Eternal God, For the privilege of having important work to do in this anxious, yet potentially productive time in world history, we are grateful.

Be with our Governor, the Members of this Assembly and all of our state and national officials. May they be men of deep dedication, mental acumen, spiritual

perception and moral stability Give them courage and not a sense of frustration as they face the mountainous tasks before them.

Assembly bills so amended shall be engrossed after printing.

Committee amendments reported with bills shall be prepared by, or approved as to form by, the Legislative Counsel. Four copies of the committee amendments to Assembly bills and five copies of the committee amendments to Senate bills must be delivered to the Clerk's desk.

Adoption of amendments to any bill in the Assembly prior to third reading, other than by a roll call, shall not preclude subsequent consideration in committee or on the third reading of the bill, of such amendments, or any part thereof, by the Assembly.

Amendments From the Floor

77 Any member may move to amend a bill during its second or third reading and such motion to amend may be adopted by a majority vote of the members present.

No amendments to a bill offered from the floor, except committee amendments reported with bills, amendments offered with a motion to amend and re-refer a bill to committee, amendments deleting any number of words, amendments adding a total of not more than 25 words, or amendments previously printed in the Journal, shall be in order unless and until a copy of the proposed amendments has been placed upon the desks of the members. If a copy of amendments adding a total of 25 words or less is not placed on the desks of the members, it shall be made available to the author of the bill, and the amendments shall be read in their entirety by the Clerk prior to debate.

Amendments offered from the floor during a bill's second or third reading either (a) shall be prepared by, or approved as to form by, the

Legislative Counsel or (b) shall be submitted on a form available from the Chief Clerk.

Before debate four copies of the proposed amendment to Assembly bills, and five copies of the proposed amendment to Senate bills, must be delivered to the Clerk's desk. Bills so amended upon second or third reading shall be reprinted and re-engrossed. The Chief Clerk shall order printed as many copies of all amended bills as he may determine to be necessary.

Consideration of Bills Re-referred to Committee

78. Whenever a bill which has been amended, and re-referred to committee, is reported out by that committee, it shall be placed on the second reading file and shall not be transferred therefrom to the regular third reading file until the following day.

Consideration of Constitutional Amendments, Concurrent and Joint Resolutions

79. Constitutional amendments, concurrent and joint resolutions may be amended by a majority of the members present and shall be treated the same as bills, except that they shall be read but once. The ayes and noes shall not be called upon the adoption of concurrent resolutions, except those presenting charter amendments or authorizing expenditures of money, unless regularly demanded or required by statute or by the Constitution.

Bills Transmitted to the Senate

80. Upon the final passage of any bill if no notice of motion to reconsider such bill be given, the Speaker shall order the bill transmitted to the Senate under the signature of the Chief Clerk. Senate bills refused passage shall forthwith be returned to the Senate under similar signature.

Bills Considered During Period Prior to Final Adjournment

81. See Joint Rule 23 for provisions governing bills considered during this period.

Concurrence in Senate Amendments

82. It shall require the same affirmative recorded vote to concur in any Senate amendment to an Assembly bill as the vote required by the Constitution for the passage of such bill. It shall require an affirmative recorded vote of two-thirds of the entire elected membership of the Assembly to concur in any Senate amendment to an Assembly bill which contains an item or items of appropriation subject to reduction or elimination under the provisions of Section 34a of Article IV of the Constitution. The vote on concurrence shall be deemed the vote upon final passage of such bill. When Senate amendments to an Assembly bill are concurred in, the bill shall be forthwith ordered enrolled, and the Chief Clerk shall notify the Senate of such concurrence.

Nonconcurrence in Senate Amendments

83. If the Assembly refuse to concur in Senate amendments to an Assembly bill, and when notified that the Senate has refused to concur in Assembly amendments to a Senate bill, the Speaker shall appoint a committee of three (3) on conference, and the Chief Clerk shall imme-

diately notify the Senate of the action taken by the Assembly and request the appointment of a like committee

Committee on Conference

84 The Speaker, in appointing a committee on conference, shall select two members from those voting with the majority on the point about which the difference has arisen, and the other member from the minority, in the event there is a minority vote

Whether a member has voted with the majority or minority on the point about which the difference has arisen is determined by his vote on the appropriate roll call, as follows:

(a) The roll call on the question of final passage of a Senate bill amended in the Assembly when the Senate has refused to concur with the Assembly amendments;

(b) The roll call on the question of concurrence with Senate amendments to an Assembly bill

Meetings and Reports of Committees on Conference

85 The Chairman of the Senate committee on conference for the same bill shall arrange the time and place of meeting of such committee. It shall require an affirmative vote of not less than two of the Assembly members and two of the Senate members constituting the committee on conference to agree upon a report, and the report shall be submitted to both the Senate and the Assembly. Such report is not subject to amendment, and if either house refuses to adopt such report, the conferees shall be discharged and other conferees appointed. No member who has served on a committee on conference shall be appointed a member of another committee on conference on the same bill. The presentation and consideration of any report of a committee on conference shall always be in order, except during a roll call or when a member has the floor. It shall require the same affirmative recorded vote to adopt any conference report as required by the Constitution upon the final passage of the bill affected by such report. It shall require an affirmative recorded vote of two-thirds of the entire elected membership of the Assembly to adopt any conference report affecting any Assembly bill which contains an item or items of appropriation which are subject to reduction or elimination under the provisions of Section 34a of Article IV of the Constitution.

The vote on concurrence or upon the adoption of such conference report by the Assembly shall be deemed the vote upon final passage of such bill.

Engrossing and Enrolling Bills

86 The Engrossing and Enrolling Clerk shall engross and enroll all bills which shall come to his hands for such purpose, in compliance with provisions of Section 9503 of the Government Code, and in the order of time in which the same shall be acted upon by the Assembly.

Enrollment

87 After final passage by both houses, any Assembly bill not amended by the Senate shall be forthwith ordered by the Speaker to be enrolled, as provided in Sections 9508 and 9509 of the Government Code. The Committee on Engrossment and Enrollment shall report both

the day and hour each enrolled bill is presented to the Governor, which report shall be entered in the Journal.

Adoption of Resolutions

88. House resolutions and concurrent resolutions that do not require a recorded rollcall vote, such as resolutions of congratulation or sympathy, except resolution regarding Members or former Members of the Legislature, shall be listed under a separate heading in the printed Daily File. They shall be considered for adoption under that order of business, or at any other time as determined by the Speaker.

88.1. When any previously printed House Resolution is before the Assembly for adoption it shall be printed in the Assembly Daily Journal only if amendments to it have been adopted, in which case it shall be printed as amended. In the absence of such amendments, House Resolutions before the Assembly for adoption shall be referred to by day and page of the Journal as printed upon introduction. For the purposes of this rule the adding of a coauthor shall not be deemed an amendment.

SECTION 4 PARLIAMENTARY PROCEDURE

Motions and Questions

Precedence of Motions During Debate

89. When a question is under debate or before the Assembly, no motions shall be received but the following, which shall take precedence in the order named:

- First*—To adjourn,
- Second*—To recess to a time certain;
- Third*—To lay on the table;
- Fourth*—For the previous question;
- Fifth*—To set as a special order,
- Sixth*—To postpone indefinitely,
- Seventh*—To refer to or re-refer;
- Eighth*—To amend.

Questions of Order Decided Without Debate

90. All incidental questions of order, arising after a motion is made for any of the questions named in Rule 89 and pending such motion, shall be decided by the Speaker without debate, whether on appeal or otherwise.

Appeal From Decision of the Speaker

91. Any member may appeal from a decision of the Speaker without waiting for recognition by the Speaker, even though another member has the floor. No appeal is in order when another is pending, or when other business has been transacted by the Assembly prior to the appeal being taken.

Upon the appeal being seconded, the Speaker may give his reasons for the decision, and the member taking the appeal may give his reasons for making his appeal, and the Speaker shall forthwith put this question to the Assembly: "Shall the decision of the Speaker be sustained?"

An appeal cannot be amended and yields only to a motion to recess or adjourn, to lay on the table, or a question of personal privilege. If an appeal be laid on the table, such action shall have no effect on the pending question.

An appeal cannot be debated when relating to indecorum, transgression of rules, or priority of business. A majority vote of the members present shall decide any appeal.

Speaker Explains Order of Business

92 The Speaker may, on his own motion or upon the motion of any Member of the Assembly explain the order of business when the motion pending before the Assembly is not debatable. Such explanation is not to consume more than two minutes.

To Adjourn

93 A motion to adjourn is not debatable and cannot be amended, and is always in order, except (a) when another member has the floor; (b) when the Assembly is voting, (c) during a call of the Assembly. The name of any member moving an adjournment and also the hour at which the motion was made and adjournment taken shall be entered in the Journal. A motion to adjourn must be adopted by a majority vote of the members present.

When a motion to adjourn is made and seconded, it shall be in order for the Speaker, before putting the question, to permit any member to state to the Assembly any fact relating to the condition of the business of the Assembly which would seem to render it improper or inadvisable to adjourn. A statement shall not occupy more than two minutes and shall not be debatable.

To Recess to a Time Certain

94 A motion to recess to a time certain shall be treated the same as a motion to adjourn, except that such motion is debatable when no business is before the Assembly, and can be amended as to the time and duration of the recess. It yields only to a motion to adjourn.

To Lay on the Table

95. A motion to lay on the table is not debatable and cannot be amended.

A motion to table a bill, constitutional amendment, concurrent or joint resolution requires a majority vote of the entire elected membership.

Any motion to lay on the table, if carried by a majority vote of the entire elected membership, carries with it the main question and everything that adheres to it, provided, however, that a motion to lay an amendment on the table, if adopted, does not carry with it a bill, constitutional amendment, concurrent, joint, or House resolution.

A motion to lay an amendment on the table may be adopted by a majority vote of the members present.

The Previous Question

96 The previous question shall be put only when demanded by five members, and in this form "Shall the question be now put?" and its effect, when sustained by a majority of the members present, shall be to put an end to all debate and bring the House to a vote only on the question then pending, except that the proponent of the matter pending shall be allowed not to exceed five minutes to close the debate.

Motion to Set Special Order

97. A motion to set any matter before the Assembly as a special order of business must be adopted by a two-thirds vote of the members elected. It is debatable only as to the propriety of setting the main question as a special order of business, and may be amended only as to the time.

Motion to Postpone to a Time Certain

98. A motion to postpone to a time certain shall be deemed and treated as a motion to set as a special order.

Motion to Postpone Indefinitely

99. When a motion is made to postpone indefinitely any bill, motion, or amendment, it opens the main question to debate. Should the motion to postpone indefinitely prevail by a majority vote of the entire elected membership, the main question shall not be acted upon again during the session.

Motion to Amend

100. A motion to amend may itself be amended, but no "amendment to an amendment" can be amended. A motion to amend is debatable, except where the main question to be amended is not debatable. Any motion to amend may be adopted by a majority vote of the members present.

A motion to amend having been decided in the negative, shall not again be in order on the same day, or at the same stage of proceeding. A motion to amend by striking out certain words having been decided in the negative, shall not preclude a motion to amend by adding words, or a motion to amend by striking out and inserting words; but in no case shall a further amendment be substantially the same as the one rejected.

Subject to the above provisions of this rule, a motion to amend is in order during the second or third reading of any bill.

A motion to lay an amendment on the table may be adopted by a majority vote of the members present, as provided in Rule 95.

Amendment to Be Germane

101. No amendment to any bill, whether reported by a committee or offered by a member, shall be in order when such amendment relates to a different subject, or is intended to accomplish a different purpose, or requires a title essentially different from the original title of any bill.

No amendment shall be in order which adds or deletes the name of a member as an author or coauthor, or which changes the original number of any bill.

Substitute Motion

102. A motion to substitute shall be deemed and treated as a motion to amend.

Motions in Writing

103. Upon request of the Speaker all motions shall be reduced to writing and shall be read to the Assembly by the Speaker before the same are acted upon.

Constitution of Motions

104 No motion, whether oral or written, shall be adopted until the same shall be seconded and distinctly stated to the Assembly by the Speaker

Division of Question

105 Any member may call for a division of the question, and the Speaker shall order the question divided if it comprehends propositions in substance so distinct that, one being taken away, a substantive proposition shall remain for the decision of the Assembly

Withdrawal of Motions

106 After a motion is stated by the Speaker, or a bill, resolution, or petition read by the Clerk, it shall be deemed to be in the possession of the Assembly.

Motion to Be Germane

107. No motion or proposition on a subject different from that under consideration shall be admitted as an amendment

Motion to Withdraw and Recall Bills

108 A motion to withdraw a bill or resolution from committee, or to re-refer a bill or resolution from one committee to another committee may be made during the regular order of business. A motion to re-refer shall only be debatable as to the propriety of such reference, and shall require a recorded vote of a majority of the elected members

No bill or resolution shall be withdrawn from committee and placed upon the file, except upon two days' notice thereof and except by a recorded vote of a majority of the elected members

Re-reference of Measures on File

109. A motion to re-refer a bill or resolution that is on the Assembly Daily File to committee may be made during the regular order of business. The motion shall only be debatable as to the propriety of such reference, and shall require a recorded vote of a majority of the elected members.

Bills Stricken From File

110. A motion to strike from the file any bill or House resolution requires a majority vote of the entire elected membership. Such bill shall not be acted upon again during the session.

Motion to Rescind Action and Expunge Record

111. Previous to the approval of the Journal by the Assembly any action may be rescinded and its record ordered expunged by an affirmative recorded vote sufficient to take such action originally; except that no action shall be rescinded and the record expunged by a vote less than a majority of the entire elected membership. No motion to rescind the action and expunge the record shall be made twice on the same proposition

Whenever any action of the Assembly is rescinded and its record ordered expunged, the record of the action expunged shall not appear in any form whatsoever, but the record of the proceedings on the motion to rescind and expunge shall appear in the Assembly Journal as and when printed.

Reconsideration of Vote

112. (a) A motion to reconsider on the next legislative day (1) the vote whereby any bill was passed or refused passage, or (2) the vote whereby any motion, amendment, concurrence, Assembly resolution or proposition other than a bill was passed or refused passage, must be made on the same day the vote to be reconsidered was taken. No motion to reconsider shall be in order on the last day, or the day preceding the last day, for consideration of Assembly or Senate bills in the Assembly. No motion to reconsider shall be adopted unless it receives an affirmative recorded vote of 41 members, except that it shall require such a vote of 54 members or 60 members, respectively, to reconsider the vote on any matter originally requiring 54 votes or 60 votes, as the case may be. A motion to reconsider may be voted on without a second.

A motion to reconsider a vote must be made by a member voting on the question, and shall take precedence over all motions, except a motion to adjourn. Upon such motion being made, the matter to be reconsidered shall forthwith be placed upon the unfinished business file, and no further action shall be taken prior to the next legislative day. When a motion to reconsider has once been made, the same shall be considered to be the property of the Assembly. When reconsideration is granted, the matter to be reconsidered shall resume its exact position before the Assembly previous to its being voted upon.

(b) Any member voting on any motion, amendment, concurrence, Assembly resolution or proposition other than a bill may move to take up on the same day the motion to reconsider such a question, previously made by another member. The motion to take up the reconsideration on the same day shall take precedence over the motion to reconsider and upon demand of any member the motion to take up the reconsideration on the same day must be put to an immediate vote. If the motion to take up the reconsideration on the same day is adopted, the motion to reconsider shall be the next order of business before the House.

Call of Assembly

113. After the roll has been called, and prior to the announcement of the vote, any member may move a call of the Assembly. A majority of the members present may order a call of the Assembly, and the Speaker shall immediately order the Sergeant at Arms to lock all doors and shall direct the Clerk to prepare a list of absentees as disclosed by the last roll call, which list of absentees shall be furnished to the Sergeant at Arms. Thereupon no members shall be permitted to leave the Assembly Chamber except by written permission of the Speaker, and no person shall be permitted to enter except such member as is taken into custody as herein provided, or Senators, officers, attachés, or employees of the Legislature in the official performance of their duties.

Those members who are found to be absent, and for whom no leaves of absence have been granted, shall be forthwith taken into custody wherever found by the Sergeant at Arms or his assistants or any person designated by the Sergeant at Arms, including members of the California Highway Patrol, the State Police, and sheriffs or their deputies, and brought to the Assembly Chamber. No recess or adjournment shall

be taken during a call of the Assembly. During such call, the Assembly may consider and transact any matter of business by unanimous consent. No call of the Assembly shall be ordered on any matter while the Assembly is already under call. A call of the Assembly may be dispensed with at any time upon a majority vote of the members present, such action to become effective upon the completion of the rollcall and the announcement of the vote upon the matter for which the call was ordered.

