and specialty certificates valid for 2 years and would make related changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 785 (SB 1206) Hurtt. Diversion.

(1) Existing law provides procedures for the diversion of persons who have committed specified controlled substance offenses, specified misdemeanor domestic violence offenses, specified offenses filed as misdemeanors, and specified offenses of a parent or legal guardian with respect to his or her minor child, and provides procedures also for the diversion of developmentally disabled persons who have committed specified offenses. These procedures provide that upon the successful completion of a diversion program, the arrest upon which the diversion was based shall be deemed to have never occurred. The procedures also provide that the divertee may indicate in response to any question concerning his or her prior record that he or she was not arrested or diverted for the offense.

This bill would require that the divertee be advised that, regardless of his or her successful completion of diversion, the arrest upon which the diversion was based may be disclosed by the Department of Justice in response to any peace officer application request made within 5 years of the arrest, and that completion of the diversion program does not relieve him or her of the obligation to disclose the arrest in response to any direct question contained in any questionnaire or application for a position as a peace officer, as defined.

(2) Existing law provides that any criminal justice agency may release information concerning an arrest or detention of a peace officer which did not result in conviction, or information concerning referral to, or participation in, a postarrest diversion program to a government agency employer of that peace officer.

The bill would provide that any criminal justice agency may release, within 5 years of the arrest, information concerning an arrest or detention of a peace officer or applicant for a position as a peace officer, as defined, which did not result in conviction, or information concerning a referral to, and participation in, a postarrest diversion program to a government agency employer of that peace officer or applicant for a position as a peace officer, as defined. It also would provide that notwithstanding these provisions, a criminal justice agency shall not release information under specified circumstances.

(3) Existing law also provides, among other things, that any local criminal justice agency may release information concerning an arrest or detention of a peace officer which did not result in conviction, or information concerning a referral to, and participation in, any postarrest diversion program to a government agency employer of that peace officer.

This bill would provide that any local criminal justice agency may release, within 5 years of the arrest, information concerning an arrest or detention of a peace officer or applicant for a position as a peace officer, as defined, which did not result in conviction, or information concerning a referral to, and participation in, any postarrest diversion program to a government agency employer of that peace officer or applicant for a position as a peace officer, as defined. It also would provide that notwithstanding these provisions, a local criminal justice agency shall not release information under specified circumstances.

Ch. 786 (AB 48) Hauser. Sea grants.

Under existing law, the amount of $525,000 from specified tidelands oil and gas revenues received by the state is required to be deposited in the General Fund for each of the 1989–90, 1990–91, 1991–92, 1992–93, and 1993–94 fiscal years for distribution for public and private higher education for use as local matching funds for projects under the National Sea Grant College and Program Act of 1966, approved, upon the recommendation of a 16-member advisory panel, by the Secretary of the Resources Agency or his or her designee.

This bill would extend that program through the 1998–99 fiscal year and would specify related matters. The bill would also add to the advisory panel a representative of the Office of Oil Spill Prevention and Response in the Department of Fish and Game, designated by the administrator for oil spill response.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 787 (AB 148) Rainey. Crime: prisoners: private work furlough facilities.

Existing law provides that the work furlough administrator may, with the approval of the board of supervisors, enter into contracts with appropriate public or nonprofit private agencies or private entities to provide a facility and services for the housing, sustenance, counseling, supervision, and related services for inmates eligible for work furlough.

This bill would provide, instead, that the work furlough administrator may operate the work furlough facility or, with the approval of the board of supervisors, administer the work furlough facility pursuant to written contracts with appropriate public or private agencies or private entities. The bill would also provide that no agency or private entity may operate a work furlough program or facility without a written contract with the work furlough administrator. The bill would provide that the written contract shall include, among other provisions, a provision whereby the private agency or entity agrees to operate in compliance with a specified provision which provides that no eligible person shall be denied consideration for, or be removed from, participation in a work furlough program because of an inability to pay all or a portion of the program fees. The bill would further provide that the court may recommend or refer a person to the work furlough administrator for consideration for placement in the work furlough program or a particular work furlough facility, and that the recommendation or referral of the court shall be given great weight in the determination of acceptance or denial for placement in the work furlough program or a particular work furlough facility.

Existing law defines "local detention facility" to include any adult detention facility that holds local prisoners under contract on behalf of cities, counties, or cities and counties, and provides that nothing in this provision defining "local detention facility" shall be construed as affecting the establishment of private detention facilities.

This bill would revise the definition of "local detention facility" to provide that the term does not include any facility operated by the California Department of Corrections or any facility holding inmates pursuant to provisions relating to facilities for the incarceration of parole violators, community treatment programs, restitution centers, community correctional facilities, or work furlough programs, as specified. The bill further provides that nothing in this provision defining "local detention facility" shall be construed as affecting or authorizing the establishment of private detention facilities.

The bill would, furthermore, provide that (1) any privately operated local detention facility responsible for the custody and control of any local prisoner shall operate pursuant to a contract with the city, county, or city and county, as appropriate, which contract shall include, but not be limited to, a provision whereby the private agency or entity agrees to operate in compliance with all appropriate state and local building, zoning, health, safety, and fire statutes, ordinances, and regulations, and with the minimum jail standards established by regulations adopted by the Board of Corrections, as specified; (2) the private agency or entity shall select and train its personnel in accordance with selection and training requirements adopted by the Board of Corrections, as specified; and (3) the failure of a privately operated local detention facility to comply with the appropriate health, safety, and fire laws, or with the minimum jail standards adopted by the Board of Corrections, may constitute grounds for the termination of the contract. The bill would impose a state-mandated local program upon local governments by providing that upon the discovery of a failure of a privately operated local detention facility to comply with the above requirements, the local governmental entity shall notify the director of the facility that sanctions shall be applied or the contract shall be canceled if the specified deficiencies are not corrected within 60 days.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,-

NOTE: Superior numbers appear as a separate section at the end of the digests.

000, shall be made from the State Mandates Claims Fund.

Ch. 788 (AB 218) Farr. Mental health: financing.

Existing law provides for the allocation of sales tax revenues deposited into the Local Revenue Fund, a continuously appropriated fund, to local agencies for various human services programs.

This bill would require that net funds collected as a result of procedures developed for greater compliance with vehicle license fee laws be reported monthly to the Controller, and deposited in the State Treasury to the credit of the Vehicle License Fee Collection Account of the Local Revenue Fund, with all revenues in excess of $14,000,000 to be allocated as specified.

By providing for the deposit of funds into a continuously appropriated fund, the bill would constitute an appropriation.

Under existing law, the Short-Doyle Act provides for the organization and financing of community mental health services, through which the state and the counties participate in the funding and provision of community mental health services. Under existing law, counties are required to establish a community mental health service to cover the area of the county or counties, for the provision of mental health services by private agencies or facilities, and hospitals of the State Department of Mental Health, in accordance with the Short-Doyle plan. Providers of mental health services to persons who are eligible under the Medi-Cal program are entitled to reimbursement under the Medi-Cal program.

Existing law provides that community mental health centers, as defined, shall be considered to be licensed facilities for all purposes.

This bill would revise the definition of a community mental health center for that purpose.

Existing law requires the Director of Mental Health to establish the amount of reimbursement for services provided by county mental health programs to Medi-Cal eligible individuals, and imposes a limitation on the amount of the reimbursement.

This bill would eliminate that reimbursement amount limitation.

Existing law requires the State Department of Mental Health to develop a new ratesetting methodology for use in the Short-Doyle Medi-Cal system, and specifies certain elements that must be included in that methodology.

This bill would state the intent of the Legislature with respect to that requirement, and would require the State Department of Mental Health and the State Department of Health Services to jointly develop a Short-Doyle Medi-Cal reimbursement policy that maximizes federal funding and utilizes, as closely as practicable, medicare reimbursement principles for direct client services.

Existing law provides for the reimbursement of providers of services under the Medi-Cal program, and includes certain mental health services within the scope of those health services for which reimbursement may be made under the Medi-Cal program.

This bill would revise the schedule of reimbursable mental health services that may be provided under the Medi-Cal program.

Existing law requires that claims for reimbursement under the Medi-Cal program for mental health services provided under the Short-Doyle program shall be submitted not more than 2 months after the month in which the service was rendered.

This bill would exclude claims for services provided during the 1993–94 fiscal year from that requirement.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 789 (AB 229) Allen. Motorcycle classification: driving test.

Under existing law, a person seeking a driver's license classification to operate a 2-wheel motorcycle or a 2-wheel motor-driven cycle is required, generally, to pass a separate driving test.

This bill would authorize the Department of Motor Vehicles to accept a certificate of satisfactory completion of a specified novice motorcyclist training program in lieu of the driving test if the applicant has met the other examination requirements. The bill would additionally require the department to review and approve the written and driving test

NOTE: Superior numbers appear as a separate section at the end of the digests.

used by a program to determine whether the program may issue a certificate of completion.

The bill would require the Commissioner of the California Highway Patrol to adopt certain standards with regard to the novice rider training course.

Ch. 790 (AB 322) Bronshvag. Controller: California State University.

Existing law directs the Controller to develop and implement a uniform state payroll system for all state agencies except the University of California.

This bill would require the Trustees of the California State University, in conjunction with the Controller, to conduct an analysis of the various means of developing an electronic interface between the Human Resources Information Systems of the campuses of the university and the Controller's personnel and payroll system. The bill would require the trustees to report the results of this study and make recommendations for future action to the Legislature by January 1, 1995.

The bill would also require the trustees to implement, as specified, a pilot project on 3 campuses of the California State University to reduce the time required for university vendors to receive payment by authorizing the university to make payments directly to vendors. This bill would provide that the 3 campuses involved in the pilot project may draw from funds appropriated to the California State University, for use as a revolving fund, amounts necessary to make payments directly to vendors, and those payments shall be considered an authorized use. The bill would require the trustees to report the results of the pilot project and make recommendations for future action to the Legislature by January 1, 1997. The bill would require the California State University to reimburse the Controller's office for any net costs resulting from the pilot project.

Ch. 791 (AB 332) Hauser. Ocean resources.

Existing law requires the Ocean Resources Task Force to prepare a report and plan on ocean resources management activities and impacts, as specified, and requires submittal of the report and plan to the Governor and the Legislature by January 1, 1994.

This bill would extend the date for submission of the report and plan to July 1, 1994.

Ch. 792 (AB 462) Alpert. Child care: transportation facilities.

Existing law provides that space in a state-owned transit facility may be leased by competitive bid to a properly accredited child care operator in order to meet the child care needs of the employees and users of the transit facility. In order to receive state funds, neither the admission criteria nor the curriculum of the program may refer to religion.

This bill would add identical provisions for space at a publicly owned transportation facility, would delete the accreditation requirement and would require, instead, that the child care operator obtain licensure.

Under existing law child care needs of employees working in buildings of a specified size, either acquired or constructed by the state, shall be reviewed, in part, by the Governor's Advisory Committee on Child Development Programs.

This bill would require the Child Development Programs Advisory Committee to exercise the review function of employee needs.

Ch. 793 (AB 504) Quackenbush. Service of process.

(1) Existing law provides that a judgment creditor shall personally serve a copy of an order requiring a judgment debtor to appear before the court to furnish information to aid in the enforcement of the money judgment.

This bill would provide that the order must be served by personal delivery.

(2) Under existing law, any summons issued in a complaint for unlawful detainer must state that if one or more of the defendants is a spouse or dependent child of a member of the United States Military Reserve called to active duty in the Iraq-Kuwait crisis, those defendants may be entitled to a stay of eviction procedures.

This bill would repeal that provision and make a related statement of legislative intent.

(3) Existing law generally provides that any person who, without the written permission of the landowner, owner's agent, or person in lawful possession of the land, willfully enters any lands under cultivation or enclosed by a fence, belonging to, or occupied by,

NOTE: Superior numbers appear as a separate section at the end of the digests.

another, or who willfully enters upon uncultivated or enclosed lands where signs forbidding trespass are displayed, as specified, is guilty of an infraction or a misdemeanor.

Existing law makes an exception to this general rule by providing that every person who willfully commits a trespass by any of specified acts, including driving any vehicle, as defined, upon real property belonging to, or lawfully occupied by, another, as specified, is guilty of a misdemeanor.

This bill would, instead, make the latter trespass provision the general rule and the former provision an exception thereto. The bill would also exempt from the trespass provision cited above a process server, as specified, who is making a lawful service of process.

(4) This bill would incorporate additional changes in Section 602 of the Penal Code proposed by AB 284, to be operative only if AB 284 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 794 (AB 516) Statham. Guardianship and conservatorship.

(1) Under existing law, except as otherwise provided by statute, every person appointed as a guardian or conservator must, before letters are issued, give a bond approved by the court.

Existing law further provides that no action may be maintained against the sureties on the bond unless commenced within 4 years from the discharge or removal of the guardian or conservator or within 4 years from the date the order surcharging the guardian or conservator becomes final, whichever is later. Existing law also provides that although a final judgment or order in a matter relating to guardianship or conservatorship releases sureties from claims of the ward or conservatee, as specified, this rule is not applicable where the judgment or order is obtained by fraud, conspiracy, or misrepresentation contained in the petition or account or in the judgment or order as to any material fact.

This bill would provide that in any case, and notwithstanding the latter provision, no action may be maintained against the sureties on the bond unless commenced not later than 6 years from the date the judgment or order relating to guardianship or conservatorship becomes final.

(2) Existing law provides that where a judgment or order concerning the administration of a decedent's estate becomes final, that judgment or order releases the personal representative and the sureties from all claims of the heirs, devisees, and other persons affected thereby, based on any act or omission directly authorized, approved, or confirmed in the judgment or order.

This bill would provide an exception to that provision where the judgment or order is obtained by fraud, conspiracy, or misrepresentation as to any material fact.

(3) Existing law prohibits the maintenance of an action against the sureties on the bond of the personal representative unless that action is commenced not later than 4 years after the discharge of the personal representative.

This bill would revise that provision by specifically providing that an action may be brought against the sureties on the bond when a condition of the bond has been breached. The bill would also provide that, in any case, no action may be maintained against the sureties on a bond unless that action is commenced within six years from the date the judgment or order concerning the administration of the estate becomes final.

Ch. 795 (AB 555) O'Connell. Gifted and Talented Pupil Program.

Under existing law, the Legislature is required to conduct a comprehensive review of certain education programs. These programs, as presently maintained, cease to be operative on various specified dates, unless the Legislature enacts legislation providing otherwise. If the Legislature does not enact that legislation, funding for the general purpose of the program may continue after the termination date, but relevant statutes and regulations are not operative. Under current law, the provisions governing the Gifted and Talented Pupil Program cease to be operative June 30, 1994.

This bill would delete the section that establishes the June 30, 1994, inoperative date for the Gifted and Talented Pupil Program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 796 (AB 617) Richter. Department of Transportation: land use decisions: highway encroachments.

(1) Existing law contains provisions relating to the authority of cities and counties to make decisions concerning requests to subdivide property or to acquire a construction permit.

Existing law provides that one of the powers and duties of the Department of Transportation is to plan, design, construct, operate, and maintain transportation systems that the Legislature has made the department's responsibility.

This bill would require the department to adopt regulations, including the payment of a fee, prescribing procedures, as specified, for applicants to appeal to the Director of Transportation a recommendation by a director of a highway district to a local agency that certain conditions be imposed upon the local agency's approval of an application to subdivide property or to issue a construction permit.

(2) Under existing law, the department may issue permits authorizing encroachments, as defined, on highways. Existing law requires the department to either approve or deny an application for an encroachment permit within 60 days of receiving a completed application.

This bill would require the department to adopt regulations, including the payment of a fee, prescribing procedures for an applicant to appeal to the director a decision of the department, as specified.

Ch. 797 (AB 628) Frazee. Contractors: actions for compensation: licensure.

Existing law, with certain exceptions, provides that a person who engages in the business or acts in a capacity for which a contractor's license is required may not bring an action for compensation for performance of any act or contract for which the license is required without alleging and proving that he or she was licensed during the time of the performance of the act or contract. Existing law also provides that if licensure or proper licensure is controverted, then proof of licensure shall be made by production of a verified certificate of licensure from the Contractors' State License Board which establishes that the individual or entity bringing the action was duly licensed during the performance of any act or contract covered by the action.

This bill would provide that any person or entity controverting licensure or proper licensure is not required to produce a verified certificate. The bill would also provide that when licensure or proper licensure is controverted, the burden of proof to establish licensure or proper licensure is on the licensee.

Ch. 798 (AB 909) T. Friedman. Coastal resources: ex parte communications.

(1) Existing law, the California Coastal Act of 1976, requires any person who applies to the California Coastal Commission for approval of a development permit to provide the commission with the names and addresses of all persons who, for compensation, will be communicating with the commission or commission staff on the applicant's behalf.

This bill would also require the applicant to provide the commission with the names and addresses of all such persons who will be communicating on behalf of the applicant's business partners.

(2) The act defines the term "ex parte communication" and excludes specified communications from that definition.

This bill would also exclude from the definition of ex parte communication any communication that takes place on the record during an official proceeding of a state, regional, or local agency that involves a member of the commission who also serves as an official of that agency, any communication between a member of the commission, with regard to any action of another state agency or of a regional or local agency of which the member is an official, and any other official or employee of that agency, including any person who is acting as an attorney for the agency, any communication between a nonvoting commission member and a staff member of a state agency where both the commission member and the staff member are acting in an official capacity, and any communication to a nonvoting commission member relating to an action pending before the commission, where the nonvoting commission member does not participate in that action, either through written or verbal communication, on or off the record, with

NOTE: Superior numbers appear as a separate section at the end of the digests.

other members of the commission.

(3) The act prohibits a commission member or any interested person from conducting an ex parte communication unless the commission member notifies the interested party that a full report of the ex parte communication will be entered in the commission's official record.

This bill would delete the requirement that a commission member so notify the interested party.

(4) The act prohibits a commission member or alternate from making, participating in making, or in any other way attempting to use his or her official position to influence a commission decision about which the member or alternate has knowingly had an ex parte communication and which has not been reported as required by the act.

This bill would, in addition to any other applicable penalty, subject any commission member who engages in that conduct to a civil fine, not to exceed $7,500. The bill would prescribe related matters and make related, clarifying changes.

Ch. 799 (AB 1198) Bates. Out-of-Home Placement Program.

(1) Existing law, the California Community Care Facilities Act, provides for the licensure and regulation of community care facilities by the State Department of Social Services.

This bill would require the department to license community care facilities participating in transitional housing placement programs. The bill would require the department to develop programs in 3 counties to provide supervised apartment living services for persons who, with certain exceptions, are at least 17 years of age, and less than 18 years of age, and are in out-of-home placement under the supervision of the county department of social services or the county probation department, and who are participating in an independent living program. This bill would only allow participation in the program by persons with the permission of the independent living program of the county and of the county department of social services.

This bill would require that the costs for all participants be no greater than the aggregate costs of care and supervision for those children had they not participated.

This bill would require the department, during the 1994–95 fiscal year, to approve 3 private, nonprofit, or county operated programs that meet prescribed criteria, and would require the department prior to approval to approve a plan submitted by the county's independent living program that includes assurances that the county's independent living program shall participate actively in the screening of candidates, and assist in supervision. This bill would authorize the department to license programs in additional counties in subsequent years if the department determines the initial 3 programs have had successful outcomes. This bill would require the department to provide information to the Legislature upon request regarding the program.

Existing law prescribes certain settings in which a child must be placed in order to be eligible for the Aid to Families with Dependent Children-Foster Care program.

This bill would include transitional housing placement facilities, as defined, within these eligible placements.

This bill would require the department to adopt a ratesetting system and regulations to implement this program.

This bill would repeal these provisions on January 1, 2000.

(2) Existing law requires the State Department of Social Services to implement intensive foster care programs for designated categories of children in certain circumstances in specified counties, upon concurrence of the board of supervisors of each participating county, for the provision of intensive foster care services, until June 30, 1995.

This bill would extend the duration of this program until January 1, 1999, would modify eligibility for placement under this program, would increase foster care payment rates for children placed under the program, and would make changes in provisions relating to the length of placements under the program.

Ch. 800 (AB 1234) Lee. Transportation: public transit: operating costs.

Under the Mills-Alquist-Deddeh Act, in order to be eligible for funds, an operator is required to maintain a specified ratio of fare revenues to operating cost, as defined.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, for purposes of those provisions, exclude from operating cost, until January 1, 1997, the additional operating costs to a transit operator of providing comparable complementary paratransit service required to meet the mandates imposed by specified regulations adopted pursuant to the federal Americans with Disabilities Act of 1990.

Ch. 801 (AB 1316) Richter. Yuba County Water Agency.

The Yuba County Water Agency Act authorizes the Yuba County Water Agency to sell water to its member units in accordance with prescribed provisions. The act requires the agency, by resolution of the board, to announce its intent to enter into a contract with a district lying partly or entirely outside the boundaries of Yuba County, and to provide that, through the contract, the district becomes a member unit. The act requires the board of directors to suspend or abandon, as specified, proceedings related to a contract, if a majority of the registered voters in affected districts file written protests with the board.

This bill would authorize the agency to enter into long-term contracts for the sale of water, for use outside the boundaries of the agency by other than a member unit, if certain requirements are met. The bill would delete the resolution requirement. The bill would change the protest procedure by instead requiring the board of directors to suspend or abandon, as specified, proceedings related to a contract, if a majority of the registered voters in Yuba County file written protests with the board. The bill would prohibit the implementation of any long-term contracts, as described, until the state board makes a specified determination.

Ch. 802 (AB 1409) Morrow. Automatic garage door openers.

Existing law prohibits the manufacture for sale in this state, or the purchase, selling, offering for sale, or installation of any residential automatic garage door opener, as defined, that does not have an automatic reverse safety device that complies with prescribed standards developed by Underwriters' Laboratory, Inc.

Existing law prohibits installation of any replacement garage door in a manner that connects the replacement door to a residential garage door opener that is not in compliance with the Underwriters' Laboratory, Inc. standards, regardless of the date of manufacture.

Existing law requires any person hired to service or repair any residential automatic garage opener to, upon completion of the service or repair, determine whether the opener reverses upon contact with a rigid 2-inch high obstacle placed on the surface below the door, and to attach a prescribed warning on any opener that does not so reverse.

This bill would, instead, prohibit installation of any replacement garage door in a manner that connects the replacement door to a residential garage door opener that is not in compliance with the test prescribed for servicing or repairing existing openers.

Existing law makes violation of certain of these provisions subject to prescribed civil penalties.

This bill would, also, make subject to these civil penalties any violation of the prohibition against installation of replacement garage doors connected to a residential garage door opener that is not in compliance with the prescribed service and repair test.

Ch. 803 (AB 1421) Umberg. Telephone solicitations.

Existing law regulates the solicitation of sales by telephonic sellers, as defined, and specifies those representations by a telephonic seller to a prospective purchaser that constitute a telephone solicitation for purposes of this law. Existing law exempts from the definition of a telephonic seller, any person soliciting the sale of a seller assisted marketing plan, as defined, who has filed with the Secretary of State certain documents.

This bill would instead require that these documents be filed with the Attorney General.

Existing law also exempts from the definition of a telephonic seller, an issuer or subsidiary of an issuer that has a class of securities subject to specified provisions of the Securities Exchange Act of 1934 and which is either registered or exempt from registra-

NOTE: Superior numbers appear as a separate section at the end of the digests.

tion, as specified.

This bill would also require, for this exemption to be applicable, that the issuer or subsidiary of an issuer have a security listed on a national securities exchange or designated as a national market system security on an interdealer quotation system, as specified, if the exchange or interdealer quotation system has been certified by the Commissioner of Corporations.

Existing law requires every telephonic seller to maintain a bond in the amount of $50,000.

This bill would raise the amount of the bond to $100,000. This bill would require a telephonic seller to provide additional specified information in its registration and would prohibit a salesperson from using the same name as used by any other salesperson soliciting for the same telephonic seller.

Existing law provides that each telephonic seller shall provide specified information to a prospective purchaser at the time of solicitation and prior to the consummation of any sales transaction.

This bill would require the telephonic seller to provide additional information in certain circumstances to a prospective purchaser, as specified.

Existing law requires a telephonic seller, at least 10 days prior to the inception of any promotion offering a premium valued at $500 or more, to notify the Attorney General in writing of the details of the promotion and the premium, and to maintain an additional bond for the total value of the premium.

This bill would impose specified requirements on the award of the premiums and would permit the Attorney General or other parties to enforce the bond, as specified.

Existing law makes willful violation of provisions relating to telephonic sellers a crime.

This bill would require telephonic sellers soliciting prospective purchasers to comply with additional disclosure requirements, thereby imposing a state-mandated local program by expanding the scope of an existing crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 804 (AB 1432) Mountjoy. Fish and Game Commission: meetings: fees: contracts.

(1) Existing law requires the Fish and Game Commission to annually hold meetings in Sacramento, San Diego, Los Angeles, Long Beach, Redding, or Red Bluff in February, March, and April, as specified, for the purpose of adopting regulations relating to mammals and to annually hold meetings in June and August for the purpose of adopting regulations relating to game birds.

This bill would require the commission to hold meetings in even-numbered years for those purposes, alternating locations between sites, as specified, for the meetings relating to mammals. The bill would make conforming changes.

(2) Existing law also requires the commission to provide copies of its fish, mammal, and bird regulations to specified local entities and authorizes the commission and the Department of Fish and Game to do anything that is deemed necessary and proper to publicize and distribute copies of regulations so that persons likely to be affected will be informed of them. The existing State Contract Act generally provides that contracts entered into by state agencies are subject to approval by the Department of General Services. Existing law also requires, generally, that all state printing be performed by the Office of State Printing.

This bill would authorize the commission and the department to contract with private entities to print regulations and other regulatory and public information and would exempt contracts for which state funds are not expended from specified provisions of the State Contract Act. The bill would also require advertisements in material printed pursuant to that provision to meet specified criteria.

(3) Existing law establishes the fees for license tags for the taking of deer, permits a person who possesses a deer tag to procure additional deer tags for the taking of addition-

NOTE: Superior numbers appear as a separate section at the end of the digests.

al deer during the current season for specified fees, and requires those fees to be adjusted by a specified factor. Existing law continuously appropriates a specified portion of those fees to the department for the purpose of implementing specified deer herd management plans.

This bill would delete obsolete provisions in that law. The bill would limit to one the number of additional deer tags that may be procured. The bill would also continuously appropriate 54% of the revenue derived from the fees to the department for the purpose of implementing those specified deer herd management plans.

(4) The bill would also require the commission to direct the department to authorize the sale, as specified, of 10 deer license tags for the purpose of raising funds for programs and projects to benefit deer, to be sold at auction to residents or nonresidents. Those tags would not be subject to the fees described in (3) above. The revenue from the sale of the tags would be continuously appropriated to the department to be used for the Deer Herd Management Plan Implementation Program.

Ch. 805 (AB 1599) O'Connell. California Strawberry Commission.

(1) Existing law provides for various commissions to promote the marketing and production of an agricultural commodity.

This bill would create the California Strawberry Commission in state government with a prescribed membership and would specify the powers, duties, and responsibilities of the commission in carrying out the bill. The commission would be authorized to carry out programs of production, promotion, marketing, and research relating to strawberries. The bill would authorize the commission to levy an assessment, not to exceed a specified amount, according to the marketing year, on producers, shippers, and processors of strawberries, and would authorize the expenditure of those funds for purposes of carrying out the bill.

The bill, except as necessary to conduct an election, would not become operative until the producers, processors, and shippers of strawberries, by referendum, vote in favor of the bill, as prescribed. The bill would also provide for the suspension of the operation of its provisions and for concluding the operations of the commission. The bill would make rendering or furnishing false reports, secreting, destroying, or altering records, failing to furnish a report, or failing or refusing to furnish to the commission information concerning the name and address of persons from whom strawberries are received, a misdemeanor, thereby imposing a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

The bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 806 (AB 1613) Murray. Plant quarantine and pest control.

(1) Under existing law, the Department of Food and Agriculture enforces the provisions of law relating to plant quarantine and pest control. A violation of these provisions is, under existing law, a misdemeanor.

This bill would require proof of ownership, as specified, to be made available for inspection upon request of the Director of Food and Agriculture, a county agricultural commissioner, or any peace officer upon probable cause to believe a person buying, selling, or transporting a shipment of plant material intended to be marketed for commercial purposes is in violation of the provisions relating to plant quarantine and pest control. The bill would make it unlawful for any person to knowingly falsify, misrepresent, or cause to be falsified or misrepresented, any information in a record intended to show proof of ownership. Since, under existing law, a violation of this provision would be a misdemeanor, this bill would impose a state-mandated local program by creating a new crime. This bill would also permit the director or county agricultural commissioner to compile information and make any necessary investigations relative to suspected violations of the provisions of the Food and Agricultural Code relating to plant quaran-

NOTE: Superior numbers appear as a separate section at the end of the digests.

tine and pest control, and to call and conduct a hearing in furtherance of the investigation.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 807 (AB 1692) Margolin. Workers' compensation.

Existing law provides for a specified annual assessment to fund increased investigation and prosecution of workers' compensation fraud. Existing law also provides that for each fiscal year, until January 1, 1994, the total amount of revenues derived from the assessment together with amounts collected pursuant to specified fines shall not be less than $3,000,000.

This bill would delete the repealer, thereby continuing that provision indefinitely.

Existing law, until January 1, 1995, prohibits an insurer from issuing, renewing, or continuing in force any workers' compensation insurance at premium rates that are less than the rates approved or issued by the Insurance Commissioner. Existing law authorizes a pilot project to authorize an employer participating in the pilot project to contract with a licensed health care service plan to be the exclusive provider of medical, surgical, and hospital treatment for occupational and nonoccupational injuries and illnesses incurred by its employees. Existing law also provides that, for purposes of this pilot project, health care service plan includes health care service plans and disability insurers that offer a managed care product within a pilot project county and workers' compensation insurers, as specified, that offer a managed care product within a pilot project county. Existing law requires the Administrative Director of the Division of Workers' Compensation to make a report on the project within 3 months after completion of the pilot project, and provides that the cost of the report shall be borne by participating employers.

This bill would provide that, notwithstanding the requirement for minimum rates for workers' compensation insurance, the commissioner may allow a workers' compensation insurer to issue, renew, or continue in force a policy at less than the minimum rates, in connection with an insurer's participation in that pilot project. This bill would instead require a preliminary report at the completion of the second year of the pilot project and a final report within one year after completion of the pilot project. This bill would also require additional topics to be reviewed in the report. This bill would permit the cost of the report to also be borne, if available, by other external sources outside the General Fund. This bill would additionally include as health care service plans, multiemployer, collectively bargained employee welfare benefit plans, as specified, that offer a managed care product within a pilot project county, and welfare benefit plans sponsored by recognized exclusive bargaining agents for state employees. This bill would make related changes.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 808 (AB 2354) Hauser. State contracts: cost limits.

(1) Existing law prescribes the means by which state agencies may contract for the completion of construction and other projects, usually by the solicitation of bids, under the State Contract Act. Existing law sets a cost limit that the projects must exceed in order to be covered by the public contract provisions, and provides for adjustments to the cost limit as required.

This bill would set a total cost limit of $100,000 for calendar year 1993.

(2) Existing law allows certain departments within the state to authorize an agency within the department's jurisdiction to carry out a particular project directly, without the services of the department, as long as the estimated project cost does not exceed $250,000.

This bill would adjust the cost limit to $500,000 for departments within the Resources Agency.

(3) Existing law allows certain department directors to authorize a district or agency

NOTE: Superior numbers appear as a separate section at the end of the digests.

to carry out work not exceeding specified amounts by day labor, if the director believes it is in the best interests of the state to do so.

This bill would adjust the maximum day labor amount to $100,000 for the Department of Forestry and Fire Protection.

Ch. 809 (SB 654) Bergeson. Teacher credentialing: streamlining of credentialing requirements.

(1) Existing law restricts the dissemination of personal information by the Commission on Teacher Credentialing.

This bill would authorize the Commission on Teacher Credentialing to disclose certain information related to credentials, certificates, permits, and other documents issued by the commission, and to receive from and transmit to the agency, as defined, that submits an application on behalf of an applicant the information set forth in the application.

(2) Existing law authorizes the commission to issue certificates that authorize the holder to provide specified service to limited-English-proficient pupils and sets forth the minimum requirements for the certificate. Existing law also authorizes the commission to grant supplementary authorizations to credential holders, as specified.

This bill would authorize the commission to issue that certificate pursuant to alternative requirements established by the commission and to issue that certificate as a supplementary authorization, as specified.

(3) Existing law requires the commission to administer and develop an examination for teachers on which they can demonstrate competence to teach limited-English-proficient pupils, as specified. Existing law also requires that certain examinations for bilingual cross-cultural certificates and language development specialist certificates continue to be administered until June 30, 1995, and that certain credential holders be exempted from the examination.

This bill would require the commission to continue to administer specified prior law relating to bilingual cross-cultural certificates and language development specialist certificates and examinations for those certificates, until the commission develops and begins to administer the examination on which teachers can demonstrate competence to teach limited-English-proficient pupils.

Existing law authorizes the Commission on Teacher Credentialing to issue multiple subject teaching credentials and single subject teaching credentials with authorizations to teach particular subjects.

This bill would require that the commission issue single subject teaching credentials in the subjects of agriculture, art, business, English, foreign language, with authorization to teach specific languages, health science, home economics, industrial and technology education, mathematics, music, physical education, science, and social science. The bill would subsume subjects commonly taught in departmentalized classes under one of the above-stated credential categories. The bill would require the commission to continue to issue single subject teaching credentials in the categories available on December 31, 1993, to applicants who were in the process of preparing to earn those credentials on that date.

This bill would authorize the commission to issue a multiple or single subject teaching credential with a specified concentration in a particular subject based upon the applicant's preparation in an important subject of the school curriculum and would require the commission to establish and maintain any necessary standards for the concentration, including the authorization for teaching credentials with concentrations.

(4) Existing law requires the commission to regularly assess and report to the Legislature on the adequacy of the existing subject matter categories.

This bill would repeal that provision and would require the commission to review and assess the adequacy and relevance of the revised subjects of teaching credentials and report its findings and recommendations to the Legislature.

(5) Existing law requires that subject matter examinations authorizing single subject instruction be required for all subjects taught in schools under specified categories.

This bill would instead require the commission to adopt examinations and assessments to verify the subject matter knowledge and competence of candidates for the single subject teaching credentials.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(6) Existing law requires a general subject matter examination authorizing multiple subjects to include an examination of the candidate's knowledge of, among other areas or topics, humanities.

This bill would eliminate the requirement that the examination include an examination of the candidate's knowledge of humanities.

(7) Existing law allows the reading requirement for teaching credentials to be satisfied by completion of a commission-approved program of study not to exceed 4 semester units or passage of a commission-approved reading examination.

This bill would change "reading" to "language-development" and would instead allow that requirement to be satisfied by a commission-approved program of study or passage of an appropriate examination or assessment adopted for that purpose by the commission.

(8) Existing law requires the commission to evaluate any subject matter program offered by an accredited institution in satisfaction of requirements relating to single subject credentials.

This bill would require the evaluation to be based upon standards of program quality and effectiveness and to be consistent with the specification of the assessment of subject matter knowledge and competence adopted by the commission.

(9) Existing law authorizes a California state university to approve a "diversified" or "liberal arts" degree, provided certain requirements are met.

This bill would repeal that provision.

(10) Existing law provides for the waiver of the general subject matter knowledge examination as required for the services credential with a specialization in administrative services for applicants who meet the "diversified" degree requirements.

This bill would repeal that provision.

(11) Existing law provides for the waiver of the examination required for the services credential with a specialization in pupil personnel services for applicants who have completed a commission-approved program in pupil personnel services.

This bill would repeal that provision.

(12) This bill would exempt from the requirements of the bill certain credentialed persons who were authorized to perform teaching services as of December 31, 1993.

Ch. 810 (AB 1717) Johnson. Insurance.

Existing law requires foreign and domestic insurers to be admitted to transact insurance.

This bill would authorize an admitted insurer organized under the laws of another state to become a domestic insurer by designating its principal place of business at a place in this state.

The bill would authorize a domestic insurer, upon the prior approval of the Insurance Commissioner, to transfer its domicile to any other state in which it is admitted to transact the business of insurance, as specified.

The bill would provide that the certificate of authority, agent and broker appointments and licenses, rates, and other items that the commissioner allows in his or her discretion, that are in existence at the time any insurer licensed to transact the business of insurance in this state transfers its corporate domicile to this or any other state by merger, consolidation, or any other lawful method shall continue in full force and effect upon that transfer if the insurer remains duly qualified to transact the business of insurance in this state. It would also provide that all outstanding policies of any transferring insurer shall remain in full force and effect and need not be endorsed as to the new name of the company or its new location unless so ordered by the commissioner. The bill would make related changes.

This bill would also require an insurer seeking qualification to pay a filing fee of $4,250.

Ch. 811 (SB 219) Hill. Gasoline: Reid vapor pressure.

Existing law requires the Department of Food and Agriculture to adopt specifications for gasoline or automotive spark-ignition engine fuels, which are required to meet the latest standards of the American Society for Testing and Materials (ASTM) standard specification for gasoline or automotive spark-ignition engine fuel, except that no specifi-

NOTE: Superior numbers appear as a separate section at the end of the digests.

cation may be less than required by California law. Existing law requires the State Air Resources Board to establish maximum standards for the volatility of gasoline at or below 9 pounds per square inch Reid vapor pressure, as specified, except that blends of 10% ethyl alcohol (ethanol) are exempt from that requirement unless the blend exceeds standards of the state board, and, on and after October 1, 1993, those blends are exempt unless the state board makes specified findings.

This bill would provide that any blend of gasoline and ethanol that complies with a specified California regulation relating to oxygenated gasoline may exceed the Reid vapor pressure limits of ASTM D-4814 for the area and season in which the blend is sold at retail by not more than 6.9 kilopascals (1.0 pounds per square inch), except the total Reid vapor pressure shall not exceed 103 kilopascals (15 pounds per square inch).

This bill would incorporate additional changes in Section 13440 of the Business and Professions Code, proposed by AB 2154, to be operative only if AB 2154 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last. These changes would become operative on the operative date of AB 2154.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 812 (SB 850) McCorquodale. Environmental quality: agricultural lands.

Existing law provides for the preservation of agricultural land under the Williamson Act, and requires the Director of Conservation to map agricultural land.

Existing law, the California Environmental Quality Act, requires a lead agency, as defined, to prepare an environmental impact report on a project which it intends to carry out or approve that may have a significant effect on the environment, as defined. The act requires the preparation and adoption of state guidelines to implement the act.

This bill would require the Resources Agency, in consultation with the Office of Planning and Research, to develop an amendment to the state guidelines to provide lead agencies an optional methodology to ensure that significant effects on the environment of agricultural land conversions are quantitatively and consistently considered in the environmental review process.

The bill would require the Department of Conservation, in consultation with the United States Department of Agriculture, the Resources Agency, and the Office of Planning and Research, to develop a state model land evaluation and site assessment system, and would make legislative findings and declarations in that connection. The bill would authorize the agency to adopt that model system as the amendment to the state guidelines.

The bill would appropriate $15,000 from the California Environmental License Plate Fund to the department for a grant to the Yolo County Farm Bureau for purposes of a farmlands and open-space mapping program.

Ch. 813 (SB 1151) Committee on Toxics and Public Safety Management. Medical waste transporters: generators: fees.

(1) Existing law, the Medical Waste Management Act, authorizes a local enforcement agency to implement a medical waste management program with specified components to regulate the generation, hauling, treatment, containment, and storage of medical waste. The act defines terms and imposes criminal penalties upon persons who violate the act's requirements. The fees collected by the State Department of Health Services under the act are required to be deposited in the Medical Waste Management Fund, which is available to the department, upon appropriation by the Legislature, for purposes of the act.

The act requires all medical waste transported to offsite medical waste treatment facilities to be transported by registered hazardous waste transporters, except as specified. A hazardous waste transporter is required to maintain a completed tracking document of all medical waste removed for treatment or disposal.

This bill would require each registered hazardous waste transporter and each provider of medical waste mail backsystems to submit specified information to the department. The bill would impose a state-mandated local program, since a violation of these requirements would be a crime.

(2) Under existing law, each small quantity generator, as defined, using onsite steam

NOTE: Superior numbers appear as a separate section at the end of the digests.

sterilization, incineration, or microwave technology to treat medical waste is required to register with the enforcement agency.

This bill would, on and after January 1, 1994, require the department, when it is the enforcement agency, to impose and collect an annual medical waste generator fee in the amount of $25 on small quantity generators of medical waste, except for those small quantity generators required to be so registered.

(3) Existing law prohibits a person from storing biohazardous or sharps waste onsite above a specified temperature for more than 7 days, except as specified.

This bill would impose that prohibition on persons generating 20 or more pounds of medical waste per month and would prohibit a person generating less than 20 pounds of biohazardous waste per month from containing or storing biohazardous waste above that temperature for more than 30 days.

(4) Existing law specifies the fee to be charged by the State Department of Health Services for large quantity generators, transfer stations, offsite medical waste treatment facility permits, and the evaluation of alternative treatment technologies.

This bill would increase those fees, as specified, and would additionally require the department to charge a specified fee for evaluation and approval of the use of a medical waste mail back system, which sends medical waste generated in this state to an out-of-state facility for treatment and disposal.

(5) The bill would make additional related changes to the act.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 814 (SB 486) Rosenthal. Motor vehicles: warranty adjustment programs.

Existing law provides various remedies for the breach of consumer warranties.

This bill would impose specified notice requirements on motor vehicle manufacturers and new motor vehicle dealers with respect to motor vehicle warranty adjustment programs, as defined, and would authorize a consumer to file a claim for reimbursement for expenses incurred prior to knowledge of an adjustment program, as specified.

Existing law prohibits or restricts, with specified exceptions, the disclosure of residence and mailing addresses to any person. Existing law provides an exception, however, for vehicle manufacturers who request and use the information for certain purposes, including warranty.

This bill would revise that exception to specifically include the above warranty provisions.

Ch. 815 (SB 1238) Kelley. Hospital districts: board of directors.

(1) Existing law, the Local Hospital District Law, authorizes prescribed hospital districts to increase the number of members of the board of directors from 5 to 7 after a petition is filed with the board and an election is held. The act also requires the additional vacancies on the board created by expansion to be elected at large.

Existing law authorizes the registered voters residing in the district to petition to require the board to, by resolution, divide the hospital district into 7 proposed zones. It also authorizes the board to, by resolution, make this division without a petition. Existing law requires the board, in establishing these zones, to provide for representation in accordance with population and geographic factors of the entire area of the district. It also requires the board to number the zones consecutively, hold a hearing on the resolution, make a final determination, and prepare a measure on the establishment of the zones to be voted upon at the next general hospital district election or special election, as prescribed.

Existing law requires one member of the board of directors to be elected by the electors of each zone and, upon formation of the district, requires the appointment of one member from each zone.

This bill would require the board, in establishing these zones, to also provide for demographic factors. It would delete the final determination and election requirements,

NOTE: Superior numbers appear as a separate section at the end of the digests.

and would instead authorize the voters of the district to petition for a referendum, in a prescribed manner, on this board resolution. It would require the board to prepare a measure on the resolution to be voted upon at the next general hospital district election or special election if a valid and timely petition is filed. It would also create new election related duties upon a county, thereby imposing a state-mandated local program.

(2) Existing law requires, as a condition to holding membership on the board, a person to reside in the zone from where he or she is elected for 90 days preceding the election.

This bill would instead require 30 days.

(3) Existing law requires that if at the expiration of the terms of office of the members of a 5-member board, in office at the time of the division into zones, 3 members are to be elected, these 3 members shall be elected from odd-numbered zones, and if 2 members are to be elected, these 2 members shall be elected from even-numbered zones.

This bill would delete these requirements.

(4) Existing law requires the board of directors to be responsible for the operation and management of the hospitals owned or leased by a district, and authorizes the board of directors to prescribe the terms upon which patients shall be admitted. Existing law prohibits the hospitals from contracting to provide care for indigent county patients at below the cost for care, and requires that rates be established that will permit the hospital to operate on a self-supporting basis.

This bill would instead prohibit the district from contracting to care for indigent county patients at below cost. This bill would also authorize the hospital administrator to establish a task force to assist the administrator in operating the district's facilities in accordance with certain procedures, unless prohibited from doing so by action of the board of directors.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 816 (AB 1769) Margolin. Dry cell batteries.

(1) Existing law requires the California Integrated Waste Management Board to conduct a study regarding the recycling and disposal of household batteries.

This bill would repeal those provisions and would prohibit, on and after January 1, 1995, the sale or offering for sale of any rechargeable consumer product, as defined, unless the product meets specified requirements relating to labeling of the rechargeable battery, battery pack, or product, and removal of the battery or battery pack. The bill would authorize the manufacturer or a manufacturer trade organization to apply to the board for, and the board to grant, a 2-year exemption or extension of the exemption. The bill would prohibit any political subdivision of the state from enacting or enforcing a nonidentical environmental labeling requirement.

Since a violation of certain of the bill's requirements would be a misdemeanor, the bill would impose a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 817 (AB 1787) Bowen. Household batteries.

(1) Existing law requires the California Integrated Waste Management Board to conduct a study regarding the recycling or disposal of household batteries.

This bill would prohibit the sale of dry cell, alkaline manganese, and zinc-carbon batteries containing mercury, and mercuric oxide button cell batteries, as specified. Those provisions would not become operative unless AB 1769 is enacted and takes effect on or before January 1, 1994. Since violation of the prohibition would be a misdemeanor, the bill would impose a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 818 (SB 691) Kopp. Law enforcement: immigration matters.

Existing state law makes no express provision concerning the cooperation of law enforcement officers with federal government agents on immigration matters.

This bill would provide that no local law shall prohibit a peace officer or custodial officer from identifying and reporting to the United States Immigration and Naturalization Service any person, pursuant to federal law or regulation, who is arrested and booked for the alleged commission of a felony and who is reasonably suspected to have violated the civil provisions of the federal immigration laws.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 819 (SB 733) Russell. Employment: unemployment insurance: employment services.

Existing law does not provide procedures for government and private agencies providing employment services to verify the legal status or work authorization of every individual prior to providing services to these individuals.

This bill would require each state or local government agency or community action agency, or any private organization contracting with a state or local government agency, that provides employment services, including, but not limited to, job training, retraining, or placement, to verify an individual's legal status or authorization to work prior to providing services to that individual in accordance with procedures established under federal law. It would specify that, for purposes of these provisions, proof of legal status or authorization to work includes, but is not limited to, a social security card, immigration visa, birth certificate, passport, or other valid document providing evidence of legal residence or authorization to work in the United States. It would also specify that those provisions requiring verification of an individual's legal status or authorization to work prior to providing employment services shall not apply to employment services offered by school districts under secondary school and adult education programs.

This bill would require each state or local government agency or community action agency, or any private organization contracting with a state or local government agency, that provides employment services, including, but not limited to, job training, retraining, or placement, pursuant to these provisions, to post in a prominent location in the workplace a notice stating that only citizens or those persons legally authorized to work in the United States will be permitted to use the agency's or organization's employment services that are funded by the federal or state government, as specified.

This bill would provide that if any provision of the bill or the application thereof to any person or circumstances is held invalid, that invalidity shall not affect other provisions or applications of the bill that can be given effect without the invalid provision or application.

Ch. 820 (SB 976) Alquist. Drivers' licenses: identification cards: citizenship or legal residence.

(1) Existing law requires every application for a driver's license or identification card to contain specified information.

This bill would require the Department of Motor Vehicles to require every applicant for an original driver's license or identification card to submit satisfactory proof that the applicant's presence in the United States is authorized under federal law. The department would be prohibited from issuing an original driver's license or identification card to any person who does not submit satisfactory proof that the applicant's presence in the United States is authorized under federal law.

The bill would require the department to adopt regulations to carry out these requirements, including procedures for (1) verifying that an applicant's presence in the United States is authorized, (2) the issuance of temporary licenses pending that verification, and (3) appeals hearings from denials of licenses. The bill would require the department, not later than March 1, 1994, to report to the Legislature on the feasibility of entering into agreements with the Immigration and Naturalization Service to electronically verify the alien registration number of applicants. The bill would require the department each year to submit a specified supplemental budget report to the Governor and the Legislature.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law prohibits the operation of a motor vehicle by an unlicensed person.

This bill would prohibit a peace officer from detaining or arresting a person solely on the belief that the person is an unlicensed driver, unless the officer has reasonable cause to believe that the driver is under the age of 16 years.

(3) Existing law makes it a misdemeanor for any person to, among other things, knowingly make any false statement in any document filed with the department.

This bill would make it a misdemeanor for any person to knowingly assist in obtaining a driver's license or identification card for any person whose presence in the United States is not authorized under federal law.

Because the bill would create a new crime, it would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 821 (SB 1131) Leslie. Crimes: Medi-Cal eligibility.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law makes any person receiving Medi-Cal benefits for which he or she was not eligible on the basis of false declarations as to his or her eligibility or any person making false declarations as to eligibility in behalf of any other person receiving Medi-Cal benefits for which the other person was not eligible, guilty of either a misdemeanor or a felony, depending upon the amount paid in his or her behalf for which he or she was not eligible.

This bill would make any person who intentionally solicits another to violate the above prohibitions, guilty of a misdemeanor for the first offense or a misdemeanor or a felony for subsequent offenses.

By imposing additional duties upon local law enforcement agencies through the creation of additional crimes, the bill would constitute a state-mandated local program.

This bill would incorporate additional changes to Section 653f of the Penal Code proposed by AB 1957, and AB 6 and SB 60 to become operative only if all 4 bills, or a combination, are enacted and become effective on or before January 1, 1994, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 822 (AB 1716) Peace. Public Utilities Commission.

Existing law provides for the composition, organization, and functions of the Public Utilities Commission.

This bill would require the commission to adopt procedures on the disqualification of administrative law judges due to bias or prejudice similar to those of other state agencies and superior courts, as specified, and also would require the commission to submit a report to the Legislature on or before February 28, 1994, on the adopted procedures.

Ch. 823 (AB 1664) Napolitano. Crime: impersonating a public officer.

Existing law provides that any person who falsely represents himself or herself to be a public officer, investigator, inspector, deputy, or clerk in any state department and who, in that assumed character, does any of specified acts, is guilty of a misdemeanor and upon conviction shall be punished by imprisonment in a county jail not exceeding 6 months, or by a fine not exceeding $2,500, or by both that fine and imprisonment.

This bill would provide that a person who falsely represents himself or herself to be a public officer, investigator, or inspector in any state department and who, in that assumed character, does any of specified acts shall, instead, be punished by imprisonment in a county jail not exceeding one year, by a fine not exceeding $2,500, or by both that fine and imprisonment, or by imprisonment in the state prison. By increasing the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

punishment for this crime, the bill would establish a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 824 (AB 2399) Burton. Parole: Uniform Act for Out-of-State Probationer or Parolee Supervision.

Existing law authorizes the Governor to enter into a compact on behalf of this state with any of the United States to permit any person convicted of an offense within the state and placed on probation or released on parole to reside in any other state party to the compact while on probation or parole.

This bill would provide that no person shall be released on parole to reside in any receiving state if the parolee is subject to an unsatisfied order of restitution to a victim within the sending state, except as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 825 (SB 1226) Dills. State employees.

Existing law provides that if any provision of a memorandum of understanding entered into between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of a memorandum of understanding entered into with State Bargaining Unit 14, California State Employees' Association, and would specify that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the memorandum of understanding is approved by the Legislature in legislation other than the annual Budget Act.

Ch. 826 (AB 1737) B. Friedman. Taxation: payments: electronic funds transfer.

