REPORTS

The following letter of transmittal was presented by the Chief Clerk and ordered printed in the Journal:

California State Auditor

2006-115
June 14, 2007

The Honorable Speaker of the Assembly
The Honorable Members of the Assembly
of the Legislature of California
State Capitol, Room 3196
Sacramento, California

Members of the Assembly: As requested by the Joint Legislative Audit Committee, the Bureau of State Audits presents its audit report concerning the administration of the Carl Moyer Memorial Air Quality Standards Attainment Program (Moyer Program) by the State Air Resources Board (state board) and the four local air districts we visited.

This report concludes that some policies and practices used by the state board and the four local air districts resulted in the Moyer Program achieving less cost-effective emission reductions than it otherwise could have achieved. California law impedes emission reductions by allowing the state board to set aside only 10 percent of Moyer Program funds for projects that operate in more than one district. A higher cap could lead to projects having intended emission reductions with lower costs per ton. Also, the methodology the state board uses to select projects for the multidistrict component undervalues the cost-effectiveness of emission reductions. As a result, the state board did not select some projects with lower costs per ton of intended emission reductions. Additionally, most projects the Bay Area Air Quality Management District used to meet the Moyer Program fund-matching requirement for fiscal year 2003–04 exceeded the maximum cost per ton of emission reductions established by the state board.

Further, we identified some concerns with the administration of the Moyer Program at the state board and the local air districts. The South Coast Air Quality Management District did not spend \$24.1 million in Moyer Program funds by the statutory deadline. Thus, the district

cannot ensure that it is achieving the prompt emission reductions intended by law. The state board is monitoring the district to ensure it spends the funds by July 1, 2007. Also, the state board may not perform on-site audits of local air districts' Moyer programs with sufficient frequency. Without sufficiently frequent on-site audits, errors in the districts' program administration may occur.

Finally, this report includes additional findings related to marketing and project inspections. It also identifies several best practices that can help local air districts select projects that will reduce pollution emissions more cost-effectively, reduce workload, or allow more time for applicants to complete their projects.

Respectfully submitted,

ELAINE M. HOWLE
State Auditor