Resolutions

114. The adoption of any resolution authorizing the expenditure of money shall require an affirmative recorded vote of a majority of all members elected to the Assembly. All House resolutions shall be numbered and shall be referred to the appropriate committee by the Speaker.

Motions and Resolutions

115. Any motion or resolution not otherwise provided for under the Rules shall be placed before the Assembly only under this order of business. Unless otherwise provided by law or Assembly rule, any motion or resolution may be adopted by a majority vote of the members present.

Adjournment

116. Adjournment *sine die* shall be ordered by concurrent resolution. The resolution for adjournment *sine die* shall be adopted by the Assembly not less than seven days before the date set therein for such adjournment.

Members' Decorum and Privileges

Order in Speaking to Questions

117. When a member desires to address the Assembly, he shall rise from his seat and respectfully address himself to "Mr. Speaker." Upon being recognized, he may speak, confining himself to the question under consideration. When two or more members rise at the same time, the Speaker shall designate the member who is entitled to the floor.

No member shall speak more than once during the consideration of any one question on the same day and at the same stage of proceeding, except that the author of a bill or resolution or the mover of a question shall have the right to open and close the debate thereon. No member shall be allowed to speak more than 10 minutes to open and five minutes to close the debate thereon, and no member other than the author or the mover of the question shall be allowed to speak more than five minutes, thereon. No member shall yield to any other member the time for which he is entitled to speak on any matter.

Motions

118. When a member desires to make a motion, he shall obtain recognition as provided in Rule 117. Upon being recognized he shall open by stating his motion, except in the case of a nomination, and in any other case shall not speak to the merits of the motion at that time and shall confine his remarks to those necessary to explain the motion. If the motion is in order and is seconded, it shall be stated to the Assem-

bly by the Speaker. If the motion is debated, the member who made it shall then be entitled to recognition to open the debate thereon.

When a member obtains the floor during debate upon any question that is pending before the Assembly and addresses the Assembly regarding the merits of the pending question, he shall not be permitted to conclude his debate by making any motion or by demanding the previous question

Leave of Absence

119 No member shall absent himself from attendance at any session of the Assembly without leave of the Assembly, and no member shall obtain such leave of absence or be excused for nonattendance, except by a two-thirds vote of all members elected to the Assembly, or by unanimous consent

Personal Privilege

120. Any member may rise to explain a matter personal to himself and shall forthwith be recognized by the Speaker, but shall not discuss a question in such explanation. Such matters of personal privilege yield only to a motion to recess or adjournment.

Objection to Reading of Any Paper

121 Any member upon recognition by the Speaker may object to the reading of any paper before the Assembly. After such objection, the question of reading shall be determined without debate by a majority vote of the members present, upon a brief statement of its substance by the Speaker

Members Called to Order for Transgressing Rules

122. a If any member transgresses the Rules of the Assembly, the Speaker shall, or any member may, call the offending member to order. The member so called to order shall immediately take his seat, until the Speaker without debate, shall have determined whether he is in order or not. Such decision by the Speaker shall be subject to an appeal to the Assembly.

b. If any member be called to order for offensive words spoken in debate, the person calling him to order shall state to the Assembly the words to which exception is taken. No member shall be held to answer, or be subject to censure by the Assembly, for language used in debate, if other business shall have been transacted by the Assembly prior to exception being taken to the words spoken

Members Voting

123 Every member in the Assembly Chamber when a roll call is required shall record his vote openly and without debate, unless the Assembly shall, by a majority vote of the members present, excuse him

The name of any member who refuses to vote as required by this rule, after being requested by the Speaker to do so, shall be entered in the Journal of the Assembly, together with a statement that he was present and did so refuse to vote. Any member who refuses so to vote may, if he so desires, and immediately after the announcement of the vote, submit a written explanation of his failure to vote and have such explanation printed in the Journal, provided no such explanation shall exceed 50 words in length.

In addition to the entry of his name in the Journal, any member who refuses so to vote when required, and who has not been excused from doing so, may, immediately after the announcement of the vote, in the discretion of the Speaker or upon demand of any member, be summoned to appear before the bar of the Assembly for public censure by the Speaker or by any member designated by the Speaker. Censure of a member as provided by this rule shall not constitute a bar to proceedings for his expulsion from the Assembly pursuant to Section 9 of Article IV of the Constitution.

A member may submit a written explanation of his vote on any bill or House resolution, and have such explanation printed in the Journal immediately following such vote, provided no such explanation shall exceed 50 words in length.

Compensation and Expenses of Member Convicted of Felony

124. If a Member of the Assembly is convicted of a felony by a superior court, his right to further compensation or expenses is thereupon suspended and his membership on any interim committee is suspended. If such conviction becomes final, the right of the member to further compensation or expenses shall terminate and any compensation or expenses withheld shall be forfeited to the State. If a conviction is reversed by an appellate court or a motion for a new trial is granted and the member is thereafter found not guilty or the charges against him are dismissed, the amounts of the withheld compensation or expenses shall be paid to the member and the suspension of his committee membership shall terminate.

Whenever a member is convicted of a felony in the superior court, the Assembly Rules Committee shall give written notice to the State Controller, directing him to discontinue any further payments to the member unless and until the Rules Committee notifies the State Controller that the member has been found not guilty or that the charges against him are dismissed. The State Controller shall not draw any warrant payable to any such member except as provided in this rule.

Ayes and Noes

125. The ayes and noes shall be recorded by the electrical voting system on the final passage of all bills, or by viva voce when demanded by three members or when ordered by the Speaker, and on any other question when called for by three members or ordered by the Speaker, the names of which members shall be entered in the Journal.

Voting Not to Be Interrupted

126. When once begun, voting shall not be interrupted, except that before the vote is announced, any member may have the total pending vote flashed on the visible vote recorder. Prior to the announcement of the vote the Speaker shall inquire if all members have voted. Any member may move a call of the Assembly after the completion of the roll and prior to the final recording, but no member shall be allowed to change his vote, or have his vote recorded after the vote is announced.

Members at Clerk's Desk

127. No member or other person shall be allowed at the Clerk's desk while the ayes and noes are being recorded or the votes counted.

Tie Vote

128. In case of an equal division, or tie vote, the question shall be lost.

"Two-thirds of the Entire Elected Membership" Defined

129. Wherever the words or figures, "two-thirds of the entire elected membership" appear in any rule, it shall mean 54 votes.

Assembly Expenses Between Sessions

130. Pursuant to the powers vested in the Assembly Committee on Rules, and during such times as the Assembly is not in session, the committee is authorized and directed to incur and pay such expenses of the Assembly not otherwise provided for as the committee determines are reasonably necessary, including repair, alteration, improvement and equipping of the Assembly Chamber and the offices provided for the Assembly in the State Capitol.

BUDGET MESSAGE BY GOVERNOR EDMUND G. BROWN

Mr. President, Mr Speaker, Members of the Legislature, and My Fellow Californians:

Five years ago I submitted my first budget message, describing the budget as a ledger of our character, our choices and our courage.

Each year since I have been impressed at what a dramatic test of all three the budget process has become in California.

This will be my sixth budget. Like its five predecessors it is soundly in balance. Like the last four, it requires no new taxes

Once again it extends state services to more than 600,000 new Californians. Once again it adds modest new programs to meet the State's pressing needs, \$35 million in new subventions to local school districts, \$12 million, or less than one-half of 1 percent of the budget, for increased state programs.

Once again the budget gives full recognition to needs, but employs frugal means.

The expenditure program of \$3 26 billion from current sources represents an increase of \$129 million or 4 percent over the revised operating budget of the current year. In addition, \$398 million of bond financing is proposed for capital construction, of which \$225 million is planned for facilities of the self-amortizing state water plan and \$173 million for state institutions, principally of higher education. These bond expenditures are not included in budget totals, since they are accounted for in the operating budget each year as the bonds are retired. To indicate the economic impact of this budget, however, the operating budget and bond program should be, and traditionally have been combined. The total is \$3 66 billion.

As I also said five years ago, the budget is a stern test of our principles. To do less than meet honest needs when it is within our capacity to do so is to turn our back on those principles.

I am proud of the way in which we have met and mastered the test in past budgets, and I am confident that you will do the same with this budget.

As in the past, we will act in the true California tradition—boldly and decisively, with courage and with compassion.

Five years ago we faced up to the hard fact that California was pursuing a bankrupt fiscal policy. Our expenditures were exceeding income, and our surpluses were gone. A deficit was due within six months. We substituted fiscal forthrightness for fiscal evasion, with a true economy drive and a bold revenue program. We not only balanced the budget, but we launched a new era of responsible liberalism in California government.

This budget again matches dollars against needs, sparely, but sufficiently. Within its pages, each column of figures testifies that together—the Executive and the Legislature, the Democrats and the Republicans—we are successfully meeting challenges greater than any state has ever faced.

We are providing the classrooms, the highways, the beaches and parks and other vital services for more than 600,000 new citizens a year. We are ending the unchecked waste of our precious water resources. We have launched pioneering programs extending help to the victims of discrimination and disadvantage. We are working on the frontiers of science and technology, exploring the potential of nuclear power.

We have demonstrated that we can meet the test of the greatest mass migration in the history of man—a challenge for which there was no precedent for decision, no historic guidelines, no tested blueprint for leadership.

California continues to surmount the challenges that always face a pioneer and leader.

But there is business ahead.

We have learned to measure our population in precise terms. We know we will have more than 18 million citizens by the beginning of the next fiscal year and that we expect this number to grow to nearly 28 million by 1980.

But we have learned only imperfectly to measure the effects of our tremendous growth—the impact on our cities, on housing patterns, on our transportation facilities, on our farmlands and factories, and, most of all, on our educational institutions.

Our rapid growth is creating new and complex problems. It also is exposing older, festering problems that have been attacked only piecemeal or shunted aside entirely by the rush of population.

We have a long way to go in coping with the unsolved problems before us. Broadly speaking, our paramount task is to extend the benefits of a prosperous California to the hundreds of thousands still denied full participation in our abundance.

I will present to you later this month an economic report in which I will expand on this theme, but this budget already marks a start within

the proper and practical limits of state responsibility toward meeting some of today's most urgent social and economic challenges.

The foundation must be laid down now. To postpone action is to invite disaster and to break faith with the future.

Perhaps the most critical question to be asked about the budget is why it represents an increase of 6 percent over the 1963-64 total budget when the population increase is only 3.3 percent.

The problem is simply that the population group under age 25 is growing far faster than the rest of the population. It is a kind of human tidal wave sweeping through all our institutions, but especially our most expensive institutions—correctional and educational.

The statistics pose a sobering paradox. Our under 25 age group population now represents 4.5 percent of the State's entire population. Our young people contribute only a tiny fraction to state revenues, yet they rightly seek more and more education of a more and more expensive variety.

Yet their need is our need. It must not be denied, and it will not be denied.

I think you will find the following statistics noteworthy:

Of this year's total budget, \$1.54 billion is proposed in *direct* expenditures for young people—in education, in the Youth Authority, in the Youth Conservation Program, aid to families with dependent children, the Crippled Children's Program and other categories.

The increases over the current year for these services are almost entirely due to population growth.

The educational package is up 10.6 percent, Youth Authority up 9 percent; aid to families with dependent children is up 19.7 percent; the crippled children program up 7.4 percent; and so on.

An additional \$160 million, including \$123 million for the University of California and the state college system, is proposed in capital outlay projects, for which the growth of the under 25 age group will be primarily responsible.

If we add these two components—direct services to youth and capital outlay—we have \$1.7 billion, almost one-half of the entire proposed expenditure program.

Despite these mounting pressures, I am anticipating a narrow surplus of \$8.7 million at the end of the 1964-65 fiscal year.

To preserve it, I have deleted from this budget more than \$22 million in departmental proposals to establish new programs. I also have eliminated more than \$60 million in additional requests for capital outlay projects and personnel to reduce program workloads.

Desirable as these proposals are, they must be deferred at this time. They simply do not rank high enough on a priority basis.

I invite further economies by the Legislature, but only those economies that will not impair our present level of services.

Our tax program of 1959 put California back on a sound fiscal footing. Since then, we have concentrated not on new taxes, but on tax reform—on closing loopholes, in removing inequities and in dealing with isolated islands of wealth that properly should bear a more equitable share of the cost of government services.

This budget embodies additional reforms, two of which affect the State's revenue code. Both are important, although their effect is relatively minor.

More fundamental and far reaching are a vitally needed reform of local school support taxation and a reform involving tideland oil revenues. Both have heavy implications for education in the years to come.

First, local school support:

This budget provides for an additional \$51 million in local school assistance due to population increases and through the traditional attendance formula.

It provides an additional \$25 million in support as the result of action taken by the Legislature in 1963.

I propose to add \$35 million more in local assistance.

But I firmly believe that this additional assistance should be appropriated only if accompanied by enactment of meaningful reform in school support at the local level.

We estimate that a countywide equalization would produce an additional \$27.5 million and benefit more than 80 percent of California's school children.

If you adopt my proposals, you will have lifted in just two years the level of school support by a total of \$87.5 million annually. This is exclusive of growth increases of approximately \$50 million each year.

Enactment of this full program would mean a newly revitalized program in most districts, and an end to desperation in many.

While this program can be financed fully from existing funds, it will require one other special action from you—approval again this year of budget language which reserves tidelands money which is surplus to the needs of the state water plan. This means that all tidelands funds in excess of the \$11 million assigned to the California Water Fund will be available for educational purposes. Without such action, no new state aid to education could be offered.

I assure you that the \$11 million assigned to the water fund fully meets the long-term financing requirements of the state water plan. We have already invested \$236 million of tidelands oil revenue in water development, money which will not be returned to the General Fund until the next century. It is only equitable that some of this magnificent resource be used now to benefit this generation as well. There is no greater immediate need than in the field of education.

In order to enable us to continue to finance the school support program at the proposed level in future years, I am also placing another issue before you for special consideration.

I propose that we revise the 1957 legislation which established the present legal relationship and division of revenues between Long Beach as the trustee of the oil-rich tidelands in and near its harbor and the state as the owner of the oil.

It is now clear that at least \$1.5 billion in profit should be realized in the next 35 years from a combination of the field already producing and that still untapped. Only a fraction of that amount could be spent wisely and well by Long Beach acting within the limits of its

trusteeship to the State to make local expenditures only for purposes of statewide benefit

I offer no specific figures for a settlement, but I will offer legislation based on four principles

1. Before any profits are distributed, all costs of subsidence damage or of subsidence control measures should be deducted

2. Before the Legislature determines the Long Beach share of the profits, whether on a dollar or percentage basis, the city should be asked to justify whatever amount it seeks in terms of specific and planned projects of statewide value and interest

3. Since the Long Beach share would thus become a relatively small one, the legislation should vest primary control over the tidelands oil operations involved in the State Lands Commission rather than in city officials.

4. Insofar as possible such changes as these policies would require should be achieved through legislation dealing with the untapped wealth of the new and much larger East Wilmington area. Where necessary in order to achieve a satisfactory solution, however, changes could be made affecting the current operations in the harbor area

Enactment of such legislation would not only insure ability to meet the proposed \$35 million in new annual school support in future years (only \$20 million of which is otherwise expected from present tidelands operations), but it would also provide substantial funds to relieve bonding for capital outlay needs in higher education

Our high level support for education over the years has proven to be our finest investment. Its dividends have been incalculable. Let us continue in that California tradition by making this decision now.

Meanwhile, we must continue our traditional bond issue financing, both for elementary and secondary schools and for our institutions of higher education, including the junior colleges.

For our 14-year-old bond program to provide local school construction aid, I propose we place a \$260 million issue on the June ballot.

For our nine-year-old bond program for capital construction, largely at the University of California, the state college system and our hard-pressed local junior colleges, I propose we place a \$350 million bond issue on the November ballot. This issue will also finance much-needed mental health and correctional facilities.

A number of other major items in the budget involve legislation which also must come before you in the special session I am calling concurrent with the budget session.

Personal Income Tax

To remove an inequity that works against lower bracket income earners, I am proposing a reform in our state personal income tax procedures.

Our present laws unfairly penalize the family man who earns less than \$10,000 a year and who claims the standard deduction instead of itemizing on his return. The more dependents he has, the greater the inequity.

I propose to eliminate the present percentage method of computing the standard deduction and substitute instead a flat allowance—\$500 for a single taxpayer, \$1,000 for a married person or head of household.

The reform will eliminate the income tax liability entirely for an estimated 120,000 of the lowest income earners. It will provide modest tax relief for an additional 990,000. In operation, it would reduce General Fund revenues by \$2.75 million annually.