The existing Personal Income Tax Law and the Bank and Corporation Tax Law require that any return, declaration, statement, or other document required to be made that is filed using electronic technology shall be accompanied by a signed transmittal document, as specified.

This bill would instead provide that any return, declaration, statement, or other document that is filed using electronic technology is not complete, and therefore not filed, unless an electronic filing declaration is signed by the taxpayer, as specified.

The bill would make other conforming changes to the existing Personal Income Tax Law and Bank and Corporation Tax Law.

Ch. 827 (AB 1460) Moore. Employment discrimination: family care leave.

Existing law makes it an unlawful employment practice for any employer, as defined, who employs 50 or more employees, to refuse to grant a request by any employee with more than one year of continuous service with the employer, and who is eligible for other benefits, to take up to a total of 4 months in a 24-month period for an unpaid family care leave, as defined, in connection with the birth or adoption of, or the serious illness of, a child of the employee, or to care for a parent or a spouse who has a serious health care condition.

This bill would change the term "family care leave" to "family care and medical leave," and would, in addition to other types of leave authorized under existing law, entitle an eligible employee to take leave because of a serious health condition of the employee that makes the employee unable to perform the functions of his or her position, other than leave taken for disability on account of pregnancy, childbirth, or related medical conditions.

The bill would change the limit on family care and medical leave from 4 months in a 24-month period to 12 workweeks in a 12-month period, in conformity with the federal

NOTE: Superior numbers appear as a separate section at the end of the digests.

Family and Medical Leave Act of 1993 (FMLA).

The bill would make the family care and medical leave provisions applicable to the state and any political or civil subdivision of the state and cities, as well as employers of 50 or more employees.

The bill would provide that, notwithstanding a provision of existing law, it is not an unlawful employment practice for an employer to refuse to grant a request for family care and medical leave by an employee if the employer employs less than 50 employees within 75 miles of the worksite where that employee is employed.

Existing law provides that an employer may require that a request for leave to care for a child, a spouse, or a parent who has a serious health condition be supported by a certification, as specified, issued by a health care provider, as defined.

This bill would expand the definition of a "health care provider." It would also permit an employer to require that an employee's request for leave because of his or her own serious health condition be supported by a certification issued by a health care provider. The bill would also permit requests for 2nd and 3rd opinions regarding the validity of the certification with respect to the employee's own serious health condition. The bill would permit an employer, as a condition of an employee's return from leave taken because of the employee's own serious health condition, to require the employee to obtain certification from his or her health care provider that the employee is able to resume work.

Under existing law, an employee taking family care leave may elect, or the employer may require the employee, to substitute vacation leave or other accrued time off, as specified, during the period of leave, but prohibits an employee from using accrued sick leave, unless mutually agreed to by the employer and the employee.

This bill would allow an employee to elect, or an employer to require an employee, to substitute accrued sick leave during the period of leave if the leave is taken for the employee's own serious health condition.

Existing law provides that any employee taking family care leave continues to be eligible to participate in certain employee benefit plans during the period of the leave to the same extent and under the same conditions as apply to an unpaid leave taken for any purpose other than family care, but permits an employer, in the absence of these conditions, to require the employee to pay health and welfare benefit plan premiums at the group rate during the period of leave.

This bill would require an employer, during any period that an eligible employee takes family care and medical leave, or takes leave that qualifies as leave under the FMLA, to maintain and pay for the employee's medical coverage under a group health plan, as specified. It would permit an employer to recover the premium that the employer paid for maintaining coverage for the employee under the group health plan under certain conditions.

Under existing law, an employer is not required to grant an employee family care leave to care for a child if it would allow the employee and the other parent of the child family care leave totaling more than the amount of leave allowed any one employee, as specified, or if the child's other parent is also taking family care leave or is unemployed.

This bill would limit that provision to cases in which both parents of the child are employed by the same employer and the leave is in connection with the birth, adoption, or foster care of a child.

Existing law permits an employer to refuse to grant a request for family care leave if necessary to prevent undue hardship to the employer's operations.

This bill would eliminate that provision.

Existing law permits an employer to refuse to grant a request for family care leave by a salaried employee who is either one of the 5 highest paid employees or among the top 10% of employees in terms of gross salary, as specified.

This bill would instead permit, in conformity with the FMLA, an employer to refuse to reinstate to the same or a comparable position a salaried employee returning from family care and medical leave who is among the highest paid 10% of employees employed within 75 miles of the employee's worksite, under certain specified conditions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specify that the leave taken under this act shall run concurrently with leave taken under the FMLA, except for any leave taken under the FMLA for disability on account of pregnancy, childbirth, or related medical conditions. It would further specify that the aggregate amount of leave taken under this act or the FMLA, or both, except for leave taken for disability on account of pregnancy, childbirth, or related medical conditions, shall not exceed 12 workweeks in a 12-month period.

This bill would also authorize the Fair Employment and Housing Commission, in adopting regulations with respect to family care and medical leave rights provided for in these provisions, to establish different minimum duration requirements for different types of leave, but would require the commission to permit leave to be taken in specified increments for recurring medical treatment.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 828 (AB 2196) Costa. Presidential primary.

Existing law provides that the statewide direct primary election shall be held on the 1st Tuesday after the 1st Monday in June of each even-numbered year. It requires that the presidential primary, held in any year which is evenly divisible by the number 4, be consolidated with the direct primary.

This bill would instead require that the presidential primary be held on the 4th Tuesday in March in any year which is evenly divisible by the number 4. It would also require that, in any year which is evenly divisible by the number 4, the statewide direct primary be held on the 4th Tuesday in March and that it be consolidated with the presidential primary held that year.

Existing law requires that a general municipal election be held on the 2nd Tuesday in April of even-numbered years, except as otherwise authorized under specific provisions of law.

This bill would, alternatively, authorize a general municipal election to be held on the first Tuesday after the first Monday in March of odd-numbered years. It would require that if an election is held in March of an odd-numbered year pursuant to this bill, no term of office shall be increased or decreased by more than 12 months, as specified.

This bill would also make various changes in deadlines for duties to be performed by candidates, county clerks, and the Secretary of State, necessitated by the change in those dates.

This bill would provide that, if SB 535 is chaptered and takes effect, any sections of SB 535 that repeal Sections 6264 and 6363 of the Elections Code shall prevail over changes to those sections by this bill, and the changes by this bill shall not become operative.

This bill would further provide that, if AB 1173 is chaptered and takes effect, any section of AB 1173 that amends Section 6342 of the Elections Code shall prevail over changes to that section by this bill, and the changes by this bill shall not become operative.

The provisions of this bill, except the provisions governing general municipal elections, would remain in effect only until January 1, 1998, and as of that date are repealed, unless a later enacted statute, which is enacted before January 1, 1998, deletes or extends that date.

Ch. 829 (SB 88) McCorquodale. Developmentally disabled persons: medical care: respite workers.

Existing law authorizes the provision of certain respite services for developmentally disabled persons who are clients of regional centers and who receive services at home.

Existing law also authorizes, until January 1, 1994, persons who provide respite care services to developmentally disabled persons who are clients of a regional center to perform gastrostomy care and feeding of those clients, after successful completion of training pursuant to a protocol, approved by the State Department of Developmental Services, that meets specified requirements.

This bill would extend indefinitely the authority to provide these gastrostomy care and feeding services.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 830 (SB 137) Wright. Discrimination.

Existing provisions of the Unruh Civil Rights Act, with certain exceptions, prohibit various forms of arbitrary discrimination by business establishments. The Unruh Civil Rights Act specifies that it shall not be construed to require any construction, alteration, repair, or modification of any sort whatsoever to any new or existing structure, or to change in any way the authority of the State Architect to require construction, alteration, repair, or modifications that the State Architect otherwise possesses pursuant to other provisions of the law. One of the exceptions to the prohibitions of this act is for senior housing meeting prescribed criteria. Existing provisions of the California Fair Employment and Housing Act also prohibit certain acts of housing discrimination on various bases, including familial status, but do not specifically exempt senior housing meeting the criteria for an exemption under the Unruh Civil Rights Act.

This bill would specify that the senior housing exemption to the Unruh Civil Rights Act does not apply to senior housing as to which specified state law has been preempted by the federal Fair Housing Amendments Act of 1988. The bill would also exempt defined "housing for older persons" from the housing discrimination provisions on familial status in the California Fair Employment and Housing Act.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 831 (SB 221) Marks. Historical properties: Mills Act contracts: taxation.

Existing law authorizes a city, county, or city and county to create historic zones and to contract with the owner of qualified historical properties within these zones to restrict the use of the property for a minimum period of 10 years, and establishes methods for the property tax valuation of any property so restricted both during the contract period and upon notice of nonrenewal of that contract.

This bill would impose additional requirements with respect to the contents of a contract restricting the use of a historical property, and would provide for written notice of that contract to a specified state agency. It would modify the valuation of historical properties for property tax purposes upon notice of nonrenewal of the contract, and would provide that the taxable value generally determined during the contract period shall not exceed the amount that would be determined in the absence of restrictions. It would also clarify, for purposes of property tax valuation, those properties included as historical properties. By imposing additional duties on local officials with respect to the cancellation of existing contracts, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would take effect immediately as a tax levy.

Ch. 832 (SB 306) Lockyer. Family law: visitation: grandparents.

Existing law provides that in a proceeding for dissolution of marriage, for nullity of marriage, or for legal separation of the parties, the court may award reasonable visitation rights to a grandparent of a minor child of a party to the marriage if the court determines visitation is in the best interest of the child, as specified. Under existing law, if a grandparent has applied for an order of visitation rights pursuant to these provisions, the court is required to set the matter for mediation.

This bill instead would provide that a grandparent may be granted reasonable visitation rights in any child custody proceeding.

This bill would further authorize a grandparent to petition the court for visitation rights at any time, but would provide that such a petition may not be filed while the natural or adoptive parents are married, unless specified circumstances exist. The bill

NOTE: Superior numbers appear as a separate section at the end of the digests.

would authorize the court to grant visitation if it finds that there is a preexisting relationship between the grandparent and grandchild, as specified, and if the court balances the interest of the child in the visitation against the right of the parents to exercise their parental authority. The bill would create specified rebuttable presumptions against visitation if both parents agree the grandparent should not have visitation, or if the custodial parent objects to visitation.

The bill would also require the petitioner to give notice of the petition to certain persons in these cases, and would authorize a court to order a parent, or a grandparent who has been granted visitation, to pay to the other specified support costs.

Ch. 833 (SB 311) Morgan. School facilities.

Existing law authorizes the State Allocation Board to apportion funding for school facilities projects, for designated construction purposes, on behalf of applicant school districts under the Leroy F. Greene State School Building Lease-Purchase Law of 1976.

Existing law also provides for regulations for the procedure in which an existing building may be converted into a school building.

This bill would clarify that a school district that is eligible for project funding for school construction under the Leroy F. Greene State School Building Lease-Purchase Law of 1976 may apply that funding to the acquisition and conversion to school facility purposes of existing building space.

This bill would also require the State Allocation Board in conjunction with the office of the State Architect to advise all school districts of the existence of the procedure for reconstructing existing commercial buildings for school facility purposes and assist in the interpretation and implementation of the applicable regulations.

Ch. 834 (SB 372) Leslie. Education: Butte Community College District: transportation service fees: schoolbus: definition.

(1) Existing law authorizes the governing board of a community college district to charge fees for transportation services to all students and all employees of a campus of the district upon a favorable vote of a majority of the students and a majority of the employees of that campus. Existing law limits the imposition of that fee to a 2-year period following the election.

This bill would, instead, with respect to Butte Community College only, permit the imposition of the fee for the period of time determined by the governing board of the district following the election. The bill would also require the governing board of the district to provide every voter, at the time of the election, with notice that the approved fee shall continue in effect until terminated by the governing board.

(2) Existing law defines a schoolbus as any motor vehicle designed, used, or maintained for the transportation of any school pupil at or below the 12th-grade level to or from a public or private school or to or from public or private school activities, with specified exceptions.

This bill would exempt from that definition a motor vehicle operated for the purpose of transporting any pupil to or from Butte Community College or to or from activities at that college, irrespective of the age of the pupil or the grade level completed by the pupil, if the pupil is currently an enrollee in classes of the college. The bill would require a driver of the exempt vehicle to comply with a specified provision of existing law regarding escorting pupils across highways or private roads.

The bill would require a driver of the exempt vehicle to comply with a specified provision of existing law regarding escorting pupils across highways or private roads.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 835 (SB 409) Ayala. Roof warranties: transferability.

Existing law does not specify any particular form for warranties given for roofing installation, repair, or replacement. Under existing law, a warranty does not generally apply to subsequent purchasers of the warranted item in the absence of an express provision in the warranty.

This bill would require contracts for roofing materials or for specified residential roof installation, repairs, or replacements, to be in writing. With respect to these contracts

NOTE: Superior numbers appear as a separate section at the end of the digests.

entered into on or after January 1, 1994, the bill would make these warranties enforceable by subsequent purchasers of the dwelling, unless the warranties contain a provision limiting transfer of the warranty, as specified. The bill would also require specified disclosures concerning "lifetime" and similar warranties, and would require the seller of a residential structure to provide the disclosures required by the bill to the purchaser before close of escrow where a warranty subject to the hill is provided to the purchaser. However, failure to comply would not invalidate a sale of a residential structure.

Ch. 836 (SB 487) Mello. Remedies: injunctions.

Existing law provides that an injunction to prevent a breach of certain contracts for personal services may be granted only if the contract provides compensation for the services of at least $6,000, and, on and after January 1, 1994, $50,000 per year.

This bill would further revise the criteria for enjoining the breach of a contract for personal services on and after January 1, 1994.

Ch. 837 (SB 537) McCorquodale. Place of trial.

(1) Existing law authorizes a court to order a change of place of trial in a criminal action or proceeding under specified circumstances.

This bill would provide that, in a criminal action or proceeding, the court may return the case to the original place of trial, upon its own motion or upon the motion of any party, when the action or proceeding is pending before the court after reversal of the original judgment and the court finds that the conditions which originally required the order to change venue no longer apply. The bill would impose a state-mandated local program by imposing new duties on local officials.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 838 (SB 717) Mello. Income taxes: contributions: designations: California Fund for Senior Citizens.

The existing Personal Income Tax Law provides that any taxpayer may designate on the tax return that a contribution in excess of tax liability, if any, be made to the California Fund for Senior Citizens. Existing law provides that all money in the fund be allocated to the Franchise Tax Board and the Controller for costs incurred in connection with their duties, and to the California Commission on Aging for allocation to the California Senior Legislature, as specified.

This bill would additionally require that the funds allocated to the California Commission on Aging for the purposes of funding the activities of the California Senior Legislature be spent pursuant to a specified agreement approved by both the commission and the Joint Rules Committee of the California Senior Legislature and consistent with the bylaws of the California Senior Legislature.

Ch. 839 (SB 748) Deddeh. Economic development policy: allocation of funds.

Existing law declares the existence of the California Office of Trade Policy and Research, within the California State World Trade Commission. Existing law includes among the office's purposes the elimination of unfair and restrictive foreign trade practices, participation in the development of international economic agreements and representation of domestic industry interests with respect to foreign trade barriers.

This bill would require the California Export Finance Office to seek federal matching funds, make quarterly reports on project selection, and would require unanimous approval of the 3-person credit committee for financing assistance of defense conversion projects.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 840 (SB 842) Presley. Professions: licensee discipline.

Existing law establishes regulations and procedures governing the suspension of the licenses or certifications of various licensees subject to regulation under provisions of the Business and Professions Code. Existing law provides for interim orders suspending a license, or imposing drug testing, continuing education, supervision of procedures, or other license restrictions against licensees regulated by the Division of Medical Quality, the California Board of Podiatric Medicine, and the State Athletic Commission.

This bill would permit interim orders of suspension and other restrictions to be issued, as specified, against certain other licensees engaged in a business or profession subject to regulation under provisions of the Business and Professions Code. This bill would require notice and a hearing, as specified, on the issuance of an interim order except where it appears that serious injury would result to the public before the matter is heard on notice. This bill would also enact related provisions governing the issuance of interim orders.

Ch. 841 (SB 872) Kopp. Local agencies: general obligation bonds.

Existing law authorizes and prescribes procedures for cities and counties to issue limited obligation bonds.

This bill would authorize cities, counties, school districts, community college districts, and special districts to issue and refund general obligation bonds secured by a general tax levy and prescribe the procedures therefor.

Ch. 842 (SB 1124) Thompson. Recycling centers: operation.

Existing law, the California Beverage Container Recycling and Litter Reduction Act, establishes refund values for beverage containers and requires the Department of Conservation to implement its provisions. Every beverage container sold or offered for sale in this state is required to be labeled in a specified manner and to have a minimum refund value, if specified conditions are met concerning the redemption rate.

The act requires the department to certify recycling centers which meet specified requirements. A recycling center is required to be open for business at least 30 hours per week, with a minimum of 5 hours of operation occurring during periods other than from Monday to Friday, from 9 a.m. to 5 p.m., except that the department is authorized to certify a recycling center which will operate less than 30 hours per week, if the convenience zone to be served is in a remote rural area and the operation is open for less than 30 hours per week to conduct a business other than recycling.

This bill would revise those conditions to instead allow the department to certify a recycling center which will operate less than 30 hours per week if the recycling center is located in a rural region, as defined, and is not in a convenience zone, the recycling center agrees to post a sign indicating the location of the nearest center which is open at least 30 hours per week and which will accept all material types, and the needs of the community and the goals of the act will be best served by that certification. The bill would delete the condition that, in conducting other business, the recycling center be open for less than 30 hours.

Ch. 843 (AB 264) Costa. Rent control.

Existing law requires an owner who charges rent to a tenant in excess of the certified lawful rent ceiling to refund the excess rent to the tenant upon demand in any city, county, or city and county which administers a system of controls on the price at which residential rental units may be offered for rent or lease as specified.

This bill would require any city, county, or city and county, including a charter city, that administers an ordinance, charter provision, rule, or regulation that controls or establishes a system of controls on the price at which all or any portion of the residential rental units located within the city, county, or city and county, may be offered for rent or lease or controls the adjustment of the rent level, and which does not include a system of vacancy decontrol, as defined, to permit reasonable expenses, as specified, fees, and other costs for professional services reasonably incurred in the course of pursuing rights under or in relationship to that ordinance, charter provision, rule or regulation, or the right to a fair return on an owner's property as protected by the United States Constitu-

NOTE: Superior numbers appear as a separate section at the end of the digests.

tion or California Constitution, to be included in any calculation of net operating income and operating expenses used to determine a fair return to the owner of the property, as specified.

The bill would expressly exempt from the application of the bill, any ordinance, charter provision, rule or regulation, of any city, county, and city and county, including a charter city, to the extent that the ordinance, rule, regulation, or charter provision places a limit on the amount of rent which an owner may charge a tenant of a mobilehome park.

Since the bill would require a city, county, or city and county that administers an ordinance, rule, or regulation to implement new procedures, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 844 (AB 402) Campbell. Public paratransit vehicles.

Existing law defines a "general public paratransit vehicle" as any motor vehicle designed for carrying not more than 19 persons and the driver that provides local transportation to the general public under the exclusive jurisdiction of a publicly owned and operated transit system through one of several specified modes.

This bill would include in that definition vehicles that provide transportation of pupils at or below the 12th-grade level to or from a public or private school or school activity.

Ch. 845 (AB 484) Boland. Driver's license: suspension: dishonored check.

Existing law requires the Department of Motor Vehicles to suspend a person's privilege to drive a vehicle under prescribed conditions.

This bill would require the department to suspend a person's privilege to drive a vehicle upon notification by a bank or financial institution that a check presented to the department in payment of specified fines, fees, or penalties has been dishonored. The bill would prohibit any suspension imposed pursuant to this provision from becoming effective until 30 days after the mailing of a written notice of the intent to suspend and would require that the written notice of suspension be delivered by certified mail. The bill also would provide for the reinstatement of a license under specified conditions.

Ch. 846 (AB 540) Hauser. Disaster assistance: North Coast Railroad Authority.

(1) Existing law creates the North Coast Railroad Authority to prepare plans for and to acquire and operate specified railroad lines.

This bill would make the authority a "local agency" for purposes of the Natural Disaster Assistance Act, thereby making it eligible for certain state financial assistance under that act.

(2) Under existing law, the authority is governed by a board of directors appointed by the boards of supervisors of the member counties, and an ex officio director representing the Department of Transportation.

This bill would make the ex officio director a nonvoting member, would add a city representative, appointed by the cities served by the rail line, to the board of directors, and would add a board member of the Golden Gate Bridge, Highway and Transportation District as a nonvoting, ex officio director.

Ch. 847 (AB 684) Cannella. State property: Yosemite Community College District.

Existing law required the Director of General Services to quitclaim all interests of the state, with certain exceptions, in certain real property of the Modesto State Hospital

NOTE: Superior numbers appear as a separate section at the end of the digests.

facility, and provided that the property shall revert to the state in the event that either the county or the district ceased to use the property for a public purpose. Existing law further required the director to sell, for 50% of current market value, certain other property of the Modesto State Hospital facility to the Yosemite Community College District for use as a regional instructional center and related purposes, and provided for it to revert to the state if the district ceased to use the property for that purpose. The director conveyed the properties as required.

This bill would make certain findings and declarations of intent by the Legislature respecting property transferred to the Yosemite Community College District, and would permit the district to continue to use the property subject to certain conditions. The bill would also require the district to include in any land use agreement that results from this act a statement that holds the State of California harmless for any actions connected with the use of the land in question. The imposition of this requirement on the district would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 848 (AB 774) Areias. Economic poisons: stolen.

(1) Existing law provides that a site within this state that has been treated with, or a plant, crop, or commodity, whether grown in this state or elsewhere, that has been treated with, or grown on a site treated with, an economic poison that is not registered for use on that plant, crop, commodity, or site is a public nuisance and may be seized by order of the Director of Pesticide Regulation.

This bill would make it unlawful to knowingly treat a plant, crop, or commodity, or cause it to be treated with an economic poison or fertilizer that was stolen or acquired by illegal means. This bill would therefore impose a state-mandated local program by creating a new crime. The bill would provide penalties in addition to those provided for in existing law for a violation. The bill would also provide that any person who is licensed pursuant to the Food and Agricultural Code, and who is found by a court to have knowingly sold, applied, or provided economic poisons or fertilizers that were stolen or otherwise obtained illegally, in addition to any other penalty that may be imposed, shall have his or her license or licenses suspended for a minimum of 18 months, except as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 849 (AB 813) Conroy. Highway carriers: application fees.

Existing law requires persons or corporations which transport property on the highways for hire, and persons who transport passengers for compensation, with exceptions, to obtain certificates of public convenience and necessity or permits from the Public Utilities Commission. Existing law requires applications for certificates of public convenience and necessity required for operation under the Highway Carriers' Act to be accompanied by specified fees.

This bill would increase those fees, as specified.

Existing law provides that the revenues collected by the commission, upon appropriation by the Legislature, from carriers are deposited in the Transportation Rate Fund, which is continuously appropriated to the commission to augment its current appropriations for administration of specified motor carrier laws.

By increasing the amount of funds being deposited into the Transportation Rate Fund from the increased fees to be collected under the Highway Carriers' Act, the bill would make an appropriation.

This bill would create a fund to be administered by the Department of the California

NOTE: Superior numbers appear as a separate section at the end of the digests.

Highway Patrol for use by the department and other enforcement agencies to administer and enforce the acts which regulate the safe and lawful operating practices of highway carriers throughout the state.

The bill would require an amount, as specified, of highway carriers' gross operating revenue to be allocated annually from the Transportation Rate Fund to the Commercial Motor Carrier Safety Enforcement Fund, and, upon appropriation by the Legislature, require those allocated moneys to be used by the Department of the California Highway Patrol in conjunction with local jurisdictions to provide for safety and security of highway carriers and their cargoes. Up to one percent of the funds allocated to the Commercial Motor Carrier Safety Enforcement Fund would be required to be set aside for use by the department for administration of the fund.

Ch. 850 (AB 1165) Polanco. Diversion fees.

Existing law authorizes a judge to require a defendant accused of a felony to pay an administrative fee, as part of an enrollment fee in (1) specified drug diversion programs to cover the cost of any criminalistics laboratory analysis and the cost of processing a request or application for diversion, not to exceed $150 and (2) specified domestic violence diversion programs to cover the cost of processing a request or application for diversion, not to exceed $100.

This bill would provide that this administrative fee may be used to cover the cost of supervising a defendant as a divertee under each diversion program. This bill also would increase the maximum total amount of the administrative fee for each program in (1) above to $500 and in (2) above to $300. This bill, additionally, would provide that the fee authorized in (2) above shall apply to a defendant accused of an act charged as, or reduced to, a misdemeanor, rather than to a defendant accused of a felony.

Existing law authorizes a judge to require a defendant accused of a misdemeanor to pay an administrative fee, as part of an enrollment fee in a diversion program involving violations of the California Uniform Controlled Substances Act, to cover the cost of any criminalistics laboratory analysis and the cost of processing a request or application for diversion in an amount not to exceed $100.

This bill would provide that this administrative fee may be used to cover the cost of supervising that defendant as a divertee under the diversion program. This bill also would increase the maximum total amount of the fee under this provision to $300.

Existing law requires ½ of the fee collected under this latter provision to be deposited in the criminalistics laboratories fund in the county treasury and the other half to be used to cover the administrative cost of processing the request or application.

This bill, instead, would require ⅓ of the fee collected to be deposited in the criminalistics laboratories fund in the county treasury and the remaining ⅔ to be used to cover the administrative cost of processing the request or application and the cost of supervising the divertee.

Existing law, pursuant to an obsolete provision, requires that funds collected under the above provisions be deposited in the general fund of the county in which they are collected.

This bill would repeal this obsolete provision.

Existing law requires the county drug program administrator in each county, in consultation with representatives of the court and the county probation department, to establish minimum requirements, criteria, and fees for the successful completion of drug diversion programs which shall be approved by the county board of supervisors no later than January 1, 1995. The standards established are required to include, among other things, a schedule of fees to be charged for services rendered to each person under a county drug program plan, as specified, including, but not limited to, a fee for the costs of preparing the court reports and monitoring compliance with the diversion order.

This bill would delete the authorization to charge a fee pursuant to these provisions regulating the certification of drug diversion programs for the costs of preparing the court reports and monitoring compliance with the diversion order.

This bill would incorporate additional changes in Section 1001.15 of the Penal Code proposed by Chapter 221 of the Statutes of 1993.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 851 (AB 1257) B. Friedman. Housing: Relocation Assistance Act: compensation to displaced persons.

Existing law, known as the Relocation Assistance Act, requires a public entity to provide compensation and advisory services to any person, business, or farm operation that is displaced because of the acquisition of real property for public use. Existing law governs the provision of relocation assistance, including benefits for displaced persons, as defined, and procedural protections for persons required to move from their homes. Existing law expresses the intent of the Legislature that the improvement of housing conditions of economically disadvantaged persons shall be undertaken, to the maximum extent feasible, in coordination with existing federal, state, and local government programs for accomplishing these goals.

This bill would, for the purposes of the Relocation Assistance Act, alter the definition of "displaced person" to exclude persons who have been offered occupancy of a unit, of size and quality at least comparable to the unit from which the person has been displaced and located within the same apartment complex, as defined, that contains the unit from which the person has been displaced, if all other financial benefits and services otherwise required by the act are provided to the tenants temporarily displaced from their units, the resident is offered the right to return to his or her unit, the temporary unit is not unreasonably impacted by the effects of the construction, as specified, and the property is a qualified affordable housing preservation project, as defined. It would also require that designation as a qualified affordable housing preservation project be elected by the beneficiary of the regulatory agreement creating the project, through an indication to that effect on the regulatory agreement. The bill would provide that, notwithstanding any other provision of law, no provision of the bill shall be introduced as evidence, or otherwise referred to, in any action that is pending on the date the bill becomes effective.

Ch. 852 (AB 1485) Speier. Vehicles: odometers: transfers.

(1) Existing law requires that all records of the Department of Motor Vehicles containing information as to the actual mileage of motor vehicles, required to be submitted to the department pursuant to existing law, be open to public inspection.

This bill would delete an obsolete cross-reference with regard to those provisions.

(2) Under existing law, the certificate of ownership of a vehicle is required to contain specified information.

This bill would require the certificate to additionally include an odometer disclosure statement in conformance with specified federal law.

(3) Under existing law, the department is authorized to refuse registration or the renewal or transfer of a vehicle under specified circumstances.

This bill would include, as an additional reason to refuse, that the applicant has failed to furnish the department with an odometer disclosure statement.

(4) Under existing law, the owner-transferor of a vehicle is required to notify the department of the actual mileage at the time of sale.

This bill would revise the cross-reference in that provision to the federal law, and would require the department to prescribe and issue a power of attorney form for purposes of the odometer mileage disclosure requirements consistent with federal law.

(5) Existing law sets forth requirements pertaining to the inclusion of vehicle odometer information on forms used by vehicle dealers and lessors-retailers.

This bill would conform these requirements to federal law and would require the signature of the dealer conducting a wholesale automobile auction.

(6) Existing law sets forth a schedule of fees imposed for the transfer of vehicles.

This bill would increase those fees by $1, revise and clarify the fee language, and include additional categories of fees.

(7) To the extent that a violation or failure to comply with the Vehicle Code is an infraction, the addition of the requirements contained in this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

(9) The bill would appropriate $1,392,437 from the Motor Vehicle Account in the State Transportation Fund to the department for the purposes of implementing portions of the bill.

Ch. 853 (AB 1498) Campbell. Property taxation: collection: priority: property tax losses reserve fund.

Existing property tax law provides that a tax or assessment declared to be a lien on real property has priority over all other liens on that real property, regardless of when those other liens are created.

This bill would specify that the tax or assessment shall, pursuant to that provision, be given priority over matters including, but not limited to, certain obligations or responsibilities.

This bill would additionally require that whenever real property, upon which property taxes or assessments are due and unpaid, is sold by a ministerial officer, other than at a tax sale or a sale pursuant to specified provisions relating to the enforcement of mortgages and deeds of trust, the proceeds from the sale be first applied, after the payment of sale expenses, to the payment of due and unpaid property taxes and assessments and be transmitted to the appropriate tax officer.

Existing property tax law authorizes a county to adopt procedures to establish a property tax losses reserve fund for the coverage of losses that may occur in the amount of property tax liens as a result of special sales of tax-defaulted property. Existing law requires, as specified, that in any year in which the amount of the property tax losses reserve fund reaches an amount equivalent to 4% of the total of all property taxes and assessments levied on the secured roll for that year, the amount thereafter authorized to be credited to the fund be credited to the county general fund. As an exception to the above requirement, existing law provides that for any county for which the rate of secured tax delinquency has been 3% or less for the preceding 3 consecutive fiscal years, that a similar credit to the county general fund shall occur at a 3%, rather than 4%, threshold. Existing law further provides that a county subject to the foregoing exception shall, upon triggering the percentage threshold under that exception for the crediting of moneys to the county general fund, be subject to the general 4% requirement, described above, for the crediting of moneys to the county general fund, until such time as the county again qualifies for the above-described exception.

This bill would substitute 3% for 4% as the threshold percentage in the property tax losses reserve fund after which funds are to be credited to the county general fund, and would eliminate the exception to that procedure.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 854 (AB 1585) Richter. Unemployment compensation: public school employees.

Existing unemployment compensation law permits certain employing units to elect any of various methods of financing unemployment compensation coverage and imposes interest and penalties on these employing units for a failure to make timely payment of contributions pursuant to the applicable method of financing elected.

This bill would exempt from these provisions school employers that have elected to pay the cost of benefits into the Unemployment Fund in lieu of paying contributions required of employers.

Existing unemployment compensation law provides that school employers with elective financing of unemployment compensation coverage under specified provisions may terminate that elective financing coverage for any year if a written application for termination is filed with the Director of Employment Development on or before January 31 of that year or the director waives the written application for termination.

This bill would provide that school employers who terminate this form of elective financing coverage are prohibited from making a subsequent reelection for this type of coverage for a period of 10 years.

Existing unemployment compensation law provides that whenever a period of 3

NOTE: Superior numbers appear as a separate section at the end of the digests.

consecutive years has elapsed since the termination of an election by a school employer to finance benefits under specified elective coverage provisions, any favorable balance in the school employer's account is required to be canceled on the records of the Employment Development Department unless the school employer has reacquired the account by another election for coverage made prior to the expiration of the 3-year period.

This bill would require the department's cancellation of the favorable balance in a school employer's account upon termination of elective coverage without regard to the 3-year period.

Existing law establishes the School Employees Fund from which moneys are paid for unemployment compensation benefits and various other costs of unemployment insurance, and provides for school employer contribution rates, local experience charges, and penalties, as specified.

This bill would make technical, nonsubstantive changes in the provisions governing the reimbursement of the School Employees Fund for local experience charges.

Ch. 855 (AB 1699) Martinez. Property tax assessments.

Under existing law, where a late application for a property tax exemption in connection with a supplemental assessment has not been filed before the date the first installment of taxes on the supplemental tax bill becomes delinquent, no exemption is available.

This bill would instead allow the filing of a late application for exemption in these cases, subject to a penalty of 15% of the tax, penalty, or interest due, or $250, whichever is less. By requiring county taxing officials to provide for these exemptions, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 856 (AB 1820) Gotch. Child abuse programs.

Existing law permits the State Department of Social Services to provide funding to local agencies for child abuse prevention and intervention programs. These programs may include the use of multidisciplinary personnel teams, as defined.

This bill would add to those individuals who may be included on a multidisciplinary personnel team, any public or private school teacher, administrative officer, supervisor of child welfare and attendance, or certificated pupil personnel employee.

Ch. 857 (AB 2062) Farr. Bond proceeds of local agencies.

Existing law establishes in the State Treasury the Local Agency Investment Fund to which a local governmental official, with the consent of the governing body of that agency, may remit money in its treasury not required for immediate needs for the purpose of investment to be held for a time determined by the local governmental unit. Existing law requires the deduction from earnings prior to distribution of an amount equal to the reasonable administrative costs of state agencies not to exceed a maximum of ¼ of 1% of the earnings of the fund.

This bill would increase the deduction not to exceed a maximum of ½ of 1% of the earnings of the fund.

Ch. 858 (AB 2177) Boland. Land use: manufactured housing.

(1) Existing law imposes specified restrictions on the authority of a city or county, including a charter city, county, or city and county, to regulate the location, construction, or maintenance of manufactured housing communities and mobilehome parks.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law, the Mobilehome Residency Law, defines a "park" for purposes of application of the law.

This bill would impose a state-mandated local program by providing that no city or county, including a charter city, county, or city and county, as specified, shall adopt any ordinance, rule, or regulation that prohibits or limits the duration of rental agreements or leases for any space contained within any manufactured housing community, as defined, or within any mobilehome park, as defined, that is new construction, as defined. The bill would expand the definition of "park" to include a manufactured housing community, as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 859 (AB 1273) Eastin. Teacher credentialing.

(1) Existing law defines the term basic teaching credential as one that authorizes the holder to teach specified subjects and for which a baccalaureate degree is a minimum requirement.

This bill would define the term basic teaching credential as one that authorizes the holder to teach specified subjects and for which a baccalaureate degree and completion of a preparation program, as specified, are minimum requirements or as a clear designated subjects teaching credential that authorizes the holder to teach specified subjects if the holder possesses a baccalaureate degree and has passed the CBEST test. The bill would also provide that a basic teaching credential meets the prerequisite teaching credential requirement for any other teaching, specialist, or service credential the commission is authorized to issue.

(2) Existing law authorizes the Commission on Teacher Credentialing to issue a one-year preliminary or internship credential to applicants who are seeking a vocational designated subject credential or who have not completed any required examination, as specified.

This bill would specify that the preliminary credential is for multiple or single subject teaching and would extend the term of this credential to 2 years. The bill would authorize the commission to issue this credential to out-of-state applicants who have not completed specified requirements for a teaching credential and to any applicant for a designated subjects teaching credential who has not completed a course or examination on the principles or provisions of the United States Constitution. The bill would eliminate the commission's authority, expressed in that provision of existing law, to issue an internship credential and would include authorization to issue an internship teaching or services credential in another provision of existing law.

(3) Existing law requires the Commission on Teacher Credentialing to establish professional standards, assessments, and examinations for entry and advancement in the education profession and to establish standards and procedures for the initial issuance and renewal of credentials. Existing law also requires that pupils who are deaf or hearing-impaired be taught by teachers whose professional preparation and credential authorization are specific to that handicapping condition.

This bill would authorize the commission to issue a preliminary specialist instruction credential and a services credential with a specialization in pupil personnel services, as specified, to prelingually deaf applicants, as defined. Both credentials would be issued solely for the purpose of teaching or counseling deaf and hearing-impaired pupils.

(4) Existing law prohibits the commission from issuing any credential unless the applicant has passed the state basic skills proficiency test. Existing law exempts specified categories of persons from the basic skills proficiency test requirement.

This bill would exempt prelingually deaf applicants for preliminary specialist instruc-

NOTE: Superior numbers appear as a separate section at the end of the digests.

tion credential and a services credential with a specialization in pupil personnel services from the basic skills proficiency test requirement, The bill would instead require the Commission on Teacher Credentialing to develop criteria to verify the proficiency of the persons credentialed by this bill. The bill would require the employing school district, county office of education, or state special school to appoint a 3-person panel, as specified, that would verify the proficiency of holders of these credentials using the criteria the commission develops. The bill would require the commission, upon the employing local education entity's verification of proficiency, to issue a specialist credential, solely for the purpose of instructing deaf and hearing-impaired pupils enrolled in state special schools or in special classes, or a services credential with a specialization in pupil personnel services, solely for the purpose of instructing deaf and hearing-impaired pupils enrolled in state special schools or in special classes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 860 (SB 698) Torres. State Teachers' Retirement System: compensation.[6]

(1) The State Teachers' Retirement Law authorizes any member whose salary has been reduced by 5% or more after age 58 because of a reduction in school funds to elect to use, as his or her final compensation, the highest average annual compensation earnable by the member during any 3 years during his or her membership in the system.

This bill would delete the conditions that the member's salary be reduced by more than 5% and that the reduction be made after the member attains age 58, thereby making the option available to any member whose salary has been reduced because of a reduction in school funds. This bill would specify that for the purposes of this provision, a year shall be considered to be a period of 12 consecutive months.

(2) That retirement law generally bases both benefits and contributions on the member's salary or compensation.

This bill would, in a provision that would be repealed on July 1, 1996, authorize school districts, community college districts, and county superintendents of schools that have reduced their certificated employees' salaries because of a fiscal emergency to elect to preserve the retirement benefits of those employees.

(3) This bill would appropriate $300,000 from the Teachers' Retirement Fund to the Teachers' Retirement Board for expenditure to carry out the purposes of this bill.

Ch. 861 (AB 447) Seastrand. State Teachers' Retirement System: members.[7]

(1) Existing law defines specified terms for the purposes of the State Teachers' Retirement Law.

This bill would define "reinstatement" for those purposes.

(2) Existing law requires members and beneficiaries of the State Teachers' Retirement System to furnish information regarding their status to the Teachers' Retirement Board, as required by the board. Existing law further requires the board to issue a statement of a member's individual account to members after the close of the school year.

This bill would also require members who have not had any service reported during a prior school year to provide their current mailing address and beneficiary information to the system. It would require the board to issue a statement of a member's individual account, provided that the employer or member has informed the system of the member's current mailing address. It would also require the board to periodically make a good faith effort to locate inactive members, as defined, for specified purposes.

(3) Existing law provides for the accrual and termination of benefits and allowances.

This bill would revise accrual and termination dates for specified benefits, would specify that system distributions be made in accordance with specified Internal Revenue Code provisions relating to minimum distribution requirements, and would prescribe specified beginning dates for benefit payments representing the entire interest of the member.

(4) This bill would appropriate $100,000 from the Teachers' Retirement Fund to the board for the 1993–94 fiscal year for expenditure for the purposes of this act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 862 (SB 373) Lockyer. State Bar of California: membership fees.

(1) Existing law establishes annual membership fees for members of the State Bar of California for the year 1993, but does not establish membership fees for later years.

This bill would establish annual membership fees for the years 1994 and 1995 in the same amounts as those for the year 1993 and would extend the repealer in the provision to January 1, 1996.

(2) Existing law, until January 1, 1994, requires the Board of Governors of the State Bar to increase the annual membership fees by an additional fee of $110 to be used exclusively for discipline augmentation.

This bill would continue that requirement for the years 1994 and 1995 and would also extend the repealer in the provision to January 1, 1996.

Ch. 863 (SB 536) Petris. Class actions: California State Bar.

(1) Existing law provides for class actions, as specified, and allows the joinder in a class action, as a defendant, if any person who should have been joined as a plaintiff but whose consent cannot be obtained.

This bill would require a court to determine the total amount payable to all class members in such an action, to set a reporting date for notifying the court of actual amounts received by class members, and require the court to amend the judgment to direct the defendant to pay any unpaid residue, plus interest, in any manner the court determines is consistent with the objectives and purposes of the underlying cause of action, including payment to child advocacy programs and to the California Legal Corps created by the bill. The bill would require the State Bar to annually report to the Governor and the judiciary committees of the Legislature on the programs supported by these funds, the amount of funding allocated for each, and other pertinent information. The bill would specify the purposes of the California Legal Corps, would require regulations pertaining to it to be approved by the Supreme Court, and would require the program to be periodically audited by the Judicial Council. The bill would impose a state-mandated local program by requiring new duties of the courts.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 864 (AB 761) Vasconcellos. Trade and commerce.

Existing law requires the Secretary of Trade and Commerce to coordinate and develop state policy on economic development and trade.

This bill would enact the California Economic Development Strategic Planning Act of 1993, require the secretary to review an economic development strategic plan for the state, convene a biennial economic development strategy plan panel composed of 15 members, and to submit an interim report to the Governor and the Legislature on or before September 1, 1994.

Ch. 865 (AB 1239) Caldera. Property tax relief: qualified residential property.

Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the approval of the board of supervisors.

This bill would provide that no interest or penalties shall be imposed or collected with respect to any delinquent installments of property taxes levied for the 1992–93 fiscal year on qualified residential real property, as defined. The bill would provide that "qualified real property" is property with respect to which, among other things, the owner of the property suffered economic hardship, as specified, as a result of the civil unrest that

NOTE: Superior numbers appear as a separate section at the end of the digests.

occurred in Los Angeles in April and May, 1992. The bill would also prohibit the treasurer or tax collector from taking any collection action, and would require the treasurer or tax collector to cease any collection action that has commenced, with respect to any delinquent property taxes for the 1992–93 fiscal year that were levied on that qualified real property, until on or after January 1, 1994. The bill would also require that claims for relief be filed, as specified, and that the treasurer or tax collector permit any individual that has paid any interest or penalties in connection with delinquent taxes levied for the 1992–93 fiscal year on qualified residential real property prior to filing a claim for relief to also file a claim for refund of the interest and penalties paid.

By requiring the treasurer or tax collector to receive and process claims for relief under these provisions and to prescribe a specified refund procedure, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would make certain legislative findings and declarations regarding a statewide public purpose of the bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 866 (AB 1259) Katz. Economic development.

Existing law provides for the establishment of small business development corporations to promote the economic development of small businesses by making available capital, general management assistance, and other resources. Among other things, money in the Small Business Expansion Fund is continuously appropriated to make loans, guarantees, and restricted investments for small business development corporations.

This bill would require these corporations that serve areas with declared disasters or emergencies to increase the number of small loans, as specified, and would declare legislative intent.

This bill would provide that an amount equal to all revenues, less refunds, derived from sales and use taxes at a 4¾% rate for a specified period from the sales and use tax revenue attributable to the federal motor vehicle fuel tax increase between January 1, 1993, and January 1, 1994, shall be estimated, as provided, and an amount equal to that amount, but not exceeding $7,500,000, shall be transferred from the Retail Sales Tax Fund to the continuously appropriated Small Business Expansion Fund.

Ch. 867 (AB 1611) Polanco. Economic development loans.

Existing law authorizes the California Export Finance Office to make loan guarantees up to 85% of required financing and limits the amount of loan guarantees to $500,000.

This bill would increase those limits to 90% of required financing and increase the amount of loan guarantees to $750,000.

Ch. 868 (AB 1823) Alpert. Property taxation: rebate: ERMP.

Existing property tax law provides for the levy of an annual ad valorem tax on personal property, with certain exceptions, based upon the full value of that property.

This bill would permit local agencies, excluding school districts, to rebate property tax revenue received from economic revitalization manufacturing property, as defined, for a period of 5 fiscal years from the date the property was placed in service, commencing with the 1994–95 fiscal year.

The existing Sales and Use Tax Law, Personal Income Tax Law, and Bank and Corporation Tax Law provide specified procedures and requirements for the State Board of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Equalization's and the Franchise Tax Board's approval or disapproval of a recommendation for settlement of a civil tax matter, and apply those provisions to civil tax matter disputes existing on July 1, 1993, with respect to which recommendations for settlement are first submitted to the Attorney General no later than June 30, 1994, and to either the State Board of Equalization or the Franchise Tax Board, as applicable, no later than September 15, 1994.

This bill would provide that a settlement pursuant to those procedures and requirements shall apply to civil tax matter disputes existing on January 1, 1994, and, with respect to civil matter disputes that did not exist on September 1, 1993, but that existed on January 1, 1994, shall apply only to determinations issued during that interval and to payments made pursuant to those determinations.

Ch. 869 (AB 1977) Jones. Rural economic development.

Existing law provides that the Department of Commerce is the principal state agency responsible for various economic development programs.

This bill would transfer that designation to the Trade and Commerce Agency.

Existing law provides that the Secretary of the Business, Transportation and Housing Agency serves as chairperson of the Rural Economic Development Infrastructure Panel.

This bill would transfer that duty to the Secretary of Trade and Commerce and includes the Secretary of the Business, Transportation and Housing Agency on the panel.

Existing law authorizes loans and grants to finance projects approved under the Rural Economic Development Infrastructure Program, limits loans to $1,000,000, and prescribes the length of loan terms and interest rates.

This bill would eliminate the authority to make grants, increase maximum loan amounts to $2,000,000, and authorize the agency to pool and sell loans and evidences of indebtedness and to issue bonds.

Ch. 870 (SB 726) Hill. Administrative regulations: plain English policy.

Existing law requires state agencies to comply with various procedures with respect to the adoption of administrative regulations.

This bill would require a state agency, as of January 1, 1994, when proposing to adopt or amend a regulation that affects small business, to adopt a plain English policy statement overview regarding each proposed regulation containing specified information, to draft the regulations in plain English, as defined, and to make available to the public a noncontrolling plain English summary of a regulation, if the regulation is technical in nature.

Ch. 871 (SB 852) Maddy. Economic development: small business development corporations.

Existing law provides for the establishment of small business development corporations, under the supervision of the Small Business Development Board and the Department of Commerce.

This bill would provide that those corporations are under the supervision of the Trade and Commerce Agency rather than the Department of Commerce, and would revise the duties of the board and executive director.

Existing law provides for the Small Business Development Loan Guarantee Account and the Small Business Development Corporation Guarantee Fund in the Expansion Fund.

This bill would revise provisions relating to the utilization of those funds.

The bill would make various changes related to the functioning of small business development corporations, including revisions relating to authority for direct lending and other activities other than loan guarantees, relating to farm and rural loans, and relating to the establishment of profitmaking subsidiaries.

Existing law provides for a hazardous waste reduction program under which the Department of Commerce makes loans to reduce the generation of hazardous waste. Under existing law, those provisions will be repealed January 1, 1996.

This bill would eliminate the repeal and would make related changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 872 (AB 2252) Areias. Agriculture: Agriculture Trust Fund.

Existing law provides for various programs administered by the Department of Food and Agriculture, and supported by assessments and fees.

This bill would provide that fees and assessments required to be paid to the Director of Food and Agriculture or the Department of Food and Agriculture Fund to support various specified agricultural programs may be deposited in the Department of Food and Agriculture Fund, or with an entity designated as specified. The bill would specify that the designated entities would serve as custodian of the funds.

The bill would also create the Agriculture Trust Fund and would authorize the director to transfer funds from the Department of Food and Agriculture Fund to the Agriculture Trust Fund and would specify the uses for which the money in the trust fund could be encumbered. The Agriculture Trust Fund would be created for the exclusive purpose of implementing and continuing industry programs designated by the bill as the beneficiaries of the fund. The Agriculture Trust Fund would continue in existence as long as any of the specified programs continues to exist, and upon termination of all of the specified programs, the remaining funds would be transferred to the Department of Food and Agriculture Fund.

Ch. 873 (AB 35) Klehs. Income taxes: bank and corporation taxes.

Under the existing Personal Income Tax Law and Bank and Corporation Tax Law, various provisions of the federal Internal Revenue Code as enacted as of a specified date are referenced in various sections of the Revenue and Taxation Code. Existing law provides that for taxable years beginning on or after January 1, 1992, the specified date of those referenced Internal Revenue Code sections is January 1, 1992.

Existing law provides that for any introduced bill which proposes changes in any of those dates, the Franchise Tax Board shall prepare a complete analysis of the bill which describes all changes to state law which will automatically occur by reference to federal law as of the changed date. It further requires the Franchise Tax Board to immediately update and supplement that analysis upon any amendment to the bill, and requires that analysis to be made available to the public and to be submitted to the Legislature for publication in the daily journal of each house of the Legislature.

This bill would change the specified date of those referenced Internal Revenue Code sections to January 1, 1993, for taxable years beginning on or after January 1, 1993, and thereby would make numerous substantive changes to both the Personal Income Tax Law and Bank and Corporation Tax Law with respect to those areas of preexisting conformity that are subject to changes under federal laws enacted after January 1, 1992, and that have not been or are not being excepted or modified.

This bill would make certain new changes in federal income tax laws applicable, with specified exceptions and modifications, for purposes of the Personal Income Tax Law or the Bank and Corporation Tax Law, or both, with respect to the allowance of a deduction for clean-fuel vehicles and certain refueling property placed in service after June 30, 1993, by reference to a specified federal statute, and the exclusion from income of any subsidy by a public utility to a customer for the purchase or installation of any energy conservation measure, except as specified, by reference to a specified federal statute. This bill would also delete certain provisions of the Personal Income Tax Law and the Bank and Corporation Tax Law regarding the percentage depletion of oil, gas, and geothermal wells, thus requiring that the allowance for depletion be determined in accordance with specified federal statutes.

This bill would also make various technical or supplemental changes to the Personal Income Tax Law or the Bank and Corporation Tax Law, relating to, among other things, the credit for low-emission vehicles, the alternative minimum tax, real estate investment trusts, and real estate mortgage investment conduits. This bill would also provide, with respect to the credit for low-emission vehicles, for carryovers of credit to subsequent years, as specified.

This bill would provide that specified provisions shall become operative only if both this bill and AB 63 are enacted and this bill is enacted after AB 63. It would also provide that specified provisions shall become operative only if both this bill and SB 146 are both enacted and this bill is enacted after SB 146.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would take effect immediately as a tax levy.

Ch. 874 (SB 723) Kopp. Personal income and bank and corporation taxes.

(1) Existing provisions of the Personal Income Tax Law provide for taxation of partners and partnerships in accordance with referenced provisions of the federal Internal Revenue Code, except as specifically provided.

This bill would repeal certain provisions of AB 35 which, if enacted, would make inapplicable to income taxation of partnerships specified provisions of the federal Internal Revenue Code relating to recognition of precontribution gain in the case of certain distributions to the contributing partner. However, if AB 35 is not enacted and effective on or before January 1, 1994, or does not add those provisions, this bill would add provisions expressly making that federal law applicable to the income taxation of partnerships and also making certain changes made by the federal Comprehensive National Energy Policy Act of 1992 applicable to distributions occurring in prescribed taxable years.

