San Jose State College

TAXATION OF PETROLEUM-PRODUCING PROPERTIES IN CALIFORNIA

There is little uniformity among the various states in the taxation of petroleum-producing properties, with the result that the relative merits of ad valorem and severance taxation come under continuing discussion [1] Ronald B Welch, Assistant Executive Secretary of the California State Board of Equalization, has clearly described the diverse methods of taxation currently used throughout the country:

> Ad valorem and severance taxation are the two major methods of exacting contributions from the production branch of the petroleum industry for the support of local governments. Some state governments also derive revenues from one or both of these taxes, as well as from income and franchise taxes that apply to the business community generally . .
>
> Severance taxes are often in lieu of ad valorem taxes on the mineral rights or reserves, and in some states they are also in lieu of ad valorem taxes on other tangible property committed to the extraction of oil and gas The one kind of property that severance taxes never immunize from ad valorem taxation (excepting, possibly in Wyoming) is what is left of the fee simple estate after the mineral rights have been sold—the surface rights
>
> At one extreme is a state like Alaska, which uses a severance tax almost to the exclusion of ad valorem taxes, and at the other extreme is a state like Illinois, which subjects all petroleum properties to ad valorem taxation and has no severance tax at all California is near the latter extreme We tax all petroleum properties ad valorem and have only a minuscule severance tax for the support of the Oil and Gas Division of the Conservation Department [2]

These varied techniques of taxing petroleum-producing properties reflect the pragmatic approach which is characteristic of state taxation, the diverse historical backgrounds of the states, and their unique political and economic conditions Texas and Louisiana, the two states presently producing more oil and gas than California, export most of their production to other areas of the country and have found it advantageous to impose various combinations of ad valorem and severance taxes on oil and gas properties and production Total receipts from such taxation for state and local governments account for as much as 20 percent of the combined state and local government budgets in each state.

[1] See, for instance, Earl C Crockett, "Some Policy Questions Relating to the Taxation of Mineral Resources," *Proceedings of the 1943 National Tax Conference*, pp 223–230, H K Allen, "Ad Valorem Versus Severance Taxation of Minerals," *Proceedings of the 1951 National Tax Conference*, pp 574–580 See also *Report of the [California] Senate Interim Committee on State and Local Taxes*, Sacramento, April 1951, III, pp 231–341

[2] Ronald B Welch, "Ad Valorem Taxation of Petroleum-Producing Properties," mimeographed, unpublished paper delivered at the Twelfth Annual Conference of the Western States Association of Tax Administrators, September 4, 1951

Present-day advocates of severance taxation do not base their arguments upon a theory of taxing natural resources to the exclusion of other sources of revenue for state and local governments, although in the past that point of view has had its advocates Rather today the imposition of severance taxation on petroleum-producing properties tends to find its justification in the need for revenue and in disparate criticism of (1) the methods available for determining the proper basis for ad valorem taxation of mineral deposits, (2) evaluations of the economic impact of these alternative taxes on the conservation of resources, and, perhaps by implication rather than open comment, (3) a lament that property tax revenues accrue to local governments which are, through no contribution of their own, lucky enough to have these resources within their tax jurisdictions rather than available for revenue purposes to the wider service of state revenue needs

The imposition of severance taxes in lieu of ad valorem taxation may be viewed as essentially an alternative technique for taxing oil and gas producing properties There are, of course, many difficulties in assessing the value of as yet hidden resources But assessment for ad valorem taxation in part makes use of the production expectations based upon past performance (which would be the basis for severance taxation) so that the two methods are not clearly demarcated The technical difficulties in estimating the value of hidden resources have been responsible for the development of several valuation techniques that appear to be as reasonably accurate (or perhaps, as inaccurate) over time as are property evaluation procedures for other forms of real property.[3] There are also problems associated with substituting severance taxation for ad valorem taxation One is that petroleum resources taxed by severance are taxable as produced For many reasons, production at any given location may be discontinued or reduced with a consequent loss in revenue Severance taxation is not, therefore, a cure-all for local property tax evaluation problems

Severance taxation of petroleum resources, in addition to being considered in lieu of ad valorem, is frequently suggested as an additional source of support for the state government. It is in this connection that one hears the argument that a severance tax on petroleum resources would be reasonable because it would provide payment to the state for the privilege of extracting scarce resources which are permanently removed from the state's stock of wealth In this view petroleum resources are regarded as akin to other mineral deposits and distinct from those resources which, it is suggested, are capable of replenishment, such as agricultural products, timber, fish, and, one must suppose, labor power To the contention that the state should conserve its natural resources which are capable of depletion is linked the further argument that the state should be reimbursed for the permanent loss of such resources

There is, of course, little question that wasteful use of the state's limited resources, whether they be petroleum, mineral, timber, agricultural lands or labor, should be discouraged. For example, wasteful uses of agricultural land are widely deplored and underutilization of labor is regarded in national policy as undesirable But having recognized that wastefulness is undesirable does not necessarily lead

[3] *Ibid*

one to the conclusion that the best method of insuring compliance with appropriate uses of resources is state taxation. Under an economy dominated by private ownership competition it is generally thought that wastefulness will be eliminated by heightening competition. Yet, taxation tends not to heighten competition but possibly to lessen it by increasing the costs of doing business.

Taxation in a private ownership competitive economy is generally regarded as primarily a method of securing income for the support of government services. It is thought to do so best when it is not also used for regulatory purposes. Thus, for instance, effective use of severance taxation for conservation purposes would significantly reduce government income the more successfully it served conservation and, conversely, the more successfully it provided revenue the less importance it would have for conservation.

There remains the further argument that severance taxation is potentially an additional source of state income which is justified as payment to the state for the depletion of resources. Here the issue appears to be straightforward since on the face of it such resources as petroleum once extracted are gone forever through consumption. Where or how, the question runs, is the state to obtain payment for this apparent permanent destruction of its natural resources? It must be borne in mind that in a private ownership economy the state receives its income primarily as an indirect recipient of funds from the income of its residents and others earning income in the state. Secondarily, it receives income from the sale or lease of public resources and from transfer payments from other governmental units. In the case of petroleum-producing properties these are the owners, producers, contractors, labor and other direct and indirect participants in the production and distribution processes Without petroleum production, both state and local government revenue would decline, since the income derived from that production and from the property would decline. Present generations of Californians and others deriving income from petroleum production do indeed consume petroleum products and thereby deplete California's petroleum resources Most of this income is, however, consumed in order to continue production of all wealth and some is, hopefully, reinvested either privately or publicly in order to increase the ability of future generations to produce wealth. All other industries considered in vertical integration are similarly depleting both natural and man-made resources. Thus, unlike virgin park lands or natural seashores which are capable of permanent destruction through public enjoyment, the state's mineral resources are directly consumed both in order to continue present production and to increase productive capabilities through new capital formation. Consequently, rather than depleting the state's wealth present consumption of petroleum resources tends to increase the wealth of both present and future generations and indirectly the revenue potential of the government.

But those who are particularly concerned with conservation of petroleum deposits tend to be impressed with supposedly predictable dire shortages of these resources in the future These shortages are predicated upon predicted increasing populations, increasing industrialization and economic development of underdeveloped countries, and new

uses for petroleum resources resulting from chemical engineering accomplishments, all of which will place greater demands upon these scarce and depleting resources. Thus, for California, for instance, the trend for the state as the third largest supplier of crude to a sizeable importer of petroleum resources is one which tends to confirm the dire consequences for the future confronting the state and in a similar manner the United States and the world, with regard to shortages of hydrocarbons.

The popularity of this general interpretation of world population development and resource scarcity is so great today that one must hesitate to offer even the most cautious questioning of it But another view of the potentially dire consequences arising from increasing scarcities of petroleum resources due to depletion is possible It should be considered if for no other reason than that it more closely corresponds to our historical experience than the current warnings of potential catastrophic shortage of resources.

What is frequently ignored in conservation discussions is that all natural and man-made resources are scarce whether they be taken from a limited supply in nature or from a supply which requires reseeding or restocking. Resources are scarce relative, that is, to our shifting requirements in consumption and production It is, for instance, only a short time ago that coal was one of our principal growth resources Today some of the country's most distressed areas are in the coal mining regions where mines have become so marginal that owners have reverted to techniques of production comparable to those of a hundred years ago.

The problem of making predictions as to the future need for petroleum over any long period of time is an extremely difficult one. For instance, the availability of petroleum as of any resource may if it is plentiful stimulate a number of different uses, some perhaps to the point of being integrated into the institutional order of things as have gasoline and oil in automobile transportation Relatively simple questions, when answered, might well distort even the most carefully worked out answers to questions of the expected future use of petroleum products. For instance, even if we adequately project population, can we predict the future status of employment and are not the two related to each other? Will there be war? Will the advancing nations use petroleum resources as we do? Will undersea deposits of petroleum become more readily available? Will the increasing density of population in urban areas and the declining density in rural areas bring about substitute forms of transportation? Will technological innovation in generating electricity by atomic energy replace the burning of crude and gas? Will smog problems force the use of a substitute means of generating power? Will these problems taken together significantly induce innovation to reduce the price of electrical energy, which in turn will result in a decline in the use of petroleum for heat and transportation? It is clear that the questions can be asked almost endlessly depending upon the time span into the future under consideration.

What tends to carry the problem of petroleum scarcity to dire warnings about future prospects is the present and past dependence upon the resource and the difficulty of finding new supplies Extrapolated

into an unlimited future of similar important dependence and use of the resource the problems cannot but appear terrifying It is not the purpose here to isolate those present or future developments in population growth or future developments in science or technology or changes in the social and economic organization which will determine the future dependence upon petroleum resources and consequently their relative scarcities, but rather to point out that such areas for prediction have not in the past been overly accurate Consider, for example, the dire warnings in the 1930's about the trend apparent in the declining rate of population growth A measure of the speed of recent technological change will serve to set the problems in perspective, namely, the fact that many of the products we use today were either chemically unknown or technologically unavailable 25 or 30 years ago. Furthermore, it seems unlikely that even if with great accuracy we could predict the future need and use of petroleum resources we would be willing or able to shift to alternative uses in the present. The most that could be achieved would be possibly to limit the types of use for such resources. In addition, since it is undoubtedly true that future petroleum resource needs will be supplied from a more widely dispersed geographical area than the state, it appears somewhat unreasonable to suppose that one state is capable of significantly modifying petroleum production in the interest of conservation And, finally, as noted above, the state would not be wise to pursue conservation policies with tax devices intended to produce revenue

From the point of view of the state taxpayer the ideal source of state revenue is one whereby someone else pays the taxes. Hence, the imposition of a tax whose impact falls outside the state and which does not in its consequence remove any competitive advantages enjoyed by goods bearing the tax would be most desirable. Such ideal taxes would be further increased in their advantage if their collection were at minimum cost and if the final disposition of the revenues collected were placed unencumbered in the General Fund Without questioning the ethical position of such an orientation to state taxation it is possible to recognize that many state and local taxes are to some degree paid in other states. Some state and local governments have pursued particular advantages afforded them in this respect. For instance, some states impose a disproportionately higher tax on petroleum resources which is in part explained by their net export of petroleum products

Since California is the third largest producer of petroleum products, a severance tax imposed on California's petroleum resources would seem to offer just such an opportunity to export some of the cost of state government Let us consider then for purposes of contrast a severance tax imposed on the privilege of extracting petroleum resources together with a similar tax imposed on the privilege of extracting agricultural products in California Both taxes may be imposed on a unit of physical output produced for sale within and without the state Because of federal constitutional restraints taxes imposed on goods in interstate commerce cannot be taxed differently from those within the state

Though California is a large producer of petroleum resources, it is also, with its newly enlarged population, a very large consumer of crude, gas and processed petroleum products, with the rate of importa-

tion growing at a faster rate than production. A reversal of this situation is foreseeable only as a result of new discoveries on land and in the tidewater areas from which the state and local governments would derive royalty income It is obvious that the only virtue which a severance tax imposed on petroleum resources under present conditions might have is that it would be hidden in the costs of production, since virtually none of it would be exported from the state Similarly, assuming that the present situation were to change as a result of new finds on royalty-income lands and assuming that the state and local governments would be deriving maximum royalties according to the market for these operations, these governments would then be able to export some of their fees and taxes. But until such time as the production of petroleum resources exceeds consumption any severance tax imposed would merely be equivalent to a hidden excise paid for wholly within the state

On the other hand, a similar severance tax imposed on the privilege of extracting agricultural products, most of which are consumed outside the state, would offer a far greater possibility for exporting part of the cost of government in California One might, for instance, trace the impact of present ad valorem taxes paid to local tax jurisdictions by the petroleum-producing industry and by the agricultural industry as in some measure contained in the final sales price of the various products. Although tax impact is one of the more difficult areas to measure, it would seem reasonable to hazard a guess that there is at present a more sizeable export of local ad valorem taxes contained in agricultural products than in the case of petroleum products which are largely consumed in California.

The question of how the petroleum industry bears or passes on its present ad valorem taxes and how it would react to an additional or in lieu severance tax, i e, the measurement of tax impact is perhaps the most difficult area in public finance so that the analysis which follows must be regarded as both tentative and speculative in the absence of more precise information. In the case of the petroleum-producing industry the probability is that ad valorem taxes are in part absorbed as a cost by owners of the property and in part passed on to processors who probably absorb very little because they are able to pass them on to consumers. Probably the more integrated the firm the more easily its ad valorem taxes may be contained in the final sales price The reasoning behind these generalizations is that petroleum resources are available to processors from national and international markets In California, for instance, Standard Oil imports heavily while Union Oil does not. Further, there are available today multiple transportation systems and out-of-state sources and to some extent even possible alternative resources in various stages of processing for final distribution. These factors tend to offer opportunities for interchange and substitution of petroleum resources based upon minimum cost conditions providing a basis for minimum tax cost. In addition, the size and integrated nature of the processing and distributing companies which dominate the petroleum market permit relatively great leeway in their selection of resources for operation. Possibly each major firm operates with not one but several optimum conditions for best production efficiency and minimum cost conditions. Until the last three or

four years the chemical composition of crude tended to restrict the interchange and uses for California's high residue resources The recent introduction of hydrocracking has tended to lessen that problem But California's competitive position with respect to crude resources still retains some disadvantage *The Wall Street Journal* of April 24, 1964, saw the problem this way:

> A refiner's stake in being able to alter his product mix is clear. U S. Bureau of Mines figures show that domestic gasoline demand has been rising an average 2 7 percent a year—to about 4.5 million barrels a day in 1963 from 3 7 million in 1956—while demand for heavy fuel oils during the same period has fallen slightly, to about 1 5 million barrels a day.
>
> On the West Coast the situation is even more striking Fuel oil use in seven western states has fallen about 4 5 percent a year since 1956 while gasoline consumption has risen 4 percent annually Yet West Coast refineries in 1962 fell 18 5 percent short of meeting gasoline demand while being forced to turn out 7 percent more fuel oil than was needed
>
> The switch by utilities to natural gas for powering generating plants accounts for much of the slide in fuel oil use.

The larger companies have met this change in demand for different petroleum products by shifting first to importation of gasoline and gas and then to more costly methods of cracking But California's crude, as noted above, retains some disadvantage and must be considered in relation to the possible alternative petroleum sources. The same *Journal* article explains as follows

> Catalytic cracking, in general use since World War II, usually leaves a residue of about 20 percent industrial fuel oil, and the like, after the extraction of gasoline and other higher-value products Hydrocracking forces these residues apart with wedges of hydrogen driven by secret catalysts, resulting in more gasoline.
>
> Signal Oil isn't the only refiner to discover the merits of hydrocracking. In the past three years 11 hydrocrackers have gone into operation and 12 more are under construction or being designed Standard Oil of California recently announced it will build an $80 million unit—three times larger than any now in existence—at its Richmond refinery near San Francisco
>
> Such refinery tinkering can markedly change product yields, as witness Signal's jump to 90 percent gasoline production at Bakersfield from 50 9 percent simply by, an official puts it "busting up all those dad-gum heavy oils " The refinery used to turn out 6 1 percent kerosene, 9 7 percent diesel oil and 17 9 percent industrial fuel oil that "we didn't know what to do with " Now the first two products are transformed into gasoline altogether and fuel oil output is trimmed to 4 percent, he says
>
> Signal is doing about as well as can be expected with California's heavy crudes, but given lighter oils such as predominate on the Gulf Coast, hydrocracking is able to produce nothing but gasoline, says William H Clausen, manager of invention development for California Research Corp, a California Standard Oil subsidiary.

From the point of view of judging tax impact on the supply side, California's relatively lower quality resources in respect to the changing composition of demand for higher quality final products places these resource owners at a slight disadvantage in the extended market for their products In a similar manner the composition of the petroleum industry, which is dominated by a relatively few large integrated firms which have access to multiple supplies from comparatively large numbers of leasers, tends to lead one to the conclusion that, though there may be differences as between firms, ad valorem taxes are probably in part absorbed by competitive lessors and in part passed on to the consumer.

On the demand side, for the final petroleum products, the processors are probably in a somewhat similar situation as they are in their relationship to resource leasers The demand for such items as gasoline has been found to be relatively price inelastic within the range of prices with which we have been familiar in this country. For instance, though people may switch from one service station to another due to a reduction in the price of gasoline, there is no noticeable increase in the overall use of automobiles nor in the consumption of gasoline as a result of decline in price. It would seem that the institutional solidification of our dependence on automobile transportation has made it possible for both the several states and the federal government to impose excise taxes at quite high levels without significantly affecting the rate of use of that mode of transportation

If then, on the one hand, competition by owners of petroleum resources in leasing their properties to producing-companies tends to absorb in part some of the present ad valorem taxes and if, on the other hand, the institutionally solidified demand for final petroleum products tends to permit processors to pass on the remaining portion to California consumers, it is reasonable to suppose that either additions to ad valorem or the imposition of severance taxes would have a similar impact Thus, a decision not to impose additional taxes is, in effect, an indirect aid to California petroleum resource owners whose resources are somewhat inferior to those of other areas of the market as regards the changing composition of demand and a benefit to the California consumer in lower prices of final products

It has been observed above that the one advantage which severance taxation offers is that it is a form of taxation not presently used by the state for revenue purposes With ad valorem revenues accruing to local government jurisdictions, the state has participated in taxation of the petroleum industry only as it would with any other industry by imposing taxes on franchise and income

However, recent developments in the discovery of petroleum resources on publicly owned lands and in offshore areas in which the state's rights have been established have made income from petroleum-producing properties available to the state's General Fund and Water Fund in significant amounts Oil and mineral royalties amounted to $27 2 million in 1962 and $49 2 million for the period closing June 30, 1963 It is reasonable to expect that the state's participation in royalty income could increase since explorations are in areas in which the state might be able to extend its claim However, most recently exploration has been extended out into blue water areas substantially offshore and

not clearly within state jurisdiction Water boundaries for states are at best rather vague at present The main points of concentration for such deep water exploration are in the North Sea, Gulf Coast and off Alaska and California It is possible that discoveries even in the continental shelf off the California coast could be claimed to be depleting of California's offshore deposits by subterranean connection. Such questions are, however, necessarily legal questions based upon geological evidence

Appendix

QUANTITY AND VALUE OF PETROLEUM OUTPUT IN CALIFORNIA BY COUNTIES—1962

County	*Quantity*[a]	*Value*
Fresno	26,730	$71,266,056
Kern	90,595	221,434,611
Kings	1,388	4,102,291
Los Angeles	74,386	190,563,120
Monterey	11,230	17,642,695
Orange	31,320	78,968,695
Riverside	3	9,102
San Benito	337	735,150
San Bernardino	87	221,123
San Luis Obispo	1,260	3,601,689
San Mateo	97	291,860
Santa Barbara	25,487	62,745,393
Solano	1	2,513
Tulare	46	97,225
Ventura	33,705	90,048,940
State	296,672	741,430,463
1963 Estimates for the state		
State	300,733	$745,818,000

[a] Unit—M Barrels (thousand barrels, 1 barrel = 42 gallons)

SOURCE California, Department of Conservation, Division of Mines and Geology, and Oil and Gas, letter to Assembly Committee on Revenue and Taxation

SEVERANCE TAXES—OIL AND GAS

In Selected States

State	Tax	Rates	Revenue fiscal year 1963
Alabama	Oil and gas severance taxes	Oil and gas—6% of gross value at point of production of oil, gas or other hydrocarbons produced or severed from the soil or water for commercial use	$483,000
Arkansas	Oil and gas severance or production taxes	Oil—well production per day [a] 10 or more bbls —5% of value, less than 10 bbls —4% of value, Gas—$0 003 per 1,000 cu ft	N B
California	Petroleum and gas severance taxes	Tax per barrel of oil produced and cubic feet of natural gas produced determined annually and based on estimate of annual conservation cost	854,000
Colorado [b]	Oil and gas production gross income taxes Oil and gas conservation taxes	Gross income from production of oil and gas under $25 000—2%, $25,000–100 000—3%, $100 000–300,000—4%, $300,000 and over —5% [c]	1,661,000 120,000
Florida	Oil and gas severance taxes	Oil and gas production—5% of gross value at point of production of oil or gas severed or produced from the soil or water Escaped oil—12½% additional	42,000
Indiana	Petroleum production tax	1% of the value of all petroleum removed from the soil	347,000
Kansas	Natural gas severance tax Oil proration tax Oil production tax	N A	195,000 318,000 105,000
Kentucky	Oil production tax	State—1/2 of 1% of market value of crude petroleum produced County— not to exceed 1%	286,000
Louisiana*	Oil and gas severance taxes	Oil—ranges from 18¢ per bbl for 22 gravity oil and less to 26¢ for over 43 gravity oil [a] Gas—$0 023 per 1,000 cu ft [c]	147,206,000
Mississippi*	Oil and gas severance taxes	Oil—6¢ per bbl or 6% of value, whichever is greater, Gas—6% of value or $0 005 per 1,000 cu ft	11,216,000
Montana	Oil production tax	2% and 2 5% of value [d]	2,106,000
Nebraska	Oil and gas severance taxes	Oil and gas—2% of value	1,352,000 [e]
New Mexico	Oil and gas severance taxes	Oil and gas—2 5% of value, plus privilege tax of 2% of value	N B
North Dakota*	Oil and gas production taxes	Oil and gas—5% of value	3,402,000
Oklahoma	Gross production tax	Oil and gas—5% of value	N B
Texas	Oil severance tax Natural and casing head gas severance tax	4 6% of value [a] 7% of value	122,114,000 64,051,000
Utah	Oil and gas production taxes	Oil and gas—2% of value in excess of $50,000 per year [f]	700,000
Wyoming	Oil and gas production taxes	Not to exceed 2/5 of 1 mill per dollar of value of oil and gas	66,000

* Severance or production tax is in lieu of state and local property taxes, with certain limitations on the exemption in the case of equipment not necessary and used in production Louisiana, however, exempts only the oil and gas, not equipment, from property taxation

[a] Limited credit is allowed against tax for depreciation and for cost of maintaining salt water disposal well

[b] Credit is allowed against tax due for property taxes paid on oil and gas, leaseholds, and royalties but not for property taxes on equipment and facilities used in production

[c] Tax on oil wells incapable of producing more than an average of six bbls per day is one-half of normal rate Tax on gas wells incapable of averaging 250,000 cu ft per day is $0 003 per 1,000 cu ft

[d] Tax rate is 2% of the portion of gross value of production from each lease or unit per calendar quarter not in excess of an amount equal to the number of producing wells thereon times 450 bbls , on the portion of value above this amount the rate is 2 5%

[e] Tax is 4 6¢ per bbl (not less than 4 6% of market value)

[f] An annual exemption of $50,000 is allowed in computing the amount of gross value subject to the tax

a Revenue for fiscal year 1962.

N A Data not available

N B No breakdown Oil and gas severance tax revenue yields not separable from total yields which also include other minerals Total severance tax collections in 1964 on all minerals subject to the tax were Arkansas $3,766,000, New Mexico $21,663,000, Oklahoma $35,628,000

Assembly Committee on Revenue and Taxation

CHAIN STORE TAX

HISTORICAL BACKGROUND

A major change in American economic life occurred in the 1920's as a result of the rapid expension of chain stores. In 1910, 3,000 chains operated only 13,500 stores in America. By 1928, 20,000 chains were operating 119,600 stores [1] Understandably, this change was viewed with alarm by many people sympathetic with the small independent retail businessman.

One of the reactions to this revolutionary change was the attempts by many states to impose special taxes on chain stores In this way, it was felt, the small businessman would be better able to more effectively compete with the "monolithic" chains. In 1927, the first chain store taxes were enacted in Georgia, Maryland and North Carolina. With the advent of the depression and the need by state governments for additional revenue, the chain store tax movement reached full bloom. In 1933, 13 states passed chain store taxes By 1938, 21 states had chain store tax legislation on the books [2]

Congress also became interested in this tax in the late 1930's On June 8, 1937, the House of Representatives accepted Representative Martin Dies' amendment to the District of Columbia appropriations bill (155 to 43) providing for a chain store tax in the District The amendment was rejected by the Senate. In 1938 Representative Wright Patman with 75 coauthors introduced a national chain store tax act. It established a tax rate of $50 per store on chains having 9 to 15 units and up to $1,000 per store on chains with more than 500 stores. The tax then was to be multiplied by the number of states in which the chain was operating. Under this bill, the Great Atlantic & Pacific Tea Company would have paid $523 million and Woolworth's $79 million. This measure died in committee.[3]

The movement for chain store taxes reached its peak in the 1930's. After World War II, several states abandoned this method of taxation. By 1963, only 14 states continued to impose this tax

CALIFORNIA'S 1935 CHAIN STORE TAX ACT

In 1935, the California Legislature enacted a chain store tax. The measure provided for license fees for retail stores as follows:

1st store	$1	6th store	$32
2nd store	2	7th store	64
3rd store	4	8th store	128
4th store	8	9th store	256
5th store	16	10th store	500

Each store above 10—$500

[3] Seventy-sixth Congress, Third Session, Hearings before the Committee on Ways and Means on H R 1, Excise Tax on Retail Stores, I, pp. 153–1961

Exempt from the provisions of the act were gasoline stations, ice distributing establishments, restaurant facilities of common carriers, newspaper offices, theater and motion picture houses, stores where sales were incidental to rendering of a personal service, and agricultural cooperatives.[4]

Supporting the measure, Senator Chris Jespersen and Assemblyman Melvyn Cronin stated:

"This proposal, providing a graduated scale of taxes for chain stores, represents California's first serious and successful effort to regulate monopoly within the borders of the state.

"Unrestrained by government, chain stores have grown to such colossal size within the past decade that the only proper method to prevent them seizing all forms of business is through taxation

"Financed and controlled by 'economic royalists' of the first water—whose headquarters are in Wall Street and other money centers—they suck the financial lifeblood from every community they enter, concentrating their gigantic profits in the hands of a few to sustain a reactionary oligarchy which is definitely anti-social and dedicated to the continuation of economic slavery.

"They have claimed that the consumer will pay the bill of increased taxation.

"A false complaint, since imposition of this tax will enable independent merchants to compete with monopoly on a basis of equality, thus tending to create competitive prices, for the consumer's benefit."

In opposing the bill, Senator Ray Hays and Assemblyman Paul Richie argued:

"The act is not intended as a revenue measure. It does not produce a substantial return. It is a punitive measure intended to destroy legitimate competition. It is not only unfair in this respect but it is discriminatory as well. Some chains handling the same products are exempted from the tax. It will raise the cost of living. Those whose incomes are modest are vitally affected.

"Chain stores distribute high grade merchandise directly from farm and factory to the consumer. They buy in large quantities at a lower price because of quantity and take advantage of cash discounts The costly service of the middleman is eliminated. Sales for cash avoid slow and bad accounts. The savings thereby effected result in the lowest possible price to the consumer.

"Chain stores are of tremendous value to California because they move farm and factory products in large volume. By efficient organization, advertising and promotion, they stimulate demand and provide a ready cash market to all producers.

"Of 130 chains in California which would be seriously affected by the chain stores tax, 100 are locally owned by California citizens and transact all their business in this state. National chains

[4] Statutes of 1935, Chapter 849.

do less than 7 percent of the retail business in California National food chains, alone, annually buy in California and ship to other states 89 millon dollars more in farm products than they receive for goods sold here.

"Chain stores operate on an exceedingly small margin of profit. In many cases the net profit per store is not much more, if any, than the amount of the proposed tax. Therefore, the tax must be added to the price of the food, clothing and other necessities; naturally other storekeepers influenced by larger profit, will raise their prices accordingly for the goods you buy. You will not benefit You will pay the amount of the tax in the increased price of the necessities of life and you will be compelled to deny yourself some of the modest luxuries that you may now enjoy. Many stores will be forced to close creating unemployment and affecting realty values."

Governor Merriam signed the measure in July 1935 However it did not take effect as the opponents successfully obtained enough signatures under the referendum provisions to put the measure to a vote of the people. Proponents and opponents staged what is remembered as the most hotly contested referendum in California history.

This is the way UCLA Professor Winston W Crouch describes it:

"Probably the most spectacularly fought referendum campaign was that in 1936 when California Retail Chain Stores Association fought a vigorous and well-financed campaign to defeat the measure that singled their type of business for special taxation and regulation.

"Each branch store belonging to a chain store organization would have been subject to a high tax.

"The Anti-Monopoly League of California, a well-financed group of independent store owners argued that chain stores monopolized business, drove out small establishments, and that as a large organization they should pay a special tax.

"However a skillfully organized propaganda campaign using the oft-repeated slogan 'Twenty-Two is a Tax on You' impressed the electorate sufficiently to defeat the measure, number 22 on the ballot." [5]

The measure was defeated by 300,000 votes—1,067,443 yes to 1,369,778 no—and only carried one county, San Francisco County.

A total of $1,207,764 was spent for and against the measure—a staggering amount considering the purchasing power of the dollar in 1936 [6]

LEGAL STATUS

Although several early chain store tax measures were overturned by the courts, the U S Supreme Court in 1931 ruled that this form of taxation was constitutional in *State Board of Tax Commissioners*

[5] Winston W. Crouch, *The Initiative & Referendum in California*, Los Angeles The Haynes Foundation, 1950, p 28

[6] *Ibid*, p. 30

of Indiana vs Jackson, (1931), 283 US 527, a decision which is still controlling. The principal question in this case was the validity of the classification of the chain stores under the 14th Amendment.

Speaking for the Court, Justice Roberts said.

> "A tax statute is not arbitrary if discrimination is founded upon reasonable distinction or if any state of facts reasonably can be conceived to sustain it
>
> "The record shows that the chain store has many features and advantages which definitely distinguish it from the individual store dealing in the same commodities."

However, in 1935, the Court held that classifying retail merchants for imposition of a graduated tax on sales according to the volume of sales, disregarding the number of stores operated, is invalid. [*Stewart Dry Goods Co vs. Leavis et al*, (1935), 294 US 550.]

While the number of stores within a state is the commonly accepted classification, the Court has ruled that a distinction may not be drawn with respect to the number of stores within a county compared with the number within a state [*Louis K Liggett Co. vs Lee,* (1933), 288 US 517] In fixing the applicable rate for state stores, however, a state may take into consideration the number of stores in the entire chain, wherever situated [*Great Atlantic & Pacific Tea Co. vs Grosjean et al*, (1937), 301 US 412]

CHAIN STORE TAX RATES IN THE UNITED STATES

As of September 1, 1964, 13 states imposed chain store taxes The rates and exemptions in the various states follow:

State	Rates		Exemptions
	Number of stores	Tax rate	
Alabama	1	$1	Stores selling petroleum products if constitute at least 51% of business and ice
	2- 5	15	
	6-10	22 50	
	11-20	37 50	
	Over 20	112 50	
Colorado	1	$2	Gas filling stations or gas bulk plants
	2- 4	10	
	5- 8	50	
	9-15	150	
	16-24	200	
	Over 24	300	
Iowa	1	Exempt	Nonprofit co-ops, farmers and gardeners, persons selling ice, coal, lumber, grain feed, seeds, fertilizer, twine and building materials where sales are 95% of gross, state liquor stores, hotels and roomingbouses
	2-10	$5	
	11-20	15	
	21-30	35	
	31-40	65	
	41-50	105	
	Over 50	155	

State	Rates		Exemptions
	Number of stores	Tax rate	
Louisiana	1–10	$10	Gas stations and public utilities
	11–35	15	
	36–50	20	
	51–75	25	
	76–100	30	
	101–125	50	
	126–150	100	
	151–175	150	
	176–200	200	
	201–225	250	
	226–250	300	
	251–275	350	
	276–300	400	
	301–400	450	
	401–500	500	
	Over 500	550	
Maryland	1– 5	$5	Gas stations
	6–10	20	
	11–20	100	
	Over 20	150	
Michigan	Chain stores		
	1	Exempt	Gas stations, bulk plants, warehouses and elevators in farm produce business
	2– 3	$10	
	4– 5	25	
	6–10	50	
	11–15	100	
	16–20	150	
	21–25	200	
	Over 25	250	
	Chain counters		
	1	Exempt	
	2–10	10	
	11–15	15	
	16–25	20	
	Over 25	25	
Mississippi	Towns with population under 3,000		
	1– 5	$6	Gas stations and public utilities

[a] Or $5 per pump, whichever is greater
[a] Other chain stores including ice stores, certain wholesale and retail lumber stores, certain oil and gas well supplies and equipment dealers, restaurants, certain gas stations, and certain utilities pay a tax of $4 for one store and $9 for more than one store
[b] Stores in which goods of any kind except cigarettes, tobacco products and soft drinks are sold and which contains no coin-operated device owned and operated by the store proprietor
SOURCE Agencies administering major state taxes in the various states

YIELDS IN OTHER STATES

The chain store tax is not a great revenue producer at the rates which it is levied in other states. Except for Texas, which raised over three million dollars in fiscal 1962–63, no other state receives as much as one million dollars from this source. Revenue collections for 1962–63 are as follows

TABLE I

Chain Store Tax Yield, 1962–63

State	*Yield*	*State*	*Yield*
Alabama	$128,577	Mississippi	$129,150
Colorado	248,317	Montana	185,093
Iowa	34,399	North Carolina	323,372
Louisiana	400,126	South Carolina	361,400
Maryland	N/A	Tennessee	336,974
Michigan	556,979	Texas	3,370,572
		West Virginia	N/A

Source Compiled from Budgets of various states and correspondence with various states

POTENTIAL YIELD IN CALIFORNIA

By comparing the rate structure proposed in California's ill-fated 1935 act with rate structures and collections in other states, it can be estimated that a chain store tax today would produce about $3,500,000 per year This is comparable with Texas' revenue from the same source The tax liability of 19 large chains in California would amount to nearly $900,000 This figure would indicate the $3 5 million estimate is in the proper range of magnitude.

TABLE II

Estimate of the Tax Liability of Some of the Larger Chains in California

Woolworth's	$73,511	Lucky Stores	$61,511
Kress	16,011	See's	59,011
Sears	20,511	Gallen-Kamp	63,511

EFFECTS OF A CHAIN STORE TAX

A chain store tax is more an instrument of social policy than of tax policy Ostensibly the purpose of this tax is to place more of a competitive burden on the chain in order to protect and preserve the small independent entrepreneur The tax rate, coverage, demographic characteristics of the state and the nature of the chain store business are important in determining effects of the tax A minimal tax will have only nuisance effect on chains while a very large tax could drive the chains out of California If the tax rate is based just on the number of stores in California, the total impact will be greater on regional rather than national chains A chain store tax in states with most of the population in large urban areas will not be as effective as a regulatory or revenue measure as in states with a number of medium sized cities

Chain store taxes as a percentage of net income fall much more heavily on grocery chains than on variety chains[7] To the extent that

[7] Lyle E Craine, "Chain Store Taxes As Revenue Measures," *National Tax Journal*, September 1949, p 283

it is passed on to the consumer rather than the stockholders or management, this impact would weigh more heavily on lower income groups.

To fully evaluate the desirability of a chain store tax from the standpoint of social policy, several questions must be answered. Are "chains" detrimental to society? Is additional regulation needed? Is the tax device the most effective way of regulating chains?

Earlier studies have concluded that this form of taxation at rates generally imposed in other states has little impact on the expansion of chains and is generally ineffective as a regulatory device.[8]

In considering chain store taxes as revenue-producing rather than regulatory, measures, it is evident that such taxes cannot produce substantial revenue for California at rates generally prevalent in other states. However, California imposes a number of taxes—such as the wine tax, the private car tax, etc.—which bring in even less than would a chain store tax. Or high rates could be imposed which would raise a substantial amount of revenue.

One of the criticisms of the chain store tax is that there is not necessarily a relationship between number of stores and ability to pay. Further, it is highly discriminatory against one type of enterprise *vis-à-vis* another similarly located, and as such violates the principle of tax neutrality.

PUBLISHER'S NOTE

This report is the eighth part in a series of publications issued by the Assembly Committee on Revenue and Taxation during their 1963–65 interim study of the California tax structure It is concerned with the equitability, the economic impact, and the revenue impact of taxes imposed on insurers It deals specifically with the rationale of the gross premiums tax and its importance as a revenue source, the principal office deduction, retaliatory taxation of insurance companies, and problems pertaining to the collection of the gross premiums tax.

Where applicable, analyses of proposed legislation, and some recommendations and conclusions pertaining thereto, are made

The material relied upon for data and substantiation included published economic data, testimony offered in public hearings held by the Assembly Committee on Revenue and Taxation, publications of state and federal agencies, and the literature in the field

The recommendations in this report are those of the researcher and should not be construed as representing the views or decision of the committee. The committee recommendations will be made in due course.

ABOUT THE AUTHOR

Sylvia Lane is an assistant professor of finance at San Diego State College. She received her A.B and M A in economics at the University of California and her Ph D. at the University of Southern California, where she also was a lecturer in economics. Mrs. Lane is a member of the American Economic Association, the American Finance Association, and serves as chairman of the membership committee and a member of the executive committee of the Western Economic Association.

In 1963, she received a Ford Foundation fellowship for further study in public finance at U.C L A. She has done research for A J Wood and Company, the Psychological Corporation, the Mendota Research Group, and the Economic Research Group Mrs Lane was project economist for the Los Angeles County Welfare Planning Council, 1956 to 1959; and chairman of the Commission on Aging of the Community Welfare Council of San Diego County in 1963.

Among her other publications are: *Personal Finance* (John Wiley and Sons, Inc., 1963); *Buying Intelligently* (a supplementary text book), and numerous papers on economic growth and development and patterns of consumer expenditure She was assisted in the preparation of this report by Mr James Elden.

DECEMBER 1964

TABLE OF CONTENTS

LIST OF TABLES

LIST OF FIGURES

CHAPTER I

THE PRESENT LAW

The California tax on gross premiums received by insurance companies is embodied in the Constitution of the state, in the Revenue and Taxation Code, and the Insurance Code

The Present Law

The Constitution (Article XIII, Section 14¼) contains the provisions setting the rate for the gross premiums tax and states the voting requirement for any change of that rate For a change in the tax rate to be made, the Legislature must comply with paragraph (i) of Section 14¼, which requires a favorable vote by two-thirds of all of the members elected to each of the two houses of the Legislature

Every insurer doing business in the state pays a gross premiums tax in lieu of all other licenses and taxes, excepting real estate taxes, income taxes paid by trust departments of insurers, motor vehicle fees and taxes, and ocean marine insurance taxes [1] An exemption from the gross premiums tax is allowed fraternal fire insurers and nonprofit hospital service corporations, both of which are held to be charitable or benevolent organizations The basis of the tax for insurers other than title insurers is the amount of gross premiums, less return premiums, received during the year by the insurer upon the business done in this state. "Gross premiums" do not include premiums received for reinsurance or ocean marine insurance [2] Ocean marine insurers are subject to a tax in lieu of all other taxes except real estate, retaliatory, motor vehicle, and taxes on other types of insurance written [3] The ocean marine insurers' tax is based on the portion of underwriting profit equal to the ratio of California gross premiums to those written in the entire United States [4]

Surplus line brokers are also subject to a tax based on gross premiums from business done in the state under authority of license, less 3 percent of return premiums [5]

Title insurers pay tax on all income from business done in California except (1) interest and dividends, (2) rents from real property, (3) profits from the sale or other disposition of investments, and (4) income from investments [6] Each insurer may deduct California real estate taxes paid on the property in which its principal or home office is located [7]

Insurers, for the most part, now pay a rate of 2 33 percent, and will do so until 1967 when the rate will revert to 2 35 percent, on their

[7] Revenue and Taxation Code, Section 12241

taxable gross premiums, excepting on premiums from pension and profit-sharing plans, on which rates are currently undergoing a change. (The rate for 1960 on these was 2 15 percent, in 1961, it was 1 95 percent; in 1962. 1.75 percent, 1963, 1 55 percent, for 1964, it will be 1 35 percent, and in 1965 and thereafter, it will be 1 percent [8]) Ocean marine insurers are taxed at the rate of 5 percent, and surplus line brokers at the rate of 3 percent [9] Foreign insurers are subject to retaliatory taxes [10]

Each insurer files a tax information return with the Insurance Commissioner on or before June 15 annually [11] Each insurer subject to the provisions pertaining to retaliatory taxation of the Insurance Code files a retaliatory tax information return with the Insurance Commissioner on or before May 1 annually [12] Taxes imposed upon insurers are due and payable annually on or before June 15 of the year following the calendar year in which the business reported was done [13] However, on June 15, 1964, payment for the gross premiums taxes due for business done between January 1 and March 31, 1964, was required, on June 15, 1965, taxes due on premiums resulting from business done between January 1 and March 31, 1965, shall be paid; on September 15, 1965, taxes on business done between April 1 and June 30, 1965, shall be paid, on June 15, 1966, taxes due on business done between January 1 and March 31, 1966, shall be paid, on September 15, 1966, taxes due on business done between April 1 and June 30, 1966, shall be paid, and on December 15, 1966, taxes due on business done between July 1 and September 30, 1966, shall be paid After January 1, 1967, gross premiums taxes due are to be paid on or before the 15th day of the 3rd month following the close of each calendar quarter [14] The prepayment provisions do not apply to ocean marine insurers The amount of prepayment may be the actual amount due as gross premiums taxes for the applicable quarter or an amount equal to at least 25 percent of the annual tax [15]

The tax lien levied on an insurer attaches on the first Monday in March [16]

Surplus line brokers' tax statements must be filed on or before March 1 [17]

Any taxes not prepaid by insurers are payable on June 15 [18] A tax return in duplicate must be filed by every insurer with the Insurance Commissioner by June 15 and the accompanying remittance made payable to the Controller [19] Surplus line brokers' taxes are payable on or before July 1 to the Insurance Commissioner [20] Retaliatory taxes are payable to the Controller on or before December 1 [21]

RATIONALE OF THE GROSS PREMIUMS TAX

The tax imposed upon insurance companies in California has been held to be an excise tax The excise is paid for the privilege of doing business in the state in the year preceding that in which the tax is assessed.[22]

History

The history of California's taxation of insurance companies naturally falls into three distinct historical periods The early period, from 1846, the end of Mexican rule, to 1910, is marked by the adoption of the 1849 California Constitution, the four codes of 1872, and the second California Constitution adopted in 1879 The second period dates from the major revision of the California tax structure in 1910 to the promulgation of our current codes in the 1930's This period is marked by the codification of statutes relating to insurance taxation in 1911 and 1917, and the addition of the specific sections of the Revenue and Taxation Code, Division 2, Part 7, relating to insurance taxation which were adopted in 1941 The third period begins in 1943 with the revision of these codes, which remain, in modified form, the law governing present insurance company taxation in California

This discussion will include a delineation of the law taxing insurers during each of these historical periods with emphasis on the rates and changes in the rates of the tax, any deduction or offsets allowed against the tax, any retaliatory tax, and collection procedures

1846 to 1910

The requirement that insurance companies be incorporated and/or licensed to do business in California was imposed in 1850 [23]

Previously, Section 13 of Article 11 of the 1849 Constitution, entitled "Miscellaneous Provisions" had established, in two sentences, the state's right to impose an *ad valorem* property tax to be "equal and uniform throughout the state " In 1853, a franchise tax of $250 per quarter was imposed upon domestic insurance companies and a tax of $500 per quarter was imposed upon foreign insurance companies [24] This tax was followed by a stamp tax in 1857 [25]

In 1862, California amended its nascent tax structure so that all insurance companies paid an annual license tax of $100 [26]

At the same time, a gross premiums tax was levied but only on foreign companies with less than $50,000 invested in California property [27]

All foreign life insurance companies were taxed 1 percent of their gross premiums All other foreign insurance companies paid a tax of 2 percent on gross premiums. Domestic insurers were not taxed on their premiums (Contrary to the implications made in testimony before the Assembly Committee on Revenue and Taxation at the hearings held January 31, 1964, the tax exemption allowed foreign insurers with $50,000 invested in California property is not entirely analogous to the

principal office deduction presently allowed and was not the basis of the real estate property tax offset created by legislation in 1910) The Legislature repealed the investment provisions in the 1862 Tax Law after a few years.[28] In addition to the license tax and the gross premiums tax, a retaliatory tax was levied on foreign insurance companies in 1872 [29]

In 1867 the Legislature created the position of insurance commissioner imposing upon him the duties of regulating and controlling the insurance industry. He did not, however, actually collect any taxes [30] According to the Statutes of 1867 insurance companies were required to file a statement of premiums sold and taxes given to "the treasurer of the county or city and county" in which their principal office was located.[31] In addition they were required to post bond with the State Controller Penalties for failing to comply with these requirements were enforced by the local district attorney [32]

There were no substantial modifications in the provisions governing the tax imposed on foreign insurers from 1868 to 1903 However, in 1872, there was a rewriting and codification of the statutes and laws applicable to insurers adopted prior to that time, and a limitation of $150,000, which applied to the amount of property that could be held for use as a home or principal office by an insurance company, was included in the statutes.[33] This restriction was deleted in the 1901 revision of this section of the Civil Code [34] (The $150,000 valuation ceiling on property which an insurer could use for a principal or home office did not in any way affect his tax liability, since real property taxes were not an offset against the gross premiums tax until 1911)

The ratification of the second California Constitution in 1879 did little to alter the taxation of insurers although the Legislature's revenue powers were broadened and defined at length in Article 13 In contrast to the brief list of revenue powers appearing in the first Constitution, Article 13 of the new Constitution had 13 sections on revenue and taxation None of these sections mentioned the taxation of insurance companies Not until 1910 did the Constitution itself provide for the taxation of insurance companies

In 1885, all foreign companies writing fire insurance were subjected to a tax of 1 percent, specifically to be allocated to the Fireman's Relief Fund [35]

In 1903 existing laws governing the taxation of insurers were amended to impose a 2 percent gross premiums tax on all foreign nonlife insurers [36] This legislation was again amended in 1905 to include a 1-percent tax on the gross premiums of all foreign life insurers [37] The gross premiums tax thus imposed allowed for the deduction of return premiums, of reinsurance written for companies authorized to do business in California, and for losses paid on business done in

California [38] In 1907 there was in entirely new article added to the Political Code concerning the regulation of the insurance industry but no substantial revisions were contained therein [39]

In summary then, prior to the major revision of California tax laws in 1910, the California taxation of insurance companies included (1) a 2-percent gross premiums tax on all foreign nonlife insurance companies, (2) a 1-percent gross premiums tax on foreign life insurance companies, (3) retaliatory taxes on foreign insurance companies incorporated in a state which imposed taxes higher than California's, (4) corporation licensing fees levied on both foreign and domestic insurance companies, (5) miscellaneous special taxes, for example, the tax on foreign fire insurance companies in support of firemen's relief funds, etc, and (6) general property taxes levied on foreign and domestic companies by both state and local governments This period included no offset against premiums taxes for real property taxes paid, later known as the "principal office deduction," since there was, as yet, no division of state and local revenues

1910 to 1943

The second historical period began with the major revision of California's tax structure in 1910 This revision, occasioned by Senate Constitutional Amendment No 1, separated state and local sources of revenue Revenue from property taxes, previously shared by state and local governments, now went wholly to the support of local governments The state received revenue from business and income taxes

Insurance companies, both foreign and domestic, paid a gross premiums tax to the state under the provisions of a new section, No 14, that was added to Article 13 of the Constitution This was the first time that a provision imposing a gross premiums tax became a part of the Constitution Section 14 authorized a tax on the income of not only insurance companies but also railways, telephone and telegraph companies, public utilities, banks and other financial organizations Insurance companies "doing business" in California were taxed at the rate of 1½ percent of *adjusted gross premiums* Since property taxes were to be a revenue source for local governments, insurance companies were allowed to deduct any real estate taxes paid The gross premiums tax was in lieu of all other taxes except special taxes such as the retaliatory tax [40] The Constitution, while establishing a tax of 1½ percent of gross premiums, allowed the Legislature by a two-thirds vote to change the tax rate [41] These constitutional provisions were implemented by statute in 1911 [42] and codified in 1917 in the Political Code, Section 3664 [43] Over the years the Legislature, exercising its constitutional authority, changed the tax rate until in 1921 it became 2 5 percent [44]

The collection procedure established in 1910 is similar to the one existing today The Insurance Comissioner as he did under Section

[38] *Ibid*
[39] Statutes, 1907, p 162, added were Article 16, Chapter 3, Part 3, of Title 1 and Section 623a

3666a of the then existing Political Code reports the facts and income of insurance companies to the Board of Equalization The board then assesses the tax Finally the taxes are paid into the State Treasury through the Controller's office The only noteworthy change in this system was the conversion to a prepaid tax instituted in 1964 [45]

In 1933, sections of the Constitution relevant to taxation of gross business receipts in California were substantially rewritten Noninsurance corporations such as railways, banks, savings and loan companies, previously covered by Section 14 were now taxed under laws taxing mercantile, manufacturing, and other business corporations [46] The 1933 amendment to Section 14 included a 2 6-percent tax on gross premiums of insurance companies but allowed for the deduction of real estate taxes Again this tax was in lieu of all other taxes Ocean marine insurers were taxed at 5 percent of their underwriting profit attributed to California premiums Previously, provisions relating to their taxation were included in Section 18, Article 13 adopted in 1930 [47] Except for these provisions relating to taxation of insurance companies now in Section 14¼, Section 14 is substantially at present as it was in 1933

In 1942 the gross premiums tax of 2 6 percent on insurers other than ocean marine was reduced Article 13, Section 14¾, was added in that year in an effort to correct inequities caused by the real estate tax deduction [48] These inequities were particularly troublesome during the 1930's when because of the Depression, some insurers found themselves with large numbers of property holdings even though they were not allowed for the most part, to own property not used as a principal or home office Insurance companies with property holdings were able to deduct local real estate property taxes from their gross premiums tax liability In many cases, this deduction reduced a company's state tax levy to zero This deduction not only resulted in lower revenue at the state level at a time when state revenues were sorely needed, but also gave what amounted to a subsidy to insurance companies who had acquired a number of holdings through foreclosure [49] The 1942 constitutional amendment allowed only for the deduction of real estate taxes paid on property in which an insurer's principal office was located To compensate insurers, the gross premiums tax was gradually reduced from 2 6 percent to 2 35 percent over a five-year period It has remained substantially the same since then, except for a recent temporary reduction to 2 33 percent to compensate for the shift to a prepaid tax Just prior to passage of the 1942 constitutional amendment, the Political Code sections relative to insurance taxation were transferred to a new code, the Revenue and Taxation Code [50]

1943 to the Present

Since they were revised in 1943, the Revenue and Taxation Code sections concerning insurance taxation, with some modification including a renumbering in 1961 and the new prepayment procedure, have remained substantially the same as they were

Proposed Changes

An historical review of any law would not be complete without some discussion of unsuccessful attempts to change the law

Some notable attempts made in the period from 1953 to 1962 are cited in this section In 1953 Assembly Bill 2586, which proposed an increase of the taxation rate to 2 75 percent from 2 35 percent was defeated Assembly Constitutional Amendment 21, proposed in 1953, would have eliminated the principal office deduction for general insurers It was also defeated in committee Two similar bills were defeated in the 1955 legislative session Assembly Bill 3444 would have restricted the principal office deduction to property taxes paid on that portion of the building actually housing insurance company operations Assembly Bill 3445 would have increased the tax rate on general insurers from 2 35 percent to 4 70 percent Neither bill passed either house of the Legislature

Senate Bill 1783, introduced in the 1957 session, would have modified the law to allow domestic insurance companies to deduct from their California gross premiums tax any retaliatory taxes paid by them in other jurisdictions This bill died in committee Senate Bill 2179, also introduced in the 1957 session, would have amended the section of the Revenue and Taxation Code then numbered 12256 in order to restrict gross premiums tax application to foreign insurers to admitted foreign insurance companies only It, too, died in committee

In 1958, Assembly Bill 15, that would have changed the tax rate on premiums on policies issued in connection with pension funds, was introduced, but it also died in committee However, a bill to tax premiums on pension and profit-sharing plans at lower rates did pass in 1959 [51]

In 1959, Assembly Bill 862, which was introduced, would have modified the section of the Revenue and Taxation Code then numbered 12258 in order to limit the principal or home office deduction to that portion of the principal or office building actually being used in the pursuit of its insurance business by an insurance company It died in committee

Assembly Bill 1469, also introduced in 1959, would have abolished the Franchise Tax Board and would have established a Department of Revenue to administer taxes It died in committee

Assembly Bill 2959, introduced in 1961, and Assembly Constitutional Amendment 82, introduced in that same year, would have limited the principal or home office deduction to that portion of the building actually occupied by insurers for the purpose of conducting their insurance business Neither one was adopted

[51] Statutes, 1959, p 5291.

In the 1963 session, Assembly Bill 1949 would have eliminated the principal office deduction by repealing Section 12241 of the Revenue and Taxation Code This bill was sent back to committee Assembly Bill 1947, which would have instituted the prepayment procedure, died in the Senate However, Senate Bill 8 to the same effect was passed.

Assembly Bill 2901, introduced in the 1963 session of the Legislature, would have changed the collection procedure for the premiums tax and the penalty provisions pertaining to delinquent tax payments and the late filing of retaliatory tax information returns It was not adopted.

Assembly Bill 2934 would have taxed insured employee welfare plans It was referred to committee

Two constitutional amendments were introduced. Assembly Constitutional Amendment 27 is discussed in Chapter 4. Assembly Constitutional Amendment 33, which would have limited the principal office deduction, was not adopted

In the first extraordinary session in 1964, Senate Constitutional Amendment 1, which would have removed Section 14¾ from the Constitution, died in committee Senate Bill 31, which would have curtailed the principal office deduction, also died in committee

It may be noted from this list of proposed changes that several attempts have been made to eliminate the principal or home office deduction; and an attempt was made in recent years to establish a Department of Revenue

INCIDENCE

Both the Bureau of the Census and court decisions have held the gross premiums tax to be an excise tax [52] The Bureau of the Census terms the gross premiums tax "a sales and gross receipts tax" [53]

According to authorities in public finance "a commodity tax" may reach all or a wide range of consumption expenditures or only those made for particular commodities The former type is known as a *sales tax* The second type is an *excise tax* [54] Therefore, the tax on insurance premiums is more properly classified as an excise tax

Due states further, "commodity" [55] taxes are levied upon the sales (or output) of commodities and collected from the vendors To the extent that the taxes are reflected in higher prices, individuals are essentially bearing the tax in the form of a tax supplement to the prices of goods they buy and thus in relation to their consumption expenditures, so long as their incomes are not affected by the tax [56]

Burden on Consumers

The extent to which insurance companies may shift the premiums tax on to consumers is determined by the extent to which they can raise premiums to cover the amount of the tax

However, it should be noted that consumers do not bear a very large burden because of the tax, even if it is completely shifted, simply because individual expenditures on insurance totaled only $10 7 billion

[56] Due, *op cit*, p 263

in 1963 for the United States, out of which $4 2 billion was paid into nonmsured pension funds, and another $4 5 billion was paid for government insurance and into pension reserves, leaving only $1 3 billion as premiums paid to private insurers on individual insurance policies, or less than 0 4 of 1 percent of total consumer expenditures in that year [57] Since the tax is approximately 2½ percent of the premiums paid by individual policyholders, the aggregate burden of the premiums tax is currently less than one-hundredth of 1 percent of aggregate annual consumption expenditures in the United States

As for California, in their 1962–63 annual report the Board of Equalization stated

> The gross premiums collected by all 765 companies authorized to write policies in the State during 1962 amounted to $3,660,000,000, excluding premiums from ocean marine insurance This sum is equal to 8½ percent of the disposable personal income of all Californians during that year Approximately $160 million was returned to policyholders as dividends or as premiums on canceled policies leaving $3½ billion as taxable business
>
> Virtually the entire amount was subject to a tax rate of 2 35 percent Some $92,000,000 of premium receipts of 60 life insurers from policies issued in connection with a pension or profit-sharing plan, however, were subject to a tax rate of only 1 75 percent The gross tax assessed by us for the year was $81,646,000.[58]

Personal income in California in 1962 amounted to $49,187,000,000 [59] Therefore, the entire burden of the gross premiums tax assessed in California in 1962 was only some 0 0017 percent of aggregate personal income

Burden on Insurers

In the case of the insurance industry, firms have the power to raise premiums to compensate for the cost of the tax when policies are renewed or when new policies are written The insurance industry is a monopolistically competitive industry (it is neither purely competitive nor purely monopolistic, but its structure suggests that elements of both monopoly and competition exist in the industry), and characterized in some sectors by some degree of oligopoly, (i e , few sellers of, in this case, more or less differentiated products within product classes) [60] There is consequently a notable feeling of mutual interdependence among the various firms in the industry [61]

[61] Witness the many industrywide associations and the association of those in the various sectors of the industry such as the Association of Casualty and Surety Companies, or the Institute of Life Insurance, or the National Association of Independent Insurers, et al

As a result, the reaction to any increase in tax is, most commonly an increase in the premium rate by the amount of the tax. The tax represents a cost increase to each firm [62] Each insurer knows that competitors are likewise affected and they are likely to increase premiums, especially if the firm in question is a well-known firm and lets it be known that it intends to do so Accordingly, each insurer increases premium rates, the Insurance Commissioner permitting,[63] when policies are renewed or when new policies are written Each insurer would find the increase profitable if prices had not already attained the levels which would maximize profits for the insurers as a group The tax provides an impetus for movement closer to the maximum total profit level, a movement which the firms could not make prior to the tax, if they were not members of interinsurance exchanges or other rate-computing groups, because the degree of cooperation among them is not sufficiently strong

Evidence indicates that the demand curve for insurance does not have a high price elasticity [64] Professor Jung found "there was no evidence that the amount of insurance the companies wrote in Illinois bore any direct relationship to the rates they charged" Consequently, a slight increase in price due to an increase in the premiums tax has a negligible effect on sales volume In fact, insurers as a group can raise premium rates more than the tax and suffer little or no decrease in sales volume Since, in addition, the industry is characterized by decreasing unit costs,[65] premiums will be increased more than the amount of the tax Figure 1–I shows the probable profit points before and after the imposition of the tax for a particular company.

In an industry or a firm characterized by decreasing unit costs, any increase in volume results in additional profit However, when an increase in total costs occurs, as it would because of the imposition or the increase of a premiums tax, profits are reduced In an effort to regain its former profit position the industry or the firm is behooved to attempt to increase its sales volume If its efforts are successful, it may increase its quantity sold to a point where profits are greater than they were before the imposition or the increase of the tax Thus the imposition or increase of the premiums tax may serve as a stimulus to increased effort and increased profits

Raising premiums by more than the tax will also result in higher profits on the same volume if all other expenses are properly considered

Actually, because certain costs, such as agent's commissions, are based upon the gross premiums, it takes a rate loading of slightly less than 1½ percent to recover a 1-percent tax

From the foregoing, it may be concluded that the premiums tax is not borne by insurers, except for that period of time during which policy rates remain in effect and cannot be changed, and to the extent that renewal rates and premium rates on new policies are not raised sufficiently to offset the tax on the rates which remain unchanged

EQUITY

The general conclusions on the equitability of the premiums tax are essentially the same as for any other excise tax.

Equitability of Excise Taxes

A strong case can be made for a tax on expenditures rather than income.[66] This is pertinent in this instance because the premiums tax, as an excise tax, insofar as individuals are concerned, is a tax on a particular type of expenditure (true insurance is classified as savings in economic literature, but to the individual, money spent for insurance premiums appears as an expenditure)

A group of economists (among them John Stuart Mill, A C. Pigou, and Irving Fisher) over a long period of time has argued that income is approximately defined for tax purposes as consisting only of consumption expenditures This premise is based upon the idea that economic well-being is determined by consumption alone. A person's direct and immediate level of living depends upon his consumption expenditure. Following this argument, it has been held that spending capacity rather than income is the best measure of taxpaying ability.

There are many other arguments that may be used to justify taxes on expenditures rather than on income [67]

One opposing argument that should be cited is that specific sales or excise taxes distort consumer choice, hence, leave the consumer worse off than he would be if the same revenue were extracted from him through an income tax However, Professor Somers has countered, "This allegation against the sales tax relative to the income tax has been disputed. The income tax distorts choice too." [68]

Additional arguments against expenditure taxes are that they are regressive, i e., they take a larger proportion of lower incomes,[69] and they have a potential deflationary effect in that consumers can purchase less out of their same incomes when the tax must be paid Fewer purchases may make for a lower national income in the following time period, especially if investment is affected, and if there is a tendency toward unemployment, the use of an expenditure tax may aggravate this tendency and require that the government spend not only the amount received from the tax but more in addition to counter this tendency

However, the main consideration insofar as the equitability of a tax is concerned is generally whether it distributes the tax burden fairly

[66] See N Kaldor, *An Expenditure Tax*, George Allen and Unwin, London, 1955
[67] See Harold M Somers, "Theoretical Framework of Sales and Use Taxation," *Proceedings of the National Tax Association*, 1961
[68] *Ibid.*, pp 611–612
[69] When the expenditure tax is regressive, it is argued, purchases of necessities may, due to the tax, be curtailed for the lower income families However, an expenditure tax need not be regressive If necessities are exempted, as most are from the sales tax in California, and excises are imposed upon commodities purchased more and more as incomes increase, an excise tax becomes progressive

Equitability of the Gross Premiums Tax

Since the burden of this tax is borne by the purchasers of insurance, it then becomes necessary in order to inquire into this subject to determine who purchases insurance

As Table 1-1 clearly indicates, all types of insurance are utilized more by higher income groups than by lower income groups [70] Individuals purchase more insurance as their incomes increase There-

TABLE 1-1

Insurance Expenditures and Direct Burden of Insurance Premiums Tax on California Families in 1950, by Income Class

Annual net income class	Expenditures					Total tax
	Medical insurance	House and household insurance	Auto insurance	Personal insurance	Total insurance*

fore, it may be argued that the premiums tax is, in reality, a progressive tax as far as individuals are concerned Hickman termed it mildly progressive.[71]

Firms paying the premiums tax may be assumed to shift the tax to consumers, other firms, and governmental units insofar as they can by charging higher prices for commodities. One can only estimate whether or not this will have a regressive or progressive effect, but a study of current consumer expenditure patterns which still reflect the fact that the greater part of most incomes is spent on necessities, i e , food, clothing, shelter, and requisite education and transportation,[72] would lead one to the conclusion that the net effect of the premiums tax paid by firms in the form of higher premiums for insurance and thereafter shifted is regressive Premiums taxes paid by federal governmental units are shifted progressively; by state and local governmental units, regressively [73] Thus Hickman's conclusion that all in all the premiums tax is mildly progressive was warranted However,

[71] *Ibid*, p 18

[72] E Bryant Phillips and Sylvia Lane, *Personal Finance*, New York, John Wiley and Sons, Inc , 1963, Chapter 2

[73] It is generally agreed that the aggregate federal tax burden in the United States is progressive the state and local tax burden, regressive
See R A Musgrave, et al , *Compendium of Joint Committee on the Economic Report*, November 9, 1957, p 98

his conclusion that the total relative burden pattern of this tax is proportional is open to question.

Equitability of Tax Burden on Insurers

The question has been raised as to whether a gross premiums tax is the most equitable form of taxation for the insurance industry To answer this question it is necessary to consider the equitability of the alternatives. The alternatives in this case are: (1) an income tax, (2) a sales tax, and (3) a franchise tax.

Income Tax. Insofar as an income tax upon insurers is concerned, it has been held in several instances that insurance companies pose special problems in that the computation of taxable net income is difficult, as far as they are concerned, because of doubt as to how much to deduct for future losses, i e , casualties and bad loans.[74] Furthermore, since a good part of the income of insurance companies is composed of income from government bonds, a second theoretical difficulty arises with income taxation [75]

Insurers other than life insurance companies or departments, and mutual insurance companies do not have any special income tax privileges under the federal law [76] Their operating profits and capital gains are subject to the regular corporate income taxes, and their corporate dividends are taxable income to their stockholders. (Policyholder dividends are, however, no part of taxable income.) However, there is one peculiar factor about the computation of insurance company income taxes: Their income is based upon their statutory underwriting profits.[77]

Except for the relatively minor sums paid on investment capital gains, fire and casualty insurance companies, taxable corporate incomes are roughly measured by the following formula· taxable income equals premiums earned minus losses incurred minus expenses paid plus taxable interest earned plus approximately 15 percent of dividends received.

Fire and casualty companies, then, insofar as the federal system of taxation is concerned, are simply treated as all other corporations with minor differences due to the nature of the business

Life insurance companies, on the other hand, are taxed by the federal government under a special formula which is a combination of an income tax and a capital gains tax [78] Both investment and underwriting income are taxed Mutual insurers other than life or marine insurers are exempt from federal income taxation if the gross amount received during the tax year from specified investment income and

[75] *Loc cit*

[76] Internal Revenue Code, Sections 831 and 832

[77] The statutory underwriting profit or loss is computed by subtracting from premiums written during the accounting period the increase in unearned (prepaid) premium reserve to obtain the net premiums earned , then losses and operating expenses incurred during the period are subtracted from net premiums earned to obtain the statutory underwriting profit or loss The computation charges all the expenses incurred in obtaining new business to the year in which the policy is written even though the policy may be in effect for many years

[78] Internal Revenue Code, Sections 801–820

premiums does not exceed $75,000 [79] Only four states apply income tax laws to insurance companies, notably Idaho, Louisiana, Minnesota, and Mississippi Whether life insurance company profits should be exempt from the corporate income tax in any measure because of the nature of the business is a question not yet satisfactorily answered in the literature [80]

Sales Tax The gross receipts tax, which has been classified as a sales tax, (see page 16) is imposed upon retailers for the privilege of selling tangible personal property at retail [81] Although the tax is not levied directly on the consumer, the law provides that the retailer shall pass the tax on to the consumer insofar as it can be done A list of exempt transactions is included in the law The sales tax does not apply to insurance, because insurance is an intangible rather than a tangible commodity It may, however, be argued that insurance is a consumer good Its tangibility or intangibility in this instance does not affect the consumer's income allocation for this commodity He buys insurance just as he buys food or clothing or an automobile In regarding the premiums tax as a sales tax the mechanical problem involved that has a bearing on equity in this case is that part of life insurance premiums other than premiums on purely term insurance policies build a cash reserve and may be termed savings, but feasibility might dictate that the tax be imposed on every premium collected However, this should not pose an insurmountable difficulty to the reclassification of the premiums tax as a sales tax, and its treatment in that fashion

Franchise Tax Every bank located in California and every corporation doing business in California is subject to the franchise tax, unless specifically exempted [82] The franchise tax is imposed for the privilege of exercising the corporate franchise in California Insurance underwriting companies are exempt from the franchise tax in California [83] If the gross premiums tax is held to be a sales or excise tax, then the exemption of insurance companies from the franchise tax as well as from all income tax in the state may be questioned on the grounds of equitability

Comparison of Insurers and Comparable Firms

Insurance has been termed a form of savings in many instances This terminology merits some discussion In the case of insurance other than life insurance, the term cannot be applied, since the insurance is purchased for specific protection, and unless the event insured against occurs, no part of the amount of money paid as a premium is available for the purchaser's future use If the insured-against event does occur, the benefits are recompense for losses suffered and not a return of savings

In the case of life insurance, however, a portion of each premium may be classified as savings where the policy is not in its entirety a

contract for term insurance It is on this basis that it has been argued that life insurance is a form of savings. However, equitability does not seem to warrant the taxing of insurers like banks or savings and loan associations whose business is not the writing of insurance.

ECONOMIC EFFECTS

The economic effects of the gross premiums tax will be analyzed in this section in order to assess whether, and where possible to what extent, the tax influences (1) profits of insurance companies, (2) California insurers' ability to compete in other states, and (3) aggregate income and employment.

Effect of Gross Premiums Tax on Profits

The effects of the gross premiums tax on the profits of insurers will be traced through its effects on prices, sales volume, and competition in the industry

Effect on Prices As previously noted, (see pp 20-22) it has been established that taxes on gross premiums are included as a cost when insurers are setting premium rates, and consequently, premium rates when they are first set or when they are subsequently changed reflect the full amount of the tax When the tax is raised or lowered, those premiums that cannot be changed immediately will not reflect the change

As a result, on outstanding policies, insurers absorb the effect of the change on profits until such time as premiums can be changed

Effect on Sales Volume in the Industry. Sales volume and profits have apparently not been lowered so much by the increase of the tax as to discourage the writing of insurance or the entry of insurance companies into the business in California Admittedly the evidence on this point is far from recent, but when the gross premiums tax rate was raised from 1 5 percent to 1 75 percent in 1913, the number of assessments increased from 285 to 313 Taxes assessed on premiums which reflect premiums written, increased from $637,964 in 1912 to $803,618 in 1913 When the gross premiums tax rate was increased from 1 75 percent to 2 percent in 1915 the number of assessments decreased from 319 to 315 But, taxes assessed on premiums increased from $856,999 in 1914 to $1,062,569 in 1915 When the gross premiums tax rate was increased from 2 to 2 6 percent in 1921, the number of assessments increased from 355 in 1920 to 405 in 1921, and the taxes assessed on premiums increased from $1,936,937 in 1920 to $3,204,242 in 1921 An increase in the tax rate was in two of the three applicable instances associated with an increase in the number of assessments, and in every instance associated with an increase in taxes assessed on premiums, reflecting increases in premiums written

Effect on Sales Volume

A question may be raised as to whether the fact that the gross premiums tax serves to increase premium rates decreases the sales volume of insurers It has been shown that insurance is characterized by a relatively low price elasticity of demand, and in consequence the raising of premiums does not result in a proportionate decrease in

TABLE 1-2

Number of Insurance Tax Assessments, Gross Premiums Tax Rate, and Taxes Assessed on Premiums

Year of assessments	Number of assessments	Gross premiums tax rate (percent)	Taxes assessed on premiums
1912	285	1 50	$637,964
1913	313	1 75	803,618
1914	319	1 75	856,999
1915	315	2 00	1,062,569
1920	355	2 00	1,936,637
1921	405	2 60	3,204,242

SOURCE California State Board of Equalization, *Annual Report*, 1952–53, p 104

volume.[84] (It is more importantly characterized by a very high income elasticity of demand)

A reduction of the tax rate, which though it may not serve to lower premiums will at least keep them from rising as much as they might otherwise, should, if there is any significant degree of price elasticity of demand, be associated with an increase in sales volume over and above that in the years in which there was no reduction

The gross premiums tax rates were reduced over the five-year period from 1943 to 1948 In 1942 to 1943, the year before there was any change, there was a 10 8 percent increase in premiums written in California over the previous year.[85] In each of the succeeding five years the gross premiums tax was reduced 0 5 percent per year. In 1943 to 1944 there was a 13 5 percent increase in premiums written. In 1944 to 1945 there was a 81 percent increase in premiums written In 1945 to 1946 there was a 16 2 percent increase in premiums written In 1946 to 1947 there was a 16 2 percent increase in premiums written In 1947 to 1948 there was an 8 1 percent increase in premiums written

In 1948 to 1949, the first year after the five under study in which there was no reduction in the gross premiums tax, there was a 2 7 percent increase in premiums written, and in the three succeeding years in which the tax also remained unchanged, the increases in premiums written amounted to 8 1, 13 5, and 16 2 percent.

True there were other reasons for the increases in premiums written beside the reduction in the gross premiums tax and the consequent effect of prices remaining lower than they would have otherwise, but the analysis suggests that premiums written increased to about the same extent as they would have otherwise had the gross premiums tax rate been reduced or not

Since the gross premiums tax is reflected in price, and since price elasticity for insurance is low, the argument that an increase or a decrease in the gross premiums tax rate will have a marked effect on the sales volume of insurers is not possessed of any appreciable degree of strength.

Effect on Competition Within the Industry The gross premiums tax has little effect on competition, and consequently profits, in the insurance industry because of the fact that it is considered as a cost

[84] See p 21

and reflected in premiums charged by all insurers It cannot be argued that it affects one group more than another nor that it gives one group any competitive advantage over another by affecting their profits except in the case of those insurers who qualify for the principal or home office deduction and so reduce their tax The economic effects of the principal or home office deduction are discussed in Chapter 3

In summary, the gross premiums tax has little or no effect on the profits of insurers except where premiums cannot be changed to reflect changes in the tax when they occur and in the case where insurers have a competitive advantage because they take a principal or home office deduction as an offset against their gross premiums tax

Effect of California Insurers' Ability to Compete in Other States

The California gross premiums tax rate of 2 35 percent is higher than the gross premiums tax rate paid by life insurance companies in 33 other states; by fire insurance companies in 19 other states; and by casualty insurance companies in 32 other states[86] This being the case, California insurers do suffer from some handicap in competition, pricewise, in some states This is accentuated by the retaliatory provisions of the laws in many of these states, which impose upon California insurers the same tax burden, insofar as it can be ascertained, imposed upon insurers of that state in California.[87]

Aggregate Income in the State

The gross premiums tax would affect aggregate income in California adversely, if there was a curtailment of insurance sales volume due to the fact that the tax caused an increase in the price of insurance. However, as noted above, the tax has little effect on sales volume and thus little effect on income and employment In fact, it may be argued that the tax serves as an incentive to the consequent increase of aggregate income and employment (see pp 20–22).

[86] State of California, Department of Finance, Budget Division, *Quarterly Payments of Insurance Tax*, May 1, 1963, p 7

[87] See Chapter 4.

It may also be argued that the tax dollars respent by the state cause an increase in aggregate income and employment at least as large as that which would have been generated had these tax dollars been spent by consumers on commodities other than insurance or by insurance companies on other commodities

In summary, the gross premiums tax does not appear to have any significant deleterious economic effects

CHAPTER II

IMPORTANCE AS A REVENUE SOURCE

The tax on gross premiums is the fifth highest source of tax revenue for the state of California In 1962–63, as the following table shows, retail sales and use taxes were the foremost source of tax revenue, the personal income tax was the second highest source, bank and corporation taxes were the third highest source, the inheritance tax was the fourth highest source, and the insurance gross premiums tax, fifth highest.

Tax Rates and Yield

The growth in the revenue from the insurance tax is not because of the tax rate so much as it is because the tax base, i e , insurance premiums, has grown at such a high rate since this tax in its present form went into effect Table 3–6 shows the increase in the tax since 1911

Figure 2–1 shows the increase in premiums written in California from 1935 to 1957, and the amount that it may be anticipated will be written to 1975 It should be noted, though that the high projection predicted that $3 2 billion in premiums would be written in California in 1962 and net taxable premiums actually amounted to $3,497,834,111 [1]

TABLE 2-1

Revenue From Five Major State Taxes—1962–63

Tax	Total revenue 1962–63
Retail sales and use taxes	$813,465,455
Personal income tax	322,012 176
Bank and corporation taxes	311,250,827
Inheritance tax	86,783,149
Insurance gross premiums tax	77,970,110
Total	$1,611,481,717

SOURCE State of California, Budget for the fiscal year July 1, 1964, to June 30, 1965, Sacramento 1964, p A-43

in 1962 Admittedly, then, the projections are somewhat conservative

The gross premiums tax rate has remained at 2 35 percent since 1948, but taxes assessed on premiums have increased from $21,045,450 to $82,521,529, a fourfold increase in 15 years [2] The increase in insurance written in the state is closely correlated with the increase in income in the state as was clearly shown in the Dockson Study.[3]

The net taxes assessed on insurance, which are computed by deducting from taxes assessed on premiums the local property tax credit claimed and adding taxes assessed on underwriting profits which are

[1] California State Board of Equalization, *Annual Report*, 1962–63, *op cit*, p A-40

mainly from ocean marine insurers who are subject to a 5-percent tax on underwriting profits on that portion of their business which was written in California, increased from $20,344,679 in 1948 to $77,799,250 in 1963. Again, there was virtually a fourfold increase.

The respective share of the total state tax collections contributed by the insurance tax has, however, except for 1963, been decreasing, not only for the past 15 years but over the past 25 years, as Table 2-2 illustrates

This may in large part be attributed to the fact that tax rates for other business have been increased during this period while that on insurance premiums has been decreased

SOURCE 1935–1955 California Assembly Interim Committee Reports 1955–1957, Vol 4, No 3 *A Resume of California's Tax Structure 1850–1955*, 1960–63 State Budgets

Table 2-2 also shows the respective share percentagewise of total state collections of the franchise tax from 1935 to 1963

The percentages of *General Fund* revenue contributed by banks and corporations and insurance companies is shown in Table 2-3. Between 1950 and 1963 bank and corporation payments increased 234 percent; insurance tax payments, 182 percent.

In summary, then, as a percentage of total California state receipts taxes on insurers have been declining, except for an increase this past year The percentage share of the bank and corporate franchise taxes, on the other hand, with which the insurance tax may be roughly compared, since insurance companies may be held to be financial entities to some extent, has been increasing The relative contribution for state support, as measured by the proportion of its taxes to the total of state taxes, of the insurance industry is relatively low, i e , 3 11 percent Its relative contribution to general fund revenue for 1962-63 was 4 35 percent, while banks and corporations contributed 22 7 percent It should be added that since the gross premiums tax is an excise tax, profits for the insurance companies, for the most part, are little different than they would be without the tax

The insurance industry contributes a relatively small percentage to state support and bears a relatively low tax burden. However, except on the grounds of equity, there is no practicable gauging of whether the burden should be increased

It may be noted that the burden is as light as it is because the insurance gross premiums tax is in lieu of all other taxes, state and local, on the insurers except taxes on their real property, excluding their home or principal office and upon their motor vehicles California insurers pay no tax on investment income, capital gains, or personal property, and no local license taxes or franchise fees

Interstate Comparisons

The gross premiums tax rate in California is higher than the rate on life insurance companies in 33 other states; on fire insurance companies in 19 other states, and on casualty insurance companies in 32

TABLE 2-3

Insurance Tax Compared With Bank and Corporate Franchise Taxes as to Percentage of Total General Fund Revenue

1935–36	12 2	5 3
1940–41	11 7	4 1
1945–46	15 7	3 9
1950–51	15 2	3 6
1955–56	16 1	4 0
1960–61	17 7	4 3
1961–62	17 7	4 4
1962–63	22 7	4 3

SOURCE State Budgets, 1935–1964

other states (See Figure A-1) When, however, the tax is temporarily reduced to 2 33 percent over the next four years, the relative position of California insurers, insofar as the tax rate is concerned, will be somewhat improved

The average insurance tax rates for the United States and for California are as follows

	California	*Average 50 states*
Life insurance	2 35%	2 30%
Fire	2 35%	2 83%
Casualty	2 35%	2 36%

A mean, however, is not always the best basis for comparison The highest 10 states in respect to revenue from the gross premiums tax are shown in Table 2-4

New York, which is second only to California in the tax revenue received from the gross premiums tax, had a 2-percent tax rate on fire and casualty insurance and a 1 75-percent tax rate on life insurance Texas, which is third on the list, however, had a 5 1-percent tax rate for fire insurance, 4 25-percent tax rate for casualty insurance premiums, and a 3 3-percent rate on life insurance premiums Pennsylvania, which is fourth, has a 2-percent gross premiums tax rate, and Ohio, which is fifth, a 3-percent rate on fire insurance, a 2 5-percent rate on casualty insurance, and a 2 5-percent rate on life insurance Thus of the five highest states in the country insofar as tax revenue from the insurance tax is concerned, California is lower than two, i e , Texas and Ohio, and higher than two, New York and Pennsylvania

Of the total revenue from the gross premiums tax for all 50 states collected in 1963, California's was the highest percentage of the total California's tax collections comprised 12 2 percent of the total gross premiums tax collected in the United States, New York was next highest and its gross premiums tax collections were 11 9 percent of the total collected from this tax in the United States in 1963 Texas, which was third, collected only 5 79 percent of the total collected in the United States in 1963 California and New York are the two top-ranking insurance states in the United States, and they are literally in a class by themselves However, it should be noted that although New York's gross premiums tax rate is lower than California's, the New York law

has no in lieu features and New York insurers, therefore, actually may pay a higher rate of tax, when all taxes and fees are taken into account, than California insurers. For that matter, the fact that California is the highest state in the collection of revenue from the gross premiums tax only reflects the fact that more insurance is being written in California then anywhere else in the United States [4]

SOURCE U S Department of Commerce, Bureau of the Census, *Compendium of State Government Finances in 1962*, p 12

Figures A1-6 show the tax rates and yields and features of the tax laws in all of the states

Insurance Tax as a Possible Source of New Revenue

The gross premiums tax, even if it remains unchanged, will result in more tax revenue from year to year, as the insurance industry in California grows. The tax rate that is now effective does not appear to be so high as to be inequitable, when compared with other states, nor so low as to necessitate consideration of any increase in this rate at this time.

However, if the principal office deduction is eliminated, there will be additional revenue from this tax amounting to between $5 and $6 million (see Chapter 3) in the fiscal year 1964–65 If the retaliatory provisions are strengthened there will be an additional slight increase in revenue. (See Chapter 4)

Consideration might also be given to additional taxes on the income of insurers Additional study of this matter is warranted,[5] but it would probably not be practicable to impose an income tax on insurers until

[4] U S Bureau of the Census, *Statistical Abstract of the United States, 1963*, Washington, D C , 1963, p 484

[5] No insurmountable difficulties in the administration of such a tax can be foreseen if it is imposed on the same insurers that pay a federal income tax and it is a percentage of the federal tax paid

such time as more states have done so Otherwise, if the retaliatory provisions remain in effect in the many states in which they are law (see Figure A-4), California insurers would be subjected to additional taxes when they were doing business outside of California in retaliating states

CHAPTER III

THE PRINCIPAL OFFICE DEDUCTION

It is recommended that the deduction for principal or home office real property taxes allowed insurance companies as an offset against the gross premiums tax (but not allowed against the tax liability incurred by ocean and marine insurers) be eliminated and no reduction be made in the tax rate on insurance premiums because of this rescission.

In regard to the principal office deduction, Professor Paul J. Strayer has commented:

> . . This provision has greatly lessened the effectiveness of the tax and has been abused by companies who buy a building, lease a part of it, and gain full exemption for the entire real estate tax. There is no justification for this deduction, and the only reasonable solution is to repeal this provision in its entirety. If this is done, insurance companies will be no more severely treated than other companies, and the local revenue base as well as the state base will be increased significantly.[1]

The material that follows in this chapter implements and details the basis of the above recommendations.

CONSTITUTIONAL PROVISIONS

The provision for the allowable deduction from the tax on gross premiums for the real property tax paid on the home or principal office of an insurance company is embodied in Article XIII, Section 14¼ of the Constitution and is worded as follows:

> Each insurer shall have the right to deduct from the annual tax imposed by this section upon such insurer in respect to a particular year the amount of real estate taxes paid by it, in that year, before, or within 30 days after, becoming delinquent, on real property owned by it at the time of payment, and in which was located, in that year, its home office or principal office in this State. Such real property may consist of one building or of two or more adjacent buildings in which such an office is located, the land on which they stand, and so much of the adjacent land as may be required for the convenient use and occupation thereof.

Should the Legislature wish to eliminate this deduction, now allowed, from the gross premiums tax for real property taxes paid on the home or principal office of the insurance company it must comply with paragraph 1 of Section 14¼, which requires a favorable vote of two-thirds

[1] Paul J. Strayer, *The California Revenue System*, California Teachers' Association, San Francisco, California, 1959, p. 12.

of all the members elected to each of the two houses and the proposal must be placed on the ballot for ratification by the voters of the state

RATIONALE

The rationale of this provision can be better understood if its history is traced, its incidence explained, its equitability considered, and its economic effects are analyzed.

History

The principal office deduction is a vestige from a provision dating back to 1862.

> "Prior to that time, insurance companies were subject to various fees and stamp taxes and to local property taxation Because foreign companies had very little property holdings in the state, the 1862 law levied a 2-percent tax on the gross premiums on foreign insurance companies—forgiving the tax to those that owned more than $50,000 of property located in California.
>
> In 1903, a 2-percent gross premium tax was levied on all insurance companies other than life and in 1905, foreign life companies were added to the gross premium tax law at a 1-percent rate
>
> The 1903 and 1905 premium tax statutes did not provide for any credit for real estate taxes paid, so that as of 1906 the status of California taxation of insurance companies show:
>
> 1 A gross premium tax levied upon foreign companies;
> 2 Retaliatory taxes levied upon foreign companies whose domiciliary state imposed higher taxes than California companies;
> 3. Fees levied on foreign insurance companies; and
> 4. General property taxes levied on both foreign and domestic companies by both state and local governments
>
> The report of the Commission on Revenue and Taxation of 1906 recognized inability of the property tax to reach foreign companies because of the limited investments in California property. Accordingly, the 1906 commission's recommendations submitted to the Legislature in December 1906 were that a 2-percent premium tax be levied on domestic and foreign companies in lieu of all other taxes and licenses except taxes on real estate, that a reduction be given for return premiums and re-insurance and that an offset from the premium tax be given for county and municipal taxes on real estate
>
> The proposal was revised as to the rate of 1½-percent and the power to change it This was passed by the Legislature by Senate Constitutional Amendment 1, of 1909, adopted by the electorate in 1910. And the principal office deduction first became effective in 1911.
>
> This 1910 amendment gave essentially the same tax relief then as does the principal office deduction today
>
> Even though the language of the 1910 amendment appears to be more inclusive than the present constitutional language.

The 1910 amendment provided for an offset against the premium tax for all real estate taxes paid on the property owned by the insurer While this sounds to be much broader in scope than the principal office deduction, it really was not Because Section 415 of the Civil Code which had been in effect since 1872 expressly limited the right of insurers to hold real property, other than that actually used in its business for a period of not more than five years.

The 1905 admendment removed the limitation of $150,000 as the total amount that could be invested in the principal office In other words, a company could own real estate indefinitely if that property was used for home office, or principal office in this state. Other real properties, however, acquired through foreclosures or mortgages, or otherwise, could not be retained, but had to be liquidated by the company and the law gave the company a maximum of five years in which to liquidate such property Thus, even though the credit first granted to the insurance companies in 1910 was in the form of an offset for all real estate taxes paid, other sections in the insurance law restricted the practical effect of this offset to a principal office deduction much similar to that which is found in the law today "[2]

The 1910 tax plan also provided for a gross receipts tax upon all privately owned utilities and exempted these utilities from local property taxes Insurance companies which were taxed on gross premiums, but were not exempt from local property taxes were allowed to offset all of their real estate tax payments against their tax liability resulting from the state levy on gross premiums

This offset initially stemmed from the application of the policy of the "separation of tax sources" Under this policy, state gross earnings taxes were susbstituted for local property taxes on the operating properties of public utilities Insurance companies, philosophically, were held to be akin to public utilities and at that time the personalty of insurance companies was exempted from property tax, and the taxes on their realty were credited against the then 1½-percent state tax on premiums.

Historical records indicate that the crediting of real estate taxes against the insurance premiums tax was instituted in part as a means of encouraging insurance companies to invest their funds in California. Other records indicate, however, that another motive was at least partially responsible

The general property tax was almost the sole support of state and local governments in 1911 There were no state "business taxes" in the sense in which we know them today Businesses were taxed on their property, and when other than ad valorem property taxes were imposed, they were substitutes for not additions to the property tax Under the philosophy of the times, it would have been improper to tax an insurance company on both its premiums and its real estate without

[2] Statement of Mr Lee Groezinger representing the Life Insurance Association of America, at hearings before the Assembly Committee on Revenue and Taxation on AB 2901, held in Fresno on January 31, 1964 The credit or offset was not entirely analogous to the principal office deduction today

offsetting one tax against the other unless it could have been reasoned that the two were totally unrelated, which they obviously were not [3]

The gross receipts tax on utilities was repealed in 1933 and utility property was subjected to local tax levies, but the property tax offset was continued for insurance companies While vestiges of the theory that business taxes were property taxes in disguise were to be found in the tax laws applicable to other corporations until 1933 (at which time the property tax offset against the state franchise tax measured by net income was repealed), the insurance premiums tax is virtually the only tax originating under this theory that has survived to the present day Insurance companies are the only corporations who can do business in California today without paying a business tax to the state.

As a result of foreclosures during the depression years in the 1930's, the offset made serious inroads into the state levy In 1937, in fact, the deduction amounted to 25 percent of the gross insurance tax levy

Recommendations that the offset be abolished resulted in a compromise in 1942, whereby the real estate tax offset allowed insurance companies was limited to taxes paid on California property in which the principal office or the home office of the company was located The elimination was imposed gradually over a period of five years.

In Section 14¼, which was added to Article 13 of the state Constitution in 1942, provision was made for the gradual elimination of the deduction for taxes on real estate not used for operational purposes and the restriction of the real estate deduction, after five years, to taxes on real estate in which the insurer's principal or home office was located The tax on insurers, other than ocean and marine insurers, to compensate for the change, was reduced gradually from 2 6 percent in 1942, to 2 55 percent in 1943, and finally after 1946 to 2 35 percent The offset for taxes on real estate other than the principal office in the state was also diminished gradually In the 1944 assessment, the maximum offset for taxes on real estate other than the principal or home office in the state was 75 percent of the company's 1940 offset on such property. The next year it was 55 percent, the next 35 percent, and then the next 15 percent From 1948 on, only taxes on principal or home offices have been eligible for offset The rates and the rights to the principal office deduction have remained essentially the same since the 1942 legislation

Assembly Constitution Amendment No 21, introduced in 1953, would have eliminated the principal office deduction for general insurers It did not get out of the committee [4] In the 1955 session, Assembly Bill No 3444 would have eliminated the principal office deduction by a provision limiting the amount of the home or principal deduction to the real property tax represented by that portion of the real property actually used for the transaction of insurance business This bill was not passed by the Legislature Nor were any bills to the same effect that have since been proposed

Incidence

The question of incidence is the question of who ultimately pays the tax or on whom it falls In this case it is a question of who pays a higher price and who a lower because the deduction exists

Effect on Consumers Since premiums are set after taxes are considered as one of the costs of doing business,[5] the fact that real property or principal office deductions exist may, in some cases, have made premiums somewhat lower than they otherwise would have been

Evidence exists[6] that premiums are set with competition in mind and insurance companies that are not eligible for the principal office deduction include in their premium rates the full cost of the tax on their property Companies that take advantage of the principal office deduction, need not charge lower rates, but they may on the same type of coverage If they use the principal office deduction, which lowers their cost, as a means of lowering premiums, the consumer benefits, i e , the company pays less tax and the consumer pays less tax as an inclusion in his premium; but the exact extent to which he benefits cannot be accurately estimated However, it must be to a minor extent, for as the following table shows, premium rates charged for the same type of insurance coverage are very similar (See Table 3-1)

If the principal office deduction were eliminated any increase in premiums which might result, competition permitting, would only affect new policy premiums or premiums when the policy is renewed since companies could not change the premium rate on policies already outstanding

TABLE 3-1
Comparisons of Premium Rates *

Company	Type of policy†	10 annual premiums, 1951 scale
John Hancock	Paid up at 85	$277 90
Lincoln National	Ordinary life	278 40
Massachusetts Mutual	Paid up at 85	277 60
Metropolitan Life	Paid up at 85	276 90
Minnesota Mutual	Paid up at 85	278 80
Mutual Trust	Paid up at 85	276 80
New England Life	Paid up at 85	275 70
Northwestern Mutual	Ordinary life	276 40
Ohio National	Ordinary life	274 70
Pacific Mutual	Ordinary life	279 60

* Source *Comparisons* (See footnote 6)
† CSO 2½ percent on all policies

Effect on Tenants What would probably happen if the principal office deduction were eliminated is that the rent of the tenants in the buildings subject to the deduction would be raised, as conditions permitted, to compensate for the "cost" of the additional tax

Effect on Profits To the extent that premiums could not be raised because of existing competition, and rents of tenants could not be

[5] C Arthur Williams, Jr , "Analyzing the Expenses Incurred by Private Workmen's Compensation Insurers," *The Journal of Insurance*, March 1961, p 73 and Insurance Department, Chamber of Commerce, U S A , *Hidden Taxes in Your Premiums*, Insurance Bulletin No 34, 1927, passim

[6] *Ibid*, p 76 and *Comparisons*, reprinted from *Life Insurance Courant*, July issue, annually.

raised, the elimination of the principal office deduction may result in a lowering of profits for those companies that enjoy its benefits

Contrariwise, an inverse effect is equally possible The elimination of the principal office deduction may give insurance companies with a principal or home office in California some excuse to raise premiums. Their action may be followed by their competitors raising their premiums to comparative levels for the same types of coverage Thus prices would increase to some extent and profits would, in turn, increase This is entirely possible since this is an industry characterized by monopolistic competition and often prone to use administered prices [7]

However, it is unlikely that this will cause prices or premiums to increase to a significant extent and this should not serve as a deterrent to the repeal of the principal office deduction

Equity Considerations

The question involved herein is the "fairness" or equitability of the principal office deduction

Competitive Advantage. The principal office deduction serves to give those insurance companies which own office buildings an unfair competitive advantage relative to those insurers that do not In effect, the principal office deduction is a subsidy to the 105 insurance companies (out of the total of 756 against which tax assessments were levied in 1963) that own the building in which their principal or home office is located or the building adjacent thereto and took the deduction in 1963. These 105 companies lowered their 1963 tax liability by $4,766,754, or nearly 11 percent Tax offset reduced the effective tax rate from 2 35 percent to 2 21 percent when computed on the 1962 taxable premiums of all insurers For the companies that took advantage of the principal office deduction, it meant a reduction of their aggregate effective tax rate to 2 09 percent [8]

The 14 percent of the companies that are taking the deduction have an unfair competitive advantage costwise over those companies that do not have a principal office in California Table 3-2 lists the 105 insurance companies owning home or principal offices in 1962 and the amount of principal office deduction allowed as of June 30, 1963

Additional Inequities It may be noted that even though one or more insurance companies may be controlled by another, the deduction for each is still allowed An interesting case in point may be cited Title Insurance and Trust Company controlled several subsidiaries prior to 1962

Three of these, California Pacific Title (San Francisco), Pioneer Title (San Bernardino), and Union Title (San Diego),

[7] *Ibid*, both sources, *passim*, also Allen F Jung, "Rate Variations Among Suppliers of Automobile Insurance," *The Journal of Insurance*, December 1963, pp 573–576, Alfred N Guertin, "Price Competition in the Life Insurance Business," *The Journal of Insurance*, July 1958, *passim*
The industry is characterized by monopolistic competition largely because in almost every case the product is "unique", evidence that prices are administered stems from the fact that rates do not readily respond to changes in supply or demand for the product in the market place One reason for this is that premium rates can only be changed when a new policy is issued or a policy is renewed, also another is that a large segment of the industry sets premium rates in the light of the same information received from the same sources

were merged with the parent on December 31, 1961, thereby eliminating the right of the three subsidiaries in each individual case to take the deduction The total allowable deduction for these three controlled subsidiaries prior to merger was $82,078, yet the parent corporation, Title Insurance and Trust Company, was entitled to $181,971 for the home office of the parent; this deduction did not include the subsidiaries There is nothing wrong with such treatment under the law as it now stands, and in fact it makes good business sense to take deductions for controlled subsidiaries, however, it is doubtful that this was the original intent of the legislation [9]

It was reported that three companies paid no tax on premiums because the deductions were greated than the tax [10]

The 23 insurance companies with the largest principal office deductions in 1961 were selected for an analysis of the effect of the deduction on the gross premiums tax rate Figure 3–1 displays the results of this analysis Effective rates ranged from 0 94 percent to 2 25 percent [11]

SOURCE California State Board of Equalization, *Annual Report*, 1961–62, and insurance company reports to the State Insurance Commissioner's Office
State Department of Finance Budget Division, April 30,1963

There is no direct correlation between effective rates and gross premiums, except that companies with large gross premiums tend to have higher effective tax rates since the net effect of the deduction lessens when it is applied to a larger base It may be noted that within a group of large companies, an adverse correlation may be found The first three insurers in California ranked by total gross premium dollars in 1961 were first, Prudential Life Insurance Company; second, Metropolitan Life Insurance Company; and third, Occidental Life Insurance Company Their effective rates were 2 11 percent, 2 18 percent, and 2 25 percent respectively [12] Apparently, their effective rates of tax were adversely proportional to their gross premiums,

[12] *Ibid.*, p 14.

[1] Fireman's Fund Insurance Company only Remaining 29 percent was occupied by and charged to Home Fire and Marine Insurance Company and National Surety Company, wholly owned insurance company subsidiaries

SOURCE Premium tax returns and annual statements for 1962 filed with Insurance Commissioner by insurance companies, and in certain cases, directly from companies

A similar comparison for 1962 discloses that the insurance company among the 10 with the largest principal office deductions that year that occupied the least amount of its building (Equitable Life Assurance Society of the United States—company occupancy based on Rental Income Ratio, 9 percent) had the lowest tax rate on its net taxable premiums, i e , 1 72 percent [13]

Office Building Subsidy The right to offset local property taxes against the state gross premiums tax has proved to be a powerful incentive for insurance companies to build office structures A detailed study made in 1962 showed that 105 insurance companies owned principal offices in the state About 25 percent occupied the entire building, one-third used less than half of the building

About half the companies apparently viewed the tax concession as a subsidy for their investment in commercial office buildings. The data showed that 41 companies, occupying less than 60 percent of their respective buildings, took a $2 4 million in property tax credits on their state tax returns and had a rental income of $9,736,000 from the lease of space in these principal office structures

These companies had several distinct advantages over other firms in the insurance and the commercial rental fields

1 By offsetting property tax against state tax, they achieved a reduction from the statutory 2 35-percent rate to an average of 1 89 percent
2 By passing on their property tax to the state, they achieved a $2 4 million advantage over other commercial building operators on a rental income of $9 7 million
3 By leasing space in their commercial structures to others, many insurers had a completely tax-free source of income as far as California was concerned
4 By owning an insurance company, at least one major commercial enterprise charged off the property tax on its office building against the premium tax on its insurance business
5. By offsetting the property tax against the insurance tax, they escaped the 100 percent property tax increase since 1945 [14]

TABLE 3-4

SOURCE State of California, Department of Finance, Budget Division

[13] *Ten Insurance Companies With the Largest Principal Office Deduction Offset Against Gross Premiums Tax in California in 1962 and Effective Gross Premiums Rate Resulting From the Offset*

[14] California, State Department of Finance, Budget Division, *Highlights of Proposed Changes in the Insurance Tax*, California State Printing Office, Sacramento, 1964, pp. 3–4.

A few illustrations of the manner in which this subsidy has been used follows (the cases cited illustrate the situation in 1961):

A New York insurance company:	
Occupied 8.4 percent of its building	
Had rental income of	$1,745,000
Had a gross state insurance tax of	1,750,000
But offset property tax of	422,000
Thus reduced its state insurance tax rate from 2 35 percent to 1 74 percent.	
An Illinois company:	
Occupied 3 5 percent of its building	
Had rental income of	$332,000
Had a gross state tax of	215,000
But offset property tax of	77,000
Thus reduced its state insurance tax rate from 2 35 percent to 1 50 percent.	
A California company:	
Owned by a transportation company	
Occupied 10 1 percent of its building	
Had rental income of	$971,771
Had a gross state tax of	198,118
But offset property tax of	118,793
Thus reduced its state insurance tax rate from 2 35 percent to 0 94 percent	
Another California company:	
Occupied 38 0 percent of its building	
Had rental income of	$1,069,000
Had a gross state tax of	883,281
But offset property tax of	290,519
Thus reduced its state insurance tax rate to 1 60 percent	
Another company:	
With taxable premiums of	$3,024,903
Occupied 8 5 percent of its building	
Had rental income of	713,225
And a computed tax of	71,085
Took a principal office deduction of	74,247
And paid no state insurance tax	
Still another example:	
Taxable business	$980,207
Computed tax	23,035
Principal office deduction	24,077
Paid no insurance tax	

Two British and one California companies jointly owned an office building on Montgomery Street in San Francisco They occupied 11 7 percent of the building In 1961, they obtained rental income of $745,000 and paid $131,836 in property tax with the following results on state tax:

	California Company	*British Company*	*British Company*
Insurance premiums	$1,459,801	$1,701,315	$2,309,438
Gross tax	34,305	39,985	54,272
Principal office deduction	32,959	32,959	65,918
Net tax	$1,340	$7,022	Nil
Effective tax rate	0 09%	0 40%	None

Compared with a statutory tax rate of 2 35 percent, the California company had an effective insurance tax rate of less than one-tenth of 1 percent, one British company had an effective rate of less than one-

half of 1 percent, and the other paid no state tax whatever on over $2 3 million of California premiums [15]

Charts showing the insurance companies with principal office deductions of $50,000 or more in 1961, and those with the 10 largest principal office deductions in 1962 are attached (See pp 42 and 43.) It may be noted that the relative positions of the companies insofar as their principal office deductions are concerned were unchanged It may be noted that the net tax rate of the Equitable Assurance Society of the United States had a decrease (1.74 percent to 1.72 percent) and so had the rate of John Hancock Mutual Life Insurance Company (1 73 percent to 1 63 percent), and the Prudential Insurance Company of America (2.11 percent to 2.07 percent). Where there were increases, they were slight (Firemens Fund Insurance Company's net tax rate went from 2 06 percent to 2 07 percent) There is no question of the fact that this is a differential subsidy based on whether or not the insurance company owns property with a higher or lower rental value. The amount of the subsidy depends upon (1) how much property the insurance company owns which qualifies for the principal office deduction, and (2) how much tax-sheltered rental income it derives from this property.

Economic Effects

The question may be raised as to whether the elimination of the principal office deduction will destroy the incentive for insurance companies to set up principal or home offices in California, and the further question as to whether it will decrease the amount of insurance written in California, thus having adverse effects upon employment in the insurance industry, and the income derived therefrom; and consequently, upon the level of economic activity in the state.

The Location of Home Offices in California Evidence indicates that insurance companies have located in California because there was business to be written in this part of the country and this was a logical location from which to write it, rather than because there was a tax advantage in locating a principal or home office here As Dean Robert R. Dockson stated·

> All the leading companies have recognized since World War II the growing importance of the California market for . insurance Many of them have accelerated their activities by increasing both their personnel and physical facilities in the state. Prudential, for example, established a western home office in Los Angeles in 1948 and, as of that year, greatly expanded its sales efforts From 1948 to 1957, this company increased its share of California's ordinary life insurance in force from 12 9 percent to 14 6 percent [16]

[15] California, State Department of Finance, Budget Division, *Insurance Tax—Elimination of Principal Office Deduction*, California State Printing Office, Sacramento, May 1, 1963, pp 4–5 Charts showing percent of occupancy for all companies claiming principal office deduction in 1962 and Table showing insurance companies with deductions over $25,000 in 1962 are on pp 54–55 below

[16] Robert R Dockson, *The Insurance Industry in the California Market*, Union Bank, Los Angeles, California, 1959, p 10

And he later stated,

> Since 1940, the total premiums written for all types of insurance have advanced more than 500 percent in California compared with 345 percent for the entire United States The more rapid rate of growth of premiums in California is a reflection of the state's expanding economy more than any other single factor.[17]

It is doubtful if the incentive for an insurance company to locate in California will be imperiled by the elimination of the principal office deduction For that matter, this deduction exists in only three other states, Alabama, Florida, and Utah Of these, only Utah allows the deduction without limitations In Alabama, the deduction is only given if the property is occupied 50 percent by the insurance company In Florida, the deduction is only given if it applies to a regional office serving three or more states that is owned by an out-of-state insurance company and is substantially occupied by that company [18]

None of these three states is among the top-ranking states insofar as the number of insurance companies located in the state or insurance written in the state is concerned, and there is little likelihood of insurance companies locating in them rather than in California [19]

The Effect Upon the Amount of Insurance Written in California The elimination of the principal or home office deduction should have little or no effect upon the amount of insurance written in California for the amount of premiums an insurance company writes is not affected by the fact it may deduct the tax on its principal or home office and thus pay less taxes True, insurers attempt to maximize profits after taxes but tax or no, the insurance industry is characterized by decreasing unit costs [20] and insurers will only maximize profit if they increase volume, not if they decrease supply In fact, according to economic theory since the premiums tax is included in "costs" when premiums are set, firms, as a consequence, should try to write more insurance than would otherwise be the case were there no tax, for the quantity written at which marginal revenue just covers marginal costs, and profits are maximized, is greater than it would be if "costs" were lower If anything, elimination of the deduction will serve as an incentive to increased effort and thus may serve to increase employment in the insurance industry in California

Effect on Companies' Ability to Compete Outside of State. California insurance companies pay a higher rate of tax on premiums than life insurance companies in 33 other states, than fire insurance companies in 19 other states, and than casualty insurance companies in 32 other states.[21]

If the comparison is made on the basis of the effective tax rate, then 22 states in the case of life insurance companies have a higher rate

[19] See *Cyclopedia of Insurance in the U S*, 1962, The Index Publishing Company, Paterson, New Jersey, p 485, for number of life insurance companies in the various states and for ranking by insurance tax collected in the state
[20] C Arthur Williams, *op cit*, p 73
[21] Source of rates *Quarterly Payments of Insurance Tax*, State of California, Department of Finance, Budget Division, May 1, 1963, p 7

than California, 34 states have a higher rate on premiums of fire insurance companies, and 21 states have higher rates on premiums of casualty companies However, since the principal or home office deduction makes a difference of only 0 26 of 1 percent, on the average, in the effective tax rate paid by the insurance companies on premiums, it will not change their relative position, taxwise, appreciably as compared with other states

The elimination of the principal or home office deduction will only eliminate the differential in effective tax rates for those companies that qualify for this deduction Others are competing successfully without it

Thus it cannot be argued from any strong economic base that the principal or home office deduction's elimination will cause any appreciable economic hardship on California insurance companies insofar as their ability to compete with insurance companies in other states is concerned

Effect Upon the Availability of Office Space Elimination of the principal office deduction will in all likelihood have some effect upon the amount of office space available in California since without this added incentive, some insurance companies may not build office buildings for rental purposes This raises the question of whether it was the intent of the principal office deduction to encourage the building of office buildings where space would be available for rental According to all available data, this was never the intent of the provision

It cannot be argued that this subsidy is needed because there is a shortage of office space in California Recent vacancy rates for office space in commercial buildings in California were estimated at 6.98 percent [22] From an economic viewpoint there is no justification for an increase in this subsidy In fact, to the contrary, its elimination should serve to stimulate sales effort to some extent, encourage the growth of the insurance industry and increase employment in California

PRESENT EXTENT

The local property tax credits (or the principal or home office deduction) claimed by California insurance companies in 1963 amounted to $4,766,754.

Number Taking Deduction —Although the number of insurance companies authorized to do business in California is still increasing, as indicated by Table 3-5, the number of companies taking the principal office deduction has leveled out in the last five years In 1948, 10 3 percent of all insurance companies were taking the deduction, and by 1958 this had increased to 15 1 percent. There has been a slight decline of 1 percent in the last four years; however, because of the increase in the total number of authorized companies, there has not been a reduction in the number of companies taking a deduction. The latest figures show that of 761 authorized companies, 105 (or 13 8 percent) are taking the deduction.

[22] Figure for October 1962 Now higher Estimates from Thomas Frey, Ph D, economist, San Diego First National Trust and Savings Bank, based on data from National Association of Building Owners and Managers
The office vacancy rate for early 1964 in California cities was estimated at 17 percent, *Skyscraper Management*, June 1964, p 7.

Governor Brown stated:

> "Curiously, only one out of every seven insurance companies have taken advantage of this deduction. In many instances the home office is principally an insurance company office But in many other instances it is a commercial structure, housing stores, offices, garages and other business tenants in direct competition with other commercial building operators who receive no offset against their state tax obligations "[28]

Comparison With Other Years—The amount of the principal or home office deduction claimed in 1963 was 521 percent of the amount claimed in 1949, the first year in which only the taxes on the principal or home office could be claimed as a credit against the gross premiums tax.

TRENDS

"The principal office deduction" has increased 421 percent over the last 14 years In 1963 it was over four times what it was in 1950 Table 3-6 shows the increase in the principal office deduction from 1911 through 1963.

TABLE 3-5

Insurance Companies Authorized to Do Business in California, With Number and Percentage Taking Principal Office Deductions *

Fiscal year ending 6-30	Number of insurance companies authorized to do business in California	Number with principal office deductions	Percent of companies taking deductions

1958	675	102	15 1
1954	638	89	13 9
1948	621	64	10 3

*SOURCE To 1963 from A Report of the Senate Fact Finding Committee, *op cit*, California State Board of Equalization, *Annual Report*, 1963

Over the years since 1911 the average rate of local property tax credits claimed to taxes assessed on premiums has been 7.54 percent. Over the last 10 years the average rate has been 5 percent. If taxes assessed on premiums and taxable premiums increase at the same rate as they have over the past five years, and no more, at the average rate of 5 5 percent of the taxes assessed on premiums in 1972–1973, the principal office deduction should amount to at least $11 million

(The amount of increase of local property tax credits claimed each year over the previous year from 1947 through 1963 is shown in Table 3-7.)

More probably the minimum of the tax credit will be in the neighborhood of $12 million The maximum as Table 3-8 indicates will be about $19 million. Table 3-8 shows the estimated increase of the real property tax deduction from the gross premiums tax projected to 1973

[28] *Statement of Governor Edmund G Brown on Tax Reform and Revenue Recommendations*, transmitted to the California Legislature on Tuesday, March 19, 1963, p 15

[a] Includes only assessments showing a tax liability
[b] Includes retaliatory assessments (except for the period from 1945, when the retaliatory tax law was repealed, through 1959 when the law was reestablished), penalties for late filing or nonfiling of returns, and adjustments of prior-year taxes
[c] Includes penalties for late filing or nonfiling of returns By constitutional amendment adopted in 1930, ocean marine insurance was removed from the scope of the gross premiums tax and subjected to a 5 percent tax on underwriting profits
[d] Includes penalties for late filing or nonfiling of returns and adjustments of prior-year taxes
[e] In 1957, life insurance companies writing disability insurance were assessed only once In all prior years such companies were assessed twice, one assessment covered their life insurance and annuity policies, and one covered their disability insurance business In 1958 there were 93 such companies
[f] Beginning in 1952, the State Compensation Insurance Fund has been subject to assessment by the board
[g] The declining tax rate from 1944 to 1948 was intended to compensate for a gradual restriction of the real estate tax offset privilege In the 1944 assessment, the maximum offset for taxes on real estate other than the principal office in the state was 75 percent of the company's 1940 offset on such property The next year it was 55 percent, the next 35 percent then 15 percent From 1948 on, only taxes on principal offices have been eligible for offset

1971–72	11,239,754	1,021,796	16,768,850	2,187,241
1972–73	12,363,729	1,123,875	19,284,173	2,515,323
Total	$83,566,746	--------	$123,979,913	--------

The projection shown below based on the past five years' experience corroborates that the deduction would be in the neighborhood of $11 million by 1973: [24]

	Year	Taxes assessed on premiums	Increase over previous year	Increase as a percent of previous year's taxes assessed
Average increase 9 3%	1958	$53,461,244	$5,095,521	10 5
	1959	58,377,347	4,916,103	9 1
	1960	65,169,948	6,792,601	11.6
	1961	71,235,283	6,065,335	9 3
	1962	75,504,917	4,269,634	5 9
	1963	82,521,529	7,016,612	9 2
Projected at 9%	1964	89,948,467	7,426,938	9
	1965	98,043,829	8,095,362	9
	1966	106,867,774	8,823,945	9
	1967	116,485,874	9,618,100	9
	1968	126,969,603	10,483,729	9
	1969	138,396,867	11,427,264	9
	1970	150,852,585	12,455,718	9
	1971	163,808,303	14,697,747	9
	1972	178,006,050	16,020,545	9
	1973	194,008,595		9

As Tables 3-7 and 3-8 indicate, however, the local property tax credits claimed may well be expected to increase 13 percent a year over the next 10 years, if the experience of the past 15 years serves as a basis for the forecast

REVENUE EFFECTS

The statistics reflecting the growth of the principal or home office deduction indicate that a minimum of approximately $83,566,746 will probably be lost to the state in tax revenue in the next nine years, if the provisions authorizing this deduction are not rescinded. By 1973, the state will probably be losing between $12 and $16 8 million annually in revenue because of this deduction (See Tables 3-7 and 3-8) This loss in tax revenue may amount to as much as $123 million between now and 1974

SUMMARY AND CONCLUSIONS

The case against the principal office deduction may be briefly stated as follows:

1 It serves to complicate the state's tax structure
2. California is one of only four states allowing a tax offset for property taxes paid by insurance companies on their principal or home offices and none of the other three are high-ranking insurance states.
3 It results in a loss in tax revenue In 1963 this principal office deduction amounted to $4,767,000; and it is increasing by approximately $500,000 a year
4. In some instances this provision has become a tax "loophole" Only one out of seven insurance companies is in a position to take this deduction. Of the 761 insurance companies subject to the state tax on gross premiums in 1962 only 105 owned their principal or

[24] This admittedly is too conservative a forecast It is based on the prediction that taxes assessed on premiums as shown will increase at the rate of only 9 percent a year and the principal office deduction will remain 5½ percent of taxes assessed on premiums

home office and took the real estate tax deduction These insurance companies achieved an average reduction of 11 percent in their state insurance tax rates Thirteen companies using less than 50 percent of their buildings took $1 8 million in tax credits, had at least $7.3 million in rental income, and achieved a 15-percent reduction in their state gross premiums tax in 1961 because of the principal office deduction

5 The principal or home office deduction is a subsidy In many instances the structure involved is a multistory office building or other commercial building, only a part of which is occupied by the owner for insurance purposes The remainder is leased to tenants and the source of tax-sheltered rental income, since the gross premiums tax is levied in lieu of all other taxes and fees—state, county and municipal—except those on real estate and motor vehicles Insurance companies receiving the offset against the premiums tax have a competitive advantage over those who do not

6. The principal office deduction has been increasing 60 percent faster than the tax base [25]

7. Removing this subsidy will most probably not affect premium rates or profits to any marked extent

8 It is not needed as an incentive to attract insurance companies to locate principal or home offices in California

9 Its rescission will serve to increase the amount of insurance written in California, employment in the insurance industry in this state and the state's revenue from the gross premiums tax

In order to eliminate this deduction it will be necessary to amend the Constitution, since the provision for this offset is contained in both the state Constitution and the Tax Code In accordance with the requirements of paragraph (1) of Section 14¼ of Article XIII of the Constitution, a favorable vote of two-thirds of the members elected to both houses of the Legislature will be necessary before this provision can be eliminated from the Constitution

If the deduction for the principal or home office real property tax is eliminated, it is estimated that the additional revenue resulting for the state would be between $5 and $6 million in the fiscal year 1964–65 By 1970–71 the additional revenue would amount to a minimum of $10 million Over the next 10 years the minimum of total additional revenue for the state resulting from the elimination of the deduction will be over $83 million The maximum will be over $120 million.

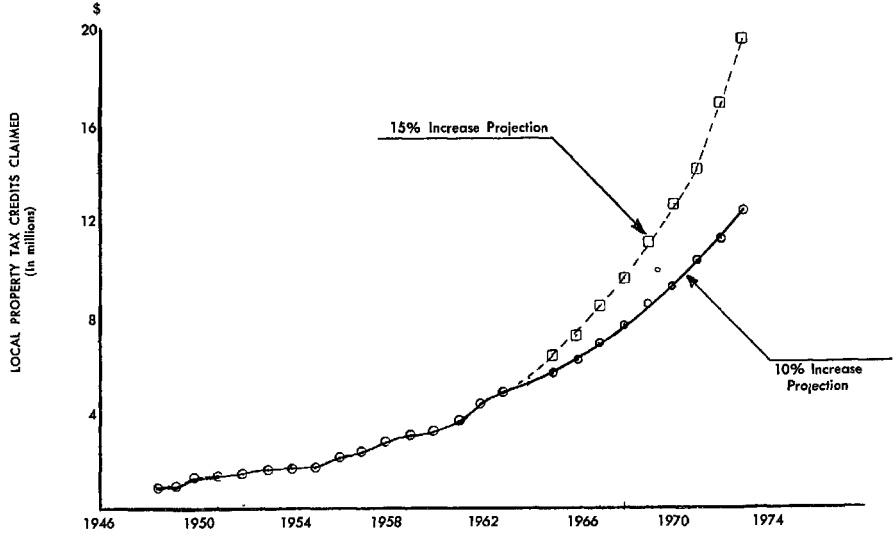
PROJECTED INCREASE IN THE PRINCIPAL OFFICE DEDUCTION



CHAPTER IV

RETALIATORY TAXATION

The taxation of insurance companies by states is unique in that most states have "retaliatory" legislation that in effect provides that if one state taxes or regulates the insurance companies of another more or differently than the second state taxes or regulates the insurance companies of the first, then the second state may, in turn, tax or regulate the insurance companies of the first state so that the taxes or regulations borne by the companies are equalized between the two states The essence of retaliatory legislation is simply "revenge "[1] The conflict which occasions the laws is between states, not between domestic and foreign companies in the same state The effect of these statutes is to subject insurance companies of higher taxing and more stringently regulated states to retaliation in other states Hence, the domestic companies enduring retaliation because they are based in the higher taxing state have, in many instances, brought pressure to bear on the legislatures of their own state to keep foreign rates low [2]

Retaliatory legislation is one of the methods that has been used by the insurance industry to oppose increases in taxes levied or the imposition of certain types of regulation by state and local governments [3]

Forty-four states now have retaliatory provisions in their statutes relating to insurance companies As far as the states are concerned, retaliatory legislation serves two purposes For those states that have domestic companies, if there is any appreciable number of domestic companies in the state, the purpose is generally to protect the domestic companies from higher tax rates and more stringent regulations that may be imposed by other states on their operations therein. However, for those states that have relatively few domestic companies operating outside of their borders, the purpose is to raise revenue Retaliatory laws are generally applicable to similar impositions and bases but the question of what is a similar imposition or a similar base has posed many problems since the retaliatory provisions of the various states contain many dissimilarities (See Figure A-4)

California is the only state in which the retaliatory provisions of the law are contained in the Constitution and only in California is it required that taxes, fees, or regulations be discriminatory with respect to the California insurer as compared with a domestic insurer of the other state or country before California may take retaliatory action.