Insurance Tax

I also propose that we take action to close a legal loophole that results in the annual loss of \$2.5 million in insurance company taxes.

Present law allows an insurance company to deduct all real estate taxes on its home or principal office in California from the gross premiums tax it pays the State.

In many cases a company pays real estate taxes on a large commercial building, only part of which is used for the firm's insurance business. The remainder is rented. The property tax deduction, however, is taken for the entire building.

I recommend that we grant no further deductions and that we limit the principal office deductions already in effect to real estate taxes paid only on property occupied for the transaction of the company's insurance business.

Under present law, the State, in effect, is subsidizing some commercial leasing operations while taxing others. Reform will mean an increase in General Fund revenues of approximately \$2.5 million a year.

Housing

I propose an appropriation of \$81,000 to establish a State Office of Housing.

This is a minimum investment to help meet one of the great unmet needs of our time—adequate housing for tens of thousands of our citizens, particularly for low income families, the aged and the farm worker.

Office of California Development

I am proposing \$593,000 for creation of a new Office of California Development, only \$275,000 of which is not now expended for comparable purposes in other agencies.

This office will give California a more effective, better coordinated program in all phases of economic development—industrial expansion, trade promotion and tourism.

It is urgent that we take concerted action now in the face of anticipated reductions in the level of Federal defense spending. We must produce new jobs for our expanding population or bear the burden of mounting and expensive unemployment.

Executive and Judicial Salaries

I am recommending salary increases totaling \$213,000 for our top State executives and \$1.9 million for judges throughout the State court system.

Many department heads now earn only a few dollars a month more than their civil service subordinates.

Further, if we are to attract men of outstanding ability to positions of leadership in California government, our salaries must be competitive with those paid elsewhere. We should not make financial sacrifice a requirement of service, whether on the bench or in the executive branch.

I ask you also to consider these noteworthy expenditure programs:

Higher Education

This budget proposes State expenditures of \$172 million for the University of California and \$113.7 million for the State college system to meet the greatest enrollment increase in nearly two decades.

I also propose capital outlay expenditures of \$63.7 million for the university system and \$59.3 million for State colleges.

We must not jeopardize our historic national pre-eminence in education. Our support must keep pace with heavier enrollment loads.

Health and Welfare

I am proposing funds:

—For a substantial expansion of our promising Short-Doyle program to develop effective community-based mental health services for our citizens.

—For an increase of nearly 20 percent in the appropriation for increased counseling services to the mentally and physically handicapped, the blind and the deaf.

—To establish two respiratory rehabilitation centers—one in northern California, the other in the southern part of the state.

—For the inclusion of epilepsy as a treatable disease under the Crippled Children Services program.

Short-Doyle—Twenty cities and counties now operate mental health services under the Short-Doyle program, and a number of them are proposing significant expansions next year. Some 12 to 15 additional counties are expected to initiate local mental health programs in 1964-65. As a result of amendments to the act adopted by the 1963 Legislature, the State's financial share for new or expanded services under the program increases from 50 to 75 percent.

I am therefore recommending an additional \$6.4 million in state support.

Rehabilitation—Experience has demonstrated dramatically that the handicapped and the retarded can, with help and counseling guidance, be rehabilitated for gainful employment and more useful lives.

I am proposing an augmentation of \$520,000—to be matched by federal funds—for expanded counseling services in the Department of Rehabilitation. In addition, I am proposing an increase of \$527,000 in case service funds for the purchase of rehabilitation aids and services.

Respiratory centers—While disabling respiratory diseases are becoming an increasingly serious health problem, facilities for specialized care of respiratory patients are being reduced.

To expand our attack on this serious problem, I am proposing an appropriation of \$200,000.

Epilepsy—Pilot studies in Contra Costa and San Bernardino Counties have demonstrated that a high percentage of children afflicted with epilepsy can be helped by proper diagnosis and treatment.

I am proposing \$418,000 to extend the program to other counties in the State.

Corrections

I am proposing expenditures of \$1.3 million to begin a pioneering and systematic attack on the problem of the violent offender in California. Of this total, \$900,000 is for Department of Corrections programs and the remainder for the Youth Authority.

We are beginning to make real progress in solving the costly and explosive riddle of the violent offender in our midst. The funds I propose will make possible a concerted effort to identify and treat the potentially violent inmate in correctional institutions, increase his supervision on parole and conduct further research into the problem.

I am also proposing more than \$31 million for Department of Corrections and Youth Authority capital outlay programs designed to relieve dangerous overcrowding in our correctional institutions.

These expenditures are a partial reflection of the staggering cost of crime in our society.

They do not begin to measure a host of other costs and consequences—in human tragedy, in lost production, in broken homes and increased welfare costs.

The violent offenders program I have outlined is aimed directly at better community protection, and at reducing criminal recidivism and its burdensome price tag. Crime must be reduced in California.

Highway Safety

I am proposing additional Highway Patrol expenditures of \$1.3 million in an effort to reduce California's frightening traffic death toll.

The amount provides for 85 additional uniformed patrolmen and their equipment and an expanded motor carrier safety program.

I have attempted to spotlight some of the new programs proposed in this budget. I remind you that together they constitute a small fraction of 1 percent of its total. They also serve as an indication of the dramatically mounting pressures on government.

The Executive branch and the Legislature both have recognized that we are responding to these pressures with a tax structure, at all levels of government, that is badly in need of repair, a tax structure that is, in some respects, 30 years behind its time.

I am hopeful that as a result of your interim tax studies, we will be in a position at the next session of the Legislature to assess our problems realistically, to weigh our unmet needs in California against an anachronistic tax structure.

It is difficult to know whether or not new revenues will be required, and I would not attempt to prejudge your studies by premature recommendations. But should they be needed, we must be prepared to take forthright action.

Together, we have managed remarkably well to date.

California ranks 27th among the 50 states in state tax burden per \$100 of personal income and 31st in net debt. Our tax burden in relation to personal income in the last 12 years has risen just 6.6 percent. The average for all states in the same period was 26.7 percent. For nine other leading industrial states it was 36.1 percent. And for

New York, the closest comparable state to California, it was 50.9 percent. And again this year, as many other states seek new or increased taxes, California need not do so.

This is a truly remarkable record. It is particularly noteworthy in the light of these comparisons with the nine other leading industrial states:

California's public school enrollment exceeds the next highest state, New York, by 28 0 percent.

Our enrollments in publicly supported institutions of higher learning exceed the next highest state, Michigan, by three to one.

The number of autos using our streets and highways exceeds the next highest state, New York, by 51 8 percent. The number of trucks and buses tops the next highest state, Pennsylvania, by 120 8 percent.

And we have three times more Old Age Security recipients than the next highest state.

The fact is that government in California is producing a higher level of service at a lower relative cost than states with far fewer pressures.

The new programs I propose are modest, but they are necessary. I ask you to weigh their cost carefully, and at the same time weigh the cost of failure to act.

I ask you to remember:

That it costs \$3,000 a year to keep a patient in a mental hospital, but only a fraction of that amount under Short-Doyle community based care.

That it costs \$2,000 a year to keep an inmate in a correctional institution, but only \$700 for the most intensely supervised parole.

That it costs the State \$2,500 a year to support a student at the University of California, or \$1,100 a year for a student at a state college, but that college graduates return to the state in their lifetime many times the amount of this investment.

That it will cost \$81,000 to begin a state attack on our pressing housing problems, but that the price of inadequate housing is misery, ill health, broken homes and a host of ills we include under the label of social dynamite.

That we must weigh our investment in traffic safety against the frightening 1963 state traffic toll—4,304 dead, 198,636 injured.

I ask, in short, that you view these expenditure proposals as investments, investments ultimately in people and in California's future.

In a very real sense, the kind of California we will live in next year and for years in the future will be determined by what we do now. The future is what we in the present make it—no more and no less.

I believe there is a broad, historic California consensus on most of the items in this budget.

The consensus grew out of the vision of Hiram Johnson and gained strength in the courage of Earl Warren. You and I repeatedly have confirmed that consensus since.

Despite our broad agreement, I invite debate on my proposals. I invite review and the clash and competition of opinion. That is your right and your role.

But let us approach our task as reasonable men Let us recognize that we are dealing with a fundamental document of public policy and that reasonable men must ultimately arrive at agreement.

The policies we set now will outlive this budget and this administration Our judgments, for good or ill, will help shape the future for all of us alike, Democrats or Republicans, rich or poor, young or old

The budget is now yours Let its ultimate fate depend not on the fortunes of partisan maneuvering, but on its own merits, on how well it meets the challenges of modern California, first among equals in the United States of America

MESSAGES FROM THE GOVERNOR

The following Budget Message of the Governor was received.

Budget Message by Governor Edmund G. Brown

February 3, 1964

To the Senate and Assembly of the Legislature of California:

Five years ago I submitted my first budget message, describing the budget as a ledger of our character, our choices and our courage

Each year since I have been impressed at what a dramatic test of all three the budget process has become in California.

This will be my sixth budget. Like its five predecessors it is soundly in balance Like the last four, it requires no new taxes Once again it extends state services to more than 600,000 new Californians. Once again it adds modest new programs to meet the State's pressing needs, \$35 million in new subventions to local school districts, \$12 million, or less than one-half of 1 percent of the budget, for increased state programs

Once again the budget gives full recognition to needs, but employs frugal means The expenditure program of \$3 26 billion from current sources represents an increase of \$129 million or 4 percent over the revised operating budget of the current year. In addition, \$398 million of bond financing is proposed for capital construction, of which \$225 million is planned for facilities of the self-amortizing state water plan and \$173 million for state institutions, principally of higher education These bond expenditures are not included in budget totals, since they are accounted for in the operating budget each year as the bonds are retired. To indicate the economic impact of this budget, however, the operating budget and bond program should be, and traditionally have been combined The total is \$3 63 billion

As I also said five years ago, the budget is a stern test of our principles To do less than meet honest needs when it is within our capacity to do so is to turn our back on those principles

I am proud of the way in which we have met and mastered the test in past budgets, and I am confident that you will do the same with this budget

As in the past, we will act in the true California tradition—boldly and decisively, with courage and with compassion

Five years ago we faced up to the hard fact that California was pursuing a bankrupt fiscal policy Our expenditures were exceeding income, and our surpluses

were gone. A deficit was due within six months. We substituted fiscal forthrightness for fiscal evasion, with a true economy drive and a bold revenue program. We not only balanced the budget, but we launched a new era of responsible liberalism in California government.

This budget again matches dollars against needs, sparsely, but sufficiently. Within its pages, each column of figures testifies that together—the Executive and the Legislature, the Democrats and the Republicans—we are successfully meeting challenges greater than any state has ever faced.

We are providing the classrooms, the highways, the beaches and parks and other vital services for more than 600,000 new citizens a year. We are ending the unchecked waste of our precious water resources. We have launched pioneering programs extending help to the victims of discrimination and disadvantage. We are working on the frontiers of science and technology, exploring the potential of nuclear power.

We have demonstrated that we can meet the test of the greatest mass migration in the history of man—a challenge for which there was no precedent for decision, no historic guidelines, no tested blueprint for leadership.

California continues to surmount the challenges that always face a pioneer and leader.

But there is business ahead.

We have learned to measure our population in precise terms. We know we will have more than 18 million citizens by the beginning of the next fiscal year and that we expect this number to grow to nearly 25 million by 1980.

But we have learned only imperfectly to measure the effects of our tremendous growth—the impact on our cities, on housing patterns, on our transportation facilities, on our farmlands and factories, and, most of all, on our educational institutions.

Our rapid growth is creating new and complex problems. It also is exposing older, festering problems that have been attacked only piecemeal or shunted aside entirely by the rush of population.

We have a long way to go in coping with the unsolved problems before us. Broadly speaking, our paramount task is to extend the benefits of a prosperous California to the hundreds of thousands still denied full participation in our abundance.

I will present to you later this month an economic report in which I will expand on this theme, but this budget already marks a start within the proper and practical limits of state responsibility toward meeting some of today's most urgent social and economic challenges.

The foundation must be laid down now. To postpone action is to invite disaster and to break faith with the future.

Perhaps the most critical question to be asked about the budget is why it represents an increase of 6 percent over the 1963-64 total budget when the population increase is only 3.3 percent.

The problem is simply that the population group under age 25 is growing far faster than the rest of the population. It is a kind of human tidal wave sweeping through all our institutions, but especially our most expensive institutions—correctional and educational.

The statistics pose a sobering paradox. Our under 25 age group population now represents 45 percent of the state's entire population. Our young people contribute only a tiny fraction to state revenues, yet they rightly seek more and more education of a more and more expensive variety.

Yet their need is our need. It must not be denied, and it will not be denied.

I think you will find the following statistics noteworthy.

Of this year's total budget \$1.54 billion is proposed in *direct* expenditures for young people—in education, in the Youth Authority, in the Youth Conservation Program, and to families with dependent children, the Crippled Children's Program and other categories.

The increases over the current year for these services are almost entirely due to population growth.

The educational package is up 10.6 percent; Youth Authority up 9 percent; aid to families with dependent children is up 19.7 percent; the crippled children program up 7.4 percent, and so on.

An additional \$160 million, including \$123 million for the University of California and the State college system, is proposed in capital outlay projects, for which the growth of the under 25 age group will be primarily responsible.

If we add these two components—*direct* services to youth and capital outlay—we have \$1.7 billion, almost one-half of the entire proposed expenditure program.

Despite these mounting pressures, I am anticipating a narrow surplus of \$8.7 million at the end of the 1964-65 fiscal year.

To preserve it, I have deleted from this budget more than \$22 million in departmental proposals to establish new programs. I also have eliminated more than \$60 million in additional requests for capital outlay projects and personnel to reduce program workloads.

Desirable as these proposals are, they must be deferred at this time. They simply do not rank high enough on a priority basis.

I invite further economies by the Legislature, but only those economies that will not impair our present level of services.

Our tax program of 1959 put California back on a sound fiscal footing. Since then, we have concentrated not on new taxes, but on tax reform—on closing loopholes, in removing inequities and in dealing with isolated islands of wealth that properly should bear a more equitable share of the cost of government services.

This budget embodies additional reforms, two of which affect the State's revenue code. Both are important, although their effect is relatively minor.

More fundamental and far reaching are a vitally needed reform of local school support taxation and a reform involving tideland oil revenues. Both have heavy implications for education in the years to come.

First, local school support.

This budget provides for an additional \$51 million in local school assistance due to population increases and through the traditional attendance formula.

It provides an additional \$25 million in support as the result of action taken by the Legislature in 1963.

I propose to add \$35 million more in local assistance.

But I firmly believe that this additional assistance should be appropriated only if accompanied by enactment of meaningful reform in school support at the local level.

We estimate that a countywide equalization would produce an additional \$27.5 million and benefit more than 80 percent of California's school children.

If you adopt my proposals, you will have lifted in just two years the level of school support by a total of \$87.5 million annually. This is exclusive of growth increases of approximately \$50 million each year.

Enactment of this full program would mean a newly revitalized program in most districts, and an end to desperation in many.

While this program can be financed fully from existing funds, it will require one other special action from you—approval again this year of budget language which reserves tidelands money which is surplus to the needs of the state water plan. This means that all tidelands funds in excess of the \$11 million assigned to the California Water Fund will be available for educational purposes. Without such action, no new state aid to education could be offered.

I assure you that the \$11 million assigned to the water fund fully meets the long-term financing requirements of the state water plan. We have already invested \$236 million of tidelands oil revenue in water development, money which will not be returned to the General Fund until the next century. It is only equitable that some of this magnificent resource be used now to benefit this generation as well. There is no greater immediate need than in the field of education.

In order to enable us to continue to finance the school support program at the proposed level in future years, I am also placing another issue before you for special consideration.

I propose that we revise the 1957 legislation which established the present legal relationship and division of revenues between Long Beach as the trustee of the oil-rich tidelands in and near its harbor and the state as the owner of the oil.

It is now clear that at least \$1.5 billion in profit should be realized in the next 35 years from a combination of the field already producing and that still untapped. Only a fraction of that amount could be spent wisely and well by Long Beach acting within the limits of its trusteeship to the State to make local expenditures only for purposes of statewide benefit.

I offer no specific figures for a settlement, but I will offer legislation based on four principles.

1. Before any profits are distributed, all costs of subsidence damage or of subsidence control measures should be deducted.

2. Before the Legislature determines the Long Beach share of the profits, whether on a dollar or percentage basis, the city should be asked to justify whatever amount it seeks in terms of specific and planned projects of statewide value and interest.