(2) The existing Personal Income Tax Law provides that, in the case of nonresident taxpayers, gross income includes only gross income from sources within this state and sets forth special rules pertaining to the attribution to this state of income of nonresidents from stocks, bonds, notes, or other intangible property, and from estates and trusts.

This bill would provide that, notwithstanding those provisions, and as specifically excepted, income of a nonresident from sources within this state shall not include dividends, interest, or gains and losses from qualifying investment securities, as defined.

(3) The existing Bank and Corporation Tax Law provides that income derived from or attributable to sources within this state includes specified types of income, and provides for the apportionment of income between this state and other states and foreign countries in the case of a business with income derived from or attributable to sources both within and without this state.

This bill would provide that, notwithstanding those provisions, income derived from or attributable to sources within this state shall not include the distributive share of interest, dividends, and gains from the sale or exchange of qualifying investment securities, as defined, derived by a bank or corporation that is a partner in a partnership that qualifies as an investment partnership, as defined, if the income from the partnership is the only income of the bank or corporation derived from or attributable to sources within this state.

(4) The existing Bank and Corporation Tax Law provides that all banks and corporations subject to tax under that law shall pay annually to the state a minimum franchise tax of $800, except as specified. Existing law also requires that every limited partnership doing business in this state and required to file a specified return pay a minimum tax of $800.

This bill would additionally require, for taxable years beginning on or after January 1, 1993, that every limited partnership that has executed, acknowledged, and filed a certificate of limited partnership with the Secretary of State shall pay that minimum tax.

(5) This bill would take effect immediately as a tax levy.

Ch. 875 (SB 146) Lewis. Use fuel tax: income taxes: bank and corporation taxes: credits: low-emission motor vehicles.

Existing provisions of the Use Fuel Tax Law specify the excise tax imposed for the use of fuel, as defined, and provide that the excise tax imposed upon ethanol or methanol containing not more than 15% gasoline or diesel fuels shall be one-half of that rate until January 1, 1994.

This bill would delete the January 1, 1994, repeal date.

The existing Personal Income Tax Law and the existing Bank and Corporation Tax Law allow various credits against the taxes imposed by those laws, including a credit for taxable and income years beginning before January 1, 1995, for a specified percentage of the total cost of the conversion of a vehicle that is intended to be used on public roads and highways and is registered in this state to a low-emission motor vehicle or for the differential cost, as defined, of a new low-emission motor vehicle that meets specified requirements.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would additionally allow those credits with respect to a specified percentage of the purchase price of any nonrecreational motor vehicle that is a low-emission motor vehicle intended to be used on private roads, school campuses, or commercial or industrial worksites in this state. The bill would also extend those credits to each taxable and income year beginning before January 1, 1996.

This bill would make other technical, clarifying changes to those credits.

This bill would require the Legislative Analyst to study the effectiveness of the low-emission vehicle tax credit, as specified, and report his or her findings to the Legislature on or before March 31, 1995.

This bill would provide that specified provisions shall become operative only if both this bill and AB 35 are enacted and this bill is enacted after AB 35.

This bill would take effect immediately as a tax levy.

Ch. 876 (SB 1068) Wright. Family law: courts.

(1) Under existing law, a court may issue a stay of a wage assignment for child or spousal support only upon a prescribed finding of good cause.

This bill would reorganize and revise the grounds for staying such a wage assignment, including (a) making defined, alternative arrangements and (b) specified failure of the obligee to notify the obligor's employer or agency making collection separate grounds. The bill would make related changes. The bill would also authorize a custodial parent receiving services under Title IV-D of the federal Social Security Act who is not the obligee of a support order to request the court to issue or modify such a wage assignment.

(2) Existing law requires an employer that is withholding support from an employee's wages for court-ordered support, to send the amounts withheld to the support obligee within 10 days of the date the obligor is paid.

This bill would require the employer to additionally report to the obligee the date on which the amount was withheld from the obligor's wages.

(3) Existing law authorizes registration of a support order made in this state or a foreign support order or foreign order for assignment of wages in the county where either the support obligor or the child resides.

This bill would also authorize registration of these orders in the county where the support obligee resides or any county where the obligor has income, assets, or property.

(4) Existing law makes a foreign order for assignment of earnings subject to the same procedure for vacation of registration as a foreign support order.

This bill would delete this procedure as applied to foreign orders for assignment of earnings, and instead reference procedures that make these orders subject to a motion to quash under existing law.

(5) Existing law specifies various requirements for child support orders.

This bill would require all child support orders to require the obligor and obligee to inform either the other parent or, if the order requires pay through an agency designated under Title IV-D of the Social Security Act, that agency, of the current employer.

(6) Existing law requires the court to order health insurance coverage be maintained for a child for whom support has been ordered, by either or both parents if available at no cost or reasonable cost to the parent.

This bill would require all child support orders which are issued or modified to include a requirement that the obligor and obligee provide each other with specified health policy insurance information.

(7) Existing law provides that a judgment for child or spousal support, including a judgment for reimbursement or other arrearages, is exempt from any requirement that judgments be renewed, and that a judgment for child or spousal support, including all lawful interest and penalties computed thereon, is enforceable until paid in full.

This bill would delete the latter provision, would expressly make the provision for nonrenewal of judgments applicable to certain judgments in favor of a county for aid provided for support and maintenance, provide that such a judgment may be renewed (although not required) by filing an application for renewal at any time if the judgment has not previously been renewed, or if the judgment has previously been renewed, at any time after 5 years has elapsed from the time the judgment was previously renewed.

The bill would also delete existing requirements for periodic renewal of a judgment

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

lien with respect to a judgment for child, family, or spousal support payable in installments.

(8) Under existing law, an order for modification or revocation of child support may include an award of attorney's fees to the prevailing party upon a showing of the nonprevailing party's ability to pay.

This bill would delete those provisions.

(9) Under existing law, a child or family support order may be enforced by a writ of execution, without court approval, until 5 years after the child reaches the age of majority or thereafter for amounts not more than 10 years overdue. Under existing law, a spousal support order is enforceable by a writ of execution, without court approval for amounts not more than 10 years overdue.

This bill would instead make these orders enforceable, without court approval, for as long as the order is enforceable.

(10) Existing law specifies the priorities for crediting satisfaction of a money judgment for child support.

This bill would make these provisions applicable to other types of judgments for support and would specify that when the judgment is payable in installments, amounts credited against unsatisfied principal shall be credited against matured installments in the order in which they matured. The bill would also revise priorities for crediting collections resulting from tax refund offsets and specified liens on workers' compensation awards.

(11) Under existing law, county assessors are required to disclose, furnish abstracts of, and provide access to all information in their offices, including nonpublic information in their files, to various specified persons and agencies.

This bill would impose a state-mandated local program by requiring assessors to additionally provide access to this information to the State Department of Social Services.

(12) Existing law makes a parent of a minor, the estate of a parent, and the estate of the minor liable for support of the minor while placed, detained in, or committed to, any institution pursuant to specified provisions for temporary custody or pursuant to an order of the juvenile court. Existing law specifies that these charges may not include costs of incarceration, treatment, or supervision for the protection of society or rehabilitation of the minor, but specifies that this limitation does not preclude the district attorney from seeking reimbursement of those costs in a child support order.

This bill would specify that the statewide child support guidelines are rebuttably presumed to be the correct amount of this support. The bill would impose a state-mandated local program by providing that any excess child support be held by the county in trust for the child or, if approved by the caseworker or probation officer, paid directly to the child. The bill would also revise procedural provisions respecting recovery of costs of out-of-home placements of dependent children and wards of the juvenile court. By requiring counties to designate a financial evaluation officer to make financial evaluations of prescribed parental liability, the bill would impose a state-mandated local program.

(13) Under existing law, district attorneys are required to investigate and obtain child or spousal support, in cases of nonsupport and where paternity is not established, if prescribed public assistance, including Medi-Cal benefits, is being provided.

This bill would specify that the district attorney shall provide child and spousal support assistance where only Medi-Cal benefits are being provided, unless the recipient of the services notifies the district attorney that only assistance in obtaining Medi-Cal benefits is requested.

(14) Existing law requires state, county, and local agencies to cooperate with, and make location, property, and income information available to, district attorneys and the California Parent Locator Service in connection with recovery of minor children, location of parents or putative parents, and enforcement of spousal and child support.

This bill would require this cooperation and information to be provided additionally to the State Department of Social Services' Statewide Automated Child Support System to the extent authorized by law. By making these requirements applicable to local

NOTE: Superior numbers appear as a separate section at the end of the digests.

agencies, the bill would impose a state-mandated local program. The bill would make related changes, would authorize the California Parent Locator Service and Central Registry to obtain information from specified sources in addition to the federal Parent Locator Service. The bill would give the Statewide Automated Child Support System the same access to information as the California Parent Locator Service and would give the Statewide Automated Child Support System access to criminal record information where permitted by law.

(15) The bill would incorporate changes made by Chapter 301 of the Statutes of 1993 relating to domestic violence and conform those changes to the enactment of the Family Code. The bill would incorporate changes made by Chapter 158 of the Statutes of 1993 relating to courts that were chaptered out by Chapter 219 of the Statutes of 1993. The bill would also make technical changes to other provisions to conform to the enactment of the Family Code.

(16) The bill would incorporate additional changes in Section 408 of the Revenue and Taxation Code, proposed by SB 143, to be operative only if SB 143 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last. These changes would become operative on the operative date of SB 143.

(17) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(18) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 877 (SB 673) Greene. Income taxes: bank and corporation taxes.

The existing Personal Income Tax Law and the Bank and Corporation Tax Law impose specified taxes and provide for various credits, deductions, exemptions, exclusions, and administrative procedures in connection therewith.

This bill would make nonsubstantive, technical changes to those provisions, as provided. The existing Bank and Corporation Tax Law provides that with respect to a specified deduction relating to the amortization of pollution control facilities, the state certifying authority shall be the State Air Resources Board and the State Water Resources Control Board, as provided. The existing Personal Income Tax Law provides that the State Department of Health Services is the state-certifying authority. This bill would provide for purposes of both laws that the state-certifying authority is the State Air Resources Board and the State Water Resources Control Board, as specified. This bill would also provide that a specified collection cost recovery fee shall not apply with respect to specified exempt organizations.

The existing Personal Income Tax Law and Bank and Corporation Tax Law conform to certain federal income tax laws relating to the treatment of certain foreign currency transactions.

This bill would provide under both laws an exception to those federal laws relating to source of income.

The existing Personal Income Tax Law provides, among other things, a credit for personal exemption, a credit for a qualified senior head of household, and specified collection procedures.

This bill would make technical, nonsubstantive changes to those provisions.

The existing Personal Income Tax Law and Bank and Corporation Tax Law provide for, among other things, the disallowance of certain deductions with respect to substandard housing, the reporting of changes or corrections in gross income or deductions made by the Internal Revenue Service or other specified authority, as provided, and the procedures relating to the filing of original or amended returns.

This bill would make technical, clarifying changes to those provisions.

The existing Bank and Corporation Tax Law imposes an alternative minimum tax, as

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified.

This bill would make a technical change relating to those provisions.

The existing Bank and Corporation Tax Law authorizes the Franchise Tax Board to collect taxes through electronic funds transfer.

This bill would extend the application of the bad check penalty provisions to payments made by electronic funds transfers. This bill would also authorize specified payments to be made by international funds transfer, as defined.

This bill would provide that specified provisions shall become operative only if SB 26 of the 1993–94 Regular Session is chaptered.

This bill would make nonsubstantive, technical changes to the unemployment insurance laws relating to cross-references to the Personal Income Tax Law and the Bank and Corporation Tax Law.

This bill would take effect immediately as a tax levy, but specified provisions would become operative as provided.

Ch. 878 (AB 65) Klehs. Franchise Tax Board: tax administration: debt collection.

The existing Vehicle License Fee Law provides that delinquent vehicle license fees and related penalties are collected by the Franchise Tax Board by the seizure and sale of the vehicle to which the delinquent fees and penalties relate or by appropriate civil action.

This bill would exempt regulations promulgated by the Franchise Tax Board in connection with those collection activities from review and adoption by the Office of Administrative Law and instead require that those regulations be adopted by the Franchise Tax Board itself. The bill would require that amounts collected by the Franchise Tax Board be deposited in an appropriate fund or account upon agreement between the Franchise Tax Board and the Department of Motor Vehicles, and would make other related clarifying and technical changes to provisions related to those activities.

Existing law requires the Controller to offset certain amounts, including child or family support accounts, as specified, against personal income tax refunds. Existing law provides that during the period from January 1, 1993, to December 31, 1995, inclusive, when a child support delinquency is reported, as specified, county district attorneys from 6 counties, determined as provided, may request, as provided, that the delinquency be referred to the Franchise Tax Board. Existing law provides, as specified, that a delinquency so referred shall be collected in any manner authorized for the collection of a delinquent personal income tax liability, due and payable to the Franchise Tax Board. Existing law also requires the Franchise Tax Board, the State Department of Social Services, and any representative as may be appointed by county district attorneys, to develop specified procedures relating to the reporting and verification of child support delinquencies.

This bill would provide that specified provisions relating to restrictions on earnings withholding and withholding orders are applicable to child support delinquencies and orders, as provided.

This bill would provide that specified enforcement remedies, information, and services are available to the Franchise Tax Board with respect to the collection of child support delinquencies.

This bill would provide that child support delinquencies collected by the Franchise Tax Board be deposited in a certain fund in the State Treasury and be continuously appropriated, as provided.

This bill would also establish a priority for application of amounts collected, in the event that a debtor has more than one debt being collected by the Franchise Tax Board and the amount collected is insufficient to satisfy the total amount owing.

The existing Personal Income Tax Law and the Bank and Corporation Tax Law are administered by the Franchise Tax Board.

This bill would make additional technical and clarifying changes in those laws.

Existing law requires, until January 1, 1994, and permits thereafter, the Franchise Tax Board to obtain a copy of the federal information return of any person, as specified, who receives more than $10,000 in cash in a transaction.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete the change in those provisions thereby continuing the requirement that the federal information return be obtained.

This bill would make certain legislative findings and declarations regarding specified collections by the Franchise Tax Board, and adjustments by taxpayers for employer-provided educational assistance and health insurance deductions for self-employed individuals.

Ch. 879 (AB 57) W. Brown. Income taxes: bank and corporation taxes: credits.

The existing Personal Income Tax Law and Bank and Corporation Tax Law provide various credits against the taxes imposed by those laws including (1) a credit for sales and use taxes paid or incurred in connection with qualified property used exclusively in an enterprise zone, (2) a credit for a specified percentage of qualified wages paid or incurred by an employer to qualified disadvantaged individuals for services performed in an enterprise zone, (3) a credit for qualified wages paid by a qualified business that hires a qualified employee that is a resident of a specified high-density unemployment area, (4) a credit for sales and use taxes in connection with the purchase of qualified property used exclusively in the Los Angeles Revitalization Zone, and (5) a credit for qualified wages paid or incurred for construction work in the Los Angeles Revitalization Zone. Existing law provides for an alternative minimum tax in addition to the regular tax imposed by those laws and further provides that, except for specified credits, no other credit shall reduce the tax imposed below the alternative minimum tax.

This bill would additionally allow those credits to reduce the alternative minimum tax.

This bill would take effect immediately as a tax levy.

Ch. 880 (AB 34) Klehs. Income taxes: bank and corporation taxes: net operating losses.

The existing Personal Income Tax Law and Bank and Corporation Tax Law allow taxpayers, in general, a net operating loss deduction in accordance with specified federal provisions, except that, among other things, net operating loss carrybacks are not allowed, and net operating loss carryovers are limited to only 50% of a net operating loss. These laws also allow qualified taxpayers, as defined, a modified net operating loss deduction.

This bill would, under both laws, extend the operation of the net operating loss provisions indefinitely, provide an additional exception to the federal provisions by allowing a net operating loss carrvover only to each of the 5 taxable or income years following the taxable or income year of the loss, or to each of the 5, 6, 7, or 8, as applicable, taxable or income years following the taxable or income year of the loss in the case of a new business, as defined, and permit 100% of the net operating loss of a new business incurred during the first 3 years of operation to be carried forward, as provided. This bill would authorize a carryover of 100% of the net operating loss of an eligible taxpayer, as defined. These changes would not apply to the net operating loss deduction available to qualified taxpayers.

This bill would take effect immediately as a tax levy.

Ch. 881 (SB 671) Alquist. Personal income and bank and corporation taxes: sales and use taxes.

The existing Sales and Use Tax Law imposes a tax on the gross receipts from the sale of, or the storage, use, or other consumption in this state of, tangible personal property and provides various exemptions from the taxes imposed by that law.

This bill would provide an exemption from those taxes for the gross receipts from the sale of, and the storage, use, or other consumption of, tangible personal property, as defined, purchased for use by a qualified person, as defined, to be used primarily in any stage of manufacturing, processing, refining, fabricating, or recycling of property, as specified. The bill would also exempt the gross receipts from the sale of, and the storage, use, or other consumption of, tangible personal property primarily used by a qualified person in research and development to maintain, repair, measure, or test any property exempted by this bill, or purchased for use by a contractor, as specified, for a qualified

NOTE: Superior numbers appear as a separate section at the end of the digests.

person. The exemption would not apply to any tangible personal property that is used primarily in administration, general management, or marketing. The bill would require that the purchaser furnish the retailer with an exemption certificate, as specified.

This bill would also provide, until January 1, 2004, an exemption from those taxes for qualified property, as defined, purchased for use in any space flight originating at Vandenberg Air Force Base.

This bill would make certain legislative findings and declarations as to the necessity of a special statute.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are generally incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

The existing Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws.

This bill would authorize a credit against those taxes for each taxable and income year beginning on or after January 1, 1995, as specified, in an amount equal to 6% of the amount paid or incurred during the taxable or income year for the purchase of qualified property that is placed in service in this state.

The existing Personal Income Tax Law and the existing Bank and Corporation Tax Law, in partial conformity to federal income tax laws, each allow a credit, for taxable or income years beginning before January 1, 1998, against taxes imposed by those laws for increasing qualified research expenses, as defined.

This bill would extend the operation of the credit indefinitely, and would provide further conformity, with certain modifications, to federal income tax provisions relating to the computation of the credit amount.

The existing Personal Income Tax Law provides various exclusions from income that is subject to the taxes imposed by that law.

This bill would provide under that law that gross income shall not include 50% of any gain from the sale or exchange of qualified small business stock, as defined, held for more than 5 years, and that was acquired at its original issuance on or after August 10, 1993, and before January 1, 1999. It would provide, in connection with the exclusion, that specified provisions relating to the alternative minimum tax, net operating losses, deduction for amounts paid or permanently set aside for a charitable purpose, distributable net income, "S corporations," and filing requirements shall apply, as provided. This bill would require the Legislative Analyst, in conjunction with Franchise Tax Board, to conduct a specified study in connection with the small business stock gain provisions of this bill.

The existing Personal Income Tax Law and the Bank and Corporation Tax Law allow as a deduction in computing taxable income under those laws 80% of the amount of any expense or item for food or beverages, entertainment, amusement, or recreation if the expense or item is directly related to or associated with the active conduct of the taxpayer's trade or business.

This bill would reduce this percentage to 50%.

The existing Bank and Corporation Tax Law imposes taxes measured by income and, in the case of an "S corporation" imposes a tax at a rate of 2½%.

This bill would instead impose a tax at a rate of 1½% on those "S corporations."

Existing law provides, in the case of a business with income derived from or attributable to sources both within and without this state, the income is apportioned between this state and the other states and foreign countries for tax purposes in accordance with a specified formula based on the property, payroll, and sales within and without this state. Existing law permits a qualified taxpayer, as defined, to elect to determine its income under a water's-edge election upon payment of a specified fee and execution of a contract for a 5-year period, as specified. A water's-edge election provides that only the

NOTE: Superior numbers appear as a separate section at the end of the digests.

income and apportionment factors of certain described affiliated corporations may be included for purposes of determining income apportioned to this state.

This bill would delete the requirement that a fee be paid, and instead permit a taxpayer to elect to account for and determine its income pursuant to a water's-edge election for an 84-month period, as specified.

Existing law requires any taxpayer who makes a water's-edge election and who has foreign property, payroll, or sales in excess of $10,000,000 or total assets in excess of $250,000,000, or a higher amount, as specified, to file a domestic disclosure spreadsheet, as specified, with certain information related to the taxpayer's identity, income, and tax liability in each state.

This bill would delete the requirement of filing a domestic disclosure spreadsheet, and would, instead, provide that each taxpayer required to apportion its income shall file an annual information return, as specified. It would require each taxpayer to maintain certain records, documents, and information, and would provide for specified penalties, enforcement, and judicial proceedings in connection therewith.

This bill would incorporate additional changes in Sections 17039 and 23036 of the Revenue and Taxation Code, proposed by AB 57, to be operative only if AB 57 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

This bill would incorporate additional changes in Section 17276 of the Revenue and Taxation Code, proposed by AB 34, to be operative only if AB 34 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

The bill would take effect immediately as a tax levy, however, its provisions would be operative, as specified.

Ch. 882 (AB 2286) Pringle. Booking fees.

Existing law provides for the collection by counties, from arresting agencies, of fees for administrative costs as specified in booking and processing arrested persons.

This bill would redefine administrative costs as specified and would exempt a city, special district, school district, community college district, college, or university from the payment of fees in certain circumstances.

Existing law authorizes a court as a condition of probation to order a convicted person to reimburse the county or arresting agency for these fees and provides that a judgment of conviction may contain an order for the payment of the criminal justice administration fee.

This bill would require the court to so order reimbursement as a condition of probation and would require that the judgment of conviction contain an order for payment of the fee.

Existing law provides, as specified, that any person booked into a county jail pursuant to an arrest is subject to a criminal justice administration fee based on actual administrative costs, as defined.

This bill would revise the definition of actual administrative costs for that purpose.

Ch. 883 (AB 1715) Areias. Small schools: apportionments.

Existing law requires the county superintendent of schools to make a specified computation for each necessary small school, which is in a school district with fewer than 2,501 units of second principal apportionment average daily attendance, as specified.

This bill would deem Mt. Hamilton Elementary School and Harney Elementary School, which are within the Alum Rock Union Elementary School District and the Patterson Joint Unified School District, respectively, as necessary small schools. This bill would, in lieu of the necessary small school apportionment, apportion $20,000 to the Alum Rock Union Elementary School District for Mt. Hamilton Elementary School and $20,000 to the Patterson Joint Unified School District for the Harney Elementary School, in addition to the amount per unit of average daily attendance received by the district as calculated pursuant to provisions governing the calculation of revenue limits for school districts that are not necessary small schools, if the schools do not exceed 20 units of average daily attendance in any fiscal year.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 884 (SB 610) Kelley. Necessary small schools: Coachella Valley Unified School District.

Existing law requires the county superintendent of schools to make specified computations for each elementary and secondary school district that has fewer than 2,501 units of second principal apportionment average daily attendance and maintains at least one school that meets the criteria for a necessary small school, as defined.

This bill would authorize the Coachella Valley Unified School District to claim apportionments for West Shores High School and Sea View Elementary School, which exist within that district, according to the schedule for necessary small high schools. The bill would provide that if the average daily attendance of either of the schools exceeds 300, then the school would no longer be eligible to receive apportionments as a necessary small school.

This bill would repeal this provision as of the July 1 after the Department of Transportation notifies the Legislature and the Secretary of State of completion of a department project, as specified.

This bill would make a legislative finding and declaration of unique circumstances in this regard.

Ch. 885 (SB 516) McCorquodale. Schools: home-to-school transportation.

Existing law requires each school district or any county office of education to receive a home-to-school transportation allowance equal to the transportation allowance received in the prior fiscal year, as specified.

This bill would entitle each county unified school district that is governed by the county board of education that meets 3 specific requirements to receive an additional apportionment of $350,000 for the 1993–94 and 1994–95 fiscal years for home-to-school transportation.

The bill would require each educational entity that receives that additional apportionment to report to the Legislature and the Legislative Analyst, as specified.

Ch. 886 (AB 160) Farr. School district revenues.

Existing law prescribes the calculation by which the revenue limit is determined for school districts in the state, involving the average daily attendance (ADA) of the district, and requires the Superintendent of Public Instruction to apportion to each school district the amount so determined.

This bill would entitle a school district to adjust its ADA in the event of a decline in enrollment in the school district in excess of 10% of its total ADA resulting from the closure of a facility operated by the United States Armed Forces. The bill would provide for this adjustment to the district's ADA for 2 years by an amount based on the result of the enrollment decline. The bill would require a school district that elects to calculate its ADA under these provisions to repay the State School Fund the amount of the augmentation, according to a schedule determined in consultation with the Superintendent of Public Instruction that may not exceed 10 years. If the school district misses one or more payments required by the established repayment schedule, the Controller would be required to withhold from Section A of the State School Fund the defaulted payment, as specified.

This bill would authorize any district that has calculated its ADA under these provisions for 2 years to adjust its revenue limit to the statewide average revenue limit per unit of average daily attendance for its size and type of district in the subsequent years, as specified. This bill would also authorize the Adelanto Elementary School District to adjust its revenue limit to the statewide average revenue limit per unit of average daily attendance for its size and type of district after the 1995–96 fiscal year.

Ch. 887 (AB 103) Quackenbush. Sales and use taxation: intangible rights.

The existing Sales and Use Tax Law imposes a state sales and use tax on the gross receipts from the sale of tangible personal property sold at retail and on the amount of the sales price with respect to the storage, use, or other consumption of tangible personal

NOTE: Superior numbers appear as a separate section at the end of the digests.

property in this state.

This bill would provide that, for purposes of this law, the terms "sales price" and "gross receipts" do not include the amount charged for intangible personal property transferred with tangible personal property in any technology transfer agreement, as defined, under which certain rights are assigned or licensed, as specified, if the agreement separately states a reasonable price for the intangible personal property or if the tangible personal property or like tangible personal property has been previously sold, leased, or offered for sale or lease at a separate price, as specified.

This bill would make a specified statement of legislative intent with respect to those provisions.

Under existing law, counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are automatically incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 888 (AB 134) Farr. Fire suppression services.

Existing law authorizes a local agency to levy an assessment for fire suppression services. Existing law requires an election on a proposed assessment for fire suppression services if protesting property owners will be obligated to pay more than 5% of the proposed assessment. If an election is held, ⅔ of the voters of a county or city and a majority of the voters of a special district are required to approve the proposed assessment. If protesting property owners will pay ⅓ or more of an assessment in a county or city or 50% or more of an assessment in a special district, the assessment is required to be abandoned.

This bill would consolidate the separate provisions relating to a city or county with those relating to a special district or county service area into one provision applying to a local agency and make further changes thus, the bill would require an election only if the protesting property owners will be obligated to pay 10% or more of a proposed assessment for fire suppression services. The bill would require approval by a majority for each proposed assessment of a local agency submitted to the voters and would require a proposed assessment of a local agency to be abandoned if there are protests by property owners who will pay 50% or more of the assessment.

Ch. 889 (AB 1012) Bornstein. Mobilehome parks rules: settlement of disputes.

Existing law guarantees various rights to residents of mobilehome parks.

This bill would make void and unenforceable any rule of a mobilehome park unilaterally adopted by the management, implemented without the consent of the homeowners, and that purports to deny the right to trial by jury or require binding arbitration of disputes between the mobilehome park's management and the owners of mobilehomes therein.

Ch. 890 (AB 1574) Burton. Legislative Counsel: additional legal services.

Existing law requires the Legislative Counsel, upon request, to advise any state agency as to the preparation of measures to be submitted to the Legislature.

This bill would authorize the Legislative Counsel to provide legal services to the State Auditor upon request.

Existing law requires the Legislative Counsel to give consideration to and service concerning any bill in the Governor's hands for rejection, approval, or other action as the circumstances permit and the Governor requests.

This bill would authorize the Legislative Counsel to provide to the Governor, upon request, a written or oral opinion upon any question of law and additional legal services concerning any matter as the circumstances permit. This bill would also require the

NOTE: Superior numbers appear as a separate section at the end of the digests.

Legislative Counsel to maintain an attorney-client privilege with the Governor with respect to communications between the Governor and the Legislative Counsel, as specified.

Ch. 891 (AB 1881) Peace. Taxation: disclosure: agreement with Mexico.

Existing law prohibits the disclosure of any information concerning any taxpayer by the State Board of Equalization, the Franchise Tax Board, and the Director of Employment Development to any person, except as specifically authorized by statute. It permits the disclosure of certain information to the Commissioner of Internal Revenue of the United States, the Multistate Tax Commission, and the tax officers of another state, under specified conditions.

This bill would permit, under specified conditions, the disclosure of tax information to the tax officials of Mexico, if a reciprocal agreement exists. The bill would specify that the reciprocal agreement shall be limited to the exchange between taxing officials of Mexico and taxing authorities of the State Board of Equalization, the Franchise Tax Board, and the Employment Development Department of information essential for tax administration purposes. The bill would provide that California's taxing authorities would be entitled only to tax information regarding California residents, and Mexico's taxing authorities would be entitled only to tax information regarding Mexican nationals.

This bill would incorporate additional changes in Section 1095 of the Unemployment Insurance Code, proposed by SB 857, to be operative only if SB 857 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

Ch. 892 (SB 426) Presley. Minors: dependent children.

Existing law contains various provisions relating to dependent children of the juvenile court, including provisions requiring preferential consideration for placement of the child with a relative who requests placement, and provisions concerning the furnishing of family reunification services, status review hearings, and permanent plans. Existing law requires minors 10 years of age or older to provide specified statements concerning placement, adoption, or guardianship, and provides that a minor 10 years of age or older may object to termination of parental rights, as specified.

This bill would revise these provisions, and would, among other things: change the requirements for the report of the probation officer or child advocate required to be considered by the court at the dispositional hearing, thereby imposing a state-mandated local program; change the factors to be considered by the court in determining whether placement with a relative who requests placement is appropriate; require the county social worker to further investigate the existence of relatives for possible placement, thereby imposing a state-mandated local program; require the court's determination as to whether the provision of reunification services where a parent or guardian is incarcerated or institutionalized would be detrimental to the minor, to be made by clear and convincing evidence; require statements concerning placement, adoption, or guardianship from a minor of any age unless the minor's age or physical, emotional, or other condition precludes his or her meaningful response; provide that a minor 12 years of age or older may object to termination of parental rights; change from 60 days to 90 days the period in which efforts are required to be made to locate an appropriate adoptive family for certain dependent children who are determined to be difficult to place for adoption; and authorize the court, with the consent of the appropriate licensed adoption agency, to appoint a guardian for certain minors until each minor is adopted. The bill would also incorporate changes to Section 361.3 of the Welfare and Institutions Code proposed by SB 270, contingent upon its prior enactment.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 893 (AB 1796) Napolitano. State Teachers' Retirement Law.

The State Teachers' Retirement Law establishes the State Teachers' Retirement System, and sets forth the provisions for its administration and the delivery of benefits to its members.

This bill would recast and recodify these provisions, and would state the intent of the Legislature that the bill would not make any substantive change in the law. It would also provide that any act enacted in 1993 at the 1993–94 Regular Session of the Legislature shall prevail over the bill.

Ch. 894 (AB 202) Collins. California Conservation Corps.

(1) Under existing law, the California Conservation Corps is in the Resources Agency.

This bill would recast existing, and add new, legislative findings and declarations relating to the corps and would name the corps headquarters in Sacramento, the "B.T. Collins California Conservation Corps Building." The bill would require the corps to seek reimbursable work projects in accordance with specified criteria. The bill would require state agencies to use the services of the corps to the maximum extent feasible to carry out projects that promote the mission of the corps. The bill would create the Collins-Dugan California Conservation Corps Fund, require the Controller, upon appropriation by the Legislature and execution of a specified contract, to transfer money to the fund from other designated funds and accounts, authorize the Department of Finance to loan $1,500,000 to the fund from the General Fund, and continuously appropriate the money in the fund to the corps. The bill would authorize the director of the corps to seek nonstate funds. The bill would require, on and after July 1, 1994, that the corps be designated a performance budget department, as specified. The bill would require the corps to report to the Legislature by January 1, 1999, regarding prescribed matters.

(2) Existing law authorizes the Department of Conservation to make grants to certified community conservation corps to perform litter abatement, recycling, and related activities. Money in the California Beverage Container Recycling Fund is continuously appropriated to the department for that purpose, among others.

This bill would delete an obsolete provision and would make technical changes in those provisions.

Ch. 895 (AB 153) Tucker. Motortrucks: passengers.

(1) Existing law prohibits the transportation of a minor under the age of 12 years in the back space of a motortruck unless the space meets specified standards, or the minor is accompanied by an adult over the age of 18 years.

This bill would, instead, prohibit the transportation of any person in or on the back of a pickup truck or a flatbed motortruck operated on a highway and also would prohibit any person from riding in or on the back of the motortruck, unless the person is secured with a restraint system. The system would be required to meet or exceed specified federal motor vehicle safety standards. This bill would exempt the application of the provisions in cases when persons are being transported in an emergency response situation, as defined, and in cases when persons are being transported in an enclosed camper or camper shell that prevents the person from being discharged. The bill would provide that it does not preempt requirements imposed by other state laws or by federal laws regarding that transportation.

Since a violation of those provisions would be an infraction, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 896 (AB 653) Sher. Wild and scenic rivers.

Under existing law, the California Wild and Scenic Rivers Act, specified rivers and segments thereof are included within the California Wild and Scenic Rivers System and are subject to specified protections.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The act requires the Secretary of the Resources Agency to study and submit to the Governor and the Legislature reports on the suitability or nonsuitability of designated potential additions to the system not later than January 1, 1989.

This bill would delete those obsolete designations for potential addition to the system and would designate specified segments of Mill and Deer Creeks for potential addition to the system. The bill would require the suitability studies and reports on the specified segments to be completed by January 1, 1995, and would include the segments within the protections afforded to wild and scenic rivers until January 1, 1996. The bill would require the reports to specifically address specified additional matters and would require the secretary to conduct one or more hearings within the local area. The bill would specify related matters.

The bill would appropriate $100,000 from the Public Resources Account in the Cigarette and Tobacco Products Surtax Fund to the Secretary of the Resources Agency for expenditure in the 1993–94 and 1994–95 fiscal years for the conduct of those suitability studies and the preparation and submission of the reports.

The bill would also repeal an obsolete provision of the act.

Ch. 897 (SB 544) Killea. Public libraries: funding.

Existing law provides that in order for a public library to receive certain state funds in the 1983–84 fiscal year and any fiscal year thereafter, the total amount of the local revenues appropriated for the public library for that fiscal year, including specified tax revenues and other revenues deemed to be local revenues, must be equal to at least the total amount of local revenues appropriated for the public library in the prior fiscal year.

This bill would, for the 1993–94 fiscal year, authorize any city, county, district, or city and county that reduces local revenues appropriated to the public library for the 1993–94 fiscal year to receive those state funds if the amount of that reduction is no more that 20% of the 1992–93 fiscal year appropriation to the public library certified by the fiscal officer of the public library to the State Librarian.

This bill would also authorize a waiver of the level of appropriations of local funds required to receive state funds for any city, county, district, or city and county that demonstrates to the State Librarian that the percentage of the reduction to be made to the appropriation of local funds is no greater than the percentage of the reduction of local revenues received by the city, county, district, or city and county, operating the public library as a result of changes made to statutes enacted during or after the 1991–92 Regular Session having the effect of shifting property tax revenues from cities, counties, special districts, and redevelopment agencies to school districts and community college districts.

Ch. 898 (AB 2053) Gotch. Child care.

(1) Existing law requires the Department of Justice to provide and maintain a trustline registration system, as specified, for child care providers who are not required to be licensed pursuant to law and to provide the California Child Care Resource and Referral Network, which administers the trustline under contract with the State Department of Education, with a continually updated record of trustline applicants and registered trustline child care providers. Existing law authorizes the department to charge trustline applicants a fee not to exceed the costs of its search of the California Criminal History System and the California Child Abuse Central Index. Existing law also requires every child care resource and referral agency to administer certain aspects of the trustline. Existing law further requires the State Department of Education to allocate to each child care resource and referral agency $0.04 per child, as specified, residing in the agency area.

This bill would specify that the trustline fee may not exceed the sum of the costs of the above searches and specified costs related to the trustline that are incurred by the California Child Care Resource and Referral Network and local child care resource and referral programs. Fee proceeds would be continuously appropriated and apportioned to the Department of Justice and the State Department of Education on a percentage basis, thereby making an appropriation. The bill would also delete the requirement that each child care resource and referral agency receive an allocation from the State De-

NOTE: Superior numbers appear as a separate section at the end of the digests.

partment of Education and would require the agencies to provide information on the trustline.

(2) Existing law also requires the State Department of Education, in consultation with representatives, as specified, to select, contract with, and monitor a private consultant for the purpose of evaluating the trustline, as specified.

This bill would require the evaluation by the private consultant to address, among other specified factors, the total public cost per applicant.

(3) Existing law requires child care providers who receive compensation provided by the Alternative Payment Program or the federal Child Care and Development Block Grant Program to register with the trustline to be eligible for that compensation.

This bill would require, to the extent permitted by specified federal law and if funding is available in the Budget Act or other statute, child care providers who receive compensation provided by specified federal programs also to register with the trustline to be eligible for compensation. The bill would require specified providers who receive compensation provided by the At Risk Child Care program to register with the trustline if specified funding conditions exist and would require the State Department of Education to evaluate, as specified, this portion of the trustline registration system.

Ch. 899 (SB 689) Kopp. Driver's licenses: alcohol: minors.

(1) Existing law prohibits a person under 18 years of age, who has a blood alcohol concentration (BAC) of .05% or more, by weight, from driving a motor vehicle. Existing law prohibits any person who has a BAC of .08% or more, by weight, or who is under the influence of alcohol or any drug, or any combination thereof, from driving a motor vehicle. The Department of Motor Vehicles is required immediately to suspend the driving privilege of any person who violates either of those prohibitions.

This bill would prohibit any person who is under 21 years of age from driving a motor vehicle with a blood-alcohol concentration of 0.01% or greater, as measured by a preliminary alcohol screening test. The bill also would prohibit a driver under the age of 21 years from refusing to take a specified preliminary alcohol screening test if requested by a peace officer under specified circumstances. The bill would require the department immediately to suspend the driving privilege of a person who violates either of those prohibitions. By expanding the scope of existing crimes, the bill would create a state-mandated local program. The bill would require the department to inform any person under 21 years of age who applies for a driver's license of those prohibitions.

The bill would prescribe procedures for an officer to follow if the specified preliminary alcohol screening test reveals a blood-alcohol concentration of 0.01% or greater, or if the person refuses to take, or fails to complete, the specified test. By expanding the requirements placed on a peace officer, the bill would create a state-mandated local program. A person who is found by the department to have violated the prohibition would lose his or her driving privilege for one year, or would be delayed by one year in being issued a driver's license. That person would be required to pay $100, in addition to any other licensing fees, to have his or her license issued or reissued.

The bill would provide that a violation of the prohibitions specified above shall not result in a violation point count.

This bill would incorporate changes in Section 13353.2 of the Vehicle Code proposed by this bill and SB 126 to be operative only if both bills are enacted and this bill is enacted last.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 900 (AB 170) Honeycutt. Local government finance: property tax revenue allocations: police protection activities.

Existing law provides, for purposes of property tax revenue allocations in the 1993-94 fiscal year, that the amount of property tax revenue deemed allocated to each special district in the prior fiscal year be reduced by an amount determined in accordance with

NOTE: Superior numbers appear as a separate section at the end of the digests.

certain formulas. It requires that the moneys not allocated to special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund for allocation to school districts, county offices of education, and community college districts.

This bill would establish a partial exemption from these reduction and transfer provisions with respect to community service districts that provide police protection and personal safety services.

Ch. 901 (AB 1224) Knowles. Water.

(1) Existing property tax law requires, for purposes of property tax revenue allocations in each county in each of the 1992–93 and 1993–94 fiscal years, that the amounts of property tax revenues deemed allocated to the county, and each city and special district, in the prior fiscal year be reduced by amounts determined by certain formulas and calculations. It requires that the moneys not allocated to the county, cities, and special districts as a result of these reductions be transferred to a specified fund for allocation to school districts, county offices of education, and community college districts.

This bill would exempt the costs incurred by certain utility and sanitation districts in complying with state water quality control laws from these, and any subsequent, reduction and transfer requirements. By requiring local officials to modify property tax revenue allocations for the 1992–93 fiscal year, this bill would impose a state-mandated local program.

(2) The Tahoe-Truckee Sanitation Agency Act authorizes the board of directors of the Tahoe-Truckee Sanitation Agency to receive reimbursement from the agency for travel expenses.

This bill would require each member of the board to receive compensation that is prescribed, by ordinance, by the board and that is not more than the maximum amount specified in a prescribed provision of existing law, thereby imposing a state-mandated local program. The bill would prohibit the members of the board from receiving compensation from more than one public agency for attendance at a board meeting or for each day of service rendered as a member of the board.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 902 (AB 1251) Polanco. Redevelopment in-lieu payments to taxing agencies: debt instruments.

(1) Under existing law, redevelopment agencies are empowered to pay taxing agencies with territory in a redevelopment project of the redevelopment agency, any amounts of money determined by the redevelopment agency to be necessary and appropriate to alleviate any financial burden or detriment caused to the taxing agency by the redevelopment project. These payments cannot, with certain exceptions, exceed the amount of property tax revenues diverted from the taxing agency by the redevelopment project.

This bill would allow specified taxing agencies in a county with a population over 4,000,000, and that are receiving these payments under an agreement with a redevelopment agency, to pledge the payments for payment of debt instruments that the bill would authorize these taxing agencies to issue for specified purposes of the taxing agency, but the bill would require a ⅘ vote of the local agency's governing body to use this borrowing to fund current operating expenses. The bill would provide that these instruments, their transfer, and the income from the debt instruments issued under the bill shall be exempt from taxation by the state and its municipalities and political subdivisions.

(2) Existing property tax law requires, for purposes of property tax revenue allocations in each county for the 1993–94 fiscal year, that the amounts of property tax revenue deemed received by the county, and each city and special district, in the prior fiscal year

NOTE: Superior numbers appear as a separate section at the end of the digests.

be reduced by amounts determined by certain formulas. Existing law requires that the moneys not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund for allocation to school districts, county offices of education, and community college districts.

This bill would provide for specified adjustments in the amounts to be transferred to the Educational Revenue Augmentation Fund by charter cities meeting specified criteria. The bill would declare that these provisions would prevail over any provisions of the same code and section number enacted by AB 1519 during the 1993 calendar year.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 903 (SB 1061) Mello. Small business: direct loan programs.

Existing law, the Small Business Development Corporation Law, provides for a small business development corporation loan guarantee fund for the purpose of making and guaranteeing loans to small businesses approved by a small business development corporation. Under existing law, the Office of Small Business may loan trust funds to a corporation located in a rural area for the purpose of lending those funds to an identified borrower.

This bill would additionally authorize, upon approval of the executive director, a corporation to borrow trust funds, not exceeding $50,000 per loan, from the Office of Small Business for the purpose of relending those funds to small businesses, as specified. The bill would prohibit more than 25% of any trust fund being used for such direct lending.

This bill would incorporate additional amendments to Section 14070 of the Corporations Code proposed by SB 852, contingent upon the prior enactment of that bill.

Ch. 904 (SB 837) Wright. Local government finance.

Existing property tax law requires, for purposes of property tax revenue allocations in each county for the 1993–94 fiscal year, that the amounts of property tax revenue deemed received by the county, and each city and special district, in the prior fiscal year be reduced by amounts determined by certain formulas. It would require that the moneys not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund for allocation to school districts, county offices of education, and community college districts.

This bill would establish or clarify exemptions from the reduction and transfer provisions with respect to certain fire protection and certain multicounty districts. This bill would also modify reductions and transfers made from certain subsidiary districts of a city. By imposing additional duties on local tax officials in the allocation of property tax revenues, this bill would impose a state-mandated local program. This bill would also make other technical or clarifying changes to the reduction and transfer provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 905 (AB 1519) Isenberg. Local government finance.

(1) Existing law provides that the board of supervisors may consolidate the duties of certain county offices in specified combinations.

This bill would permit the board of supervisors to reorganize the delivery of services by consolidation, integration, or separation of duties and functions of county offices, as specified.

(2) Existing law requires that revenues from the imposition of a portion of the state sales and use taxes be allocated to certain counties for local public safety services, as

NOTE: Superior numbers appear as a separate section at the end of the digests.

defined.

This bill would revise the allocation of those revenues in a specified county and clarify the definition of local public safety services to include ocean lifeguards.

(3) Existing property tax law requires the county auditor, in computing assessments on the supplemental tax roll, to apply the tax rate for the "roll being prepared," if that rate is known, to the fiscal year to which it applies.

This bill would instead authorize, but not require, this application for purposes of supplemental assessments of a known tax rate for the "roll being prepared," and would specify the applicable rate where the former rate is not known.

(4) Existing property tax law requires, for purposes of property tax revenue allocations in each county for the 1993–94 fiscal year, that the amounts of property tax revenue deemed received by the county, and each city and special district, in the prior fiscal year be reduced by amounts determined by certain formulas. It requires that the moneys not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund for allocation to school districts, county offices of education, and community college districts.

This bill would revise the reductions for special districts and would establish separate reduction calculations for certain consolidated or reorganized districts, and for certain subsidiary districts. This bill would establish or clarify exemptions from the reduction and transfer provisions with respect to certain fire protection districts, certain multicounty districts, and disaster-related property tax revenue losses in certain cities and counties. It would also modify allocations of property tax revenues with respect to enterprise special districts in a specified county. By imposing additional duties on local tax officials in the allocation of property tax revenues, this bill would impose a state-mandated local program. This bill would also make other technical or clarifying changes to the reduction and transfer provisions.

(5) Existing property tax law provides for the separate assessment of timeshare estates upon written request and provides that the taxes due on a separately assessed timeshare estate shall be a lien solely on that estate and be entered on the secured roll.

This bill would, as provided, authorize the transfer of defaulted taxes with respect to a separately assessed timeshare estate from the secured roll to the unsecured roll.

(6) The existing Transactions and Use Tax Law provides, with specified exceptions, that the combined rate of all taxes imposed pursuant to its provisions in any county shall not exceed 1.5%, and that no tax shall be considered in accordance with its provisions if, upon that tax's adoption, the combined rate will exceed 1.5%.

This bill would make corresponding technical changes to other provisions that permit counties to impose additional transactions and use taxes.

(7) This bill would make other changes regarding the financing of local government activities including provisions relating to the collection of delinquent fees and assessments in a specified county, the transfer of certain county moneys to county general funds, and the funding of children-related services in certain counties.

(8) This bill would make certain legislative findings and declarations regarding specified litigation and would state the intent of the Legislature in enacting certain statutes.

(9) Existing law prescribes a formula by which state assistance for schools based upon average daily attendance is computed.

This bill would establish a special formula, applicable for the 1993–94 and 1994–95 fiscal years, for computing the amount of this assistance for the Hemet Unified School District.

(10) This bill would contain legislative findings as to the necessity of a special statute.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide, with respect to a specified provision of this bill, that no reimbursement is required for a specified reason. This bill would also provide that, if the Commission on State Mandates determines that any of the remaining provisions of this bill contain costs mandated by the state, reimbursement for those costs shall be made

NOTE: Superior numbers appear as a separate section at the end of the digests.

pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(12) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 906 (AB 557) Farr. Local government.

Existing law establishes the sole procedure by which a local agency or school district may claim reimbursement for costs mandated by the state under Section 6 of Article XIII B of the California Constitution by filing a claim with the Commission on State Mandates. Existing law requires the Controller to pay and audit claims from funds made available for that purpose.

This bill would provide that a reimbursement claim for actual costs filed by a local agency or school district in accordance with specified provisions is subject to audit by the Controller no later than 4 years after the end of the calendar year in which the claim is filed or last amended, except as specified. The bill would also require the Controller to notify the claimant in writing within 30 days after issuance of a remittance advice of any adjustment to a claim for reimbursement that results from an audit or review.

Existing law permits the board of supervisors by a ⅘ vote to appropriate up to $1,000,000 of its available moneys to a revolving fund for specified uses relating to county service areas under prescribed conditions, including reimbursement.

This bill would permit the Board of Supervisors of Santa Barbara County to make disbursements from the revolving fund without the requirement of reimbursement.

Under existing law, various duties pertaining to elections are performed by the county clerk. The county clerk is an elective office, unless the voters of the county have approved a proposal to make the office appointive. A county may also provide for an office of registrar of voters.

An existing provision presently states that in Monterey, Riverside, San Joaquin, Solano, and El Dorado Counties, a registrar of voters may be appointed by the county board of supervisors to discharge all duties vested by law in the county clerk which relate to, and are part of, the election procedure.

This bill would extend similar authority to Merced and Tulare Counties.

Existing law, relating to county retirement systems, generally permits system members who were public service employees before becoming members to make contributions and to receive credit for all allowed public service time under specified conditions.

This bill would permit the San Mateo County Board of Supervisors to adopt a resolution authorizing persons hired by the county before January 1, 1993, and employed by the county on December 31, 1992, to make contributions to the retirement system to receive credit for prior military service, as specified.

Existing law, the Cortese-Knox Local Government Reorganization Act of 1985, sets forth the procedures for the initiation, conduct, and completion of changes of organization and reorganization for cities and districts. That act defines the term "district" or "special district" for purposes of the act. The act also by definition excludes specified entities from certain provisions of the act.

This bill would include within a category of entities to which the act has limited application a separation of grade district.

Existing law permits either of 2 named cities to annex certain noncontiguous territory under specified conditions.

This bill would correct an erroneous word in that provision.

Existing law relating to changes of organization or reorganization of local agencies, requires the election on the question of the change of organization or reorganization to be called and held on the next regular election date occurring at least 88 days after the adoption by the conducting authority of the resolution calling for the election.

This bill would make this requirement inapplicable to an election conducted solely by mail ballot, as specified.

Existing law concerning community services districts provides that, among other things, a district that has been granted consent by the governing body of the county or city to exercise certain powers relating to street improvements shall have the powers, duties, and authority of a county road commissioner with respect to roads accepted for maintenance by the district.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would correct an obsolete reference in that provision.

Existing law, relating to subdivision maps, requires, among other things, that the county surveyor or other designated public official or employee shall complete and file with his or her legislative body his or her certificate or statement stating certain information within 20 days from the time the parcel map is submitted to him or her by the subdivider for approval.

This bill would additionally require the appropriate official to place the stamp of his or her seal on the certificate or statement. The bill, instead of requiring the filing, require that the parcel map be delivered to the office of the county recorder or filed with the legislative body, as provided by local ordinance, within that 20-day period.

Existing law specifies the requirements to which an amending map, if it is a parcel map, shall conform.

This bill would delete one of those requirements.

Existing law provides that, prior to filing the final map or parcel map with the legislative body, the subdivider shall file with the county recorder a certificate or statement showing that there are no liens against the subdivision for unpaid taxes or assessments. Existing law provides that whenever any part of the subdivision is subject to a lien for taxes or special assessments collected as assessments, the final map or parcel map shall not be recorded until the owner or subdivider files an official estimate of those taxes and assessments and executes and files security conditioned upon the payment of all taxes and assessments, as specified.

This bill would make those requirements inapplicable to amending maps.

Existing law, relating to subdivisions, permits a city or county to cause the reversion to acreage of land previously subdivided and consisting of 4 or less contiguous parcels under the same ownership by the filing of a map, as specified. The filing of the map also constitutes the abandonment of all streets and easements not shown on the map. Under existing law, subdivided lands may be merged and resubdivided by the filing of a final map or parcel map that also constitutes the abandonment of all streets and easements not shown on the map.