Present California Provisions

Presently, the retaliatory provisions in the California law are in paragraph (3) of subsection (f) of Article XIII, Section 14¼ of the

[3] *Ibid*

Constitution, in Chapter 3 5, Sections 12281 through 12290 of Part 7 of Division 2 of the Revenue and Taxation Code; and in Section 685 of the Insurance Code.

Paragraph (3) of Subsection (f) of Article XIII, of Section 14¼ of the California Constitution states.

> When by the laws of any other state or country any taxes, fines, penalties, licenses, fees, deposits of money or securities or other obligations or prohibitions are imposed on insurers of this State doing business in such other state or country, or upon their agents therein, in excess of those imposed upon insurers of such other state or country or upon their agents therein, so long as such laws continue in force, the same obligations and prohibitions of whatsoever kind may be imposed by the Legislature upon insurers of such other state or country doing business in this State, or upon their agents herein.[4]

Chapter 3 5 which was added to Part 7 of Division 2 of the Revenue and Taxation Code in 1961[5] provides for annual retaliatory tax information returns; penalties for the failure to file the returns on time; the recommendation to the Board of Equalization by the Insurance Commissioner of the amount of retaliatory tax payable by each insurer; the assessment of the tax due by the Board of Equalization annually; the applications for correction of the tax due by insurers, increases or decreases of assessment, due dates, payment of the tax, interest and penalties for delinquencies; and deficiency assessments.

Section 685 of the Insurance Code which became effective in September of 1959 states:

> When by or pursuant to the laws of any other state or foreign country any taxes, licenses and other fees, in the aggregate, and any fines, penalties, deposit requirements or other material obligations, prohibitions or restrictions are or would be imposed upon California insurers, or upon the agents or representatives of such insurers, which are in excess of such taxes, licenses and other fees, in the aggregate, or which are in excess of the fines, penalties, deposit requirements or other obligations, prohibitions, or restrictions directly imposed upon similar insurers, or upon the agents or representatives of such insurers, of such other state or country under the statutes of this State, so long as such laws of such other state or country continue in force or are so applied, the same taxes, licenses and other fees, in the aggregate, or fines, penalties or deposit requirements or other material obligations, prohibitions, or restrictions, of whatever kind shall be imposed upon the insurers, or upon the agents or representatives of such insurers, of such other state or country doing business or seeking to do business in California Any tax, license or other fee or other obligation imposed by any city, county, or other political subdivision or agency of such other state or country on California insurers or their agents or representatives shall be deemed to be imposed by such state or country within the meaning of this article[6]

[4] State Board of Equalization, *California Tax on Insurers*, 1963, p 6
[5] Statutes, 1961, p 984, in effect March 31, 1961
[6] Added by Statutes 1959, p 4945, in effect September 18, 1959

Section 685 also contains Subsection 685 1 which states that Section 685 shall not apply to personal income taxes, ad valorem taxes on real or personal property, special purpose obligations or assessments imposed before the effective date of the section by another state or foreign country in connection with particular kinds of insurance, other than property insurance However, deductions from premiums taxes or other taxes allowed because of real estate or personal property taxes are to be taken into consideration when determining the amount of the retaliatory tax.

Subsection 685 2 clarifies the determination of the domicile of alien insurers

Subsection 685 3 imposes upon the Insurance Commissioner the duty of enforcing the provisions of Section 685 and upon the State Board of Equalization, the Board of Control, and the State Controller, the duties of enforcing the provisions of Section 685 that fall within the scope of their duties and powers

Subsection 685.4 makes the provisions of Section 685 applicable to reciprocals, interinsurance exchanges, and fraternal benefit societies.

History

Section 14¼ of Article XIII of the California Constitution authorized the Legislature to adopt a retaliatory tax on insurance companies under the following conditions· (1) if taxes, fines, penalties, licenses, fees, deposits of money for securities or other obligations or prohibitions were imposed on California insurers doing business in another state or country, or upon their agents therein, in *excess* of those imposed upon the insurers of the other state or country, or their agents, in California, (2) for as long as the retaliatory laws of the foreign state or country applying to California insurers or their agents were in force; and (3) if the same obligations and prohibitions could be imposed by the Legislature on the insurers of the other states or their agents, for the Constitution provided that the same ones were to be imposed [7]

Since at least as early as 1872, California has taxed foreign insurers[8] and a retaliatory tax was in effect from 1872 until 1945 when in response to a ruling by the United States Supreme Court the Legislature repealed the retaliatory provisions[9] in the California law In 1959, Chapter 2120 was adopted by the Legislature amending Section 685 of the Insurance Code to provide for such taxes to be exacted in California when other states taxed or regulated California insurance companies more stringently than their own home-based companies The 1959 retaliatory statute was designed to cover all foreign insurance companies from all states and countries However, some foreign companies pointed to the present language of the California Constitution and claimed exemption from the effect of the statutes [10]

[7] California Constitution, Article XIII, Section 14¼, subdivision (f), paragraph 3
[8] Political Code, Section 622
[9] It was held in *U S v South-Eastern Underwriters Association* (1944), 322 U S 523, that insurance could be the subject of interstate commerce However, any effect that this decision might have had upon retaliatory insurance taxes was stayed by Congressional action (*Prudential Insurance Co v Benjamin* (1946), 66 S Ct 1142)
[10] See *Franklin Life v State Board of Equalization*, Civil 21798, District Court of Appeals, First Appellate Division, California, Pending

In 1960 the language of the statute was ruled by the Attorney General to be in conflict, in part, with the provisions of the Constitution. To quote the Attorney General

> . . the Constitution expresses the power of the Legislature to impose retaliatory taxes when, by the laws of another state, taxes are imposed on California insurers . in excess of those imposed upon insurers of such other state In contrast, the Insurance Code section appears to make the test for application of retaliation on the basis of a comparison between amounts imposed on California insurers by the other state and amounts imposed by the laws of California upon similar insurers of the other state doing business here [11]

He further stated:

> . . . the Insurance Code section provides that where the foreign state charges California companies more than California charges the companies of that state, then California shall retaliate by assessing additional tax sufficient to bring the California exaction up to the amounts which the foreign state would charge a California company on the same business But the Constitution prescribes that California taxing authorities may do this only when the foreign state charges California companies and their agents doing business there more than it charges its own domestic companies and their agents in that state . . .[12]

Assembly Constitutional Amendment 27, which is now proposed, is an amendment to eliminate this conflict and to prevent foreign insurance companies from not paying retaliatory taxes because of the present wording of the constitutional provision In effect, the proposal is to insure that foreign insurance companies will be treated in California as California insurance companies are treated in the foreign states

Proposed Constitutional Amendment

Assembly Constitutional Amendment 27, now proposed as an amendment to subdivision (f) of Section 14¼ of Article XIII of the California Constitution, adopted June 26, 1963, with the Senate concurring, to be submitted to the voters in November of 1964, reads as follows·

CALIFORNIA
Regular Session

ASSEMBLY CONSTITUTIONAL AMENDMENT No. 27*

A resolution to propose to the people of the State of California an amendment to the Constitution of the State, by amending subdivision (f) of Section 14¼ of Article XIII, relating to retaliatory taxation of insurers

Resolved by the Assembly, the Senate concurring, That the Legislature of the State of California at its 1963 Regular Session commencing on the seventh day of January, 1963, two-thirds of the members elected to each of the two houses of the Legislature voting therefor, hereby proposes to the people of the State of California that the Constitution of the State be

[11] *The Tax Digest,* First Quarter 1964, p 24
[12] *Ibid*
* California Regular Session, 1963 New Laws, Page 1765

amended by amending subdivision (f) of Section 14¼ of Article XIII thereof, to read

(f) The tax imposed on insurers by this section is in lieu of all other taxes and licenses, state, county, and municipal, upon such insurers and their property except:

(1) Taxes upon their real estate

(2) That an insurer transacting title insurance in this State which has a trust department or does a trust business under the banking laws of this State is subject to taxation with respect to such trust department or trust business to the same extent and in the same manner as trust companies and the trust departments of banks doing business in this State

(3) When by or pursuant to the laws of any other state or foreign country any taxes, licenses and other fees, in the aggregate, and any fines, penalties, deposit requirements or other material obligations, prohibitions or restrictions are or would be imposed upon California insurers, or upon the agents or representatives of such insurers, which are in excess of such taxes, licenses and other fees, in the aggregate, or which are in excess of the fines, penalties, deposit requirements or other obligations, prohibitions, or restrictions directly imposed upon similar insurers, or upon the agents or representatives of such insurers, of such other state or country under the statutes of this State, so long as such laws of such other state or country continue in force or are so applied, the same taxes, licenses and other fees, in the aggregate, or fines, penalties or deposit requirements or other material obligations, prohibitions, or restrictions, of whatever kind shall be imposed upon the insurers, or upon the agents or representatives of such insurers, of such other state or country doing business or seeking to do business in California. Any tax, license or other fee or other obligation imposed by any city, county, or other political subdivision or agency of such other state or country on California insurers or their agents or representatives shall be deemed to be imposed by such state or country within the meaning of this paragraph (3) of subdivision (f).

The provisions of this paragraph (3) of subdivision (f) shall not apply as to personal income taxes, nor as to ad valorem taxes on real or personal property nor as to special purpose obligations or assessments heretofore imposed by another state or foreign country in connection with particular kinds of insurance, other than property insurance, except that deductions, from premium taxes or other taxes otherwise payable, allowed on account of real estate or personal property taxes paid shall be taken into consideration in determining the property and extent of retaliatory action under this paragraph (3) of subdivision (f).

For the purposes of this paragraph (3) of subdivision (f) the domicile of an alien insurer, other than insurers formed under the laws of Canada, shall be that state in which is located its principal place of business in the United States.

In the case of an insurer formed under the laws of Canada or a province thereof, its domicile shall be deemed to be that province in which its head office is situated.

The provisions of this paragraph (3) of subdivision (f) shall also be applicable to reciprocals or interinsurance exchanges and fraternal benefit societies.

(4) The tax on ocean marine insurance.

(5) Motor vehicle and other vehicle registration license fees and any other tax or license fee imposed by the state upon vehicles, motor vehicles or the operation thereof.

Adopted, June 21, 1963

Since this amendment contains the wording of Section 685 of the Insurance Code and is proposed to eliminate the conflict between Section 685 of the Insurance Code and the constitutional provision governing retaliatory taxation, a comparison will be made between the constitutional amendment and the code provision, and the effects of both, and

an analysis will be made to determine if the proposed changes will succeed in this objective.

Assembly Constitutional Amendment No. 27 and Section 685 of the Insurance Code Paragraph (3) of subdivision (f) in the amendment to Section 14¼ of Article XIII of the Constitution adds the words "or pursuant to" after the words "whereby" so that retaliatory action may be taken by this state in the cases where California insurers are discriminated against through *executive actions* taken pursuant to the laws of the "foreign" state, not just when the law discriminates

"Or *foreign* country" was the phrase used after "any other state" when the Insurance Code provision was written Since the constitutional provision stated in any "other state or country," it might have been construed as applying to the United States Therefore, the word "foreign" was apparently required for clarification

The addition of the words "in aggregate" after "any taxes, licenses, and other fees" was necessitated in order that a comparison might be made between the aggregate taxes, licenses, and fees, imposed upon California insurers in the other state or foreign country and those imposed in California upon their insurers These aggregates can, in most cases, be feasibly computed and compared Without the words "in the aggregate," the Insurance Commissioner was being asked to compare unlike entities Comparisons had, at times, not only been difficult but impossible [13] It should also be noted that it had been held that the aggregate of all taxes had to be compared with the aggregate of taxes in the other state to determine if retaliation was in order [14] The words "fines, penalties, deposit requirements, or other material obligations, prohibitions, or restrictions" were placed after the words "in the aggregate" because these are not directly amenable to summation in dollars and cents in every case and therefore are more practicably retaliated against separately and individually rather than in the aggregate, and not necessarily in terms of money

The word "requirements" was added in the code after the word "deposit" so that not only actual deposits made but whatever deposits were required whether they had as yet been made or not by California insurers could be the object of retaliation

The word "material" was added in the code before the word "obligations" because it had proven difficult to compare or assess nonmaterial obligations

The word "restrictions" was added in the code provision to permit California to retaliate when California companies were subject to restrictions in other states in which they were doing business, which California did not impose upon their insurers or their agents. There were many such

The words "or would be" were added to restrain other states from discriminatory impositions upon California insurers by putting them on warning that if any discriminatory provisions were applied to California insurers they could expect the same ones to be applied to their domestic insurers doing business in California

[13] Robert S Felton, *op cit*, p 72, and *State* v. *Continental Insurance Company*, 67 Indiana Appellate 536, 116 F E 929

[14] *Employers Casualty Company* v *Hobbs*, 149 Kansas 774, 89 p 2d 933, 1939

"Upon California" insurers was substituted for "insurers of this state" for clarity.

"Or representatives of such insurers" was added so that not only agents but representatives were covered under this provision. In some states attempts had been made to tax representatives rather than insurers or their agents, since no retaliation was foreseen as resulting from the taxing of representatives [15] New Jersey, for example, was one of these states

The phrase "which are in excess of such taxes, licenses, and other fees, in the aggregate, or which are in excess of the fines, penalties, deposit requirements, or other obligations, prohibitions, or restrictions directly imposed upon similar insurers, or upon the agents or representatives of such insurers of such other state or country under the statutes of this state," was substituted for "in excess of those imposed upon insurers of such other state or country or upon their agents therein" to clarify the provision and to make it more easily administerable since it provides for direct comparisons of aggregates or of separate provisions that were directly imposed.

The words "or are so applied" were added so that retaliation could be made for as long as discriminatory laws were applied to California insurers.

The words "of whatever kind" were added after the words "or restriction" to strengthen the preventive effect of the provision as it applied to restrictions.

But most important the word "may" in the clause "may be imposed by the Legislature" was changed to "shall" in the Insurance Code making the California provision *mandatory*—rather than permissive.

The sentence "Any tax, license, or other fee or other obligation imposed by any city, county, or other political subdivision or agency of such other state or country on California insurers or their agents or representatives shall be deemed to be by such state or country within the meaning of this paragraph (3) of subdivision (f)" was added to permit retaliation against local taxes and to permit local taxes to be included when computing the aggregate dollar amount paid in another state or country by California insurers or their agents or representatives in taxes, licenses, and fees so that this aggregate might be compared with the aggregate dollar amount paid in taxes, licenses, and fees to California by the insurers, and agents, or representatives from another state.

All in all Section 685 of the Insurance Code is much stronger and clearer in so far as its retaliatory effects are concerned than the existing constitutional provision and bringing the Constitution into conformity with this section will serve to strengthen the retaliatory power of the California law,[16] so that it cannot only be used against states that have clearly discriminatory legislation favoring their own insurers, but against all states in which California companies pay more in taxes and fees or are under more severe impositions than the companies of

[15] Harris, *op cit*, pp 330–331

[16] California under its Constitution cannot retaliate if California companies and domestic companies pay the same rates and fees and are subject to the same regulations, even if the taxes or fees in the other state are higher than those paid by the other states' insurers in California and its regulations are more stringent than California regulations

the other states have imposed upon them in California; and it will furthermore eliminate the conflicts between the Constitution and the code.

Arguments for the Amendment (Assembly Constitutional Amendment 27)

The arguments presented for the amendment by its proponents are as follows:

Forty-four states, including California, have enacted insurance company retaliatory laws This proposal revises the provisions of California's Constitution to parallel those in the laws of the 43 other states

Retaliatory laws primarily affect the total amount of taxes, licenses and fees a foreign insurer must pay to a state that has higher taxes, licenses and fees than California, the retaliatory law operates automatically to impose on insurers from such other state the same higher taxes, licenses and fees that such state imposes on California insurers

The present California constitutional provision permits retaliation only if the other state discriminates between insurers domiciled in that state and California insurers This requirement is unique to California, and is not in the law of any other state

The principal change made by this amendment deletes this unique requirement, so that California's retaliatory law hereafter will apply to insurers from other states in the same manner the other 43 states now apply their retaliatory laws to California insurers

Additionally, this amendment changes the language of California's constitutional provision to conform with that of the model retaliatory law, which model law was added to the California Insurance Code by Chapter 2120, Laws 1959, and has been included in all modern insurance codes enacted by other states since 1958

These phraseology changes prescribe in detail the rules included in this model law for determining how and when retaliation is to be applied. Adding these details to the Constitution does not change the substance of the law in these respects, but will prevent any possible confusion in applying the Insurance Code retaliatory provisions, and will promote uniformity in interpreting retaliatory laws throughout the country

Including such details of insurance company taxation in the Constitution has been done in California since 1910 Other constitutional provisions prescribe the tax base and rate and limit the Legislature's power to change the rate Under those sections, insurance companies are taxed on the basis of insurance premiums received, a form of gross income tax which results in $2 35 tax on every $100 premiums paid by California's residents, less a wise deduction for local real estate taxes paid on investments in California principal office properties

This particular constitutional amendment will close the gap that now permits foreign insurers from some states to escape payment of retaliatory taxes to California, and will bring in additional tax revenue from such foreign insurers

> This amendment received the unanimous vote support of the members of the California State Legislature at the 1963 session, and its adoption by the people is recommended Vote YES.[17]

No arguments have been presented against the amendment

As for the arguments presented this amendment *will eliminate* the conflict between the statute, i.e., Section 685 of the Insurance Code and the Constitution; it should act to strengthen the retaliatory effects of the California laws so that foreign insurance companies in the state will be taxed more like California insurance companies when they are doing business in other states, and it is true that, the present constitutional provision does act to permit retaliation *only* if another state discriminates between insurers domiciled in that state and California insurers This requirement *is* unique to California

The amendment will eliminate the technicality under which some foreign insurance companies escaped payment of retaliatory taxes in California; [18] and the amendment will bring in additional tax revenue. However, this revenue will not, in all probability, amount to very much (The revenue from retaliatory taxes in 1963 was $873,484 in all) [19]

The amendment will result in a more equitable tax between California and other states; however, the question of what is an equitable tax, in this instance, is a very difficult one, but it will mean that the tax paid by foreign insurance companies in California and California companies in other states will be closer to being equalized.

RATIONALE

The ostensible purpose and the actual rationale of the retaliatory provision merit further discussion in a consideration of the proposed constitutional amendment and the problems pertaining thereto.

Purpose

The ostensible purpose of the retaliatory provision is to prevent other states from discriminating against California insurance companies by imposing higher taxes or fees or more stringent regulations upon California companies than they do upon their own insurance companies. However, as it was pointed out above, the conflict reflected in the retaliatory provisions is between states and not between domestic and foreign insurance companies. The fact of the matter is that domestic insurance companies attempt to keep premiums taxes and other taxes, licenses, fees, penalties, restrictions, and requirements imposed upon foreign insurance companies in the state lenient, so that they will not be discriminated against in other states. Their attempts, when successful, defeat the second purpose of retaliatory provisions, i e, the raising of revenues by states Also, as noted above, the defensive purpose of the retaliatory provision is more important in states that have a relatively high number of insurance companies, and California is one of these. The second purpose is more important for those that have relatively few domestic insurance companies

[17] Statement of Lester A McMillan, Assemblyman, 61st District and Lou A Cusanovich, Assemblyman, 64th District, September 19, 1963
[18] See Franklin Life, *op cit*
[19] See California State Board of Equalization, *Annual Report*, 1962–63, *op cit*, p 16

Specifically, California had 830 insurance organizations, including fraternal societies authorized to transact business in the state in 1963, and out of this number 147 were domestic companies and 684 were foreign. The revenue from retaliatory taxes is not a major part of the state revenue, as evidenced by the fact that in 1963 retaliatory taxes in California amounted in total to only $873,484 as noted above,[20] or less than one-twentieth of 1 percent of the total tax revenue for 1962.[21] Actually, the revenue to be obtained from the retaliatory provision, in itself, probably does not justify having a retaliatory provision.

Actual Rationale

The actual rationale for the provision is that the application of the retaliatory laws acts as a deterrent to state taxation on the insurance industry. Section 685 of the Insurance Code is, almost word by word, the "model" provision recommended to state legislatures by the insurance industry.

Felton has stated "granting the assumptions that the domestic companies are politically powerful, retaliatory laws help the insurance industry in that the application of the laws acts as a brake on taxes."[22] It is true that insurers are disadvantaged by retaliatory taxation provisions in the short run, for they usually result in some insurers paying more in taxes in retaliating states. But, in the long run, insurers as a group pay less in taxes because of these provisions, since legislators, when considering measures affecting insurers, do consider retaliatory effects in instance after instance. The insurance industry apparently understands this well.[23]

The State Department of Finance has stated:

> Whether the insurance companies have sponsored this legislation or not, in their resistance to tax change they have benefited by it. The home-owned companies in all but a half-dozen states are able to say, 'Don't raise our taxes. If you do, we will have to pay more in other states.' The effectiveness of this barrier is demonstrated by the fact that of the 48 states, only 9 increased their insurance tax rates in the last 12 years. They were Alabama, Colorado, Georgia, Mississippi, Montana, New Mexico, Oregon, South Carolina and Wyoming. None of these is an outstanding insurance state.[24]

Incidence

In the short run, retaliatory taxation provisions serve to decrease insurers' profits not only because insurers may pay higher taxes, licenses, fees, or be subject to more stringent restrictions in retaliatory states but also rates are not always set and approved, in cases where they are subject to approval, with retaliatory taxes fully considered in the costs on which they are based. As Felton has stated.

> If taxes are paid on a retaliatory basis, they are not always passed through in the rate structure. If State A imposes a greater

[20] California State Board of Equalization, *Annual Report*, 1962–63, *op cit*, p. 16.
[21] California Franchise Tax Board, *Annual Report*, 1962, p. vi.

[23] Felton, *op cit*, p. 71.
[24] State Department of Finance, Budget Division, *Highlights of Proposal for Quarterly Insurance Tax Payments*, May 1, 1963, p. 3.

tax burden on foreign companies, and a company of State A is operating in State B where the tax burden on foreign companies is lower, the company of State A pays the higher tax in State B. When the rate filings are made in State B, the rate cannot include enough for taxes paid on the retaliatory basis, because there may be companies from almost every other state operating in State B which do not pay the higher tax because their states do not charge a greater amount to foreign companies Therefore, it is only the companies of State A that must pay the higher taxes Apparently, taxes paid under retaliation are not included in the rate because the commissioner in State B cannot be concerned about what happens in other states, that is, he is not concerned with the fact that State A taxes foreign companies at a higher rate Another reason why retaliatory taxes are not included in the rates is that the rate filings do not assume *all* companies will pay on a retaliatory basis for the same risk [25]

The longrun effect of the retaliatory provision on taxes paid by insurers has probably been to keep them at a lower level than they otherwise would have risen to, as the material above indicated, and consequently, they have kept premiums lower and insurers' profits higher than would otherwise have been the case

SUMMARY AND CONCLUSIONS

In summary, retaliatory taxation provisions exist, in California and in 43 other states, and subject California insurers doing business in those states to the same taxes, fees, and regulations that are imposed upon the insurers of those states doing business in California These provisions have served as a brake on the taxation of insurance companies The problem now is whether to amend the Constitution so that Subdivision (f) of Section 14½ of Article XIII shall be made to conform to Section 685 of the Insurance Code, the "model" provision approved by the insurance industry

It would appear to be advantageous at this time to make this change A strong moral case can be made against retaliatory taxation provisions The question to be asked would be Should the principal of "an eye for an eye" rather than positive objectives be the basis for any legislation However, from a pragmatic standpoint, these provisions do defend California companies from a certain amount of discrimination Consequently, it may be argued that California should not be in the small group that do not have such laws The other point is that as long as we have these provisions they may as well be strengthened and made more effective The proposed constitutional amendment would, in all probability, prove to be more effective than the preceding one since it is stronger and eliminates any alleged conflicts between the Constitution and the provisions of the code

CHAPTER V

COLLECTIONS

The responsibility for overseeing and effecting the proper payment and collection of the gross premiums tax, and taking care of difficulties that may arise in the process, is divided among three state agencies in California, i e , the Insurance Commissioner, the State Board of Equalization, and the Controller.

The Collection Procedure

Presently, each insurer transacting business in the State of California files an annual statement with the Insurance Commissioner. Accompanying this statement is a tax return, which must be filed on or before June 15, and show the computation of the amount of tax for the period covered by the return, and the total amount of any prepayments Separate returns are filed with respect to (a) life insurance, (b) ocean marine insurance, (c) title insurance, and (d) insurance other than life insurance (or life insurance and disability insurance), ocean marine insurance or title insurance [1]

It is required that a remittance payable to the Controller for the amount of the tax computed and shown on the tax return, less any prepayments that have been made, accompany the return when it is filed.[2]

The Insurance Commissioner may, if he finds there is good cause therefor, extend the time for filing a tax return or paying any amount required to be paid with the return for 10 days [3] The insurer to whom an extension is granted is required to pay, in addition to the tax, interest at the rate of one-half of 1 percent per month, or any fraction thereof, from June 15 until the date of payment [4]

A duplicate copy of each tax return received by the Insurance Commissioner is forwarded to the Board of Equalization [5] The Board of Equalization then assesses the tax due in accordance with the data reported by the insurer on his return [6] The Board of Equalization thereafter transmits the notice of its assessment to the Insurance Commissioner and the Controller, and if the board's assessment differs from the amount of the tax as computed by the insurer, notice is sent to the insurer.[7] When it makes its assessment, the Board of Equalization may offset an overpayment for one calendar year against an underpayment for another calendar year, against penalties, and against any interest due on an underpayment [8]

As soon is is practicable after the insurer files his return, the Insurance Commissioner examines the return and any other information

[8] Revenue and Taxation Code, Section 12414

he may have in his possession pertaining to the matter, and determines the correct amount of tax for each particular insurer.[9] If the Insurance Commissioner determines that the amount of tax disclosed by the return and assessed by the Board of Equalization is less than the amount of tax disclosed by his examination, he sends a written proposal to the Board of Equalization containing a deficiency assessment for the difference. The proposal sets forth the basis for the deficiency assessment and the details of its computation.[10]

If an insurer fails to file a return, the Insurance Commissioner may require a return. A notice is mailed to the insurer to file a return by a specified date. Alternatively, the Insurance Commissioner may, without requiring a return, or if no return was filed after a demand upon the insurer was made, make an estimate of the amount of tax due for the calendar year or years in respect to which the insurer failed to file the return. The estimate is made from any available information in the Insurance Commissioner's possession. The Insurance Commissioner then sends a written proposal to the Board of Equalization containing a deficiency assessment for the amount of estimated tax. The proposal sets forth the basis of the estimate and the details of the computation of the tax.[11]

The Board of Equalization then makes a deficiency assessment on the basis of the proposal submitted to it by the Insurance Commissioner.[12] There may be one or more deficiency assessments for one or more calendar years.[13] The Board of Equalization may offset overpayments for one year against underpayments, penalties, or interest on underpayments for other years when making deficiency assessments.[14] The insurers are notified by the Board of Equalization of any deficiency assessment made.[15]

An insurer against whom a deficiency assessment is made may petition for a redetermination of the deficiency assessment within 30 days after service upon the insurer of the notice thereof, by filing with the Board of Equalization a written petition setting forth the grounds of objection to the deficiency assessment and the correction sought. At the time the petition is filed with the Board of Equalization, it is required that a copy of the petition be filed with the Insurance Commissioner. If a petition for redetermination is not filed within the 30-day period prescribed, the deficiency assessment becomes final and due and payable at the expiration of the 30-day period.[16]

If the petition for redetermination is filed as prescribed, the Board of Equalization reconsiders the deficiency assessment, and if the insurer has requested it, grants him an oral hearing for the presentation of evidence and argument. The hearing is held before the Board of Equalization or its authorized representative.[17]

The Board of Equalization may decrease or increase the amount of the deficiency assessment before the assessment becomes final. However,

[17] Revenue and Taxation Code, Section 12429.

the amount may only be increased if a claim for the increase is made by the Insurance Commissioner or the Board of Equalization at or before the hearing referred to above.[18] The order or decision of the Board of Equalization upon a petition for redetermination of a deficiency assessment becomes final 30 days after a notice thereof is served on the insurer [19] Copies of each notice of a deficiency assessment made by the Board of Equalization are transmitted to the Insurance Commissioner and the Controller The Controller keeps a record of all the assessments and any payments made thereon [20]

Any amounts of taxes, interest and penalties not remitted to the Insurance Commissioner with the original return of the insurer are payable to the Controller [21]

An insurer who fails to pay any tax, except a tax determined as a deficiency assessment by the Board of Equalization, within the time required, pays a penalty of 10 percent of the amount of the tax, in addition to the tax, plus interest at the rate of ½ of 1 percent per month, or any fraction thereof, from June 15 of the year in which the tax became due and payable until the date of payment [22]

A similar provision applies to deficiency assessments except that the 10 percent applies to the deficiency assessment exclusive of interest and penalties and no interest need be paid on penalties [23] When a deficiency assessment is made on the basis of a proposal submitted by the Insurance Commissioner concerning the taxes of an insurer who failed to file a return, a penalty of 10 percent of the amount of the deficiency assessment is added to the tax due [24] A similar penalty is applied when a deficiency assessment is made on the basis of a proposal submitted by the Insurance Commissioner concerning an underestimate of the tax due where the deficiency was due to negligence or disregard of the applicable rulings without intent to defraud on the part of the insurer [25] If fraud was involved, the penalty becomes 25 percent of the amount of the deficiency assessment and is in addition to any other penalties that may have been imposed [26]

The Controller may at any time within four years after any amount of tax becomes due and payable, and at any time within two years after any deficiency assessment of tax becomes due and payable, bring an action to collect the delinquent taxes, and any interest and penalties owing [27] The action is prosecuted by the Attorney General [28] In the action a certificate of the Controller or of the Secretary of the Board of Equalization, showing unpaid against an insurer, may be used in evidence.[29]

The Controller may recover any refund which has been erroneously made or any credit which has been erroneously allowed in a court action [30]

[22] Revenue and Taxation Code, Section 12631
[23] Revenue and Taxation Code, Section 12632
[24] Revenue and Taxation Code, Section 12633
[25] Revenue and Taxation Code, Section 12634
[26] Revenue and Taxation Code, Section 12635
[27] Revenue and Taxation Code, Section 12676
[28] Revenue and Taxation Code, Section 12678
[29] Revenue and Taxation Code, Section 12681
[30] Revenue and Taxation Code, Section 12691

The Controller, between December 10 and December 15, transmits an annual statement to the Insurance Commissioner showing the names of all insurers that failed to pay any tax that became delinquent in the preceding June on or before December 10, or any tax which has been unpaid for more than 30 days from the date it became due and payable as a deficiency assessment The statement shows the amount of the tax, interest, and penalties due from each insurer [31]

The Insurance Commissioner, after a hearing, revokes the certificates of authority for insurers which do not establish to his satisfaction, at or before the hearing, that taxes, interest, and penalties due have been paid [32] An insurer whose certificate of authority has been revoked may have the certificate restored by the Insurance Commissioner during the period for which it was issued upon payment by the insurer of all taxes, interest, and penalties due and a fee of $10 to the Insurance Commissioner [33]

If an amount in excess of $250 has been illegally assessed, the Board of Equalization records this fact and certifies to the State Board of Control the amount assessed in excess of the amount that should have been assessed legally and the insurer against whom the assessment was made If the State Board of Control approves, it authorizes the cancellation of the amount upon the records of the Controller and the Board of Equalization If an amount not exceeding $250 has been illegally assessed, the Board of Equalization, without certifying this fact to the State Board of Control, authorizes the cancellation of the amount upon the records of the Controller and the State Board of Equalization The State Board of Equalization mails a notice to the insurer of any authorized cancellation [34]

If the Insurance Commissioner discovers an amount assessed by the Board of Equalization which he believes to be illegally assessed, he notifies the Board of Equalization of this fact in writing and sends them a statement containing any information he may have concerning the correctness of the assessment [35]

If the Board of Equalization determines that any tax, interest, or penalty has been paid more than once or has been erroneously or illegally collected or computed, the Board of Equalization notes the fact in its records and certifies to the Board of Control the amount of the taxes, interest, or penalties collected in excess of what was legally due, and from whom they were collected or by whom paid If approved by the Board of Control the excess is certified to the Controller for credit or refund If the amount involved is less than $250, the Board of Equalization may certify the amount to the Controller for credit or refund without obtaining approval from the State Board of Control The Controller, when he receives a certification for a credit or refund, credits the insurer, deducting the credit or refund from any amounts due and payable, and if there is an excess over such amounts, refunds the balance [36] A credit or refund must be allowed or approved within four years after June 15 of the year following the year for which the overpayment was made

[31] Revenue and Taxation Code, Section 12801
[32] Revenue and Taxation Code, Section 12802
[33] Revenue and Taxation Code Section 12803
[34] Revenue and Taxation Code, Section 12851
[35] Revenue and Taxation Code, Section 12852
[36] Revenue and Taxation Code, Section 12977.

or within six months after the date a deficiency assessment became final, or after six months from the date of the overpayment, whichever period expires the later, unless a claim for a refund or credit is filed with the Insurance Commissioner of the Board of Equalization before the expiration of the periods noted [37] If the claim for a refund or a credit is presented to the Insurance Commissioner, he transmits it to the Board of Equalization together with a statement of any information he may have concerning a subject of the claim [38]

Interest is allowed upon the amount of any overpayments of insurers' taxes at the rate of 6 percent per annum from the due date of the tax for the year for which the overpayment was made No interest is paid to the insurers on refunds or credits.[39] However, if the Board of Equalization determines that any overpayment has been made intentionally or made where there was no reasonable legal liability, no interest is allowed on the overpayment [40] Claimants may sue the Board of Equalization when there is disagreement on claims for refunds or credits upon which the Board of Equalization has taken action [41]

In summary, then, the Insurance Commissioner, who is also responsible for the enforcement of all state regulations concerning insurers, receives annual statements from all insurers, conducts periodic audits of insurers, and receives the tax returns, which he examines for accuracy, and the insurers' checks in payment of their taxes, which he deposits in the bank to the account of the Controller The Board of Equalization assesses the tax due from insurers on the basis of the return and the Insurance Commissioner's findings The board sends a notice of each assessment to the Insurance Commissioner and the Controller. The Insurance Commissioner, after the tax is assessed, when he examines the return, determines if there are deficiencies in the assessments and notifies the Board of Equalization if there are, or of estimated taxes due when no returns are filed The Board of Equalization considers and rules on deficiency assessments The Controller brings action to collect delinquent taxes and submits an annual report of delinquent insurers to the Insurance Commissioner The Insurance Commissioner is responsible for revoking insurers' certificates to do business and restoring them when they have taken care of any delinquencies If there has been an illegal assessment in excess of $250, the State Board of Control must authorize its cancellation If the illegal assessment is less than $250, the State Board of Equalization alone may authorize its cancellation

If the Insurance Commissioner discovers a Board of Equalization assessment which he believes to have been illegally assessed, he notifies the Board of Equalization If the Board of Equalization discovers any erroneous or illegal computations or collections, it notes the fact, notifies the Board of Control, and any excess is credited or refunded by the Controller If the amount is under $250 the Controller will make the credit or refund upon receipt of a certificate from the Board of Equalization without any further certification being required If a

[37] Revenue and Taxation Code, Section 12978
[38] Revenue and Taxation Code, Section 12932

[40] Revenue and Taxation Code, Section 12984
[41] Revenue and Taxation Code, Section 13103

claim for a refund or a credit is presented to the Insurance Commissioner, he transmits it to the Board of Equalization

In conclusion, it would seem that having three agencies involved in the collection of the gross premiums tax makes for some undue complication One of the problems occasioned therefrom arises from the fact that the insurer, on many matters, has to correspond with all three agencies

Proposed Changes in Collection Procedure

Under existing law, as noted above, insurers' tax returns, together with a remittance payable to the State Controller for the amount of tax shown thereon, are submitted to the Insurance Commissioner on June 15. The State Board of Equalization assesses the tax, as required by the Constitution, and the Controller records all tax payments, and collects the taxes whether they be delinquent or not.

It has been proposed that all regular (nonretaliatory) insurance tax returns be submitted to the Insurance Commissioner by April 1; that the commissioner notify the Board of Equalization of the amounts due by May 15; that the Board of Equalization assess the taxes and notify the insurers of the amounts due by June 1; and that the Insurance Commissioner, rather than the State Controller, collect the taxes by June 15 The bill proposed further provided that the Insurance Commissioner be responsible for collecting all such amounts not more than two years delinquent [42]

The proposed bill also deleted the existing 10-percent penalty for delinquent tax payments and substituted a sliding scale depending upon the amount of tax There was also a provision reducing the minimum penalty for the late filing of retaliatory tax information returns.

Section 14¼(h) of the California Constitution requires that the tax on insurers be assessed by the State Board of Equalization. The proposed bill would eliminate the requirement that the Insurance Commissioner send the Board of Equalization a copy of the tax return The Board of Equalization would, therefore, be assessing the tax in accordance with a list or roll forwarded by the Insurance Commissioner without any other supporting evidence This would, in effect, reduce the assessing function to a so-called clerical or ministerial act This, then, raises the question as to why the Insurance Commissioner could not assess the tax as well In fact, if simplification is the objective, this might be considered

Under present law the Controller is responsible for collection of the insurance tax, maintaining the records, showing the status of all assessments and payments, and bringing necessary court actions for collection of delinquencies The Insurance Commissioner is frequently involved in this litigation The proposed bill states:

> The commissioner shall be responsible for the collection of all taxes, interest and penalties that are not more than two years delinquent and shall conduct all correspondence with insurers in respect thereto, and all such amounts shall be made payable and be paid to the commissioner The commissioner shall promptly

[42] Assembly Bill 2901 (Thomas), 1963 General Session

advise the Controller of all such amounts received. All such amounts more than two years delinquent shall be promptly reported by the commissioner to the Controller and the Controller shall thereafter be responsible for the collection thereof.

The question might well be raised again as to whether it might not be feasible to have one agency responsible for the examination of the tax rate, the assessment and the collection of the tax The only theoretical problem that arises in connection with this proposal is the question of whether a regulatory agency should be the agency that also assesses and collects taxes due from the firms that it regulates and supervises. There is no strong argument against it doing so in the literature In several states the Insurance Commissioner has very wide powers and discretion insofar as the control, supervision, and direction of all insurance business in the state is concerned, and insofar as the determination, assessment, and collection of the insurance tax is concerned Checks for the insurance tax are in many states made payable to the State Treasurer or Department of Taxation or Revenue, but oftentimes, other than one of these, no state agency is concerned with the tax [43] In some cases taxes are paid to the State Tax Commission [44]

The proposed bill required insurance companies to file premium tax returns on or before April 1 The Insurance Commissioner would then prepare a roll or list of amounts to be assessed by the Board of Equalization and propose the assessments to the Board of Equalization on or before May 15 The Board of Equalization would be required to assess the tax in accordance with the list and transmit notices of its individual assessments to each insurer before June 1 The annual tax would then be payable to the Insurance Commissioner on or before June 15

It must be noted that Assembly Bill 2901 preceded the enactment in 1963 of the quarterly prepayment system, which added three more dates to the insurers' tax reporting time table Insurance companies will be making quarterly installment payments as of June 15, September 15, December 15, and March 15 for their business in the preceding calendar quarters The annual return will continue to be made June 15 together with any adjustment due for the previous business year and not included within the prepayment installments To add an additional date to the time table insurers must follow seems unduly complicating

As to the proposal that each insurer be notified of his assessment, it should be noted that most of the assessments are made in the same amounts as are self-reported by insurers Notices of adjustments upward or downward are presently given There seems no point in having the Board of Equalization required to notify insurers of an assessment in the same amount as was reported due by the insurer

As to the roll system, i e, having the Board of Equalization assess in accordance with a list or a roll, as proposed for the premium tax in Assembly Bill 2901, this system was abandoned by the Legislature in the amendments to the insurance tax law adopted in 1961 No reason is apparent why it should be brought back

[43] See State of New York, Insurance Department, *Fees and Taxes Charged Insurance Companies Under the Laws of New York, together with abstracts of fees, and other requirements of other states*, 1964.
[44] *Ibid.*, p. 3.

Assembly Bill 2901 also proposed to delete the existing 10-percent penalty for delinquent tax payments and substitute a sliding scale depending upon the amount of the tax This provision would have the effect of reducing penalties but might a better solution to the penalty problem not be keeping the existing 10-percent penalty for delinquent tax payments but providing, as is done in the case of the sales tax, that where there is sufficient cause for the delinquency, the penalty could be waived

The minimum penalty provision for the late filing of retaliatory tax information returns was also reduced by the proposed bill The present minimum penalty is $50 per day, while the proposed penalty was $100 for each 15-day period or fraction thereof No change was made in the maximum penalty of $500 The proposed change was apparently designed to relieve the problem of the penalty being unduly harsh in a few cases This section [45] has a very minor revenue effect and no strong argument against it can be found

In summary the bill proposed that the Insurance Commissioner be responsible for collecting the premiums tax Having him entirely responsible for the assessment and collection of the tax might well be considered.

No advantage appears to accrue from the proposed sending of a roll of taxes due from the Insurance Commissioner to the Board of Equalization for assessment Nor does there seem to be any advantage attached to adding another date on which insurers must file premiums tax returns, nor in notifying insurers of their assessments when taxes have been computed correctly and in the same amount as was assessed.

Substituting a sliding scale of penalties in place of the existing 10-percent penalty in order to mitigate the harshness of the penalty provision may not be the best solution to the problem of making the penalty more appropriately lenient Waiving the penalty in exceptional cases where sufficient cause for delinquency appears to exist, might be a better solution.

Reducing the penalty for the late filing of retaliatory tax information returns does not pose any serious problem

The proposed changes are indicative of the fact that the collection procedure is in need of further simplification.

[45] Revenue and Taxation Code, Section 12282

CHAPTER VI

SUMMARY AND CONCLUSIONS

The gross premiums tax on insurance companies is an excise tax. Insurance is a commodity and the only portion of insurance that can be properly defined as being savings is that part of life insurance premiums which adds to cash reserves of insurance policies

The gross premiums tax in California evolved into its present form over a period of years beginning in 1862 when the first tax of this nature was placed on foreign insurance companies The principal office deduction dates back to 1911 The gross premiums tax rate has remained at the same level since 1948 except for the reduction in the tax on pension or profit-sharing plans which became effective in 1962 and the temporary reduction from 2 35 percent to 2 33 percent for the years 1964–67 to compensate for the actuation of the prepayment plan in 1964

Consumers bear the full burden of the insurance premiums tax except in those cases where the tax has been increased subsequent to the writing of policies, and premium rates cannot be changed until the policy is renewed or a new policy is written. Since nonlife insurance policies are renewed or replaced, generally, within five years after they are written, this exception does not apply to a large number of policies

The gross premiums tax is no more inequitable than any other excise tax. Because more insurance is bought by higher than lower income groups, this tax tends to be progressive California insurers, except for those that do not benefit from the principal office deduction, seem to be treated equitably under the provisions of the existing law The tax rate in California is higher than in some other states, and it is higher than the rate in New York, the only other state that provides a close parallel for comparison with California (California and New York are the two highest ranking insurance states in the United States and are far and above all other states both in insurance policies outstanding and insurance being written), but it is not appreciably higher, and it is lower than the average tax rates on fire and casualty insurers in all 50 states

Insurers' sales volume and profits do not suffer to any significant extent because of the gross premiums tax, nor does the tax appreciably affect California insurers' competitive position as compared with insurers of other states to any appreciable extent

The gross premiums tax is the fifth highest revenue source for the state of California It yields more in this state than it does in any other state in the United States The revenue from this tax source can be increased if the principal office deduction is eliminated.

There is no way to justify the principal office deduction on economic grounds It is a deduction of real property taxes paid, which all other firms owning real property also pay and for which they receive no

deduction, from an excise tax It cannot be justified purely on the grounds that it is necessary to attract insurers to locate in California, because insurers are attracted primarily by the fact that there is insurance to be written in California and maintaining a principal or home office in California gives them an advantage in obtaining this business and processing it economically It certainly is not needed to encourage the building of office buildings by insurers (judging by the vacancy rate for office space in California)

The elimination of the principal office deduction will have little or no effect on insurance rates and little or no effect on insurers' profits from the writing of insurance

As to the retaliatory provisions contained in the Constitution and the Insurance Code, they have been effective in the prevention of the raising of the premiums tax rate in California and in other states However, as long as the majority of other states have retaliatory provisions, California insurers would have justifiable complaints if there were no retaliation against the insurers of states which retaliate against California

Nonetheless, philosphically, retaliation does not seem to be a positive doctrine upon which legislation should be based

The most feasible of alternatives to the premiums tax is an income tax However, only four states have an income tax that applies to insurers This, however, should not preclude further study of this method of taxation for insurers, since insurers' profits are not taxed by the state There are no insurmountable difficulties to the working out of the mechanics or the imposition of an income tax, especially if the federal pattern of the taxation of insurance companies is followed, and the tax is simply a percentage of the federal tax

The collection procedure for the premiums tax is unduly complicated Further consideration should be given to having the Insurance Commissioner be responsible for its assessment and collection, or alternatively, treating it in the same way as the sales tax insofar as its collection procedure is concerned, but the second alternative would probably only be feasible if and when a Department of Revenue and Taxation were established.

APPENDIX

SOURCE *State Tax Guide*, Commerce Clearing House, Chicago, *Abstract of Fees and Taxes*, New York Insurance Commission, and the insurance tax laws of the 50 States and the District of Columbia

[1] In Alabama foreign fire and marine companies have taxes reduced if invest in state Domestic companies get Principal Office Deduction Note also that municipalities may impose 4-percent tax on gross premiums, but counties cannot

[3] After 1963 (January 1) if company invests 50 percent of their reserves in certain Arkansas property, tax rates are reduced by one-half of 1 percent

[5] California has Principal Office Deduction

[4] A domestic company maintaining a principal office in Colorado and having 30 percent or more of its assets invested in the state is taxed at 1 percent

[5] Foreign insurers maintaining a regional home office in Florida are entitled to credits against tax of (1) 50 percent of tax due and (2) an amount equal to the full amount of ad valorem taxes paid during the next preceding year on property occupied and on property used in connection with the regional home office, except that tax may not be reduced to less than 20 percent of the original amount

[6] Georgia's tax on direct gross premiums is reduced to 1 25 percent if 25 percent of company's assets are in Georgia, and to 0 50 percent if 75 percent of company's assets are invested with the state

[7] Idaho reduces gross premiums tax from 3 percent to 1 percent for domestic companies with 25 percent of their gross assets invested *within the state*, but domestic companies must pay tax on risks outside of state if not taxed by another state

[8] "License tax" 2 percent on premiums of $7,000, 1 7 percent on premiums in excess of $7,000—for life, health and accident, and annuities

[9] "License tax" 3 percent on premiums of $6,000, 2 percent on premiums in excess of $6,000 for fire and marine

[10] Taxes reduced to one-third of amount if one-sixth of total assets are invested in *specified securities* Note that in Louisiana municipalities may impose additional taxes

[11] Domestic companies allowed credit for franchise taxes paid and every life insurance company with home office in Maryland is allowed a credit for fees paid to Insurance Commissioner for valuing risks policies if credit not greater than 15 percent of total

[12] Massachusetts taxes on life insurance companies now mainly 2 *percent of gross premiums* less returns and dividends, but if retaliatory tax is greater, then pay that

[13] Tax on all domestic insurance companies in Michigan is *one-half of* 1 percent of paid-up capital, surplus and unassigned funds $10,000 minimum to $50,000 maximum

[14] *Difference* between ad valorem taxes up to $20,000 and one-half of the tax on foreign companies doing same business

[15] Assets of $15,000,000 or more—flat sum plus percentage of taxable premiums—*assets of less than* $15,000 000—1¾ percent of taxable premiums also domestic stock has a local tax equivalent to property tax rate of preceding year of 2 percent of previous year—whichever lower

[16] Tax *reduced to three-fourths* of 1 percent if at least 30 percent of assets are in New Mexico investments

[17] Domestic companies taxed either on (1) two-tenths of 1 percent of capital and surplus if capital is divided into shares, otherwise surplus only or (2) two-tenths of 1 percent of 8½ times the gross premiums—whichever is less—minimum $25

[18] 2 percent on foreign insurance companies may be reduced to 2 percent "by proper investments" 2 percent on domestic insurers—not to exceed 5 percent of net income computed under the Income Tax Law with the additional deduction of required additions to reserves—domestic *insurance corporations* have license fee The basic tax of 2 percent on domestic insurers may be reduced to 1¾ percent, 1½ percent, 1¼ percent, or 1 percent by investments in South Carolina securities

[19] *Domestic company's gross* premiums tax reduced to 1 percent if 75 percent of the company's assets are in Wyoming *securities*—reduced to ½ percent if 50 percent of its assets are invested in Wyoming securities

[20] Note that in Minnesota insurance companies are also subject to income taxes, since Section 290 06 allows a credit against income taxes paid by insurance companies for the gross premiums tax paid and is considered controlling

[21] If an insurer has 50 percent or more of its paid-in capital stock invested in Montana securities, the insurer may deduct whatever tax it may have already paid to the state and its political subdivisions during the calendar year for which the premiums tax is levied

[22] *If* taxable premiums exceed 12½ percent of total premiums collected by company, then only 12½ percent of total premiums of company are taxed

[23] Credits for investment in Oklahoma real estate or securities are permitted, which will reduce the premiums tax credits received range from 2 percent to 30 percent (at which point there is no tax) of admitted assets in Oklahoma

[24] Insurance *corporations*, except life, fraternal, benefit, health, accident, and nonprofit hospital service, which have invested in Tennessee securities between 70 and 80 percent of the amount invested in the state in which the greatest percentage of their assets are invested, may reduce their gross premiums tax by 25 percent 80 to 90 percent will reduce gross premiums tax by 50 percent and will reduce gross premiums tax by 75 percent if greater than 90 percent

[25] Foreign life, health, and accident—3 2 percent unless the investments in Texas securities fall within one of the following categories of percentages of the amount such companies have invested in similar securities in the state in which they have the highest percentage of admitted assets invested

70-80 percent	3 025 percent
80-85 percent	2 75 percent
85-90 percent	2 2 percent
90-100 percent	1 925 percent

75-80 percent	3 025 percent
80-85 percent	2 75 percent
85-88 percent	2 2 percent
88-90 percent	2 05 percent
90 or more	1 1 percent
(other insurance companies taxed at 3 85 percent)	

[26] Exempt from state taxation if qualified under Federal Internal Revenue Code, Section 103

[27] No tax on domestic mutual fire insurers

* All data *correct* to January 1 1954

† This rate includes additional tax on fire insurance premiums for the support of local fire districts

NOTE In 40 states base for insurance tax is gross premium less returns and in *many* cases dividends and reinsurance premiums

Average tax rate for *domestic life insurers* for 40 states and the District of Columbia is 1 91 percent Average tax rate for foreign life insurers for 50 states and the District of Columbia is 2 38 percent Average tax rate for domestic fire insurers for 42 states and the District of Columbia is 2 34 percent Average tax rate for foreign fire insurers for 50 states and the District of Columbia is 2 74 percent Average tax rate for domestic casualty insurers for 42 states and the District of Columbia is 1 93 percent Average tax rate for foreign casualty insurers for 50 states and the District of Columbia is 2 31 percent

PUBLISHER'S NOTE

This study by Dr. Ellis Austin presents the results of an investigation of certain commodity taxes in California. He covers the taxation of tobacco products, alcoholic beverages and horseracing. He studies not only the importance of these taxes as revenue producers but also attempts to determine their economic impact and equity implications.

His basic philosophy is that the Legislature should not use taxation as a method of telling people how to spend their money. However, many economists support the theory that the Legislature may wish to discourage consumption of harmful commodities by making them more expensive through taxation He is also concerned with the apparent fact that these taxes are regressive in that they hit the lower income groups with a greater relative impact than the higher income groups

It should be noted that Dr Austin's references to the economic impact of the sales tax refers to the national pattern rather than the sales tax in California

In addition, Dr Austin's findings relate to excise taxes "standing alone " If these taxes are included in a "package" which contains progressive taxes, the total impact of the "package" may negate the regressive nature of excise taxes

Both critics and defenders of Dr. Austin's work will find much food for thought in this well-organized study It provides a provocative and stimulating basis for discussion of the issues involved.

The recommendations in this report are those of the researcher and should not be construed as representing the views or decisions of the committee. The committee recommendations will be made in due course.

ABOUT THE AUTHOR

Ellis T. Austin is a professor of business administration at Fresno State College. He is a graduate of Western Washington College of Education, where he received his teacher's certificate, and of the University of Washington. He received his Ph D from Michigan State University in 1955

Dr Austin taught at the University of Washington, the University of Idaho, Michigan State, and the University of Pittsburgh before coming to Fresno State in 1958 He has participated actively in campus and civic affairs in each community where he has taught; in the fall of 1960, for example, he gave 15 one-hour lectures on local television in Fresno and he has spoken before, or written for, many local groups.

Professor Austin has received fellowships for special study each summer since 1960. These programs have taken him to New York University, the University of Chicago, Harvard University, and more recently to UCLA for the Ford Foundation Regional Seminar in Economics—Public Finance and Fiscal Policy

He is a member of the American Economic Association and the American Finance Association.

CALIFORNIA EXCISE TAXES ON CIGARETTES, ALCOHOLIC BEVERAGES, AND HORSERACING

TABLE OF CONTENTS—Continued

LIST OF TABLES

CHAPTER I

INTRODUCTION

"Tax the vices, they have the broadest shoulders"—Napoleon This statement, even today, clearly reflects the thinking of most governments toward the taxation of commodities, especially the vices. In the United States, commodity taxation by the states received its greatest stimulus during the depression This was a time when the states were in dire need of funds It was also the time that the sale of alcoholic beverages was legalized, and some states (e g , California) legalized on-track wagering on horseracing Given the need and the opportunity, the states were quick to make the most of it. Where else could taxes be raised with so little public protest?

This movement into the taxation of the vices has continued up to the present time All states tax alcoholic beverages, all but two tax cigarettes, and 27 tax horseracing Virtually all that remains is for tax rates to continue to rise, and this appears to be a certainty

This paper investigates the taxation of tobacco products, alcoholic beverages, and horseracing with respect to equity, economic impact, and revenue. If it differs from previous studies, it is mainly that more recognition is given to equity and economic considerations than is usually the case Nonetheless, imbalance persists, revenue (with special emphasis on limiting factors) still receives the most attention

CHAPTER II

EQUITY

DEFINITION

One of the foremost considerations of any tax program is that it must be equitable Briefly, this means that everyone must bear his fair share of the tax burden in accordance with his ability to pay Furthermore, it is generally considered equitable for taxes, as a proportion of income, to increase as income increases Such a tax is called progressive, and is best illustrated by the federal income tax Proportional taxes take the same percentage of all incomes. Regressive taxes, which take proportionately more as income declines, are generally considered inequitable because of the relatively greater burden they place on the lower income groups

SHIFTING AND INCIDENCE

General Statement

Before a tax can be judged progressive, proportional, or regressive, it must be determined who bears the burden (incidence) of the tax. This becomes a problem. since the tax may not be paid by the firm or individual from whom it is collected—it may be shifted forward or backward In the case of taxes on consumption, it is generally intended that the consumer bear the tax. Since these taxes, however, are collected from the seller, he must shift them forward through higher prices on the taxed commodities Whether a tax, once imposed, can be shifted forward or not depends upon the relative elasticities of supply and demand On the demand side, the more inelastic the demand, the weaker the consumers' defense against the tax and the more likely the tax to be shifted forward. For with an inelastic demand an increase in price would only slightly reduce the quantity taken (not at all, if the demand were completely inelastic), so little pressure would be put on the seller to assume very much of the tax in order to maintain his sales volume. Under inelastic demand conditions, revenue from sales will increase as prices increase Given a very elastic demand, however, an increase in price would greatly reduce the quantity taken and the seller's sales and net income would be seriously impaired On the seller's or supply side, the greater the elasticity, the greater the defense against the tax and the smaller the part of it he will bear. The tax will be either shifted forward to the consumers or backward to the suppliers. Supply is elastic under competitive conditions where the return is just adequate to justify the existing amount of productive facilities Thus if the seller were to bear the tax (all, or in part), the reduced return would cause some producers to find it unprofitable to continue, and their dropping out would reduce the supply until costs of production were again covered In summary, conditions that are conducive to forward shifting of taxes are an inelastic demand (weak consumer defense against the tax) and an elastic supply (strong seller defense against the tax).

Selected Commodities—Tobacco Products, Alcoholic Beverages, and Horseracing

In the case of the commodities under consideration—tobacco products, alcoholic beverages, and gambling (horseracing), demand is considered inelastic by most authorities. For example, Harold M. Groves contends,

> . the tobacco tax has appeal the world over because the demand for tobacco is highly inelastic This permits the taxmakers to hang a fantastic tax on an otherwise cheap product and keep the consumer coming back for more Tobacco consumption falls in the area of compensatory psychology. One "needs a smoke" largely to favor himself in moments of boredom and fatigue [1]

The Report of the Senate Interim Committee on State and Local Taxation (1951) reported findings by the U S Treasury which indicated a high degree of inelasticity with respect to price and income for both tobacco products and alcoholic beverages [2] Undoubtedly, gambling would demonstrate similar characteristics One author states,

> As a matter of fact, the strongest motive of all mankind, after the more sordid necessities are provided for, is excitement. For this reason, gambling will continue—even should all cardplaying be declared illegal and all racecourses ploughed up [3]

The elasticities of these commodities will be considered in greater detail under the appropriate revenue sections. At this point, it appears safe to conclude that demand for these commodities is highly inelastic and that taxes levied on them are largely shifted to the consumer

SUMPTUARY TAXATION

Commodities may be selected for taxation for sumptuary reasons. If so, the objective is to control consumption—essentially, to reduce it. It is argued that in the absence of a tax, output and use of the commodity in question would be beyond the level regarded as optimum by society That is consumption of such a commodity results in real costs to society not reflected in costs to producers and therefore not reflected in prices paid by consumers In such a situation, the imposition of a tax is needed to raise the price of the commodity and reduce its consumption

Since smoking, drinking, and gambling are widely held to be vices, it is easy to understand the use of the sumptuary argument as the rationale for their taxation. This defense is subject to criticism on several grounds For one thing, consumption of these commodities will be curtailed only if demand for them is elastic, which has been argued above to be untrue Such curtailment as does occur would likely be at the lower income levels where the increased prices would be an im-

portant consideration But reduction of consumption on the basis of income levels is hardly justifiable Even more damaging to the sumptuary argument is its conflict with revenue goals For if consumption is reduced, revenue is reduced—complete sumptuary success would result in no revenue This whole problem is most neatly pointed out by the classic statement of the late Henry C Simons

> Many liberal persons defend levies like the tobacco tax on the curious grounds that tobacco is not a necessity—that poor people may or can avoid the burden by not consuming the commodity. This position invites two comments First, it is hardly accurate to say that no burden is involved in getting along without the commodity Second, it seems a little absurd to go around arguing that poor people could or ought to do without tobacco, especially if it is taxed, in the face of the facts that they simply do not do anything of the kind, that the commodity was selected for taxation because they are not expected to do so, and that the government would not get much revenue if they did The plain fact, to one not confused by moralistic distinctions between necessities and luxuries, is simply that taxes like the tobacco taxes are the most effective means available for draining government revenues out from the very bottom of the income scale The usual textbook discussions on these points hardly deserve less lampooning than their implied definition of luxuries (and semiluxuries!) as commodities which poor people ought to do without and won't. [4]

This statement would apply with equal force to alcoholic beverages and gambling (horseracing)

REGRESSIVITY

Consumption Taxes

Taxes based on consumption are widely held to be regressive. Their regressivity arises out of the fact that lower income groups spend a larger proportion of their income for goods and services upon which the tax is placed and, consequently, the tax takes a larger proportion of low than of high incomes Thus, consumption taxes are considered to fail the equity test

Taxes may be placed on consumption in general or on selected commodities and services. The retail sales tax illustrates the general consumption tax Such a tax is highly regressive One author states that the typical sales tax would collect about twice as much per thousand dollars of income at the $1,000-$2,000 income level than it would at the $10,000 and over income level [5] Also, the larger the size of the family, the more that family pays under the sales tax, while the reverse is true under an income tax In order to reduce the regressivity of the sales tax, items are sometimes excluded upon which the lower income groups spend heavily, e g , food

[4] Henry C Simons, *Personal Income Taxation* (Chicago The University of Chicago Press, 1938), p 39

[5] Groves, *op cit*, p 291 However, in California, with food exempt from the tax, the sales tax loses the regressiveness attributed to other states See, *The Sales Tax* by Harold M Somers, published by the Assembly Committee on Revenue and Taxation as Vol 4 in the major tax study in 1964

Selected Commodities—Tobacco Products, Alcoholic Beverages, and Horseracing

Taxes on selected commodities are also referred to as excises, selective sales taxes, and sumptuary taxes Typically, such excise taxes are found to be regressive. A recent study indicated that federal excises took 4 percent of income in the under $2,000 income class and 1 8 percent of income in the $15,000 and over income class Tobacco products, alcoholic beverages, and wagering account for over 40 percent of federal excise tax revenue The same study found that state excises comprised almost entirely of these commodities, took 4.8 percent and 2 1 percent of the income in these respective groups [6]

By almost any standards, tobacco products, alcoholic beverages, and gambling are heavily taxed They are among the few items selected for special taxation—most items are not specially taxed. Also, they are taxed generally at higher rates than other items selected Most luxuries, for example, are taxed at 10 percent at the federal level.

Some selected illustrations may help indicate the tax burden these commodities bear Cigarettes are currently taxed at 8 cents per package by the federal government, the California tax is 3 cents per package Thus a one-pack-a-day smoker in California pays about $40 annually for the privilege These taxes comprise about 44 percent of the retail price of 25 cents per package The tax rate on distilled spirits is even higher The Licensed Beverage Industries estimates that total federal, state, and local taxes amount to 58 2 percent of the average retail price, i e, of the average retail price of $4 64 per fifth of distilled spirits, total taxes amount to $2 70.[7] Horseracing (gambling) is taxed at somewhat lower rates Presuming the state's share of the turnover (total amount wagered) to measure the extent of the tax, this form of gambling is taxed by the horseracing states at an average rate of slightly less than 10 percent [8] However, horseracing is the only form of amusement that pays 20 percent federal admissions tax. All other amusements bear only a 10 percent admissions tax.

Different Treatment Within Classifications

Tobacco Products Inequities can arise because of the different treatment accorded the various items within each category. In the case of tobacco products, of the 47 states taxing cigarettes in 1962, all but 11 taxed cigarettes only Consequently, the cigarette smoker is penalized in comparison with users of other tobacco products. Other tobacco products are generally classified as cigars, smoking tobacco, chewing tobacco, and snuff Smoking tobacco, chewing tobacco, and snuff are habitually consumed by those in the lower income groups so, except for federal taxes, little regressivity occurs here Taxation of these products would, of course, be highly regressive Cigars, however, are a popular item for higher income groups, therefore, their

[8] Karl Marx, "Tobacco, Alcoholic Beverages, and Pari-Mutuel Taxes," Chapter 21 of the State of Illinois *Report of the Commission on Revenue* (Springfield Frye Printing Company, 1963), p 752

taxation might be progressive It has been suggested that the reason they are not taxed is that most politicians have a fondness for cigars.[9] Federal taxation of tobacco products is not as discriminatory as state taxation; it discriminates only in favor of pipe and chewing tobacco, which pay less than half the ad valorem rate on cigarettes and cigars.

Alcoholic Beverages. A similar situation exists in the taxation of alcoholic beverages; here distilled spirits are taxed heavily in comparison with other alcoholic beverages. In California, a recent study put the total of federal-plus-state excise taxation to be 51.5 percent of a typical "A" blend of 86.8 proof whiskey in 1959.[10] Beer is taxed in California at a rate of 4 cents a gallon. At this rate, a case of 24 12-ounce containers would be taxed 9 cents. The federal tax is 29 cents a gallon or 65 3 cents for a similar case. This makes the total federal-plus-state tax approximately 74 cents. For a case of beer retailing at $4 50 a case, the tax would be about 17 percent, considerably less than the rate on distilled spirits. Wine is taxed according to alcoholic content. The federal tax is 17 cents a gallon for wine with an alcoholic content of less than 14 percent, and 67 cents a gallon on wine with an alcoholic content of 14–21 percent. California wines in these classifications are taxed 1 cent and 2 cents, respectively. For a fifth of wine of under 14 percent alcohol, total excise tax would be 3.6 cents (federal 3.4 cents, plus 0 2 cents state tax). Thus the excise tax would be only 3.6 percent per fifth of wine retailing for $1 (exclusive of sales taxes). This wide range in the rate of taxation of distilled spirits, beer, and wine is highly inequitable, for it means that some users of alcoholic beverages will be taxed much more heavily than others, depending upon their tastes.

Horseracing. Even horseracing experiences some discriminatory taxation within classifications. In most racing states, harness racing is given preferential treatment over thoroughbred racing Ten of the 13 states, practicing both forms of racing, tax harness racing at lower rates. However, in some of the states that use progressive rates, the top rate applied is higher for harness racing.[11]

Ad Valorem Versus Specific Taxation

Inequity also enters into the taxation of the "vices" through the use of specific taxation rather than ad valorem taxation. Specific taxes are levied on the basis of quantity, ad valorem taxes on the basis of value With only minor exceptions, e g , cigars, specific taxation is used. The taxation of beer may be used to demonstrate the manner in which specific taxes add to regressivity of excise taxes. The total excise tax on a case of 24 12-ounce containers of beer was found above to be 74 cents For a case of beer retailing at $4 50, the tax would be about 17 percent of this price, whereas it would amount to about 21 percent of a case of beer retailing for $3 50. For distilled spirits the disparity is even greater. The average rate of taxation was stated above by the Licensed Beverage Industries to be about 58 percent of the average retail price per fifth of distilled spirits The average total

[11] National Association of State Racing Commissioners, *Statistical Reports on Horse Racing in the United States for the Year of 1963* (Lexington The National Association of State Racing Commissioners, February 1964) Table No 2.

excise tax load used was $2 70 per fifth For a cheap whiskey, selling for $3 50, taxes would constitute 77 percent of the retail price. For cigarettes, the same situation obtains but to a lesser extent Since lower income groups are probably the major purchasers of lower priced (lower quality) items, specific taxation adds to the regressivity of excise taxation.

Other Considerations

Besides bearing a proportionately larger share of the excise taxes on the selected commodities—tobacco products, alcoholic beverages, and horseracing—than do the higher income groups, the lower income groups have other burdens to endure. Because moonshine is priced under legitimate whiskey, low income receivers are the moonshiner's best customers As a consequence, they may suffer serious illness, blindness, and even death The Licensed Beverage Industries reports that the Internal Revenue Service found that 93 percent of a large sample of illicit whiskey contained appreciable amounts of lead—a major cause of illness and death Although difficult to determine, the Licensed Beverage Industries estimates 200 deaths in the last decade were caused by moonshine [12]

Finally, it should be noted that when a low income receiver spends money for smoking, drinking, and gambling, he may do so at the sacrifice of other expenditures which are essential to his health and well-being The heavy taxing of these commodities and services then reduces the low income receiver's ability to meet his needs For upper income groups, such considerations are of minor consequence.

CHAPTER III

ECONOMIC IMPACT

GENERAL CONSIDERATIONS

Allocation of Resources and Consumer Welfare

Under a perfectly competitive price system, the consumer has complete freedom of choice The exercise of this choice results in an expenditure pattern which directs the allocation of resources in such a manner that an optimum allocation is attained Since each consumer spends his income (aside from saving) on the goods and services which will bring the greatest satisfaction, he maximizes his welfare, that is, his real income is maximized Similar behavior on the part of all consumers consequently maximizes society's real income However, exception to this conclusion can be taken if it can be argued that the price system ignores some of the real costs to society and consequently the consumption of some goods and services is higher than society deems desirable This is the basis of the sumptuary argument previously discussed Given such a possibility, optimum allocation of resources will be attained only through control of consumption and redirection of resources in line with social judgment

One method of curtailing consumption of a commodity and reducing the amount of resources devoted to its production is to tax it The imposition of this extra burden on the selected commodity must either raise its price or lower the returns to resources engaged in its production Assuming the price of the commodity to be increased—i e , the tax shifted forward—some persons will buy less of it than before and buy untaxed goods and services instead If so, their real income is lower, since they have a less desirable combination of goods than before the levying of the tax If consumption of the taxed commodity is maintained at a higher price, a lesser amount of funds will be available for purchase of other commodities and again real income is lower The extent to which consumption of the taxed commodity would be affected would depend upon the elasticity of demand The more inelastic the demand, the more consumption of the taxed commodity would be maintained—but only at the expense of less consumption of the untaxed goods and services If the tax cannot be shifted forward to the consumer, it must be borne by the supply factors Lower returns to these factors will discourage production of the taxed commodity and reduce the amount of resources devoted to its manufacture In addition, the costs of tax collection which are borne by the supply factors will further serve to reduce returns and thereby reduce production Because of these considerations, the taxation of selected commodities under usual conditions (less than totally inelastic demand) will tend to lessen the amount of resources allocated to their production

Reduced legal production of the taxed commodity may be accompanied by increased interest in such illegal activities as smuggling and

moonshining The taxation of a commodity adds to its costs of production, but tax costs need to be covered only by legal businesses Consequently, the taxation of a commodity creates an opportunity for illicit gains The greater the tax, the wider the spread between nontax production costs and selling prices When this spread is wide, substantial amounts of resources may be directed toward illicit production An outstanding example of such a situation is moonshining The typical quart of moonshine retails for $4, out of which production costs are 26 cents (profits excepted) [1] Production of moonshine was estimated to be 46,000,000 gallons in 1962 and profits were estimated at $688 3 million [2] Unquestionably, the amount of capital invested in this illegal activity is large

It should be pointed out, however, that even though excise taxes have been severely criticized on the above grounds, all taxes to some extent distort production For example, income taxes, which presumably leave the consumer free to choose from undistorted consumer prices, may very well affect the allocation of resources through altering the relative desirability of work and leisure Also, nonincome considerations, such as prestige, become increasingly significant in choosing occupations But it should be noted excise taxes have these effects as well as their other distortive impact on allocation of resources

Business Cycle Aspects

Among the virtues of the progressive income tax is the stabilizing influence it exerts upon the business cycle When income declines, it takes proportionately less out of income and thus helps to maintain consumption When income is rising, it takes proportionately more and thereby restricts spending growth and inflationary pressures Hence the wide acclaim for the automatic stabilizing influence of the progressive income tax It follows that regressive taxes—i e, commodity taxes—react perversely to changes in business conditions As income declines, these taxes take a proportionately larger part of income and leave the income receiver less able to spend for the products of business When income is rising, they take proportionately less, thereby adding to inflationary pressures As one author comments, "Unless rates are deliberately changed as income changes, such tax systems are anticompensatory, they tend to boom the boom and depress the depression' " [3]

Taxes levied on tobacco products, alcoholic beverages, and gambling (horseracing) are among the worst offenders for fiscal perversity First, as a group, they are the most regressive of all taxes, therefore, they have the highest degree of fiscal perversity In addition, these commodities are generally taxed on a specific basis rather than an ad valorem basis, which compounds their anticompensatory nature Since specific taxes are levied on a quantity basis, the tax remains the same regardless of quality differences and price level changes Thus as incomes and prices rise, revenues from specific taxes rise

[1] Licensed Beverage Industries, *Moonshine A $660,000,000 Tax Fraud on the American Taxpayers* (New York Licensed Beverage Industries, Inc, 1963), p 18
[2] *Ibid*, pp 10, 18
[3] Philip E Taylor, *The Economics of Public Finance* (revised edition, New York The Macmillan Company, 1953), p 573

less proportionately than ad valorem taxes and, therefore, are not as effective in restraining inflation as other forms of taxation. The reverse is true in times of price and income declines Specific taxes then bear more heavily on income than ad valorem taxes and consequently reinforce this decline.

Commodity taxation may contribute to inflation in another way. If the tax is shifted forward to the consumer through a price increase, less of the product will typically be sold This cutback of output means unemployed resources—land, labor, and capital. If governmental authorities respond to this situation with measures designed to alleviate it, e g., easy money policy or increased government spending, such efforts will work toward reemployment of these resources at the new higher price level.

From the point of view of the taxing state, revenues from commodity taxation tend to be maintained better during economic declines than revenue from income taxes. On the other hand, during periods of rising business activity, the state will share less in this growth under commodity taxation than under income taxation.

SELECTED COMMODITIES

Tobacco Products

One of the major ways that taxation of tobacco products in California may impair the growth of the tobacco industry is through sales lost to other states If taxation raises the prices of California tobacco products to higher levels than other states, tobacco users may transfer their purchases to the lower-priced (lower-taxed) products of other states. Sales may be lost to the lower-tax states through commuter purchases, through mail order purchases (but not cigarettes because of the Jenkins Act), and through bootlegging The extent of the sales loss will depend largely on price differences and the accessibility of the low-price products

If California were to increase its cigarette tax to 8 cents per package, it would create a large price difference with two of its border states Oregon has no tax on cigarettes and Arizona taxes only 2 cents per package. There would be little difference with Nevada, whose current rate is 7 cents per package Lower prices in Oregon and Arizona would likely encourage purchases in those states by California border residents The recent experience of New York illustrates clearly the extent that one state can lose sales to another when conditions are favorable to tax evasion When New York imposed a 15 percent tax on tobacco products, sales of cigars fell on the average 30 percent At the same time, sales in adjoining states were up 2 percent to 5 percent. Within New York, sales losses varied according to ease of access to tax-free products; for instance, sales in Manhattan were down more than in upstate New York One cigar dealer located near the Hudson tubes had a sales loss of 80 percent (lost to New Jersey) [4]

[4] Clarence M Weiner, "Why the Cigar and Tobacco Products Taxes Were Repealed by New York State and Michigan Effective July 1, 1961," (New York Cigar Manufacturers Association of America, Inc, February 1, 1962). [Pages not numbered.] (Lithographed.)

California's geography would limit sales losses to the lower-priced products, but would not eliminate them Legitimate sales would also be lost to bootlegged cigarettes

The costs of collection of the tax will reduce returns and investment in the tobacco industry to the extent that these taxes are borne by the industry The State of California grants a discount of not more than 2 percent on stamps purchased as an allowance for costs of collection. A 1960 California study reports that distributors were complaining that these allowances did not cover costs In one month, distributors reported costs that ranged from 2 15 percent to 7 22 percent [5] In other states, surveys have found allowances for costs inadequate for the small distributors but profitable for the larger firms For example, a New Jersey survey indicated that the 3 percent allowance exceeded the costs of collection of 35 large firms by 18 3 percent to 44 9 percent, while small wholesalers had losses of 15 5 percent and small vending machine operators had losses of 23 5 percent [6] This data suggests that many firms in California's tobacco industry are carrying a part of the tax collection costs, especially the smaller firms

Another factor restricting the growth of California's tobacco industry is the additional financial cost which results from the capital requirements needed because of the tax Additional funds are needed for stamp inventory, additional merchandise inventory (needed because of the stamping process), and additional accounts receivable (resulting from higher prices). Stamps can be purchased from the state on credit, provided a bond can be posted; if not, they must be paid for in cash so that, in effect, the tax is prepaid In either case. however, additional cost to the firm is involved—the cost of the bond or the financial cost of funds needed for the prepayment of the tax Even with the 3-cent-per-package tax, the State Board of Equalization estimates that approximately 40 percent of the tobacco distributors do not have bonding requirements.[7] Higher bonding requirements due to higher taxes would mean that even fewer would qualify. The additional funds needed for larger merchandise inventory and accounts receivable may be substantial The California Association of Tobacco Distributors, Inc , estimates the capital required because of the 3-cent tax for the small distributor (300 cases per week) to be $18,000 If the tax were increased to 8 cents per package, $48,000 would be required, a $30,000 increase [8] Raising these additional funds would be extremely difficult for many distributors Some are already paying nearly 10 percent for bank funds To raise funds by increasing accounts payable through lost discounts is an even higher cost source Mr Joseph J. Mittler, President of the California Association of Tobacco Distributors, Inc , claims that this extra burden would cause the medium and smaller houses to disappear [9] These considerations indicate that an increase in cigarette taxes would reduce the flow of capital into the tobacco industry.

[8] *Ibid.*

[9] Letter from Joseph J. Mittler, President, California Association of Tobacco Distributors, Inc., June 30, 1964.

Besides limiting the growth of the tobacco industy, additional taxes would likely change the structure of the industry, there would be increased concentration of the industry into fewer and larger firms The evidence above indicates that smaller firms bear a greater burden from the additional costs that result from taxation than do the larger firms As a result, many smaller firms will leave the industry, which has already experienced a strong movement toward greater concentration In 1940, Southern California had approximately 15 major grocery houses and 30 tobacco distributors, last June there were only three major wholesale groceries, and about seven tobacco distributors [10] Distributors have been eliminated either through closure or through merger Additional taxation will hasten this process through elimination of more small distributors As a consequence, there will be a greater concentration and lessening of competition in the tobacco industry

Alcoholic Beverages

The alcoholic beverage industry in California has grown remarkably since its establishment during the depression In 1935, industry payroll and earnings amounted to $26,458,000, by 1962, this figure reached $623,054 000 [11] National growth almost parallels this—payroll increased from $37 billion to $322 billion in the same period [12]

This growth has taken place despite the heavy tax burden placed on the industry The distilled spirits segment of the alcoholic beverage industry is far more heavily taxed than either the beer or wine segments Beer and wine are so lightly taxed that their rate of growth must be mainly explained in terms of nontax factors e g consumer tastes Growth in the distilled spirits sector has been heavily penalized by its tax load The high prices necessitated by these taxes have caused legitimate businessmen to lose sales to illicit production, as discussed and illustrated in detail above and in Chapter V

Horseracing

The horseracing industry in California has experienced a marked change in profitability since the legalizing of on-track wagering The first two decades were extremely profitable In this period, the six private tracks earned total profits of $49,930,000 on an original investment of $5,700,000, and paid stockholders $30,422,000 in dividends [13] In the immediate postwar years, some instances of phenomenal earnings occurred For example, in one year Bay Meadows earned 212 percent on its net worth [14] Since then, profits have been trending downward From 1945 to 1952, profits as a percent of net worth declined from 52 4 percent to 19 7 percent [15] From 1952 to 1960, profits continued downward—falling 33 percent This decline occurred despite the 34 percent increase in track gross revenues in this period Increasing expenses

[15] *Ibid*

plus an increasing share of the parmutuel pool going to the state account for this seeming discrepancy [16] Furthermore, horseracing profits tend to vary considerably from year to year These factors have prompted a Stanford Research Institute study to describe the California horseracing industry as a slow-growth industry, which is subject to high degrees of fluctuation in the demand for its product and to inflexible expenses—all of which combine to make horseracing in California a high-risk business [17]

Horseracing in California is a regulated industry The state grants a monopoly to the tracks and protects them from new entrants In return, the state shares in the proceeds and is, in effect, a partner in the business Intra-industry competition exists mainly in the allocation of racing days between northern and southern tracks and between private associations and the fairs When racing dates overlap, competition for top horses results In the past few years, inter-industry competition from other forms of entertainment has been increasing Baseball, basketball, ice hockey and other spectator sports have become increasingly available

Because the state is the controlling shareholder in the horseracing business, it can direct the destiny of horseracing in California Through changing its share of the revenues from the industry, it affects the returns to the owners and their willingness to invest capital in the industry Low returns discourage, and high returns encourage, capital investment Attempts to increase state revenues through increased tax levies may prove abortive if the capital investment in the industry declines and the quality of racing is impaired, thereby lowering attendance and wagering at the tracks Optimization of horseracing collections to the state would require setting tax rates which would provide returns sufficient to attract capital to the industry How much capital should be attracted into the horseracing industry depends primarily upon the state's philosophy as to the need and desirability of horseracing

A further problem exists in that southern tracks are more profitable than northern tracks In economic theory, unprofitable ventures wither away—as they should, if optimum allocation of resources is to be obtained In this case, however, the tax rates chosen by the state help to determine profitability Should the state apply different rates to northern tracks as opposed to southern tracks? In effect, this would amount to southern tracks subsidizing the northern tracks Again, the answer depends on the social goals of the state

Through its regulations and disposition of revenues, the state also affects the allocation of resources A large part of the rationale for legalizing wagering on horseracing was that it would stimulate the breeding of quality horses To implement this objective, the current law calls for 10 percent of the purses won by California-bred horses to be distributed to the breeders of those horses In 1963, there were 2,863 California-bred winners and total awards of $523,558 [18] Undoubtedly, these awards have encouraged the breeding of high-quality horses

[16] Stanford Research Institute, *An Economic Appraisal of the Outlook for Horse Racing in California* (Menlo Park Stanford Research Institute, March 1961), p 69
[17] *Ibid*, pp 84, 88, 89
[18] *Horse Racing in California*, Annual Report of Operations, 1963, California Horse Racing Board (Sacramento State Printing Office, 1963), p 5

The state currently earmarks $750,000 of its horseracing revenues to the Wildlife Restoration Fund. The effect may be for more funds to be allocated in this way than if this fund had to compete with other demands upon the state's General Fund

CHAPTER IV

REVENUE FROM TOBACCO PRODUCTS

CIGARETTES

Importance of Revenue

The state of California was one of the very latest states to adopt a cigarette tax Its tax did not become effective until July 1, 1959, and by this time, 45 states were already levying cigarette excises [1] When Colorado imposed a tax on cigarettes effective July 1, 1964, it brought the total taxing states to 48 The only two states that do not currently tax cigarettes are Oregon and North Carolina

California's cigarette tax proved a substantial revenue producer from the start In its first fiscal year, 1959–60, the yield was $64,805,000 In the short period the tax has been in effect, these revenues have steadily increased They reached an estimated $72,150,000 for fiscal 1963–64 [2] In addition to these collections, the state derives revenue from the 3 percent general sales tax on cigarettes The Tobacco Tax Council estimates this yield to be $21,700,000 for 1963 [3]

Despite the size and growth of California's cigarette tax collections, the relative importance of these revenues has declined In fiscal 1959–60, they represented 3 1 percent of total state revenues; for fiscal 1963–64, the comparable figure is 2 6 percent [4] Tobacco revenues are relatively more important to other taxing states, on the average, their proportion of total state revenue is twice as large as California's [5]

California is one of the leading states in cigarette tax collections; in fiscal 1963 it ranked fourth among the taxing states. In that year its revenues were $70,829,000 Other major revenue states were: New York, $124,687,000; Texas, $89,706,000, and Pennsylvania, $86,704,000. Substantial revenues are also derived from this tax by a number of other states, but for many states the amounts are comparatively small Wyoming's yield, at $1,731,000, is the smallest [6]

California's tax rate, 3 cents per package, is one of the lowest in the nation Only two states have lower rates—Arizona, 2 cents per package, and Kentucky, 2½ cents per package Washington, D C., also is lower with a 2-cent rate In addition to an ever-increasing number of states adopting cigarette taxes, the tax rates applied by these states have been surging upward In 1950, the most commonly applied rate and also the midpoint of the range of the taxing states was 3-cents per package By May 1964, the most common rate was 8 cents, and the

middle rate applied was 6 cents.[7] This means that since 1950 many states have doubled or more than doubled their tax rates on cigarettes (See Table IV-1 for comparative state tax rates for 1950 and 1964.)

How can California's high revenue yield be reconciled with its low tax rate? Part of the explanation lies in the state's large population. In addition its per capita consumption is high. In fiscal 1963, per capita consumption was 146 packs, 11 above the national average. The State Board of Equalization reports: "The high per-capita income of Cali-

formans and the large number of tourists visiting the state account for most of this difference "[8]

Revenue Potential

California is still taxing cigarettes at its original rate of 3 cents per package, however, there have been proposals to raise this rate AB 84 (amended) (Marks and Garrigus) California Legislature 1964 First Extraordinary Session proposes an 8-cent tax per package, and AB 157 (Henson) California Legislature 1964 First Extraordinary Session proposes a 7-cent tax per package Assuming no change in sales from the levying of these higher tax rates on cigarettes, the state would have revenues for fiscal 1963–64 for these different rates as given in Table IV-2

Qualifications

The above estimates of additional revenue from higher tax rates on cigarettes depend upon a completely inelastic demand, i e, sales do not

decline even though the tax is fully reflected in the retail price Many authorities do contend that the demand for cigarettes is extremely inelastic, in fact, they hold that this is the very reason they are so heavily taxed There is considerable data available which supports this position A recent tax study found the demand for cigarettes to be highly inelastic, that changes in cigarette tax rates resulted in almost proportionate changes in revenues For example, between 1958 and 1959, both Massachusetts and Mississippi raised their rates from 5 cents to 6 cents per package, a 20-percent increase The average cigarette revenue for these two states increased by 24 1 percent in the year following the rate increase, while the remaining 41 states which did not significantly change their tax rates on cigarettes had an average increase in cigarette collections of only 9 97 percent This result was quite typical for other states when their cigarette tax rates were increased On the rare occasions when cigarette tax rates have been reduced, cigarette tax collections have fallen, again confirming the inelasticity of demand To illustrate, Kentucky reduced its rate from 3 cents to 2 5 cents on July 1, 1960 In the ensuing year, its cigarette

[8] State of California, *Annual Report of the State Board of Equalization 1962–63* (Sacramento State Printing Office, 1963), p 28

tax collections were down 10.1 percent [9] This empirical data supports the inelastic demand hypothesis for cigarettes

There are, however, some factors on the horizon which might reduce the inelasticity of demand for cigarettes in the future One factor is the rising price of cigarettes. As prices increase, demand tends to become more elastic, and prices of cigarettes have been moving upward in response to the ever-increasing taxation Furthermore, it appears that tax increases will likely continue at most governmental levels. Beside recent widespread state increases in cigarette tax rates, a 5-cent increase per pack in the federal rate has lately been proposed,[10] and some cities have also adopted cigarette taxes (for example, Los Angeles). A 5-cent increase at each governmental level would mean a potential 15-cent increase in the price of a package of cigarettes Undoubtedly, an increase of such magnitude in the price of cigarettes would bear heavily on cigarette sales.

Although most evidence indicates a high degree of inelasticity of demand for cigarettes, there is also some evidence that cigarette sales are affected by price changes (demand may still be inelastic) For example, when California adopted its cigarette tax, cigarette sales fell over 20 percent in the ensuing 12 months [11] In its May 1964 Monthly Report, the Tobacco Tax Council stated that the number of cigarette packages taxed for that month was down 12 1 percent from May 1963. While the health scare undoubtedly accounts for much of this decline, part may be due to tax increases. Fifteen states raised their taxes during this period Their average decline in packages taxed was about 16 percent—noticeably greater than the 9½-percent average decline for the states whose tax rates remained unchanged Some suffered severe declines, e g., Nebraska raised its tax from 4 cents to 6 cents per pack and the number of packages taxed fell 47 8 percent [12] This evidence suggests that cigarette sales may be reduced through increased taxation.

Cigarette smokers may react to increased prices of cigarettes in a number of ways which would reduce the number of cigarette packages taxed While few may stop smoking cigarettes, some may reduce the number they smoke Others will switch to other tobacco products Small cigars, for example, may be an excellent substitute for many cigarette smokers. Still others will seek out the lower-taxed or tax-free cigarettes The Tobacco Tax Council, in its argument against a tax increase on cigarettes in California, contends that border residents will increase their out-of-state purchases [13] Finally, the wider margin provided by high taxes will serve as a stimulus to bootlegging and further decrease the number of packages taxed.

Another element which might impair cigarette sales and taxes in the future is the possible link between cigarette smoking and cancer The government's health report, which came out in January 1964, appears

to have sharply reduced sales While the National Tax Association reports that cigarette stamp sales were up in June 1964 from June of the prior year, this is the first year-to-year increase for monthly stamp sales since the government report was published In the past, cigarette sales have rebounded from health scares and have then continued trending upward Whether the June increase in stamp sales is a revival of this upward trend is difficult to say The National Tax Association warns of possible misinterpretation of the June upturn It notes that the June 1963 sales were abnormally low, since many stamps had been purchased in advance in anticipation of tax increases scheduled to go into effect [14] Because many people are convinced that smoking is dangerous to health, educational programs are being promoted whose goals are to discourage and prevent cigarette smoking In the long run, such programs may have a telling effect on the smoking habits of Americans At any rate, health considerations, plus ever-rising cigarette prices, may serve to limit the future ability of governments to garner additional revenue from the taxation of cigarettes

TAX COLLECTION METHODS

States taxing cigarettes have two procedures available for collection of the tax One is the reporting (sometimes called invoice or inventory) method Under this plan, the taxpayer reports to the taxing authorities specific information as to his invoices, inventories, and sales, and pays his taxes according to these records The tax is thus self-assessed, and is paid in a manner similar to California's sales tax Another method is the use of indicia (i e, stamps or meter impressions) While variations exist in the implementation of this plan, its essence is that the tax is paid by the taxpayer through the purchase of stamps or meter impressions from the proper state officials or state-authorized agencies.

Of the cigarette-taxing states, only four rely on the reporting method, they are Alaska, Hawaii, Massachusetts, and Michigan. All the other states, including California, use some form of indicia

Potential Savings of Reporting Method

The stamp plan is a costly method of tax collection In addition to general administrative costs, it requires the purchasing and affixing of stamps Although the affixing is done by the distributor, discounts are usually given to the distributor by the state, presumably to compensate for the costs incurred Since costs of stamping can be avoided under a reporting system, a state using this system may realize substantial savings To illustrate the potential savings available to the state of California, estimates based on AB 1374 (Petris) (as amended in Assembly April 5, 1963) 1963 General Session are given in Table IV-3 From this table it can be seen that the reporting method would have provided a saving to the state of $1,818,700 for the fiscal year 1963–64 This saving would continue into the indefinite future and increase as cigarette sales increase However, because of certain nonrecurring adjustments and the revenue lag caused by the change-over from a prepayment to a postpayment plan, there would be a one-

[14] *The Wall Street Journal*, July 15, 1964, p. 2.

time negative effect on revenue to the state in fiscal 1963–64 of $1,880,000, even after the above savings are taken into account [15]

Qualifications

How much of the nearly $2,000,000 per year savings the state would realize would depend upon two factors Costs of enforcement in lieu of stamps, and the extent of tax evasion On the first point, it is the view of the State Board of Equalization that the cost of effective investigation and audit procedures would be " no more than a third of the current cost of the stamp method Possibly it might be substantially less " [16] In Massachusetts, also, opposition to the use of stamps has come mainly from state officials, who believe the method not worth the additional cost [17]

The major criticism of the reporting method of cigarette-tax collection is that tax evasion might more than offset the savings from elimination of the stamping process However, a 1960 report prepared by the California Legislative Analyst concluded that the reporting system could be successfully employed in California provided that (1) the program is strictly enforced, (2) sufficiently severe penalties are imposed on tax evasion, and (3) cooperation of the major segment of the cigarette industry is obtained To begin with, the report notes the long and successful experience the state has had in the use of the reporting method in collection of sales taxes and alcoholic beverage taxes Furthermore, the study points to a number of factors which contribute to the difficulty of cigarette tax evasion For one thing, the state's geography limits access to tax-free cigarettes Most of its population live in coastal areas and only 2 percent near its borders Consequently, tax evasion through individual consumer purchases would be small The Jenkins Act (1949 federal enactment) effectively rules

out interstate shipments of cigarettes, since this act requires the shipper to send a copy of the invoice to the tax administrator in the consumer's state where the use tax would apply Tax avoidance through the use of military outlets is thought to be small and exists under both systems Of greatest concern is bootlegging Even here, the report holds that low profit margins would discourage bootlegging, the profit potential is apparently quite small especially when bootlegging's many problems are considered Among them are the difficulty of finding volume outlets, fines, jail sentences, and confiscation of cargoes In addition, auditing of distributors' records, plus excellent facilities for highway inspection of truck cargoes, should further discourage bootlegging and also foil some of the bootlegging attempted [18]

Two states, Massachusetts and Michigan, have had a long experience with the reporting method of cigarette tax collection, and officials in both states express satisfaction with it A legislative report from Massachusetts states, "Those persons most actively associated with the application of the cigarette excise in Massachusetts state that the reporting system is successful" [19] The cigarette tax administrator in the state of Michigan ardently supports the reporting system He notes that industry members are also pleased with the system and says, "Frankly, at present we know of not one wholesaler who is dissatisfied with the return (reporting) system and who would prefer stamps In fact, many wholesalers are outspoken in praise of the system" [20] Many industry members in both Massachusetts and California have also strongly supported the reporting system [21, 22]

On the other hand, the use of indicia in cigarette tax administration has many strong advocates In Massachusetts, a number of tax officials have recommended the stamp plan for the collection of cigarette taxes Furthermore, the National Association of Tobacco Distributors contends Massachusetts would add $3 million to its revenue through the use of stamps [23] A recent survey of tax officials in all cigarette-taxing states found strong sentiment in favor of the use of indicia (over 90 percent) in the replies (74 percent) [24] A fairly typical reply, perhaps a little stronger than average, is that of a Maryland tax official

> We feel strongly that tax indicia is an absolute necessity for the proper administration of a cigarette tax law We use heat-applied decal stamps, which we consider superior to metered impressions Cigarettes are such a universal item and move so quickly that the lack of indicia would be an open invitation to bootlegging [25]

TAXATION OF OTHER TOBACCO PRODUCTS

Importance of Revenue

For the most part, the taxation of other tobacco products has not been an important source of revenue to either the federal government or the states. In the early period of federal taxation, which started during the Civil War, these revenues were important; since then, cigarette revenues have steadily increased in importance and revenues from other tobacco products now only comprise a minor part of federal tobacco revenues In 1963, the federal government received 96 7 percent of its tobacco collections from cigarettes [27] For the states, cigarettes have always been the major part of their tobacco tax collections Cigarettes were first taxed in 1921 by one state, other tobacco products were first taxed in 1923 by two states. For all tobacco-taxing states, cigarette revenues have never been less than 87.4 percent (in 1927) of total tobacco collections In 1963, cigarette revenue as a percent of total state tobacco revenue was 98 2 percent [28] It should be noted, however, that largely responsible for the very low yield from other tobacco products is the fact that most tobacco-taxing states do not tax other tobacco products Currently, only 16 states tax other tobacco products, and California is not one of them.[29] (For federal and state tobacco collections for 1963, see Table IV-4)

There is a wide range of taxing practices among the states which do tax other tobacco products. For one thing, the products selected for taxation vary. While most states tax all other tobacco products, some tax cigars only, others select two or three products, and North Dakota taxes only snuff and smoking tobacco Also, considerable differences exist as to the type of tax and the range of rates Five states rely solely on ad valorem taxes; eight use specific rates, and three apply specific rates to cigars and ad valorem rates to other selected tobacco products The range of rates is most aptly illustrated by ad valorem rates Minnesota applies a 10-percent rate on the wholesale price of all tobacco products; the comparable rate for Washington is 25 percent An examination of specific rates would also reveal a wide spread (For selected state tax rates on other tobacco products, see Table IV-5.)

The federal government uses specific rates, although the rate on some classifications of cigars is bracketed according to the retail price For cigars weighing less than 3 pounds per thousand, the tax is $0 75, for cigars weighing over 3 pounds per thousand, the rate per thousand increases from $2 50 to $20 as the retail price increases. All other tobacco products are taxed at $0 10 per pound [30]

Undoubtedly, the lack of enthusiasm on the part of the states for taxing other tobacco products lies in the difficulty of securing com-

pliance to such taxes For many states, the additional revenue is not worth the additional cost Evasion of the tax could arise through out-of-state purchases It could also occur through illicit in-state sales if marking of tobacco products is essential to the collection of the tax, and this marking is too difficult and expensive to be carried out effectively

The Jenkins Act, which protects the state against tax evasion through purchasing cigarettes by mail from nontax sources, does not apply to other tobacco products Consequently, the tax could be avoided by purchasing these products by mail Some tax leakage will likely occur in

this way, especially on high-quality tobacco products for which there is some tendency to order by mail However, evasion through direct out-of-state purchases by individuals is likely to be small California's geography, with so few of its people living near the border, would seriously restrict such purchases

Another problem lies in the choice of the collection method Other tobacco products do not lend themselves to stamping as easily as cigarettes They come in a variety of weights and sizes, making the placing of stamps or metered impressions an expensive process This expense can be eliminated if the reporting method is used but, as discussed above, there might be more tax evasion There are still more problems If specific taxes are used, serious auditing problems arise, if ad valorem taxes are used, a problem arises because of price instability Wholesale and retail prices are especially unstable Factory list prices appear to offer the most stable tax base for cigars and other tobacco products After a consideration of all these problems, the California Legislative Analyst concluded that California is better situated than most states to tax other tobacco products and that it could probably successfully tax them He further recommended an ad valorem tax based on factory list prices and the reporting method of tax collection [31]

A recent tax study found that most of the states taxing other tobacco products are not unduly concerned with the problem of compliance Although both the stamp and reporting methods are employed, a majority of the states use the stamp method Alabama and Oklahoma are cited as examples of states that are very successful in taxing other tobacco products Alabama applies a specific tax to tobacco products, Oklahoma applies a specific tax to cigars, but taxes smoking and chewing tobacco on an ad valorem basis Both states use stamps to ensure compliance On the other hand, Washington was reported to have a minimum of trouble in collecting its tobacco tax even though it uses the reporting method and employs an ad valorem tax based on wholesale prices One state, New York, did have such a compliance problem that it discontinued the tax It should be noted, however, that New York is unique in its location near large urban centers which provide an easy source of tax-free tobacco products On the basis of these and other findings, the tax study recommended that Illinois tax other tobacco products It further recommended a specific tax for cigars, an ad valorem tax for chewing tobacco, smoking tobacco, and snuff, and that the stamp method should be used to assure compliance [32]

Revenue Potential

It is difficult to estimate the revenue that California might receive from the taxation of other tobacco products However, in 1955, when California was considering a tax on tobacco and cigarettes, the Department of Finance estimated that a tax of 20 percent of the retail price of tobacco products other than cigarettes would yield $8,288,000 [33] A current estimate might be made on a per capita basis In 1961, the

[31] *Ibid* pp 7–8
[32] Marx *op cit*, pp 716–721
[33] California Legislative Analyst, "Considerations Involved in the Taxation of Tobacco Products Other Than Cigarettes," pp 5–6

per capita net revenue for all 18 states taxing other tobacco products was $0.47, for the four states using a 20-percent ad valorem tax on wholesale prices, the average was $0.51.[34] If the latter figure is used in calculating the revenue potential, California would have received revenue of $9,014,250 from this source in fiscal 1963–64.[35]

Besides the problem of compliance discussed above, the elasticity of demand for other tobacco products is an important consideration in judging the revenue potential from their taxation. Such evidence as is available suggests that this demand is quite elastic. There appears to be a direct relationship between tax rates on other tobacco products and tax revenues, i.e., revenues increase in proportion to tax increases. For example, when Alabama raised its rates on other tobacco products by 50 percent in 1959, revenue increased by more than this amount. Very similar results were experienced in Oklahoma where overall rates were increased by almost 50 percent in 1961. In the ensuing year, revenue from taxes on other tobacco products went up by approximately the same amount as the tax increase.[36] Such data suggests that the demand for other tobacco products is highly elastic, therefore, the yield from taxation of other tobacco products will be determined to a large extent by the level of the tax rate chosen.

CHAPTER V

REVENUE FROM ALCOHOLIC BEVERAGES

IMPORTANCE OF REVENUE

All states tax sales of alcoholic beverages They receive revenue from this taxation in one of two ways One approach is for the state to exercise the sole right to the purchasing and selling of alcoholic beverages. Such states are called monopoly (or control) states In these states, revenues take the form of profits (markups) Although practices vary from state to state, usually the state exercises a monopoly on the sale of packaged bottled distilled spirits The sale of wine and beer by the package and by the drink, and also distilled spirits by the drink, may then be handled by licensed retailers Currently, there are 17 control states In the remaining 33 states, alcoholic beverages at both the wholesale and retail level are distributed by private enterprise. These states are called license states and they derive their revenue through licenses and excise taxation California is a license state

California has taxed the sale of alcoholic beverages since their sale was first legalized in the early thirties This taxation has been the source of considerable revenue to the state and still continues to be a reasonably important part of total revenue For fiscal 1963–64, revenues from the taxation of alcoholic beverages (license fees plus excise taxes) were estimated to be $74 8 million, or 2 5 percent of total state revenues for that period [1] This $74 8 million does not include sales taxes, which would substantially increase total revenues realized by the state from the sale of alcoholic beverages

LICENSING

In the state of California, the Department of Alcoholic Beverages Control has the exclusive power to license the manufacture, importation, and sale of alcoholic beverages Licensing is generally held to be regulatory by the practicing states, even though revenues frequently exceed cost of policing and of administration This is especially true of California—liquor license revenues were over $13 million in 1961 Only New York surpassed this with license revenue of $24 million for the same period Most states received less than $1 million from this source [2]

Revenues to California from liquor licenses over the years have not demonstrated a strong growth pattern From fiscal 1945–46 through fiscal 1963–64, these revenues increased from $8,980,000 to an estimated $14,121,000, an increase of 59 percent This compares with an

[1] California Legislature, *State of California Budget For the Fiscal Year July 1, 1964 to June 30, 1965* (Sacramento State Printing Office), p A-20

[2] California State Senate, *A Study of the Feasibility of Increasing State and Local Government Revenues from Selected Taxes*, Report of the Senate Fact Finding Committee on Revenue and Taxation, Prepared by William K Schmelzle and the Planning Research Corporation (Sacramento State Printing Office, April 1963), p 63

increase of slightly over 500 percent for total state revenues in the same period [3] Projections also suggest continued slow growth for license revenues [4] In the future, revenue will come principally from renewals and recently authorized special fees These special fees will partly offset the decline in revenues resulting from the expiration of authority to issue intercounty transfers, which expired on June 1, 1963.[5] Very few original licenses are currently available (42 on-sale and 5 off-sale) [6] Licenses are issued on a population basis and more become available as the population grows, but recent legislation raised the number of persons per license, thereby slowing the growth of original licenses [7]

Licensing is held to be regulatory, therefore it cannot be looked upon as a means of raising revenue Since California's license revenue is already higher than costs of administration, further increases in license fees would require a change in the philosophy which created the Department of Alcoholic Beverage Control and thereby divorced control from revenue (For a further discussion of Alcoholic Beverage Control Department fees and licenses See Alice J Vandermuelen, *Fees and Licenses,* published by the Assembly Interim Committee on Revenue and Taxation, July, 1964)

EXCISE TAXES

California received an estimated $60,730,000 in fiscal 1963–64 from the excise taxation of alcoholic beverages [8] This is an increase of 3 percent from the prior year as compared with an increase in total state revenues of 13 percent Although revenues from taxation of alcoholic beverages over the years have increased quite steadily, they have fallen far short of matching the overall growth in the total state revenue

In comparison with other states, California stands second only to New York in receipts from taxation of the sale of alcoholic beverages. In fiscal 1961, New York's receipts were $58,384,000, while receipts in California were $51,002,000 Several other states also realize considerable revenue from this source Among the leaders for fiscal 1961 were· Pennsylvania, $48,969,000, Florida, $47,147,000; and Illinois, $40,612,000 Revenues ranged on down to a low of $612,000 for Wyoming [9]

At the present time, excise tax rates in California are as follows·

Distilled spirits	$1 50 per gallon
Beer	$1 24 per barrel, or 4 cents per gallon
Wine	
Fourteen percent alcohol or less	1 cent per gallon
Over 14 percent alcohol	2 cents per gallon
Sparkling wine	30 cents per gallon

and federal excise tax rates on alcoholic beverages are as follows:

Distilled spirits	$10 50 on each proof gallon
Beer	$9 00 per barrel of 31 gallons

Wines
Still wines—rates per wine gallon
Fourteen percent alcohol or less ..... 17 cents
Over 14 percent to 21 percent alcohol ..... 67 cents
Over 21 percent to 24 percent alcohol $2 25
Champagne and other sparkling wines ..... $3 40 per wine gallon
Artificially carbonated wines ..... $2 40 per wine gallon [10]

Distilled Spirits

Importance of Revenue The bulk of the revenue from the taxation of alcoholic beverage sales comes from distilled spirits For fiscal 1963–64, the estimated yield in California was $49,300,000, which was 81 percent of the total revenues from the excise taxation of alcoholic beverages Distilled spirits revenues grew only sluggishly during the first postwar decade Although slow growth still persists (2 percent in the past year), these revenues spurted sharply when the tax on distilled spirits was increased on July 1, 1955, from $0 80 to $1 50 per wine gallon Revenues rose from $16 198,000 to $33,970,000, more than double, in the first fiscal year following the price increase [11] The new tax ranks California virtually in the middle of the 33 license states, with 17 states levying higher rates Specific rates range from a low of 75 cents per gallon for South Dakota to a high of $4 per gallon for Alaska, while Hawaii charges 16 percent of the wholesale price [12] (See Table V-1 for excise tax rates on distilled spirits in selected states)

Only New York received greater revenue from the taxation of distilled spirits than California In 1960, leading states were New York, $45,297,000, California, $41,184 000, Illinois, $23,441,000, and Florida, $20,163,000 [13]

California is consistently a high consumer of distilled spirits In 1961, its per capita consumption was 1 78 gallons, while the national per capita rate was 1 34 gallons [14]

Revenue Potential For purposes of illustration, assume the state raises its tax rate on distilled spirits to $2 per wine gallon, an increase of 33⅓ percent With no change in consumption, revenue would also increase by this amount For fiscal 1963–64, this higher tax would have resulted in additional revenue of $16,433,333

Qualifications The success of a tax rate increase on a commodity depends upon the elasticity of demand for that commodity In the estimate above, it was assumed to be completely inelastic Consequently, sales would be maintained even though the tax is fully reflected in the price However, the true nature of the demand for distilled spirits is questionable A recent tax study investigating this matter could come to no positive conclusions about the elasticity of demand for distilled spirits The authorities cited in the study were divided in their opinions, some held this demand to be inelastic, others thought it to be elastic [15]

n a —Data not available
[1] 12% of wholesale price
[2] 16% of wholesale price

The Licensed Beverage Industries, however, marshals considerable evidence that sales of distilled spirits are affected, in some cases sharply, by taxation It notes that many states have turned to increased taxes on distilled spirits as a means of raising revenues on the theory that they have little effect on liquor sales "But almost inevitably, when state liquor taxes or control-state markups have been raised, these increases have resulted in decreasing sales—or at least in limiting them "[16] One recent example cited in this report is the case of Pennsylvania When its tax rates were raised from 10 percent to 15 percent of sales (50-percent increase), on June 1, 1963, taxable liquor sales dropped at the rate of $1 million dollars a month. The tax was referred to as "price-tag prohibition "[17] As further evidence this report points out that, in seven of the private license states where taxes are highest, 1962 sales were below their 1946 levels, while sales in all other states exceeded their 1946 levels[18] There is much additional data presented which also indicates that sales are curtailed by taxes In most cases, the major effect on revenue was slow growth rather than absolute declines[19]

One of the factors affecting the elasticity of demand is the availability of substitutes For some, beer and wine are substitutes for distilled spirits, therefore, an increase in the tax on distilled spirits will cause some distilled spirits users to switch to beer or wine For those who do not consider these beverages to be substitutes, moonshine might suffice. The high level of moonshine production suggests that many do consider it to be a substitute for legal distilled spirits, its production was estimated to be 46,000,000 gallons in 1962[20] At this time, however, it appears that moonshine production is not significant in California In 1962, there were 18,561 stills seized by authorities in the United States, of which only 12 were in California. However, as taxes on distilled spirits increase, moonshiners' margins increase, and illicit liquor production is stimulated Indications are that states formerly free of such production are now experiencing an increase in such activity The Licensed Beverage Industries reports,

> during the past year reports of moonshine activities have come from states where little such action has been noted before. These include Maine, Vermont, Massachusetts, Connecticut, Rhode Island, Delaware, Wisconsin, and Minnesota in the East and Midwest, and Idaho, Oregon and Washington in the Far West[21]

Fair Trade Versus Free Trade A conceivable course of action, which would likely yield substantial revenue to the state (and at the same time benefit the consumer), would be to sell distilled spirits on a competitive basis This would mean issuing more licenses and the elimination of so-called "fair-trade" pricing. Since prices in fair-trade states tend to be substantially higher than in free-trade states, large price reductions are possible. Such price reductions would provide a

strong stimulus to sales. The following price illustrations are suggestive of the price cut potential once free trade is initiated New York enforces distillers' minimum prices, and a fifth of Seagram's VO sells for $6 95 Other prices for the same item are $7 14 in Philadelphia, which is located in a monopoly state, $6 50 in California, and $4 99 in free-trade Washington, D.C [22] California's price in this case is 30 percent higher than Washington, D C \ An examination of other brands would reveal similar, and in some cases even larger, price differences. An opportunity to observe the impact on prices, sales, and state revenues, when free trade replaces fair trade, will soon be available In New York, legislation repealing price controls and providing for the issuance of more licenses went into effect on October 31, 1964. It is expected to bring lower liquor prices One New York dealer commented, "A fifth of good stuff might now go down about 60 cents "[23]

Governor Edmund G Brown recently declared his opposition to the high prices in the liquor industry He had reference both to prices of distilled spirits and liquor licenses The price of a license, which might be $40,000 to $50,000, he considered to be outrageous He noted that California is one of the few states which by law protects the price of whiskey for the industry, and he added, "The result is that we pay more money than they do in other states "[24]

How much would revenue to the state be increased by free trade? It is difficult to say, but on an assumption of a 10-percent increase in sales, revenues would increase by an equivalent amount if tax rates remain unchanged On this basis, the additional revenue to the state for fiscal 1963–64 would be approximately $5,000,000 Such an estimate might prove quite conservative

Beer

Importance of Revenue Revenue to California from the taxation of beer was estimated to be $10,545,000 for fiscal 1963–64 [25] This is a relatively small part (about 17 percent) of state revenue from the excise taxation of all alcoholic beverage sales In 1960, California ranked 10th highest for revenue collections from beer sales among 41 states for which data was available [26] Some of the leading states for this year were Ohio, $24,409,000, Florida, Pennsylvania, and Texas, about $20,000,000 each At the same time, California received $9,069,000 This relatively low yield is primarily a reflection for the state's low tax rate At this time, almost every state whose revenue was greater than California's had higher tax rates For example, Ohio's rate at 8 cents is twice California's Only one state, New York, had higher revenue with a lower rate Its rate, 3¼ cents per gallon, brought revenue of $10,626,000, just slightly higher than California.[27] (See Table V-2 for beer excise tax rates for selected states)

Besides its low tax rate, California's low per capita consumption further holds down beer excise revenues. California's apparent per capita consumption of beer was below the national average for the

[27] *Ibid*, pp 737–739

years 1950 through 1961, the gap narrows, however, toward the end of this period.[28] Recent indications are that the state's per capita consumption of beer is turning upward. The State Budget for fiscal 1963–64 projects an increase of about 0.3 gallon per person. This would put consumption at 2.5 gallons per adult civilian.[29]

TABLE V-2

STATE TAX RATES ON BEER, JANUARY 1, 1964[1]

(per barrel)

Less than $1	$1 to $2	$2 to $3	$3 to $4	$4 to $6
Maryland Missouri Wyoming	California Colorado Illinois Montana Nebraska Nevada New Jersey New York Oregon Rhode Island[3] Washington Wisconsin District of Columbia	Arizona Connecticut Delaware Indiana[2] Iowa Kentucky Massachusetts[4] New Mexico Ohio Pennsylvania	Kansas[5] Minnesota New Hampshire Tennessee[3]	Arkansas Idaho Texas Utah Virginia West Virginia
Total—3	13	10	4	6

$6 to $8	$8 to $10	$10 to $12	$12 to $14	16 percent of wholesale price
Alaska Maine[6] Michigan North Dakota[7] Vermont	Florida Georgia South Dakota	Louisiana North Carolina Oklahoma	Alabama Mississippi South Carolina	Hawaii
Total—5	3	3	3	1

[1] Montana, Virginia, Washington, and West Virginia tax light beer only, and Kansas and Oklahoma tax strong beer only. The rates for Minnesota, North Dakota, South Dakota, and Utah included in the table are those applicable to strong beer.
[2] Includes, in addition to excise taxes of $6 per gallon, an enforcement tax of ¾ of 1¢ per gallon.
[3] The tax on sales of beer at wholesale is 17 percent of the wholesale price.
[4] In addition, every corporation, association or organization which is licensed by any city or town to sell alcoholic beverages, except certain corporations and certain veterans' organizations, are taxed on the gross receipts from the sale of alcoholic beverages at the rate of one-fourth of 1 percent, plus 23 percent surtax.
[5] Malt beverages imported into the state are taxed on the basis of reciprocity. The current rate, as fixed by the Liquor Control Commission is $1 per barrel.
[6] The tax on malt liquors manufactured in the state is 5½¢ per gallon.
[7] Includes additional taxes scheduled to expire on July 1, 1967.
SOURCE: Advisory Committee on Intergovernmental Relations, *Tax Overlapping in the United States 1964*, July 1964, p. 199.

Revenue Potential. For purposes of illustration, assume that California doubles its tax rate on beer from 4 cents to 8 cents per gallon. Also, assume sales to continue as before. Under these conditions, revenues from beer would double. For the fiscal year 1963–64, the additional revenue would have been $10,545,000, an amount just equal to the current revenue.

Qualifications. The additional revenue illustrated is contingent upon demand being completely inelastic. While the true nature of demand

[28] California State Senate, *op. cit.*, pp. 70–71.
[29] California Legislature, *op. cit.*, p. A-16.

for beer is difficult to determine, some evidence is provided by two recent state tax rate increases When Connecticut doubled its taxes on beer, revenues a year later were up sharply The new rates, effective July 1, 1961, were $2 a barrel and 6¾ cents for beer in small containers Revenues for May 1962, the year following the tax rise, were $265,796 63, more than double the revenue of $120,081 96 for May 1961 [30] The Illinois experience was quite similar In 1959, beer taxes were raised 50 percent, from 4 cents to 6 cents per gallon In the ensuing year, revenues rose 38 percent, from $7,308,000 to $10,081,000 [31] In this case, however, the revenue rise was not quite proportional to the tax rise These two experiences suggest that the demand for beer is highly, but not completely, inelastic On the other hand, there is some evidence that beer consumption is sensitive to price changes The recent national upsurge in beer sales is partly credited to the effective use of price cuts by some of the leading brewers Although other things, such as better packaging and demographic factors, were partly responsible for increased beer consumption, sales and revenues of the firms employing price cuts were up far more than the national average [32]

An illustration may serve as a basis for judging the impact of taxes on beer sales in California The current tax on a case of beer amounts to 9 cents Doubling the tax would mean, of course, a potential 9-cent price increase Even if the retail price were raised the full 9 cents, it is doubtful that sales would be much affected when one considers that beer retails at about $5 a case, depending upon the brand

Wine

Importance of Revenue California's revenue from the taxation of wine was estimated to be $885,000 for fiscal 1963–64 [33] This is an extremely small part (1 5 percent) of total state revenue from the excise taxation of alcoholic beverages The state's low tax rate on wine is undoubtedly responsible for this low yield At 1 cent per gallon for light wines and 2 cents per gallon for fortified wines, its rates are the lowest in the nation The next lowest rate applied among the states for light wine is 10 cents, and rates range as high as $1 and $2 per gallon for light wines and fortified wines, respectively [34] In spite of California's low rates, only 9 of the 31 license states had higher excise revenue from wine in 1960 Some leading states in that year, with their revenues, are as follows: Florida, $5 808,000, Illinois, $4,130,000; New York, $2,655,000, Massachusetts, $1,705,000, and California, $767 000 [35] (See Table V-3 for wine excise tax rates for selected states)

The reason that California stands as high as it does in wine tax revenue among the states is that California is by far the largest consumer of wine In 1961, its apparent consumption was 35,295,000 gallons of wine The next highest state was New York, whose consumption for that year was 24,892,000 gallons Wine consumption is significantly

lower in all the remaining states, with many of these states apparently consuming less than 1,000,000 gallons Even on a per capita basis, California's annual rate of 2 15 gallons is the highest among the states, and is exceeded only by Washinton, D.C , whose rate is 2 96. The national rate is less than one gallon per capita.[36]

[36] California State Senate, *op cit.*, pp. 68, 70–71.

Revenue Potential To illustrate the revenue potential of increased wine taxes, assume the following schedule · 10 cents per gallon for wine with alcoholic content not over 14 percent; 20 cents per gallon for wine with alcoholic content from 14 percent to 21 percent, and 60 cents for sparkling wines With these rates, California would still be a low-rate state With no change in sales, the revenue from the new rates based on the estimates for fiscal 1963–64 would be as follows dry wine, $3,310,000; sweet wine, $1,990,000, and sparkling wine, $710,000 [37] Total revenue would be $6.010.000, an increase of $5,125,000

Qualifications Whether or not the above revenue would be realized would depend upon the impact of the higher tax on wine sales. A strong argument could be made that wine sales would be virtually unaffected by the imposition of the tax. The hypothetical schedule of new tax rates, even though considerably higher than the current rates, would still amount to a very small part of the retail price For example, the new rate on dry wine is 10 cents per gallon or 2 cents per fifth Even if the full amount of the tax were reflected in the price, it is doubtful that an increase of 2 cents per fifth would curtail sales very much, if at all While rates for other types of wine are higher, again there would likely be little change in sales. While the hypothetical new tax on sparkling wines is 6 cents per fifth and might increase the price by that amount, this increase becomes relatively insignificant when one considers that sparkling wines are generally much higher priced than other wines

Some insight into the impact on revenue when tax rates on wine are increased may be gained from Connecticut's recent experience Effective July 1, 1961, its rates were doubled on all wines The newly scheduled rates were 20 cents for wines under 21 percent alcoholic content and 50 cents for wines over 21 percent and for sparkling wines In May 1962, the year following the tax increase, wine revenues were 81 4 percent higher than for May 1961 Thus the increase in revenue nearly matched the increase in tax rate While sales were not unaffected, they were not down heavily (about 8 percent).[38] Since California's rates are much lower than Connecticut's, even before the latter's tax rate increase, California's wine sales would likely be even less affected by a rise in its tax rates The results in Connecticut, plus the illustrations above on the price impact of tax increases, suggest that California would realize revenue increases nearly proportionate to tax rate increases until considerably higher tax levels are reached.