3. Since the Long Beach share would thus become a relatively small one, the legislation should vest primary control over the tidelands oil operations involved in the State Lands Commission rather than in city officials.

4. Insofar as possible such changes as these policies would require should be achieved through legislation dealing with the untapped wealth of the new and much larger East Wilmington area. Where necessary in order to achieve a satisfactory solution, however, changes could be made affecting the current operations in the harbor area.

Enactment of such legislation would not only insure ability to meet the proposed \$35 million in new annual school support in future years (only \$20 million of which is otherwise expected from present tidelands operations), but it would also provide substantial funds to relieve bonding for capital outlay needs in higher education.

Our high level support for education over the years has proven to be our finest investment. Its dividends have been incalculable. Let us continue in that California tradition by making this decision now.

Meanwhile, we must continue our traditional bond issue financing, both for elementary and secondary schools and for our institutions of higher education, including the junior colleges.

For our 14-year-old bond program to provide local school construction aid, I propose we place a \$260 million issue on the June ballot.

For our nine-year-old bond program for capital construction, largely at the University of California, the state college system and our hard-pressed local junior colleges, I propose we place a \$350 million bond issue on the November ballot. This issue will also finance much-needed mental health and correctional facilities.

A number of other major items in the budget involve legislation which also must come before you in the special session. I am calling concurrent with the budget session.

Personal Income Tax

To remove an inequity that works against lower bracket income earners, I am proposing a reform in our state personal income tax procedures.

Our present laws unfairly penalize the family man who earns less than \$10,000 a year and who claims the standard deduction instead of itemizing on his return. The more dependents he has, the greater the inequity.

I propose to eliminate the present percentage method of computing the standard deduction and substitute instead a flat allowance—\$500 for a single taxpayer, \$1,000 for a married person or head of household.

The reform will eliminate the income tax liability entirely for an estimated 120,000 of the lowest income earners. It will provide modest tax relief for an additional 990,000. In operation, it would reduce General Fund revenues by \$2.75 million annually.

Insurance Tax

I also propose that we take action to close a legal loophole that results in the annual loss of \$2.5 million in insurance company taxes.

Present law allows an insurance company to deduct all real estate taxes on its home or principal office in California from the gross premiums tax it pays the State.

In many cases a company pays real estate taxes on a large commercial building, only part of which is used for the firm's insurance business. The remainder is rented. The property tax deduction, however, is taken for the entire building.

I recommend that we grant no further deductions and that we limit the principal office deductions already in effect to real estate taxes paid only on property occupied for the transaction of the company's insurance business.

Under present law, the State, in effect, is subsidizing some commercial leasing operations while taxing others. Reform will mean an increase in General Fund revenues of approximately \$2.5 million a year.

Housing

I propose an appropriation of \$81,000 to establish a State Office of Housing.

This is a minimum investment to help meet one of the great unmet needs of our time—adequate housing for tens of thousands of our citizens, particularly for low income families, the aged and the farm worker.

Office of California Development

I am proposing \$598,000 for creation of a new Office of California Development, only \$275,000 of which is not now expended for comparable purposes in other agencies.

This office will give California a more effective, better coordinated program in all phases of economic development—industrial expansion, trade promotion and tourism.

It is urgent that we take concerted action now in the face of anticipated reductions in the level of Federal defense spending. We must produce new jobs for our expanding population or bear the burden of mounting and expensive unemployment.

Executive and Judicial Salaries

I am recommending salary increases totaling \$213,000 for our top State executives and \$1.9 million for judges throughout the State court system.

Many department heads now earn only a few dollars a month more than their civil service subordinates.

Further, if we are to attract men of outstanding ability to positions of leadership in California government, our salaries must be competitive with those paid elsewhere. We should not make financial sacrifice a requirement of service, whether on the bench or in the executive branch.

I also propose capital outlay expenditures of \$63.7 million for the university system and \$59.3 million for State colleges.

We must not jeopardize our historic national pre-eminence in education. Our support must keep pace with heavier enrollment loads.

Health and Welfare

I am proposing funds

—For a substantial expansion of our promising Short-Doyle program to develop effective community-based mental health services for our citizens.

—For an increase of nearly 20 percent in the appropriation for increased counseling services to the mentally and physically handicapped, the blind and the deaf.

—To establish two respiratory rehabilitation centers—one in northern California, the other in the southern part of the state.

—For the inclusion of epilepsy as a treatable disease under the Crippled Children Services program.

Short-Doyle—Twenty cities and counties now operate mental health services under the Short-Doyle program, and a number of them are proposing significant expansions next year. Some 12 to 15 additional counties are expected to initiate local mental health programs in 1964-65. As a result of amendments to the act adopted by the 1963 Legislature, the state's financial share for new or expanded services under the program increases from 50 to 75 percent.

I am therefore recommending an additional \$8.4 million in state support.

Rehabilitation—Experience has demonstrated dramatically that the handicapped and the retarded can, with help and counseling guidance, be rehabilitated for gainful employment and more useful lives.

I am proposing an augmentation of \$520,000—to be matched by Federal funds—for expanded counseling services in the Department of Rehabilitation. In addition, I am proposing an increase of \$527,000 in case service funds for the purchase of rehabilitation aids and services.

Corrections

I am proposing expenditures of \$13 million to begin a pioneering and systematic attack on the problem of the violent offender in California. Of this total, \$900,000 is for Department of Corrections programs and the remainder for the Youth Authority.

I am proposing additional Highway Patrol expenditures of \$13 million in an effort to reduce California's frightening traffic death toll.

The Executive branch and the Legislature both have recognized that we are responding to these pressures with a tax structure, at all levels of government, that is badly in need of repair, a tax structure that is, in some respects, 30 years behind its time.

I am hopeful that as a result of your interim tax studies, we will be in a position at the next session of the Legislature to assess our problems realistically, to weigh our unmet needs in California against an anachronistic tax structure.

It is difficult to know whether or not new revenues will be required, and I would not attempt to prejudge your studies by premature recommendations. But should they be needed, we must be prepared to take forthright action.

Together, we have managed remarkably well to date.

California ranks 27th among the 50 states in state tax burden per \$100 of personal income and 31st in net debt. Our tax burden in relation to personal income in the last 12 years has risen just 6.6 percent. The average for all states in the same period was 26.7 percent. For nine other leading industrial states it was 36.1 percent. And for New York, the closest comparable state to California, it was 50.9 percent. And again this year, as many other states seek new or increased taxes, California need not do so.

This is a truly remarkable record. It is particularly noteworthy in the light of these comparisons with the nine other leading industrial states.

California's public school enrollment exceeds the next highest state, New York, by 28.0 percent.

Our enrollments in publicly supported institutions of higher learning exceed the next highest state, Michigan, by three to one.

The number of autos using our streets and highways exceeds the next highest state, New York, by 51.8 percent. The number of trucks and buses tops the next highest state, Pennsylvania, by 120.8 percent.

And we have three times more Old Age Security recipients than the next highest state.

The fact is that government in California is producing a higher level of service at a lower relative cost than states with far fewer pressures.

The new programs I propose are modest, but they are necessary. I ask you to weigh their cost carefully, and at the same time weigh the cost of failure to act. I ask you to remember:

That it costs \$3,000 a year to keep a patient in a mental hospital, but only a fraction of that amount under Short-Doyle community based care.

That it costs \$2,000 a year to keep an inmate in a correctional institution, but only \$700 for the most intensely supervised parolee.

That it costs the State \$2,500 a year to support a student at the University of California, or \$1,100 a year for a student at a state college, but that college graduates return to the state in their lifetime many times the amount of this investment.

That it will cost \$81,000 to begin a state attack on our pressing housing problems, but that the price of inadequate housing is misery, ill health, broken homes and a host of ills we include under the label of social dynamite.

That we must weigh our investment in traffic safety against the frightening 1963 state traffic toll: 4,304 dead; 198,636 mired.

I ask, in short, that you view these expenditure proposals as investments, investments ultimately in people and in California's future.

In a very real sense, the kind of California we will live in next year and for years in the future will be determined by what we do now. The future is what we in the present make it—no more and no less.

I believe there is a broad, historic California consensus on most of the items in this budget.

The consensus grew out of the vision of Hiram Johnson and gained strength in the courage of Earl Warren. You and I repeatedly have confirmed that consensus since.

Despite our broad agreement, I invite debate on my proposals. I invite review and the clash and competition of opinion. That is your right and your role.

But let us approach our task as reasonable men. Let us recognize that we are dealing with a fundamental document of public policy and that reasonable men must ultimately arrive at agreement.

The policies we set now will outlive this budget and this administration. Our judgments, for good or ill, will help shape the future for all of us alike, Democrats or Republicans, rich or poor, young or old.

The budget is now yours. Let its ultimate fate depend not on the fortunes of partisan maneuvering, but on its own merits, on how well it meets the challenges of modern California, first among equals in the United States of America.

Respectfully submitted,

EDMUND G. BROWN

Letter of Transmittal

Bulletin 39-61—Water Supply Conditions in Southern California During 1960-61
The Resources Agency of California
Department of Water Resources
Sacramento, August 16, 1963

Hon. Arthur A. Ohnibus
Clerk of the Assembly
State Capitol, Sacramento

Dear Mr. Ohnibus: Transmitted herewith for the information of the California State Assembly is Volume I of Department of Water Resources Bulletin 39-61 entitled "Water Supply Conditions in Southern California during 1960-61." This is another in the annual Bulletin 39 series prepared on a continuing basis, pursuant to Sections 225 and 226 of the California Water Code.

This report has been prepared in three volumes. The text of the report is contained in Volume I. In it you will find a description of surface water supply, ground water supply, sea-water intrusion, outflow and sewage discharge to the ocean, weather modification operations, and miscellaneous activities affecting water supply conditions. Volumes II and III consist largely of data tabulations useful to persons and agencies concerned with detailed engineering studies of water supply conditions. Also enclosed are copies of such of these volumes which we feel may be useful to you in view of your area of interest and scope of activity.

The data herein show that the water supply during the 1960-61 year was below normal, the seventeenth such year since the current drought began in 1944. Surface water storage declined, as did most ground water levels. These conditions, combined with increased population, resulted in heavier demands upon imported water from the Los Angeles and Colorado River Aqueducts.

Sincerely yours,

WILLIAM E. WARNE, Director

Above transmitted three volumes of Bulletin 39-61 referred by the Speaker pro Tempore to the Assembly Interim Committee on Water.

Our investigators concluded that a significant potential for the development of ground water for irrigation exists in portions of all the ground water basins investigated. Sacramento, October 16, 1963*Hon Arthur Ohnmus*
Chief Clerk of the Assembly
Room 3165, State Capitol, Sacramento

Dear Mr. Ohnmus: I am pleased to transmit herewith, for the information of the Assembly, a copy of the preliminary edition of Department of Water Resources' Bulletin No. 100, "Mt. Shasta City-Dunsmuir Area Investigation," dated March 1963.

The bulletin presents results of engineering and economic studies of a water resources development, which would include a reservoir at the Box Canyon site on the Sacramento River approximately two miles southwest of Mt. Shasta City. Results of the studies indicate that a single-purpose recreation reservoir at Box Canyon is economically justified.

The report is a preliminary edition, subject to revision. It is anticipated that the California Water Commission and this department will hold public hearings to receive comments from interested agencies and individuals. After consideration of the comments received, a final report will be published.

God, Our Father, At the outset of this new session, may friendships be renewed, mutual confidences re-established, and our individual integrity deepened. We can learn from one another and from all our past experiences. But give us the occasion to look beyond ourselves and gain new perspective by seeking to be Thy men and doing Thy will.

If we open the windows of our lives, Thy light can fill our darkness, Thy truth can reveal our errors, and Thy love for us can make us sensitive to the needs of our fellow man. Help us this day to open some windows which have long been closed and to receive Thy grace which can give meaning to our actions. In Thy Name—
AMEN

House Resolution No. 21

Memorializing Congress relative to the Stanford Linear Accelerator Power Lines

WHEREAS, The Atomic Energy Commission proposes to condemn land for construction of a 220,000 volt power line from Skylue Ridge to the Stanford Linear Accelerator, a distance of six miles through San Mateo County; and

WHEREAS, This power line will slash through and inflict irreparable damage to a unique and beautiful area which Californians have been privileged to enjoy for many generations and which should be preserved for generations to come, and

WHEREAS, The Pacific Gas and Electric Company has applied to the city and county governments involved for permits for such construction, which were denied in the belief that such a line should be underground to preserve scenic and property values; and

WHEREAS, The Atomic Energy Commission claims that the cost of underground lines is not within its budget, although this budget did not contemplate the use of the present route, nor was anyone consulted about the damaging effects of such a line; and

WHEREAS, According to the prior understandings the Atomic Energy Commission planned to make use of existing power lines in the area, and the new line represents a change of intention by Pacific Gas and Electric Company and the Atomic Energy Commission; and

WHEREAS, The additional cost of placing the power lines underground as requested by the people and governmental entities involved is only a small fraction of the total cost of the total project, and

WHEREAS, The cost in terms of permanent damage to the terrain and its enjoyment by people born and unborn is incalculable since the three cities, Woodside, Los Altos Hills, and Monte Sereo, most vitally effected were incorporated solely to preserve the scenic beauty of the area, and the community of Portola Valley is presently seeking incorporation status for a similar purpose; and

WHEREAS, The area at the west end of the accelerator is traversed by a large number of hiking and riding trails created and maintained by both public and private groups, a recreation facility pioneered by San Mateo County and formalized by a 1903 Act of the California Legislature, and

WHEREAS, Within a mile of the accelerator passes the trail followed by Gaspar de Portola in 1769, and other splendid historic sites and recreational facilities lie in this area; and

WHEREAS, All parties have indicated the reasonableness of having the accelerator and its supporting facilities conform to the admitted aesthetic beauties of the landscape, and

WHEREAS, 220 KV is the highest voltage now in existence in California, and it is reasonable that such a facility should be placed underground, and that the cost of this should be borne by the Atomic Energy Commission as part of the cost of the project, now, therefore, be it

Resolved by the Assembly of the State of California, That the Congress of the United States and the Joint Committee of the Congress on Atomic Energy is hereby memorialized by this body to request the Atomic Energy Commission to change this short-sighted policy, and to incorporate underground power lines into the plans for its Stanford Linear Accelerator

Resolution read, and referred by the Speaker to the Committee on Rules

By Assemblyman Mulford:

House Resolution No. 22

Relative to commending Al Davis, General Manager and Head Coach of the Oakland Raiders Professional Football Team

WHEREAS, Football fans in the City of Oakland in particular, and the East Bay Area in general, were privileged to witness an unsurpassable effort by the General Manager and Head Coach of the Oakland Raiders Professional Football Team, Mr Al Davis; and

WHEREAS, The wizardry and leadership displayed by Mr Davis transformed the Oakland Raiders from its position as the traditional doormat of the American Football League to that of a top contender in the Western Division of the League, and a team which became one of the entire league's most formidable foes, and

WHEREAS, By rebuilding the team within the incredibly short period of one year, Al Davis created a cohesive unit and sparkplugged the enthusiasm, desire, and will to win in his charges which became evident during the exhibition season and was amply demonstrated during league play, and

PRAYER

The following prayer was offered by the Chaplain, Rev Robert R. Ferguson:

God, Our Loving Father, May not the work of this body be impaired and the potential benefit for the people of this State be lessened by our clinging to past grievances.

We are all so fallible that we must constantly ask Thy forgiveness for our sins Yet Thou hast revealed that we cannot be forgiven by Thee unless we forgive one another Give us this ability so that our lives are not stunted and cancerous because of gnawing enemies

May we be candid and honest in our dealings May our motives be above suspicion and our decisions based on evidence for the general good rather than for our personal gain.

In our Lord's Name, we pray —AMEN.

COMMUNICATIONS

The following communication was presented by the Speaker and ordered printed in the Journal:

Joint Legislative Audit Committee

California Legislature

Sacramento, March 3, 1964

*The Honorable Speaker of the Assembly
The Honorable Members of the Assembly
of the Legislature of California*

Sirs, As required by Section 5019.26 of the Public Resources Code, and as Chairman of the Joint Legislative Audit Committee, I am submitting to you the enclosed report by the Auditor General concerning state park concession contracts

It would be very much appreciated if this report can be printed in today's Assembly Journal.

Respectfully submitted,

VINCENT THOMAS, Chairman
Joint Legislative Audit Committee

cc: Mr. Wm. H. Merrifield
Auditor General

Office of the Auditor General
Sacramento, February 25, 1964

*The Honorable President of the Senate
The Honorable Speaker of the Assembly
The Honorable Members of the Senate and
the Assembly of the Legislature of California*

Sirs: We have reviewed the facts relating to state park concession contracts, as we are required to do by Section 5019.26 of the Public Resources Code.