This bill would provide, with respect to these provisions, that the filing of the map also constitutes abandonment of all public streets and public easements not shown on the map if a written notation of each abandonment is listed by the recording data creating those public streets or public easements and certified on the map by the clerk of the legislative body approving the map.

Existing law authorizes a city, county, city and county, or a fire protection district to adopt building standards relating to fire and panic safety that are more stringent than those contained in the California Building Standards Code, as specified.

This bill would correct an obsolete reference in those provisions.

Existing law prohibits the enforcement agency of any city, county, or city and county from requiring a new or modified building requirement different from those specified in the plans and specifications, as defined, approved during plan checking functions for which a building permit is issued unless any of specified conditions apply.

This bill would change the term "building requirement" in that provision to "building standard," define "permittee," and make related changes.

Existing law regulates the contracts of the Solano County Water Agency.

The bill would make technical nonsubstantive changes.

Existing law provides, for purposes of property tax revenue allocations in the 1993–94 fiscal year, that the amount of property tax revenue deemed allocated to each special district in the prior fiscal year be reduced by an amount determined in accordance with certain formulas. It requires that the moneys not allocated to special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund for allocation to school districts, county offices of education, and community college districts.

This bill would establish full or partial exemptions from these reduction and transfer provisions with respect to veterans' memorial districts.

Existing law provides that the board of directors of a water district shall either appoint an auditor or treasurer to carry out specified duties or retain an auditor and an independ-

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

ent contractor to conduct an annual audit.

This bill would state that the auditor retained as an independent contractor shall not be the appointed auditor or treasurer.

Existing law concerning the Placer County Flood Control and Water Conservation District requires the board of supervisors to choose one of the 2 methods of selecting the district board of supervisors.

This would permit a 3rd method of selection, as specified.

Existing law provides that in order to be eligible for election or appointment each director of the board of the Santa Clara County Flood Control and Water District must have been a qualified elector in the district he or she represents for at least 2 years prior to election or appointment.

This bill would eliminate the 2-year residency requirement.

Existing law relating to the board of the Sonoma County Flood Control and Water Conservation District specifies that directors receive no compensation other than actual and necessary expenses in the performance of their duties.

This bill would state that they shall receive no additional compensation other than those expenses.

Existing law with respect to that district makes various county officials ex officio members of the district for which they receive no additional compensation.

This bill would permit the district, by agreement with the county, to reimburse the county for the costs of duties performed by some ex officio members, as specified.

This bill would incorporate additional changes in Section 97.035 of the Revenue and Taxation Code as that section is proposed to be enacted by AB 1519 to be operative only if AB 1519 and this bill are both chaptered and become operative on or before January 1, 1994, and this bill is chaptered last.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 907 (SB 814) Greene. Alcoholic beverages: tied-house restrictions.

Existing tied-house restrictions prohibit a manufacturer, winegrower, manufacturer's agent, rectifier, California winegrower's agent, distiller, bottler, importer, and wholesaler, and any officer, director, or agent of any of those persons, from having specified relationships with an on-sale alcoholic beverage licensee with limited exceptions.

This bill would provide additional exceptions to those restrictions by authorizing any licensee or officer, director, employee, or agent of a licensee that holds no more than 8 on-sale licenses to hold not more than 16.67% of the stock of a corporation that holds beer manufacturer licenses that are located in Sacramento, Placer, El Dorado, Marin or Napa County, and to serve on the board of directors and as an officer or employee of that corporate licensed beer manufacturer. That on-sale licensee would be prohibited from purchasing alcoholic beverages for sale in this state other than from a licensed wholesaler or wine grower.

The bill would state legislative intent.

Ch. 908 (SB 472) Committee on Energy and Public Utilities. Public utilities.

Existing law requires the Public Utilities Commission to require electronic utilities to implement specified pilot projects relating to a generation resource bidding system, an integrated bidding system, and competitive bidding auctions for demand side services, and to report to the Legislature on the results of the programs on or before January 1, 1993.

This bill would require the report instead to be made at the earliest practicable time.

Existing law authorizes the Public Utilities Commission to supervise and regulate every public utility in the state and to do all things necessary and convenient in the exercise of its power and jurisdiction. Various provisions relating to public utilities refer to persons operating vehicles requiring a class 1 driver's license. Reference to class 1 licenses are obsolete under existing law, since references to class 1 licenses have been changed to class A.

This bill would revise these provisions by correcting the class 1 references to read class A.

Under existing law, no person or corporation may operate a passenger stage without

NOTE: Superior numbers appear as a separate section at the end of the digests.

a certificate of public convenience and necessity issued by the Public Utilities Commission covering the proposed operations. The commission may issue a certificate to operate in a territory being served by a passenger stage corporation pursuant to a certificate only when the certificated corporation will not provide the proposed service to the commission's satisfaction.

This bill would make a nonsubstantive change in those provisions.

The bill would incorporate changes made in Sections 3353 and 3584 of the Public Utilities Code by AB 1646, which would become operative if AB 1646 is enacted and this bill is enacted after AB 1646.

Ch. 909 (SB 15) Lockyer. Judiciary: crimes.

(1) Existing law prohibits a judge from receiving added compensation for performing an official act.

This bill would state that the lawful compensation of a temporary judge shall be prescribed by Judicial Council rule.

(2) Existing law denominates all judges of courts of record as magistrates.

This bill would make the night-time commissioner of the Santa Clara County Superior Court a magistrate for purposes of conducting probable cause hearings, as specified.

(3) Existing law requires the Judicial Council to collect, analyze, quarterly distribute, and publish relevant information on sentencing practices to trial judges and other interested persons.

This bill would revise this duty to, instead, collect and analyze relevant information on sentencing practices.

(4) Under existing law, when the court waives fees and costs for a prevailing litigant proceeding in forma pauperis and that litigant would have been entitled to recover those fees and costs under a judgment had they not been waived, the court may assess the waived fees and costs against the other party and order them paid to the county.

This bill would alternatively authorize the court to order these fees and costs paid to the clerk or serving or levying officers, and would specify procedures for collection. The bill would also require county boards of supervisors to set an additional fee of up to $25 for administration of these provisions.

(5) Existing law authorizes specified conversion of justice courts to municipal courts and consolidation of judicial districts.

This bill would provide that neither such a conversion or consolidation nor any election or failure to make an election under specified law by an affected judge shall affect the judge's rights and obligations under prescribed provisions relating to state and local contributions for judges' health benefits.

(6) Existing law requires the trial courts to submit quarterly reports to the Judicial Council on cost reduction goals associated with coordination plans, factors impacting court costs and revenue collection, and uniform fiscal information on court expenditures and revenues prepared by the county auditor. Except for the 4th quarter, these reports are required to be submitted within 3 months after the end of the quarter. Existing law requires the 4th quarter report to be submitted within 4 months after the end of the quarter.

This bill would require the 4th quarter report to be submitted within 3 months after the end of the quarter.

(7) Existing law requires development of prescribed trial court coordination plans and authorizes implementation, as specified.

This bill would declare that coordination, consolidation, merger, or conversion of trial courts pursuant to those provisions or otherwise shall not itself cause any reduction in employee benefit programs. The bill would declare this to be existing law and require retroactive refund of any benefits withheld from June 30, 1992, until the effective date of the bill.

(8) Existing law requires the Controller to draw warrants for payment of judges' extra compensation or expenses.

This bill would instead require the Judicial Council to draw the warrants.

(9) The Brown-Presley Trial Court Funding Act contains various provisions relating to trial court funding.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete the definitions in that act of "block grant," "fine," "forfeiture" and "penalty assessment" and would revise the definition of "court operations."

(10) Existing law contains various penalties for violations of the Vehicle Code, including willful violation of a promise to appear for such a violation and willful failure to pay a fine for a Vehicle Code violation or violation of an ordinance adopted pursuant thereto.

This bill would make it a misdemeanor for any person to comply with a court order for a Vehicle Code violation.

Ch. 910 (SB 687) Boatwright. Corporations: foreign professional corporations.

Existing law provides for the formation of corporations under the General Corporation Law for the purposes of qualifying as a professional corporation, and permits a professional corporation to render professional services through persons who are licensed in the profession.

This bill would authorize specified foreign professional corporations to qualify as a foreign corporation to transact intrastate business, and would provide for the rendering of professional services in this state or for residents of this state by persons who are licensed to render those services in the jurisdiction in which the services are rendered. The bill would enact related provisions.

This bill would incorporate additional amendments to various sections proposed by SB 312, contingent upon the prior enactment of that bill.

Ch. 911 (SB 754) Hughes. State Teachers' Retirement System: optional settlements.

The existing State Teachers' Retirement Law authorizes a member to elect from specified optional settlements which provide, upon the postretirement death of the retirant, for specified lifetime payments to a beneficiary designated by the member. A 1990 statute added 2 additional optional settlements, Options 6 and 7, which are commonly known as "pop-up" options.

This bill would authorize any service retirant who retired under Option 2 or Option 3 with an effective date prior to January 1, 1991, to elect, subject to specified conditions, including a statement of the retirant under penalty of perjury that to the best of his or her knowledge the named option beneficiary is not afflicted with any known terminal illness, to change Option 2 to Option 6 or Option 3 to Option 7, naming the same option beneficiary, during the 6-month period from July 1, 1994, through December 31, 1994. By extending the crime of perjury to this election, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 912 (SB 419) Wright. Reusable soiled textile materials.

(1) Existing law prohibits any person from managing hazardous waste except as provided in the statutes and regulations governing hazardous waste. Existing law also imposes specified fees, including a facility fee, upon hazardous waste generators and facilities, for deposit in the Hazardous Waste Control Account. Under existing law, the money in the Hazardous Waste Control Account is available, upon appropriation, to the Department of Toxic Substances Control for hazardous waste management and for removal and remedial actions to hazardous substance releases, and may also be expended by the Office of Emergency Services, upon appropriation in the annual Budget Act, to implement the federal Emergency Planning and Community Right-to-Know Act of 1986. Existing law exempts the owners of hazardous waste facilities authorized by the department to operate pursuant to a permit-by-rule, or under a grant of conditional authorization, or facilities exempt from hazardous waste facilities permitting requirements, from the facility fee for specified activities. Under existing law, a violation of any provision regulating hazardous waste is a crime.

This bill would exempt reuseable soiled textile materials, as defined, from the facility and generator fees and from specified requirements concerning the transportation of

NOTE: Superior numbers appear as a separate section at the end of the digests.

hazardous waste, if the materials are managed in a specified manner, and would exempt a facility laundering or cleaning reusable soiled textile materials from the requirements of obtaining a hazardous waste facilities permit and financial assurances if the facility complies with specified requirements, thereby imposing a state-mandated local program by creating a new crime.

The bill would require a generator of those materials to pay a fee to the State Board of Equalization for deposit in the Hazardous Waste Control Account, thereby imposing a state-mandated local program by creating new crimes and thereby imposing a tax for purposes of Article XIII A of the California Constitution.

The bill would exempt a qualified facility operating pursuant to a standardized permit from the facility fees for certain activities carried out before January 1, 1993.

(2) Existing law, the Wright-Polanco-Lempert Hazardous Waste Treatment Permit Reform Act of 1992, deems a generator who conducts specified treatment activities, upon notifying the department to be conditionally authorized to operate without obtaining a hazardous waste facilities permit or other grant of authorization, and also exempts from hazardous waste facilities permit requirements and corrective action requirements a generator who treats not more than specified amounts of hazardous waste, in any month, or generators conducting specified treatment processes, if specified requirements are met with regard to that hazardous waste. Existing law requires that a generator operating pursuant to a permit-by-rule or under a grant of conditional authorization pay a fee of $1,140 for the 1993 reporting period to the board. A violation of the act is a crime.

The bill would additionally require owners and operators of a facility or a transportable treatment unit operating pursuant to a permit-by-rule to pay a fee of $1,140 for the 1993 reporting period to the board. The bill would require the fees for the 1993 reporting period to be submitted to the department when specified notifications are required to be submitted. The bill would make related changes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 913 (SB 1091) Killea. Household hazardous waste: small quantity generators.

(1) Existing law requires operators and owners of hazardous waste facilities to obtain a hazardous waste facilities permit or grant of authorization from the Department of Toxic Substances Control and exempts from these requirements a household hazardous waste collection facility operated by a public agency, or by any person under an agreement with a public agency, if the facility accepts only certain materials which are transported to, and managed at, the facility in a specified manner and in specified amounts. Existing law requires the department to allow any city, county, or district which operates a household hazardous waste program, or any person operating a household hazardous waste collection program under an agreement with a public agency, to allow small quantity commercial sources which comply with specified criteria to participate in the program.

Existing law requires any person transporting hazardous waste to have in his or her possession a manifest, as specified, and exempts persons transporting latex paint, antifreeze, small batteries, spent lead-acid batteries, or used oil to a household hazardous waste collection facility in a prescribed manner from that manifest requirement. Existing law imposes specified fees upon persons applying for various permits to manage hazardous waste and exempts from these fees variances issued to a local government agency to transport wastes for purposes of operating a household hazardous waste facility or from a household hazardous waste facility receiving hazardous waste from small quantity commercial sources. Under existing law, a violation of any provision regulating hazardous waste is a crime.

This bill would revise and recast the provisions regulating household hazardous waste. The bill would make a statement of legislative intent, would define terms, and would require a public agency, or its contractor, that intends to operate a household hazardous

NOTE: Superior numbers appear as a separate section at the end of the digests.

waste collection facility, to submit specified information to the department. The bill would authorize the department to allow any household hazardous waste collection facility to accept hazardous waste from conditionally exempt small quantity generators (CESQGs) and would authorize a public agency, or its contractor, that accepts hazardous waste from CESQGs, to charge CESQGs a fee for the cost incurred in handling their hazardous waste.

The bill would authorize the department to adopt and revise regulations for household hazardous waste collection facilities. The bill would exempt a person transporting household hazardous waste and a CESQG transporting hazardous waste to an authorized household hazardous waste collection facility from the requirements of registration as a hazardous waste transporter and possession of a manifest, if specified requirements are met, and would impose specified requirements upon the transportation of hazardous waste to a household hazardous waste collection facility and the operation of curbside and door-to-door household hazardous waste collection programs and household hazardous waste residential pickup services. The bill would exempt from specified fees the hazardous waste generated or disposed of by the operator of a household hazardous waste collection facility, and would additionally exempt from those fees the operation of such a facility.

The bill would require a hazardous waste facilities permit to be obtained for the operation of a household hazardous waste collection facility, except as specified. The bill would require the public agency, or its contractor, operating a household hazardous waste collection facility to submit a specified form to the department on or before October 1 of each year.

The bill would make conforming changes.

Since a violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program by creating new crimes.

(2) The bill would incorporate changes to Section 25201 of the Health and Safety Code proposed by both this bill and SB 796, which would become operative if both bills are enacted and become effective on January 1, 1994, and amend that section. The bill would also incorporate changes to Section 25205.7 of the Health and Safety Code proposed by this bill and SB 27, which would become operative if both bills are enacted and become effective on or before January 1, 1994, and both bills amend that section.

The bill would also provide that if SB 922 is enacted and becomes effective on or before January 1, 1994, and amends Sections 25174.7, 25205.1, and 25205.7 of the Health and Safety Code, the changes proposed by that bill to those sections would prevail over the changes made by this bill to those sections, regardless of whether this bill is chaptered before or after SB 922.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 914 (AB 1707) Farr. Hazardous waste facility fees: municipal landfill.

Existing law requires each operator of a hazardous waste facility to pay to the State Board of Equalization a facility fee for each reporting period, for deposit in the Hazardous Waste Control Account. Under existing law, the money in the account is available, upon appropriation, to the Department of Toxic Substances Control for hazardous waste management and for removal and remedial actions to hazardous substance releases. A person who is in a closure period approved by the department is not subject to that fee for any reporting period in which the closure was granted or approved by the department, or in the reporting period following any reporting period in which the facility has completed all activities necessary for the department to approve the closure.

This bill would additionally exempt from the facility fee a city, located in the County of Santa Cruz, that operates a municipal landfill and that has not received any hazardous waste on or after January 1, 1986, if the city did not receive a written annual notification from the department or the board, in accordance with specified requirements, that the fee would be due on or after January 1, 1986.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would make a legislative declaration that a general statute cannot be made applicable within the meaning of Section 16 of Article IV of the California Constitution for specified reasons.

The changes made by the bill to Section 25205.2 of the Health and Safety Code would not take effect if SB 922 of the 1993–94 Session of the Legislature is enacted and takes effect January 1, 1994, and amends Section 25205.2 of the Health and Safety Code in a specified manner, whether that bill is enacted prior to, or subsequent to, this bill.

The bill would incorporate amendments to Section 25205.2 of the Health and Safety Code proposed by this bill and SB 27, which would become operative only if SB 27 is enacted first and SB 922 is not enacted.

Ch. 915 (AB 1310) Alpert. School districts: pupil attendance alternatives.

(1) Existing law requires the governing board of each school district, as a condition for the receipt of school apportionments from the State School Fund, to adopt rules and regulations establishing designated school district policies.

This bill, in addition, would require the governing board of each school district, except for certain small school districts, as a condition for the receipt of those funds, to adopt rules and regulations, on or before July 1, 1994, establishing a policy of open enrollment within the district for residents of the district, and would thereby impose a state-mandated local program. The bill would require the open enrollment policy, subject to specified limitations, to authorize the parent or guardian of each schoolage child to select the school that the child shall attend, irrespective of the particular location of his or her residence within the district. The bill would require the governing board of the school district to determine the capacity of the schools in its district for the purposes of the open enrollment policy and would thereby impose a state-mandated local program.

(2) Under law that will become effective on January 1, 1994, a school district that elects to accept interdistrict transfers must by resolution, elect to accept transfer pupils and determine and adopt the number of transfers it is willing to accept. Also under that law, a school district may place certain limits on the number of pupils transferring out each year.

This bill would clarify that the provisions relating to the number of transfers a school district is willing to accept and the limitations a school district places on pupils transferring out apply only to those transfers accepted and transfers out made pursuant to the provisions authorizing interdistrict attendance.

(3) Under law that will become effective on January 1, 1994, any pupil's parent or guardian may apply for an interdistrict transfer for the pupil to certain school districts between January 1, 1994, and January 1, 1998.

This bill would permit any pupil's parent or guardian to apply for an interdistrict transfer for the pupil to certain school districts between January 1, 1994, and January 1, 1999.

(4) Under law that will become effective on January 1, 1994, the school district, as to pupils admitted to a school district under this interdistrict transfer authority, is credited with a corresponding increase in average daily attendance for purposes of certain computations under the Leroy F. Greene State School Building Lease-Purchase Law of 1976.

This bill would require the State Allocation Board to develop procedures to ensure that the average daily attendance of pupils admitted by a school district under the above-stated application procedure is so credited to that school district.

(5) Under existing law that will become effective on January 1, 1994, school district governing boards will be required to report specific information regarding requests made for alternative attendance to the Superintendent of Public Instruction by January 1, 1995.

This bill would revise that reporting date to January 1, 1996.

(6) Existing law requires the governing board of each school district to notify the parent or guardian of its minor pupils regarding certain provisions relating to education at the beginning of the first semester or quarter of the regular school term.

This bill, in addition, would require the governing board to notify the parent or guardian of attendance options available in the school district, as specified, including any special programmatic options available on an interdistrict and intradistrict basis, and

NOTE: Superior numbers appear as a separate section at the end of the digests.

would thereby impose a state-mandated local program. The bill would require the State Department of Education to produce certain portions of the notification and to distribute it to all school districts.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 916 (AB 672) Woodruff. Geological hazards.

(1) Under existing law, the Alquist-Priolo Special Studies Zones Act, the State Geologist is required to delineate special studies zones, encompassing certain areas of earthquake hazard, and to compile maps delineating those zones. Cities and counties are required, prior to approval of a project, as defined, to require a geologic report defining and delineating any hazard of surface fault rupture, unless the report is waived, as specified. The act does not apply to any development or structure in existence prior to May 4, 1975, or to alterations or additions to any structure, the value of which does not exceed 50% of the value of the structure.

This bill would limit the exemption for a structure that was in existence prior to May 4, 1975, by excluding an alteration or addition to the structure that exceeds 50% of the value of the structure, thereby imposing a state-mandated local program by increasing the structures subject to regulation by cities and counties.

The bill would additionally exempt from the act alterations which include seismic retrofitting, to unreinforced masonry buildings, concrete tilt-up buildings, and reinforced concrete moment resisting frame buildings which are in existence before May 4, 1975, if the city or county takes specified actions with regard to that building. The bill would reorganize provisions pertaining to the application of the act and make technical and clarifying changes.

(2) Under the Tort Claims Act, a public entity is not liable for an injury caused by adopting or failing to adopt an enactment or failing to enforce any law.

This bill would make a city or county, which knowingly issues a permit that grants an exemption and does not adhere to specified requirements, potentially liable for any earthquake-related injuries or deaths caused by the city or county's failure to adhere to those requirements, notwithstanding the Tort Claims Act.

(3) Under existing law, a geologic hazard abatement district may be formed pursuant to specified provisions for the purpose of prevention, mitigation, abatement, or control of a geologic hazard, as defined.

This bill would also authorize the formation of a district for the mitigation or abatement of structural hazards that are partly or wholly caused by geologic hazards. The bill would revise the definition of geologic hazard to specifically include a fault movement. The bill would authorize geologic reports required by the act for multiple projects to be undertaken by a geologic hazard abatement district. The bill would declare legislative intent.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 917 (AB 424) Peace. Workers' compensation.

Existing law relating to workers' compensation requires private self-insuring employers to secure incurred liabilities by making a deposit based upon estimated future liability for compensation.

This bill would provide that in determining the amount of the deposit, the Administra-

NOTE: Superior numbers appear as a separate section at the end of the digests.

tive Director of the Division of Workers' Compensation shall offset estimated future liabilities for the same claims covered by a self-insured plan under the Longshore and Harbor Workers' Compensation Act, as specified. The bill would also provide that, at the employee's option, recovery may be pursued under either the state or federal program. The bill would enact related provisions for the coordination of state and federal workers' compensation provisions as they affect self-insured employers.

Ch. 918 (AB 2087) Takasugi. Juveniles: escape.

(1) Under existing law, any person in custody in, or committed to, any of enumerated county juvenile facilities who escapes or attempts to escape from the facility, or during transportation to or from the facility, is guilty of a misdemeanor punishable by imprisonment in the county jail for up to one year.

This bill would provide that the willful failure by such a person to return to such a facility while outside or away from the facility on furlough or temporary release, except as specified, constitutes an escape, punishable as a misdemeanor. Because the bill would establish a new crime it would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 919 (AB 1518) Aguiar. Automobile insurance.

Existing law authorizes a peace officer, as defined, who has been involved in an accident to submit to his or her private automobile insurer within 30 days of the accident his or her written declaration under penalty of perjury as to whether he or she was operating an authorized emergency vehicle, or in lieu of that declaration to submit a copy of the incident report.

This bill would make that provision applicable to a firefighter, as defined. By making a new class of persons subject to the penalty of perjury provision the bill would create a new crime and impose a state-mandated local program.

Existing law prohibits an insurer from failing to renew private automobile insurance of a peace officer, firefighter, or member of the California Highway Patrol with respect to operation of a private motor vehicle, for the reason that the insured has been involved in an accident while operating an authorized emergency vehicle in the performance of his or her duties, as specified.

This bill would, for those purposes, define a "firefighter" and provide that with respect to a volunteer firefighter, the section applies to his or her regular employer, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 920 (AB 1631) Karnette. STRS: administration: required information.

A provision of the existing State Teachers' Retirement Law specifies the conditions under which a member is required to present the system with proof of his or her date of birth.

This bill would repeal that provision and, instead, would specify the conditions under which proof of the date of birth of a member, a beneficiary under an optional settlement, a child, a surviving spouse, or a dependent parent is required to be presented to STRS. This bill would also authorize STRS to withhold any benefit payment until that proof has been received and accepted by STRS.

This bill would redefine "proof of death" as providing to STRS such evidence of death as may be required by STRS and make related, technical, and corrective changes. This bill would make data filed with STRS by any retirant, as well as any member or beneficiary, confidential and authorize the release of information filed with STRS in a beneficiary designation form to certain specified persons. This bill would provide that if at the

NOTE: Superior numbers appear as a separate section at the end of the digests.

death of a retirant, as well as a member, no beneficiary designation is in effect, any benefit payable shall be paid to the estate of the retirant. This bill would require that if a benefit or refund cannot be paid because, after a good faith effort the member or beneficiary cannot be located, the amounts payable shall be retained in the Teachers' Retirement Fund until such time as the party entitled to the payment is located.

Ch. 921 (SB 368) Kopp. Property taxes: county free libraries.

Existing law provides for a method of allocating property tax revenues among counties, cities, school entities, and special districts in accordance with specified formulas. For purposes of these allocation provisions, the definition of a special district does not include county free libraries.

This bill would include county free libraries for which a property tax was levied in the 1977–78 fiscal year within the definition of "special district" for purposes of those allocation provisions. By imposing new duties on county tax officials with respect to the allocation of property tax revenues, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill which will result in costs incurred by a local agency or school district for a new program or higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

This bill would make certain legislative findings and declarations regarding the changes made by this bill.

Ch. 922 (AB 337) Statham. Solid waste landfill: closure and postclosure maintenance: costs.

Existing law, the California Integrated Waste Management Act of 1989, requires, among other things, any person owning or operating a solid waste landfill to certify to the California Integrated Waste Management Board that the owner or operator has prepared an initial estimate of closure and postclosure maintenance costs, has established a trust fund or equivalent financial arrangement acceptable to the board, and will deposit annually in the trust fund or equivalent financial arrangement amounts that will ensure adequate resources for the closure and postclosure maintenance of the landfill.

This bill would provide that, if the owner or operator is a county with a population of 200,000 or less, determined by the 1990 decennial census, the county shall not be required to make annual deposits in excess of the amount required by the federal act, as defined, or any other federal law, or by any board-approved formula which meets the requirements of the federal act. The bill would require the board to adopt regulations that provide for an increase in the initial cost estimate, as prescribed.

The bill would also authorize, if not in conflict with federal law or regulations, a county or city, with regard to a solid waste landfill owned or operated by the county or city, to base its estimate of closure and postclosure maintenance costs on the costs of employing county or city employees or persons under contract with the county or city in performing closure and postclosure maintenance. The bill would authorize the county or city to employ its employees or persons under contract in the actual performance of closure and postclosure maintenance operations, to effect cost savings, even if, to meet federal requirements, the cost estimate is based on the most expensive costs of closure and postclosure maintenance performed by a 3rd party.

The bill would require the board, on or before January 1, 1995, to conduct and complete a study on class III landfill closure and postclosure maintenance in counties with a population of 200,000 or less, as determined by the 1990 decennial census, and report the results of the study to the Legislature.

The bill would delete related obsolete provisions and make technical changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 923 (AB 2185) Eastin. School finance: budget review.

(1) Under existing law, each county superintendent of schools is required annually to submit to the county board of education certain reports regarding the financial and budgetary status of the county board of education. As part of each report, the county superintendent is required to certify in writing whether or not the county office of education is able to meet its financial obligations by using specified classifications.

This bill would clarify the definitions of the various classifications.

(2) Under existing law, each county board of education is required to annually submit its budget for approval to the Superintendent of Public Instruction, the county board of supervisors, and the county auditor. The Superintendent of Public Instruction is then required to approve or disapprove the budget no later than August 1, and if the budget is disapproved by the Superintendent of Public Instruction, the county board of education must revise the budget no later than September 1. The Superintendent of Public Instruction is then required to approve or disapprove the revised budget by September 15.

This bill would require the Superintendent of Public Instruction to approve or disapprove the budget no later than August 15. This bill would require the county board of education to revise the budget no later than September 8, for approval or disapproval by the Superintendent of Public Instruction no later than October 8. This bill would also make related date changes.

(3) Under existing law, each school district is required to annually adopt a budget. Existing law requires the county superintendent of schools to approve or disapprove the school district's adopted budget no later than August 15 and, if the budget is disapproved by the county superintendent of schools, the school district must revise the budget no later than September 1. The county superintendent of schools must then approve or disapprove the revised budget by September 15.

This bill would require each school district to revise a disapproved budget no later than September 8. This bill would require the county superintendent of schools, by September 22, to provide a list to the Superintendent of Public Instruction identifying all school districts for which budgets may be disapproved, thereby imposing a state-mandated local program. This bill would require the county superintendent of schools to approve or disapprove the revised budgets by October 8. This bill would also make related date changes.

(4) Existing law provides for a review and revision process when the governing board of a school district and the county superintendent of schools disagree on the budget, which includes establishing a budget review committee.

This bill would provide that the budget review committee process would be canceled if the governing board of the school district and the county superintendent of schools agree on the budget, as specified.

(5) Under existing law, the superintendent of each school district is required annually to submit to the governing board of the school district certain reports regarding the financial and budgetary status of the school district. Pursuant to each report, the governing board of each school district is required to certify in writing whether or not the school district is able to meet its financial obligations by using specified classifications. Under existing law, the county superintendent of schools has 60 days after the close of the reporting period to approve or disapprove these reports.

This bill would clarify the definitions of the various classifications. This bill would also provide that the county superintendent of schools has 75 days after the close of the reporting period to approve or disapprove the reports.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,-

NOTE: Superior numbers appear as a separate section at the end of the digests.

000, shall be made from the State Mandates Claims Fund.

Ch. 924 (AB 1708) Murray. Local education financing.

(1) Under existing law, a county superintendent of schools is required, among other things, to certify in writing whether or not the county office of education is able to meet its financial obligations for both the remainder of the fiscal year and for the subsequent fiscal year. The certifications are classified as "negative," "qualified," or "positive," as prescribed by the Superintendent of Public Instruction.

This bill would define a qualified certification and a positive certification for those purposes and for purposes of certifying school districts.

(2) Under existing law, if the county superintendent of schools disapproves a school district's budget, he or she may form a budget review committee, which committee makes recommendations to the Superintendent of Public Instruction regarding that district's budget. If the superintendent disapproves the budget adopted as a result of the budget review committee's recommendations, the county superintendent of schools is required to do several things, including monitoring and reviewing the district and developing a fiscal plan for the district.

This bill would additionally require the county superintendent to perform several duties regarding that school district's fiscal condition. Because the bill would impose new duties on the county superintendent, it would create a state-mandated local program.

(3) Existing law requires the Superintendent of Public Instruction to monitor the operation of each county office of education pursuant to the budget adopted for that office and to take specified actions if the county office will be unable to meet its financial obligations for the current or subsequent year.

This bill would delete this requirement and instead require the Superintendent of Public Instruction to take certain actions if, at any time during the fiscal year, he or she determines that the county office may be unable to meet its financial obligations for the current or 2 subsequent fiscal years or if the county office would have a qualified or negative certification, as specified.

(4) Existing law requires every county superintendent of schools and the governing board of every school district to have an audit performed each year.

This bill would require the auditor, upon request, to provide the county superintendent or the Superintendent of Public Instruction with fiscal information on a school district if the county superintendent determines that a school district may not be able to meet its obligations for the current or subsequent fiscal year.

(5) Existing law provides that the Superintendent of Public Instruction shall appoint a trustee or an administrator, as specified, of a school district that receives emergency apportionments.

This bill would authorize a trustee to stay or rescind the actions of the school district personnel commission and would require an administrator to suspend the actions of the school district personnel commission.

(6) This bill would prohibit the Superintendent of Public Instruction from making apportionments to a county office of education if the governing board of that office neglects or refuses to prepare a budget for that office, as specified.

(7) Existing law requires the county superintendent of schools to approve or disapprove the adopted budget of every school district in his or her jurisdiction. If the county superintendent disapproves a budget, he or she is required to initiate the formation of a budget review committee, which subsequently reviews the school district budget and recommends approval or disapproves the budget. If the review committee disapproves the budget and that decision is upheld by the Superintendent of Public Instruction, the county superintendent is required to take certain actions for the remainder of the fiscal year to develop and adopt a budget and fiscal plan for the district.

This bill would impose additional duties and grant additional authority to the county superintendent in the event that a school district budget is disapproved and the county superintendent is required to develop and adopt a budget and fiscal plan for the district.

(8) Existing law requires the county superintendent of schools to monitor the operation of each school district pursuant to the budget adopted for that district and to take specified actions upon determining that a district will be unable to meet its financial

NOTE: Superior numbers appear as a separate section at the end of the digests.

obligations for the current or subsequent fiscal year.

This would delete these provisions and instead require the county superintendent of schools to take certain actions if, at any time during the fiscal year, he or she determines that a school district may be unable to meet its financial obligations for the current or 2 subsequent fiscal years or if the district would have a qualified or negative certification, as specified. The bill would also establish a process to appeal these determinations of the county superintendent by appealing to the Superintendent of Public Instruction. The bill would revise other provisions regarding the authority of the county superintendent when a school district has a negative or qualified certification.

(9) The bill would impose a state-mandated local program by imposing new duties on the county superintendent of schools.

(10) Existing law prescribes the procedures whereby public school employee organizations and public school employers negotiate the terms and conditions of their employment.

This bill would require a school district to allow the county office of education in which the school district is located to review and comment on any proposed agreement between the exclusive representative of public school employees and the public school employer, as specified. The bill would require the Superintendent of Public Instruction to develop forms on which appropriate parties could provide certain information regarding the financial impact of that agreement to the county superintendent of schools. The county superintendent would be required to notify the school district if the proposed agreement would endanger the fiscal well-being of the district, as specified.

(11) Under existing law, $10,500,000 was appropriated, without regard for fiscal year, for apportionment by the Superintendent of Public Instruction as an emergency loan to the Compton Unified School District, under specified conditions.

This bill would also appropriate $9,451,259 for apportionment by the superintendent to the Compton Unified School District as an emergency loan under the same conditions according to a specified schedule. Any new costs to the district to comply with these conditions, beyond those that resulted from the loan provided for under existing law, would constitute a state-mandated local program.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000 shall be payable from the State Mandates Claims Fund.

Ch. 925 (SB 425) Lockyer. Courts: rules and procedures.

(1) Existing law requires the Judicial Council to adopt a standard of judicial administration governing the appearance of counsel by telephone in specified proceedings.

This bill would require, in addition, that the superior court of each county to adopt a rule enabling the appearance of counsel by telephone at trial setting conferences in civil cases, thereby imposing a state-mandated local program by requiring new duties of the courts. The bill would authorize the rule to require personal appearance of counsel for good cause.

(2) Existing law sets forth a procedure for the adoption of local rules by judges of the superior court, copies of which are required to be filed with the Judicial Council. Existing law prohibits local rules from being inconsistent with law or Judicial Council rules, and authorizes the clerk of the court to charge a reasonable fee for copies of local rules.

This bill would authorize municipal and justice courts to follow the same procedure for the adoption of local rules, and would require the Judicial Council to adopt rules governing distribution of these rules. This bill would eliminate the prohibition against local rules being inconsistent with law or Judicial Council rule, and would revise the provisions governing publication and distribution of local rules. The bill would also enact special provisions governing the adoption and publication of rules adopted by individual

NOTE: Superior numbers appear as a separate section at the end of the digests.

judges and rules that apply solely to particular branches or districts of a court . By requiring an increased level of service by local officials in this regard, the bill would impose a state-mandated local program.

(3) Existing law authorizes every court to make rules for its own government and the government of its officers not inconsistent with law or Judicial Council rules, and prohibits any rule that imposes a tax, charge, or penalty upon a legal proceeding or for filing a pleading, or that gives an allowance to an officer for services.

This bill would further require the Judicial Council to adopt rules or procedures that encourage uniformity of requirements throughout a court and statewide, particularly with regard to specified matters.

(4) The bill would make related changes.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 926 (AB 2205) Committee on Judiciary. Civil remedies.

(1) Existing law provides that any order of the State Bar Court imposing suspension or disbarment of a member of the State Bar, or accepting a resignation with a disciplinary matter pending, may include an order that the member pay a monetary sanction, as specified.

This bill would revise this provision to refer to an order of the Supreme Court, rather than the State Bar Court, imposing suspension or disbarment.

(2) Existing law provides for the enforcement of laws regarding unfair competition by authorizing injunctive actions to be prosecuted by the Attorney General, district attorney, county counsel, or city attorney or prosecutor, as specified.

This bill would specify that these injunctive actions shall be prosecuted exclusively in a court of competent jurisdiction.

(3) Existing law authorizes the presiding judge of each superior court to prepare proposed local rules designed to expedite and facilitate the business of the court, as specified.

This bill would expand this provision to apply to the presiding judge of each municipal court. The bill would also incorporate further changes to Section 575.1 of the Code of Civil Procedure proposed by SB 425, contingent upon its prior enactment.

(4) Existing law requires a writ of possession or sale to include specified information.

This bill would make the inclusion of certain information at the option of the creditor.

(5) Existing law sets forth specified procedures and time limits for the review of any decision of a local agency other than a school district, which are applicable to a particular local agency only if the governing body of that agency adopts a specified resolution or ordinance.

This bill would make these procedures and time limits applicable to all local agencies, other than school districts, thereby imposing a state-mandated local program by requiring new duties of local officials.

(6) Existing law provides a stay of eviction procedures if one or more of the defendants in an action is the spouse, dependent child, or otherwise a dependent of a reservist who has been called to active duty as a result of the Iraq-Kuwait crisis.

This bill would delete that provision.

(7) Existing law generally specifies the procedures for valid service of a subpoena duces tecum. Existing law also includes a separate provision governing deposition subpoenas that command only the production of business records.

This bill would specifically provide that the general provision specifying the manner of service of a subpoena duces tecum does not apply to deposition subpoenas commanding only the production of business records for copying.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(8) Existing law specifies the manner in which deposition subpoenas that command only the production of business records for copying may be delivered. Existing law provides that the custodian of the records or other qualified person may (a) permit the deposition officer specified in the deposition subpoena to make a copy of the originals of the designated business records, or (b) deliver a copy of the records, as specified.

This bill would instead provide that the custodian of the records or other qualified person shall elect one of those methods of delivery.

(9) Existing law sets forth the procedure for reading, correcting, and signing the original transcript of stenographically recorded deposition testimony.

This bill would revise that procedure.

(10) Existing law requires a petition to review an order regarding the disclosure or nondisclosure of public records to be filed within 10 days of receipt of notice of the order.

This bill would extend that period to 20 days.

(11) Existing law provides that the county clerk shall act as clerk of the superior court.

This bill would provide that the term "county clerk" refers to the superior court executive officer to the extent the duties of the county clerk have been delegated to the superior court executive officer.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 927 (AB 1930) Weggeland. Occupational safety and health: injury prevention programs.

Existing law requires every employer to establish, implement, and maintain an effective written injury prevention program that includes specified elements, and to provide specified training of employees in general safe and healthy work practices. Existing law further requires the Occupational Safety and Health Standards Board to adopt a standard setting forth the employer's duties under these provisions, and permits the board to adopt less stringent criteria for employers with few employees and for employers in industries with insignificant occupational safety or health hazards.

This bill would require the board, for employers with fewer than 20 employees who are in industries that are not on a designated list of high hazard industries and who have a workers' compensation experience modification rate of 1.1 or less, and for any employers with fewer than 20 employees who are in industries that are on a designated list of low hazard industries, to adopt the same standard as adopted for all other employers, except that the employer need keep only limited written records, as specified. It would also require the division, for purposes of these provisions relating to the injury prevention program, to establish a list of high hazard industries using prescribed methods for identifying and targeting employers in high hazard industries.

Ch. 928 (AB 395) Hannigan. Occupational safety and health: injury prevention programs.

Existing law requires every employer to establish, implement, and maintain an effective written injury prevention program that includes specified elements, to correct unsafe and unhealthy conditions and work practices, to train employees in safe and healthy work practices, and to keep appropriate records regarding implementing and maintaining the injury prevention program.

This bill would permit specified employers in the construction industry, beginning January 1, 1994, to use employee training provided to the employer's employees under a construction industry occupational safety and health training program approved by the Division of Occupational Safety and Health to comply with the provisions requiring the training of employees in general safe and healthy work practices, but would require

NOTE: Superior numbers appear as a separate section at the end of the digests.

that those employers provide training on hazards specific to an employee's job duties. It would further permit specified employers in the construction industry, beginning January 1, 1994, to use records relating to employee training provided to an employer in connection with an occupational safety and health training program approved by the division to comply with the provisions requiring the keeping of appropriate records of steps taken to implement and maintain the injury prevention program, but would require that those employers keep records of steps taken to implement and maintain the injury prevention program with respect to hazards specific to an employee's job duties.

This bill would provide, with certain exceptions, that no civil penalty shall be assessed against any new employer in the state for a violation of any standard developed pursuant to a specified provision requiring the establishment, implementation, and maintenance of an effective, written injury prevention program for a period of one year after the date the new employer establishes a business in the state, as provided.

This bill would require the Division of Occupational Safety and Health to prepare a Model Injury and Illness Prevention Program for Non-High-Hazard Employment, and to make copies of the model program available to employers, upon request, for posting in the workplace. It would provide that an employer who adopts and implements the model plan in good faith shall not be assessed a civil penalty for the first citation issued thereafter for a violation of the provisions requiring the establishment, implementation, and maintenance of an effective, written injury prevention program. It would require the division to establish, by June 30, 1994, a list of non-high-hazard industries, using data from specified sources.

This bill would also require the division to prepare a Model Injury and Illness Prevention Program for Employers in Industries with Intermittent Employment, and to determine which industries have historically utilized seasonal or intermittent employees. It would provide that an employer in an industry determined by the division to have historically utilized seasonal or intermittent employees shall be deemed to have complied with the provisions requiring the establishment, implementation, and maintenance of an effective, written injury prevention program if the employer adopts the model program prepared by the division and complies with any instructions relating thereto.

Existing law authorizes the assessment of a civil penalty of up to $7,000 for each violation against any employer who violates any occupational safety or health standard, order, or special order, or a specified provision, if the violation is not determined to be of a serious nature. It provides that employers who do not have an operative injury prevention program shall receive no penalty adjustment for good faith of the employer or history of previous violations, as provided.

This bill would delete the provisions relating to penalty adjustments for employers who do not have an operative injury prevention program.

This bill would incorporate additional changes to Section 6401.7 of the Labor Code proposed by AB 1930, to be operative only if this bill and AB 1930 are both enacted and both become effective on or before January 1, 1994, and this bill is enacted last.

Ch. 929 (AB 2380) Committee on Ways and Means. Employer injury prevention program.

Existing law requires every employer to establish, implement, and maintain an effective written injury prevention program that includes specified elements, to correct unsafe and unhealthy conditions and practices, and to keep appropriate records regarding the implementation and maintenance of the injury prevention program.

This bill would provide that, for counties, cities, cities and counties, districts, and all public or quasi-public corporations and public agencies therein, including each public entity, other than a state agency, that is a member of, or created by, a joint powers agreement, the records regarding implementation and maintenance of the program need not be kept.

This bill would incorporate additional changes in Section 6401.7 of the Labor Code proposed by AB 1930 and AB 395, to be operative only if either AB 1930 or AB 395, or both, and this bill are chaptered and become effective on or before January 1, 1994, and

NOTE: Superior numbers appear as a separate section at the end of the digests.

this bill is chaptered last.

Ch. 930 (SB 560) Mello. Long-term health care facilities.

Existing law, the Long-Term Care, Health, Safety, and Security Act of 1973, establishes an inspection and citation system for the imposition of civil sanctions against long-term health care facilities, as defined, that are in violation of laws and regulations relating to patient care.

Existing law requires a licensee of a long-term health care facility who intends to adjudicate the validity of a class "AA" or a class "A" citation in a municipal or superior court to file a civil action in either court in the county where the long-term health facility is located no later than 60 calendar days after the licensee notifies the director of his or her intent to contest the citation or no later than 90 days after receipt of a decision by the director's designee after a citation review conference.

This bill would instead require this licensee to file the action no later than 90 calendar days after notice to the director or no later than 90 days after receipt of a decision by the director's designee after a citation review conference.

Existing law authorizes a licensee who desires to contest a class "B" citation to request, within 15 business days, a citation review conference.

Existing law defines a nursing facility to mean a health facility licensed as either a skilled nursing facility or an intermediate care facility.

This bill would instead define a nursing facility to mean a facility that is certified to participate as a provider of care in the federal medicaid program and is licensed as a skilled nursing facility or intermediate care facility.

This bill would instead authorize this licensee to request, within 15 days after service of the citation, a citation review conference.

This bill would also make a technical, nonsubstantive change.

Ch. 931 (AB 972) Jones. Rural general acute care hospitals.

Existing law prohibits operation of a health facility without a license, and defines "health facility" for this purpose, to include, among others, a "general acute care hospital." Existing law, further, defines a "general acute care hospital" for this purpose to mean a health facility meeting prescribed staffing and other requirements that provides certain basic services, including, but not limited to, surgical and anesthesia services. Under existing law, the violation of these health facility licensure provisions is a misdemeanor.

Existing law, until January 1, 1994, requires the Office of Statewide Health Planning and Development to adopt emergency regulations waiving or modifying existing regulations that the office determines are inapplicable, unreasonably burdensome to, or unnecessary for the safe and efficient operation of small and rural hospitals, as defined.

This bill would include within the definition of a "general acute care hospital" a "rural general acute care hospital", as defined. This bill would prohibit the State Department of Health Services from requiring a rural general acute care hospital to provide surgery and anesthesia services. It would require a rural general acute care hospital that does not provide these services to maintain written transfer procedures with one or more general acute care hospitals that provide surgical and anesthesia services. This bill would provide that the regulations adopted by the office regarding regulatory requirements for small and rural hospitals apply to a rural general acute care hospital. It would change references in these provisions from the office to the state department and would authorize the state department to adopt regulations to implement or administer these provisions. Since this bill would change the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 932 (SB 910) Calderon. Tuberculosis examinations: state correctional institutions.

(1) Existing law prohibits the initial employment of a person by the Department of Corrections, the Department of the Youth Authority, the Board of Prison Terms, or the Youthful Offender Parole Board unless the person, upon offer of employment conditional upon passing a medical examination, has been found to be free of communicable tuberculosis.

This bill, instead, would prohibit the initial employment of a person under this provision unless the person, after an offer of employment, completes an examination, a test, or a medical evaluation and is found to be free of tuberculosis in an infectious or contagious stage prior to assuming work duties. This bill would make conforming changes to related provisions. This bill would provide that all costs of implementing the tuberculosis testing under these provisions would be met by the Department of Corrections.

(2) Existing law requires, as a condition of continued employment with the above entities, that employees undergo annual medical examinations for communicable tuberculosis. Existing law also requires, among other things, that once an employee has a documented, positive skin test, that employee shall be referred within 3 days of completion of the examination to an early intervention program and a medical panel doctor, as specified.

This bill, among other things, would provide, instead, that if an employee has a documented positive skin test, the employee shall have a medical evaluation to determine the need for followup care. This bill would require that the above entities ensure that all examinations or tests and medical evaluations are made available to the employee promptly at a reasonable time and place at no cost to the employee and are performed by, or under the supervision of, a licensed health care professional. The bill would further provide that tuberculosis examinations meeting the conditions of this bill which are made available to department employees shall be made similarly available to employees from other state agencies who work in department institutions.

(3) Existing law requires that the above entities provide the examinations and the certificate, as defined, that indicate the absence of active tuberculosis as required by these provisions.

This bill would require that these entities, instead, offer the examinations or tests required by these provisions and would require that employees who elect not to accept the offer obtain the examinations or tests through their local public health departments at no cost to the department.

This bill also would provide that followup care for tuberculosis infection or treatment for tuberculosis disease shall be pursued through the workers' compensation system for job-related incidents or through the employee's health insurance plan for non-job-related incidents.

(4) Existing law requires these entities to maintain a file containing an up-to-date certificate, as defined, for each employee.

This bill would require each employee, including employees who are initially employed, to submit a signed certificate, as defined, annually.

(5) Existing law specifies procedures under which inmates committed to the Department of Corrections or the Department of the Youth Authority are required to be examined for tuberculosis. These procedures require the chief medical officer to order an examination or test for tuberculosis of an inmate at any time if he or she reasonably suspects that the inmate has or has had, or has been exposed to, tuberculosis in an infectious stage if the chief medical officer has reasonable grounds to believe that it is necessary, as specified.

This bill would revise these procedures and would, additionally, apply these procedures to wards, as specified. The bill, among other things, would also authorize the chief medical officer to order treatment under these circumstances.

This bill would require the involuntary testing and authorize the involuntary treatment of an inmate or ward who refuses to submit to an examination, test, or treatment for tuberculosis, as specified, or who violates, or refuses or neglects to conform to, any

NOTE: Superior numbers appear as a separate section at the end of the digests.

rule, order, guideline, or regulation prescribed by the Department of Corrections or the Department of the Youth Authority. This bill would subject the inmate or ward to disciplinary action, as specified.

(6) Existing law requires the Department of Corrections, in consultation with the State Department of Health Services, to adopt, on or before July 1, 1993, guidelines to be used by the chief medical officer of a state correctional institution, as defined, relating to effective control of the spread of tuberculosis within a state correctional institution. Existing law also requires that the guidelines include, but not be limited to, a record system that emphasizes assessment, as specified.

This bill would require the Department of Corrections to operate pursuant to guidelines for this purpose developed in consultation with the State Department of Health Services on or before July 1, 1994, and would revise the provisions relating to the record system.

This bill also would revise and add to definitions for the purpose of these provisions.

(7) Under existing law, the State Department of Health Services is required to license a category of health facilities, known as correctional treatment centers, that are operated by the Department of Corrections, the Department of the Youth Authority, or a county, city, or city and county law enforcement agency that, as determined by the state department, provides outpatient health services, in addition to inpatient health services, to that portion of the inmate population that does not require a general acute care level of basic services. Existing law excludes from this definition areas of a city, county, or city and county law enforcement facility that, for reasons of security and protection, separately house inmates or wards who may receive outpatient services. Existing law requires a correctional treatment center to provide basic health services that include, among other things, dental services. Existing law provides that these provisions, as they apply to local agencies, shall remain operative until January 1, 1996.

This bill would instead provide that these provisions would be operative only until January 1, 1997. It would instead define a correctional treatment center to mean a health facility operated by these governmental entities that provides, as determined by the state department, inpatient health services, to that portion of the inmate population that does not require a general acute care level of basic services. The bill would also exclude from the definition those areas of any law enforcement facility that, for reasons of security, protection, and improved access to health care, separately houses inmates or wards who may receive outpatient services. It would delete dental services from among the basic health services required of a correctional treatment center.

(8) Existing law provides that regulations defining a correctional treatment center operated by a county, city, or city and county are not to become effective prior to, or if effective, are to be inoperative until January 1, 1996, and exempts correctional facilities from any licensing requirements until that time.

This bill would also exempt correctional facilities operated by the Department of Corrections or the Department of the Youth Authority from those regulations and licensing requirements until January 1, 1996.

(9) Existing law requires the department to adopt regulations that define bed classifications for certain health facilities. Existing law includes correctional treatment centers among these health facilities until January 1, 1994. Existing law requires licensed beds in a correctional treatment center to be used only for the purpose of providing health services until January 1, 1994.

This bill would change these termination dates to January 1, 1997.

(10) Existing law requires the department, in conjunction with the Office of Statewide Health Planning and Development, and in consultation with the Department of Corrections, the Department of the Youth Authority, and the State Department of Mental Health, to develop and adopt licensure regulations for correctional treatment centers in a prescribed manner until January 1, 1994. Existing law requires the Mental and Child Health Branch of the department to monitor and evaluate the standards and protocols of perinatal care utilized by the department for treatment of pregnant prisoners and to annually report to the Legislature, until January 1, 1994.

This bill would change these termination dates to January 1, 1997.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the Department of Corrections to provide detailed plans, cost estimates, and schedules during the legislative hearings on the 1994-95 Budget Act.