CHAPTER VI

REVENUE FROM HORSERACING

IMPORTANCE OF REVENUE

California has a long history of horseracing It flourished at the turn of the century, but wagering on horseracing was declared illegal in 1909 due to abuses and corrupt practices In 1933, wagering on horseracing was again made legal, provided it is carried on at the track As a safeguard against corruptness, the California Horse Racing Board, acting for the State of California, has complete supervision and jurisdiction over all racing activities in the state

In its first fiscal year of operation, 1933–34, the state received total revenue from horseracing of $259,657 Since then, horseracing revenues have risen sharply, but there have been some dips along the way One dip occurred during the war years when revenue to the state, which was almost $4 million in fiscal 1940–41, fell to about $1 million in fiscal 1942–43 Revenue boomed to almost $23 million in fiscal 1945–46, then dropped to about $14 million in the fiscal year 1949–50 Since that time, revenues to the state have trended almost steadily upward, reaching $42,577,236 in 1963 [1] Of the 27 horseracing states, this revenue was second only to New York, which experienced revenue of $124,117,709 in 1963, while New Jersey was third with revenue of $27,210,978 Some of the racing states receive less than $1 million from this source [2]

The relative importance of horseracing revenue to the state of California can be seen by relating it to total state revenue In fiscal 1962–63, California received 1 7 percent of its total revenue from horseracing In calendar 1962, parimutuel taxes were 1 4 percent of total state revenue The average for other states using this tax was 2 0 percent [3]

The upward trend in state racing revenue is the consequence of both increased wagering by the public and the fact that the state has been taking an increasing share of that wagering Total wagering by the public on thoroughbred racing increased from $333 718,000 in 1954 to $430,066,000 in 1963 [4] In the same period, the state increased its share of this parimutuel pool from 5 3 percent to 6 5 percent and, in addition, increased its share of the breakage from 42 percent to 77 6 percent [5] While state racing revenues have thus been increasing, the racing

associations have been suffering declining incomes From 1952 to 1961, profits for the six racing associations dropped from $7 2 million to $4 8 million.[6] A study by the Stanford Research Institute reports

> The state has been the principal beneficiary from the increase in public expenditures on parimutuel wagering over the 1952–61 period, having taken an ever-increasing share of these expenditures as license fees The racing associations, on the other hand, appear to have suffered the principal brunt of the increasing share of the public's expenditures on parimutuel wagering flowing to the State of California [7]

SOURCES OF REVENUE

In the horseracing states, revenues come from a number of sources· parimutuel taxes, breakage, unclaimed tickets, admissions taxes, license fees, and fines The parimutuel tax is a percentage tax, levied on the total amount wagered The total amount wagered is the parimutuel pool and is commonly called the turnover or handle The amount deducted from the turnover is the takeout, and this takeout, in turn, is divided between the state and the track If the takeout is 15 percent, 85 percent is the amount returned to the winning tickets Suppose the state's share of the handle is 6 percent, then the track will receive 9 percent Breakage is the odd cents of the computed winnings that are not returned to the winners In order to expedite the payments to the winners, amounts are figured to the lowest breakage Thus, if breakage is 10 cents, and a winning ticket comes to $8 88 the winner would receive $8 80 The remaining 8 cents may go to the track, to the state, or be divided between them according to the schedule of the particular state involved

In California, parimutuel taxes plus breakage account for 99 percent of state racing revenues [8] For the most part, this is true of other states, however, in some states admissions taxes and license fees provide substantial income The major states in which these sources of revenue are important are New York and Illinois In 1961, New York received $379,000 from license fees and $2 509,000 from admissions taxes, for Illinois, the comparable figures were $657,000 and $533,000 [9] California has no admissions taxes and its license fees are insignificant

Revenues can also be classified by type of racing thoroughbred, quarter horse, or harness Of these thoroughbred racing is by far the most important, it is the only type that is carried out by all the racing states California, which conducts all three types, received revenues in 1963 as follows thoroughbred racing $30,920,186 83, quarter horse racing, $2 360,784 02, and harness racing, $3,445,181 08 [10]

PARIMUTUEL TAXES AND BREAKAGE

Comparison With Other States

Originally, the takeout in California was 12 percent, out of which the state took 4 percent with the remaining 8 percent going to the tracks At this time, breakage was on a 10-cent basis, and went entirely to the tracks. Since then, several statutory changes have been made, which have both increased the state's share of the takeout and the amount of the takeout. In addition, the state now shares in the breakage Under current law, 1959 enactment, the taxation of the parimutuel pool is as follows Total takeout increased from 13 percent to 14 percent A graduated scale places the state's return at 5 percent on the first $10 million, 6 percent on the next $10 million, 7 percent on over $20 million to $75 million, 7 5 percent on over $75 million to $125 million, and 8 percent on all over $125 million Correspondingly, the track's share declines from 9 percent to 8 percent to 7 percent to 6 5 percent to 6 percent, respectively. The state's share of the breaks is 50 percent of the first $24 million handle and 100 percent thereafter

California's 14-percent takeout applied to thoroughbred racing pools is slightly less than that withheld by most states A 15-percent takeout is the most common rate used Only one state, Vermont, has a takeout as high as 18 percent, and only one state, Delaware, has a rate as low as 12 percent Although California applies the 14-percent takeout to all types of racing, several states use different rates for harness racing and quarter horse racing [11] (See Table VI-1) For the most part, where different rates exist, they favor harness racing and quarter horse racing Once the takeout is determined, the state's share varies according to the particular scheme in use Over half of the states take a straight percentage of the parimutuel pool; the rest of the states have graduated scales, with the state's share increasing as the size of the turnover increases [12] In 1961, average parimutuel tax rates for the six highest revenue states in order of their revenue, from highest to lowest, were as follows New York, 9 9 percent, California, 6.7 percent, New Jersey, 7 6 percent, Illinois, 5 8 percent; Florida, 8.0 percent, and Maryland, 5 0 percent [13]

The amount of breakage retained by the states runs the full range from none to 100 percent. About half the racing states take none, most of the rest take 50 percent, although the amount in some states varies according to the location of the track and by the type of racing California's rate has recently been about 75 percent, which is topped by only two states taking 100 percent [14]

TABLE VI-2

BRIEF SUMMARY OF TAX METHOD OF SELECTED STATES SHOWN IN TABLE VI-1

State	*Summary of Tax Method*
California	Total takeout permitted 14%. State receives 5% of first 10 million dollars handled, 6% of next 10 million, 7% over 20 million to 75 million, 7½% over 75 million to 125 million, 8% over 125 million dollars wagered, occupational license fees. Breaks to 10¢, of which state receives 50% of first 24 million dollars and 100% of all over 24 million wagered
Delaware	Unclaimed parimutuel tickets revert to state after one year. Harness. Total takeout permitted 16%, 3½% to state and 12½% to association, 10¢ on admissions, breaks to 5¢, all to association, $750 per season license
Florida	Thoroughbred. Total takeout permitted 15% divided as follows: 7% to association, 3% and admission taxes to be divided equally between each county after racing commission expenses are deducted, 5% to state for old age benefit. However, any association having an average daily parimutuel pool of less than $400,000 per day for the preceding racing season may operate on a fixed daily license fee and, in lieu of the 3% and 5% tax rate, shall pay ¾ of 3% and ¾ of 5%. Breaks to 5¢ all to state for old age benefit. Seven extra days of racing allowed for benefit of charities and scholarships
Illinois	Thoroughbred. Total takeout permitted 14% (Chicago area), 15% (downstate) of which state receives 4% and 2% of the total mutuel handle, plus ½ of the breakage, breakage 10¢, daily license fee $1,000, with application, $100, for each racing day granted and ¼ of 1% of daily mutuel handle; tax on admissions 20 cents; horsemen's license fees. (State tax is reduced from 6% to 4% on mutuel wagering when total handle does not exceed $300,000 on any one day.) As of April 1st of each year, proceeds from uncashed parimutuel tickets sold during the previous year are payable to the state of Illinois for the Illinois Veterans Rehabilitation Fund of the State Treasury. Harness. Of the total 15% takeout permitted, 9½% goes to association and 5½% to state. Five percent of the amount received by the state goes into the Agricultural Premium Fund and ½% of the amount received by the state goes into the Illinois Fund for Illinois Sired Colts, divided between 6 races (2 races for 2-year-olds, 2 races for 3-year-olds, 1 free-for-all pace and 1 free-for-all trot for 4-year-olds and over)—plus $6,000 reserved for investigator relative to eligibility of horses entered in these named races
Maine	Thoroughbred. Total takeout permitted 17%. State General Fund 6%, Agricultural Stipend Fund 1%, association 10% (½ of General Fund's 6% returned to track for costs of operation, maintenance and repair), license fee $5,000, breakage to 10 cents, all to association. Harness. Total take-out permitted 17%. State General Fund 6%, Agricultural Stipend Fund 1%, association 10%. Breakage to 10 cents, all to association. License fee $10 for each six days of racing. Bond up to $50,000 required for license. One-sixth of state commission is returned to association for purposes of supplementing purse money
New York	Thoroughbred. Total takeout permitted 15%, with the state receiving from Saratoga 9%, and from Aqueduct 10% of total mutuel handle. From Finger Lakes the state receives 10% on first $175,000, 8% next $125,000, 7% next $100,000, 6% over $400,000 to $500,000, 5% to $600,000 and 4% all over $600,000. Breakage 5 cents, divided equally between state and track at Saratoga and Finger Lakes, at Aqueduct 60% of breakage goes to state and 40% to track. Franchise fees of $1,000 per racing day paid by nonprofit racing associations. Harness. Total takeout permitted 15%. Of total daily pool, state

TABLE VI-2—Continued

BRIEF SUMMARY OF TAX METHOD OF SELECTED STATES SHOWN IN TABLE VI-1

State	*Summary of Tax Method*
	receives 5% not exceeding $175,000; 7%—$175,000 01 to $300,000, 8%—$300,000 01 to $400,000; 9%—$400,000 01 to $500,000, 10%—$500,000 01 to $600,000; 11% all over $600,000; plus 50% of the amount of the breaks (breaks to 5 cents) paid by track to state tax commission until the total payments to state tax commission to construction account of each track shall be eliminated
Vermont	Total takeout permitted 18% State receives 3% first $100,000, 4%—$100,001 to $150,000, 6%—$150,001 to $200,000; 10%—$200,001 to $300,000, 12%—$300,001 and over Operating fees set by selectmen with approval of racing commission (Effective June 24, 1963, to April 1, 1964) After April 1, 1964, state receives 8% of which 2% allocated to Agricultural Stipend Fund Breakage 10 cents, half to state and half to track

Revenue Potential

Increase in California's Share of the Takeout One possibility for increasing state revenues from racing is to increase the state's share of the takeout This is the content of AB 2919 (C Wilson), which would increase the state's share of the takeout by 1 percent in all brackets, while correspondingly reducing the track's share, thereby keeping total takeout the same On the assumption that no other changes occur, mainly that wagering continues as before, the additional revenue to the state from such a proposal would have been $5,614,101 in 1963, or 1 percent of the total parimutuel pool of $561,410,107.

Increase in Total Takeout Another possible source of revenue to the state would be to increase the total takeout with the increase going to the state Increasing the takeout from 14 percent to 15 percent would have resulted in revenue to the state in 1963 of $5,614,101; that is, 1 percent of the parimutuel pool as given above.

Increase in State's Share of the Breakage. Breakage also comes out of the total parimutuel pool Although California is currently taking slightly over 75 percent of the breakage, it could claim 100 percent. In 1963, breakage going to track operators amounted to $1,581,213 State revenue would be increased by this amount if all breakage were to be retained by the state

Qualifications

The revenue estimates above assume that total wagering at the tracks will be unaffected by the additional taxes Since additional taxes amount to a price increase for betting, total wagering would decline unless demand were totally inelastic Thus if the total takeout is increased, a smaller percentage of the parimutuel pool is returned to the bettors which, in effect, means the price of wagering has increased. Although increasing the state's share of existing takeout and of the

breakage does not reduce the amount returned to bettors, it may result in reduced quality of racing—the equivalent of an increase in price

How heavy an impact such additional taxes would have on wagering at the tracks is not subject to absolute determination; however, some evidence of the influence of taxes on wagering may be provided There have been some instances where increasing the takeout has produced negative effects. For example, when New York increased its takeout from 10 percent to 15 percent in 1946, drastic declines were experienced in the parimutuel pool for several years During the same period, states which did not increase their takeout had increases in the parimutuel pool at first, which were followed by only moderate declines.[15] A 1956 study was conducted especially to find out the effect of a one percentage point increase in the commission (takeout) on wagering in New York State. It found that a 1-percent increase in commission would result in a 6-percent drop in the handle, even with no change in attendance It further concludes

> If the commission goes up one point, all other factors remaining the same, and results in a 6-percent drop in handle, the projected handle would be $352,500,000 A 16-percent commission on this handle would yield a take of $56,400,000 On the other hand, a 15-percent commission on $375,000,000 would yield $56,250,000—only $150,000 less. To the extent that attendance is also adversely affected by a commission increase, total income produced by a 16-percent commission would be less than that produced by a 15-percent commission.[16]

In the case of California, there is good reason to believe that additional taxing of the parimutuel pool may produce much less in revenue than the above estimates suggest Such additional taxation would make it even more difficult for the racing industry, which is already suffering economic difficulties, to maintain the quality of racing in California A recent study points out:

> The net profits of the thoroughbred racing associations from conducting horseracing meets in California have declined significantly over the past decade in terms of both actual dollars and as a share of the total revenue from thoroughbred racing. Net profits before federal and state income taxes of these associations as a group declined nearly 33 percent between 1952 and 1960, notwithstanding an increase in total revenue of nearly 34 percent over the same period. Before-tax profits declined as a share of total revenue from about 14 5 percent in 1952 to about 7 3 percent in 1960.[17]

Should additional taxation push track revenues down even more, the tracks would find it increasingly difficult to maintain their plants and equipment. Furthermore, there would be reduced ability to offer attractive purses. Overall, the quality of racing offered the public would deteriorate and cause a drop in both attendance and wagering at the tracks Concomitantly, state revenues would suffer

OTHER SOURCES OF REVENUE

License Fees

California charges no daily track license fee—its parimutuel tax was originally intended as a license fee Some states, however, levy both a track license fee and a parimutuel tax. New York, a leading example, has a $1,000-a-day license fee, in addition to its parimutuel tax In 1963, such a tax in California would have resulted in revenue of $379,000. Total racing days for the year were 379 (291 for the private associations and 88 for the fairs). Such additional taxes would likely have to be borne by the betting public and racegoers, even though collected and paid for by the track to the state Consequently, such a revenue estimate would be subject to all the limitations discussed above, which arise out of additional taxation of the parimutuel pool.

The occupational license fees now collected by California and other states are too small to be considered for revenue purposes. They are primarily a means of regulating and controlling horseracing. For 1963, the state collected $50,311 from all individual licenses issued.

(For a futher discussion of license fees, see Alice J. Vandermuelen, *Fees and Licenses,* published by the Assembly Interim Committee on Revenue and Taxation, July, 1964.)

Admissions Taxes

California is 1 of 14 racing states which charge no admissions taxes. In some states, these taxes raise considerable revenue. For example, the two leading states, New York and Illinois, received $2,509,000 and $533,000, respectively, from this source in 1961.[18] Since the federal admissions tax in California in 1963 amounted to $1,493,113 (20 percent of paid admissions), a 15-percent state tax would amount to approximately $1,125,000; a 10-percent tax would be about $750,000. These estimates, again, assume no decrease in attendance with the additional tax Since these taxes increase the cost of watching horseracing and of wagering, some decrease in attendance is likely. When one considers that total admissions taxes in California now average about 30 percent (20 percent federal tax, plus approximately 10 percent average city tax), an additional 10 percent or 15 percent tax would produce a total tax load which might seriously reduce track attendance Thus admissions taxes are subject to the same restraints as discussed under the additional taxation of the parimutuel pool

Number of Racing Days

Another possible source of income would be to increase the number of racing days The 1963 Senate Fact Finding Committee study illustrates the expected income that could be gained by increasing the number of racing days at the southern tracks, where population density and availability of personal income might warrant such a consideration.[19] Using the same hypothetical example as in the Senate study, but updating the average daily handle to 1963 figures, would result in the following revenue to the state·

[18] Marx, *op cit*, p 753
[19] California State Senate, *op cit*, p. 57.

From Hollywood Park	
17 added days at $2,602,491 (1963 average daily handle)	$45,772,347
Parimutuel taxes at 8 percent	3,661,787
From Santa Anita	
17 added days at $2,547,314 (1963 average daily handle)	43,304,338
Parimutuel taxes at 8 percent	3,464,346
From Del Mar	
8 added days at $985,325 (1963 average daily handle)	7,882,600
Parimutuel taxes at 7 percent	630,608
Total increased parimutuel pool	$96,959,285
Total increased revenue to state	7,756,741

The above revenue estimates assume that the average daily handle will be maintained over the added racing days. Such an assumption is open to question. Increasing the number of racing days may simply result in bettors spreading available funds over more days, with a consequent drop in the average daily handle. Some support for the concept of a limited amount of funds available can be gained by turning to a recent study on California horseracing, which found a relatively limited customer market in the Los Angeles area consisting of a "hard core" of racegoers. Thus, it contended, thoroughbred racing at Los Alamitos would have to rely on customers already attending other meets.[20] If the market is as limited as this study implies, the average daily handle would undoubtedly suffer from the added days of racing.

Night Racing

State revenues might be increased by legalizing night racing. The 1963 Senate Fact Finding Committee suggests a possible increase in state revenues of $41,000,000 from this source. A major question to consider is whether this amount would be a net increase. Night racing may very well widen the market for bettors and racegoers, on the other hand, night racing would likely compete with other racing to some extent and thus subtract from other racing revenues.

Off-track Betting

The city of New York has been seriously considering legalizing off-track betting for some time. Interest has been so high that WCBS-TV of CBS undertook a public survey on the matter of legalizing off-track betting. It found that betting was not a moral problem with New Yorkers—three out of four favored off-track betting.[21] On the matter of morality, Abraham D. Beame, comptroller of the city, said:

> We have been told that off-track betting is immoral. Can it be moral for the state to collect $106 million from betting at the tracks, and immoral to gain revenue from off-track betting? Is it immoral to deprive the underworld of its main source of revenue—the money it uses to support dope traffic, prostitution and other nefarious enterprises?[22]

[20] Stanford Research Institute, *op. cit.*, p. xvi.
[21] International Research Associates, *New Yorkers Consider Off-Track Betting.* Prepared for WCBS-TV by Helen Dinerman, Gary A. Steiner, Project Director (New York: International Research Associates, Inc., November 30, 1963), p. 1.
[22] Marx, *op. cit.*, p. 756.

Aside from the question of morality, objections might be raised against off-track betting on the grounds that it might impoverish those in the lower income groups and consequently deprive some families of necessities Such a problem already exists to some extent in the availability of on-track betting Also bookies currently provide gambling opportunities and, furthermore, pay no tax to the state

There are two major arguments for the legalizing of off-track betting One has already been mentioned—legalizing off-track betting would put the bookie out of business and thereby deprive the organized underworld of one of their most lucrative sources of funds Crime and corruption would be sharply curtailed as a result The other argument is that the revenue potential to the states legalizing off-track betting would be substantial According to one estimate, the state of New York would receive over $200,000,000 yearly from legalized off-track betting; for Illinois the amount would be $50,000,000 [23] Both these estimates are slightly more than double the total racing revenues currently received by these states On the same basis, California could expect to receive over $85,000,000 from legalized off-track betting Such an amount completely dwarfs the potential revenue increases from all other sources—with the possible exception of night racing.

In support of the contention that legalized off-track betting would provide substantial revenue to the state is the widening of the market for betting that would occur The study previously referred to found that racegoers were a hard core group that traveled only short distances to the track. For example, at Hollywood Park, 93 percent of the racegoers traveled less than 50 miles [24] Off-track betting could reach those in population centers removed from the tracks, as well as those who now patronize the bookie, regardless of proximity to the tracks

State Fairs

In the year 1963, the Fair and Exposition Fund amounted to $22,506,715 28 [25] This was almost 53 percent of the total racing revenue to the state of $42.577,231 41 These funds are derived through a 4-percent license fee on all parimutuel wagering, which comes out of the state's share of the takeout, plus the total revenue from individual license fees By taking this amount off the top of the revenues generated by horseracing to the state and earmarking it for the fairs, the amount spent for fairs is undoubtedly in excess of what would be spent if the fairs had to compete for funds out of the general fund [26] To the extent that expenditures would be reduced under this procedure, savings would result which could be considered the equivalent of additional revenues Even a 10-percent reduction in such expenditures would have resulted in savings in excess of $2,000,000 to the state in 1963.

CHAPTER VII

SUMMARY

Virtually all available evidence indicates that taxation of the commodities under consideration—tobacco products, alcoholic beverages, and horseracing — is an extremely inequitable, if not the most inequitable, type of taxation. This taxation bears most heavily upon the lower income groups. It takes proportionately more of their income, and as a consequence, it reduces their ability to purchase other needed commodities.

Besides failing the test of equity, these taxes have other undesirable social consequences. They reduce the overall social well-being from its optimum, that is, society's real income is reduced. This is the consequence of the distortive effects these taxes have on prices Prices of the taxed commodities tend to be higher than in the absence of the tax and therefore the tax curtails their consumption Resources which would have been used in their production are now diverted to other forms of production less desirable to the consumer. In some cases, the tax-caused production may be illicit production such as moonshining, which, in turn, finances syndicated mobsterism

The sumptuary rationale provides the basis for such taxation Its major tenet is that the costs involved in the normal productive process do not cover the real costs to society The tax is needed to raise the price of the commodity to its true social cost In levying such taxes, the legislators are substituting their judgment for that of the individual. Thus the legislators decide what is good for the individual and deny him freedom of choice among goods whose prices are undistorted by taxation Commodities may be taxed out of existence (pricetag prohibition) even though their production and sale is legal.

Taxes on the commodities studied have a further weakness; they have a destabilizing economic impact As income rises, they rise at a slower rate; as income declines, they fall less rapidly. Thus they tend to reduce consumption during recession and fail to reduce consumption during inflation As quoted in Chapter III, they tend to "boom the boom and depress the depression " They do, however, tend to preserve the state's income during economic declines but, on the other hand, they reduce the state's share of income growth during inflation, which has been the chronic postwar condition.

Only on one point do these taxes score well; they are excellent revenue producers However, there is some question whether the ability to produce revenue should be the sole criterion for taxation If so, legislators would do well to consider taxing medicine and church attendance Imagine the public protest! Smoking, drinking, and gambling are evils, so it is all right to tax them An individual may pursue his vice just as long as he is willing to pay the tax penalty. In fact, the state hopes and expects him to do just this, otherwise it would receive no revenue. It is interesting to note in the 1964 United States con-

gressional investigation into excise taxation that, in spite of the extremely high levels of federal taxation on tobacco products and alcoholic beverages, opinion was virtually unanimous that these excises should be maintained. Opinion was almost equally as strong that excises on furs and jewelry, much lower taxed items, should be reduced. Our mores apparently largely determine our tax structure.

In the past, governments have been able to raise additional revenue from taxation of the vices through the simple expedient of raising the tax rates applied. There are some indications, however, that such a procedure may be unsuccessful, if not abortive, in the future. The recent health report and data on cigarette sales warn against overly optimistic revenue expectations from additional cigarette taxation. The taxation of alcoholic beverages and horseracing may also be reaching its limit. Officials in the distilled spirits industry commonly describe its taxation as "confiscatory" and officials in the horseracing industry feel that taxation in their industry has reached the "point of diminishing returns." In short, these industries are already so heavily taxed that any further tax increases will likely provide limited additional revenue. New avenues, such as legalized off-track wagering, may prove more fruitful.

FELIX WAHRHAFTIG

December 1964

TABLE OF CONTENTS

LIST OF TABLES, FIGURES, AND CHARTS

I. INTRODUCTORY NOTE

This study describes California's system of taxing corporation income and makes suggestions for improvement The rates of taxation imposed in this state (Chapter II) and other states (Chapter III) are outlined, the possibility of passing the tax on to others is evaluated (Chapter IV) and several special problems are considered (Chapter V), particularly, conformity with federal taxation (A), the existence of tax-exempt organizations (B), the prepayment provisions (C), and, of course, the taxation of multistate corporations (D) The last will undoubtedly remain a problem for some years and merits careful attention

II. TAXATION OF CORPORATION NET INCOME IN CALIFORNIA

California is one of 38 states imposing net income taxes on corporations Every bank and corporation doing business in this state with certain exceptions[1] is subject to a franchise tax of 5 5 percent of net income or $100, whichever is greater Banks are also subject to a special tax rate not to exceed 4 percent in lieu of personal property taxation The bank tax is discussed in depth in a report on the subject by Mrs Yvette Gurley issued by the Assembly Committee on Revenue and Taxation as part of a volume entitled "Taxation of Property in California" (December 1964) Corporations which derive income in California but are not subject to the franchise tax are taxed under the corporation income tax also at 5 5 percent of net income As shown in Table I, in 1964 California realized $311 million in revenue from corporation income and franchise taxes

The franchise tax, which is a privilege tax "measured" by net income, was enacted by the Legislature in 1929 following the adoption of a constitutional amendment by the electorate At the time of adoption, the amendment contained a 4 percent limit on the corporation tax rate and a provision that a tax could be imposed under the provisions of the amendment only by two-thirds vote of each house of the Legislature The rate limit was subsequently removed but the two-thirds vote requirement has remained. The franchise tax is a prepaid tax It is paid in advance for the privilege of doing business in California in the ensuing year. In 1963, the Legislature provided for accelerated collections of the bank and corporation franchise tax

The corporation income tax was enacted in 1937 to remove an inequity in the taxation of interstate corporations which were not taxable under the Franchise Tax Act As this tax is an income tax rather than a franchise tax, corporations subject to it are not required to pay a minimum tax nor are they required to include in income interest from United States obligations.

The corporation income tax is of minor importance in the state's revenue structure In 1962–63, corporation income tax collections amounted to only $1,889,335, compared with the total of $311,250,827 collected by the Franchise Tax Board in bank and corporation franchise and corporation income taxes[2] A law passed by Congress in 1959 (P.L 86–272) reduced the number of corporations subject to the state corporation income tax law. The federal law prohibits a state from imposing a tax on income derived from interstate commerce, provided (1) the activities within the state are limited to the solicitation

[1] A number of corporations are exempt from tax social, fraternal, civic, religious, educational, hospital, charitable, etc organizations (See Section V-B) Insurance companies are also exempt as they are taxed on gross premiums in lieu of all other taxes except property taxes The taxation of insurance companies is covered in a report on the subject by Dr Sylvia Lane issued by the Assembly Committee on Revenue and Taxation

[2] Franchise Tax Board, *Annual Report*, 1963, p. 13

of orders for sales of tangible personal property by employees or other representatives; (2) orders are sent outside the state for approval; and (3) orders are filled from stocks of goods maintained outside the state * [See pp 41 ff., below, for a detailed discussion]

* This provision works in the same direction as the business inventory tax, i e, it encourages warehousing out of the state See Harold M Somers, "Business Inventory Tax," in David R Doerr and Raymond R Sullivan, *Taxation of Property in California* (Sacramento Assembly Interim Committee on Revenue and Taxation, 1964)

SOURCE Franchise Tax Board, *Annual Reports*, 1936–1963

[a] Does not include Bank Tax (see "The Bank Tax in Lieu of Personal Property Taxation," Section Five, VII, *Taxation of Property in California*, Sacramento Assembly, California Legislature, Assembly Interim Committee on Revenue and Taxation, December, 1964.)

[b] Preliminary

[c] Excludes corporations reporting net loss or no income or loss; such information not being available

III. CORPORATION TAXES IN OTHER STATES

Of the 38 states taxing corporate net income as shown in Table II, eleven states have a maximum rate in excess of that imposed by California However, several of these states allow a deduction for federal tax paid while California does not

* "X" Denotes "yes", "–" denotes "no" In general, each state which permits the deduction of federal income taxes limits such deduction to taxes paid on that part of income subject to its own income tax

** Allows deduction of state corporation income tax itself in computing state tax liability

† Bank rate is 12 54 percent

†† Rate on banks and financial institutions is 8 percent

‡ Limited to 10 percent of net income before federal tax

SOURCE Commerce Clearing House, *State Tax Guides* and *State Taxation of Interstate Commerce*, report of the Special Subcommittee on State Taxation of Interstate Commerce of the Committee on the Judiciary Vol 1, pp 105–107 88th Congress, 2d Session, House Report No 1480 (Washington, D C , 1964)

The corporation income tax bases vary widely among the various states, as shown in Table III A majority of states do not use net income reported to the federal government as a starting point for the computation of the state tax base. The California corporation franchise tax base is roughly comparable in many respects to New York's and Oregon's.

IV. WHO REALLY PAYS THE CORPORATION INCOME TAX?[a]

We are concerned here with trying to determine who really pays the corporation income tax The corporation itself is legally obligated to pay and makes the payment to the revenue agency Can the corporation recoup the tax wholly or partly by paying less for what it buys or charging more for what it sells? This is apart from the obvious fact that a company can recoup about half of its state tax from the federal government through the deductibility feature

The doctrine that "an income tax cannot be shifted" has been held firmly for some time Occasionally a word of protest is raised, but without any serious impairment of the doctrine itself Taxes on income from wages and salaries, interest and dividends can be shifted under certain, reasonably realistic conditions The doctrine of the nonshiftability of an income tax cannot, therefore, apply to such income What of the taxation of business income?

In the analysis of the taxation of business income it is particularly important to distinguish between the short run (fixed capacity) and the long run (variable capacity), even though much of contemporary tax doctrine would say that no shifting takes place in either case

A. GENERAL CONSIDERATIONS

If one may judge from the opinions often expressed popularly, income taxes on business can be shifted It is assumed that a merchant or manufacturer often takes into account, at least indirectly, the amount of income tax he will have to pay and, if the market conditions permit, fixes his prices at such a level as would yield him a certain minimum net income Leaving aside for later discussion the complications introduced by the corporate form of business, however, most economic opinion has in the past been to the effect that "market conditions" usually do not permit the addition of the tax to the price in the short run[4] Any shifting that takes place does not come about by a straightforward shifting from seller to buyer but, if it comes about at all, does so through a complex, indirect, and roundabout process

Before passing to a detailed economic analysis of the problem, it is necessary to discuss several general considerations and also some general arguments which are often used to prove that shifting of the tax does not take place, i e that the tax is absorbed by businessmen

---

[a] Prepared by Harold M Somers See Challis A Hall, Jr, "Direct Shifting of the Corporation Income Tax in Manufacturing," *American Economic Review*, May 1964 Marian Krzyzaniak and Richard A Musgrave, *The Shifting of the Corporation Income Tax An Empirical Study of Its Short Run Effect Upon the Rate of Return* (Baltimore The Johns Hopkins Press, 1963) Harold M Somers "The Place of the Corporation Income Tax in the Tax Structure" *National Tax Journal*, September 1952, Richard Goode, *The Corporation Income Tax* (New York John Wiley & Sons, Inc 1951), and Harold M Somers, 'Taxation of Business Income,' Chapter 13 in *Public Finance and National Income* (Philadelphia The Blakiston Company 1949)

[4] See Robert S Ford, 'Some Economic Aspects of the Present Corporate Income Tax," *Proceedings of the National Tax Association*, 1947, pp 55–59 and the bibliographical references given there

The following discussion covers goods and services including those of manufacturing, sales and financial companies

Assumption of Profit Maximization

It is assumed in this discussion that (1) price and output were set at the point of maximum profit before the tax was imposed and (2) that the price and output will be changed, if necessary, to achieve the maximum profit after the tax is imposed [5] Insofar as these assumptions are inconsistent with actual business practice, (i e if businessmen do not actually try to maximize profit) the following analysis is unrealistic However, it may still be useful in suggesting how to approach the problem of tax shifting under other, perhaps more realistic, assumptions For instance, it may reasonably be assumed that inertia, if nothing else, will prevent a change in price for only a small prospective change in profit The analysis can then be modified to ignore any change in profit that is less than, say, 10 percent of the existing amount Professor Shoup has suggested that firms might have kept their prices down for competitive reasons, but that a substantial increase in the income tax might prompt concerted action to raise prices and profits [6]

Significance of "Goodwill"

The possibility of losing "goodwill" is frequently advanced as an argument to prove that price will be unchanged and the tax absorbed This would mean that a change in price would result, not in the sales originally assumed, but in some other sales, because of the change in goodwill attributable to the price change If the change in goodwill is actually attributable to the price change, and it is capable of being estimated even roughly, then a price-sales schedule (i e a demand schedule) can be set up accordingly

Psychological Effects of the Tax

Changes in the price-sales relationship may take place because of the imposition of the tax itself People may be more willing to pay a higher price, knowing that the business firms have to pay higher taxes on their income or other base This means that a new set of price-sales data must be obtained after the tax is imposed The new data must be used to determine the new price and output Even though technically the demand conditions have changed, it may still be legitimate to consider any price rise as a case of tax shifting since the change in the demand conditions is attributable to the tax

Significance of the Quantity of Money

An argument against shifting which has found favor in the past runs somewhat as follows The general price level, given a certain volume of production, depends on the quantity of purchasing power—money and deposits—and the velocity with which it circulates An increase in the income tax could only enable sellers in general to put up their prices, if at the same time it caused an expansion of currency or a more

[5] For a convenient mathematical demonstration that an income tax is not shifted under these assumptions see Paul A Samuelson, *Foundations of Economic Analysis*, p 40 (Cambridge Harvard University Press, 1947)

[6] See Carl Shoup, "Incidence of the Corporation Income Tax Capital Structure and Turnover Rates," *National Tax Journal*, Vol 1, March 1948, pp 12–17

rapid circulation of money, making it possible for the higher prices to be paid

This may be criticized along traditional lines In terms of the equation of exchange, $MV = PT$, where M is the amount of money and money substitutes, V the velocity of circulation of the items included in M, P the price level, and T the volume of trade, an increase in P is possible through a reduction in T and without any change in M or V or MV

Since a rise in price is almost certain to be associated with a decline in output where general demand and supply conditions do not change, the quantity theory of money imposes no barrier to the possibility of tax shifting

If the decline in T is nil or insufficient to offset the rise in P, then it is true that M or V or both must rise so that MV rises Under the presently prevailing banking and monetary system it is likely that the amount of money and money substitutes will actually respond to a rise in PT Hence, the possibility of a rise in P cannot be neglected It is not ruled out of account on overall grounds such as those represented by the equation of exchange

Application of General Supply and Demand Theory

Instead of relying on the quantity theory of money as crudely stated, we may merely speak of the price level as being determined by total commodity demands and total commodity supplies Seligman apparently had this in mind when he approved of the Ricardian statement "Each man's expenses must be diminished to the amount of his tax, and if the seller would wish to relieve himself from the burden of the tax by raising the price of his commodity, the buyer for the same reason would wish to buy cheaper These contending interests would so exactly counteract each other, that prices would undergo no alteration "[7] As Robertson pointed out, however, this argument rests on the assumption that all working class consumers are income taxpayers, and that money collected by the state is not spent [8] Even if all are taxpayers it may generally be assumed that the income tax rates applicable to owners of business firms are higher than those of the general population, i e the final consumers

Significance of Differential Rates

One of the arguments sometimes accepted as indicating that the tax cannot be shifted is that the amount of the shift cannot be determined because of the various tax rates which exist As Robertson has caricatured it, "because it [the tax] would not know so to speak, to what extent to affect them "[9] Needless to say, the fact that we do not know exactly how great the shifting may be is no disproof of the possibility that some shifting will take place Robertson has made this point very clearly and has argued that, besides, Pigou had measured the effect of differential taxes upon various sources of supply

[7] E R A Seligman, "Income Taxes and the Price Level," Appendix to the Colwyn Report, p 123n

[8] D H Robertson, "The Colwyn Committee, the Income Tax and the Price Level," *Economic Journal* Vol 37, December 1927, p 576

[9] *Ibid*

Significance of International Price Level

Another of the superficial and mechanical arguments, similar to the one based on the quantity theory, is based on the existence of a general international price level There is a common price level throughout the world for goods which enter into international trade and it has been argued that this price level could not be affected by the fact that the income tax in one country is higher than income taxes in other parts of the world In criticism of this Robertson points out that The British supply is a large part of the world supply, the argument would be just as valid for local taxes, and, businessmen have contended that British trade was restricted because the tax made it difficult to compete at world prices Similarly, we may argue that American supply is a substantial part of the world supply, hence anything that tends to push up the prices of American goods on the world market may affect the market as a whole, and in certain products California output is a significant factor in the formation of domestic and international market prices

Significance of Corporate Organization

Where the firm in question is incorporated there are added reasons why it is claimed that the tax will not be shifted It may be argued that this type of business enterprise is not concerned with the tax because it recoups itself by deducting the tax from its shareholders, the directors are not personally affected to any great extent and are unwilling to experiment with higher prices because of the size of the undertaking, and the differential rates of the income tax affect different shareholders to various extents This argument, if valid, would be very important because management is separated from ownership in substantial degree in American corporate interprise

This type of argument is not very convincing because it implies a disregard for profits on the part of management It must be assumed that if the tax made a change in profits, management would at least consider offsetting the change It is curious that the conclusion of the nonshiftability of the tax is reached here by assuming (implicitly) that the principle of profit maximization does not hold whereas in later sections of this chapter the same conclusion is reached (under conditions of fixed plant and equipment) on the assumption of profit maximization

There is no need to go the extreme of denying profit maximization completely in an effort to be realistic A profit "constraint" alone helps explain business behavior The constraint, either imposed by shareholders or self-imposed by management, sets a minimum amount or rate of profit to be earned As long as that minimum is secure, management might try to make the company grow as rapidly as possible, as by maximizing gross sales [10] Another objective might be to keep a certain share of the market even though profits might suffer somewhat

[10] See W J Baumol, *Business Behavior and Growth* (New York 1957) and William C Pardridge, "Sales or Profit Maximization in Management Capitalism," *Western Economic Journal* II (2), 134–141 (spring 1964)

B. SHIFTING UNDER FIXED CAPACITY

The theoretical argument that a tax on business income cannot be shifted if profit is maximized can be stated simply The price and output which yield the maximum profit before the tax will yield the maximum profit after the tax Suppose that the best profit is $1,000 and this profit is obtained at a price of, say, $5 and output of 500 units (i.e. any other price and output will yield a smaller profit than $1,000) The imposition of a 20-percent tax on all income will leave 80 percent of $1,000, or $800 This is greater than 80 percent of any of the other possible profit figures, all of which are less than $1,000 before tax and less than $800 after tax

This is true also in the case of a monopolist Even if the monopoly is absolute, the monopolist is assumed to be charging the highest desirable price before the tax is imposed And since the income tax does not affect the cost of production or the demand price (not directly, at any rate), there is no theoretical reason why the supply price should be raised In actual practice, it is true, the price being charged may not be the highest possible and the monopolist may be stimulated by the tax to raise prices, but it cannot be claimed that the tax itself made the increased price possible It appears, therefore, that the monopolist cannot with impunity shift an income tax Normally the price he charges will not in any way be directly affected by the imposition or increase of such a tax

Revolting as it may seem to the orthodox analyst, there is a possibility that though the income tax is a tax on profit and not a tax on unit of output or sales, it might be shown in the demand curve When the businessman considers the fact that part of the receipts derived from an additional 1,000 units, say, of the product, will be paid out in the form of taxes, then he actually has in mind, not the sort of demand curve which economists impute to him, i e one which is independent of the tax, but actually he has before him a demand curve (and the corresponding marginal curve) which is *net* of the tax We may object to this on the grounds that the demand curve alone cannot determine net profit, hence it cannot correctly reflect the tax But where we speak of "the demand curve as seen by the seller," we must be prepared to accept anything the seller sees The imposition of the tax might shift the demand curve he sees, and result in changes in price and output In this way the irrational view which the seller has of the demand curve may be rationalized in terms of economic theory Nevertheless, at the margin there would still be no net profit, hence no tax If the seller had been operating at the margin, he would still have no reason to change price or output The average and marginal curves could be so constructed as to reflect the tax but there would be no change at the crucial point, the point of maximum profit, where marginal cost equals marginal revenue and marginal net profit and marginal tax are zero

Numerical Example

The following numerical example will illustrate this point further It is assumed the first $2,000 is exempt, the next $2,000 is taxable at 10 percent, the next $2,000 at 20 percent, the next $2,000 at 30 percent, and all amounts over $8,000 at 40 percent Any other percentage

tax set up on a bracket system will yield the same conclusion as long as no bracket is taxed more than 100 percent

In Table IV various prices per unit are given in column (1) At these prices the outputs listed in column (2) are sold The total receipts from the sales of these amounts at the prices indicated are given in column (4) The cost of producing and selling a unit of the product at the various levels of output is given in column (3) In this example

TABLE IV

SHIFTING OF BUSINESS INCOME TAX WITH FIXED CAPACITY

Price per unit (1)	Number of units sold (2)	Cost per unit (3)	Total receipts (4)	Total cost (5)	Total profit (6)	Total tax (7)	Total profit after tax (8)
$10	900	$5	$9,000	$4,500	$4,500	$300	$4,200
9	1,200	5	10 800	6 600	4 800	360	4,440
8	1,400	5	11 200	7 000	4 200	240	3,960
7	1,600	5	11 200	8 000	3,200	120	3,080
6	1,800	5	10,800	9,000	1,800	—	1 800
5	2,000	5	10,000	10,000	—	—	—

SOURCE Somers, *Public Finance and National Income*, p 213

the cost is assumed to be uniform throughout The total cost, items in column (2) multiplied by items in column (3), is given in column (5) The total profit, given in column (6), is obtained by subtracting each item in column (5) from each item in column (4) The figures in column (7) are obtained by applying the tax structure given above to the profit data in column (6) The total profit after tax, column (8), is obtained by subtracting the items in column (7) from those in column (6)

Absence of Forward or Backward Shifting

It will be seen that the point of maximum profit before the tax is imposed is at a price of $9 and sales of 1,200 units The same holds true after the tax is imposed The profit after tax at this price and output is greater than any other There is no tendency to shift the tax forward by changing the price Since the output is unchanged there is no reason to believe that there will be any backward shifting

Analysis in Terms of the "Marginal" or the "Representative" Firm

The short-term analysis of business-income tax shifting is sometimes done in terms of the "marginal" firm Since the marginal firm has no net income, an income tax does not affect it And since the marginal firm sets the price, price is not affected The "representative" firm rather than the "marginal" firm is sometimes given the strategic price-determining role But, as the above analysis shows, even profit-taking firms, including the representative firm, are not induced to raise the price as a result of an income tax

Nevertheless the marginal producer approach provides one of the most widely accepted arguments against the possibility of the income tax being shifted—accepted mainly by those who have uncritically accepted classical value theory The basic thesis is that in a free, competitive market with ample supplies in relation to demand, the price

at any time is measured by the cost of production to the marginal producer That price yields no profit and is not liable to income tax, hence, no element of tax can enter into it There are two main defects in this as an argument against the possibility of passing on the tax

The first defect lies in the definition of "marginal producer" As Robertson points out, "I do not think any warrant can be found in Marshall's pages either for the view that the costs of production which are relevant to the determination of normal value are those of the most inefficient or unfortunate producers, or for the view that they do not comprise a substantial element of profit" [11] Under monopolistic conditions the marginal theory loses even more of its effectiveness as an argument against the likelihood of the shifting of the tax This is the second defect of the marginal producer analysis To the extent that we have differentiated products and, in the extreme case, to the extent that we have virtual monopolies, the gradation super-, sub-, and marginal producers becomes inappropriate Each producer is to some degree or other independent of every other in that his price cannot be said to be determined solely by some producer who happens to be breaking even Thus as a result every other producer (including the one who is just breaking even) is producing a product which, at best, is only an imperfect substitute for his

Risk as a Factor Inducing Shifting

There is one set of realistic factors, not considered above, which might also require a modification of the conclusion that the business income tax is not shifted in the short run Increased output even with fixed productive capacity necessarily involves additional risk taking Working capital which might otherwise be in the form of cash gradually takes the form of various inventories—raw materials, semifinished and finished goods—as expenditures are made on account of purchases and payrolls At the same time the demand figures are not certainties Even if goods are produced only to order there are numerous risks involved, such as those of cancellation and nonpayment When goods are not produced to order but for the market, then the demand figures must be considered as some sort of average of estimates—with some possibility of over- as well as under-estimate The income tax reduces the net return and it is no longer worth while to produce for the more risky orders or sections of the market Thus some reduction in output and increase in price is likely This means that there may be some short-run forward shifting of the income tax Since a change in price would involve a change in sales and output there is also a possibility of some backward shifting through a reduction in the price of goods purchased

Taxation of "Accounting Profit" instead of "Economic Profit"

It is taken for granted that the business income tax cannot be shifted in the short run because the point of maximum profit before the tax is the same as the point of maximum profit after the tax provided that the tax is less than 100 percent in total or in any bracket This conclusion if it holds at all applies only if the tax impinges on true economic profit, namely the profit which is the reward of the fac-

[11] Robertson, *op cit*, pp 568–69

tor, business enterprise However, the taxes are actually imposed on the accounting profit This may be radically different from the economic concept of profit, it may include implicit shares of other factors such as wages, interest, and rent To the extent that the businessman pays the income tax on these shares he may be induced to curtail his activities In other words, entrepreneurship is a factor of production and must be paid [12] The businessman may decide that it does not pay him to work so hard if the government is going to take away a substantial portion of his income in the form of taxes Thus he will curtail his production Under such conditions it cannot be said that prevailing taxes on business income cannot be shifted in the short run A tax which might theoretically be imposed on pure business profits would not be shifted in the short run, but the taxes which are actually imposed on business income do impinge on elements other than pure business profit and therefore can be shifted

An examination of the arbitrary decisions involved in the determination of the accounting profit reinforces the above conclusions The accounting methods of evaluating assets is highly questionable from an economic point of view, however necessary and desirable they may be for conservative accounting practice and as a device for preventing extravagant business decisions The book value of fixed assets net of depreciation allowances does not begin to portray the true economic value of those assets as they change from year to year in response to changing business conditions earning power, etc The same may be said of most accounting methods of evaluating inventory. As a result of these accounting devices the accounting profit may be different from the true economic profit In many instances the accounting profit may actually include elements of other shares of distribution In so far as taxes on such shares do result in some short-run shifting, it may be said that prevailing income taxes on business profits—as determined by accountants—may be subject to short-run shifting

Confiscatory Bracket Rates

Some forward tax shifting might occur under a peculiar tax structure where a bracket rate exceeds 100 percent From time to time high-income celebrities are quoted as saying that they cannot afford to accept an additional engagement the current year because that would put them "in a higher tax bracket" and leave them with less money than before This would hold true only if the tax rate for the bracket exceeded 100 percent This is not and probably never will be true in law, but there may be some peculiarities of administration which would have the same effect Raising the income above a certain level might subject it to a more rigid type of audit which would have the effect of raising the tax liability on the earlier brackets of the taxpayer's income This, if large enough, would be the same as taxing the latest bracket more than 100 percent Another possibility occurs in the higher brackets in cases where multiple taxation exists

Although these situations have occurred occasionally they are not very likely It is interesting to see what sort of tax shifting they lead to The following table recomputes columns (7) and (8) of the pre-

[12] See Harold M Groves, "Revision of the Corporation Income Tax," *Proceedings of the National Tax Association* 1947, pp 99–100

vious table on the basis of the following (highly objectionable) tax structure: first $2,000 exempt, next $2,000 taxed 80 percent, amounts over $4,000 taxed 150 percent

TABLE V

CONFISCATORY BRACKET RATES

Price per unit (1)	Total profit (6)	Total tax (9)	Total profit after tax (10)
$10	$4,500	$2,350	$2,150
9	4,900	2,800	2,000
8	4,200	1,900	2,300
7	3,200	960	2,240

SOURCE Somers, *Public Finance and National Income* p 217 (modified)

In this case the point of greatest profit is at a price of $9 before taxes and $8 after taxes It apparently pays the seller in this case to *reduce* the price In other numerical examples or with other tax structures it might occur that the price is raised or that there is no change whatever

Thus the conclusion that the best point of production before the tax is imposed must also be the best point of production after the tax is imposed holds only if no bracket is taxed at confiscatory rates—that is, at 100 percent or more If any bracket is taxed at less than 100 percent, then there will always be some additional net income after taxes when the individual moves into the higher bracket He will not lose in dollars and cents by moving into the higher bracket

In order to be certain that the brackets are not confiscatory, it is sometimes necessary to examine carefully the structure of rates Suppose the rates are not stated in bracket but overall terms Then it is possible that the system is confiscatory at certain brackets even though it does not appear to be so at first sight The following example may serve to explain this point

Suppose that the tax system is such that on income up to $10,000 the rate is 20 percent and that on the total of income when the income exceeds $10,000, the rate is 30 percent If the individual makes $10,000 he pays a total tax of $2,000 If he makes $10 001 he pays a total tax of $3,000 30 Thus by raising his income $1 he increases his tax liability by $1,000 30 Implicitly, therefore, there is a confiscatory bracket of tremendous size In such cases of course the business income tax would be shifted in the short run because an individual would reduce production so as to avoid getting into the higher bracket Such a bracket structure does not exist in the federal income taxes at the present time It is quite conceivable, though, that through the variety of tax structures and also the possibility of multiple taxation and variations in exemptions, practical cases could exist where the individual is in practice faced with a confiscatory bracket Within this limited range the business income tax would result in a price change even in the short run

C. SHIFTING UNDER VARIABLE CAPACITY

The possibility of shifting a business income tax in the long run where productive capacity and the number of plants can be varied has generally been discarded on a very plausible basis This is the twofold argument (1) that an income tax does not affect the marginal firms, which have no income, and therefore does not force any firms out of business, and (2) an income tax does not change the optimum size of a firm since the size of plant which gives the maximum profit before tax will also give the maximum profit after income tax

Complications Introduced by the Nature of Investment Decisions

The above statements, although fully consistent with "classical" price theory, ignore two important interrelated aspects of investment decisions (1) the data on which investment decisions are based are not known quantities but are merely estimates involving a wide range of probabilities and a high degree of risk, and (2) if the net return after tax falls below a certain level the investor will keep his assets in the form of a cash or riskless securities such as government bonds

In any business investment there is the possibility of loss If there is a good chance of making a large profit there will be some people who are willing to make an investment of a certain amount If an income tax is imposed on a given income-probability structure, the net prospective returns are reduced throughout Some investors will decide not to invest at all and others will reduce the amount of their investment For these marginal investors, and for the marginal investments of the other investors, the marginal efficiency of capital has dropped below the marginal rate of liquidity preference and there will be a shift into liquid holdings until the two are brought into equality again [18] This means that fewer plants are opened up than, would otherwise be the case and existing plants are allowed to deteriorate to some extent or are not expanded as much as they would otherwise be

There is no escaping the conclusion that in the long run the possibility of price increase and forward shifting of the income tax exists This conclusion is based not on vague references to "confidence" but on a direct application of contemporary economic analysis which recognizes the existence of risk and the influence of liquidity-preference (the preference for cash or equivalent)

Importance of Alternative Possibilities

The important thing to remember is that the absolute amount of net income is not the sole determining factor in business investment decisions Alternative possibilities, such as purchase of interest-bearing bonds or even holding idle cash, cannot be ignored In the case of the small businessman even the possibility of current consumption should be considered The large corporation in which management and ownership are said to be "divorced" also has these alternatives although a desire on the part of management to make the company as large as possible may have a predominant influence in price policy

[18] See Harold M Somers, "Monetary Policy and the Theory of Interest," *Quarterly Journal of Economics*, Vol 55, May 1941, pp 488–507 Reprinted in *Readings in the Theory of Income Distribution*, pp 477–98 (Homewood, Ill Richard D Irwin, Inc , 1951) See also J Hirshleifer, "On the Theory of Optimal Investment Decision," *Journal of Political Economy*, August 1958

Taxation of Alternative Possibilities

One caution must be sounded in connection with alternative investments they too may be subject to the income tax If the income from the interest-bearing bonds is subject to tax at the same rates as business income, then the alternative loses some of its attractiveness by virtue of the income tax There are, however, two other alternatives: holding cash (or equivalent) and spending the money on consumption The "psychic income" or whatever it is that is derived from devoting funds to these purposes is not (as yet) subject to income taxation

Marginal Rates of Liquidity- and Time-preference

To make this approach to the problem amenable to further analysis, it is necessary to keep in mind two concepts the "marginal rate of liquidity preference" and "marginal rate of time preference" The marginal rate of liquidity preference may be considered the minimum net return which is required to induce an individual to invest an additional sum of money rather than hold it idle in the form of cash The marginal rate of time preference may be considered the minimum net return which is required to induce an individual to invest an additional sum of money rather than spend it for current consumption

Business Expectations

A numerical illustration is difficult because of the many complications involved in the analysis of risk-taking In particular, not enough is known about the businessman's reaction to (1) the average expected return, i e arithmetic mean of all the possible returns weighted by their probabilities, (2) the most probable return, i e the single return which has the highest single probability, however large or small that may be, and (3) the dispersion of the various possibilities, i e how great the probability is of losing all, how great it is of losing 90 percent, etc Different businessmen will of course react differently to each of these The gamblers may ignore (1) and (2) and go for the long chance, as in a sweepstake The more conservative businessman will consider all three He will want a high average expected return, a high "most probable" with a large probability, and will not look kindly on a wide dispersion of the possible, or at least the more probable, returns Another important factor is the margin of safety required by the businessman after all calculations are completed [14]

Numerical Example

By way of illustration, the mean expected return is used in the numerical illustration below A single company contemplating various sized plants is considered The effect of an income tax is then examined

Table VI gives the basic data for a discussion of long-run shifting of an income tax in the particular case mentioned above Column (1) gives various possible amounts of investment representing plants of different size The task is to determine which amount of investment should be undertaken in the absence of an income tax and which amount with an income tax Column (2) gives the net income derived from

[14] See William Fellner, *Monetary Policies and Full Employment*, Chapter 5 (Berkeley University of California Press, 1946)

the various amounts of investment stated in column (1) All expenses have been allowed for, including interest, either actual or imputed These are estimated figures and represent some sort of average of the various possible returns to be expected at each level of investment

Column (3) gives the increment in the total investment figures listed in (1). In this case the increments are all $1.000 Column (4) gives the increments in the total net return figures of column (2) Column (5) gives the amounts of income tax computed at a flat rate of 20 percent on the net return figures of column (2) Although a simple proportional tax is used here, the analysis does not preclude a more complicated tax structure.

Column (6) gives the net return after the tax has been deducted, i e column (2) minus column (5) Column (7) gives the increments in column (6) Column (8) is column (4) computed as a percentage of column (3) Column (9) is column (7) computed as a percentage of column (3). Column (10) gives the marginal rate of liquidity preference, which was explained above In this case the rate is assumed to be 4 percent throughout This means that the businessman would rather hold cash than invest additional amounts at less than a net return of 4 percent This is a "take-home" net return after all expenses, taxes, interest, etc , are deducted It represents a state of mind and is not subject to taxation It is unaffected by the imposition of a tax on income In practice this rate might rise in relation to larger investments since the investor will be left with fewer liquid resources as the amount of investment rises A variable marginal rate of liquidity preference does not change the type of analysis considered here It is assumed, however, that the schedule of marginal rates of liquidity preference is not affected by variations in other returns as a result of taxes

The same principles will hold as long as there is some minimum net return which would induce a potential investor (whether an individual or a business firm) to hold cash (or equivalent) rather than invest When income taxes reduce the net return below that minimum, the

switch to cash will occur An absolutely rigid liquidity preference—as in the example — is not essential to the analysis

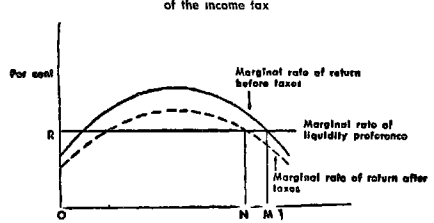
Before the imposition of the tax the businessman is willing to invest up to $9,000 and build a plant of corresponding size At this level of investment the marginal rate of return just equals the marginal rate of liquidity preference Up to this point the additional return has exceeded the minimum required to induce him to make the investment. He will not invest $10,000 because the return on the last thousand is only $30 or 3 percent while the minimum that he will consider is $40 or 4 percent

When the tax is imposed the marginal rates of return are reduced The ninth thousand yields only 3 2 percent, which is below the required minimum of 4 percent The eighth thousand yields 4 percent and this is as far as the businessman will go He will build a plant requiring the investment of $8,000

Graphic Analysis

The analysis of the problem of the long-run shifting of the income tax is demonstrated diagrammatically in Fig 1 The marginal rate of liquidity preference is shown by the solid line extending horizontally from the point *R* This, it will be recalled, is the minimum return at which an additional amount of money will be removed from cash holdings and diverted to investment in business This rate is here considered to be uniform It is likely that a higher minimum rate would prevail as investment increases and cash holdings decline In that case the curve out of point *R* would be upward-sloping to the right The curve might also shift downwards in response to taxes imposed on the other returns Neither the analysis nor the qualitative conclusions would be affected as long as it shifts less than the other curves

Figure 1 The graphic analysis of the problem of the long-run shifting of the income tax



SOURCE Somers, *Public Finance and National Income* p 223

The marginal rate of return before taxes is indicated by the solid curve so labeled The best amount of investment is OM where the marginal rate of return on the investment equals the marginal rate of liquidity preference When the tax is imposed the curve falls to the broken line in Fig 1 The best investment is now ON Business plans will now call for a smaller plant

Significance of Deductibility of Interest Expense

It will be noted that in the above example the marginal net return is compared, *not* with the rate of interest, but with the marginal rate of liquidity preference Decisions concerned with debt-financed investment based solely on a comparison of interest with marginal efficiency of capital (marginal net return before deduction of interest) will not be affected by the income tax where interest expense is deductible for tax purposes [15] The imposition of the tax reduces the prospective return but it also reduces the net interest cost to the firm because of the deductibility of interest expense for tax purposes Some modifications have to be made in this conclusion if it is found that the prevailing interest rate itself changes

Effects on Costs and Prices

The effect which reduced capacity in an industry will have on costs of production will depend on a variety of economic factors The reduced industrial capacity may mean higher, lower, or constant costs depending on whether long-run decreasing, increasing, or constant costs prevail Under highly competitive conditions the prevailing price will correspondingly be higher, lower, or unchanged (unless we specify the shape of the long-run demand curve) Under other conditions, the reduced capacity will generally mean less competition Reduced competition may have various effects on prices In this case, where reduced capacity accompanies the reduction in competition, the influence would be in the direction of higher prices [16] A sufficient reduction in costs—if such is the nature of this industry—could offset this tendency

Prospects of Shifting in the Long Run

It is frequently assumed that the business income tax will be shifted in the long run because the tax does reduce the incentive to expansion and may even encourage gradual liquidation of investment Whether a reduction in the size or number of firms results in an increase or decrease in prices will depend on the long-run cost conditions and the conditions of demand Thus aspect of the problem has been discussed above

The conclusion that the business income tax will have the effect of reducing incentives in the long run requires some further study If there are some "windfall" or true "economic surplus" elements in business profit in the long run then any income tax which is confined to those elements would not reduce incentives The surplus is something over and above what is necessary to promote long-run changes in investment This is probably merely a technical point, however. Under conditions of pure competition economic surpluses cannot persist generally in the long run The lure of supernormal profits would increase the number of firms so that the supernormal profits disappear through a reduction in price If the supernormal profits are taxed away, then the number of firms will not increase and the prevailing

[15] See E Cary Brown, "Business-income Taxation and Investment Incentives" *Income, Employment and Public Policy Essays in Honor of Alvin H Hansen*, p 314 (New York W W Norton & Co, 1948)

[16] It should be emphasized that we are not dealing here with the question whether a monopoly price is necessarily higher than a competitive price We are considering a change in the monopoly price itself as a result of an income tax

prices will remain Thus the taxing away of the supernormal profits prevents a price change which would otherwise take place In this sense it may be said that tax shifting might occur

Under conditions of monopolistic competition, if it is assumed that free entry exists, then again increase in the number of firms will take place so that in the long run supernormal profits are wiped out Once again the presumption is that the increase in the number of firms will reduce the price The imposition of the tax will prevent the increase in the number of firms by taxing away the attraction to new firms and therefore higher prices will persist Once again, however, the answer depends on the long-run nature of the cost and demand conditions It is quite conceivable that the increase in the number of firms might then result in higher costs and higher prices (through bidding up of scarce labor and materials) Under such conditions the tax keeps the price lower than would otherwise have been the case

Under conditions of monopoly where it is assumed that even in the long run supernormal profits may persist, the taxing away of those profits should have no effect whatever, assuming that the tax is on economic business profits The best-sized plant for the monopoly before the income tax will still be the best-sized plant after the income tax Thus only in the case of monopoly can it be said that an income tax which is imposed on supernormal profits alone will not be shifted even in the long run

If the business income tax actually impinges on normal profits because it is based on accounting definitions, then more drastic effects may be expected The tax on supernormal profits may reduce the attraction to new firms but a tax on normal profits will encourage the dropping out of existing firms There again the final effects on prices will depend on long-run cost conditions and demand conditions Even the monopolist will be induced to seek alternative occupations if the tax impinges on normal profits, that is, the opportunity cost Even if all fields are taxed the monopolist may prefer to go out of business completely and may perhaps decide to live off his investments A tax system which would prevent such effects would have to be more carefully devised so that the tax by its very nature reduces the alternative possibilities by taxing them In other words the tax would have to reduce the opportunity cost and thereby reduce the normal profit itself

This would require that all income-producing alternatives be taxed equally so that any effects of opportunity costs are reduced and all normal profits, or normal incomes generally, are correspondingly reduced It is even doubtful whether this would be an effective method of avoiding long-run consequences The alternative of holding cash and indulging in leisurely activities constantly exists Unless the government supplements its income tax with some device for taxing cash and preventing leisure, a tax which impinges on presently prevailing normal profits will undoubtedly have the effect of changing the price Thus it may be concluded that the business income tax which impinges on normal profits will generally result in price changes in the long run

D. CONCLUSIONS ON SHIFTING

In general, we may conclude that in the short run there is little likelihood of business income tax being shifted under the rigorous assumption of profit maximization in the literal sense Departures from this assumption, such as maximization of gross sales (or size of the business) subject to a profit constraint, lead to the conclusion that prices will change under the impact of an income tax in some instance, e g , where the company has been operating right at the profit constraint Various other situations in which price changes may occur have been mentioned above

There is some recent empirical evidence that tends to support the conclusion that the business income tax is shifted [17] It has been shown that an increase in the corporation income tax is shifted through short-run adjustments to prevent a decline in the net rate of return, and that these adjustments are maintained subsequently [18] This suggests that strict profit maximization had not been followed and that a business firm has much leeway in terms of buying and selling prices and internal efficiency An increased tax prompts changes which will leave the profit rate unimpaired The reluctance of management to alter dividend policy abruptly as a result of changes in profits after taxes [19] strengthens the notion that shareholders, at any rate, do not bear the burden of changes in corporate income taxation in the short run

In the long run, where a greater variety of alternative possibilities exists, there is a stronger likelihood that basic changes will be induced by the tax In particular, the constant possibility of holding cash (or equivalent) stands as a deterrent to investment where the net return after taxation falls too low [20] The result is some curtailment of economic growth

V. PROBLEMS IN CORPORATION INCOME TAXATION

A. CONFORMITY

California is in substantial conformity with the federal Internal Revenue Code provisions relating to corporation taxation, but it is not in detailed, technical conformity on many important items.

The broad arguments pro and con on the question of conformity of taxation in general have been thoroughly covered in an earlier publication of the Assembly Committee on Revenue and Taxation entitled *Conformity of State Personal Income Laws to Federal Personal Income Tax Laws* It will suffice here to note that some of the reasons for nonconformity are. nonapplicability, administrative problems, and loss of revenue to the state In addition, it has been deemed unnecessary to conform on purely incentive provisions as the federal law supplies sufficient incentive Another problem in conformity is the unitary nature of the federal code as compared with the separate personal and corporation tax laws in California This problem is discussed in detail below.[21]

The extremely large number of amendments made to the federal law in recent years makes the task of achieving conformity (in areas in which conformity is deemed desirable) difficult for at least two reasons.

(1) The existence of a separate personal income tax law and a separate corporation income tax law in many instances doubles the job of drafting amendments As businesses may be operated as sole proprietorships, partnerships or corporations, the tax provisions relating to business generally must be set forth in both tax laws This is avoided in the case of the federal income tax inasmuch as a single law governs such matters as exclusions from income, gross income, and deductions irrespective of the type of legal entity conducting the business

(2) Amendments conforming the California income tax laws to changes in the federal law are, of necessity, enacted after the federal amendments The state amendments generally are adopted in the year following that of the federal amendments. This may delay conformity for one year in many instances, but after that year transactions receive the same tax treatment for both state and federal purposes In other cases, however, e.g, amendments revising the law on depreciation, the action taken by a taxpayer for federal tax purposes the first year may affect the determination of income and tax liability for subsequent years. The delay of a year in the adoption by California of a federal change may, accordingly, as a practical matter, result in a permanent loss, or a loss for many years, of conformity so far as the affected taxpayers are concerned

[21] The following material on conformity (pp 29–34) was prepared by Felix Wahrhaftig

The problem first above mentioned arising from the two California income tax laws could be solved by combining the two into a single income tax law This could be done in conjunction with a general revision as a means of achieving a greater degree of conformity with the federal law.

There is, however, a major obstacle to the use by California of a single income tax law applying to both individuals and corporations. It lies in the requirement of Section 16 of Article XIII of the California Constitution that any tax imposed on banks or corporations under that section shall be under an act passed by not less than a two-thirds vote of all the members elected to each of the two houses of the Legislature. This provision has been construed by the Legislative Counsel as requiring a two-thirds vote on any bill increasing or decreasing the tax liability of the banks or corporations.

If the two taxes were embodied in a single law and that law was amended by less than a two-thirds vote in such a way as to change the tax liabilities of both individuals and corporations (including banks), the amendment would not be effective, under the Legislative Counsel's view, as to corporations This would be an undesirable result as it would mean that an individual or partnership conducting a business would have his or its income computed in one manner while a corporation conducting the same business would have its income computed in a different manner

Wholly independently of the question of conformity, one may consider whether it is proper policy to require a two-thirds vote to change the law governing the tax liability of corporations while merely a majority vote will suffice to effect a change in the tax liability of individuals If the two-thirds vote requirement were removed, it would then be entirely logical to consider the adoption by the state of single income tax law to replace the existing two separate laws

The second problem above mentioned, that of the taking effect of an amendment to the California law in a later year than the corresponding change in the federal law, could also be solved to a considerable extent through a constitutional amendment Problems in this connection have generally arisen through the claim that the retroactive application of an amendment reducing tax liability would violate Section 31 of Article IV of the California Constitution which prohibits a gift of public money. (See, for example, *Allen* v *Franchise Tax Board*, 39 Cal 2d 109) It may be desirable to consider in this connection the advisability of a constitutional amendment authorizing the Legislature to give such retroactive effect to amendments to the California income tax laws as would be necessary to obtain conformity as respects effective dates to the federal amendments

This proposal does not involve any requirement that changes to the California law have any retroactive application, but would simply confer a discretion on the Legislature to provide for the very limited retroactive application The Legislature would be able in each instance to consider whether the interests of conformity and the convenience of taxpayers and the tax administrator as to the effective date of a California amendment would be best served by the adoption of the effective date of the federal amendment

The recent changes in the federal law which have not yet been adopted by California provide opportunities for further possible conformity There are certain provisions of the Federal Revenue Act of 1964 which might, in the interests of conforming the federal and California law, be adopted as amendments to the California Bank and Corporation Tax Law

(No consideration is given here to those provisions of the Federal Revenue Act amending provisions of the Internal Revenue Code which had not heretofore been adopted by California This covers such matters as capital gains and losses, personal holding companies and the investment tax credit, inasmuch as the California law does not contain counterparts of the federal law on these subjects Similarly, there are certain 1964 federal amendments in situations, such as that relating to depletion, wherein the pre-1964 California law was different from the pre-1964 federal law)

Three matters are considered here and the adoption by California of the federal amendments is recommended in each case The three matters are relatively minor ones and while the adoption of the amendments is desirable in the light of policy considerations and conformity, the amendments would be virtually without revenue significance

Perhaps the most important thing to point out is that there is a more desirable manner of studying the question of conformity of the California with the federal law As indicated above, there are several areas in which California has not adopted provisions of the Internal Revenue Code relative to the taxation of corporations Furthermore, in some areas the California law is still patterned after the Internal Revenue Code of 1939 rather than the 1954 code so it is rather difficult to pick up the amendments to the federal 1954 code sections through amendments of the differently worded provisions of the Bank and Corporation Tax Law.

In order to pursue this matter of conformity more fully, it would be advisable to start with a listing of all the major areas, not individual sections, of the law in which the federal and California corporation tax provisions differ today A determination would then be made of the areas in which conformity is desirable and those in which it is not desirable In areas in which conformity is found desirable, action would be taken to achieve that conformity without regard to the time at which or the particular federal act from which the present nonconformity arose

This involves a considerable amount of work of a reviewing, policy determining, or amendment drafting type This is the only effective way in which a greater degree of conformity in desired areas may be achieved The present piecemeal method of picking up only certain provisions from each revenue act enacted by Congress will only result in less and less conformity with the passing years

The three 1964 federal revisions to which attention is directed are as follows

I *Disallowance of Interest on Certain Indebtedness to Meet Insurance Policy Premiums*

Section 24424 of the California Bank and Corporation Tax Law, which is based on Section 264 of the Internal Revenue Code, disallows

the deduction of interest on indebtedness incurred or continued to purchase or carry a single premium life insurance, endowment or annuity contract This is a loophole-closing provision for normally all or a substantial part of the proceeds of an insurance policy will not be subject to income tax. The taxpayer is, accordingly, not permitted to reduce taxable income by interest paid on amounts borrowed to purchase the policy

Section 264 was amended by the Revenue Act of 1964 to extend the interest disallowance requirement to situations wherein the insurance was purchased under a plan which contemplated systematic borrowing to meet premium payments for a number of years The amendment is designed to make more effective the closing of the loophole whereby it would otherwise be possible to obtain what is in effect non-taxable interest income at the cost, in part at least, of deductible interest expense

The 1964 amendment is explained generally in one of the Congressional committee reports as follows·

> "'. . . interest paid on indebtedness incurred or continued to pay premiums on life insurance contracts, endowment contracts, or an annuity is not to be deductible if the individual is following a plan of systematically borrowing amounts equal to the increase in the cash value of the insurance contract to pay part or all of the premiums The interest deduction is to be denied whether the borrowing is direct or indirect, that is, whether it is from the insurance carrier, from a bank, or from any other person. It also is intended to cover cases where the individual borrows on other property or on his general line of credit to pay the premiums. This provision is not to apply to a single premium contract or to a contract treated like a single premium contract, since present law already denies a deduction in these cases ' '' *

The deduction is not disallowed, however, in the following cases

(1) No part of four of the first seven annual premiums is paid with funds borrowed under the plan Where premiums on an existing policy are substantially increased, the policy is treated as a new contract for the purpose of this seven-year rule.
(2) The interest paid or accrued during the year is $100 or less. (If more, all would be disallowed)
(3) If taxpayer proves that the loan was incurred because of an unforeseen substantial loss of income or increase in his financial obligations
(4) The loan was for business reasons

It is recommended that the 1964 amendment to Section 264 of the Internal Revenue Code be incorporated in Section 24424 of the California Bank and Corporation Tax Law Such action would be desirable in the interest of conformity with the federal law and for the same loophole-closing policy considerations that prompted the amendment of the federal law The amendment would have only nominal revenue significance, but its effect would be on the gain side.

* U S Congress, House of Representatives, Committee on Ways and Means, *Revenue Act of 1963*, p 62 88th Congress, 1st Session, House Report No. 749. (Washington, D C , 1964)

II. *Corporate Reorganizations*

Section 24562 of the California Bank and Corporation Tax Law, defining the term "reorganization," is based on Section 368 of the Internal Revenue Code. The definition is an important part of the statutory plan whereby certain transfers of the stock of corporations or of the assets of corporations are declared nontaxable transactions, in whole or in part.

The California law, like the pre-1964 federal law, included within the meaning of reorganization the acquisition by one corporation, in exchange solely for all or a part of its voting stock, of stock of another corporation if, immediately after the acquisition, the acquiring corporation has control of such other corporation (whether or not such acquiring corporation had control immediately before the acquisition). In this situation, the acquired corporation becomes a subsidiary of the acquiring corporation

Under the 1964 federal amendment, the transaction would constitute a reorganization if the stock of the acquired corporation is obtained by a subsidiary of the acquiring corporation in exchange for the acquiring corporation's stock In other words, the nontaxable status which has attached heretofore to a qualifying transaction in which a parent corporation acquired a subsidiary through an exchange of the stock of the parent for the stock of the subsidiary would also attach when a parent corporation obtained a new subsidiary through an exchange of the stock of the parent for the stock of the new subsidiary but the stock of the new subsidiary was transferred to an already existing subsidiary of the parent

In so broadening the definition of reorganization in the stock-for-stock area, the federal law was made consistent with the situation previously existing in the stock-for-property area Even prior to the 1964 federal amendment, a transaction in which substantially all the assets of another corporation were acquired in exchange for stock of a parent corporation could qualify as a corporate reorganization even though the acquired assets were transferred to an existing subsidiary of the parent

It is recommended that the 1964 amendment to Section 386 of the Internal Revenue Code be incorporated in Section 24562 of the California Bank and Corporation Tax Law Here, again, such action would be desirable in the interests of conformity with the federal law and in the light of the policy considerations leading to the amendment of the federal law The change in the California law would result in an undeterminable, though purely nominal, loss of revenue

III *Employee Stock Options.*

The Revenue Act of 1964 amended substantially the provisions of the Internal Revenue Code relative to stock options granted by employers to employees California has previously adopted provisions similar to the federal law on this subject The 1964 federal act, in addition to continuing the existing treatment for restricted stock options previously granted to employees, provides for the tax treatment of what are termed qualified stock options and employee stock purchase plans

Most of the 1964 federal amendments involve the taxation of the employees receiving the options and such amendments have been picked

up in the California Personal Income Tax Law through Statutes 1964 (First Extra Session), Chapter 63

Technical amendments are required to Sections 24435 and 24621 of the Bank and Corporation Tax Law in order that those sections may conform to the revised federal and state stock option taxing provisions Both sections refer to a 'restricted stock option' and should accordingly, be amended so as to set forth a more general reference to the portions of the California tax law providing for the three classes of stock options The technical amendments will not result in any real change in the California law and will not have any revenue effect.

A complete compilation of the areas of substantive nonconformity between California and federal law in regards to corporation income taxation can be found in the Appendix

The question of conformity with the federal definition of income is considered separately in Section D, below, because of the special problem of interstate allocation of income

B. TAX-EXEMPT ORGANIZATIONS

Many corporations are exempt from the corporation franchise and corporation income taxes In general, these organizations can be described as nonprofit educational, religious, charitable, literary, scientific, civic, fraternal, and social organizations Also exempt are nonprofit cemetery companies, business leagues, real estate boards, labor, agricultural or horticultural organizations except cooperatives, and various beneficiary and retirement organizations [22]

However, most of these organizations are subject to tax on unrelated business income over $1,000. They are also subject to tax on rental income if they borrow money to acquire property Religious, charitable, scientific, or educational organizations may lose their exemption by engaging in transactions with their creators or accumulating income under certain conditions [23] California's statutes on tax-exempt corporations are substantially the same as those in federal law

As of August 31, 1963, a total of 62,631 organizations were exempt from California franchise and corporation income taxes Of this total, 30,091 were granted exemptions under sections of the law which are not excluded from the provisions of Section 23772 as to the requirement for filing information returns The organizations in this group have a liability to file information returns if the gross income exceeds $25,000 Approximately 5,000 of the 30,091 had gross income of over $25,000 [24]

Most of these exempt organizations do a great deal of public good and often discharge duties that would otherwise fall to government to perform However, increasing evidence points to the conclusion that a few tax-exempt foundations have abused their tax-free status Since 1962, a subcommittee of the House of Representatives Small Business Committee has been studying foundations which are exempt from federal corporation taxes Congressman Wright Patman of Texas, chairman of the subcommittee, in reporting the findings of the study, cited

[22] See *Revenue and Taxation Code*, Sections 23701–23705
[23] See *Revenue and Taxation Code*, Sections 23731–23737
[24] Letter from Martin Huff, Executive Officer, Franchise Tax Board, to David R Doerr, September 25, 1963 and supplementary information

what he termed an "unreasonable accumulation" of income [25] He found that 40 percent of the aggregate receipts of $7 billion of selected foundations during a 10-year period were unspent Congressman Patman has also charged that (1) some foundations were active in speculative and margin trading on the stock market and contributed substantially to the stock market plunge in the spring of 1962; (2) actual violations of Treasury regulations were made by far too many foundations; (3) present laws are ineffective as foundations can aid profit making corporations by proxy fights, in lending money, in leasing back of property, in aiding employees of a company, purchasing goodwill for a company, and many other devices, and (4) that the wealthy can keep control of wealth through foundations by appointing relatives as directors of foundations, through control over investments, etc

In view of the findings of the Patman study and in view of the fact that California law closely parallels the federal law in this area, a study in depth of the role of tax exemptions on California's tax base and economy would appear to be warranted

C. COMPUTATION ON BASIS OF PREVIOUS YEAR'S INCOME

The California franchise tax is based on the previous year's income Corporations pay a state tax for the privilege of operating in California based on net income derived from their operations during the previous year.

The income for the first full year of operations is used to measure the tax for that year and for the subsequent year This results in a double payment in the first year of operation

Upon dissolution of the corporation or withdrawal from operations within the state, the corporation is not subject to any franchise tax based on its final year. A corporation that can postpone all of its net income until its final year can escape paying any franchise tax at all except for the minimum $100 per year In some lines of business, particularly the construction and motion picture business, net income tends to concentrate in the year in which a project is completed If the corporation dissolves in the final year, it escapes payment of taxes to California on most of its net income

On the other hand, if a corporation suffers a net loss and is withdrawing from business because of financial difficulties, it is likely that the total tax liability of the corporation will be higher under the present previous-year features of the law than under a system where the tax is based on the net income of the current year

If the corporation earned a profit in its first year of operation and a net loss in its last year of operation, it will pay more in taxes to the state under the existing pre-year provisions Such corporations would find it advantageous to have the franchise tax measured by current net income rather than on net income of the previous year [26]

One problem associated with changing from a previous year's income basis to a current year's income basis would be that of treating

[25] *Tax-exempt Foundations and Charitable Trusts Their Impact on Our Economy*, Chairman's Report to the Select Committee on Small Business, House of Representatives, 87th Congress, Washington, D C, U S Government Printing Office, 1961

[26] See Edward A Weiss, "California Franchise Tax as Applied to Commencing and Dissolving Corporations," *The Hastings Law Journal*, August 1960, for a more extensive discussion of this point.

equitably those corporations that began under the old law and would dissolve under the new law These corporations would then have paid twice in the first year and would also pay for their final year This could be overcome by crediting the second tax paid for the first year of operation against the tax due for the last year of operation and refunding the second tax paid in the first year to the extent such tax exceeds the tax payable in the final year of operation.

Considering the inequity of the present law and considering that numerous tax experts, including a State Bar Committee on Taxation, have recommended a change to a current basis, the Corporation Franchise Tax Law should be revised to provide that the tax be imposed for the privilege of doing business in California measured by the net income of the current year The second first-year tax paid by existing corporations should be applied as a tax credit (or refunded in cases of an excess payment) on taxes due for the final year of operation

D. TAXATION OF MULTISTATE CORPORATIONS

The major portion of California's corporation franchise tax is paid by corporations operating in two or more states In levying the tax, the Franchise Tax Board must determine the net income of the corporation derived from or attributable to sources within the state. This is necessary in order to insure that multistate firms do not have a competitive tax advantage over firms solely operating in California

When a corporation is engaged in business in more than one state the first step in determining taxable income for California purposes is to segregate its income into two groups—unitary and intangible California has been primarily determining its portion of the unitary income subject to tax through the application of a property-payroll-sales formula [27] This three factor formula was upheld by the U S. Supreme Court in 1942 (*Butler Bros* v *McColgan* (1942) 315 US 501)

The property-payroll-sales formula works as follows:

The percentage of the firm's total real property and tangible personal property in California is computed; the percentage of the firm's total payroll of wages, salaries and commissions paid to employees in California is computed; the percentage of the firm's gross sales, less returns and allowances, in California is computed The three percentage figures are totaled and the resulting sum is then divided by three. The final figure applied to total business income represents the percentage of the total net business income of a firm which can be allocated to California.

Intangible income is apportioned by situs If a corporation is local, all of its intangible income is subject to tax If it is foreign, its intangible income is not taxable in California

The division of income for a corporation doing business in two or more corporate income-taxing states is of critical importance. The standards used to establish taxable nexus also vary greatly from one jurisdiction to another Before considering the various standards cur-

[27] Revenue and Taxation Code Section 25101 gives broad authority to the board to allocate net income by other means, however, the board uses this authority only infrequently and in special circumstances.

rently in use, it will be helpful to consider the California standard in some detail A summary of the California provisions follows *

CALIFORNIA

Nature of tax

* * * California imposes both a franchise tax measured by net income and a direct tax on net income Cal Rev. & Tax Code §§ 23151, 23501, 23503.

Taxable event

All domestic corporations and foreign corporations "doing business" within California are subject to the franchise tax Code § 23151 "Doing business" is construed to mean engaging in intrastate commerce Reg 23101

The direct income tax is imposed on the derivation of income from sources within the state. Code § 23501

DIVISION OF INCOME

General

A corporation may divide its income for tax purposes if its income "is derived from or attributable to sources both within and without . " California Code § 25101 Under the franchise tax, in order to meet this test it is "necessary that a stock of goods, from which shipments are regularly made, be maintained without the State, that employees perform services without the State, or that some activity of the corporation be carried on without the State " Instructions to Bank and Corporation Franchise Tax Return Form 100 (1962). No similar provisions appear in the Instructions to the Corporation Income Tax Return Form 200 (1962)

California distinguishes between income received "in connection with the unitary business" and income "which is not a part of or connected with the unitary business," apportioning all of the former by formula and specifically allocating all of the latter. Reg. 25101.

Interest

If connected with the unitary business, apportioned by formula Otherwise, follows the business situs of the intangible property from which the interest is earned If the intangible property has not acquired a business situs, allocation is made to California if the corporation has its commercial domicile in California Reg 25101 The instructions respecting allocation of income of the Bank and Corporation Franchise Tax Return Form 100 (1962) define the business situs of intangibles as follows

> "Intangible personal property has a business situs in this State if it is employed as capital in this State or the possession and control of the property has been localized in connection with a business, trade or profession in this State so that its substantial use and value attach to and become an asset of the business, trade or profession in this State For example, if a corporation pledges intangible personal property in California as security or the payment of indebtedness, taxes, etc, incurred in connection with a business in this State, the property has a busi-

* See p 40 for source.

ness situs here. Again, if a corporation maintains a branch office here and a bank account on which the agent in charge of the branch office may draw for the payment of expenses in connection with the activities in this State, the bank account has a business situs here"

Dividends

Dividends are never treated as unitary income[28] Letter from Dixwell L Pierce, Secretary of State Board of Equalization, Sept 12, 1961 (in subcommittee files) Thus all dividend income is specifically allocated

Dividend income follows the business situs of the stock, or, in the event that the stock has not acquired a business situs, is allocated to California if the corporation has its commercial domicile in California Reg. 25101.

Rents and royalties from tangible property

If connected with the unitary business, apportioned by formula; otherwise, allocated to the state where the property is located Reg 25101, Bank and Corporation Franchise Tax Form 100 (1962), Corporation Income Tax Return Form 200 (1962)

There is no prescribed method for prorating rents and royalties from transient personalty not used in the unitary business Allocation on a time-situs basis appears to be customary, although not universal Letter from Dixwell L Pierce, *supra*. Allocation of such income will sometimes be governed in part by Code § 25101, which provides that "Income attributable to isolated or occasional transactions in states or countries in which the taxpayer is not doing business" shall be allocated to the state of commercial domicile

Royalties from intangibles

If connected with the unitary business, apportioned by formula Otherwise, follows the business situs of the property, or, if the property has not acquired a business situs anywhere, the income is allocated to California if the corporation has its commercial domicile in California Reg 25101.

Capital gains from tangibles

If the assets are connected with the unitary business, apportioned by formula, otherwise, allocated to the state where the assets are located Bank and Corporation Franchise Tax Return Form 100 (1962), Corporation Income Tax Return Form 200 (1962)

Capital gains from intangibles

Same treatment as royalties from intangibles

Other items of income given special treatment

Income attributable to isolated or occasional transactions in states or countries in which the taxpayer is not doing business are allocated to the state in which the taxpayer has its principal place of business or commercial domicile Code § 25101

[28] [According to the California Franchise Tax Board, dividends received by a corporation operating as a stockbroker are included in unitary income.]

Apportionment formula

California uses a three-factor formula based on property, payroll, and sales Reg 25101

Property factor

The property factor is based on the real and tangible personal property "owned by the taxpayer and used in the unitary business" Property of which the taxpayer is lessee is excluded from the factor Also generally excluded is property owned by the taxpayer but not used in the unitary business

The valuation normally used is the same as the "adjusted basis" used for determining gain or loss under the California law However, in cases where this basis is not readily available and it appears that there would be little distortion, the adjusted basis for federal tax purposes may be used. Letter from Dixwell L Pierce, *supra* Property is included in the factor at average value Normally, the average of end-of-month values is used However, where the business has been in operation throughout the entire year with no unusual seasonal fluctuations, opening and closing values may be used Reg 25101

Rolling stock and similar assets with no fixed situs are apportioned on the basis of mileage There are special rules with regard to vessels *Ibid*

Payroll factor

This factor is based on all compensation paid to officers and employees such as wages, salaries, commissions and bonuses *Ibid* With respect to employees rendering services in more than one state, the regulations provide only that their compensation is to be "apportioned on the basis of time spent in the performance of services on behalf of the taxpayer" *Ibid* Commissions or compensation to independent agents, brokers or other representatives not defined as employees under the Federal Insurance Contributions Act are excluded from the factor. Instructions to Bank and Corporation Franchise Tax Return Form 100 (1962), Instructions to Corporation Income Tax Return Form 200 (1962)

Sales factor

The numerator of the sales factor includes sales resulting from employee sales or promotional activities within California This rule also applies to repeat or mail order sales resulting from prior employee solicitations Sales are ordinarily considered as being outside the state when the employee responsible for the sale performs all of the services without the state Similarly, sales are ordinarily considered as within the state when the services are performed within the state *Ibid* , Reg 25101 The problem of locating the situs of the sale presents no little difficulty. It has been observed that in practice in California,

> "judgment rather than hard and fast rules must govern the assignment of the sales If only a slight portion of the activities leading to a sale is carried on outside California, the sale may be assigned entirely to this state If, the sales negotiations follow a regular pattern of activities partly within and partly without the state, a portion of the total sales, e.g , 25 or 50 per cent, may be assigned

to California on the basis of a review of the entire sales activity " Wahrhaftig, *Allocation Factors in Use in California,* 12 Hastings L J 65, 89 (1960).

DIVISION OF DEDUCTIONS

General

Expenses are attributed in the same manner as the income items to which they are related Reg 24201d. Losses from the sale of assets are attributed in the same manner as gains Reg 25101; Letter from John J Campbell, Executive Officer of Franchise Tax Board, March 19, 1962 (in subcommittee files).

Overhead expenses

A "reasonable" portion of general overhead expense is assigned to income which is specifically allocated Reg 24201d(2). No method is prescribed for making the proration

Interest expense

Rev Code § 24344(b) limits the amount of deductible interest expense to "an amount equal to interest income subject to allocation by formula, plus the amount, if any, by which the balance of interest expense exceeds interest and dividend income (except dividends deductible under the provisions of section 24402) not subject to allocation by formula " The interest expense not included in the preceding amount is "directly offset against interest and dividend income (except dividends deductible under the provisions of section 24402) not subject to allocation by formula " The general purpose of the above-cited statutory provision is to limit the deduction of interest expense when a taxpayer has intangible income which is not included in the measure of the tax Reg 24121(b).

Deductions for state and federal income taxes

State and federal income taxes are not deductible. Code § 24345

Operating loss carryovers

There are no provisions which allow operating losses to be carried forward or carried back

SEPARATE ACCOUNTING AND ADMINISTRATIVE MODIFICATION OF ALLOCATION AND APPORTIONMENT METHODS

The Franchise Tax Board is given broad powers to divide income "by such other method of allocation as is fairly calculated to determine the net income derived from or attributable to sources within this State " Code § 25101

Departures from the statutory method are made "occasionally " These generally consist of adjustments in one or more of the factors, most frequently the property factor For example, adjustments may be made where a plant has been constructed in California at inflated costs while older plants outside the state are substantially depreciated, and the product can be manufactured at a comparable price per unit at the old and new plants Letter from Dixwell L Pierce, *supra.*

SOURCE: Committee on the Judiciary, *State Taxation of Interstate Commerce,* Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol II, pp. A248–52 88th Congress, 2d Session, House Report No. 1480 (Washington, D C 1964.)

The Federal Law of 1959

The number of corporations subject to the corporation income tax was decreased by the enactment in 1959 of P L 86-272 This federal law prevents the states from declaring the existence of a taxable nexus in certain circumstances It provides that a net income tax may not be imposed on income derived from interstate commerce if the only business activity within the state is:

1. The solicitation of orders for sales of tangible personal property, which orders are sent outside the state for approval or rejection, and if approved are filled by shipment from a point outside the state; or
2 The solicitation of orders from a prospective customer, if orders by the customer are filled by shipment or delivery from a point outside the state

In large measure, this federal statute is a "stopgap" measure. The law provides that both houses of Congress shall hold hearings and investigate the entire problem of state taxation of interstate commerce, with reports to be made on or before June 30, 1965

Corporations doing business in several states have complained long and bitterly about the lack of uniformity in state laws taxing interstate commerce, particularly corporate income tax laws The jurisdictional standards set forth by the several states are conflicting and confusing It is possible that any particular sale, for instance, will be taxed once. twice, or not at all depending on the state of origin and state of destination The problem has received attention from the various states and numerous conferences have been held by organizations attempting to deal with the problem The National Conference of Commissioners on Uniform State Laws has proposed the Uniform Division of Income for Tax Purposes Act (UDITPA) This law, designed to obtain uniformity in the area of tax jurisdiction has been entirely adopted by one state, Kansas, and partially adopted by four others

It has been estimated that P L 86-272 has reduced the revenue from California's corporate income tax by about $1 million per year This is not a highly significant amount in percentage terms but the law has two undesirable features First, it provides a shelter which more and more businesses are likely to attempt to use Second, it establishes a precedent for more legislation to restrict further the state's taxation of interstate commerce The potential effect of this law on California's tax revenue may be significant

While California and most other states use the property-payroll-sales formula to determine taxable income of multistate corporations, not all states do so Even where states use a property-payroll-sales formula, there is no guarantee of uniformity among these states Each factor is susceptible of definition in various ways

It is as a result of the inconsistencies in the taxation of corporations among the states, that Congress has taken a deep interest in the problem The special subcommittee of the House of Representatives' Committee on Judiciary, cited in Chapter III, above, was established to make a thorough study of state taxation of interstate commerce The first

report of this subcommittee, issued June 15, 1964, concluded that "the overall situation is chaotic" [29]

The committee found that: [30]

> Although all of the income tax states prescribe apportionment formulas to be used under varying circumstances, no formula devised has been found generally acceptable One-factor, two-factor, and three-factor formulas are all in use today The three-factor formula based on property, payroll, and sales is the most common, but this prevalence is one of form only There are differences from one state to another in respect to which items are to be included in the factors and how they are to be located [*sic*] These differences are especially pronounced in the sales factor, with the states employing a half-dozen different rules for assigning sales For the company which sells into any number of states the likelihood is that it will be required to account for its sales by standards different from one another and often different from those used to keep records for ordinary business purposes

Because of this situation, the subcommittee found that some companies paid taxes on a net income in excess of actual net income while other companies paid taxes on only a portion of net income The subcommittee also noted that the diversity of state corporation tax laws make it difficult for small businesses to compete in interstate commerce

As can be seen in Table VII, a sample of companies involved in interstate commerce shows that a very large percentage of them have protected activity in from 1 to 37 of the 38 income-taxing states

This characteristic is also shown in Tables VIII and IX Over 90 percent of the manufacturing firms surveyed and over 50 percent of the

DATA Business Questionnaire II (sample of companies engaged in interstate commerce)

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce* Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol I p 294 88th Congress, 2d Session, House Report No 1480 (Washington, D C , 1964)

mercantile firms reported sales in a greater number of income tax states than the number of income tax states in which they actually paid taxes

Due to the "stopgap" nature of P L 86-272, there is every indication that new legislation in this area will be forthcoming from the federal government in the near future The proponents of even more restrictive legislation in the area have pointed chiefly to the lack of uniformity in the various state laws Vague jurisdictional definitions and cases of conflicting and overlapping jurisdiction are often cited as evidence of the "need" for federal legislation in this area For this reason, where greater uniformity can be achieved without loss of revenue to the state involved, steps to implement the uniformity should be made. If greater uniformity should bring with it increased revenue, then a movement in the direction of uniformity would clearly be overdue This matter will be taken up in greater detail later in this report

Pending the completion of other reports in the areas of sales and property taxes, no recommendations were made by the subcommittee in the June report. There is every indication, however, that action will be forthcoming by Congress if the states collectively do not agree on a more uniform approach to taxing corporations

Comparison of the Federal and California Definitions of Taxable Income

An extremely troublesome and controversial area of the corporate income tax in the several states is the definition of income Corporations involved in interstate commerce complain that because the definition of taxable income in the various states differs from the federal definition, they must bear a great deal of additional expense in the form of additional recordkeeping Some of the states have dealt with this problem by adopting the federal income definition and including provisions which automatically make new federal legislation on the subject part of the state statute Other states, including California have maintained their own income definitions

A comparison of selected provisions of the Internal Revenue Code of the United States and the California definitions of taxable income follows [31] The California taxable income definition is considerably broader than the federal definition in several important respects. Perhaps the most important differences are that in California there is no provision for special treatment of capital gains and losses, there is no deduction for taxes paid to other jurisdictions, there is a $75,000 limit on exploration expenses rather than the $100,000 provided in the federal code; and there is a greater limitation on the deduction of intercorporate dividends

Interest on governmental obligations

Federal

Section 103 exempts interest on obligations of states, territories, possessions, political subdivisions of these units, and the District of Columbia It also grants partial exemption for a limited number of obligations of the United States; requiring only the payment of the surtax

[31] The following summaries are from *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Committee on the Judiciary, Vol II, pp A368–A370, A377–A378 88th Congress, 2d Session, House Report No 1480 (Washington, D C, 1964)

California

Interest on federal obligations is exempt from the direct income tax but is taxable under the franchise tax measured by net income California Revenue and Taxation Code Section 24272. Interest on obligations of California and its subdivisions and of other states and their subdivisions is taxable. Code Section 24271.

Expenses related to exempt income

Federal

Section 265 disallows deductions for expenses related to exempt income, including interest paid on money borrowed to invest in tax-exempt securities

California

Substantially similar to federal provision Code Section 24425

Deductions and credits for taxes

Federal

Section 164 allows deductions for taxes other than federal income taxes Subject to limitations in amount, Sections 901 and 902 allow a domestic corporation a credit for income taxes, or taxes "in lieu" of income taxes, paid, or deemed to have been paid upon receipt of dividends from a foreign corporation, to a foreign country or a possession of the United States If the taxpayer claims a credit for any tax under Section 901, it may not claim a deduction for any tax which would qualify for a credit

California

California does not allow a deduction for taxes on or measured by income imposed by the United States, California, or any other state. Code Section 24345. No credit for taxes paid to other jurisdictions is allowed.

Depreciation

Federal

Section 167 permits straight line, declining balance, sum of the years-digits, or any other method of proration which does not, during the first two-thirds of the life of the property, exceed the total that would have been allowed under the declining balance method Methods other than straight line may be used only for assets having useful lives of three years or more

Section 179 permits 20 percent of the cost of tangible personal property to be depreciated in the first year, for no more than $10,000.

California

California follows the federal provisions both regarding the methods of prorating depreciation as well as the additional 20-percent first-year depreciation allowance Code Sections 24349, 24356.

Investment credit [32]

Federal

Sections 38, 46, and 48 permit a credit against tax of 7 percent of "qualified investments" in certain new (and in some cases, used) depreciable property other than buildings "Qualified investments" are generally defined to include: 100 percent of the cost of investment prop-

[32] As of 1962

erty with a useful life of eight years of more, 66⅔ percent of the cost of investment property with a useful life of at least four but less than six years Amounts taken in the form of the credit are excluded from the depreciable basis of such property These provisions became effective on January 1, 1962

California

The federal investment tax credit is not allowed by California However, an amount equal to the federal investment credit may be depreciated separately over the life of the property, or added to the salvage value, or deducted in the year succeeding the useful life of the property. Reg. 24349(k)(1).

Depletion

Federal

Sections 611–614 permit depletion based on cost (adjusted basis) or on a percentage of gross income from the property, not to exceed 50 percent of the net income from the property Rates for percentage depletion are as follows

- 27½%—oil and wells,
- 23% —sulfur, uranium, tin, zinc, bauxite, many of the rarer metals, and many minerals;
- 15% —many metals, including iron and copper, rock asphalt, vermiculite, some clays, and a large group of minerals,
- 10% —coal, lignite, and some other items;
- 5% —gravel, shells, sand, some clays, and some other items

California

Substantially similar to federal provisions Code Section 24832

Intangible drilling expenses

Federal

Section 263 permits the "operator" of an oil or gas interest to deduct the costs of drilling and development of wells

California

Follows federal provision Code Section 24423

Exploration and development expenses

Federal

Sections 615 and 616 permit the deduction of expenses of exploring for minerals and developing mines These sections do not apply to oil and gas The deduction for exploration expenses is limited to $100,000 annually, with a $400,000 maximum

California

Exploration expenses not exceeding $75,000 annually for four years are deductible Code Section 24837(a) Development expenses may be deducted without limitation Code Section 24836(a)

Research and experimentation expenses

Federal

Section 174 permits the deduction of expenses for research and experimentation, even if the expenses would otherwise be treated as capi-

tal. However, the section does not apply to expenses for the acquisition of depreciable property or land to be used for research purposes, and it does not apply to expenses of exploring for mineral deposits.

California

Follows federal provision Code Section 24366

Installment method of accounting

Federal

Section 453 permits dealers in personal property sold on the installment plan to report the income from such sales ratably as payments are received, rather than accruing all income at the time of the sale Such installment reporting may be used only if the initial payment does not exceed 30 percent of the selling price With certain qualifications the same treatment is allowed with respect to sales of realty and casual sales of personal property

California

Substantially similar to federal provision. Code Sections 24667, 24668

Intercorporate dividends

Federal

Section 243 permits the deduction of 85 percent of the dividends received from domestic corporations

California

Dividends received are deductible to the extent that they are declared from income which has been taxed in California Code Section 24402

Capital gains and losses

Federal

Excess of net long-term gain over net short-term loss is taxed at 25 percent. Excess of net short-term gain over net long-term loss is taxed at regular corporate rates Property must be held for six months for a gain or loss to be long-term A net capital loss may not be deducted, but may be carried forward for five years as a short-term loss Sections 1201, 1211, 1212, 1222.

Special treatment is generally given to sales of depreciable property and land if held for more than six months, as well as to some other dispositions of property. The total of losses from such dispositions during the year is subtracted from the total of gains from such dispositions. If the result is a net gain, it is treated as capital gain, if a net loss, it is treated as ordinary loss Section 1231

For tax years starting after 1962, gains from the disposition of depreciated property other than buildings are generally treated as ordinary income to the extent of the depreciation of the property after December 31, 1961 Section 1245

California

No distinction is made between capital gains and losses and ordinary gains and losses

Basis of property held at time of adoption of income tax

Federal

The federal income tax was first adopted on March 1, 1913. Section 1053 provides that for property held at the time of the initial adoption of the tax the basis for gain is the higher of fair market value or depreciated cost as of March 1, 1913 The basis for loss is depreciated cost as of that date.

California

Follows federal provision Code Section 24963; Reg 24963

Net operating loss carryovers

Federal

Section 172 allows a net operating loss to be carried back for three years and carried forward for five years

California

No provision

Charitable contributions

Federal

Section 170 allows deductions for contributions to certain organizations in an amount not to exceed 5 percent of net income, computed without regard to loss carrybacks or intercorporate dividend deductions. A two-year carryover is provided for contributions in excess of a 5-percent limitation

California

Substantially similar to the federal provision except that carryovers are not allowed. Code Sections 24358, 24359.

Payment to employees' trusts

Federal

Subject to limitations of amount, Section 404 permits deductions for amounts paid to pension and profitsharing trusts which meet certain standards There is an unlimited carryover for payments to a pension trust which are in excess of the limitations.

California

Substantially similar to federal provision Code Section 24601

Reorganizations and liquidations

Federal

Section 361 gives tax-free treatment to certain transfers of assets and stock pursuant to reorganization plans. Section 337 permits the tax-free sale of corporate assets in connection with a plan of liquidation.

California

Substantially similar to federal provisions Code Sections 24512, 24551 *

Several important arguments have been advanced in defense of the differences between the California and federal definitions of taxable income First, it has been pointed out that most of the differences between the federal and state returns can be computed by means of the simple addition or subtraction of items For instance in preparation of the federal return, a certain transaction may be accorded capital gains

* End of excerpt from report cited on p 44, above.

treatment The necessary figures to return the same transaction as ordinary income are certainly readily discernible from the computations on the federal return If a certain expense is deductible on the federal return but not on the state return, the difference between the federal and state returns on this item is simply a shift of the amount of the item out of the "deductions" column

Adoption of the federal definition of taxable income would also mean that the state would lose its ability to adjust the tax base to reflect local conditions When a state adopts the federal income definition, it is desirable for the state also to adopt all future changes in the federal law automatically to keep the two definitions identical over time This in effect removes the determination of the size of the tax base for the corporate income tax from state control.

TABLE X

DATA Business Questionnaire II (combined samples) Figures have been adjusted to eliminate capital loss carryovers and net operating loss carryovers and carrybacks

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol I, p 574 88th Congress, 2d Session, House Report No 1480 (Washington, D C , 1964)

The differences between the California and federal income definitions are quite large when considered in terms of the tax base, as shown in Table X. For many corporations, the difference in taxable income amounts to over $1 million

A Survey of the State Taxation of Interstate Corporations

Following is a survey of the corporate income tax in the several states, with particular emphasis on California The problems faced by the multistate firm can be seen in better perspective in this way It is also helpful to consider developments in other taxing jurisdictions in considering revisions in California

The popular conception of the modern corporation dealing in interstate commerce has been one of a huge corporate giant, with sales in the hundreds of millions and a battery of tax lawyers, economists and accountants A recent study shows that this is not the case A very sizable percentage of the companies engaged in interstate commerce are of modest size As Table XI shows, from one-sixth to one-fifth of the companies engaged in interstate commerce have annual gross receipts of less than $200,000

The same study points out that about half of the companies engaged in interstate commerce have fewer than 20 employees. For a firm of modest size, compliance with-state corporate income tax laws can pose serious problems The state corporate income tax laws are of bewildering variety and complexity Many different methods are employed to determine whether a corporation is liable for any corporate income tax in a particular state Once the liability has been established, there are numerous provisions determining the apportionment of the corporation's income for tax purposes This results in the situation that frequently a firm which has the every intention of complying with the tax laws is quite unable to determine what its tax liability is, or even if any liability exists This creates difficulties in compliance and corresponding difficulties in enforcement

TABLE XI

SIZE OF COMPANIES ENGAGED IN INTERSTATE COMMERCE, BY INDUSTRY

1,568 companies, classified by their volume of gross receipts

Size of company (gross receipts)	Manufacturers		Wholesalers		Retailers	
	No	(%)	No	(%)	No	(%)
Under $200,000	184	(17 5)	58	(15 0)	26	(19 7)

The corporate income tax paid by foreign corporations is quite significant in California As Table XII shows, over 50 percent of the income-tax revenue derived from corporations in 1959 in California was derived from corporations whose income was divided among two or more states

TABLE XII

DATA State Revenue Questionnaire

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol I, p 88 88th Congress 2d Session House Report No 1480 (Washington, D C , 1964)

The percentage was much higher for manufacturing corporations, almost 80 percent of the income tax revenue derived from corporations engaged in manufacturing came from companies whose income was split

At the present time, 38 of the 50 states have some form of corporate income tax The tax rates range from 1 percent on the first $3,000 of income in Arkansas to 10 5 percent in Idaho The present tax rates, and the rates in effect at selected dates over the past 15 years are shown in Table XIII

California, together with 29 other states charges a flat rate The eight other states that have corporate income tax laws charge graduated rates with the higher rates usually applying to over $25,000 of business income For all but the smallest corporations, the graduated features of these other tax structures are not too important In 11 of the states, deduction for federal income taxes is allowed California is one of the 27 states that do not permit deduction for federal income taxes

As Table XIV shows, the corporate income tax has increased in relative importance in California over the last 15 years

Table XV shows the division of income for tax purposes in 1929 At that time California had no provision for separate accounting There was no specific allocation provided for All income division was therefore handled by means of an apportionment formula The factors

TABLE XV

DIVISION OF INCOME FOR TAX PURPOSES, 1929

Income tax states	Separate accounting	Specific allocation	Factors in apportionment formula			
			Property	Payroll	Sales	Other
Arkansas	Allowed	None			X[1]	Cost of production[1]
California	No provision	None	X	X	X	
Connecticut	None	None	X[2]			
Georgia	Allowed	[3]				[3]
Massachusetts	None	B & Nonb	X	X	X	
Mississippi						
Manufacturers	}	B & Nonb				Capital assets, expenditures for labor
Merchants	Allowed					Net cost of sales
Missouri	Allowed	None			X	
Montana	Compulsory	None				[4]
New York	None	None				Property, bills and accounts receivable, and stock of other companies
North Carolina	None	None	X[5]			
North Dakota	None	B & Nonb	X			Business (payroll, purchases, and sales)
Oregon	[3]	[3]				[3]
South Carolina	Allowed	None	X[5]		X[5]	
Tennessee	None	None			X	
Virginia	Allowed	None				Property and sales
Wisconsin	Allowed	B & Nonb	X		X	Manufacturing costs

[1] Alternative factors

[2] A one-factor formula based on sales is used for certain nonmanufacturing and nonmercantile companies

[3] Statute was enacted in 1929 and gave the tax administrator authority to determine the methods of income division No information is available as to what methods were used in 1929

[4] No formula prescribed

[5] Manufacturers in South Carolina use only the property factor, companies engaged only in selling in South Carolina use the sales factor, other companies use both factors

B & Nonb Specific allocation of both business and nonbusiness items

DATA (1) 1929 Proceedings National Tax Association pp 163–89, (2) National Industrial Conference Board, State and Local Taxation of Business Corporations, pp 80–81 (1931)

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol I, p 114 88th Congress, 2d Session, House Report No 1480 (Washington, D C, 1964)

employed were the "Massachusetts formula" of property, payroll and sales

The pattern of apportionment formulas used by the various states has changed markedly since 1929 As Tables XVI and XVII show, the property payroll, sales formula has increased in adoption from 2 of 17 states in 1929 to 26 of 38 states in 1963. This is, of course, the formula presently used by California

These tables mask the differences in the income division provisions of the several states While many states use the same apportionment formula, definitions vary widely This is brought out clearly in Table XVIII in the case of "sales"

California assigns sales to the state if the sales result from employee activity in the state Other frequently used standards are the sales' origin and the sales' destination When the origin standard is used, sales are assigned to the state if the goods are located in the state at the time of the sale Under the destination definition, sales are assigned to a state if they are shipped into the state or delivered to customers in the state

TABLE XVI

DIVISION OF INCOME FOR TAX PURPOSES, 1963

Income tax states	Separate accounting	Specific allocation	Factors in apportionment formula			
			Property	Payroll	Sales	Other
Alabama	Preferred	Nonb	X		X	Manufacturing costs[1]
Alaska	Preferred	Nonb	X	X	X

20 Property, sales to in-state buyers, sales from in-state offices		1	1

DATA (1) Division of Income Summaries, appendix J, (2) P-H State and Local Taxes *All States Tax Guide* ¶ 1046 (Sept 1963), (3) 1929 Proceedings, National Tax Association, pp 103-30

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol I, p 110 88th Congress, 2d Session, House Report No 1480 (Washington, D C, 1964)

There are additional standards used in assigning sales but these are three of the most important ones It is apparent that these three sales definitions are not mutually exclusive There is ample opportunity for a given sale to be taxed once, twice or not at all depending on the location of the origin of the sale, the destination of the sale and the location of the relevant sales activity It is precisely this type of jurisdictional conflict and multiple taxation which has led to the current demand for federal legislation in this field While it would be difficult to select one of these standards as "better" than the others on theoretical grounds, it seems clear that uniformity in this area is most desirable If the several states all agree on one standard, this will be a better solution than the present situation no matter which standard is decided upon

At present there is a marked movement toward the destination sales standard One reason for this may be the fact that this is the standard contained in the Uniform Division of Income for Tax Purposes Act (UDITPA) which was approved by the National Conference of Commissioners on Uniform State Laws (NCCUSL) in 1957. This act has been adopted verbatim by Kansas, with minor variations by Alaska and Arkansas, and with major variations by South Carolina and Virginia In addition, Indiana and Oregon appear to have followed the UDITPA sales standard at least to some degree.

The destination standard has at least two advantages In the case of California, these advantages could only be realized by applying the

TABLE XVIII

STANDARDS USED IN ASSIGNING SALES, 1955–1963

Types of standard are indicated by initials as explained in key below

	1955 Sept 13	1957 Aug 6	1958 May 6	1959 Mar 3	1959 Nov 4	1960 Apr 1	1963 Nov 1

KEY

D—Destination (sales assigned to state if shipped into or delivered to customers in the state)

O—Origin (sales assigned to state if goods are located in the state at time of the sale)

SO—Sales office (sales assigned to state if arising from negotiations through an office or other place of business in the state)

SA—Sales activity (sales assigned to state if resulting from employee activity in the state)

P/A—Place of acceptance (sales assigned to state if made in response to orders accepted in the state)

IS—Intrastate shipment (sales assigned to state if shipped from a point within the state to another point within the state)

Note These definitions are highly generalized and are designed only to show the orientation of the standard

DATA The material in this table is based upon information made available to the subcommittee by Prentice-Hall, Inc

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol I, pp 120–1 88th Congress, 2d Session, House Report No 1480 (Washington, D C, 1964)

destination standard to the franchise tax as well as the corporate income tax First, if a locally based manufacturer with a significant amount of sales outside the state is allowed to attribute his sales by destination, the state is able to offer him a lower tax bill than he would have under an origin test, or a sales activity test where his sales activity is in California Second, under a destination standard, the state not only allows locally based industry to apportion out, it also attributes to itself income from sales destined into the state from manufacturers based elsewhere

An estimate has been made of the effect on tax revenue of a change from the present California formula to a three-factor formula based on destination as well as certain other formulas These estimates are shown in Table XIX.

TABLE XIX

CALIFORNIA: EFFECTS OF VARIOUS APPORTIONMENT FORMULAS

Estimated income tax base of manufacturing and mercantile corporations, and estimated revenue from these corporations, under four apportionment formulas

	Estimated tax base and revenue in thousands of dollars		Relative sizes of tax base under four formulas	
	Tax base	Tax revenue	As percent of base under State formula	As percent of base under two-factor formula
State formula	2,193,564	120,646	*100*	100 4
Two-factor formula	2,185,530	120,210	99 6	*100*
Three-factor formula (destination)	2,248,336	123,658	102 5	102 9
Three-factor formula (origin)	2,199,882	120,994	100 3	100 7

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol II, p A482 88th Congress, 2d Session, House Report No 1480 (Washington, D C , 1964)

According to these estimates, the use of a destination sales standard would result in a 2¼ percent increase in California tax revenue from this source The tax base and tax revenue figures shown in this table are highly unrealistic. They are based on the use of the federal income definition and on 1958 income data. However, these qualifications only affect the absolute magnitude of the figures, not the relative figures The data are perfectly consistent internally and therefore the percentage figures can be taken to be reasonably accurate. (It appears that the effect of P L 86-272 was considered in making this estimate This is implicit in the discussion of the estimates in the study cited but it is not actually stated)

Adoption of the destination standard for the sales factor of the apportionment formula would have thus two important effects in California· It would increase tax revenue and it would represent an important step toward uniformity

The "nexus standards" for state income taxes imposed on foreign corporations vary widely from one jurisdiction to another. What one state considers a taxable nexus is ignored by another state and vice

versa The types of contacts with the various taxing states which are considered sufficient to require a corporation to file a return for a tax on or measured by net income are shown in Chart I.

In all cases the corporation is assumed to have a place of business, including a factory, warehouse and sales office, outside the taxing state and to ship goods regularly by mail or common carrier into the taxing state

The diversity among the several states in the circumstances which the tax administrators consider sufficient to create tax liability is striking Not one of the activities considered was universally agreed upon as sufficient to create tax liability. On the other hand, while many of the listed activities provide an extremely weak basis for jurisdictional claims, each of the listed activities is considered the basis for jurisdiction by at least one state In fact, most of them are considered to indicate taxable nexus by several states

The standards used to assign sales in the several states are summarized in Table XX As can be seen, destination is by far the most common standard

The circumstances in which a corporation based in the taxing states is allowed to apportion its income to other states are shown in Chart 2.

This chart summarizes the results of a questionnaire sent to the tax administrators of the various states concerned In each case the administrator was asked to assume that a company had a place of business, including a factory, warehouse, and sales office in the administrator's state, and shipped goods regularly by mail or common carrier to another state The administrators were not asked to distinguish between the rules governing eligibility to apportion and the apportionment rules themselves Each position represented on the chart therefore indicates a result reached by applying both the eligibility rules and the apportionment rules It should be noted that under the California standard of "sales activity," if salesmen are regularly soliciting orders in the other state, even if they do not have authority to accept them, this by itself is sufficient to permit apportionment.

On the other hand if sales are obtained through telephone or mail orders without salesmen in the other state, apportionment is only permitted if a stock of raw materials is stored in the other state; or there is an administrative office in the other state, or there is a research facility, for company use only, in the other state

If sales are obtained through independent contractors with offices accepting orders in the other state on the corporation's behalf then California permits apportionment of income if there are goods in the other state consigned to customers or if there are "missionary men" in the other state creating demand for the corporation's products. Of course the "missionary men" can easily be considered as a "sales activity."

The differences between states with apparently similar standards can be seen in Chart 2 Both California and Arizona have a sales activity standard, but California permits apportionment in 12 more situations than Arizona does

CHART 1

NEXUS STANDARDS FOR STATE INCOME TAXES IMPOSED ON FOREIGN CORPORATIONS

This chart indicates the types of contacts with the various taxing states which we considered sufficient to require a corporation to file a return for a tax on or measured by net income In all cases the corporation is assumed to have a place of business, including a factory, warehouse, and sales office, outside the taxing state and to ship goods regularly by mail or common carrier into the taxing state

"★" opposite an activity described below indicates that the activity is considered by the state tax administrator to be sufficient contact with his state to require the corporation to file a return.

"□" indicates that the administrator considers the activity to be insufficient contact to require the filing of a return

The absence of a symbol indicates that no answer was provided in response to the subcommittee's inquiry.

CHART 1—Continued

This chart indicates the types of contacts with the various taxing states which we considered sufficient to require a corporation to file a return for a tax on or measured by net income. In all cases the corporation is assumed to have a place of business including a factory, warehouse, and sales office, outside the taxing state and to ship goods regularly by mail or common carrier into the taxing state.

"★" opposite an activity described below indicates that the activity is considered by the state tax administrator to be sufficient contact with his state to require the corporation to file a return.

"□" indicates that the administrator considers the activity to be insufficient contact to require the filing of a return.

The absence of a symbol indicates that no answer was provided in response to the subcommittee's inquiry.

[1] Results apply only to the taxability of income from the sale of goods
[2] A fixed-fee minimum tax is required
[3] The administrator indicates that a return is *not* required if the independent contractor is an "independent broker"
[4] A return is required if there is a charge for the service
[5] The administrator indicates that "in actual practice" a return is not required
[6] The administrator's reply is unclear
[7] The results depend largely on the type of business
[8] The results depend largely on the nature of the products

DATA State Income Tax Nexus Questionnaire

[9] There is no liability if the corporation's activities are confined to purchasing and storage of personality incident to shipment outside the state
[10] The administrator indicates that the result is "probable"
[11] The administrator expresses some uncertainty as to the administrative practice
[12] Return might be required under "special circumstances"

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol I, pp. 148–9 88th Congress, 2d Session, House Report No 1480 (Washington, D C, 1964)

Chart 3 compares nexus and "reverse nexus" for foreign corporations in the several states As can be readily seen, there are a great many inconsistencies in the treatment of nexus and "reverse nexus" Quite often an activity that is the basis for a jurisdictional claim is not considered sufficient grounds for apportionment of income and vice versa

In California, the only inconsistencies are those in which an activity is not considered the basis for the requirement of filing of a return, but it is sufficient to allow apportionment of income These activities are salesmen regularly soliciting orders in the state (without authority to accept unless otherwise indicated) and no other activities, displaying goods at space leased occasionally and for short terms, telephone answering service in the state with local directory listing, salesman residing in the state using homes for maintaining records only, corporation qualified to do business in the state, occasional or regular C O D shipments into the state, occasional or regular security interest

TABLE XX

STANDARDS USED TO ASSIGN SALES IN EACH OF THE STATES

	Destination	Sales office	Sales activity	Origin	Place of acceptance	Intrastate shipments
Alabama		X		X		
Alaska	X					
Arizona			X			
Arkansas	X					
California			X			
Colorado	X

CHART 2

CIRCUMSTANCES IN WHICH A CORPORATION MAY APPORTION ITS INCOME

This chart indicates the types of contacts with a state other than the taxing state which are considered sufficient to allow a taxable corporation to apportion its income In all cases the corporation is assumed to have a place of business, including a factory, warehouse, and sales office in the taxing state and to ship goods regularly by mail or common carrier into the other state

"★" opposite an activity described below indicates that the administrator of the taxing state considers that activity to be sufficient contact with another state to allow the corporation to apportion its income

"□" indicates that the administrator considers the activity to be insufficient contact with the other state to allow apportionment

The absence of a symbol indicates that no answer was provided in response to the subcommittee's inquiry

[1] Results apply only to income from sale of goods
[2] Domestic corporations are not allowed to apportion income but instead get credit for taxes paid to other states
[3] The administrator indicates that apportionment is allowed "if substantial activity prevails"
[4] The administrator indicates that apportionment is allowed "if the activities require the office as a necessity"
[5] The administrator's reply as applied to domestic corporations is unclear
[6] Apportionment is allowed only if income from the sales is subject to inclusion in the measure of any income or franchise tax imposed by the other state
[7] Domestic corporations may apportion only if their income is subjected to a tax in the other state
[8] The administrator's reply is unclear
[9] The results depend largely on the type of business
[10] The results depend largely on the nature of the products
[11] Apportionment is allowed if the corporation is required to pay a tax based on income to the other state
[13] The administrator indicates that apportionment might "possibly" be allowed
[14] The administrator indicates that the result is "probable"
[16] Apportionment might not be allowed under "special circumstances"

DATA State Income Tax Nexus Questionnaire.