Sections 5019.10 through 5019.26 were added to the Public Resources Code effective September 20, 1963. These sections specify generally the procedures to be followed by the State in entering into contracts for the operation of concessions in state parks. Section 5019.26 requires the Auditor General to study all facts relating to those contracts and related documents and report annually thereon to the Legislature.

There were no concession contracts entered into by the Department of Parks and Recreation between September 20 and the end of 1963. During this period bids were received for a concession at Hearst San Simeon State Historical Monument and bids were requested for a concession at Lake Elmore State Recreation Area.

Several bids were received on the Hearst San Simeon project, however, a contract has not as yet been negotiated due to legal action initiated by local businessmen. It appears that it will be several months before the action can be cleared through the courts.

Notices to bidders on the Lake Elsinore project were published in November 1963; bid opening was to take place on January 15, 1964, but no bids were received. The department is presently negotiating with an operator directly, as provided in Section 5019.23(a) of the Public Resources Code.

Our review of procedures relative to proposing, advertising, and negotiating concession contracts indicated that the department is complying with the requirements of the Public Resources Code.

Respectfully submitted,

WILLIAM H. MERRIFIELD, Auditor General

INTRODUCTION OF GUESTS

Mr. Willson introduced the Honorable Roger Pfaff, Presiding Judge of the Domestic Relations Court of Los Angeles County, and former Member of the Assembly, to the Members, who joined in welcoming him on his visit to the Assembly Chamber.

MESSAGES FROM THE GOVERNOR

The following Economic Message of the Governor was received:

ECONOMIC MESSAGE

BY GOVERNOR EDMUND G. BROWN

To the Senate and Assembly of the Legislature of California:

Under the provisions of Chapter 588, Statutes of 1963, I am presenting my first economic report.

By way of summary, I can report to you that California's economic performance in the year just past once again broke all records.

New highs were achieved in virtually every index of activity—employment, personal income, construction, retail sales, corporate profits, cash farm receipts and a host of others.

More Californians were working, earned more, bought more, built more and invested more than at any time in our history.

We exceeded nearly every expectation. We began the year amid generally pessimistic forecasts of an economic downturn. But the downturn never came. Instead, we rode the crest of what seems destined to become the longest sustained peacetime recovery since World War II, a period of recovery and advance now in its 37th month.

Despite this record performance, despite our justifiable pride in our economic achievements, we cannot be satisfied.

In the midst of this general prosperity, we are faced with an ever-sharpening economic paradox:

- Increasing numbers of Californians do not share in the fruits of our economic abundance. Hard core groups of the unemployed and the poverty stricken must walk in the shadows of our ever-higher economic plateaus.

- More than 65 million Californians are employed. But for more than 400,000 of our citizens there are no jobs.

- Total personal income last year passed the \$52 billion mark. The average family of four had an income of nearly \$5,300. Disposable income per capita—the amount remaining after payment of federal and state income taxes—has risen nearly \$1,000 since 1950. Yet at least one million Californians in families of four or larger have a "bare subsistence" annual income of less than \$4,000, according to some estimates, and half this number struggle with a "poverty" income of less than \$2,000.

- More and more of our citizens are claiming unemployment insurance benefits. Yet thousands of jobs in California go unfilled month after month because men and women with the required skills cannot be found.

- California built one of every five homes in the Nation last year, an astonishing rate. Yet there is pitifully inadequate housing for hundreds of thousands of our citizens—the aged, the poor, the farm worker.

- California in 1963 again led the Nation in construction in all categories—residential, nonresidential, public works and utilities. Yet our unmet construction needs—for schools and hospitals and transit systems for our cities, to name just a few—are staggering.

- Employers find their payments for overtime work rising. Yet thousands of Californians cannot find even part-time employment.

- We created 189,000 new jobs during 1963, more than any other state. But it was not enough. Our labor force increased by 211,000.

Our challenging task is to resolve the ancient paradox of poverty amid plenty; unemployment amid general prosperity, idleness amid the highest levels of production in our history.

The resolution of the paradox will continue to receive the highest priority in this administration.

In his State of the Union message, President Lyndon B. Johnson declared unconditional war on poverty and unemployment.

California long ago enlisted in that war. Our State has long been a battleground. And we have made spectacular progress in the face of greater population pressures than any state in the union.

We have put first priority on education at all levels. And our unsurpassed educational system has provided the foundation for our rapid economic advance, our high level of technology, our high productive capacity.

We launched the California Water Plan to ensure adequate supplies of water for our industrial expansion and continued agricultural prosperity.

We established California's first Economic Development Agency to attract new industry to our State and thus provide new jobs for our rapidly growing population.

We have written into law enlightened human rights measures—the Fair Employment Practices Act, the Rumford Fair Housing Act and others—so that all Californians will have equal opportunity to employment and to full participation in our economic advance.

We have enacted the Nation's most enlightened programs of social welfare and social insurance aimed at combating poverty, sustaining purchasing power and at breaking the recurring pattern of dependency.

In recent months we have launched the California Commission on Manpower, Automation and Technology to help us find solutions to the perplexing problems of rapid technological change, the displacement of man by machine.

We are working more closely than ever before with leaders in the California aerospace industries and with officials in Washington on problems of defense contracts, phaseouts and shifting patterns of federal procurement.

Most of our weapons in the war against poverty and unemployment have been effective. But we must constantly improve our arsenal. We must expand the range of our weapons, and we must develop new ones to fit the shifting thrusts of our problem.

Our goal simply stated must be full employment. We cannot be satisfied with six percent unemployment or five percent, or any other so-called tolerable level of unemployment.

For even if we cut the present level in half, we are no nearer our goal if disproportionate numbers of any segment of our people—youth, the aged, minorities—still cannot find work.

We must pursue the goal with all our energies. The cost of failing to do so is human hopelessness. It is loss of pride and of productivity. We cannot afford the cost either in social or economic terms.

I endorse the conclusions and the recommendations of the detailed economic report which follows. It makes several facts abundantly clear.

First, our economic evolution has placed an increasing premium on skills and education in our labor force. Indeed, some say we are undergoing not an evolution, but a profound technological revolution. We can expect its tempo to accelerate in the years ahead.

The illiterate, the undereducated, the unskilled will face ever-diminishing job opportunities.

Second, our minority group citizens—particularly the Negro and the Mexican-American—are victimized disproportionately by the new technology. Too many of these citizens—unskilled, undereducated and offered too little motivation—cannot compete equally in today's job market.

Our challenge is to compensate for a century of discrimination and disadvantage in a desperately short period of time

Third, while we expect no precipitous decline in the level of federal spending in our State for defense and space purposes, we cannot expect the heretofore steady expansion of these activities to continue. There may well be some decline

Our task is to promote the development and diversification of industry in the nondefense sector.

The battle against poverty and unemployment will not be won overnight. Nor will it be won this year. Indeed, we must be prepared to suffer setbacks and temporary losses before the tide is turned.

Nor can we win it alone. We must bring state policy to bear with deliberate force on our economic problems, but state policy alone will fall short of what is needed.

The business community, industry groups, labor unions and the Federal Government must be our allies.

I am confident that together we can realize our goals. These are my recommendations.

Economic Growth

We must launch more energetic and better coordinated programs to attract industry to our State, to promote the diversification of defense-oriented industries, to expand our foreign trade and promote tourism

California is the number one state in industrial expansion. We created 189,000 new jobs last year, while the second largest state, New York, suffered a slight decline in total employment.

We are the Nation's leading world trade state with an annual export-import volume of about \$2.7 billion.

Annual spending by out-of-state tourists in California has been estimated at \$1 billion a year.

These figures are impressive, but they should be more impressive still. It is clear that we are not realizing our potential. Our efforts are falling behind those of our sister states.

We rank last among the industrial states in terms of budget and personnel for industrial development. Indeed, we are nearly last among all the states. Our efforts are being outstripped by such states with less economic advantages as Alabama, Louisiana, Oklahoma and Kansas.

While other states are becoming more aggressive in their pursuit of new industry and tourist spending, California by comparison is standing still.

Separate agencies presently administer industrial development and trade promotion programs. And we have no state activity whatever in the field of tourist promotion. We ignore the inter-relationships among these three areas of economic development at our peril.

Accordingly, I have recommended that the Legislature create an Office of California Development to direct statewide programs to stimulate industrial development and diversification, expand our exports and promote tourism.

The office would consolidate the activities of present agencies in the field and add a program of tourism and visitor services.

Our efforts must be on a competitive basis. The competition is keen. The stakes are high. And the need is urgent.

Education and Job Training

California's high level of investment in education over the years has paid impressive dividends. It is the key to our economic advance. It has put California in the vanguard of today's defense-space-electronics technology. It is the single most important reason why California has the performance capabilities to attract one-quarter of the Nation's prime defense contracts and half of all research and development contracts awarded by the National Aeronautics and Space Administration.

Our educational system has produced the ability to launch man into outer space. But it has passed thousands of our citizens by.

Too many of our unemployed, many of them from other states with less investment in education, are functionally illiterate. Nearly half of our unemployment insurance claimants are from the unskilled and semiskilled categories.

Our statewide high school drop-out rate is estimated at a shocking 25 percent. In some areas the rate is 30 percent and higher. Roughly half of our population over 25 has not completed high school.

The mere creation of jobs will not solve our unemployment problems. Our people must have the educational and skill capabilities to fill the jobs.

In 1963 we created the first state compensatory education program with a modest appropriation. Preliminary results indicate that the program is making dramatic progress in combatting drop-outs.

But we have a long way to go, and we must attack the skill-education problem on a number of fronts

Most important, we must re-examine our approach to vocational education. Our efforts are falling frighteningly short of what is needed. And the Federal Government must significantly step up aid to education and its training programs for unskilled youths and unschooled adults

President Johnson has signed legislation expanding programs in both categories, but a much more energetic effort—one beyond the financial resources of the states—must ultimately be made

The impact of federal efforts in this regard is magnified in California because of our spectacular and continuing population growth

We are growing by more than 600,000 a year, more than half this number through migration from other states

Thus, we inherit from our sister states the results either of educational excellence or educational neglect, of tolerance or discrimination, high skill competence or low

The process compounds the task of our educational system and our planners

The structure of today's unemployment and the portents for the future pose fundamental challenges to our educational system, to government at all levels, to industry and to labor

Together we must equip our people with the education and the skills for useful and sustained employment.

Industry and labor must be prepared to build in some of the costs of training and retraining. The hard-pressed public dollar will not be able to absorb the entire cost.

Our training program under the Manpower Development and Training Act will not be paid for entirely out of federal funds after July 1, 1965. If we are to continue this valuable program after that date we will have to provide one-third of the costs out of state funds.

We have more than 23,700 apprentices in training in California. But we could and should be training four times as many. Labor and management, in their own self-interest and in the interest of the economy, must make greater efforts in this program.

We must view education as a continuing process if our workers are to keep pace with technological developments and remain in the work force.

We must get used to the idea that the day may be disappearing when a young man or woman can confidently choose a single skill as a lifetime work.

Any given skill may be rendered obsolete almost overnight by a new machine or a new process. Tomorrow's worker must be prepared to develop a second, even a third skill if he is to remain employed.

We are rich enough and skilled enough to remove illiteracy from our Nation. If we can equip an astronaut to survive in space, certainly we can equip all our people to survive as productive members of society.

Equal Opportunity

We have made notable progress in human rights. We have enacted the legal framework for full equality of opportunity, and I am recommending no further state legislation in this field at this time.

The task that remains is the preservation and implementation of our present laws. Until this is accomplished, the Negro, the Mexican-American and other minority group members will be barred from the benefits of our economic advance.

Equally important is enactment of meaningful federal civil rights legislation by the current Congress. More than any other state, California, with its heavy immigration, is a reflection of the Nation. The impact of injustice anywhere in the land is felt ultimately in California.

Until we have true equality of opportunity, we will be faced by statistics like these:

- An unemployment rate for nonwhites twice that for whites.
- Eighty percent of our employed Negro population in semiskilled, unskilled, service and farm occupations.
- A mere eight percent of the nonwhite work force (aside from agriculture) in professional or managerial occupations.
- Seventy-five percent of the nonwhite population over age 25 without a high school diploma and more than one-third of these without an eighth grade education.

If the full potential of our manpower resources is to be realized, we must truly end discrimination and disadvantage whether in education, in jobs or in housing.

The retention of the Rumford Fair Housing Act is as important to our economy as it is to our sense of justice.

It will stimulate demand for new housing and lead to the overdue destruction of our trap ghettos, the costly breeding grounds of crime, illiteracy, poverty and hopelessness.

But more than this, it can break the heartbreaking cycle of discrimination. Desegregated housing means an end to de facto segregation in our schools. It means better opportunities in education. And education is the certain key to full participation in our economy.

Taxation

I said in my budget message that our present tax structure at the city, county and state levels is an anachronism, based on realities that existed decades ago, but exist no longer.

Committees in both houses of the Legislature are now engaged in important tax studies aimed at modernizing our tax structure and removing inequities.

I also said in my budget message that I would not attempt to prejudge those studies by premature recommendations of my own. But I would suggest that our tax policies can have a powerful effect on our economy. These are some of the issues that need resolving:

The proper taxation of business inventories; elimination of relatively untaxed islands of wealth and the resulting relief of the tax burden elsewhere; equitable treatment of household property, and the abuse of tax exemptions; elimination of tax erasions by enactment of such administrative measures as the withholding tax; and conformity with federal tax laws consistent with the state's responsibility to determine its basic tax policy.

As a result of your studies, we should be in a position to proceed realistically on tax problems at the beginning of the 1965 general session.

But we are faced today with a critical problem in the financing of public schools—a problem that bears heavily on unemployment and one on which we cannot afford to defer action.

I refer to the inequities in our school district tax pattern. Our present method of financing places an unfair burden on the property owners in most of our school districts. Because of relatively narrow tax bases, these taxpayers are assessed three and four times as much for school support as those in the remaining, wealthier districts. Still they fall short of providing full equality in educational facilities.

To eliminate this inequity I have recommended a program of countywide tax equalization or a variation of this plan that would accomplish meaningful reform.

Such a plan would ensure that islands of assessed wealth contribute their fair share to the cost of public education. It would close the gaps in the quality of our educational facilities and work to eliminate pockets of second class education.

It is in these pockets, these districts, that the level of instruction is lowest, the classrooms largest, the counseling facilities weakest and the drop-out rates highest. These are the districts that spawn too many of our unemployed.

The need for reform is urgent.

Housing

No report on the economy or on unemployment can ignore poverty and its crippling consequences.

The data that follow sketch a hard profile of both. Perhaps the most dramatic are the statistics on housing. They include these:

- Some 700,000 California dwellings, or about 13 1/2 percent of the total, lack plumbing facilities or are so decayed that they fail to measure up to federal standards as "sound" housing.

- Nearly 400,000 Californians are forced to pay 35 percent or more of their income for rent because the supply of low cost housing is too limited to meet the demand.

- Nearly 65 percent of the dwellings occupied by domestic field workers in a six community survey were found to be dilapidated or deteriorated.

- More than 80 percent of farm worker families in the same areas lived in dwellings which violate standards of health, safety and comfort; pit privies still served 33 percent of the dwellings occupied by the field workers.

In addition:

- One-third of the families in Los Angeles and San Francisco do not earn enough to buy the lowest priced houses on the California market. If present trends continue, their ability to pay will go down, not up. The cost of living in general has risen 23 percent since 1950. The cost of housing has risen 42 percent.

- More than 60 percent of California's elderly couples, widows and widowers live on incomes of \$2,000 a year or less. The rents they can pay are meager and so are the quarters their rent payments buy.

With conditions like these, we can take little comfort in the fact that we are ahead of the other states, that the quality of California housing is unequalled in the Nation.

The task ahead in housing is so gigantic that it is beyond the resources of any state. We are not participating fully in existing federal programs. And the total federal effort is inadequate to California's needs and largely irrelevant to its situation.

We need new tools and new techniques for land development and housing of all kinds to serve the needs of the future. We urgently need a focus for solving our housing problems.

Accordingly I have asked the Legislature to create a state Office of Housing and Community Development to promote, develop and coordinate programs which will expand the supply of decent housing available to all Californians.

The office should spearhead efforts to fully assess California's housing needs and to bring federal and state programs more in line with those needs.

Its immediate emphasis should be on housing for migrant farm workers as the bracero program comes to an end.