(11) Existing law, the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983 requires the Office of Statewide Health Planning and Development, among other things, to approve construction plans for hospital buildings, including reconstruction, or alteration of these buildings.

Existing law includes, until January 1, 1994, in the definition of hospital building for these purposes a correctional treatment center, the construction of which was completed on or after March 7, 1973.

This bill would delete the January 1, 1994, inoperative date.

Existing law excludes from the definition of hospital building for these purposes any building that would meet the pre-January 1, 1992, definition of a correctional treatment center, for which the final design documents were completed prior to January 1, 1994.

This bill would instead exclude from the definition of hospital building any correctional treatment center, for which the final design documents were completed prior to January 1, 1994.

Existing law also excludes, until January 1, 1994, from the definition of hospital building for these purposes any building subject to licensure as a correctional treatment center, the construction of which was completed prior to March 7, 1973.

This bill would delete the January 1, 1994, inoperative date.

Existing law also excludes from this definition certain correctional treatment centers operated by or to be operated by, among other entities, a law enforcement agency of a county or city and county.

This bill would include a law enforcement agency of a city among those entities.

Existing law also excludes from the review and approval by the office, plans for construction or alteration prepared by or under the supervision of certain state or local law enforcement agencies.

This bill would include law enforcement agencies of a city within the exclusion, and would make other technical changes.

(12) Since the bill will impose new duties upon local agencies operating facilities meeting the definition of a correctional treatment center, it would impose a state-mandated local program. Since violation of health facility licensing standards and willful violation of the regulations adopted for these facilities is a misdemeanor, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be payable from the State Mandates Claim Fund.

(12.5) This bill would incorporate additional changes in Section 1250 of the Health and Safety Code, proposed by AB 972 or SB 560, or both, to be operative only if AB 972 or SB 560, or both, and this bill are chaptered and become effective on or before January 1, 1994, and this bill is chaptered last. These changes would become operative on the effective date of AB 972 or SB 560, or both.

(13) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 933 (SB 1153) Hart. California Health Care for the Indigent Program: maintenance of effort.

Existing law contained in the California Health Care for the Indigent Program (CHIP) provides for the allocation of money from the Cigarette and Tobacco Products Surtax Fund to the counties to provide health care benefits.

Existing law establishes financial maintenance of effort requirements that must be

NOTE: Superior numbers appear as a separate section at the end of the digests.

met in the use of money allocated pursuant to the CHIP program.

This bill would revise the financial maintenance of effort requirements for the 1993–94 fiscal year for the County of Santa Barbara.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 934 (AB 1038) Archie-Hudson. California Health Care for the Indigent Program: maintenance of effort.

Existing law contained in the California Health Care for the Indigent Program (CHIP) provides for the allocation of money from the Cigarette and Tobacco Products Surtax Fund to the counties to provide health care benefits.

Existing law establishes financial maintenance of effort requirements that must be met in the use of money allocated pursuant to the CHIP program.

This bill would revise the financial maintenance of effort requirements for the 1993–94 fiscal year for a county with a population in excess of 7,000,000.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 935 (SB 145) Calderon. Child and spousal support.

(1) Existing law sets forth the statewide uniform guideline for determining child support. Under existing law, the amount calculated under the uniform guideline is presumed to be the correct amount of child support, but this presumption may be rebutted by facts showing that application of the guideline would be unjust or inappropriate in a particular case because one or more specified factors is found to be applicable and the revised amount is in the best interests of the child. Among these factors is the income of a parent's subsequent spouse or nonmarital partner which helps meet that parent's basic living expenses, thus increasing the parent's disposable income.

This bill would delete this factor, and instead provide that the income of the child support obligor's or obligee's subsequent spouse or nonmarital partner shall not be considered when determining or modifying child support, except as specified.

(2) Existing law provides that, except as otherwise agreed upon by the parties in writing, there is a rebuttable presumption of a decreased need for spousal support if the supported party is cohabiting with a person of the opposite sex, whether or not the parties hold themselves out to be husband and wife.

This bill would also provide that the income of a supporting spouse's subsequent spouse or nonmarital partner shall not be considered when determining or modifying spousal support.

(3) This bill would incorporate additional changes in Section 4057 of the Family Code, proposed by SB 541, to be operative only if SB 541 and this bill are both chaptered and become effective on January 1, 1994, and this bill is chaptered last.

Ch. 936 (AB 508) Speier. Hospital security.

Existing law prohibits operation of a health facility, as defined, without a license. Existing law requires that hospitals or other health facilities offering maternity services establish written policies to promote the protection of babies, and the reduction of baby thefts.

This bill would require all hospital employees regularly assigned to the emergency department to receive training and education relating to various security topics, including, but not limited to, general safety measures, aggression and violence predicting factors, and verbal and physical maneuvers to diffuse or avoid violent behavior, by January 1, 1995, and on a continuing basis thereafter as provided for in the security plan of the hospital. The bill would require prescribed medical and other staff to receive the same security training or training determined sufficient pursuant to the security plan of the hospital.

This bill would require by July 1, 1995, all general acute care, acute psychiatric, and special hospitals to conduct a security and safety assessment and to develop a security plan.

This bill would require reporting of any act of assault or battery, as defined, against any on-duty hospital personnel to the local enforcement agency within 72 hours, and would make any individual knowingly interfering with or obstructing the reporting

NOTE: Superior numbers appear as a separate section at the end of the digests.

process guilty of a misdemeanor, thereby imposing a state-mandated local program. Since violation of health facility licensing standards and willful violation of the regulations adopted for these facilities is a misdemeanor, this bill would impose a state-mandated local program by changing the definition of a crime.

Existing law, the Medi-Cal Act, requires the California Medical Assistance Commission to negotiate rates, terms, and conditions for, or to call bids for, exclusive contracts with hospitals for inpatient services to be rendered to medical beneficiaries. Existing law specifies various factors to be considered by the negotiator in negotiating these contracts, including, but not limited to, beneficiary access, ability to render services efficiently and economically, and protection against fraud and abuse.

This bill would, in addition, require that the negotiator consider the ability of the contracting hospital to provide a secure environment for the provision of health care services, as prescribed.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 937 (AB 1602) Woodruff. Disabled persons: Department of Rehabilitation.

Existing law specifies that the people of the state accept the provisions and benefits of the Act of Congress entitled "An Act to provide for the promotion of vocational rehabilitation of persons disabled in industry or otherwise and their return to civil employment," approved June 2, 1920, and as amended.

This bill would, instead, provide that the people of the state accept the provisions and benefits of the Act of Congress entitled "The Rehabilitation Act Amendments of 1992," and any subsequent amendments thereto.

Existing law requires the Department of Rehabilitation to provide various services to individuals with disabilities.

This bill would recast those provisions relating to the provision of services to individuals with disabilities, revise the mode of provision of those services, and revise the scope of services to be provided to those individuals.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 938 (AB 616) Gotch. Medi-Cal reports.

Existing law provides for the Medi-Cal program, which is administered pursuant to rules and regulations adopted by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law authorizes the Director of Health Services to enter into managed care contracts for the provision of medical benefits for all persons who are eligible to receive medical benefits under publicly supported programs.

Existing law provides that any managed care contractor serving children under the Medi-Cal program who have conditions that are eligible for treatment under the California Children's Services program shall report expenditures and savings separately with respect to those children.

Under existing law, if a managed care contractor is paid according to a capitated or risk-based payment methodology, there is required to be a separate actuarially sound rate for children eligible for California Children's Services.

This bill would, in addition, require separate rates for children eligible for California Children's Services. The bill would also permit a managed care pilot project, if approval is obtained as required, to establish an alternative rate structure for children eligible for California Children's Services.

Ch. 939 (AB 2355) Eastin. Special education.

(1) Existing law regulates the activities of attorney and nonattorney advocates in special education proceedings.

This bill would prohibit an attorney or advocate for the parent of an individual with

NOTE: Superior numbers appear as a separate section at the end of the digests.

exceptional needs from recommending placement in a nonpublic, nonsectarian school or agency, as defined, with which the attorney or advocate is employed, contracted, or otherwise has a conflict of interest or from which the attorney or advocate receives a benefit.

(2) Existing law defines "licensed children's institution" to mean a licensed residential facility that provides nonmedical care to children including individuals with exceptional needs.

This bill would specify that "licensed children's institution" does not include certain specified governmental programs.

(3) Existing law specifies that if a health facility operates a nonpublic, nonsectarian school and an individual with exceptional needs is served by that school, the school district in which the parent of the individual resides is responsible for assuring that the pupil is receiving an appropriate education.

This bill would repeal this provision and instead provide that specified health facilities are not eligible for certification as nonpublic, nonsectarian schools to provide special education to individuals with exceptional needs and that education agencies have until September 1, 1994, to find an alternative placement for affected children, thus imposing a state-mandated local program.

(4) Under existing law, before contracting with an out-of-state nonpublic, nonsectarian school for placement of an individual with exceptional needs, the local education agency, as specified, is required to locate a school or agency within the state. If an appropriate school is not available, the local education agency may petition the Superintendent of Public Instruction for a waiver to place the individual out-of-state.

This bill would instead require that the waiver request be submitted to the State Board of Education and would further condition the granting of such waivers.

(5) Existing law authorizes a local education agency, as specified, to contract with a nonpublic, nonsectarian school or agency for special education, designated instruction, and related services for individuals with exceptional needs. Under existing law, no contract is authorized unless the schools or agency has been certified as meeting specified standards. Existing law provides that the procedures, methods, and areas of certification shall be established by rules and regulations issued by the State Board of Education.

This bill would specify how the certification fee would be adjusted annually for inflation, when certification would become effective and expire, what the application would include, and when the application filing period would occur. The bill would require each site to be certified if a school or agency operates a facility or program on more than one site and would require programs operated by the applicant in other states to be certified or licensed by those states. The bill would require the Superintendent of Public Instruction to conduct an onsite review, as specified, and make determinations, as specified, as to each application within 120 days of receiving it. The bill would permit the school or agency to be monitored as specified. The bill would impose additional specified requirements on a nonpublic, nonsectarian school or agency proposing to initiate or expand services to pupils in juvenile court or community schools or in other specified nonspecial education programs. The bill would require the superintendent to review annually the certification of each school and agency and also would require a school or agency to update its application for certification and pay an annual certification fee.

(6) Existing law authorizes local education agencies or nonpublic, nonsectarian schools and agencies to petition the Superintendent of Public Instruction for a waiver of certain contract requirements for the delivery of special education services.

This bill would condition the granting of waivers regarding reimbursement of specified contract costs upon approval by the State Board of Education and would require the superintendent to provide specified information on waivers regarding out-of-state placements and certification requirements in an annual report to the board.

(7) This bill would prohibit reimbursement by the state under a contract for special education services with a nonpublic, nonsectarian school or agency if the contract covers special education services provided by a person employed by the local education agency, as specified, within the last 365 days. The bill would also specify grounds for the Superin-

NOTE: Superior numbers appear as a separate section at the end of the digests.

tendent of Public Instruction to revoke or suspend a nonpublic, nonsectarian school's or agency's certification to provide services and the school's or agency's rights. The bill also would require a nonpublic, nonsectarian school or agency to submit, as specified, a list of specified uniform tuition fees as a condition of certification.

(8) This bill would require the Superintendent of Public Instruction to convene, until June 30, 1994, a 12-member nonpublic, nonsectarian school and agency work group with a specified membership to submit a specified report regarding programmatic and funding issues. The bill would transfer $100,000 from a specified budget item in the Budget Act to the superintendent for purposes of the report, thereby making an appropriation.

(9) The bill would exclude certain specified costs from the costs reimbursable under contracts with nonpublic, nonsectarian schools or agencies for special education services.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would declare that it would take effect immediately as an urgency statute.

Ch. 940 (AB 1723) Knight. Real estate appraisers.

Existing law, known as the Real Estate Appraisers' Licensing and Certification Law, establishes the Office of Real Estate Appraisers and defines various terms for purposes of that law.

This bill would revise the definitions of various terms and would define new terms, including "state licensed real estate appraiser."

Existing law requires the director of the office to adopt and enforce rules and regulations to implement the Real Estate Appraisers' Licensing and Certification Law.

This bill would provide that any emergency regulations filed with the Office of Administrative Law by December 31, 1993, shall be deemed to be necessary for the immediate preservation of the public peace, health, safety, and general welfare.

Existing law prohibits a person from engaging in federally related real estate appraisal activity without first becoming a real estate appraiser or state certified real estate appraiser.

This bill would prohibit a person from engaging in this activity without first becoming a state licensed real estate appraiser or state certified real estate appraiser. This bill would make the willful violation of this provision a crime, punishable as specified. By creating a new crime, this bill would impose a state-mandated local program.

Existing law provides that an individual who is not a state licensed or certified appraiser may assist in the preparation of an appraisal under specified conditions.

This bill would make specified changes to that provision.

Existing law permits the Office of Real Estate Appraisers to conduct investigations related to the professional conduct of appraisers.

This bill would require the county assessor, upon request, to disclose specified information and records to the Office of Real Estate Appraisers when the office is conducting an investigation, as specified. By so requiring, this bill would impose a state-mandated local program. The bill requires, however, that the Office of Real Estate Appraisers shall reimburse the assessor for the reasonable cost of those services.

Existing law sets forth procedures for the licensing or certification of real estate appraisers.

This bill would require each applicant for licensure and certification as a real estate appraiser to submit a completed fingerprint card to be used for the purpose of a criminal record check. This bill would provide for the issuance of a temporary license or certification pending the outcome of the fingerprint check. This bill would require the director to adopt regulations governing the process and procedures for renewal of a license or certification.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires all licensing or certification fees to be paid at the time of application and provides that these fees are not refundable.

This bill would require initial application fees to be paid at the time of application and issuance-related fees to be paid at the time the issuance application is submitted. This bill would require all fees to be paid by cashier's check, certified check, or money order and would provide that all fees are refundable at the discretion of the director.

Existing law requires the office to conduct a specified study on or before January 1, 1993.

This bill would change that date to June 30, 1995.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 941 (AB 387) Boland. Real estate appraisers.

Existing law authorizes an individual who is not a state licensed or certified appraiser to assist in the preparation of an appraisal subject to specified conditions, including a requirement that the assistance is under the direct supervision of an individual who is a licensed or certified appraiser and the decision or conclusion as to value is made by a licensed or certified appraiser. To "assist in the preparation" is defined to mean ministerial aspects of the appraisal activity and does not include any conclusion of value of the property.

This bill would delete that definition from those provisions. It would require the final conclusion as to value, rather than the decision or conclusion as to value, to be made by a licensed or certified appraiser.

Existing law requires the Director of the Office of Real Estate Appraisers to adopt regulations governing the process and procedure of applying for a real estate appraiser license and real estate appraiser certificate, including necessary experience requirements.

This bill would provide that a holder of a valid real estate broker license shall be deemed to have completed appraisal license application requirements upon proof that he or she has accumulated 1,000 hours of experience in the valuation of real property. In evaluating applicant experience, it would require the director to apply the same standards to the experience of all applicants.

Ch. 942 (AB 1290) Isenberg. Redevelopment: Community Redevelopment Law Reform Act of 1993.

(1) Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in those communities.

This bill would enact the Community Redevelopment Law Reform Act of 1993. The bill would revise the definition of a blighted area and would enact numerous revisions in the Community Redevelopment Law, including the imposition of specified time limitations on redevelopment plans, the requirement of the adoption of implementation plans describing the goals and objectives of redevelopment agencies, and the inclusion of specified information on statements of indebtedness required to be filed by redevelopment agencies. The bill would require that when redevelopment plans are merged, as specified, these time limitations shall be individually counted, from the date of adoption of each plan. Because the bill would require new procedures of redevelopment agencies, the bill would impose a state-mandated local program.

(2) Existing law requires each redevelopment agency to present an annual report to its legislative body within 6 months of the end of the agency's fiscal year. Existing law requires this annual report to contain, among other things, specified quantitative data relating to households displaced by, and affordable housing created by, redevelopment activity.

This bill would impose a state-mandated local program by requiring each redevelopment agency to also include in its annual report specified data relating to the amount

NOTE: Superior numbers appear as a separate section at the end of the digests.

of excess surplus, as defined, in the agency's Low and Moderate Income Housing Fund and a description of the plans and programs of the agency to increase, improve, and preserve the community's supply of low-income and moderate-income housing for the next 2 years. The bill would also provide that, if an agency has not expended moneys within three years from when they become excess surplus, the agency is subject to specified sanctions until it expends that excess surplus. The bill would not permit the additional expenditure to be from the Low and Moderate Income Housing Fund, but would require the funds to be used in a manner meeting all requirements for expenditures from that fund.

(3) Under existing law, a project area is an area of a community that is blighted and the redevelopment of which is necessary to effectuate the purposes of the Community Redevelopment Law. Existing law authorizes a redevelopment agency to establish programs to eliminate blight within the project area. Existing law also sets forth the requirements for the replacement, as specified, of low- and moderate-income dwelling units that have either been destroyed or removed from the low- and moderate-income market. Existing law requires these units to remain affordable to low- and moderate-income purchasers for a specified time. Existing law permits the sale of certain owner-occupied replacement units for a price in excess of the amount otherwise permitted.

This bill would authorize redevelopment agencies to establish a program under which funds would be loaned to owners or tenants for the purpose of rehabilitating commercial buildings or structures within the project area. The bill would authorize a redevelopment agency to establish a schedule of equity sharing, as specified, to determine the distribution of the excess proceeds in those transactions where a higher sale price is permitted. By requiring the agency to provide an equal number of affordable units at the same income level as those sold under these terms, the bill would impose a state-mandated local program.

(4) This bill would state legislative findings and declarations with respect to the Legislature's intent that the amendment and repeal of specified code sections, as provided for in the bill, not affect certain redevelopment ordinances and activities adopted or occurring prior to the effective date of the bill and not expand specified redevelopment activities.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 943 (AB 69) Cannella. Military base closure redevelopment agencies: Castle Joint Powers Redevelopment Agency.

(1) Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities in order to address the effects of blight, as defined, in those communities.

This bill would add to the Community Redevelopment Law provisions governing the establishment and fiscal affairs of redevelopment agencies based in areas within a military base that has been closed pursuant to the actions of the federal Base Closure Commission. Because this provision would impose new duties on officials in the affected counties, it would constitute a state-mandated local program.

(2) Existing law does not provide for a joint powers agency with jurisdiction over the Castle Air Force Base project area.

This bill would express specified findings and declarations of the Legislature relating to the closure of Castle Air Force Base. The bill would create the Castle Joint Powers Redevelopment Agency, with specified membership. It would require the agency to act as the legislative body and planning commission for all approvals and actions required and authorized for the adoption and implementation of a redevelopment plan within

NOTE: Superior numbers appear as a separate section at the end of the digests.

the Castle Air Force Base project area, as specified. The bill would specify the amount of tax increment revenues to be apportioned under that plan and would limit the length of the terms of indebtedness incurred to finance that plan. The bill would provide that the agency shall not adopt a redevelopment plan until the City of Atwater adopts a housing element, as specified. By requiring the City of Atwater, the City of Merced, and the County of Merced to be members of the Castle Joint Powers Redevelopment Agency, the bill would impose a state-mandated local program.

(3) The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

The bill would declare that, because of the unique circumstances applicable to the closure of Castle Air Force Base in the County of Merced, a general statute cannot be made applicable.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory provisions, and if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

However, as to costs incurred by the County of Merced under the bill, the bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 944 (SB 915) Johnston. Redevelopment: military base closure redevelopment agencies: Mather Air Force Base Redevelopment Project Area.

(1) Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities in order to address the effects of blight, as defined, in those communities.

This bill would add to the Community Redevelopment Law provisions governing the establishment and fiscal affairs of redevelopment agencies based in areas within a military base that has been closed pursuant to the actions of the federal Base Closure Commission. Because this provision would impose new duties on officials in the affected counties, it would constitute a state-mandated local program.

This bill would also add to the Community Redevelopment Law provisions establishing a Mather Air Force Base Redevelopment Project Area in the territory included within Mather Air Force Base on the effective date of the bill. The bill would specify the purposes of the project area, would specify the dimensions of the project area, would exempt the project area from specified requirements of the Community Redevelopment Law, and would require the redevelopment agency of the County of Sacramento to take specified actions with regard to the establishment and fiscal affairs of the project area. The bill would require the county to adopt a housing element, as specified, before adopting a redevelopment plan. Because the bill would impose new duties on the County of Sacramento, the bill would constitute a state-mandated local program.

(2) The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique problems within the County of Sacramento that the bill is intended to remedy, a general statute within the meaning of a specified provision of the California Constitution cannot be made applicable and a special statute is necessary.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000, including the creation of a State Mandates Claims Fund to pay the cost of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory provisions and, if the statewide cost does not exceed $1,000,-000, shall be made from the State Mandates Claims Fund.

However, as to costs incurred by the County of Sacramento under the bill, the bill would provide that no reimbursement is required for a specified reason.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 945 (SB 1085) Bergeson. Early intervention services.

Existing law sets forth findings and declarations relating to handicapped and high-risk infants for purposes of the California Early Intervention Services Act.

This bill would repeal the act and enact the California Early Intervention Services Act, for the purpose of providing a statewide system of programs to provide early intervention systems to all eligible infants and toddlers, as defined, and their families.

The bill would require the act to be administered by various state agencies and would require the lead agency to be the State Department of Developmental Services. The bill would require specified state departments to coordinate their early intervention services, as prescribed. This bill would provide that the State Department of Developmental Services would be responsible for payment of services under the act upon notice as to the insufficiency of federal funds and termination of the program.

The bill would specify services to be provided to an eligible infant or toddler. The bill would require direct services to be provided by regional centers under the Lanterman Developmental Disabilities Services Act and local education agencies under an early education program. This bill would prohibit any agency or multidisciplinary team from presuming or determining eligibility for any other agency. It would require regional centers and local education agencies to coordinate family service plans for infants and toddlers and their families who are served by an agency. It would also require certain early intervention services to be provided or purchased by regional centers or local education agencies, as prescribed. By increasing duties of local agencies, the bill would impose a state-mandated local program.

The bill would require any increased cost to prescribed local educational agencies or regional centers due to implementation of the act to be funded from certain federal funds.

The bill would require the lead agency to maintain a system for compiling specified data, and to adopt regulations jointly with the State Department of Education to comply with the act and federal law.

The bill would provide that the state's participation in a prescribed program of the federal Individuals with Disabilities Education Act is contingent on the receipt of sufficient federal funds. The bill would repeal the provisions of the bill if the state terminates its participation in the federal early intervention programs or on January 1, 1998, whichever occurs first. This bill would require termination of the program to occur on July 1 if local education agencies have been notified of the termination prior to March 1 of that calendar year. This bill would prohibit termination from occurring prior to July 1 of the subsequent calendar year if notification is not provided prior to March 10.

This bill would add the findings and declarations contained in existing law relating to disabled and high-risk infants upon repeal of the act.

This bill would provide that if federal funds are available after certain requirements are met, the lead agency would be authorized to, in consultation with the State Department of Education, designate local interagency coordination areas throughout the state and allocate funds to support family resource services.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,-

NOTE: Superior numbers appear as a separate section at the end of the digests.

000, shall be made from the State Mandates Claims Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 946 (SB 1176) Kopp. Bank and corporation taxes: unitary businesses.

The existing Bank and Corporation Tax Law imposes taxes measured by income and, in the case of a business with income derived from or attributable to sources both within and without this state, the income is apportioned between this state and the other states and foreign countries for tax purposes in accordance with a specified formula based on the property, payroll, and sales within and without this state. Pursuant to that formula all business income of the taxpayer is apportioned to this state by multiplying the income by a fraction, the numerator of which is the property factor plus the payroll factor plus the sales factor, and the denominator of which is 3. The sales factor is a fraction, the numerator of which is the total sales of the taxpayer in this state during the income year, and the denominator of which is the total sales of the taxpayer everywhere during the income year.

This bill would provide, instead, that all business income of the taxpayer shall be apportioned to this state by multiplying the income by a fraction, the numerator of which is the property factor plus the payroll factor plus twice the sales factor, and the denominator of which is 4, except that all the business income of a taxpayer with more than 50% of its gross business receipts derived from extractive or agricultural business activities, as defined, shall be apportioned to this state by multiplying the business income by a fraction the numerator of which is the property factor plus the payroll factor plus the sales factor, and the denominator of which is 3.

The bill would take effect immediately as a tax levy.

Ch. 947 (AB 1676) Margolin. Physicians and surgeons.

Existing law provides that a person who practices any system or mode of treating the sick or afflicted, or who diagnoses, treats, operates for, or prescribes for a physical or mental condition of a person, without a valid, unrevoked, or unsuspended physician's and surgeon's certificate is guilty of a misdemeanor.

This bill would provide that the application and rendering by any person, as defined, of a decision that penalizes a physician and surgeon principally for advocating for medically appropriate health care as defined, violates public policy.

The bill would require that these provisions not be construed to prohibit a payer from making a determination not to pay for a particular medical treatment or service, to prohibit certain entities from enforcing reasonable peer review or utilization review protocols, or to prevent the Medical Board of California from taking disciplinary actions authorized by existing law.

Ch. 948 (AB 1713) Farr. Organic food.

(1) Existing law, the California Organic Foods Act of 1990 in the Sherman Food, Drug and Cosmetic Law (hereafter, the act), generally prohibits food from being sold as organic in the state unless it consists entirely of, among other things, processed food manufactured only from raw agricultural commodities, as defined. Existing law makes the violation of any provision of the Sherman Food, Drug and Cosmetic Law or any regulation adopted thereto a misdemeanor.

Existing law requires the Organic Food Advisory Board to comprise 13 members, including one processor member.

This bill would instead require the board to comprise 14 members, including 2 processor members.

(2) Existing law requires the Director of Food and Agriculture, in consultation with the board, to adopt regulations, on or before January 1, 1994, listing specific substances that are in compliance or not in compliance with the definition of "prohibited materials" for use in the production and handling of organic foods and to make a determination regarding substances on a national materials list for use in this production and handling.

This bill would extend the date to January 1, 1996. This bill would require the board, in consultation with the director, to make determinations regarding substances that may be used for the production and handling of organic food.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would provide that it is unlawful for any person to commingle nonorganic commodities with commodities sold as organic, with certain exceptions.

(3) Existing law requires any raw agricultural commodity produced from seed to be from seed that has not been treated with any prohibited material. However, existing law authorizes, if untreated seed is unavailable, the use of seed treated with fungicide for food germinated prior to January 1, 1994, except for seed used for sprouts.

This bill would instead authorize, if untreated seed is unavailable, the use of seed treated with fungicide for food, except seed for sprouts.

This bill would permit water, air, and salt and other prescribed ingredients to be included within the processed food manufactured only from raw agricultural commodities.

(4) Existing law requires any producer, handler, processor, or retailer of food sold as organic to keep prescribed records available for inspection by the Director of Health Services and the Director of Food and Agriculture.

This bill would prohibit those records from being public records for purposes of the California Public Records Act. This bill would authorize certain law enforcement officials to inspect these records.

(5) Existing law requires both directors to obtain and provide to a requesting party a copy of records that are required to be kept under the act that pertain to a specific product. Existing law exempts prescribed information on these records from disclosure to a requesting party. Existing law authorizes both directors to require specific information on the date and location of sale or offer for sale and details concerning the identity of the product.

This bill would require, upon a written request that establishes cause, the directors to obtain and provide a copy of required records that pertain to a specific product and identify substances applied, administered, or added to that product and would require that this information is not to be considered a trade secret. The bill would provide that information regarding the identity of suppliers or customers and the quantity or price of supplies purchased or products sold is to be included among the information that is exempt from disclosure. It would also prohibit the release of exempt information to any person other than to prescribed government officials or entities. This bill would delete the authority of the directors to require the specific information. The bill would provide that these provisions become inoperative on January 1, 1995. The bill would authorize each director to charge a reasonable fee to reimburse him or her self the source of the records for the cost of reproducing the records requested.

(6) Existing law requires an organization that certifies food as organic to meet several qualifications, including the qualification that it be the certification organization for at least 10 legally separate and distinct persons involved in the production or processing of organic food. It also requires this organization to be registered with the director on a form that includes the names of all persons involved in making certification decisions or setting certification standards.

This bill would instead require the organization to meet, among other qualifications, the qualification that it be the certification organization for at least 5 of these legally separate persons. This bill would instead require the organization to be registered with the director on a form that includes a written statement affirming compliance with specific provisions of the act and would require the director to make this form available on or before December 1, 1993.

This bill would authorize a federally accredited certification organization to certify organic food in the state.

(7) Existing law requires the director to supervise all certification organizations registered with the department, establish complaint procedures concerning noncompliance with the act by these organizations, and establish and collect an annual registration fee not to exceed $2,000.

This bill would delete these requirements and would establish a registration fee of $500, or, if the organization is also registered as a certifier of producers by the Director of Food and Agriculture, $100.

(8) Existing law requires a registered certification organization to conduct at least

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

two initial inspections of the premises at which the food is to be certified or processed.

This bill would require that provision to apply only to a producer, and would instead require one inspection.

(9) Existing law prohibits the certification of food unless compliance with the act is verified by the certification organization for at least one year in the case of producers and at least 6 months in the case of processors.

This bill would delete the 6-month verification requirement in the case of processors and would instead require verification of producers for at least one year prior to initial certification.

(10) Existing law authorizes the sale of processed or multiingredient food as organic only if all the ingredients are certified.

This bill would instead authorize the sale of these foods as organic only if all the organic ingredients are certified.

(11) Existing law requires every person who processes or handles processed food sold as organic, except for processed meat, fowl, or dairy products, to register with the director prior to the first sale of this food on a form that includes prescribed information and is accompanied by a registration fee not to exceed $2,000, as prescribed.

This bill would instead require every person who processes or handles this food, except for processed meat, fowl, or dairy products, to register with the director on a form that includes prescribed information and is accompanied by a registration fee of $100.

The bill would require processors and handlers of processed food registered with the department under the Food Processors Registration System to register in conjunction with the annual renewal of that registration. The bill would set forth penalties and interest for late registration.

This bill would require the director to provide a validated copy of the registration form to the registrant. This bill would also require registration information regarding quantity of products sold and gross sales volume in dollars to be deleted from any registration forms before they are made available to the public.

This bill would authorize the director to administratively establish a procedure to permit certification organizations operating outside the state to apply for and be recognized pursuant to provisions of existing law.

This bill would make it unlawful for any person to represent in advertising or labeling that the person or the foods of the person are registered.

This bill would require, on or before March 1, 1995, the director to compile and publish a summary of information regarding registrations under the act.

This bill would provide that all organic food regulations and any amendments to the regulations adopted pursuant to federal law that are in effect on the date this bill is enacted or that are adopted after that date are the organic food regulations of this state.

The bill would also authorize the department, if certain federal requirements are satisfied, to adopt regulations that prescribe conditions under which organic foods may be sold in the state, whether or not they are in accordance with regulations adopted pursuant to federal law. This bill would limit the enforcement responsibilities of the department concerning state law relating to organic foods.

Since this bill would change the definition of existing crimes and would create additional crimes, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 949 (SB 431) Greene. Pain management.

Existing law regulates the licensure of hospices and requires hospices to provide pain and symptom management. Existing law also provides for the licensure of physicians and surgeons, and podiatrists, administered by the Medical Board of California and the California Board of Podiatric Medicine, respectively.

This bill would require the Medical Board of California to notify licensees of the

NOTE: Superior numbers appear as a separate section at the end of the digests.

existence of pain management guidelines published by the Agency for Health Care Policy and Research of the Public Health Service within the United States Department of Health and Human Services, and to provide those guidelines upon request.

Ch. 950 (SB 415) Presley. Children.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, through which qualified children in foster care are provided assistance for specified needs. The AFDC-FC program is administered and partially funded by counties, and is administered pursuant to regulations adopted by the State Department of Social Services.

Existing law provides for the establishment of group home rates for the payment of group homes for the provision of care to eligible children under the AFDC-FC program.

This bill would revise the method of calculating group home rates beginning July 1, 1994.

Existing law requires the department to reimburse group home AFDC-FC providers on a basis of points determined according to various factors, and requires the department to adjust the data used in determining the rate point classifications by January 1, 1993.

This bill would prohibit the State Department of Social Services from reducing the reimbursement rate, establishing an overpayment, or taking other action for any period a group home fails to maintain the level of care and services associated with that rate classification level if the program has maintained the level of care and services associated with the rate classification level for the average number of beds actually occupied during that period.

Existing law requires the department to develop and implement a level of care assessment instrument process which shall match the assessed needs of the dependent child of the court or ward of the court and his or her family with the structure, supervision, and services provided by appropriate placement resources.

This bill would make that requirement applicable only if feasible.

Existing law requires the department to develop, by July 1, 1993, performance standards and outcome measures for determining the effectiveness of the care and supervision of AFDC-FC group homes.

This bill would specify that the performance standards and outcome measures must meet certain requirements.

The bill would require the State Department of Social Services to review and recommend to the appropriate policy and fiscal committees of the Legislature a new or revised ratesetting system for group homes and public care institutions.

Existing law requires the State Department of Social Services to perform or have performed program and fiscal audits, and to adjust the rate and to recover any overpayments resulting from an overstatement of the projected level of care and services.

This bill would require the department to modify the amount of an overpayment if the level of care and services meets certain requirements.

The bill would require the State Department of Social Services to adopt emergency regulations to implement this bill.

The bill would appropriate funds from the General Fund and the Federal Trust Fund in augmentation of provisions of the Budget Act of 1993 for implementation of this act for the 1993–94 fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 951 (AB 1741) Bates. Children's services.

Existing law authorizes counties to establish an interagency children's services coordinating council, to implement various aspects of children's services.

The bill would require the coordinator to establish a 5-year pilot program for the blending of various children's services funds allocated to designated participating counties.

The bill would require the participating counties to transfer all funds provided to counties for specified child welfare services in the county's strategic plan to use blended funding into a county child and family services fund, for use in providing specified child

NOTE: Superior numbers appear as a separate section at the end of the digests.

and family services under the pilot program and would authorize local education agencies, cities, or private nonprofit agencies to transfer funds to the county child and family services fund for services for children and families.

Ch. 952 (AB 2011) Polanco. Employee housing.

(1) Under the existing Employee Housing Act, certain accommodations meeting the definition of employee housing are exempt from specified land use regulations of a local government.

The bill would specify that employee housing is included within these provisions even if the housing accommodation or property is not located in a rural area, as defined.

(2) Existing law requires local enforcement agencies to gather and submit to the Department of Housing and Community Development, and the department, in areas where it serves as an enforcement agency, to gather specified information relating to employee housing for inclusion in specified annual reports of the department and of the Legislative Analyst.

This bill would impose a state-mandated local program by requiring specified additional information to be gathered by local enforcement agencies, as well as by the department, for inclusion in these reports.

(3) Under existing law, if a court finds that employee housing is in a condition that substantially endangers the health and safety of residents, upon entry of any order or judgment, the court is required to, among other things, order the owner to pay all reasonable and actual costs of the enforcement agency, or order that the local enforcement agency provide the tenants with notice of the court order or judgment.

This bill would authorize an enforcement agency, tenant, or tenant organization or association to seek, and permit a court to order, the appointment of a receiver for the substandard employee housing, under certain circumstances.

(4) Under existing law, fines and penalties collected pursuant to the Employee Housing Act are required to be paid to the enforcement agency that had the major responsibility for investigating and seeking correction of the violations, or a private person or entity under certain circumstances.

This bill would make an appropriation by requiring the amount remaining after all of those agencies and entities are reimbursed for their costs to be deposited into the Farmworker Housing Grant Fund for expenditure by the Department of Housing and Community Development for specified purposes.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 953 (SB 640) Hart. Food Stamp Program: outreach activities.

Existing law requires counties to administer the federal Food Stamp Program, subject to the supervision of the State Department of Social Services.

Existing law requires the department to administer outreach programs and adopt rules and regulations requiring counties to conduct outreach programs to the extent permitted by federal law and eligible for federal financial participation.

This bill would require the department, upon request and subject to the approval of the United States Department of Agriculture, to act as the state entity for any nonprofit organization that is successful in raising money for food stamp outreach activities and that has secured a local governmental agency to serve as the contracting agency, for purposes of receipt of matching funds.

The bill would also require the department to establish a Food Stamp Outreach Task Force, composed as specified. This bill would require the task force to develop a state plan for food stamp outreach, that would be subject to the approval of the department and the United States Department of Agriculture by July 1, 1994. It would repeal the provision establishing the task force on January 1, 1995.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 954 (AB 581) Speier. Weapons: tear gas.

(1) Under existing law, no person shall purchase, possess, or use any tear gas or tear gas weapon if the person has not completed a training course, as specified, and been issued a card identifying the person who has completed the course.

This bill would revise and recast these provisions to provide that no person shall purchase, possess, or use any tear gas or any tear gas weapon that has been certified by the Department of Justice without first obtaining a tear gas instruction card, as specified, and would require any person who legally possesses a tear gas certificate issued by the department prior to March 1, 1994, to obtain oleoresin capsicum certification to purchase, possess, or use a tear gas weapon in which the active ingredient is oleoresin capsicum. The bill would provide that the department shall issue these tear gas instruction cards commencing March 1, 1994, if the applicant completed a course in the use of tear gas and tear gas weapons certified by the Department of Justice, completed an objective test as prescribed by the department, or completed point-of-sale instruction, as specified. The bill would require the objective test to be administered by a licensed point-of-sale tear gas retailer, as defined, or by a certified tear gas training institution, as specified.

The bill would authorize the department to establish and charge specified fees, including a fee not to exceed $10 paid to the Department of Justice for the cost of the department to administer the program. The bill also would authorize Department of Justice certified tear gas training institutions to charge a fee covering the actual cost of that training.

The bill also would appropriate $96,000 from the General Fund to the Department of Justice to meet startup costs, and would declare that it is the intent of the Legislature that these funds be repaid to the General Fund no later than January 1, 1996.

(2) Existing law provides that any person who uses tear gas or tear gas weapons except in self-defense or as authorized for training purposes by the Department of Justice is guilty of a public offense, punishable by imprisonment in a state prison for 16 months, or 2 or 3 years, or in a county jail not to exceed one year, or by a fine not to exceed $1,000, or by both the fine and imprisonment.

This bill would provide that any person who uses in self-defense, or purchases or possesses for the purpose of self-defense, any tear gas or tear gas weapon that has not been certified by the department is guilty of a misdemeanor, punishable by imprisonment in a county jail for a period not to exceed one year, or by a fine not to exceed $2,000, or by both the fine and imprisonment. By increasing the scope of an existing crime, this bill would establish a state-mandated local program.

However, the bill would provide that it shall be an infraction for any person who has not obtained a tear gas instruction card to use in self-defense, or purchase or possess for the purpose of self-defense, any tear gas or tear gas weapon, as specified, that has been certified by the Department of Justice as acceptable pursuant to (5).

(3) The bill would also require that, on and after March 1, 1994, specified information shall accompany each tear gas container or tear gas weapon, including information on the directions for use, first aid, safety and storage, and an explanation of the legal ramifications of the improper use of the tear gas container or tear gas product.

(4) Under existing law, a minor may not purchase, possess, or use tear gas or tear gas weapons unless the minor has attained the age of 16 years, has completed a course of instruction, as specified, and has obtained the written consent of his or her parent or guardian. A person may sell or furnish tear gas or a tear gas weapon to a minor who is 16 years of age if the minor presents a valid identification card that contains a statement of consent to the purchase signed by the minor's parent or guardian and indicating that the minor has completed a specified course of instruction.

This bill would, instead, require that a minor who has attained the age of 16 years present a statement of consent signed and verified by the minor's parent or guardian and a signed affidavit in a prescribed format stating under penalty of perjury the person's intent to use the tear gas or tear gas weapon solely for self-defense purposes. This bill would also provide that any civil liability of a minor arising out of his or her use of tear gas or a tear gas weapon other than for self-defense is imposed on the person who

NOTE: Superior numbers appear as a separate section at the end of the digests.

signed and verified the statement of consent, as specified.

(5) Existing law provides that no tear gas or tear gas weapon shall be possessed, sold, or transported in this state unless the Department of Justice has certified that particular type and brand of tear gas or tear gas weapon to be acceptable.

This bill would provide that any person who is otherwise qualified, as specified, may purchase, possess, or use tear gas or a tear gas weapon in which the active ingredient is oleoresin capsicum. However, no oleoresin capsicum tear gas weapon shall be purchased, possessed, used, sold, or transported in this state unless the department has certified that the particular brand of oleoresin capsicum tear gas or type of oleoresin capsicum tear gas weapon is acceptable, as specified.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 955 (SB 312) Petris. Professional law corporations.

Existing law provides for the formation of professional law corporations and their regulation by the State Bar of California.

This bill would allow a professional law corporation to be incorporated as a nonprofit public benefit corporation if (1) the corporation complies with the provisions of the Nonprofit Public Benefit Corporation Law, and additional specified requirements, or (2) the corporation is a qualified legal services project or a qualified support center as specified. The bill would make conforming changes.

The bill would, until January 1, 1996, exempt those corporations from a requirement of obtaining errors and omissions liability insurance if the board of directors has made all reasonable efforts to obtain available insurance.

The bill would also exempt qualified legal service projects and support centers from certain filing requirements.

This bill would incorporate additional changes in Sections 6161 and 6165 of the Business and Professions Code and Section 13406 of the Corporations Code proposed by SB 687, to be operative only if SB 687 and this bill are both chaptered and become effective January 1, 1994, and this bill is chaptered last.

This bill would incorporate additional changes in Section 13401 of the Corporations Code proposed by SB 687 or AB 1807, or both, to be operative only if SB 687 or AB 1807, or both, and this bill are chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

Ch. 956 (SB 316) Rosenthal. South coast district: advanced pollution control technologies.

(1) Existing law, the Lewis-Presley Air Quality Management Act, requires the South Coast Air Quality Management District to establish a 5-year program to encourage participation in projects to increase the utilization of clean-burning fuels. Existing law also authorizes the south coast district to impose a specified fee surcharge based on emissions, and, until August 1, 1994, to impose a $1 fee on the renewal of registration of motor vehicles in the district, to fund that program.

This bill would extend that program indefinitely and that motor vehicle registration fee authority until August 1, 1999. The bill would restrict the use of the motor vehicle registration renewal fee, as specified.

(2) The act requires the south coast district to submit an annual report to the state board and the Legislature on its regulatory activities for the preceding calendar year. The report is required to include specified elements.

This bill would require the south coast district to include biennially the results of the clean fuels program in the annual report. That requirement would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 957 (SB 572) Killea. Transportation: toll bridges: San Diego-Coronado Bridge.

(1) Existing law transfers authority from the California Transportation Commission to the San Diego Association of Governments for fixing tolls on the San Diego-Coronado Bridge. Under existing law, the association may not set tolls at rates exceeding $1.50 per vehicle.

This bill would make that limitation applicable only to Class 1 vehicles.

(2) Under existing law, tolls established by the commission are to remain in effect until June 30, 1995.

This bill would provide for those tolls to remain in effect until that date, unless changed by the association.

(3) Existing law creates the San Diego-Coronado Toll Bridge Revenue Fund.

This bill would appropriate all money deposited in the fund prior to March 26, 1992, that is not expended, encumbered, or programmed before January 1, 1994, to the Controller for allocation to the San Diego Association of Governments for transportation services that increase the bridge's capacity, reduce the demand for travel in the transportation corridor, as defined, or for alternative forms of transportation.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 958 (SB 575) Rogers. Smog certificate.

(1) Existing law requires a certificate of compliance or noncompliance with motor vehicle emission standards upon, among other things, the transfer of registration of a vehicle, except in certain instances.

This bill would exempt certain transfers from this requirement if a valid certificate of compliance or a certificate of noncompliance, as appropriate, was obtained, as specified.

The bill would also require the transferor of a motor vehicle that is subject to emission certification requirements, and that is not subject to certain exceptions, to sign and deliver to the transferee, upon completion of the transaction, a statement, under penalty of perjury, that he or she has not modified the emission system and does not have any personal knowledge of anyone else modifying the emission system in a manner that causes the emission system to fail to qualify for the issuance of a certificate of compliance. The bill would require the department to prescribe and make available to transferors the necessary forms, as specified. Because a violation of the provision would be a crime, the bill would impose a state-mandated local program by creating a new crime. The bill would provide for the rescission of a sale of a motor vehicle with regard to which the transferor is found to have committed perjury, as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 959 (SB 734) Rosenthal. State and local purchasing: recycled products.

Existing law declares it is state policy to conserve and protect resources using recycled resources. For example, existing law requires local and state public agencies to purchase recycled paper products, when available, with fitness and quality equal to that of their nonrecycled counterparts.

This bill would require all state agencies to purchase rerefined automotive lubricants, recycled antifreeze, recycled solvents and recycled paints all of which as defined by this bill. The purchase of the listed materials is required only when they are available, of a fitness and quality equal to their nonrecycled counterparts, as defined, and are not more costly than 5% of the lowest price quoted by suppliers. This bill allows state agencies to submit claims pursuant to a specified pilot program for funding price preference purchases.

The bill would provide that it is repealed on January 1, 1997.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 960 (AB 11) Eastin. Recycled products: purchase requirements.

(1) Existing law, the State Assistance for Recycling (STAR) Markets Act of 1989, requires government agencies to give purchasing preference to recycled products. Existing law also requires the Legislature to give purchasing preference to recycled products.

This bill would require a state agency or contractor supplying materials, goods, or services to the state and the Legislature, if a recycled product, as defined, costs more than the same product made with virgin material, to purchase fewer of those more costly products, if feasible, or to apply cost savings, if any, gained from buying other recycled products towards the purchase of those more costly products.

(2) The act requires the Department of General Services to give a preference to suppliers of recycled paper products, as defined, of up to 5% of the lowest bid or price quoted by suppliers offering nonrecycled paper products.

Existing law requires the Legislature to give a purchasing preference if the recycled product meets all applicable standards and can be substituted for a comparable nonrecycled product.

The act and that existing law require that, by January 1, 1992, at least 35%, and by January 1, 1994, at least 40%, of the total dollar amount of paper products purchased or procured by the department and the Legislature be purchased as recycled paper product.

This bill would instead require the department to set goals for purchases made by state agencies which require that, by January 1, 1994, at least 40%, and by January 1, 1996, at least 50%, of the total dollar amount of paper products purchased or procured by the department be purchased as recycled paper product and would make a related statement of legislative intent. The bill would also require that, by January 1, 1994, at least 15%, and by January 1, 1996, at least 25%, of the total purchased or procured fine writing and printing paper be a recycled paper product. The bill would require that, by January 1, 1995, at least 40%, and by January 1, 1997, at least 50%, of the total dollar amount of paper products purchased or procured by the Legislature be purchased as recycled paper product. The bill would also require that by January 1, 1995, at least 15%, and by January 1, 1997, at least 25%, of the total fine writing and printing paper purchased or procured by the Legislature be a recycled paper product. The bill would require all state agencies to give a purchase preference, not to exceed 10% for recycled paper products, if the product's fitness, quality, availability, and price meet specified requirements. The Legislature, the department, and state agencies would also be required to give special consideration to purchasing certain products.

(3) The act requires procuring agencies, when purchasing materials, goods, or supplies, to give a purchasing preference to recycled products, including specified paving materials, when specified conditions are met. Existing law requires that at least 10% of those purchases be of recycled products by January 1, 1991, 20% by January 1, 1993, and 40% by January 1, 1995.

This bill would apply those provisions to all state agencies, would delete the inclusion of those paving materials, and would require the department to set goals for purchases made by state agencies which would be at least 20% by January 1, 1996, 30% by January 1, 1998, and 50% by January 1, 2000, if feasible.

(4) The act requires procuring agencies to require contractors to certify the recycled content of materials, goods, or supplies, as specified.

This bill would authorize the department, in consultation with the California Integrated Waste Management Board, to establish recycled-content disclosure, recycled product-only bids, if feasible, and cooperative purchasing arrangements, and to conduct an avoided-cost analysis to assist in meeting recycled product preference and purchasing requirements.

(5) The bill would require the board to implement a pilot program, if adequate funds are available, from January 1, 1994, to January 1, 1997, for funding claims submitted by state agencies for providing the price preferences required by the bill.

(6) The bill would repeal all of the provisions in (1), (2), (3), and (4) above, on January 1, 2001.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 961 (AB 75) Hauser. Air pollution: district governing boards: funding.

(1) Under existing law, the governing board of a county air pollution control district is ex officio the county board of supervisors; the governing board of a unified air pollution control district is ex officio the board of supervisors of each county comprising the district; the governing board of a regional air pollution control district consists of an agreed upon number of county supervisors and members of the city selection committee from each county, which committee consists of the mayors of the cities in the county; the governing board of the Sacramento Metropolitan Air Quality Management District consists of county elected officials, as specified; the governing boards of the Bay Area Air Quality Management District and the South Coast Air Quality Management District include members who may be either county supervisors or mayors or city council members, as prescribed; and the governing board of the San Joaquin Valley Air Quality Management District, which would be created under prescribed conditions, consists of county supervisors and prescribed city members.

This bill would, on and after July 1, 1994, require the governing board of each of those districts, except as specified, to include both county supervisors and mayors or city council members, as specified. By imposing new duties on local agencies, the bill would impose a state-mandated local program.

The bill would specify sources of funding for those districts.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 962 (AB 713) Goldsmith. Highway tolls: transit service: demonstration project.

Existing law authorizes 4 toll highways in northern California and one in southern California, to be operated as demonstration programs. Existing law also authorizes certain transportation projects in Orange County to be constructed and operated as toll facilities by a joint powers agency.

This bill would authorize the San Diego Association of Governments (SANDAG), in cooperation with the Department of Transportation, to conduct a demonstration program pursuant to which single-occupant vehicles would be allowed to use the high-occupancy vehicle lane on a specified portion of Interstate Highway Route 15 (I-15) for a fee. The bill would prescribe requirements for agreements relating to the program. The bill would require the fee revenues to be used for the costs of the program, for the improvement of transit services in the I-15 corridor, and for high-occupancy vehicle facilities. The bill would require SANDAG to submit a report to the Legislature.

All of these provisions of the bill would be repealed on January 1, 1998.

Ch. 963 (AB 771) Areias. Economic poisons: registration.

Existing law requires every manufacturer of, importer of, or dealer in, any economic poison to obtain a certificate of registration from the Department of Pesticide Regulation before the economic poison is offered for sale. Under the Birth Defect Prevention Act of 1984, the registration of pesticide products containing an active ingredient with a significant data gap may be suspended and no new active pesticide ingredient may be registered when any of the mandatory health effects studies are missing.

This bill would, notwithstanding those provisions, permit a registrant of any pesticide registered with the United States Environmental Protection Agency to apply to obtain a certificate of interim registration, under specified conditions. The bill would also authorize the department to impose a fee in an amount sufficient to cover the costs of reviewing and processing the application on any person who applies for an exemption. The revenue from the fees would be available to the department, upon appropriation,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to offset the department's costs of processing and reviewing those applications.

Ch. 964 (AB 790) Sher. Timber: sales and purchases.

Under existing law, timber from state forests may not be sold to any primary manufacturer, or to any person for resale to a primary manufacturer, who makes use of the timber at any plant not located within the United States, unless it is sawn on 4 sides to dimensions not greater than 4 inches by 12 inches.

This bill would also prohibit such a sale to a primary manufacturer who, within one year prior to the bid date and one year after the termination of the contract, sells unprocessed timber, as defined, which is harvested from private timberlands and is exported into foreign commerce from this state. The bill would make related changes.

The bill would also impose similar restrictions on the sale by the State Lands Commission of timber harvested from lands under the jurisdiction of the commission pursuant to the commission's authority to harvest timber at the same time as the orderly harvesting of surrounding or adjacent federal-owned or state-owned timber.