SOURCE: Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol I, pp 240–1 88th Congress, 2d Session, House Report No 1480 (Washington, D C, 1964)

retained in goods sold, and occasional or regular maintenance of cars in the state owned by the corporation and used by salesmen

One would think that if these activities are sufficient to permit apportionment of income, they should also be sufficient grounds for a jurisdictional claim If sufficient nexus does not exist to support a jurisdictional claim, it is difficult to see how apportionment can be sustained

A Two-factor Formula?

The foregoing is based on the Congressional investigation and study Another study of this problem, by Charles E Ratliff, Jr, also merits careful attention in California [33] The question is whether "sales" should be by origin or destination Ratliff notes that limitations on a state's powers come under the due process clause and the commerce clause A tax imposed on the privilege of engaging in interstate commerce is unconstitutional but a fairly apportioned tax levied directly on the net income of a business engaged in interstate commerce and measured by income is constitutional He notes that the National Commission on Uniform State Laws recommended the destination basis for the sales factor,[34] and for the following reasons

> "(1) with the origin basis the sales factor tends to duplicate the property and payroll factors, (2) with the destination basis there is less opportunity for manipulation of sales operations merely for tax avoidance, (3) some recognition should be given the state providing the market"

The author argues for the two-factor formula He states that income is produced by human effort and the use of land and capital, not by selling and purchasing except to the extent that human effort and property are involved He states that inclusion of the sales factor gives a disproportionate weight to the property and labor involved in sales It should be noted that this argument is along the lines of the contribution-to-income approach If one really wants to trace the contributions to income in a multiproduct, multifactor firm he has an unbelievable problem in partial derivatives since the marginal productivity of the factors must be determined

In 1957 North Carolina changed from the two-factor formula to a three-factor (property, payroll, destination-sales) formula Early experience indicates that taxes were reduced for North Carolina manufacturers selling nationally and increased for foreign manufacturers selling in North Carolina [35] North Carolina experience indicates that the new formula produces wider fluctuations in yield over the cycle than the old formula [36]

In attacking the sales factor the author states [37]

> "In fact with a sales factor included in the formula, the labor and property devoted to selling are allocated once in the payroll and property factors, and then the sales factor in effect allows them to be counted again, at a much heavier weight The sales

CHART 3

COMPARISON OF NEXUS AND "REVERSE NEXUS" FOR FOREIGN CORPORATIONS

This chart shows for each income-tax state the degree of consistency between the standards for determining whether out-of-state corporations are required to file returns (nexus) and the standards for determining whether in-state corporations may apportion their income ("reverse nexus")

In all cases, the activities listed below are assumed to be the only activities which a corporation has outside its base state

"●" opposite an activity described below indicates that the activity is sufficient to require a corporation based outside the state to file a return, but is insufficient to allow a corporation based in the state to apportion its income

"▲" indicates that the contact does not require filing of a return but does permit apportionment

"□" indicates that the treatment of corporations based outside the state is consistent with that of corporations based inside the state

The absence of a symbol indicates that no meaningful comparison could be made

DATA State Income Tax Nexus Questionnaire

factor may also be condemned on the economic grounds that it interferes with the allocation of resources, increasing the real cost of goods, by inducing firms to *manipulate their selling operations for tax advantages* and by imposing upon them more work in compliance" (Emphasis added)

This is a fairly weak argument It is difficult to imagine how a firm is going to manipulate its selling operations for tax advantages Usually we consider that the firm has certain markets and sells in those markets in accordance with the cost and demand conditions holding at the moment One can much more easily see a firm changing the location of a plant or warehouse for tax purposes than obtaining tax advantage from rearranging its markets It would appear also that the three-factor formula was designed to determine what percentage of the operations of a firm can equitably be attributed to a certain state Elimination of the sales factor would cause the foreign firm with no property or payroll in the state to obtain a tax-exempt advantage over the domestic producer in the state market

Ratliff states that the sales factor cannot be included under the contribution-to-income approach but he admits that a destination-sales factor may be justified under the burden-of-tax approach [38] He attacks the burden-of-tax approach because he maintains that we cannot estimate the distribution of the burden to any degree of precision He is, of course, open to the same criticism with the contribution-to-income approach due to the complex nature of the marginal products involved

It should be noted that the foreign corporation with sales in a state enjoys the protection of the laws and the services of the state and the state is justified in demanding that the corporation contribute its equitable share to the upkeep of the state in which its market is located To exclude the destination-sales factor in favor of a two-factor formula would be to give the foreign corporation a substantial advantage over the California corporation in the California market The long-run effect of this could only be to increase the number of California corporations locating in Nevada

Ratliff argues that the lack of uniformity in state laws operates as a burden upon the economy because of the increased cost of both enforcement and compliance [39]

In conclusion, Ratliff recommends that the federal government establish a uniform two-factor formula [40] We must point out, however, that 26 states have the three-factor sales-destination formula It would cause a much greater dislocation of state finances than would standardization along prevailing lines In California, even more income would be lost by the fact that Ratliff recommends standardization on the Federal Tax Code definition of income which is much narrower than the California income definition

The property-payroll-sales factor can be justified on economic grounds as allocating to the state that portion of the unitary business's income for tax purposes as corresponds with the business's operations in that state Here the corporation, like the individual, is treated as a unitary entity The source of the income is not considered, only the

[38] *Ibid*, p 98
[39] *Ibid*, p 101
[40] *Ibid*, pp 106–108

percentage of the operations that falls within the particular state The ability to pay is determined by the amount of corporate income The state of jurisdiction is determined by the location of the various operations The destination-sales factor operates to offset the disadvantage that domestic corporations would have vis-à-vis foreign corporations in the California market and to block a rather obvious tax avoidance loophole

Some data from this study that are of general interest follow in Charts 4, 5 and 6

A Single Factor Formula?

A recent decision of the U S Supreme Court has even held valid a single-factor unapportioned tax It sustained the State of Washington's tax on the privilege of doing business in the state The tax was measured by the company's gross wholesale sales of motor vehicles, parts and accessories sold in the state The state superior court had held that the presence of a branch office in Seattle subjected some of the company's transactions to the tax, but application of the tax to the remainder would be repugnant to the commerce and due process clauses of the U S Constitution The state supreme court reversed, holding that all the company's transactions were subject to taxation The U S Supreme Court, affirming the state supreme court, declared that it was well established that state taxation of a business measured by gross receipts is constitutional if it is fairly apportioned The company main-

tained district managers and service representatives in the state and headquarters personnel made personal visits to the state The court found that "the bundle of corporate activity so enmeshed in local connections" was sufficient to justify the state's finding that they were a sufficient basis for the levy of a tax Even though the tax was unapportioned in the usual sense, the court did not declare it constitutionally impermissible in view of the findings of the state supreme court The company had argued that it might be subjected to multiple taxation on the same sales because of its manufacturing and service connections in other states which handled Washington-bound products The court answered this by saying that the company had not actually demonstrated that this was the case The four dissenters were concerned with the fact that failure to apportion would result in multiple taxation of the same sales where commercial activity in several states resulted in a sale in one of them, or that the majority decision would mean that states would be permitted to tax wholly interstate sales by any company selling through local agents or traveling salesmen [41] This decision aggravates the need for an interstate compact or Congressional or Constitutional action

California will have to watch future Congressional action closely in order to protect its corporation franchise tax base Yet, it is clear that there is an urgent need for more uniformity among the states in the taxation of corporation net income

Noncompliance

The complexities of jurisdiction and apportionment lead to problems of compliance To a large extent, the corporate income tax is self-assessed If there is confusion on questions of taxable nexus, there is bound to be noncompliance to a greater degree than would otherwise be the case Even a firm that is extremely careful about paying the tax in every state where it believes that taxable nexus exists may find genuine areas of doubt The course to be taken by the company in such cases is not too clear To ask the state commissioner is to invite litigation Certainly no firm wishes to pay taxes where it is not legally liable Therefore, quite often the problem is resolved by the relatively simple expedient of noncompliance

Table XXI indicates the results of a questionnaire concerning firms who had salesmen accepting orders but no other activity in a state which considered this a taxable nexus

It is interesting to note that returns were filed in less than three percent of the cases surveyed Even in California returns were filed in only 3 cases out of 39, which is less than 10 percent

Where jurisdiction is based on the maintenance of goods in a public warehouse, compliance was markedly better This can be seen in Table XXII

For all the states included in the survey there were returns filed in 39 percent of the cases California with 20 out of 25 returns filed or 80 percent did considerably better than most states It is significant however that in no state was there 100 percent filing

Table XXIII shows the incidence of noncompliance with assertions of jurisdiction based on the maintenance of a sales office in the state but having no stronger contact

Here only 44 out of 130 returns were filed for a 33 8 percent compliance percentage In most states noncompliance was the rule rather than the exception in spite of a rather strong nexus California's filing percentage of 58 8 percent, representing 10 returns filed out of 17, was one of the highest of all the states Even in California, however, the number of returns filed cannot be considered to represent close compliance

The extremely low compliance figures may be partly explained by the fact that some of the states excuse a portion of the potential taxpayers A California official has indicated that discretion is currently

TABLE XXI

NONCOMPLIANCE WITH ASSERTIONS OF JURISDICTION BASED ON SALESMEN ACCEPTING ORDERS

For each asserting state, total number of cases of a company having this activity but no stronger contact and number of these cases in which returns were filed

*States reputed to be vigorously enforcing jurisdictional assertions

DATA Business Questionnaire II (combined samples) Doubtful cases have been resolved in favor of return filing

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol I, p 305 88th Congress, 2d Session, House Report No 1480 (Washington, D C 1964)

being exercised to excuse filing by smaller corporations Part of his testimony follows [42]

"**Mr. Drabkin.** Yesterday the subcommittee heard a small manufacturer who indicated that his operations were in a large number of states, and that in 20 percent of the states in which he operated, his sales were about $12,000 gross or less He operates on a net profit, after taxes of 1 24 percent In other words, his net profit in a state may be as little as $150

How is a uniform apportionment formula going to do that man any good?

Mr. Walker. [Bruce W Walker, assistant executive officer, the California Franchise Tax Board] I would say this would be solved, and is currently being solved, by tax administrators using their discretion not to require that returns be filed

Mr. Drabkin. Your suggestion is that the taxpayer pay or not pay at his peril?

Mr. Walker. Well, as far as California is concerned, if he wrote us a letter and said, "My sales in your state were $12,000, I had no payroll, no property there," we would never do anything about it

Mr. Drabkin. Isn't he entitled to a clearer delineation of his liabilities under the law than simply administrative discretion?

[42] *Hearings Before the Special Subcommittee on State Taxation of Interstate Commerce of the House Committee on the Judiciary*, pp 170–171, 87th Congress, 1st Session, serial 20 (1962)

Mr. Walker. I do not know. I rather doubt it. If he is present in the state of California he knows the situation when he goes there. When you go into another state it is burdensome on you to know their laws; is it not?

Mr. Drabkin. If you would not impose liability on this taxpayer anyway, why are you so concerned, as you are, with the loss of his taxes? Even if a line could be drawn where this type of operation is excluded, you apparently would still be totally opposed to it.

Mr. Walker. Well, as I have indicated here, if you put $100,000 as a minimum on 86-272, we think it would be all right and, perhaps we would not argue about it, because we are concerned about the money, you see That is what we are concerned about

. . . I am simply saying, when I talk about administrative discretion, that taxation is a practical matter, and tax administrators are practical people, and they do not pursue people for very small sums of money if they can tell it is a small sum before they start after it."

Recommendations [48]

There are two changes of major importance that could be undertaken to improve the California corporation income tax and its accompanying franchise tax Both of these relate to the apportionment formula used

[48] Suggested to the authors by Joseph J Launie

*States reputed to be vigorously enforcing jurisdictional assertions

DATA Business Questionnaire II (combined samples) Doubtful cases have been resolved in favor of return filing

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol I, p 209 88th Congress, 2d Session, House Report No 1480 (Washington, D C , 1964)

to determine what proportion of the income of a company doing business in California and other States is subject to the California tax

1 One of the factors used in the California formula is property This factor is based on the real and tangible personal property owned by the taxpayer and used in the unitary business Property of which the taxpayer is lessee is excluded from the factor This exclusion of leased property appears to violate the principle of tax neutrality and provide a large loophole at the same time

There appears to be no economic justification for the inclusion of a plant if it is owned and the tax exemption of the same plant if it is leased Certainly this tax exemption greatly affects the "buy-or-lease" decision of the taxpayer and is at odds with the goal of tax neutrality The loophole provided by this exemption also has adverse equity implications because it can easily provide for undertaxation of those taxpayers in a position to take advantage of it and overtaxation correspondingly for those taxpayers who cannot A further disadvantage of the leased property exemption is that it represents the only substantial difference between the California property factor and the property factor contained in the Uniform Division of Income for Tax Purposes Act. California could well consider revising its property tax factor by adopting at least the principles of the Uniform Division of Income for Tax Purposes Act The wording proposed by the UDITPA is as follows

"SEC 10 The property factor is a fraction, the numerator of which is the average value of the taxpayer's real and tangible personal property owned or rented and used in this state during the tax period and the denominator of which is the average value of all the taxpayer's real and tangible personal property owned or rented and used during the tax period.

SEC 11. Property owned by the taxpayer is valued at its original cost Property rented by the taxpayer is valued at eight times the net annual rental rate Net annual rental rate is the annual rental rate paid by the taxpayer less any annual rental rate received by the taxpayer from sub-rentals

COMMENT

This section is admittedly arbitrary in using original cost rather than depreciated cost, and in valuing rented property as eight times the annual rental. This approach is justified because the act does not impose a tax, nor prescribe the depreciation allowable in computing the tax, but merely provides a basis for division of the taxable income among the several states The use of original cost obviates any differences due to varying methods of depreciation, and has the advantage that the basic figure is readily ascertainable from the taxpayer's books No method of valuing the property would probably be universally acceptable

SEC. 12 The average value of property shall be determined by averaging the values at the beginning and ending of the tax period but the [tax administrator] may require the averaging of monthly values during the tax period if reasonably required to reflect properly the average value of the taxpayer's property "

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol II, p A229 88th Congress, 2d Session, House Report No 1480 (Washington, D C, 1964)

A last, but not necessarily minor consideration is that the elimination of the leased property exclusion will according to the Franchise Tax Board slightly decrease the tax revenue realized from the corporation income tax and the franchise tax Nevertheless, elimination of the leased property exemption would improve tax neutrality and equity and represent a move toward greater uniformity

2 The sales activity standard which California employs in the sales factor of the apportionment formula is also quite unsatisfactory It is a standard which is quite difficult to apply in many cases It often makes the taxpayer quite uncertain as to the exact extent of his liability

As has been stated previously, the destination standard is quite attractive It provides an easily verifiable standard since the destination of a particular sale is seldom difficult to determine It provides the tax administrator with a means of offering lower tax bills to local manufacturers whose products are shipped out of the state At the same time it provides a means of attributing to the state income from sales destined into the state from manufacturers based elsewhere The increase in tax revenue that would result if this standard were to be adopted is also quite important Based on the recent level of revenue from this tax of $400 million, a 2½-percent increase would result in an additional revenue of $10 million annually with no increase in rates Finally, the adoption of the destination standard would be an important step toward uniformity

If PL 86-272 should be overturned by the Supreme Court, or rescinded by Congress, the destination standard might be adopted by Congress Since the driving force behind such legislation as P L 86-272 is the lack of uniformity in state laws on the subject and since the UDITPA contains the destination standard, it is quite likely that new federal legislation would favor this standard

The principle, at least, of the Uniform Division of Income for Tax Purposes Act should be adopted in California for the sales factor. The wording proposed by the UDITPA is stated as follows:

"SEC 15 The sales factor is a fraction, the numerator of which is the total sales of the taxpayer in this state during the tax period, and the denominator of which is the total sales of the taxpayer everywhere during the tax period

SEC 16 Sales of tangible personal property are in this state if

(a) the property is delivered or shipped to a purchaser, other than the United States Government, within this state regardless of the f o b point or other conditions of the sale, or

(b) the property is shipped from an office, store, warehouse, factory, or other place of storage in this state and (1) the purchaser is the United States Government or (2) the taxpayer is not taxable in the state of the purchaser

COMMENT

Sales to the United States Government are treated separately because they are not necessarily attributable to a market existing in the state to which the goods are originally shipped

SEC. 17. Sales, other than sales of tangible personal property, are in this state if:

(a) the income-producing activity is performed in this state; or

(b) the income-producing activity is performed both in and outside this state and a greater proportion of the income-producing activity is performed in this state than in any other state, based on costs of performance."

SOURCE Committee on the Judiciary, *State Taxation of Interstate Commerce*, Report of the Special Subcommittee on the State Taxation of Interstate Commerce, Vol II, p A230 88th Congress, 2d Session, House Report No. 1480 (Washington, D C, 1964)

As Chart 3 has shown, at the present time the California standards for nexus and for "reverse nexus" are not consistent. If a particular activity on the part of a taxpayer is sufficient grounds for a jurisdictional claim, then it should also be sufficient grounds to permit a California firm to apportion out some of its income However, California firms are presently being allowed to apportion out part of their income for activities which are not considered grounds for a jurisdictional claim This inconsistency should be eliminated. This would be particularly important if the destination sales standard is adopted and P.L. 86-272 remains in effect.

APPENDIX

Areas of Substantive Nonconformity Between Federal Corporation Tax Laws and California Bank and Corporation Tax Law

SOURCE: State Franchise Tax Board, August 1964

BANK AND CORPORATION TAX LAW— INTERNAL REVENUE CODE COMPARISON

(Differences in effective dates not noted)

IRC	STATE	
11	23151, 23181, 23501	Contains federal rate State rates are different
12		Cross-references only
21	23058, 24251	Federal law applies to rate changes State law applies where the law "applicable to the computation of taxes" is different Effective date of rate changes generally specified
32		Federal allows a credit for taxes withheld on foreign corporations No withholding under state law
33		Federal law allows a credit for taxes imposed by foreign countries and U S possessions
38, 46, 47 and 48		Federal allows a tax credit up to 7 percent for investments in certain depreciable property State regulations provide for options to maintain same depreciable basis, but no credit
39		Cross-reference only
63		Federal tax is based on "taxable" income State tax on "net" income
72	24302	Federal law permits lump-sum amounts received under insurance contracts other than life to be taxed over a three-year period Also permits lump-sum proceeds to be received as an annuity State law provides proceeds are not taxable until consideration is recovered, thereafter all is taxable
74		Federal law permits certain prizes and awards to be received tax free Little if any application in the case of corporations
75		Federal law requires dealers in tax-exempt municipal bonds to amortize the premiums on tax-exempt securities Not necessary under state law as the interest on the bonds is taxable
76		Federal law exempts income except interest on obligations issued by a joint-stock land bank No specific provision, but controlled by federal law (12 U S C 931)
78		Requires domestic corporations receiving dividends from a foreign corporation which claim a foreign tax credit to increase (gross-up) their income by amount of foreign taxes paid Foreign tax credit not allowed, therefore provision is not applicable
101(a)(1)	24304, 24305	Federal law permits insurance policies to be transferred tax free to a corporation in which the insured is a shareholder or officer State law also permits transfer of endowment or annuity contracts
102		Federal law specifically exempts from income property acquired by gift, bequest, devise or inheritance No specific state provision
103		Federal law exempts interest on certain governmental obligations Section 24272 specifically taxes such interest
110		Federal law provides that if a lessee corporation is obligated to pay federal income tax with respect to rentals, tax is not included in gross income Exclusion is for federal taxes No comparable state provision
114		Permits corporation to exclude expenses attributable to sports program conducted for the Red Cross No comparable state provision
115		Federal law exempts income derived from any public utility operated by a state, etc , or from the exercise of any governmental function No comparable state provision Controlled by general law
118		Federal law excludes from income contributions to capital Same result reached under case law
121		Cross-references
162(a)		Federal specifies conditions under which expenses in connection with legislation and traveling, etc , expenses are deductible No state provision
163	24344	State law contains special rules which may limit the interest deduction

BANK AND CORPORATION TAX LAW— INTERNAL REVENUE CODE COMPARISON—Continued

(Differences in effective dates not noted)

IRC	STATE	
164		Difference in language, but deduction generally same because taxes are allowed as business expenses However Section 164(e) allows a corporation a deduction for taxes it pays on behalf of its shareholders No comparable state provision
165(d)		Federal law denies a deduction for wagering losses Probably does not apply to corporations
165(f), (g)		Federal limits capital loss deduction No limit under state law
165(h)		Federal allows certain disaster losses to be claimed in the prior year
165(i)		Cross-references
166	24348	Federal treats bad debt losses on securities as capital losses State allows unlimited deduction State requires consistency in claiming partial worthlessness of a debt, federal does not
167(e)(2) & (f)		Federal permits taxpayers to change depreciation methods without prior approval, notwithstanding a prior agreement not to change and disregard amounts as salvage value up to 10 percent of the basis of the property with respect to "Sections 1245 and 1250 property" Sections 1245 and 1250 are not applicable under this law
170(b)		Federal law permits excess charitable contributions to be carried forward five years
170(e)		Special rule regarding "Section 1245" property See Section 167(e)(2)
170(i)		Cross-references
171(c)(1)		Relates to partially taxable bonds No bonds are partially taxed under state law
172		Net operating loss deduction Not added to state law Carryback of losses to state law would jeopardize the financial rate
175	24369	Federal law restricts deduction for soil and water conservation expenditures to 25 percent of farming gross income No state limitation
176		Permits a domestic corporation to deduct payments where it has entered into an agreement to extend social security benefits to citizens employed by its foreign subsidiaries Deduction is for the "burden of the payment"
181		Allows a deduction for any unused investment credit
182		Allows a deduction for expenditures incurred by farmers for clearing land.
242		Allows a deduction for certain partially tax-exempt interest Interest is taxable under franchise tax, but is exempt under Corporation Income Tax Law.
243-247	24402	Allows a deduction for dividends received Section 24402 of state law relates to dividends, different concept
263(a)(1)(E)		Allows a deduction for expenses incurred by farmers for clearing land See Section 182
263(b)		Relates to certain expenditures for advertising and goodwill if claimed for purpose of computing excess profits tax credit Not applicable
264(a)(3) & (c)		Prohibits an interest deduction if amount equal to surrender value of insurance premiums is borrowed under a systematic plan
265	24425	Relates to amounts allocable to tax-exempt income See Section 24425
268		Federal disallows expenses incurred in connection with an unharvested crop State law contains no comparable provisions, but taxes gain as ordinary income
272		Relates to the disposal of coal and iron ores under certain contracts See Section 268
273		Federal law disallows a deduction for shrinkage in value of a life or terminable interest

PUBLISHER'S NOTE

This report on capital gains, death and gift taxation is the 11th in a series of studies to be published this interim by the Committee on Revenue and Taxation The recommendations in this report are those of the researcher and should not be construed as representative of the views or decisions of the committee The committee recommendations will be made in due course.

ABOUT THE AUTHOR

This report on capital gains, death and gift taxation was prepared by Dr. Harold M Somers, Chairman of the Department of Economics at U.C L A Dr. Somers received his Ph D in economics from the University of California, Berkeley, and his LL B from the Law School of the State University of New York at Buffalo

He is a member of the American Bar Association, American Economic Association, American Finance Association, and National Tax Association.

Prior to coming to U.C L A., Dr Somers taught at the University of Buffalo and the University of Michigan and was a member of the research staff at the University of Chicago and the Brookings Institution, an economist for the New York State Department of Commerce, a consultant to the New York State Department of Commerce, and a consultant to the New York State Commission on Revision of the Constitution and the Joint Legislative Committee on Town and Village Laws

Dr. Somers has published widely in the areas of economics and taxation. He is the author of a book, *Public Finance and National Income*, and a contributor to volumes on *Growth of the American Economy* and *Taxation and Business Concentration* His papers, notes and reviews have appeared in the *American Economic Review, American Historical Review, Buffalo Law Review, Canadian Journal of Economics and Political Science, Commercial and Financial Chronicle, Econometrica, Impuestos: Revista de Doctrina Jurisprudencia y Legislación, Journal of Economic History, Journal of Finance, Journal of the American Statistical Association, Journal of Political Economy, National Tax Journal, Proceedings of the National Tax Association, Quarterly Journal of Economics, Review of Economics and Statistics, Review of Economic Studies, Rivista Internazionale di Scienze Economiche e Commerciali, Revue de Science et de Législation Financière, Vanderbilt Law Review, Western Economic Journal,* and the following federal publications, *Monetary Policy and the Management of the Public Debt* and *Federal Expenditure Policy for Economic Growth and Stability,* both issued by the Joint Economic Committee of the U.S. Congress, and *Excise Tax*

Compendium, issued by the House Ways and Means Committee Among his contributions to professional publications since 1950 are.

"A Theory of Income Determination," *Journal of Political Economy*, December 1950

"Government Expenditures and Economic Welfare," *Revue de Science et de Législation Financière*, January 1951

"What Generally Happens During Business Cycles—and Why," *Journal of Economic History*, summer 1952

"The Place of the Corporation Income Tax in the Tax Structure," *National Tax Journal*, September 1952

"'Cost of Money' as the Determinant of Public Utility Rates," *Buffalo Law Review*, spring 1955

"Estate Taxes and Business Mergers," *Journal of Finance*, May 1958

"Reconsideration of the Capital Gains Tax," *National Tax Journal*, December 1960

"Theoretical Framework of Sales and Use Taxation," *Proceedings of the Fifty-fourth National Tax Conference: 1961* (National Tax Association)

"Capital Gains Tax Significance of Changes in Holding Period and Long-term Rate," *Vanderbilt Law Review*, June 1963

"Economic Implications of an Income Tax Reduction," *Rivista Internazionale di Scienze Economiche e Commerciali*, April 1964

"Problemas fiscales de países en desarrollo" ["Fiscal Problems of Developing Countries"], *Impuestos*, April 1965

Dr. Somers prepared an earlier study in this series, *The Sales Tax*, coauthored one on *Taxation of Corporate Income in California* with David R Doerr and contributed to one on *Taxation of Property in California* by David R Doerr and Raymond R Sullivan

Dr Somers was assisted in the preparation of this report and the earlier studies by Joseph J Laume, who is a teaching assistant and Ph D candidate at U C L A Mr Laume was previously a member of the research staff of the Bureau of Business and Economic Research at the University of Nevada and has an M A degree from the latter institution

LIST OF TABLES AND FIGURES

I. INTRODUCTORY NOTE

There are a great many "taxable events" that provide the occasion —or perhaps the excuse—for taxation It may be the manufacture or sale of a commodity, as in excise or sales taxation; it may be the accretion of economic power, as in income taxation, it may be the gratuitous transfer of wealth, as in estate, inheritance and gift taxation, or it may be the realization of an appreciation in one's assets, as in capital gains taxation In this study we are concerned primarily with taxes on the gratuitous transfer of wealth at time of death or gift We necessarily become involved with the capital gains tax because some of the assets transferred may have appreciated in value since they were originally acquired The capital gains tax is technically part of the income tax, yet it is essentially a form of taxation of wealth, hence resembles the gratuitous transfer taxes in that respect Accrued capital gains at time of death and at time of lifetime gift present a common problem. In neither case has there been an actual sale or "realization" Under present law, the capital gain that has accrued on an asset transferred at death is not taxed as a capital gain but the asset is put in at its full value at death for California inheritance tax purposes In the case of a gift between living persons, there is no capital gains tax at the time of gift but the receiver of the gift must use the donor's basis (or market value at time of gift, if lower) whenever he sells the property Thus capital gains, death and gift taxation are closely intertwined

The California inheritance tax is described in Chapter II and the incidence and effects of death taxes generally are considered briefly in Chapter III. Inheritance tax provisions in the various states are outlined in Chapter IV. A revision of the discount period and the grace period is considered in Chapter V. The taxation of capital gains at death is covered in Chapter VI An excellent historical review of the California inheritance and gift tax law, which was prepared by Charles J. Barry, Chief Inheritance Tax Attorney, State of California, is included as an Appendix which begins on page 61

II. TAXATION OF GIFTS AND INHERITANCES IN CALIFORNIA

California's inheritance and gift taxes impose rates ranging from 2 to 24 percent on the market value of the gift or inheritance, with many significant exemptions These taxes are administered by the State Controller and contribute directly to the General Fund of the state. In 1962–63, they together constituted 5 0 percent of the General Fund revenue and 3 5 percent of total state revenue They play a slightly more important role in California's revenue system than in the average of all other states, having contributed 2 8 percent of California's total revenue in 1961–62 while the average of all states using death and gift taxes was 2 2 percent The inheritance tax yielded $86 8 million and the gift tax yielded $5 6 million in 1962–63 [1]

Background

California adopted an inheritance tax in 1905 patterned to a large extent on a Wisconsin law of 1903 Inheritance taxes go far back into antiquity several hundred years before the Christian era and were well

[1] See *California's Tax Structure 1964*, Part 1, pp 18–28 (Assembly Interim Committee on Revenue and Taxation, Sacramento, January 1964)
This summary is derived from testimony of Charles J Barry, Chief Inheritance Tax Attorney, State of California, before Assembly Interim Committee on Revenue and Taxation, Hon Nicholas C Petris, Chairman, and discussion by Assemblymen Petris, Tom Carrell, and William Stanton, at a hearing held at Metropolitan Oakland International Airport, October 3 and 4, 1964, as reported in *California's Tax Structure 1964*, cited above

established in Egypt They were found in Rome, throughout Europe in the modern era and appeared in the United States at an early date. The first state of the United States to adopt such a tax was Pennsylvania in 1820 The first well-planned and workable inheritance tax law appeared in Wisconsin in 1903 It provided initial exemptions for widows and children By 1952 all of the states had adopted some form of death tax Nevada, however, dropped its tax in 1925 The death taxes are of two forms on the estate itself or on the inheritances In some states the rates are just sufficient to pick up the credit allowed under the federal estate tax law through Section 2011(b) of the Internal Revenue Code

The Present Tax in California

The 1905 California law has served as the model for all subsequent death tax laws in this state It was codified in 1943, effective July 1, 1945

California's inheritance tax is collected from the transferee who "is strong and healthy, and ready and willing to battle "[2] This is because the California tax is on the privilege of receiving property on the death of another, as opposed to those death taxes that are on the privilege of transmitting the property The latter type is the estate tax where the number and relationship of the beneficiary is wholly immaterial; and, aside from a spouse or a charity, it makes no difference who the beneficiaries are or how many there are in an estate, the tax is identical. For example, if a man died and left 10 children, the estate tax would be exactly the same as though he left his whole estate to one stranger in blood, such as a friend of his Under the California type of inheritance or succession tax, the various beneficiaries pay the tax out of their respective shares Each beneficiary receives his assigned exemption and the rates are calculated as per schedule See Table 1

Relation to Federal Estate Tax

The initial exemption for the Federal Estate Tax Law is $60 thousand If the estate nets less than $60 thousand, there is no federal estate tax, but there could be a California inheritance tax because the exemptions under the inheritance tax law for each individual are lower than the $60 thousand For example, a minor child gets a $12 thousand exemption, an adult child or spouse or a grandchild a $5 thousand exemption The further away they get the less the exemption and the higher the tax But with an estate tax, there is one exemption and the rates are applied to the net estate after that exemption If you give it all to one person, he would just have a single exemption in California The size of the exemption would depend upon his relationship If he were a class A beneficiary, it would probably be $5 thousand, a class B would be $2 thousand If he is no relation, the exemption would be $50 with 10 percent as the rate from zero to $25 thousand The top rate is 24 percent But there is an interesting feature in comparing the federal estate tax with the California inheritance tax If a man were left a $10 thousand bequest out of an estate of that amount, he would be paying no estate tax Since the whole estate is less than $60 thousand there would be no estate tax, and there would be no appor-

TABLE 1

CALIFORNIA INHERITANCE TAX—RATES AND EXEMPTIONS
Effective as to Decedents Dying After 12:01 a.m. September 15, 1961

CLASSIFICATION			EXEMPTION	Rate of Tax on amount left after deducting exemption from $25,000 00	$25,000 to $50,000	$50,000 to $100,000	$100,000 to $200,000	$200,000 to $500,000	$300,000 to $500,000	Over $500,000
A	HUSBAND or WIFE	Community Property	All Exempt*							
		Decedent's Separate Property	One-half of Separate Property Plus $5 000 00	2%	3%	4%	7%	9%	9%	10%
A	Minor Child—Including Adopted		12,000.00	2%	3%	4%	7%	9%	9%	10%
A	Adult Child Grandchild (Adopted or Acknowledged) Parent—Grandparent		5,000.00	2%	3%	4%	7%	9%	9%	10%
B	Brother—Sister—Nephew—Niece Son-in-Law—Daughter-in-Law		2,000.00	6%	10%	13%	15%	15%	17%	18%
C	Uncle—Aunt—Cousin		500.00	7%	12%	15%	15%	15%	18%	18%
D	Strangers in Blood—including Brothers- and Sisters-in-Law—Fathers- and Mothers-in-Law		50.00	10%	15%	18%	18%	18%	22%	24%

It is unlawful (1) For anyone to enter a safe deposit box after the death of any person who had a right of access to that box, during lifetime, without first having it examined by a representative of the County Treasurer's Office
(2) For anyone to use a joint bank account or to transfer any personal property held in joint tenancy where one of the joint tenants is deceased without first obtaining a release from the County Treasurer's Office

*If a decedent husband gives his wife a Life Estate or Power of Appointment in his half of the community property, said half is subject to tax at the rates indicated with a $5,000 exemption allowed.
SOURCE Alan Cranston, State Controller

tionment of a tax, because there is no tax prorated to this $10 thousand beneficiary. But if the decedent were worth a million dollars, that $10 thousand bequest is dischargeable with a prorated federal estate tax of $3,257.[3]

Prior to 1959, under the California law, from about 1921 to 1959, the state of California allowed a deduction against the estate for federal estate taxes paid, but that was repealed in 1959, and now there is no federal estate tax deduction allowable under the California law. This is a tax on a tax but it has been upheld by the courts of this state, *Estate of Fabris* in 1962 In the beginning, there was no allowance for the federal estate tax, and until 1921, there was no provision in the Inheritance Tax Law at all for any deduction, even for funeral expenses. They were allowed on the basis that it was a succession tax, and beneficial succession was the measure of the tax, but there was no provision in the law, and it was not until 1921 that any provision was put in the law to permit deductions to be allowed [4]

Details of California Law

The California law is broken down first according to whose estate comes under the inheritance tax; then what property is taxable and what transfers are taxable, then what deductions are allowed Next, what exclusions are allowed under the law, for example, community property exclusions. And then the computation of the tax And, of course, the payment features of it· the payment of the tax to the county treasurer, the discounts and the refund provision.[5]

A. PROPERTY TAXABLE

Jurisdiction to tax depends upon residence, i e., domicile of the decedent in California or the presence of real property or tangible personal property in this state. All real property in the state of California is subject to tax under the law, irrespective of the domicile of the owner. It is within the borders of the state The law also taxes all tangible personal property within the borders of this state, irrespective of domicile. With respect to intangible personal property—bank accounts, securities, promissory notes—these depend upon the residence or domicile of the deceased If the decedent were domiciled in another state, California would not attempt to tax a bank account that he had on deposit in a California bank, or attempt to tax stock that he held in a California corporation Other states accord a like exemption to California residents with respect to intangible personal property Residence is not defined in the statute, but it is equated with domicile for the present purpose. The laws of Oregon and Washington do not use the word resident or domicile They use the word inhabitant The law is nicely vague in this area, but the courts have tied it down to domicile [6] In a state like California, there are quite a number of disputed domicile cases These cases could result in a double taxation, that is, taxation by two different states. We have provisions in our law to preclude this by virtue of a right to compromise a disputed domicile case, and also

[3] Barry, *op cit*
[4] *Ibid*
[5] *Ibid*
[6] *Ibid.*

specific provisions for arbitration We have never utilized the arbitration provisions, but they are there, nevertheless [7]

If a decedent is a nonresident of the United States, the law says California will tax any intangible personal property in the state of California. The state will also tax stock in a California corporation, which the 1963 session defined precisely, and any other tangible personal property. The law exempts bank deposits and deposits in the savings and loan associations belonging to a deceased nonresident of the United States, so long as the accounts are not used in connection with a business conducted in whole or in part in California.[8]

B. TRANSFERS TAXABLE

Any transfer by will or the laws of succession is subject to the inheritance tax law. Probate homesteads, family allowances, and civil code homesteads, i e , the declared homesteads, are taxable If this were all, many transfers would escape tax. For example, inter vivos transfers, a deed of gift, and blanket gift from a parent to a child are subject to tax so long as the transfer was made without valuable and adequate consideration equal in money or money's worth; and the courts say partial consideration in such instances is not consideration. The law taxes any transfer made in contemplation of death. California is one of the relatively few states that defines the term, and contemplation of death means in California with a "testamentary intent or a testamentary flavor." [9] It does not mean a deathbed transfer as it does in some jurisdictions It means a transfer that would be a substitute for testamentary disposition including a transfer with a reserved life estate. For example, a parent deeds his home to the child, reserving to the grantor a life estate. This type of a transfer is taxable under the California Inheritance Tax Law.

C. JOINT TENANCIES

Some 75 percent to 80 percent of all homes in California are held in joint tenancy, and the law taxes the termination of a joint tenancy by the death of one of the joint tenants on what is called a contribution theory. Code Section 13671 states that on a death of one of two joint tenants, the whole of the joint tenancy property is taxable, except that which the survivor may prove originally belonged to him, and never came from the deceased. This is satisfactory in many ways but with respect to a husband and wife difficulties arose, so the Legislature in 1955 amended the law to provide that a joint tenancy held by a husband and wife which had its source in community earnings would be treated for inheritance tax purposes as community property In other words, if the home was bought with community earnings, on the death of either husband or wife, it would be treated as community property, and since 1961, all community property passing outright to the survivor is free of inheritance tax. There are also such things as three-way joint tenancies, and there was created by the Legislature in 1961 a new type of property which was acquired in some state other than California which would have been community property had it been acquired in California. With respect to that, if it is held in joint tenancy, the

[7] Barry, *op. cit.*
[8] *Ibid.*
[9] *Ibid.*

statute provides that it shall be considered as though each was a contributor of one-half [10]

D. POWERS OF APPOINTMENT

As for powers of appointment, the Legislature from time to time has changed its position At one time it taxed a creation of a power of appointment to the donee of the power Subsequently, the law was changed to tax the exercise of the power by the donee Since 1935 California has been taxing the creation of the power of appointment again, but not the exercise of the power of appointment on the death of the donee. For example, A gives to B an estate for life with a power to say how that property shall go on the death of B, the donee B, the donee, exercises the power at his death, and gives the property to X California does not tax that last transfer "We tax the first one but not the last, although the donee of the power has what the cases and the taxwriters say can amount to absolute ownership" [11] He has the enjoyment of the property during his life and the right to say who shall have it after his death "This is an area that should be explored in the future" [12] Powers of appointment are not as popular as joint tenancies nor as popular as ordinary life estates, but they have become more important since 1954 when the Internal Revenue Code was amended With the marital deduction in the Federal Estate Tax Law, if it is separate property and the husband dies first, assume that he has created Trust A and Trust B the latter being the so-called marital deduction trust He has to give the surviving spouse the power of appointment in Trust B in order to gain the advantage of the marital deduction under the federal law to exclude half of the property from the estate tax, that is, the property in Trust B The use of the power of appointment has accordingly grown considerably in the last eight or nine years In large estates, the people who have a great deal of property are able to avail themselves of the services of estate planners who will arrange their affairs so as to minimize the tax "There is nothing evil in this but there are some loopholes that come up" [13] In the Federal Estate Tax Law, it is provided not alone that the exercise of the power of appointment be taxed on the death of the donee, but possession of the power as well. If the donee had the power at the time he died, whether he exercised it or not, the transfer is subject to tax [14]

E. INSURANCE

The next type of property transfer which is subject to tax is insurance. It has to be genuine insurance, not a single premium policy that is brought by, say, an elderly person in conjunction with an annuity contract The risk-sharing feature must be present The federal law a few years ago eliminated the payment-of-premiums test The state looks to incidents of ownership If the decedent has the incidents of ownership, we considered the transfer taxable We have not in our law eliminated the payments-of-premiums test But if the premiums were paid with community earnings and the spouse is the beneficiary

[10] Barry, *op cit*
[11] *Ibid*
[12] *Ibid*
[13] *Ibid.*
[14] *Ibid*

of the policy of insurance, the community exclusion applies to it, and, of course, as it stands now it is not taxable There is in the state law a $50 thousand insurance exemption There was up until 1942 a $40 thousand insurance exemption in the federal law. At that time, it was repealed. California did not repeal its $50 thousand insurance exemption.[15]

The payment-of-premiums test relates to the continuance of paying the premiums by the insured The insured transfers the policy to the beneficiary, for example, and then each continues to pay the premiums on it Formerly, if he continued to pay the premiums under the federal law, it was considered that he was still the owner of the insurance, and it was still subject to tax But if the policy was transferred, or, if, for example, the wife took out the policy of insurance on her husband's life, and she paid all premiums, he was not the owner of the policy, and it was not something that was passing from him to her. This was her own investment If it was a partnership, a beneficiary could well be an owner of the policy, but if it were a corporation and the corporation took out the policy of insurance on the life of its president or its general manager and the corporation paid all the premiums and the proceeds were payable to the corporation as beneficiary, then it would not be subject to tax. If it were payable to the wife of the corporation president and if the decedent were not the owner of it, then it would not be subject to tax In other words, the corporation pays it and the wife, or the estate, is the beneficiary "But we have to be careful here because if it goes into the estate proper, the decedent's estate, and is subject to the terms of his will and subject to the claims of creditors, it does not qualify for the exemption, and it would be taxable But if it goes directly to the beneficiary—if he were not the owner of the policy—it would not be subject to tax If he were the owner of the policy, then the $50 thousand exemption would apply "[16] If a partner takes out insurance to pay off his equity in the business and if the proceeds go into the partnership as of the moment of death, his interest has been enriched to that extent and would be subject to tax[17]

Gift Tax

The gift tax rates and specific exemptions in California (as distinguished from "exclusions") are the same as under the inheritance tax. In the federal law, gift tax rates are lower than estate tax rates[18] and a different scheme of exemptions applies.

Further details of the California taxes are provided in the Appendix.

[15] Barry, *op cit*

[17] *Ibid*
[18] The disparity between federal estate and gift tax rates may be criticized as being in violation of tax neutrality, but see Robert N Miller, "The Federal Gift Tax Rate Revision," *American Bar Association Journal*, April 1965, vol 51, pp 333–336 For a useful summary of federal estate and gift tax provisions see Alfred D Youngwood and John W Galanis, "Estate and Gift Taxation in the United States of America," pp 83–104 of G S A Wheatcroft (ed) *Estate and Gift Taxation A Comparative Study* (London Sweet and Maxwell, 1965)

III. INCIDENCE AND EFFECTS OF DEATH TAXES*

Inheritance and estate taxes have the peculiarity that they are not paid by the person who earns the income or accumulates the wealth out of which the tax is paid This fact requires a different approach to the question of incidence and effects from that employed in the discussion of other taxes.

There is an interesting difference of opinion on the shiftability of inheritance and estate taxes in the traditional literature on the subject. Two well-known authorities may be cited as a basis for discussion. Seligman says, "A tax on inheritance or bequests cannot be shifted, for evidently there is *no* one to whom it could be transferred The ulterior effects of which some writers speak, such as the influence of inheritance taxes on the accumulation of capital, do not really illustrate the process of shifting. *They are, moreover, of such doubtful validity that they may be neglected* "[1] Brown claims that the amount of capital might decrease because of lessened motive for accumulation and that, "so far as such a tax did operate to decrease the volume of saving and raise interest rates, its *burden* would be upon laborers or landowners or both and not upon owners or inheritors of capital."[2]

* Derived, with revision, from Harold M Somers, *Public Finance and National Income*, pp 291–295 (Philadelphia Blakiston Company, 1949) and "Estate Taxes and Business Mergers", *Journal of Finance*, May 1958.

[1] E. R. A. Seligman, *Shifting and Incidence of Taxation*, p 371 (New York: Columbia University Press, 1921). [Italics added]

[2] H. G Brown, *Economics of Taxation*, p. 209. (New York: Henry Holt and Co., 1924). [Italics added]

In the narrowest sense any impact on the accumulation of capital does not illustrate the process of shifting. Whether an analysis of such impact is of "doubtful validity," however, will be considered below. The fact that interest rates may rise does not remove the *burden* from the inheritors of capital in any substantial degree The inheritors give up a capital sum; they may regain some of their loss through higher interest rates, but any such effect would benefit the inheritors to only a small extent relative to the capital loss All interest receivers share part of the gain resulting from the capital loss borne by the inheritors alone. When it is considered that the extent of any rise in interest rates would depend on prevailing credit conditions and would generally be small, it seems reasonable to conclude that any shifting of the tax by the inheritors through higher interest rates would be negligible.

The economic effects of inheritance and estate taxes are peculiar in that in most cases, at any rate, the inheritance is in the nature of a windfall, hence we cannot attribute to the tax any insidious effect on economic motives of the recipient Nevertheless, effects may result from two considerations. (1) the tax reduced the amount received by the inheritor and (2) the anticipation of the necessity of paying the tax may have influenced the decedent in various ways.[3]

An ingenious device for reducing some of the arbitrary effects of inheritance and estate taxes has been proposed by Dr William Vickrey. Under this plan the tax would be cumulative and would be graduated according to the difference in age between donor and recipient.[4] Another interesting suggestion is that of Eugenio Rignano who proposed that that part of an estate that had in turn been inherited by the legator would be taxed more heavily than that part which had been built up by the legator himself.[5] Finally, there is the plausible suggestion of Professor W. J. Shultz that there be a "vanishing" exemption. Under this plan a large estate would have a smaller absolute exemption than a small estate [6] These proposals could readily be adapted to California's inheritance tax scheme.

It is reasonable to assume that some of the money inherited will be used for consumption purposes and some will be saved. The supply of "capital" is therefore diminished by the tax insofar as it absorbs savings that might have been invested The basic study of these effects was undertaken in Great Britain in 1927. There the Colwyn Committee found considerable disagreement but expressed the opinion that agricultural landowners and private businesses experienced inconvenience and hardships, and that in some cases considerable damage was done Public companies, moreover, were affected insofar as the supply of

[3] The area of estate planning (including investment decisions made with a view toward death tax consequences) appears to be a major exception to the generalization that tax considerations do not dominate the activities of high-income individuals See James N Morgan, Robin Barlow and Harvey E Brazer, "A Survey of Investment Management and Working Behavior Among High-Income Individuals" Paper presented at seventy-seventh annual meeting of the American Economic Association, Chicago, Illinois, December 1964 (To appear in *American Economic Review*, May 1965)

[4] William Vickrey, *Agenda for Progressive Taxation*, Chapters 8 and 9 (New York: Ronald Press, 1947)

[5] See Eugenio Rignano, *The Social Significance of the Inheritance Tax*, p 115 (New York Alfred A Knopf, 1924) Tax concessions for successive estates in the California inheritance tax law and the federal estate tax law tend to act slightly in the opposite direction

[6] See William J Shultz, "Death Tax Exemptions," Chapter 9 in *Tax Exemptions* (New York: Tax Policy League, 1939).

capital from the public was decreased.[7] The Colwyn Committee also says of both inheritance and income taxes that "both forms of taxation alike prevent a certain amount of new capital from coming into being, the ultimate effect depending very largely on the direction of government expenditure".[8] Some years ago Colm and Lehmann estimated the reduction in savings in the United States resulting from the 1936 Revenue Act rates on personal estate and gift taxes:[9]

$130–$170 million—compared with 1932 rates
300– 330 million—compared with 1928 rates
350– 390 million—compared with no tax

These are substantial magnitudes for that time

The federal estate tax and California's inheritance tax undoubtedly have an unfavorable effect on the availability of capital for investment purposes. The government (federal or state) could, of course, use the funds to augment the supply of savings Examples would be veterans' and housing loans of various sorts under either federal or state auspices.

The deterrent to capital formation is not necessarily of the same magnitude as the reduction in "savings" in any case The availability of credit from the banking system and other sources may be ample[10] The possible effect which the anticipation of the tax may have on the accumulation of capital should also be taken into account It is conceivable that a person would be so spiteful of the state or federal government as to reduce the amount of wealth he will pass on to others (either while he is alive, i e through gifts, or after his death) but it is also conceivable that consideration for his heirs will make him more eager than ever to increase the size of his estate We have no reason to assume any net effect in either direction.

The direct impact of inheritance and estate taxation on business operations is deferred to Part VI, below, where it is discussed in the context of the taxation of capital gains at death

IV. INHERITANCE TAX PROVISIONS IN THE VARIOUS STATES

The state inheritance tax laws vary widely in their major provisions. Some of the most important of these provisions are summarized in the following tables for purposes of comparison

Application of the Tax

Table 2 illustrates some of the important provisions regarding application of the inheritance tax in the various jurisdictions

California is one of 25 jurisdictions out of the 52 considered that give a full exemption to nonresident estates With the exception of Pennsylvania, where no exemption is allowed, the other jurisdictions apportion the exemption Legacies to nonresident charities are taxable in California, with certain exceptions, which is the case in thirty other jurisdictions as well California's taxation of assets transferred under power of appointment is followed in 48 of the other jurisdictions Thirty-two jurisdictions, including California, make allowance for property recently taxed Tax on remainder interests can be deferred in California as it can in twenty-seven other jurisdictions

Deductibility of the Federal Estate Tax and Inheritance Taxes Paid to Other Jurisdictions

In California there is, in effect, a tax on a tax because federal estate tax is not deductible and neither are inheritance taxes paid to other

TABLE 2

APPLICATION OF THE INHERITANCE TAX IN VARIOUS JURISDICTIONS

QUERIES	*Is exemption given nonresident estates in full or apportioned?	Are legacies to nonresident charities taxable?	Are assets transferred under power of appointment taxable?	Is allowance made for property recently taxed?	Can tax on remainder interests be deferred?

states, with the exception that taxes paid other states on the transfer of stock are deductible in computing the value of such stocks. Twenty-one other states also do not permit the deduction of the federal estate tax. See Table 3.

Discount and Interest Provisions

To encourage early payment of inheritance taxes, many of the states have discount provisions in their laws The amount of the discount and the time period after death that the discount applies vary widely from one state to another. California and two other states provide for a 5 percent discount within six months of death. Discounts of varying amounts with periods of from 3 to 18 months are given by 10 other

TABLE 3

DEDUCTIBILITY OF THE FEDERAL ESTATE TAX AND INHERITANCE TAXES PAID TO OTHER JURISDICTIONS

State	Federal Estate Tax	Inheritance Taxes Paid Other States
Alabama	No[1]	No[1]
Alaska	Deductible	Yes
Arizona	Not deductible	No[2]
Arkansas	No[1]	No[1]
California	Not deductible	No[2]
Colorado	Not deductible	No[2]
Connecticut	Not deductible	No[2]
Delaware	Not deductible	No[2]
District of Columbia	Deductible (apportioned)	No[2]
Florida	No[1]	No[1]
Georgia	No[1]	No[1]
Hawaii	Deductible	No[2]
Idaho	Deductible	Yes
Illinois	Deductible	No[2]
Indiana	Not deductible	Yes, as to intangible personal property
Iowa	Deductible	No[2]
Kansas	Deductible	No[2]
Kentucky	Deductible (apportioned)	No[2]
Louisiana	Not deductible	No[2]
Maine	Deductible	No[2]
Maryland	Deductible	Yes
Massachusetts	Deductible	Yes
Michigan	Not deductible	No[2]
Minnesota	Deductible	Yes
Mississippi	No[1]	No[1]
Missouri	Deductible	Yes
Montana	Deductible	No[2]
Nebraska	Deductible	No[2]
Nevada	No inheritance tax law	No inheritance tax law
New Hampshire	Deductible	Yes, except in case of tax on a specific bequest of property in another state[3]
New Jersey	Not deductible	Yes, to the extent that they are paid on property taxable in New Jersey
New Mexico	Not deductible	No[2]
New York	Not deductible	No[2]
North Carolina	Not deductible	Yes
North Dakota	Deductible	Yes, as to intangible personal property
Ohio	Deductible	Yes Credit allowed for taxes paid to other states
Oklahoma	Not deductible	No[2]

TABLE 3—Continued

DEDUCTIBILITY OF THE FEDERAL ESTATE TAX AND INHERITANCE TAXES PAID TO OTHER JURISDICTIONS—Continued

State	Federal Estate Tax	Inheritance Taxes Paid Other States
Oregon	Not deductible	No[2]
Pennsylvania	Not deductible	Yes
Puerto Rico	Not deductible, but credit allowed	No[3], but credit allowed
Rhode Island	Not deductible	Yes
South Carolina	Not deductible	Yes, on death taxes on charitable transfers
South Dakota	Not deductible	No[2]
Tennessee	Not deductible	Yes, as to intangible personal property.
Texas	Not deductible	No[2]
Utah	Not deductible	No[2]
Vermont	Deductible	Yes, if made a charge on the residuary estate.
Virginia	Deductible	No[2]
Washington	Not deductible	No[2]
West Virginia	Deductible	No[2]
Wisconsin	Deductible	No[2]
Wyoming	Deductible	No[2]

[1] These states levy estate taxes based on the credit allowed against the federal estate tax toward state death taxes, so the question of deducting the federal estate tax does not arise Where a portion of the decedent's property is in another state, the tax levied is the proportionate amount of the federal credit based upon the ratio of the property within the state to the entire estate

[2] Taxes paid other states on the transfer of stock are deductible in computing the value of such stocks. *Frick v. Pennsylvania*, (1925) 268 U S 473

[3] Allows only a credit against local taxes on *same* transfer

SOURCE *Inheritance, Estate and Gift Tax Reporter*, State Vol 4, Commerce Clearing House, Inc Chicago 1964

NOTE Reproduced from INHERITANCE TAX REPORTS, published by and copyright 1962, Commerce Clearing House, Inc , Chicago, Illinois

states. Some states, of which Montana is representative, have an interesting method of inducing early payment. In Montana the estate is granted a 5 percent discount for 18 months after death. After that time a 10 percent annual interest charge is made. The estate is never taxed at "par." Thirty-seven states provide no discount for early payment. See Table 4.

Interest provisions vary widely. In some states, interest charges begin as early as six months after death. California, in charging interest after 24 months, together with Alaska and Vermont, has the longest grace period of any of the jurisdictions.

Gifts Made in Contemplation of Death

If a transfer of property is made *inter vivos*, but made in contemplation of death and in lieu of disposition by will or descent, then this transfer of property is taxable unless it is a bona fide sale for adequate consideration in money or money's worth. Many of the states have statutes defining the term "contemplation of death" as being the state of mind of a person executing his will For the most part these statutes state that if the transfer is made within a certain period prior to the

TABLE 4

DISCOUNT AND INTEREST PROVISIONS IN STATE INHERITANCE TAX LAWS

State	Discount	Interest
Ala	None	If time of payment extended, 6% per annum charged from 15 months after death to time of payment Penalty of 1% per month after 6 months notice or 15 months after death if enforcement by levy and sale is necessary No interest or penalty shall accrue for any period prior to final assessment
Alaska	None	7% from death if tax is not paid within 2 years of death [1]
Ariz.	None	6% annually from due date, 15 months after death, and 4% annually during period of extension, if granted.
Ark.	None	6% per annum from extended date, where an extension, not to exceed 18 months, has been granted Additional tax found to be due more than 18 months after decedent's death is subject to interest at 10% per annum if not paid within 30 days after notice and demand
Cal	5% within 6 months of death	10% annually from date of death if not paid within 2 years of death, if delay is excused, 7% from expiration of 2 years (as to estates of decedents dying prior to September 22, 1951), 6% annually from date of delinquency [2 years after death] (as to estates of decedents dying on or after September 22, 1951)
Colo.	5% within 6 months of death	10% annually from date of death, if not paid within 1 year of death, unless delay is unavoidable, in which case interest may be reduced or waived In case of installment payments, 7% until expiration of time limited for payment and 10% thereafter
Conn.	None	9% annually from 14 months after death If extension is granted, rate is 4% until expiration of extension In case of estate tax, extension may be with or without interest at 9%
Del.	None	4% from 15 months after death Where there is litigation interest begins 1 month after adjudication
D C.	None	½ of 1% a month from 18 months after date of death
Fla	None	6% per annum from 15 months after death
Ga.	None	1% a month if not paid within 6 months after notice of assessment
Hawaii	None	8% per annum from 18 months after death, unless delay is unavoidable, in which case 5% is charged
Idaho	5% within 6 months of death	10% per annum from 1 year after date of death, unless delay is unavoidable, when 7% is charged
Ill.	None	7% from date of death if not paid within 18 months after date of death, 10% if not paid within 20 months of death
Ind	5% within 1 year of death	10% per annum after 18 months from date of death [1]
Iowa	None	8% annually after 18 months from date of death, 6% if extension of time for payment is granted Extension may not be more than 3 years after date of death
Kan	None	6% annually after time of distribution, after 18 months from date of death or after determination of beneficiaries' shares, where shares cannot be determined within 18 months
Ky.	5% within 9 months of death	10% annually from date of death if not paid within 18 months of death [1]
La	None	1% a month after 6 months from date of death and 2% a month after 12 months from date of death [2]
Me	None	6% annually after 15 months from date of death unless secured by cash deposit
Md.	None	6% annually from 15 months and 30 days after issuance of letters of administration
Mass	None	6% annually after 15 months from date of death of the decedent, If at least ⅘ths of tax is paid on or before due date, no interest is chargeable on balance until 30 days after notice for taxes is sent. 4% interest rate between election and final determination where there is a domiciliary dispute.

TABLE 4—Continued

DISCOUNT AND INTEREST PROVISIONS IN STATE INHERITANCE TAX LAWS

State	Discount	Interest
Mich	5% within 12 months of death	8% annually from date of death, if not paid within 18 months of death [1] 5% on delayed payments where bond is furnished
Minn.	None	6% annually after 18 months from date of death
Miss	None	6% annually after 15 months from date of death
Mo	None	6% from date of death for 1 year and 1% per month thereafter. Interest remitted if tax paid within 9 months of date of death [1]
Mont	5% within 18 months of death	10% annually if not paid within 18 months after date of death unless bond is given for deferred payment, in which case the rate is 6% per annum [1]
Neb.	None	7% annually from date of death if not paid within 16 months of death 6% annually from 16 months after death in case of estate tax.
Nev		No inheritance tax law
N H	None	10% annually after 15 months from date of death
N J	None	10% annually after 8 months from date of death [1]
N. Mex	None	10% annually after 12 months from qualification of executor.
N. Y	None	If payment is not made within 6 months of the date of the decedent's death, interest will be assessed against the estate The interest rate begins at ½% on the unpaid amount if paid in the seventh month and increases ½% for each month until the fifteenth If not paid within fifteen months, a rate of 10% per annum till the date of payment will be charged If extension is granted the rate is 6% from expiration of 6-month period until expiration of extension period, but if payment is not made within extension period 10% is charged from due date until paid In certain cases, where time for payment has not been extended, surrogate may reduce the rate to 6% Interest on additional estate tax is chargeable from date of final determination of federal estate tax, although no interest is chargeable if the additional tax is paid within 60 days of date of determination
N Car	None	6% per annum from 15 months after date of death If not paid within 2 years of date of death, an added 5% is incurred [2] ½% per month from date due until date paid (exclusive of penalties) as to additional assessments
N Dak	None	6% per annum after 15 months from date of death
Ohio	1% a month for each full month prior to expiration of year after "succession"	8% annually after 1 year from date of "succession," unless delay is unavoidable in which case no interest is charged until the cause of delay is removed
Okla	None	1% per month from 15 months after date of death, unless determination is impossible, in which case it is ½ of 1% per month
Ore.	5% within 8 months of death	8% annually from 8 months after date of death [1] If bond is given for deferred payment of tax, rate is 6% per annum from 8 months after date of death
Penn	5% within 3 months of death	6% annually after 1 year from date the tax becomes delinquent in case of inheritance tax and after 18 months from date of death in case of estate tax, unless delay is unavoidable, when interest is at productive rate if such rate is lower than 6%
P R.	None	6% per annum after 180 days from date of notice to interested parties.
R I	None	8% from 9 months after appointment of first executor or administrator [1]
S Car.	None	6% annually after 15 months from date of death
S Dak.	None	6% from date of death if not paid within 1 year after date of death.[2]
Tenn.	None	6% annually from 15 months after date of death and penalty of ½ of 1% per month unless delay is unavoidable when penalty may be suspended.

TABLE 4—Continued

DISCOUNT AND INTEREST PROVISIONS IN STATE INHERITANCE TAX LAWS

State	Discount	Interest
Tex.	None	2% per month from date of notice if not paid within 3 months after date of notice of assessment If not paid within 9 months after date of notice, lien is foreclosed
Utah	None	8% annually from date of death, or in case of extension from date of expiration of extension if not paid within 1 year of date of death, unless delay is unavoidable when the interest may be reduced or waived
Vt.	None	6% annually after 2 years from date of death
Va.	None	1% a month from 1 year after date of death Where tax is not determinable until more than 11 months after date of death interest begins 30 days after determination
Wash.	None	6% annually from date of death if tax is not paid within 15 months from date of death [2] Interest may not be tolled for more than 3 years and minimum tax must be paid within 15 month period. Where bond is given for deferred payment of tax, rate is 8% from 60 days after possession.
W. Va	3% within 13 months of death	10% annually from 14 months after death and in addition thereto, a 5% penalty, unless delay is unavoidable, when penalty and interest may be suspended
Wis.	5% within 1 year of death	10% annually from date of death if tax is not paid within 18 months.[1] If bond is given for deferred payment of tax 6% from date of death to date of payment.
Wyo.	5% within 16 months of death	8% annually after 16 months from date of death [2]

[1] Unless unavoidable delay, when only 6% is charged
[2] Unless delay is unavoidable, when no interest is charged

transferor's death, the transfer is deemed to have been "in contemplation of death" and is includible in decedent's gross estate. This presumptive period is listed in Table 5 for the various states. The period is three years under California law without presumption; and no transfer made more than three years prior to death is taxable as having been made in contemplation of death.

TABLE 5

GIFTS MADE IN CONTEMPLATION OF DEATH—PRESUMPTIVE PERIOD IN VARIOUS STATES

State	Presumptive Period
Alabama	3 years, but no transfer made more than 3 years prior to death is taxable
Alaska	No period specified
Arizona	3 years, but no transfer made more than 3 years prior to death is taxable
Arkansas	3 years, but no transfer made more than 3 years prior to death is taxable
California	3 years if transfer is proved by the State to have been made in contemplation of death (there is no presumption), but no transfer made more than 3 years prior to death is taxable
Colorado	2 years
Connecticut	3 years, but no transfer made more than 3 years prior to death is taxable
Delaware	6 months
District of Columbia	2 years
Florida	3 years, but no transfer made more than 3 years prior to death is taxable
Georgia	3 years, but no transfer made more than 3 years prior to death is taxable
Hawaii	No period specified
Idaho	No period specified
Illinois	2 years
Indiana	2 years
Iowa	2 years
Kansas	1 year
Kentucky	3 years
Louisiana	1 year
Maine	6 months, but no transfer made more than 2 years prior to death is taxable
Maryland	2 years
Massachusetts	1 year, but no transfer made more than 2 years prior to death is taxable
Michigan	2 years
Minnesota	3 years, but no transfer made more than 3 years prior to death is taxable
Mississippi	2 years
Missouri	2 years
Montana	3 years, but no transfer made more than 3 years prior to death is taxable
Nebraska	3 years, but no transfer made more than 3 years prior to death is taxable
Nevada	No inheritance tax
New Hampshire	2 years
New Jersey	3 years, but no transfer made more than 3 years prior to death is taxable
New Mexico	1 year, and an additional tax is imposed on such transfer according to the relationship of the parties
New York	3 years, but no transfer made more than 3 years prior to death is taxable
North Carolina	3 years, if the transfer exceeds 3% of the estate
North Dakota	2 years
Ohio	2 years
Oklahoma	2 years
Oregon	3 years, but no transfer made more than 3 years prior to death is taxable if all gift taxes assessed were paid or if no gift taxes were due
Pennsylvania	2 years
Puerto Rico	2 years, where the transferor is over 50 years of age
Rhode Island	2 years
South Carolina	3 years
South Dakota	No period specified
Tennessee	2 years
Texas	2 years
Utah	3 years
Vermont	No provision for taxing absolute inter vivos transfers
Virginia	3 years, but no gift made more than 3 years prior to death is taxable
Washington	2 years
West Virginia	3 years
Wisconsin	2 years
Wyoming	6 months, but no transfer made more than 2 years prior to death is taxable

V. REVISION: CHANGES IN THE DISCOUNT PERIOD AND THE GRACE PERIOD OF THE INHERITANCE TAX LAW

Two aspects of California's inheritance tax law that require attention are the discount period and the grace period. One possibility is to shorten the grace period from the present 24 months to 15 months, thus speeding up a certain percentage of the inheritance tax payments Another is to extend the time period for the 5 percent discount from the present six months to eight months, which would postpone some tax collections

The Controller's office has estimated the 1965–66 direct revenue effect of these proposals as follows:

	1965–66
Speedup of payments	$8,600,000
Payments postponed	−8,400,000
Additional discount	−200,000
Net change	0

The Controller estimates that the state will lose approximately $300,000 per year thereafter because more taxpayers will be in a position to take advantage of the discount. The Controller also finds that any interest value of the earlier tax receipts will be offset almost exactly by the interest loss on the delayed tax collections resulting from the extension of the discount period.

Advantages of the Changes

Amendment of Section 14103 of the Revenue and Taxation Code to shorten the grace period from 24 months to 15 months will speed up tax collections

Amendment of Section 14161 of the Revenue and Taxation Code would extend the time period of the discount from the present six months to eight months keeping the discount at 5 percent. This change would have the advantage of permitting the personal representative to make a closer estimate of the actual tax because by the end of eight months from the date of death the six months' notice to creditors would normally have expired and all claims would be in. Another advantage would be to give the personal representative an additional two months to make his decisions.

It has been stated that this time extension would give the estates the advantage of long term capital gains on their investments. It would encourage prompt investment of the funds by the executor in order to take advantage of the long term capital gains feature This would aid the more liquid estates.

Disadvantages of the Changes

Charles J. Barry, chief inheritance tax attorney, lists the following disadvantages of the discount provision: [1]

1. The discount presents an administrative problem. Accounts must be set up when the payment initially is received When the inheritance tax appraiser's report is filed the entry must be checked Since the prepayment is almost invariably made before the report is filed, it is nearly always over or under the amount of the tax, necessitating an adjusting ledger entry to correct the allowable discount.

2. There are a great many overpayments since all prepayments are based on an estimate of the tax In his opinion, 95 percent of the refunds paid in any year are the direct result of personal representatives and survivors endeavoring to take advantage of the discount provision before the tax liability is known In the fiscal year 1962–63 his office processed 1,335 refunds.

3. The refunds require a substantial portion of the tax collected each year to be paid back to personal representatives and survivors In the fiscal year 1962–63, the total amount paid out of inheritance tax revenue as refunds was $2,265,926 75.

4. The discount causes substantial tax loss In the fiscal year 1962–63 the total discounts amounted to $2,899,582 17 compared with total tax collections of approximately $89,000,000. If the discount period is extended to eight months, there would be an additional tax loss of approximately $300,000 each year due to the two months' additional delay

5. The discount is discriminatory in that it places a premium on liquidity in an estate. It favors the estate which consists largely of ready cash The discount discriminates against the estate which was almost wholly invested in California real estate or a closely held business interest.

[1] Letter by Charles J Barry, chief inheritance tax attorney, Office of the Controller, to the Honorable Nicholas C Petris, Chairman, Assembly Commitee on Revenue and Taxation, May 15, 1964

6. The federal estate tax law does not allow a discount.
7. It may be argued that the presence of a discount provision in the inheritance tax law constitutes a threat to other California taxes. Since the discount in the inheritance tax law encourages early payment of the tax, a discount offered in other California taxes might encourage prepayment of such taxes as the personal income tax, insurance gross premiums tax, and bank and corporations franchise tax

It should also be noted that one of the advantages of an extension of the discount period is held to be that it would permit the personal representative two additional months in which he would be able to make a closer estimate of the actual tax In most cases and in all large estates there would continue to be no more than an estimate This results from the length of time involved in the probate process, the preparation of documents and affidavits for the appraiser, the computation of the tax and the audit of the report.

Granting eight months rather than six months for the discount period would result in a slowdown of payments At present, most payments are made at the end of the six-month period; under the proposed revision, a substantial portion of the payments would be made in the last week of the eighth month.

The length of time which elapses under existing law from date of death to date of approval of the appraisal report and to date of first tax payment is shown in Tables 6 and 7 and Figures 1 and 2.

Net Effects of the Changes

It would appear that the net result of both changes would ultimately be a loss in revenue to the state on the order of some $300,000 a year.

The proposal to shorten the grace period from 24 months to 15 months is extremely sound and long overdue The original grace period was 18 months and it was lengthened during the depression of the 1930's and never revised Fifteen months is the grace period extended by the federal government and appears to be about the modal grace period for the various states

The proposal to lengthen the discount period from six months to eight months would appear to have much less to recommend it. Consideration of this proposal calls for a consideration of the entire matter of a tax discount. The purpose of the tax discount is to accelerate tax payments to the state While it cannot be denied that the state receives some advantage in early rather than late tax payments in terms of the interest accruing on the funds, there is a question as to whether the game is worth the candle.

Under the eight-month discount period with a 5 percent discount, the state would lose revenue of about $3,000,000 on total tax collections of roughly $90,000,000. In return for this, the state would receive some 65 percent of the tax funds at the end of the eighth month with the rest coming in some time later If the grace period were amended to 15 months and the discount provision completely eliminated, a very large percentage of the tax payments would be made at the end of the 15th month. In rough terms, the state would be paying $3,000,000 interest to obtain, at the most, $58,000,000 seven months early under an eight-month discount and 15 months grace period provision. While

it is clear that this is far above the usual borrowing rate for the state, this is not the entire cost of the discount provision by any means. The making of early payments on the basis of tax estimates imposes a very large administrative burden. The additional recordkeeping and the large number of refunds involved probably imposes a much greater cost on the state than can be realized from the interest earned by the state on the moneys paid in overpayments.

The eight-month rather than six-month period may make it possible for some estates to realize capital gains on their funds before they pay their taxes but in order to do this on new investments the estate would have to be quite liquid The estate's representative would have to invest the earmarked tax funds within two months of the date of death

in order to obtain capital gains treatment on the liquidating transaction undertaken to make payment to the state.

The entire discount provision seems to be at variance with the economic objective of tax neutrality. The discount provision places a premium on liquidity of assets. It therefore imparts a distortion into the decision as to whether wealth should be held in a liquid or illiquid form The estate that consists chiefly of real estate, for instance, would not be in a good position to take advantage of the discount provision. For this reason the discount provision makes the possession of large liquid assets an important part of estate planning for large estates. This cannot but affect the allocation of resources between liquid and nonliquid asset holding.

A fifteen-month grace period, with no discount period, would have considerable advantages, in terms of more revenue to the state, the elimination of discriminatory treatment of liquid as against illiquid estates and the resulting greater tax neutrality. There might be a revenue loss in the particular year the revisions are instituted because delay in payment resulting from elimination of the discount might outweigh speed-up in payment resulting from reduction in grace period.

VI. REVISION: TAXATION OF CAPITAL GAINS AT DEATH *

A taxpayer can die to avoid the capital gains tax. This is true whether he dies under California law or under federal law, or both. Should he be allowed such an easy way out? "No" was the answer given to this question by the Administration in Washington in its proposals for tax revision in 1963 Congress had its own ideas, however, and decided to leave the law on this point unchanged in the Internal Revenue Act of 1964 The federal provisions and proposals are of particular concern in California because of the question of federal-state conformity

Federal Provisions and Proposals

A summary of the Administration's plan as presented by President Kennedy follows [1]

> Impose a tax at capital gains rates on all net gains accrued on capital assets at the time of transfer at death or by gift.
>
> Adoption of this proposal is an essential element of my program for the taxation of capital gains; certainly in its absence there would be no justification for any reduction of present capital gain rate schedules

* The federal portion of this part is derived from a chapter by the present writer in a forthcoming collection of essays in memory of C Ward Macy (P L Kleinsorge, ed) to be published by the University of Oregon Press The author is indebted to attorneys Donald C Lubick and Albert R Mugel for discussion of the federal issues They should not, however, be held responsible for the views expressed here

[1] See "President's 1963 Tax Message" (January 24, 1963) in *Hearings Before the Committee on Ways and Means*, (beginning February 6, 1963) Vol. 1 (revised) p 24.

A number of exceptions would limit the applicability of this proposal to fewer than 3 percent of those who die each year. These exceptions would provide special rules for the transfer of household and personal effects, assets transferred to a surviving wife or husband, and a certain minimum amount of property in every case. Appreciation on property subject to the charitable contribution deduction would continue to be exempt both on gift and at death.

For those who would have a substantial amount of appreciation taxed upon transfer at death, a special averaging provision should prevent the application of higher rates than would have applied upon disposition over a period of years. In addition, it should be clearly understood that the tax upon transfer at death would reduce the size of the taxable estate, and thereby reduce the estate tax. The present provisions for extended payment of estate taxes would apply to the new taxes upon appreciated property transferred at death and would be liberalized

My proposal, if enacted, would apply to gifts made after this date, but would be phased to apply fully to transfers at death only after three years. The Secretary of the Treasury will present a technical elaboration of this proposal and its relationship to the existing rules for the taxation of various kinds of assets transferred at death.

This recommendation is a reflection of a serious problem at both federal and state levels At the time of death, property takes on a basis equivalent to market value, and any appreciation in value that occurred in the hands of the decedent is forever forgotten as far as the capital gains tax is concerned. The property at its new value is subject to the federal estate tax and the state inheritance tax but in view of the many exemptions and deductions in both types of taxes, a particular capital gain may, in fact, escape all taxation. This has important economic implications

The close relation between current questions in the capital gains tax itself and the taxation of capital gains at death and by gift has been stated succinctly by Walter Heller.[2]

> . . . Instead of lowering the capital gains barrier at the front door marked 'market transactions', it may be just as effective—and more desirable on equity grounds—to close the back door marked 'tax-free transfers at death' and the side door marked, 'tax-deferring transfers by gift'

The prevailing situation is well summarized by Seltzer[3]:

> Most commonly, in both law and ordinary speech, a distinction is made between 'realized' and 'unrealized' capital gains or losses. An owner who does not sell or enter into an exchange legally equivalent to a sale is said not to 'realize' a capital gain or loss, however big the change in the market value of his holdings, however marketable

[2] Walter W Heller, "Investors' Decisions, Equity, and the Capital Gains Tax," *Federal Tax Policy for Economic Growth and Stability*, papers submitted by panelists appearing before the Subcommittee on Tax Policy, Joint Committee on the Economic Report, November 9, 1955, pp 381–394, at pp 381–382 (Washington: Government Printing Office, 1956).

[3] Lawrence H Seltzer, *The Nature and Tax Treatment of Capital Gains and Losses* (New York, National Bureau of Economic Research, Inc, 1951) p 4.

they are, and regardless how long he has owned them The change in market value, commonly referred to as an 'unrealized' capital gain or loss is not taken into account in computing taxable income. *Very substantial proportions of the increases in the value of lands and corporate securities are never 'realized' in the current legal sense because the law does not regard transfers of property at death as occasioning 'realization'* The difference between the cost of the property to a decedent and its value on the date of his death is not regarded as a capital gain or loss to either the decedent or his heirs. The latter put the property on their books at the value on the date of transfer (or other date chosen by the executor for the purpose of the estate tax) and measure their capital gains or losses on it from the value on that date [Emphasis supplied]

Tax advisers make a point of this method of avoiding the capital gains tax, as illustrated by the following [4]:

You can get capital gain on your share when you retire and receive it all within one year If company contributions are invested in company stock, appreciation on the stock is not taxed until you finally sell the stock *If you hold the stock until death, there may be complete avoidance of income tax* [Emphasis supplied]

Treatment of Capital Gains in California

Capital gains are not accorded any special treatment for tax purposes in California under the provisions of the Franchise Tax Law or the Bank and Corporation Income Tax Law Capital gains are afforded special tax treatment under the provisions of the Personal Income Tax Law [5] Here it is provided that net long-term capital gains are effectively taxable at 50 percent of the tax rate that would otherwise apply There is no ceiling rate in the California statute to correspond to the federal 25-percent ceiling While the California personal income tax code currently has seven different rates ranging from 1 percent to 7 percent in a progressive manner, the top 7-percent rate applies to all income of $15,000 or over for a single person and $30,000 or over for joint returns

In effect then, net long-term capital gains in California are presently taxed at a maximum of 3½ percent in most cases rather than the 7-percent rate which would apply if they were taxed as ordinary income. The California definition of what constitutes a capital gain follows very closely upon the federal statute In 1961 the Senate Fact Finding Committee on Revenue and Taxation issued a report entitled *Conformity of California Personal Income and Bank and Corporation Franchise Taxes with the Federal Internal Revenue Code* which noted several minor differences between the federal code and the California Personal Income Tax Law Conforming legislation was suggested in this report and much of it was adopted in 1961, particularly in the capital gains area.

[d] The deduction of federal income tax paid allowed in South Carolina is limited to $500
[e] The deduction of federal income tax paid allowed in Wisconsin is limited to 3 per cent of the net income of the taxpayer
SOURCE Emanuel Melichar, *State Individual Income Taxes*, p 52, University of Connecticut, Storrs Agricultural Experiment Station, (Storrs 1963)

As Table 8 shows, California is one of the 23 states affording special treatment to capital gains in its Personal Income Tax Law out of the 32 states that have personal income taxes

No capital gains tax is assessed on an asset that is held until death This provides some incentive (although only to the extent of a maximum 3½-percent rate in California under present law) to avoid selling the asset at a gain during the life of the owner It also provides a possible tax loophole due to the difference in the treatment of capital gains in the franchise tax and corporation tax on the one hand and the personal income tax on the other A closely held corporation might have a capital gain under either the franchise tax or the corporation tax, whichever applied If, however, the principals of the corporation were able to manipulate the asset so that it became their own property rather than corporate property, they would be able to avoid the capital gains tax entirely on the asset merely by the expedient of holding until the time of death or gift (There is no capital gains tax imposed at time of gift but the donee takes the donor's base for future capital gains tax purposes.)

Background of the Federal Exemption of Capital Gains at Death

What stands out sharply from the legislative and court history [6] of the early federal income tax laws is that no deliberate decision to exempt unrealized gains was necessary; rather, the courts early interpreted the general income tax provisions (under which capital gains are taxed) to cover realized income only This showed up first in areas outside capital gains and was firmly entrenched before any special treatment was accorded long-term gains In other words, it would have required special and very explicit enactment to have imposed a tax (under the income tax) on unrealized income, including gains on property passing by gift or death. Whether such a tax would have been constitutional is another matter, which is discussed in a later section of this study.

The 16th Amendment refers to the imposition of a tax on "income from whatever source derived" The early decisions established that the "income" had to be "realized;" and "realized" meant "sale or exchange" [7] The concepts of "realization" and "sale or exchange" have been stretched considerably by both court interpretation and legislative action They have not, however, been stretched to the point of declaring that a "realization" or a "sale or exchange" occurs when a person dies Hence, the capital gains tax has not been imposed on appreciated property left by a decedent

A related concept is that of "severability" of the thing taxed—the income, including capital gain—from the corpus That concept, too, has gradually been eroded so that physical severability is not required [8] Nevertheless, under present thinking, the transfer of property at death does not constitute realization or severance of any appreciation in the property so as to subject it to the income tax It must constantly be remembered that the federal capital gains tax is simply a part of the income tax. If the constitutional requirements of "income" are not met, neither are those of capital gains Once the constitutional requirements are met, we must look to the Legislature to determine whether the item is to be covered by the income tax at all, and to legislative, administrative and judicial definitions of "capital assets" to determine whether the special treatment accorded the capital gains form of income should apply.

Mertens emphasizes the importance of looking to the substance of a transaction to determine whether a sale has occurred [9].

> Whether or not a sale or exchange took place is to be determined from a consideration of the substance of the transaction and

[b] Estate of Clarence B Lehr, 18 TC 373 (1952) Cf. Fidelity-Philadelphia Trust Co, 23 TC 627 (1954)

The respective treatments accorded the taxation of transfers by gift and at death are closely intertwined. The question of "realization" arises in both cases and in both cases there is no capital gains tax at time of transfer. A divergence lies in the basis of the property in the hands of the transferee: gifts retain the original donor's basis or market value at time of gift, whichever is lower; death transfers acquire the fair market value at death (or optional date, in the federal law).

The basis acquired by property left in an estate is initially a matter of the estate tax rather than income tax. For purposes of the estate tax the property is given a basis equal to its full market value at the date of death (or optional valuation date) This is the basis of the property in the hands of the estate and generally in the hands of any beneficiary of the estate It can readily be seen that for purposes of imposing the estate tax a single (or one alternative) date of valuation is more practical than an attempt to trace back a variety of different valuations of the respective pieces of property, to say nothing of the possible evasions and inequities which might result from such practice.

It is important to note for our later discussion of the constitutional issue that in *Eisner* v *Macomber* (1920)[10] the Court gave as reasons for unconstitutionality of a tax on unrealized gains: (1) necessity of converting capital to pay the tax; and (2) mere increase in value is not income.

Arguments For and Against Taxing Capital Gains at Death

We may now turn to the pros and cons of the proposal that capital gains be taxed at death. In technical terms, there would be constructive realization at death, subjecting the appreciation in value to the capital gains tax. There has been legislative debate on this issue from time to time: for taxing the increment at time of death at the one extreme and for confining the basis to the valuation used for estate tax purposes at the other.[11]

A. Arguments For Taxing Capital Gains at Death

There are three main arguments in favor of taxing capital gains at death: (1) *welfare*—the present arrangement encourages holding onto a piece of appreciated property until death, thereby interfering with the mobility of capital and the optimum allocation of economic resources; (2) *equity*—the present arrangement is grossly inequitable in that it permits families to become richer and richer without paying the capital gains tax; and (3) *revenue*—the present arrangement results in a substantial loss in tax revenue.

(1) Welfare Argument for Taxation of Capital Gains at Death

Heller reaches the conclusion, "Constructive realization at gift or death would serve both equity and economic objectives." [12] He supports his conclusion as follows [13]:

> The inviting option of tax-free transfer of appreciated assets by gift or death may well have more to do with the undesirable pinning down of investment funds than any other single aspect of the gains tax. If the investor knew that there would surely be a day of reckoning on his unrealized gains, he might press the search for improved investment opportunities more actively than he does today. This move would tend to convert passive into active investors rather than investors into speculators, thus not merely promoting financial activity but improving the allocation of resources.

Tax-free transfer at death means that an individual can forever avoid the capital gains tax. Thus he is tempted to stay with his appreciated investment rather than switch and incur the capital gains tax. This supports the argument for a "rollover" provision during life (discussed later) thereby making investment switches free of the tax penalty.

A large volume of transactions gives the stock market "liquidity" which, in turn, is a favorable element in the inducement to invest.[14] Steger has argued that increased mobility of capital is not an unmixed blessing: a certain willingness to "stay put" is desirable.[15] It is difficult to accept the view, however, that barriers should deliberately be placed in the way of sale so as to encourage stability of investments. If the tax-induced rigidity is known in advance, it may act as a deterrent to investment.

Reduction of the "lock-in" effect and increased "liquidity" in the market for capital assets would tend to improve the allocation of economic resources and raise the level of economic welfare

(2) Equity Argument for Taxation of Capital Gains at Death

Randolph Paul has stated the argument in favor of taxation of capital gains at death as follows: [16]

> If a stockholder sells his stock, the undistributed profits are at least indirectly subject to capital gains taxation. But if the stockholder does not sell his stock, a potential capital gain escapes taxation. Although in many instances this gain will ultimately be subjected to *estate* tax, our tax structure should contain a provision to stop this serious *income* tax leak. I believe the most feasible technique would be a tax upon the gain—with perhaps a corresponding treatment of any loss—at the time of any gift of the stock, even to a charity, and at the time of death. A provision of this kind would capture the tax in the end, although somewhat tardily if no gift were made. [Emphasis in original]

[16] Randolph Paul, *Taxation for Prosperity* (New York: Bobbs-Merrill Company, 1947) p. 376.

This suggests that the present exemption is inequitable as between those who sell and those who do not sell at a capital gain before death.

(3) Revenue to Be Derived From Taxation of Capital Gains at Death

It is evident that federal tax revenue would increase as a result of the taxation of capital gains at death. The Administration's proposal, which included many deductions, exemptions and allowances, would have increased revenue by $300 million at the low long-term rates included in the tax message [17] Senator Douglas has stated that the prevailing exemption allows $12 to $13 billion of gains to escape taxation.[18]

The revenue gain in California is of a rather low order of magnitude (perhaps one million dollars in 1965–66 and $5 million in 1966–67) because of the relatively low level of income tax and capital gains tax rates in California The maximum rate on capital gains is 3½ percent whereas the maximum inheritance tax rates range from 10 percent to 24 percent.[19] If the portion of the asset that is made subject to the capital gains tax were to be exempted from the inheritance tax completely there might be a serious revenue loss. The most that could be done would be to allow the capital gains tax due at death to be treated as a liability of the estate (as in the federal proposal) thereby reducing the amount that is subject to the inheritance tax to the extent of the capital gains tax due.

B. *Arguments Against Taxing Capital Gains at Death*

The current discussion of taxing capital gains at death has been mainly at the federal level and telling arguments have been raised against the proposal at that level These arguments do *not* apply in California In order to make this clear, we will review the federal case and indicate the differences in the California situation. The federal prospects are important also in estimating the likelihood of federal-state conformity in this area.

The main arguments against taxing capital gains at death in the federal law are (1) *constitutionality*—such taxation would be beyond the power of Congress; (2) *hardship*—a hardship would result in that there is actually no "realization" from which the tax could be paid; (3) *structure*—business structure and practices would be changed.

(1) Constitutionality of the Taxation of Capital Gains at Death

In *Eisner* v. *Macomber* [20] the U S Supreme Court refused to permit the taxation of stock dividends It found that the prohibition against direct taxation in Article I was not voided by the 16th Amendment in

[17] Hearings (1963) *op cit*, pp 67, 708. Harold Groves has claimed that probably four-fifths of capital gains now "accrue outside the tax system," "Taxation of Capital Gains," *Tax Revision Compendium*, vol 2, November 16, 1959, pp 1193–1201 at p 1194 (Compendium of Papers on Broadening the Tax Base, Submitted to the Committee on Ways and Means) Referring to the proposal to tax gains at death, Peckman has said, "This reform was intended to close a loophole that permits many billions of dollars of capital gains to go untaxed" Joseph A Peckman, "Individual Income Tax Provisions of the Revenue Act of 1964," paper presented at the twenty-third annual meeting of the American Finance Association, Chicago, Illinois, December 1964 (to be published in *Journal of Finance*, May 1965) There would also be important consequences for the cyclical flexibility of the revenue For effects of the existing tax see Harley H Hinrichs, "Dynamic-Regressive Effects of the Treatment of Capital Gains on the American Tax System During 1957–1959," *Public Finance*, vol 19, no 1, 1964, pp 73–88.

[18] *Congressional Record*, January 1964, pp. 1040–1043 at p 1043

[19] See Table 1, above

[20] 252 U S 189, 40 S Ct 189 (1920), 212–215

this case The grounds were that the taxpayer had "not realized or received any income in the transaction " The Court was also concerned with the fact that "in the nature of things it [the stock dividend] requires conversion of capital in order to pay the tax." The Court emphatically said, " enrichment through increase in value of capital investment is not income in any proper meaning of the term."

These views of the Supreme Court raise serious doubts as to whether Congress can enact a tax on unrealized gains at death (under the income tax) even if it wants to Congress' entire power to tax income without state apportionment or population census derives from the 16th Amendment. Yet it is in interpreting that amendment that the Supreme Court decided that income must be realized in order to be taxable That being the case, we may ask, would "constructive realization" at death be constitutional?

Randolph Paul believes that a tax on capital gains at death would be upheld [21]

> Under present law ordinary income can be converted into capital gains by allowing profits to remain in corporations As a matter of fact, the tax can be wholly avoided by holding stock until death or to some degree, by making gifts of property which has appreciated in value While some doubts have been raised as to its constitutionality, I believe that the most promising remedy for avoidance of this type is to impose a tax upon gains accrued to the date of any gift of the stock or at the time of death I believe that such a tax would be upheld.

Stanley Surrey, too, has argued strongly in favor of the constitutionality of a tax on capital gains at death.[22] The General Counsel of the Treasury has also rendered an unequivocal opinion in favor of constitutionality.[23]

It is true that, in some respects, the Supreme Court has been liberal in its interpretation of the constitutional authorization to tax "income from whatever source derived " It is likely that some way could be found to include the taxation of the appreciation in property passing at death The transfer that occurs at death may possibly be considered a form of "exchange" which constitutes "realization" so as to have been "derived" in the constitutional sense The property may be regarded as being transferred to the distributee in "exchange" for the distributee's rights under the will or the interstate share The exchange that occurs may then be considered a "taxable exchange."

The tax law now contains a concept of "constructive receipt" of income which might possibly be applied to the taxation of unrealized gains Interest accruing in a bank account, or an uncashed check, are examples of constructive receipt The appreciated value is available to the estate and might thereby be regarded as being constructively received by it, hence taxable as income The General Counsel of the

[21] Randolph Paul, *Taxation for Prosperity,* (New York Bobbs-Merrill Company, 1947) p 275

[22] Quoted in Surrey and Warren, *Federal Income Taxation,* pp 1183–1184 (Brooklyn The Foundation Press Inc , 1953 ed), pp 1518–1519 (1960 ed) [Extract from Surrey, "The Supreme Court and the Federal Income Tax Some Implication of the Recent Decisions," 35 *Illinois Law Review* 779 (1941)]

[23] Contained in *Hearings* (1963) *op cit*, pp 596–602

Treasury feels that Congress can decide what is a "taxable event" and can tax the unrealized capital gain at death. He says.[24]

> To recapitulate, it is my opinion that *Eisner* v. *Macomber* has limited, if any, application and does not stand in the way of the present proposals; that the transfers of appreciated property by gift or by death present appropriate occasions to measure the increase in the value of the property and to tax the capital gain to the donor or decedent, and that such a tax would be constitutional The constitutionality of the tax can be supported by the conclusions that an appreciation in property may be taxed upon the occurrence of an appropriate taxable event, which event is for Congress to determine, and that the taxpayer has realized the appreciation in value by his exercise of control over it and by his accomplishment of his economic objective with respect to that income

One would have to be rash indeed to disagree with such eminent authorities One would have to be equally rash, however, to take it for granted that a favorable decision by the Supreme Court is a certainty.

It is difficult to read the history of the "realization" doctrine without serious doubts as to the constitutionality of the taxation of unrealized capital gains at death at the federal level. In particular, it must be recalled that in *Eisner* v *Macomber* the Supreme Court gave two reasons against the taxation of the unrealized gain (a stock dividend): (1) the necessity for converting capital in order to obtain the funds to pay the tax; and (2) the mere increase in value is not income Both points can be made with respect to the taxation of unrealized gains at death It is true that the first point can be made about many aspects of tax laws whose constitutionality is no longer in question. The second point has also been whittled away in several instances. Nevertheless, the two points were made, have not been overruled in principle and might be invoked in the specific case of taxing capital gains at death.[25]

For constitutional reasons it may be wise to drop the idea that the capital gains tax is part of the income tax If the tax were simply a property tax or a capital tax the problem of fitting into the judicially established concept of "income" would be avoided Article I of the Constitution requires that "direct taxes" be apportioned among the several states according to an enumeration. The 16th Amendment removes taxes on "income" from this restriction Thus all other "direct" taxes remain subject to the restriction The question is whether any tax imposed on or measured by an appreciation in value must be classified as "direct" within the meaning of the Constitution. Taxes which are not "direct" are not restricted by Article I nor affected by the 16th Amendment This raises the possibility of some kind of excise or use tax or even a special estate tax, the measure of which is the capital gains portion of the property value

None of these problems arises in connection with the taxation of capital gains in California There is no constitutional restriction on "direct taxes" except in the area of property tax exclusions and ex-

[24] Hearings (1963) *op cit*., p 602

[25] See Morton A Smith, "The Constitution Revisited· The Power of Congress to Levy a Tax," *American Bar Association Journal*, May 1960, Vol 46, pp 559–561.

emptions. The Legislature could undoubtedly impose a tax on the accretion in value of an asset at any time, including transfer at death. Article XIII, Section 1 of the California Constitution, which excepts certain property from taxation does not impose limitations on inheritance taxes (*Estate of Watkinson*, 191 Cal. 591) or income taxes (*Weber* v *Santa Barbara County*, 15 Cal 2d 82). There do not appear to be any pertinent constitutional prohibitions If an unexpected constitutional barrier does exist, the greater ease of amendment of the state constitution suggests that the barrier could be removed more readily than at the federal level.

(2) Hardships Involved in Taxing Capital Gains at Death

The imposition of a tax on capital gains inherent in property passing at death would impose a burden on the estate or the distributee in finding the money with which to pay the tax It may be necessary to sell the property and realize the gain in order to obtain the cash necessary to pay the tax. There would thus be a forced sale with all its unfavorable consequences. Taxation of capital gains at death would actually impose a burden on the distributee, not the decedent

If capital gains are to be taxed at death there remains the question whether the entire appreciated value should be taxed in the year of death. In view of the progressive rates, this may appear to be an undue burden. Even for the ordinary capital gains tax there is a proposal for spreading the tax over the period of appreciation or a period in gross (e g , five years) The argument is much stronger in case of taxation at death · the entire appreciation becomes taxable in one year without any choice on the part of the decedent-taxpayer. At least during life he might have had an opportunity (depending on the assets involved) to spread the gain over a number of years by selling off over a period of years

Steger highlights the liquidity problem [26] ·

> *Effect of constructive realization at death on the liquidity of the estate tax population.* One of the most specific economic effects of constructive realization of gains and losses at death would be the effect on the liquidity position of estates The effect as most clearly seen by comparing the liquid and near-liquid asset positions of various size estates, as reported in 1949 estate tax returns,[a] with the liquid and the near-liquid asset positions of these estates if unrealized gains had been constructively realized at death.[b] For the purposes of the analysis, federal, state, and municipal bonds were considered "very liquid," as were two-thirds of "other bonds," taxable insurance and cash. Fifty percent of common stock was defined as "liquid "[c]
>
> The computation revealed that, whereas very liquid assets were 262 percent of the estate tax and very liquid plus liquid assets were 427 percent of the estate tax for all estates in 1949, these rates would have fallen to 186 percent and 305 percent, respec-

[26] Steger, *op cit*, pp 279–280

tively, had gains been constructively realized in these 1949 estates. In estate size classes greater than $300,000 (net estate before exemption) all the ratios were lower than these In the $1,000,000–$1,500,000 size class, for example, the very liquid ratio would have decreased from 127 percent to 104 percent and the very liquid plus liquid ratio from 261 percent to 215 percent

When shrinkage in the size of the estate from probation and administration expenses is considered along with the subsequent increase (about 15 percent on the average) in tax liability for these estates after audit, it can be seen that the change in the tax law under consideration would cause significant difficulties, particularly in the case of estates of more than $300,000 Most of these estates certainly would be forced to liquidate assets of less than the highest liquidity. Since many of the medium-size estates hold stock in only one corporation, this would severely intensify the problems of small businesses on the death of one of the owners.[d] At the very least, taxing unrealized gains at death would severely increase the liquidity problems of many estates.

[a] *Statistics of Income* 1949
[b] From Table 1 on p 272 of *Steger's* article
[c] The procedure used follows that in C L Harris, 'Liquidity of Estates," *Political Science Quarterly*, v 64 (1949) p 533–39
[d] See Butters, J K., Lintner, J., and Cary, W., *Effects of Taxation on Corporate Mergers*, Boston, Harvard Business School, 1951, Ch 2

Even Pechman, who argues strongly for taxation at death, recognizes the need for some method of easing the burden of payment[27]:

> Unrealized capital gains transferred by gift or at death —The omission of capital gains transferred by gift or at death is a by-product of the use of the realization principle in the tax law Actually, this omission acts as a great deterrent to transfers of assets, since taxpayers are encouraged to retain assets on which large gains have been realized so that they can be transferred tax free by bequest It is also inequitable because it benefits those who can arrange their affairs to avoid realizing gains If these gains were made subject to tax, some form of averaging would be needed, or, as an alternative, the gains might be taxed at a flat rate with a tax-free allowance to all taxpayers to avoid the problems of averaging.

The possibility of paying the government in kind or in notes has been suggested[28]:

> Professor Paul Studenski, New York University: I'd like to ask Professor Eisner whether in proposing by indirection that capital gains on noncash assets be taxed, he had in mind that such gains on noncash assets be paid to the government in cash; or whether perhaps he suggested or had in mind the possible innovation in our tax system that the tax on the gains should be paid in the form of the noncash assets, so that the government then would have the problem of converting these noncash assets into spendable cash.

[27] Joseph A Pechman, "What Would a Comprehensive Individual Income Tax Yield?", *Essays in Federal Taxation*, (New York Committee for Economic Development, December 1959) p 30
[28] "Discussion of Tax Differentials and Their Effect on Investment", in *Income Tax Differentials*, Tax Institute Symposium, November 21–22, 1957, (Princeton: Tax Institute, Incorporated, 1958) pp 180–181

Professor Eisner. This is a nice question if you want to pursue the matter seriously As an economist, I am not sure what I can say about it I suppose offhand I'd be happy to let the people sell the stock, if they have to, and pay it in cash, but I don't see any serious objection to having some kind of a scheme where the individual accepts an obligation to the government, if you wish, and on which due interest is paid I think Mr Vickrey has some interesting schemes on this score That, to me, is a detail The important thing is to recognize that in a meaningful sense income is nothing but what you consume plus what you add to your net worth or wealth and it doesn't make any difference in a meaningful sense whether this is in the form of a capital gain or whether it is in the form of something like what the poor professor has to declare as a taxable income It's still income

The administration recognized the hardships involved in the tax plan in 1963 and proposed several forms of relief: averaging the gain (in effect) over a five-year period, and making exceptions for personal and household effects, a personal residence, property transferred to a surviving spouse, property transferred to charity, and a minimum of $15,000 in every case [29] The estate would be reduced by the amount of the capital gains tax liability There was no provision for payment in kind or notes

The same problems would arise, in principle, in California but the much lower prevailing capital gains tax rates, ranging from ½ percent to 3½ percent, make the practical burden much smaller Moreover, the inheritance taxes would be reduced slightly if the capital gains tax were deductible as a liability of the estate There could, of course, be various relief provisions comparable to those in the federal proposal

(3) Effect on Business Structure and Practices

The problems which would arise in the taxation of capital gains at death are similar in form to those which now exist with respect to the estate tax. The required solutions are also of the same type [30] The essence of the problem is this since there is no actual sale there are no funds released with which to pay the tax and there is no certainty as to what value should be placed on the property, hence what tax should be paid The consequence is a serious impact on business structure and practices in order to avoid a forced sale of the ownership interest to pay the tax.

The taxation of capital gains at death would become a factor contributing to the merger of small businesses into large corporations [31]

[29] Hearings, 1963, *op cit*, p 128

[30] The problems with respect to estate taxes are discussed in Harold M Somers, "Estate Taxes and Business Mergers," *Journal of Finance*, May 1958

[31] An illustrative statement on the effect of the estate tax was made by a private investment banker who said, " The business slowdown fires the merger trend Another factor is that aging owners of some companies want to sell out to mitigate the effect of estate taxes" (*Wall Street Journal*, December 19, 1957), p 1 Studies that point in the direction of an impact of estate taxes on investment and merger decisions include J Keith Butters, Lawrence E Thompson, and Lynn L Bollinger, *Effects of Taxation Investments by Individuals* (Boston Harvard University, 1953) pp 3½, 171, Dan Throop Smith, *Effects of Taxation Corporate Financial Policy* (Boston Harvard University, 1952) pp 184, 188, 225, J Keith Butters John Lintner, and William L Cary, *Effects of Taxation Corporate Mergers* (Boston Harvard University, 1951) *passim* C Lowell Harriss, "Economic Effects of Estate and Gift Taxation," *Federal Tax Policy for Economic Growth and Stability* (Washington, D C Joint Committee on the Economic Report, 1955) pp 860-62 Most of these findings would apply to the taxation of capital gains at death

In order to see this we must review the effects of the estate tax on business operations.

There are two aspects of the estate tax that affect business structure and practices in closely held corporations. (1) *uncertainty* as to how much the tax will be and (2) fear of *insufficient liquidity* to pay the tax One of the major elements of uncertainty in the estate tax lies in the valuation of closely held securities The illiquidity results from the fact that shares in closely held corporations may be hard to sell on the death of one of the owners; and even when a buyer is available there is the danger of bringing in a stranger who may disrupt the operation of the business to the detriment of surviving owners or heirs. (The problem of illiquidity was discussed in Section 2, above, but it has special significance where business firms are involved.)

The taxation of capital gains at death would likewise result in uncertainty and illiquidity and would encourage practices to overcome or avoid their unfavorable effects

Under the existing estate tax, attempts are made to ensure the continuity of the business firm after the death of a major stockholder or partner through the use of a stock-redemption plan or a cross-purchase agreement. When the stock cannot be redeemed by the company or bought out by surviving stockholders, the survival of the firm may be seriously jeopardized The widow may try to run the firm or sell her interest to a stranger who will do likewise. Under a stock-redemption plan the company agrees to buy the stock of the deceased. Under a cross-purchase agreement the surviving stockholders or partners agree to do so Either may obtain the necessary funds through life insurance on the stockholder or partner. There are many legal pitfalls ready to trap the unwary under either arrangement.

These are the ways in which business firms try to respond to the estate tax (and would similarly have to respond to the capital gains tax) in order to insure the survival of the business after the death of the major owners. The complicated nature of these arrangements, however, and the persistent residue of uncertainty and illiquidity may drive the owner to yield to a much simpler solution: sell out during life, possibly to a larger company. The taxation of capital gains at death would greatly encourage this solution by removing the prevailing temptation to avoid the tax by holding on to the property until death.

Sale or merger during the lifetime of the principal owner offers an attractive way for the individual to minimize the problems of uncertainty and illiquidity involved in the estate tax and in any capital gains tax that may be imposed at death. The owner receives either cash or the listed securities of the large corporation. If he receives securities he pays no capital gains tax at that time His estate would, however, be subject to tax Nevertheless, neither he nor his heirs need face the more serious problems which are associated with the estate tax or which would have to be faced if capital gains were taxed at death. Cash, of course, leaves no problem of valuation or capital gains tax. Securities of a public corporation minimize the problem of valuation and of partial liquidation to pay taxes.

The result of this type of sale or merger is that the small company disappears as a separate entity [32] It is either absorbed indistinguishably into the large corporation or becomes one of its subsidiaries or divisions. Thus estate taxes drive small business into the arms of the big corporations The taxation of capital gains at death might accelerate the movement unless precautions are taken.

In order to avoid or reduce the absorption of small companies by large ones, some relief must be provided from uncertainty and illiquidity The estate tax is not solely responsible for the trend, but it does aggravate the difficulties involved; taxation of capital gains at death would aggravate them still more Revisions in the estate tax, which would apply equally to the taxation of capital gains at death, can accordingly relieve or eliminate the problems to some degree

Uncertainty can be relieved by having the tax-collecting agency give rulings on the application of a taxpayer on either the method of valuation used in a particular stock-redemption or cross-purchase agreement or on the actual value set by such agreement. Approval of the method would at least narrow the range of valuation uncertainty. Approval of the actual value would, of course, eliminate uncertainty as to value. This would require an increase in the number of revenue agents but would be of invaluable help to small business.

The problem of illiquidity can be partly solved by allowing the capital gains tax if imposed on family businesses to be spread over a 10-year period as a matter of right A proposal of this sort has been adopted for the estate tax. This provision should apply only where the redemption privilege is not exercised This should not be discretionary with the tax authority; nor should collateral be required in the case of family businesses As pointed out above, the Administration's proposals of 1963 included various devices for easing the problem of liquidity.[33]

These recommendations should have the effect of reducing the potential impact of a capital gains tax at death as a contributing factor in the merger of small businesses into large companies. The existing federal death tax, the estate tax, has been an artificial factor distorting economic decisions in questions of merger A tax on capital gains at death would become an additional death tax By removing any death tax as an element of uncertainty and illiquidity we may be said to be strengthening a "free market" in mergers whereby a proposed merger will be accepted or rejected on its economic merits by the parties involved without the bias introduced by the peculiarities of the death tax We must make sure that the capital gains tax, if imposed at death, does not simply add another factor of distortion in the merger market There will be a greater tendency to sell out during life but the preference in favor of a large buyer can be reduced

California's inheritance tax undoubtedly has some of the consequences of the federal estate tax The low rates applied to children and a surviving spouse, however, reduce the likelihood of loss of a family business to strangers Low rates are also applicable to capital

[32] One important finding of Steger (*National Tax Journal*, September 1957, p 276) is "Due to the large amounts of unrealized gains in unincorporated enterprises, self-employed individuals would be the occupational group absorbing the heaviest impact of the proposed tax revision" Thus the taxation of capital gains at death runs counter to the current emphasis on helping small, particularly unincorporated, business

[33] Hearings (1963), *op cit*, pp 24 (President's 1963 tax message) 54–56 (presentation of Hon. C Douglas Dillon) and 128–140 ("Technical Implementation").

gains. Relief provisions to prevent a forced sale could be enacted if the rates are ever raised substantially and a tax is imposed on capital gains at death.

C. Arguments (Pro and Con) Concerning Prices and Risky Investments

The capital gains tax as we know it tends to have a "lock-in" effect on investors—they hold their securities in order to avoid paying a tax on the gain This has a destabilizing effect on securities prices and tends somewhat to discourage risky investments [34] Steger has suggested tentatively that taxation of capital gains at death would have a stabilizing effect on prices [35] This conclusion is consistent with the analysis of the effects of the existing capital gains tax. One inducement to being "locked in" is the prospect of avoidance of all capital gains tax at death. Removal of this prospect removes part of the "lock-in" problem and its consequences [36] On the other hand, inability to avoid the tax in a risky investment that really "pays off" (at death) would remove one incentive to making such investment. Thus the proposal could have a stabilizing effect cyclically but might have an unfavorable growth effect. Any existing capital resources would be better allocated (see "welfare" argument, above) but the growth in such resources might be hampered in the private sector of the economy.

Various Combinations of Taxes on Realized and Unrealized Capital Gains in California

The California tax code provides an incentive of a maximum 3½-percent tax saving if an asset whose value has appreciated is held until death or gift rather than sold after having been held more than six months It would certainly be possible to affect this incentive by changing either the treatment of realized capital gains or the treatment of capital gains at the time of death or gift, or both. Various possibilities are summarized in Table 9 [37]

Table 9 shows the treatment of capital gains at realization, the treatment of capital gains at the time of death or gift, and the possible "lock-in" effect of different tax treatment combinations For the sake of simplicity in the table and the following discussion the illustration is based on single persons in the $15,000 and over tax bracket or married taxpayers in the $30,000 and over bracket filing a joint return.

The first possibility considered is the one that prevails in California today (A). Under the present statute a capital gain is subject to a maximum 3½-percent income tax at the time of realization and there is no capital gains tax at the time of death or gift The degree to which this "locks in" the taxpayer is indicated in the final column The rankings shown are relative and refer only to the other possibilities shown,

TABLE 9

CALIFORNIA: CAPITAL GAINS TAXATION IN VARIOUS COMBINATIONS

	Capital gains taxation at realization	Capital gains taxation at death or gift transfer	"Lock-in" effect†	
			Factor	Rank
A	R/2*	E*	Save 3½% by holding to transfer	3
B	R/2	R/2	Lock-in 3½% in either case	5
C	R/2	R	Save 3½% by realizing before transfer	7
D	R	E	Save 7% by holding to transfer	1
E	R	R/2	Save 3½% by holding to transfer	2
F	R	R	Lock-in 7% in either case	4
G	E	E	None	6
H	E	R/2	Save 3½% by realizing before transfer	8
I	E	R	Save 7% on realization before transfer	9

*Present California law
† 1 represents maximum "lock-in"
5 represents neutrality
9 represents maximum "negative lock-in" or "lock-out"
Key R = ordinary income tax rate.
E = tax exempt

not to any absolute The strongest lock-in is ranked "1"; the weakest, "9." These represent our estimates of the probable effects, not empirical findings.

The next possibility considered (B) is the taxation of capital gains at 50 percent of the ordinary income rate both at time of realization and at time of gift or death The "5" ranking given to this proposal illustrates that this would constitute less of a "lock-in" than the previous proposal which ranked "3" In effect the taxpayer would be subject to a 3½-percent capital gains tax on realization and this tax could not be avoided by holding the asset until the time of death or gift In terms of achieving the maximum tax neutrality between realized and unrealized gains and providing incentives for capital investment while still obtaining the necessary revenue, this proposal would appear to be the most advantageous of the nine considered.

The next combination (C) has the capital gains taxed at 50 percent of the ordinary income tax rate at the time of realization and the full ordinary income tax rate at the time of death or gift This proposal has a "negative lock-in" effect or a "lock-out " What this would do is to provide an incentive of 3½ percent for the taxpayer to realize the capital gain before the time of death or gift

The maximum possible degree of "lock-in" is contained in the next proposal (D). Here the capital gain would be taxed at ordinary income tax rates at realization but it would be tax exempt at the time of death or gift This provides an incentive for the taxpayer not to realize the capital gain (in the form of a 7-percent tax saving). Viewed

in comparison with the other proposals in this manner, the extreme "lock-in" effects of this type of proposal can be easily seen. It should be noted, however, that this type of legislation is not inconceivable. The California corporate income tax assesses capital gains at ordinary income tax rates (5 5 percent). To extend this type of tax treatment to the California personal income tax in an effort to increase the tax yield would be quite undesirable and possibly self-defeating. The taxpayer's incentive to hold the asset until the time of death or gift would be doubled.

The next proposal (E) would be to tax the capital gain at ordinary income tax rates at the time of realization but at 50 percent of the ordinary income tax rates at the time of death or realization. This proposal would double the present incentive to avoid realization and also provide the same 3½-percent tax savings for holding the asset until the time of death or gift The "lock-in" effect of this proposal would undoubtedly be stronger than at present.

The next proposal (F) provides for taxation of capital gains at ordinary income tax rates at either realization or time of death or gift Here the taxpayer would be subject to a 7-percent capital gains tax which he would not be able to avoid by holding until the time of death or gift The "lock-in" factor at work here would be determined by the individual taxpayer's rate of time preference. He is able to postpone but not avoid the fateful day of the reduction in his wealth through the capital gains tax. The 7-percent tax rate at the time of death or gift poses other problems however. If the capital gain is the result of the increase in the value of the stock of a closely held company, the taxpayer may have the very serious liquidity problems discussed earlier. It may be that this tax will force the liquidation of the company in some cases This complete elimination of the favorable treatment of capital gains will increase tax revenue but it will have adverse effects upon incentives to undertake capital investment.

On the other hand, the next proposal (G) contains a large incentive to seek risky, capital gains-yielding ventures since it provides for the tax exemption of capital gains both at realization and at the time of gift or death There would be no "lock-in" effect as the taxpayer would be under no penalty if he realized his capital gain at any time. (Presumably there would be a six-month retention period since all these provisions would apply only to long-term capital gains but this factor is common to all the proposals under discussion) While this proposal would have the virtue of tax neutrality between realized and unrealized gains it would also result in a substantial drop in tax yield

The next proposal (H) provides for the exemption of capital gains at realization and the taxation of capital gains at the time of death or gift at 50 percent of the ordinary income tax rate. This proposal would have a "lock-out" effect in that the taxpayer would be able to effect a 3½-percent tax savings by realizing his capital gain rather than having it subject to tax at the time of death or gift.

The final proposal (I) provides for the exemption of capital gains at realization and their taxation at ordinary income tax rates at the time of death or gift. This proposal would have a much stronger "lock-out" effect than the previous one; in fact, it would have the strongest "lock-out" effect of all the proposals. The taxpayer would be able

to avoid the capital gains tax and save 7 percent by realizing his capital gain before death or gift. In addition to this "lock-out" effect, this proposal, as well as the preceding one, would raise liquidity problems

There are some interesting possibilities involved in switching a capital gain between an individual and his closely held corporation If the second proposal considered above (B) were adopted, that is, taxing capital gains at 50 percent of the ordinary income tax rate both at realization and at time of death, then the most that could be gained through a switch would be a saving of 2 percent (5 5% minus 3 5%).

If the sixth proposal (F) were adopted, that of taxing the capital gain at the ordinary income rate both at realization and at the time of death or gift, then the corporate rate would be 1½ percent lower than the maximum personal income tax rate (7 0% minus 5 5%).

Other Proposals

In view of some of the arguments that can be made against the taxation of capital gains at death, a search for alternatives and modifications is in order Four are considered here (1) crediting capital gains tax against inheritance and estate tax; (2) taxation of unrealized appreciation on an accrual basis, (3) carryover of decedent's basis for property passing at death; and (4) integration of the tax at death (or changed basis) with the "roll-over" proposal. Some of these alternatives are fully consistent with the proposal to tax capital gains at death and serve primarily to soften the impact on the taxpayer.

A. Credit Against Inheritance or Estate Tax

Jonathan Brown suggests that there be "some form of estate-tax credit for all capital gains taxes paid after age 65, or perhaps within five years of death "[38] He states:

> Such a tax credit would be an equitable improvement in our tax laws that would go a long way toward unlocking the older investor. Moreover, it would almost certainly occasion very little loss in revenue, because older investors can't afford to sell anyway under the present law.
>
> Under the proposed credit, there would be larger tax revenues from the larger estates which would be left, from the fact that some older unlocked investors would pay a capital gains tax but outlive the credit period, and because of the general benefit to the economy of the country.

This proposal would remove some of the disadvantages of the existing situation by inducing some investors to sell before death The tax-free privilege now accorded capital gains at death would be extended forward to some years before death The prevailing inducement to remain locked in to the bitter end would thus be removed or reduced

The Administration in Washington proposed a reduction of the estate, hence of the estate tax, as part of the plan to tax capital gains at death.

[38] Jonathan A Brown, "The Locked-in Problem," in *Federal Tax Policy for Economic Growth and Stability*, pp 379–380 84th Congress, 1st Session, Papers Submitted by Panelists Appearing Before the Subcommittee on Tax Policy, Joint Committee on the Economic Report, November, 1955 (Washington, Government Printing Office, 1956), pp 367–381.

This was *not to* be a tax credit whereby the gains tax would be deducted from the estate tax The Administration's proposal of 1963 included the following:[39]

> The income tax on the gain at death would constitute a debt of the estate, be deductible from the gross estate for estate tax purposes, and thus reduce any estate tax liability The treatment here follows automatically under present estate tax rules dealing with debts of an estate Further, the income tax on the death transfer of property has the same tax consequences as would the income tax on a sale or exchange of the property by the decedent during his last taxable year.

In absence of a credit, the capital gain portion of an asset is taxed twice, once under the income (capital gains) tax and again under the estate or inheritance tax A credit would thus avoid double taxation of the capital gain at death The Administration's proposal would merely have avoided an estate tax on the gains *tax*, not on the gain itself It is not so much the "doubleness" *per se* that is at issue as the fact that the two taxes together might lead to an exorbitant combined rate If there is no relief provision, the decedent will be better off dead.

Either of the above proposals could readily be adapted to California's inheritance tax. Under the full credit plan, the capital gains tax paid could be allocated *pro rata* among all the inheritances; presumably with a refund due in those cases where the credit exceeds the tax liability Similarly, under the Administration plan, the allocated gains tax paid could constitute a deduction in computing the taxable portion of each inheritance

If a too-simple tax credit plan were followed, a new lock-in might be created A tax on capital gains at death would be credited against the inheritance or estate tax but a tax paid on a capital gain realized in the years before death would not be so credited This would again induce a holding until death and put us back to the present situation Thus Jonathan Brown's proposal, described above, would be useful in reducing the lock-in effect whether or not capital gains are taxed at death It is quite a dilemma Without a capital gains tax credit against the inheritance or estate tax we would be taxing the gain twice (and, in some extreme instances, at a total combined death tax rate [of all kinds] close to 100 percent) With a capital gains tax credit only on the gain that is taxed at death, we would be restoring the inducement to remain locked in until death By crediting earlier capital gains tax payments we can avoid both evils

B. Taxation of Unrealized Appreciation on a Year-to-year Accrual Basis

The possibility of taxing unrealized gains from year to year has been advanced The nature and defects of the proposal have been summarized by the staff of the Joint Economic Committee:[40]

> Since the realization principle in the present law has been generally identified as the principal source of difficulty in capital gains taxation, the taxation of gains on an accrual basis has been pro-

[39] Hearings (1963), *op cit*, p 139

[40] *The Federal Revenue System Facts and Problems 1961*, Materials Assembled by the Committee Staff for the Joint Economic Committee, Congress of the United States (Washington Government Printing Office, 1961) p 69

posed as an ideal solution. Under this proposal, taxable income would include the net change in the value of the property owned between the beginning and end of the taxable year, whether or not realized Tax at ordinary income tax rates would be applied to such changes in value. Where net capital losses accrued over the year, they would be deducted in full from ordinary income. This approach would also eliminate the problems resulting from the lack in the present law of a constructive realization on transfers by gift or at death.

Numerous objections are raised against this proposal In addition to the difficulties attendant upon establishing reliable values for property in the absence of a sale or exchange, the proposal would also frequently result in forced realizations in order to provide the means for payment of the tax. Moreover, this treatment would eliminate the present tax bias in favor of so-called growth investments as compared with safer income investments, and would, in fact, introduce an opposite bias

There are some serious difficulties in the valuation and taxation of any assets in absence of a sale, including unrealized gains.[41] These difficulties of uncertainty and liquidity are faced at the present time in inheritance and estate tax valuations, as pointed out in an earlier section of this study. The prospect of facing these problems every year would be enough to bring on premature death.

C. Changing the Basis Requirements

The greatest prospect of improvement in the near future lies in changing the basis of inherited property. At the present time, the person who gets the property from the decedent takes it with a basis which is generally the same as the value that is used for inheritance or estate tax purposes If, instead, he took the decedent's basis there would be some possibility, at least, of taxing the appreciation in the future The tax would not be completely lost but there would be a postponement until the property was sold Presumably the new basis would be either cost or value at death, whichever is lower There would be loss of revenue from the inheritance and estate tax if the decedent's basis (or value at death, if lower) is used for inheritance and estate tax purposes also If the value at death is used in evaluating the property for inheritance and estate tax purposes it will be argued that the distributee should be given the benefit of that same value for later capital gains tax purposes The appreciation would otherwise be subjected to both the death tax and the subsequent capital gains tax. A solution to this problem might be to allow either a partial or total credit or deduction of death tax paid on the appreciated portion of the estate This credit or deduction would become effective at the time that the capital gains tax becomes due.