Defense and Diversification

California can implement the recommendations I have outlined and more. We are a large State and a wealthy one. But the main effort must come from the Federal Government. We can supplement federal policy, but we cannot supplant it. Nowhere is this more evident than in the area of federal defense spending.

I have consistently pressed California's position on matters of federal defense policy that vitally concern us before the Congress, the Cabinet and the President. Among my recommendations have been these:

- An immediate step-up in the retraining programs of the Manpower Development and Training Act with special emphasis on new skills for the defense worker displaced by contract phaseouts or automation.

- Creation of a program of subsidies to employers for retraining on the job.
- Payment of moving costs where necessary for unemployed defense workers.
- Hardship grants to hard-hit state and local governments for industrial development planning.

All of these are important. But the fundamental fact is that the Federal Government must address itself more directly to the problems created by its own shifting procurement patterns.

I support President Johnson's policy of defense cost-cutting wherever consistent with a strong defense posture. I support the policy when it is applied to other states and when it is applied to our own.

Defense contract cancellations mean layoffs and economic dislocations. The cancellation of the Skybolt project last year, for example, ended thousands of jobs.

The difficulties of dealing with these dislocations are great. But the policy is right.

We must, in cooperation with federal authorities, find better ways of repairing local economic disruptions.

We must have early warning on contract phaseouts, the closing of federal installations and on broad procurement policy shifts. Even more important, we need a deliberate federal policy to offset reductions in defense investment with investments to meet the vast unmet social needs of our State and Nation.

If we need less rockets, we need more recreation facilities. If Skybolt is phased out, schools should be phased in. If we can do with less military hardware, we can do with more mental hygiene.

California is making massive and magnificent efforts in education and in providing a wide range of vital public projects for our citizens. But our financial resources now fall short of what is required.

The list of unmet public needs in our State is staggering.

Nearly 200 public works projects to conserve and develop our natural resources should be started immediately. But the price tag is \$1.77 billion, and the funds are not available.

Immediate construction needs at the University of California and the state college system total \$928.67 million. Against this expenditure need we have only \$36 million of unexpended bond funds available.

Except for funds we could accelerate our state highway system construction by starting badly needed projects amounting to \$745.9 million.

We could begin construction of a southern crossing of San Francisco Bay for \$200 million and for a needed San Diego-Coronado Bridge for \$30 million. But we lack the financial resources.

We have an immediate and pressing need for \$63.6 million for mental health facilities and \$205.5 million for rehabilitation and correctional facilities.

Our hard-pressed county and city governments face similar pressures. A Department of Finance survey in just 17 metropolitan area counties tentatively pin-pointed 166 local projects for which the need is urgent and for which finances are lacking—projects for hospital facilities, drainage and flood control, rehabilitation centers, park and recreation developments.

These are just some of our immediate needs. We will have 1,700 more Californians tomorrow than we have today. And the need for these facilities and services will be correspondingly greater. Private industry will not, cannot provide them. Only government can—and should.

The number and urgency of our needs point up the hard problems of public finance. We can meet our public needs only if:

- Government makes efficient use of its revenues and maximizes the return from its revenue sources.
- Industry makes new technological breakthroughs—not merely to produce better potato mashers, power wheel-barrrows and electric toothbrushes—but to serve far-reaching social needs. There is a pressing need for more efficient and less expensive urban transit system, new building products and techniques to help solve the low-cost housing problem and a wide range of other urgent matters before us.
- The international climate permits some shift of federal funds from defense to public projects.

On balance, there is every reason for confidence in California's economic future. Side by side are surplus labor and unmet social needs. We must find the means to fit one to the other, to make the social good and the economic good coincide.

We can be confident because our high level of education and technological capability—tested and proven in the crucible of the Space Age—is our insurance for the future.

It is our greatest economic asset and it gives California an assured head start.

We are linked to the technology of the future more surely than any other state. We have the capacity to diversify. And we have the professionals with the technical know-how to adapt.

The same ingredients that have made California the leader in today's space-defense economy will make us the leader in tomorrow's economy, too, whatever shape it takes.

Finally, we can be confident because new economic frontiers remain to be conquered—limitless frontiers in outer space and inner space and under the sea.

California will play a large role in pushing these frontiers back. It is the theme of our economic history.

Gold gave us our start and agriculture, movies, petroleum and the tourist trade played important roles in the earlier years. They still do.

Today aerospace and defense dominate the economy. We can scarcely guess at the new technologies that will shape our future development.

California historically has proven its economic flexibility, its adaptability to fast-changing events.

We proved the prophets of doom to be wrong after World War II, after Korea and after the virtual sudden death of manned aircraft procurement in the late 1950's.

Tomorrow's economic shifts may be swifter and infinitely more complex than any we have witnessed. But I am confident that California's adaptable economy—if we shape it with energy, imagination and dedication—can not only survive them but reach new plateaus of prosperity for all our citizens.

Respectfully presented,

EDMUND G. BROWN, Governor

PRAYER

The following prayer was offered by Rev Michael Anderson, Minister to Students of Fremont Presbyterian Church

O God, We would have the audacity to pray that our meat and drink is to do Thy will For in the profusion of man's conflicting methods to save the world, and himself, from destruction and alienation, we are left with nothing, but to ask of Thee

When all else has been propounded, attempted and excused, and hope without substance is our foundation, and confused ends our goal, may we become adept in the art of listening, in the gentle stillness to hear Thy strong voice.

If we understand it is Thy will that we are to serve, may we do that creatively, or to love, that completely, or to give, that unreservedly.

Our wills are ours to make them Thine

In Christ's Name—AMEN.

PRAYER

The following prayer was offered by the Chaplain, Rev. Robert R. Ferguson.

O Lord, Our God, At the outset of another day, we pause to ask for Thy guidance upon the routine and novel matters facing us this day.

We confess we like to be sophisticated in the ways of man, but that we are naive in the ways of God. The qualities which the New Testament sets before us to emulate—love, joy, peace, long-suffering, gentleness, meekness, temperance, truth—many question. Yet may we ask how durable are our alternatives.

May we be certain of the ground of our being so we may stand with confidence in the changing tempos of life.

In our Lord's Name —AMEN.

REQUEST FOR UNANIMOUS CONSENT TO PRINT IN JOURNAL

Mr. Porter was granted unanimous consent that the following opinion of the Legislative Counsel be printed in the Journal

OPINION OF LEGISLATIVE COUNSEL

State of California
Office of Legislative Counsel
Sacramento, March 2, 1964

Hon. Carley V. Porter
Assembly Chamber

Water Rights—No. 2934

Dear Mr. Porter:

Question

If S.1275 presently before the United States Congress is enacted as introduced, could the federal 160 acre limitation be abrogated by state law

Opinion

In our opinion the enactment of S 1275 would not negate the application of the federal 160 acre limitation

Analysis

Subdivision (3) of Section 1 of S 1275 reads as follows

“Any right claimed by the United States to the beneficial diversion, storage, distribution, or consumptive use of water under the laws of any State shall be initiated and perfected in accordance with the procedure established by the laws of that State”

The federal 160 acre limitation is contained in Section 5 of the Reclamation Act of 1902 (43 U.S.C. 431) and reads as follows:

“No right to the use of water for land in private ownership shall be sold for a tract exceeding 160 acres to any one landowner . . .”

In our opinion the quoted language of S 1275 relates to procedures by which the federal government may perfect certain water rights which it claims. On the other hand the 160 acre limitation relates to the operation of federal projects.

The question presented here is similar to one presented in the case of *Ivanhoe Irrigation District v. McCracken* (1958) 357 U.S. 275, 2 L. Ed 2d 1313. It was there contended that state law rather than the federal 160 acre limitation was applicable to contracts whereby the federal government was to furnish water from federal reclamation projects. The contention was based on Section 8 of the Reclamation Act of 1902 (43 U.S.C. 383) which provided that the act is not to be construed as interfering with state laws "relating to the control, appropriation, use or distribution of water used in irrigation."

The Supreme Court rejected the contention that Section 8 made Section 5 inapplicable. The court stated at 2 L. Ed 2d 1325: "As we see it, the authority to impose the conditions of the contracts here comes from the power of the Congress to condition the use of federal funds, works and projects in compliance with reasonable requirements." The court further stated "As we read Section 8, it merely requires the United States to comply with state law when in the construction and operation of a reclamation project, it becomes necessary for it to acquire water rights or vested interests therein. But the acquisition of water rights must not be confused with the operation of federal projects" (2 L. Ed. 2d 1325). We believe that subdivision (3) of Section 1 of S 1275, like Section 8 of the Reclamation Act of 1902, relates to the acquisition of water rights and would not be construed to overrule the long existing policy of the federal reclamation program with respect to the 160 acre limitation.

Very truly yours,

A C MORRISON, Legislative Counsel

House Resolution No. 46

Relative to congratulating Bobby Darin

WHEREAS, Bobby Darin has just been made "Heart Ambassador" of the American Heart Association, one of the highest honors that the Heart Association bestows, and

WHEREAS, This award carries not only distinction but the assumption of a great responsibility which Bobby Darin discharged with characteristic verve and energy with many public appearances during February—"Heart Month"—of this year; and

WHEREAS, Bobby's work for the Heart Association did not just begin but has been his principle charitable activity for several years—in the past four years he was designated "King of Hearts" in recognition of his tireless efforts to bring this number one killer—heart disease—under control, and

WHEREAS, His work in this effort springs from more than a general charitable inclination—he was the victim of four separate attacks of rheumatic fever as a young boy and he well remembers the loneliness, fear and despair of the child disabled by heart disease—his recovery, now complete, was the result of advances in medical knowledge about heart ailments made possible by public contributions to the Heart Fund Drive; now, therefore, be it

Resolved by the Assembly of the State of California, That the Members extend their warmest congratulations to Bobby Darin on the occasion of this award and, on behalf of the people of this State, express their heartfelt appreciation for his efforts in furthering the work of the American Heart Association; and be it further

Resolved, That the Chief Clerk of the Assembly is hereby directed to transmit a suitably prepared copy of this resolution to Mr. Darin.

House Resolution No. 55

Relative to social welfare needs of seasonal farm labor

WHEREAS, It appears that the program for importation of Mexican Nationals (Braceros) for seasonal farm labor in California will be terminated on December 31, 1964, and that it will probably be necessary to expand and develop the domestic supply of seasonal farm labor in order to harvest California's agricultural crops, and

WHEREAS, It appears that existing social welfare programs in California may be inadequate because of the social welfare problems likely to result from a greater number of migrant farm labor families, now, therefore, be it

Resolved by the Assembly of the State of California, That the Assembly Committee on Rules is requested to assign to an appropriate interim committee for study the subject of, the social welfare needs likely to result because of a greater volume of migrant farm labor families, the impact on existing social welfare programs in California by reason of a greater number of migrant farm labor families engaged in the harvest of seasonal crops in California, and the need for further legislation, if any, in the field of social welfare as related to the problems resulting from the greater numbers of migrant farm labor in the harvesting of California seasonal agricultural crops, and to direct such committee to report thereon to the Assembly not later than the fifth legislative day of the 1965 Regular Session of the Legislature

Resolved by the Assembly of the State of California, That the Assembly Committee on Rules is requested to assign to an appropriate interim committee for study

the subject of California's seasonal farm labor needs and how those seasonal farm labor needs may best be fulfilled after termination of the Mexican National (Bracero) Program, expected December 31, 1964.

MESSAGES FROM THE GOVERNOR

The following message from the Governor was received:

State of California
Governor's Office
Sacramento, March 4, 1964

To the Members of the Assembly, California State Legislature.

Last January 8 in a statement before the Assembly Judiciary Committee, I said that I planned to follow its hearings on California's domestic relations law very closely with a view to possibly asking that you expand this committee study to include a Citizens' Advisory Committee composed of judges, lawyers, clergymen, sociologists and psychologists.

I said at that time that it appeared that divorce, with its tragic by-products of crime, alcoholism, and dependency upon the state, is an ever growing problem in California. The testimony offered at your Judiciary Committee hearings certainly supports that premise.

I am therefore asking the Assembly to take steps to expand the Judiciary Committee's study.

I believe members of your Judiciary Committee will agree with me that, although there is apparent need for change in our divorce laws, we should not act hastily. Before we can intelligently recommend change, we must first have serious and purposeful investigation into the declining stature of the married state.

In reviewing testimony given before the committee, and in private conversations with judges and lawyers, with sociologists and educators, I find general agreement that we lack a reliable body of knowledge of the forces that are at work in the field of domestic relations.

Statistics developed before your Judiciary Committee seem to show clearly how divorce erodes the very foundation of our society—the family. The statistics indicate

that some 75 percent of our juvenile delinquents and more than 50 percent of the inmates of our penal institutions come from broken homes.

These are shocking statistics. They tell of an erosion of our precepts and institutions which are so dependent on the endurance, stability and sanctity of the home.

Consider them in another light—the drain on our dollar resources. A four-year prison term costs the taxpayers of California three times more than it does to educate a child through four years of high school.

Add to this the cost of welfare aid to child victims of broken marriages. In 1962 we spent \$192.5 million on aid to needy children, most of which can be directly traced to our growing divorce rate.

The dollar cost of divorce—apart from legal fees, alimony, child support and court costs—is overwhelming.

I know that for you, elected representatives, hardly a day goes by without complaints about the cost of welfare, mental health, and school dropouts and their cumulative effect on our society. I get these too. We form commissions and councils to investigate these social problems, but we investigate them for the most part as individual problems. Not enough is known about the basic causes of dependency of which these problems are but by-products.

There are no easy answers. That is an inescapable fact. I believe that for the health, sanity, and future of our society we must undertake the monumental task of seeking answers to these pressing problems.

What the Judiciary Committee has done thus far is just a beginning. A great deal of research is necessary before the Legislature can enact laws in this delicate and personal area of human relations.

Neither the husband nor the wife, as parties to a divorce, are the most damaged of the many victims. The most damaged are their children, this state's, this nation's future. Seven million American youngsters under the age of 18 live in one-parent homes. What is their future?

For too many of them, it is one of quitting school, wandering our streets and ending up in our juvenile halls. For others, it is the beginning of the path to a cell in one of our penal institutions. To others, deprived of love, firm guidance and understanding, it is but a way to a life of continual insecurity. In some cases, it leads to abject poverty and complete dependency upon the state for minimal survival.

If our concern here is truly to build a better, more stable society, we have an inescapable duty to make a serious inquiry into this festering social problem.

Great civilizations have faltered and ultimately perished and vanished from the earth through moral decadence. These were civilizations without our capacity to communicate. We must utilize our talents and facilities to probe and expose the core of this growing social problem.

I urge you to take the steps available to you to undertake this research.

Sincerely,

EDMUND G. BROWN, Governor

The following prayer was offered by the Chaplain, Rev. Robert R. Ferguson:

O Thou Who Dost Possess All Wisdom and Compassion, As our minds reflect for a moment upon the areas of world tension which are so potentially explosive, as we think of national problems and our state decisions, we can pray, as the Gloucester fisherman of old, "Lord help us, the sea is so vast and our boats so small"—yet we have boats;

Gave to all of us courage to face the waves of life, an adequate compass of truth and righteousness by which we chart our course, and steadfastness of purpose so that we do not become frustrated and settle for lower and safer harbors, when we can do no less than desire equality for all peoples and courageously strive to know Thy Will and then do it —AMEN

PRAYER

The following prayer was offered by the Chaplain, Rev Robert R Ferguson :

God our Creator, May we have the insight in the realm of thought and for our analysis of social problems that the physical scientist had when he said "sit down before a fact as a little child, be prepared to give up every preconceived notion, follow humbly wheresoever and to whatever abysses nature leads, or you shall learn nothing"

We confess our minds are often closed so we don't want to be confused by the evidence. Wilt Thou enable light to break through our prejudices so that we may arrive at just and accurate conclusions, and others may never suffer because of our biases

We pray in our Master's name.—AMEN.