Ch. 965 (AB 840) Peace. State agencies: information technology.

Existing law creates various agencies within the state government and prescribes the functions, powers, and duties of those agencies.

This bill would require the Department of Transportation, by June 30, 1994, to (1) apply for federal funding to be used to convert data pertaining to the state highway system from paper storage to intelligent computer information, and (2) commence implementation of the conversion process within 6 months of having its application for federal funding approved. Following completion of that conversion by the department, the bill would require the Multi/Agency Information Management Authority to coordinate the availability of an online information data base for state agencies and departments.

Ch. 966 (AB 925) Burton. Taxation: vehicles: registration fees.

Existing law imposes registration and license fees for the privilege of operating upon the public highways in this state any vehicle of a type that is subject to registration under the Vehicle Code.

This bill would authorize the City and County of San Francisco, upon meeting specified requirements, to impose a local registration fee of $4 on the registration or renewal of registration of any vehicle registered within that city and county, with specified exceptions, and a local vehicle license fee surcharge equal to not more than 15% of the vehicle license fee that is imposed under a specified provision of law. The bill would require the Department of Motor Vehicles to collect the fees and, after deducting all costs incurred pursuant to collecting the fees, to distribute the revenues to the city and county, if it meets the specified requirements, in amounts equal to the net amount of money received from the city and county that was derived from the imposition of the fees. The bill would require the money allocated pursuant to this provision to be expended exclusively for specified purposes and would, under specified circumstances, repeal the authority to impose the fees.

Ch. 967 (AB 931) B. Friedman. Crimes.

Existing law prohibits specified activities with regard to distributing, sending, causing to be sent, exhibiting, or offering to distribute or exhibit harmful matter, as defined, to a minor, as specified, a violation of which is a misdemeanor or a felony for the first offense and a felony for a 2nd or subsequent offense.

Existing law also prescribes punishments for a violation of specified sex offenses, as specified.

This bill would authorize the court, upon the conviction of any person for a violation of specified offenses regarding harmful matter and specified sex offenses, to, in addition to any other penalty or restitution fine imposed, order the defendant to pay a restitution fine based on the defendant's ability to pay not to exceed $5,000, upon a felony conviction, or $1,000, upon a misdemeanor conviction. This bill would require that every fine imposed and collected under this provision be deposited in the Restitution Fund to be

NOTE: Superior numbers appear as a separate section at the end of the digests.

transferred to the county children's trust fund for the purpose of child abuse prevention.

This bill would provide that if the court orders the fine to be imposed upon conviction for the above-described offenses, the actual administrative cost of collecting the fine, not to exceed 2% of the total amount paid, may be paid into the general fund of the county treasury for the use and benefit of the county.

Existing law provides that the proceeds of the Restitution Fund are continuously appropriated, as specified.

This bill would make an appropriation by increasing the moneys in the Restitution Fund that are subject to appropriation and expanding the purposes for which those funds may be expended.

Ch. 968 (AB 1023) Baca. Redevelopment: Norton Air Force Base: project area committee.

Existing law authorizes the legislative bodies of communities as defined under the Community Redevelopment Law to form a joint powers authority for purposes of the redevelopment of a project area containing privately owned land adjacent to, or in close proximity to, as defined, Norton and George Air Force Bases which are proposed to be closed by the federal government pursuant to Public Law 100-526.

This bill would impose a state-mandated local program by requiring the joint powers agency operating within the area of Norton Air Force Base to appoint a project area citizens committee for the purpose of consultation and advice regarding policy matters which deal with planning and programs affecting the residents, businesses, and educational institutions within the project area, implementation of the redevelopment plan, and the development and implementation of amendments to the redevelopment plan.

The bill would make legislative findings and declarations concerning the unique circumstances necessitating its enactment.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 969 (AB 1124) Hauser. Land use: multifamily dwellings.

(1) Existing law generally authorizes the legislative body of any county or city to regulate, by ordinance, the use of buildings, structures, and land as between industry, business, residences, open space, and other purposes.

This bill would require planning commissions and legislative bodies, prior to noticing a public hearing on a proposed zoning ordinance or amendment reducing the density permitted on property authorized for multifamily dwelling uses, to approve a nonconforming use ordinance for multifamily dwellings that are involuntarily damaged or destroyed. The bill would allow the nonconforming use ordinance to be conditioned on the approval of the ordinance or amendment reducing the density permitted on property authorized for multifamily dwelling uses and would specify applicability, notice, and hearing provisions, including providing for combined hearing notice, when appropriate. The bill would provide that the nonconforming use ordinance need not apply to abandoned dwellings, or those constituting a public nuisance, as specified. The bill would state that its provisions shall not apply to a city, county, or city and county that has adopted a nonconforming use ordinance, as specified, or to a proposed multifamily dwelling ordinance or amendment that has been requested by the owner of the property authorized for multifamily dwelling uses.

Because the bill would require planning commissions and legislative bodies to adopt new procedures, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish

NOTE: Superior numbers appear as a separate section at the end of the digests.

procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 970 (AB 1166) Polanco. Youth services.

Existing law authorizes counties to implement various services for children.

This bill would authorize counties to implement an interagency day care program for multiple needs youths who are being served by, or who are at risk of being served by, the juvenile justice system.

The bill would require the Department of the Youth Authority to conduct an assessment of the feasibility of adopting the San Bernardino County Youth Justice Center Model, as defined, on a statewide basis, and to submit the assessment to the appropriate committees of the Legislature by July 1, 1994.

This bill would require the San Bernardino County Youth Justice Center to provide certain information to any county that requests that information to replicate that model or implement a similar program, thereby resulting in a state-mandated local program.

Existing law requires a county that receives state social services funding that also reduces the capacity of its juvenile homes, ranches, camps, or forestry camps below a specified level shall contribute to the Department of the Youth Authority an amount equivalent to the actual cost of commitments from the county's juvenile court system to the authority above a specified level.

This bill would exempt Santa Clara County from reductions in the capacity of its juvenile homes, ranches, camps, or forestry camps that were made prior to January 1, 1993, if the reductions were due to fiscal restraints.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 971 (AB 1453) Sher. Enterprise zones: designation.

The Enterprise Zone Act requires the Department of Commerce to designate enterprise zones from geographic areas proposed by local governments.

This bill would authorize the department to accept and consider applications for designation of enterprise zones filed on or before June 30, 1994, by cities with less than a specified population and to designate two places from those applications.

Ch. 972 (AB 1663) Napolitano. Counties or cities: parks: personnel.

(1) Under existing law, a county, city, or special district operating parks, playgrounds, recreational centers, or beaches is not required to screen prospective employees or volunteers for their criminal background.

This bill would prohibit a county or city or city and county or special district, in connection with the operation of a park, playground, recreational center, or beach used for recreational purposes, from hiring for employment or as a volunteer any person in a position having supervisory or disciplinary authority over any minor, if the person has been convicted of specified crimes, thereby imposing a state-mandated local program by implicitly requiring the county or city or city and county or special district to take reasonable steps to determine if a prospective employee or volunteer is such a person. The bill would authorize a county or city or city and county or district to screen, in

NOTE: Superior numbers appear as a separate section at the end of the digests.

accordance with specified law, any such prospective employee or volunteer for their criminal background.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 973 (AB 1937) Campbell. Hazardous waste: environmental impact statement.

(1) Existing law, the California Environmental Quality Act, requires a lead agency, as defined, to prepare an environmental impact report on any project which it intends to carry out or approve that may have a significant effect on the environment, as defined, with specified exceptions. The act requires a lead agency to prepare an environmental impact report for a project involving the burning of municipal wastes, hazardous waste, or refuse derived fuel, but specifies exemptions from that requirement.

This bill would additionally exempt from that requirement a project which exclusively conducts onsite burning of hazardous waste in an industrial furnace that recovers hydrogen chloride from the flue gas, if the hydrogen chloride is subsequently sold, distributed in commerce, or used in a manufacturing process at the site where the hydrogen chloride is recovered, and the burning is in compliance with specified requirements.

The bill would impose a state-mandated local program on local agencies with regard to determining the applicability of, giving notice of, and filing the notice of, the exemption.

The bill would delete obsolete provisions and revise obsolete references and would make various other clarifying and technical changes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 974 (SB 482) Johnston. Insurers.

(1) Existing law provides for the establishment of a California Life Insurance Guaranty Association to provide coverage for life insurers unable to pay life insurance claims. Similarly, under existing law, the Robbins-Seastrand Health Insurance Guaranty Association Act, provides for creation of the Robbins-Seastrand California Health Insurance Guaranty Association to provide coverage for insurers unable to pay claims under health and supplemental policies or contracts due to insolvency or impairment.

This bill would abolish both of those guarantee associations and instead create the California Life and Health Insurance Guarantee Association to provide coverage for persons for direct, nongroup life, health, annuity, and supplemental policies or contracts of insurance, except as specified, in case of failure in the performance of contractual obligations under policies and contracts because of the impairment or insolvency of the member insurer that issued the policies or contracts. The bill would specify the duties and powers of the association, and the instances and procedures for payment of claims.

The bill would also make various technical and conforming changes.

(2) Existing law provides that domestic stock insurers may make dividends only from the surplus of admitted assets in excess of the aggregate of: (a) par value of issued or subscribed shares; (b) a surplus based on par value of issued or subscribed shares; and (c) specified reserves.

This bill would instead provide that the dividends may be made only from earned surplus, except as specified.

The bill would impose requirements on dividends of insurers registered under the Holding Company Act to prohibit the payment of dividends until at least 10 business days after the Insurance Commissioner has received notice. It would authorize the commissioner to issue an order stopping payment of the dividend or other distribution if, in the commissioner's opinion, the payment would violate any provision of the Insurance Code or if payment may be hazardous to the insurer's policyholders, creditors, or

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the public. It would require, for purposes of determining whether the insurer's surplus is reasonable, consideration of the quality of the company's earnings, and the extent to which they include extraordinary accounting items. It would eliminate a provision that exempted title insurers from an extraordinary dividend restriction.

Existing law provides that domestic life insurers, issuing policies on the reserve plan, may make dividends only from profits remaining on hand after retaining unimpaired assets amounting to the aggregate of: (1) the entire capital stock; (2) a sum sufficient to pay all losses reported or in course of settlement, and all liabilities; and (3) a sum sufficient to reinsure all outstanding policies.

This bill would provide instead that the dividends may be made only from earned surplus, except as specified.

The bill would, for a domestic incorporated life insurer issuing policies in the reserve plan, provide that no dividends may be declared out of earned surplus derived from mere appreciation in the value of assets, as specified.

The bill would eliminate provisions relating to incorporated fire and marine insurers and to mortgage insurers.

Existing law provides for the financial regulation of insurers by the Insurance Commissioner, including various provisions relating to rehabilitation and insolvency.

This bill would require life insurers to file an annual risk-based capital report concerning various risks to the insurer's assets. The bill would require certain actions by insurers based on the report, and, in some instances, would authorize the commissioner to take action.

Existing law requires title insurers to set aside certain amounts in their unearned premium reserve.

This bill would revise that amount commencing January 1, 1994, and would make related changes.

This bill would incorporate additional changes to Sections 1067.02 and 1067.04 of the Insurance Code proposed by SB 435, contingent upon the prior enactment of that bill.

Ch. 975 (SB 435) Russell. California Life Insurance Guaranty Association.

Existing law provides for the establishment of the California Life Insurance Guaranty Association to provide coverage for insurers unable to pay claims under life insurance. For coverage purposes, existing law defines annuity contracts and certificates under group annuity contracts to include certain agreements and contracts and does not provide coverage for unallocated annuity contracts.

This bill would expand that coverage list to include unallocated annuity contracts sold to an employer to provide employees with deferred compensation or pension benefits, subject to specified conditions. It would also make a related change with respect to the definition of unallocated annuity contract. The bill would prohibit the offer of an unallocated annuity contract that is not covered by the guarantee association without disclosure of that fact, as specified.

Existing law provides that the California Life Insurance Guaranty Association Act does not apply to any insurer that was declared to be insolvent or impaired, or as to which delinquency proceedings had been commenced, on or before January 1, 1991.

This bill would change that date to October 1, 1990, and would provide that specified provisions also apply to contracts issued by a foreign insurer that was declared insolvent or impaired after October 1, 1990, but before January 1, 1991.

This bill would incorporate additional changes in Sections 1067.02 and 1067.04 of the Insurance Code proposed by SB 482, to be operative only if SB 482 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last.

Ch. 976 (SB 154) Roberti. Public parks.

Under existing law, the Director of General Services, with the consent of the Department of Corrections, is authorized to lease without any monetary consideration, specified property of the California Institution for Men in Chino, to the City of Chino, subject to various conditions, for the purposes of developing and maintaining a public park.

This bill would permit the City of Chino to sublease a portion or all of the premises

NOTE: Superior numbers appear as a separate section at the end of the digests.

for the development and maintenance of public park and recreational improvements and facilities, including commercial enterprises. This bill would also authorize the director, with the consent of the Department of Corrections, to let specified property to the City of Chino for purposes of expanding the public park described above.

Under existing law, the Director of General Services is authorized to approve the transfer of state property from one state agency to another state agency for the payment of such consideration as he or she deems proper. Under existing law, land that has been declared surplus by the Legislature may be transferred to local agencies for park and recreation purposes under specified conditions at less than fair market value.

This bill would authorize the director to convey to, exchange, or lease, with the City of Los Angeles, at less than fair market value, approximately 28 acres of real property known as Pan Pacific Park located in the City of Los Angeles, subject to a right of reentry by or reversion to the state, as specified. The bill would require that the agreement contain a provision making the transfer or lease subject to the right of the County of Los Angeles to place and operate a museum on the property, subject to specified conditions.

Ch. 977 (SB 213) Beverly. Sales and use taxes: exemptions: nonmonetized bullion and numismatic coins.

The existing Sales and Use Tax Law exempts from sales and use taxes, until January 1, 1994, the gross receipts from the sales in bulk of nonmonetized bullion and numismatic coins that are substantially equivalent to transactions in securities or commodities through a national securities or commodities exchange.

This bill would delete that date thereby extending this exemption indefinitely.

Existing law defines a sale in bulk of the bullion or coins as a transaction of $1,000 or more.

This bill would require the State Board of Equalization to adjust that amount by an inflation factor adjustment, as specified.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are automatically incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take immediate effect as a tax levy.

Ch. 978 (SB 305) Lockyer. Guardianship and conservatorship.

(1) Existing law provides for the appointment of guardians and conservators, and specifies that, in appointing a guardian of the person, the court is governed by specified existing provisions of law relating to the custody of a minor.

This bill would provide that if a custodial parent, as defined, has been diagnosed as having a defined terminal condition, the court may appoint the custodial parent and a person nominated by that parent as joint guardians of the person of the minor, except that such an appointment shall not be made over the objection of a noncustodial parent without a finding that the noncustodial parent's custody would be detrimental to the minor, as specified.

(2) Under existing law, on or after the filing of a petition for appointment of a guardian or conservator, any person entitled to petition for appointment of the guardian or conservator may file a petition for appointment of a temporary guardian or temporary conservator of the person or estate or both, to serve pending the final determination of the court upon the petition for the appointment of the guardian or conservator. Under these provisions, notice of the proposed appointment is required to be personally delivered to the proposed ward if 14 years of age or older, and to other specified persons, unless the court for good cause otherwise orders. Existing law also provides that the appointment of the temporary guardian or temporary conservator may be made with or without notice to other persons as the court may require.

This bill would require notice of the proposed appointment of a temporary guardian

NOTE: Superior numbers appear as a separate section at the end of the digests.

to be given to the proposed ward if he or she is 12 years of age or older and to any person who has a visitation order, as specified. The bill would delete the latter provision described above, and would provide that in a proceeding for temporary guardianship of the person, evidence that a custodial parent has died or become incapacitated and that the petitioner is the nominee of the custodial parent may constitute good cause for the court to order that the notice described above not be delivered. The bill would provide for a hearing for reconsideration of a temporary guardianship under specified conditions, and would provide that visitation orders granted prior to the filing of a petition for temporary guardianship shall remain in effect, unless the court orders otherwise.

(3) Existing law provides for the disposition of certain funds held for the benefit of a minor or incompetent person, and authorizes a court to order that these funds be paid to a special needs trust, established for the benefit of a minor or incompetent person who has a disability that substantially impairs that person's ability to provide for his or her own care or custody and who is likely to have special needs that will not be met without the trust.

This bill would require the court to hold a hearing before it may order that these funds be paid to a special needs trust, and would require notice of the time and place of the hearing and a copy of the petition to be mailed to the directors of specified state agencies at least 15 days before the hearing. To the extent that the bill would require local officials to mail the notice and a copy of the petition, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 979 (SB 357) Thompson. Taxation: disaster relief.

Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the approval of the board of supervisors. With respect to an eligible county, defined to mean a county that, among other things, has adopted a reassessment ordinance as described above, existing law also authorizes owners of eligible property, as defined, who have applied for reassessment under that ordinance, to apply for and receive the deferral of the next installment of property taxes on the regular secured roll. It additionally authorizes an eligible county to adopt an ordinance allowing, upon the filing of a claim by an assessee, the deferral of that assessee's unpaid and nondelinquent taxes on the supplemental roll. Existing law provides, as specified, for state allocations to eligible counties to reimburse those counties for the deferral of taxes on the regular secured and supplemental rolls, and requires eligible counties to in turn reimburse the state, as provided, for those allocations. Existing law also continuously appropriates, without regard to fiscal years, moneys in the Special Fund for Economic Uncertainties for purposes of the above provisions.

This bill would provide, as specified, for state allocations to eligible counties, declared by the Governor to be in a state of disaster as a result of storm, flooding, or any other related casualty that occurred in specified counties in January 1993, of the estimated amounts of the reductions in property tax revenues on the regular secured and supplemental rolls as a result of reassessment of damaged properties under a reassessment ordinance, with the exception of any estimated property tax revenue reductions to school districts, as provided, county offices of education, and community college districts. It would require those eligible counties receiving those allocations to reimburse the state for those amounts, where the estimated reductions in property tax revenues exceed actual reductions, excluding any property tax revenue lost by school districts, as

NOTE: Superior numbers appear as a separate section at the end of the digests.

provided, county offices of education, and community college districts.

By requiring moneys continuously appropriated from the Special Fund for Economic Uncertainties to be allocated by the Controller for the new purpose of reimbursing certain new eligible counties for the above property tax revenue reductions, this bill would make an appropriation.

The existing Personal Income Tax Law and the Bank and Corporation Tax Law provide for the carryover to specified taxable or income years of specified losses sustained as a result of various disasters occurring in California in an area determined by the President of the United States to warrant specified federal assistance, or proclaimed by the Governor to be in a state of disaster.

This bill would extend those provisions to losses sustained as a result of storm, flooding, or any other related casualty that occurred in a specified city and specified counties in January 1993, for taxable or income years beginning on or after January 1, 1993.

This bill would make certain legislative findings and declarations regarding a statewide public purpose of the bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 980 (SB 365) Kelley. Reclaimed water.

(1) Existing law declares that the use of potable domestic water for various nonpotable uses is a waste or an unreasonable use of water, and prohibits a person or public agency from using potable domestic water for those uses, if reclaimed water is available and specified requirements are met.

This bill would declare that the use of potable domestic water for the irrigation of residential landscaping, or for floor trap priming, cooling towers, or air-conditioning devices is a waste or unreasonable use of water, if certain requirements are met. The bill would authorize a public agency to require the use of reclaimed water for these uses in various prescribed structures, if certain requirements are met.

(2) Existing law authorizes the State Department of Health Services to charge fees for costs incurred in connection with specified provisions regarding the use of reclaimed water in place of potable domestic water for toilet and urinal flushing.

This bill would instead require any person proposing the use of reclaimed water to reimburse the department for costs incurred pursuant to specified provisions of law.

Ch. 981 (SB 461) Thompson. Medi-Cal reimbursement rates.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. Many of these services are provided subject to utilization controls, with one of these controls being a requirement that a provider obtain prior authorization or reauthorization for the provision of services from the Medi-Cal program.

Existing regulations adopted by the department concern reimbursement rates for Medi-Cal services, as well as requirements for the submission of prior authorization requests and circumstances under which reimbursement will be provided when a request has been submitted late.

This bill would make legislative findings concerning the existing prohibition against making Medi-Cal payments to a long-term health care facility when the treatment authorization request has been submitted late.

The bill would require the department to specify circumstances under which requests for authorization may be granted for services provided by skilled nursing facilities and, except for specialized types, intermediate care facilities, for periods of up to 2 years.

Ch. 982 (SB 645) Presley. Attorneys: discipline.

Existing law provides for the licensing and discipline of attorneys admitted to practice law in this state by the State Bar of California. Within the State Bar, there is the State Bar Court consisting of no fewer than 6 hearing judges.

This bill would provide that there shall be no fewer than 7 hearing judges.

Existing law provides for a complainants' grievance panel within the State Bar to monitor complaints and disciplinary proceedings against attorneys. The panel consists of 4 members of the State Bar and 3 public members who have never been members

NOTE: Superior numbers appear as a separate section at the end of the digests.

of the State Bar or admitted to practice before any court in the United States.

This bill would revise the membership of the panel to require 4 public members and 3 attorney members, as specified.

This bill would also revise the duties of the panel and would impose additional responsibilities on the panel with respect to the audit and review of complaints, as specified. The bill would provide for funding for the panel, as specified. This bill would repeal existing law which establishes and provides for the panel on January 1, 1999, unless a later enacted statute deletes or extends that date on or before that date.

This bill would authorize the State Bar to establish an alternative dispute resolution discipline mediation program to resolve complaints against attorneys that do not warrant the institution of formal investigation or prosecution.

Existing law provides in certain cases that a written fee agreement or contract containing specified information is required between an attorney and his or her client. That agreement or contract is required to include a statement disclosing whether the attorney maintains errors and omissions insurance coverage applicable to the services to be rendered and, in specified circumstances, the policy limits of that coverage.

This bill would, instead, require that agreement or contract to include, if the attorney does not maintain errors and omissions coverage or has not filed a guaranty agreement, as specified, with the State Bar, a statement disclosing that fact. The bill would permit the State Bar to impose a filing fee, as specified. This provision would become operative on January 1, 1994, and would be repealed on January 1, 1997, unless a later enacted statute deletes or extends that date. This bill, on and after January 1, 1997, would not require the written fee agreement or contract to include any statement regarding an attorney's errors and omissions insurance coverage or guaranty agreement.

Under former law, the signature of an attorney or party constituted a certificate that the person had read the pleading, motion, or paper, and that it was well grounded in fact and was warranted by existing law or a good faith extension, modification, or reversal of existing law, and was not interposed for any improper purpose. If the paper was not signed, it was required to be stricken if not promptly signed. If a pleading or other paper was signed in violation of those provisions, the court, upon motion or its own initiative and after notice and an opportunity to be heard, was required to impose sanctions, as specified. This law only applied in Riverside County and San Bernardino County and was repealed on January 1, 1993.

This bill would reenact this law, except that it would not apply in actions pertaining to personal injury or wrongful death, and its operation would be limited to Riverside County, and would provide that it remain in effect until January 1, 1998, unless a later enacted statute deletes or extends that date on or before that date.

Existing law, with certain exceptions, makes privileged any confidential communication between a lawyer and a client, as specified.

This bill would create an exception to the lawyer-client privilege if the lawyer reasonably believes that disclosure of any confidential communication relating to representation of a client is necessary to prevent the client from committing a criminal act that the lawyer believes is likely to result in death or substantial bodily harm.

Ch. 983 (SB 789) Rosenthal. Energy programs: funding.

Existing law requires the State Energy Resources Conservation and Development Commission to administer various programs relating to research, development, demonstration, and commercialization of energy resources.

Existing law, the Rosenthal-Naylor Act of 1984, provides, until January 1, 1995, for the funding of certain energy technology projects.

This bill would extend the operation of that act until January 1, 2005.

The bill would enact the Energy Research, Development, Demonstration, and Commercialization Act of 1993 to provide, until that date, for loans, research contracts, and grants, as defined, for energy technology projects, as specified.

Ch. 984 (SB 896) McCorquodale. Special education programs: transfer.

Existing law prohibits special education programs already in operation in school districts from being transferred to the county superintendent of schools or other school

NOTE: Superior numbers appear as a separate section at the end of the digests.

districts, or from the county superintendent of schools to school districts, without the approval of the Superintendent of Public Instruction, if the transfer would result in an entitlement to increased state aid.

This bill would additionally prohibit the Superintendent of Public Instruction from approving these transfers if the transfer would result in diminishing the level of services or the opportunity of affected pupils to interact with the general school population, as required by the individualized education programs of the affected pupils.

Ch. 985 (SB 931) Killea. Local government: records.

The existing Housing Authorities Law permits a housing authority to undertake various actions for the purpose of increasing the availability of housing.

Under existing law, county welfare departments administer various public social services programs, including the Aid to Families with Dependent Children program and county general assistance programs.

This bill would permit a housing authority and a county welfare department, without the need to provide written documentation that client consent has been obtained, to provide information to the other entity necessary for the administration of the respective programs that those entities administer. It would require a specified notice to be provided to persons about whom information is to be exchanged, and would permit the client, upon request, to review the information.

Ch. 986 (SB 1008) McCorquodale. GAIN: concurrent enrollment.

Existing law provides for the Greater Avenues for Independence (GAIN) program, through which job training and education services are provided to applicants for and recipients of assistance under the Aid to Families with Dependent Children (AFDC) program pursuant to a contract with the county welfare department. Specified individuals are exempt from participation in the program, beyond registration, including individuals who are employed for 15 or more hours per week.

This bill would provide for a 3-year pilot project in Fresno County in which certain individuals who are employed but not exempt from registration would be required to participate in an appropriate program component. It would require the State Department of Social Services and the county to submit an evaluation of the pilot project to the Legislature within 6 months after the termination of the pilot project, but no later than June 30, 1997.

Ch. 987 (SB 1221) Maddy. Health coverage.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the regulation of health care service plans by the Commissioner of Corporations. Existing law makes the willful violation of the act or any rule or regulation thereunder a misdemeanor.

Existing law requires health care service plans to establish procedures for the continuous review of the quality of care, performance of medical personnel, utilization of services and facilities, and cost. Existing law exempts from liability any person who participates in quality of care or utilization reviews by peer review committees that are composed chiefly of certain health care professionals. Existing law also provides that disclosure of the proceedings or records to the governing body of the plan or its designee to review the activities of the committees does not alter the status of the records as privileged communications.

This bill would provide that disclosure of the proceedings or records to the governing body of the plan or its designee to review activities of the plan or provider committees would not alter this confidential status.

Existing law requires every health care service plan contract that provides coverage to family members or dependents of a subscriber, as defined, or enrollee, as defined, to grant immediate accident and sickness coverage, from and after the moment of birth, to each newborn infant of any subscriber or enrollee covered and to each minor child placed for adoption from and after the moment the child is placed in the physical custody of the covered subscriber or enrollee for adoption.

This bill would instead require every health care service plan contract that provides

NOTE: Superior numbers appear as a separate section at the end of the digests.

coverage to the spouse or dependents of a subscriber or spouse to grant immediate accident and sickness coverage, from and after the moment of birth, to each newborn infant of any subscriber or spouse covered and to each minor child placed for adoption from and after the date on which the adoptive child's birth parent or appropriate legal authority signs a written document granting the subscriber or spouse the right to control health care for the adoptive child or, absent this document, the date on which other evidence exists of this right.

This bill would permit a health care service plan to offer a point-of-service plan contract, as defined, if it meets several requirements, including that it meets certain financial criteria. This bill would require this plan to provide financial incentives for enrollees to use in-plan covered services, as defined. It would also authorize a plan that offers a point-of-service plan contract to, among other things, limit or exclude coverage for specific types of services or conditions when obtained out of plan, as defined, and to include risk-sharing arrangements for out-of-network services if prescribed conditions are met, including, but not limited to, approval by the commissioner.

This bill would require certain health care service plans to limit their offering of point-of-service plan contracts and their health care expenditures for out-of-network services. It also would authorize the commissioner to limit the offering of point-of-service plan contracts to new groups or require the plan to amend point-of-service contracts under specified conditions.

This bill would require a health care service plan that offers a point-of-service plan contract to, among other things, make a deposit of cash or securities, or any combination of these, track out-of-plan utilization separately from in-plan utilization, demonstrate to the satisfaction of the commissioner that the plan has the fiscal, administrative, and marketing capacity to control its point-of-service plan contract enrollment, utilization, and costs so as not to jeopardize the financial security or management ability of the health care service plan.

This bill would require, until July 1, 1995, a health care service plan to file a notice of material modification at least 60 business days prior to offering a point-of-service plan contract. This bill would thereafter require this notice to be filed at least 20 business days prior to offering this contract. This bill would exempt a plan that was registered under provisions of law that were repealed in 1975 for a contract offered by a plan on or before September 1, 1993.

Since this bill would create new crimes, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 988 (SB 1225) Committee on Budget and Fiscal Review. Vehicle license funds.

Existing law, as set forth in the Budget Act of 1993, makes certain appropriations for the support of the Department of Motor Vehicles that are payable from the Motor Vehicle Account of the State Transportation Fund, and from the Motor Vehicle License Fee Account of the Transportation Tax Fund.

This bill, in accordance with legislative findings and declarations, would revise those appropriations, and would appropriate specified amounts from those accounts to the support of the Franchise Tax Board.

This bill would declare that it is to take effect immediately as an appropriation for the usual current expenses of the state.

Ch. 989 (AB 562) Hannigan. Banned, unregistered, and outdated agricultural waste.

(1) Existing law authorizes a county to develop and establish a program for the collection of banned, unregistered, or outdated agricultural wastes from an eligible participant. Existing law specifies requirements for the transportation of those wastes to and from collection sites. A violation of these provisions is a crime and these provisions

NOTE: Superior numbers appear as a separate section at the end of the digests.

are repealed on January 1, 1994.

A county is authorized to consult with the Department of Food and Agriculture, among others, in implementing a collection program for those wastes. The collection program is required to include an education program, as specified.

A county which implements such a collection program is required to submit specified variances to the Department of Toxic Substances Control. Various requirements concerning the transportation of those wastes to dropoff sites are imposed under the collection program, including prohibiting the wastes from being transported over specified amounts.

A county implementing a collection program is authorized to charge a fee to eligible participants to cover the county's costs of implementing the program, including, but not limited to, the costs of collecting, handling, transporting, treating, recycling, and disposing of the wastes.

Existing law requires any person generating a hazardous waste to provide the person who will transport the hazardous waste with an applicable manifest completed as required by the Department of Toxic Substances Control. Existing law requires persons transporting hazardous waste to register as a hazardous waste transporter and requires vehicles used to transport hazardous waste to be inspected and certified, as specified.

This bill would allow the county to consult, instead, with the Department of Pesticide Regulation, and to additionally consult with the Department of the California Highway Patrol, when implementing a collection program for those banned, unregistered, or outdated agricultural wastes. The bill would delete the requirement that the education program include the legal disposal of the other types of hazardous wastes generated by agricultural processes.

The bill would delete the requirement that a county submit specified variances to the Department of Toxic Substances Control and would instead require the county to make a specified notification to operate under a permit-by-rule. The bill would exempt wastes transported to the collection site, or wastes rejected at the collection site, from various requirements concerning possession of a manifest, registration as a hazardous waste transporter, and the inspection and certification of vehicles, and would delete the requirement that wastes be transported to collection sites in specified amounts. The bill would require the wastes to be prepackaged in accordance with specified federal regulations and to be accompanied by a certain shipping paper.

The bill would require the county to charge a fee to cover the costs of implementing the program and would require the county to transfer 10% of these fees to the Department of Toxic Substances Control, within 60 days from the date of collection, for deposit in the Hazardous Waste Control Account, for expenditure by the department, upon appropriation by the Legislature, for purposes of implementing the collection program. The bill would also allow a county to charge a fee to eligible participants to cover registration fees, administrative costs, and overhead expenses.

The bill would delete the repeal of the program, thereby extending the program indefinitely and imposing a state-mandated local program by creating a new crime.

Since a violation of the transportation requirements imposed by the bill would be a crime, the bill would impose a state-mandated local program by creating new crimes.

The bill would make related changes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 990 (AB 841) Peace. Transit development boards.

(1) Under the Mills-Deddeh Transit Development Act, the San Diego Metropolitan Transit Development Board is created with specified transportation powers, including the power to contract with specified law enforcement agencies for security, police, and related services.

This bill would additionally allow the board to contract with other transit development boards for purposes of providing law enforcement services. The bill would also

NOTE: Superior numbers appear as a separate section at the end of the digests.

allow the board to establish and maintain its own police force, including the employment of peace officers.

(2) Existing law sets forth a contract award procedure applicable only to transit development boards governed by the act. This procedure is effective only until January 1, 1994, on which date it is repealed.

This bill would delete the repeal date, thereby continuing the procedure indefinitely.

(3) Existing law requires an average of 15% of funds allocated from specific funds issued by service authorities to the San Diego urbanized area over a specified program period be allocated for transit projects.

This bill would delete this provision.

(4) Existing law makes it an infraction punishable by a fine not exceeding $50 for a first violation of ordinances, rules, or regulations enacted by the board relating to the nonpayment of a fare.

This bill would increase the maximum amount of that fine to $75.

(5) Under the North San Diego County Transit Development Board Act, the North San Diego County Transit Development Board is created with specified transportation duties and powers.

This bill would make it a crime to violate specified ordinances, rules, or regulations enacted by the board and created by the bill, and it would authorize the board to contract with private licensed patrol operators, the county sheriff, municipal police departments, or other transit development boards, and to establish and maintain a transit police force of its own, including the employment of peace officers. By creating new crimes, the bill would impose a state-mandated local program.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 991 (AB 881) McDonald. Highways: outdoor advertising.

The Outdoor Advertising Act regulates the placement of advertising adjacent to and within specified distances of highways that are part of the national system of interstate and defense highways and federal-aid highways. The act prohibits certain advertising displays and restricts others.

This bill would delete certain obsolete provisions, prohibit advertising displays from being placed or maintained along certain scenic highways or byways, and make numerous technical and clarifying changes. Because a violation of some of the provisions of the bill would be a crime, the bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 992 (AB 1652) Speier. Injuries related to criminal conduct: reports.

Existing law requires every person, firm, or corporation conducting a hospital or pharmacy to report to specified law enforcement officers, as specified, the arrival of any person to the facility who is suffering from any wound or other injury inflicted by his own act or by the act of another by means of a knife, gun, pistol, or other deadly weapon, or in cases where injuries have been inflicted in violation of any penal law of the state.

This bill would, instead, require any health practitioner, as defined, employed in a health facility or clinic, as defined, or physician's office who, in his or her professional capacity or within the scope of his or her employment, has knowledge of or observes a patient who he or she knows or reasonably suspects has suffered from any wound or injury inflicted as described above, or any wound or physical injury inflicted on the person as a result of assaultive or abusive conduct, as defined, to report to a law enforcement agency, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires every physician or surgeon who has under his or her charge or care any person suffering from a specified wound or injury to report to specified law enforcement officers. Existing law, for specified purposes, includes a physician or surgeon within the definition of a health practitioner.

This bill would revise the reporting requirements of a physician or surgeon under these provisions to conform to changes made by this bill. The bill also would recommend that any medical records include a copy of the law enforcement reporting form, documentation of past references by the domestic violence victim in his or her medical records, and a map of his or her body identifying injuries and bruises in the medical records. The bill would recommend that the physician or surgeon make referrals to local domestic violence services.

Existing law makes it a misdemeanor to violate any of the above provisions, punishable by imprisonment in a county jail not exceeding 6 months, by a fine not exceeding $500, or by both.

This bill would increase the fine under this provision to a fine not exceeding $1,000.

This bill, in addition, among other things, would provide civil and criminal immunity, as specified, for a health practitioner who makes any required or authorized report pursuant to these provisions regarding reporting injuries to local law enforcement and would allow the presentation of claims to the State Board of Control for reasonable attorney's fees not exceeding $50,000 incurred in any action brought against any person on the basis of his or her making a report if the person prevails in the action.

This bill would impose a state-mandated local program by increasing the duties of local public officials, and by changing the definition of a crime.

Under existing law, the Child Abuse and Neglect Reporting Act requires specified persons to report known or suspected instances of child abuse, as specified, and the Elder Abuse and Dependent Adult Civil Protection Act requires specified persons to report elder or dependent adult abuse, as specified.

This bill would provide that the reporting requirements proposed by this bill shall not apply when a report is required pursuant to these acts.

Existing law, except as specified, provides for the privilege to refuse to disclose, and to prevent another from disclosing, a confidential communication between patient and physician and between patient and psychotherapist under specified conditions.

This bill would provide that these privileges shall not apply in any court proceeding or administrative hearing with regard to the information related to specified injuries that a health practitioner is required to report as proposed by this bill. This bill also would provide specified provisions regarding the confidentiality of, and restricted access to, reports required by this bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 993 (AB 1696) Martinez. Local educational entities: use of public funds.

Existing law provides for the expenditure of public funds for various purposes relating to education but does not expressly prohibit the expenditure of those funds for the purchase of alcoholic beverages.

This bill would prohibit school districts, county boards of education, and county superintendents of schools from expending public funds for the purchase of alcoholic beverages. This bill would also specify that employees of a school district or county educational agency may refund any reimbursements for expenditures made in violation of that prohibition.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 994 (AB 1785) Tucker. Economic development: financial institutions.

Existing law imposes various requirements for loans made by banks and savings associations, including in some instances collateral requirements.

This bill would require the Treasurer, in consultation with the State Banking Department and the Department of Savings and Loan, on or before June 1, 1994, to develop alternatives to current collateral requirements for financial institutions in order to promote the economic recovery and growth for those areas affected by the civil disturbances in Los Angeles on April 29, 1992, and following days.

The bill would require the Treasurer, in evaluating collateral requirement alternatives, to require a financial institution taking advantage of those requirements to demonstrate and maintain a community reinvestment performance profile that is consistent with promoting economic growth and recovery in California's minority and inner-city communities.

Ch. 995 (AB 1850) Nolan. Protective orders.

(1) Existing law provides for protective orders regarding family law matters, including the prevention of domestic violence, and for protective orders relating to the intimidation or dissuasion of a witness or victim in a criminal matter. Existing law specifies the circumstances under which a peace officer is authorized to arrest a person with or without a warrant, and requires a peace officer who is called out on a domestic call to make a good faith effort to inform the victim of the right to make a citizen's arrest.

This bill would authorize a peace officer to arrest, without a warrant, and take into custody a person against whom a protective order as described above has been issued if the peace officer is responding to a call alleging a violation of the protective order by that person and the officer has reasonable cause to believe that the person has notice of the order and has violated the order, whether or not the violation occurred in the officer's presence, as specified. The bill would also provide that where mutual protective orders have been issued, the duty to arrest extends only to one who is reasonably believed to have been the primary aggressor, as defined.

(2) Existing law provides that a person arrested for an offense declared to be a misdemeanor must be taken before a magistrate, upon demand, or released according to specified procedures. Persons arrested for a misdemeanor violation of a protective court order involving domestic violence, however, must be taken before a magistrate and may not be released, unless the arresting officer determines that there is not a reasonable likelihood that the offense will continue or resume, or that the safety of persons or property would not be immediately endangered.

This bill, in addition, would provide that prior to adopting these provisions, each city, county, or city and county shall develop a protocol, as specified, to assist officers to determine when an arrest and release is appropriate, rather than taking the arrested person before a magistrate. Because the bill would increase the responsibilities of local governmental officials, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 996 (AB 1856) Speier. Vessels: flotation devices: children.

(1) Existing federal law requires personal flotation devices on board vessels. State law does not require children 6 years of age or less to wear those devices.

This bill would make it an infraction punishable by a specified fine for any person to operate, as defined, a motorboat, sailboat, or vessel that is 26 feet or less in length unless every person 6 years of age or less on board the motorboat, sailboat, or vessel is wearing a type I, II, or III Coast Guard approved personal flotation device while that vessel is

NOTE: Superior numbers appear as a separate section at the end of the digests.

underway, as defined.

The bill would exempt a person operating a vessel from that provision if the child is in an enclosed cabin, as defined, would exempt a person operating a sailboat from that provision if the child is restrained by a tethered harness, and would exempt a person operating a motorboat, sailboat, or vessel from that provision if the operator is reacting to an emergency rescue situation.

By making a violation of those provisions an infraction, the bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 997 (AB 1980) Klehs. Emergency medical services technicians: qualifications.

Under existing law, the Emergency Medical Services and the Prehospital Emergency Medical Care Services Personnel Act, operative prior to July 13, 1993, and operative on and after December 31, 1993, each county may designate an emergency medical services agency, for the establishment and administration of an EMS program in the county. Existing law also establishes the Emergency Medical Services Authority, that, among other things, adopts regulations governing these emergency medical services provisions.

Existing law operative prior to July 13, 1993, and operative, unless specified conditions are met, on and after December 31, 1993, specifies certain training and examination requirements of an emergency medical technician-paramedic (EMT-P), and requires the authority to develop, after approval of the Commission on Emergency Medical Services, minimum standards for the training and scope of practice for EMT-II's and EMT-P's.

Existing law, operative, unless specified conditions are met, from July 13, 1993, until December 31, 1993, requires the authority to be the agency solely responsible for certification and recertification of EMT-Ps who meet the standards provided by law. It provides for the temporary recertification by the authority of EMT-Ps whose certifications expire before the authority implements a recertification procedure, and of individuals who have either completed EMT-P training in California or are registered as EMT-Ps with the National Registry of Emergency Medical Technicians and who meet certain other requirements, to be valid only until the authority implements and applies the certification procedures, or in any case no later than December 31, 1993.

Existing law operative, unless specified conditions are met, from July 13, 1993, until December 31, 1993, authorizes the medical director of a local EMS agency to place on probation any certificate holder or suspend or revoke any EMT-I or EMT-II certificate or suspend or recommend to the authority the revocation of any EMT-P certificate issued under these provisions. It authorizes the authority to deny, suspend, or revoke certification as an EMT-P.

Existing law operative prior to July 1, 1993, and operative, unless specified conditions are met, on and after December 31, 1993, establishes and continuously appropriates the Emergency Medical Services Personnel Fund to the authority to, among other things, maintain the authority's testing and personnel "registry" program.

Existing law operative, unless specified conditions are met, from July 13, 1993, until December 31, 1993, instead, specifies that the fund is for the maintenance of the authority's testing and personnel "certification" program.

Existing law operative, unless specified conditions are met, from July 13, 1993, until December 31, 1993, requires the authority to adopt emergency regulations to implement a state EMT-P certification program.

This bill would recast and reenact those provisions that were operative until December 31, 1993, and would make them operative until January 1, 1995. This bill would make the alternate provisions inoperative from January 1, 1993, until January 1, 1995.

This bill would require the authority to develop statewide guidelines for continuing education for EMT-Ps and for quality improvement systems. The bill would require the authority to conduct an evaluation of the EMT-P exam.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 998 (AB 2016) Conroy. Occupational safety and health.

Existing law authorizes the division to investigate industrial accidents and occupational illnesses, as specified.

Existing law provides that the Chief of the Division of Occupational Safety and Health and all qualified and authorized division inspectors and investigators shall have free access to any place of employment to make an investigation or inspection during regular working hours, and at other reasonable times when necessary for the protection of safety and health. If, during any investigation of an industrial accident or occupational illness, the division is refused entry by the employer, the chief or his or her authorized representative may issue an order to preserve materials or the accident site as they were at the time the accident or illness occurred if, in the opinion of the division, it is necessary to do so in order to determine the cause of the accident or illness.

This bill would authorize the division to issue an order to preserve materials or the accident site, regardless of whether the division is refused entry, if, in the opinion of the division, it is necessary to do so in order to determine the cause of the accident or illness and the evidence is in potential danger of being removed, altered, or tampered with.

Existing law provides that an action to collect a civil penalty under provisions regulating safety in employment shall commence no later than 3 years from the date the notice of civil penalty is final.

This bill would instead provide that an action to collect any civil penalty, fee, or penalty fee under provisions regulating safety in employment shall be commenced within 3 years from the date the assessment of any penalty or fee became final, as specified.

Existing law authorizes the division to fix and collect specified fees for the inspection of elevators to cover the actual costs related to these inspections. It requires a person owning or having the custody, management, or operation of an elevator who fails to pay required fees within 60 days after notification to pay a specified penalty fee.

This bill would provide that, for purposes of these provisions relating to elevator safety, the date of the invoice assessing a penalty or fee shall be considered the date of notification.

Existing law authorizes the division to fix and collect fees for the inspection of aerial passenger tramways to cover the actual cost of these inspections. It provides that the division may not charge for inspections performed by certified insurance inspectors, but authorizes the division to charge a specified fee to cover the cost of processing the permit when issued by the division as a result of the inspection.

This bill would require the division, whenever a person owning or having custody, management, or operation of an aerial passenger tramway fails to pay any fee required under these provisions within 60 days after notification by the division, to assess a penalty fee equal to 100% of the initial fee. It would provide that, for purposes of these provisions, the date of the invoice fixing the fee shall be considered the date of notification.

Ch. 999 (AB 2356) Hauser. Home energy assistance: allocation of funds.

Under existing law, the Department of Economic Opportunity is required to receive and administer the Federal Low-Income Home Energy Assistance Programs Block Grant, and allocate the funds from that grant in a specified manner. The allocations under existing law include 10% of the total federal allocation to the State Department of Social Services, for specified programs, and 15% for weatherization services for those eligible.

This bill would eliminate the allocation to the State Department of Social Services, and increase the amount allocated for weatherization to an amount between 15% and 25%.

This bill would state that it is to take effect immediately, as an urgency statute.

Ch. 1000 (AB 2268) Caldera. Bicycles: safety helmets.

(1) Existing law prohibits a person operating a bicycle upon a highway from allowing a person who is 4 years of age or younger, or weighs 40 pounds or less, to ride as a passenger on a bicycle unless that passenger is wearing a helmet meeting specified standards.

This bill would, instead, prohibit a person under 18 years of age from operating, or

NOTE: Superior numbers appear as a separate section at the end of the digests.

riding upon a bicycle as a passenger, upon a street, bikeway, or other public bicycle path or trail unless the person is wearing a helmet meeting specified standards. The bill, commencing in 1995, would provide for fines to be imposed for violations of this prohibition and would require all the revenue derived from the fines to be allocated, as specified. The bill would, however, require that the charge against a person be dismissed if it is the first charge against that person for a violation of this prohibition.

The bill would require any safety helmet sold or offered for sale to be conspicuously labeled in accordance with the specified standards and would prohibit the sale or offer for sale of any bicycle safety helmet which is not of a type meeting the safety standards.

Since under other provisions of existing law, violation of the prohibitions and requirements imposed by this bill would be infractions, this bill would create new crimes, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1001 (AB 7) Campbell. State employees: civil service eligibility.

(1) Existing law provides that persons holding nonelected exempt executive branch positions, and persons employed by the Legislature for 2 or more consecutive years, are eligible to apply for promotional civil service examinations for which they meet the minimum qualifications. Existing law also provides that legislative employees who meet this requirement and are employed by the Legislature as of January 1, 1991, and who resign or are released from service due to a force reduction of the Legislature before January 1, 1992, are eligible to take promotional civil service examinations for 3 years following their resignation or release in accordance with certain provisions.

This bill would also provide that employees who meet the requirement, are employed by the office of the Auditor General or the office of the Legislative Analyst as of January 1, 1992, and who resign or are released from service due to a force reduction of the Legislature before January 1, 1994, shall be eligible to take promotional civil service examinations, including career executive assignments, for 3 years following their resignation or release in accordance with certain provisions.

The bill would also provide that a legislative or nonelected exempt executive branch employee who met the above requirements, was subsequently employed in a career executive assignment position, and whose career executive assignment appointment was terminated, shall be eligible to take promotional civil service examinations, including examinations for career executive assignments, pursuant to the above provisions, to the same extent as a legislative or nonelected exempt executive branch employee who had not been employed in the career executive assignment position.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1002 (AB 99) Andal. Property taxation: assessment: restrictions on land.

Existing property tax law requires a county assessor in the valuation of land to consider the effect upon value of any enforceable restriction to which the use of that land may be subject. It also provides, for purposes of the foregoing requirement, that enforceable restrictions on land include, but are not limited to, specified items.

This bill would add a recorded conservation, trail, or scenic easement in favor of a public agency or a nonprofit corporation, as specified, to those enforceable restrictions required to be considered by the county assessor.

Ch. 1003 (AB 279) Seastrand. California Spaceport Authority.

Existing law makes no provision for the designation of a spaceport authority in this state.

This bill would state legislative findings and declarations and would designate the Western Commercial Space Center, a nonprofit corporation, as the California Spaceport Authority to perform specified space flight-related activities.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1004 (AB 336) Snyder. Confidentiality: medical information.

Existing law prohibits defined providers of health care from disclosing medical information regarding a patient of the provider without first obtaining authorization, except when compelled by court order or otherwise, as specified, and authorizes disclosure of medical information for purposes of diagnosis or treatment, when authorized by law, and in other circumstances, as specified. A violation of these provisions that results in economic loss or personal injury to a patient is punishable as a misdemeanor. Existing law exempts from these provisions the disclosure of medical information and records to, and their use by, the Insurance Commissioner, the Division of Industrial Accidents, the Workers' Compensation Appeals Board, and the Department of Insurance.

This bill would provide that, for purposes of these provisions, any corporation organized for the primary purpose of maintaining medical information in order to make the information available to the patient or to a provider of health care on request shall be deemed to be a provider of health care. The bill would require such a corporation to maintain the same standards of confidentiality required of providers of health care with respect to medical information disclosed to the corporation . The bill would also specify that the corporation shall be subject to the penalties for improper use and disclosure of medical information prescribed by existing law. The bill would additionally exempt from these provisions the disclosure of medical information and records to, and their use by, the Commissioner of Corporations and the Department of Corporations.

Because the bill would expand the scope of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1005 (AB 485) O'Connell. Department of Transportation: commercial space activities.

Existing law creates, within the Business, Transportation and Housing Agency, the Department of Transportation, and provides for the work of the department to be divided into at least 5 divisions, as specified.

This bill would create within the department a unit, known as the Spaceport Office, with responsibility for seeking and obtaining federal funding for the commercialization of private space activities in the state.

The bill would require the Spaceport Office to work cooperatively with the Western Commercial Space Center and other entities in developing plans, grant proposals, and bids for submission to federal agencies and private corporations for funds to support space programs in California.

The bill would declare the state's recognition of the Western Commercial Space Center as an eligible recipient of grants and loans to engage in the planning, development, and operation of commercial and educational space launch facilities at Vandenberg Air Force Base.

Ch. 1006 (AB 776) Hannigan. Family preservation services.

Existing law provides for a statewide system of child welfare services, including family reunification and family maintenance services, administered by counties.

Existing law provides for a program permitting participating counties to claim, on an annual basis, a prescribed portion of the state's share of that county's Aid to Families with Dependent Children-Foster Care (AFDC-FC) program General Fund expenditures in advance if the county shows that it will conduct a program of family reunification and family maintenance services for eligible families who meet specified criteria.

This bill would revise conditions of participation in the program. The bill would also revise the class of eligible recipients to include those families with children who, instead of having been declared a dependent child of the court, have been placed by the court with the child's parent or guardian under the supervision of a probation officer.

This bill would define family preservation services.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law makes an appropriation by requiring, commencing with the 1993–94 fiscal year, and until July 1, 1996, the department to transfer once, on a permanent basis, funds from the category of General Fund moneys appropriated for out-of-home placement to the category of funding for local child welfare programs, according to specified criteria, to be used by counties for the provision of family preservation services, and establishing procedures for reallocation of money for these services in subsequent years.