The changed basis would bring death taxes in line with gift taxes. The donor's basis (or market value if lower than donor's basis) is currently used for gifts The basis device is less drastic or more palatable

[41] See Harold M Somers, "Valuation of Property for Purposes of Taxation and Legal Proceedings," in *Capital Investment and Asset Valuation* (University of Buffalo Industrial Liaison Office Publications, 1954, litho), and Harold M Somers (ed) *Estate Taxes and Business Management* (University of Buffalo Industrial Liaison Office Publications, 1957, litho).

than taxation of the gain at the time of death There is then at least the option of retaining the appreciated property and thereby further postponing the payment of the capital gains tax Such "carryover of basis" was one of the possibilities considered during the Congressional tax discussion of 1963.

The carryover of decedent's basis, rather than taxation of the gain at the time of death, is consistent with the general policy embodied in the income tax The State Legislature and the Congress have apparently been anxious to avoid taxation on improvements in economic power which do not provide the means of paying the tax The treatment of "fringe benefits" is a good example In particular, the employer's contribution to a qualified pension fund is not taxed in the current year, presumably because no funds are currently released to the employee taxpayer.

There is, of course, the remote chance that the particular asset will not be sold by those who inherit it, nor by those who inherit it from them, etc. In that case, the capital gains tax will be deferred until the asset is sold A period in gross (e g 30 years) could be used to ensure payment of a capital gains tax within a generation after the death of the first owner. Some lock-in will remain but it will not be so strong as at present.

D. Integration of Changed Basis With "Roll-over" Proposal

Constructive realization at death is closely related to what is known as the "roll-over" proposal [42]:

> Proposals have been made to provide for tax-deferred exchanges of nonbusiness capital assets held in an individual's personal investment account in a manner similar to that now provided for gains on the sale of personal residences.[a] Taxation of gains would be deferred until final realization of the assets, either by diversion of the proceeds to consumption or to investments of an entirely different character. Realization would also be provided for at the transfer of the property by gift or at death, or even at the election of the taxpayer. In general, an investor would not be taxed if the gains on the sale of an eligible asset were reinvested in similar assets within the same income period. A tax would be imposed, at ordinary income rates, on that portion of the gains not so reinvested. Capital losses could be carried over without limit for offset against capital gains.
>
> This proposal, it is maintained, would completely eliminate the deterrent of current taxation on transfers of investable funds. Moreover, though it would afford some benefits to taxpayers reinvesting gains by virtue of deferral of tax, it would nevertheless provide for ultimate and complete taxability as ordinary income of all gains realized by the taxpayer.
>
> Practical problems of administration and enforcement are suggested in criticizing this proposal Proponents, on the other hand, maintain that the proposal would involve little more difficulty than the present law in compliance and administration.

[a] See statement of Reuben Clark, attorney at law, Washington, D C , in hearings before the Committee on Ways and Means, House of Representatives, 85th Cong , 2d Sess , pt II, pp 2272–2281 .

[42] *The Federal Revenue System: Facts and Problems 1961* (Washington: Government Printing Office, 1961), p. 68. See also Dan Throop Smith, *Federal Tax Reform* (New York: McGraw-Hill, 1961), pp 151–155.

The administrative difficulties for both the taxpayer and the tax collector are not negligible. For one thing, "running capital accounts would have to be kept for all taxpayers who were property owners." [43] For another "since there would clearly be an incentive to borrow in order to live off untaxed capital gains, net contraction of debts during the tax period would have to be subtracted from the total value of the purchases of that period." [44] These difficulties can be overcome without insuperable complexity.

This proposal arises from the claim that the capital gains tax on certain transactions is really a "wallet-shifting tax." If the taxpayer has a certain amount of his wealth in a number of shares of a certain stock and he sells that stock in order to purchase another security, then the capital gains tax that he must pay as a result of this transaction is really a tax on his shifting his wallet from one pocket to another. It would be possible to avoid the "wallet-shifting" feature of the capital gains tax by exempting from capital gains taxation that amount of the sales price of the security or the property that is reinvested within a one year period in securities or property of the same or similar nature.

It should be emphasized that the roll-over proposal (also known as the Full Reinvestment Proposal) does not necessarily involve exemption from capital gains tax during life: only an exemption in those cases where there is a reinvestment of the proceeds in similar assets. Other realization would remain taxable, as at present.

If the roll-over proposal is adopted, some form of taxation of capital gains at death becomes essential if there is to be any taxation of capital gains at all. The roll-over must stop at the time of death. If the decedent was allowed to roll over when he was alive, he cannot be permitted to do so when he is dead.

The Issue and a Solution

The basic issue is simple. Those who realize their capital gains during their lifetime are penalized by having to pay a capital gains tax whereas those who hold their appreciated property until death avoid the tax. One extreme possibility is to remove all taxation of gains during life and the other is to impose a gains tax at death. An intermediate possibility is to treat a gift at death the same as a gift during life, with the donee taking on the donor's base for capital gains tax purposes.

VII. CONCLUSIONS

The inheritance-gift-capital gains tax complex is one of the most intricate in California's entire tax structure. Innumerable reforms, some of them purely legalistic in nature, could be proposed. In this study, we have confined ourselves to the following.

[43] Ursula K. Hicks and Herschel I. Grossman, "Lessons from America's Capital Gains Tax," *The Bankers' Magazine (England)*, February 1962, Vol. 193, pp. 85–91 at pp. 88–90.

[44] *Ibid.* *Cf. The Federal Revenue System: Facts and Problems 1964*, p. 85.

1. Removal of the discount provision and reduction of the grace period.
2. Removal of the tax-free treatment of capital gains at death.

The proposal to remove the discount provision would withdraw the preference that is currently granted to liquid estates At the present time, a 5-percent discount is given on payment in six months Coupled with this is a proposal to reduce the grace period from 24 months to 15 months. This would increase revenue in providing earlier payment of funds on which interest could be earned by the state. The dropping of the discount would undoubtedly slow down payments to some extent. The state would lose the interest that can now be earned on funds paid early; but it would also be relieved of the necessity of paying a 5-percent discount on those funds. The state would also be spared the expense of making refunds to those who pay an estimated tax early in order to take advantage of the discount provision before the exact tax liability can be ascertained.

The proposal to remove the tax-free treatment accorded capital gains at death has both economic and equitable origins At issue is the fact that property that has appreciated in value during the lifetime of the owner is not subject to the capital gains tax if the owner holds the property until he dies. Those who inherit from the owner take the property at the value it has at time of death; and this is the basis used in case of any future capital gains.

The result is an inducement to hold property until death, with unfavorable consequences for the securities market and other asset markets and for the free flow of investment capital into new companies and industries. There is also the inequity involved as between those who sell their appreciated assets during life and those who hold them until death. In both cases, the cash and/or assets are subject to the inheritance tax but in the former case a capital gains tax is also imposed.

Solutions to the problem are complicated by the necessity of having enough liquidity in the estate to pay any new tax imposed. There are also difficulties involved in providing appropriate deductions or credits as between the capital gains tax and the inheritance tax In the case of gifts during life, there is no capital gains tax at the time of donation but the donee takes the donor's base for capital gains tax purposes Thus a more moderate proposal suggests itself· Have the inheritances take on the decedent's base This ensures that there will ultimately be a day of reckoning even if it does not coincide with the day of death.

CALIFORNIA INHERITANCE TAX

I. Historical Background

California's first inheritance tax law (Stats 1853, Ch 167, p 233) was never really effective, for it was repealed the following year (Stats 1854, Ch 74, p 103)

A. *The Inheritance Tax Act of 1893*
(Stats 1893, Ch 168, effective March 23, 1893)

1 The act taxed transfers by will or interstate laws of California and inter vivos transfers made in contemplation of death or intended to take effect in possession or enjoyment at or after death Transfers to father, mother, husband, wife, lawful issue, brother, sister, wife or widow of a son, husband of a daughter, adopted children, and charities were exempted The tax was payable to the treasurer of the county wherein the probate proceedings were pending

2 Amendments
(Stats 1895, Ch 28, effective March 9, 1895, Stats 1897, Ch 83, effective March 9, 1897, Stats 1899, Ch 85, effective March 14, 1899, Stats 1903, Ch 228, effective March 20, 1903 The act was repealed by Stats 1905, Ch 314, Sec 27, effective July 1, 1905)

B *The Act of 1905*
(Stats 1905, Ch 314, effective July 1, 1905) This was the predecessor of all state inheritance tax acts up to and including the Inheritance Tax Act of 1935 It was founded on the Wisconsin Act of 1903 Differences from the 1893 act included

(1) Broadening of the base to include all transferees, direct descendants as well as collaterals,
(2) Varying of exemptions and rates according to degree of blood relationship,
(3) Progressive rates

C *The Act of 1911*
(Stats 1911, Ch 395, effective July 1, 1911) This act was a complete rewriting of the 1905 Act, and all parts of the latter in conflict with the 1911 Act were repealed Important changes consisted of

(1) Limitation of lien for tax to five years as to a bona fide purchaser;
(2) Addition of penalty for unauthorized transfer, and
(3) Provision for appointment of appraisers

Contemporaneous amendment of the then Section 1440 of the Code of Civil Procedure (now Prob C Sec 605)

D *The Act of 1913*
(Stats 1913, Ch 595, effective August 15, 1913) The 1913 act was primarily a reenactment of the act of 1911, substantially increasing the rates in the upper tax brackets, but not changing the 1911 exemptions It taxed the creation of powers of appointment, rather than their exercise, and provided that an inheritance tax appraiser must be appointed in every probate proceeding
The 1915 amendments (Stats 1915, Chs 189 and 198, effective August 8, 1915), provided for
(1) Taxation of joint tenancies (Sec 1(g)),
(2) Compensation of appraisers out of inheritance tax receipts,
(3) A change in classes of beneficiaries from five to four

E *The Act of 1917*
(Stats 1917, Ch 589, effective July 27, 1917) This was a reenactment with certain changes of the 1913 act It granted the surviving wife exclusion equal to one-half the community property

F *The Act of 1921*
(Stats 1921, Ch 821, effective August 2, 1921.)
1 While primarily a reenactment of the act of 1917, the 1921 act
(a) Granted a deduction for federal estate tax paid, upon prescribed formula,
(b) Provided for shifting a tax lien from property sold on probate sale to proceeds of such sale,
(c) Reduced rates of the tax,
(d) Introduced the "previously taxed property" (five-year) exemption, applicable to class A transferees,
(e) Provided that the tenant of a safe deposit box must agree to notify depositary of the death of any other person having access to said box
2 The 1923 amendment (Stats 1923, Ch 337, effective August 17, 1923) redefined community exclusion
3 One of the 1925 amendments (Stats 1925, Ch 238, effective July 23, 1925) provided for deposit of taxes collected in the general fund
4 The other 1925 amendment (Stats 1925, Ch. 284, effective July 23, 1925)
(a) Provided for treatment of the community property exclusion where the husband's will forces the wife to an election,
(b) Introduced the Prob C Sec 201 5 concept as to personal property into inheritance tax law,
(c) Taxed family allowance
5 The 1927 amendment (Stats 1927, Ch 646, effective July 29, 1927) established the intangibles exemption based on reciprocity, and introduced the additional (pickup) tax
6 The 1929 amendment (Stats 1929, Ch 844, effective August 14, 1929),
(a) Provided that transfers to take effect in possession or enjoyment at or after death would be valued as of the date of death,
(b) Provided that failure by a donee to exercise power of appointment would not be a taxable transfer,
(c) Added the insurance exclusion,
(d) Changed certain exemptions and rates,
(e) Added reciprocal exemption as to foreign charities,
(f) Exempted proceeds from war risk insurance payable to the estate,
(g) Extended intangibles reciprocity to foreign states and countries,
(h) Authorized compromise of contingent interests,
(i) Revised the "previously taxed property" exemption
7 The 1933 amendment (Stats 1933, Ch 1048, effective October 25, 1933) changed the specific exemption of the wife

G *The Act of 1935*
(Stats 1935, Ch 358, effective June 25, 1935) This act was primarily a reenactment of the 1921 act as amended The 1935 act was amended three times in 1937, twice in 1941, and in 1943

H *Inheritance Tax Law Codified*
Inheritance tax law was codified in 1943 (Stats 1943, Ch 658, operative July 1, 1945) and incorporated into the Revenue and Taxation Code

II. Persons and Property Subject to the Tax

A *Where Decedent Owner Is a Resident of the State*
("Residence" is not defined in the statute *Estate of Bloom* (1931) 213 C 575, 2 P. 2d 753)

1 Real property situated in California is subject to the tax Under the doctrine of equitable conversion, real property located elsewhere, subject to a contract of sale might be subject to the tax depending upon the law of the state in which the real property is located
2 Tangible personal property located in California is subject to the tax
3 Also subject to the tax is intangible personal property in California irrespective of location of evidence of ownership *Estate of Dillingham* (1925) 196 C 525

B *Where Decedent Is a Nonresident of California, but a Resident of the United States*
The tax is levied on real and tangible personal property located in California Intangible personal property is exempt under Rev & Tax C Sec 13851,* based upon reciprocity

C *Disputed Domicile Cases*
In cases of disputed domicile the Controller may compromise (Secs 14195 and 14195 4) or arbitrate (Secs 14197 and 14197 13) the question of domicile An alternative method of arbitration is provided by Secs 14199 to 14199 13 (added 1957)

D *Where Decedent Is a Nonresident of the United States*
The tax is levied on real and tangible and intangible personal property located in California (Sec 13303(b)) Included under the category "intangible personal property" is
(1) Stock in a California corporation;
(2) Stock in a federal corporation or a national bank which has its principal place of business in California,
(3) All other intangible personal property in California (Sec 13602) Bank deposits and deposits in a savings and loan association are not subject to the tax unless used in connection with a business operated in whole or in part in California (Sec 13303(b), 1956 and 1963 as amended)

III. Transfers Taxable

A. *In General*
All transfers by will or the laws of succession are taxable (Secs 13601 and 13602) Also taxable are transfers of a statutory and probate homestead (Secs 13621 and 13622) and transfers of a family allowance (Sec 13623).

B *Inter Vivos Transfers*
An inter vivos transfer without valuable and adequate consideration (Sec 13641 and Stats 1959, Ch 485); *cf Estate of Stevens* (1958) 163 C A. 2d 255, 329 P 2d 337, *Estate of Hyde* (1949) 92 C A 2d 6, 206 P 2d 420) is taxable if made
(1) In contemplation of death (Sec 13642), Barr, *Taxation of Transfers in Contemplation of Death,* (1959) 10 Hastings Law Journal 370,
(2) As a substitute for a testamentary disposition (Sec 13648), *Estate of Newman* (1942) 52 C A 2d 126, 125 P 2d 908, *Estate of Adams* (1952) 39 C 2d 309, 246 P 2d 625; or
(3) To take effect in possession or enjoyment at or after death (Sec 13643), *Estate of Madison* (1945) 26 C 2d 453, 159 P 2d 630, *Estate of Hyde* (1949) 92 C A 2d 6, 206 P 2d 420

* Unless otherwise noted, all further code references are to the California Revenue and Taxation Code

Such a transfer is taxable even though the transferor retains a life income or interest (Sec 13644, *Estate of Thurston* (1950) 36 C 2d 207, 223 P 2d 12), or extracts a promise from the transferee to make payments to or care for the transferor (Sec 13645) Such a transfer by way of revocable trust (Sec 13646) Totten trust (*Estate of Goldfader* (1955) 131 C A 2d 533, 280 P 2d 799, or advancement (Sec 13647 and Prob C Sec 1050) is also taxable

C *Joint Tenancies*

1 A joint tenancy is wholly taxable to the survivor, except for that part which the survivor may prove originally belonged to him or was not received from the decedent for less than adequate and full consideration (Sec 13671), *United States* v *Jacobs* (1939) 306 U S 363; *Harvey* v *United States* (7th Cir 1950) 185 F 2d 463 See also, *Estate of Darby* (1949) 93 C A. 2d 96, 208 P 2d 689.

2 A husband and wife joint tenancy having its source in community earnings is treated on the death of either as community property (Sec 13671 5) For further treatment see this outline VI A

3 In the case of a three-way joint tenancy (husband, wife and third person) created with community earnings, a post 1927 community, husband or wife deceased, one half of the property is charged to each survivor The result is that the surviving husband or wife is considered as contributor to the extent of three-fourths so that on the death of the surviving husband or wife, the third person is considered to be contributor to the extent of one-fourth

4 Section 13672, added 1961, provides that if the joint tenancy had its source in quasi-community property, upon the death of either spouse, the property shall be treated as if each spouse was the contributor of one-half Quasi-community property is defined by new Sec 15300 See Gift Tax VI

D *Powers of Appointment*

(Secs 13691 to 13698) If created prior to June 25, 1935, the tax is levied upon the exercise of the power by the donee (Sec 13693) *Estate of Newton* (1950) 35 C 2d 830, 221 P 2d 952, *Estate of Baird* (1953) 120 C A 2d 219, 260 P 2d 1052; (1955) 135 C A 2d 343, 287 P 2d 372 If created on or after June 25, 1935, the tax is levied upon the creation of the power A charitable exemption is applicable in any of the following situations

(1) Where the power is limited to a charitable beneficiary (Sec 13694),
(2) Where the power is exercised in favor of a charitable beneficiary either before or after the tax is fixed, (order fixing tax subject to modification (Sec 13696)),
(3) Where a charity takes upon the nonexercise of power, (order fixing tax subject to modification).

E *Insurance*

(Secs 13721 to 13724)

1 To qualify proceeds of contract as insurance, the elements of risk sharing and risk shifting must be present *Helvering* v *LeGierse* (1941) 312 U S 531 "Incidents of ownership" is the test employed although the statute does not use the term However, payment of premiums test has not been eliminated If the premiums are paid with community earnings and husband or wife is beneficiary, the community exclusions apply *Estate of Marson* (1930) 30 C A 2d 566, 86 P 2d 922, *Estate of Compton* (1962) 198 C A 2d 766

2 Proceeds of the insurance policy or policies up to $50,000 are excluded from the tax if payable to a named beneficiary (Sec 13724(a)) If there is more than one beneficiary, the $50,000 exclusion is prorated among the beneficiaries (Sec 13724(b)) *Estate of Marson*, supra If premiums are paid with community earnings and spouse and another person are beneficiaries, that payable to spouse is excluded from tax, and the $50,000 exemption is applied to the balance of proceeds

Estate of Compton, supra Annuity contracts and supplemental contracts are not insurance, consequently the $50,000 exclusion is not applicable *Estate of Barr* (1951) 104 C A 2d 506, 231 P 2d 876, *Estate of Loewenstein* (1951) 37 C 2d 843, 236 P 2d 566

3. With respect to death benefits payable under retirement or pension plans of public (governmental) or private business systems some uncertainty as to taxability has existed *Estate of Simpson* (1954) 43 C 2d 594, 275 P 2d 467, involved a county employee, and *Estate of Richartz* (1955) 45 C 2d 292, 288 P 2d 857, involved a school teacher The Government Code exempts retirement fund contributions of public employees from taxation The Supreme Court of California held in these cases that this exemption referred to property taxes, whereas the inheritance tax is a privilege tax and decided (1) the return of employee contributions plus interest and (2) payment of the lump sum death benefit, were taxable transfers The 1955 session of the Legislature immediately added Sections 31452 and 21200 5 to the Government Code and Section 14278 to the Education Code, specifically exempting such payments from inheritance tax The 1956 session of the Legislature added Section 13880 to the Revenue and Taxation Code exempting death benefits and payments under any public retirement system from inheritance tax

The law is now clear as to payments under a California public retirement system, but the taxability of similar payments under a private governmental plan is still an unanswered question It is the Department's position that the reasoning of the *Richartz* and *Simpson* cases is sound and applicable and might well render pension payments under a private system, taxable In *Estate of Wyman* (1962) 208 C A 2d 489 it was held that death benefits payable to a beneficiary under U S civil service retirement plan were exempt under the provisions of Sec 13880

IV. Valuation (Sec 13951)

A. *In General*

(Sec 13951) The market value is the price that a willing buyer would pay to a willing seller of property, neither being under any compulsion to buy or sell (Admin C, Title 18, Reg 13951(a)*) Valuation is made by an inheritance tax appraiser (Secs 14771 to 14774) appointed by the court (Prob C Secs 605, 1174; Rev & Tax C Sec 14051 and following) Valuation date is the date of the transferor's death, regardless of whether the transfer was made during life or at death (Sec 13951) *Riley* v *Zellerbach* (1942) 53 C A. 2d 196, 127 P 2d 597. The federal optional or alternative valuation date is not recognized or permitted

B *Real Property*

For valuation of real property, recognized appraisal methods are used taking into consideration all relevant facts and circumstances acceptable (Reg 13951(b)) *Estate of Ross* (1915) 171 C 64, 151 P 1138 The assessed value for ad valorem taxation is not acceptable (Reg 13951(c))

C *Securities*

1 *Listed*

The valuation of this type of securities in the mesne between high and low quotations on the principal market (Reg 13951(e)(1)) If there are no sales on date of death, the mesne is determined from quotations on the nearest date before and after death (Reg 13951 (e)(2).)

2 *Unlisted, but traded over the counter*

(Same as above)

3 *Closely Owned Securities*

The appraiser must be furnished with a balance sheet as of, or near the date of, death, as well as profit and loss statements for the five years preceding the date of death If average net profits exceed a

* Unless otherwise noted all further regulation references are to Title 18 of the Administrative Code

"fair return" or net worth, there may be "good will" or "intangible value" present, which is added to "net worth" The balance sheet is adjusted to reflect the true market value of underlying assets There are three methods of arriving at a per share valuation

(1) (Untraded securities) divide net worth by number of shares outstanding, *Estate of Felton* (1917) 176 C 663, 169 P 392,

(2) (Untraded securities) in addition to the *Felton* rule, other influencing factors must be considered, *Estate of Rowell* (1955) 132 C A 2d 421, 282 P 2d 163,

(3) (Traded securities) Sales at or near the date in question persuasive, *Estate of Goodhue* (1932) 127 C A 283, 15 P 2d 771

4 Blockage is not recognized under Reg 13951(f), *but see* this Outline V C 5 d (7).

D *Future Interests—Life Estates and Remainders*

To determine the value of a remainder the corpus is first multiplied by 4 percent (Sec 13953) to determine the annual income, the annual income is multiplied by the factor assigned in Table A(1), Admin C, Title 18, Reg 13952-13954(1), for the age at the nearest birthday for the life tenant or annuitant The result is the value of the life estate or annuity For value of the remainder subtract the life estate or annuity value from the corpus If the life tenant or annuitant should die before the tax is fixed, the value of his life estate or annuity is the sum actually paid him, and the remainder interest is correspondingly increased (Sec. 13955) *Estate of Knapp* (1951) 37 C 2d 827, 236 P 2d 372 When the valuation of the future interest has been determined in accordance with the statute and rule, no further reduction may be made for a contingency which might abridge, defeat or diminish such interest (Sec 13956)

V. Deductions

A *In General*

1 Deductions are a matter of legislative grace and not a matter of right *Estate of Watkinson* (1923) 191 C 591, 217 P 1073, *aff'd sub nom Stebbins* v *Riley* (1925) 268 U S 137

2 The first specific provisions relating to deductions were included in the 1921 Inheritance Tax Act (Stats 1921, Ch 821, Sec 2(10)) Deductions are allowed on the theory that the inheritance tax is a succession tax upon the beneficial interest of the heir or legatee *Estate of Miller* (1921) 184 C 673, 195 P 413 See also *Estate of Rath* (1937) 10 C 2d 399, 75 P 2d 509, and *Riley* v *Zellerbach* (1942) 53 C A 2d 196, 198, 127 P 2d 597, 598-599 "Clear market value" is defined by Sec 13312 as the "value of any property included in any transfer, less any deductions allowable by this part"

3 A person claiming a deduction must point out the applicable statutory provision and show that the claimed deduction falls within its terms *New Colonial Ice Co* v *Helvering* (1934) 292 U S 435 The rule that taxing statutes are to be construed in favor of the taxpayer does not generally apply to statutory provisions dealing with exemptions or deductions *Estate of Steehler* (1925) 195 C 386, 396, 233 P. 972, 977, *Estate of Bull* (1908) 153 C 715, 96 P 366

B *General Requirement*

A deduction may not be taken unless the debt, obligation, or expense actually reduces the amount of the inheritance or transfer It is not necessary that the amount to be deducted be actually physically paid at the time of deduction, but it must be finally fixed and enforceable at that time *Estate of Slack* (1948) 86 C A 2d 49, 53, 194 P 2d 61, 64 The deduction must be an obligation of the decedent or his estate, and it must be paid by the estate or the transferee (Sec 13982)

C *Particular Deductions*

1 Last illness expenses

Only those expenses paid after death are allowable since those paid before death had the effect of depleting decedent's estate in his lifetime (Sec 13956) If paid by another before death, such person should file a claim against the estate

2 Funeral Expenses

a Funeral expenses must be reasonable having regard for the station in life of the decedent and the custom of the community of which he was a resident (Sec 13986) Such expenses may include
(1) Costs for burial,
(2) Costs for burial plot, either for decedent alone, or for decedent and members of his family,
(3) Costs for tombstone, monument, or other memorial,
(4) Costs for perpetual care of burial plot,
(5) Donations to officiating clergyman,
(6) Costs for transportation of body to burial place

b Funeral and last illness expenses of a deceased wife are deductible from her estate even though she be survived by a husband financially able to pay those expenses (Sec 13986) *Riley* v *Robbins* (1934) 1 C 2d 285, 34 P 2d 715 (See also Prob C Sec 951 1)

3 Debts owed by decedent at death

a The debt should be based upon a claim timely and properly filed, allowed, and approved, but neither Sec 13983 nor the regulations use the word "claim" A claim formally presented, allowed, and approved may not be allowed as a deduction, if not actually a bona fide debt of the decedent A claim upon which the statute of limitation has run is not an allowable deduction (Reg 13983(e))

b Contingent obligations of the decedent are not allowable as deductions (Reg 13983(d)) If subsequently established and paid, however, the order fixing the tax may be modified equitably and a refund obtained if petition for refund is filed within one year after the establishment or payment There is no limitation of time within which the debt must be paid after the order fixing the tax is made (Sec 13985)

c A debt secured by a mortgage may properly be deducted even though not actually paid, distribution subject to the mortgage will suffice. (Reg. 13983(b)) See also *Estate of Slack* (1948) 86 C A 2d 49, 194 P 2d 61

4 Property taxes
Property taxes which are a lien at the date of death may be properly deducted (Sec 13986, Reg 826) Property taxes become a lien as of the first Monday in March so that if the decedent dies between that date and the date of the December payment, two installments may be deductible If death occurs between the first Monday in March and the date of the April payment, it is possible that three installments may be deductible

5 Ordinary expenses of administration
(See in general Sec 13988)

a The commission of an executor or administrator computed under Prob C Sec 901 upon the probate inventory at "date of death" values may be deducted (Sec 13988(a)) *Estate of Skinker* (1956) 47 C 2d 290, 303 P 2d 745.

b The same rule applies to attorneys' fees If executor is a lawyer and elects to act as his own attorney he may claim either the executor's commission or attorney's fee, but not both But see *Estate of Thompson* (1958) 50 C 2d 613, 328 P 2d 1 Should he retain his own firm as counsel he must file an affidavit to establish that he is not to participate in or receive any benefit from the attorney's fee claimed as a deduction (Reg 13988(b)) *Estate of Parker* (1926) 200 C 132, 135, 251 P 907, 909 He may, however, employ another attorney to render the necessary legal service and the latter's fee is a proper deduction *Estate of Graham* (1921) 187 C 222, 201 P 456

c A bequest to the executor in lieu of the statutory commission is not deductible insofar as it exceeds the statutory commission (Reg. 13988(a), 13601-13603(f))

d Expenses of administration (Reg 13988(g)) ordinarily include filing fees, publication of notices, death certificates, certified copies of documents, appraiser's fees, and closing costs Generally, these are rather modest and present no problem The following are not allowable as ordinary expense of administration

(1) California inheritance tax paid by or on behalf of an heir or legatee *Kelso v Sargent* (1936) 11 C A 2d 170, 172, 54 P 2d 26, 26-27, *Estate of Chesney* (1905) 1 C A 30, 33, 81 P 679, 680;

(2) Payments to compromise an actual or threatened suit by a disgruntled or disinherited heir or legatee (*compare* Sec 13409);

(3) Costs incurred defending a will contest;

(4) Costs incurred in connection with contested or litigated claims against estate, the established or compromised claim is allowable as a deduction, however;

(5) Expenses relative to carrying on decedent's business,

(6) Traveling expenses of executor or administrator or his attorney,

(7) Expenses on sale of estate property, unless the sale was directed by will, or was necessary to pay debts or taxes,

(8) If the sale is necessary, and the sale price is at or below the appraised value, the difference between the net proceeds and the appraised value is allowable as a deduction,

(9) Amounts expended for care and upkeep of estate property

D *Extraordinary Professional Fees*

Extraordinary fees, in the usual connotation of the term (e g, suits to recover property, litigated claims, etc), are not allowable as deductions (Sec 13988 1) The extraordinary fees which are allowable are limited to tax work and proceedings to fix inheritance tax, such as costs for

(1) Proceedings under Prob C Sec 1170,

(2) Petition to determine inheritance tax,

(3) Federal estate tax return, negotiation and litigation;

(4) Income tax returns, negotiation and litigation

Such fees are allowable only for work actually performed, and if they are charged by and paid to the executor, administrator, or the executor's attorney or accountant There is no fixed fee schedule, but the fee must be fair and reasonable It may be allowed as a deduction prior to the actual fixing by the court It is not allowable if the services are minor in character and compensated in the statutory fees *Estate of George E Tubbs* (1947) 82 C A 2d 305, 309, 186 P 2d 7, 10

E. *Federal Estate Tax as to Decedents Dying Prior to 5 05 p m, June 24, 1959*

1 Any amount due or paid to the United States as federal estate tax is allowable as a deduction Computation of the deduction is limited to property subject to the California inheritance tax, and the computation is based upon the appraiser's valuation of that property Property located outside of California may not be included in the making of this computation *Estate of Guthman* (1954) 125 C A 2d 408, 270 P 2d 875 The marital exemption (Sec 13805) is treated as an exclusion for the purpose of this computation

2 The allowable deduction is the amount actually paid the United States as finally determined, or the appraiser's computation of the federal estate tax, whichever is the lesser amount *Estate of Slack* (1948) 86 C A 2d 49, 194 P 2d 61 The 1957 amendment gives the court continuing jurisdiction to amend the order fixing tax for this purpose only Even though not yet actually paid, the deduction is allowable if it appears "due" in the sense that it will be paid *Estate of Slack, supra.*

3 Apportionment may be avoided by an appropriate provision in the will directing that the federal estate tax be paid out of the residue (Prob C Sec 970 and following) A similar provison in the will relating to inheritance taxes amounts to a bequest of inheritance tax, however

As to decedents dying after 5 05 p m , June 24, 1959 , Section 13989 is repealed and no deduction is allowable for Federal Estate Tax paid Constitutionality of repeal of Section 13989 was upheld in *Estate of Fabris* (1962) 200 C A 2d 408

F *Nonresident Decedents*
If ancillary administration is had in California and the assets subject to domiciliary administration are sufficient to discharge debts and expenses, i e , *the domiciliary estate is solvent*, none of the debts, charges and expenses are allowable as deductions, except those directly chargeable to the California estate, i e , administrator's commissions and attorney's fees based upon the California estate, and the California expenses of administration. (Reg 13981-13982(b))

G *Deductions Erroneously Allowed*
An order fixing tax may be amended to fix supplemental tax on amount of erroneous over allowance of deduction (Sec 13984) No statute of limitations runs against the state

VI. Exclusions

A *Community Property*

1 Identification of community property to be excluded There is no presumption that any property acquired by a decedent after marriage is community property. (Sec 13556) The inheritance tax presumption is the opposite of the Civil Code presumption A spouse claiming community property has the burden of proof, and must file a Community Property Affidavit, Form No 3 See *Estate of Raphael* (1949) 91 C A 2d 931, 206 P 2d 391. The definition of "separate property" in C C Secs 162 and 163 is closely followed See *Estate of Caswell* (1957) 152 C A 2d 195, 312 P 2d 703 Following is the method used for identifying community property

(a) Separate property of the decedent (and surviving spouse if inter mingled) is first identified and segregated ,

(b) Proceeds and earnings are traced and segregated ,

(c) If tracing is impossible or impracticable, separate property is capitalized at simple interest of 4 percent per annum from date of marriage or acquisition to date of death ,

(d) The balance is community property
See *Estate of Mendenhall* (1960) 182 A C A 524 and *United States* v *Stewart*, 270 F 2d 894 (cert den) re includability of wife's half cash surrender value insurance on life of husband where premiums paid with community earnings

2 Community property passing to husband on wife's death
On the death of the wife, no part of the community property passing to the husband is subject to the tax All of the community property devised or bequeathed to a person other than the husband is subject to the tax (Sec 13551(b))

3 *Community property passing on husband's death*
On the death of the husband none of the community property which passes outright to the wife, whether by the laws of succession, the decedent's will or by election, is subject to tax If, however, the husband's will gives the wife a life estate in his one-half of the community property, or gives her a power of appointment, the life estate or the property subject to the power is subject to tax (Secs 13551, 13552, as amended 1961) All of the community property devised or bequeathed to a person other than the wife is subject to the tax

4 Community property transferred other than by will or the laws of succession
If one spouse transfers community property other than by will or the laws of succession outright to the other, none of the property so transferred is subject to tax If, however, the husband is the transferor, and the wife is given a life estate, with remainder in another, or a power of appointment, the life estate or the property subject to the power is subject to tax. (Sec 13554) The "harsh" rule of *Kirk-*

wood v *the Bank of America* (1954) 43 C 2d 333, 273 P. 2d 532, which limited the community exclusion of the wife-transferee of old type community property transferred to her and a third person to one-half of what she received, rather than one-half of the total, was eliminated by amendment in 1955 There is no longer any distinction between the old type and new type community property so far as inheritance tax is concerned (Sec 13557, 1957 amendment)

B *Nonnative Son Property—Prob C 201 5 Property*

One-half of any property to which Prob C Sec 201 5 is applicable and which goes to the surviving spouse, is subject to tax (Sec 13555(a) (amended 1957)) By contrast no community property passing outright to the surviving spouse is subject to tax Sec 13551.

The one-half of any Prob C Sec 201 5 property which belongs to the surviving spouse is not subject to tax (Sec 13555(b))

None of the property restored to the decedent's estate under Prob C Sec. 201 8 is subject to tax (Sec 13555(b))

Any person who claims certain property in Prob C Sec 201 5 property has the burden of proving that it is such (Sec 13556 5)

See this Outline VI A 1. above

Where a married person by his will presents the surviving spouse with an election, and the surviving spouse elects to take under the will, the exclusion is the value of the property received by the surviving spouse by virtue of such election, subject, however, to a maximum exclusion of

(a) One-half of the value of Prob C Sec 201 5 property, and

(b) Full value of Prob C Sec 201 8 property (Sec 13552 5)

The same rules apply to transfers other than by will or the statutes of succession (Sec 13554 5 (1957))

See, *Rights of a Surviving Spouse in Property Acquired by a Decedent While Domiciled Outside California* by Abel, Barry, Halsted and Marsh, (1959) 47 Calif Law Rev 211

See, also, *Paley* v *Bank of America* (1958), 159 C A 2d 500

C *Insurance Exclusion*

Insurance proceeds payable to a named beneficiary or beneficiaries up to the amount of $50,000 are not subject to the tax See the Outline III. E. 2.

VII. Exemptions

A *In General*

Exemptions must be distinguished from deductions and exclusions Exemptions are a part of the tax computation and have the effect of exhausting a part at least of the lower tax brackets, thus throwing the balance of the property into higher tax brackets (Sec 13403) See *Estate of Harrison* (1952) 110 C A 2d 717, 243 P 2d 528.

B *Specific Exemptions*

There are four classes of transferees

Class A · Husband, wife, lineal ancestors, lineal descendants, adopted and mutually acknowledged children and their issue, and adopted children of lineal issue of the decedent (Sec 13307), *Estate of Radovich* (1957) 48 C 2d 116, 308 P 2d 14, *Estate of Teddy* (1963) 214 A C A 126 (mutually acknowledged child),

Class B Brother or sister of the decedent, descendants of a brother or sister, wife or widow of a son, and husband or widower of a daughter (Sec 13308),

Class C Brother or sister of a father or mother of the decedent, and descendants of brother or sister of father or mother of decedent (Sec 13309);

Class D All other transferees (Sec 13310);

The specific exemption is measured in dollars and varies according to the class into which the beneficiary falls.

Class A. Minor child, $12,000; all others, $5,000 (Sec. 13801);

Class B $2,000 (Sec 13802);

Class C $500 (Sec 13803);
Class D $50 (Sec 13804)

The rates of tax are also graduated according to class, with the lowest rates to class A beneficiaries and the highest rates chargeable to class D beneficiaries The rates are also graduated according to the amount received by each beneficiary, with the lowest rate in the under $25,000 bracket and the highest in the over $500,000 bracket (Secs 13404 to 13407)

Important Chapter 1128, Stats 1959, effective 5 05 p m June 24, 1959, amends Secs 13406 and 13407, increasing the rates of tax applicable to class C and class D beneficiaries, respectively Statutes of 1961, p. 4531, amended a schedule setting forth the exemptions and rates of tax as set out at page 29 hereof; Sec 13405, increasing rates of tax applicable to class B beneficiaries

C *Marital Exemption*
An exemption equal to one-half the clear market value of decedent's separate property is allowed to the spouse of the decedent (Sec 13805) There is no terminable interest rule. The surviving spouse does not have to take any of the separate property for the exemption to apply It will extend to any other property devised or bequeathed to the surviving spouse The amount of the exemption is one-half the clear market value of the decedent's separate property, computed after the federal estate tax is deducted *Estate of Law* (1958) 50 A C 279, *rehearing denied* 325 P 2d 449

D. *Charitable Exemption*
(Secs 13841 and 13842)

1 Transfers to the United States, the State of California, a California public corporation or a society, corporation, institution, or association exempt from taxation by California law, are exempt from inheritance tax Although the inheritance tax law exempted from taxation transfers to the United States, the Supreme Court of California held, in *Estate of Burnison* (1948) 33 C 2d 638, 204 P 2d 330, *aff'd* 339 U S 87, that the United States could not take by will in California under Prob. C. Sec. 27. That section has since been amended to include the United States

2 Transfers to any society, etc., operated solely for religious, charitable, scientific, literary, or educational purpose, not operated for private profit or engaged in propaganda, are exempt from taxation provided any of the requirements listed below is met.
   a That the society, etc, is organized under the laws of California or of the United States (Cf *Estate of Barter* (1947) 30 C 2d 549, 184 P 2d 305,
   b That the transferred property is limited for use in California (*Estate of Fleming* (1948) 31 C 2d 514, 190 P.2d 611); or
   c That the society, etc, is organized under the laws of another state, the other sovereignty either
      (1) Did not impose a death duty, or
      (2) Had in its laws a reciprocal provision similar to California
   See *Estate of Baxter* (1950) 100 C A 2d 397, 223 P 2d 877; *Estate of Bendheim* (1950) 100 C.A 2d 398, 223 P.2d 874.

3 It is not necessary that the charitable corporation be in existence at the date of death, i e, one may, in California, by his will create a charitable organization. *Estate of Irwin* (1925) 196 Ch 366, 237, p 1074

E *Other Exemptions*

1 Although included within Chapter 5 of the inheritance tax law, the following "exemptions" are, in reality, exclusions certain intangible personal property belonging to a deceased nonresident of California; war risk insurance, the armed services exemption, and death benefit payments.

2 Intangible personal property belonging to a deceased nonresident of California is not subject to tax if the other state did not impose a death tax with respect to intangible personal property belonging to a deceased resident of California, or the other state had in its laws a reciprocal provision similar to California's (Sec 13851)

3 War risk insurance, *i e*, National Service Life Insurance, is not subject to tax if it is payable to the estate of the deceased veteran (Sec 13861) If such insurance is payable to a named beneficiary it must be aggregated with other insurance and included therewith in applying the $50,000 insurance exclusion.

4 Where the decedent was a member of the armed forces of the United States between Sept 16, 1940 "and the termination of all wars in which the United States is now engaged," and death was service connected, property transferred to persons within class A, B, or C is not subject to tax The transferee must be a dependent of decedent, and death may not be the result of wilful misconduct The "exemption" is applicable only to resident decedents or transferees (Secs 13871 to 13873)

5 Death benefit payments and return of employees' contributions, made under a *public* pension or retirement system to a named beneficiary or to the estate of a deceased employee are not subject to tax Section 13880 was, in effect, a legislative overruling of *Estate of Simpson* (1954) 43 C 2d 594, 275 p 2d 467, and *Estate of Richartz*, (1955) 45 C 2d 292, 288 p 2d 857. See this Outline, III E. 3.

VIII. Computation of the Tax

A. *The Inheritance Tax Proper*

Market value (Sec 13311) or gross estate value less allowable deductions equals "clear market value" (Sec. 13312)
This total is allocated among the heirs or devisees or legatees according to the statutes of succession or the will, depending upon whether the decedent died intestate or testate All transfers to a particular beneficiary are aggregated and the appropriate exemption, depending upon the beneficiary's relationship to the decedent, is deducted therefrom and the balance is multiplied, by brackets, by the appropriate rates of tax

1 All transfers to the same person (inter vivos gifts, joint tenancies, bequests, devises, etc) are aggregated, and the tax is computed on the total, as though there was but a single transfer (Sec 13408) *Estate of Childs* (1941) 18 C 2d 237, 115 p 2d 432.

2 If a legatee or devisee under a will or an heir renounces his rights, or agrees that the estate be distributed other than under the will or the laws of succession, the tax is computed in accordance with the will or the laws of succession, depending upon whether decedent died testate or intestate, and not according to the renunciation or agreement (Sec 13409) *Cohn* v *Cohn* (1942) 20 C 2d 65, 68, 123 p 2d 833, 835, *Estate of Rossi* (1915) 169 C 148; 146 p 430, *Estate of Holt* (1923) 61 C A 464, 469, 215 p 124, 125-126, *Kelso* v *Sargent* (1936) 11 C A 2d 170, 54 p 2d 26

3 If a transfer is subject to a contingency (future interests), the tax is computed at the highest contingency A refund may be had, however, upon the happening of the contingency, where the tax was paid on high contingency (Secs 14411 to 14414) See, however, *Estate of Off* (1956) 146 C.A 2d 516, 304 p 2d 126 The Controller may compromise the tax where contingency is present (Sec 14191) In such case the court order is a final determination, and no refund is permitted upon the failing in of the interests (Sec 14192)

B *Additional Tax—"Pickup" Tax*

(Secs 13441 and 13442)

1. In a case where the credit for inheritance tax paid the state under the federal estate tax law exceeds the inheritance tax payable to the state, an additional tax is imposed equal to the difference between the

maximum federal credit and the inheritance tax. (See *Estate of Good* (1963) 213 A C A 2d.)

2 In a case where, due to the exclusions and exemptions, no inheritance tax would normally be owing to the state (*e g*, wife deceased, all community property in name of the husband, and wife dies intestate or leaves a will bequeathing her share of the community property to the husband), a tax is imposed equal to the maximum credit allowed under federal estate tax law. (Sec 13442)

3. By the provisions of Sec 14161 a discount equal to 5 percent of the amount of tax is available for prompt payment, *i e*, payment within six months of the date of death The discount provision does not apply where an additional tax is imposed under Secs 13441 and 13442 (Sec 14161) The reason for this rule is that under the federal estate tax law, the executor can get credit only for the exact number of dollars actually paid to the state

4. The pickup tax becomes delinquent at the expiration of two years from date of death or at the expiration of six months from the final determination, whichever is later (Sec 14103)

IX. Credits

A. *Previously Taxed Property*

1. (Sec 14071, 1957) Prior to Sept 11, 1957, there was a "previously taxed property" exemption in the law (Secs 13821 to 13824, repealed 1957) which required each item to be traced from prior estate into present estate, and identified As to the effect of the then exemption, see this Outline VII A

2 Under the present law, the decedent must have been a class A beneficiary in a prior estate, and the beneficiary in the present estate must be a class A beneficiary to the present decedent The two deaths must occur within a five year period, and an inheritance tax must have been paid in the prior estate, but no additional (pickup) tax (Secs 13441 and 13442) need have been paid The formula for computation is prescribed by Sec 14071(b) The credit so computed is deducted from the inheritance tax computed without reference to the credit

B *Gift Tax Credit*

If the same transfer is taxed both under the gift tax law and under the inheritance tax law a credit is allowed against the inheritance tax for the gift tax paid The formula for computation of gift tax credit is prescribed by the statute If the decedent had neglected to file a gift tax return and paid the tax where required prior to his death, the amount paid by the executor after death is an allowable deduction Should the same transfer also be taxable under inheritance tax law, the credit is allowable It follows, therefore, that the same payment may be used twice to reduce the inheritance tax (Secs 14051 to 14059)

X. Payment of the Tax

A. *When and to Whom Payable*

The inheritance tax is due and payable as of the date of death (Sec 14102) and must be paid within two years, at which time it becomes delinquent if unpaid (Sec 14103) It is payable to the county treasurer (Sec 14104) The executor, administrator, or trustee must collect the tax, or withhold it from the transferee, and is responsible for its payment (Secs 14101 and 14121) Where a life estate with a remainder over has been created, the tax is payable out of the property itself, and is not collected from either transferee (Secs 14123 and 14124) The same rule applies to a transfer subject to a contingency (Sec 14125) The personal representative may sell estate property to pay the tax (Sec 14127) The additional (pickup) tax (Secs 13441 and 13442) is also payable to the county treasurer. (Sec 14126) It becomes delinquent at the expiration of two years from date of death or six months after the final determination of the federal estate tax, whichever is later (Sec. 14103) No discount is allowable. (Sec 14161.)

B *Discount (Sec 14161)*

If the inheritance tax (no additional tax being due) is paid within six months of the date of death a discount equal to five per cent of the amount of tax is allowed No discount is allowed where the California tax is the pickup tax See *Estate of Harker* (1948) 88 C A 2d 6, 198 P 2d 51, and the subsequent amendment to C.C P. Sec 12a.

C *Deferment of Payment*

Where a transfer has been made subject to a contingency, payment of a portion of the tax may be deferred upon posting of a bond (Secs 14171 to 14178) Preferred practice in contingency cases is to request the appraiser to compute tax on both a normal and high (Sec 13411) contingency and then to compromise the tax by adding an agreed sum to the normal tax (Sec 14191), thus closing the matter. Should the "spread" between the normal and high contingency be so large as to preclude a "fair" compromise both as to taxpayer and the state, the following two avenues are open.

(1) The executor may show both computations in the report, pay the tax on the high contingency, and apply for a refund, if proper, upon the resolving of the contingency (Secs 14401 to 14403); or

(2) He may pay tax on the normal contingency, and post a bond against the difference between the normal and the high contingency

D *Interest*

If the tax is not paid prior to the date upon which it becomes delinquent (two years from the date of death) it is subject to simple interest at six per cent per annum from the delinquency date until paid. (Sec 14211) All payments upon a delinquent tax are applied first to the satisfaction of interest, and the balance, if any, to the tax itself. (Sec 14221)

In a proper case, the Controller may require the filing of a delinquent tax bond

E *Payment of Tax and Interest, a Prerequisite to Distribution*

1 The account of an executor, administrator or trustee cannot be approved or settled until the tax has been paid and a receipt, countersigned by the Controller is in the file (Sec 14143) A probate estate cannot be distributed (Prob C Sec 1024) nor can a decree establishing fact of death be made (Prob C Sec 1174) unless the inheritance tax and accrued interest, if any, have been paid in full. *Becker* v. *Nye* (1908) 8 C A 129, 96 P 333 Payment of the tax is established by the presence in the file of the original receipt of the county treasurer, countersigned by the Controller or his deputy (Sec 14142)

2 Upon receipt of payment of inheritance tax the county treasurer executes a receipt, upon the prescribed form, in quadruplicate (Sec 14141) Distribution is as follows

(a) The fourth copy is retained by the county treasurer for his records,

(b) One copy is delivered to the person paying the tax,

(c) The original receipt and one copy is forwarded to the Controller in Sacramento.

If the ledger account which was set up at the time the Report of the appraiser is balanced by the payment, the original receipt is countersigned by a deputy Controller and forwarded to the county clerk for filing in the proceeding (Sec 14142)

F *Refund*

1 Refunds are generally occasioned by payments made to secure the prompt payment discount of 5 percent, and usually arise by reason of a premature estimate of the tax without according proper weight to the many factors which might reduce the tax This accounts for perhaps 90 percent of all applications for refunds

2 The present procedure to be followed in applying for a refund
Prepare the application alleging the payment, the amount of tax found due reduced by the discount allowable, if any, show the difference, and pray that the State Controller draw his warrant upon the State Treasurer in favor of the person paying the tax Distribution
(a) Forward to the Inheritance Tax Department in Sacramento the original and one copy of the application and the form of order directing refund,
(b) If approved, the original application and original form of order directing refund will be stamped with an approval and waiver of notice of time and place of hearing, the order directing refund may then be obtained ex parte,
(c) Three "conformed" or "endorsed" copies of the order fixing tax should be served upon or delivered to the State Controller at his Sacramento office

The 1959 Legislature amended Secs 14361, 14373, 14383, 14391, 14392, 14403, 14413, 14423, and 14428, effective Sept 18, 1959, to provide that the State, rather than the County Treasurer to whom the payment on account of tax was made, shall make the refund to the person paying the tax Application for refund must still be filed, and refund may be made only upon order of the superior court having jurisdiction.

3 Refunds for reasons other than as above may require a recomputation of the tax See Ch 10, Sec 14361 and following of the inheritance tax part of the Revenue and Taxation Code

Important · The 1963 Legislature by amendments to the inheritance tax law greatly simplified the refund procedures to permit the State Controller to process refund applications without the necessity of a court order Prior to the 1963 amendments Chapter 10 of Division 2, *Part 8 of the Revenue and Taxation Code embraced eight different* articles, all dealing with inheritance tax refunds in specified fact situations Superfluous sections (Section 14381-14388, 14401-14403, 14411-14414, 14426-14428, and 14421-14424) were repealed eliminating the specified types of direct refund The new law, by amending Sections 13956 and 13411 and adding Sections 13443 and 14371, gives the taxpayer the right to have the order fixing tax amended to reflect the correct amount of tax due

All refunds may now be obtained under the regular procedure provided in Sections 14371-14375 (overpayment in excess of correct order fixing tax) The person entitled ot the refund applies directly to the State Controller on a form provided and after audit and approval the refund is paid by the State Treasurer

The old procedure is retained in the law to afford the applicant an alternative method should dispute develop with respect to the amount or the legality of the refund

XI. Practice and Procedure

A *Appraisers*

1 The Controller must appoint at least one person in each county to act as inheritance tax appraiser for that county (Secs 14771 to 14774) Larger or more populous counties may have several inheritance tax appraisers The appraiser has no power to act except upon order of the court in a particular case

2 Court must appoint an inheritance tax appraiser in every probate proceeding (Prob C Sec 605), in every proceeding to establish the fact of death (Prob C Sec 1174) and in every proceeding for determination of inheritance tax (Sec 14501 and following)

3 Appointment of an appraiser by the court in particular proceeding imposes the duty to ascertain and report to the court the clear market value of all transfers and the amount of tax due (Sec 14501) Upon

such appointment the appraiser becomes a referee of the court with power to issue subpoenas, require attendance of witnesses, production of records, etc (Secs 14502 to 14505)

B *Normal Probate Procedure*

1 An original and two copies of the inventory must first be submitted When the original inventory and appraisement is returned, the following must be submitted to the appraiser

(a) Form 22, the inheritance tax affidavit; it must be carefully and accurately filled out in detail, an incomplete or inaccurate Form 22 is the single most important cause of delay in processing the report.

(b) Form 3, the community property affidavit, where required,

(c) The will and all codicils;

(d) The inventory and appraisement if not already in the hands of an appraiser;

(e) A copy of any trust instrument executed by or under which the decedent may have been a beneficiary,

(f) Any other pertinent or useful information A hearing before a department attorney may be required if the estate exceeds $200,000 gross or if problems exist

2 The appraiser drafts and submits the proposed report to the department for examination and audit It is to be noted that the appraiser is an independent officer of the court, he is not an employee of, nor is he subject to, the inheritance tax department He may file his report irrespective of department approval

3 Upon receipt of department approval of his report or at his own discretion, the appraiser files his report with the court If no objection is filed, at the expiration of 10 days from the filing of the report, the appraiser procures an order fixing tax (Sec 14509)

4 Should the executor, administrator or any of the beneficiaries, or the department be not satisfied with the report, any of them may file objections to the report following its filing and before the order fixing tax is made (Sec 14510) If objections are filed, trial is had in the Probate Court which enters its order overruling or sustaining the objections, as the case may be (Sec 14513) On the hearing of objections the objector is the "plaintiff," and the report is presumed to be correct *Cf Estate of Cunningham* (1957) 148 C A 2d 8, 305 P 2d 920

C *Petition to Establish Fact of Death or Determine Inheritance Tax*

Upon filing of the petition, the executor or his attorney should procure an order appointing the inheritance tax appraiser and submit to him a copy of the petition, the Form 22 Inheritance Tax Affidavit, and the Form 3 Community Property Affidavit, if the latter is pertinent The processing is the same as indicated in this Outline XI B

D *Miscellaneous*

1 Tax Lien Imposed.

a A lien is imposed upon all property subject to inheritance tax, which lien remains until the tax and interest are paid in full (Sec 14301) The statute of limitations is five years where property subject to lien is sold to bona fide purchaser, mortgagee, etc (Sec 14303) If property subject to lien is sold on probate sale, the lien on such property is extinguished and the lien attaches to proceeds of sale (Sec 14304)

b Release of the lien may be granted by the Controller, inheritance tax attorney, or the appraiser upon proof that no tax is due (Sec 14307) or by the Controller or the inheritance tax attorney if sufficient security is posted (Sec 14308) A certificate is issued as evidence of the release of the lien

2 Termination of Joint Tenancy

Following is the procedure for termination of a joint tenancy in real property by the affidavit method

(a) Submit to department or appraiser Form 22 affidavit and Form 3 Community Property Affidavit, if requested by department,

(b) Copy of "Affidavit—Death of Joint Tenant" (Land Title Ass'n Form) or description of property, date of deed and page of recordation and recorder's number;
(c) Appraisal of property by inheritance tax appraiser or evidence of sale price on pending sale;
(d) If it appears that no inheritance tax is due, or that it is amply secured, the certificate will issue;
(e) Recordation of "Affidavit—Death of Joint Tenant," a certified copy of death certificate, and the department certificate releasing inheritance tax lien will satisfy the title company;
(f) Generally, this simplified procedure is not available where a tax is due and there is no proceeding pending in which the tax may be determined, under such facts a proceeding under Prob C Sec 1170 should be instituted

3 Consent to transfer and withholding by third persons
No bank, corporation, depositary, etc, may transfer any asset belonging to a decedent, or an asset in which a decedent had an interest, without retaining a sufficient portion or amount to pay any tax and interest, or without first securing consent to transfer In actual practice the withholding privilege is rarely used In the case of the contents of a safe deposit box or drawer, the contents are listed by the county treasurer and consent to transfer is then given (Sec. 14344) Burial instructions or the will may be removed, however, prior to listing and consent by the county treasurer (Sec. 14344) Consent to transfer is required prior to the transfer of corporate stock. (Sec. 14341) This same requirement applies to bank accounts generally However, it is relaxed in the following instances·
(a) Prob C. Sec. 630 cases,
(b) Where a husband and wife joint tenancy accounts are up to $5,000, in this situation the bank must give notice to the Controller;
(c) Where the decedent was a California resident, and there is a California probate proceeding; the bank must give notice to the Controller.

4 Informal or extra judicial determination of the tax
Where the assets transferred, or passed by survivorship consist of a bank account or shares of listed stock, and where the amount or value and the tax are relatively small, the tax may, by tradition (but *not* by statute), be fixed by "report letter" by department attorney. Form 22 affidavit must be filed with department The tax is paid to the county treasurer. If computation is erroneous, or overpayment made, there can be no refund, since there is no court proceeding

XII. Administration

The State Controller is vested with the responsibility for administration of inheritance tax law (Rev. & Tax C Sec 14732) The Inheritance Tax Department, set up under Sec. 14731, is under the authority and direction of the State Controller. (Sec 14733) The inheritance tax attorney (chief) with offices in Sacramento (Sec 14736) is in charge of the legal work and has general supervision of the department (Sec 14738) District offices are maintained in Sacramento (five attorneys), San Francisco (six attorneys), and Los Angeles (10 attorneys) The department is not a tax-collecting agency; rather it administers and enforces inheritance tax law It advises appraisers, county treasurers, attorneys, trust officers, title examiners, taxpayers, and the general public in all matters affecting inheritance tax It issues rules and regulations, it records, compiles, and publishes statistics relating to inheritance tax

CALIFORNIA GIFT TAX

CALIFORNIA GIFT TAX

I. Historical Background

The original enactment of the California gift tax can be found in Stats 1939, Ch. 652, effective June 21, 1939. It was codified in 1943 (Stats 1943, Ch 658, effective July 1, 1945) and can be found in Sections 15101 to 16652 of the Revenue and Taxation Code

II. Jurisdiction to Tax

A. *Resident Donors*

Where the donor is a resident of the State, all real property and intangible personal property within the State, and all other personal property "the transfer of which this State may constitutionally tax," is subject to the tax

B *Nonresident Donors*

Where the donor is not a resident of the State, all real property within the State, and "all intangible and other personal property the transfer of which this State may constitutionally tax," is subject to the tax

III. Transfers Taxable

The transfer of any property, interest therein, income therefrom, in possession or enjoyment, present or future, in trust or otherwise, directly or indirectly, made with a donative intent, is taxable (Sec 15104) By contrast, under the federal gift tax which does not require "donative intent," it is sufficient to establish taxability if made without adequate and full consideration, not in the course of business A revocable transfer not normally taxable, becomes taxable upon the relinquishment of the power of revocation (Sec 15105) If the transfer is made for less than adequate and full consideration, excess value over the consideration paid is value of transfer (Sec 15106) Payment of tax by the donee is not consideration (Sec 15107) The creation of a joint tenancy between husband and wife in real property does not constitute a taxable transfer, unless the donor elects to treat it as a gift, and then it is not taxable until the joint tenancy is terminated (Note Sec 15104 5, enacted 1957, effective Sept. 11, 1957, is the California version of a similar federal provision)

IV Valuation

Property transferred is valued as of the date of the gift (Sec 15551) The method of evaluating gifts of future interests is similar to that used for inheritance tax purposes (Secs 15552 and 15553) If the annuitant or the life tenant dies prior to the issuance of determination of the tax, the value of the annuity or the life interest is the amount actually paid (Sec 15554) If the donor dies before the filing of the gift tax return, his executor or administrator may elect, if the transfer is also subject to an inheritance tax, to have the transferred property valued by an inheritance tax appraiser (Secs 15571 to 15577)

V. Deductions

The actual consideration paid in money or money's worth, is deductible from the total value of the property transferred (Sec 15106) Where property is transferred subject to an encumbrance which is assumed by the donee, it is deductible from the value of the property transferred

VI. Exclusions

A *The Annual Exemption*

The annual exemption of $4,000 is subtracted from the value of the property transferred leaving as a result the "net gift" (Secs 15118 and 15401) However, the annual exemption is not always allowable if the gift is a future interest (Sec 15402) Gifts to minors within the "Gifts to Minors Act" qualify for the annual exemption (Sec 15402(a), 1957 as amended) In a case of conversion of separate property into community property, the second half is subject to a gift tax on the death of the spouse whose property it was, without the annual exemption (Sec 15402(b))

B *Community Property Transferred*

On transfer by one spouse to the other one-half is not subject to tax the other one-half is taxable (Sec 15301) On transfer to a third person, each spouse is donor of one-half value of the property transferred (Sec 15302) There is no distinction, for gift tax purposes in the interest that the wife acquires in community property whenever acquired (Sec 15304) It is always treated as new type community property A person claiming transferred property in community must establish that as fact (Sec 15306) Form GT3, community property affidavit, must be filed

C *Conversion of Separate Property into Community*

Where separate property of either spouse is converted into community property, one-half is subject to tax at the time of the transfer (Sec 15303(a)) The other one-half is subject to gift tax, without annual exemption, on the death of the spouse whose property it was, but not to inheritance tax (Sec 13573) (Sec 15303(c)) Caveat It is unwise in the present state of the law to convert separate property into community property by inter vivos transfer, for this results in 100 percent of such property being subjected to tax If the one spouse leaves separate property to the other by will, only one-half is taxed (Sec 13805)

D. *Quasi-community Property*

Section 15300, enacted 1961, defines quasi community property as property acquired by either spouse while domiciled elsewhere which would have been community property of the husband and wife had the property been acquired in California It is the same type of property as referred to in Section 201 5 Probate Code Under Sec 15301, if one spouse transfers *quasi-community property to the other, one-half the property* is subject to gift tax providing the same rule as for a similar transfer of community property The donor must prove the nature of the property transferred (Sec 15306) (Form GT-3) If quasi-community property is transferred to a person other than a spouse, the spouse owning the property is the donor or, if both elect, each shall be considered to be the donor of one-half (Sec 15302 5) The spouses may convert quasi-community *property into community property or into property held by the* spouses as joint tenants or as tenants in common with equal interests without gift tax consequences Sec 15303 5) If, however, the quasi-community property converted into community property was owned (held

in the name of) by the wife, one-half thereof would be subject to gift tax on her death

VII. Exemptions and Rates

The specific exemptions and rates of tax are precisely the same as under the inheritance tax law See schedule, page 29 (Secs 15110 to 15113; 15205 to 15208, and 15421 to 15424) Specific exemptions are not allowed where the donor is an alien nonresident of the United States (Sec 15425) The specific exemption is applied as gifts are made Application may not be deferred to later years (Sec 15426) By contrast, the federal $30,000 specific exemption may be applied at the will of the donor The charitable exemption is similar to the inheritance tax exemption (Secs. 15441 and 15442) The intangibles exemption is also similar to the inheritance tax exemption (Sec 15451)

VIII. Returns

A *The Donor's Return*

The donor must file a return between January 1 and April 15 following the calendar year in which the gift was made (Sec 15651) The return will not be accepted until the close of the year in which the gift was made The Controller may grant an extension of time not exceeding six months (Sec 15652) The Controller may make an arbitrary determination (Sec 15654)

B *The Donee's Return*

Formerly the donee was required to file a donee's return (Sec 15671) This has been obviated by the donee's signature to "Schedule D" of the current form

C *Penalties for Failure to File Return*

If no return is filed as required, a penalty equal to 5 percent of amount of tax is added to the tax. (Sec 15681) Interest is computed upon tax and penalty at 7 percent per annum beginning June 15 in the year following that in which the gift was made (Sec 15684 5)

D *Fraudulent Return*

The penalty is 25 percent of the amount of the unreported tax (Sec 15682) A willful failure to file return may subject the donor to a penalty of $1,000 (Sec 15685)

IX. Computation of the Tax

(See Sec. 15204) Where there are no prior gifts.

(1) the market value of the gift
(2) (less) the annual exemption
(3) (equals) the net gift
(4) (less) the specific exemption
(5) (equals) the amount subject to rates
(6) (times) the rates
(7) (equals) the gift tax due

Where the donor has made prior gifts

(1) the new gifts for the calendar year
(2) (plus) the new gifts to same donee for all prior years
(3) (equals) the total net gifts
(4) (less) the specific exemption
(5) (equals) the amount subject to rates
(6) (times) the rates
(7) (equals) the total gift tax
(8) (less) the gift tax heretofore paid
(9) (equals) the gift tax currently due

X. Determination

A. *When Issued*

If the return is filed in time, the determination of the tax must issue within three years from the date the return is filed (Sec 15801) If no return is filed or the return is false or fraudulent, a determination may be issued any time (Sec 15802)

B *When the Determination Becomes Final*
The determination becomes final at the expiration of 60 days from notice of the determination (Sec 15804) and has the force and effect of judgment in a civil action (Sec 15806), unless (1) the tax is paid (Sec 15908), (2) the action is brought by donor to recover the tax so paid (Sec 15805), and (3) the action is brought within 60 days of notice of determination (Sec. 15804) By 1963 amendment to Sec 16251 the requirement that the tax must be paid "under protest" was deleted as a prerequisite to action for refund

C *When Payable*
The tax must be paid within 60 days of notice of determination (Sec. 15905) If not so paid, it is subject to interest at 7 percent per annum beginning 60 days after issuance of notice of determination (Secs 15905 and 15961) The tax is payable to the State Controller by remittance drawn in favor of the State Treasurer

XI. *Refund*
If erroneous overpayment has been made, a refund may be had by application to the State Controller within one year of the date of payment or determination of the tax (Sec 16221) Interest is not allowed if the overpayment is due to an error or mistake of the taxpayer (Sec 16271) If the overpayment is involuntary, the interest on refund is allowed at 6 percent per annum from the date of payment (Sec. 16272)

INHERITANCE TAX

The 1963 legislation made the following changes in the laws effecting the work of the Inheritance and Gift Tax Division.

INTANGIBLE PROPERTY IN CALIFORNIA OF DECEASED NONRESIDENTS OF THE UNITED STATES SUBJECT TO INHERITANCE TAX

Revenue and Taxation Code Section 13303(b) by specifying what shall be included in the terms "estate" or "property" sets forth the types of intangible personal property of a deceased nonresident of the United States which are subject to inheritance tax Prior to the 1963 amendment the section specifically included as subject to tax, among other intangibles, "all stock of a California corporation" and specifically excluded from tax, bank deposits not used in connection with a business operated in California

The 1963 amendment clarifies what is meant by a California corporation by rewording the section to include stock of a corporation organized in California or which has its principal place of business here or does the major portion of its business here The amendment also extended the bank deposit exclusion to savings accounts in savings and loan associations.

The text of the section as amended:

13303 "Estate" or "property" means the real or personal property or interest therein of a decedent or transferor, and includes all of the following.

(a) All intangible personal property of a resident decedent within or without the State or subject to the jurisdiction thereof

(b) All intangible personal property in California belonging to a deceased nonresident of the United States, including all stock of a corporation organized under the laws of California or which has its principal place of business or does the major part of its business in California or of a federal corporation or national bank which has its principal place of business or does the major part of its business in California, excluding, however, saving accounts in saving and loan associations operating under the authority of the Division of Savings and Loan or the Federal Home Loan Bank board and bank deposits, unless such deposits are held and used in connection with a buiness conducted or operated, in whole or in part, in California

REFUND PROCEDURES

Substantial changes were made in the inheritance tax refund procedures These procedures are set forth in Division 2, Part 8, Chapter 10 of the Revenue and Taxation Code Prior to the 1963 amendments, Chapter 10 embraced eight different articles of from two to seven sections each, all dealing with inheritance tax refunds As amended, Chapter 10 is now composed of a single article of five sections (Sections 14371-14375) The amendments accomplished three primary changes in the law

1 *A single method of obtaining refunds is provided* Under prior law most refunds were obtained under Sections 14371-14373 which covered cases in which the amounts paid to the county treasurer exceeded the amount fixed in the order fixing inheritance tax In five classes of cases, however, the law permitted a refund where the tax fixed and the tax paid were in balance but later events proved the tax to have been fixed in an excessive amount In these cases the law did not provide for amending the order fixing tax but permitted the taxpayer to let the erroneous order stand and apply directly for the amount of refund due The cases in which refunds were obtained in this manner are as follows

a *Sections 14381-14383* Cases involving an additional or "pickup" tax under Sections 13441-13442 in which the credit finally allowed against federal estate tax by the Internal Revenue Service proved to be less than the total state tax which was previously fixed and paid

b *Sections 14401-14403* Cases in which an inheritance tax was fixed and paid without making allowance for a contingency which might defeat or diminish the interest of the transferee pursuant to Section 13956 and in which the contingency happens so as to result in a lower tax.

c *Sections 14411-14414.* Cases in which the tax was fixed and paid at the highest contingency pursuant to Section 13411 and in which the contingencies have resolved themselves in such manner as to produce a lower tax

d *Sections 14426-14428* Cases in which a transferee is entitled to an armed services exemption under Sections 13871-13873 which was not allowed when the tax was previously fixed and paid.

e *Sections 14421-14424.* Cases in which a debt which was not allowed as a deduction in fixing the tax is established after distribution of the estate

The 1963 amendments repealed the sections above enumerated, thereby eliminating this type of direct refund In lieu of the direct refund provided by the repealed sections, the new law, by amending Sections 13956 and 13411 and adding Sections 13443, and 14371, gives the taxpayer the right to have the order fixing tax amended to show the correct amount of tax due The order having been thus corrected, the refund can be obtained in the usual manner under

Sections 14371-14375 (It was not necessary to provide for amendment of the order fixing tax in cases covered by repealed Sections 14421-14424 because this is already provided for in Section 13985.)

2 *Certain sections providing for refunds were repealed as being superfluous* They covered cases in which it was necessary to correct the order fixing tax before the application for refund could be made Since a correct order was required, the refund can be obtained under the regular procedure provided in Sections 14371-14375 The sections repealed as being superfluous were Sections 14361-14362 (refund after order is modified on appeal), Sections 14391-14393 (refund when power of appointment exercised in favor of charity)

3 *The basic procedure for obtaining refunds of inheritance tax was simplified* In order to obtain a refund under prior law, it was necessary for the taxpayer to file a petition in the superior court and obtain the court's order directing the State to pay the amount of refund due Notice of filing the petition had to be given the State Controller After the order was made, copies would be submitted to the Controller and the refund would be paid

This procedure is retained in the law as amended but in addition a new procedure is provided whereby the refund may be obtained by direct application to the State Controller without obtaining a court order (Revenue and Taxation Code Sections 14371-14375) The Controller will furnish forms to be used in making the application Should the Controller refuse to honor the direct application, the taxpayer may follow the old procedure and make application for a court order directing the refund

The text of the amendments which accomplish these changes is as follows

13411 (a) In the case of a transfer made subject to a contingency or condition upon the occurrence of which the right, interest, or estate of the transferee may, in whole or in part, be created, defeated, extended, or abridged, the tax is computed as though the contingency or condition has occurred in such manner as to produce the highest rate of tax possible

(b) Upon the occurrence of the contingency or condition after an order fixing inheritance tax has been entered in which the tax was computed at the highest rate possible pursuant to this section, the court which made the order shall, upon petition after notice to the Controller, modify said order to fix the tax due in accordance with the occurrence of the contingency or condition The petition shall be filed within six months after the occurrence of the contingency or condition

13443 (a) If the amount of the maximum state death tax credit allowable pursuant to the federal estate tax law is later found to exceed the total amount of tax fixed by an order fixing inheritance tax theretofore made, the court which made said order shall, upon petition of the Controller after notice to the persons chargeable with any increased tax, modify it to fix the true amount of additional tax due under this article The Controller's petition for modification may be filed at any time within six months after he has received knowledge that the federal estate tax has been finally determined

(b) If the amount of the maximum state death tax credit allowable pursuant to the federal estate tax law is later found to be less than the total amount of tax fixed by an order fixing inheritance tax theretofore made which included an additional tax computed under this article, the court which made said order shall, upon petition by or on behalf of the persons liable for the tax fixed in said order, after notice to the Controller, modify it to fix the true amount of tax

due under this article The petition shall be filed at any time within six months after the federal estate tax has been finally determined

13874 The court which has made an order fixing inheritance tax in which the exemption provided by this article was not allowed may, upon petition after notice to the Controller, modify said order to make allowance for said exemption The petition shall be filed within one year after the entry of said order or the decree of final distribution in the estate, whichever is later

13956 (a) In determining the value of any estate or interest to the beneficial enjoyment or possession of which there is a person presently entitled, no allowance is made on account of any contingent incumbrance on the estate or interest, nor on account of any contingency upon the happening of which the estate or interest, or some part of it, might be abridged, defeated, or diminished

(b) Upon the taking effect of the incumbrance or the happening of the contingency after an order fixing inheritance tax has been entered in which no allowance was made pursuant to this section, the court which made said order shall, upon petition after notice to the Controller, modify said order to fix the amount of tax due based upon the diminution in value resulting therefrom The petition shall be filed within six months after the taking effect of the incumbrance or the happening of the condition

(Chapter 10 is repealed and Chapter 10 is added)

Chapter 10. Refunds

14371 Any person who has made a payment of tax to the county treasurer in excess of the amount specified in the order or orders fixing tax as finally amended or modified, and as said amount is adjusted pursuant to discount and interest provisions of this part, is entitled to a refund in the amount erroneously paid

14372 An application for the refund shall be made to the State Controller, or shall be filed with the superior court having jurisdiction, within one year after the date of the entry of the order fixing tax or of the decree of final distribution of the estate, whichever is later

Where application for refund is filed with the superior court, notice of the hearing together with a copy of the application shall be given to the Controller.

14373 On proof satisfactory to him that the applicant is entitled to a refund, the State Controller shall draw his warrant upon the State Treasurer in favor of the person who paid the tax in the amount erroneously paid, and the State Treasurer shall refund that amount If an application to the Controller is denied in whole or in part, the applicant may file an application for a determination of the amount of the refund with the superior court having jurisdiction within one year after the date of the entry of the order fixing tax or the decree of final distribution of the estate, whichever is later On proof satisfactory to it that the applicant is entitled to a refund, the court shall by order direct the state to refund to the person who paid the tax the amount erroneously paid

Notice of the filing of such an application to the court shall be given to the Controller

14374 No person is entitled to interest upon any refund allowed by this chapter

14375 A judgment for a refund allowed by this chapter bears interest after the judgment becomes final and the refund is refused upon demand after such final judgment, but then only from the date of refusal

PROCEDURE ESTABLISHED TO INCREASE AMOUNT OF ADDITIONAL (PICKUP) TAX AFTER FEDERAL DETERMINATION

Revenue and Taxation Code Section 13443 was added to the law as one of the measures necessary to effectuate the changes in refund procedures previously described This new section also provides a procedure which permits the Controller to have the order fixing tax modified if the final federal estate tax determination results in a federal credit in excess of the tax fixed Under prior law, the taxpayer had a remedy, i e , by obtaining a refund under Sections 14381-14383 if the credit proved to be less than the tax fixed but there was no

procedure enabling the State to pick up the excess in cases where the credit proved to be larger than the tax fixed.

The text of the amended section is set forth under changes in Refund Procedures.

CASUALTY LOSS DEDUCTION

A new section, 13991, was added to the Revenue and Taxation Code providing for allowance of casualty losses as a deduction in computing inheritance tax. The loss must be uncompensated for by insurance and must occur prior to the date of entry of the order fixing tax or prior to one year from the date of death, whichever is earlier. Under prior law no such deduction was allowable.

The text of the new section:

13991. Any net loss, not compensated for by insurance or otherwise, which shall occur as to any property included in any transfer subject to this part made by the decedent, shall be deductible from the appraised value of such property, subject to the following limitations:

(a) Such loss shall have been caused by fire, earthquake, landslide or other casualty.

(b) The cause of such loss, as specified in subsection (a) of this section, shall have occurred after the date of death of the decedent but prior to the date of the making of the order fixing tax, or prior to one year from the date of death, whichever is earlier.

PETITION FOR DETERMINATION OF INHERITANCE TAX—CHANGE IN PROCEDURE

Prior to the 1963 legislation when the taxpayer filed a petition under Revenue and Taxation Code Section 14551 to have the inheritance tax determined upon inter vivos transfers, the court was required to set a time and place for an inheritance tax hearing before the appraiser. The 1963 amendment to Section 14552 deletes this requirement.

The text of the section as amended:

14552 Upon the filing of the petition the court shall, by order, designate and appoint an inheritance tax appraiser to ascertain and report to the court the amount of tax, if any, due and payable on the transfer for which the petitioner is liable. Upon the entry of such order, the petition and the matter to which it relates shall be deemed referred to such appraiser for all purposes.

COURT COSTS IN INHERITANCE TAX PROCEEDINGS

Revenue and Taxation Code Section 14675 was amended to permit court costs to be awarded against the State in inheritance tax proceedings. The amendment deleted the clause of Section 14675 which prohibited the awarding of such costs.

Text of the section as amended

14675 No fee shall be charged the Controller for filing, recording, or certifying any petition, lis pendens, decree, or order, or for taking any oath or acknowledgment, in any proceeding under this part; nor shall any undertaking be required from the Controller or the State in any such proceeding.

TREASURERS' COMMISSIONS

Revenue and Taxation Code Section 14797 was amended to provide increased commissions for inheritance tax collected by county treasurers (other than those of counties of the first and second class) who collect more than eight million dollars per year.

Text of the section as amended:

14797. The maximum commissions that may be retained by the county treasurer out of the total inheritance taxes paid to and accounted for by him in any one year are as follows

a By the county treasurer of a county of the first class, eighty-five thousand dollars ($85,000)

b By the county treasurer of a county of the second class, fifty thousand dollars ($50,000)

c By the county treasurer of a county of the third class, forty thousand dollars ($40,000), provided that where the total amount of inheritance taxes paid to and accounted for by the county treasurer in the year exceeds eight million dollars ($8,000,000) the maximum commissions that may be retained by him shall be fifty thousand dollars ($50,000)

d By the county treasurer of a county of the fourth class, twenty-five thousand dollars ($25,000); provided that where the total amount of inheritance taxes paid to and accounted for by the county treasurer in the year exceeds eight million dollars ($8,000,000) the maximum commissions that may be retained by him shall be fifty thousand dollars ($50,000)

e By the county treasurer of a county of any other class, twenty thousand dollars ($20,000); provided that where the total amount of inheritance taxes paid to and accounted for by the county treasurer in the year exceeds eight million dollars ($8,000,000) the maximum commissions that may be retained by him shall be fifty thousand dollars ($50,000)

GIFT TAX

GIFT TAX ANNUAL EXEMPTION ON TRANSFERS BETWEEN SPOUSES

Revenue and Taxation Code Section 15402(b) was amended to conform this section with the changes effected by the 1961 amendment of Section 15303(b).

Prior to the 1961 amendments, one-half of the community property passing to a wife upon the death of her husband and all of the community property passing to a husband upon the death of his wife was exempt from inheritance tax In order that separate property converted to community by inter vivos transfer of the spouses would not escape both gift and inheritance taxes by reason of such inheritance tax exemptions, the law (Revenue and Taxation Code Section 15303) provided (1) that upon a conversion of the husband's separate property to community property, one-half was subject to gift tax at the time of conversion, leaving the other half subject to inheritance tax upon the husband's death and (2) that upon a conversion of the wife's separate property to community property, one-half of the converted property was subject to gift tax at the time of conversion and the other half, if it passed to the husband, was subject to gift tax upon the wife's death In order that the full half would be subjected to gift tax (in lieu of inheritance tax) upon the wife's death, Section 15402(b) provided that the annual exemption would not be allowable

In 1961 the inheritance tax law was amended to exempt all community propery (except life estates and powers of appointment in the husband's half) passing from husband to wife, and in conformance therewith, Section 15303(c) was also amended to subject to gift tax, as of the date of a husband's death, the remaining half of his separate property which he had converted to community property during his lifetime The 1961 Legislature, however, omitted to provide, as in the case of a decedent wife, that the annual exemption would not apply

The 1963 amendment corrects this oversight by amending Section 15402(b) to disallow the annual exemption upon such transfers regardless of which spouse is the decedent-donor

The text of the section is amended

15402 Neither of the following is within the exemption allowed by this article

(a) A future interest in property, provided, that no part of a gift to an individual who has not attained the age of 21 years on the date of such transfer shall be considered a gift of a future interest in property for the purposes of this subsection if the property and the income therefrom may be expended by, or for the benefit of, the donee before his attaining the age of 21 years, and will to the extent not so expended pass to the donee on his attaining the age of 21 years, and in the event the donee dies before attaining the age of 21 years, be payable to the estate of the donee or as he may appoint under an unlimited power of appointment

(b) Property subject to tax by virtue of the operation of subdivision (c), Section 15303 of this code.

AMENDMENT OF GIFT TAX DETERMINATIONS BY REASON OF PRIOR GIFTS

Revenue and Taxation Code Section 15807 was amended to provide that when a gift tax is determined for a calendar year prior to those for which determinations have already been issued, the latter determinations may be amended to show the true amount of tax which would have properly been assessed had all determinations been made in proper sequence Under the old law the prior year's gift was treated as having been made in the last year for which a determination was issued

The text of the amended section:

15807. When the Controller makes an original, amended or supplemental determination for a calendar year which is prior to calendar years for which he has theretofore made final determinations, he may concurrently therewith, notwithstanding other provisions of this part, amend the determinations for the subsequent years to show the true amount of tax which would have been determined had all determinations been issued in the sequence in which the gifts were made.

PAYMENT OF GIFT TAX UNDER PROTEST

Revenue and Taxation Code Section 16251 was amended to delete the requirement that payment of gift tax must be accompanied by a protest as a condition to filing action for recovery of the tax.

Text of the section as amended.

16251. Within 60 days after notice of the determination of the amount of tax has been given by the Controller, any person who has paid the tax may file an action against the State in the superior court having jurisdiction to recover the tax so paid.

PROBATE CODE

INHERITANCE BY PERSON WHO CAUSED DECEDENT'S DEATH

Probate Code Section 258 was amended to extend the circumstances under which a person who caused the decedent's death is barred from succeeding to any portion of the estate as heir or legatee Under prior law the only circumstances which barred the person from taking was his conviction of the murder or voluntary manslaughter of the decedent.

The text of the section as amended

258 No person who has unlawfully and intentionally caused the death of a decedent, and no person who has caused the death of a decedent in the perpetra-

tion or attempt to perpetuate arson, rape, robbery, burglary, mayhem, or any act punishable under Section 288, Penal Code, shall be entitled to succeed to any portion of the estate or to take under any will of the decedent; but the portion thereof to which he would otherwise be entitled to succeed goes to the other persons entitled thereto under the provisions of this chapter or under the will of the decedent A conviction or acquittal on a charge of murder or voluntary manslaughter shall be a conclusive determination of the unlawfulness or lawfulness of a causing of death, for the purposes of this section

CONSENT TO GRANTING PETITION TO HAVE EXECUTOR OR ADMINISTRATOR COMPLY WITH OPTION

The 1963 Legislature added Section 854 to the Probate Code which provides a procedure whereby an optionee of an option given by will may obtain a court order authorizing the executor or administrator to transfer property of the estate in compliance with the option The order cannot be made unless the court finds that the inheritance tax has been paid or a consent to entry of the order is obtained from an inheritance tax attorney.

The text of the new section:

854 When any option to purchase real or personal property is given in a will duly admitted to probate the optionee may petition the court for an order authorizing the executor or the administrator with the will annexed to transfer or convey such propery upon compliance with the terms and conditions stated in the will

The clerk shall set the petition for hearing by the court and give notice thereof for the period and in the manner required by Section 1200 of this code

Such order shall not be made unless the court shall find that the rights of creditors will not be impaired or shall require bond in an amount and with such surety as the court shall direct or approve. The order shall not be entered unless the court shall find that all inheritance taxes payable in said proceedings have been paid or the State Controller, and inheritance tax attorney or a subordinate inheritance tax attorney has, in writing, consented to the entry of the order by the court

The petition must be filed within any time limitations stated in the will, or, in any event, within six months after the issuance of letters testamentary or letters of administration with the will annexed; provided, however, that if any time limitation in the will is measured from the death of the testator such time shall be extended by the period between such death and the issuance of such letters but in no event to more than six months after such issuance

JULY 1965

A PROGRAM OF TAX REFORM FOR CALIFORNIA

Final Report of the

ASSEMBLY INTERIM COMMITTEE ON REVENUE AND TAXATION

July 1965

LETTER OF TRANSMITTAL

HON. JESSE M UNRUH,
Speaker of the Assembly, and
MEMBERS OF THE ASSEMBLY

Attached hereto is the final report of the Assembly Interim Committee on Revenue and Taxation. The report covers the major tax study during the 1963–65 interim and the tax legislation which was introduced as a result of the interim work

The tax reform plan (AB 2270) is shown as Part A of the Appendix The single omnibus bill was chosen as a vehicle for all our tax law reforms and rate changes to enable us to present one balanced program for consideration by the Legislature To break the proposal into separate components would have created unnecessary problems in drafting and hearings, and confusion for those responsible for handling the bills Furthermore, it is possible that many of the exemptions would have been approved by the legislators who would have been reluctant to support the increases in other tax levies necessary to make up the lost revenue.

Although a majority of the committee supported the tax reform plan, the record should be clear that some of the members of the committee did not approve it.

I want to express my appreciation for the support you gave to the committee during the interim study and for your work on behalf of the bill in the general session

Sincerely yours,

NICHOLAS C PETRIS

TABLE OF CONTENTS

LIST OF TABLES

FOREWORD

This report of the activities of the Assembly Interim Committee on Revenue and Taxation covers the work of the committee during the 1963–1965 interim period and presents the major tax legislation which emerged from that study of California's tax structure The measure was introduced as AB 2270 of the 1965 General Session.

We have included in this booklet a detailed description of the bill, an index to its sections, tables showing its effect on the counties, cities and school districts of the state, and a list of revenue sources with estimates of their return In this way the committee is making available the material from which it assembled AB 2270 and when this is used with the information contained in our earlier reports on the economic impact of each tax levy it is possible to evaluate the ultimate burden of any tax change which may be proposed in the immediate future.

SPECIAL ACKNOWLEDGMENT

Any legislation with the technical detail found in this tax law is the product of a dedicated group of extremely well-qualified men. Although the members of the Committee on Revenue and Taxation have called upon these men in the past they wish to give special tribute to them for their assistance in the preparation of the major bill which emerged from the work described in this report

CONSULTING ECONOMISTS

Economists from California's university and state college system were retained by the committee to prepare special studies on the various parts of the tax structure We are grateful for the guidance and assistance thay gave us and appreciate the many hours which they devoted to research and writing for us

A biography of each contractor follows:

Dr Harold M. Somers, chairman of the Department of Economics at U C.L.A., received his Ph.D in economics from the University of California, Berkeley, and his LL B. from the Law School of the State University of New York at Buffalo.

He is a member of the American Bar Association, American Economic Association, American Finance Association, and National Tax Association.

Prior to coming to U C L A , Dr Somers taught at the University of Buffalo and the University of Michigan and was a member of the research staff at the University of Chicago and the Brookings Institution, an economist for the New York State Department of Commerce, a consultant to the New York State Department of Commerce, and a consultant to the New York State Commission on Revision of the Constitution and the Joint Legislative Committee on Town and Village Laws.

Dr. Somers has published widely in the areas of economics and taxation He is the author of a book, *Public Finance and National Income,* and a contributor to volumes on *Growth of the American Economy* and *Taxation and Business Concentration* His papers, notes and reviews have appeared in the *American Economic Review, American Historical Review, Buffalo Law Review, Canadian Journal of Economics and Political Science, Commercial and Financial Chronicle, Econometrica, Impuestos: Revista de Doctrina Jurisprudencia y Legislación, Journal of Economic History, Journal of Finance, Journal of the American Statistical Association, Journal of Political Economy, National Tax Journal, Proceedings of the National Tax Association, Quarterly Journal of Economics, Review of Economics and Statistics, Review of Economic Studies, Rivista Internazionale di Scienze Economiche e Commerciali, Revue de Science et de Législation Financière, Vanderbilt Law Review, Western Economic Journal,* and the following federal publications, *Monetary Policy and the Management of the Public Debt* and *Federal Expenditure Policy for Economic Growth and Stability,* both issued by the Joint Economic Committee of the U S. Congress, and *Excise Tax Compendium,* issued by the House Ways and Means Committee. Among his contributions to professional publications since 1950 are·

"A Theory of Income Determination," *Journal of Political Economy,* December 1950.

"Government Expenditures and Economic Welfare," *Revue de Science et de Législation Financière,* January 1951.

"What Generally Happens During Business Cycles—and Why," *Journal of Economic History,* summer 1952.

"The Place of the Corporation Income Tax in the Tax Structure," *National Tax Journal,* September 1952.

"'Cost of Money' as the Determinant of Public Utility Rates," *Buffalo Law Review,* spring 1955.

"Estate Taxes and Business Mergers," *Journal of Finance,* May 1958.

"Reconsideration of the Capital Gains Tax," *National Tax Journal,* December 1960.

"Theoretical Framework of Sales and Use Taxation," *Proceedings of the Fifty-fourth National Tax Conference: 1961* (National Tax Association)

"Capital Gains Tax: Significance of Chances in Holding Period and Long-term Rate," *Vanderbilt Law Review,* June 1963

"Economic Implications of an Income Tax Reduction," *Rivista Internazionale di Scienze Economiche e Commerciali,* April 1964

"Problemas fiscales de paises en desarrollo," ["Fiscal Problems of Developing Countries"], *Impuestos,* April 1965

Dr. Yung-Ping Chen was Brookings Research Professor at the University of Wisconsin immediately prior to his association with this committee. He received his M.A. and Ph.D. at the University of Washington where he was also a research fellow and teaching fellow. While he was assistant professor of economics at Seattle Pacific College Dr. Chen published several articles dealing directly with the tax problems of the senior citizen. "The Federal Old Age and Survival Insurance Trust Fund as an Equalization Reserve" appeared in *Proceedings of the Western Economic Association;* "The Economic Implication and Consequences of the OASI Trust Fund," *Journal of Finance;* and "Income Tax Exemption for the Aged as a Policy Instrument" in the *National Tax Journal* make him eminently qualified to write on homestead exemptions for the aged in California.

Mrs. Yvette Gurley received her undergraduate degree at San Diego State College and did graduate work in economics at Stanford University. She was engaged in an interdisciplinary research project at the Center for Research on World Political Institutions in Princeton University before she moved to Washington, D.C. In Washington Mrs. Gurley was first an economic analyst in the trust investment department of the American Security and Trust Company and later a researcher at the Brookings Institution. Since 1963 she has been with the American Economic Review. Among her publications is "Federal Income Taxation of Mutual Savings Banks and Savings and Loan Asso-

ciations" which was a portion of the study *Tax Revision Compendium: Compendium of Papers on Broadening the Tax Base* written for the Committee on Ways and Means of the U S Congress

Bruce T McKim is an assistant professor of economics in the University of California at Riverside He received his bachelor's, master's, and doctoral degrees in economics from the State University of Iowa where he taught before coming to California as an assistant professor at Los Angeles State College in 1962 Dr McKim also served as an economist to the Federal Reserve Bank of Chicago from 1960 to 1962. Among his publications are "A Statistical Examination of Selected Factors of Economic Growth and Stock Market Conditions" *Iowa Business Digest:* "Income Velocity and Monetary Policies in the United States, 1951–1960"· *Journal of Finance*, and "The Quantity of Money and Monetary Policy"· also in the *Journal of Finance*

Ralph C Kelly is a graduate of Western Reserve University in Cleveland, Ohio He continued his education at Cleveland Marshall Law School in Cleveland where he received his LLB Mr Kelly was an accounting major and corporate finance and banking minor and it was this experience he used from 1955 to 1962 as public accountant in Ohio and California His work for the committee involved a detailed study of the proposed tax on public utility services and analysis of the public financial records of public utilities in California.

Levern Graves, associate professor of economics at California State of Fullerton, receiving his bachelor's and doctoral degrees from the University of California at Berkeley He has also done work at Johns Hopkins School of Advanced International Studies in Washington. Dr Graves has been a consultant to business groups in Oakland, California and received research grants from the Southern Fellowships Fund and the Foundation for Economic Education as well as a Ford Foundation regional fellowship. He was an assistant professor of economics at Florida State University and the University of Nevada before coming to Fullerton

Ellis T Austin is a professor of business administration at Fresno State College He is a graduate of Western Washington College of Education, where he received his teacher's certificate, and of the University of Washington He received his Ph D from Michigan State University in 1955

Dr Austin taught at the University of Washington, the University of Idaho, Michigan State, and the University of Pittsburgh before coming to Fresno State in 1958 He has participated actively in campus and civic affairs in each community where he has taught; in the fall of 1960, for example, he gave 15 one-hour lectures on local television in Fresno and he has spoken before, or written for, many local groups.

Professor Austin has received fellowships for special study each summer since 1960 These programs have taken him to New York University, the University of Chicago, Harvard University, and more recently to U C L A for the Ford Foundation Regional Seminar in Economics—Public Finance and Fiscal Policy

He is a member of the American Economic Association and the American Finance Association.

Sylvia Lane is an assistant professor of finance at San Diego State College She received her A B and M A in economics at the University of California and her Ph D at the University of Southern California, where she also was a lecturer in economics Mrs Lane is a member of the American Economic Association, the American Finance Association, and serves as chairman of the membership committee and a member of the executive committee of the Western Economic Association

In 1963, she received a Ford Foundation fellowship for further study in public finance at U C L A. She has done research for A J Wood and Company, the Psychological Corporation, the Mendota Research Group, and the Economic Research Group. Mrs Lane was project economist for the Los Angeles County Welfare Planning Council, 1956 to 1959; and chairman of the Commission on Aging of the Community Welfare Council of San Diego County in 1963

Among her other publications are· *Personal Finance* (John Wiley and Sons, Inc, 1963); *Buying Intelligently* (a supplementary text book); and numerous papers on economic growth and development and patterns of consumer expenditure

Dr. Marvin Lee is an associate professor of economics at San Jose State College He is a graduate of the University of California at Berkeley and received his Ph D from the University of North Carolina in 1960, before his employment as a tax consultant for the North Carolina and South Carolina A F L-C I O He was later on the southern regional staff of the Amalgamated Clothing Workers of America at their New York headquarters He has done tax research for the Department of Tax Research at Raleigh, North Carolina, where he prepared reports for the legislature on many sectors of the state's economy He was a consultant on Economic Development and Prospects to the Joint Committee for Study of the Tax Structure in North Carolina. Among his publications is "Tax Incentives and the Industrialization of the Southeast" which appeared in the *Proceedings*, National Tax Journal in September, 1961.

Dr. Lee was an instructor in economics at the University of North Carolina and an assistant professor of economics at Hofstra University, Hempstead, Long Island, before coming to San Jose State College in September, 1963

Mrs. Wilma Mayers is a lecturer on economics at Sacramento State College Mrs Mayers graduated at the head of her class when she received her A B in economics from the University of British Columbia From 1944 to 1947 she was a teaching assistant in economics and statistics at the University of California in Berkeley and at that same time she was on the staff of the University's Bureau of Business and Economic Research In 1949 she became a lecturer in economics at U C L A, leaving in 1950 when she began work for the State Board of Equalization on property and sales taxes.

Mrs. Mayers has been active in civic affairs in Sacramento and was president of the League of Women Voters in 1958–59 She is now a candidate for the Ph D at the University of California, Berkeley

Mrs Alice John Vandermeulen, associate research economist in the Institute of Government and Public Affairs at the University of California, Los Angeles received her A B in economics from Bryn Mawr College, her master's degree from Radcliffe College, and her Ph D from Harvard University. She is a member of Phi Beta Kappa.

Dr. Vandermeulen taught economics at Harvard before moving west in 1948 and since that time she has lectured at Scripps College, at Claremont Graduate School, at Claremont Men's College, where she was assistant dean of the faculty, and at the University of California at Los Angeles Both the John Randolph and Dora Haynes Foundation and the Social Science Research Council have made grants to Dr Vandermeulen for special study projects

She is a past president of the Southern California Economics Association and a member of the American and the Western Economics Associations as well as the American Finance Association Her published works include both articles and books in the field of government finance. The most recent article· "Capital Gains—Two Tests for the Taxpayer and a Proposal for the President" appeared in the *National Tax Journal* for December 1963.

Mrs. Corinne Lathrop Gilb, is a research associate at the Center for Study of Law and Society at the University of California in Berkeley Dr Gilb received her A B degree from the University of Washington, her master's degree from the University of California, and her Ph.D from Radcliffe College. She is a member of Phi Beta Kappa

Dr Gilb has headed the regional cultural history project and the Institute of Industrial Relations' oral history project at the University of California prior to her work with the Center for the Study of Law and Society She has also taught at San Francisco State and Mills College. Dr Gilb is the author of a recent book entitled *The Professions and the State* and has published numerous articles in professional journals

I. BACKGROUND OF THE MAJOR TAX STUDY

During the 1963 legislative session the members of the California Assembly became greatly concerned about the revenue system of the state They directed their Committee on Revenue and Taxation to make a thorough investigation of the state's tax structure and to report to the 1965 Legislature with suggestions for improving, updating, and rebuilding the system The members fully realized that tax increases would be necessary to balance the 1965–66 budget when they commissioned the study in 1963 This gave all the more urgency to their instructions to the committee The committee was told to study the structure in detail to see where the proposed increases could be levied most equitably—not necessarily where they would create the least public outcry The committee was to look at each revenue source, study its history and development, judge its equitability as a revenue producer, determine its relative importance, its impact on the businessman and consumer, and most important of all see which income groups bore the brunt of its payment

The first step was to employ a noted economist to help guide the project and to help prepare the studies of the tax structure Dr. Harold M Somers, Chairman of the Department of Economics at UCLA, was chosen as the consulting economist for the study Other professors from the university and state college system were retained to prepare detailed explanations of our existing tax levies

The tax structure which they studied was basically the system adopted in 1933–35 Each of the professors who contracted to work with the committee was assigned a topic in the field of taxation for research and analysis They were asked to dissect the subject from all standpoints as well as make suggestions for improvements in all phases of concern Each of the contractor's reports was reviewed by the committee members and discussed in formal and informal meetings of the committee and with Dr Somers The individual studies were published by the committee and have received wide distribution throughout the state Many cities and states as well as libraries and universities across the nation have requested copies of these contractor's reports Alice Vandermeulen did the first known complete compilation of financial information on California's fees and licenses (Part 2 of the Tax Study) Corinne Gilb wrote Part 3, a review of conformity of state to federal personal income tax laws, and Wilma Mavers studied the financial problems of local government (Part 6)

The major emphasis of the entire tax study was on the property tax so it is natural that there were more contributions in this field Bruce McKim wrote on the economic and psychological limits of the property tax, Yvette Gurley studied the bank tax which is in lieu of the personal property tax, and Yung-Ping Chen provided a detailed analysis of senior citizens' property tax relief legislation in the 50 states and its impact on California Guenter Conradus discussed the prop-

erty tax in relation to forest timber and Levern Graves compared state and local tax burdens in California.

Two contractors, Wilma Mayers and Marvin Lee, reported on the real estate transfer tax, the stock transfer tax, and the taxation of petroleum producing properties in Part 7. Sylvia Lane's *The Insurance Tax* is Part 8 and California's excises on cigarettes, alcoholic beverages, and horseracing, written by Ellis Austin, is Part 9. The consulting economist, Harold Somers, wrote Part 4, *The Sales Tax*, a portion of Part 5 on the property tax, coauthored Part 10 on the taxation of corporate income, and did Part 11 titled *Capital Gains, Death and Gift Taxation* Committee staff members David R Doerr and Raymond R Sullivan worked with each of the authors, while themselves contributing a major portion of Part 5 on the property tax and writing sections of Parts 1, 6, 7, and 10

While the professors were busy with the theoretical the committee held a series of public meetings throughout the state to learn about problems in taxation The first hearing in the interim period gave the civil servants and elected officers of state and local government departments the opportunity to express their views of the statutes guiding the operation of the tax levies they administered. Representatives of the Department of Finance, the Controller's Office, Board of Equalization, Franchise Tax Board, the county and city assessors, and tax collectors spoke at length in describing their work, the taxes they deal with and the problems they encounter.

The second hearing was in Los Angeles where the committee was given a thorough briefing on the operations of the assessor's office and then heard a day and a half of testimony on the property tax, assessment practices, and exemptions from the tax. Subsequent hearings held throughout the state centered on the assessment and taxation of agricultural land, the tax burdens of senior citizens, the income tax, state income tax conformity to federal tax law, and certain technical amendments proposed to the California personal income tax law The "single tax," business taxes (especially inventory), revenue problems of the cities and counties, and overall views of the tax structure by representatives of major business and labor groups filled the six two-day hearing periods scheduled after the orientation meeting in Oakland (See Appendix L for a listing of those who appeared before the committee during the interim period)

The public was kept abreast of these activities through press notices, coverage of the hearings, and speeches about the study by the chairman and other members of the committee. Letters with suggestions and questions for study were received and considered, detailed questionnaires were mailed to the county assessors The contractor's reports were distributed to the members and to the public, and discussions were held periodically to keep the other members of the Assembly informed on the progress of the overall program. During the 1964 Budget Session a comprehensive review of activites to date was published in the *Assembly Daily Journal;* and in July, 1964, a report was made to the Assembly Rules Committee on progress, expenses, and the plans for the completion of the study.

II. GENERAL DISCUSSION OF THE TAX STRUCTURE

California's growth in the past two decades has put unprecedented demands on government. These demands have produced a patchwork revenue structure—a structure that is regressive—a structure that is not based on ability to pay—a structure that hinders economic growth —a structure which cannot meet the demands which will come with the growth expected in the future

Under the existing revenue system every California property owner faces the certainty that his local property taxes will continue to rise unabated year after year while he faces further tax increases at the state level *It is vital that the state tax structure be reoriented and redrawn to ensure that our revenue sources keep abreast of growth in the economy.* But while this is done it is necessary to view the tax structure as it relates to the business climate of California The state must be careful to avoid the imposition of taxes which might deter the development of new industry

It is clear that the property tax is the major defect in the California tax system, it is outmoded, discriminatory, unfair, economically destructive and regressive. It fails every major and accepted standard by which government policymakers have come to judge the propriety of any particular form of taxation

University of California Professor Malcolm Davisson told this committee at its first interim hearing of one writer who says:

"The general property tax has only two faults; first it is wrong in theory; and second it doesn't work in practice" In support of this generalization he offered the following evidence.

"First, the property tax is discriminatory in its application to different forms of wealth

"Second, although proportional as to rate, the property tax is often regressive when related to incomes of property owners There appears to be considerable evidence that high value properties are at times treated differently than low value properties so far as the ratio of assessed to full value is concerned It is often argued that the tax is regressive because a considerable portion of it falls on housing, and that housing expenditure tends to decline as income rises.

"The third argument is that the use of an ad valorem base for tax purposes places a heavy burden on persons with small current cash income.

"Fourth, the property tax is a poor index of benefits received. There are, undoubtedly, certain services performed by government, particularly by local government, which do provide benefits that are pretty closely allied to the value of property, and here, I suppose one can make a case for property taxation. But there are many kinds of services which are supported in large part by the property tax where this is not the case. The outstanding example is, of course, education

"Fifth, property is also deficient as a measure of ability to pay, another point that is so obvious it needs no elaboration.

"Lastly, the property tax is cumbersome and fails to adjust adequately to the changing economic conditions of an industrialized society. Property tax yields tend to lag behind overall changes in economic activity and thus accentuate inflationary pressures in periods of prosperity and deflationary pressures during recessions

"Now there may be a difference of opinion as to whether these various arguments support the sweeping indictment that I quoted a few minutes ago that the property tax is both wrong in theory and doesn't work in practice, but whether that is true or not, the fact remains that the case against the property tax turns out to be a fairly impressive one."

Local property taxes are imposed on a base which is determined in an arbitrary and often inequitable manner; the assessment of a parcel of property is never the product of an exact science There are as many approaches to value as there are values for each piece of property. The best that can be said for assessments is that they are impartial guesses The studies made by the committee found variations of assessments within a county whereby one taxpayer paid two hundred times more in tax on the same value property as did another taxpayer In addition it is impossible for an assessor, under California's rapidly shifting economic conditions, to keep up with changes in value of property within his county on a year-to-year basis The existence of the "time lag" in reassessing and consequent sudden increases in assessment generates ill feeling among taxpayers while causing a revenue loss to local government

The study of state and local tax burdens in California (by Dr Levern Graves) for our study shows that the overall impact of taxes collected at the state level is proportional However, the property tax is shown to be highly regressive, with a heavy enough burden to make the whole tax structure regressive.

Graves' findings are shown in Table 1 on the following page.

These findings indicate that the poor pay a far heavier share of the property tax, restricting low income purchasing power and putting a drag on the economy.

Considering these weaknesses, the magnitude of this property tax and the pace at which the rate has been increasing are of grave concern More money is extracted from the citizens of this state through property taxation than by all state levied taxes combined In 1963-64, taxes levied on property amounted to $2 8 billion dollars Since World War II, the tax has increased from 3 2 percent of personal income to 5 3 percent of personal income

These findings suggest that it is imperative that certain property tax reforms be instituted and that the revenue structure be altered by moving away from the property tax toward more equitable forms of taxation.

As a potential source of additional state revenue to meet growing demands for state services and to finance property tax relief, the personal income tax has a number of advantages The income tax is based on ability to pay and is progressive in relation to income. While it treats all persons with similar incomes equally, the tax can also be adjusted to meet differing sets of circumstances—such as size

SOURCE Taxation of Property in California, A Major Tax Study, Part 5, Assembly Committee on Revenue and Taxation, December, 1964

of family medical costs, etc. and finally, those with limited income are exempt from taxation.

From an economic standpoint, the income tax rates high marks in its impact on business cycles. During an economic downturn the income tax will produce less revenue—thereby mitigating the effects of the recession During boom times, the income tax raises more revenue, tending to curb runaway inflation. The personal income tax also tends to be much more responsive to growth than other levies The opposite is true of the property tax

Compared with other industrial states, California makes relatively light use of the personal income tax. Its exemptions tend to be higher, its brackets tend to be wider and its rate schedule tends to be lower than elsewhere. The total amount raised is roughly two-thirds of one percent of the personal income of California. The average state income tax paid by a family of four at various income levels is·

Gross Income	*Tax Paid*
$ 5,000	$ 0
7,000	18
9,000	38
10,000	48
15,000	136
25,000	432

Personal income taxes per $1,000 of personal income averaged approximately $11 in all states levying a state income tax In California, the personal income tax raises approximately $6 50 per $1,000 of per-

sonal income. The large yield in the state of New York ($20 per $1,000 of personal income) suggests that this levy can become the backbone of a state revenue system.

The sales tax is also a better revenue source than the property tax. One of the major charges which has been hurled at the sales tax is that it is regressive. Our study of the California Sales Tax, by Dr Harold Somers, developed a somewhat different conclusion. His findings indicate that if current income is the measure of ability to pay, the sales tax is slightly regressive with food exempt, but less so than the property tax However, if net resources (income plus net worth) are the measure of ability to pay, the sales tax is actually slightly progressive.

Perhaps the most desirable aspect of sales taxation, from a governmental standpoint, is that it raises substantial amounts of revenue in a relatively painless manner In a situation where governmental expenditures are expected to increase faster than personal income, it is desirable to have a tax base which expands commensurately From fiscal 1950 to fiscal 1962, collections from sales taxes increased from $326 to $749 million—a 130% increase During this same period of time, personal income in California increased by 152%.

The sales tax is also a valuable adjunct to the income tax in that it provides a means of taxing those people who somehow manage to have a low net taxable income despite a high inflow of disposable resources

One additional point must be made Loopholes and exemptions are proliferating in all the major taxes—income, sales, and property This tendency must be stopped if the tax structure is to remain equitable and carry the burden of providing revenues for government service This is not to say all exemptions are bad In some instances, certain taxes can be improved with judicious exemptions. However, the many exemptions now in the laws should be thoroughly reviewed and those which favor a special group should be eliminated.

Because of the weaknesses in the property tax and the pressing demands by government for more revenue, it is quite clear that the revenue structure of California needs a major overhaul. It will not be easy to revamp the system so that it can support the services which the people demand and support them by a fair and equitable means of taxation However, expediency will cause only trouble if it becomes the basis for modifications of the revenue system At best, this approach is only postponing the inevitable while doing a disservice to the people of California At worst, it can become the basis for the breakdown of government.

III. AB 2270—PETRIS-UNRUH TAX REFORM PLAN

As a result of the interim hearings and the studies of the tax structure which were prepared for the committee a plan of tax reform gradually took shape Many discussions were held among members of the committee and other interested parties as to the specific ingredients of the package Two committee workshops were held in late 1964, one in Los Angeles on November 12 and 13 and one in Sacramento on December 7 and 8. At these meetings many of the reform features of the proposal were hammered into shape After a general consensus was reached, the proposed tax reform package was announced to the public by Assemblyman Nicholas C Petris and Speaker Jesse M Unruh on January 27, 1965 This plan, which was introduced in the 1965 Legislature as AB 2270, was approved by a majority of the members of the Assembly Committee on Revenue and Taxation (12 aye, 6 no) and then by a majority of the Members of the Assembly

When AB 2270 was acted on by the State Senate, all the reform features were removed by the Senators who returned the bill to the Assembly with a 6¢ cigarette tax and the provisions which brought leases under the sales and use tax provisions In this form it was unacceptable to the Members of the Assembly who felt the need for tax reform was paramount The measure was then rejected by a unanimous vote

While AB 2270 has been rejected, the issue of tax reform has not. It will be before the people and the Legislature until it has been resolved.

A. OBJECTIVES

In formulating AB 2270 the basic approach was to devise a program which would be fair to all taxpayers, which would meet the revenue needs of state and local government, and at the same time improve California's tax structure Specifically, the plan was designed to remove inequities in the tax structure, to promote economic growth in California, to reduce the oppressive burden of the property tax, to provide for partial financing of state capital improvements from current revenues rather than entirely from bonds, and to meet the needs of state and local government.

It is important to recognize the balanced nature of the plan and consider it as a whole, rather than a collection of individual items. There are features which, if standing alone, might be unacceptable However, in the context of a "package" they are balanced by other, more desirable features For example, the proposed elimination of the personal property tax on household goods, although meritorious, would be unacceptable as a separate item, because of the sizeable revenue loss to local government When balanced by increases in other taxes, such a proposal is justified. In addition, in assessing the impact of the plan on various income groups, the total effect of the package must be considered rather than the incidence of individual taxes.

For example, the regressive cigarette tax was balanced by the progressive income tax.

It was not the purpose of this plan to shift tax burdens from one income group to another. And it cannot be stressed too strongly that the ultimate aim of the plan was to be fair to persons in all income groups.

B. BRIEF SUMMARY OF THE TAX REFORM PLAN

The proposed tax program made major changes in the revenue structure of the state of California The total revenue to be raised for state and local government by the plan was slightly more than one billion dollars of which over $730 million was earmarked for local government use to offset reductions in the property tax.

The property tax relief phase of the plan which was to be effective in 1966–67 was a three-part program Step one involved a narrowing of the property tax base due to the exemption of business inventories, household furnishings, and solvent credits. This would have reduced local government revenues by $287 million Part two was a reduction of the school property tax rate by an average of 25 percent through the substitution of revenue derived from an increase in the sales tax In furnishing additional state money to schools, AB 2270 used the equalization formula but also constituted major reforms in school finance Part three provided an additional $36 million in special property tax relief for low-income aged homeowners who could no longer afford to remain in their homes in the face of spiraling property taxes

The reduction of the property tax base and the reduction of the school property tax rate were fully funded from tax sources other than the property tax. There would have been no shifting of the property tax load from one group of taxpayers to another and local government would have been more than completely compensated for any loss in revenue These units would have received more revenue under the plan than they would have lost. (See Appendix B) To insure that the property tax reductions were continuing, new tax ceilings were proposed for schools and adjustments were made for other local governmental entities.

Revenue adjustments which were needed to offset the loss of property tax revenue and provide for state government needs included:

(1) An increase in the cigarette tax from 3¢ per pack to 8¢ per pack
(2) Changes in the income tax as follows: (a) revising the rate structure from the present 1 to 7 percent, to 1 to 15 percent; (b) reducing the personal exemption to $1,000 ($2,000 for couples); and (c) narrowing the present tax brackets to $1,500 intervals.
(3) The adoption of a pay-as-you-earn system of collecting the state income tax, with 100 percent forgiveness from the tax (exclusive of capital gains) for 1965 income.
(4) Slight changes in the coverage of the sales tax to include the lease of equipment and the occasional sale of autos, aircraft and boats. (Local government would also benefit from these changes under the Bradley-Burns formula.)
(5) An increase of ¼ percent in the Bank and Corporation Tax rate

(6) A minor increase in the Inheritance and Gift Tax rates on inheritances over $100,000; changes in Class C and D rates; changes in the taxable status of capital gains at death and removal of the exemption of tax on inheritances to tax-exempt organizations (other than churches, colleges, schools and charitable organizations).

(7) A property transfer tax, to be imposed by counties at their option, for their own use partially to make up for loss in property tax base. The first $15,000 of all transfers would be exempt (except for sales of bare land) The rates would be 1 percent for all transfers over $15,000 and 1½ percent for transfers over $25,000.

(8) An increase of 1 percent in the state sales tax All the revenue from this increase would have been placed in the state school fund to allow mandatory reduction of school property tax rates an average of 25 percent.

Each of the changes outlined above is fully explained in Chapter IV AB 2270 also carried a number of reforms, primarily in the area of property taxation, which improved tax administration but which were without major revenue significance. These will be explained in Chapter VI.

IV. DETAILED EXPLANATION OF STATE REVENUE NEEDS, MAJOR REFORM, AND REVENUE SOURCES IN PROPOSED TAX PLAN

There is danger in attempting an item by item justification of the component parts of a revenue package Many items are intended to balance other items Because the proposal must be considered and evaluated as a whole, a discussion of each item may tend to obscure the broad view and divert attention to individual levies Yet, to understand the whole plan, it is necessary to clarify and explain each of its ingredients. (Refer to Table 2)

A. STATE REVENUE NEEDS

1. State Revenue Gap

$100 million—1965–1966
240 million—1966–1967

Based on statements by the Department of Finance, this $100 million was the minimum amount of new revenue which was necessary to balance the budget passed by the 1965 Legislature, and the $240 million

TABLE 2

Impact of AB 2270 on State and Local Revenues for 1965–66 and 1966–67
(in millions)

	1965–65	*1966–67*
A. State Revenue Needs		
Gap	$100	$240
Capital improvements—pay-as-you-go	25	50
State revenue loss due to income tax conformity provisions	1	5
	126	295
B. Revenue Loss to Government Due to Reductions in Property Tax Base		
Exemption of business inventories (includes loss of state bank tax revenues of 12 million)		237
Exemption of household goods		45
Exemption of solvent credits		5
Tax relief for low-income aged		36
		323
C. School Property Tax Relief		
Mandatory school property tax reduction (average 25 percent)		335
		335
D. Additional Revenue for Local Government		
Additional assistance for cities beyond replacement of property tax loss		25
Additional assistance for counties beyond replacement of property tax loss		26
Additional assistance for schools beyond replacement for property tax loss		35
		86
	126	1039

is their estimate of next year's needs. The gap results from the end of the "one-shot" accelerated revenues which were used in this and the last fiscal year, the need for additional revenues to finance the school assistance program of 1964 and new programs passed by the 1965 Legislature Approximately $60 million is represented by new programs and salary increases It must be emphasized that these figures are at best only estimates. During the preparation and presentation of the reform plan, the estimates of revenue needs made by the Department of Finance kept changing. This made the development of a sound presentation of this facet of the plan very difficult

2. *Capital Improvements Pay-As-You-Go*

$25 million—1965–1966
50 million—1966–1967

In 1964, the Legislature signified a desire to move toward financing state capital outlay from current revenues rather than bonds. This amount represents a significant move toward that goal It should also be noted that the proposed 1965–1966 federal budget recommends a doubling of the grants to states for higher educational facilities. Congressional approval of this proposal will alleviate further pressure on state bonds.

3. *State Revenue Loss*

$1 million—1965–1966
5 million—1966–1967

A small amount of revenue would have been lost to the state due to the conforming of provisions in the state income tax law with those in federal law. The following changes in the California Personal Income Tax Law were included:

a. Annuities Under Life Expectancy Rule

Changed the personal income tax law to allow annuities to be taxed under the life expectancy rule. Estimated revenue loss· $300,000.

b. Foster Children Deduction

In computing their state personal income tax, taxpayers would have been allowed to deduct $600 for each foster child. Estimated revenue loss: $200,000.

c Charitable Contributions Deduction

The allowable deduction for charitable contributions was to be increased to 30% of income to conform with federal law Estimated revenue loss: $1,100,000.

d Foreign Student Deduction

Individuals could have deducted from taxable income $50 per month for each foreign student in their home. Revenue loss is minor.

e Medical Deduction

The maximum deduction of medical expenses was increased from $2,500 to $20,000 for married taxpayers and from $1,250 to $10,000 for single taxpayers Estimated revenue loss· $2,900,000

Each of these items is more fully discussed in part E of this chapter.

B. MAJOR REFORM: REDUCTION IN PROPERTY TAX BASE

1. *Exemption of Business Inventories*

It was proposed that business inventories be exempt from property taxation Inventories would have included raw material, work in process, or goods which were in the stream of commerce and were intended to be sold Inventories would not include machinery, equipment, office machines and furniture and other items which a firm would not sell in the normal course of its business It would include most agricultural livestock and crops for sale The exemption would also extend to motion picture films

This exemption is desirable for a number of reasons The tax is an invitation for firms to export inventories to avoid high taxes To avoid the tax, a great many firms have goods stored in transit in other states such as Nevada which artificially depresses economic activity in California for the first two months of the year It is anticipated that repeal of this tax would be of material benefit to the business climate in California, unemployment could be reduced and more jobs created

The inventory tax is completely inequitable in its application The tax falls most heavily on the firm that must have a high inventory on the lien date or has not been able to sell its goods To the extent that the tax falls on those which have been less successful, it falls on the firm *least* able to pay

It should also be noted that the inventory tax is partially passed on to consumers—and to this extent it applies to items exempt from sales tax such as food and medicine. The inventory tax exemption would have gone into effect for the 1966–67 fiscal year

From data supplied the committee by the county assessors, we have estimated that local units of government would lose approximately $225 million in revenue as a result of this exemption and the state would lose approximately $12 million from the bank tax because of the reduction in locally taxable personal property The defects of the inventory tax are fully documented in "Taxation of Property in California," Part 5 in the series of reports released by the committee during the interim

2. *Exemption of Household Goods*

The exemption of household goods and furnishings from property taxation is long overdue AB 2270 would have exempted all personal effects, wearing apparel, and household furnishings not used for the production of income; but it did not include boats or airplanes

Of all the weaknesses of the property tax, the assessment of household goods and furnishings is most glaring Assessment of this type of property is completely inequitable and administratively impossible Many assessors simply estimate the value of household personal property by the value of the residence This practice is inequitable, as some homes of the same value may have furniture of higher value than others; and unconstitutional, as assessors are required to assess all property equally in proportion to value

Household goods would have been exempt beginning with the 1966–67 fiscal year Estimated revenue loss to local government by elimination of household *personally* from the assessment rolls was $45 million

For a complete discussion of the evils of the present tax on household goods, see "Taxation of Property in California," Part 5 of this study.