WHEREAS, This award carries not only distinction but the assumption of a great responsibility which Bobby Darin discharged with characteristic verve and energy with many public appearances during February—"Heart Month"—of this year, and

WHEREAS, Bobby's work for the Heart Association did not just begin but has been his principal charitable activity for several years—in the past four years he was designated "King of Hearts" in recognition of his tireless efforts to bring this number one killer—heart disease—under control, and

WHEREAS, His work in this effort springs from more than a general charitable inclination—he was the victim of four separate attacks of rheumatic fever as a young boy and he well remembers the loneliness, fear and despair of the child disabled by heart disease—his recovery, now complete, was the result of advances in medical knowledge about heart ailments made possible by public contributions to the Heart Fund Drive; now, therefore, be it

Resolved by the Assembly of the State of California. That the Members extend their warmest congratulations to Bobby Darin on the occasion of this award and, on behalf of the people of this State, express their heartfelt appreciation for his efforts in furthering the work of the American Heart Association, and be it further

House Resolution No. 21, as Amended

By Assemblyman Britschgi

House Resolution No. 21

Memorializing Congress relative to the Stanford Linear Accelerator Power Lines

WHEREAS, The Atomic Energy Commission proposes to condemn land for construction of a 220,000 volt power line from Skyline Ridge to the Stanford Linear Accelerator, a distance of six miles through San Mateo County; and

WHEREAS, This power line will slash through and inflict irreparable damage to a unique and beautiful area which Californians have been privileged to enjoy for many generations and which should be preserved for generations to come; and

WHEREAS, The Pacific Gas and Electric Company has applied to the city and county governments involved for permits for such construction, which were denied in the belief that such a line should be underground to preserve scenic and property values; and

WHEREAS, According to the prior understandings the Atomic Energy Commission planned to make use of existing power lines in the area, and the new line represents a change of intention by Pacific Gas and Electric Company and the Atomic Energy Commission; and

WHEREAS, The additional cost of placing the power lines underground as requested by the people and governmental entities involved is only a small fraction of the total cost of the total project; and

WHEREAS, The cost in terms of permanent damage to the terrain and its enjoyment by people born and unborn is incalculable since the three cities, Woodside, Los Altos Hills, and Monte Sereno, most vitally affected were incorporated solely to preserve the scenic beauty of the area, and the community of Portola Valley is presently seeking incorporation status for a similar purpose; and

WHEREAS, The area at the west end of the accelerator is traversed by a large number of hiking and riding trails created and maintained by both public and private groups, a recreation facility pioneered by San Mateo County and formalized by a 1963 Act of the California Legislature; and

WHEREAS, Within a mile of the accelerator passes the trail followed by Gaspar de Portola in 1769, and other splendid historic sites and recreational facilities lie in this area; and

WHEREAS, All parties have indicated the reasonableness of having the accelerator and its supporting facilities conform to the admitted aesthetic beauties of the landscape; and

WHEREAS, 220 KV is the highest voltage now in existence in California, and it is reasonable that such a facility should be placed underground, and that the cost of this should be borne by the Atomic Energy Commission as part of the cost of the project; now, therefore, be it

Resolved by the Assembly of the State of California, That the Congress of the United States and the Joint Committee of the Congress on Atomic Energy is hereby memorialized by this body to request the Atomic Energy Commission to change this short-sighted policy, and to incorporate underground power lines into the plans for its Stanford Linear Accelerator.

Resolution, as amended, ordered to the Consent Calendar.

Resolved by the Assembly of the State of California, That the Members commend Mrs. Vera Warner for her reaction in such a tragic emergency, for her expert assistance to law enforcement officers to enable them to make a speedy apprehension of the person involved, and for the responsibility she assumed in aiding the police and in performing beyond the call of civic duty; and be it further

House Resolution No. 71

Relative to the Antelope Valley-East Kern Water Agency

WHEREAS, The Antelope Valley-East Kern Water Agency was created by the Legislature in 1959 so that the areas within the agency might contract for and receive water from the Feather River Project, and

WHEREAS, The agency was established without a vote of the people residing within its boundaries, and

WHEREAS, The Kern County Water Agency Act was passed by the Legislature in 1961, and

WHEREAS, The Kern County Water Agency was established by a vote of the people in Kern County on September 26, 1961, and

WHEREAS, The Kern County Water Agency includes the Kern County area of the Antelope Valley-East Kern Water Agency, and

WHEREAS, The Kern County Water Agency levies a tax for administrative purposes on all the property in Kern County, including the Kern County area within the Antelope Valley-East Kern Water Agency, and

WHEREAS, The Antelope Valley-East Kern Water Agency levies a tax for all the purposes of the agency on all the property in the agency, including the Kern County area of the agency; and

House Resolution No. 72

Relative to an interim study of cost sharing in public assistance programs

WHEREAS, The law now fixes a different cost-sharing ratio for the State and counties in each public assistance program, and there is no uniformity in the state and county shares of public assistance grants; and

WHEREAS, The State, at present, does not contribute toward the cost of administering public assistance programs, so that the full impact of administrative costs falls on the counties and federal government; and

WHEREAS, There is evidence that if a uniform cost-sharing formula could be devised, covering all public assistance programs, and possibly also covering the cost of administration, there would be an increase in efficiency in the administration of welfare funds and an equalization of the financial obligations of the respective counties; and

WHEREAS, Attempts were made in 1963 to devise a uniform cost-sharing formula, such as the one proposed in Assembly Bill 2539 of 1963, but the Legislature found that the matter was in need of further study; now, therefore, be it

Resolved by the Assembly of the State of California, That the Assembly Committee on Rules is directed to assign to an appropriate interim committee for study the subject of cost sharing in public assistance programs, and to direct such interim committee to report its findings and recommendations to the Legislature by the fifth legislative day of the 1965 Regular Session.

Eternal God, At the outset of this day, the day of St. Patrick, in this moment of prayer, may we look inward. As Christ said, how can we take the splinter out of the eye of another if we have a plank in our own

May we look upward As an artist said, "If I get my sky into my picture, the rest falls into its rightful relation" Thou art the sky and the ground of our being, may we look to Thee

May we look outward Thou hast created us not for solitude, but for community May our brothers come within the scope and horizon of our concerns, for only as we bear one another's burdens, do we fulfill Thy law.

In our Master's Name —AMEN

RESOLUTIONS

The following resolutions were offered:

By Assemblyman Petris:

House Resolution No. 74

Relative to an interim study of commitments to the California Youth Authority

WHEREAS, Twenty years have passed since the Legislature established the Department of the California Youth Authority and during this period the daily population in its facilities has increased by 293 5 percent while the civilian population in the State increased only 97 6 percent, and

WHEREAS, After five years of a relatively constant juvenile court commitment rate between 159 and 165 per 100,000 population in the 10- to 17-year-old age group, the rate of new commitments rapidly increased beginning in February, 1963, and continued at the level of 174 per 100,000 throughout the year; and

WHEREAS, This unforeseen increase in new juvenile court commitments to the Youth Authority has caused overcrowding and accelerated its need for more facilities and an expansion of its programs; and

WHEREAS, In the period from 1943 to 1944, counties paid 24.2 percent of the total cost of care for wards committed to the Youth Authority but this percentage declined to 5 7 during the period from 1962 to 1963; and

WHEREAS, The number of admissions estimated by Youth Authority officials for the 1964-65 fiscal year over the population estimate used for the 1964-65 Governor's Budget could require alternative programs to accommodate 729 boys; and

WHEREAS, A series of new programs and program expansions as alternatives to institutionalization of Youth Authority wards, even with a continuation of present overcrowding in these institutions, could result in an increase in the Governor's Budget of \$972,857, according to Youth Authority estimates; and

WHEREAS, Expansion of county-operated facilities for juvenile delinquents has not matched the rate of increase in the number of juvenile offenders referred to the courts for adjudication, and

WHEREAS, Special efforts should be made to develop workable criteria that would be applicable to juvenile court commitments to the Youth Authority, and an equitable subvention program should be worked out to encourage counties to retain a greater percentage of delinquents in adequate local ranch camps and homes; and

WHEREAS, In the 13 years from 1943 through 1956, counties increased their bed capacity for delinquents by only 569 beds but, after the Legislature provided in 1957 for a maximum payment to counties of \$3,000 per bed for construction of new or additions to existing county facilities for the care of juvenile offenders, counties increased their bed capacity by 1,859 beds in the next five years, and

WHEREAS, Despite new program concepts and increases in treatment staff, there has been no appreciable improvement in the overall parole performance of Youth Authority wards and one theory under current study is that certain juveniles are not improved but actually retarded in their rehabilitation by placement in an institution; now, therefore, be it

Resolved by the Assembly of the State of California, That the Committee on Rules is directed to assign the subject matter of this resolution to an appropriate interim committee for study of the problems contained therein, and the laws relating thereto, and to report its findings, together with its recommendations for needed legislation, to this Assembly by the fifth legislative day of the 1965 Regular Session

Resolution read, and referred by the Speaker to the Committee on Rules.

By Assemblyman Petris:

House Resolution No. 75

Relative to a study relating to drugs

Resolved by the Assembly of the State of California, That the Assembly Committee on Rules is directed to refer for study to an appropriate interim committee the subject of the use, and financing of the use, of drugs in state institutions and other facilities supported by state funds, and that such interim committee shall report its findings and recommendations to the Assembly no later than the fifth legislative day of the 1965 Regular Session.

Resolution read, and referred by the Speaker to the Committee on Rules.

By Assemblyman Unruh:

House Resolution No. 76

Relative to a state park or recreation area site in the Santa Monica Mountains

WHEREAS, There is a definite need for public facilities to serve the millions of people in Southern California seeking outdoor areas for recreation purposes; and

WHEREAS, Very scenic portions of the Santa Monica Mountains are still unurbanized and undeveloped and, therefore, available for park and recreation purposes; and

WHEREAS, The Santa Monica Mountains can be expected to become rapidly urbanized as the population of Southern California increases; and

WHEREAS, The Cameron-Unruh Beach, Park, Recreational, and Historical Facilities Bond Act of 1964, which is to be submitted to the people for their ratification at the November 1964 General Election, provides for expenditures of \$150,000,000 for acquiring and developing state and regional beach, park, recreational and historical facilities; and

WHEREAS, Section 5096 18 of the Public Resources Code, which is included within that act, requires that projects involving state funds be originated by legislative resolution; and

WHEREAS, Failure to initiate project studies prior to the adoption by the people of the Cameron-Unruh Beach, Park, Recreational, and Historical Facilities Bond Act of 1964 will result in the delay of one year on the legislative approval of these projects; now, therefore, be it

Resolved by the Assembly of the State of California, That the Department of Parks and Recreation is requested to undertake a study to determine the feasibility of the establishment of a state park or recreation area in the Santa Monica Mountains and to comply with the provisions of the Cameron-Unruh Beach, Park, Recreation and Historical Facilities Bond Act of 1964, and to report the results of such study to the Assembly not later than the fifth legislative day of the 1965 Regular Session; and be it further

Resolved, That the Chief Clerk of the Assembly be directed to transmit a copy of this resolution to the Director of Parks and Recreation.

PRAYER

The following prayer was offered by the Chaplain, Rev. Robert R. Ferguson:

"O God our help in ages past, our hopes for years to come; our shelter from the stormy blast and our eternal home" Guide us this day in our deliberations As we face delicate problems and explosive situations, may we not look upon these with detachment, but see our own personal involvement in helping to create some of the problems we are trying to solve

May we not have the naiveté of Pilate who ceremoniously washed his hands of responsibility. We confess our own part in allowing some of these problems to exist and thus give us added incentive in seeking a solution.

We pray in His name—AMEN.

God Our Father, Help us more clearly to see that carrying a cross does not mean merely accepting some difficult situation and bearing it passively. Rather it is actively choosing the difficult and unpopular and creatively bearing causes which could have been avoided.

May we have courage and vision to choose what is excellent in principle, rather than what is politically expedient, for that which is morally right, rather than socially acceptable

May we not waver when conscience causes us to set our face toward our spiritual Jerusalem

PRAYER

The following prayer was offered by the Chaplain, Rev. Robert R. Ferguson:

Eternal God, As we come to this season, holy to the religious faiths, help us to learn from the events which took place in the last week of His earthly ministry

There is a need for a common table open to all men of faith, that we should not shun the hard road of righteousness even if it leads to death; that we cannot

conscript a member of another race to bear the world's cross, and that hatred and alienation will only lead to more of the same; that, like Pilate, we cannot wash our hands of a difficult decision

We confess we fall into these categories and are part of the world's corporate guilt. Give us the grace to forgive others and ourselves and to follow the path of Him who gives to all who seek, a new life—AMEN

House Resolution No. 69

Relative to support of the South Coast Botanic Garden

WHEREAS, The County of Los Angeles has dedicated certain land as the South Coast Botanic Garden and wishes to establish therein a Botanic Garden and Hall of Horticulture for the growing and continuous display of live flowers and plants, and

WHEREAS, Assembly Bill No 2080 of the 1963 General Session was introduced to create Agricultural District No 53 and authorize it to construct and operate such a building, thereby qualifying the area for state financial assistance in construction of the Hall of Horticulture, now, therefore, be it

Resolved by the Assembly of the State of California, That the Assembly Committee on Rules is directed to assign to an appropriate interim committee for study the subject matter of providing state funds to assist the South Coast Botanic Garden in the construction of its Botanic Garden and Hall of Horticulture either by the creation of Agricultural District No 53 as provided in Assembly Bill No 2080, or by some other means, and to direct such interim committee to report its findings and recommendations to the Assembly no later than the fifth legislative day of the 1965 Regular Session of the Legislature

House Resolution No. 74—Relative to an interim study of commitments to the California Youth Authority

Resolution read.

Consideration of Committee Amendments

The following amendment, proposed by the Committee on Rules, was read, and adopted:

Amendment No. 1

In line 5 of the *Resolved* clause of the printed measure as printed on page 216 of the Assembly Journal for March 17, 1964, strike out "this", and insert "the".

House Resolution No. 74, as Amended

By Assemblyman Petris.

House Resolution No. 74

Relative to an interim study of commitments to the California Youth Authority

WHEREAS, Twenty years have passed since the Legislature established the Department of the California Youth Authority and during this period the daily population in its facilities has increased by 293 5 percent while the civilian population in the State increased only 97 6 percent, and

WHEREAS, After five years of a relatively constant juvenile court commitment rate between 159 and 165 per 100,000 population in the 10- to 17-year-old age group, the rate of new commitments rapidly increased beginning in February, 1963, and continued at the level of 174 per 100,000 throughout the year, and

WHEREAS, This unforeseen increase in new juvenile court commitments to the Youth Authority has caused overcrowding and accelerated its need for more facilities and an expansion of its programs, and

WHEREAS, In the period from 1943 to 1944, counties paid 24.2 percent of the total cost of care for wards committed to the Youth Authority but this percentage declined to 5.7 during the period from 1962 to 1963; and

WHEREAS, The number of admissions estimated by Youth Authority officials for the 1964-65 fiscal year over the population estimate used for the 1964-65 Governor's Budget could require alternative programs to accommodate 729 boys; and

WHEREAS, A series of new programs and program expansions as alternatives to institutionalization of Youth Authority wards, even with a continuation of present overcrowding in these institutions, could result in an increase in the Governor's Budget of \$972,857, according to Youth Authority estimates; and

WHEREAS, Expansion of county-operated facilities for juvenile delinquents has not matched the rate of increase in the number of juvenile offenders referred to the courts for adjudication; and

WHEREAS, Special efforts should be made to develop workable criteria that would be applicable to juvenile court commitments to the Youth Authority, and an equitable substitution program should be worked out to encourage counties to retain a greater percentage of delinquents in adequate local ranch camps and homes; and

WHEREAS, In the 13 years from 1943 through 1956, counties increased their bed capacity for delinquents by only 569 beds but, after the Legislature provided in 1957 for a maximum payment to counties of \$3,000 per bed for construction of new or additions to existing county facilities for the care of juvenile offenders, counties increased their bed capacity by 1,859 beds in the next five years; and

WHEREAS, Despite new program concepts and increases in treatment staff, there has been no appreciable improvement in the overall parole performance of Youth Authority wards and one theory under current study is that certain juveniles are not improved but actually retarded in their rehabilitation by placement in an institution, now, therefore, be it

Resolved by the Assembly of the State of California, That the Committee on Rules is directed to assign the subject matter of this resolution to an appropriate interim committee for study of the problems contained therein, and the laws relating thereto, and to report its findings, together with its recommendations for needed legislation, to the Assembly by the fifth legislative day of the 1965 Regular Session

Resolution, as amended, re-referred to Committee on Rules, and the subject matter referred to the Committee on Rules for assignment to the proper interim committee for study.

House Resolution No. 55—Relative to social welfare needs of seasonal farm labor

Resolution read.

Consideration of Committee Amendments

The following amendments, proposed by the Committee on Rules, were read, and adopted:

Amendment No. 1

In line 2 of the second WHEREAS clause of the printed measure as printed on page 163 of the Assembly Journal for March 9, 1964, strike out "will", and insert "may"

Amendment No. 2

In line 4 of the second WHEREAS clause, strike out "will", and insert "may".

Amendment No. 3

In line 3 of the *Resolved* clause, strike out the comma.