This bill would revise the requirements of eligibility for requesting the transfer and would expand the class of children for whom the services may be provided to include wards of the court, thereby increasing the scope of the use of appropriated funds, and resulting in an appropriation.

The bill would require the State Department of Social Services to seek additional federal funds to finance family preservation services, and would state the intent of the Legislature that those additional funds shall supplement, not supplant, existing General Fund support for family preservation services.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1007 (AB 865) Johnson. Insurance: surplus line advisory organization.

Existing law licenses and regulates surplus line brokers and permits a surplus line broker to solicit and place insurance with nonadmitted insurers but only if that insurance cannot be procured from insurers admitted in this state for that class of insurance.

This bill would authorize a surplus line advisory organization, as defined, to perform or exercise specified duties and authority.

This bill would require surplus line advisory organizations to comply with specified powers of the Insurance Commissioner and would make the failure to do so by the advisory organization, or any of its officers, committee members, agents, or employees, punishable by a civil fine or, if the violation is willful, a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

This bill would remain in effect only until January 1, 1995, and as of that date is repealed, unless a later enacted statute deletes or extends that date.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would not become operative if SB 959 of the 1993–94 Regular Session is enacted and becomes effective on or before January 1, 1994.

Ch. 1008 (AB 1011) Sher. Underground storage tanks: data base.

Existing law prohibits the ownership or operation of an underground storage tank used for the storage of hazardous substances unless a local agency issues a permit for its operation. Existing law also imposes various design, installation, monitoring, and release reporting requirements with regard to underground storage tanks. A local agency is required to provide the California Association of Environmental Health Administrators with copies of the completed permit applications, in a specified manner. The State Water Resources Control Board is required to enter into a contract with the California Association of Environmental Health Administrators for using the Statewide Environmental Evaluation and Planning System (SWEEPS).

This bill would instead authorize the board to enter into a contract with either the association or other designee of the board to administer the underground storage tank permit data base. The bill would require the board, in selecting such a contractor, to consider the fiscal impact upon local agencies of converting to the database systems and procedures employed by that contractor. The bill would make conforming changes.

Ch. 1009 (AB 1017) Campbell. Public utilities: overhead lines.

Existing law does not require the Division of Aeronautics to adopt criteria for determining the need to mark or light public utility overhead lines and supporting structures.

This bill would require the Division of Aeronautics, in cooperation with the aviation and electric utility industries, to undertake a pilot education and awareness program and

NOTE: Superior numbers appear as a separate section at the end of the digests.

to evaluate criteria for marking selected wires and supporting structures, as specified.

The bill would require all electrical corporations and publicly owned utilities to pay a fee for coordinating and disseminating information relating to the criteria for marking the wires and supporting structures. The fees would be deposited in the Aeronautics Account in the State Transportation Fund to be continuously appropriated to the Department of Transportation for the above purposes, thereby making an appropriation.

The bill would also provide a procedure for determining whether the wire or supporting structure should be marked. It would require the division to be reimbursed by each utility for whom a recommendation is made by the division in that regard, at a rate not to exceed $1,000 for each recommendation. These reimbursements would be deposited in the Aeronautics Account in the State Transportation Fund and be continuously appropriated to the department for those purposes, thereby making an appropriation.

This bill would repeal the provisions relating to the evaluation of the wire-marking criteria January 1, 1996, unless a later enacted statute that takes effect on or before January 1, 1996, deletes or extends that date.

Ch. 1010 (AB 1472) Hauser. Housing program: supportive services.

Existing law permits any local agency or specified nonprofit corporation that provides or proposes to provide housing for persons requiring supportive services to apply to the Department of Housing and Community Development for assistance in obtaining federal housing subsidies therefor.

This bill would require the department, on or after July 1, 1994, to transfer all contracts entered into pursuant to this provision, to local agencies, under specified conditions.

Ch. 1011 (AB 1573) Burton. Unlawful detainer assistants: registration.

Existing law provides for unlawful detainer proceedings with respect to a tenant of real property.

This bill would require unlawful detainer assistants, as defined, to register with the county clerk of the county in which he or she resides, and of each county in which he or she performs acts for which registration is required. The bill would, among other things, do the following:

(1) Require a certificate of registration to be accompanied by a bond in the amount of $25,000, or, in lieu of a bond, a cash deposit in the same amount.

(2) Require the county clerk to maintain a register of unlawful detainer assistants, assign a registration number to each registrant, and issue an identification card to each one, thus imposing a state-mandated local program by imposing new duties on a local government official.

(3) Require the registrant's registration number and county of registration to appear on the registrant's work product, as specified, and on any solicitation or advertisement.

(4) Specify various requirements for acting as an unlawful detainer assistant and prohibited acts.

Since a violation of these requirements would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be payable from the State Mandates Claims Fund.

The bill would state legislative intent.

Ch. 1012 (AB 1597) Knowles. Driver's licenses.

Existing law authorizes the Department of Motor Vehicles to issue a class A driver's license, as defined, restricted to the operation of any two-axle vehicle weighing 4,000 pounds or more unladen when towing a trailer coach exceeding 10,000 pounds gross

NOTE: Superior numbers appear as a separate section at the end of the digests.

vehicle weight rating, or a fifth-wheel travel trailer exceeding 15,000 pounds gross vehicle weight rating, when the towing of the trailer is not for compensation.

This bill would authorize the issuance by the department of a restricted class A driver's license for the operation of any two-axle vehicle, with specified exceptions, weighing 4,000 pounds or more unladen when towing a livestock trailer, as specified. The bill would require the Department of the California Highway Patrol to report to the Legislature, as needed, on any safety problems or concerns that the department observes as a result of the enactment of this bill. The provisions of the bill would remain in effect only until January 1, 1996.

Ch. 1013 (AB 1646) Costa. Highway carriers.

Under existing law, the Public Utilities Commission authorizes the operation of highway permit carriers under the Highway Carriers' Act through the issuance of permits. Existing law prohibits the commission from issuing or authorizing the transfer of a permit under that act, including a seasonal agricultural carrier permit, except upon a showing before the commission and a finding by the commission that the applicant or proposed transferee meets specified requirements.

This bill would authorize the commission to delegate to its executive director or the executive director's designee the authority to issue, or authorize the transfer of, seasonal agricultural carrier permits and to make the required findings.

The bill would incorporate changes in Sections 3353 and 3584 of the Public Utilities Code made by SB 472, which would become operative if SB 472 is chaptered and this bill is chaptered last.

Ch. 1014 (AB 1656) Polanco. Fraud: telephone services.

Existing law prohibits specified activities with regard to defrauding a person providing telephone or telegraph service of the lawful charge for telephone or telegraph service. Existing law prohibits under these provisions a person from knowingly, willfully, and with intent to defraud a person providing telephone or telegraph service, avoiding or attempting to avoid, or aiding, abetting, or causing another to avoid the lawful charge, in whole or in part, for telephone or telegraph service by any of specified means, including, by using any deception, false pretense, trick, scheme, device, or means.

This bill would add to the prohibitions covered by this provision the use of conspiracy and the fraudulent use of false, altered, or stolen identification to defraud a person providing telephone or telegraph service.

Existing law makes a violation of these prohibitions a misdemeanor or a felony if the total value of all telephone or telegraph services obtained in violation of the provisions aggregates over $400 within any period of 12 consecutive months during the 3 years immediately prior to the indictment, certification to superior court, or filing of the information, or if the defendant has previously been convicted of an offense in excess of $400 under these provisions, or under similar other state or federal laws.

This bill, among other things, would revise the punishment for a violation of these provisions. This bill, instead, would provide that a theft of any telephone or telegraph services under these provisions is a misdemeanor or felony, except that theft of these services by a person who has a prior misdemeanor or felony conviction for the theft of the services under these provisions within the past 5 years, is a felony.

Existing law also prohibits any person from publishing, as defined, the number or code of an existing, canceled, revoked, expired, or nonexistent credit card, or the numbering or coding which is employed in the issuance of credit cards, with the intent that it be used or with knowledge or reason to believe that it will be used to avoid the payment of any lawful telephone or telegraph toll charge, punishable as a misdemeanor.

This bill would include within the definition of publishing for the purpose of this provision the communication of information to any one or more persons by electronic means, including, but not limited to, a bulletin board system, thereby imposing a state-mandated local program by expanding the scope of a crime.

This bill would also provide that any person who is the issuee of a calling card, credit card, calling code, or any other means or device for the legal use of telecommunications services and who receives anything of value for knowingly allowing another person to

NOTE: Superior numbers appear as a separate section at the end of the digests.

use the means or device in order to fraudulently obtain telecommunications services is guilty of a misdemeanor or a felony punishable pursuant to these provisions.

Because this bill would create a new crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1015 (AB 1863) Burton. Guide dogs for the blind: arbitration.

Existing law provides that the State Board of Guide Dogs for the Blind has the exclusive authority to issue licenses for the instruction of the blind in the use of guide dogs, for the training of guide dogs, and for the operation of schools for these purposes.

This bill would establish a 5-year pilot project to provide an arbitration procedure for the resolution of disputes between guide dog users and guide dog schools relating to the continued physical custody and use of a guide dog. The bill would specify disputes that may be subject to this procedure.

These provisions would be repealed on January 1, 1999.

Ch. 1016 (AB 1929) Weggeland. Computer-readable transcripts.

Under existing law, if directed by the court or requested by a party, an official reporter of the superior court is required to produce a written transcript of specified proceedings of the court.

This bill would specifically authorize the court or any party or person to request a transcript in computer-readable form and would specify standards and fees for these transcripts. The bill would also authorize specified copies to be made of these transcripts by persons possessing transcripts, and would require computer-readable transcripts produced in criminal cases, where the death penalty may be imposed, to conform to these standards.

Ch. 1017 (AB 1935) Richter. Environmental laboratories.

Existing law requires the State Department of Health Services to certify laboratories that perform various analyses. Existing law requires a laboratory to pay an annual certification fee that consists of a basic nonrefundable fee and an additional fee for certification in prescribed fields of testing for which certification is sought.

This bill would authorize the department to issue a certificate to the owner of a laboratory in a field of testing or method adopted by regulation of the federal Environmental Protection Agency and pursuant to subsequent amendments to these regulations that are published in the Federal Register. It would also provide that the department shall not be required to comply with existing provisions of law regarding the adoption of administrative regulations for this purpose.

Ch. 1018 (AB 2146) Horcher. Business licenses: food facilities: public health permits.

Existing law authorizes cities and counties to license businesses carried on within the limits of their jurisdictions, and to charge a fee for the issuance of that license.

Existing law, known as the California Uniform Retail Food Facilities Law, provides for the regulation of various types of food facilities, including mobile food preparation units, vehicles, and vending machines, as defined, to ensure uniform health and sanitation standards for the protection of the public health. Existing law prohibits food facilities from being open for business without a valid permit under these provisions.

Existing law also provides that violation of any of the provisions relating to regulation of food facilities is a misdemeanor.

This bill would require any person operating a food facility or conducting any itinerant food vending, to obtain all necessary permits, including a public health permit under the California Uniform Retail Food Facilities Law, thereby imposing a state-mandated local program by changing the definition of a crime.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1019 (AB 2253) Areias. Rural economic growth strategy.

Existing law authorizes the Office of Planning and Research to develop strategies for land use and long-term growth.

This bill would require the Director of Planning and Research, in consultation with the Governor's Interagency Council on Growth Management and an advisory committee composed of rural landowners and citizens, to adopt a rural economic growth strategy, on or before December 31, 1994. The purposes of the strategy would be to encourage a healthy, self-sustaining rural economy and society, among other things.

This bill would require that the rural economic growth strategy include a rural economic development component, among other components. It would also provide that the advisory committee shall terminate upon adoption of the strategy.

Ch. 1020 (AB 2259) Woodruff. Health.

(1) Existing law, with certain exceptions, prohibits operation of a clinic, as defined, without a license issued by the State Department of Health Services. Existing law prohibits operation of a health facility, as defined, without a license issued by the department.

This bill would enact the Mobile Health Care Services Act to regulate the operation of a mobile unit, as defined, as an independent-freestanding clinic or as a service of a licensed health facility or to a licensed clinic, for the purpose of providing medical, diagnostic, and treatment services, in order to help ensure the availability of quality health care services for patients who receive care in remote or underserved areas, and for patients who need specialized types of medical care provided in a cost-effective way. The bill would require the department to charge a licensure fee.

This bill would require that mobile units meet prescribed criteria, including, but not limited to, bearing the insignia of approval of the Department of Housing and Community Development. The bill would require licensees using mobile services pursuant to the Mobile Health Care Services Act to meet certain criteria.

This bill would require the department to adopt mobile unit regulations, and would require federal certification standards to apply to mobile units requesting licensure as a chronic hemodialysis clinic, a surgery clinic, or comprehensive outpatient rehabilitation facilities, as applicable, until certain regulations are adopted.

This bill would require local planning, zoning, and fire authorities to approve the sites of a mobile unit, and would require strict enforcement of parking restrictions around the mobile units. By requiring local agencies to perform these functions, this bill would impose a state-mandated local program.

(2) Existing law establishes certain standards for congregate living facilities serving persons who are terminally ill, persons who are catastrophically and severely disabled, or persons who are mentally alert but physically disabled. These standards are effective until adoption of permanent regulations.

Existing law provides that the interim regulations are operative only until permanent regulations are filed with the Secretary of State on July 1, 1993, whichever occurs first.

This bill would delete that inoperative date, and would declare the intent of the Legislature to, again, make those standards operative on and after the effective date of this bill, to become inoperative after the filing of regulations with the Secretary of State.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made

NOTE: Superior numbers appear as a separate section at the end of the digests.

pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1021 (SB 144) Calderon. Industrial hygienists.

Existing law requires the State Department of Health Services by regulation to establish standards of education and experience for professional and technical personnel employed in local health departments. Pursuant to this authority the department has established education and experience standards for industrial hygienists employed in local health departments.

This bill would define industrial hygiene and certified industrial hygienist and would allow any certified industrial hygienist to obtain a stamp from an industrial hygiene certification organization certifying that the industrial hygienist has passed an industrial hygiene examination and has met the certification maintenance requirements of the organization. The bill would also provide that no entity of state or local government shall by rule or otherwise regulate the practice of industrial hygiene by any certified industrial hygienist, except where authorized by state statute to regulate a specific activity that may include the practice of industrial hygiene.

This bill would provide, except as specified, that it is an unfair business practice for any person to represent themselves as a certified industrial hygienist or a "CIH" unless they comply with the requirements of this act.

Ch. 1022 (SB 388) Rosenthal. Housing: Emergency Housing and Assistance Program.

(1) Under existing law, the Department of Housing and Community Development is authorized to make grants from the continuously appropriated Emergency Housing and Assistance Fund to local governments and nonprofit organizations to provide emergency or temporary housing for the homeless, as specified.

This bill would repeal this program and create a new Emergency Housing and Assistance Program to be administered, as specified, by the department. The bill would authorize the department to adopt regulations, including emergency regulations, for the administration of the program. The bill would create a new Emergency Housing and Assistance Fund, which, like the existing fund of the same name, would be continuously appropriated. The bill would transfer all of the moneys in the existing Emergency Housing and Assistance Fund to the new fund of the same name, thereby making an appropriation.

(2) The bill would appropriate from the Emergency Housing and Assistance Fund to the Legislative Analyst a sum sufficient to prepare an evaluation of the program referenced in (1), as specified.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1023 (SB 448) Alquist. License plates: state-owned.

Existing law authorizes the Department of Motor Vehicles to issue regular series license plates for certain motor vehicles that are owned by the state.

This bill would allow the chancellor, or a president of a campus, of the California State University, or the president, or a chancellor of a campus, of the University of California, who is regularly issued a state-owned vehicle to apply to the department for regular series license plates if a request for that issuance is made in the manner specified by the department, and by the Trustees of the California State University or the Regents of the University of California, as applicable. The bill would require the surrender of those regular series plates to the department by the trustees or the regents upon the reassignment of that particular vehicle.

Ch. 1024 (SB 650) Kelley. Coachella Valley Water District: replenishment programs.

(1) Under existing law, the Coachella Valley Water District is authorized to impose water replenishment assessments for the purpose of replenishing groundwater supplies. The amount of the assessments may not exceed the sum of specified costs. Under existing law, the district board is authorized to commission an engineering survey and report

NOTE: Superior numbers appear as a separate section at the end of the digests.

concerning district groundwater supplies. Under existing law, the district is authorized to raise funds to construct, operate, and maintain works, improvements, and functions, as specified.

This bill would include the cost of "in lieu" programs including, but not limited to, incentive programs to use reclaimed water and Colorado River water in place of groundwater, among the costs for which the district is authorized to impose an assessment. The bill would impose a state-mandated local program by requiring the engineering survey and report to include the cost of the incentive programs and would specify that "replenishment" and "replenishing" include the incentive programs. The bill would include a special assessment on specified lands among the district's authorized fundraising methods.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1025 (SB 1022) Thompson. Wine: lead contamination.

Existing law, the Sherman Food, Drug, and Cosmetic Law, among other things, prohibits adulteration of food or receiving, delivering, or offering in commerce any adulterated food. Existing law excludes wine or wine growers from its application in some cases. Existing law authorizes the department to adopt regulations to establish standards of identity and quality of wine. Violation of these provisions is a crime.

Existing law, the Alcoholic Beverage Control Act, requires payment of an annual license fee by winegrowers, wine blenders, and importers of wine.

This bill would require each licensed winegrower or wine blender and each importer of wine to pay to the Department of Alcoholic Beverage Control prescribed annual fees to be deposited in the Wine Safety Fund established by this bill for the purposes of better enabling the State Department of Health Services to carry out and supervise a program to ensure that levels of lead in wine sold in this state remain within applicable tolerances, upon appropriation by the Legislature in the annual Budget Act.

This fee requirement would be repealed as of January 1, 2000.

This bill would provide that wine is adulterated food if it contains prescribed levels of lead, or it has a metal foil capsule containing prescribed levels of lead attached to its container, except as prescribed. By expanding the scope of an existing crime, this bill would impose a state-mandated local program. The bill would vest exclusively in certain state and local officers and agencies, the right to pursue specified actions based on an alleged violation of this bill, would grant prescribed protections from prosecution to retailers, as defined, as are afforded to food dealers, and would provide that prescribed provisions of the bill do not apply to any action for personal injury or wrongful death, or any action based upon a failure to warn.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1026 (AB 430) Hauser. Municipal courts: Humboldt County.

(1) Existing law establishes the Eureka Judicial District in Humboldt County, and specifies the number, compensation, and classification of the officers and employees thereof.

This bill would repeal those provisions, and add provisions establishing the Humboldt Judicial District encompassing all of Humboldt County, and make provisions for the number and classification of certain of the officers and employees thereof, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1027 (AB 1151) Alpert. Funding of fish and game programs.

Existing law declares the intent of the Legislature that the costs of commercial fishing programs be provided solely from revenues from commercial fishing taxes, license fees, and other revenues, as specified, that the costs of hunting and sportfishing programs be provided solely out of hunting and sportfishing revenues and reimbursements and federal funds received for hunting and sportfishing programs, and that other costs be funded, as specified.

This bill would delete the declaration that commercial fishing programs and hunting and sportfishing programs be funded solely from those sources and would additionally declare the intent of the Legislature that those programs be funded with other funds appropriated by the Legislature for those purposes.

Ch. 1028 (AB 1890) Sher. Air quality: transportation control measures: compliance programs: energy efficiency programs.

(1) Existing law requires air pollution control districts and air quality management districts to adopt, implement, and enforce transportation control measures for the attainment of state or federal ambient air quality standards. Existing law requires a district, which has entered into an agreement with a council of governments or regional agency to jointly develop a plan for transportation control measures, to quantify the emissions from transportation sources.

This bill would require the State Air Resources Board, to the extent requested to do so by a district, to assist a district in identifying the quantity of emission reductions necessary to comply with that requirement.

(2) The bill would require each district, other than the South Coast Air Quality Management District, to adopt an annual budget in accordance with prescribed requirements and would make legislative findings and declarations in that connection. The bill would thereby impose a state-mandated local program. The bill would prohibit the south coast district from imposing certain fees in excess of the adjusted actual cost of district programs in the preceding fiscal year, except as specified.

(3) The bill would also require each district which has a population of 1,000,000 or more to establish a compliance program, consisting of specified elements.

(4) Under existing law, the state board is required at least once every 2 years to prepare a report on the sources of funding for each district with an annual budget which exceeds $1,000,000.

This bill would require preparation of the report annually and contemporaneously with the State Budget. The bill would require additional specified information to be included in the report.

(5) Existing law, until July 1, 1996, establishes a program for making energy efficiency improvements loans and providing technical assistance in reducing energy costs to small businesses.

This bill would extend that program until July 1, 2001.

(6) Existing law, until January 1, 1994, requires the south coast district to establish a special small business assistance fund known as the Air Quality Assistance Fund to help small businesses comply with south coast district regulations, and requires the south coast district to annually allocate $1,000,000 from specified sources to that fund.

This bill would prohibit the south coast district from making an annual allocation to the fund, if the balance of the fund equals or exceeds $4,000,000. The bill would extend the life of the fund until January 1, 1999.

(7) The bill would make a clarifying change with regard to classifying moderate ozone nonattainment areas and moderate carbon monoxide nonattainment areas.

(8) Existing law requires the state board to adopt regulations to achieve the maximum feasible reduction in reactive organic compounds emitted by consumer products, as specified, including aerosol paints, and prohibits the districts from adopting different regulations for that purpose.

This bill would require the state board, by January 1, 1995, to adopt those regulations

NOTE: Superior numbers appear as a separate section at the end of the digests.

as to aerosol paints, requiring full compliance by December 31, 1999, subject to the granting of a specified extension, and establishing interim limits prior to that date. The bill would prohibit the districts from adopting any different regulations, except as specified.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1029 (AB 1336) Gotch. Air pollution.

Existing law requires air pollution control districts and air quality management districts to adopt, implement, and enforce transportation control measures, including measures to reduce vehicle trips, and requires specified governmental agencies to adopt congestion management programs. Existing law authorizes a district to delegate to a local agency any function with respect to the implementation of transportation control measures if specified conditions are met.

This bill would add an additional condition that multiple site employers with more than one regulated worksite in the district have the option of complying with the district rule and reporting directly to the district, in which case, the employer would be exempt from the local agency trip reduction measure. The bill would declare legislative intent regarding local agency authority.

The bill would, until July 1, 1994, require the State Air Resources Board to convene a technical review group, composed as prescribed, to define terms for statewide use relating to employer-based trip reduction. The bill would authorize the technical review group to consult with other state agencies, including, but not limited to, the Department of Transportation, regarding definitions of terms. The bill would require the technical review group to recommend definitions to the state board by April 1, 1994, and require the state board to adopt definitions by June 30, 1994. The bill would make a related statement of legislative intent, and would make a nonsubstantive technical change.

Ch. 1030 (AB 36) Quackenbush. Medi-Cal: technology dependent children.

Existing law establishes procedures for the reimbursement of providers of health care to eligible persons under the Medi-Cal program.

This bill would, commencing January 1, 1994, require reimbursement for specified Medi-Cal services to certain technology dependent children, as defined, according to actual cost if the overall cost to the state would decrease.

Ch. 1031 (AB 198) W. Brown. School accountability.

(1) Under the Classroom Instructional Improvement and Accountability Act (Proposition 98), in order to promote a model statewide standard of instructional accountability and conditions for teaching and learning, the Superintendent of Public Instruction is required to develop and present to the State Board of Education for adoption a statewide model school accountability report card that includes an assessment of specified school conditions. Under the act, the governing board of each school district is required to implement a school accountability report card for each school in the district that includes the conditions covered in the statewide model report card.

This bill would require that the statewide model school accountability report card also include, as a school condition to be assessed, the degree to which students are prepared to enter the work force. The bill would require the superintendent to consult with representatives of business and organized labor in the development of this condition. Adding a condition to the statewide model report card would require local districts to similarly modify their school accountability report cards, thus imposing a state-mandated local program by creating a new duty.

(2) The Classroom Instructional Improvement and Accountability Act, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a ⅔ vote of each house.

This bill, which would declare that it furthers the purposes of the act, would therefore

NOTE: Superior numbers appear as a separate section at the end of the digests.

require a ⅔ vote.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 1032 (AB 340) Katz. Public contracts: minority, women, and disabled veteran business enterprises.

(1) Existing law requires all contracts awarded by any state agency, department, officer, or other state governmental agency, and permits all contracts awarded by any local agency, for construction, certain professional services, materials, supplies, equipment, alteration, repair, or improvement to have participation goals of not less than 15% for minority business enterprises, 5% for women business enterprises, and 3% for disabled veteran business enterprises.

Existing law, the Subletting and Subcontracting Fair Practices Act, also imposes requirements on prime contractors with respect to providing certain information regarding subcontractors.

This bill would require that a contractor provide certain information in his or her bid or offer relating to the use of minority, women, or disabled veteran business enterprises as subcontractors in connection with the performance of the public contract, and would make provisions of the above act applicable to this information.

(2) Under existing law, it is unlawful for any person to commit certain acts in connection with state contracts, including those for professional bond services, awarded pursuant to statewide participation goals for minority, women, and disabled veteran business enterprises. Existing law further provides for the suspension of persons who violate these provisions and requires the Office of Small and Minority Business to take certain actions in connection with violations of these provisions.

This bill would make it a misdemeanor for any person or firm to establish or cooperate in the establishment of, or exercise control over, a firm found to have violated these provisions, and would impose civil penalties in the amount not to exceed $50,000 for a 1st violation, and not to exceed $200,000 for each additional or subsequent violation. The bill would also broaden the suspension provisions and requirements on the office to include violations committed by firms. The creation of these new crimes would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1033 (AB 454) Solis. Cooperative agreements: State Department of Health Services contracts.

Existing law provides for a contract approval and award process for all direct service contracts, as defined, awarded by the departments within the Health and Welfare Agency. Existing law also provides for a formal administrative appeals process to resolve disputes that arise out of a direct service contract between contracting private nonprofit human service organizations and the Health and Welfare Agency or a component department of the agency.

Existing law also requires that all contracts for the procurement of materials, supplies, equipment, and services entered into by any state agency or department, with certain exceptions, meet various requirements, including approval by the Department of General Services. Existing law sets forth procedures for bidding for and awarding of these contracts.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would enact the State Department of Health Services Cooperative Agreement Act for the purposes of simplifying the administration of public health programs by the State Department of Health Services, reducing the administrative cost of public health programs to the department, and encouraging units of state and local government and nonprofit organizations to attempt bold new solutions to local public health problems.

This bill would define cooperative agreement as an agreement between the department and a unit of local government, any other unit of state government, or a nonprofit organization that provides for a contract under enumerated public health programs. This bill would require the department to comply with provisions of law relating to the direct service contract approval process, procedure, and audit requirements, and certain grievance and appeal provisions.

This bill would require that cooperative agreements be procured by means of a request for application, as defined, or a request for proposal. The bill would require that request for proposal cooperative agreements comply with existing procedures for evaluation and selection of contracting entities through the use of requests for proposals and be of prescribed duration. The bill would authorize a cooperative agreement to be procured without a request for application or proposal when the amount of the agreement is less than $50,000 under certain circumstances, or less than $200,000 under different circumstances.

This bill would require program staff to administer all requests for application and requests for proposals, evaluate the applications and proposals received, make the awards, and monitor progress of recipients of awards.

This bill would specify the methods of payment that may be used by the department under cooperative agreements, and would prohibit imposition of conditions or terms other than those required by statute or regulations after the agreement is entered into. The bill would require the agreement to contain a line item budget if the allowable cost payment system is used, as prescribed.

The bill would authorize the department to require additional reporting of data, as prescribed, until June 30, 1996. The bill would also require the department to develop certain cooperative agreement formats and standardized agreement language, as defined, pursuant to specified procedures.

This bill would authorize the department or contractor to terminate any cooperative agreement upon a minimum of 30 days' written notice, and to use an organization's failure to comply with contracted requirements in prior contracts or agreements with the department in rejecting a request for proposal or application.

The bill would exempt until June 30, 1997, certain cooperative agreements from prescribed provisions of law relating to acquisition of data processing and telecommunications goods and services by state departments and agencies. The bill would subject certain cooperative agreements to procurement restrictions. The bill would authorize the Director of General Services to exempt certain other purchases if the exemption is appropriate and in the best interests of the state.

The existing civil service law authorizes state agencies to enter into personal services contracts when the agency clearly demonstrates that obtaining the services by contract will result in overall cost savings to the state.

This bill would make cooperative agreements subject to these provisions.

Existing law provides for the Clinic Revolving Fund of the State Department of Health Services, which is continuously appropriated to the department, to reimburse clinics that contract with the department and to expedite preliminary advance payments under pending agreements with clinics.

This bill would provide that the department, in implementing this bill, has the authority and is subject to the requirements of those provisions, except that those provisions would be required to apply to all agreements, not only those agreements with clinics. This bill would also provide that funds in the Clinic Revolving Fund may be used for the purposes of cooperative agreements only upon appropriation of funds by the Legislature for that purpose.

The bill would authorize the department to make specified certifications and claims

NOTE: Superior numbers appear as a separate section at the end of the digests.

to the Controller when the department awards a cooperative agreement.

Existing law provides for the review and approval of all contracts by the Department of General Services, and by the State Personnel Board to ensure consistency with certain merit employment principles set forth in the California Constitution.

This bill would subject cooperative agreements to review and approval by the Department of General Services, with prescribed exceptions. This bill would also exempt, until June 30, 1997, nonprofit organizations or governmental agencies that are awarded cooperative agreements from certain minority and women business and disabled veterans participation goals applicable to state contracts with respect to that portion of the cooperative agreement budget that is for personnel related costs, or when the cooperative agreement meets certain criteria.

This bill would provide that nothing in this bill shall affect any cooperative agreement entered into between the state, the United States Government, and the state primary care association in accordance with specified provisions of federal law.

Ch. 1034 (AB 677) Moore. State contracts: goals.

(1) Existing law provides that no state or local agency is required to prepare and submit any written report to the Legislature or the Governor until January 1, 1995, except under specified conditions.

This bill would exempt the annual report by each department on the level of participation in state contracts by minority, women, and disabled veteran business enterprises from that provision.

(2) Existing law provides that contracts awarded by state agencies for construction, professional services, materials, supplies, equipment, alteration, repair, or improvement shall have specified statewide participation goals for minority, women, and disabled veteran business enterprises.

This bill would require contracts awarded by any state agency for general public advertisements to have similar statewide participation goals.

Ch. 1035 (AB 681) Moore. Public utilities.

Existing law subjects the activities of all public utilities to the jurisdiction and control of the Public Utilities Commission pursuant to the Public Utilities Act.

Existing law requires the Public Utilities Commission to annually determine a fee to be paid by every electrical, gas, telephone, telegraph, water, sewer system, and heat corporation and every other public utility providing service directly to customers or subscribers and subject to the jurisdiction of the commission other than a railroad, except as otherwise specified. The fee is established in accordance with specified conditions.

This bill would revise the conditions under which this fee is established and require the commission to maintain records necessary to account separately for all fees and charges, received from each class of utility, as specified. It would require the commission to report to the Legislature on the collections for each class of utility and regulatory expenditures affecting each class, within 60 days after the end of the fiscal year.

Existing law specifies that provisions of law relating to the employment of the Attorney General as legal counsel, the supervisory powers of the Department of General Services, including its approval of certain contracts for the hiring of services or the purchase of materials, supplies, or property, and the prohibition against specifications for bids which limit the bidding to one bidder, do not apply to the commission with respect to any of its activities under the Public Utilities Act.

This bill would instead expressly apply these provisions to the commission, except when the commission makes a finding that extraordinary circumstances justify expedited contracting for consultant or advisory services.

Ch. 1036 (AB 769) Areias. Food: renderers and transporters of inedible kitchen grease.

(1) Under existing law, it is unlawful for any person to engage in the transportation of inedible kitchen grease without being registered with the Department of Food and Agriculture. A violation of this requirement is a misdemeanor.

This bill would additionally make it unlawful for any person who is not a registered

NOTE: Superior numbers appear as a separate section at the end of the digests.

transporter or licensed renderer of inedible kitchen grease to transport that product from any place within this state to any place outside the borders of this state, or to steal, misappropriate, contaminate, or damage inedible kitchen grease or containers thereof. The bill would also prohibit a licensed renderer, registered transporter, or any other person from taking possession of inedible kitchen grease from an unregistered transporter, or from knowingly taking possession of stolen kitchen grease. Under existing law, a violation of these provisions would also be a misdemeanor, thereby constituting a state-mandated local program.

(2) Under existing law, the department may suspend or revoke a registration certificate or a renderer's license if it finds the occurrence of any of specified acts.

This bill would permit the department to suspend or revoke a registration certificate or a renderer's license if it finds the registrant or licensee has taken possession of inedible kitchen grease from an unregistered transporter or has knowingly taken possession of inedible kitchen grease that has been stolen.

(3) Existing law makes any person who violates the provisions governing renderers and transporters of inedible kitchen grease guilty of a misdemeanor.

This bill would permit the Director of Food and Agriculture to either seek recovery of a civil penalty, or to levy a civil penalty for violations of these provisions, in lieu of prosecuting violations as a misdemeanor.

(4) Existing law regulates retail food facilities, and makes any violation of the regulations a misdemeanor.

This bill would require all animal byproducts and inedible kitchen grease disposed of by any food facility, except a restaurant as defined, to be transported by a licensed renderer or registered transporter of inedible kitchen grease. A violation of that provision would be, under existing law, a misdemeanor, thereby imposing a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1037 (AB 956) Cannella. Air toxics "hot spots."

(1) Existing law, the Air Toxics "Hot Spots" Information and Assessment Act of 1987, requires operators of facilities which are sources of air releases or potential air releases of hazardous materials to develop, submit to the appropriate air pollution control district or air quality management district, and biennially update emissions inventories. The act requires the districts, based on data from the inventories, to designate facilities as high, intermediate, or low priority category facilities. The act authorizes the districts to require any facility operator to prepare and submit a health risk assessment, and requires the districts to collect fees from facility operators.

This bill would require the districts to exempt facilities that meet prescribed criteria from further compliance with the act, thereby imposing a state-mandated local program. The bill would require the operators of exempted facilities to biennially submit a specified statement and a copy of the most recent emissions inventory for the facility to the district. The bill would require new facilities to prepare and submit an emissions inventory plan and report. The bill would require the operators of exempted facilities to submit an emissions inventory update for those sources and substances for which a change in activities or operations has occurred, as specified. In other cases, the bill would require a district to exempt a facility that meets specified criteria from paying a fee, thereby imposing a state-mandated local program by imposing new duties on the districts.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1038 (AB 969) Jones. Regulations: state agencies: impact statement.

Existing law requires state agencies proposing to adopt or amend any administrative regulation to assess the potential for adverse economic impact on California business enterprises and individuals.

This bill would require a state agency to include the ability of California businesses to compete with businesses in other states in its adverse economic impact assessment.

Ch. 1039 (AB 937) Campbell. Taxation: counties.

Existing law authorizes the legislative body of designated special districts to impose a special tax, as defined, if the ordinance or resolution proposing imposition of the special tax is submitted to the voters and approved by ⅔ of the voters voting on the issue. Existing law prescribes the procedures for the adoption of a special tax.

This bill would, in the same manner, authorize the board of supervisors of any county to impose a special tax, as specified. The bill would require that the taxes be applied uniformly to all taxpayers or all real property within the county, except as specified.

Ch. 1040 (AB 1004) Campbell. Vessels.

Under existing law vessels, as defined, with specified exceptions, including vessels under the burden of 5 tons net register, are subject to the regulation of the Public Utilities Commission.

This bill would narrow the exception for vessels to those which are both under the burden of 5 tons net register and under 30 feet in length, thus subjecting additional species of watercraft to regulation by the commission, and would revise the exception for vessels under 5 tons and over 30 feet in length.

The bill would require these vessels, as specified, to file with the commission, prior to March 1, 1994, an application for a certificate of public convenience and necessity to operate as a common carrier by vessel, and, in lieu of all other fees required by law, to pay a fee of $50. The commission would be required to issue the certificate without further proceedings, as specified.

Because violations of orders, decisions, rules, or other requirements of the Public Utilities Commission are misdemeanors, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1041 (AB 1060) Costa. Air toxics "hot spots."

Existing law, the Air Toxics "Hot Spots" Information and Assessment Act of 1987, requires specified facilities to submit to the air pollution control district or air quality management district having jurisdiction, an emissions inventory plan, requires the district to classify the facilities, requires certain facilities to submit a health risk assessment to the district, and prescribes the use of those assessments. The act requires the emissions inventories to be updated biennially.

This bill would, instead, require those emissions inventories to be updated every 4 years, and would make related changes.

Ch. 1042 (AB 1065) Campbell. Physician assistants: licensure of international medical graduates.

Existing law provides for the licensure of physician assistants administered by the Physician Assistant Examining Committee of the Medical Board of California. Existing law requires that applicants for licensure as physician assistants meet certain educational requirements and pass a licensing examination.

Existing law provides for the implementation of various programs by the Office of Statewide Health Planning and Development relating to the training of health care professionals.

This bill would state the findings and declarations of the Legislature regarding the

NOTE: Superior numbers appear as a separate section at the end of the digests.

shortage and declining proportion of family practice physicians in the United States, and the growing demand for medical care in California.

This bill would require the Office of Statewide Health Planning and Development to coordinate the establishment of a pilot and an ongoing international medical graduate physician assistant training program, with the goal of placing as many international medical graduate physician assistants in medically underserved areas as possible in order to provide greater access to care for the growing population of medically indigent and underserved by training foreign medical graduates to become licensed as physician assistants at no cost to the participants in return for a commitment from the participants to serve in underserved areas.

This bill would require the office, by February 1, 1994, or by a specified date after federal funds become available to implement these provisions, whichever occurs later, to establish a training program advisory task force to, among other things, develop a recommended curriculum for the training program, and would require the curriculum to be presented by the office to the Committee on Allied Health Education and Accreditation of the American Medical Association for approval by April 1, 1994, or by a specified date after federal funds become available to implement these provisions, whichever occurs later.

This bill would make any person who has satisfactorily completed the program eligible for licensure by the committee as a "physician assistant" if the person has successfully completed the examination required for licensure as a physician assistant, and has successfully completed the Test of English as a Foreign Language (TOEFL).

This bill would specify the liquidated damages in the event of default by a successful training participant to include the training costs plus interest, the costs of seeking cover, and the costs of enforcement.

This bill would provide that the Attorney General may represent the office, or the committee, or both in any litigation necessitated by this article, or if the Attorney General declines, would authorize the office, or the committee, or both to hire other counsel for this purpose. This bill would require funds collected pursuant to its provisions to be allocated according to a prescribed formula.

This bill would specify the further duties of the Office of Statewide Health Planning and Development, including, but not limited to, determining those areas of the state that are medically underserved and would benefit from the services of additional persons licensed as physician assistants, and providing grants to applicant health care providers that provide services in medically underserved areas for the purpose of funding additional physician assistant positions in those areas.

This bill would create the Physician Assistant Training Fund in the State Treasury for the purpose of receipt of certain funds collected pursuant to its provisions, and would make the fund available to the statewide office for the purpose of providing grants to increase the number of physician assistants providing full-time services in underserved areas, upon appropriation by the Legislature.

This bill would specify that no General Fund revenues shall be expended for the purposes of this bill, and would make the implementation of these provisions contingent upon the availability of federal funds, subject to specified limitations and criteria.

Ch. 1043 (AB 1073) McDonald. Veterans' farm and home purchase: service in Somalia.

Existing law provides for educational assistance and for farm and home purchase benefits for qualifying veterans under the Veterans' Farm and Home Purchase Act of 1974. Existing law defines "veteran" for these purposes to include persons who performed prescribed military service, including, but not limited to, from December 7, 1941, to January 1, 1947, and during the recent Operation Desert Shield and Operation Desert Storm.

This bill would, also, include persons who served in Operation Restore Hope, in Somalia, or offshore in the vicinity of Somalia, regardless of the number of days served.

This bill would incorporate additional changes in Section 980 of the Military and Veterans Code, proposed by SB 603 and SB 837 to become operative only if SB 603 or SB 837, or both, and this bill are chaptered and become effective on or before January

NOTE: Superior numbers appear as a separate section at the end of the digests.

1, 1994, and this bill is chaptered last.

Ch. 1044 (AB 1090) Tucker. Notaries public: fees.

Existing law requires a notary public to not take an acknowledgment of an instrument unless there is satisfactory evidence of the identity of an individual.

This bill would revise the criteria for determining that satisfactory evidence.

Existing law prescribes the fees that can be charged for notary public services.

This bill would increase those fees.

Existing law requires every notary public who is not an attorney and who advertises services in a foreign language to include a statement regarding the fact that the notary public cannot give legal advice.

The bill would require that statement to refer to legal advice about immigration or any other legal matters.

Existing law authorizes the Secretary of State to establish a commissioning fee for notaries public not exceeding $50.

This bill would raise the limitation upon the commissioning fee to $100.

Ch. 1045 (AB 1108) Peace. Property tax assessments and revenues: allocation: unitary and operating nonunitary property.

Existing property tax law requires that the value of unitary and operating nonunitary property, as defined in specified statutes and as assessed by the State Board of Equalization, be allocated in each county in accordance with a specified statute and that the revenues derived therefrom be allocated in each county in accordance with specified formulas and procedures.

This bill would prescribe a special formula for the allocation by the county auditor of property taxes attributable to improvements on utility property subject to a development plan or agreement for new construction if the city or county in which the property is located adopts and files a specified resolution with the State Board of Equalization and the county auditor before January 1, 1995. The allocation formula would continue until December 31, 2004. By requiring additional computations for allocation of property taxes by county taxing officials, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1046 (AB 1144) Goldsmith. State agencies: adoption of regulations.

Existing law imposes various requirements on state agencies with respect to the adoption of regulations.

This bill would require state agencies, where proposed state regulations are substantially different from federal requirements, to include in the notice of adoption, amendment, or repeal, a brief description of the significant differences and a summary of agency efforts minimizing duplication and conflicts. The bill would also require departments, boards, and commissions within the Environmental Protection Agency, the Resources Agency, and the office of the State Fire Marshal to implement any federal standard, rule, or regulation that has been adopted by a federal agency, to the extent permitted by state law and to the extent possible within the adoption process, unless these entities find that differing state regulations are authorized by state law or the burden created by the new local standard rule or regulation is justified by the benefit to human health, public safety, public welfare, or the environment.

Ch. 1047 (AB 1229) Conroy. Santa Margarita Water District.

(1) Under existing law, districts organized pursuant to the California Water District Law are landowner voting districts, but the voting procedure may be changed to that of a resident voting district upon petition by registered voters when at least 50% of the assessable area within the district is developed for residential, industrial, or commercial use.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would impose a state-mandated local program by requiring all elections within the Santa Margarita Water District to be conducted as resident voter elections. The bill would require the terms of office of all directors who are in office on January 1, 1994, to be shortened and would provide for staggered terms.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1048 (AB 1256) Costa. Small school districts.

Under the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (Greene Act), the State Allocation Board is authorized to provide project funding for construction, reconstruction, or modernization of school buildings. Each school district to which funds are allocated under the Greene Act is required to provide a matching share based on the assessment of local development fees and the size of the project.

This bill would authorize any school district with an average daily attendance of less than 2,501 pupils to apply to the board for a loan to cover the project activities of the 1st or 2nd phase, as those phases were defined on July 1, 1993, of a project, not including the purchase of real property, funded under the Greene Act to be repaid within 5 years either through a dedication of development project fees or charges, as specified, or upon project funding in the construction phase. The bill would authorize the board to notify the Controller in the event that loan payments are 90 days late, in which case the Controller would be required to reduce apportionments to the school district as necessary to recover past due and current payments. The bill would specify that any school district accepting a loan under the bill would continue to be subject to local matching share requirements. The board would be authorized to make loans for this purpose to the extent that funds are available up to a maximum of $10,000,000 per fiscal year.

Ch. 1049 (AB 1301) Cortese. Health facility patient charges: copy to health care practitioner.

Existing law requires health facilities, as defined, to comply with various reporting requirements, including, but not limited to, a report to the California Health Policy and Data Advisory Commission, among other things, patient charges.

This bill would require general acute care hospitals, within seven days after completion of the patient's itemized bill, to provide upon request to the primary attending health care practitioner a copy of the complete itemized charges for services rendered by the hospital to the health care practitioner's patient when the primary attending health care practitioner is not an employee of the hospital nor a member of an integrated group practice that provided the hospital services.

This bill would require the requesting practitioner to pay a fee to defray the cost of providing the records.

This bill would require the requesting practitioner to obtain prior written consent from the patient for the release, and to forward a copy of the consent form to the health care facility as part of the request.

Ch. 1050 (AB 1491) Murray. Weights and measures: fees.

Existing law requires each sealer to weigh or measure packages, containers, or amounts of commodities sold, or in the process of delivery, to determine whether they contain the quantity or amount represented and whether they are being sold in accordance with law. Existing law also requires each sealer to inspect commercially used weight, measures, and weighing and measuring apparatus and permits the board of supervisors to charge an annual device registration fee to recover the costs of inspecting or testing the devices.

This bill would permit the board of supervisors to charge an annual device registration fee to recover the cost of weighing and measuring packages. The bill would increase the charge per location based on the number of devices inspected, and would provide for a registration fee of $200 for weighing devices with capacities of 20,000 pounds or greater.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would also provide that a scale or device used in a certified farmers' market, as defined, is not required to be registered in the county where the market is conducted if the scale or device has an unexpired seal for the current year, issued by a licensed county sealer.

Ch. 1051 (AB 1494) Campbell. Adult education: average daily attendance.

Existing law provides a formula for the computation of the authorized limit of adult education average daily attendance for high school districts and unified districts that operate adult education programs and claim adult education state apportionments, based on the district's adult education average daily attendance and the average daily attendance for high school pupils concurrently enrolled in adult education programs, as specified.

This bill would require that for the purposes of that formula the average daily attendance for concurrently enrolled high school pupils in adult education programs for districts that are currently party to an adult education joint powers agreement established prior to January 1, 1963, be based upon the average daily attendance of all participating pupils. This bill would provide that the average daily attendance for concurrently enrolled high school pupils in the Covina-Valley Unified School District shall not exceed that district's average daily attendance for concurrently enrolled high school pupils for the 1992–93 fiscal year.

Ch. 1052 (AB 1768) Margolin. Health care coverage: preexisting conditions.

Existing law prohibits certain group health care service plan contracts that cover 3 or more enrollees from excluding coverage based on a preexisting condition for a period greater than 6 months, as prescribed.

This bill would also prohibit plan contracts that cover one or 2 individuals from excluding coverage based on a preexisting condition for a period greater than 12 months. If a plan does not utilize a preexisting condition provision in plan contracts that cover one or 2 individuals, the bill would authorize the plan to impose a contract provision excluding coverage for waivered conditions, as defined.

Existing law prohibits certain health benefit plans, which are defined as group or individual policies or contracts offered through employment or sponsored by an employer that cover 3 or more persons from excluding coverage based on a preexisting condition for a period greater than 6 months, as prescribed.

This bill would no longer limit health benefit plans to policies or contracts offered through employment or sponsored by an employer and would also prohibit certain health benefit plans that cover one or 2 individuals from excluding coverage based on a preexisting condition for a period greater than 12 months. If a carrier does not utilize a preexisting condition provision in health plans that cover one or 2 individuals, the bill would authorize the carrier to impose a contract provision excluding coverage for waivered conditions, as defined.

Since willful violation of the law regulating health care service plans is a misdemeanor under existing law, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1053 (AB 1824) Lee. Property taxation: transfer of base year value: disaster relief.

Existing property tax law provides, pursuant to a requirement of the California Constitution, that the property tax base year value of real property that is substantially damaged or destroyed by a disaster, as declared by the Governor, may be transferred to a comparable property located within the same county that is acquired or newly constructed after the disaster as a replacement property.

This bill would expand this transfer authorization to allow a comparable replacement

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

property to be acquired or newly constructed within 3 years, rather than 2 years, after a disaster.

This bill would take effect immediately as a tax levy.

Ch. 1054 (AB 1885) V. Brown. Marriage, family, and child counselors: licensure.

Existing law provides for the licensure and regulation of marriage, family, and child counselors, administered by the Board of Behavioral Science Examiners. Existing law requires an applicant for licensure as a marriage, family, and child counselor to obtain 3,000 hours of supervised experience as a trainee and as an intern. Existing law requires the registration of all trainees, and defines "trainee" and "intern" for purposes of these provisions.

Existing law requires registered interns to notify the board within specified time limits of employment or termination of employment. Under existing law, hours of experience gained prior to the notification may not be accepted for purposes of meeting the licensure requirements if the intern fails to provide the notification to the board.

This bill would authorize the board, at its discretion, to waive the requirement that registered interns notify the board of the commencement or termination of employment when the board believes good cause exists. This bill would also make this notification requirement inapplicable to hours gained on or after January 1, 1994.

This bill would revise the definition of "trainee." This bill would repeal the requirement that all trainees register with the board and notify the board of employment or termination of employment as a trainee.

This bill would authorize trainees enrolled in a qualifying degree program to perform certain activities and services provided the activities and services constitute part of the trainee's supervised course of study and that the person is designated as a trainee.

Existing law requires that the board undertake, or cause to be undertaken, a comprehensive review, in consultation with certain groups, of the supervision of interns and trainees, and propose regulations by July 1, 1988.

This bill would delete the date by which the regulations shall be proposed, and would require that the board undertake or cause to be undertaken a further review of supervision of interns and trainees.

This bill would require applicants for intern registration to furnish the board with a prescribed certification from the chief academic officer of an accredited school, college, or university regarding successful completion of the academic requirements for licensure.

Existing law sets forth the requirements for licensure that all applicants must meet.

This bill would revise requirements for the required professional experience and the required practice. This bill would also prescribe the requirements for applicants for intern registration who met the qualifications for registration prior to December 31, 1987, but failed to apply or qualify.

This bill would prohibit applicants who enroll in a qualifying degree program on or after January 1, 1995, from obtaining more than 750 hours of counseling and direct supervisor contact prior to the granting of the degree, with specified exceptions.

This bill would also require educational institutions that prepare applicants for licensure to encourage students to undergo counseling or psychotherapy.

Existing law authorizes the board to refuse to issue, or to suspend or revoke, a license of any registrant or licensee who has been guilty of unprofessional conduct.

This bill would add to the list of acts that constitute unprofessional conduct the violation of any statute or regulation governing the gaining and supervision of required experience, and employing, directly or indirectly, any unlicensed or unregistered person to engage in conduct for which a license is required.

Existing law provides that it is a misdemeanor to violate the provisions of law relating to licensure of marriage, family, and child counselors.

By revising the requirements for licensure, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1055 (AB 1896) Bornstein. Community care facilities: staff training: HIV, AIDS, and tuberculosis.

Existing law prohibits the operation or management of a community care facility, as defined, without a valid license issued by the State Department of Social Services. Existing law requires the Director of Social Services to ensure that operators and staffs of community care facilities have appropriate training to provide the care and services for which the license is issued.

This bill would require the director to ensure that, within 6 months of obtaining licensure, and each year thereafter, an administrator of an adult residential facility and a program director of a social rehabilitation facility receive 4 hours of training on the needs of residents who may be infected with HIV or AIDS, and on basic information about tuberculosis, as described.

This bill would require the department to enforce these provisions. The bill would require all administrators of adult residential and program directors of social rehabilitation facilities licensed on or before January 1, 1994, to complete the training by December 31, 1994, and would require newly employed administrators and program directors to complete the training within 6 months of commencing employment.

Under existing law, violation of the laws or regulations pertaining to community care facilities is a misdemeanor.