3. *Exemption of Solvent Credits*

The special, low-rate property tax on solvent credits would have been discounted Solvent credits, which are amounts owing to a party from the sale of a good or service without security, less debts of a like character, are the only intangible forms of wealth now taxable in California. It is illogical to tax this one form of intangible wealth and exempt all other forms. Intangibles such as notes, shares of stock and bonds are tax exempt, but book accounts are taxed Under present law, accounts are taxed while a note taken in payment of an account would not be taxed. This exemption would have gone into effect for the 1966–67 fiscal year and the estimated revenue loss to local government was $5 million.

4. *Tax Relief for Low Income Aged*

A program of tax relief for low-income aged was included as part of the tax reform plan

The state would reimburse each homeowner on the basis of the following schedule:

TABLE 3

Property Tax Relief to Low-Income Aged

Eligible—aged (65 or over) owner-occupied residence

Total gross income of all residents, less than	Percentage exempt of first $5,000 of assessed value	Total gross income of all residents, less than	Percentage exempt of first $5,000 of assessed value	Total gross income of all residents, less than	Percentage exempt of first $5,000 of assessed value
$1,000	95	$1,800	63	$2,600	31
1,025	94	1,825	62	2,625	30
1,050	93	1,850	61	2,650	29
1,075	92	1,875	60	2,675	28
1,100	91	1,900	59	2,700	27
1,125	90	1,925	58	2,725	26
1,150	89	1,950	57	2,750	25
1,175	88	1,975	56	2,775	24
1,200	87	2,000	55	2,800	23
1,225	86	2,025	54	2,825	22
1,250	85	2,050	53	2,850	21
1,275	84	2,075	52	2,875	20
1,300	83	2,100	51	2,900	19
1,325	82	2,125	50	2,925	18
1,350	81	2,150	49	2,950	17
1,375	80	2,175	48	2,975	16
1,400	79	2,200	47	3,000	15
1,425	78	2,225	46	3,025	14
1,450	77	2,250	45	3,050	13
1,475	76	2,275	44	3,075	12
1,500	75	2,300	43	3,100	11
1,525	74	2,325	42	3,125	10
1,550	73	2,350	41	3,150	9
1,575	72	2,375	40	3,175	8
1,600	71	2,400	39	3,200	7
1,625	70	2,425	38	3,225	6
1,650	69	2,450	37	3,250	5
1,675	68	2,475	36	3,275	4
1,700	67	2,500	35	3,300	3
1,725	66	2,525	34	3,325	2
1,750	65	2,550	33	3,350	1
1,775	64	2,575	32		

Because of rising property tax burdens, many people over 65 who have little or no income are being forced to sell their homes. In some

cases, people are paying up to 40 percent of their incomes in property taxes No tax program should force people to abandon their homes.

The plan as proposed would reimburse the elderly for a portion of the amount that has been paid in property taxes The taxpayers would pay property taxes to local government as at present, but, they could send their receipted tax bill to the Franchise Tax Board and receive a state reimbursement for a portion of their tax bill depending on the gross income of all residents of the home.

To be eligible for the program, the homeowner would have to be 65 or over. Gross income means income from all sources of all residents of a household and the taxpayer would not receive any refund for taxes paid on assessed value in excess of $5,000 The refund would apply to the first $5,000 of assessed value for all property—no matter what the total assessed value. For a further discussion of this problem, see *"The Taxation of Property in California"* Part 5 of the series of tax studies prepared for the Assembly Committee on Revenue and Taxation.

C. MAJOR REFORM: SCHOOL PROPERTY TAX RELIEF

In addition to reduction in the tax base, school property tax rates would have been reduced by an additional 25 percent (on an average) by placing in the State School Fund the amount raised by a sales tax rate of 1 percent. This money would be distributed as equalization aid and would have the effect of putting almost every school district in the state on equalization aid.

Each school district would have been required to reduce its tax rate by an amount necessary to raise the sum of new money received from the state under this program. The statutory tax ceiling in each district would also be lowered to that same amount and school districts would be required to go to a vote of the people to increase the school tax rate, exclusive of tax increases needed for payment on bonds.

It should also be pointed out that schools would have received funds to compensate them for a loss in tax base and an additional increment of $35 million above the loss. This is explained in detail in Chapter VI.

D. ADDITIONAL REVENUE FOR LOCAL GOVERNMENT

It would be impossible to return money to local government in a dollar for dollar relation to what they would lose from the property tax reductions.

To insure that they did not lose tax revenue as a result of the reduction in assessed valuation due to the various exemptions proposed by the plan, we provided additional funds for distribution to cities.

Cities would have received $25 million more than they lost; counties would receive $26 million more than they lost; and as mentioned, school districts were to receive $35 million above what they might lose.

The method of reimbursement to local government is explained in Chapter V.

E. EXPLANATION OF REVENUE SOURCES
(refer to Table 4)

To provide revenue to meet state requirements and offset reductions in property taxes, a number of adjustments in the tax structure were to have been made.

TABLE 4

Revenue Sources to Make Up State Gap & Offset Property Tax Relief

	1965–66	*1966–67*
Cigarette tax · 5¢ increase	120	125
Sales tax reforms:		
—taxation of equipment leases in lieu of sales	9	13
—taxation of occasional sales of autos, aircraft, and boats	8	8
Income tax		
—withholding		
100 percent forgiveness (excluding capital gains)	—200 (est.)	75
—drop exemption to $1,000; narrow brackets to $1,500 intervals; extend rates to 15 percent	89	353
—tax capital gains at death		1
Bank and Corporation tax.		
—increase rate ½ percent	34	35
—allocation of income of multistate corporations	3	3
—eliminate double tax on commencing corporations	—2	—2
Inheritance tax:		
—increase rates on inheritances over $100,000		8
—tax inheritances to nonprofit foundations (other than those eligible for property tax exemptions)		3 (est.)
New tax source for county use (optional) property transfer tax: first $15,000 of all transactions exempt (except bare land) rates 1 percent over $15,000; 1½ percent over $25,000		80
Automatic local revenue increase: New local sales tax revenue due to state reforms in sales tax coverage (see above)	5	7
1 percent sales tax increase for mandatory reduction in school property taxes and additional assistance for schools	90	360
	156	1,069

1. *Cigarette Tax*

The tax on cigarettes would have been increased from 3 cents a pack to 8 cents a pack, effective July 1, 1965, although the dealer discount for stamping would remain at 2 percent. Provision was made for a floor stocks tax at a rate of 5 cents per pack. This would have produced approximately $120 million in new revenue in 1965–66 and $125 million in 1966–67.

Cigarette Tax Rates as of July 1, 1965

2 5	1
3	2
4	4
5	4
6	5
7	6
7 8	1
8	19
9	1
10	2
11	2

* Oregon has placed a 4¢ cigarette tax on its next statewide election ballot.
† Includes District of Columbia.

In addition to the need for revenue an increased consideration of the health aspect of smoking has probably contributed to the numerous recent increases in cigarette tax rates Today two states, Texas and Washington, have rates of 11 cents, and two others, New York and Vermont tax cigarettes at 10 cents per pack. Mississippi has a rate of 9 cents and 19 states have a rate of 8 cents.

Three states have proposals before them to increase the tax rate to 8 cents, and four states have proposals to increase the rate to 9 cents. Excluding California, the average cigarette tax rate as of July 1, 1965, was 6 5 cents Compared to other states, California derives an exceptionally low percentage of its total tax revenue from the cigarette tax In 1963–64, only five states including 3 * which had no tax received a smaller fraction of the total revenue from the tobacco taxes

2. *Income Tax*

Heavier use of the state income tax would make the revenue structure more progressive and by more closely paralleling the increase in personal income in the state make unnecessary the constant increase in tax rates

The following changes in the California personal income tax laws would have produced approximately $353 million in additional revenue

a Reduce the personal exemption to $1,000 for single persons and $2,000 for married This was a step in the direction of conformity with the federal exemption of $600 California's present personal exemption of $1,500 is exceeded by only four of the states with income taxes

b Decrease size of the tax brackets from $2,500 intervals ($5,000 for married couples) to $1,500 ($3,000 for married couples) This would increase the progression of the income tax more markedly.

c. Increase the rate structure to a maximum of 15 percent Prior to World War II, California personal income rates progressed from 1 to 15 percent With these rates restored, a married couple would pay the 15 percent rate only on that portion of income over $45,000 a year A couple with two children may deduct $4,200 from their yearly income to determine their taxable income and the tax is then 1 percent on the first $3,000 plus 2 percent on the next increment of $3,000 and so on until the 15 percent rate is reached The 15 percent rate applies only to the last increment of income It should be noted that much of the increase in tax liability in the higher brackets would be passed on to the federal government as the state personal income tax is fully deductible

* Colorado imposed a cigarette tax on July 1, 1964

[12] The tax applies only to interest and dividends
[13] Applies to commuters only, New Jersey-New York area
[14] In addition to the personal exemptions, the following tax credits are granted Single persons, $10, married taxpayers and heads of households, $25
[15] An additional exemption of $1,000 is allowed a married woman with separate income
[16] A credit of $1 is allowed for each $100 actually contributed by the taxpayer as partial support of a person who could qualify (except for the chief support requirement) as a dependent The credit shall not exceed $6
[17] A tax credit of $12 is allowed for each taxpayer or spouse who has reached the age of 65 A blind taxpayer and his spouse (if also blind) are allowed an additional $600 exemption plus a tax credit of $18 each
[18] The exemption is extended to dependents over the age of 21 if their income is less than $600 a year and if they are students in an accredited school or college
[19] Exemption for one dependent of unmarried person is $1,000, if dependent is father, mother, son, daughter, sister or brother
[20] Single person, $218, married couple $405

SOURCE Tax Overlapping in the United States 1964, The Advisory Commission on Intergovernmental Relations, Washington, D C Pg 120

Wisconsin[2]	10 (435)	20 (870)	10 (405)	[20]5	
District of Columbia	1,000	2,000	500	500	500

[1] In most states an identical exemption is allowed for a spouse if she meets the age and blindness conditions In Massachusetts the deduction is allowed against business income only In Hawaii the $5,000 blindness deduction is allowed in lieu of the personal exemption

[2] Personal exemptions and credits for dependents are allowed in the form of tax credits which are deductible from an amount of tax With respect to personal exemptions, the sum in parentheses is the exemption equivalent of the tax credit assuming that the exemption is deducted from the lowest brackets With respect to the dependency exemptions, the sum in parentheses is the amount by which the first dependent raises the level at which a married person or head of family becomes taxable

[3] Individuals establishing residence in Hawaii after the age of 65 are subject to tax on income from Hawaii sources only (the tax is imposed on the entire taxable income of resident individuals estates, and trusts)

[4] Each spouse is entitled to the lesser of $1 000 or adjusted gross income

[5] Single person $833 married couple, $1 167

[6] The exemption is allowed for students regardless of age or income

[7] The exemptions and credits for dependents are deductible from the lowest income bracket and are equivalent to the tax credits shown in parentheses

[8] An identical exemption is allowed for a spouse or for a dependent

[9] The exemption is allowed for students regardless of age or income, and an additional credit of $800 is allowed for each dependent 65 years of age or over

[10] The exemptions shown are those allowed against business income, including salaries and wages a specific exemption of $2,000 for each taxpayer In addition a dependency exemption of $500 is allowed for a dependent spouse who has income from all sources of less than $2,000 In the case of a joint return, the exemption is the smaller of (1) $3,000 or (2) $2 000 plus the income of the spouse having the smaller income For nonbusiness income (annuities, interest and dividends) the exemption is the smaller of (1) $1 000 or (2) the unused portion of the exemption applicable to business income Married persons must file a joint return in order to obtain any nonbusiness income exemption If a single person, or either party to a joint return is 65 years of age, the maximum exemption is increased from $1,000 to $1,500 No exemption is allowed against nonbusiness income if income from all sources for a single person exceeds $5,000 and for a married person exceeds $7,500

[11] An additional tax credit of $10 for single persons and $15 each for taxpayer and spouse is allowed for persons 65 years of age or over and for blind persons

TABLE 6

State Individual Income Taxes: Rates, January 1, 1964

State	Net income after personal exemption	Rate (percent)	Federal tax deductible	Standard deduction allowed[1]	Special rates or features
Alabama	First $1,000	1	X	X	
	$1,001–$3,000	2			
	$3,001–$5,000	3			
	Over $5,000	5			
Alaska	First $2,000	1		X	
	$2,001–$4,000	2			The income brackets are for single persons, and married couples filing separate returns. The use of brackets is double for married couples filing joint returns
	$4,001–$6,000	3			
	$6,001–$8,000	4			
	$8,001–$10,000	5			
	$10,001–$12,000	6			
	$12,001–$14,000	7			
	$14,001–$16,000	8			
	$16,001–$18,000	9			
	$18,001–$20,000	10			
	$20,001–$22,000	11			
	$22,001–$26,000	12			
	$26,001–$32,000	13			
	$32,001–$38,000	14			
	$38,001–$44,000	15			
	$44,001–$50,000	16			
	$50,001–$60,000	17			
	$60,001–$70,000	18			
	$70,001–$80,000	19			
	$80,001–$90,000	20			
	$90,001–$100,000	21			
	$100,001–$150,000	22			
	$150,001–$200,000	23			
	Over $200,000	24			
Arizona[2]	First $1,000	1	X	X	
	$1,001–$2,000	2			
	$2,001–$3,000	3			
	$3,001–$4,000	4			
	$4,001–$5,000	5			
	$5,001–$6,000	6			
	$6,001–$7,000	7			
	Over $7,000	8			
Arkansas	First $3,000	1		X	
	$3,001–$6,000	2			
	$6,001–$11,000	3			
	$11,001–$25,000	4			
	Over $25,000	5			
California[3]	First $2,500	1		X	
	$2,501–$5,000	2			
	$5,001–$7,500	3			
	$7,501–$10,000	4			
	$10,001–$12,500	5			
	$12,501–$15,000	6			
	Over $15,000	7			
Colorado	First $1,000	3	X	X	Surtax on income from intangibles in excess of $5,000, 2 percent. Beginning with tax year 1963, taxpayers are allowed a credit equal to ½ of 1 percent of net taxable income on the first $9000 of taxable income
	$1,001–$3,000	3.5			
	$2,001–$3,000	4			
	$3,001–$4,000	4.5			
	$4,001–$5,000	5			
	$5,001–$6,000	5.5			
	$6,001–$7,000	6			
	$7,001–$8,000	6.5			
	$8,001–$9,000	7			
	$9,001–$10,000	7.5			
	Over $10,000	8			
Delaware	First $1,000	1.5	X[4]	X	
	$1,001–$2,000	2			
	$2,001–$3,000	3			
	$3,001–$4,000	4			
	$4,001–$5,000	5			
	$5,001–$6,000	6			
	$6,001–$8,000	7			
	$8,001–$30,000	8			
	$30,001–$50,000	9			
	$50,001–$100,000	10			
	Over $100,000	11			
Georgia	First $1,000	1		X	
	$1,001–$3,000	2			
	$3,001–$5,000	3			
	$5,001–$7,000	4			
	$7,001–$10,000	5			
	Over $10,000	6

State Individual Income Taxes: Rates, January 1, 1964

State	Net income after personal exemption	Rate (percent)	Federal tax deductible	Standard deduction allowed[1]	Special rates or features
Hawaii[4]	First $500	3		X	Alternative tax on capital gains
	$501–$1,000	3 5			Deduct 50 per cent of capital
	$1,001–$2,000	4			gains and pay an additional 3
	$2,001–$5,000	5			percent on such gains The in-
	$5,001–$10 000	6			come classes reported are for
	$10,001–$20,000	7			individuals and heads of
	$20 001–$30,000	8			households For joint returns
	Over $30,000	9			the rates shown apply to in-
					come classes twice as large
Idaho[2]	First $1,000	3 4	X	X	A $10 filing fee is imposed on
	$1,001–$2,000	5 5			each return
	$2,001–$3,000	7 2			
	$3,001–$4,000	8 25			
	$4 001–$5,000	9 35			
	Over $5,000	10 5			
Indiana	Adjusted gross income	2			A $6 tax credit is allowed each
					taxpayer and each dependent
					for sales tax paid on food and
					prescription drugs
Iowa	First $1,000	0 75	X	X	
	$1 001–$2,000	1 5			
	$2,001–$3,000	2 25			
	$3,001–$4 000	3			
	Over $4 000	3 75			
Kansas	First $2,000	1 5	X	X	The income classes reported are
	$2,001–$3,000	2 5			for individuals and heads of
	$3 001–$5,000	3			households For joint returns
	$5,001–$7 000	4			the rates shown apply to in-
	Over $7 000	5 5			come classes twice as large
Kentucky	First $3 000	2	X	X	
	$3,001–$4,000	3			
	$4,001–$5,000	4			
	$5,001–$8,000	5			
	Over $8 000	6			
Louisiana[2]	First $10 000	2	X	X	
	$10,001–$50,000	4			
	Over $50 000	6			
Maryland	Ordinary income	3		X	Rate on ordinary income in-
	Investment income				creased to 4 percent, effective
	First $500	3			January 1, 1965
	Balance	5			
Massachusetts[4]	Earned income and business income	3 075	X[5]		Rates include the following
	Interest and dividends, capital gains on intangibles	7 38			additional taxes 3 percent permanent surtax on all types of income, and, through June 30 1965, 20-percent surtax on all types of income, 1 percent on earned and business income, and 3 percent on capital gains on intangibles
	Annuities	1 845			
Minnesota	First $500	1	X	X	A 15-percent surtax for taxable
	$501–$1,000	1 5			years starting before 1965
	$1 001–$2 000	2 5			There is an additional tax of
	$2,001–$3 000	3 5			1 percent on the first $1,000
	$3,001–$4 000	4 5			or fraction thereof of ad-
	$4 001–$5,000	5 5			justed gross income where net
	$5 001–$7 000	6 5			income tax plus surtax does
	$7,001–$9,000	7 5			not exceed $10 This addi-
	$9 001–$12,500	8 5			tional tax shall not, however,
	$12 501–$20,000	9 5			be applied to increase the
	Over $20,000	10 5			total taxes payable by such persons to more than $10
Mississippi	First $5,000	2		X	The maximum rate for later
	$5,001–$10 000	3			years will be 1965, 3 5 on
	Over $10,000	4			income in excess of $10,000, 1966 and after, 3 on income in excess of $5,000

	$14,001–$15,000	9.9			
	Over $15,000	10.0			
District of Columbia	First $5,000	2.5		X	Income from unincorporated business is taxed at 5 percent
	$5,001–$10,000	3			
	$10,001–$15,000	3.5			
	$15,001–$20,000	4			
	$20,001–$25,000	4.5			
	Over $25,000	5			

[1] Varies on single and joint returns from $250 to $1,000
[2] Community property state in which, in general, ½ the community income is taxable to each spouse
[3] Limited to $300 for single persons and $600 for married persons filing joint returns
[4] Allows deduction of state individual income tax itself in computing state tax liability
[5] Limited to taxes paid on professional or business income
[6] Limited to $500 per taxpayer
SOURCE Advisory Commission on Intergovernmental Relations, *Tax Overlapping in the United States, 1964*, Pp 122–126

d. In addition to changes in the rate structure, the method of collection of the state income tax was to be changed. Beginning on January 1, 1966, Californians would have started paying state income taxes on a pay-as-you-earn basis—similar to the present method of paying federal income taxes. Employers would withhold state income taxes from wages and persons who expected that their income tax would exceed the amounts withheld by more than $40 would be required to file declarations of estimated tax By adopting this collection method, taxes would be received from many people who owe the state income taxes but do not pay. Farmers, fishermen, some retired persons, military personnel, newsboys and certain others would be exempt from the withholding feature.

The change to a pay-as-you-earn system of collection would be accompanied by a full 100 percent forgiveness of all 1965 taxes that were owed the state and would be due in 1966 (except for capital gains and trust income). This means that none of the money Californians earned in 1965 would be subject to income taxation by the state Even those exempt from withholding would be eligible for 100 percent forgiveness. The state would lose $200 million in revenue in the fiscal year 1965–66 as a result of the forgiveness of 1965 income taxes; however, beginning in 1966–67 and without changing rates the general fund would receive more than $65 million in new money primarily due to the pickup from those now evading the tax and from those who leave the state without paying and by attaching the rate structure to the growth in the tax base in the year the growth occurs

Under the present method of collecting the state income tax, there is a lag of from 3½ to 15½ months between the time the income is earned and the time the tax on that income is due It takes another two years using the most up-to-date methods and equipment to ascertain who is a delinquent taxpayer and almost 2½ million persons will have left the state in this time period. Many avoid the state income tax by not being here when it comes time to file the tax return, or by not paying the tax in anticipation of leaving California. This problem would be aggravated by the shifting of defense contracts to other states, with the consequent departure of well-paid technical and professional persons.

Withholding also educates new residents to their California income tax responsibilities and helps prevent initial tax delinquency on their part Some of these people come from states which do not levy an income tax and they are not aware that California imposes such a levy

The argument has been made that withholding reduces the "tax consciousness" of the taxpayer, and with it goes his concern for efficiency and economy in government Those holding this opinion further contend that paying taxes should be painful rather than easy—that taxpaying should be like pulling teeth—only without an anesthetic. There is a difference of opinion among economists as to whether taxes should be painful or be collected with the ease of convenience to the taxpayer.

Adam Smith, one of the giants of the free market economists, states on this point: "Every tax ought to be levied at the time, or in the manner in which it is most likely to be convenient for the contributor to pay it."

TABLE 7

Withholding States in Order of the Effective Date of Withholding and the Extent of Forgiveness

	The state	Effective date of withholding	Degree of forgiveness
1	Oregon	1948—January 1	None
2	Alaska[1]	1949—January 1	Not applicable [2]
3	Delaware[3]	1949—July 1	None

[1] A territory when withholding introduced
[2] Withholding introduced simultaneously with state income tax
[3] Delaware suspended withholding on December 31, 1950 and resumed it on July 1, 1953
[4] All liabilities except those on trusts, estates, and capital gains were forgiven
[5] With the exception of tax on capital gains
[6] Subject to referendum
SOURCE National Tax Journal Volume XVII, No 4 December 1964, pg 404, National Tax Administrators News, Vol 30, No 6, June 1965, and information supplied by revenue departments of various states

Some would argue that withholding actually increases awareness Each time the wage earner receives his paycheck—often 52 times a year—he is aware that deductions for income taxes have been made Each time the taxpayer files and pays his declaration of estimated tax, he is aware of the income tax And finally, when he files his income tax return he is made aware of the total amount of his tax liability. Tax payments are not similarly summarized for the individual who pays general sales taxes, gasoline taxes or other excises

The pay-as-you-earn system does not decrease tax consciousness It does make it easier for the taxpayer to pay what he owes by creating a reserve from which to pay his tax It spreads out his payments in the form of interest-free installments, thus removing the need to borrow funds to meet his liability

Often the taxpayer must borrow in order to fulfill his liability or he may not remit the amount due with his return In 1964, more than 200,000 returns were received without remittances Of this number, over 188,000 were from taxpayers with incomes below $14,000 and these persons were required to pay interest to the state when they finally paid their tax.

Pay-as-you-earn also improves taxpayer morale, since the honest taxpayer knows that those who would evade the tax are also paying

their fair share of the cost of government. Better morale means improvement in voluntary compliance as the taxpayer includes income from all sources when he files his return States that have adopted withholding report little, if any taxpayer opposition Many states, in fact, report taxpayer satisfaction, something that no other collection method has been able to accomplish

The most valid argument against the adoption of withholding is that the employer becomes a tax collector The rebuttal is to point out that he is already the collecting agent for other taxes and services, many of which he does voluntarily. Payroll deductions may add something to employer expenses; however, it is not a large amount The study of this subject most frequently referred to was done by Professor Lewis G Kahn of Hamline University regarding the administration of local income taxes for four Pennsylvania cities He contacted 22 firms Of the 16 which responded, 9 reported that the cost of withholding was negligible, and 6 gave information which indicated that the weighted average cost of withholding per employee was 26 cents per year Conversation with employers large and small in income tax cities of other states led Professor Kahn to the conclusion that the cost of withholding local income taxes is negligible.

The burden of a state income tax withholding system can be said to be marginal in any case, since it is only one of the many payroll deductions (including United Crusade, union dues, etc) usually required The cost of withholding is a business expense to the employer, and as such is fully deductible in arriving at taxable income

It must be emphasized, too, that under AB 2270 employers would remit quarterly the amounts they withheld Thus, employers would have the interest-free use of these funds for an average of two months before they remit it to the state

As of June 1965, 30 of the 33 states taxing personal income collected, or will shortly collect the tax by withholding Only one, New York, granted 100 percent forgiveness when withholding was instituted

c Reforms in the Personal Income Tax

In the committee's interim report, Part 3, *Conformity of State Personal Income Tax Laws,* there were suggestions for more uniformity of deductions and exemptions in the state personal income tax law so that it would then parallel the Federal Internal Revenue Code Six of these suggestions were included among the provisions of AB 2270

1 Annuities Under Life Expectancy Rule

Under present law a person who receives payments from an annuity contract is subject to an annual tax on payments (up to 3 percent of the purchase price) until the amount of the exempt payments equals the purchase price of the annuity From that time all the payments are fully taxable The amendment proposed in AB 2270 would conform California tax law to federal rules which allow a standard exemption on all payments received The tax liability would be the same in all years, not increasing in later years as they do under the 3 percent rule The standard exemption would have been determined for each annuity by the size of the payment and adjusted for the actuarial life of the annuity

2 Foster Children Deduction

Foster parents would have been allowed to deduct the $600 personal exemption for any foster children under their care as they now claim each of their own children or other dependents

3 Charitable Contributions Deduction

The maximum charitable contribution was raised from 20 percent to 30 percent of a taxpayers' adjusted gross income if the extra 10 percent were contributed to a church, school or hospital

4 Foreign Student Deduction

Taxpayers would also be permitted to deduct $50 per month ($600 per year prorated) for each month that they maintain a student under a program sponsored by charitable organizations

5 Medical Deduction

The maximum medical expense deductions were raised to conform to federal statute

Taxpayer	*Existing law*	*Proposed by AB 2270*
Single or married filing separately	$1,250	$10,000
Joint or head of household	2,500	20,000
Over 65 and disabled	15,000	20,000
Married couple (both over 65 and disabled)	30,000	40,000

It should be kept in mind that these are not automatic deductions for all taxpayers; they are medical expense deductions and represent a like amount already spent by the taxpayer for medical care

6 Capital Gains at Death

One further reform proposed by AB 2270 was in the treatment of capital gains at death The bill would have imposed a tax at capital gains rates on all net gains accrued on capital assets up to the time of transfer at death Under the present law, at the time of death property takes on a basis equivalent to market value, and any appreciation in value that occurred in the hands of the decedent is forever forgotten as far as the capital gains tax is concerned The property at its new value is subject to the federal estate tax and the state inheritance tax but in view of the many exemptions and deductions in both of these taxes a particular capital gain may escape all taxation In this case the transfer may escape all taxation since the capital gain will escape, and the higher rate personal income tax will not apply To eliminate this inequity AB 2270 proposed that the capital gains tax rate apply to the net gain on the asset between the time it was originally acquired and the date of transfer The California Personal Income Tax Law provides a capital gains rate at 50 percent of the rate applied to normal income In most cases where the capital gains tax would apply the income tax rate would be 7 percent so the capital gains rate would be only 3½ percent As an example let us cite two illustrations In one case a man owns 500 shares of General Motors bought at $10 a share He sells them at $50 a share and receives $25,000 He pays a capital gains tax on the $40 a share increase in value of the stock Then immediately after selling the stock he dies He is also taxed on the $25,000 in cash in the estate In another situation a

man buys 50 shares of General Motors at $10 a share but does not sell He dies when the General Motors stock is worth $50 a share His beneficiary will pay an inheritance tax on the value of the stock, $25,000 Immediately upon receiving the stock his beneficiary sells the stock for $50 a share He will pay no capital gains tax whatsoever. In this illustration, the second taxpayer has an advantage over the first one

3. *Bank and Corporation Tax*

To compensate for a loss in the bank and corporation tax revenues as a result of the elimination of business personal property from the tax base, this tax rate would have been raised one-half of 1 percent—from 5½ percent to 6 percent This would add approximately $30 million in revenue to the general fund.

Adoption of the reforms in the Bank and Corporation tax law described below would have resulted in a large revenue loss in 1965–66 and a small gain thereafter.

a Allocation of Income of Multistate Corporations

The major portion of California's corporation franchise tax is paid by corporations operating in two or more states. In levying the tax on multistate corporations, the Franchise Tax Board must determine the net income of the corporation derived from or attributable to sources within the state A problem results when other states also tax the net income of these same corporations often using different methods of allocating net income to their state A recent Congressional investigation of this problem concluded that the present situation is chaotic

To preclude the need for Congressional action, the states are attempting to adopt a proposed uniform standard. AB 2270 amended the Bank and Corporation Tax Law to adopt the principles of the Uniform Division of Income for Tax Purposes Act which was approved by the National Conference of Commissioners on Uniform State Laws in 1957 A number of the provisions in AB 2270 dealing with acceleration were technical or would have the effect of putting into the law what are already existing administratively established practices in California and would therefore have no effect on revenues Major changes which would have had substantive effect were these:

Existing law provides that the formula for allocating income among the various states will be based upon sales, purchases, manufacturing expenses, payroll, value and situs of tangible property or by reference to any other factors or method which would fairly determine the allocation This bill makes changes in the formula, described below, in the allocation factor relating to sales

Currently the administratively adopted guidelines for allocating sales provides that sales are to be attributed to various states on the basis of sales activity in the states Under the changes in the bill, sales would be allocated on the basis of the state of delivery rather than sales activity.

The existing guidelines contain special provisions for allocating sales made to the United States Government because such sales usually involve sales activity in two or more states. Under the changes in the bill, all such sales would be allocated to the state from which the items were shipped. The Franchise Tax Board estimates the changes pro-

posed in the bill would result in an increase in revenues of $3 million per year, most of which would be attributable to the provisions applying to sales to the United States Government

Currently property owned by a taxpayer is included as one of the factors in the income allocation formula, but rented property is not This bill provided that rented property be included in the allocation formula and gave a method for establishing the value of rented property for this purpose.

Payrolls are currently apportioned to the state in which the personal services are rendered In instances where employees work in more than one state, such as those operating transportation equipment, the costs are apportioned on a mileage or similar basis Under this bill it is expected that such personal service costs would have been allocated entirely to the state in which the employee is normally considered to have his base of operations

The provisions of the bill which affected computation of the taxes would apply to income or taxable years beginning after December 31, 1964

b Commencing Corporations

The annual franchise tax is paid in advance (as contrasted to the personal income tax which is paid at the end of the earning year). When a new firm is incorporated, it is immediately liable for its first year's tax payment although there is no income on which to base the collection For this reason, a uniform payment of $100 is required of all new corporations At the end of the first year of business, the tax rate is applied to the corporation's net income to determine the second year's tax liability, and this same figure is adjusted by the original $100 prepayment to take care of the first year's tax A refund or additional payment is then made for the first year In subsequent years, there is only one computation at tax time with the payment based on the previous year's net income

The tax is always collected in advance so there is no tax based on the final year's net income Since many "corporations" are created to perform a specific job, e g , produce a movie, and complete the job in a year or less, they avoid a corporate tax in their year of greatest earnings or their only year of earnings

AB 2270 eliminated the prepayment provisions and imposed a tax on the net income of the corporation in each year of operation (including the last year or portion of a year) in California Due to the elimination of the first-year double payment there would be a $2 million yearly loss to the state general fund.

c. Exemption of Keogh Trusts

This section relates to the highly complex and controversial federal Self-Employed Retirement Act of 1962 In general, the act permits an individual to deduct from adjusted gross income his contributions made under a self-employed pension plan Self-employed individuals may contribute to a retirement plan for themselves up to $2,500 per year, however, only 50 percent of this is deductible from gross income Benefits may not begin before age 59½ unless the individual becomes disabled or dies Individuals who choose this particular tax exemption must also cover all their full-time employees with more than three years

C	Uncle—Aunt—Cousin Strangers in Blood—including Brothers- and Sisters-in Law Fathers- and Mothers-in-Law	300 00	10%	15%	18%	19%	20%	22%	24%

* If a decedent husband gives his wife a life estate or power of appointment in his half of the community property, said half is subject to tax at the rates indicated with a $5 000 exemption allowed

service, not counting seasonal, part-time or temporary workers The primary purpose of the measure was to give self-employed persons access to retirement plans on a basis similar to that given employees whose employers have established pension, or profit-sharing bonus plans. Retirement plans established for the benefit of employees and their beneficiaries are given favorable tax treatment under present law. AB 2270 exempted from bank and corporation tax, trust income set up pursuant to the Keogh Act.

4. Inheritance and Gift Tax

Several changes were contemplated which related to the gift tax and to taxes paid at death. The revenue impact of these changes was estimated to be $16 million.

a. Rates on gifts and inheritances over $100,000 would have been increased as follows:

Class A	$100,000–$200,000	change from 7 to 9 percent
	200,000– 300,000	change from 9 to 11 percent
	300,000– 500,000	change from 9 to 12 percent
	over $500,000	change from 10 to 14 percent
Class B	$200,000–$300,000	change from 15 to 16 percent
Class D	$100,000–$200,000	change from 18 to 19 percent
	200,000– 300,000	change from 18 to 20 percent

b Class C and D rates and exemptions were combined to reflect Class D rate with a $300 exemption.

c. Certain types of nonprofit foundations, now exempt from inheritance taxes would have been taxable at Class D rates although colleges, churches, orphanages, and charitable institutions would continue to be exempt.

5. Property Transfer Tax

Counties would have been authorized to impose a countywide real property transfer or deed recording tax. This would partly offset the loss of tax base which the counties would experience. It was similar to the 1 percent real property transfer tax proposed by Governor Frank Merriam in 1935 except that the first $15,000 of all sales of property with improvments was to be exempt and the rate for property over $25,000 increased to 1½ percent Fourteen other states have real estate transfer taxes It is estimated that the counties of California could derive $80 million from this tax For a more detailed discussion of property transfer taxes see Part 7 of the Committee's Interim Reports, and Appendix I

6. Sales Tax

The sales tax is also a better revenue source than the property tax. California's state sales tax would have been raised 1 percent (3 percent state–1 percent local, to 4 percent state–1 percent local) with the increased revenue obtained therefrom placed in the state school fund for mandatory school property tax relief to average 25 percent. This new rate would have gone into effect in January 1966. Recent studies

of the sales tax have shown that with the exemptions California provides it is not regressive *

a. Reform in the State Sales Tax

1 Occasional Sales of Vehicles, Boats and Aircraft

AB 2270 extended the provisions of the sales and use tax to occasional sales of autos, aircraft and boats These are the sales by private parties rather than dealers Under present law, private parties may sell one automobile each year without a sales or use tax applying but AB 2270 would extend the tax to all sales except those between family members California would realize $8 million in new revenue each year after this exemption is closed

The occasional sale exemption was satisfactory until the practice of arranging sales between individuals developed in the automobile business This practice took several forms In some instances it was done in order to get a so-called clean deal—the sale of a new car with no trade-in Some dealers, however, complained that it was carried on as a profitable sideline by salesmen In any event, sales of used cars directly from owner to purchaser soon became an important sales and use tax loophole

In 1963 the sales tax law was amended to tax all private party sales in any 12-month period Under this law the tax is paid by the purchaser at the time the vehicle is registered if he has not obtained an affidavit stating that the former owner has made no other sale in the previous 12 months Since the buyer has no assurance that the car he has purchased is, in fact, the other party's first sale in 12 months, he frequently finds that he has been double-crossed and what was understood to be a tax exempt sale is taxable The use tax applies to these sales and it must be paid before the car can be registered Because a complete check of all such transfers is not feasible, the present law actually tends to encourage deception and tax evasion As a result of this provision there has been a great deal of dissatisfaction among purchasers and a substantial tax loss to the state The simplest solution is to make all sales of vehicles subject to use tax, just as all sales of new cars and all used car sales by dealers are subject to the sales tax

Extension of this use tax principle to occasional sales of boats and airplanes merely recognizes that the same potential loophole exists in these types of property If the purchase is made from a retailer, it is taxable If it is made from an individual who has sold less than three items in a year, it is exempt under present law AB 2270 applied the same rule to boats—except ferry boats, sailboats less than eight feet in length, rowboats and canoes—and to airplanes The use tax would be collected by the Board of Equalization subsequent to notification by the Division of Small Craft Harbors and the Civil Aeronautics Administration of a transfer of ownership of boats and airplanes

(This occasional sales tax as it applied to automobiles, boats, and aircraft was included in AB 1 of the 1965 1st Extraordinary Session and is now on the statute books)

* For a full discussion of this tax see "The Sales Tax" by Harold M Somers, part 4 of the series published by the Assembly Committee on Revenue and Taxation

2 Leasing of Tangible Personal Property

AB 2270 extended the sales and use tax to the receipts from the lease of tangible personal property Closing this loophole would mean $13 million to the General Fund

The practice of leasing rather than purchasing or selling tangible personal property has expanded significantly in the 1960's Companies which have come into existence in recent years will lease almost any conceivable piece of equipment Many items, such as computers and office machines, are now acquired entirely on a lease basis rather than by purchase Recently, banks have also entered the field of equipment leasing Leasing has become a way of business life, in competition with selling

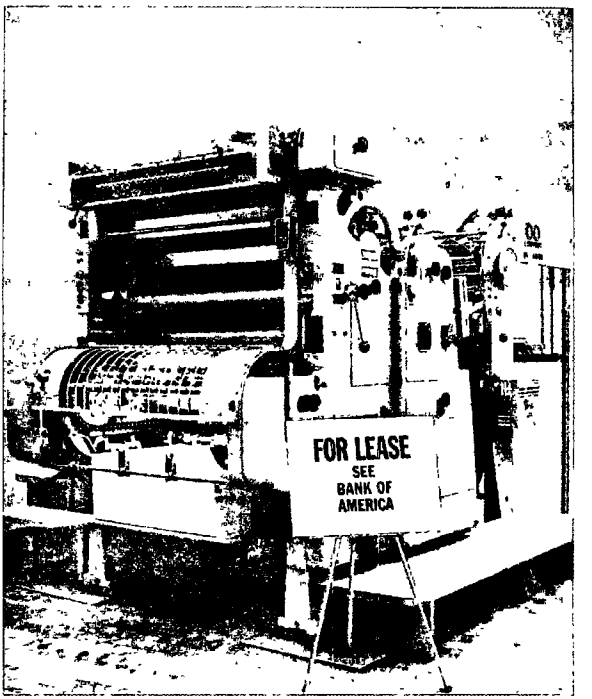
At the beginning of 1965 the law allowed a lessor to elect to pay tax on his cost of property or on his rental receipts The taxable cost to manufacturers who operate their own lease plan is only the cost of their raw materials and labor and this ordinarily represents only a fraction of sale or rental price Many long-term leases closely resemble conditional sales and under the then existing law certain of these leases were considered sales for tax purposes There are, however, an infinite variety of clauses, options, and terms which may be placed in rental or lease agreements making it extremely difficult for businessmen and tax administrators to clearly segregate those leases which were subject to tax from those which were not As many leases were then taxed, or sales taxes were paid prior to leasing, the major impact of AB 2270 in this area would have been on property leased from the original manufacturer or on property leased from banks and insurance companies. In the case of a lease from a manufacturer, there is no transfer of title, and the measure of the tax is the cost of the raw material which went into production of the item, only a minimal fraction of the actual value of the finished product Such a manufacturer-lessor has a distinct tax advantage over other lessors

Estimates by the Board of Equalization indicated that $10 million of the increased revenue expected if this proposal had been adopted would come from the lease of computers and E D P equipment The proposal would also have covered those banks which were entering the equipment rental business

Banks and insurance companies are not subject to use tax, since the bank and insurance taxes are in lieu of all other taxes on personal property Hence, it was possible for banks and insurance companies to purchase tangible personal property outside the state and bring it to California for leasing purposes Since the lessee was not subject to tax under the existing law, this transaction escaped taxation entirely while their competitors were subject to the full 4 percent sales or use tax

AB 2270 attempted to correct each of these situations by including leases of tangible personal property in the definition of "sale" and "purchase" since this lease is, in effect, a continuing sale The tax applies and it is to be collected by the lessor from the lessee, just as the amount of the sales tax is collected by the seller from the purchaser.

Exemptions were provided for clothing, linen supplies, where the laundering service is an essential part of the lease agreement, house-



Printing presses, linotypes, multi-spindle drills, lathes, reamers—any machine you need—*we'll* buy. And then lease it to you at mutually acceptable terms. Just choose the model that suits your requirements and we'll have the dealer deliver it directly to you. That's all there is to it. It's the modern, flexible way to add value to your capital equipment—*without* using your capital.

For more information about leasing from the bank or to discuss any of your equipment financing needs, call your nearest Bank of America branch. Or write Equipment Financing & Leasing Department, 341 Montgomery St., San Francisco or 650 S. Spring St., Los Angeles.

BANK OF AMERICA

hold furnishings provided in rental living quarters, and motion picture film and video tape

At the special session of the Legislature following adjournment of the 1965 Regular Session a modified lease tax proposal was placed on the statute books This measure provides for the collection of the tax on all tangible property which is leased when a sales or use tax has not been collected on the property in substantially the form in which it is leased In simple terms it means that if an item is manufactured and leased by the same firm or leased by a bank so that no sales tax is paid then the lease tax applies However, if property is purchased by a dealer in rental equipment for subsequent lease then he will pay a sales tax and the lease tax will not apply.

b. Reform in Local Sales Tax

1 Beginning in April, 1966, a newly authorized 1 08 percent local sales tax would have been a credit against the state sales tax. As a result, the sales tax in the state of California would be a uniform five percent. If a county decided to abandon its local sales tax, the rate would continue at 5 percent in the county with all the revenue going to the state.

2 Because of the lack of uniformity in the imposition of the local sales tax, several exemptions were written into statute As the sales tax rate would be uniform throughout the state if the above reform is adopted, the local sales tax exemption for property purchased by operators of common carriers and the local use tax exemption for property purchased by utilities was to be repealed

V. HOW FUNDS WERE TO BE ALLOCATED TO LOCAL GOVERNMENT

A. REVENUE LOSS TO LOCAL GOVERNMENT DUE TO NARROWING OF THE TAX BASE

Local government would lose an estimated $275 million as a result of the property tax exemptions proposed by AB 2270 The loss stems from the repeal of the personal property tax on household goods and business inventories and the exemption of solvent credits. The reduction in the bank tax and the property tax relief program for low income senior citizens, shown in the section on revenue loss to government due to reductions in the property tax base (Chapter IV), are not losses to local government The bank tax is a state tax and the tax relief for low income aged will be a, reimbursement by the state for property taxes paid by those who are elgible for the program

LOSS TO LOCAL GOVERNMENT
(in millions)

Exemption of Business Inventories	$225
Exemption of Household Goods	45
Exemption of Solvent Credits	5
Total	$275

The $275 million loss is the total figure for all local government. To determine the loss by type of local government, it is necessary to allocate the loss based on the percentage of total property tax revenue collected for each of the local jurisdictions using this tax. For example, approximately 50 percent of all property taxes levied are for schools Therefore, approximately one-half the revenue loss could be allocated to schools Thirty percent of all property taxes collected go to county governments and 15 percent to cities The balance represents the property taxes collected by special districts

LOSS BY TYPE OF GOVERNMENT
(in millions)

Schools (50%)	$137.50
Counties (30%)	82 50
Cities (15%)	41.25
Special Districts (5%)	13 75
Total	$275 00

B. CITY REIMBURSEMENT

Cities would lose approximately $42 million in property tax revenues because of the exemptions in AB 2270

The state would not only reimburse cities for this loss, but add an additional $25 million in new money for city councils to use They may use this additional money to improve the quality of their services or to reduce property taxes even further To reimburse cities, the state

ADDITIONAL REVENUE FOR CITIES
(in millions)

From seventeen one-hundreds of 1 percent of sales tax set aside in special fund	$61
From local 1 percent sales tax on leases and occasional sales of autos	6
Total additional revenue	$67
Loss to cities due to exemptions	42
Net additional revenue	$25

would place revenue equivalent to the amount collected by a sales tax rate of seventeen one-hundreds of 1 percent into a special fund. The fund would be allocated to cities by the Controller in the proportion that the revenue collected from locally assessed personal property by each city in 1963–64 bears to the sum of all revenue collected by cities against locally assessed personal property The cities would also get approximately $8 million through the present Bradley-Burns local sales tax as a result of the expansion of the sales tax base to leases and occasional sales of autos, boats and aircraft

C. COUNTY REIMBURSEMENT

Counties would lose approximately $82 5 million in property tax revenues because of the exemptions in AB 2270 This loss would be made up by a locally imposed real estate transfer tax, a special countywide sales tax at a rate of eight one-hundreds of 1 percent and increased revenue from the local 1 percent sales tax as a result of an expanded tax base

Counties would have been authorized to levy the real estate transfer tax at a rate of 1 percent for the first $25,000 of transfer value and 1½ percent on values transferred in excess of $25,000, however the first $15,000 of value of improved real property would be exempt

ADDITIONAL REVENUES FOR COUNTIES
(in millions)

From real property transfer tax	$80
From countywide sales tax at a rate of eight one-hundreds of 1 percent (portion relinquished by state)	28
From increased local 1 percent sales tax due to the taxation of leases and autos	1
Total additional revenue	$109
Loss to county due to exemptions	82 5
Net additional revenue	$26 5

In order for a county to impose a countywide sales tax at a rate of eight one-hundredths of 1 percent, the state would relinquish this portion of its sales tax rate In no event would the total state and local sales tax be higher than 5 percent anywhere in the state

A small increase in sales tax revenue would accrue to counties due to the change in the sales tax base (extension to leases and occasional sales of autos, aircraft and boats) Approximately 15 percent of sales tax revenues generated under the existing 1 percent local sales tax goes into the county treasury

D. SCHOOL DISTRICT REIMBURSEMENT

In this bill California's school districts were allocated $508 million of new state money for three purposes to make up the property tax revenue lost due to the exemptions of household furnishings, business inventories, and solvent credits; to provide for a mandatory reduction in school property tax rates which averaged close to 25 percent on a

ALLOCATION OF MONEY TO SCHOOL DISTRICTS
(in millions)

New money placed in state school fund	$508
How money would be used:	
1 To replace funds lost as result of exemptions	$138
2 For average 25 percent property tax rate reduction (mandatory)	335
3 For improved educational programs	35
	$508

statewide basis (but vary from district to district depending upon the wealth and tax rate of the district); and to provide additional funds for improved educational opportunities for the children of this state. The money was to be placed in the school apportionment fund for distribution to the districts on a formula basis. The present formulae were changed substantially, as explained in Chapter VI.

VI. OTHER REFORMS

A. NON-REVENUE REFORMS IN THE PROPERTY TAX

1. Standard Ratio of Assessment

The bill provided that all taxable property in this state should be appraised at 100 percent of full cash value. To obtain the assessed value the assessor would multiply this appraised value by a factor established by the State Board of Equalization In this way all taxable property in the state would be assessed at the same ratio to full cash value Assessors were still given discretion in determining appraised values but the assessed value on which the tax applies had to be uniform throughout the state

2. Improved Appeals Procedure

(a) *Notification* Every taxpayer whose assessment was increased by 10 percent or more would have to be notified of the change (Present law requires notification only if the assessment is increased over 25 percent)

(b) *Appeal.* Assessment appeals could be filed in any branch office maintained by the county government where the assessor or clerk of the board has an office

(c) *Information.* Since the State Board of Equalization surveys of each county would be completed before the appeals hearing the taxpayer would have the board ratios for his county on which he could rely when protesting his assessment. The local board would be directed to adjust any assessment which varied by more than 10 percent depending on the evidence presented

3. City Assessing

Provisions of the bill encouraged charter cities to transfer their assessing function to their county assessor and provided that general law cities must transfer the assessing function This would have resulted in a savings of over $1 5 million which is now spent for wasteful duplication

4. Appraiser Qualifications

In the future anyone hired as an appraiser by a county would have to demonstrate his qualifications and be certificated by the State Board of Equalization. In counties where potential appraisers are required to pass a civil service examination, the State Board of Equalization would approve the content of the examination and passage of such an examination would suffice for certification In other counties, the candidate would be required to pass a state examination, which would be administered by the State Personnel Board

This requirement for certification would improve the quality of assessments and insure more uniformity of assessment throughout the

state It is a reform which has been recommended by the Advisory Commission on Intergovernmental Relations.

5. Lien Date

The lien date was changed from the first Monday in March to January 1 This change moved many dates on the tax calendar,, allowed governmental agencies to get an earlier look at the assessment roll and made more information available to the taxpayer when equalization hearings are held The lien date in most other states is on Dec 31 or Jan. 1

6. Aircraft

Aircraft are now taxed at the special rate of $1\frac{1}{2}$ percent of market value Under provisions of AB 2270 they would be assessed as all other taxable property and the previous year's statewide average property tax rate would be applied This would maintain the uniformity of taxation now applied to aircraft but tie it more closely to the average rate paid by other property

7. Tightening Exemptions

(a) The bill required that the irrevocable dedication clause be specified rather than implied in an organization's articles of corporation before such organization would be eligible to receive the welfare exemption

(b) Tighter rules for salaries and for "arms-length" dealings by welfare exempt organizations were established

(c) Cemeteries would be required to file statements indicating the property on which they claim the exemption

(d) An unconstitutional provision which attempted to exempt certain veterans' halls was repealed

(e) Veterans who claim a property tax exemption would have to appear in person at the assessor's office at least once in each four years to file their application In the intervening years they could continue to file by mail

8. Special Districts

In order that special districts could continue operations in spite of the reduced property tax base within their boundaries and the present rate limitations under which they tax, a new limit was placed on every special district which had reached its maximum This new maximum could produce no more than 105 percent of the revenue produced by their 1965–66 rate

9. Obsolete Sections

Several obsolete sections of the Revenue and Taxation Code dealing with the property tax would have been eliminated

B. REFORM IN ADMISSIONS TAX

The only admissions tax imposed by the state is the 5 percent tax on boxing and wrestling admissions AB 2270 changed this tax so that it applied only to actual amounts collected from patrons and did not apply to the value of free passes

C. REFORM IN SCHOOL APPORTIONMENT FORMULA

1 The bill appropriated to the State School Fund, in 1966–67 and in the years thereafter, an additional $508 million in school support Reforms in the bill freed approximately $200 million in additional funds for increasing foundation programs and providing additional support for schools

2 Foundation programs were increased to the following levels

	Existing level	*Proposed level*
Elementary	$249	$400
High School	339	490
Junior College	600	600

The magnitude and importance of such increases in the level of state support can readily be seen when the proposed new foundation program levels are compared with actual current expense of education in California school districts

Proposed program		*Current expense*
	Elementary	
$400 (without unified bonus)		$397 00
$425 (with unified bonus)		
	High School	
$490 (without unified bonus)		$553 00
$515 (with unified bonus)		

Presently, state levels of school support do not approach the actual average cost of providing an educational program The levels of foundation support proposed in AB 2270 would, at the elementary level, slightly surpass this actual expense level, and at the high school level, would come much closer to actual expense figures The impact of such a change would be felt most strongly in the poorer school districts, thus enabling such schools for the first time in their history to provide an educational program at least equal to what is provided, on the average, in the more financially able districts

The foundation program provisions of AB 2270, and all other major provisions of the measure, were endorsed by nearly every major educational organization in California (see Appendix F)

3 The unification bonus was increased from $15 per a d a to $25 per a d.a.

This change is necessary since it has become apparent that the $15 per a d a, added as a part of AB 145, Chapter 132, Statutes of 1964, is not sufficient in many districts to induce them to properly reorganize themselves and unify This $15 was added by AB 145 as equalization aid Because the $15 of equalization aid is apportioned to districts on the basis of their wealth, the actual apportionment may equal less than $15 per a d a in the new district An increase of this incentive to $25 per a d a should obviate this problem and should encourage more sound unification in the future

4 The maximum foundation program for adults at junior colleges in graded classes was increased from $230 to $600 per a d a This change should funnel some $10 to $14 million in additional state aid into the junior colleges

The amendment has been sought by the junior colleges for years. They point out that an adult student in a regular class costs exactly as much to educate as a minor student in the same class The logic of this argument is clear, and AB 2270 would have answered the problem by supporting the adult junior college student at the same rate as every other student

5 In place of the existing unrealistic and inequitable formula whereby varying amounts of federal P. L 874 funds are taken into account in adjusting a district's state aid, the bill provided that 50 percent of the federal money the district receives would be used in computing the district's ability to finance its own educational program Under the present formula percentages range from 5 to 74 This change would not apply to other federal funds received by schools including those which may be available under the proposed education bill pending in Congress

6. Computational tax rates used to determine district ability would have been increased as follows·

Level	*Old Rate*	*Proposed Rate*
Elementary	$0.60	$0.90
High School	0.50	0 75
Junior College	0.25	0 25

It should be noted that these proposed computational rates are lower than existing school tax rates in almost all school districts For years it has been argued by experts in the field of school finance that computational tax rates are unrealistically low and do not properly measure a school district's contribution to its own school support program The proposed rates, while still far below average school district tax rates in California, came closer to them and permitted a much greater increase in the foundation programs

AB 2270 also increased the "areawide tax" for nonunified areas to levels of $0.90 and $0.75, in order to conform to the new computational tax rates. This increase would lessen any undue benefit in state aid which nonunified elementary districts might gain through the passage of AB 2270.

7 For the first time foundation programs would have been so high that no special "supplemental support program" (a higher foundation level) for poor school districts would be necessary For this reason, the supplemental program was repealed

8 Foundation programs for small school districts were increased in the same proportion to the increase in the basic foundation program

9 Authority of school boards to levy "permissive override taxes" not requiring a vote of the people was eliminated, except for bond interest and redemption, state loan repayments, retirement and "pay-as-you-go" capital construction

Due to the unwillingness of the legislature to remove the limits from statutory maximum school district tax rates, approximately 28 separate so-called "permissive override taxes" have been authorized for specific purposes. Because of the ever-present press for funds school districts have used these "permissive overrides" extensively but there is no indication that these individual rates have been used solely for the purpose for which they were enacted In most cases, the evidence shows

that their primary use has been to take the pressure off of the general purpose tax rate

During the 1963–64 interim, the Assembly Interim Committee on Education made a survey of the taxing and expenditure policies of selected school districts The committee found some districts in which well over 50 percent of the total tax rate was comprised of "permissive override taxes" which had not been voted by the people, nor were they within the statutory maximum rates provided by law The committee recommended complete repeal of all permissive taxes With a few justifiable exceptions, AB 2270 carried out this recommendation If AB 2270 had passed, school district tax rates could be increased *only* upon a majority vote of the people of each district

The California Association of School Administrators strongly endorsed this change, calling the present method of taxation in school districts "cookie-jar financing" (see Appendix F)

10 School district maximum tax rates were changed to reflect the new money received from the bill. This section would require mandatory tax rate reductions which averaged approximately 25 percent depending upon the new money received by the district The poorer, high tax rate districts enjoyed reductions up to 70 percent (See Appendix B)

Appendix A(1)

AMENDED IN ASSEMBLY MAY 17, 1965

CALIFORNIA LEGISLATURE—1965 REGULAR (GENERAL) SESSION

ASSEMBLY BILL No. 2270

Introduced by Assemblymen Petris, Unruh, Alquist, Waldie, Crown, Danielson, Dymally, Garrigus, McMillan, Meyers, Quimby, Rumford, Ryan, and Thomas

April 6, 1965

REFERRED TO COMMITTEE ON REVENUE AND TAXATION

An act to repeal Sections 111, 112, 113, 114, 215, 216, 254.7, 263, 264, 265, 266, 268.5, 268.7, 269, 270, 271, 273, 535, 871, 2153, 6011.5, 6389, 6422, 6454.5, 13310, 13406, 13804, 15113, 15207, 15424, 23040, 30016, ~~30107, 30433 and 30475~~ AND 30433 *of, to repeal Article 3 (commencing with Section 1056) of Chapter 5 of Part 2 of Division 1 of, Chapter 3 (commencing with Section 4691) of Part 8 of Division 1 of, and Article 2 (commencing with Section 30115) and Article 3 (commencing with Section 30121) of Chapter 2 of Part 13 of Division 2 of, to add Sections 201.2, 214.01, 214.8, 223, 256.5, 401.1, 2151.1, 6006.1, 6006.3, 6010.1, 6051.5, 6201.5, 6390, 6391, 6422, 7103, 17035, 17109, 17110, 17111, 17112,* 17155, *17181.5, 17204.7, 17215.2, 17216.1, 17216.3, 17216.4, 17216.5, 17838, 18057, 18405.5, 18412, 18435, 18556, 18557, 18591.1, 18602, 18681.1, 18681.5, 18685.1, 18685.2, 18685.3, 18685.4, 18685.5, 18687.1, 18696,* 18805.5, *18806, 18807 18808, 18809, 18810, 18811, 18812, 18813, 18814, 18816 18822, 18823, 18824, 18934,* 18935, 18936, *19051.1, 19053.1, 19062.11, 19062.12, 19062.13, 19062.14, 19082.1, 19290, 19409, 19410, 19411, 19412, 19413, 23115, 23151 5, 23153.2, ~~23184.2,~~ 23181.5, 23182 5, ~~23183.2,~~ ~~23183.5,~~ ~~23186.5~~* 23183.5, 23186.5, 23186.7, *23505, 23701o, 24565, 24566, 24567, 25106, 25107, 25108, 25109, 25110, 25111, 25112, 25113, 25114, 25115, 25116, 25117, 25118, ~~25119,~~ ~~25130,~~ ~~25553.7,~~ ~~30004,~~ ~~30007,~~ ~~30101.5,~~ ~~30107,~~ ~~30244,~~ ~~30475 and~~ ~~30476~~ ~~to,~~* 25119, 25120, 26312, 26313 AND 30244 TO,

to add Article 8 (commencing with Section 670) to Chapter 3 of Part 2 of Division 1 of, Chapter 3.5 (commencing with Section 6271) to Part 1 of Division 2 of, Article 5 (commencing with Section 18491), to Chapter 17 of Part 10 of Division 2 of, Chapter 25 (commencing with Section 19501) and Chapter 26 (commencing with Section 19601) to Part 10

of Division 2 of, Article 3 5 (commencing with Section 23201) to Chapter 2 of Part 11 of Division 2 of, Article 3 (commencing with Section 30126) to Chapter 2 of Part 13 ~~of Division 2 of, Article 1 5 (commencing with Section 30871) to Chapter 6 of Part 13 of Division 2 of, Chapter 7.5 (commencing with Section 30463) to Part 13 of Division 2 of, Part 16 (commencing with Section 36001) to Division 2~~ OF DIVISION 2 *of, and Division 3 (commencing with Section 38001) to, to amend Sections 155 8, 210, 212, 214.3, 220, 251, 252, 254.5, 255, 272, 401, 405, 407, 441, 448, 463, 464, 467, 565, 569, 616, 619, 621, 751, 753, 1362, 1605, 1607, 1817, 1901, 2189.3, 2192, 5363, 5364,* 5366, *5391, 6006, 6009, 6010, 6011, 6051, 6052.5, 6094, 6201, 6203, 6244, 6367, 6381, 6401, 6457, 7102, 7202, 7203,* 11003.4, *11492, 13309, 13404, 13405, 13803, 13841, 13842, 15112, 15205, 15206, 15423, 17041, 17048,* 17053, *17101, 17102, 17103, 17104, 17105, 17106, 17107, 17108, 17132, 17181, 17182, 17183, 17302,* 17204, *17214, 17215, 17216, 17216.2, 17255, 17260, 17501, 17503, 17504, 17506, 17511, 17512, 17734, 17783, 17785, 17812, 17818, 17852, 18044, 18045, 18046, 18053, 18401, 18402, 18403, 18405, 18410.6, 18431, 18433, 18434, 18551 1, 18588, 18681, 18682, 18805, 19052, 19053, 19053.9, 23041, 23042, 23058, 23153, 23184, 23185a, 23185b, 23301, 23333, 23361, 23362, 23501, 23571, 23701n, 23731, 23734a, 23736.3, 23736.4, 23771, 23772, 24273, 24273.5, 24307, 24310, 24343, 24344, 24345, 24346, 24347, 24348, 24349, 24351, 24356, 24356 1, 24357, 24358, 24360, 24361, 24362, 24363, 24364, 24365, 24366, 24368 1, 24372, 24373, 24374, 24375, 24377, 24402, 24404, 24409, 24425, 24427, 24430, 24482, 24485, 24495, 24502, 24512, 24516, 24575.1, 24601, 24602, 24603, 24606, 24607, 24608, 24611, 24613, 24614, 24622, 24631, 24633, 24634, 24636, 24661, 24667, 24668, 24669, 24670, 24672, 24673, 24674, 24675, 24676, 24677, 24678, 24681, 24684, 24703, 24704, 24705, 24706, 24721, 24722, 24722 1, 24722.3, 24723, 24832, 24833, 24835, 24836, 24837, 24916, 24918, 24943, 24944, 24945, 24946, 24961, 24962, 24971, 25001, 25003, 25004, 25005, 25006, 25009, 25010, 25101, 25101.1, 25201, 25202, 25204, 25206, 25208, 25401, 25401b, 25441, 25442, 25443, 25552b,* 25553, 25553.5, 25562, *25563, 25564, 25761, 25952, ~~25953, 25954, 25956, 30001, 30005, 30008, 30009, 30011, 30013, 30014, 30101, 30103, 30103 5, 30105, 30104, 30105 5, 30106, 30108, 30109, 30111, 30140, 30142, 30167, 30168,~~* 25953, 25954, 25956, 30008, 30101, 30102 5, 30142, 30167, 30168, 30170, 30179, *30181, 30182, 30183, 30186, 30187, 30202, ~~30231, 30232~~* 30223, 30362 , *~~30366, 30431, 30432, 30453, 30454, 30455, 30461 and 30462~~* 30366, 30431 AND 30432 *of, ~~to amend the heading of Part 13 (commencing with Section 30001) of Division 2 of,~~ and to amend and renumber Sections 13407, 15208, 17216 1, 18806, 18807, 18808, 18809, 18810 , ~~18811 and 30476~~* AND 18811 *of, the Revenue and Taxation Code, to amend Section 18711 of the Business and*

Professions Code, to amend Sections 4204, 15607, 20532, 43002, 43007, 51501, 51505, 51515 and 54903 of the Government Code, to amend Sections 1828, 3347, 5605 5, 5605 6, 5661, 6352, 6741, 6954, 6955, 6963 1, 8955, 11451, 11451 02, ~~14314, 14657, 14758,~~ 16633, 16635, 16645 12, 16645 16, 17200, 17263 1, 17301, 17303.5, 17602, 17602 5, 17603, 17654 5, 17655 5, 17656, 17660, 17664, 17665, 17665 5, 17666.2, 17667, 17671, 17676, 17702, ~~17702 3, 17906 3, 17951~~ 17702.2, 17702 3, 17906 2, 17951, 20751 *and 20930 of, to add Sections 17603 5, 20751 2 and 20751 3 to, to repeal Sections ~~3255,~~ 3256, 3353, 11451.01, 11706, 17653, 20752, 20753, 25445 ; ~~25541 5~~ and 25542 of, and to repeal Article 7 (commencing with Section 1791) of Chapter 1, Division 5, Article 7 1 (commencing with Section 17920) of Chapter 3 of Division 14, and Article 3 (commencing with Section 20801) of Chapter 3, Division 16 of*, AND TO ADD SECTION 20751 4 AND ARTICLE 3 (COMMENCING WITH SECTION 20803), TO CHAPTER 3, DIVISION 16 OF *the Education Code, to add Section 681 1 to the Harbors and Navigation Code, to amend Section 4997 of the Public Resources Code, to amend Sections 1652 and 1653 of the Streets and Highways Code and Sections 4000, 4300 5, 4451, 4750 5 and 5600 of the Vehicle Code, relating to an integrated system of state and local taxation for governmental purposes, to take effect immediately, tax levy.*

The people of the State of California do enact as follows:

SECTION 1. Section 111 of the Revenue and Taxation Code is repealed.

SEC. 2. Section 112 of said code is repealed.

SEC. 3. Section 113 of said code is repealed.

SEC. 4 Section 114 of said code is repealed.

SEC 5. Section 155 8 of said code is amended to read:

155.8. Notwithstanding anything in this code to the contrary, every person who at 12 01 a m on the first day of January of any year was the owner of, or had in his possession or under his control, any taxable improvement which improvement was thereafter destroyed without his fault by fire or by any other means prior to July 31 of that year and cannot be rebuilt because of a zoning prohibition may, on or before September 30 of that year, make application for reassessment of such improvement and deliver to the assessor a written statement under oath, accompanied by a certificate of a disinterested competent person or authority, showing the condition and value, if any, of the improvement immediately after the destruction The assessor shall, on or before October 31 of that year, assess the improvement, or reassess it if it has already been assessed, according to the condition and value immediately after the destruction, and the assessor, if he reassesses the improvement, shall transmit to the board a description of

the improvement so reassessed, the name of the person making the application in connection with the improvement, and the value of the improvement so reassessed. Upon such notice as it may find to be proper, the local board of equalization may, until November 30 of that year, equalize any such assessment or reassessment.

The tax rate fixed for property on the roll on which the improvement so assessed appears or the improvement so reassessed appeared at the time of its original assessment shall be applied to the amount of the equalized assessment or reassessment determined in accordance with the last paragraph. In the event that the resulting figure is less than the tax theretofore computed, the taxpayer shall be liable for tax only for the lesser amount, and the difference shall be canceled. If the taxpayer has already paid the tax previously computed, such difference shall be refunded to him pursuant to Chapter 5 (commencing with Section 5096) of Part 9 of this division, as an erroneously collected tax.

SEC 6. Section 201 2 is added to said code, to read:

201.2. Inventories shall be exempt from property taxation. Inventories shall include goods intended for sale or resale in the normal course of business and shall include raw materials and work in process with such goods *and shall include motion picture, including television, negatives, films and tapes*. Inventories shall include animals and crops ~~intended for sale or resale within one year~~ *held primarily for sale or resale*. ~~Inventories shall not include animals and crops not intended to be sold within one year. Inventories shall not include busi-~~ *Inventories shall not include busi*ness machinery and equipment and office machines and furniture except where they are held for sale in the normal course of business. Inventories shall not include cut timber until it has been processed. This section shall be effective for the 1966–67 fiscal year *and each year thereafter*.

SEC. 7. Section 210 of said code is amended to read:

210 The householder's exemption is as specified in section 10½ of Article XIII of the Constitution. If a householder fails to select the personal property to be exempted, the assessor shall apply the one hundred dollars ($100) exemption to household furnishings and personal effects not otherwise exempt by law.

SEC. 8. Section 212 of said code is amended to read:

212 Notes, debentures, shares of capital stock, solvent credits, bonds, deeds of trust, mortgages, and any interest in such property are exempt from taxation.

SEC. 9 Section 214 01 is added to said code, to read:

214 01. For the purpose of Section 214, property shall be deemed irrevocably dedicated to religious, charitable, scientific, or hospital purposes only if a statement of irrevocable dedication to only these purposes is found in the articles of incorporation of the corporation, or in the case of any other fund or

foundation, in the bylaws, articles of association, constitution, or regulations thereof.

SEC. 10. Section 214.3 of said code is amended to read:

214.3. In the event that any property described in subdivision (6) of Section 214 shall have been used solely for charitable or hospital purposes for a minimum period of 30 years, the "welfare exemption" granted by Section 214 shall extend to such property irrespective of any reversionary provisions in the title of the property respecting liquidation, dissolution or abandonment, if the ownership, operation, use and dedication of the property are otherwise within the purview of Section 214.

SEC. 11. Section 214.8 is added to said code, to read:

214.8. The Legislature finds and declares that the vast majority of community chests, funds, foundations or corporations organized and operated for religious, hospital, scientific or charitable purposes are faithfully serving the purposes for which they were created and meet the needs of the people of this state, and it is not the legislative purpose to deprive the property of such organizations of the welfare exemption provided for in Section 214. It is the intent of the Legislature in enacting this section to debar from this exemption only those religious, hospital, scientific or charitable organizations which abuse their true purpose by payment of excessive remuneration to their officers, employees or directors or by engaging in transactions with profit-making organizations which a reasonable man should know would operate to the detriment of the religious, hospital, scientific or charitable organization involved.

Property described in Section 214 shall not be entitled to the welfare exemption from taxation if the salary, wage or other emolument of any type whatever paid directly or indirectly by the religious, hospital, scientific or charitable organization to any of its officers, employees or directors is excessive in comparison to the salaries, wages or emoluments paid to comparable officers and employees in private agencies or institutions providing comparable services within the county or, if none, within the state.

The remuneration received by an officer or employee of a religious, hospital, scientific or charitable organization shall be deemed excessive if it exceeds substantially that paid directly or indirectly to comparable officers or employees of private agencies or institutions providing comparable services. The remuneration received by a director of a religious, hospital, scientific or charitable organization shall be deemed excessive if it exceeds substantially that paid directly or indirectly to the head of comparable private agencies or institutions. No individual officer, employee or director of a single religious, hospital, scientific or charitable institution shall be entitled to two or more such remunerations by reason of the fact that he serves in two or more capacities as officer, employee or director.

Property described in Section 214 shall not be entitled to the welfare exemption from taxation if the religious, hospital, scientific or charitable organization owning such property enters into any transaction of benefit to a profit-making organization which is not conducted at arm's length and does not afford commensurate benefit to the religious, hospital, scientific or charitable organization For purposes of this paragraph, a disputable presumption shall arise that a transaction is not at arm's length if the service performed or price paid does not correspond to what a willing buyer of services or property would pay to a willing seller on the open market, neither being under any compulsion to buy or sell

As used in this section, "profit-making organization" means any person, corporation, association, partnership or any other entity engaged in business for profit.

SEC. 12 Section 215 of said code is repealed.

SEC. 13. Section 216 of said code is repealed.

SEC. 14. Section 220 of said code is amended to read:

220. Any aircraft which is in California on the first day of January solely for the purpose of being repaired, overhauled, modified, or serviced is exempt from personal property taxation This exemption does not apply to aircraft normally based in California, or operated intrastate or interstate in and into California.

SEC. 15. Section 223 is added to said code, to read:

223. The personal effects and household furnishings in excess of one hundred dollars ($100) of every householder shall be exempt from taxation, effective July 1, 1966 and thereafter.

The word "householder" as used in this section means any person owning, purchasing or renting real property which he is using regularly, if not continuously, as a residence

The phrase "personal effects and household furnishings" does not include boats, ~~aircraft, motor vehicles~~ *aircraft or motor vehicles,* or personalty held or used in connection with a trade, profession or business

SEC. 16. Section 251 of said code is amended to read:

251. The board shall prescribe all procedure and forms required to carry into effect the veterans', church, cemetery, orphanage, college, exhibition, or welfare exemption.

SEC 17 Section 252 of said code is amended to read:

252. When making the first claim any person claiming the veterans' exemption or the spouse of such person shall appear before the assessor, shall give all information required and answer all questions in an affidavit, and shall subscribe and swear to the affidavit before the assessor The assessor may require other proof of the facts stated before allowing the exemption In subsequent years the person claiming the veterans' exemption, or the spouse of such person, may file the affidavit by mail on such forms as the assessor shall require, except that the applicant for the exemption shall appear in person before the county assessor once in every four-year period and subscribe and swear to the affidavit before the assessor.

SEC. 18. Section 254.5 of said code is amended to read:

254.5. Affidavits for the welfare exemption shall be filed in duplicate on or before March 15 of each year with the assessor concerned and shall be accompanied by duplicate certified copies of the financial statements of the owner and operator. Copies of the affidavits and financial statements shall be forwarded forthwith by the assessor to the board which shall review all such affidavits and statements and may institute an independent audit or verification of the operations of the owner and operator to ascertain whether both the owner and operator meet the requirements of Sections 214 and 215 of the Revenue and Taxation Code. In this connection the board shall consider, among other matters, whether:

(a) The services and expenses of the owner or operator (including salaries) are excessive, based upon like services and salaries in comparable public institutions;

(b) The operations of the owner or operator, either directly or indirectly, materially enhance the private gain of any individual or individuals;

(c) Any capital investment of the owner or operator for expansion of physical plant is justified by the contemplated return thereon, and required to serve the interests of the community.

The board shall forward to each assessor concerned its finding with respect to each claimant and said finding shall be considered by the assessor in his determination with respect to the claim for exemption.

SEC. 19. Section 254.7 of said code is repealed.

SEC. 20. Section 255 of said code is amended to read:

255. Affidavits required for exemptions named in this article, except the welfare exemption, shall be filed with the assessor between 12 01 a.m. on the 1st day in January and 5 o'clock p.m. on the first Monday in April.

SEC. 21. Section 256.5 is added to said code, to read:

256.5. Cemetery exemption affidavit. The affidavit for the cemetery exemption shall show that:

(a) The property is used or held exclusively for the burial or other permanent deposit of the human dead or for the care, maintenance or upkeep of such property of such dead, and

(b) The property is not held for profit.

SEC. 22. Section 263 of said code is repealed.

SEC. 23. Section 264 of said code is repealed.

SEC. 24. Section 265 of said code is repealed.

SEC. 25. Section 266 of said code is repealed.

SEC. 26. Section 268.5 of said code is repealed.

SEC. 27. Section 268.7 of said code is repealed.

SEC. 28. Section 269 of said code is repealed.

SEC. 29. Section 270 of said code is repealed.

SEC. 30. Section 271 of said code is repealed.

SEC. 31. Section 272 of said code is amended to read:

272. If a claimant for the veterans' exemption failed to file the required affidavit pursuant to Section 255 because he

was in the military service of the United States and serving outside of the continental limits of the United States between 12:01 a.m. on the first day of January and 5 o'clock p.m. on the first Monday in April, any tax or penalty or interest thereon for any fiscal year commencing during the calendar year 1966 on property to the amount of one thousand dollars ($1,000) owned by such person as to which the veterans' exemption was available for such fiscal year, shall be canceled pursuant to Article 1 (commencing with Section 4986) of Chapter 4 of Part 9 of this division as if it had been levied or charged erroneously, and, if paid, a refund thereof shall be made pursuant to Article 1 (commencing with Section 5096) of Chapter 5 of Part 9 of this division as if it had been erroneously collected.

SEC. 32. Section 273 of said code is repealed.

SEC. 33. Section 401 of said code is amended to read:

401. Except as provided in this part, every assessor shall uniformly appraise all taxable property at 100 percent of full cash value. This appraised value shall be multiplied by a factor which shall be established by the State Board of Equalization pursuant to Section 401.1. This factor, which may be known as the "standard ratio," shall be uniform throughout the state *The product of the appraised value and the factor shall be the assessed value.*

SEC. 34. Section 401.1 is added to said code, to read:

401.1. The Board of Equalization shall, no later than December 1, 1965, adopt the factor to be used in assessing property throughout the state as provided in Section 401. The board shall hold public hearings prior to determining the factor.

The board is directed to adopt a factor which will produce a ratio of assessed value to full cash value which is within a 20 percent range of the statewide average assessment ratio for 1964 as determined by the Board of Equalization.

Unless the Legislature, by concurrent resolution, prior to June 30, 1966, establishes another factor which shall replace the factor proposed by the Board of Equalization, the factor established by the Board of Equalization shall be in effect on July 1, 1966 with respect to assessments made in the 1966–67 fiscal year and thereafter.

SEC. 35. Section 405 of said code is amended to read:

405. Annually, the assessor shall assess all the taxable property in his county, except state-assessed property, to the persons owning, claiming, possession, or controlling it at 12:01 a.m. on the first day of January. The assessor shall ascertain such property between January 1st and June 15th.

SEC. 36. Section 407 of said code is amended to read:

407. Annually, on or before June 22, the assessor shall transmit a statistical statement to the board, supplying any statistical information which the board may require, and shall supply from time to time any other information required by the board.

SEC. 37. Section 441 of said code is amended to read:

441. (a) Every person shall file a written property statement, under oath, with the assessor between noon on the first ~~Monday in March~~ *day of January* and 5 p.m. on the last Monday in April, annually, and within such time as the assessor may appoint. At any time, as required by the assessor for assessment purposes, every person shall furnish information or records for examination.

(b) The property statement may be filed with the assessor through the U.S. mail, properly addressed with postage prepaid. This subdivision shall be applicable to every taxing agency, including but not limited to, a chartered city and county, or chartered city.

SEC. 38. Section 448 of said code is amended to read:

448. The property statement shall show all information as of 12:01 a.m. on the first day of January and as of noon on the first Monday in March. The statement shall set forth all the real and personal property owned by such taxpayer, or in his possession, or under his control at 12:00 meridian on the first Monday of March

Additional information required by this article shall be furnished regarding property owned, controlled by or in the possession of a taxpayer on the first day of January. Additional information with respect to property owned or in the possession of a taxpayer at noon on the first Monday in March beyond that required by this section shall not be necessary.

SEC. 39 Section 463 of said code is amended to read:

463. Every person forfeits one hundred dollars ($100) to the people of the state, to be recovered by action brought in their name by the assessor, for each refusal to do any of the following:

(a) Furnish the property statement.

(b) Make and subscribe the affidavit respecting his name and place of residence

SEC. 40. Section 464 of said code is amended to read:

464. All moneys recovered by the assessor under Section 463 shall be paid into the county treasury and the assessor may retain none for his own use.

SEC. 41 Section 467 of said code is amended to read:

467. Annually, on or before February 20th, every taxing agency shall file with the assessor of the county in which the property is located statements containing legal descriptions of

(a) All real estate which it has conveyed by deed to any person during the assessment year ending on the preceding first day of January

(b) All real estate owned by it on the preceding first day of January and which it has agreed by contract in writing to sell and convey to any person The statement covering property sold by contract shall show for each parcel of real estate the name and address of the purchaser, the consideration for the sale and conveyance thereof, and the amount of the consideration paid as of the first day of January.

SEC. 42. Section 535 of said code is repealed.

SEC. 43. Section 565 of said code is amended to read:

565. Whenever tax-deeded property is redeemed between the first day in January and June 15th, the redemption officer shall immediately notify the assessor of the redemption and the assessor shall enter the property on the roll being prepared.

SEC. 44. Section 569 of said code is amended to read:

569 Whenever delinquent taxes on tax-deeded property are being paid in installments, and there has been a default in the payment of any installment, the redemption officer shall notify the county assessor of such default on or before the first day in January of the year following said default.

SEC. 45. Section 616 of said code is amended to read:

616. On or before ~~the~~ June 15th, annually, the assessor shall complete the local roll. He shall make and subscribe an affidavit on the roll substantially as follows:

"I, _____, assessor of _____ county, swear that between the first day of January and June 15, 19___, I have made diligent inquiry and examination to ascertain all the property within the county subject to assessment by me, and that it has been assessed on the roll, according to the best of my judgment, information, and belief, at its value as required by law; and that I have faithfully complied with all the duties imposed on the assessor under the revenue laws; and that I have not imposed any unjust or double assessment through malice, ill will, or otherwise; nor allowed anyone to escape a just and equal assessment through favor, reward, or otherwise."

The failure to make or subscribe this affidavit, or any affidavit, does not affect the validity of the assessment.

The assessor may require from any of his deputies an affidavit on the roll similar to his own

SEC. 46 Section 619 of said code is amended to read:

619. The assessor shall, upon or prior to completion of the local roll, either;

(a) Inform the assessees of real property on the local secured roll of the amounts at which their respective properties have been or will be assessed thereon, or

(b) Inform each assessee of real property on such roll of the amount of any increase in the assessed value of such real property if the increase exceeds 10 percent of its assessed value on the roll for the year immediately preceding, or if the increase exceeds some lesser amount when so specified by the board of supervisors.

The information given by the assessor to the assessee pursuant to subdivisions (a) or (b) shall include a notification of hearings by the county board of equalization, which shall include the period during which assessment protests will be accepted and the place where they may be filed.

This information shall also include the assessment ratio for the county as last computed by the State Board of Equalization.

This information shall be furnished by the assessor to the assessee by regular U.S. mail directed to him at his latest address known to the assessor. The board of supervisors of any county may, in addition, authorize the publication of this information in any newspaper of general circulation within the county.

The failure of the assessee to receive this information shall not in any way affect the validity of any assessment or the validity of any taxes levied pursuant thereto.

SEC. 47. Section 621 of said code is amended to read:

621. The assessor, with the approval of the board of supervisors, may give the information required by Section 619, as an alternative to giving the information by U.S. mail, by having published lists of assessments in newspapers For this purpose he may divide the county into publication areas not to exceed five in number Within such areas the assessment listings may be grouped by assessment map books, by post office zones or by such other arrangements as may be determined by the assessor as most likely to give notice to assessees and as practicable for publication in local newspapers. The complete assessment data of one such area may be printed in one year, and for other areas in successive years as directed by him until the full county is covered. Each year at least all changes of assessment listings for all the areas shall be printed, together with a notice that no changes were made with regard to properties not on the list of changes, so that all changes will be on a current basis for the entire county. Newspapers for the publications shall be selected as they are for publication of the delinquent tax lists and the rate paid for the advertising shall be the same

Neither the failure of the assessee to receive this information nor the failure of the assessor to so inform the assessee shall in any way affect the validity of any assessment or the validity of any taxes levied pursuant thereto. ,

SEC. 48 Article 8 (commencing with Section 670) is added to Chapter 3 of Part 2 of DIVISION 1 of said code, to read:

Article 8 Assessor and Appraiser Qualifications

670. (a) No person shall perform the duties or exercise the authority of an assessor or appraiser of property in or on behalf of any county unless ~~the~~ *he* is the holder of a valid assessor's or appraiser's certificate, as the case may be, issued by the State Board of Equalization.

(b) The board shall provide for the examination of applicants for such certificates The State Personnel Board may be designated to give such examinations No certificate shall be issued to any person who has not demonstrated to the satisfaction of the board that he is competent to perform the work of an assessor or appraiser, as the case may be · provided that any applicant for a certificate who is denied the same shall have a

right to review of such denial in accordance with the State Administrative Procedure Act.

(c) Passage of a civil service examination for appraiser given by any county shall suffice to meet the requirements of this section. The content of such examination shall be approved by the Board of Equalization.

(d) Any person performing the duties of assessor or appraiser in state or county or city government at the time this section is adopted shall be certificated without examination upon application to the Board of Equalization.

(e) This section does not apply to elected officials.

SEC. 49. Section 751 of said code is amended to read:

751. The board shall assess all state-assessed property at its actual value as of 12:01 a.m. on the first day of January.

SEC. 50 Section 753 of said code is amended to read:

753. Annually, on or before the first Monday in August, the board shall assess all state-assessed property required to be assessed as of the first day of January.

SEC. 51. Section 871 of said code is repealed.

SEC. 52. Article 3 (commencing with Section 1056) of Chapter 5 of Part 2 of Division 1 of said code is repealed.

SEC. 53. Section 1362 of said code is amended to read:

1362. Any taxpayer having the necessary knowledge may file with the board of supervisors an affidavit, alleging that certain property has escaped taxation or is being underassessed through the willful failure or neglect of the assessor, and giving the best description of the property that he can.

SEC. 54 Section 1605 of said code is amended to read:

1605. After giving notice as prescribed by its rules, the county board may increase or lower any assessment on the local roll in order to equalize the assessment of property on the local roll.

If the ratio of assessed value to full cash value on any parcel of property in a county deviates by more than 10 percent from the average ratio of assessment of all property in a county as found by the State Board of Equalization as provided in Section 1817, this shall be prima facie evidence of an inequitable assessment and the county board shall equalize the assessment on said property so that the assessed value shall be in the same proportion to full cash value as all property in the county as reflected by the findings of the State Board of Equalization.

SEC. 55. Section 1607 of said code is amended to read:

1607. A reduction in an assessment on the local roll shall not be made unless the party affected or his agent makes and files with the county board a verified, written application for it, showing the facts claimed to require the reduction.

The application may be filed at any branch office of the county where the clerk of the county or the assessor has an office. This application shall be filed no later than three calendar ~~days~~ *days* after the first Monday in July.

SEC. 56. Section 1817 of said code is amended to read:

1817. The board shall annually estimate any change that may have occurred in the full cash value of locally assessable tangible property between the lien date of the roll for which the last survey was made pursuant to Section 1815 and the lien date of the current roll. The board shall use as the basis for such estimate data on school enrollment, retail sales, wages, or other factors reasonably indicative of change or lack of change in the total full cash value of the property. The relationship between the total assessed value of the tangible property on the current local roll and the total full cash value of locally assessable tangible property so estimated shall be computed for each county of the state by the ~~third Monday~~ *first day* in July of each year. The board shall transmit promptly to each county assessor and county superintendent of schools, and to the Superintendent of Public Instruction a statement of its preliminary determination of this relationship. This determination shall be published in a paper of general circulation in each county. This determination may be used in local equalization hearings.

SEC. 57. Section 1901 of said code is amended to read:

1901. Where property in a city is not assessed for city purposes by the county assessor the board shall equalize the assessed value of state assessed property in the city with the assessed value of other property in the *city but not higher than the assessed value of other property in the* county.

SEC. 58. Section 2151.1 is added to said code, to read:

2151.1. Notwithstanding any other provision of law, special districts may increase their property tax rates above statutory maximums to an amount which will produce no more than 105 percent of the revenue produced by the property tax they levied for the fiscal year 1965–66.

SEC. 59. Section 2153 of said code is repealed.

SEC. 60. Section 2189.3 of said code is amended to read:

2189.3. A tax on personal property belonging to an owner of real property on the secured roll located in the same county as the personal property, where the personal property is not located upon the real property on the lien date, is, on and after the lien date, a lien on the real property, having the force, effect and priority of a judgment lien from and after the lien date, if, on or before the lien date:

(a) The assessor, at the request of the taxpayer, determines and issues to the taxpayer a certificate, that the real property is sufficient to secure the payment of the tax.

(b) The taxpayer records the certificate with the county recorder.

Any tax which becomes a lien on the real property in accordance with this section shall be subject to the provisions of this division relating to the rate and date of payment of taxes on the secured roll for the current year; and in the event of any delinquency in the payment of such tax, the personal property on which it has been levied shall be subject to seizure

and sale in accordance with Sections 2914 to 2921, inclusive, of this code.

SEC. 61. Section 2192 of said code is amended to read:

2192. Except as otherwise specifically provided, all tax liens attach annually as of 12:01 a.m. on the first day of January preceding the fiscal year for which the taxes are levied.

SEC. 62. Chapter 2 (commencing with Section 4691) of Part 8 of Division 1 of said code is repealed.

SEC. 63. Section 5363 of said code is amended to read:

5363. In assessing aircraft, the assessor shall determine assessed value as provided by Section 401.

SEC. 64. Section 5364 of said code is amended to read:

5364. The board shall establish standards and fix guides to be used by the county assessor in the assessment of aircraft.

SEC. 64.5 Section 5366 of said code is amended to read:

5366. Owners, as well as operators, of private and public airports shall, on or before the first ~~Monday in March~~ *day of January* of each year, provide the assessor of the county in which the airport is situated with a statement containing a list of names and addresses of the owners of all aircraft which use the airport as a base.

SEC. 65. Section 5391 of said code is amended to read:

~~5391. On or before September 1, of each year, the board of supervisors of each county shall fix the rate of tax for aircraft, and shall levy the tax on aircraft. The rate shall be equal to one and one-half percent (1.5%) of the market value of the aircraft as determined pursuant to this part. If the board of supervisors of any county for any reason fails to fix the rate of tax for aircraft, the rate of tax for aircraft shall be conclusively presumed to be one and one-half percent (1.5%) of the market value of the aircraft as determined pursuant to this part~~

5391. The rate of tax for aircraft shall be equal to the average statewide property tax rate for the previous year as computed by the State Board of Equalization.

SEC. 66. Section 6006 of said code is amended to read:

6006. "Sale" means and includes:

(a) Any transfer of title or possession, exchange, or barter, conditional or otherwise, in any manner or by any means whatsoever, of tangible personal property for a consideration. "Transfer of possession," includes only transactions found by the board to be in lieu of a transfer of title, exchange, or barter.

(b) The producing, fabricating, processing, printing, or imprinting of tangible personal property for a consideration for consumers who furnish either directly or indirectly the materials used in the producing, fabricating, processing, printing, or imprinting.

(c) The furnishing and distributing of tangible personal property for a consideration by social clubs and fraternal organizations to their members or others.

(d) The furnishing, preparing, or serving for a consideration of food, meals, or drinks.

(e) A transaction whereby the possession of property is transferred but the seller retains the title as security for the payment of the price.

(f) A transfer for a consideration of the title or possession of tangible personal property which has been produced, fabricated, or printed to the special order of the customer, or of any publication.

(g) Any lease of tangible personal property in any manner or by any means whatsoever, for a consideration, except a lease of:

(1) Clothes or costumes.

(2) Linen supplies and similar articles when an essential part of the lease agreement is the furnishing of the recurring service of laundering or cleaning the articles.

(3) Household furnishings with a lease of the living quarters in which they are to be used.

(4) Motion picture, including television, films and tapes.

SEC. 67. Section 6006.1 is added to said code, to read:

6006.1. The granting of possession of tangible personal property by a lessor to a lessee, or to another person at the direction of the lessee, is a continuing sale in this state by the lessor as respects any period of time the leased property is situated in this state, irrespective of the time or place of delivery of the property to the lessee or such other person.

SEC. 68. Section 6006.3 is added to said code, to read:

6006 3. "Lease" includes, rental, hire and license.

SEC. 69. Section 6009 of said code is amended to read:

6009. "Use" includes the exercise of any right or power over tangible personal property incident to the ownership of that property, and also includes the possession of, or the exercise of any right or power over, tangible personal property by a lessee under a lease, except that it does not include the sale of that property in the regular course of business.

SEC. 70. Section 6010 of said code is amended to read:

6010. "Purchase" means and includes.

(a) Any transfer of title or possession, exchange, or barter, conditional or otherwise, in any manner or by any means whatsoever, of tangible personal property for a consideration. "Transfer of possession," includes only transactions found by the board to be in lieu of a transfer of title, exchange, or barter.

(b) When performed outside this state or when the customer gives a resale certificate pursuant to Article 3 of Chapter 2 of this part, the producing, fabricating, processing, printing, or imprinting of tangible personal property for a consideration for consumers who furnish either directly or indirectly the materials used in the producing, fabricating, processing, printing, or imprinting.

(c) A transaction whereby the possession of property is transferred but the seller retains the title as security for the payment of the price.

(d) A transfer for a consideration of tangible personal property which has been produced, fabricated, or printed to the special order of the customer, or of any publication.

(e) Any lease of tangible personal property in any manner or by any means whatsoever, for a consideration, except a lease of:

(1) Clothes or costumes.

(2) Linen supplies and similar articles when an essential part of the lease agreement is the furnishing of the recurring service of laundering or cleaning the articles.

(3) Household furnishings with a lease of the living quarters in which they are to be used.

(4) Motion picture, including television, films and tapes.

SEC. 71. Section 6010.1 is added to said code, to read:

6010.1. The possession of tangible personal property by a lessee, or by another person at the direction of the lessee, is a continuing purchase for use in this state by the lessee as respects any period of time the leased property is situated in this state, irrespective of the time or place of delivery of the property to the lessee or such other person.

SEC. 72. Section 6011 of said code is amended to read:

6011. "Sales price" means the total amount for which tangible personal property is sold or leased or rented, as the case may be, valued in money, whether paid in money or otherwise, without any deduction on account of any of the following:

(a) The cost of the property sold.

(b) The cost of materials used, labor or service cost, interest charged, losses, or any other expenses.

(c) The cost of transportation of the property, except as excluded by other provisions of this section.

The total amount for which the property is sold or leased or rented includes all of the following:

(a) Any services that are a part of the sale.

(b) Any amount for which credit is given to the purchaser by the seller.

(c) The amount of any tax imposed by this state that is conclusively presumed to be a direct tax on the retail consumer precollected by the seller for the purpose of convenience and facility only.

"Sales price" does not include any of the following:

(a) Cash discounts allowed and taken on sales.

(b) The amount charged for property returned by customers when that entire amount is refunded either in cash or credit, but this exclusion shall not apply in any instance when the customer, in order to obtain the refund, is required to purchase other property at a price greater than the amount charged for the property that is returned. For the purpose of this section refund or credit of the entire amount shall be

deemed to be given when the purchase price less rehandling and restocking costs are refunded or credited to the customer.

(c) The amount charged for labor or services rendered in installing or applying the property sold.

(d) The amount of any tax (not including, however, any manufacturers' or importers' excise tax) imposed by the United States upon or with respect to retail sales whether imposed upon the retailer or the consumer.

(e) The amount of any tax imposed by any city, county or city and county within the State of California upon or with respect to retail sales of tangible personal property, measured by a stated percentage of sales price or gross receipts, whether imposed upon the retailer or the consumer.

(f) The amount of any tax imposed by any city, county or city and county within the State of California with respect to the storage, use or other consumption in such city, county or city and county of tangible personal property measured by a stated percentage of sales price or purchase price, whether such tax is imposed upon the retailer or the consumer.

(g) Separately stated charges for transportation from the retailer's place of business or other point from which shipment is made directly to the purchaser, but the exclusion shall not exceed a reasonable charge for transportation by facilities of the retailer or the cost to the retailer of transportation by other than facilities of the retailer; provided, that if the transportation is by facilities of the retailer, or the property is sold for a delivered price, this exclusion shall be applicable solely with respect to transportation which occurs after the purchase of the property is made.

(h) The amount of any motor vehicle fee or tax imposed by and paid to the State of California that has been added to or is measured by a stated percentage of the sales or purchase price of a motor vehicle.

SEC. 73. Section 6011.5 of said code is repealed.

SEC. 74. Section 6051 of said code is amended to read:

6051. For the privilege of selling tangible personal property at retail a tax is hereby imposed upon all retailers at the rate of 2½ percent of the gross receipts of any retailer from the sale of all tangible personal property sold at retail in this state on or after August 1, 1933, and to and including June 30, 1935, and at the rate of 3 percent thereafter, and at the rate of 2½ percent on and after July 1, 1943, and to and including June 30, 1949, and at the rate of 3 percent thereafter, and at the rate of 5 percent on and after April 1, 1966.

SEC. 75. Section 6051.5 is added to said code, to read:

6051.5. Any retailer subject to sales tax under this part for the privilege of selling tangible personal property at retail shall be entitled to credit the amount of sales tax due under a sales and use tax ordinance enacted in accordance with Part 1.5 of Division 2 of this code against the payment of taxes due under this part.

SEC. 76. Section 6052.5 of said code is amended to read:

6052.5. The board shall prepare sales tax reimbursement schedules showing the total amount that may be collected by the retailer from a consumer in reimbursement of the sales tax, computed on each sales price, from one cent ($0.01) to and including one hundred dollars ($100), at the 5 percent rate. The schedules shall be identical with the following tables up to the amount specified therein:

1¢–	9¢, inclusive—no tax
10¢–	29¢, inclusive—1¢ tax
30¢–	49¢, inclusive—2¢ tax
50¢–	69¢, inclusive—3¢ tax
70¢–	89¢, inclusive—4¢ tax
90¢–$1.09,	inclusive—5¢ tax

The remainder of the schedules shall show amounts of reimbursement computed by applying the applicable tax rate to the sales price, rounded off to the nearest cent by eliminating any fraction less than one-half cent ~~(0.005)~~ *($0.005)* and increasing any fraction of one-half cent ~~(0.005)~~ *($0.005)* or over to the next higher cent.

The "sales tax reimbursement schedule" shall be available for inspection and duplication or reproduction.

Each retailer who collects amounts from a consumer in reimbursement of the sales tax shall use the schedule prepared by the board in computing the amount of the reimbursement, based upon the sales price of the item sold where one item is sold, and where more than one item is sold in any one transaction, upon the sum of the aggregate sales prices of the items sold, or he shall include in the sales price of each item an amount of reimbursement computed to the nearest mill at the applicable tax rate and post a notice in his premises stating that each posted or advertised price includes reimbursement so computed. When both taxable and nontaxable items are included in the same transaction, the foregoing requirement regarding computation of tax reimbursement upon the sum of the aggregate sales prices shall apply only if the purchaser requests at the time of the sale that the computation be made in this way.

The board shall enforce the provisions of this section.

SEC. 77. Section 6094 of said code is amended to read:

6094. If a purchaser who gives a certificate makes any use of the property other than retention, demonstration, or display while holding it for sale in the regular course of business, the use shall be taxable to the purchaser under Chapter 3 of this part as of the time the property is first used by him, and the sales price of the property to him shall be the measure of the tax. Only when there is an unsatisfied use tax liability on this basis shall the seller be liable for sales tax with respect to the sale of the property to the purchaser.

SEC. 78. Section 6201 of said code is amended to read:

6201. An excise tax is hereby imposed on the storage, use, or other consumption in this state of tangible personal property purchased from any retailer on or after July 1, 1935, for storage, use, or other consumption in this state at the rate of 3 percent of the sales price of the property, and at the rate of 2½ percent on and after July 1, 1943, and to and including June 30, 1949, and at the rate of 3 percent thereafter, and at the rate of 5 percent on and after April 1, 1966.

SEC. 79. Section 6201.5 is added to said code, to read:

6201.5. Any person subject to an excise tax imposed under this part for the storage, use, or other consumption in this state of tangible personal property purchased from any retailer shall be entitled to credit the amount of use tax due under a sales and use tax ordinance enacted in accordance with Part 1.5 of Division 2 of this code against the payment of taxes due under this part.

SEC. 80. Section 6203 of said code is amended to read:

6203. Every retailer engaged in business in this state and making sales of tangible personal property for storage, use, or other consumption in this state, not exempted under Chapter 4 of this part, shall, at the time of making the sales or, if the storage, use, or other consumption of the tangible personal property is not then taxable hereunder, at the time the storage, use, or other consumption becomes taxable, collect the tax from the purchaser and give to the purchaser a receipt therefor in the manner and form prescribed by the board.

As respects leases constituting sales of tangible personal property, the tax shall be collected from the lessee at the time amounts are payable by the lessee under the lease.

"Retailer engaged in business in this state" as used in this and the preceding section means and includes any of the following:

(a) Any retailer maintaining, occupying, or using, permanently or temporarily, directly or indirectly, or through a subsidiary, or agent, by whatever name called, an office, place of distribution, sales or sample room or place, warehouse or storage place or other place of business.

(b) Any retailer having any representative, agent, salesman, canvasser or solicitor operating in this state under the authority of the retailer or its subsidiary for the purpose of selling, delivering, or the taking of orders for any tangible personal property.

(c) Any retailer deriving rentals with respect to tangible personal property situated in this state.

SEC. 81. Section 6244 of said code is amended to read:

6244. If a purchaser who gives a certificate makes any storage or use of the property other than retention, demonstration, or display while holding it for sale in the regular course of business, the storage or use is taxable as of the time the property is first so stored or used

SEC. 82. Chapter 3.5 (commencing with Section 6271) is added to Part 1 of Division 2 of said code, to read:

CHAPTER 3.5. MOTOR VEHICLES, VESSELS AND AIRCRAFT

Article 1. Definitions

6271. Except where the context otherwise requires, the definitions given in this chapter govern the construction of this chapter.

6272 "Motor vehicle" is as defined in Section 415 of the Vehicle Code.

6273. "Vessel" means any boat, ship, barge, craft, or floating thing designed for navigation in the water except:

(a) A seaplane;

(b) A watercraft of the type defined by subdivision (d) (2) of Section 651 of the Harbors and Navigation Code;

(c) A watercraft of a type designed to be propelled solely by oars or paddles;

(d) A watercraft of eight feet or less in length of a type designed to be propelled by sail.

A motor or other component of a vessel, whether or not detachable, shall be deemed to be part of the vessel when sold therewith.

6274. "Aircraft" means any powered contrivance designed for navigation in the air except a rocket or missile.

6275. Every person making a retail sale of a motor vehicle required to be registered under the Vehicle Code, or of a vessel or an aircraft as defined in this article, is a retailer for the purposes of this part of the motor vehicle, vessel or aircraft, regardless of whether he is a retailer by reason of other provisions of this part. This section has no application to a lease of a motor vehicle, vessel or aircraft.

6276 Except when a motor vehicle is purchased outside this state from the manufacturer or a motor vehicle dealer, whenever the purchaser of a motor vehicle is required to pay the use tax to the Department of Motor Vehicles, the sales price shall be presumed to be its market value at the time of the purchase as that value is determined to measure vehicle license fees imposed under Part 5 of Division 2 of this code. The presumption may be rebutted by evidence which establishes that the sales price was other than such market value.

Article 2. Special Exemptions

6280. The provisions of this article shall not apply to leases of motor vehicles, vessels or aircraft or to use taxes imposed upon lessees for the use of motor vehicles, vessels or aircraft.

6281. There are exempted from the taxes imposed by this part the gross receipts from the sale of, and the storage, use,

or other consumption in this state of, a motor vehicle required to be registered under the Vehicle Code or a vessel or aircraft, if such property is included in a transfer of all or substantially all the property held or used in the course of a business activity of the person selling the property, when after such transfer the real or ultimate ownership of such property is substantially similar to that which existed before such transfer For the purposes of this section, stockholders, bondholders, partners, or other persons holding an interest in a corporation or other entity are regarded as having the "real or ultimate ownership" of the property of such corporation or other entity.

6282. There are exempted from the computation of the amount of the sales tax the gross receipts from sales of motor vehicles required to be registered under the Vehicle Code when the retailer is other than a person licensed or certificated pursuant to the Vehicle Code as a manufacturer, dealer, or dismantler.

6283. There are exempted from the computation of the amount of the sales tax the gross receipts from the sale of a vessel or of an aircraft when the retailer is other than a person holding a valid seller's permit issued pursuant to Article 2 of Chapter 2 of this part

6284 If a person is engaged in the business of selling motor vehicles, vessels or aircraft he shall not be excused from the requirements of Article 2 of Chapter 2 of this part, by reason of the exemptions provided in Sections 6282 and 6283.

6285. There are exempted from the taxes imposed by this part the gross receipts from the sale of and the storage, use, or other consumption in this state of a motor vehicle required to be registered under the Vehicle Code or of a vessel or an aircraft, when the person selling the property is either the parent, grandparent, child or spouse of the purchaser and the person selling is not engaged commercially in selling the type of property for which the exemption is claimed.

Article 3. Auxiliary Collection Provisions

6290. The provisions of this article shall not apply to use taxes imposed upon lessees for the use of motor vehicles, vessels or aircraft.

6291. Notwithstanding Section 6451, the use taxes imposed by this part with respect to the storage, use or other consumption in this state of motor vehicles required to be registered under the Vehicle Code and of vessels and aircraft as defined in this chapter are due and payable by the purchaser at the time the storage, use or other consumption of the property first becomes taxable. Delinquency penalties and interest with respect to use tax for motor vehicles registered with the Department of Motor Vehicles shall be as provided in Section 6292. Penalties and interest with respect to use tax for vessels

and aircraft shall attach as if the due date of the tax were fixed by Section 6451.

6292. (a) When a motor vehicle required to be registered under the Vehicle Code is sold at retail by other than a person licensed or certificated pursuant to the Vehicle Code as a manufacturer, dealer or dismantler, the retailer is not required or authorized to collect the use tax from the purchaser, but the purchaser of the motor vehicle must pay the use tax to the Department of Motor Vehicles acting for and on behalf of the board pursuant to Section 4750.5 of the Vehicle Code.

(b) If the purchaser does not make timely application to that department, but is subject to penalty because of delinquency in effecting registration or transfer of registration of the motor vehicle, he then becomes liable also for penalty as specified in Section 6591 of this code, but no interest shall accrue.

SEC. 83. Section 6367 of said code is amended to read:

6367. There are exempted from the taxes imposed by this part the gross receipts from occasional sales of tangible personal property and the storage, use, or other consumption in this state of tangible personal property, the transfer of which to the purchaser is an occasional sale This exemption does not apply to the gross receipts from the sale other than by leasing of, or to the storage, use, or other consumption in this state other than as lessee of, a vessel or aircraft, as defined in Article 1 of Chapter 3 5 of this part, or a motor vehicle required to be registered under the Vehicle Code

SEC. 84. Section 6381 of said code is amended to read:

6381. There are exempted from the computation of the amount of the sales tax the gross receipts from the sale of any tangible personal property to:

(a) The United States, its unincorporated agencies and instrumentalities;

(b) Any incorporated agency or instrumentality of the United States wholly owned by the United States or by a corporation wholly owned by the United States;

(c) The American National Red Cross, its chapters and branches.

This exemption does not extend to the rentals payable under a lease of tangible personal property.

SEC 85. Section 6389 of said code is repealed.

SEC 86 Section 6390 is added to said code, to read:

6390. There are exempted from the computation of the amount of the sales tax the rentals payable under a lease of tangible personal property (a) when such rentals are required to be included in the measure of the use tax or (b) when such property is situated outside this state

SEC 87 Section 6391 is added to said code, to read:

6391. There are exempted from the computation of the amount of the sales tax the rentals payable under a lease of tangible personal property for any period of time for which the lessor is unconditionally obligated to lease the property

for an amount fixed by the lease prior to the effective date of this section and the lessor has not elected under Sections 6094 or 6244 to pay use tax measured by the amount of the rental charge

SEC. 88. Section 6401 of said code is amended to read:

6401. The storage, use, or other consumption in this state of property, the gross receipts from the sale of which are required to be included in the measure of the sales tax, is exempted from the use tax; provided, however, that this exemption does not extend to the possession of, or the exercise of any right or power over, tangible personal property by a lessee under a lease.

SEC. 89. Section 6422 of said code is repealed.

SEC. 90. Section 6422 is added to said code, to read:

6422. The board may provide for exemption certificates and other tax clearance certificates to be issued by it or by retailers selling motor vehicles. Such certificates shall be used to allow a completion of registration of a motor vehicle by the Department of Motor Vehicles. A certificate may indicate that the board finds that no use tax is due or is likely to become due with respect to the storage, use or other consumption of the motor vehicle or that the tax has been paid or is to be paid in a manner not requiring the withholding of a registration or transfer of registration. The certificates shall be in such form as the board may prescribe and shall be executed, issued and accepted for clearance of registration on such conditions as the board may prescribe. The issuance, alteration, forgery or use of any such certificate in a manner contrary to the requirements of the board constitutes a misdemeanor.

SEC. 91. Section 6454.5 of said code is repealed.

SEC. 92. Section 6457 of said code is amended to read:

6457. As respects leases of tangible personal property, for purposes of the sales tax, or the use tax, the return shall show the total amount payable by the lessee under the lease during the preceding reporting period.

SEC. 93. Section 7102 of said code is amended to read:

7102. The money in the Retail Sales Tax Fund shall be distributed as follows:

(a) The money in the fund shall, upon order of the Controller, be drawn therefrom for refunds under this part.

(b) That sum of money collected and deposited in the fund which is equal to seventeen hundredths of one percent (0.17%) of the measure of the taxes collected under this part shall, upon order of the Controller, be transferred to the City Property Tax Relief Fund, which fund is hereby created.

(c) The money remaining in the Retail Sales Tax Fund shall, upon order of the Controller, be transferred to the General Fund of the state.

SEC. 94. Section 7103 is added to said code, to read:

7103. The money in the City Property Tax Relief Fund shall, upon order of the Controller, be paid quarterly to each of the cities and cities and counties of this state in the propor-

tion that the taxes levied against locally assessed personal property by each such city and city and county in the tax year 1963–1964 bears to the sum of the taxes levied against locally assessed personal property during that time by all the cities and cities and counties in this state. This proportion shall be determined by the board.

SEC. 95. Section 7202 of said code is amended to read:

7202. The sales tax portion of any sales and use tax ordinance adopted under this part shall be imposed for the privilege of selling tangible personal property at retail, and shall include provisions in substance as follows:

(a) A provision imposing a tax for the privilege of selling tangible personal property at retail upon every retailer in the county at the rate of one percent (1%) of the gross receipts of the retailer from the sale of all tangible personal property sold by him at retail in the county to and including March 31, 1966, and thereafter at the rate of one and eight hundredths of one percent (1.08%).

(b) Provisions identical to those contained in Part 1 of Division 2 of this code, insofar as they relate to sales taxes, except that the name of the county as the taxing agency shall be substituted for that of the state and that an additional seller's permit shall not be required if one has been or is issued to the seller under Section 6068 of this code

(c) A provision that all amendments subsequent to the effective date of the enactment of Part 1 of Division 2 of this code relating to sales tax and not inconsistent with this part, shall automatically become a part of the sales tax ordinance of the county.

(d) A provision that the county shall contract prior to the effective date of the county sales and use tax ordinances with the State Board of Equalization to perform all functions incident to the administration or operation of the sales and use tax ordinance of the county.

(e) A provision that such ordinance may be made inoperative not less than 60 days, but not earlier than the first day of the calendar quarter, following an increase by any city within the county of the rate of its sales or use tax above the rate in effect at the time the county ordinance was enacted.

(f) A provision that the amount subject to tax shall not include the amount of any sales tax or use tax imposed by the State of California upon a retailer or consumer

(g) That any person subject to a sales and use tax under the county ordinance shall be entitled to credit against the payment of taxes due under that ordinance the amount of sales and use tax due to any city in the county; provided, that the city sales and use tax is levied under an ordinance including provisions in substance as follows:

(1) A provision imposing a tax for the privilege of selling tangible personal property at retail upon every retailer in the city at the rate of 1 percent or less of the gross receipts of the retailer from the sale of all tangible personal property

sold by him at retail in the city and a use tax of 1 percent or less of purchase price upon the storage, use or other consumption of tangible personal property purchased from a retailer for storage, use or consumption in the city.

(2) Provisions identical to those contained in Part 1 of Division 2 of this code, insofar as they relate to sales and use taxes, except that the name of the city as the taxing agency shall be substituted for that of the state (but the name of the city shall not be substituted for the word "state" in the phrase "retailer engaged in business in this state" in Section 6203 nor in the definition of that phrase in Section 6203) and that an additional seller's permit shall not be required if one has been or is issued to the seller under Section 6068 of this code.

(3) A provision that all amendments subsequent to the effective date of the enactment of Part 1 of Division 2 of this code relating to sales and use tax and not inconsistent with this part, shall automatically become a part of the sales and use tax ordinance of the city.

(4) A provision that the city shall contract prior to the effective date of the city sales and use tax ordinance with the State Board of Equalization to perform all functions incident to the administration or operation of the sales and use tax ordinance of the city which shall continue in effect so long as the county within which the city is located has an operative sales and use tax ordinance enacted pursuant to this part.

(5) A provision that the storage, use or other consumption of tangible personal property, the gross receipts from the sale of which has been subject to sales tax under Part 1 of Division 2 of this code, shall be exempt from the tax due under this ordinance.

(6) A provision that the amount subject to tax shall not include the amount of any sales tax or use tax imposed by the State of California upon a retailer or consumer.

SEC. 96 Section 7203 of said code is amended to read:

7203. The use tax portion of any sales and use tax ordinance adopted under this part shall impose a complementary tax upon the storage, use or other consumption in the county of tangible personal property purchased from any retailer for storage, use or other consumption in the county. Such tax shall be at the rate of one percent (1%) to and including March 31, 1966, and thereafter at the rate of one and eight hundredths of one percent (1.08%) of the sales price of the property whose storage, use or other consumption is subject to the tax and shall include:

(1) Provisions identical to the provisions contained in Division 2, Part 1, of this code, other than Section 6201, insofar as such provisions relate to the use tax except that the name of the county as the taxing agency enacting the ordinance shall be substituted for that of the state (but the name of the county shall not be substituted for the word "state" in the

phrase "retailer engaged in business in this state" in Section 6203 nor in the definition of that phrase in Section 6203).

(2) ~~That~~ *A provision that* all amendments subsequent to the date of such ordinance to the provisions of the Revenue and Taxation Code relating to the use tax and not inconsistent with this part shall automatically become a part of the ordinance.

(3) A provision that the storage, use or other consumption of tangible personal property, the gross receipts from the sale of which has been subject to sales tax under a Part 1 of Division 2 of this code, shall be exempt from the tax due under this ordinance.

(4) A provision that the amount subject to tax shall not include the amount of any sales tax or use tax imposed by the State of California upon a retailer or consumer.

SEC. 96.5. Section 11003.4 of said code is amended to read:

11003.4. As soon as the report is returned to the auditor he shall distribute the amounts received by him under Section 11003.3 ~~in the same manner~~ according to situs of the trailer coaches as ~~is provided for the distribution of the proceeds of the tax on intangibles under Chapter 2 of Part 8 of Division 1 of this code~~ *follows:*

(a) One-half of the amount to the unified school district in which the trailer is located or one-fourth of the amount to the elementary school district in which the trailer is located and one-fourth to the high school district in which the trailer is located;

(b) Five percent (5%) to the junior college district in which the trailer is located;

(c) Thirty-three percent (33%) to the county in which the trailer is located; and

(d) Twelve percent (12%) to the city in which the trailer is located.

Where any one of these taxing jurisdictions does not exist, its share of the funds shall be given to the county.

SEC. 97. Section 11492 of said code is amended to read.

11492. The lien upon personal property attaches on the first day of January of each year with respect to taxes, together with the interest and penalties thereon, to be levied during the year.

SEC. 98. Section 13309 of said code is amended to read:

13309. "Class C transferee" means any transferee who is not a class A or B transferee.

SEC. 99. Section 13310 of said code is repealed.

SEC. 100. Section 13404 of said code is amended to read:

13404. In the case of a transfer to a class A transferee, the rates of tax are as follows:

(a) Two percent of the clear market value of the property transferred up to twenty-five thousand dollars ($25,000).

(b) Three percent of the excess value over twenty-five thousand dollars ($25,000) and up to fifty thousand dollars ($50,000).

(c) Four percent of the excess value over fifty thousand dollars ($50,000) and up to one hundred thousand dollars ($100,000).

(d) Nine percent of the excess value over one hundred thousand dollars ($100,000) and up to two hundred thousand dollars ($200,000).

(e) Eleven percent of the excess value over two hundred thousand dollars ($200,000) and up to three hundred thousand dollars ($300,000).

(f) Twelve percent of the excess value over three hundred thousand dollars ($300,000) and up to five hundred thousand dollars ($500,000).

(g) Fourteen percent of the excess value over five hundred thousand dollars ($500,000).

SEC. 101. Section 13405 of said code is amended to read:

13405. In the case of a transfer to a class B transferee the rates of tax are as follows:

(a) Six percent of the clear market value of the property transferred up to twenty-five thousand dollars ($25,000).

(b) Ten percent of the excess value over twenty-five thousand dollars ($25,000) and up to fifty thousand dollars ($50,000).

(c) Thirteen percent of the excess value over fifty thousand dollars ($50,000) and up to one hundred thousand dollars ($100,000).

(d) Fifteen percent of the excess value over one hundred thousand dollars ($100,000) and up to two hundred thousand dollars ($200,000).

(e) Sixteen percent of the excess value over two hundred thousand dollars ($200,000) and up to three hundred thousand dollars ($300,000).

(f) Seventeen percent of the excess value over three hundred thousand dollars ($300,000) and up to five hundred thousand dollars ($500,000).

(g) Eighteen percent of the excess value over five hundred thousand dollars ($500,000)

SEC. 102. Section 13406 of said code is repealed.

SEC. 103. Section 13407 of said code is amended and renumbered to read:

13406 In the case of a transfer to a class C transferee, the rates of tax are as follows:

(a) Ten percent of the clear market value of the property transferred up to twenty-five thousand dollars ($25,000).

(b) Fifteen percent of the excess value over twenty-five thousand dollars ($25,000) and up to fifty thousand dollars ($50,000).

(c) Eighteen percent of the excess value over fifty thousand dollars ($50,000) and up to one hundred thousand dollars ($100,000)

(d) Nineteen percent of the excess value over one hundred thousand dollars ($100,000) and up to two hundred thousand dollars ($200,000).

(e) Twenty percent of the excess value over two hundred thousand dollars ($200,000) and up to three hundred thousand dollars ($300,000).

(f) Twenty-two percent of the excess value over three hundred thousand dollars ($300,000) and up to five hundred thousand dollars ($500,000).

(g) Twenty-four percent of the excess value over five hundred thousand dollars ($500,000).

SEC. 104. Section 13803 of said code is amended to read:

13803. Property of the clear market value of three hundred dollars ($300) transferred to any class C transferee is exempt from the tax imposed by this part.

SEC. 105. Section 13804 of said code is repealed.

SEC. 106. Section 13841 of said code is amended to read:

13841. Property transferred to any of the following is exempt from the tax imposed by this part:

(a) The United States

(b) This state.

(c) A public corporation of this state.

(d) A society, corporation, institution, or association exempt by the laws of this state from property taxation under Section 203, 206, 207 or 214 of this code.

SEC. 107. Section 13842 of this code is amended to read:

13842. Property transferred to any society, corporation, institution, or association, in trust or otherwise, or to any foundation or trust, organized and operated exclusively for religious, charitable, or scientific purposes, which could qualify for a property tax exemption under Section 214 of this code, no part of the net earnings of which inures to the benefit of any private stockholder or individual, and no substantial part of the activities of which is carrying on propaganda or otherwise attempting to influence legislation, is exempt from the tax imposed by this part, if any of the following conditions is present:

(a) The society, corporation, institution, foundation, trust, or association is organized solely for religious, charitable or scientific purposes under the laws of this state or of the United States;

(b) The property transferred is limited for use within this state;

(c) In the event that the society, corporation, institution, foundation, trust, or association is organized or existing under the laws of a territory or another state of the United States or of a foreign state or country, at the date of the decedent's death either of the following concurred:

(1) The territory, other state, foreign state, or foreign country did not impose a legacy, succession, or death tax of any character in respect to property transferred to a similar society, corporation, institution, or association organized or existing under the laws of this state;

(2) The laws of the territory, other state, foreign state, or foreign country contained a reciprocal provision under which

property transferred to a similar society, corporation, institution, or association organized or existing under the laws of another territory or state of the United States or foreign state or country was exempt from legacy, succession, or death taxes of every character, if the other territory or state of the United States or foreign state or country allowed a similar exemption in respect to property transferred to a similar society, corporation, institution, or association organized or existing under the laws of another territory or state of the United States or foreign state or country.

SEC. 108. Section 15112 of said code is amended to read:

15112. "Class C donee" means any donee who is not a class A or B donee.

SEC. 109. Section 15113 of said code is repealed.

SEC. 110. Section 15205 of said code is amended to read:

15205. In the case of a transfer to a class A donee, the rates of tax are as follows:

(a) Two percent of the clear market value of the property transferred up to twenty-five thousand dollars ($25,000).

(b) Three percent of the excess value over twenty-five thousand dollars ($25,000) and up to fifty thousand dollars ($50,000).

