

INDEX TO SUBJECTS OF ASSEMBLY BILLS, ETC.

Bills amending codes are indexed by subject under each code, and also in their proper alphabetical places in the general index. In addition, following this General Index are the four Joint Senate and Assembly Code Amendment Indexes which gives the different sections in numerical order and the number of each bill referring to each section. Resolutions and Constitutional Amendments are indexed in the main index but separate indexes are also given at the end of this index.

Bills approved by the Governor are indicated by *. Bills vetoed or pocketed by the Governor are indicated by †. The action on all other bills is given in body of text.

Note—*Indicates bills approved by Governor.

THE LEGISLATIVE COUNSEL BUREAU.

This bureau was created in 1913 by act of the legislature to "prepare or assist in the preparation or amendment of legislative bills," and is directly connected with the legislature itself. It has no connection with the State Library. The bureau, whose chief is Mr. Arthur P. Will, is located in room 51, second floor of the Capitol.

THE STATE LIBRARY.

California was one of the first states to make provision for legislative reference work. In 1907 the State Library added to its organization such a department. This was done in order to embody whatever was new in reference or other work of value to the legislature that the library had not already undertaken, and was simply in line with what the State Library considered its proper function and the modern interpretation of the original act of 1850 creating the library.

As at present organized the State Library has a legislative reference librarian, but during the sessions of the legislature the whole staff is put upon various phases of legislative reference work. Bill drafting, which in some states is made a part of the legislative reference work, will not be attempted by the California State Library.

Legislative Expenditures

CALIFORNIA LEGISLATURE

Showing the Various Items of Expense and Daily Average
Also General Average Expense for the Last Fourteen
Sessions Beginning with the Session of 1889
and Including the Session of 1915.

PREPARED BY

L. B. MALLORY

Chief Clerk of the Assembly, Sessions of 1911, 1913, 1915

The following is a brief reference to the accompanying chart, for the purpose of explanation

It is interesting to note that although the number of proposed laws have greatly increased, the proportion approved remains about the same.

Since and including the session of 1909 the Constitution provides that the compensation of each Senator and Assemblyman shall be \$1,000.00 for the session, no matter how long. Prior to 1909, a legislator received only \$8.00 per day for a period of sixty (60) days, or a total of \$480.00.

Up to 1909 there was no limit on the amount of money spent for attachés. At the session of 1907 a constitutional amendment was submitted to and ratified by the people, limiting this expenditure to \$500.00 per day for each house.

In considering the items "Salaries of officers and attachés" and "Contingent expenses" of either house, the two items should be taken together, for prior to the session of 1909 the funds were not separated, the contingent expense fund being drawn upon for pay of attachés and employees as well as contingent expense.

While the compensation of the one hundred and twenty (120) members of the Legislature has been increased from \$480.00 to \$1,000.00, beginning with the 1909 session, or a total increase of \$62,000.00, and while an additional expense of what is known as the bifurcated or divided session has been added, the average daily expense for each of the last three sessions has been even less than for former sessions.

All supplies are now purchased under competitive bids, through the office of Superintendent of Buildings and Grounds.

The item of Legislative printing is not included, it being impossible to segregate it prior to 1913. The Department of State Printing is, however, economically and expeditiously handled, the later years showing greater economy and efficiency.