By requiring completion of HIV-related and tuberculosis-related training, this bill would create a new crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1056 (AB 2026) Bronshvag. Minority and women owned businesses: study: disabled persons.

Existing law requests the University of California to conduct a study that addresses specified areas of concern with regard to businesses owned or operated in the state by minorities and women.

This bill would add businesses owned by disabled persons to the scope of this study.

Ch. 1057 (AB 2275) Tucker. Professions and vocations: athletic contests.

(1) Existing law establishes the State Athletic Commission to supervise and regulate boxing in this state. Existing law requires the commission to collect an assessment from promoters of professional boxing matches for deposit into the Boxer's Neurological Examination Account in the General Fund. Existing law also provides for the Boxers' Pension Account and the Disability Insurance Program Account in the General Fund from which moneys are continuously appropriated.

This bill would create the Athletic Commission Fund and would direct that assessments previously deposited in the Boxer's Neurological Examination Account be deposited in the Athletic Commission Fund. This bill would also provide that moneys deposited in the Boxers' Pension Account and the Disability Insurance Program Account in the General Fund, instead be deposited in those accounts in the Athletic Commission Fund to be continuously appropriated, as under existing law, for specified purposes.

This bill would require the cost of the examination to also be paid by managers and professional boxers.

(2) Existing law specifies licensing, registration, and other fees for various athletic professions and vocations.

This bill would revise, as specified, the licensing, registration, and other fees of specified athletic professions and vocations. This bill would also impose licensing fees for booking agents and sparring permits, as specified.

(3) Existing law requires persons who conduct contests or wrestling exhibitions to pay

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to the commission a 5% tax of the amount paid for admission, and of the gross price for the sale, lease, or other exploitation of broadcasting or television rights, provided that the tax shall not be less than $50.

This bill would characterize the 5% tax as a fee and would provide that the fee shall not be less than $1,000, except that the minimum fee for an amateur contest or exhibition shall not be less than $500.

(4) Existing law provides that no tax is due in the case of a person admitted free of charge.

This bill would provide, in addition, that if the number of persons admitted free of charge to specified contests or exhibitions exceeds 25% of the total number of spectators, then an additional fee of $1 per complimentary ticket or pass shall be paid to the commission for each complimentary ticket or pass that exceeds the numerical total of 25% of the total number of spectators.

Ch. 1058 (SB 50) Thompson. Property taxation: new construction: exclusion.

Existing provisions of the California Constitution generally limit ad valorem property taxes on real property to 1% of the full cash value of that property. For purposes of the foregoing limitation, "full cash value" is defined as the value of the real property as shown on the 1975–76 tax bill or, thereafter, its appraised value when purchased, newly constructed, or a change in ownership has occurred after the 1975 assessment.

This bill would provide, for purposes of those constitutional provisions defining "full cash value," that the term "newly constructed" does not, where certain certification requirements are met, include that portion of any improvement to real property that consists of the installation of water conservation equipment for agricultural use, as defined.

This bill would take effect immediately as a tax levy, but would provide that it shall become operative only if SCA 4 of the 1993–94 Regular Session is approved by the voters and becomes operative, and in that event, this bill would become operative on the same date as that measure.

Ch. 1059 (SB 206) Torres. Insurance: agents.

Existing law prohibits an insurer from terminating a written agency contract to transact private passenger automobile insurance solely on the basis of the loss ratio experience developed by the private passenger automobile insurance business underwritten through that agency or solely because the insurance agency submitted applications to the insurer for automobile insurance pursuant to good driver discount provisions. Under existing law, these provisions do not apply to an agent who is an employee of an insurer, or to an agent who by contractual agreement either represents only one insurer or group of affiliated insurers or who is required by contract to submit risks to a specified insurer or group of affiliated insurers prior to submitting them to others. Under existing law, these provisions will be repealed on January 1, 1994.

This bill would delete the exception for employees and certain contracting agents. It would provide for an agent who is an employee of an insurer, or an agent who by contract either represents only one insurer or group of insurers or is required by contract to submit risks to a specified insurer or group of affiliated insurers prior to submitting them to others, these provisions are not intended to prevent the insurer from managing the profitability of its business through the exercise of lawful management techniques, as specified. It would extend the January 1, 1994, repeal date to January 1, 1997.

Ch. 1060 (SB 263) Mello and Killea. Invalid local taxes: credit: refund.

Existing law contains the San Diego County Regional Justice Facility Financing Act, administered by the San Diego County Regional Justice Facility Financing Agency, and provides for the adoption of a retail transactions and use tax ordinance by the agency to be approved by a majority vote of the electors. However, a California Supreme Court case has held that a ⅔ vote of the electors is required for the approval of that tax.

This bill would repeal that act. It would authorize the County of San Diego to pay all just debts and obligations that were accrued by the San Diego County Regional Justice Facility Financing Agency during the period of its existence.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing provisions of the California Constitution require that a special tax imposed by a county, city, or special district be approved by ⅔ of the qualified voters of that entity, and prohibit any special tax so imposed from including an ad valorem property tax or a tax on the sale of real property. Existing statutory law does not provide for the refund of those revenues collected pursuant to a local sales or transactions and use tax that is determined to be invalid for failure to comply with these constitutional requirements.

This bill would require, whenever a local sales or transactions and use tax is finally determined to be invalid for failure to comply with these constitutional requirements, that a portion of the revenues collected under that tax be credited to taxpayers located in the jurisdiction in which that tax was imposed. The bill would provide that the allowance of the credit continue for a specified period and that the sales tax reimbursement that a retailer may add to the sales price of tangible personal property be reduced by the amount of the credit during that period.

This bill would also provide that, for purposes of refunding those revenues not credited to taxpayers, a purchaser may file a claim for refund with the State Board of Equalization in accordance with specified requirements and procedures.

This bill would make specified legislative findings and declarations regarding invalid local taxes.

This bill would appropriate $2,117,000 from the General Fund to the State Board of Equalization to reimburse the board for its costs in implementing the bill during the 1993–94 fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1061 (SB 418) Morgan. Private postsecondary education.

(1) Existing law contains provisions that regulate private postsecondary educational institutions.

This bill would provide that, with specified exceptions, those provisions do not apply to institutions that exclusively offer short-term seminar training, as defined, and that comply with specified law.

(2) Existing law establishes the Council for Private Postsecondary and Vocational Education. Under existing law, the council has the responsibility for approving and regulating private postsecondary educational institutions and for developing state policies for private postsecondary and vocational education in California.

This bill would authorize the council to bring an action for equitable relief for any violation of certain provisions governing private postsecondary education and would specify that the action for equitable relief would supplement, and not supplant, remedies and penalties under other provisions of law.

The bill would authorize the director of the council to purchase annuity contracts for permanent employees of the council and would require the reduction of the salaries of participating employees by the amount of the costs of the contract if certain conditions are met.

(3) Existing law requires the council to conduct a qualitative review and assessment of institutions and all programs offered, through a comprehensive onsite review process performed by a qualified visiting committee. Existing law requires that each institution submit a single application for all operations in California and requires that the application include a single fee that is institution based and not site based.

Existing law also requires that, if there is a shift in control or change of ownership of an institution, an application for a new approval to operate for the institution under the changed ownership or control be filed with the council at least 20 days prior to the shift in control or change in ownership. Existing law also requires that whenever an institution is operated at different locations, an application for approval be filed for each location.

This bill would specify that the single application requirement does not apply if an institution is operated at different locations, in which case an application for approval is filed for each location.

The bill also would require that each institution submit a single application for its main location, branches, and satellites.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) Existing law prohibits any private postsecondary educational institution from offering education services or an education program, with specified exceptions, unless the institution or the branch or satellite campus at which these programs are offered has been approved by the council as meeting certain requirements. Existing law requires approval by the council under certain provisions for all colleges and universities offering courses to veterans through the veteran educational benefit program.

This bill would delete the latter requirement.

(5) Existing law prohibits any institution from offering education that develops or improves an occupational skill, knowledge, or ability unless the ownership for its statewide operations has filed with the council an annual declaration under penalty of perjury for public disclosure setting forth certain information. Under existing law, these requirements do not apply to education with an educational, professional, technological, or vocational objective that is subject to approval pursuant to other provisions. Existing law also exempts from those requirements certain accredited institutions and continuing education courses and remedial and tutorial education, certain education that is offered at a total charge of less than $300, and any education offered by nonprofit entities.

This bill would delete the prohibition against institutions offering education that develops or improves an occupational skill, knowledge, or ability unless the ownership for its statewide operations has filed copies of certain information with the council. The bill would also delete the exemptions described above. The bill would require an institution that exclusively offers short-term seminar training to file specified material and information annually.

(6) Existing law required the council, on or before January 1, 1993, to have adopted a fee schedule for all approved institutions.

This bill would authorize the council to modify the fee schedule, subject to approval during the annual budget process.

(7) Existing law requires the council to annually present its proposed budget and fee schedule to the Department of Finance and the Joint Legislative Budget Committee for their review as part of the annual budget process.

This bill would require the council to, additionally, present penalty fees assessed for delinquent payments, as specified, and additions and deletions of fee categories. The bill would also grant the Department of Finance and the Joint Legislative Budget Committee approval authority with respect to the proposed budget, fee schedule, penalty fees, and additions and deletions of fee categories. The bill would also exempt the adoption of the annual fee schedule, any modification of the fee schedule, and any increase in fees, up to the maximum allowable level, from specified provisions governing the procedure for the adoption of regulations.

Ch. 1062 (SB 466) Boatwright. Rigid plastic packaging containers.

The California Integrated Waste Management Act of 1989 requires, except as specified, on and after January 1, 1995, every rigid plastic packaging container, as defined, which is sold or offered for sale in the state to meet on average at least one of 5 specified criteria.

This bill would exempt, until January 1, 1996, rigid plastic packaging containers which are manufactured for use in the shipment of hazardous materials, as specified, from those requirements and would require the California Integrated Waste Management Board to make a specified report relating to related federal regulations by January 1, 1995. The bill would also exempt, until January 1, 1997, rigid plastic packaging containers which are manufactured for use with food or cosmetics from meeting those criteria, as specified, and would impose specified requirements on manufacturers of products packaged in those exempt rigid plastic packaging containers and on trade associations representing resin manufacturers, as specified.

The bill would prescribe other related matters.

Ch. 1063 (SB 513) Morgan. Administrative regulations: socioeconomic impact analysis.

Existing law requires state agencies proposing to adopt or amend any administrative regulation to assess the potential for adverse economic impact on California business

NOTE: Superior numbers appear as a separate section at the end of the digests.

enterprises and individuals.

This bill would require all state agencies to assess, when proposing the adoption or amendment of any administrative regulation, the potential impact the proposed change may have on California jobs, business expansion, elimination, or creation. This bill also requires that the result of this assessment shall accompany the notice of proposed action and that information for the assessment may come from existing state publications.

Ch. 1064 (SB 551) Hughes. Public Utilities Commission.

Existing law authorizes the Public Utilities Commission to supervise and regulate every public utility in the state and to do all things necessary and convenient in the exercise of its power and jurisdiction. Existing law authorizes the executive director of the commission to release to the Director of Industrial Relations any information concerning entities under its jurisdiction relevant to the enforcement of workers' compensation laws of this state.

This bill would require the commission to publish, as specified, any information it collects for its clearinghouse minority and women data base that it deems to be nonconfidential, for use by governmental agencies and members of the public.

The bill would authorize the commission to impose fees on the requesters of information commensurate with its cost to publish, duplicate, or provide computer access to the data base.

Ch. 1065 (SB 598) Rosenthal. Telephones: cellular telephone carriers.

(1) Under existing law, telephone services, including cellular telephone service, are furnished by telephone corporations subject to the jurisdiction of the Public Utilities Commission.

This bill would express legislative findings and declarations relating to the monitoring of the cellular telephone industry by the Public Utilities Commission. The bill would require cellular telephone carriers to provide the commission, within 6 months of the effective date of the bill, and thereafter as requested by the commission, with information, as specified by the commission, concerning service quality and customer complaints. The bill would provide for the imposition of fines and sanctions on cellular telephone carriers violating its provisions. This bill would impose a state-mandated local program since violation of its provisions would be a crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1066 (SB 603) Rogers. Veterans benefits: home and farm purchase loans.

Existing law provides for various state benefits for veterans, including, among other things, assistance with the purchase of a farm or home. Existing law defines the term "veteran" for purposes of these benefits, and sets out an order of preference for the conferring of these benefits.

This bill would for purposes of the Veterans' Farm and Home Purchase Act of 1974 provide for 4th preference to be given to veterans released from active duty more than 10 years prior to their application for benefits, and 5th preference to be given to veterans eligible for a certain subsequent loan.

The bill would delete from the definition of "veteran" the requirement that the person met certain residency requirements at the time of, and 6 months prior to, entry into active duty. This bill would make conforming changes and other changes of a technical nature.

Existing law excludes from eligibility for benefits, among other persons, persons who have received from another state a bonus, compensation, or benefit for which the prerequisite is service in the armed forces.

This bill would delete that exclusion.

If the department is to contract with a veteran for the construction of a dwelling house and other buildings, or for the purchase of a mobilehome, existing law requires a veteran

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to be the owner in fee of the real property on which the dwelling house and other buildings are to be constructed, and to be the owner in fee, or the owner of an undivided interest in common in a portion of a parcel, real property on which a mobilehome is to be situated.

This bill would instead require that the veteran will be the owner of the real property on which the dwelling house and other buildings are to be constructed, and that the veteran will be the owner of real property, or will be the owner of an undivided interest in common in a portion of a parcel of real property on which a mobilehome is situated.

Existing law requires the veteran, and an Indian veteran, to file with the department certain plans and specifications, together with a contract, within 8 months after acquisition of the real property by the department.

This bill would change the deadline to within 12 months of acquisition and would authorize the department to require course-of-construction insurance for public liability, property damage, and workers' compensation.

Existing law requires the department to enter into a contract with the veteran at a selling price determined by the amount of the contract price for the improvements in the case of real property acquired from a veteran for the purpose of constructing improvements on the property.

This bill would instead require the selling price to be determined by the department's appraised value of the land, if the loan is to include the value of the land, and the amount of the department's appraised value of the improvements to be constructed on the property, in the case of real property acquired for the purpose of constructing improvements on the property.

Existing law authorizes a subsequent loan to be granted for the purchase of a farm or home if the veteran has sold the farm or home for which the earlier loan was obtained, has paid the purchase contract in full, and applies for the subsequent loan within one year of the date of sale of the first farm or home. Existing law also provides that the maximum amount of a subsequent loan is the unpaid contract balance at the time of sale of the first farm or home.

This bill would eliminate the one-year time restriction on applying for a subsequent loan and would make the maximum loan amount the prescribed amount that would be available for a first loan.

Existing law authorizes the Department of Veterans Affairs to issue debentures, revenues from which are deposited in the Veterans Farm and Home Building Fund for use in accordance with the Veterans Farm and Home Purchase Act. Existing law requires the department to require all applicants to qualify under federal laws relating to the permitted uses of tax-exempt bond funds.

This bill would, also, require the department to require all applicants to file within the same time limits required under applicable federal laws and regulations.

This bill would incorporate additional changes in Section 980 of the Military and Veterans Code, proposed by AB 1073, to be operative only if AB 1073 and this bill are both chaptered and become effective on or before January 1, 1994, and this bill is chaptered last. These changes would become operative on the effective date of AB 1073.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1067 (SB 639) Rosenthal. Energy conservation: lighting devices.

Existing law, the Warren-Alquist State Energy Resources Conservation and Development Act, requires the State Energy Resources Conservation and Development Commission to prescribe, by regulation, design and construction standards for, among other things, lighting, to increase the energy efficiency of buildings, and minimum operating efficiency levels for appliances.

This bill would specify that the commission shall consider new and replacement and interior and exterior lighting devices as lighting for purposes of those design and construction standards, and include indoor and outdoor lighting devices as appliances for those purposes. The bill would make legislative findings and declarations that these requirements are declaratory of existing law.

The bill would require the commission to establish an advisory group, obtain public review, prepare and submit a report to the Legislature by January 1, 1996, and initiate

NOTE: Superior numbers appear as a separate section at the end of the digests.

a rulemaking proceeding to consider standards and programs relating to lighting and lighting devices.

The above provisions would become operative only if the commission receives not less than a total of $220,000 in nonstate funds, as specified, by February 28, 1994. If those funds are received, they would be deposited in the Lighting Device Fund, which the bill would create, and which would be continuously appropriated to the commission for expenditure for purposes of the bill.

The bill would require the commission, to the extent possible, based on resources provided by the Budget Act of 1995, to comply with the rulemaking requirements as part of the next appropriately scheduled appliance standard update, and would require the commission, if additional resources are required, to request those resources through the budget process.

Ch. 1068 (SB 659) Deddeh. Permit Streamlining Act: development project approvals.

Under the existing Permit Streamlining Act, any public agency that is the lead agency for a development project for which an environmental impact report is prepared under the California Environmental Quality Act, is required to approve or disapprove the project within one year from the date on which an application requesting approval of the project has been received and accepted as complete by that agency.

This bill would impose a state-mandated local program by requiring approval or disapproval of that project within 6 months from the date of certification by the lead agency of the environmental impact report for the development project.

Under the existing Permit Streamlining Act, if a negative declaration is adopted or if the development project is exempt from regulation under the California Environmental Quality Act, the development project is required to be approved or disapproved within 6 months from the date on which an application requesting approval of the project has been received and accepted as being complete by the lead agency, unless the project proponent requests an extension of the time limit.

This bill would impose a state-mandated local program by requiring approval or disapproval of that project within 3 months from the date of adoption of the negative declaration or the determination by the lead agency that the project is exempt from regulation under the California Environmental Quality Act.

The bill would also prohibit a public agency from requiring a waiver of the time limits specified in the act as a condition of accepting or processing the application for the development project, with certain exceptions. The bill would also require a public agency to specify reasons for the disapproval of an application for a development project.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1069 (SB 694) Killea. Respiratory care fees.

(1) Existing law establishes procedures relating to the denial, suspension, or revocation of licenses of respiratory care practitioners.

This bill would provide that an administrative disciplinary decision imposing terms of probation may include a requirement that the probationer pay the monetary costs associated with monitoring the probation.

(2) Existing law prohibits any person from representing himself or herself to be a respiratory care practitioner without a license.

This bill would authorize the imposition of an administrative citation and assessment of an administrative fine for violation of that prohibition.

(3) Existing law requires a holder of a respiratory care license, at the time of renewal thereof, to notify the Respiratory Care Examining Committee of whether he or she has been convicted of any crime subsequent to the licensee's previous renewal.

This bill would also require the licensee to provide additional information at the time

NOTE: Superior numbers appear as a separate section at the end of the digests.

of renewal.

(4) Existing law requires the examining committee to establish within prescribed limits an application, renewal, and examination and reexamination fees for respiratory care practitioners.

This bill would increase the limits for the application and renewal fees and would establish the examination and reexamination fees at the actual cost to the examining committee. This bill would prohibit the examining committee from increasing the renewal fee in effect on December 31, 1993, before January 1, 1995, and would limit increases in that fee.

(5) Existing law requires the initial license fee to be an amount equal to the renewal fee in effect on the last regular renewal date before the date on which the license is issued, except as prescribed. Existing law authorizes the committee to provide by regulation for waivers or refunds of this fee where the license is issued less than 45 days before the date when it will expire.

This bill would delete these provisions and would establish the initial license fee at $200.

(6) Existing law requires the delinquency fee to be 50% of the renewal fee in effect, but not more than $50.

This bill would delete the $50 cap and would establish a limit for a delinquency fee at a prescribed percentage of the renewal fee in effect when the license is renewed.

(7) Existing law authorizes an expired license to be renewed within 3 years after expiration upon payment of the biennial renewal fee and penalty fee and submission of proof of the applicant's qualifications as the committee may require.

This bill would, instead, authorize an expired license to be renewed within 3 years after expiration upon payment of all accrued and unpaid fees and penalty fees and would authorize the examining committee to require proof of the applicant's qualifications.

(8) This bill would require the examining committee to report information concerning fee increases to appropriate committees of the Legislature.

(9) Existing law authorizes the examining committee to request an administrative law judge to direct any practitioner or applicant found to have committed a violation of law to pay to the committee a sum not to exceed the costs of investigation and prosecution of the case.

This bill would provide that the costs of prosecution includes prosecuting attorney fees and other costs.

(10) Existing law requires the above-described fees to be paid into the Respiratory Care Fund, a continuously appropriated fund.

By raising the fees and fee limits, this bill would result in an increase of moneys deposited into the fund, thereby making an appropriation.

Ch. 1070 (SB 722) Kopp. Environmental quality.

(1) Existing law, the California Environmental Quality Act, requires a lead agency, as defined, to prepare an environmental impact report or negative declaration on a project, as defined, which it intends to carry out or approve. The act requires specified public notices to be given in connection with the review of projects.

This bill would establish, until January 1, 1997, a specified procedure for expanded notices of preparation.

(2) Existing law requires the Office of Planning and Research to prepare, and the Secretary of the Resources Agency to adopt, state guidelines to implement the act.

This bill would declare legislative intent regarding interpreting the act and the state guidelines.

(3) Existing law requires local lead agencies to prepare and certify an environmental impact report on a project which they intend to carry out or approve that may have a significant effect on the environment, as defined.

This bill would provide that when an environmental impact report is certified by a local lead agency's decisionmaking body which is not elected, that certification may be appealed to the agency's elected decisionmaking body, if any.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1071 (SB 730) Johnston. Regional park or open-space districts: Sacramento County.

Under existing law, a regional park district, regional park and open-space district, or regional open-space district may generally only be formed upon presentation of a petition, among other things, signed by at least 5,000 residents, to the board of supervisors of the county containing the largest area within the proposed district. Upon receipt of the petition, the board of supervisors is required to hold a hearing, pass a resolution approving or denying a petition, and call an election, if the petition is approved, to approve or disapprove formation of the district and to elect district directors. Existing law authorizes the board of directors of a district to levy assessments.

This bill would permit proceedings for the formation of a regional park and open-space or regional open-space district in Sacramento County to be initiated by resolution of the county board of supervisors adopted after a noticed hearing. The bill would specify the contents of the resolution, including a requirement to call an election, as prescribed. The bill would prescribe related powers and duties of the regional district, if formed, including requirements applicable to any assessment levied by the district. The bill would make related legislative findings and declarations.

Ch. 1072 (SB 743) Boatwright. Healing arts practitioners: sexual misconduct.

Existing law provides that any act of sexual abuse, misconduct, or relations with a patient, client, or customer that is substantially related to the qualifications, functions, or duties of the occupation for which a license is issued constitutes unprofessional conduct and grounds for disciplinary action for certain healing arts practitioners and social workers.

This bill would delete the condition that the act be substantially related to the qualifications, functions, or duties of the occupation for which a license was issued.

Existing law provides that a psychotherapist who engages in sexual contact, as defined, with a patient or client, or with certain former patients or clients, is guilty of sexual exploitation, with certain exceptions.

This bill would also apply that provision to a physician and surgeon. The bill would change the definition of "sexual contact." The bill would set forth certain exceptions. The bill would require prosecution of a misdemeanor violation of this provision to be commenced within 2 years after commission of the offense.

Existing law provides that a single count of sexual exploitation is a misdemeanor, and that several acts are either a misdemeanor or a felony, with specified sentences and fines.

This bill would specify sentences for sexual exploitation contingent on the number of acts of sexual exploitation, whether there is one or several victims, and whether the offender has been previously convicted of sexual exploitation.

Since violation of these provisions is a misdemeanor under existing law, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1073 (SB 802) Lewis. South coast district: fees.

(1) Existing law, the Lewis-Presley Air Quality Management Act, authorizes the South Coast Air Quality Management District to impose fees for, among other things, the issuance of permits and variances.

This bill would limit any increase in permit or variance fees, or fees for any activity required for compliance with district rules and regulations, imposed by the south coast district to any percentage increase in the state Consumer Price Index, as specified.

(2) The act does not specifically limit the amount of fees collected by the south coast district.

This bill would limit the total fees collected by the south coast district, as specified.

(3) The bill would become operative only if AB 1890 is enacted.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1074 (SB 817) Wright. Solid waste: Ventura County Waste Management Authority.

(1) Existing law, the California Integrated Waste Management Act of 1989, regulates the management of solid waste.

This bill would provide for the formation of the Ventura County Waste Management Authority, prescribe the composition of its governing board, and prescribe the powers and duties of the governing board. The bill would impose requirements upon local agencies in this regard, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1075 (SB 877) Marks. Occupational safety and health: asbestos.

Existing law requires registration with the Division of Occupational Safety and Health for specified asbestos-related work, as defined, and prescribes civil and criminal penalties for violating those requirements.

This bill would exclude from the definition of "asbestos-related work," the installation, repair, maintenance, or nondestructive removal of asbestos cement pipe used outside of buildings, as specified, if the employees and supervisors involved in the operations have received training through a task-specific training program and written certification of completion of that training from the training entity responsible for the training.

The bill would require the Division of Occupational Safety and Health to establish an advisory committee to develop and recommend, for action by the Occupational Safety and Health Standards Board, specific requirements for those hands-on, task-specific training programs. It would also require the division to approve training entities to conduct hands-on, task-specific training programs that meet these requirements for craft employees who may be exposed to asbestos-containing construction materials and for employees and supervisors involved in operations pertaining to asbestos cement pipe, as specified.

Existing law establishes a process for certifying asbestos consultants, and provides that the Division of Occupational Safety and Health may charge a fee to each consultant certified by the process. Existing law provides that the fees are deposited in the Asbestos Consultant Certification Fund, which is continuously appropriated for the purpose of administering the asbestos consultant certification process.

The bill would require the Division of Occupational Safety and Health to charge fees, sufficient to cover the cost of the approval process, to the training entities approved by the division pursuant to the provisions of this bill. It would rename the Asbestos Consultant Certification Fund the Asbestos Training and Consultant Certification Fund, and would create within the fund 2 accounts, the Asbestos Training Approval Account and the Asbestos Consultant Certification Account. It would provide that the fees collected by the division, as provided, shall be deposited in the respective accounts within the Asbestos Training and Consultant Certification Fund. It would also provide that the moneys in each account of the fund shall be available, upon appropriation by the Legislature, for expenditure for the purpose of administering the training approval process and the consultant certification process, respectively. It would also provide that amounts deposited in the Asbestos Training Approval Account in the 1993–94 fiscal year are hereby appropriated to the Department of Industrial Relations for operating costs in the 1993–94 fiscal year.

Ch. 1076 (SB 951) Hart. Solid waste: plastic trash bags and rigid plastic containers.

(1) Existing law, the California Integrated Waste Management Act of 1989, requires each seller, defined as any person who sells trash bags to a retailer, distributor, commercial or industrial user, or governmental entity, to ensure that a specified percentage of the material used in trash bags is recycled postconsumer material, as defined, and requires each seller, on and after March 1, 1994, and annually thereafter, to certify to the California Integrated Waste Management Board that it has complied with those

NOTE: Superior numbers appear as a separate section at the end of the digests.

requirements. The act requires the board, if any seller of trash bags or recycled postconsumer material provides the board with a false or misleading certificate of compliance with those requirements, within 30 days of making that determination, to refer the false or misleading certificate to the Attorney General for prosecution for fraud. The act provides that specific information on material prices included in that certification is proprietary, and prohibits the board from making that information available to the general public.

This bill would repeal those provisions and enact similar provisions with regard to plastic trash bags, as defined, instead requiring a manufacturer to ensure those percentages of postconsumer material. The bill would define a manufacturer as a person who manufactures plastic trash bags for sale in this state and a "wholesaler" as any person who purchases plastic trash bags from a manufacturer for resale in the state. The bill would require each manufacturer, on or before March 1, 1994, and annually thereafter, to submit a report to the board certifying that it has complied with the requirements to use the specified percentages of recycled plastic postconsumer material. The bill would require each wholesaler, on or before March 1, 1994, and annually thereafter, to certify to the board the name and physical location of each manufacturer from whom it purchased plastic trash bags. The bill would require each manufacturer to obtain from its suppliers of recycled plastic postconsumer material for use in the manufacture of plastic trash bags a statement regarding the postconsumer material content and require the manufacturer to annually certify the name and physical location of the suppliers and report specified information obtained from the suppliers regarding those supplies. The bill would not reenact the provisions prohibiting the disclosure of proprietary material price information.

The bill would require the board to refer any false or misleading information provided by a supplier or any false or misleading certification or information provided by a manufacturer or wholesaler to the Attorney General for prosecution for fraud.

By providing for those special prosecutions for fraud, the bill would impose a state-mandated local program by changing the definition of a crime.

(2) The act requires every rigid plastic container, as defined, that is sold or offered for sale in the state to meet specified criteria, commencing on January 1, 1995, except as specified.

This bill would require the board to grant a one-year waiver from those criteria requirements for rigid plastic packaging containers that are introduced and sold in this state after January 1, 1995.

The bill would make clarifying changes to those provisions and would revise, for purposes of those provisions, the definition of "source reduced container." The bill would also define "curbside collection program" for those purposes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1077 (SB 991) Kelley. Structural pest control.

Existing law provides a comprehensive scheme for the regulation of structural pest control operators. Exempt from those provisions are, among others, authorized representatives of any educational institution or state agency engaged in research or study of pest control.

This bill would enlarge the scope of that exemption to apply to authorized representatives of any educational institution or state or federal agency engaged in research or study of pest control, or engaged in investigation or preparation for expert opinion or testimony, as specified.

Existing law provides for the deposit of funds derived from certain pesticide use report fees collected from structural pest control operators in the Structural Pest Control Research Fund.

This bill would authorize the fee to be deposited with a bank or other depository approved by the Department of Finance and designated by the Research Advisory Panel

NOTE: Superior numbers appear as a separate section at the end of the digests.

or into the Structural Pest Control Research Fund, as determined by the panel. This bill would impose specified requirements on those deposits.

Ch. 1078 (SB 1025) Thompson. Winegrape pest and disease control districts.

(1) Existing law provides for the formation of districts in the state to combat the spread of various types of agricultural pests.

This bill would authorize the formation of winegrape pest and disease control districts to respond to the effects of winegrape plant pests and diseases, and to collect and disseminate to winegrape producers in the district all relevant information and scientific studies concerning the pests and diseases, as well as to chart and determine the extent and location of any infestations. The bill would set forth a procedure for the formation, consolidation, reauthorization, and dissolution of the districts, and would provide for their powers and duties, including the power to make assessments for the purposes of the district. The bill would impose duties on a county board of supervisors if a petition is filed to form a district, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement is required by this act for a specified reason. This bill would also provide that, if the Commission on State Mandates determines that this bill contains unreimbursed costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1079 (AB 1450) Escutia. Transportation: Alameda Corridor Transportation Authority.

Existing law imposes various duties and responsibilities on the Department of Transportation.

This bill would make legislative findings and declarations concerning the need for the state to foster economic development and job creation, and the role of the Alameda Corridor Transportation Authority, a joint exercise of powers agency created to carry out the Alameda Corridor project. The bill would require the Trade and Commerce Agency, in conjunction with the Office of Permit Assistance, to provide specified assistance to the authority.

Ch. 1080 (SB 96) Johnston. Employment training panel.

Existing law establishes the Employment Training Panel, and provides that, until January 1, 1994, the Employment Training Fund shall be expended as allocated by the panel for reimbursement of actual training costs incurred by employers and training agencies in job training programs approved by the panel. It also requires that each employer, with specified exceptions, pay a specified contribution into the Employment Training Fund until January 1, 1994.

This bill would extend to January 1, 1997, the termination date of the above provisions establishing the Employment Training Panel and providing for the funding of, and expenditures from, the Employment Training Fund.

Existing law provides that money in the Employment Training Fund shall be expended only for purposes related to the functioning and administration of certain employment training programs for eligible participants, with specified exceptions. It provides that, commencing with the 1991–92 fiscal year, interest earned on the money in the fund shall be used to fund the activities of the Employment Development Department Service Center Program, and the State-Local Cooperative Labor Market Information Program, as specified, and specifies that any money not spent on these programs shall be available to the Employment Training Panel for purposes related to employment training programs.

This bill would specify that, commencing with the 1994–95 fiscal year, and for each

NOTE: Superior numbers appear as a separate section at the end of the digests.

fiscal year thereafter, to the extent that interest is earned on the money in the Employment Training Fund, that interest shall be used to fund the activities of the Employment Development Department Service Center Program, at the program level authorized by the 1993 Budget Act, and to fund up to 50% of the costs of the State-Local Cooperative Labor Market Information Program, but in an amount not to exceed $3,100,000.

Existing law requires the Employment Training Panel to perform various functions and duties with respect to implementing job training for eligible participants, including the establishment and updating of an annual plan relating to the effectiveness of panel training contracts, and authorizes the panel to allocate money in the Employment Training Fund for specified purposes.

This bill would make various changes with respect to the composition of the Employment Training Panel, and the functions and duties the panel is required to perform, including the establishment of a 3-year plan relating to the effectiveness of panel training contracts that shall be updated annually, as provided, and would revise the purposes for which money in the Employment Training Fund may be allocated, as specified.

Existing law requires the Employment Training Panel to develop a new hire cost reimbursement system to encourage successful new hire training by reimbursing contractors for costs associated with the placement and training of new hires.

This bill would provide that the new hire cost reimbursement system shall remain in effect only until December 31, 1995.

Ch. 1081 (SB 417) Marks. Water quality: commercial shellfish.

Existing law requires California regional water quality control boards to formulate and adopt water quality control plans for enclosed bays and estuaries.

This bill would enact the Shellfish Protection Act of 1993. The bill would require the regional boards, if a commercial shellfish growing area, as defined, is determined to be threatened, as specified, to form, within 90 days of the effective date of the act, or within 90 days of the date that a threat is subsequently identified, a technical advisory committee with prescribed membership, devoted solely to the threatened area. The bill would require the technical advisory committee to advise and assist that board in developing an investigation and remediation strategy in accordance with specified law to reduce pollution affecting that area. The bill would require the regional boards to develop, with the assistance of the technical advisory committee, water quality investigation projects for affected areas if the technical advisory committee makes a specified determination, and, with the advice of the local technical advisory committee, to order appropriate remedial action to abate the pollution affecting the commercial shellfish growing area, as specified. The bill would require the regional board to monitor water quality in the threatened area during the implementation of pollution abatement measures to ensure that the measures are effective and to provide the results of the monitoring to the technical advisory committee. The bill would require the regional board, if agricultural sources of pollution have been identified as contributing to the degradation of a shellfish growing area, to invite specified representatives of agricultural interests to work with affected shellfish growers to develop and implement remediation strategies to reduce pollution affecting the area. The bill would require the State Water Resources Control Board and the regional boards, when the state board or regional boards are rating specified project proposals, to give timely notice to the California Aquaculture Association and to provide shellfish growers in affected commercial shellfish growing areas with the opportunity to comment on specified proposals.

Ch. 1082 (AB 2278) Tucker. State Teachers' Retirement System: miscellaneous revisions.

The State Teachers' Retirement Law provides various benefits for members, beneficiaries, disabilitants, disability retirants, and retirants.

This bill would provide, with respect to a member's accumulated contributions which are eligible for direct trustee-to-trustee transfer, for direct transfer to the trustee of a qualified plan under Section 402 of the Internal Revenue Code. This bill would also make technical and related changes.

This bill would make a technical change in a provision relating to judicial determina-

NOTE: Superior numbers appear as a separate section at the end of the digests.

tions of the community property right of members and their spouses in the State Teachers' Retirement System.

Existing law provides for employer pickup of all member's contributions pursuant to Section 414(h)(2) of the Internal Revenue Code.

This bill would require that the member contributions be deducted from the salary of the member.

This bill would revise and recast the provision that provides for the transmission of payments to various entities and in various manners, as designated by the retirant, disabilitant, or beneficiary.

This bill would make a technical change in the provision relating to certain limitations imposed on the benefits of certain members by Section 415 of the Internal Revenue Code.

Ch. 1083 (AB 798) Sher. Public retirement systems: benefit payments.

Existing law authorizes the Teachers' Retirement Board of the State Teachers' Retirement System and the Board of Administration of the Public Employees' Retirement System to, upon request, transmit benefit payments for an eligible person to a bank, savings and loan association, or credit union for deposit in that person's account by electronic fund transfer or by mail. The Teachers' Retirement Board is required to send a copy of the benefit payment information to the person who has had the payment transmitted to the financial institution.

This bill would prohibit the Teachers' Retirement Board and the Board of Administration from mailing a copy of the benefit payment information to the person who has had the payment transmitted to the financial institution pursuant to these provisions, if a written request not to have the information sent has been received from that person. It would require each board to notify persons subject to these provisions of their right to make this request, in the monthly benefit payment notice.

This bill would also make additional changes in provisions concerning State Teachers' Retirement System benefits if those changes are made in AB 2278, and this bill is enacted after AB 2278.

Ch. 1084 (SB 584) Maddy. Satellite wagering.

Existing law provides, with respect to harness, quarter horse, and mixed breed meetings, that 1% of the total amount handled by each satellite wagering facility shall be distributed to a specifically described organization for promotion of the program at satellite wagering facilities.

This bill would instead provide, with respect to quarter horse racing meetings, that ½ of 1% of the total amount handled by each satellite wagering facility shall be distributed for the promotion of the program at satellite wagering facilities and ½ of 1% be distributed according to a written agreement between the licensed racing association and the organization representing the horsemen participating in the meeting.

Existing law also provides for the retention of a certain percentage of the handle by the satellite wagering facility as a commission.

This bill would state that the commission is for the right to do business, and not for the use of real property.

This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 1085 (SB 518) Maddy. Equine drug testing.

(1) Existing law provides for the California Poultry and Livestock Disease Diagnostic Laboratory System within the School of Veterinary Medicine at the University of California, Davis.

This bill would change the name of the system to the California Veterinary Diagnostic Laboratory System.

(2) The Horse Racing Law requires one sample of blood, urine, saliva, or other test samples required by the California Horse Racing Board to be taken from horses entered in any race to be sent to the official racing laboratory approved and designated by the board, and the remaining sample to be sent to an independent laboratory participating in the Association of Racing Commissioners International Quality Assurance Program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the construction of an Equine Drug Testing Laboratory at the University of California, Davis, as part of the California Veterinary Diagnostic Laboratory System, would state the Legislature's intent that the board contract with the Regents of the University of California to provide equine drug testing, and would require that ⅓ of the test samples taken, as required by the board, be sent to the California Veterinary Diagnostic Laboratory System for testing.

(3) The Horse Racing Law requires $\frac{1}{10}$ of 1% of the amount handled by satellite wagering facilities to be distributed to the Equine Research Laboratory, School of Veterinary Medicine, University of California, Davis.

This bill would require $\frac{33}{100}$ of $\frac{1}{10}$ of 1% of that amount to be distributed to the Equine Research Laboratory and $\frac{67}{100}$ of $\frac{1}{10}$ of 1% to be distributed to the California Veterinary Diagnostic Laboratory System. The bill would also require every association that conducts a racing meeting to deduct $\frac{1}{10}$ of 1% of the total amount handled and would require that $\frac{33}{100}$ of that amount be distributed to the Equine Research Laboratory and $\frac{67}{100}$ of that amount be distributed to the California Veterinary Diagnostic Laboratory System.

(4) Under existing law, after the deduction from take-out of certain specified amounts as license fees, commissions, and other fees, 50% of the funds remaining from satellite wagering are distributed as commissions to the association conducting the racing meeting, and 50% as purses to the horsemen participating in the meeting.

This bill would requre 50% of the additional amount deducted from the satellite wagering handle to be paid to the board for deposit in the General Fund and 50% to be distributed as purses to the horsemen participating at the racing meeting conducted by the association.

(5) Existing law provides, with respect to harness, quarter horse, and mixed breed meetings, that 1% of the total amount handled by each satellite wagering facility shall be distributed to a specifically described organization for promotion of the program at satellite wagering facilities.

This bill would instead provide, with respect to quarter horse racing meetings, that ½ of 1% of the total amount handled by each satellite wagering facility shall be distributed for the promotion of the program at satellite wagering facilities and ½ of 1% be distributed according to a written agreement between the licensed racing association and the organization representing the horsemen participating in the meeting.

(6) Existing law also provides for the retention of a certain percentage of the handle by the satellite wagering facility as a commission.

This bill would state that the commission is for the right to do business, and not for the use of real property.

Ch. 1086 (AB 747) Speier. Horseracing: medication.

Existing law prohibits the administration of a substance to a horse after it has been entered in a horserace, unless the California Horse Racing Board has, by regulation, specifically authorized the use of the substance. Existing law requires any blood, urine, saliva, or any other test sample required by the board to be taken from a horse that is entered in a race to be taken in duplicate; one of the samples is required to be sent to the official racing laboratory, and one to an independent laboratory participating in the National Association of State Racing Commissioners Laboratory Quality Assurance Program.

This bill would require any blood or urine sample to be taken to be divided to provide for a split sample. The bill would require the board to adopt regulations to ensure the security of obtaining and testing all samples. If the official sample tests positive for a prohibited substance, this bill would require the secretary of the board to confidentially inform the trainer and the owner of the results. The bill would permit the trainer and the owner to request that the split sample be tested. If the split sample tests positive for a prohibited substance, the bill would require the secretary to report that finding to the board.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 1087 (AB 930) B. Friedman. Public social services.

Existing law requires the State Department of Social Services to administer the Adoption Assistance Program, under which aid is provided to persons adopting special needs children. Each county is required to make eligibility determinations under the program and to make the aid payments under the program, with the state being responsible for a share of the costs of adoption assistance payments.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which payments are made on behalf of qualified children placed in foster care. AFDC-FC rates are determined in accordance with various provisions, including requirements for higher rates for children with special needs.

Existing law contains specific requirements regarding the basis for payments under adoption assistance agreements entered into on or after October 1, 1992.

This bill would make changes in eligibility criteria for the Adoption Assistance Program, as well as in procedures to be used by the department or the responsible county entity for determining eligibility with certain requirements being inapplicable to adoption assistance agreements entered into prior to October 1, 1992. It would also require that adoption assistance payments be used only to pay for unmet needs of the child.

This bill would require the department to develop emergency regulations implementing these eligibility provisions.

By increasing the duties of each county in making eligibility determinations, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed $1,000,000, shall be made from the State Mandates Claims Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 1088 (AB 1197) Bates. Community care facilities: group homes for children.

(1) Existing law, the California Community Care Facilities Act, provides for the licensure and regulation of community care facilities, including group homes and other residential facilities for the care of children, by the State Department of Social Services. Existing law makes it a misdemeanor to violate the act or willfully or repeatedly violate any rule or regulation adopted pursuant to the act.

Existing law requires, by July 1, 1994, the department to develop a standard form for program statements for ratesetting, community care licensing, and county placement purposes for group homes, foster family agencies, and small family homes.

This bill would require the department to adopt regulations for community care facilities licensed as group homes and temporary shelter care facilities, as defined, that care for dependent children, children placed by a regional center, or voluntary placements who are under the age of 6 years. Since the willful or repeated violation of these regulations would be a crime, this bill would impose a state-mandated local program.

(2) Existing law requires a court, at the initial hearing on a petition to adjudge a minor a dependent child of the juvenile court, to order a minor who is not released from the custody of the court to be temporarily placed in the suitable home of a relative or in an emergency shelter or other suitable licensed place or place exempt from licensure or in an appropriate certified family home whose license is pending and all the prelicense requirements for this placement have been met for a period not to exceed 15 judicial days.

This bill would authorize, when a child under the age of 6 years is not released from the custody of the court, the placement of the child in a community care facility licensed as a group home for children or a temporary shelter care facility, as defined, only under prescribed circumstances.

(3) Existing law requires that when a court orders removal of a minor adjudged a

NOTE: Superior numbers appear as a separate section at the end of the digests.

dependent child of the court, the court is required to order the care, custody, control, and conduct of the minor to be under the supervision of a probation officer who may place the minor in specified placements.

This bill would include in those placements that a child under 6 years of age may be placed in a community care facility licensed as a group home for children or a temporary shelter care facility, as defined, under certain conditions.

(4) The bill would require the department to assess the needs of young children and adopt standards in consultation with interested parties.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1089 (AB 2129) Committee on Human Services. Minors.

(1) Existing law requires a county welfare director, prior to the issuance of any foster family home license or prior to the placement of a child in a licensed foster family home, to ensure that one or more home interviews are conducted sufficient to collect information for use by the county welfare department or the placement agency to evaluate the ability, readiness, and willingness of the prospective parent to meet the varying needs of a child.

This bill would, instead, require one or more home interviews prior to the issuance of any foster family home license. It would specify that the information is to be used only by the placement agency. It would also prohibit the inability of a prospective foster parent to meet the varying needs of children, including hard-to-place children from, in and of itself, precluding a prospective foster parent from obtaining a foster family home license.

This bill would require the State Department of Social Services to establish criteria to be used for conducting a home study of a prospective foster parent, at which time the above provisions governing the prelicensing home interviews would become inoperative. By creating additional duties for local agencies, this bill would impose a state-mandated local program.

(2) Existing law provides the procedures for permanently terminating parental rights with regard to, or establishing legal guardianship of, a minor while the minor is a dependent child of the juvenile court.

This bill would permit a court that orders the placement of a minor in long-term foster care with a relative to authorize the relative to provide legal consent for the medical, surgical, and dental care and education of the minor as if the relative were the custodial parent of the minor. It would provide similar authority to the court in related provisions of law.

(3) Existing law establishes the Foster Children and Parent Training Fund and requires, if sufficient moneys are available in the fund, the allocation of up to $1,000,000 for the support of foster parent training programs conducted in community colleges. Existing law additionally requires foster family agencies to supplement the community college training by providing a program of training for their certified foster families.

This bill would require, beginning January 1, 1994, the State Department of Social Services to develop and implement an enhanced statewide basic foster parent training program. The bill would provide that it is the intent of the Legislature to fund this program by allocating child welfare services funds from the 1992–93 fiscal year to the 1993–94 fiscal year to support a 2-year training effort.

(4) Existing law authorizes a child declared a ward or dependent child of the juvenile court, who is age 16 years or older, and who is a participant in the Independent Living Program established under federal law to retain any cash savings accumulated as part of that child's program case plan that is deposited in an insured bank or savings and loan institution and is for the child's use for purposes directly related to emancipation.

This bill would require, by January 1, 1995, the department to complete a comprehensive evaluation, in consultation with county Independent Living Program administrators, placement agencies, providers and community groups, of the Independent Living

NOTE: Superior numbers appear as a separate section at the end of the digests.

Program and to develop recommendations regarding the independent living services. It would also require the department to investigate alternative transition models for youth discharged from foster care.

(5) Existing law requires, by July 1, 1994, the department, in consultation with the State Department of Mental Health, county departments, and foster care providers, to develop and implement a level of care assessment instrument and process.

This bill would require the level of care assessment instrument and process to consider the needs of the child for safety and compatibility with other characteristics of children placed in a facility, as defined in a program statement. This bill would make a conforming change.

(6) This bill would require various procedures to be satisfied in the instance of out-of-county placements of certain minors, including the requirement that the sending county develop a plan of supervision and visitation, or develop a formal agreement between the sending and receiving counties, thereby imposing a state-mandated local program.

(7) Existing law authorizes the Director of Social Services to take certain actions if the director believes that a county is substantially failing to comply with certain provisions of law or any regulation pertaining to any program of the department, under prescribed circumstances.

This bill would grant the same authority to the director with respect to a county probation department substantially failing to comply with certain provisions of law or any regulation pertaining to the placement activities required to be performed by the probation department to ensure that needs of wards in placements whose board and care is funded through the Aid to Families with Dependent Children-Foster Care program are met.

(8) This bill would require county placement agencies to conduct an evaluation of placement resources and programs, thereby imposing a state-mandated local program. It would require the department to provide technical assistance with respect to this evaluation.

(9) Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which, through a combination of federal, state, and county funds, payments are made to foster care providers for qualified children. One category of providers receiving payment under this program is group homes.

Existing law contains various provisions, under which the department determines the reimbursement rate of group homes under the AFDC-FC program.

This bill would make changes in provisions concerning the computation of AFDC-FC group home reimbursement rates.

(10) Existing law requires the department to develop regulations governing the correction of AFDC-FC group home rate classifications, the adjustment of group home rates, and the recovery of overpayments.

Existing law also grants a group home provider the right to appeal an audit determination made by the department.

This bill would modify provisions concerning the conducting of audits, the recovery of overpayments, appeal procedures for various departmental determinations and decisions, and other related matters.

(11) This bill would require the department to conduct a recruitment effort for sibling group placements and to conduct a prescribed study and review.

(12) Under the Adoption Assistance Program, adoptive parents may be reimbursed for nonrecurring expenses incurred as a result of the adoption of a special needs child, subject to specified conditions. Until January 1, 1994, existing law limits the amount of the reimbursement to $400 for each special needs placement.

This bill would delete the repeal date of the provisions imposing the $400 limitation, thus making the limitation permanent, and make a conforming and other technical changes.

(13) The bill would require the department to adopt regulations in order to implement its provisions, with the adoption of any emergency regulations filed with the Office of Administrative Law on or before June 30, 1995, to be deemed to be an emergency as specified in the Administrative Procedure Act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(14) SB 415 would require the State Department of Social Services to adopt emergency regulations in order to implement its provisions.

This bill would amend that bill to limit the time for adoption of those regulations to June 30, 1994.

(15) This bill would incorporate additional amendments to Section 361.2 of the Welfare and Institutions Code proposed by AB 1197, contingent upon the prior enactment of that bill.

(16) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1090 (SB 176) Maddy. Municipal courts: Tulare County.

(1) Existing law specifies the number, classification, and compensation of municipal court personnel in Tulare County.

This bill would revise the number, classification, and compensation of municipal court personnel in Tulare County.

(2) Existing law provides that there is one marshal for each division of the municipal court district in Tulare County.

This bill instead would provide for one marshal for the County of Tulare.

(3) The bill would create a state-mandated local program by revising the number, classification, and compensation of municipal court personnel in Tulare County.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 1091 (AB 2207) Committee on Judiciary. Courts.

(1) Existing law provides for the number, classification, and compensation of various municipal court personnel in Alameda, Butte, Contra Costa, El Dorado, Fresno, Los Angeles, Marin, Merced, Monterey, Napa, Placer, Riverside, Sacramento, San Joaquin, San Luis Obispo, Santa Barbara, Santa Cruz, Shasta, Sonoma, Tulare, and Ventura Counties and the City and County of San Francisco, and provides for the number, classification, and compensation of various superior court personnel in El Dorado and Sacramento Counties and the City and County of San Francisco.

This bill would revise the number, classification, and compensation of various municipal court personnel in Alameda, Butte, Contra Costa, El Dorado, Fresno, Los Angeles, Marin, Merced, Monterey, Napa, Placer, Riverside, Sacramento, San Joaquin, San Luis Obispo, Santa Barbara, Santa Cruz, Shasta, Sonoma, Tulare, and Ventura Counties and the City and County of San Francisco, and provides for the number, classification, and compensation of various superior court personnel in El Dorado and Sacramento Counties and the City and County of San Francisco, thereby imposing a state-mandated local program by requiring a higher level of service under an existing program.

(2) Existing law provides that the present incumbents of judicial positions in the Manteca-Ripon-Escalon-Tracy Judicial District, de jure or de facto, or their successors, shall succeed to the judicial positions created under other provisions of law, as specified.

This bill would eliminate that provision.

(3) This bill would set forth findings of the Legislature regarding the review of changes in the number and compensation of municipal court employees. The bill would direct the Judicial Council to review the procedures now governing municipal court staffing legislation, and would require the Judicial Council to report to the Legislature on options for revision on or before January 1, 1994.

(4) This bill would incorporate additional changes in Sections 69893.5 and 74191.7 of the Government Code proposed by AB 480, contingent on its prior enactment.