Consideration of House Resolution No. 55, as Amended

By Assemblyman Henson:

House Resolution No. 55

Relative to social welfare needs of seasonal farm labor

WHEREAS, It appears that the program for importation of Mexican Nationals (Braceros) for seasonal farm labor in California will be terminated on December 31, 1964, and that it will probably be necessary to expand and develop the domestic supply of seasonal farm labor in order to harvest California's agricultural crops; and

WHEREAS, It appears that the harvesting of seasonal agricultural crops solely by domestic farm labor may result in a greater number of migrant farm labor fami-

lies who will experience periods of unemployment by reason of the nature of seasonal crop harvesting, and whose social welfare needs may become a matter of concern for state and local government; and

WHEREAS, it appears that existing social welfare programs in California may be inadequate because of the social welfare problems likely to result from a greater number of migrant farm labor families; now, therefore, be it

Resolved by the Assembly of the State of California, That the Assembly Committee on Rules is requested to assign to an appropriate interim committee for study the subject of the social welfare needs likely to result because of a greater volume of migrant farm labor families, the impact on existing social welfare programs in California by reason of a greater number of migrant farm labor families engaged in the harvest of seasonal crops in California, and the need for further legislation, if any, in the field of social welfare as related to the problems resulting from the greater numbers of migrant farm labor in the harvesting of California seasonal agricultural crops, and to direct such committee to report thereon to the Assembly not later than the fifth legislative day of the 1965 Regular Session of the Legislature

Resolution, as amended, re-referred to the Committee on Rules, and the subject matter referred to the Committee on Rules for assignment to the proper interim committee for study.

REQUEST FOR UNANIMOUS CONSENT

Mr. Porter was granted unanimous consent that the following statement and Opinion of Legislative Counsel be printed in the Journal:

STATEMENT BY ASSEMBLYMAN CARLEY V. PORTER

to Assembly Ways and Means Committee on Amendment
to Item 275, Assembly Bill No. 1, March, 1964

On February 20, 1963 Assemblyman Lunardi's Assembly Concurrent Resolution No. 16 (Resolution Chapter 54) came before the Assembly Water Committee. This resolution provided that the Department of Water Resources was "requested to investigate all possible means of disposing of the hydroelectric power to be generated by Oroville Dam and Reservoir and related facilities, including, but not limited to, possible disposal to all agencies engaged in the transmission and distribution of electric power to the end that optimum benefits may accrue from the disposal of such hydroelectric power." It was my understanding that this resolution was introduced at the request of the State Department of Water Resources itself and members of the committee wholeheartedly agreed that a study of power marketing at Oroville was appropriate. The committee, however, amended the resolution to require a report to the Legislature by February 15, 1964. The resolution subsequently passed both houses.

Mr. Post, in his Analysis of the Budget Bill which was released on the 10th of February, 1964 stated.

"A \$1,054,000 contract is now being prepared to provide for design of two double circuit 230 kv transmission lines from Oroville to the Delta.

However, the contract also includes complete design of the line and the department's 1964-65 budget is prepared on the basis that construction of the line will occur."

"After reviewing the status of work underway, it is not apparent what economic and engineering information will be available to the department to determine whether the line should be built, except that the department

may be able to construct the line cheaper than provided in any transmission or sales agreement it can negotiate. A conclusion that state construction is cheaper than alternatives under negotiation may or may not justify construction of the line by the department. *Whether the Legislature or other interests will be fully informed on the rapid developments which will occur as decisions are made on these matters during the next few months is a matter for conjecture* (emphasis added)

"The next year will probably be the most critical year for deciding the power aspects of the State Water Facilities. Important basic decisions will have to be made during this time. Studies will have to be secured on power sales, purchase, and feedback matters, participation in the Pacific Northwest interconnection, the use of nuclear energy, etc. The department is currently proceeding with important phases of this work, including preliminary discussions with the Atomic Energy Commission on patterns of cooperation between the department and the AEC on the use of nuclear energy."

Then Mr. Post pointed out, and this is most important:

"A request by the Assembly Ways and Means Committee last session for quarterly progress reports from the department on its various power studies has been belatedly honored with one report which provides little significant information. The Legislature passed ACR 16 (1963 General Session) which directed the department to 'investigate all possible means of disposing of the hydroelectric power, and to report thereon to the Legislature not later than February 15, 1964.' There does not appear to be any prospect that a report released in February can fulfill the directive in ACR 16, in view of the work accomplished to date" (emphasis added)

On February 24, I received a three-page letter from Mr. William E. Warne explaining that he was complying with the requirements of Assembly Concurrent Resolution 16 by this letter and that he was also enclosing to serve as the Assembly Concurrent Resolution 16 report the first and only quarterly progress report, to which Mr. Post had referred in his analysis. The progress report was released last January. Thus, the department *has not* complied with the provisions of Assembly Concurrent Resolution 16, a resolution it itself sponsored, and has provided the Legislature with no indication that it actually had studied this important matter of marketing—a matter which must be studied before any decision on construction of transmission lines could be made.

In response to the comment of Mr. Post in his analysis and upon receiving the department's totally inadequate report, I had the amendment prepared which is now before you, and all this amendment really does is require the Department of Water Resources to now make a study, such as was requested by Assembly Concurrent Resolution 16 when it was passed in March last year, before it constructs the transmission lines.

The department has objected to the possibilities of delay. To this I would reply that had the department made a study as requested by the Legislature in Assembly Concurrent Resolution 16 (which it itself had introduced), there would be no need today for this amendment. It does not hamstring the department and it does not force them to take one alternative over another in the marketing of power from Oroville Dam.

I would like to make it clear that by this amendment we are only asking for the department to provide a report prior to spending funds. We expect them to ask both private and public power entities to indicate their proposals for disposing of Oroville power. Whether or not

a transmission line is required to the Delta is a matter for the department to determine after comparing the various proposals.

There is much confusion about what this transmission line is actually needed for. To begin with, the department has large quantities of power for sale at Oroville Dam and proposes to sell this power, presumably to support revenue bonds. The department, however, proposes a transmission line from Oroville to the Delta and whether or not such transmission line is needed depends upon who buys the power and where the entity buying the power wants it delivered. The fact that the State has water facilities in the Delta has no real bearing on this since the Oroville power is expensive peaking power and if used for pumping the State's own facilities it would be a tremendous waste of money.

It is hoped that the department will select the most economically advantageous proposal. This choice may involve either the federal government, a private utility, a public entity, or maybe even a combination of these.

The amendment simply requires them to take a look at all the factors and all the possibilities before it makes its decision, and it *requires that the Legislature be advised of these factors* and that the California Water Commission conduct a hearing so that the public, too, can make their views known on this matter.

OPINION OF LEGISLATIVE COUNSEL

State of California
Office of Legislative Counsel
Sacramento, March 19, 1964

Honorable Carley V. Porter
Assembly Chamber

Feather River Facilities—No. 3492

Question

Dear Mr. Porter: You have submitted to us a proposed amendment to the Budget Bill and ask if it would be a valid restriction upon the expenditure of funds for rights-of-way acquisition and final design of transmission lines for power generated at Oroville or Thermalito of the Feather River Facilities.

Opinion and Analysis

The proposed amendment would amend Item 275 of the Budget Act and reads as follows:

“On page 59, line 39, of the printed bill, strike out the period, and insert:

; provided, further, that no part of the funds made available under this item shall be expended for right-of-way acquisitions and final design (as defined on page 738 of the Governor's Budget) of transmission lines for power generated at Oroville or Thermalito of the Feather River Facilities, until the Department of Water Resources has completed a comprehensive report on the power loads, resources and transmission re-

lated to said facilities and said report has been submitted to the Legislature and presented to the California Water Commission at a public hearing at which time an opportunity to comment has been offered to all interested parties Said report shall include engineering and cost data for all alternatives to state construction and operation of said transmission lines."

The proposed expenditures for right-of-way acquisitions and final design of transmission lines to which the amendment relates are to be financed out of general obligation water bond proceeds from the Water Resources Development Bond Fund (Analysis of the Budget Bill, page 637) The bonds and proposed expenditures are authorized by the Burns-Porter Act (Secs 12930-12944, Wat C).

The Burns-Porter Act was submitted to the voters and was approved at the general election held on November 8, 1960. (See Statement of Vote for Election of Nov 8, 1960, p 23, Stats 1959, Ch 1762) The approval of a bond act by the voters creates an obligation in the nature of a contract that must be respected, and a material departure from the proposition as voted will not be upheld (*Golden Gate Bridge and Highway District v Felt* (1931), 214 Cal 308, 339; *Skinner v. City of Santa Rosa* (1895), 107 Cal 464, 465, *Peery v City of Los Angeles* (1922), 187 Cal 753) Also, it is our understanding that general obligation bonds authorized by the Burns-Porter Act have been issued and sold The issuance and sale of bonds creates a contractual relationship, and the rights of bondholders may not be substantially impaired by later legislative action (*County of San Bernardino v. Way* (1941), 18 Cal 2d 647)

It is well established that despite the existence of continuing appropriations such as those contained in the Burns-Porter Act, the Legislature may thereafter place a fiscal year limitation on restrictions upon the amount of money available for the purposes for which appropriated by an item in the Budget Act (*Board of Fish and Game Commissioners v Riley* (1924), 194 Cal 37) However, this power is subject to the rights of the voters and bondholders previously discussed

Thus, the issue presented by your question is whether the proposed amendment is a material departure from the Burns-Porter Act as enacted or substantially impairs rights of bondholders

The Burns-Porter Act contemplates the development of "State Water Facilities," which are defined to include, among other things, a multiple-purpose dam and reservoir on the Feather River in the vicinity of Oroville and facilities for the generation and transmission of electrical energy (Secs 12931, 12934, Wat C) In our opinion the Legislature may not halt expenditure of Burns-Porter Act funds or substantially alter, eliminate or delay the facilities contemplated by the act without violating the obligation to the voters and the holders of general obligation bonds to develop state water facilities The proposed amendment clearly would not completely halt the expenditure of Burns-Porter Act funds or alter or eliminate any of the State Water Facilities, so that the only question posed is whether it would substantially delay the construction of any or all of said facilities.

The amendment provides that no part of the funds made available under Item 275 may be spent for right-of-way acquisitions and final design of transmission lines for power generated at Oroville or Thermalito of the Feather River Facilities until the completion by the Department of Water Resources of a comprehensive report on the power loads, resources and transmission related to the facilities and the report is submitted to the Legislature and presented to the California Water Commission at a public hearing. The amendment requires only that a comprehensive report be completed and made public. Legislative approval of the report is not required.

We have no information as to the length of time which would be required to make the required comprehensive report and thus can give no categorical answer as to whether the construction of any or all of the State Water Facilities would be substantially delayed by complying with the legislative requirement. If such requirement could be met within the 1964-65 fiscal year we doubt if this would be held to be a substantial delay.

In this connection we might mention that it is possible that the holders of general obligation bonds issued pursuant to the Burns-Porter Act would not in any event be affected by any delay in the construction of transmission lines for power generated at Oroville or Thermalito of the Feather River Facilities. As we understand it, it is the intent of the Department of Water Resources to issue revenue bonds pursuant to the so-called Central Valley Project Act (Sec 11100 et seq, Wat C) to finance the power facilities at Oroville and Thermalito and to pledge all of the revenues derived from the sale of the power generated at said facilities for the payment of principal and interest on said revenue bonds (see *Warne v. Harkness* (1963), 60 A C 566, 568, *Cal. Water Resources Dev. Finance Committee v. Betts* (1963), 60 A C 582, 584). Thus, even though the proceeds of general obligation bonds issued pursuant to the Burns-Porter Act are to be used to finance the cost of right-of-way acquisition and final design of the power transmission lines in question, it would appear that if the department proceeds with the financing of the Oroville and Thermalito power facilities as planned, none of the revenues therefrom would be available to assist in paying the principal and interest on the Burns-Porter Act general obligation bonds. If this is so, then any delay in the construction of such power transmission lines would not affect the general obligation bondholders unless the delay is such as to substantially affect the completion of construction, or the operation, of other of the features of the State Water Facilities which will result in the production of revenues which are available for the payment of principal and interest on their bonds. Again, we have no information as to whether compliance with the legislative requirement in question would result in such a substantial delay.

Very truly yours,

A. C. MORRISON, Legislative Counsel

Dear Father As humbly as we know how, we come to Thee, our heads are bowed, our bodies are still, our thoughts are of hope and our prayer is that You may find us yielded and yielding even more to Thy Holy Will

Last night we lay sleeping, while You were re-creating within us strength for today Help us now that we may use our wills, intellects, means and influences in behalf of others and to find it more easy to put ourselves in the place of those who seek our help and consideration May we remember that to us much is given and of us much is required

And throughout this day as we act out our parts in another drama of life let each of us so live and serve under the highest Law of Heaven and earth—The Law of Love—AMEN

REQUEST FOR UNANIMOUS CONSENT TO PRINT IN JOURNAL

Mr Z'berg was granted unanimous consent that the following statement be printed in the Journal.

**STATEMENT IN OPPOSITION TO THE AMENDMENT
TO THE BUDGET BILL ITEM NO. 275**

I am opposed to the amendment to Item 275 of the Budget Bill. It is designed to preclude the expenditure of funds for rights of way and for final design for power transmission lines for power generated at the Oroville Dam until a report has been made to the Legislature and to the Water Commission and a public hearing has been held.

Although I am sympathetic to the maintenance of a watchful legislative eye on the administration of the water program and I favor periodic reports on the water project from the executive branch to the legislative branch, this amendment singles out for special treatment only one phase of the program—power—and requires that public debate precede any action by the Department of Water Resources. My objection runs to selecting power for special treatment and to the requirement for public debate. It is my opinion that if this procedure is imposed on the department, it will seriously handicap its negotiations with the private power companies for alternatives to state construction of transmission lines. Moreover, it is probable that the restriction suggested constitutes illegal interference with the Executive Department under the terms of the Burns-Porter Act. Comparable restrictive language in the 1961 Budget Bill was blue-penciled by the Governor on this ground.

The Department of Water Resources is faced with a most difficult and important task in working out the most advantageous arrangement for the disposal of Oroville power and for the purchase or generation of additional power needed for project pumping. It is my understanding that the department is negotiating with the Pacific Gas and

Electric Company on these subjects at this very moment. Lest there be any doubt about the financial impact of power on the State Water Project, I invite your attention to the latest published report of the department indicating that it may cost as much as \$71 million annually to pump water through the facilities of the State Water Project under conditions of full development.

One obvious method for solving the power aspects of the project is to work out arrangements with the Pacific Gas and Electric Company. Not only could Oroville power be sold to the company but additional power required for pumping could be purchased from it. It must be remembered, however, that P. G. & E. controls essentially all of the transmission and production of power in Northern and Central California. The company is well known for its stern attitude in bargaining with state and local agencies and with others as is true with any private company—and I do not criticize this—its first obligation must be to its stockholders. Consequently, the private utilities in their negotiations with the State are going to drive the hardest bargain they can. Faced with this situation, unless the State has available alternatives, such as the utilization of its own power for its own pumping and the sale of power generated to customers other than P. G. & E., it will be at the mercy of the company. It cannot possibly maintain a bargaining position of any consequence without the unhampered ability to construct transmission lines.

Now I realize the amendment does not preclude the construction of transmission lines. However, it would establish conditions and impediments involving at the least great delays which, as a practical matter, may have the same effect. I believe that if we hamstring the department by requiring that it withhold action on the transmission lines until its plans are reported to the Legislature and to the Water Commission and they are publicly debated, we shall make it extremely difficult, if not impossible, for the department to do the job we want. Effective negotiations cannot be conducted through the medium of a public hearing. The proposed amendment to Item 275 can be a comfort only to the private utilities. It can only be a detriment to the Department of Water Resources, to the water users and to every Member of the Legislature who seeks the financial success of the State Water Project.

In any event, I see no sound basis for singling out power as the one item on which there should be public hearings before action is taken. Consistent with this, should we insist on hearings before large construction contracts are awarded? Should we ask for public hearings on the question of sizing the Tehachapi pumps? Should we ask for public hearings before there is a final determination of the sizing of all canals? I think the answer is obvious. If the Legislature should require this, it would be virtually impossible for the Department of Water Resources to conduct an efficient operation.

May we live according to our best judgment and not be motivated by ancient grievances or hostilities. May we see that the ground at the foot of the Cross is level, and that all are equally precious and in need of Thy grace and one another's good will. Give vision to see that the blackest night gives way to a glorious morning, and death itself into eternal life

In His Name—AMEN.