(c) Four percent of the excess value over fifty thousand dollars ($50,000) and up to one hundred thousand dollars ($100,000).

(d) Nine percent of the excess value over one hundred thousand dollars ($100,000) and up to two hundred thousand dollars ($200,000).

(e) Eleven percent of the excess value over two hundred thousand dollars ($200,000) and up to three hundred thousand dollars ($300,000).

(f) Twelve percent of the excess value over three hundred thousand dollars ($300,000) and up to five hundred thousand dollars ($500,000).

(g) Fourteen percent of the excess value over five hundred thousand dollars ($500,000).

SEC. 111. Section 15206 of said code is amended to read:

15206. In the case of a transfer to a class B donee, the rates of tax are as follows:

(a) Six percent of the clear market value of the property transferred up to twenty-five thousand dollars ($25,000).

(b) Ten percent of the excess value over twenty-five thousand dollars ($25,000) and up to fifty thousand dollars ($50,000).

(c) Thirteen percent of the excess value over fifty thousand dollars ($50,000) and up to one hundred thousand dollars ($100,000).

(d) Fifteen percent of the excess value over one hundred thousand dollars ($100,000) and up to two hundred thousand dollars ($200,000).

(e) Sixteen percent of the excess value over two hundred thousand dollars ($200,000) and up to three hundred thousand dollars ($300,000).

(f) Seventeen percent of the excess value over three hundred thousand dollars ($300,000) and up to five hundred thousand dollars ($500,000).

(g) Eighteen percent of the excess value over five hundred thousand dollars ($500,000).

SEC 112 Section 15207 of said code is repealed

SEC 113. Section 15208 of said code is amended and renumbered to read:

15207. In the case of a transfer to a class C donee, the rates of tax are as follows:

(a) Ten percent of the clear market value of the property transferred up to twenty-five thousand dollars ($25,000).

(b) Fifteen percent of the excess value over twenty-five thousand dollars ($25,000) and up to fifty thousand dollars ($50,000)

(c) Eighteen percent of the excess value over fifty thousand dollars ($50,000) and up to one hundred thousand dollars ($100,000).

(d) Nineteen percent of the excess value over one hundred thousand dollars ($100,000) and up to two hundred thousand dollars ($200,000).

(e) Twenty percent of the excess value over two hundred thousand dollars ($200,000) and up to three hundred thousand dollars ($300,000).

(f) Twenty-two percent of the excess value over three hundred thousand dollars ($300,000) and up to five hundred thousand dollars ($500,000)

(g) Twenty-four percent of the excess value over five hundred thousand dollars ($500,000)

SEC 114 Section 15423 of said code is amended to read:

15423 Property of the clear market value of three hundred dollars ($300) transferred to any class C donee is exempt from the tax imposed by this part.

SEC 115. Section 15424 of said code is repealed

SEC 116 Section 17035 is added to said code, to read·

17035. The term "withholding agent" means any person required to deduct and withhold any tax under the provisions of Sections 18805 or 18806

SEC 117 Section 17041 of said code is amended to read:

17041 (a) There shall be levied, collected, and paid for each taxable year upon the entire taxable income of every resident of this state and upon the entire taxable income of every nonresident which is derived from sources within this state, taxes in the following amounts and at the following rates upon the amount of taxable income:

Upon taxable incomes not in excess of one thousand five hundred dollars ($1,500), 1 percent of such taxable incomes

Fifteen dollars ($15) upon taxable incomes of one thousand five hundred dollars ($1,500); and upon taxable incomes in ex-

cess of one thousand five hundred dollars ($1,500), and not in excess of three thousand dollars ($3,000), 2 percent in addition of such excess

Forty-five dollars ($45) upon taxable incomes of three thousand dollars ($3,000); and upon taxable incomes in excess of three thousand dollars ($3,000), and not in excess of four thousand five hundred dollars ($4,500), 3 percent in addition of such excess.

Ninety dollars ($90) upon taxable incomes of four thousand five hundred dollars ($4,500); and upon taxable incomes in excess of four thousand five hundred dollars ($4,500), and not in excess of six thousand dollars ($6,000), 4 percent in addition of such excess.

One hundred fifty dollars ($150) upon taxable incomes of six thousand dollars ($6,000), and upon taxable incomes in excess of six thousand dollars ($6,000), and not in excess of seven thousand five hundred dollars ($7,500), 5 percent in addition of such excess

Two hundred twenty-five dollars ($225) upon taxable incomes of seven thousand five hundred dollars ($7,500); and upon taxable incomes in excess of seven thousand five hundred dollars ($7,500), and not in excess of nine thousand dollars ($9,000), 6 percent in addition of such excess.

Three hundred fifteen dollars ($315) upon taxable incomes of nine thousand dollars ($9,000), and upon taxable incomes in excess of nine thousand dollars ($9,000), and not in excess of ten thousand five hundred dollars ($10,500), 7 percent in addition of such excess.

Four hundred twenty dollars ($420) upon taxable incomes of ten thousand five hundred dollars ($10,500); and upon taxable incomes in excess of ten thousand five hundred dollars ($10,500), and not in excess of twelve thousand dollars ($12,000), 8 percent in addition of such excess.

Five hundred forty dollars ($540) upon taxable incomes of twelve thousand dollars ($12,000); and upon taxable incomes in excess of twelve thousand dollars ($12,000), and not in excess of thirteen thousand five hundred dollars ($13,500), 9 percent in addition of such excess.

Six hundred seventy-five dollars ($675) upon taxable incomes of thirteen thousand five hundred dollars ($13,500); and upon taxable incomes in excess of thirteen thousand five hundred dollars ($13,500), and not in excess of fifteen thousand dollars ($15,000), 10 percent in addition of such excess.

Eight hundred twenty-five dollars ($825) upon taxable incomes of fifteen thousand dollars ($15,000), and upon taxable incomes in excess of fifteen thousand dollars ($15,000), and not in excess of sixteen thousand five hundred dollars ($16,500), 11 percent in addition of such excess

Nine hundred ninety dollars ($990) upon taxable incomes of sixteen thousand five hundred dollars ($16,500); and upon taxable incomes in excess of sixteen thousand five hundred

dollars ($16,500), and not in excess of eighteen thousand dollars ($18,000), 12 percent in addition of such excess.

One thousand one hundred seventy dollars ($1,170) upon taxable incomes of eighteen thousand dollars ($18,000); and upon taxable incomes in excess of eighteen thousand dollars ($18,000), and not in excess of nineteen thousand five hundred dollars ($19,500), 13 percent in addition of such excess.

One thousand three hundred sixty-five dollars ($1,365) upon taxable incomes of nineteen thousand five hundred dollars ($19,500); and upon taxable incomes in excess of nineteen thousand five hundred dollars ($19,500), and not in excess of twenty-one thousand dollars ($21,000), 14 percent in addition of such excess.

One thousand five hundred seventy-five dollars ($1,575) upon taxable incomes of twenty-one thousand dollars ($21,000); and upon taxable incomes in excess of twenty-one thousand dollars ($21,000), 15 percent in addition of such excess.

(b) The tax imposed by this part is not a surtax.

SEC 118. Section 17048 of said code is amended to read:

17048. (a) In lieu of the tax imposed under Section 17041 of this part, there shall be levied, collected and paid for each taxable year upon the taxable income of each individual whose adjusted gross income is less than ten thousand dollars ($10,000), and who has elected to pay the tax imposed by this section for such year, the tax shown in the following table:

If the adjusted gross income is at least—	But less than	The tax shall be— (1) Single person (not head of household), and (2) married person making separate return	Head of household (unmarried person)	Joint return of married person
$0	$1,600	$0	$0	$0
1,600	1,700	1.50	0	0
1,700	1,800	2.50	0	0

9,700	9,800	270 00	187 50	112 50
9,800	9,900	276 00	192 50	115 50
9,900	10,000	282 00	197 50	118.50

In applying the above schedule to determine the tax of a taxpayer with one or more dependents, there shall be subtracted from his adjusted gross income six hundred dollars ($600) for each such dependent

(b) For the purpose of this section—

(1) "Married person" means a married person on the last day of the taxable year unless his spouse dies during the taxable year, in which case such determination shall be made as of the date of the spouse's death.

(2) "Dependent" means a person who is a dependent under Section 17182

(3) An individual not a head of a household or a married person shall be treated as a single person.

SEC 118.5. Section 17053 of said code is amended to read:

17053 (a) In the case of an individual who has received earned income before the beginning of the taxable year, there shall be allowed as a credit against the tax imposed by this part for the taxable year an amount equal to the amount received by such individual as retirement income (as defined in subsection (c) and as limited by subsection (d)), multiplied by the rate provided in Section 17041 for the first ~~two~~ *one* thousand five hundred dollars ~~($2,500)~~ *($1,500)* of taxable income, but the credit provided by this section shall not exceed the tax imposed under this part reduced by the credit allowable under Chapter 12 (relating to taxes paid to other states).

(b) For purposes of subsection (a), an individual shall be considered to have received earned income if he has received, in each of any 10 calendar years before the taxable year, earned income (as defined in subsection (g)) in excess of six hundred dollars ($600). A widow or widower whose spouse had received such earned income shall be considered to have received earned income.

(c) For purposes of subsection (a), the term "retirement income" means—

(1) In the case of an individual who has attained the age of 65 before the close of the taxable year, income from—

(A) Pensions and annuities,

(B) Interest,

(C) Rents, and

(D) Dividends, or

(2) In the case of an individual who has not attained the age of 65 before the close of the taxable year, income from pensions and annuities under a public retirement system (as defined in subsection (f)), to the extent included in gross income without reference to this section, but only to the extent such income does not represent compensation for personal services rendered during the taxable year.

(d) For purposes of subsection (a), the amount of retirement income shall not exceed one thousand five hundred twenty-four dollars ($1,524) less—

(1) In the case of any individual, any amount received by the individual as a pension or annuity—

(A) Under Title II of the Social Security Act,

(B) Under the Railroad Retirement Acts of 1935 or 1937, or

(C) Otherwise excluded from gross income, and

(2) In the case of any individual who has not attained the age of 72 before the close of the taxable year—

(A) If such individual has not attained age 62 before the close of the taxable year, any amount of earned income (as defined in subsection (g)) in excess of nine hundred dollars ($900) received by the individual in the taxable year—

(B) If such individual has attained age 62 before the close of the taxable year, the sum of (i) one-half the amount of earned income received by such individual in the taxable year in excess of one thousand two hundred dollars ($1,200) but not in excess of one thousand seven hundred dollars ($1,700), and (ii) the amount of earned income so received in excess of one thousand seven hundred dollars ($1,700).

(e) Subsection (d)(1) shall not apply to any amount excluded from gross income under Sections 17101 to 17112, inclusive (relating to annuities), 17131 to 17135, inclusive (relating to life insurance proceeds), 17138 (relating to compensation for injuries or sickness), 17139 (relating to amounts received under accident and health plans), 17503 to 17507, inclusive, (relating to taxability of beneficiary of employees' trust), or 17511 and 17512 (relating to taxation of employee annuities).

(f) For purposes of subsection (c)(2), the term "public retirement system" means a pension, annuity, retirement, or similar fund or system established by the United States, a state, a territory, a possession of the United States, any political subdivision of any of the foregoing, or the District of Columbia.

(g) For purposes of subsections (b) and (d)(2), the term "earned income" has the meaning assigned to such term in Section 911(b) of the Internal Revenue Code of 1954, except that such term does not include any amount received as a pension or annuity.

(h) (1) A husband and wife who make a joint return for the taxable year and both of whom have attained the age of 65 before the close of the taxable year may elect (at such time and in such manner as the Franchise Tax Board by regulations prescribes) to determine the amount of the credit allowed by subsection (a) by applying the provisions of paragraph (2).

(2) If an election is made under paragraph (1) for the taxable year, for purposes of subsection (a)—

(A) If either spouse is an individual who has received earned income within the meaning of subsection (b), the other spouse shall be considered to be an individual who has received earned income within the meaning of such subsection; and

(B) Subsection (d) shall be considered as providing that the amount of the combined retirement income of both spouses shall not exceed two thousand two hundred eighty-six dollars ($2,286), less the sum of the amounts specified in paragraphs (1) and (2) of subsection (d) for each spouse.

(i) No credit shall be allowed under subsection (a) to any nonresident

SEC. 119. Section 17101 of said code is amended to read:

17101. Except as otherwise provided in this part, gross income includes any amount received as an annuity (whether for a period certain or during one or more lives) under an annuity, endowment, or life insurance contract.

SEC. 120. Section 17102 of said code is amended to read:

17102. Gross income does not include that part of any amount received as an annuity under an annuity, endowment, or life insurance contract which bears the same ratio to such amount as the investment in the contract (as of the annuity starting date) bears to the expected return under the contract (as of such date). This section shall not apply to any amount to which Section 17104(a) (relating to certain employee annuities) applies.

SEC. 121. Section 17103 of said code is amended to read:

17103 (a) For purposes of Section 17102, the investment in the contract as of the annuity starting date is—

(1) The aggregate amount of premiums or other consideration paid for the contract, minus

(2) The aggregate amount received under the contract before such date, to the extent that such amount was excludable

from gross income under this part or prior income tax laws.

(b) If—

(1) The expected return under the contract depends in whole or in part on the life expectancy of one or more individuals;

(2) The contract provides for payments to be made to a beneficiary (or to the estate of an annuitant) on or after the death of the annuitant or annuitants; and

(3) Such payments are in the nature of a refund of the consideration paid;

then the value (computed without discount for interest) of such payments on the annuity starting date shall be subtracted from the amount determined under subdivision (a). Such value shall be computed in accordance with actuarial tables prescribed by the Franchise Tax Board. For purposes of this section and of Section 17105(b)(1), the term "refund of the consideration paid" includes amounts payable after the death of an annuitant by reason of a provision in the contract for a life annuity with minimum period of payments certain, but (if part of the consideration was contributed by an employer) does not include that part of any payment to a beneficiary (or to the estate of the annuitant) which is not attributable to the consideration paid by the employee for the contract as determined under subdivision (a)(1)

(c) For purposes of Section 17102, the expected return under the contract shall be determined as follows:

(1) If the expected return under the contract, for the period on and after the annuity starting date, depends in whole or in part on the life expectancy of one or more individuals, the expected return shall be computed with reference to actuarial tables prescribed by the Franchise Tax Board.

(2) If subdivision (c)(1) does not apply, the expected return is the aggregate of the amounts receivable under the contract as an annuity.

(d) For purposes of Sections 17101 to 17112, inclusive, the annuity starting date in the case of any contract is the first day of the first period for which an amount is received as an annuity under the contract; except that if such date was before January 1, 1965, then the annuity starting date is January 1, 1965

SEC. 122. Section 17104 of said code is amended to read:

17104. (a) Where—

(1) Part of the consideration for an annuity, endowment, or life insurance contract is contributed by the employer, and

(2) During the three-year period beginning on or after January 1, 1965, the aggregate amount receivable by the employee under the terms of the contract is equal to or greater than the consideration for the contract contributed by the employee, then all amounts received as an annuity under the contract shall be excluded from gross income until there has been so excluded (under this article and prior income tax laws) an amount equal to the consideration for the contract contributed

by the employee. Thereafter all amounts so received under the contract shall be included in gross income.

(b) For purposes of subdivision (a), if the employee died before any amount was received as an annuity under the contract, the words "receivable by the employee" shall be read as "receivable by a beneficiary of the employee."

(c) For certain rules for determining whether amounts contributed by employer are includible in the gross income of the employee, see Article 1 (commencing at Section 17501) of Chapter 5 of this part, relating to pension, profit-sharing, and stock bonus plans, etc.

SEC. 123. Section 17105 of said code is amended to read:

17105. (a) If any amount is received under an annuity, endowment, or life insurance contract, if such amount is not received as an annuity, and if no other provision of this part applies, then such amount—

(1) If received on or after the annuity starting date, shall be included in gross income; or

(2) If subdivision (a)(1) does not apply, shall be included in gross income, but only to the extent that it (when added to amounts previously received under the contract which were excludable from gross income under this part or prior income tax laws) exceeds the aggregate premiums or other consideration paid.

For purposes of Sections 17101 to 17112, inclusive, any amount received which is in the nature of a dividend or similar distribution shall be treated as an amount not received as an annuity.

(b) For purposes of subdivision (a), the following shall be treated as amounts not received as ~~an annuity~~ *an annuity*:

(1) Any amount received, whether in a single sum or otherwise, under a contract in full discharge of the obligation under the contract which is in the nature of a refund of the consideration paid for the contract; and

(2) Any amount received under a contract on its surrender, redemption, or maturity.

In the case of any amount to which the preceding sentence applies, the rule of subdivision (a)(2) shall apply (and the rule of subdivision (a)(1)) shall not apply).

SEC 124. Section 17106 of said code is amended to read:

Except as provided in subdivision (c), in computing, for purposes of Section 17103(a)(1), the aggregate amount of premiums or other consideration paid for the contract for purposes of Section 17104(a), the consideration for the contract contributed by the employee, and for purposes of Section 17105(a)(2), the aggregate premiums or other consideration paid, amounts contributed by the employer shall be included, but only to the extent that—

(a) Such amounts were includable in the gross income of the employee under this part or prior income tax laws; or

(b) If such amounts had been paid directly to the employee at the time they were contributed, they would not have been

includable in the gross income of the employee under the law at the time of such contribution.

(c) For purposes of Sections 17101, 17104, 17105, 17131 and 17132, where amounts are received by a surviving annuitant under a joint and survivor's annuity contract, the basis of such survivor annuitant's interest is the consideration paid for such annuity reduced by any amounts excluded from gross income under this part.

SEC. 125. Section 17107 of said code is amended to read:

17107. Where any contract (or any interest therein) is transferred (by assignment or otherwise) for a valuable consideration, to the extent that the contract (or interest therein) does not, in the hands of the transferee, have a basis which is determined by reference to the basis in the hands of the transferor, then—

(a) For purposes of Sections 17101 to 17112, inclusive, only the actual value of such consideration, plus the amount of the premiums and other consideration paid by the transferee after the transfer, shall be taken into account in computing the aggregate amount of the premiums or other consideration paid for the contract;

(b) For purposes of Section 17103(a)(2), there shall be taken into account only the aggregate amount received under the contract by the transferee before the annuity starting date, to the extent that such amount was excludable from gross income under this part or prior income tax laws; and

(c) The annuity starting date is January 1, 1965, or the first day of the first period for which the transferee received an amount under the contract as an annuity, whichever is the later.

For purposes of this section, the term "transferee" includes a beneficiary of, or the estate of, the transferee

For the purposes of this section and Sections 18044 and 18045(f), the survivor's interest in a joint and survivor's annuity shall be considered to be property "acquired by bequest, devise or inheritance" from the decedent if the death of the decedent was after December 31, 1952 and ~~before December 31, 1965~~ *before January 1, 1965*, and if the value of any part of such interest was required to be included in determining the value of the decedent's interest taxable under the California Inheritance Tax Law

SEC. 126. Section 17108 of said code is amended to read:

17108 If—

(a) A contract provides for payment of a lump sum in full discharge of an obligation under the contract, subject to an option to receive an annuity in lieu of such lump sum;

(b) The option is exercised within 60 days after the day on which such lump sum first became payable; and

(c) Part or all of such lump sum would (but for this section) be includable in gross income by reason of Section 17105(a).

then, for purposes of this part, no part of such lump sum shall be considered as includable in gross income at the time such lump sum first became payable.

SEC. 127. Section 17109 is added to said code, to read:

17109. Where an annuitant died after December 31, 1952, and before January 1, 1965, and the basis of a surviving annuitant's interest in the joint and survivor annuity contract was determinable under Section 17746 5 of the Personal Income Tax Law of 1954 or Section 18045(f) then—

(a) Section 17104 shall not apply with respect to such contract;

(b) For purposes of Sections 17101 to 17112, inclusive, the aggregate amount of premiums or other consideration paid for the contract is the basis of the contract determined under such Section 17746 5 of the Personal Income Tax Law of 1954 or Section 18045(f);

(c) For purposes of Section 17103(a)(2), there shall be taken into account only the aggregate amount received by the surviving annuitant under the contract before the annuity starting date, to the extent that such amount was excludable from gross income under this part or prior income tax laws; and

(d) The annuity starting date is January 1, 1965, or the first day of the first period for which the surviving annuitant received an amount under the contract as an annuity, whichever is the later.

SEC. 128. Section 17110 is added to said code, to read:

17110. Notwithstanding any other provision of Sections 17101 to 17112, inclusive, if any amount is held under an agreement to pay interest thereon, the interest payments shall be included in gross income.

SEC. 129. Section 17111 is added to said code, to read:

17111. (a) Sections 17101 to 17112, inclusive, shall not apply to so much of any payment under an annuity, endowment, or life insurance contract (or any interest therein) as is includable in the gross income of the wife under Sections 17081, 17082 and 17083 or Sections 17819 and 17820 (relating to income of an estate or trust in case of divorce, etc.).

(b) For definition of "wife," see Section 17021.

SEC. 130. Section 17112 is added to said code, to read:

17112. For purposes of Sections 17101 to 17112, inclusive, the term "endowment contract" includes a face-amount certificate, as defined in Section 2(a)(15) of the Investment Company Act of 1940 (15 U.S.C., Sec. 80a-2), issued after December 31, 1964.

SEC. 131. Section 17132 of said code is amended to read:

17132. (a) Gross income does not include amounts received (whether in a single sum or otherwise) by the beneficiaries or the estate of an employee, if such amounts are paid by or on behalf of an employer and are paid by reason of the death of the employee.

(b) (1) The aggregate amounts excludable under subdivision (a) with respect to the death of any employee shall not exceed five thousand dollars ($5,000).

(2) Subdivision (a) shall not apply to amounts with respect to which the employee possessed, immediately before his death, a nonforfeitable right to receive the amounts while living

This subdivision shall not apply to total distributions payable (as defined in Section 17503(c)(3)) which are paid to a distributee within one taxable year of the distributee by reason of the employee's death—

(i) By a stock bonus, pension, or profit-sharing trust described in Section 17501 which is exempt from tax under Section 17631,

(ii) Under an annuity contract under a plan which meets the requirements of paragraphs (c), (d), (e), and (f) of Section 17501, or

(iii) Under an annuity contract purchased by an employer which is an organization referred to in Section 23701d of this code but only with respect to that portion of such total distributions payable which bears the same ratio to the amount of such total distributions payable which is (without regard to this section) includable in gross income, as the amounts contributed by the employer for such annuity contract which are excludable from gross income under Section 17512 bear to the total amounts contributed by the employer for such annuity contract.

(3) Subdivision (a) shall not apply to amounts received by a surviving annuitant under a joint and survivor's annuity contract after the first day of the first period for which an amount was received as an annuity by the employee (or would have been received if the employee had lived)

(4) In the case of any amount to which Section 17101 to 17112, inclusive (relating to annuities, etc.), apply, the amount which is excludable under subdivision (a) (as modified by this subdivision) shall be determined by reference to the value of such amount as of the day on which the employee died. Any amount so excludable under subdivision (a) shall, for purposes of Sections 17101 to 17112, inclusive, be treated as additional consideration paid by the employee.

SEC. 131.5. Section 17155 is added to said code, to read:

17155. Gross income does not include any reimbursement made to a claimant under Chapter 25 of this part.

SEC. 132. Section 17181 of the said code is amended to read:

17181. (a) In the case of an individual, the exemptions provided by this section shall be allowed as deductions in computing taxable income.

(b) In the case of a single individual a personal exemption of one thousand ($1,000), or, in the case of a head of a household or a married individual, a personal exemption of two thousand dollars ($2,000). A husband and wife shall receive

but one personal exemption of two thousand dollars ($2,000). If the husband and wife make separate returns, the personal exemption may be taken by either or divided between them.

(c) (1) An additional exemption of six hundred dollars ($600) for the taxpayer if he is blind at the close of his taxable year.

(2) An additional exemption of six hundred dollars ($600) for the spouse of the taxpayer if a separate return is made by the taxpayer, and if the spouse is blind and, for the calendar year in which the taxable year of the taxpayer begins, has no gross income and is not the dependent of another taxpayer.

(3) For the purposes of this section an individual is blind only if either: his central visual acuity does not exceed 20/200 in the better eye with correcting lenses, or his visual acuity is greater than 20/200 but is accompanied by a limitation in the fields of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees.

(d) An exemption of six hundred dollars ($600) for each dependent (as defined in Section 17182).

SEC. 133. Section 17181.5 is added to said code, to read:

17181.5 (a) A nonresident or an individual who either becomes or ceases to be a resident of this state during the taxable year shall apportion the deductions provided for by this article, and the standard deduction allowed by Section 17171, in the proportion to which the adjusted gross income from California bears to adjusted gross income from all sources. The allowance, after the apportionment required by this section, shall in no case be less than ~~one thousand dollars ($1,000)~~ *five hundred dollars ($500)*.

(b) An individual subject to the provisions of this section shall be permitted to apportion the minimum standard deduction provided for by Section 17171, regardless of the amount of his adjusted gross income, but shall not be permitted to determine his tax under the tax table prescribed by Section 17048.

SEC. 134. Section 17182 of said code is amended to read:

17182. For the purposes of this part, the term "dependents" means any of the following individuals over half of whose support, for the calendar year in which the taxable year of the taxpayer begins, was received from the taxpayer (or is treated under Section 17184 as received from the taxpayer):

(a) A son or daughter of the taxpayer, or a descendant of either;

(b) A stepson or stepdaughter of the taxpayer;

(c) A brother, sister, stepbrother, or stepsister of the taxpayer;

(d) The father or mother of the taxpayer or an ancestor of either;

(e) A stepfather or stepmother of the taxpayer;

(f) A son or daughter of a brother or sister of the taxpayer;

(g) A brother or sister of the father or mother of the taxpayer;

(h) A son-in-law, daughter-in-law, father-in-law, mother-in-law, brother-in-law, or sister-in-law of the taxpayer,

(i) An individual (other than an individual who at any time during the taxable year was the spouse, determined without regard to Section 17186, of the taxpayer) who, for the taxable year of the taxpayer, has as his principal place of abode the home of the taxpayer and is a member of the taxpayer's household, or

(j) An individual who—

(i) Is a descendant of a brother or sister of the father or mother of the taxpayer,

(ii) For the taxable year of the taxpayer receives institutional care required by reason of a physical or mental disability, and

(iii) Before receiving such institutional care, was a member of the same household as the taxpayer.

SEC. 135. Section 17183 of said code is amended to read:

17183. For purposes of Section 17182—

(a) The terms "brother" and "sister" include a brother or sister by the halfblood.

(b) In determining whether any of the relationships specified in Section 17182 or subsection (a) of this section exists, a legally adopted child of an individual (and a child who is a member of an individual's household, if placed with such individual by an authorized placement agency for legal adoption by such individual) shall be treated as a child of such individual by blood.

(c) The term "dependent" does not include any individual who is not a citizen of the United States unless such individual is a resident of the United States, of a country contiguous to the United States, of the Canal Zone, or of the Republic of Panama. The preceding sentence shall not exclude from the definition of "dependent" any child of the taxpayer—

(i) Born to him, or legally adopted by him, in the Philippine Islands before January 1, 1956, if the child is a resident of the Republic of the Philippines, and if the taxpayer was a member of the armed forces of the United States at the time the child was born to him or legally adopted by him, or

(ii) Legally adopted by him, if, for the taxable year of the taxpayer, the child has as his principal place of abode the home of the taxpayer and is a member of the taxpayer's household, and if the taxpayer is a citizen of the United States.

(d) A payment to a wife which is includable in the gross income of the wife under Section 17081 or 17819 shall not be treated as a payment by her husband for the support of any dependent.

(e) If the taxpayer would not occupy the status of head of a household except by reason of there being one or more dependents for whom he would be entitled to claim a deduction under Section 17181, the deduction shall be disallowed with respect to one of the dependents.

(f) An individual is not a member of the taxpayer's household if at any time during the taxable year of the taxpayer the relationship between such individual and the taxpayer is in violation of local law.

SEC. 136. Section 17202 of the said code is amended to read:

17202. (a) There shall be allowed as a deduction all the ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business, including—

(1) A reasonable allowance for salaries or other compensation for personal services actually rendered;

(2) Traveling expenses (including the entire amount expended for meals and lodging) while away from home in the pursuit of a trade or business; and

(3) Rentals or other payments required to be made as a condition to the continued use or possession, for purposes of the trade or business, of property to which the taxpayer has not taken or is not taking title or in which he has no equity.

For purposes of the preceding sentence, the place of residence of a Member of Congress (including any delegate and resident commissioner) within the state, congressional district, territory, or possession which he represents in Congress shall be considered his home, but amounts expended by such members within each taxable year for living expenses shall not be deductible for income tax purposes in excess of three thousand dollars ($3,000).

(b) No deduction shall be allowed under subdivision (a) for any contribution or gift which would be allowable as a deduction under Sections 17214 to 17216.5, inclusive, were it not for the percentage limitations, the dollar limitations, or the requirements as to the time of payment, set forth in such sections.

(c) No deduction shall be allowed under subdivision (a) for any expenses paid or incurred if the payment thereof is made, directly or indirectly, to an official or employee of a foreign country, and if the making of the payment would be unlawful under the laws of the United States if such laws were applicable to such payment and to such official or employee

(d) For special rule relating to expenses in connection with subdividing real property for sale, see Sections 18197 and 18198.

SEC 136 5. Section 17204 of said code is amended to read:

17204 (a) Except as otherwise provided in this section and Section 17205, the following taxes shall be allowed as a deduction for the taxable year within which paid or accrued:

(1) State and local, and foreign, real property taxes;

(2) State and local personal property taxes;

(3) State and local general sales taxes;

(4) State and local taxes on the sale of gasoline, diesel fuel, and other motor fuels; and

In addition, there shall be allowed as a deduction state and local, and foreign, taxes not described in the preceding sentence which are paid or accrued within the taxable year in carrying on a trade or business or an activity described in Section 17252 (relating to expenses for production of income).

(b) For purposes of this section and Section 17205—

(1) The term "personal property tax" means an ad valorem tax which is imposed on an annual basis in respect of personal property, and for the purpose of allowing a deduction under this part, includes, but is not limited to, fees imposed as an excise tax under Section 10751 of the Revenue and Taxation Code.

(2) (A) The term "general sales tax" means a tax imposed at one rate in respect of the sale at retail of a broad range of classes of items.

(B) In the case of items of food, clothing, medical supplies, and motor vehicles—

(i) The fact that the tax does not apply in respect of some or all of such items shall not be taken into account in determining whether the tax applies in respect of a broad range of classes of items, and

(ii) The fact that the rate of tax applicable in respect of some or all of such items is lower than the general rate of tax shall not be taken into account in determining whether the tax is imposed at one rate.

(C) Except in the case of a lower rate of tax applicable in respect of an item described in subparagraph (B), no deduction shall be allowed under this section for any general sales tax imposed in respect of an item at a rate other than the general rate of tax.

(D) A compensating use tax in respect of an item shall be treated as a general sales tax. For purposes of the preceding sentence, the term "compensating use tax" means, in respect of any item, a tax which—

(i) Is imposed on the use, storage, or consumption of such item, and

(ii) Is complementary to a general sales tax, but only if a deduction is allowable under subsection (a)(3) in respect of items sold at retail in the taxing jurisdiction which are similar to such item.

(3) A state or local tax includes only a tax imposed by a state, a possession of the United States, or a political subdivision of any of the foregoing, or by the District of Columbia.

(4) A foreign tax includes only a tax imposed by the authority of a foreign country.

(5) If the amount of any general sales tax or of any tax on the sale of gasoline, diesel fuel, or other motor fuel is separately stated, then, to the extent that the amount so stated is paid by the consumer (otherwise than in connection with the consumer's trade or business) to his seller, such amount shall be treated as a tax imposed on, and paid by, such consumer.

(6) The deduction for real property taxes shall be allowed without reduction for any reimbursement provided for by Chapter 25.

(c) No deduction shall be allowed for the following taxes:

(1) Taxes paid or accrued to the state under this part;

(2) Taxes on or according to or measured by income or profits paid or accrued within the taxable year imposed by the authority of:

(A) The government of the United States or any foreign country;

(B) Any state, territory, county, city and county, school district, municipality, or other taxing subdivision of any state or territory;

(C) Taxes imposed by authority of the government of the United States includes—

(i) The tax imposed by Section 3101 of the Internal Revenue Code of 1954 (relating to the tax on employee under the Federal Insurance Contributions Act);

(ii) The taxes imposed by Sections 3201 and 3211 of the Internal Revenue Code of 1954 (relating to the taxes on railroad employees and railroad employee representatives); and

(iii) The tax withheld on wages under Section 3402 of the Internal Revenue Code of 1954

(3) Federal war profits and excess profits taxes

(4) Estate, inheritance, legacy, succession, and gift taxes;

(5) Taxes computed as an addition to, or as a percentage of, taxes which are not deductible under this section;

(6) Taxes assessed against local benefits of a kind tending to increase the value of the property assessed, but this does not exclude the allowance as a deduction of so much of the taxes assessed against local benefits as is properly allocable to maintenance or interest charges.

(7) Taxes on real property, to the extent that Section 17205 requires such taxes to be treated as imposed on another taxpayer

SEC 137. Section 17204.7 is added to said code, to read:

17204.7. The tax deducted and withheld under Sections 18805 and 18806 shall not be allowed as a deduction either to the employer or to the recipient of the income in computing taxable income under this part.

SEC 138. Section 17214 of said code is amended to read:

17214 There shall be allowed as a deduction any charitable contribution (as defined in Section 17216) payment of which is made within the taxable year A charitable contribution shall be allowable as a deduction only if verified under regulations prescribed by the Franchise Tax Board

SEC. 139. Section 17215 of said code is amended to read:

17215 In the case of an individual the deduction provided in Section 17214 shall be limited as provided in subdivisions (a), (b), (c), and (d).

(a) Any charitable contribution to—

(1) A church or a convention or association of churches;

(2) An educational organization referred to in Section 23736(b) of this code;

(3) A hospital referred to in Section 23736(e) or to a medical research organization (referred to in Section 23736(e)) directly engaged in the continuous active conduct of medical research in conjunction with a hospital, if during the calendar year in which the contribution is made such organization is committed to spend such contributions for such research before January 1 of the fifth calendar year which begins after the date such contribution is made;

(4) An organization referred to in Section 23736(c) organized and operated exclusively to receive, hold, invest, and administer property and to make expenditures to or for the benefit of a college or university which is an organization referred to in paragraph (2) and which is an agency or instrumentality of a state or political subdivision thereof, or which is owned or operated by a state or political subdivision thereof or by an agency or instrumentality of one or more states or political subdivisions,

(5) A governmental unit referred to in Section 17216(a), or

(6) An organization referred to in Section 17216(b) which normally receives a substantial part of its support (exclusive of income received in the exercise or performance by such organization of its charitable, educational, or other purpose or function constituting the basis for its exemption under Section 23701) from a governmental unit referred to in Section 17216(a) or from direct or indirect contributions from the general public, shall be allowed to the extent that the aggregate of such contributions does not exceed 10 percent of the taxpayer's adjusted gross income,

(b) The total deductions under Section 17214 for any taxable year shall not exceed 20 percent of the taxpayer's adjusted gross income For purposes of this subdivision, the deduction under Section 17214 shall be computed without regard to any deduction allowed under subdivision (a) but shall take into account any charitable contributions described in subdivision (a) which are in excess of the amount allowable as a deduction under subdivision (a).

(c) The limitation in subdivision (b) shall not apply if, in the taxable year and in 8 of the 10 preceding taxable years, the amount of the charitable contributions, plus the amount of income tax paid during such year in respect of such year or preceding taxable years, exceeds 90 percent of the taxpayer's taxable income for such year, computed without regard to—

(1) This section, and

(2) Section 17181 (allowance of deductions for personal exemptions)

In lieu of the amount of income tax paid during any such year, there may be substituted for that year the amount of income tax paid in respect of such year, provided that any amount so included in the year in respect of which payment was made shall not be included in any other year.

(d) No deduction shall be allowed under Section 17214 for the value of any interest in property transferred after December 31, 1964, to a trust if—

(1) The grantor has a reversionary interest in the corpus or income of that portion of the trust with respect to which a deduction would (but for this subdivision) be allowable under Section 17214; and

(2) At the time of the transfer the value of such reversionary interest exceeds 5 percent of the value of the property constituting such portion of the trust.

For purposes of this subdivision, a power exercisable by the grantor or a nonadverse party (within the meaning of Section 17782(b)), or both, to revest in the grantor property or income therefrom shall be treated as a reversionary interest.

SEC. 140. Section 17216.1 of said code is amended and renumbered to read:

17215.1. If, in connection with any charitable contribution, a liability is assumed by the recipient or by any other person, or if a charitable contribution is of property which is subject to a liability, then, to the extent necessary to avoid the duplication of amounts, the amount taken into account for purposes of this section and Sections 17214 through 17216 as the amount of the charitable contribution—

(A) Shall be reduced for interest (i) which has been paid (or is to be paid) by the taxpayer, (ii) which is attributable to the liability, and (iii) which is attributable to any period after the making of the contribution, and

(B) In the case of a bond, shall be further reduced for interest (i) which has been paid (or is to be paid) by the taxpayer on indebtedness incurred or continued to purchase or carry such bond, and (ii) which is attributable to any period before the making of the contribution.

The reduction pursuant to subparagraph (B) shall not exceed the interest (including interest equivalent) on the bond which is attributable to any period before the making of the contribution and which is not (under the taxpayer's method of accounting) includible in the gross income of the taxpayer for any taxable year For purposes of this section, the term "bond" means any bond, debenture, note, or certificate or other evidence of indebtedness.

SEC 141. Section 17215.2 is added to said code, to read:

17215.2. If the amount of charitable contributions described in Section 17215(a), payment of which is made within a taxable year (hereinafter in this subdivision referred to as the "contribution year") beginning after December 31, 1964, exceeds 30 percent of the taxpayer's adjusted gross income for such year, such excess shall be treated as a charitable contribution described in Section 17215(a) paid in each of the five succeeding taxable years in order of time, but with respect to any succeeding taxable year, only to the extent of the lesser of the two following amounts:

(a) The amount by which 30 percent of the taxpayer's adjusted gross income for each succeeding taxable year exceeds the sum of the charitable contributions described in Section 17215(a), payment of which is made by the taxpayer within such succeeding taxable year (determined without regard to this section), and the charitable contributions described in Section 17215(a), payment of which was made in taxable years (beginning after December 31, 1964) before the contribution year which are treated under this section as having been paid in such succeeding taxable year; or

(b) In the case of the first succeeding taxable year, the amount of such excess, and in the case of the second, third, fourth, or fifth succeeding taxable year, the portion of such excess not treated under this paragraph as a charitable contribution described in Section 17215(a) paid in any taxable year intervening between the contribution year and such succeeding taxable year.

SEC. 142. Section 17216 of said code is amended to read:

17216 For purposes of Section 17214, the term "charitable contribution" means a contribution or gift to or for the use of—

(a) A state, a territory, a possession of the United States, or any political subdivision of any of the foregoing, or the United States or the District of Columbia, but only if the contribution or gift is made for exclusively public purposes.

(b) A corporation, trust, or community chest, fund, or foundation—

(1) Created or organized in the United States or in any possession thereof, or under the law of the United States, any state or territory, the District of Columbia, or any possession of the United States;

(2) Organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes or for the prevention of cruelty to children or animals;

(3) No part of the net earnings of which inures to the benefit of any private shareholder or individual; and

(4) No substantial part of the activities of which is carrying on propaganda, or otherwise attempting, to influence legislation.

(c) A post or organization of war veterans, or any auxiliary unit or society of, or trust or foundation for, any such post or organization—

(1) Organized in the United States or any of its possessions, and

(2) No part of the net earnings of which inures to the benefit of any private shareholder or individual.

(d) A domestic fraternal society, order, or association, operating under the lodge system, but only if such contribution or gift is to be used exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals.

(e) A cemetery company owned and operated exclusively for the benefit of its members, or any corporation chartered solely for burial purposes as a cemetery corporation and not permitted by its charter to engage in any business not necessarily incident to that purpose, if such company or corporation is not operated for profit and no part of the net earnings of such company or corporation inures to the benefit of any private shareholder or individual.

(f) For purposes of Sections 17214 to 17216, inclusive, the term "charitable contribution" also means an amount treated under Section 17216.1 as paid for the use of an organization described in subdivision (b), (c), or (d).

SEC 143. Section 17216 1 is added to said code, to read:

17216 1. (a) Subject to the limitations provided by paragraph (b), amounts paid by the taxpayer to maintain an individual (other than a dependent, as defined in Sections 17181 to 17185, inclusive, or a relative of the taxpayer) as a member of his household during the period that such individual is—

(1) A member of the taxpayer's household under a written agreement between the taxpayer and an organization described in subdivisions (b), (c), or (d) of Section 17216 to implement a program of the organization to provide educational opportunities for pupils or students in private homes, and

(2) A full-time pupil or student in the 12th or any lower grade at an educational institution (as defined in Section 17150(c)) located in the United States, shall be treated as amounts paid for the use of the organization

(b) (1) Subdivision (a) shall apply to amounts paid within the taxable year only to the extent that such amounts do not exceed $50 multiplied by the number of full calendar months during the taxable year which fall within the period described in subdivision (a) For purposes of the preceding sentence, if 15 or more days of a calendar month fall within such period such month shall be considered as a full calendar month

(2) Subdivision (a) shall not apply to any amount paid by the taxpayer within the taxable year if the taxpayer receives any money or other property as compensation or reimbursement for maintaining the individual in his household during the period described in subdivision (a).

(c) For purposes of subdivision (a), the term "relative of the taxpayer" means an individual who, with respect to the taxpayer, bears any of the relationships described in paragraphs (a) through (h) of Section 17182.

(d) No deduction shall be allowed under Section 17214 for any amount paid by a taxpayer to maintain an individual as a member of his household under a program described in subdivision (a) (1) except as provided in this section.

SEC 144. Section 17216 2 is amended to read·

17216 2. The amount of any charitable contribution taken into account under Sections 17214 to 17216 5 shall be reduced by the amount which would have been treated as gain to which

Section 18211(a) or 18212 applies if the property contributed had been sold at its fair market value (determined at the time of such contribution).

SEC. 145. Section 17216.3 is added to said code, to read:

17216.3. For purposes of Sections 17214 to 17216.5, payment of a charitable contribution which consists of a future interest in tangible personal property shall be treated as made only when all intervening interests in, and rights to, the actual possession or enjoyment of, the property have expired or are held by persons other than the taxpayer or those standing in a relationship to the taxpayer described in Section 17288. For purposes of the preceding sentence, a fixture which is intended to be ~~served~~ *severed* from the real property shall be treated as tangible personal property.

SEC. 146. Section 17216.4 is added to said code, to read:

17216.4. (a) If the taxable year begins after December 31, 1964—

(1) Section 17215(c) shall apply only if the taxpayer so elects (at such time and in such manner as the Franchise Tax Board by regulations prescribes), and

(2) For purposes of Section 17215(c), the amount of the charitable contributions for the taxable year (and for all prior taxable years beginning after December 31, 1964) shall be determined without the application of Section 17215.2 and solely by reference to charitable contributions described in subdivision (b).

If the taxpayer elects to have Section 17215(c) apply for the taxable year, then for such taxable year Section 17214 shall apply only with respect to charitable contributions described in subdivision (b), and no amount of charitable contributions made in the taxable year or any prior taxable year may be treated under Section 17215.2 as having been made in the taxable year or in any succeeding taxable year.

(b) The charitable contributions referred to in subdivision (a) are—

(1) Any charitable contribution described in Section 17215(a);

(2) Any charitable contribution, not described in Section 17215(a), to an organization described in Section 17216(b) substantially more than half of the assets of which is devoted directly to, and substantially all of the income of which is expended directly for, the active conduct of the activities constituting the purpose or function for which it is organized and operated;

(3) Any charitable contribution, not described in Section 17215(a), to an organization described in Section 17216(b) which meets the requirements of paragraph (c) with respect to such charitable contributions; and

(4) Any charitable contribution payment of which is made after December 31, 1964.

(c) An organization shall be an organization referred to in subdivision (b)(3), with respect to any charitable contribution, only if—

(1) not later than the close of the third year after the organization's taxable year in which the contribution is received (or before such later time as the Franchise Tax Board may allow upon good cause shown by such organization), such organization expends an amount equal to at least 50 percent of such contribution for—

(A) The active conduct of the activities constituting the purpose or function for which it is organized and operated,

(B) Assets which are directly devoted to such active conduct,

(C) Contributions to organizations which are described in Section 17215(a) or in subdivision (b)(2) of this subdivision, or

(D) Any combination of the foregoing; and

(2) for the period beginning with the taxable year in which such contribution is received and ending with the taxable year in which subdivision (c)(1) is satisfied with respect to such contribution, such organization expends all of its net income (determined without regard to capital gains and losses) for the purposes described in clauses (A), (B), (C) and (D) of subdivision (c)(1).

If the taxpayer so elects (at such time and in such manner as the Franchise Tax Board by regulations prescribes) with respect to contributions made by him to any organization then, in applying subdivision (c)(2) with respect to contributions made by him to such organization during his taxable year for which such election is made and during all his subsequent taxable years, amounts expended by the organization after the close of any of its taxable years and on or before the 15th day of the third month following the close of such taxable year shall be treated as expended during such taxable year.

(d) An organization shall be an organization referred to in subdivisions (b)(2) and (b)(3) only if at no time during the period consisting of the organization's taxable year in which the contribution is received, its three preceding taxable years, and its three succeeding taxable years, such organization—

(1) lends any part of its income or corpus to,

(2) pays compensation (other than reasonable compensation for personal services actually rendered) to,

(3) makes any of its services available on a preferential basis to,

(4) purchases more than a minimal amount of securities or other property from, or

(5) sells more than a minimal amount of securities or other property to,

the donor of such contribution, any member of his family (as defined in Section 17289(c)), any employee of the donor, any officer or employee of a corporation in which he owns

(directly or indirectly) 50 percent or more in value of the outstanding stock, or any partner or employee of a partnership in which he owns (directly or indirectly) 50 percent or more of the capital interest or profits interest. This subdivision shall apply to transactions occurring after December 31, 1964.

SEC. 147. Section 17216.5 is added to said code, to read:

17216.5. No gift or bequest for religious, charitable, scientific, literary, or educational purposes (including the encouragement of art and the prevention of cruelty to children or animals), otherwise allowable as a deduction under Sections 17214, 17216 and 17734 shall be allowed as a deduction if made to an organization described in Section 23701d of this code which, in the taxable year of the organization in which the gift or bequest is made, is not exempt under Section 23701 by reason of Sections 23736.2 and 23736.3. With respect to any taxable year of the organization for which the organization is not exempt pursuant to Section 23736.2 by reason of having engaged in a prohibited transaction with the purpose of diverting the corpus or income of such organization from its exempt purposes and such transaction involved a substantial part of such corpus or income, and which taxable year is the same, or prior to, the taxable year of the organization in which such transaction occurred, such deduction shall be disallowed the donor only if such donor or any member of his family (as defined in Section 17289(d) was a party to such prohibited transaction.

SEC. 148. Section 17255 of said code is amended to read:

17255. Except as provided in subdivision (c) the deduction under Sections 17253 and 17254 shall not exceed five thousand dollars ($5,000), multiplied by the number of exemptions allowed for the taxable year as a deduction under Section 17181 (other than the exemption allowed by reason of subdivision (c), relating to additional exemption for blindness), provided that a husband and wife or head of a household receiving one personal exemption of two thousand dollars ($2,000) shall, for the purposes of this section, be considered as having received two exemptions; except that the maximum deduction under Sections 17253 to 17258, inclusive, shall be—

(a) Ten thousand dollars ($10,000), if the taxpayer is single and not the head of a household (as defined in Section 17042) or is married but files a separate return; or

(b) Twenty thousand dollars ($20,000) if the taxpayer files a joint return with his spouse under Section 18402, or is the head of a household (as defined in Section 17042).

(c) (1) Subject to the provisions of paragraph (2), the deduction under this section shall not exceed—

(A) Twenty thousand dollars ($20,000), if the taxpayer has attained the age of 65 before the close of the taxable year and is disabled, or if his spouse has attained the age of 65 before the close of the taxable year and is disabled and if his spouse does not make a separate return for the taxable year, or

(B) Forty thousand dollars ($40,000), if both the taxpayer and his spouse have attained the age 65 before the close of the taxable year and are disabled and if the taxpayer files a joint return with his spouse under Section 18402.

(2) For purposes of paragraph (1)—

(A) Amounts paid by the taxpayer during the taxable year for medical care, other than amounts paid for—

(i) His medical care, if he has attained the age of 65 before the close of the taxable year and is disabled, or

(ii) The medical care of his spouse, if his spouse has attained the age of 65 before the close of the taxable year and is disabled, shall be taken into account only to the extent that such amounts do not exceed the maximum limitation provided in subdivisions (a) and (b) which would (but for the provisions of this subdivision) apply to the taxpayer for the taxable year;

(B) If the taxpayer has attained the age of 65 before the close of the taxable year and is disabled, amounts paid by him during the taxable year for his medical care shall be taken into account only to the extent that such amounts do not exceed twenty thousand dollars ($20,000); and

(C) If the spouse of the taxpayer has attained the age of 65 before the close of the taxable year and is disabled, amounts paid by the taxpayer during the taxable year for the medical care of his spouse shall be taken into account only to the extent that such amounts do not exceed twenty thousand dollars ($20,000).

(3) For purposes of paragraph (1), an individual shall be considered to be disabled if he is unable to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or to be of long-continued and indefinite duration An individual shall not be considered to be disabled unless he furnishes proof of the existence thereof in such form and manner as the Franchise Tax Board may require

(4) For purposes of paragraph (1), the determination as to whether the taxpayer or his spouse is disabled shall be made as of the close of the taxable year of the taxpayer, except that if his spouse dies during such taxable year such determination shall be made with respect to his spouse as of the time of such death

SEC 149. Section 17260 of said code is amended to read:

17260. (a) The maximum amount allowable for both medical expenses and adoption expenses in the case of a husband and wife who file a joint return and claim deductions for both medical expenses and adoption expenses, or the head of a household who claims deductions for both medical expenses and adoption expenses is that provided in Section 17255, except that subdivision (c) of Section 17255 shall not apply

(b) The maximum amount allowable for both medical expenses and adoption expenses in the case of a taxpayer who files a separate return and claims deductions for both medical

expenses and adoption expenses is that provided in Section 17255, except that subdivision (c) of Section 17255 shall not apply

SEC 150. Section 17501 of said code is amended to read:

17501. A trust created or organized in the United States and forming part of a stock bonus, pension, or profit-sharing plan of an employer for the exclusive benefit of his employees or their beneficiaries shall constitute a qualified trust under this article—

(a) If contributions are made to the trust by such employer, or employees, or both, or by another employer who is entitled to deduct his contributions under Section 17516(b) (relating to deduction for contributions to profit-sharing and stock bonus plan), for the purpose of distributing to such employees or their beneficiaries the corpus and income of the fund accumulated by the trust in accordance with such plan;

(b) If under the trust instrument it is impossible, at any time prior to the satisfaction of all liabilities with respect to employees and their beneficiaries under the trust, for any part of the corpus or income to be (within the taxable year or thereafter) used for, or diverted to, purposes other than for the exclusive benefit of his employees or their beneficiaries;

(c) If the trust, or two or more trusts, or the trust or trusts and annuity plan or plans are designated by the employer as constituting parts of a plan intended to qualify under this section which benefits either—

(1) Seventy percent or more of all the employees, or 80 percent or more of all the employees who are eligible to benefit under the plan if 70 percent or more of all the employees are eligible to benefit under the plan, excluding in each case employees who have been employed not more than a minimum period prescribed by the plan, not exceeding five years, employees whose customary employment is for not more than 20 hours in any one week, and employees whose customary employment is for not more than five months in any calendar year, or

(2) Such employees as qualify under a classification set up by the employer and found by the Franchise Tax Board not to be discriminatory in favor of employees who are officers, shareholders, persons whose principal duties consist in supervising the work of other employees, or highly compensated employees; and

(d) If the contributions or benefits provided under the plan do not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist in supervising the work of other employees, or highly compensated employees.

(e) A classification shall not be considered discriminatory within the meaning of subsection (c)(2) or (d) merely because it excludes employees the whole of whose remuneration constitutes "wages" under Section 3121(a)(1) of the Internal Revenue Code (relating to the Federal Insurance Contribu-

tions Act) or merely because it is limited to salaried or clerical employees. Neither shall a plan be considered discriminatory within the meaning of such provisions merely because the contributions or benefits of or on behalf of the employees under the plan bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of such employees, or merely because the contributions or benefits based on that part of an employee's remuneration which is excluded from "wages" by Section 3121(a)(1) of the Internal Revenue Code, or of the California Unemployment Insurance Act differ from the contributions or benefits based on employee's remuneration not so excluded, or differ because of any retirement benefits created under state or federal law.

(f) A plan shall be considered as meeting the requirements of subsection (c) during the whole of any taxable year of the plan if on one day in each quarter it satisfied such requirements

(g) A trust or plan which meets the requirements of Public Law 87-792, 76 U S Stats 809, approved October 10, 1962 (The Self-Employed Individuals Tax Retirement Bill of 1962), but no deduction shall be allowed for contributions made to such plan or trust by the employer, or employee, or both.

SEC. 151. Section 17503 of said code is amended to read:

17503 (a) Except as provided in subdivision (b), the amount actually distributed or made available to any distributee by any employees' trust described in Section 17501 which is exempt from tax under Section 17631 shall be taxable to him, in the year in which so distributed or made available, under Sections 17101 to 17112, inclusive, (relating to annuities) The amount actually distributed or made available to any distributee shall not include net unrealized appreciation in securities of the employer corporation attributable to the amount contributed by the employee. Such net unrealized appreciation and the resulting adjustments to basis of such securities shall be determined in accordance with regulations prescribed by the Franchise Tax Board.

(b) In the case of an employees' trust described in Section 17501, which is exempt from tax under Section 17631, if the total distributions payable with respect to any employee are paid to the distributee within one taxable year of the distributee on account of the employee's death or other separation from the service, or on account of the death of the employee after his separation from the service, the amount of such distribution, to the extent exceeding the amounts contributed by the employee (determined by applying Section 17106), which employee contributions shall be reduced by any amounts theretofore distributed to him which were not includable in gross income, shall be considered a gain from the sale or exchange of a capital asset held for more than six months.

Where such total distributions include securities of the employer corporation, there shall be excluded from such excess the net unrealized appreciation attributable to that part of the

total distributions which consists of the securities of the employer corporation so distributed. The amount of such net unrealized appreciation and the resulting adjustments to basis of the securities of the employer corporation so distributed shall be determined in accordance with regulations prescribed by the Franchise Tax Board.

(c) For purposes of this section—

(1) The term "securities" means only shares of stock and bonds or debentures issued by a corporation with interest coupons or in registered form.

(2) The term "securities of the employer corporation" includes securities of a parent or subsidiary corporation (as defined in subdivisions (e) and (f) of Section 17535) of the employer corporation

(3) The term "total distributions payable" means the balance to the credit of an employee which becomes payable to a distributee on account of the employee's death or other separation from the service, or on account of his death after separation from the service.

SEC. 152. Section 17504 of said code is amended to read:

17504. Contributions to an employees' trust made by an employer during a taxable year of the employer which ends within or with a taxable year of the trust for which the trust is not exempt from tax under Section 17631 shall be included in the gross income of an employee for the taxable year in which the contribution is made to the trust in the case of an employee whose beneficial interest in such contribution is nonforfeitable at the time the contribution is made The amount actually distributed or made available to any distributee by any such trust shall be taxable to him, in the year in which so distributed or made available, under Sections 17101 to 17112, inclusive (relating to annuities).

SEC 153 Section 17506 of said code is amended to read:

17506. Notwithstanding Section 17504 or any other provision of this part, a contribution to a trust by an employer shall not be included in the gross income of the employee in the year in which the contribution is made if—

(a) Such contribution is to be applied by the trustee for the purchase of annuity contracts for the benefit of such employee;

(b) Such contribution is made to the trustee pursuant to a written agreement entered into prior to September 1, 1943, between the employer and the trustee, or between the employer and the employee; and

(c) Under the terms of the trust agreement the employee is not entitled during his lifetime, except with the consent of the trustee, to any payments under annuity contracts purchased by the trustee other than annuity payments

The employee shall include in his gross income the amounts received under such contracts for the year received as provided in Sections 17101 to 17112, inclusive (relating to annuities). This section shall have no application with respect to amounts contributed to a trust after June 1, 1951, if the trust on such

date was exempt under Sections 18156 to 18167, inclusive, of the Personal Income Tax Law of 1954 For purposes of this section, amounts paid by an employer for the purchase of annuity contracts which are transferred to the trustee shall be deemed to be contributions made to a trust or trustee and contributions applied by the trustee for the purchase of annuity contracts; the term "annuity contracts purchased by the trustee" shall include annuity contracts so purchased by the employer and transferred to the trustee; and the term "employee" shall include only a person who was in the employ of the employer, and was covered by the agreement referred to in subsection (b) prior to September 1, 1943.

SEC 154 Section 17511 of said code is amended to read·

17511 Except as provided in subdivision (a), if an annuity contract is purchased by an employer for an employee under a plan which meets the requirements of Section 17515 (whether or not the employer deducts the amounts paid for the contract under such section), the employee shall include in his gross income the amounts received under such contract for the year received as provided in Sections 17101 to 17112, inclusive (relating to annuities).

(a) If—

(1) An annuity contract is purchased by an employer for an employee under a plan which meets the requirements of Section 17501(c), (d), (e), and (f);

(2) Such plan requires that refunds of contributions with respect to annuity contracts purchased under such plan be used to reduce subsequent premiums on the contracts under the plan; and

(3) The total amounts payable by reason of an employee's death or other separation from the service, or by reason of the death of an employee after the employee's separation from the service, are paid to the payee within one taxable year of the payee,

then the amount of such payments, to the extent exceeding the amount contributed by the employee (determined by applying Section 17106), which employee contributions shall be reduced by any amounts theretofore paid to him which were not includable in gross income, shall be considered a gain from the sale or exchange of a capital asset held for more than six months

(b) For purposes of subdivision (a), the term "total amounts" means the balance to the credit of an employee which becomes payable to the payee by reason of the employee's death or other separation from the service, or by reason of his death after separation from the service.

SEC 155. Section 17512 of said code is amended to read:

17512 (a) (1) If an annuity contract is purchased—

(A) (i) For an employee by an employer described in Section 23701d of this code which is exempt from tax under Section 23701 of this code, or

(ii) For an employee (other than an employee described in clause (A)(i), who performs services for an educational institution (as defined in Section 17150(c)), by an employer which is a state, a political subdivision of a state, or an agency or instrumentality of any one or more of the foregoing;

(B) Such annuity contract is not subject to Section 17511, and

(C) The employee's rights under the contract are nonforfeitable, except for failure to pay future premiums,

then amounts contributed by such employer for such annuity contract on or after such rights become nonforfeitable shall be excluded from the gross income of the employee for the taxable year to the extent that the aggregate of such amounts does not exceed the exclusion allowance for such taxable year The employee shall include in his gross income the amounts received under such contract for the year received as provided in Sections 17101 to 17112, inclusive (relating to annuities)

(2) For purposes of this section, the exclusion allowance for any employee for the taxable year is an amount equal to the excess, if any, of—

(A) The amount determined by multiplying (i) 20 percent of his includable compensation, by (ii) the number of years of service, over

(B) The aggregate of the amounts contributed by the employer for annuity contracts and excludable from the gross income of the employee for any prior taxable year.

(3) For purposes of this section, the term "includable compensation" means, in the case of any employee, the amount of compensation which is received from the employer described in subdivision (a)(1)(A), and which is includable in gross income (computed without regard to Section 17139(d)) for the most recent period (ending not later than the close of the taxable year) which under paragraph (4) may be counted as one year of service. Such term does not include any amount contributed by the employer for any annuity contract to which this section applies.

(4) In determining the number of years of service for purposes of this section, there shall be included—

(A) One year for each full year during which the individual was a full-time employee of the organization purchasing the annuity for him, and

(B) A fraction of a year (determined in accordance with regulations prescribed by the Franchise Tax Board) for each full year during which such individual was a part-time employee of such organization and for each part of a year during which such individual was a full-time or part-time employee of such organization.

In no case shall the number of years of service be less than one.

(5) If for any taxable year of the employee this section applies to two or more annuity contracts purchased by the employer, such contracts shall be treated as one contract.

(6) For purposes of this section and Section 17106 (relating to special rules for computing employees' contributions to annuity contracts), if rights of the employee under an annuity contract described in subparagraphs (A) and (B) of paragraph (1) change from forfeitable to nonforfeitable rights, then the amount (determined without regard to this subdivision) includable in gross income by reason of such change shall be treated as an amount contributed by the employer for such annuity contract as of the time such rights become nonforfeitable.

(b) If an annuity contract purchased by an employer for an employee is not subject to Section 17511 and the employee's rights under the contract are nonforfeitable, except for failure to pay future premiums, the amount contributed by the employer for such annuity contract on or after such rights become nonforfeitable shall be included in the gross income of the employee in the year in which the amount is contributed. The employee shall include in his gross income the amounts received under such contract for the year received as provided in Sections 17101 to 17112, inclusive, (relating to annuities)

(c) Notwithstanding the first sentence of subdivision (b), if rights of an employee under an annuity contract purchased by an employer which is exempt from tax under Section 17631 or if subject to tax under this part would be exempt under Section 17631 or by an employer which claims the special deduction allowed by Sections 24404 through 24406 of this code change from forfeitable to nonforfeitable rights, the value of such contract on the date of such change (to the extent attributable to amounts contributed by the employer after December 31, 1960) shall, except as provided in subdivision (a), be included in the gross income of the employee in the year of such change.

SEC. 156. Section 17734 of said code is amended to read:

17734. In the case of an estate or trust (other than a trust meeting the specifications of Article 2) there shall be allowed as a deduction in computing its taxable income (in lieu of the deductions allowed by Sections 17214 and 17303, relating to deduction for charitable, etc., contributions and gifts) any amount of the gross income, without limitation, which pursuant to the terms of the governing instrument is, during the taxable year, paid or permanently set aside for a purpose specified in Sections 17216 and 17303, or is to be used exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals, or for the establishment, acquisition, maintenance or operation of a public cemetery not operated for profit.

For this purpose, to the extent that such amount consists of gain from the sale or exchange of capital assets held for

more than six months, proper adjustment of the deduction otherwise allowable under this section shall be made for any deduction allowable to the estate or trust under Section 18151 (relating to deduction for excess of capital gains over capital losses).

In the case of a trust, the deduction allowed by this section shall be subject to Sections 17811 to 17818, inclusive (relating to unrelated business income and prohibited transaction).

SEC. 157. Section 17783 of said code is amended to read:

17783. (a) The grantor shall be treated as the owner of any portion of a trust in which he has a reversionary interest in either the corpus or the income therefrom if, as of the inception of that portion of the trust, the interest will or may reasonably be expected to take effect in possession or enjoyment within 10 years commencing with the date of the transfer of that portion of the trust.

(b) Subsection (a) shall not apply to the extent that the income of a portion of a trust in which the grantor has a reversionary interest is, under the terms of the trust, irrevocably payable for a period of at least two years (commencing with the date of the transfer) to a designated beneficiary, which beneficiary is of a type described in Section 17215(a)(1), (2), or (3).

(c) The grantor shall not be treated under subsection (a) as the owner of any portion of a trust where his reversionary interest in such portion is not to take effect in possession or enjoyment until the death of the person or persons to whom the income therefrom is payable.

(d) Any postponement of, the date specified for the reacquisition of possession or enjoyment of the reversionary interest shall be treated as a new transfer in trust commencing with the date prescribed by the postponement. However, income for any period shall not be included in the income of the grantor by reason of the preceding sentence if such income would not be so includable in the absence of such postponement.

SEC. 158. Section 17785 of said code is amended to read:

17785. Section 17784 shall not apply to the following powers regardless of by whom held:

(a) A power described in Section 17791 to the extent that the grantor would not be subject to tax under that section.

(b) A power, the exercise of which can only affect the beneficial enjoyment of the income for a period commencing after the expiration of a period such that a grantor would not be treated as the owner under Section 17783 if the power were a reversionary interest; but the grantor may be treated as the owner after the expiration of the period unless the power is relinquished.

(c) A power exercisable only by will, other than a power in the grantor to appoint by will the income of the trust where the income is accumulated for such disposition by the grantor or may be so accumulated in the discretion of the grantor or

a nonadverse party, or both, without the approval or consent of any adverse party.

(d) A power to determine the beneficial enjoyment of the corpus or the income therefrom if the corpus or income is irrevocably payable for a purpose specified in Section 17216 (relating to definition of charitable contributions)

(e) A power to distribute corpus either—

(1) To or for a beneficiary or beneficiaries or to or for a class of beneficiaries (whether or not income beneficiaries) provided that the power is limited by a reasonably definite standard which is set forth in the trust instrument; or

(2) To or for any current income beneficiary, provided that the distribution of corpus must be chargeable against the proportionate share of corpus held in trust for the payment of income to the beneficiary as if the corpus constituted a separate trust.

A power does not fall within the powers described in this subsection if any person has a power to add to the beneficiary or beneficiaries or to a class of beneficiaries designated to receive the income or corpus, except where such action is to provide for afterborn or afteradopted children.

(f) A power to distribute or apply income to or for any current income beneficiary or to accumulate the income for him, provided that any accumulated income must ultimately be payable—

(1) To the beneficiary from whom distribution or application is withheld, to his estate, or to his appointees (or persons named as alternate takers in default of appointment) provided that such beneficiary possesses a power of appointment which does not exclude from the class of possible appointees any person other than the beneficiary, his estate, his creditors, or the creditors of his estate, or

(2) On termination of the trust, or in conjunction with a distribution of corpus which is augmented by such accumulated income, to the current income beneficiaries in shares which have been irrevocably specified in the trust instrument.

Accumulated income shall be considered so payable although it is provided that if any beneficiary does not survive a date of distribution which could reasonably have been expected to occur within the beneficiary's lifetime, the share of the deceased beneficiary is to be paid to his appointees or to one or more designated alternate takers (other than the grantor or the grantor's estate) whose shares have been irrevocably specified. A power does not fall within the powers described in this subsection if any person has a power to add to the beneficiary or beneficiaries or to a class of beneficiaries designated to receive the income or corpus except where such action is to provide for afterborn or afteradopted children.

(g) A power exercisable only during—

(1) The existence of a legal disability of any current income beneficiary; or

(2) The period during which any income beneficiary shall be under the age of 21 years,

to distribute or apply income to or for such beneficiary or to accumulate and add the income to corpus A power does not fall within the powers described in this subsection if any person has a power to add to the beneficiary or beneficiaries or to a class of beneficiaries designated to receive the income or corpus, except where such action is to provide for afterborn or afteradopted children.

(h) A power to allocate receipts and disbursements as between corpus and income, even though expressed in broad language.

SEC 159. Section 17812 of said code is amended to read:

17812. The amount otherwise allowable under Section 17734 as a deduction shall not exceed 20 percent of the taxable income of the trust (computed without the benefit of Section 17734 but with the benefit of Section 17215(a)) if the trust has engaged in a prohibited transaction as defined in Section 17813.

SEC 160. Section 17818 of said code is amended to read:

17818. If the amounts permanently set aside, or to be used exclusively for the charitable and other purposes described in Section 17734 during the taxable year or any prior taxable year and not actually paid out by the end of the taxable year—

(a) Are unreasonable in amount or duration in order to carry out such purposes of the trust;

(b) Are used to a substantial degree for purposes other than those prescribed in Section 17734; or

(c) Are invested in such a manner as to jeopardize the interests of the religious, charitable, scientific, etc., beneficiaries;

the amount otherwise allowable under Section 17734 as a deduction shall be limited to the amount actually paid out during the taxable year and shall not exceed 20 percent of the taxable income of the trust (computed without the benefit of Section 17734 but with the benefit of Section 17215(a)). Paragraph (a) shall not apply to income attributable to property of a decedent dying before January 1, 1951, which is transferred under his will to a trust created by such will In the case of a trust created by the will of a decedent dying on or after January 1, 1951, if income is required to be accumulated pursuant to the mandatory terms of the will creating the trust, paragraph (a) shall apply only to income accumulated during a taxable year of the trust beginning more than 21 years after the date of death of the last life in being designated in the trust instrument

SEC 161 Section 17838 is added to said code, to read:

17838 (a) For purposes of computing the deduction under Section 17836(a), amounts received by a surviving annuitant—

(1) As an annuity under a joint and survivor annuity contract where the decedent annuitant died after December

31, 1964, and after the annuity starting date (as defined in Section 17103(d)); and

(2) During the surviving annuitant's life expectancy period;

shall, to the extent included in gross income under Sections 17101 to 17112, inclusive, be considered as amounts included in gross income under Sections 17831 to 17834, inclusive.

(b) In determining the net value for inheritance tax purposes under Section 17837(b) for purposes of this section, the value for inheritance tax purposes of the items described in subdivision (a) shall be computed—

(1) By determining the excess of the value of the annuity at the date of the death of the deceased annuitant over the total amount excludable from the gross income of the surviving annuitant under Sections 17101 to 17112, inclusive, during the surviving annuitant's life expectancy period, and

(2) By multiplying the figure so obtained by the ratio which the value of the annuity for inheritance tax purposes bears to the value of the annuity at the date of the death of the deceased.

(c) For purposes of this section—

(1) The term "life expectancy period" means the period beginning with the first day of the first period for which an amount is received by the surviving annuitant under the contract and ending with the close of the taxable year with or in which falls the termination of the life expectancy of the surviving annuitant. For purposes of this section, the life expectancy of the surviving annuitant shall be determined, as of the date of the death of the deceased annuitant, with reference to actuarial tables prescribed by the Franchise Tax Board.

(2) The surviving annuitant's expected return under the contract shall be computed, as of the death of the deceased annuitant, with reference to actuarial tables prescribed by the Franchise Tax Board

SEC 162 Section 17852 of said code is amended to read:

17852. In determining his income tax, each partner shall take into account separately his distributive share of the partnership's—

(a) Gains and losses from sales or exchanges of capital assets held for not more than six months;

(b) Gains and losses from sales or exchanges of capital assets held for more than six months;

(c) Gains and losses from sales or exchanges of property described in Section 18181 and 18182 (relating to certain property used in a trade or business and involuntary conversions);

(d) Charitable contributions (as defined in Section 17216);

(e) Political contributions (as defined in Section 17234);

(f) Taxes, described in Section 18006, paid to another state on such income;

(g) Other items of income, gain, loss, deduction, or credit, to the extent provided by regulations prescribed by the Franchise Tax Board; and

(h) Taxable income or loss, exclusive of items requiring separate computation under other subsections of this section.

SEC. 163. Section 18044 of said code is amended to read:

18044. Except as otherwise provided in this article, the basis of property in the hands of a person acquiring the property from a decedent or to whom the property passed from a decedent shall, if not sold, exchanged, or otherwise disposed of before the decedent's death by such person, be the same as it would be in the hands of the decedent or the last preceding owner by whom it was not acquired by bequest, devise, or inheritance, except that if such basis (adjusted for the period before the date it was acquired from a decedent as provided in Sections 18052 and 18053) is greater than the fair market value of the property at the time it was acquired from a decedent, then for the purpose of determining loss the basis shall be such fair market value. If the facts necessary to determine the basis in the hands of the decedent or the last preceding owner are unknown to the heir or legatee, the Franchise Tax Board shall, if possible, obtain such facts from the estate of the decedent or the last preceding owner or any other person cognizant thereof. If the Franchise Tax Board finds it impossible to obtain such facts, the basis in the hands of such decedent or last preceding owner shall be the fair market value of such property as found by the Franchise Tax Board as of the date or approximate date at which, according to the best information that the Franchise Tax Board is able to obtain, such property was acquired by such decedent or last preceding owner.

SEC. 164 Section 18045. of said code is amended to read:

18045. For purposes of Section 18044, the following property shall be considered to have been acquired from or to have passed from the decedent:

(a) Property acquired by bequest, devise, or inheritance, or by the decedent's estate from the decedent;

(b) Property transferred by the decedent during his lifetime in trust to pay the income for life to or on the order or direction of the decedent, with the right reserved to the decedent at all times before his death to revoke the trust;

(c) Property transferred by the decedent during his lifetime in trust to pay the income for life to or on the order or direction of the decedent with the right reserved to the decedent at all times before his death to make any change in the enjoyment thereof through the exercise of a power to alter, amend, or terminate the trust;

(d) Property passing without full and adequate consideration under a general power of appointment exercised by the decedent by will.

SEC. 165. Section 18046 of said code is amended to read:

18046. If the property was acquired from a decedent before January 1, 1966, the basis shall be the fair market value of such property at the time of its acquisition.

SEC. 166. Section 18053 of said code is amended to read:

18053. Whenever it appears that the basis of property in the hands of the taxpayer is a substituted basis, then the adjustments provided in Section 18052 shall be made after first making in respect of such substituted basis proper adjustments of a similar nature in respect of the period during which the property was held by the decedent, transferor, donor, or grantor, or during which the other property was held by the person for whom the basis is to be determined. A similar rule shall be applied in the case of a series of substituted bases. The term "substituted basis" as used in this section means a basis determined under any provision of this chapter and Chapters 4 (relating to corporate distributions and adjustments), 10 (relating to partners and partnerships), and 14 (relating to capital gains and losses), or under any corresponding provision of a prior income tax law, providing that the basis shall be determined—

(a) By reference to the basis in the hands of a decedent, transferor, donor, or grantor; or

(b) By reference to other property held at any time by the person for whom the basis is to be determined.

SEC. 167. Section 18057 is added to said code, to read:

18057. In the case of the sale of an annuity contract, the adjusted basis shall in no case be less than zero.

SEC. 168. Section 18401 of said code is amended to read:

18401. Every individual taxable under this part shall make a return to the Franchise Tax Board, stating specifically the items of his gross income and the deductions and credits allowed by this part, if he has for the taxable year—

(a) An adjusted gross income of over one thousand five hundred dollars ($1,500), if single;

(b) An adjusted gross income of over three thousand dollars ($3,000), if married; or

(c) A gross income of over five thousand dollars ($5,000), regardless of the amount of adjusted gross income.

SEC 169. Section 18402 of said code is amended to read:

18402. If a husband and wife have for the taxable year an aggregate adjusted gross income of over three thousand dollars ($3,000), or an aggregate gross income of over five thousand dollars ($5,000)—

(a) Each shall make such a return, or

(b) The income of each shall be included in a single joint return, in which case the tax shall be computed on the aggregate income, as provided in Section 17045 No joint return shall be made if husband and wife have different taxable years; except that if such taxable years begin on the same day and end on different days because of the death of either or of both, then the joint return may be made with respect to the taxable year of each The above exception shall not apply if the surviving spouse remarries before the close of his taxable year, nor if the taxable year of either spouse is a fractional part of a year under Section 17553.

(c) In the case of the death of one spouse or both spouses the joint return with respect to the decedent may be made only by his executor or administrator; except that in the case of the death of one spouse the joint return may be made by the surviving spouse with respect to both himself and the decedent if (1) no return for the taxable year has been made by the decedent, (2) no executor or administrator has been appointed, and (3) no executor or administrator is appointed before the last day prescribed by law for filing the return of the surviving spouse If an executor or administrator of the decedent is appointed after the making of the joint return by the surviving spouse, the executor or administrator may disaffirm such joint return by making, within one year after the last day prescribed by law for filing the return of the surviving spouse, a separate return for the taxable year of the decedent with respect to which the joint return was made, in which case the return made by the survivor shall constitute his separate return.

SEC 170. Section 18403 of said code is amended to read

18403. If the taxpayer is unable to make his own return (including the return required by Section 18412), the return shall be made by a duly authorized agent or by the guardian or other person charged with the care of the person or property of the taxpayer.

SEC 171 Section 18405 of said code is amended to read.

18405 Every fiduciary (except a receiver appointed by authority of law in possession of part only of the property of an individual) shall make a return, which shall contain or be verified by a written declaration that it is made under the penalties of perjury, for any of the following taxpayers for whom he acts, stating specifically the items of gross income of the taxpayer and the deductions and credits allowed under this part.

(a) Every individual having an adjusted gross income for the taxable year of over one thousand five hundred dollars ($1,500), if single

(b) Every individual having an adjusted gross income for the taxable year of over three thousand dollars ($3,000), if married

(c) Every individual having a gross income for the taxable year of over five thousand dollars ($5,000), regardless of the amount of his net income.

(d) Every estate the net income of which for the taxable year is over one thousand dollars ($1,000)

(e) Every trust the net income of which for the taxable year is over one hundred dollars ($100)

(f) Every estate or trust the gross income of which for the taxable year is over five thousand dollars ($5,000), regardless of the amount of the net income

(g) Every decedent, for the year in which death occurred, and for prior years, if returns for such years should have been

filed but have not been filed by the decedent, under such rules and regulations as the Franchise Tax Board may prescribe.

SEC 172. Section 18405.5 is added to said code, to read:

18405.5. A nonresident or an individual who either becomes or ceases to be a resident of this state during the taxable year shall be required to file a return, regardless of the amount of his adjusted gross income, if he is required to pay any tax imposed by this part after his adjusted gross income has been apportioned as provided by Section 17181 5.

SEC 173. Section 18410 6 of said code is amended to read:

18410 6 For the purposes of Sections 18586 to 18589, inclusive (relating to period of limitations upon assessment and collection), and for the purposes of Section 18681 (relating to delinquent returns), a joint return made under Section 18410 shall be deemed to have been filed:

(a) Where both spouses filed separate returns prior to making the joint return, on the date the last separate return was filed, (but not ~~earlier that~~ *earlier than* the last date prescribed by this part for filing the return of either spouse).

(b) Where one spouse filed a separate return prior to the making of the joint return, and the other spouse had one thousand five hundred dollars ($1,500) or less of adjusted gross income and five thousand dollars ($5,000) or less of gross income for such taxable year, on the date of the filing of such separate return (but not earlier than the last date prescribed by law for the filing of such separate return)

(c) Where only one spouse filed a separate return prior to the making of a joint return and the other spouse had an adjusted gross income of more than one thousand five hundred dollars ($1,500) or a gross income of more than five thousand dollars ($5,000) for such taxable year, on the date of the filing of such joint return

SEC. 174 Section 18412 is added to said code, to read:

18412. (a) Every individual shall make a declaration of his estimated tax for the taxable year if—

(1) The gross income for the taxable year can reasonably be expected to exceed—

(A) Five thousand dollars ($5,000), in the case of—

(i) A single individual other than a head of a household (as defined in Section 17042);

(ii) A married individual not entitled under subsection (b) to file a joint declaration with his spouse; or

(iii) A married individual entitled under subsection (b) to file a joint declaration with his spouse, but only if the aggregate gross income of such individual and his spouse for the taxable year can reasonably be expected to exceed ten thousand dollars ($10,000); or

(B) Ten thousand dollars ($10,000), in the case of a head of a household (as defined in Section 17042); or

(2) The gross income can reasonably be expected to include more than two thousand dollars ($2,000) from sources other than wages (as defined in Section 18807).

Notwithstanding the provisions of this subsection, no declaration is required under this part if the estimated tax (as defined in subsection (c)), other than the tax withheld under Sections 18805 and 18806, can reasonably be expected to be less than forty dollars ($40).

(b) In the case of a husband and wife, a single declaration under this section may be made by them jointly, in which case the liability with respect to the estimated tax shall be joint and several. No joint declaration may be made if a husband and wife are separated under a decree of divorce or of separate maintenance, or if they have different taxable years. If a joint declaration is made but a joint return is not made for the taxable year, the estimated tax for such year may be treated as the estimated tax of either the husband or the wife, or may be divided between them.

(c) For purposes of this part, in the case of an individual, the term "estimated tax" means the amount which the individual estimates as the amount of the income tax imposed by this part for the taxable year, minus the amount which the individual estimates as the sum of any credits against tax provided by Section 17053 (relating to the retirement income credit), Section 18551.1 (relating to tax withheld on wages), and Chapter 12 (commencing with Section 18001) (relating to taxes paid to other states).

(d) The declaration shall contain such pertinent information as the Franchise Tax Board may by forms or regulations prescribe.

(e) An individual may make amendments of a declaration filed during the taxable year under regulations prescribed by the Franchise Tax Board.

(f) If on or before January 31 (or February 15, in the case of an individual referred to in Section 18435(b), relating to income from farming or fishing) of the succeeding taxable year the taxpayer files a return, for the taxable year for which the declaration is required, and pays in full the amount computed on the return as payable, then, under regulations prescribed by the Franchise Tax Board—

(1) If the declaration is not required to be filed during the taxable year, but is required to be filed on or before January 15, such return shall be considered as such declaration, and

(2) If the tax shown on the return (reduced by the sum of the credits against tax provided by Section 17053 (relating to the retirement income credit) and Chapter 12 (commencing with Section 18001) (relating to taxes paid to other states) is greater than the estimated tax shown in a declaration previously made, or in the last amendment thereof, such return shall be considered as the amendment of the declaration permitted by subsection (e) to be filed on or before January 15

In the application of this subsection in the case of a taxable year beginning on any date other than January 1, there shall

be substituted, for the 15th or last day of the months specified in this subsection, the 15th or last day of the months which correspond thereto.

(g) An individual with a taxable year of less than 12 months shall make a declaration in accordance with regulations described by the Franchise Tax Board.

(h) The provisions of this section shall not apply to an estate or trust

(i) This section shall be applicable only with respect to taxable years beginning after December 31, 1965

SEC 175. Section 18431 of said code is amended to read·

18431 Except as otherwise provided by the Franchise Tax Board, any return, declaration, statement, or other document required to be made under any provision of this part or regulations shall contain, or be verified by, a written declaration that it is made under the penalties of perjury Such returns, and all other returns, declarations, statements, or other documents or copies thereof, required by this part, shall be in such form as the Franchise Tax Board may from time to time prescribe, and shall be filed with the Franchise Tax Board The Franchise Tax Board shall prepare blank forms for the returns, declarations, statements, or other documents and shall distribute them throughout the state and furnish them upon application Failure to receive or secure the form does not relieve any taxpayer from making any return, declaration, statement, or other document required

SEC 176 Section 18433 of said code is amended to read·

18433. The Franchise Tax Board, whenever in its judgment good cause exists, and under such rules and regulations as it shall prescribe, may grant a reasonable extension of time for filing any return, declaration, statement, or other document, or for payment of the tax, disclosed by the return, due or to become due within the period of the extension Except in the case of taxpayers who are abroad, no such extension shall be for more than six months

SEC 177. Section 18434 of said code is amended to read:

18434. (a) In the case of a taxpayer who is serving as a member of the armed forces of the United States or any auxiliary branch thereof, or the merchant marine, beyond the boundaries of the United States, the Franchise Tax Board shall automatically grant, without application being made therefor, an extension of time, free from interest and penalties, for filing the return (except income tax withheld at source), for payment of the tax (except income tax withheld at source), for taking any of the steps required by Sections 18590, 18593, 19053, 19057 and 19058 of the Revenue and Taxation Code, until 180 days after his return to the United States.

(b) "United States," as used in subsection (a) means the 50 states of the United States and the District of Columbia.

SEC 178 Section 18435 is added to said code, to read·

18435 (a) Declarations of estimated tax required by Section 18412 from individuals regarded as neither farmers nor

fishermen for the purpose of that section shall be filed on or before April 15 of the taxable year, except that if the requirements of Section 18412 are first met—

(1) After April 1 and before June 2 of the taxable year, the declaration shall be filed on or before June 15 of the taxable year, or

(2) After June 1 and before September 2 of the taxable year, the declaration shall be filed on or before September 15 of the taxable year, or

(3) After September 1 of the taxable year, the declaration shall be filed on or before January 15 of the succeeding taxable year.

(b) Declarations of estimated tax required by Section 18412 from individuals whose estimated gross income from farming or fishing (including oyster farming) for the taxable year is at least two-thirds of the total estimated gross income from all sources for the taxable year may, in lieu of the time prescribed in subsection (a), be filed at any time on or before January 15 of the succeeding taxable year.

(c) An amendment of a declaration may be filed in any interval between installment dates prescribed for that taxable year, but only one amendment may be filed in each such interval.

(d) The application of this section to taxable years of less than 12 months shall be in accordance with regulations prescribed by the Franchise Tax Board

(e) In the application of this section to the case of a taxable year beginning on any date other than January 1, there shall be substituted, for the months specified in this section, the months which correspond thereto

SEC 179 Article 5 (commencing with Section 18491) is added to Chapter 17 of Part 10 of Division 2 of said code, to read:

Article 5. Returns of Withheld Tax on Wages

18491 (a) Every employer required to deduct and withhold any tax under Section 18806 shall, for the calendar quarter beginning January 1, 1966, and for each calendar quarter thereafter (whether or not wages are paid therein), on or before the last day of the month following the close of each such quarter, file a withholding return in a form prescribed by the Franchise Tax Board and pay over to the Franchise Tax Board the taxes so required to be deducted and withheld

(b) The Franchise Tax Board may, if it believes such action necessary, require any employer to make the return required by this section and pay to it the tax deducted and withheld at any time, or from time to time.

(c) The Franchise Tax Board may in its discretion, under regulations prescribed by it, when satisfied that amounts withheld will be adequately safeguarded, permit an employer to

file a withholding return and pay over taxes deducted and withheld for other than quarterly periods.

18492. (a) Whenever any person who is required to collect, account for, and pay over any tax imposed by this part—

(1) At the time and in the manner prescribed by law or regulations (A) fails to collect, truthfully account for, or pay over such tax, or (B) fails to make deposits, payments, or returns of such tax, and

(2) Is notified, by notice delivered in hand to such person, of any such failure,

then all the requirements of subsection (b) shall be complied with. In the case of a corporation, partnership, or trust, notice delivered in hand to an officer, partner, or trustee, shall, for purposes of this section, be deemed to be notice delivered in hand to such corporation, partnership, or trust and to all officers, partners, trustees, and employees thereof.

(b) Any person who is required to collect, account for, and pay over any tax imposed by this part, if notice has been delivered to such person in accordance with subsection (a), shall collect the taxes imposed by this part, which become collectible after delivery of such notice, shall (not later than the end of the second banking day after any amount of such taxes is collected) deposit such amount in a separate account in a bank located within the limits of this state, and shall keep the amount of such taxes in such account until payment over to the Franchise Tax Board. Any such account shall be designated as a special fund in trust for the Franchise Tax Board, payable to the Franchise Tax Board by such person as trustee.

(c) Whenever the Franchise Tax Board is satisfied, with respect to any notification made under subsection (a), that all requirements of law and regulations with respect to the taxes imposed by this part, will henceforth be complied with, it may cancel such notification. Such cancellation shall take effect at such time as is specified in the notice of such cancellation.

18493. The Franchise Tax Board is authorized to require such information with respect to persons subject to the taxes imposed by Article 1 (commencing with Section 18801) of Chapter 19 (relating to tax withheld on wages) as is necessary or helpful in securing proper identification of such persons.

SEC 180. Section 18551.1 of said code is amended to read:

18551.1. (a) (1) For purposes of this part, the amount withheld under Sections 18805 and 18806 during any calendar year shall be allowed to the recipient of the income as a credit against the tax imposed by this part.

(2) The amount so withheld during any calendar year shall be allowed as a credit for the taxable year beginning in such calendar year, except that in the case of amounts deducted and withheld under Section 18805 the amount withheld shall be allowed as a credit for the taxable year with respect to which such amount was withheld. In the case of amounts withheld under Section 18806, if more than one taxable year begins in

a calendar year, such amounts shall be allowed as a credit for the last taxable year so beginning

(b) For purposes of Section 19053, any tax actually deducted and withheld during any calendar year under Sections 18805 and 18806 shall, in respect of the recipient of the income, be deemed to have been paid by him on the 15th day of the fourth month following the close of the taxable year with respect to which such tax is allowable as a credit under subsection (a). For purposes of Section 19053, any amount paid as estimated income tax for any taxable year shall be deemed to have been paid on the last day prescribed for filing the return under Section 18401 for such taxable year.

(c) Notwithstanding subsection (b), for purposes of Section 19053 with respect to any tax deducted and withheld under Sections 18805 and 18806—

(1) If a return for any period ending with or within a calendar year is filed before April 15 of the succeeding calendar year, such return shall be considered filed on April 15 of such succeeding calendar year; and

(2) If a tax with respect to an amount paid during any period ending with or within a calendar year is paid before April 15 of the succeeding calendar year, such tax shall be considered paid on April 15 of such succeeding calendar year.

(d) If any overpayment of income tax is, in accordance with Section 19051.1, claimed as a credit against estimated tax for the succeeding taxable year, such amount shall be considered as a payment of the income tax for the succeeding taxable year (whether or not claimed as a credit in the return of estimated tax for such succeeding taxable year), and no claim for credit or refund of such overpayment shall be allowed for the taxable year in which the overpayment arises.

SEC. 181. Section 18556 is added to said code, to read:

18556. (a) The amount of estimated tax (as defined in Section 18412(c)) with respect to which a declaration is required under Section 18412 shall be paid as follows:

(1) If the declaration is filed on or before April 15 of the taxable year, the estimated tax shall be paid in four equal installments. The first installment shall be paid at the time of the filing of the declaration, the second and third on June 15 and September 15, respectively, of the taxable year, and the fourth on January 15 of the succeeding taxable year.

(2) If the declaration is filed after April 15 and not after June 15 of the taxable year, and is not required by Section 18435 to be filed on or before April 15 of the taxable year, the estimated tax shall be paid in three equal installments. The first installment shall be paid at the time of the filing of the declaration, the second on September 15 of the taxable year, and the third on January 15 of the succeeding taxable year.

(3) If the declaration is filed after June 15 and not after September 15 of the taxable year, and is not required by Section 18435 to be filed on or before June 15 of the taxable year, the estimated tax shall be paid in two equal installments.

The first installment shall be paid at the time of the filing of the declaration, and the second on January 15 of the succeeding taxable year.

(4) If the declaration is filed after September 15 of the taxable year, and is not required by Section 18435(a) to be filed on or before September 15 of the taxable year, the estimated tax shall be paid in full at the time of the filing of the declaration.

(5) If the declaration is filed after the time prescribed in Section 18435 (including cases in which an extension of time for filing the declaration has been granted under Section 18433), paragraphs (2), (3), and (4) of this subsection shall not apply, and there shall be paid at the time of such filing all installments of estimated tax which would have been filed within the time prescribed in Section 18435(a), and the remaining installments shall be paid at the times at which, and in the amounts in which, they would have been payable if the declaration had been so filed.

(b) If an individual referred to in Section 18435(b) (relating to income from farming or fishing) makes a declaration of estimated tax after September 15 of the taxable year and on or before January 15 of the succeeding taxable year, the estimated tax shall be paid in full at the time of the filing of the declaration

(c) If any amendment of a declaration is filed, the remaining installments, if any, shall be ratably increased or decreased, as the case may be, to reflect the increase or decrease, as the case may be, in the estimated tax by reason of such amendment, and if any amendment is made after September 15 of the taxable year, any increase in the estimated tax by reason thereof shall be paid at the time of making such amendment.

(d) The application of this section to taxable years of less than 12 months shall be in accordance with regulations prescribed by the Franchise Tax Board

(e) In the application of this section to the case of a taxable year beginning on any date other than January 1, there shall be substituted, for the months specified in this section, the months which correspond thereto

(f) At the election of the individual, any installment of the estimated tax may be paid prior to the date prescribed for its payment

SEC 182 Section 18557 is added to said code, to read·

18557. Payment of the estimated income tax, or any installment thereof, shall be considered payment on account of the income taxes imposed by this part for the taxable year.

SEC 183. Section 18588 of said code is amended to read.

18588 (a) For the purposes of Sections 18586, 18586 1 and 18587, a return of tax imposed by this part, except tax imposed by Article 1 (commencing with Section 18801) of Chapter 19 (relating to withholding at the source), filed before the last day prescribed by law for filing, shall be considered as filed on that day. For purposes of Section 19053, payment of

any portion of the tax made before the last day prescribed for the payment of the tax shall be considered made on such last day.

(b) For purposes of this section, if a return of tax imposed by Article 1 (commencing with Section 18801) of Chapter 19 (relating to withholding at the source), for any period ending with or within a calendar year is filed before April 15 of the succeeding calendar year, such return shall be considered filed on April 15 of such calendar year

SEC 184 Section 18591 1 is added to said code, to read.

18591 1 (a) For purposes of this part, the term "deficiency" means the amount by which the tax imposed by this part exceeds the excess of—

(1) The sum of

(A) The amount shown as the tax by the taxpayer upon his return, if a return was made by the taxpayer and an amount was shown as the tax by the taxpayer thereon, plus

(B) The amounts previously assessed (or collected without assessment) as a deficiency, over—

(2) The amount of rebates, as defined in subsection (b) (2), made

(b) For purposes of this section—

(1) The tax imposed by this part and the tax shown on the return shall both be determined without regard to payments on account of estimated tax, and without regard to the credit under Section 18551 1.

(2) The term "rebate" means so much of an abatement, credit, refund, or other repayment, as was made on the ground that the tax imposed by this part was less than the excess of the amount specified in subsection (a) (1) over the rebates previously made.

SEC 185 Section 18602 is added to said code, to read·

18602 (a) If on any return or claim for refund of taxes imposed under this part there is an overstatement of the credit for income tax withheld at the source, or of the amount paid as estimated income tax, the amount so overstated which is allowed against the tax shown on the return or which is allowed as a credit or refund may be assessed by the Franchise Tax Board in the same manner as is provided by Section 18601 in the case of a mathematical error appearing upon the return

(b) No unpaid amount of estimated tax under Section 18556 shall be assessed

SEC 186 Section 18681 of said code is amended to read:

18681 (a) If any taxpayer fails to make and file a return required by this part on or before the due date of the return or the due date as extended by the Franchise Tax Board, then, unless it is shown that the failure is due to reasonable cause and not due to willful neglect, 5 percent of the tax shall be added to the tax for each 30 days or fraction thereof elapsing between the due date of the return and the date on which filed, but the total penalty shall not exceed 25 percent of the tax.

The penalty so added to the tax shall be due and payable upon notice and demand from the Franchise Tax Board.

(b) For purposes of subsection (a), the amount of tax required to be shown on the return shall be reduced by the amount of any part of the tax which is paid on or before the date prescribed for payment of the tax and by the amount of any credit against the tax which may be claimed upon the return

(c) This section shall not apply to any failure to file a declaration of estimated tax required by Section 18412.

SEC. 187. Section 18681.1 is added to said code, to read:

18681.1. In the case of each failure—

(a) To file a statement of the aggregate amount of payments to another person required by Section 18802 (relating to information at source), Section 18803 (relating to payments of corporate dividends), Section 18823(c) (relating to information returns with respect to income tax withheld), or Section 18802.1 (relating to payments of patronage dividends),

(b) To make a return required by Section 18802.7 (relating to reporting information in connection with certain options) with respect to a transfer of stock or a transfer of legal title to stock, or

(c) To make a return required by Section 18802.5 (relating to reporting payment of wages in the form of group-term life insurance) with respect to group-term life insurance on the life of an employee.

On the date prescribed therefor (determined with regard to any extension of time for filing), unless it is shown that such failure is due to reasonable cause and not to willful neglect, there shall be paid (upon notice and demand by the Franchise Tax Board and in the same manner as tax), by the person failing to file a statement referred to in paragraph (a) or failing to make a return referred to in paragraph (b) or (c), one dollar ($1) for each such failure, but the total amount imposed on the delinquent person for all such failures during any calendar year shall not exceed one thousand dollars ($1,000).

SEC. 188. Section 18681.5 is added to said code, to read:

18681.5. If an employer fails to file the annual report of compensation paid and taxes withheld, required under Section 18823(d) on or before 30 days after notice has been given to the employer of his failure, unless such failure is due to reasonable cause, the employer, in addition to any other penalties imposed by this part, shall be subjected to a penalty of twenty-five dollars ($25) for each month of delinquency, but the total penalty shall not exceed five hundred dollars ($500). The penalty shall be assessed and collected in the same manner as the tax.

SEC. 189 Section 18682 of said code is amended to read:

18682. If any taxpayer, upon notice and demand by the Franchise Tax Board, fails or refuses to make and file a return

(other than a declaration of estimated tax required under Section 18412) required by this part, the Franchise Tax Board, notwithstanding the provisions of Section 18648, may estimate the net income and compute and levy the amounts of the tax due from any available information. In such case 25 percent of the tax, in addition to the penalty added under Section 18681, shall be added to the tax and shall be due and payable upon notice and demand from the Franchise Tax Board.

SEC. 190. Section 18685.1 is added to said code, to read:

18685.1 (a) In case of failure by any person required by this part or by regulation of the Franchise Tax Board under this part to deposit with the Franchise Tax Board on the date prescribed therefor any amount of tax imposed by this part or in a bank located within the limits of this state when required by Section 18492 to receive such deposit, unless it is shown that such failure is due to reasonable cause and not due to willful neglect, there shall be imposed upon such person a penalty of 1 percent of the amount of the underpayment if the failure is for not more than one month, with an additional 1 percent for each additional month or fraction thereof during which such failure continues, not exceeding 6 percent in the aggregate For purposes of this subsection, the term "underpayment" means the excess of the amount of the tax required to be so deposited over the amount, if any, thereof deposited on or before the date prescribed therefor.

(b) For purposes of subsection (a), the failure shall be deemed not to continue beyond the last date (determined without regard to any extension of time) prescribed for payment of the tax required to be deposited or beyond the date the tax is paid, whichever is earlier.

SEC. 191. Section 18685 2 is added to said code, to read:

18685.2 Any person required to collect, truthfully account for, and pay over any tax imposed by this part who willfully fails to collect such tax, or truthfully account for and pay over such tax, or willfully attempts in any manner to evade or defeat any such tax or the payment thereof, shall, in addition to other penalties provided by law, be liable to a penalty equal to the total amount of the tax evaded, or not collected, or not accounted for and paid over. No penalty shall be imposed under Sections 18684 or 18685 for any offense to which this section is applicable.

SEC. 192. Section 18685 3 is added to said code, to read:

18685.3. In addition to the criminal penalty provided by Section 19410, any person required under the provisions of Section 18823 to furnish a statement to an employee who willfully furnishes a false or fraudulent statement, or who willfully fails to furnish a statement in the manner, at the time, and showing the information required under Section 18823, or regulations prescribed thereunder, shall for each such failure be subject to a penalty under this chapter of fifty dollars ($50), which shall be assessed and collected in the same manner as the tax.

SEC. 193 Section 18685.4 is added to said code, to read:

18685.4. (a) In the case of any underpayment of estimated tax by an individual, except as provided in subsection (d), there shall be added to the tax for the taxable year an amount determined at the rate of 6 percent per annum upon the amount of the underpayment (determined under subsection (b)) for the period of the underpayment (determined under subsection (c)).

(b) For purposes of subsection (a), the amount of the underpayment shall be the excess of—

(1) The amount of the installment which would be required to be paid if the estimated tax were equal to 70 percent ($66\frac{2}{3}$ percent in the case of individuals referred to in Section 18435(b) relating to income from farming or fishing) of the tax shown on the return for the taxable year, or, if no return was filed, 70 percent ($66\frac{2}{3}$ percent in the case of individuals referred to in Section 18435(b), relating to income from farming or fishing) of the tax for such year, over

(2) The amount, if any, of the installment paid on or before the last date prescribed for such payment

(c) The period of the underpayment shall run from the date the installment was required to be paid to whichever of the following dates is the earlier—

(1) The 15th day of the fourth month following the close of the taxable year.

(2) With respect to any portion of the underpayment, the date on which such portion is paid For purposes of this paragraph, a payment of estimated tax on any installment date shall be considered a payment of any previous underpayment only to the extent such payment exceeds the amount of the installment determined under subsection (b)(1) for such installment date.

(d) Notwithstanding the provisions of the preceding subsections, the addition to the tax with respect to any underpayment of any installment shall not be imposed if the total amount of all payments of estimated tax made on or before the last date prescribed for the payment of such installment equals or exceeds whichever of the following is the lesser—

(1) The amount which would have been required to be paid on or before such date if the estimated tax were whichever of the following is the least—

(A) The tax shown on the return of the individual for the preceding taxable year, if a return showing a liability for tax was filed by the individual for the preceding taxable year and such preceding year was a taxable year of 12 months, or

(B) An amount equal to the tax computed, at the rates applicable to the taxable year, on the basis of the taxpayer's status with respect to personal exemptions under Section 17181 for the taxable year, but otherwise on the basis of the facts shown on his return for, and the law applicable to, the preceding taxable year, or

(C) An amount equal to 70 percent (66⅔ percent in the case of individuals referred to in Section 18435(b), relating to income from farming or fishing) of the tax for the taxable year computed by placing on an annualized basis the taxable income for the months in the taxable year ending before the month in which the installment is required to be paid. For purposes of this subparagraph, the taxable income shall be placed on an annualized basis by—

(i) Multiplying by 12 (or, in the case of a taxable year of less than 12 months, the number of months in the taxable year) the taxable income (computed without deduction of personal exemptions) for the months in the taxable year ending before the month in which the installment is required to be paid.

(ii) Dividing the resulting amount by the number of months in the taxable year ending before the month in which such installment date falls, and

(iii) Deducting from such amount the deductions for personal exemptions allowable for the taxable year (such personal exemptions being determined as of the last date prescribed for payment of the installment); or

(2) An amount equal to 90 percent of the tax computed, at the rates applicable to the taxable year, on the basis of the actual taxable income for the months in the taxable year ending before the month in which the installment is required to be paid.

(e) For purposes of applying this section—

(1) The estimated tax shall be computed without any reduction for the amount which the individual estimates as his credit under Section 18551.1 (relating to tax withheld at source on wages), ~~and~~

(2) The amount of the credit allowed under Section 18551.1 for the taxable year shall be deemed a payment of estimated tax, and an equal part of such amount shall be deemed paid on each installment date (determined under Section 18556) for such taxable year, unless the taxpayer establishes the dates on which all amounts were actually withheld, in which case the amounts so withheld shall be deemed payments of estimated tax on the dates on which such amounts were actually withheld:, *and*

(3) For purposes of subparagraphs (d) (1) (A) and (B), the term "preceding taxable year" shall mean the last preceding taxable year for which a tax was imposed upon all of an individual's taxable income

(f) For purposes of subsections (b) and (d), the term "tax" means the tax imposed by this part reduced by the credits against tax allowed by Section 17053 (relating to retirement income) and Chapter 12 (commencing with Section 18001) (relating to taxes paid other states), other than the credit against tax provided by Section 18551 1 (relating to tax withheld on wages).

(g) The application of this section to taxable years of less than 12 months shall be in accordance with regulations prescribed by the Franchise Tax Board.

(h) This section shall apply only with respect to taxable years beginning after December 31, 1965.

SEC. 194. Section 18685.5 is added to the said code, to read:

18685.5. (a) If any person who is required by regulations prescribed under Section 18934—

(1) To include his identifying number in any return, statement, or other document.

(2) To furnish his identifying number to another person, or

(3) To include in any return, statement, or other document made with respect to another person the identifying number of such other person,

fails to comply with such requirement at the time prescribed by such regulations, such person shall pay a penalty of five dollars ($5) for each such failure, unless it is shown that such failure is due to reasonable cause

(b) Article 2 (commencing with Section 18581) of Chapter 18 (relating to deficiency procedures for income taxes) shall not apply in respect of the assessment or collection of any penalty imposed by subsection (a).

SEC. 195. Section 18687 1 is added to said code, to read:

18687.1. The last date prescribed for payment by Section 18687 shall be determined without regard to any notice and demand for payment issued, by reason of jeopardy (as provided in Article 4 (commencing with Section 18641) of Chapter 18), prior to the last date otherwise prescribed for such payment.

SEC. 196. Section 18696 is added to said code, to read:

18696. Sections 18686 to 18695, inclusive, shall not apply to any failure to pay estimated tax required by Section 18556.

SEC 197. Section 18805 of said code is amended to read:

18805. The Franchise Tax Board may, by regulation, require any person, including any officer or department of the state or any political subdivision or agency of the state, or any city organized under a freeholder's charter, or any political body not a subdivision or agency of the state, to withhold from payments of interest (other than interest coupons payable to bearer), dividends, rent, prizes and winnings, and compensation for personal services, including bonuses, (except wages, as defined in Section 18807), an amount equal to the tax that would be imposed by this part upon such payments if they, together with all similar payments since the beginning of the calendar year, represented net income and the only net income of the payee, and to transmit the amount withheld to the Franchise Tax Board at such time as it may designate.

SEC. 197 5 Section 18805 5 is added to said code, to read:

18805 5 Notwithstanding any provision of this law, no returns for the calendar year 1965 will be required under Sections 18802, 18802 1, 18803 or 18805, and withholding

agents may, in accordance with regulations of the Franchise Tax Board, refund to any person any tax deducted and withheld for such calendar year

SEC 198 Section 18806 is added to said code, to read:

18806 (a) Every employer making payment of any wages on or after January 1, 1966, to an employee for services performed within this state shall deduct and withhold from such wages (except as provided in subsection (f)) for each payroll period, a tax computed in such manner as to result, so far as practicable, with due regard to the exemptions allowable under Article 5 (commencing at Section 17181) of Chapter 3, a sum which is substantially equivalent to the amount of tax reasonably estimated to be due under this part resulting from the inclusion in the gross income of the employee of his wages received during such calendar year The method of determining the amount to be withheld shall be prescribed by regulations of the Franchise Tax Board.

(b) The Franchise Tax Board upon request may permit the use of accounting machines to calculate the proper amount to be deducted and withheld from such wages; provided, that such calculation produces an amount substantially equivalent to the amount of tax required to be withheld under subsection (a).

(c) In determining the amount to be deducted and withheld under this section, the wages may, at the election of the employer, be computed to the nearest dollar.

(d) The Franchise Tax Board may, under regulations prescribed by it, authorize employers to estimate the wages which will be paid to any employee in any quarter of the calendar year, to determine the amount to be deducted and withheld upon each payment of wages to such employee during such quarter as if the appropriate average of the wages so estimated constituted the actual wages paid, and to deduct and withhold upon any payment of wages to such employee during such quarter such amount as may be necessary to adjust the amount actually deducted and withheld upon the wages of such employee during such quarter to the amount that would be required to be deducted and withheld during such quarter if the payroll period of the employee was quarterly.

(e) The Franchise Tax Board may provide by regulation, under such conditions and to such extent as it deems proper, for withholding in addition to that otherwise required under this section in cases in which the employer and employee agree to such additional withholding Such additional withholding shall for all purposes be considered a tax required to be deducted and withheld under this chapter.

(f) In the case of remuneration paid in any medium other than cash for services performed by an individual as a retail salesman for a person, where the service performed by such individual for such person is ordinarily performed for remuneration solely by way of cash commission an employer shall not be required to deduct or withhold any tax under this

article with respect to such remuneration, provided that such employer files with the Franchise Tax Board such information with respect to such remuneration as the Franchise Tax Board may by regulation prescribe

SEC 199. Section 18807 is added to said code, to read:

18807 For purposes of this chapter, the term "wages" means all remuneration (other than fees paid to a public official) for services performed by an employee for his employer, including all remuneration paid to a nonresident employee for services performed in this state and, the cash value of all remuneration paid in any medium other than cash; except that such term shall not include remuneration paid—

(a) For active service as a member of the armed forces of the United States; or

(b) For agricultural labor (as defined in Section 3121(g) of the Internal Revenue Code of 1954); or

(c) For domestic service in a private home, local college club, or local chapter of a college fraternity or sorority; or

(d) For service not in the course of the employer's trade or business performed in any calendar quarter by an employee, unless the cash remuneration paid for such service is fifty dollars ($50) or more and such service is performed by an individual who is regularly employed by such employer to perform such service For purposes of this paragraph, an individual shall be deemed to be regularly employed by an employer during a calendar quarter only if—

(1) On each of some 24 days during such quarter such individual performs for such employer for some portion of the day service not in the course of the employer's trade or business; or

(2) Such individual was regularly employed (as determined under subparagraph (1)) by such employer in the performance of such service during the preceding calendar quarter; or

(e) For services by a citizen or resident of the United States for a foreign government or an international organization; or

(f) For services performed by a nonresident alien individual, other than—

(1) A resident of a contiguous country who enters and leaves the United States at frequent intervals; or

(2) A resident of Puerto Rico if such services are performed as an employee of the United States or any agency thereof; or

(g) For such services, performed by a nonresident alien individual who is a resident of a contiguous country and who enters and leaves the United States at frequent intervals, as may be designated by regulations prescribed by the Franchise Tax Board; or

(h) For services performed by a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry or by a member of a religious order in the exercise of duties required by such order; or

(i) (1) For services performed by an individual under the age of 18 in the delivery or distribution of newspapers or shopping news, not including delivery or distribution to any point for subsequent delivery or distribution; or

(2) For services performed by an individual in, and at the time of, the sale of newspapers or magazines to ultimate consumers, under an arrangement under which the newspapers or magazines are to be sold by him at a fixed price, his compensation being based on the retention of the excess of such price over the amount at which the newspapers or magazines are charged to him, whether or not he is guaranteed a minimum amount of compensation for such services, or is entitled to be credited with the unsold newspapers or magazines turned back; or

(j) For services not in the course of the employer's trade or business, to the extent paid in any medium other than cash; or

(k) To, or on behalf of, an employee or his beneficiary—

(1) From or to a trust described in Section 17501 which is exempt from tax under Section 17631 at the time of such payment unless such payment is made to an employee of the trust as remuneration for services rendered as such employee and not as a beneficiary of the trust; or

(2) Under or to an annuity plan which, at the time of such payment, meets the requirements of Section 17501(c), (d), (e) and (f), or

(l) To a master, officer or any other seaman who is a member of a crew on a vessel engaged in foreign, coastwise, intercoastal, interstate, or noncontiguous trade; or

(m) Pursuant to any provision of law other than Section 5(c) or 6(l) of the Peace Corps Act, for service performed as a volunteer or volunteer leader within the meaning of such act; or

(n) In the form of group-term life insurance on the life of an employee, or

(o) To or on behalf of an employee (and to the extent that) at the time of the payment of such remuneration it is reasonable to believe that a corresponding deduction is allowable under Section 17266.

SEC. 200. Section 18808 is added to said code, to read

18808. (a) For purposes of this chapter, the term "payroll period" means a period for which a payment of wages is ordinarily made to the employee by his employer.

(b) If wages are paid with respect to a period which is not a payroll period, the amount to be deducted and withheld shall be that applicable in the case of a miscellaneous payroll period containing a number of days, including Sundays and holidays, equal to the number of days in the period with respect to which such wages are paid In any case in which wages are paid by an employer without regard to any payroll period or other period, the amount to be deducted and withheld shall be that applicable in the case of a miscellaneous payroll period containing a number of days equal to the number of days, includ-

ing Sundays and holidays, which have elapsed since the date of the last payment of such wages by such employer during the calendar year, or the date of commencement of employment with such employer during such year, or January 1st of such year, which ever is the later In any case in which the period of time described, or the time prescribed in the preceding sentence, in respect of any wages is less than one week, the Franchise Tax Board, under regulations issued by it, may authorize an employer, in computing the tax required to be deducted and withheld, to use the excess of the aggregate of the wages paid to the employee during the calendar week over the withholding exemption allowed by Section 18806 for a weekly payroll period

(c) If the remuneration paid by an employer to an employee for services performed during one-half or more of any payroll period of not more than 31 consecutive days constitutes wages, all the remuneration paid by such employer to such employee for such period shall be deemed to be wages; but if the remuneration paid by an employer to an employee for services performed during more than one-half of any such payroll period does not constitute wages, then none of the remuneration paid by such employer to such employee for such period shall be deemed to be wages.

SEC 201 Section 18809 is added to said code, to read:

18809 For purposes of this chapter, the term "employee" means a resident or a nonresident individual who receives remuneration for services performed within this state and includes an officer, employee, or elected official of the United States, a state, territory, or any political subdivisions thereof, or the District of Columbia, or any agency or instrumentality of any one or more of the foregoing. The term "employee" also includes an officer of a corporation.

SEC 202 Section 18810 is added to said code, to read:

18810 (a) For purposes of this chapter, the term "employer" means any individual, corporation, association or partnership, or any agent thereof, doing business in this state, deriving income from sources within this state, or in any manner whatsoever subject to the laws of this state, the State of California or any political subdivision or agency thereof, any city organized under a freeholder's charter, or any political body not a subdivision or agency of the state and any person, officer, employee, department or agency thereof, making payment of wages to employees for services performed within this state, except as provided in subsection (b).

(b) If the employer (as defined in subsection (a)) for whom the employee performs or performed the service does not have control of the payment of wages for such services, the term "employer" (except for purposes of Section 18807) means the person having control of the payment of such wages (as provided in Section 18824), whether or not the person having control of the payment of such wages is subject to the jurisdiction of the laws of this state.

SEC. 203 Section 18811 is added to said code, to read:

18811. (a) Unless the employee files a state withholding exemption certificate, in such form and containing such information as the Franchise Tax Board may by regulations prescribe, an employer shall use the exemption certificate filed by the employee with the employer under the income tax withholding provisions of the United States Internal Revenue Code, for determining the number of withholding exemptions to be allowed in computing the tax required to be deducted and withheld under Section 18806; however, unless the employer can determine the employee's marital status from the federal exemption certificate the exemption allowed for each dependent claimed by the employee shall be six hundred dollars ($600).

(b) No withholding exemptions shall be allowed until the employee files a new withholding exemption certificate if the Franchise Tax Board finds that the withholding exemption certificate filed under this chapter or under the Internal Revenue Code does not properly reflect the number of exemptions allowable and so advises the employer in writing

SEC. 204 Section 18812 is added to said code, to read:

18812 The number and amount of withholding exemptions allowed shall be based upon the persons claimed in a withholding exemption certificate in effect under Section 18811, except that if no such certificate is in effect, the number of withholding exemptions claimed shall be considered to be zero.

SEC. 205. Section 18813 is added to said code, to read·

18813. (a) A new withholding exemption certificate filed under the income tax provisions of the Internal Revenue Code in cases in which a previous such certificate was in effect shall take effect with respect to the first payment of wages made on or after the first status determination date which occurs at least 30 days from the date on which such certificate is so furnished, except that at the election of the employer such certificate may be made effective with respect to any payment of wages made on or after the date on which such certificate is so furnished. For purposes of this section the term "status determination date" means January 1, and July 1 of each year

(b) If a state withholding exemption certificate is furnished the employer such certificate shall take effect as of the beginning of the first payroll period ending, or the first payment of wages made without regard to a payroll period, on or after the date on which such certificate is so furnished.

SEC 206. Section 18814 is added to said code, to read:

18814. If a payment of wages is made to an employee by an employer—

(a) With respect to a payroll period or other period, any part of which is included in a payroll period or other period with respect to which wages are also paid to such employee by such employer, or

(b) Without regard to any payroll period or other period, but on or prior to the expiration of a payroll period or other

period with respect to which wages are also paid to such employee by such employer, or

(c) With respect to a period beginning in one and ending in another calendar year, or

(d) Through an agent, fiduciary, or other person who also has the control, receipt, custody, or disposal of, or pays, the wages payable by another employer to such employee, the manner of withholding and the amount to be deducted and withheld under this article shall be determined in accordance with regulations prescribed by the Franchise Tax Board under which the withholding exemptions allowed to the employee in any calendar year shall approximate the withholding exemption allowable with respect to an annual payroll period.

SEC. 207 Section 18806 of said code is amended and renumbered to read:

18815. (a) The employer shall be liable for the payment of the tax required to be deducted and withheld under Section 18806, and shall not be liable to any person for the amount of such payment. Every employer or person required to deduct and withhold any tax is hereby made liable for such tax, to the extent provided by this section, and, insofar as they are not inconsistent with the provisions of this section, all the provisions of this part relating to penalties, interest, assessment and collection shall apply to persons or employers subject to the provisions of this part, and for these purposes any amount required to be deducted and paid to the Franchise Tax Board under Sections 18805 and 18806 shall be considered the tax of the employer or person Any employer or person who fails to withhold from any payments any amount required to be withheld under Section 18805 is liable for the amount withheld or the amount of taxes due from the taxpayer to whom the payments are made but not in excess of the amount required to be withheld, whichever is more, unless it is shown that the failure to withhold is due to reasonable cause

(b) Whenever any employer or person has withheld any amount pursuant to this article, the amount so withheld shall be held to be a special fund in trust for the State of California The amount of tax required to be deducted and withheld under Sections 18805 or 18806 shall be assessed, collected, and paid in the same manner and subject to the same provisions and limitations (including penalties) as are applicable with respect to the taxes imposed by this part.

SEC. 208. Section 18816 is added to said code, to read:

18816 If the employer, in violation of the provisions of this article, fails to deduct and withhold the tax under this article, and thereafter the tax against which such tax may be credited is paid, the tax so required to be deducted and withheld shall not be collected from the employer; but this section shall in no case relieve the employer from liability for any penalties or additions to the tax otherwise applicable in respect of such failure to deduct and withhold.

SEC. 209. Section 18807 of said code is amended and renumbered to read:

18817. The Franchise Tax Board may by notice, served personally or by registered mail, require any employer, person, officer or department of the state, political subdivision or agency of the state, city organized under a freeholder's charter, or political body not a subdivision or agency of the state, having in their possession, or under their control, any credits or other personal property or other things of value, belonging to a taxpayer or to a person or employer who has failed to withhold and transmit amounts due pursuant to Sections 18815 and 18818, to withhold, from such credits or other personal property or other things of value, the amount of any tax, interest or penalties due from the taxpayer or the amount of any liability incurred by such employer or person for failure to withhold and transmit amounts due from a taxpayer under this part and to transmit the amount withheld to the Franchise Tax Board at such times as it may designate.

SEC 210. Section 18808 of said code is amended and renumbered to read

18818. Any employer or person failing to withhold the amount due from any taxpayer and to transmit the same to the Franchise Tax Board after service of a notice pursuant to Section 18817 is liable for such amounts.

SEC. 211 Section 18809 of said code is amended and renumbered to read.

18819. Any employer or person required to withhold and transmit any amount pursuant to this article shall comply with the requirement without resort to any legal or equitable action in a court of law or equity Any employer or person paying to the Franchise Tax Board any amount required by it to be withheld is not liable therefor to the person from whom withheld unless the amount withheld is refunded to the withholding agent

SEC 212. Section 18810 of said code is amended and renumbered to read

18820. Any taxpayer from whom a tax is collected by withholding under this article is entitled to the remedies set forth in Articles 1 and 2 of Chapter 20 of this part In the case of an overpayment of tax required to be withheld by this article, refund or credit shall be made to the employer or to the withholding agent, as the case may be, only to the extent that the amount of such overpayment was not deducted and withheld by the employer or withholding agent.

SEC 213. Section 18811 of said code is amended and renumbered to read.

18821. Whenever, under any provision of this article, service is authorized upon the state of any notice to withhold, unless expressly exempted from the provisions of this section, such service to be effective must, in addition to any other re-

quirements, be made on the state agency owing the obligation prior to the time such agency presents the claim for payment thereof to the State Controller.

SEC 214. Section 18822 is added to said code, to read.

18822. If the employer is the United States, or this state, or political subdivision thereof, a city organized under a freeholder's charter, or any agency or instrumentality of any one or more of the foregoing, the return of the amount deducted and withheld upon any wages may be made by any officer or employee of the United States, or of such state, city organized under a freeholder's charter, or political subdivision, or of such agency or instrumentality, as the case may be, having control of the payment of such wages, or appropriately designated for that purpose

SEC 215 Section 18823 is added to said code, to read:

18823. (a) Every employer or person required to deduct and withhold from an employee a tax under Section 18806, or who would have been required to deduct and withhold a tax under Section 18806 if the employee had claimed no more than one withholding exemption, shall furnish to each such employee in respect of the remuneration paid by such person to such employee during the calendar year, on or before January 31 of the succeeding year, or, if his employment is terminated before the close of such calendar year, on the day on which the last payment of remuneration is made, a written statement showing the following:

(1) The name of such person;

(2) The name of the employee (and his social security or identifying number if wages as defined in Section 18807 have been paid);

(3) The total amount of wages as defined in Section 18807; and

(4) The total amount deducted and withheld as tax under Section 18806.

(b) The statement required to be furnished pursuant to this section in respect of any remuneration shall be furnished at such other times, shall contain such other information, and shall be in such form as the Franchise Tax Board may by regulations prescribe.

(c) A duplicate of any statement made pursuant to this section and in accordance with regulations prescribed by the Franchise Tax Board shall, when required by such regulations be filed with the Franchise Tax Board.

(d) Every employer shall make an annual return on forms prescribed by the Franchise Tax Board, summarizing the total compensation paid and the tax withheld for each employee during the calendar year, which shall be filed on or before January 31 of the year following that for which the report is made.

SEC. 216. Section 18824 is added to said code, to read:

18824. In case a fiduciary, agent, or other person has the control, receipt, custody, or disposal of, or pays the wages of an employee or group of employees, employed by one or more employers, the Franchise Tax Board, under regulations prescribed by it, is authorized to designate such fiduciary, agent, or other person to perform such acts as are required of employers under this part and as the Franchise Tax Board may specify. Except as may be otherwise prescribed by the Franchise Tax Board, all provisions of law (including penalties) applicable in respect of an employer shall be applicable to a fiduciary, agent, or other person so designated but, except as so provided, the employer for whom such fiduciary, agent, or other person acts shall remain subject to the provisions of law (including penalties) applicable in respect of employers.

SEC. 217 Section 18934 is added to said code, to read:

18934. (a) When required by regulations prescribed by the Franchise Tax Board:

(1) Any person or employer required under the authority of this part to make a return, statement, or other document shall include in such return, statement, or other document such identifying number as may be prescribed for securing proper identification of such person.

(2) Any person with respect to whom a return, statement, or other document is required under the authority of this part to be made by another person shall furnish to such other person such identifying number as may be prescribed for securing his proper identification.

(3) Any person or employer required under the authority of this part to make a return, statement, or other document with respect to another person shall request from such other person, and shall include in any such return, statement, or other document, such identifying number as may be prescribed for securing proper identification of such other person

(b) (1) Except as provided in paragraph (2), a return of any person with respect to his liability for tax, or any statement or other document in support thereof, shall not be considered for purposes of paragraphs (2) and (3) of subsection (a) as a return, statement, or other document with respect to another person.

(2) For purposes of paragraphs (2) and (3) of subsection (a), a return of an estate or trust with respect to its liability for tax, and any statement or other document in support thereof, shall be considered as a return, statement, or other document with respect to each beneficiary of such estate or trust

(c) For purposes of this section, the Franchise Tax Board is authorized to require such information as may be necessary to assign an identifying number to any person.

SEC. 217.5. Section 18935 is added to said code, to read:

18935. (a) The Franchise Tax Board is authorized to provide with respect to any amount required to be shown on a form, return, statement, or other document, that if such amount of such item is other than a whole-dollar amount, either—

(1) The fractional part of a dollar shall be disregarded; or

(2) The fractional part of a dollar shall be disregarded unless it amounts to one-half dollar or or more, in which case the amount (determined without regard to the fractional part of a dollar) shall be increased by one dollar ($1).

(b) Any person making a return, statement, or other document shall be allowed under regulations prescribed by the Franchise Tax Board, to make such return, statement, or other document without regard to subsection (a).

(c) The provisions of subdivisions (a) and (b) shall not be applicable to items which must be taken into account in making the computations necessary to determine the amount required to be shown on a form, but shall be applicable only to such final amount.

SEC. 217.7. Section 18936 is added to said code, to read:

18936. The Franchise Tax Board may by regulations provide that in the allowance of any amount as a credit or refund, or in the collection of any amount as a deficiency or underpayment, of any tax imposed by this part, a fractional part of a dollar shall be disregarded, unless it amounts to fifty cents ($0 50) or more, in which case it shall be increased to one dollar ($1).

SEC. 218. Section 19051.1 is added to said code, to read:

19051 1. The Franchise Tax Board is authorized to prescribe regulations providing for the crediting against the estimated income tax for any taxable year of the amount determined by the taxpayer or the Franchise Tax Board to be an overpayment of the income tax for a preceding taxable year.

SEC. 219. Section 19052 of said code is amended to read:

19052. (a) No credit or refund exceeding one thousand dollars ($1,000) shall be allowed or made until approved by the State Board of Control.

(b) If the Franchise Tax Board determines that an amount not exceeding one thousand dollars ($1,000) was not required to be paid under this part, the Franchise Tax Board without obtaining the approval of the State Board of Control shall set forth that fact in its records. The Franchise Tax Board may credit the amount on any amounts then due and payable under this part from the taxpayers by whom the amount was paid and may refund the balance to the taxpayer or his successors, administrators, or executors.

SEC 220 Section 19053 of said code is amended to read:

19053. No credit or refund shall be allowed or made after four years from the last day prescribed for filing the return or after one year from the date of the overpayment, whichever period expires the later, unless before the expiration of the period a claim therefor is filed by the taxpayer, or unless before the expiration of such period the Franchise Tax Board allows a credit or makes a refund where the overpayment does not exceed one thousand dollars ($1,000) or if the overpayment exceeds one thousand dollars ($1,000) certifies such overpayment to the State Board of Control for approval of the refunding or the crediting thereof

SEC. 221. Section 19053.1 is added to said code, to read:

19053 1. For purposes of Section 19053, a return filed within four years from the last day prescribed for filing the return, showing a credit for (a) tax withheld under Sections 18805 and 18806 or (b) estimated tax paid under Section 18556 in excess of the tax due, shall be considered a claim for refund of such excess if the amount thereof is more than one dollar ($1) No refund of tax withheld or estimated tax paid shall be allowed to an employee or taxpayer who fails to file a return for the taxable year in respect of which the tax withheld or estimated tax was allowable as a credit.

SEC. 222. Section 19053 9 of said code is amended to read:

19053 9. Notwithstanding any statute of limitations provided in this part, any overpayment due a taxpayer for any year which results from a transfer of items of income or deductions or both to or from another year for the same taxpayer, or for the same year for a related taxpayer described in Section 18691 1, shall be allowed as an offset in computing any deficiency in tax for any other year resulting from the transfer of such income or deductions or both, but no refund shall be allowed unless the Franchise Tax Board has allowed a credit or made a refund where the overpayment does not exceed one thousand dollars ($1,000), or where the overpayment exceeds one thousand dollars ($1,000), such overpayment is certified to the State Board of Control, or a claim for refund is filed within the time otherwise provided for in this part.

The offset provided herein, however, shall not be allowed after the expiration of seven years from the due date of the return on which the overpayment is determined.

SEC. 223 Section 19062.11 is added to said code, to read:

19062 11 If any overpayment of tax imposed by this part is refunded within 90 days after the return is filed, or within 90 days after the last day prescribed for filing the return of such tax (determined without regard to any extension of time for filing the return), whichever is later, no interest shall be allowed under Section 19062 on such overpayment.

SEC. 224. Section 19062 12, is added to said code, to read:

19062.12. If the amount allowable as a credit under Section 18551 1 (relating to credit for tax withheld at the source) exceeds the tax imposed by this part against which such credit is allowable, the amount of such excess shall be considered an overpayment.

SEC 225. Section 19062 13, is added to said code, to read:

19062 13. An amount paid as tax shall not be considered not to constitute an overpayment solely by reason of the fact that there was no tax liability in respect of which such amount was paid.

SEC. 226 Section 19062 14 is added to said code, to read:

19062.14. Any action of the Franchise Tax Board in refunding the excess of tax withheld under Sections 18805 and 18806 or estimated tax paid under Section 18556 shall not constitute a determination of the correctness of the return of the taxpayer for purposes of this part.

SEC 227 Section 19082 1 is added to said code, to read:

19082 1. The credit of an overpayment of any tax in satisfaction of any tax liability shall, for the purpose of any suit for refund of such tax liability so satisfied, be deemed to be a payment in respect of such tax liability at the time such credit is allowed.

SEC. 228 Section 19290 is added to said code, to read:

19290. For purposes of this article, a declaration of estimated tax shall be held and considered a return under this part

SEC. 229. Section 19409 is added to said code, to read:

19409 Any person required under this part to pay any estimated tax or tax, or required by this part or by regulations made under authority thereof to make a return (other than a return required under authority of Section 18412), keep any records, or supply any information, who willfully fails to pay such estimated tax or tax, make such return, keep such records, or supply such information, at the time or times required by law or regulations, shall, in addition to other penalties provided by law, be guilty of a misdemeanor and, upon conviction thereof, shall be fined not more than ten thousand dollars ($10,000), or imprisoned not more than one year, or both, together with the costs of prosecution.

SEC. 230 Section 19410 is added to said code, to read:

19410. In lieu of any other penalty provided by law (except the penalty provided by Section 18685 3) any person required under the provisions of Section 18823 to furnish a statement who willfully furnishes a false or fraudulent statement or who willfully fails to furnish a statement in the manner, at the time, and showing the information required under Section 18823, or regulations prescribed thereunder, shall, for each such offense, upon conviction thereof, be fined not more than one thousand dollars ($1,000), or imprisoned not more than one year, or both.

SEC 231. Section 19411 is added to said code, to read:

19411. Any individual required to supply information to his employer under Sections 18811 to 18813, inclusive, who willfully supplies false or fraudulent information, or who willfully fails to supply information thereunder which would require an increase in the tax to be withheld under Section 18806, shall, in lieu of any penalty otherwise provided, upon conviction thereof, be fined not more than five hundred dollars ($500), or imprisoned not more than one year, or both

SEC 232 Section 19412 is added to said code, to read:

19412 Any person who willfully delivers or discloses to the Franchise Tax Board any list, return, account, statement, or other document, known by him to be fraudulent or to be false as to any material matter, shall be fined not more than one thousand dollars ($1,000), or imprisoned not more than one year, or both

SEC 233. Section 19413 is added to said code, to read:

19413 (a) Any person who fails to comply with any provision of Section 18492(b) shall, in addition to any other penalties provided by law, be guilty of a misdemeanor, and, upon conviction thereof, shall be fined not more than five thousand dollars ($5,000), or imprisoned not more than one year, or both, together with the costs of prosecution.

(b) This section shall not apply—

(1) To any person, if such person shows that there was reasonable doubt as to (A) whether the law required collection of tax, or (B) who was required by law to collect tax, and

(2) To any person, if such person shows that the failure to comply with the provisions of Section 18492(b) was due to circumstances beyond his control.

For purposes of paragraph (2), a lack of funds existing immediately after the payment of wages (whether or not created by the payment of such wages) shall not be considered to be circumstances beyond the control of a person

SEC. 234. Chapter 25 (commencing with Section 19501) is added to Part 10 of Division 2 of said code, to read:

CHAPTER 25. SENIOR CITIZENS PROPERTY TAX REIMBURSEMENT

Article 1. Definitions

19501 This chapter may be known as the Unruh-Petris Senior Citizens Property Tax Reimbursement Act.

19502 "Income" shall mean all income of the claimant and spouse and of all other individuals living in the principal personal residence from whatever source derived. It shall include but not be limited to the sum of adjusted gross income as used for purposes of the California Personal Income Tax Law

(including items of income excluded by Article 3 of Chapter 3), plus alimony, support money, cash public assistance and relief, the gross amount of any pensions or annuities including railroad retirement benefits, all benefits received under the Federal Social Security Act and veteran's disability payments, all interest received from the federal government or any of its instrumentalities, all interest received from the State of California or any of its political subdivisions, realized capital gains, workmen's compensation and the gross amount of loss of time insurance benefits, life insurance proceeds, and gifts It does not include surplus food or other relief in kind supplied by a governmental agency *or reimbursements received under this chapter*

Total income shall be determined for the calendar year (or approved fiscal year ending within such calendar year) which ends within the fiscal year for which the property taxes have been assessed

19503. "Principal personal residence" means:

(a) A single family residence and the area of land on which it stands, not exceeding one acre, and any additional structures that are customary in combination with a single family residence; and

(b) Which is occupied during the calendar year by the claimant as his principal and permanent dwelling place except for temporary absences; and

(c) The real property is owned by the claimant and/or his spouse, or by the claimant and an individual related to him (as defined in Section 17182).

For purposes of this subdivision, ownership must be evidenced by a duly recorded document.

19504. "Claimant" means an individual who has filed a claim under this chapter, who is a resident of this state and at least one of the owner-occupants is 65 years of age or older prior to June 30 of the fiscal year for which a claim for reimbursement is filed pursuant to Chapter 3 of this act.

19505. When a principal personal residence is owned by two or more individuals as joint tenants or tenants-in-common and one or more such persons is not a member of the claimant's personal dwelling unit, the term "property tax" shall include only that part of the taxes levied which reflects the ownership of the claimant and his spouse.

19506. "Property tax" shall mean only those taxes paid currently which are assessed for fiscal years beginning on or after July 1, 1965 Included taxes are those amounts due on December 10th and April 10th of fiscal years ended on the succeeding June 30th

19507. "Property taxes accrued" means current property taxes (exclusive of special assessments, interest, penalties, principal payments on improvement bonds and charges for service) assessed against a claimant's principal residence by

any city, city and county, or county for any fiscal year beginning on or after July 1, 1965 When a claimant owns his principal personal residence for only part of a year the "property taxes accrued" means only taxes assessed against the residence, multiplied by the percentage of 12 months that such property was owned and occupied as the principal personal residence in such year Whenever a principal personal residence is an integral part of a larger unit such as a farm, property taxes accrued shall be that percentage of the total property taxes accrued as the value of the principal residence is of the total value.

Article 2. Property Tax Reimbursement

19521. Every claimant who was a resident for the entire calendar year which ends in the fiscal year of the tax reimbursement claim may file with the Franchise Tax Board, pursuant to Article 3, an application for reimbursement from the state of a sum equal to a percentage of the property taxes accrued and paid by the claimant on his principal personal residence as provided in Section 19523.

19522. (a) If the amount of the reimbursement exceeds five dollars ($5) the Franchise Tax Board, pursuant to the provisions of Article 3, shall reimburse to the claimant a percentage of the property tax accrued and paid by the claimant on his principal personal residence as provided in Section 19523 Such reimbursement shall be equal to the applicable percentage of property taxes paid on the assessed value of the property up to and including five thousand dollars ($5,000). No reimbursement shall be made for property taxes paid on that portion of assessed value of a principal personal residence exceeding five thousand dollars ($5,000).

(b) For purposes of allowing reimbursement provided for by this section·

(1) Only one claim for each principal personal residence shall be allowed. If two or more individuals are able to meet the qualifications for a claimant, they may determine who the claimant shall be. If they are unable to agree, the matter shall be referred to the Franchise Tax Board and its decision shall be final.

(2) The right to file a claim shall be personal to the claimant and shall not survive his death; however, when a claimant dies after having filed a timely claim, the amount thereof shall be disbursed to the spouse of the claimant if occupying the residence at the date of death.

19523 The amount of reimbursement shall be based on the income of all the individuals living in the principal personal residence of the claimant *Any reimbursement received under this chapter shall be deemed to be inconsequential resources.* The percentage of reimbursement for which each claimant shall be eligible shall be based on the following scale:

If the total income (as defined in this chapter) of all residents is not more than:	The percentage of *tax on* the first $5,000 of assessed value to be reimbursed is.	If the total income (as defined in this chapter) of all residents is not more than.	The percentage of *tax on* the first $5,000 of assessed value to be reimbursed is	If the total income (as defined in this chapter) of all residents is not more than:	The percentage of *tax on* the first $5,000 of assessed value to be reimbursed is.
$1,000	95%	$1,800	63%	$2,600	31%

1,775	64	2,575	32		

Article 3. Administration

19531. Each claimant applying for reimbursement under Article 2 of this chapter shall file with the Franchise Tax Board, on forms supplied by the Franchise Tax Board, annually, a statement describing the property on which the claim is based and showing at least, the assessed value of the land and the principal personal residence, the size and nature of the personal residence, and the annual income of all residents of the principal personal residence, together with a re-

ceipt from the city, city and county, and/or county to which the property tax for the principal personal residence has been paid. No interest shall be allowed on any payment made to any claimant pursuant to this chapter

19532. The statement on which the reimbursement is claimed shall be filed after May 15 but on or before July 31 succeeding the fiscal year ended June 30 for which reimbursement is claimed The state shall reimburse the claimant before November 30 of the calendar year in which the claim is filed, except that if the claim is defective, reimbursement shall be made as promptly as is practicable after the claim has been perfected. The Franchise Tax Board, whenever in its judgment good cause exists, may grant a reasonable extension of time for filing a claim. No extension or extensions shall aggregate more than six months from the due date provided for filing the claim The first claim filed shall include a proof of the claimant's age, acceptable to the Franchise Tax Board.

19533. The amount of any claim otherwise payable under this chapter may be applied by the Franchise Tax Board against any liability due from the claimant under any law administered by the Franchise Tax Board.

19535. Forms filed pursuant to this chapter shall not be under oath but shall contain, or be verified by, a written declaration that they are made under the penalties of perjury. Such forms and all other forms required by this chapter, shall require such information as the Franchise Tax Board may from time to time prescribe, and shall be filed with the Franchise Tax Board The Franchise Tax Board shall prepare blank forms for the claimant and shall distribute them throughout the state and furnish them upon application.

19536. The Franchise Tax Board shall prescribe all rules and regulations necessary for the enforcement of this chapter and may prescribe the extent to which any ruling or regulation shall be applied without retroactive effect.

19537. If any claimant fails or refuses to furnish any information requested in writing by the Franchise Tax Board, pursuant to this chapter, or files a fraudulent claim, the reimbursement required by this chapter shall be disallowed.

19538. Any claim for reimbursement which is less than that claimed on the form due to a mathematical error is not a fraudulent claim. Reimbursement of any amount erroneously claimed on the form is prohibited

19539. The Franchise Tax Board may recover any refund or any portion thereof of any reimbursement which is erroneously made or allowed, together with interest at the rate of 6 percent per annum from the date the reimbursement was made or the credit allowed, in an action brought in a court of competent jurisdiction in the County of Sacramento in the name of the people of the State of California within two years after the refund or credit was made.

19540. Taxpayers who fraudulently claim the refund allowed under this part are subject to a fine of up to five hundred dollars ($500), or 30 days imprisonment, or both. The place of trial for any violation of this section shall be in the county of residence of the claimant at the time the offense was committed.

19541. Any person aggrieved by the denial in whole or in part of the reimbursement claimed (except when the denial is based upon late filing of claim for reimbursement or is based upon a mathematical error) may appeal such denial to the Board of Equalization, or commence an action in the Superior Court of the County of Sacramento in the County of Los Angeles or in the City and County of San Francisco against the Franchise Tax Board, subject to the limitations and provisions of Chapter 20 of Part 10.

SEC. 235. Chapter 26 (commencing with Section 19601) is added to Part 10 of Division 2 of said code, to read:

CHAPTER 26. FORGIVENESS OF 1965 TAX ON NET INCOME

19601. (a) Notwithstanding any provisions of this part, except as provided by subdivision (b), with respect to the calendar year 1965 and any fiscal year ending in 1966; (1) no taxes under this part shall be payable by or on behalf of any taxpayer, provided however, taxes shall be paid thereunder by or on behalf of (A) all trusts and estates, with respect to taxable income and net capital gain, and (B) all other taxpayers, with respect to net capital gain; and (2) returns shall be made thereunder by or on behalf of (A) all trusts and estates and (B) all other taxpayers whose net capital gain exceeds ~~two thousand dollars ($2,000) if single, or four thousand dollars ($4,000) if married.~~ *one thousand dollars ($1,000) if single, or two thousand dollars ($2,000) if married. Taxes which are payable by or on behalf of trusts and estates, and with respect to net capital gain shall be determined on the basis of the exemption and rates provided for by this act. If only the tax on net capital gain is required to be paid, only the exemptions provided for in Section 17181 of the Revenue and Taxation Code as amended by this act, shall be allowed with respect to such net capital gains.* In the event of a change in accounting period the foregoing provisions of this section (other than those applicable to trusts and estates), shall apply only to the first taxable period commencing on or after January 1, 1965. If any such taxes which are not payable under the provisions of this section have been paid, such taxes, in accordance with regulations prescribed by the Franchise Tax Board, shall be credited against any taxes imposed by this part for the immediately succeeding calendar or fiscal year, or shall be refunded, or shall be otherwise credited. Notwithstanding the fact that no tax on taxable income shall be payable (by taxpayers other than trusts and estates and on net capital gain)

the Franchise Tax Board may require such returns for such years as it shall deem necessary or appropriate.

(b) This section shall not apply in any case in which the individual is convicted of any criminal offense with respect to the tax for the taxable year 1965 or in which additions to the tax for such taxable year are applicable by reason of fraud.

(c) With respect to taxable years for which no taxes on taxable income are required to be paid under the provisions of subdivision (a), taxable income shall be deemed to have been computed in the same manner as if taxes thereon had been required to be paid for such years.

SEC. 236. Section 23040 of said code is repealed.

SEC. 237. Section 23041 of said code is amended to read:

23041. "Taxable year" means the calendar year or the fiscal year for which the tax is imposed and upon the basis of which the net income is computed. "Taxable year" means, in the case of a return made for a fractional part of a year, the period for which such return is made.

SEC. 238. Section 23042 of said code is amended to read:

23042 "Annual accounting period" means the annual period on the basis of which the taxpayer regularly computed or now computes its income and on the basis of which it kept or now keeps its books.

SEC. 239. Section 23058 of said code is amended to read:

23058. Unless otherwise specifically provided the provisions of any law effecting changes in the computation of taxes shall be applied only in the computation of taxes for taxable years beginning after December 31st of the year preceding enactment and the remaining provisions of any such law shall become effective on the date it becomes law.

SEC. 240. Section 23115 is added to said code, to read:

23115. (a) The provisions of this part in effect on December 31, 1964, shall be applicable in the computation and payment of taxes imposed under Sections 23151, 23181, 23183 and ~~23186, disclosed by returns required to be filed for income~~ *23186 on or measured by net income of* years beginning prior to January 1, 1965.

(b) Sections 23151, 23181, 23183 and 23186, Articles 4, 5 and 6 of Chapter 2 and Sections 23332, 23364a and 23504 shall not be applied in the computation of taxes on or measured by net income of years beginning on or after January 1, 1965.

(c) Notwithstanding any other provisions of this act, the provisions of Sections 23151, 23181, 23183 and 23186 shall be applicable in the computation of taxes on or measured by net income for years which began on or after January 1, 1965 and terminated by dissolution or withdrawal prior to the effective date of this act.

SEC. 241. Section 23151.5 is added to said code, to read:

23151.5. With the exception of financial corporations, every corporation doing business within the limits of this state and not expressly exempted from taxation by the provisions of the Constitution of this state or by this part, shall annually pay

to the state for each taxable year beginning with the calendar year 1965, and fiscal years beginning in 1965, for the privilege of exercising its corporate franchises within this state, a tax according to or measured by its net income, to be computed at the rate of 6 percent upon the basis of its net income for the taxable year. In any event, each such corporation shall pay annually to the state, for the said privilege, a minimum tax of one hundred dollars ($100).

SEC. 242. Section 23153 of said code is amended to read:

23153. Every corporation not otherwise taxed under this chapter and not expressly exempted by the provisions of this part or the Constitution of this state shall pay annually to the state a tax of one hundred dollars ($100), except that the following corporations shall pay annually to the state a tax of twenty-five dollars ($25):

(a) A credit union not otherwise taxed under this chapter whose gross income is twenty thousand dollars ($20,000) or less.

(b) A corporation formed under the laws of this state whose principal business when formed was gold mining, which is inactive and has not done business within the limits of the state since 1950

Every such domestic corporation taxable under this section shall be subject to the said tax from the date of incorporation until the effective date of dissolution

For the purpose of paragraph (b) a corporation shall not be considered to have done business if it engages in incidental activities, other than mining

SEC. 243. Section 23153 2 is added to said code, to read·

23153 2 A corporation which incorporates or organizes under the laws of this state or qualifies to do business in this state shall thereupon prepay the minimum tax provided in Section 23153, except that any credit union shall thereupon prepay a tax of twenty-five dollars ($25) The prepayment shall be made before the corporation files with the Secretary of State its articles of incorporation or a duly certified copy thereof.

SEC. 244. Section 23153.5 is added to said code, to read:

23153.5. If a corporation which has been subject to the provisions of Chapter 3 commences to do business in this state, its tax shall be computed as follows:

(a) Such corporation shall pay a tax under Chapter 3 for the period prior to the date on which it commences to do such business;

(b) Such corporation shall pay a tax under this chapter measured by its income for the period beginning with the date on which it commences to do such business

~~SEC. 245. Section 23181.2 is added to said code, to read·~~

~~23181.2. A tax is hereby imposed, for the calendar year 1965 and fiscal years beginning in 1965, upon every bank located within the limits of this state according to or measured by its net income, upon the basis of its net income for the~~

~~taxable year at the rate of 6 percent. With respect to the taxation of national banking associations, the state adopts the method numbered (4) authorized by the act of March 25, 1926, amending Section 5219 of the Revised Statutes of the United States, Title 12, Section 548, United States Code.~~

SEC. 246. Section 23181.5 is added to said code, to read:

23181.5. An annual tax is hereby imposed for each taxable year, beginning with the calendar year ~~1966~~ *1965* and fiscal years beginning in ~~1966~~ *1965*, upon every bank located within the limits of this state according to or measure by its net income, upon the basis of its net income for the taxable year at the rate provided under Section 23186.5. With respect to the taxation of national banking associations, the state adopts the method numbered (4) authorized by the act of March 25, 1926, amending Section 5219 of the Revised Statutes of the United States, Title 12, Section 548, United States Code.

SEC. 247. Section 23182.5 is added to said code, to read:

23182.5. The tax imposed under Section ~~23181.2 or~~ 23181.5 upon banks is in lieu of all other taxes and licenses, state, county and municipal upon the said banks except taxes upon their real property.

~~SEC. 248. Section 23183.2 is added to said code, to read:~~

~~23183.2. A tax is hereby imposed for the calendar year 1965 and fiscal years beginning in 1965 upon every financial corporation doing business within the limits of this state and taxable under the provisions of Section 16 of Article XIII of the Constitution of this state, for the privilege of exercising its corporate franchises within this state, according to or measured by its net income, upon the basis of its net income for the taxable year at the rate of 6 percent. A financial corporation shall not be allowed the offset provided by Section 23184 against the tax imposed by this section.~~

SEC. 249. Section 23183.5 is added to said code, to read:

23183.5. An annual tax is hereby imposed for each taxable year, beginning with the calendar year ~~1966~~ *1965* and fiscal years beginning in ~~1966~~ *1965*, upon every financial corporation doing business within the limits of this state and taxable under the provisions of Section 16 of Article XIII of the Constitution of this state, for the privilege of exercising its corporate franchises within this state, according to or measured by its net income, upon the basis of its net income for the taxable year at the rate provided under Section 23186.5.

SEC. 250. Section 23184 of said code is amended to read:

23184. Financial corporations may offset against the franchise tax the amounts paid during the ~~year~~ *preceding* the taxable year to this state or to any county, city, town, or other political subdivisions of the state as personal property taxes, or as license fees or excise taxes for the following privileges:

(a) Operating as personal property brokers or brokers as defined in the Personal Property Brokers Act.

(b) Operating motor vehicles under Part 5 of this division.

(c) Engaging in the business of loaning money, advancing credit, or loaning credit or arranging for the loan of money or advancing of credit or loaning of credit.

(d) Storing, using or otherwise consuming in this state of tangible personal property by savings and loan associations.

The tax on a financial corporation after the allowance of offset shall not be less than 6 percent of its net income for the taxable year nor less than the following minimum tax:

(1) In the case of financial corporations, other than credit unions whose gross income is twenty thousand dollars ($20,000) or less, one hundred dollars ($100).

(2) In the case of credit unions whose gross income is twenty thousand dollars ($20,000) or less, twenty-five dollars ($25).

SEC. 251. Section 23185a of said code is amended to read:

23185a. If a financial corporation, in paying the tax provided for in this chapter, desires to claim an offset in the computation of its tax, the rate provided in Section 23186.5 for financial corporations shall be applied to the offset and the amount so computed shall be added to and included in the tax of the financial corporation.

SEC. 252. Section 23185b of said code is amended to read:

23185b. If the taxes described in Section 23184 are at any time refunded to any taxpayer, and said taxpayer has been allowed an offset under Section 23184 for such taxes against any tax imposed under this chapter, said taxpayer shall pay a tax not subject to offset in an amount equivalent to any offset which has been allowed against any tax at any time imposed under this chapter on account of such refunded taxes. Said taxpayer shall report such taxes in its return for the taxable year in which the same are refunded. The tax herein provided for shall be due and payable in one amount on or before the due date for filing the return. The provisions of this part relating to delinquent taxes shall be applicable to such tax if it is not paid on or before its due date.

SEC. 253. Section 23186.5 is added to said code, to read:

23186.5. The rate of tax on banks and financial corporations, beginning with the calendar year ~~1966~~ *1965* and fiscal years beginning in ~~1966~~, *1965, and ending after the effective date of this act,* shall be 6 percent plus a percentage equal to the percentage of the total amount of net income, allocable to this state, of every corporation taxable under Section 23151.5, other than public utilities as defined in the Public Utilities Act, for the ~~next~~ ~~preceding~~ calendar year or fiscal years ended during such calendar year, required to be paid to this state or its political subdivisions by such corporations as personal property taxes during the ~~preceding~~ calendar year or fiscal years ended in such calendar year; provided, however, that said rate of tax shall not exceed 10 percent. The percentage of the net income of every corporation taxable under Section 23151.5, other than public utilities, as defined in the Pub-

lic Utilities Act, required to be paid to this state or its political subdivisions in personal property taxes shall be determined by ascertaining the ratio which the total amount of such personal property taxes, less 6 percent thereof, bears to the total amount of net income of such corporations allocable to California, increased by the amount of such personal property taxes; provided, however, that if any such corporation sustains a net loss allocable to California the personal property taxes required to be paid by such corporation to this state or its political subdivisions during the preceding calendar year or fiscal years ended during such calendar year shall be considered for the purpose of determining such ratio only to the extent which such personal property taxes exceed such net loss allocable to California.

SEC 253 5. Section 23186.7 is added to said code, to read:

23186 7 The rate of tax on banks and financial corporations, beginning with the calendar year 1966 and fiscal years ended in 1966 shall be 6 percent plus a percentage equal to the percentage of the total amount of net income, allocable to this state, of every corporation taxable under Section 23151.5, other than public utilities as defined in the Public Utilities Act, for the calendar year or fiscal years ended during such calendar year, required to be paid to this state or its political subdivisions by such corporations as personal property taxes during the calendar year or fiscal years ended in such calendar year; provided, however, that said rate of tax shall not exceed 10 percent. The percentage of the net income of every corporation taxable under Section 23151 5, other than public utilities, as defined in the Public Utilities Act, required to be paid to this state or its political subdivisions in personal property taxes shall be determined by ascertaining the ratio which the total amount of such personal property taxes, less 6 percent thereof, bears to the total amount of net income of such corporations allocable to California, increased by the amount of such personal property taxes; provided, however, that if any such corporation sustains a net loss allocable to California the personal property taxes required to be paid by such corporation to this state or its political subdivisions during the preceding calendar year or fiscal years ended during such calendar year shall be considered for the purpose of determining such ratio only to the extent which such personal property taxes exceed such net loss allocable to California.

SEC. 254. Article 3.5 (commencing with Section 23201) is added to Chapter 2 of Part 11 of Division 2 of said code, to read:

Article 3.5. Credit for Prepaid Tax

23201. In the case of a taxpayer whose tax for the first taxable year in which it did business in the state was computed under Sections 23222 to 23224, inclusive (or corresponding sections of prior laws), there shall be allowed as a credit against the tax imposed under Chapter 2 according to or meas-

ured by the net income of the taxable year of dissolution or withdrawal, an amount equal to the amount by which the tax paid for the first taxable year which constituted a full 12 months of doing business exceeded the minimum tax then in effect.

23202 In the case of a taxpayer, which has been a transferee in a reorganization to which Sections 23251 to 23254, inclusive (or corresponding sections of prior laws), were applicable, there shall be allowed as a credit against the tax imposed under Chapter 2 according to or measured by the net income of the taxable year of dissolution or withdrawal, an amount equal to the amount by which any tax paid by prior transferors or by the transferee as a transferor under Sections 23222 to 23224, inclusive (or corresponding sections of prior laws), for the first taxable year of the transferors which constituted a full 12 months of doing business exceeded the minimum tax then in effect The credit allowable under this section shall be in addition to any credit which may be allowable to the taxpayer under Section 23201

23203 The credits provided by Sections 23201 and 23202 shall be allowable only upon submission by the taxpayer of evidence establishing to the satisfaction of the Franchise Tax Board the amount of the tax paid pursuant to Sections 23222 to 23224, inclusive (or corresponding sections of prior laws), and with respect to which the credit is claimed

Should the credits allowable to a taxpayer under Sections 23201 and 23202 exceed the amount of tax due from the taxpayer under Chapter 2 for the taxable year of dissolution or withdrawal, the excess of the credits over the tax shall not be deemed an overpayment which is subject to refund under the provisions of Chapter 22.

23204 No credit shall be allowed or made after four years from the last day prescribed for filing the return for the taxable year of dissolution or withdrawal, or after one year from the date of the overpayment, whichever period expires the later, unless before the expiration of such period a claim therefor is filed by the taxpayer.

23205 Notwithstanding the provisions of Sections 23201 and 23202, no credit shall be allowed to any corporation that discontinued business in any prior year and did not dissolve or withdraw from the state, but resumed doing business in any succeeding taxable year beginning or or after January 1, 1965, if it did not pay a tax measured by the net income of either the year of cessation of business or the preceding calendar or fiscal year.

SEC 255 Section 23301 of said code is amended to read·

23301 Except for the purpose of amending the articles of incorporation to set forth a new name, the corporate powers, rights and privileges of a domestic taxpayer shall be suspended, and the exercise of the corporate powers, rights and privileges of a foreign taxpayer in this state shall be forfeited if any of the following conditions occur:

(a) If any tax, penalty or interest, or any portion thereof, which is due and payable at the time the return is required to be filed, is not paid on or before 6 o'clock p m on the last day of the 12th month after the close of the taxable year, or

(b) If any tax, penalty or interest, or any portion thereof, other than jeopardy or fraud assessments, due and payable upon notice and demand from the Franchise Tax Board, is not paid on or before 6 o'clock p m on the last day of the 11th month following the due date of said tax; or

(c) If any jeopardy or fraud assessment, or any interest or penalty thereon, is not paid within 40 days from the date such tax, penalty and interest are due and payable upon notice and demand from the Franchise Tax Board, unless the bond required by Section 25761a is filed to stay the collection of said tax, penalty and interest, and said tax, interest and penalty are paid within 60 days after notice by the Franchise Tax Board on the taxpayer's petition for reassessment.

SEC 256. Section 23333 of said code is amended to read:

23333 For the calendar year ~~1966~~ *1965* and fiscal years beginning in ~~1966,~~ *1965 and ending after the effective date of the amendments to this section enacted at the 1965 Regular Session of the Legislature,* a taxpayer subject to Section 23186a shall, if it dissolves or withdraws prior to the date the rate is determined under Section 23186a, pay a tax at the maximum rate prescribed in said Section 23186 5, if the rate is subsequently determined to be less than the maximum prescribed in Section 23186 5, a refund shall, within thirty (30) days of such determination, be made as prescribed in Article 1 of Chapter 22.

SEC. 257 Section 23361 of said code is amended to read:

23361 "Affiliated group" means one or more chains of corporations connected through stock ownership with a common parent corporation if during the period when the income was accrued or realized and on the 16th day of the first month after the close of the taxable year—

(a) At least 80 percent of the stock of each of the corporations, except the common parent corporation, is owned directly by one or more of the other corporations, and

(b) The common parent corporation owns directly at least 80 percent of the stock of at least one of the other corporations; and

(c) Each of the corporations is either (1) a corporation whose principal business is that of a common carrier by railroad or (2) a corporation the assets of which consist principally of stock in such corporations and which does not itself operate a business other than that of a common carrier by railroad For the purpose of determining whether the principal business of a corporation is that of a common carrier by railroad, if a common carrier by railroad has leased its railroad properties and such properties are operated as such by another common carrier by railroad, the business of receiving rents for

such railroad properties shall be considered as the business of a common carrier by railroad.

Except in paragraph (c) "stock" does not include non-voting stock which is limited and preferred as to dividends.

SEC. 258. Section 23362 of said code is amended to read:

23362. An affiliated group, subject to the provisions of this article, shall have the privilege of making a consolidated return for the taxable year in lieu of separate returns The making of a consolidated return shall be upon the condition that all the corporations, which have been members of the affiliated group at any time during the taxable year for which the return is made, consent to all regulations under Section 23363 prescribed prior to the making of such return and the making of a consolidated return shall be considered as such consent. In the case of a corporation, which is a member of the affiliated group for a fractional part of the taxable year, the consolidated return shall include the income of such corporation for such part of the taxable year as it is a member of the affiliated group.

SEC. 259. Section 23501 of said code is amended to read:

23501. There shall be imposed upon every corporation for each taxable year, a tax at the rate of 6 percent upon its net income derived from sources within this state on or after January 1, 1937, other than income for any period for which the corporation is subject to taxation under Chapter 2 of this part, according to or measured by its net income.

SEC. 260. Section 23505 is added to said code, to read:

23505 Where a corporation formerly subject to tax under Chapter 2 becomes subject to tax under Chapter 3, the tax for the period prior to the date on which the change occurs will be assessed under Chapter 2, and the tax for the period beginning with the date on which the change occurs will be assessed under Chapter 3.

SEC. 261. Section 23571 of said code is amended to read:

23571. (a) Except for the purpose of amending the articles of incorporation to set forth a new name, the corporate powers, rights and privileges of a domestic taxpayer shall be suspended and shall not be exercised for any purpose or in any manner in this state:

(1) If any tax, penalty or interest, or any portion thereof, which is due and payable at the time the return is required to be filed is not paid on or before 6 o'clock p m. of the last day of the 12th month after the close of the taxable year; or

(2) If any tax, penalty or interest, or any portion thereof, other than jeopardy or fraud assessments, due and payable upon notice and demand from the Franchise Tax Board, is not paid on or before 6 o'clock p.m. on the last day of the 11th month following the due date of said tax; or

(3) If any jeopardy or fraud assessment, or any interest or penalty thereon, is not paid within 40 days from the date such tax, penalty and interest are due and payable upon notice and demand from the Franchise Tax Board, unless the bond re-

quired by Section 25761a is filed to stay the collection of said tax, penalty and interest, and said tax, interest and penalty are paid within 60 days after notice by the Franchise Tax Board on the taxpayer's petition for reassessment.

(b) Any taxpayer which has been suspended under subsection (a), may be revived in the manner provided for by Sections 23305 and 23305a.

SEC 262 Section 23701n of said code is amended to read:

23701n. (1) A trust or trusts forming part of a plan providing for the payment of supplemental unemployment compensation benefits, if—

(A) Under the plan, it is impossible, at any time prior to the satisfaction of all liabilities with respect to employees under the plan, for any part of the corpus or income to be (within the taxable year or thereafter) used for, or diverted to, any purpose other than the providing of supplemental unemployment compensation benefits,

(B) Such benefits are payable to employees under a classification which is set forth in the plan and which is found by the Franchise Tax Board not to be discriminatory in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees, and

(C) Such benefits do not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees A plan shall not be considered discriminatory within the meaning of this clause merely because the benefits received under the plan bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of the employees covered by the plan.

(2) In determining whether a plan meets the requirements of subparagraph (1), any benefits provided under any other plan shall not be taken into consideration, except that a plan shall not be considered discriminatory—

(A) Merely because the benefits under the plan which are first determined in a nondiscriminatory manner within the meaning of subparagraph (1) are then reduced by any sick, accident, or unemployment compensation benefits received under state or federal law (or reduced by a portion of such benefits if determined in a nondiscriminatory manner), or

(B) Merely because the plan provides only for employees who are not eligible to receive sick, accident, or unemployment compensation benefits under state or federal law the same benefits (or a portion of such benefits if determined in a nondiscriminatory manner) which such employees would receive under such laws if such employees were eligible for such benefits, or

(C) Merely because the plan provides only for employees who are not eligible under another plan (which meets the requirements of subparagraph (1)) of supplemental unemployment compensation benefits provided wholly by the employer

the same benefits (or a portion of such benefits if determined in a nondiscriminatory manner) which such employees would receive under such other plan if such employees were eligible under such other plan, but only if the employees were eligible under both plans would make a classification which would be nondiscriminatory within the meaning of subparagraph (1).

(3) A plan shall be considered to meet the requirements of subparagraph (1) during the whole of any year of the plan if on one day in each quarter it satisfies such requirements.

(4) The term "supplemental unemployment compensation benefits" means only—

(A) Benefits which are paid to an employee because of his involuntary separation from the employment of the employer (whether or not such separation is temporary) resulting directly from a reduction in force, the discontinuance of a plant or operation, or other similar conditions, and

(B) Sick and accident benefits subordinate to the benefits described in clause (A).

(5) Exemption shall not be denied under this article to any organization entitled to such exemption as an association described in Section 23701i merely because such organization provides for the payment of supplemental unemployment benefits (as defined in subparagraph (4)(A)).

SEC 263. Section 23701o is added to said code, to read

23701o A trust or plan which meets the requirements of Public Law 87-792, 76 U.S. Stats 809, approved October 10, 1962 (The Self-Employed Individuals Tax Retirement Bill of 1962), but only if such trust or plan is not exempt from taxation under Section 17631.

SEC. 264. Section 23731 of said code is amended to read:

23731 Every organization described in Section 23731a shall be subject to the tax imposed under Chapter 2 or Chapter 3 upon its "Article 2" net income as defined in Section 23731b.

SEC. 265. Section 23734a of said code is amended to read·

23734a If a publishing business carried on by an organization during an annual accounting period beginning before January 1, 1954, is, without regard to this sentence, an unrelated trade or business, but before the beginning of the third succeeding annual accounting period the business is carried on by it (or by a successor who acquired such business in a liquidation which would constitute a tax-free exchange under Section 24502) in such manner that the conduct thereof is substantially related to the exercise or performance by such organization (or such successor) of its educational or other purpose or function described in Section 23701d, such publishing business shall not be considered, for the taxable year, as an unrelated trade or business.

SEC 266 Section 23736 3 of said code is amended to read:

23736 3. An organization described in Section 23701n or Section 23701d, except as specified in Section 23736, shall be denied exemption under Section 23736 2 only for taxable years subsequent to the taxable years during which it is notified by

the Franchise Tax Board that it has engaged in a prohibited transaction, unless such organization entered into such prohibited transaction with the purpose of diverting corpus or income of the organization from its exempt purposes, and such transaction involved a substantial part of the corpus or income of such organization

SEC. 267. Section 23736.4 of said code is amended to read:

23736.4. Any organization denied exemption under Section 23701d or Section 23701n by reason of the provisions of Section 23736.2 with respect to any taxable year following the taxable year in which notice of denial of exemption was received, may, under regulations prescribed by the Franchise Tax Board, file claim for exemption, and if the Franchise Tax Board pursuant to such regulations, is satisfied that such organizations will not knowingly again engage in a prohibited transaction, such organization shall be exempt with respect to taxable years subsequent to the year in which such claim is filed

SEC. 268. Section 23771 of said code is amended to read:

23771. Every organization, otherwise exempt under Article 1 of this chapter, but having income of the character described in Article 2, shall file a return, verified by an executive officer under penalties of perjury in the form prescribed by the Franchise Tax Board, within 2 months and 15 days of the close of the taxable year, reporting its income from such activities and shall pay a tax of 6 percent on its Article 2 net income as defined in Section 23731.b

SEC. 269. Section 23772 of said code is amended to read:

23772. Every organization exempt under Article 1 except:

(a) A religious organization exempt under Section 23701d;

(b) An educational organization exempt under Section 23701d, if such organization normally maintains a regular faculty and curriculum and normally has a regularly organized body of pupils or students in attendance at the place where its educational activities are regularly carried on; or

(c) A charitable organization, or an organization for the prevention of cruelty to children or animals, exempt under Section 23701d, if such organization is supported, in whole or in part, by funds contributed by the United States or any state or political subdivision thereof, or is primarily supported by contributions of the general public; or

(d) An organization exempt under Section 23701d, if such organization is operated, supervised, or controlled by or in connection with a religious organization described in subsection (a); or

(e) An organization exempt solely under Section 23701b, shall file an annual return with the Franchise Tax Board on or before the 15th day of the fifth full calendar month following the close of the taxable year setting forth—

(1) Its gross receipts for the year,

(2) Its expenses attributable to such income and incurred within the year,

(3) Its disbursement within the year for the purpose for which it is exempt,

(4) Its accumulation of income within the year,

(5) Its aggregate accumulations of income at the beginning of the year,

(6) Its disbursements out of principal in the current and prior years for the purposes for which it is exempt,

(7) A balance sheet showing its assets, liabilities and net worth as of the beginning of such year, and

(8) Such other information as the Franchise Tax Board may by regulation prescribe.

(f) Any organization exempt from taxes under Article 1 (commencing at Section 23701) of Chapter 4 of this part shall pay the minimum tax provided for by Section 23153 for any year or years for which it fails to file, on or before the due date, the annual return required by this section.

SEC. 270 Section 24273 of said code is amended to read:

24273. (a) Amounts received as loans from the Commodity Credit Corporation shall, at the election of the taxpayer, be considered as income and shall be included in gross income for the taxable year in which received

(b) If a taxpayer exercises the election provided for in subsection (a) for any taxable year, then the method of computing income so adopted shall be adhered to with respect to all subsequent taxable years unless with the approval of the Franchise Tax Board a change to a different method is authorized

SEC. 271. Section 24273.5 of said code is amended to read:

24273 5 (a) Noncash patronage allocations from farmers' cooperative and mutual associations (whether paid in capital stock, revolving fund certificates, retain certificates, certificates of indebtedness, letters of advice or in some other manner that discloses the dollar amount of such noncash patronage allocations) may, at the election of the taxpayer, be considered as income and included in gross income for the taxable year in which received.

(b) If a taxpayer exercises the election provided for in subdivision (a), the amount included in gross income shall be the face amount of such allocations.

(c) If a taxpayer elects to exclude noncash patronage allocations from gross income for the taxable year in which received, such allocations shall be included in gross income in the year that they are redeemed or realized upon.

(d) If a taxpayer exercises the election provided for in subdivision (c), the face amount of such noncash patronage allocations shall be disclosed in the return made for the taxable year in which such noncash patronage allocations were received

(e) If a taxpayer exercises the election provided for in subdivision (a) or (c) for any taxable year, then the method of computing income so adopted shall be adhered to with respect to all subsequent taxable years unless with the approval of the

Franchise Tax Board a change to a different method is authorized

(f) If a taxpayer has made the election provided for in subdivision (e), then (1) the statutory period for the assessment of a deficiency for any taxable year in which the amount of any noncash patronage allocations are realized shall not expire prior to the expiration of four years from the date the Franchise Tax Board is notified by the taxpayer (in such manner as the Franchise Tax Board may by regulation prescribe) of the realization of gain on such allocations, and (2) such deficiency may be assessed prior to the expiration of such four-year period, notwithstanding the provisions of Section 25663 or the provisions of any other law or rule of law which would otherwise prevent such assessment.

SEC. 272 Section 24307 of said code is amended to read:

24307. (a) No amount shall be included in gross income by reason of the discharge, in whole or in part, within the taxable year, of any indebtedness for which the taxpayer is liable, or subject to which the taxpayer holds property, if—

(1) The indebtedness was incurred or assumed—

(A) By a corporation; or

(B) By an individual in connection with property used in his trade or business; and

(2) Such taxpayer makes and files a consent to the regulations prescribed under Section 24918 (relating to adjustment of basis) then in effect at such time and in such manner as the Franchise Tax Board by regulations prescribes.

In such case, the amount of any income of such taxpayer attributable to any unamortized premium (computed as of the first day of the taxable year in which such discharge occurred) with respect to such indebtedness shall not be included in gross income, and the amount of the deduction attributable to any unamortized discount (computed as of the first day of the taxable year in which such discharge occurred) with respect to such indebtedness shall not be allowed as a deduction.

(b) No amount shall be included in gross income by reason of the discharge, cancellation, or modification, in whole or in part, within the taxable year, of any indebtedness of a railroad corporation, as defined in Section 77(m) of the Bankruptcy Act (11 U.S.C. 205(m)), if such discharge, cancellation, or modification is effected pursuant to an order of a court in a receivership proceeding or in a proceeding under Section 77 of the Bankruptcy Act commenced before January 1, 1961. In such cases, the amount of any income of the taxpayer attributable to any unamortized premium (computed as of the first day of the taxable year in which such discharge occurred) with respect to such indebtedness shall not be included in gross income, and the amount of the deduction attributable to any unamortized discount (computed as of the first day of the taxable year in which such discharge occurred) with respect to such indebtedness shall not be allowed as a deduction. Subsec-

tion (a) of this section shall not apply with respect to any discharge of indebtedness to which this subsection applies

SEC 273 Section 24310 of said code is amended to read:

24310 (a) Gross income does not include income attributable to the recovery during the taxable year of a bad debt, prior tax, or delinquency amount, to the extent of the amount of the recovery exclusion with respect to such debt, tax, or amount

(b) For purposes of subsection (a)—

(1) The term "bad debt" means a debt on account of the worthlessness or partial worthlessness of which a deduction was allowed for a prior year.

(2) The term "prior tax" means a tax on account of which a deduction or credit was allowed for a prior year

(3) The term "delinquency amount" means an amount paid or accrued on account of which a deduction or credit was allowed for a prior year and which is attributable to failure to file return with respect to a tax, or pay a tax, within the time required by the law under which the tax is imposed, or to failure to file return with respect to a tax or pay a tax

(4) The term "recovery exclusion," with respect to a bad debt, prior tax, or delinquency amount, means the amount, determined in accordance with regulations prescribed by the Franchise Tax Board, of the deductions or credits allowed, on account of such bad debt, prior tax, or delinquency amount, which did not result in a reduction of the taxpayer's tax under this part or corresponding provisions of prior tax laws, reduced by the amount excludable in previous annual accounting periods with respect to such debt, tax or amount under this section.

SEC 274 Section 24343 of said code is amended to read:

24343 (a) There shall be allowed as a deduction all the ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business, including—

(1) A reasonable allowance for salaries or other compensation for personal services actually rendered; and

(2) Rentals or other payments required to be made as a condition to the continued use or possession, for purposes of the trade or business, of property to which the taxpayer has not taken or is not taking title or in which it has no equity.

(b) No deduction shall be allowed under subsection (a) for any expenses paid or incurred if the payment thereof is made, directly or indirectly, to an official or employee of a foreign country, and if the making of the payment would be unlawful under the laws of the United States if such laws were applicable to such payment and to such official or employee.

(c) No deduction shall be allowed under subsection (a) for any contribution or gift which would be allowable as a deduction under Section 24357 were it not for the percentage limitations, or the requirements as to the time of payment, set forth in Sections 24357 and 24358.

(d) For purposes of this part, whenever the amount of capital contributions evidenced by a share of stock issued pursuant to Section 303 (c) of the Federal National Mortgage Association Charter Act (12 U.S C . Section 1718) exceeds the fair market value of the stock as of the issue date of such stock, the initial holder of the stock shall treat the excess as ordinary and necessary expenses paid or incurred during the taxable year in carrying on a trade or business

SEC 275. Section 24344 of said code is amended to read:

24344. (a) Except as limited by subsection (b), there shall be allowed as a deduction all interest paid or accrued during the taxable year on indebtedness of the taxpayer

(b) If income of the taxpayer is determined by the allocation formula contained in Section 25101, the interest deductible shall be an amount equal to interest income subject to allocation by formula, plus the amount, if any, by which the balance of interest expense exceeds interest and dividend income (except dividends deductible under the provisions of Section 24402) not subject to allocation by formula Interest expense not included in the preceding sentence shall be directly offset against interest and dividend income (except dividends deductible under the provisions of Section 24402) not subject to allocation by formula.

SEC. 276. Section 24345 of said code is amended to read:

24345. There shall be allowed as a deduction—

(a) Taxes or licenses paid or accrued during the taxable year except·

(1) Taxes paid to the state under this part.

(2) Taxes on or according to or measured by income or profits paid or accrued within the taxable year imposed by the authority of

(A) The government of the United States or any foreign country; or

(B) Any state, territory, county, school district, municipality, or other taxing subdivision of any state or territory.

(3) Taxes assessed against local benefits of a kind tending to increase the value of the property assessed, but this does not exclude the allowance as a deduction of so much of the taxes assessed against local benefits as is properly allocable to maintenance or interest charges. Nor does this exclude the allowance of any irrigation or other water district taxes or assessments which are levied for the payment of the principal of any improvement or other bonds for which a general assessment on all lands within the district is levied as distinguished from a special assessment levied on part of the area within the district.

(4) Federal stamp taxes (not described in subsections (a) 2 or (3); but this subsection shall not prevent such taxes from being deducted under Section 24343 (relating to trade or business expenses).

(b) (1) In this subsection, "retail sales tax" means a tax imposed by any state, territory, district, or possession of the United States, or any political subdivision thereof, upon persons engaged in:

(A) Selling tangible personal property at retail, which is measured by the gross sales price or the gross receipts from the sale or which is a stated sum per unit of the property sold

(B) Furnishing services at retail, which is measured by the gross receipts for furnishing the services.

(2) If the amount of a retail sales tax is separately stated, to the extent that the amount so stated is paid by the purchaser (otherwise than in connection with the purchaser's trade or business) the amount shall be allowed as a deduction in computing the net income of the purchaser as if the amount were a tax imposed upon and paid by the purchaser.

SEC. 277. Section 24346 of said code is amended to read.

24346. (a) For purposes of Section 24345(a), if real property is sold during any real property tax year, then—

(1) So much of the real property tax as is properly allocable to that part of such year which ends on the day before the date of the sale shall be treated as a tax imposed on the seller; and

(2) So much of such tax as is properly allocable to that part of such year which begins on the date of the sale shall be treated as a tax imposed on the purchaser

(b) (1) In the case of any sale of real property; if—

(A) A bank or corporation may not, by reason of its method of accounting, deduct any amount for taxes unless paid; and

(B) The other party to the sale is (under the law imposing the real property tax) liable for the real property tax for the real property tax year;

then for purposes of Section 24345(a) the bank or corporation shall be treated as having paid, on the date of the sale, so much of such tax as, under subsection (a), is treated as imposed on the bank or corporation. For purposes of the preceding sentence, if neither party is liable for the tax, then the party holding the property at the time the tax becomes a lien on the property shall be considered liable for the real property tax for the real property tax year.

(2) Subsection (a) shall apply to annual accounting periods beginning after December 31, 1960, but only in the case of sales after December 31, 1960.

(3) Subsection (a) shall not apply to any real property tax, to the extent that such tax was allowable as a deduction under the Bank and Corporation Tax Law of 1954 to the seller for an annual accounting period which began before January 1, 1961

(4) In the case of any sale of real property, if the bank or corporation's net income for the taxable year during which the sale occurs is computed under an accrual method of accounting, and if no election under Section 24681(b) (relat-

ing to the accrual of real property taxes) applies, then, for purposes of Section 24345(a), that portion of such tax which—

(A) Is treated, under subsection (a), as imposed on the bank or corporation; and

(B) May not, by reason of the bank or corporation's method of accounting, be deducted by the bank or corporation for any taxable year, shall be treated as having accrued on the date of the sale.

SEC 278 Section 24347 of said code is amended to read:

24347 (a) There shall be allowed as a deduction any loss sustained during the taxable year and not compensated for by insurance or otherwise

(b) For purposes of subsection (a), the basis for determining the amount of the deduction for any loss shall be the adjusted basis provided in Section 24911 for determining the loss from the sale or other disposition of property.

(c) For purposes of subsection (a), any loss arising from theft shall be treated as sustained during the taxable year in which the taxpayer discovers such loss

(d) If any security becomes worthless during the taxable year, the loss resulting therefrom shall, for purposes of this part, be treated as a loss from its sale or exchange, on the last day of the taxable year

SEC 279. Section 24348 of said code is amended to read:

24348. There shall be allowed as a deduction debts which become worthless within the taxable year; or, in the discretion of the Franchise Tax Board, a reasonable addition to a reserve for bad debts When satisfied that a debt is recoverable ~~in part only~~ *only in part* the Franchise Tax Board may allow such debt, in an amount not in excess of the part charged off within the taxable year, as a deduction, provided, however, that if a debt was actually worthless prior to January 1, 1943, but was not ascertained to be worthless and charged off prior to said date, a deduction may be taken therefor during the first annual accounting period ending after December 31, 1942; and, provided, that if a portion of a debt is claimed and allowed as a deduction in any year no deduction shall be allowed in any subsequent year for any portion of the debt which in any prior year was charged off, regardless of whether claimed as a deduction in such prior year.

SEC. 280 Section 24349 of said code is amended to read.

24349. (a) There shall be allowed as a depreciation deduction a reasonable allowance for the exhaustion, wear and tear (including a reasonable allowance for obsolescence)—

(1) Of property used in the trade or business; or

(2) Of property held for the production of income.

(b) For annual accounting periods ending after December 31, 1958, the term "reasonable allowance" as used in subsection (a) shall include (but shall not be limited to) an allowance computed in accordance with regulations prescribed by the Franchise Tax Board, under any of the following methods

(1) The straight line method;

(2) The declining balance method, using a rate not exceeding twice the rate which would have been used had the annual allowance been computed under the method described in paragraph (1);

(3) The sum of the years-digits method; and

(4) Any other consistent method productive of an annual allowance which, when added to all allowances for the period commencing with the taxpayer's use of the property and including the taxable year, does not, during the first two-thirds of the useful life of the property, exceed the total of such allowances which would have been used had such allowances been computed under the method described in paragraph (2).

Nothing in this subsection shall be construed to limit or reduce an allowance otherwise allowable under subsection (a).

SEC. 281 Section 24351 of said code is amended to read:

24351. Where, under regulations prescribed by the Franchise Tax Board, the taxpayer and the Franchise Tax Board have, after the date of enactment of this section, entered into an agreement in writing specifically dealing with the useful life and rate of depreciation of any property, the rate so agreed upon shall be binding on both the taxpayer and the Franchise Tax Board in the absence of facts or circumstances not taken into consideration in the adoption of such agreement. The responsibility of establishing the existence of such facts and circumstances shall rest with the party initiating the modification Any change in the agreed rate and useful life specified in the agreement shall not be effective for taxable years, before the taxable year in which notice in writing by certified mail or registered mail is served by the party to the agreement initiating such change.

SEC 282. Section 24356 of said code is amended to read:

24356. (a) In the case of Section 24356 property, the term "reasonable allowance" as used in Section 24349(a) may, at the election of the taxpayer, include an allowance, for the first taxable year for which a deduction is allowable under Sections 24349 through 24354 to the taxpayer with respect to such property, of 20 percent of the cost of such property

(b) If in any one taxable year the cost of Section 24349 property with respect to which the taxpayer may elect an allowance under subsection (a) for such taxable year exceeds ten thousand dollars ($10,000), then subsection (a) shall apply with respect to those items selected by the taxpayer, but only to the extent of an aggregate cost of ten thousand dollars ($10,000).

(c) (1) The election under this section for any taxable year shall be made within the time prescribed by law (including extensions thereof) for filing the return for such taxable year. The election shall be made in such manner as the Franchise Tax Board may by regulations prescribe.

(2) Any election made under this section may not be revoked except with the consent of the Franchise Tax Board

(d) (1) For purposes of this section, the term "Section 24356 property" means tangible personal property—

(A) Of a character subject to the allowance for depreciation under Sections 24349 through 24354,

(B) Acquired by purchase after December 31, 1958, for use in a trade or business, and

(C) With a useful life (determined at the time of such acquisition) of six years or more.

(2) For purposes of paragraph (1), the term "purchase" means any acquisition of property, but only if—

(A) The property is not acquired from a person whose relationship to the person acquiring it would result in the disallowance of losses under Sections 24427 through 24429 (but, in applying Sections 24428 and 24429 for purposes of this section, paragraph (d) of Section 24429 shall be treated as providing that the family of an individual shall include only his spouse, ancestors, and lineal descendants),

(B) The property is not acquired by one member of an affiliated group from another member of the same affiliated group, and

(C) The basis of the property in the hands of the person acquiring it is not determined in whole or in part by reference to the adjusted basis of such property in the hands of the person from whom acquired.

(3) For purposes of this section, the cost of property does not include so much of the basis of such property as is determined by reference to the basis of other property held at any time by the person acquiring such property.

(4) For purposes of subsection (b) of this section—

(A) All members of an affiliated group shall be treated as one taxpayer, and

(B) The Franchise Tax Board shall apportion the dollar limitation contained in such subsection (b) among the members of such affiliated group in such manner as it shall by regulations prescribe.

(5) For purposes of paragraphs (2) and (4), the term "affiliated group" has the meaning assigned to it by Section 1504 of the Internal Revenue Code of 1954, except that, for such purposes, the phrase "more than 50 percent" shall be substituted for the phrase "at least 80 percent" each place it appears in Section 1504(a) of the Internal Revenue Code of 1954.

(6) In applying Section 24353, the adjustment under Section 24916(b)(1) resulting by reason of an election made under this section with respect to any Section 24356 property shall be made before any other deduction allowed by Section 24349(a) is computed.

(e) The Franchise Tax Board shall prescribe such regulations as may be necessary to carry out the purposes of this section.

SEC 283 Section 24356 1 of said code is amended to read:

24356 1 (a) Any taxpayer who held retirement-straight line property on his 1959 adjustment date may elect to have this section apply. Such an election shall be made at such time and in such manner as the Franchise Tax Board shall prescribe. Any election under this section shall be irrevocable and shall apply to all retirement-straight line property as hereinafter provided in this section (including such property for periods when held by predecessors of the taxpayer).

(b) For purposes of this section, the term "retirement-straight line property" means any property of a kind or class with respect to which the taxpayer or a predecessor (under the terms and conditions prescribed for it by the Franchise Tax Board) for any annual accounting period beginning after December 31, 1940, and before January 1, 1959, changed from the retirement to the straight line method of computing the allowance of deductions for depreciation

(c) If the taxpayer has made an election under this section, then in determining the adjusted basis on the 1959 adjustment date of all retirement-straight line property held by the taxpayer, in lieu of the adjustment for depreciation provided in Section 24916(b)(1) or (2) the following adjustments shall be made (effective as of its 1959 adjustment date) in respect of all periods before the 1959 adjustment date

(1) For depreciation sustained before March 1, 1913, on retirement-straight line property held by the taxpayer or a predecessor on such date for which cost was or is claimed as basis and which either—

(A) Was retired by the taxpayer or a predecessor before the changeover date, but only if (i) a deduction was allowed in computing net income by reason of such retirement, and (ii) such deduction was computed on the basis of cost without adjustment for depreciation sustained before March 1, 1913 In the case of any such property retired during any annual accounting period beginning after December 31, 1929, the adjustment under this subparagraph shall not exceed that portion of the amount attributable to depreciation sustained before March 1, 1913, which resulted or would have resulted, had the taxpayer been subject to this part during such years (by reason of the deduction so allowed) in a reduction in taxes under this part or prior tax laws.

(B) Was held by the taxpayer or a predecessor on the changeover date This subparagraph shall not apply to property to which paragraph (2) applies

The adjustment determined under this paragraph shall be allocated (in the manner prescribed by the Franchise Tax Board) among all retirement-straight line property held by the taxpayer on its 1959 adjustment date.

(2) For that portion of the reserve prescribed by the Commissioner of Internal Revenue and which was also adopted by the Franchise Tax Board in connection with the changeover which was applicable to property—

(A) Sold, or

(B) With respect to which a deduction was allowed for tax purposes by reason of casualty or "abnormal" retirement in the nature of special obsolescence, if such sale occurred in, or such deduction was allowed for a period on or after the changeover date and before the taxpayer's 1959 adjustment date

(3) For depreciation allowable, under the terms and conditions prescribed by the commissioner which terms and conditions are equally applicable under this part in connection with the changeover, for all periods on and after the changeover date and before the taxpayer's 1959 adjustment date.

This subsection shall apply only with respect to annual accounting periods beginning after December 31, 1958.

(d) If the taxpayer has made an election under this section, then in determining the adjusted basis of any retirement-straight line property as of any time on or after the changeover date and before the taxpayer's 1959 adjustment date, in lieu of the adjustments for depreciation provided in Section 24916(b)(1) or (2) and the corresponding provisions of prior laws, the following adjustments shall be made

(1) For the amount of the reserve prescribed by the commissioner (and determined by the Franchise Tax Board to be applicable under this part) in connection with the changeover.

(2) For the depreciation allowable under the terms and conditions prescribed by the commissioner (and determined by the Franchise Tax Board to be applicable under this part) in connection with the changeover

This subsection shall apply only with respect to annual accounting periods beginning on or after the changeover date and before the taxpayer's 1959 adjustment date

(e) For purposes of this section—

(1) The term "depreciation" means exhaustion, wear and tear, and obsolescence.

(2) The term "changeover" means a change from the retirement to the straight line method of computing the allowance of deductions for depreciation

(3) The term "changeover date" means the first day of the first annual accounting period for which the changeover was effective

(4) The term "1959 adjustment date" means, in the case of any taxpayer, the first day of his first annual accounting period beginning after December 31, 1958

(5) The term "predecessor" means any person from whom property of a kind or class to which this section refers was acquired, if the basis of such property is determined by reference to its basis in the hands of such person Where a series of transfers of property has occurred and where in each instance the basis of the property was determined by reference to its basis in the hands of the prior holder, the term includes each such prior holder.

(6) The term "commissioner" means the Commissioner of Internal Revenue.

SEC 284. Section 24357 of said code is amended to read:

24357. (a) There shall be allowed as a deduction any charitable contribution (as defined in Section 24359) payment of which is made within the taxable year. A charitable contribution shall be allowable as a deduction only if verified under regulations prescribed by the Franchise Tax Board

(b) In the case of a bank or corporation reporting its income on the accrual basis, if—

(1) The board of directors authorizes a charitable contribution during any taxable year; and

(2) Payment of such contribution is made after the close of such taxable year and on or before the 15th day of the third month following the close of such taxable year,

then the bank or corporation may elect to treat such contribution as paid during such taxable year. The election may be made only at the time of the filing of the return for such taxable year, and shall be signified in such manner as the Franchise Tax Board shall by regulations prescribe

SEC 285. Section 24358 of said code is amended to read:

24358 In the case of a bank or corporation, the total deductions under Section 24357 for any taxable year shall not exceed 5 percent of the taxpayer's net income computed without regard to—

(a) Sections 24357, 24358 or 24359, inclusive;

(b) Article 2 (commencing at Section 24401) of Chapter 7 (except Sections 24407 to 24409, inclusive).

SEC 286 Section 24360 of said code is amended to read:

24360. In the case of any bond, as defined in Section 24363, the following rules shall apply to the amortizable bond premium (determined under Section 24361 on the bond):

(a) In the case of a bond, the amount of the amortizable bond premium for the taxable year shall be allowed as a deduction.

(b) In the case of any bond the interest on which is excludable from gross income under Chapter 3, no deduction shall be allowed for the amortizable bond premium for the taxable year.

SEC 287. Section 24361 of said code is amended to read·

24361. (a) For purposes of subsection (b), the amount of bond premium, in the case of the holder of any bond, shall be determined—

(1) With reference to the amount of the basis (for determining loss on sale or exchange) of such bond:

(2) With reference to the amount payable on maturity or on earlier call date; and

(3) With adjustments proper to reflect unamortized bond premium, with respect to the bond, for the period before the date as of which Section 24360 becomes applicable with respect to the taxpayer with respect to such bond.

In no case shall the amount of bond premium on a convertible bond include any amount attributable to the conversion features of the bond.

(b) The amortizable bond premium of the taxable year shall be the amount of the bond premium attributable to such year. In the case of a bond described in Section 24362(a) issued after January 22, 1951, and acquired after January 22, 1954, which has a call date not more than three years after the date of such issue, the amount of bond premium attributable to the taxable year in which the bond is called shall include an amount equal to the excess of the amount of the adjusted basis (for determining loss on sale or exchange) of such bond as of the beginning of the taxable year over the amount received on redemption of the bonds or (if greater) the amount payable on maturity.

(c) The determinations required under subsections (a) and (b) shall be made—

(1) In accordance with the method of amortizing bond premium regularly employed by the holder of the bond, if such method is reasonable;

(2) In all other cases, in accordance with regulations prescribing reasonable methods of amortizing bond premium prescribed by the Franchise Tax Board.

SEC. 288. Section 24362 of said code is amended to read:

24362. (a) Sections 24360 to 24363, inclusive, shall apply to the bonds only if the taxpayer has elected to have these ~~sections apply, in the case of any taxpayer, bonds the interest on which is not excludable from gross income~~ *sections apply*.

(b) The election authorized under this section shall be made in accordance with such regulations as the Franchise Tax Board shall prescribe. If such election is made with respect to any bond (described in subsection (a)) of the taxpayer, it shall also apply to all such bonds held by the taxpayer at the beginning of the first annual accounting period to which the election applies and to all such bonds thereafter acquired by him and shall be binding for all subsequent annual accounting periods with respect to all such bonds of the taxpayer, unless, on application by the taxpayer, the Franchise Tax Board permits him, subject to such conditions as the Franchise Tax Board deems necessary, to revoke such election.

SEC. 289. Section 24363 of said code is amended to read:

24363. For purposes of Sections 24360 to 24363, inclusive, the term "bond" means any bond, debenture, note, or certificate or other evidence of indebtedness, issued by any corporation and bearing interest (including any like obligation issued by a government or political subdivision thereof), but does not include any such obligation which constitutes stock in trade of the taxpayer or any such obligation of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or any such obligation held by the taxpayer primarily for sale to customers in the ordinary course of its trade or business.

SEC. 290. Section 24364 of said code is amended to read:

24364. Notwithstanding Article 3, Chapter 7, all expenditures (other than expenditures for the purchase of land or depreciable property or for the acquisition of circulation through the purchase of any part of the business of another publisher of a newspaper, magazine, or other periodical) to establish, maintain, or increase the circulation of a newspaper, magazine, or other periodical shall be allowed as a deduction; except that the deduction shall not be allowed with respect to the portion of such expenditures as, under regulations prescribed by the Franchise Tax Board, is chargeable to capital account if the taxpayer elects, in accordance with such regulations, to treat such portion as so chargeable. Such election, if made, must be for the total amount of such portion of the expenditures which is so chargeable to capital account, and shall be binding for all subsequent taxable years unless, upon application by the taxpayer, the Franchise Tax Board permits a revocation of such election subject to such conditions as it deems necessary

SEC. 291. Section 24365 of said code is amended to read:

24365. (a) A bank or corporation may treat research or experimental expenditures which are paid or incurred by it during the taxable year in connection with its trade or business as expenses which are not chargeable to capital account The expenditures so treated shall be allowed as a deduction

(b) (1) A bank or corporation may, without the consent of the Franchise Tax Board, adopt the method provided in subsection (a) for its first annual accounting period—

(A) Which begins after December 31, 1960, and ends after the date on which this section is enacted; and

(B) For which expenditures described in subsection (a) are paid or incurred.

(2) A bank or corporation may, with the consent of the Franchise Tax Board, adopt at any time the method provided in subsection (a).

(c) The method adopted under this section shall apply to all expenditures described in subsection (a). The method adopted shall be adhered to in computing net income for the taxable year and for all subsequent years unless, with the approval of the Franchise Tax Board, a change to a different method is authorized with respect to part or all of such expenditures

SEC. 292 Section 24366 of said code is amended to read.

24366. (a) At the election of a bank or corporation, made in accordance with regulations prescribed by the Franchise Tax Board, research or experimental expenditures which are—

(1) Paid or incurred by the bank or corporation in connection with its trade or business;

(2) Not treated as expenses under Section 24365; and

(3) Chargeable to capital account but not chargeable to property of a character which is subject to the allowance under Sections 24349 to 24354, inclusive, (relating to allowance for depreciation, etc.) or Section 24831 (relating to allowance for

depletion); may be treated as deferred expenses. In computing net income, such deferred expenses shall be allowed as a deduction ratably over such period of not less than 60 months as may be selected by the bank or corporation (beginning with the month in which the bank or corporation first realizes benefits from such expenditures). Such deferred expenses are expenditures properly chargeable to capital account for purposes of Section 24916 (relating to adjustments to basis of property).

(b) The election provided by subsection (a) may be made for any annual accounting period beginning after December 31, 1960, but only if made not later than the time prescribed by law for filing the return for such period (including extensions thereof) The method so elected, and the period selected by the bank or corporation, shall be adhered to in computing net income for the taxable year for which the election is made and for all subsequent taxable years unless, with the approval of the Franchise Tax Board, a change to a different method (or to a different period) is authorized with respect to part or all of such expenditures The election shall not apply to any expenditure paid or incurred during any annual accounting period before the taxable year for which the bank or corporation makes the election

SEC. 293. Section 24368.1 of said code is amended to read:

24368.1. (a) Any trademark or trade name expenditure paid or incurred during an annual accounting period beginning after December 31, 1960, may, at the election of the taxpayer (made in accordance with regulations prescribed by the Franchise Tax Board), be treated as a deferred expense In computing net income, all expenditures paid or incurred during the year which are so treated shall be allowed as a deduction ratably over such period of not less than 60 months (beginning with the first month in such year) as may be selected by the taxpayer in making such election The expenditures so treated are expenditures properly chargeable to capital account for purposes of Section 24916(a) (relating to adjustments to basis of property)

(b) For purposes of subsection (a), the term "trademark or trade name expenditure" means any expenditure which—

(1) Is directly connected with the acquisition, protection, expansion, registration (federal, state, or foreign) or defense of a trademark or trade name;

(2) Is chargeable to capital account; and

(3) Is not part of the consideration paid for a trademark, trade name, or business

(c) The election provided by subsection (a) shall be made within the time prescribed by law (including extensions thereof) for filing the return for the taxable year during which the expenditure is paid or incurred The period selected by the taxpayer under subsection (a) with respect to the expenditures paid or incurred during the taxable year which are treated as deferred expenses shall be adhered to in computing

its net income for the taxable year for which the election is made and all subsequent years.

(d) For adjustments to basis of property for amounts allowed as deductions for expenditures treated as deferred expenses under this section, see Section 24916(h).

SEC. 294. Section 24372 of said code is amended to read:

24372. (a) Every taxpayer, at its election, shall be entitled to a deduction with respect to amortization of the adjusted basis (for determining gain) of any device, machinery, or equipment for the collection at the source of atmospheric pollutants and contaminants based on a period of 60 months Such amortization deduction shall be an amount, with respect to each month of such period within the taxable year, equal to the adjusted basis of the device, machinery, or equipment at the end of such month divided by the number of months (including the month for which the deduction is computed) remaining in the period. Such adjusted basis at the end of the month shall be computed without regard to the amortization deduction for such month The amortization deductions provided by this section with respect to any month shall be in lieu of the deduction with respect to such device, machinery, or equipment provided in Section 24349 relating to exhaustion, wear and tear, and obsolescence. The 60-month period shall begin, at the election of the taxpayer, with the month following the month in which the device, machinery, or equipment was completed or acquired, or with the succeeding taxable year

(b) The election of the taxpayer to take the amortization deduction and to begin the 60-month period with the month following the month in which the device, machinery, or equipment was completed or acquired, or with the taxable year succeeding the taxable year in which such device, machinery, or equipment was completed or acquired, shall be made in an appropriate statement in the taxpayer's return for the taxable year in which the device, machinery, or facility was completed or acquired, or in which the certification required by subdivision (d) was made, whichever is later.

(c) A taxpayer which has elected under subdivision (b) to take the amortization deduction provided in subdivision (a) may, at any time after making such election, discontinue the amortization deductions with respect to the remainder of the amortization period, such discontinuance to begin as of the beginning of any month specified by the taxpayer in a notice in writing filed with the Franchise Tax Board before the beginning of such month. The deduction provided under Section 24349 shall be allowed beginning with the first month as to which the amortization deduction is not applicable, and the taxpayer shall not be entitled to any further amortization deductions with respect to such device, machinery, or equipment.

(d) In determining for the purposes of this section the adjusted basis of such device, machinery, or equipment, there shall be included only so much of the amount of such adjusted basis (computed without regard to this section) as is properly

attributable to the construction, reconstruction, remodeling, installation, or acquisition of such device, machinery, or equipment after December 31, 1954, as certified by the State Department of Public Health.

SEC. 295. Section 24373 of said code is amended to read:

24373. Except as provided in Section 24374, in determining the amount allowable to a lessee as a deduction for any taxable year for exhaustion, wear and tear, obsolescence, or amortization—

(a) In respect of any building erected (or other improvement made) on the leased property, if the portion of the term of lease (excluding any period for which the lease may subsequently be renewed, extended, or continued pursuant to an option exercisable by the lessee) remaining upon the completion of such building or other improvement is less than 60 percent of the useful life of such building or other improvement, or

(b) In respect of any cost of acquiring the lease, if less than 75 percent of such cost is attributable to the portion of the term of the lease (excluding any period for which the lease may subsequently be renewed, extended, or continued pursuant to an option exercisable by the lessee) remaining on the date of its acquisition,

the term of the lease shall be treated as including any period for which the lease may be renewed, extended, or continued pursuant to an option exercisable by the lessee, unless the lessee establishes that (as of the close of the taxable year) it is more probable that the lease will not be renewed, extended, or continued for such period than that the lease will be so renewed, extended, or continued.

SEC. 296. Section 24374 of said code is amended to read:

24374. (a) If a lessee and lessor are related persons (as determined under subsection (b)) at any time during the taxable year then, in determining the amount allowable to the lessee as a deduction for such taxable year for exhaustion, wear and tear, obsolescence, or amortization in respect of any building erected (or other improvement made) on the leased property, the lease shall be treated as including a period of not less duration than the remaining useful life of such improvement.

(b) For purposes of subsection (a), a lessor and lessee shall be considered to be related persons if—

(1) The lessor and the lessee are members of an affiliated group (as defined in Section 1504 of the Internal Revenue Code of 1954), or

(2) The relationship between the lessor and lessee is one described in Section 24428(2) and (3), except that for purposes of this subparagraph, the phrase "80 percent or more" shall be substituted for the phrase "more than 50 percent" each place it appears in such subsection.

For purposes of determining the ownership of stock in applying subparagraph (2), the rules of Section 24429 shall apply,

except that the family of an individual shall include only his spouse, ancestors, and lineal descendants.

SEC. 297. Section 24375 of said code is amended to read:

24375. In any case in which neither Section 24373 nor Section 24374 applies, the determination as to the amount allowable to a lessee as a deduction for any taxable year for exhaustion, wear and tear, obsolescence, or amortization—

(a) In respect of any building erected (or other improvement made) on the leased property, or

(b) In respect of any cost of acquiring the lease, shall be made with reference to the term of the lease (excluding any period for which the lease may subsequently be renewed, extended, or continued pursuant to an option exercisable by the lessee), unless the lease has been renewed, extended, or continued or the facts show with reasonable certainty that the lease will be renewed, extended, or continued.

SEC 298. Section 24377 of said code is amended to read:

24377. (a) A taxpayer engaged in the business of farming may elect to treat as expenses which are not chargeable to capital account expenditures (otherwise chargeable to capital account) which are paid or incurred by it during the taxable year for the purchase or acquisition of fertilizer, lime, ground limestone, marl, or other materials to enrich, neutralize, or condition land used in farming, or for the application of such materials to such land. The expenditures so treated shall be allowed as a deduction.

(b) For purposes of subsection (2), the term "land used in farming" means land used (before or simultaneously with the expenditures described in subsection (a)) by the taxpayer or its tenant for the production of crops, fruits, or other agricultural products or for the sustenance of livestock.

(c) The election under subsection (a) for any taxable year shall be made within the time prescribed by law (including extensions thereof) for filing the return for such taxable year. Such election shall be made in such manner as the Franchise Tax Board may by regulations prescribe Such election may not be revoked except with the consent of the Franchise Tax Board

SEC. 299. Section 24402 of said code is amended to read:

24402. Dividends received during the taxable year declared from income which has been included in the measure of the taxes imposed under Chapter 2 or Chapter 3 of this part upon the taxpayer declaring the dividends.

SEC 300. Section 24404 of said code is amended to read:

24404. In the case of farmers, fruitgrowers, or like associations organized and operated in whole or in part on a cooperative or mutual basis, (a) for the purpose of marketing the products of members or other producers, and turning back to them the proceeds of sales, less the necessary marketing expenses, which may include reasonable reserves, on the basis of either the quantity or the value of the products furnished by them, or (b) for the purpose of purchasing, or producing,

supplies and equipment for the use of members or other persons, and turning over such supplies and equipment to them at actual cost, plus necessary expenses, all income resulting from or arising out of such business activities for or with their members carried on by them or their agents, or when done on a nonprofit basis for or with nonmembers

For the purposes of this section "all income resulting from or arising out of such business activities for or with their members" shall include all amounts, whether or not derived from patronage, allocated to members during the taxable year Amounts allocated include cash, merchandise, capital stock, revolving fund certificates, certificates of indebtedness, retain certificates, letters of advice, or written instruments which in some other manner disclose to each member the dollar amount allocated to him Allocations made after the close of the taxable year and on or before the 15th day of the ninth month following the close of such year shall be considered as made on the last day of such taxable year to the extent the allocations are attributable to income derived before the close of such year.

SEC 301 Section 24409 of said code is amended to read:

24409 The election provided by Section 24407 may be made for any annual accounting period beginning after December 31, 1960, but only if made not later than the time prescribed by law for filing the return for such period (including extensions thereof) The period so elected shall be adhered to in computing the income of the bank or corporation for the taxable year for which the election is made and all subsequent taxable years The election shall apply only with respect to expenditures paid or incurred on or after the date of enactment of this section

SEC 302 Section 24425 of said code is amended to read:

24425 Any amount otherwise allowable as a deduction which is allocable to one or more classes of income not included in the measure of the tax imposed by this part, regardless of whether such income was received or accrued during the taxable year

SEC 303 Section 24427 of said code is amended to read:

24427 No deduction shall be allowed—

In respect of losses from sales or exchanges of property (other than losses in cases of distributions in corporate liquidations), directly or indirectly, between persons specified within any one of the paragraphs of Section 24428.

In respect of expenses, otherwise deductible under Section 24343, or of interest, otherwise deductible under Section 24344—

(a) If within the period consisting of the taxable year of the taxpayer and 2½ months after the close thereof (1) such expenses or interest are not paid, and (2) the amount thereof is not includable in the gross income of the person to whom the payment is to be made; and

(b) If, by reason of the method of accounting of the person to whom the payment is to be made, the amount thereof is not, unless paid, includable in the gross income of such person for the taxable year in which or with which the taxable year of the taxpayer ends; and

(c) If, at the close of the taxable year of the taxpayer or at any time within 2½ months thereafter, both the taxpayer and the person to whom the payment is to be made are persons specified within Section 24428.

(d) The amount of expenses incurred or interest accrued, the deduction of which is disallowed under this section in the year incurred or accrued, may be deducted in the year paid.

SEC. 304. Section 24430 of said code is amended to read:

24430. If—

(a) In case of a sale or exchange of property to a bank or corporation a loss sustained by the transferor is not allowable to the transferor as a deduction by reason of Section 24427 (or by reason of Section 24201e of the Bank and Corporation Tax Law of 1954); and

(b) After December 31, 1960, the bank or corporation sells or otherwise disposes of such property (or of other property the basis of which in its hands is determined directly or indirectly by reference to such property) at a gain,

then such gain shall be recognized only to the extent that it exceeds so much of such loss as is properly allocable to the property sold or otherwise disposed of by the bank or corporation. This section applies with respect to annual accounting periods beginning after December 31, 1960. This section shall not apply if the loss sustained by the transferor is not allowable to the transferor as a deduction by reason of Section 24998 (relating to wash sales) or by reason of Section 24121e of the Bank and Corporation Tax Law of 1954.

SEC. 305. Section 24482 of said code is amended to read:

24482. (a) If a corporation inventorying goods under the method provided in Sections 24702 to 24706, inclusive (relating to last-in, first-out inventories), distributes inventory assets (as defined in subsection (b)(1), then the amount (if any) by which—

(1) The inventory amount (as defined in subsection (b)(2)) of such assets under a method authorized by Section 24701 (relating to general rule for inventories), exceeds

(2) The inventory amount of such assets under the method provided in Sections 24702 to 24706, inclusive,

shall be treated as gain to the corporation recognized from the sale of such inventory assets.

(b) For purposes of subsection (a)—

(1) The term "inventory assets" means stock in trade of the corporation, or other property of a kind which would properly be included in the inventory of the corporation if on hand at the close of the taxable year.

(2) The term "inventory amount" means, in the case of inventory assets distributed during an taxable year, the amount of such inventory assets determined as if the taxable year closed at the time of such distribution.

(c) For purposes of this section, the inventory amount of assets under a method authorized by Section 24701 shall be determined—

(1) If the corporation uses the retail method of valuing inventories under Sections 24702 to 24706, inclusive, by using such method; or

(2) If paragraph (1) does not apply, by using cost or market, whichever is lower.

SEC. 306 Section 24485 of said code is amended to read:

24485. (a) On the distribution by a corporation, with respect to its stock, of inventory assets (as defined in subsection (b)(1)) the fair market value of which exceeds the adjusted basis thereof, the earnings and profits of the corporation—

(1) Shall be increased by the amount of such excess; and

(2) Shall be decreased by whichever of the following is the lesser:

(A) The fair market value of the inventory assets distributed; or

(B) The earnings and profits (as increased under paragraph (1)).

(b) (1) For purposes of subsection (a), the term "inventory assets" means—

(A) Stock in trade of the corporation, or other property of a kind which would properly be included in the inventory of the corporation if on hand at the close of the taxable year;

(B) Property held by the corporation primarily for sale to customers in the ordinary course of its trade or business; and

(C) Unrealized receivables or fees, except receivables from sales or exchanges of assets other than assets described in this paragraph.

(2) For purposes of paragraph (1)(C), the term "unrealized receivables or fees" means, to the extent not previously includable in income under the method of accounting used by the corporation, any rights (contractual or otherwise) to payment for—

(A) Goods delivered, or to be delivered, to the extent that the proceeds therefrom would be treated as amounts received from the sale or exchange of property other than a capital asset; or

(B) Services rendered or to be rendered.

SEC 307. Section 24495 of said code is amended to read

24495 For purposes of this part, the term "dividend" means any distribution of property made by a corporation to its shareholders—

(a) Out of its earnings and profits accumulated after February 28, 1913; or

(b) Out of its earnings and profits of the taxable year (computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year), without regard to the amount of the earnings and profits at the time the distribution was made

Except as otherwise provided in this part, every distribution is made out of earnings and profits to the extent thereof, and from the most recently accumulated earnings and profits To the extent that any distribution is, under any provision of this chapter, treated as a distribution of property to which Sections 24451 and 24453 apply, such distribution shall be treated as a distribution of property for purposes of this section.

SEC. 308 Section 24502 of said code is amended to read:

24502. (a) No gain or loss shall be recognized on the receipt by a corporation of property distributed in complete liquidation of another corporation.

(b) For purposes of subsection (a), a distribution shall be considered to be in complete liquidation only if—

(1) The corporation receiving such property was, on the date of the adoption of the plan of liquidation, and has continued to be at all times until the receipt of the property, the owner of stock (in such other corporation) possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote and the owner of at least 80 percent of the total number of shares of all other classes of stock (except nonvoting stock which is limited and preferred as to dividends); and either

(2) The distribution is by such other corporation in complete cancellation or redemption of all its stock, and the transfer of all the property occurs within the taxable year; in such case the adoption by the shareholders of the resolution under which is authorized the distribution of all the assets of such corporation in complete cancellation or redemption of all its stock shall be considered an adoption of a plan of liquidation, even though no time for the completion of the transfer of the property is specified in such resolution; or

(3) Such distribution is one of a series of distributions by such other corporation in complete cancellation or redemption of all its stock in accordance with a plan of liquidation under which the transfer of all the property under the liquidation is to be completed within three years from the close of the annual accounting period during which is made the first of the series of distributions under the plan, except that if such transfer is not completed within such period, or if the taxpayer does not continue qualified under paragraph (1) until the completion of such transfer, no distribution under the plan shall be considered a distribution in complete liquidation.

If such transfer of all the property does not occur within the taxable year, the Franchise Tax Board may require of the taxpayer such bond, or waiver of the statute of limitations on assessment and collection, or both, as he may deem necessary to insure, if the transfer of the property is not completed

within such three-year period, or if the taxpayer does not continue qualified under paragraph (1) until the completion of such transfer, the assessment and collection of all taxes then imposed by law for such taxable year or subsequent taxable years, to the extent attributable to property so received. A distribution otherwise constituting a distribution in complete liquidation within the meaning of this subsection shall not be considered as not constituting such a distribution merely because it does not constitute a distribution or liquidation within the meaning of the corporate law under which the distribution is made; and for purposes of this subsection a transfer of property of such other corporation to the taxpayer shall not be considered as not constituting a distribution (or one of a series of distributions) in complete cancellation or redemption of all the stock of such other corporation, merely because the carrying out of the plan involves (A) the transfer under the plan to the taxpayer by such other corporation of property, not attributable to shares owned by the taxpayer, on an exchange described in Section 24551, and (B) the complete cancellation or redemption under the plan, as a result of exchanges described in Section 24531, of the shares not owned by the taxpayer.

(c) If—

(1) A corporation is liquidated and subsection (a) applies to such liquidation; and

(2) On the date of the adoption of the plan of liquidation, such corporation was indebted to the corporation which meets the 80-percent stock ownership requirements specified in subsection (b);

then no gain or loss shall be recognized to the corporation so indebted because of the transfer of property in satisfaction of such indebtedness.

SEC. 309. Section 24512 of said code is amended to read:

24512 If—

(a) A corporation adopts a plan of complete liquidation on or after December 31, 1954; and

(b) Within the 12-month period beginning on the date of the adoption of such plan, all of the assets of the corporation are distributed in complete liquidation, less assets retained to meet claims;

then no gain or loss shall be recognized to such corporation from the sale or exchange by it of property within such 12-month period.

SEC 310. Section 24516 of said code is amended to read:

24516. (a) For purposes of this chapter, a distribution shall be treated as in partial liquidation of a corporation if—

(1) The distribution is one of a series of distributions in redemption of all of the stock of the corporation pursuant to a plan; or

(2) The distribution is not essentially equivalent to a dividend, is in redemption of a part of the stock of the corporation pursuant to a plan, and occurs within the taxable year

in which the plan is adopted or within the succeeding taxable year, including (but not limited to) a distribution which meets the requirements of subsection (b).

(b) A distribution shall be treated as a distribution described in subsection (a)(2) if the requirements of paragraphs (1) and (2) of this subsection are met.

(1) The distribution is attributable to the corporation's ceasing to conduct, or consists of the assets of, a trade or business which has been actively conducted throughout the five-year period immediately before the distribution, which trade or business was not acquired by the corporation within such period in a transaction in which gain or loss was recognized in whole or in part.

(2) Immediately after the distribution the liquidating corporation is actively engaged in the conduct of a trade or business, which trade or business was actively conducted throughout the five-year period ending on the date of the distribution and was not acquired by the corporation within such period in a transaction in which gain or loss was recognized in whole or in part.

Whether or not a distribution meets the requirements of paragraphs (1) and (2) of this subsection shall be determined without regard to whether or not the distribution is pro rata with respect to all of the shareholders of the corporation.

SEC. 311. Section 24565 is added to said code, to read:

24565. In the case of the acquisition of assets of a corporation by another corporation—

(a) In a distribution to such other corporation to which Section 24502 (relating to liquidations of subsidiaries) applies, except in a case in which the basis of the assets distributed is determined under Section 24504(b)(2); or

(b) In a transfer to which Section 24551 (relating to nonrecognition of gain or loss to corporations) applies, but only if the transfer is in connection with a reorganization described in subparagraph (1), (3), (4) (but only if the requirements of subparagraphs (A) and (B) of Section 24531(b) (1) are met), or (6) of Section 24562(a),

the acquiring corporation shall succeed to and take into account, as of the close of the day of distribution or transfer, the items described in Section 24567 of the distributor or transferor corporation, subject to the conditions and limitations specified in Sections 24566 and 24567.

SEC. 312. Section 24566 is added to said code, to read:

24566. Except in the case of an acquisition in connection with a reorganization described in subparagraph (6) of Section 24562—

(a) The taxable year of the distributor or transferor corporation shall end on the date of distribution or transfer.

(b) For purposes of this section, the date of distribution or transfer shall be the day on which the distribution or transfer is completed; except that, under regulations prescribed by the Franchise Tax Board, the date when substantially all of

the property has been distributed or transferred may be used if the distributor or transferor corporation ceases all operations, other than liquidating activities, after such date.

SEC. 313. Section 24567 is added to said code, to read:

24567. The items referred to in Section 24565 are:

(a) In the case of a distribution or transfer described in Section 24565—

(1) The earnings and profits or deficit in earnings and profits, as the case may be, of the distributor or transferor corporation shall, subject to subparagraph (2), be deemed to have been received or incurred by the acquiring corporation as of the close of the date of the distribution or transfer, and

(2) A deficit in earnings and profits by the distributor, transferor, or acquiring corporation shall be used only to offset earnings and profits accumulated after the date of transfer. For this purpose, the earnings and profits for the taxable year of the acquiring corporation in which the distribution or transfer occurs shall be deemed to have been accumulated after such distribution or transfer in an amount which bears the same ratio to the undistributed earnings and profits of the acquiring corporation for such taxable year (computed without regard to any earnings and profits received from the distributor or transferor corporation, as described in paragraph (1) of this subsection) as the number of days in the taxable year after the date of distribution or transfer bears to the total number of days in the taxable year

(b) The acquiring corporation shall use the method of accounting used by the distributor or transferor corporation on the date of distribution or transfer unless different methods were used by several distributor or transferor corporations or by a distributor or transferor corporation and the acquiring corporation If different methods were used, the acquiring corporation shall use the method or combination of methods of computing taxable income adopted pursuant to regulations prescribed by the Franchise Tax Board

(c) In any case in which inventories are received by the acquiring corporation, such inventories shall be taken by such corporation (in determining its income) on the same basis on which such inventories were taken by the distributor or transferor corporation, unless different methods were used by several distributor or transferor corporations or by a distributor or transferor corporation and the acquiring corporation. If different methods were used, the acquiring corporation shall use the method or combination of methods of taking inventory adopted pursuant to regulations prescribed by the Franchise Tax Board.

(d) The acquiring corporation shall be treated as the distributor or transferor corporation for purposes of computing the depreciation allowance under paragraphs (2), (3), and (4) of subsection (b) of Section 24349 on property acquired in a distribution or transfer with respect to that part or all of the basis in the hands of the acquiring corporation as does

not exceed the basis in the hands of the distributor or transferor corporation

(e) If the acquiring corporation acquires installment obligations (the income from which the distributor or transferor corporation has elected, under Sections 24667 to 24670, inclusive, to report on the installment basis) the acquiring corporation shall, for purposes of Sections 24667 to 24670, inclusive, be treated as if it were the distributor or transferor corporation

(f) If the acquiring corporation assumes liability for bonds of the distributor or transferor corporation issued at a discount or premium, the acquiring corporation shall be treated as the distributor or transferor corporation after the date of distribution or transfer for purposes of determining the amount of amortization allowable or includable with respect to such discount or premium

(g) The acquiring corporation shall be entitled to deduct, as if it were the distributor or transferor corporation, expenses deferred under Sections 24836 and 24837 (relating to exploration and development expenditures, respectively) if the distributor or transferor corporation has so elected For the purpose of applying the limitation provided in Section 24837, if, for any taxable year, the distributor or transferor corporation was allowed the deduction in Section 24837(a) or made the election in Section 24837(b), the acquiring corporation shall be deemed to have been allowed such deduction or to have made such election, as the case may be

(h) The acquiring corporation shall be considered to be the distributor or transferor corporation after the date of distribution or transfer for the purpose of determining the amounts deductible under Chapter 12 with respect to pension plans, employees' annuity plans, and stock bonus and profit-sharing plans

(i) If the acquiring corporation is entitled to the recovery of bad debts, prior taxes, or delinquency amounts previously deducted or credited by the distributor or transferor corporation, the acquiring corporation shall include in its income such amounts as would have been includable by the distributor or transferor corporation in accordance with Section 24310 (relating to the recovery of bad debts, prior taxes, and delinquency amounts).

(j) The acquiring corporation shall be treated as the distributor or transferor corporation after the date of distribution or transfer for purposes of applying Sections 24943 to 24949 2, inclusive

(k) If the acquiring corporation—

(1) Assumes an obligation of the distributor or transferor corporation which, after the date of the distribution or transfer, gives rise to a liability, and

(2) Such liability, if paid or accrued by the distributor or transferor corporation, would have been deductible in computing its net income

The acquiring corporation shall be entitled to deduct such items when paid or accrued, as the case may be, as if such corporation were the distributor or transferor corporation A corporation which would have been an acquiring corporation under this section if the date of distribution or transfer had occurred on or after the effective date of the provisions of this chapter applicable to a liquidation or reorganization, as the case may be, shall be entitled, even though the date of distribution or transfer occurred before such effective date, to apply this paragraph with respect to amounts paid or accrued in taxable years beginning after December 31, 1964, on account of such obligations of the distributor or transferor corporation This subdivision shall not apply if such obligations are reflected in the amount of stock, securities, or property transferred by the acquiring corporation to the transferor corporation for the property of the transferor corporation.

(*l*) Notwithstanding the other provisions of this section, or Section 24668, a corporation which has acquired the properties and assumed the liabilities of a wholly owned subsidiary shall be considered to have succeeded to and to be entitled to take into account contributions of the subsidiary to a pension plan, and shall be considered to be the distributor or transferor corporation after the date of distribution or transfer (but not for the taxable years with respect to which this paragraph does not apply) for the purpose of determining the amounts deductible under Chapter 12 with respect to contributions to a pension plan if—

(1) The corporate laws of the state of incorporation of the subsidiary required the surviving corporation in the case of merger to be incorporated under the laws of the state of incorporation of the subsidiary; and

(2) The properties were acquired in a liquidation of the subsidiary in a transaction subject to Section 24502

(m) The acquiring corporation shall take into account any net amount of any adjustment described in Sections 24721–24724 of the distributor or transferor corporation—

(1) To the extent such net amount of such adjustment has not been taken into account by the distributor or transferor corporations, and

(2) In the same manner and at the same time as such net amount would have been taken into account by the distributor or transferor corporation.

SEC. 314. Section 24575.1 of said code is amended to read:

24575.1 (a) (1) If the taxpayer has acquired property in a transaction described in Section 24577 or 24578(b), and if any such property constitutes retirement-straight line property, then, in determining the adjusted basis of all retirement-straight line property held by the taxpayer on his adjustment date, adjustment shall be made (in lieu of the adjustment provided in Section 1016(b) (1) and (2)) for depreciation sustained before March 1, 1913, on retirement-straight line

property which was held on such date for which cost was or is claimed as basis, and which either—

(A) Was retired before the acquisition of the retirement-straight line property by the taxpayer, but only if a deduction was allowed in computing net income by reason of such retirement, and such deduction was computed on the basis of cost without adjustment for depreciation sustained before March 1, 1913 In the case of any such property retired during any annual accounting period beginning after December 31, 1929, the adjustment under this subparagraph shall not exceed that portion of the amount attributable to depreciation sustained before March 1, 1913, which resulted or would have resulted, had the taxpayer been subject to this part during such years, (by reason of the deduction so allowed) in a reduction in taxes under this part or prior tax laws

(B) Was acquired by the taxpayer.

The adjustment determined under this paragraph shall be allocated (in the manner prescribed by the Franchise Tax Board) among all retirement-straight line property held by the taxpayer on his adjustment date. Such adjustment shall apply to all periods on and after the adjustment date.

(2) For purposes of this subsection, the term "retirement-straight line property" means any property of a kind or class with respect to which (A) the corporation transferring such property to the taxpayer was using (at the time of transfer) the retirement method of computing the allowance of deductions for depreciation, and (B) the acquiring corporation has adopted any other method of computing such allowance

(3) For purposes of this subsection

(A) The term "depreciation" means exhaustion, wear and tear, and obsolescence.

(b) In the case of any kind or class of property, the term "adjustment date" means whichever of the following is the later·

(i) The first day of the taxpayer's first annual accounting period beginning after December 31, 1958, or

(ii) The first day of the first annual accounting period after June 24, 1959 in which the taxpayer uses a method of computing the allowance of deductions for depreciation other than the retirement method

SEC. 315. Section 24601 of said code is amended to read:

24601 If contributions are paid by an employer to or under a stock bonus, pension, profit-sharing, or annuity plan, or if compensation is paid or accrued on account of any employee under a plan deferring the receipt of such compensation, such contributions or compensation shall not be deductible under Section 24343 (relating to trade or business expenses) but if they satisfy the conditions of the section, they shall be deductible under this section, subject, however, to the following limitations as to the amounts deductible in any year:

In the taxable year when paid, if the contributions are paid into a pension trust, and if such taxable year ends within or

with a taxable year of the trust for which the trust is exempt under Section 17501 of this code, in an amount determined as follows:

(a) An amount not in excess of 5 percent of the compensation otherwise paid or accrued during the taxable year to all the employees under the trust, but such amount may be reduced for future years if found by the Franchise Tax Board upon periodical examinations at not less than five-year intervals to be more than the amount reasonably necessary to provide the remaining unfunded cost of past and current service credits of all employees under the plan; plus

(b) Any excess over the amount allowable under paragraph (a) necessary to provide with respect to all of the employees under the trust the remaining unfunded cost of their past and current service credits distributed as a level amount, or a level percentage of compensation, over the remaining future service of each such employee, as determined under regulations prescribed by the Franchise Tax Board, but if such remaining unfunded cost with respect to any three individuals is more than 50 percent of such remaining unfunded cost, the amount of such unfunded cost attributable to such individuals shall be distributed over a period of at least five taxable years, or

(c) In lieu of the amounts allowable under paragraphs (a) and (b) above, an amount equal to the normal cost of the plan, as determined under regulations prescribed by the Franchise Tax Board, plus, if past service or other supplementary pension or annuity credits are provided by the plan, an amount not in excess of 10 percent of the cost which would be required to completely fund or purchase such pension or annuity credits as of the date when they are included in the plan, as determined under regulations prescribed by the Franchise Tax Board, except that in no case shall a deduction be allowed for any amount (other than the normal cost) paid in after such pension or annuity credits are completely funded or purchased.

(d) Any amount paid in a taxable year in excess of the amount deductible in such year under the foregoing limitations shall be deductible in the succeeding taxable years in order of time to the extent of the difference between the amount paid and deductible in each such succeeding year and the maximum amount deductible for such year in accordance with the foregoing limitations.

SEC. 316. Section 24602 of said code is amended to read:

'24602. In the taxable year when paid, in an amount determined in accordance with Section 24601, if the contributions are paid toward the purchase of retirement annuities and such purchase is a part of a plan which meets the requirements of Section 17501(c), (d), (e), and (f) of Part 10 of Division 2 of this code, and if refunds of premiums, if any, are applied within the current taxable year or next succeeding taxable year toward the purchase of such retirement annuities.

SEC. 317. Section 24603 of said code is amended to read:

24603 (a) In the taxable year when paid, if the contributions are paid into a stock bonus or profit-sharing trust, and if such taxable year ends within or with a taxable year of the trust with respect to which the trust is exempt under Section 17501 of this code, in an amount not in excess of 15 percent of the compensation otherwise paid or accrued during the taxable year to all employees under the stock bonus or profit-sharing plan If in any taxable year there is paid into the trust, or a similar trust then in effect, amounts less than the amounts deductible under the ~~preceding sentence,~~ *Section 24602* the excess, or if no amount is paid, the amounts deductible shall be carried forward and be deductible when paid in the succeeding taxable years in order of time, but the amount so deductible under this sentence in any such succeeding taxable year shall not exceed 15 percent of the compensation otherwise paid or accrued during such succeeding taxable year to the beneficiaries under the plan In addition, any amount paid into the trust in any taxable year in excess of the amount allowable with respect to such year under the preceding provisions of this subsection shall be deductible in the succeeding taxable years in order of time, but the amount so deductible under this sentence in any one such succeeding taxable year together with the amount allowable under the first sentence of this subsection shall not exceed 15 percent of the compensation otherwise paid or accrued during such taxable year to the beneficiaries under the plan The term "stock bonus or profit-sharing trust," as used in this subsection, shall not include any trust designed to provide benefits upon retirement and covering a period of years, if under the plan the amounts to be contributed by the employer can be determined actuarially as provided in Section 24601 If the contributions are made to two or more stock bonus or profit-sharing trusts, such trusts shall be considered a single trust for purposes of applying the limitations in this subsection

(b) In the case of a profit-sharing plan, or a stock bonus plan in which contributions are determined with reference to profits, of a group of corporations which is an affiliated group within the meaning of Section 1504 of the Federal Internal Revenue Code of 1954, if any member of such affiliated group is prevented from making a contribution which it would otherwise have made under the plan, by reason of having no current or accumulated earnings or profits or because such earnings or profits are less than the contributions which it would otherwise have made, then so much of the contribution which such member was so prevented from making may be made, for the benefit of the employees of such member, by the other members of the group, to the extent of current or accumulated earnings or profits, except that such contribution by each such other member shall be limited, where the group does not file a consolidated return, to that proportion of its total current and accumulated earnings or profits remaining after adjustment

for its contribution deductible without regard to this subsection which the total prevented contribution bears to the total current and accumulated earnings or profits of all members of the group remaining after adjustment for all contributions deductible without regard to this subsection Contributions made under the preceding sentence shall be deductible under subsection (a) by the employer making such contribution, and, for the purpose of determining amounts which may be carried forward and deducted under the second sentence of subsection (a) in succeeding taxable years, shall be deemed to have been made by the employer on behalf of whose employees such contributions were made

SEC 318 Section 24606 of said code is amended to read·

24606 In the taxable year when paid, if the plan is not one included in Sections 24601, 24602, and 24603, if the employees' rights to or derived from such employer's contribution or such compensation are nonforfeitable at the time the contribution or compensation is paid

SEC 319 Section 24607 of said code is amended to read·

24607. For purposes of Sections 24601, 24602, and 24603, a taxpayer on the accrual basis shall be deemed to have made a payment on the last day of the year of accrual if the payment is on account of such taxable year and is made not later than the time prescribed by law for filing the return for such taxable year (including extensions thereof).

SEC 320 Section 24608 of said code is amended to read:

24608 If amounts are deductible under Sections 24601 and 24603, or Sections 24602 and 24603, or Sections 24601, 24602, and 24603, in connection with two or more trusts, or one or more trusts and an annuity plan, the total amount deductible in a taxable year under such trusts and plans shall not exceed 25 percent of the compensation otherwise paid or accrued during the taxable year to the persons who are the beneficiaries of the trusts or plans In addition, any amount paid into such trust or under such annuity plans in any taxable year in excess of the amount allowable with respect to such year under the preceding provisions of this section shall be deductible in the succeeding taxable years in order of time, but the amount so deductible under this sentence in any one such succeeding taxable year together with the amount allowable under the first sentence of this section shall not exceed 30 percent of the compensation otherwise paid or accrued during such taxable years to the beneficiaries under the trusts or plans This section shall not have the effect of reducing the amount otherwise deductible under Sections 24601, 24602, and 24603, if no employee is a beneficiary under more than one trust, or a trust and an annuity plan.

SEC 321 Section 24611 of said code is amended to read·

24611 The amount of any unused deductions or contributions in excess of the deductible amounts for annual accounting periods to which this article does not apply which under Sections 17324 to 17324.17, inclusive, ~~or Part 10~~ *of Part 10* of Di-

vision 2 of this code would be allowable as deductions in later years had such Sections 17324 to 17324 17, inclusive, of Part 10 of Division 2 of this code remained in effect, shall be allowable as deductions in annual accounting periods to which this part applies as if such Sections 17324 to 17324 17, inclusive, of Part 10 of Division 2 of this code were continued in effect for such years. However, the deduction under the preceding sentence shall not exceed an amount which, when added to the deduction allowable under Sections 24601 to 24608, inclusive, for contributions made in annual accounting periods to which this article applies, is not greater than the amount which would be deductible under Sections 24601 to 24608, inclusive, if the contributions which give rise to the deduction under the preceding sentence were made in an annual accounting period to which this article applies

SEC 322 Section 24613 of said code is amended to read:

24613. For purposes of applying Sections 24601 to 24611, inclusive, with respect to contributions made to or under a pension, profit-sharing, stock bonus or annuity, plan by a domestic corporation (i e, a corporation created or organized within the United States), or by another corporation which is entitled to deduct its contributions under Section 24603(b), on behalf of an individual who is treated as an employee of such domestic corporation under Section 17527(a) of the Personal Income Tax Law—

(1) Except as provided in paragraph (2), no deduction shall be allowed to such domestic corporation or to any other corporation which is entitled to deduct its contributions under such sections,

(2) There shall be allowed as a deduction to the foreign subsidiary of which such individual is an employee an amount equal to the amount which (but for paragraph (1)) would be deductible under Sections 24601 to 24611, by the domestic corporation if he were an employee of the domestic corporation, and

(3) Any reference to compensation shall be considered to be a reference to the total compensation of such individual (determined with the application of subsection (b)(2) of Section 17527 of the Personal Income Tax Law)

Any amount deductible by a foreign subsidiary under this section shall be deductible for its year with or within which the taxable year of such domestic corporation ends.

SEC 323 Section 24614 of said code is amended to read·

24614 For purposes of applying Sections 24601 to 24611, inclusive, with respect to contributions made to or under a pension, profit-sharing, stock bonus, or annuity, plan by a domestic parent corporation (i.e., a corporation created or organized within the United States), or by another corporation which is entitled to deduct its contributions under Section 24603(b), on behalf of an individual who is treated as an employee of such domestic corporation under Section 17528(a) of the Personal Income Tax Law—

(1) Except as provided in paragraph (2), no deduction shall be allowed to such domestic parent corporation or to any other corporation which is entitled to deduct its contributions under such sections,

(2) There shall be allowed as a deduction to the domestic subsidiary of which such individual is an employee an amount equal to the amount which (but for paragraph (1)) would be deductible under Sections 24601 to 24611, inclusive, by the domestic parent corporation if he were an employee of the domestic parent corporation, and

(3) Any reference to compensation shall be considered to be a reference to the total compensation of such individual (determined with the application of subsection (b)(2) of Section 17528 of the Personal Income Tax Law).

Any amount deductible by a domestic subsidiary under this section shall be deductible for its income year with or within which the taxable year of such domestic parent corporation ends.

SEC. 324. Section 24622 of said code is amended to read:

24622. (a) If the transfer of a share of stock to an individual pursuant to his exercise of an option would otherwise meet the requirements of Section 17532(a), 17533(a), or 17534(a) of the Personal Income Tax Law except that there is a failure to meet any of the holding period requirements of Section 17532(a)(1), 17533(a)(1), or 17534(a)(1) of the Personal Income Tax Law, then any deduction from the income of the employer corporation for the taxable year in which such exercise occurred attributable to such disposition, shall be treated as a deduction from income in the taxable year of such employer corporation in which such disposition occurred.

(b) If an individual who has acquired a share of stock by the exercise of a qualified stock option makes a disposition of such share within the three-year period described in Section 17532(a)(1) of the Personal Income Tax Law, and such disposition is a sale or exchange with respect to which a loss (if sustained) would be recognized to such individual, then the amount which is deductible from the income of the employer corporation, shall not exceed the excess (if any) of the amount realized on such sale or exchange over the adjusted basis of such share.

SEC. 325. Section 24631 of said code is amended to read:

24631. (a) Income shall be computed on the basis of the taxpayer's taxable year.

(b) For purposes of this part, the term "taxable year" means—

(1) The taxpayer's annual accounting period, if it is a calendar year or a fiscal year;

(2) The calendar year, if subsection (g) applies; or

(3) The period for which the return is made, if a return is made for a period of less than 12 months.

(c) For purposes of this part, the term "annual accounting period" means the annual period on the basis of which the

taxpayer regularly computes its income in keeping its books

(d) For purposes of this part, the term "calendar year" means a period of 12 months ending on December 31st

(e) For purposes of this part, the term "fiscal year" means a period of 12 months ending on the last day of any month other than December. In the case of any taxpayer who has made the election provided by subsection (f), the term means the annual period (varying from 52 to 53 weeks) so elected

(f) (1) A taxpayer who, in keeping its books, regularly computes its income on the basis of an annual period which varies from 52 to 53 weeks and ends always on the same day of the week and ends always—

(A) On whatever date such same day of the week last occurs in a calendar month, or

(B) On whatever date such same day of the week falls which is nearest to the last day of a calendar month,

may (in accordance with the regulations prescribed under paragraph (3)) elect to compute its income for purposes of this part on the basis of such annual period. This paragraph shall apply to annual accounting periods ending after December 31, 1954

(2) (A) In any case in which the effective date or the applicability of any provision of this part is expressed in terms of taxable years beginning or ending with reference to a specified date which is the first or last day of a month, a taxable year described in paragraph (1) shall be treated—

(i) As beginning with the first day of the calendar month beginning nearest to the first day of such taxable year, or

(ii) As ending with the last day of the calendar month ending nearest to the last day of such taxable year, as the case may be.

(B) In the case of a change from or to a taxable year described in paragraph (1)—

(i) If such change results in a short period (within the meaning of Section 24634) of 359 days or more, or less than 7 days, Section 24636 shall not apply;

(ii) If such change results in a short period of less than seven days, such short period shall, for purposes of this part, be added to and deemed a part of the following taxable year; and

(iii) If such change results in a short period to which Section 24634 applies, the income for such short period shall be placed on an annual basis for purposes of such subsection by multiplying such income by 365 and dividing the result by the number of days in a short period, and the tax shall be the same part of the tax computed on the annual basis as the number of days in the short period is of 365 days.

(3) The Franchise Tax Board shall prescribe such regulations as it deems necessary for the application of this subsection.

(g) Except as provided in Section 24634 (relating to returns for periods of less than 12 months), the taxpayer's taxable year shall be the calendar year if—

(1) The taxpayer keeps no books;

(2) The taxpayer does not have an annual accounting period; or

(3) The taxpayer has an annual accounting period, but such period does not qualify as a fiscal year.

SEC. 326. Section 24633 of said code is amended to read:

24633. If a taxpayer changes its annual accounting period, the new accounting period shall become the taxpayer's taxable year only if the change is approved by the Franchise Tax Board. For purposes of this part, if a taxpayer to whom Section 24631(g) applies adopts an annual accounting period (as defined in Section 24631(c)) other than a calendar year, the taxpayer shall be treated as having changed its annual accounting period.

SEC. 327. Section 24634 of said code is amended to read:

24634 (a) A return for a period of less than 12 months (referred to in this article as "short period") shall be made under any of the following circumstances:

(1) When the taxpayer, with the approval of the Franchise Tax Board, changes its annual accounting period. In such a case, the return shall be made for the short period beginning on the day after the close of the former taxable year and ending at the close of the day before the day designated as the first day of the new taxable year.

(2) When the taxpayer is in existence during only part of what would otherwise be its taxable year.

(3) When the Franchise Tax Board terminates the taxpayer's taxable year under Section 25761 (relating to tax in jeopardy).

SEC. 328. Section 24636 of said code is amended to read:

24636 (a) If a separate return is made by a taxpayer subject to the tax imposed by Chapter 2, under Section 24634 on account of a change in the accounting period the net income, computed on the basis of the period for which separate return is made, referred to in this section as "the short period," shall be placed on an annual basis by multiplying the amount thereof by 12, and dividing by the number of months in the short period The Franchise Tax Board shall compute the amount of a tax on the income placed on such annual basis, and shall allow the offset provided for in Article 3 of Chapter 2, from such tax The tax due under this section, which shall not be subject to offset, shall be such part of the tax, less the offset allowed, computed on such annual basis as the number of months in the short period is of 12 months

(b) If a taxpayer subject to the tax imposed by Chapter 2 establishes the amount of its net income for the period of 12 months beginning with the first day of the short period, computed as if such 12-month period were a taxable year, under the law applicable to such year, then the tax for the

short period shall be reduced to an amount which is such part of the tax computed on the net income for such 12-month period as the net income computed on the basis of the short period is of the net income for the 12-month period. The taxpayer (other than a taxpayer to which the next sentence applies) shall compute the tax and file its return without the application of this section If the taxpayer has disposed of substantially all its assets prior to the end of such 12-month period, then in lieu of the net income for such 12-month period there shall be used for the purposes of this section the net income for the 12-month period ending with the last day of the short period. The tax computed under this section shall in no case be less than the tax computed on the net income for the short period without placing such net income on an annual basis The benefits of this section shall not be allowed unless the taxpayer, at such time as regulations prescribed hereunder require (but not after the time prescribed for the filing of the return for the first taxable year which ends on or after 12 months after the beginning of the short period), makes application therefor in accordance with such regulations. Such application, in case the return was filed without regard to this section, shall be considered a claim for credit or refund with respect to the amount by which the tax is reduced under this section. The Franchise Tax Board shall prescribe such regulations as it may deem necessary for the application of this section.

SEC. 329. Section 24661 of said code is amended to read:

24661. The amount of any item of gross income shall be included in the gross income for the taxable year in which received by the taxpayer, unless, under the method of accounting used in computing income, such amount is to be properly accounted for as of a different period.

SEC. 330. Section 24667 of said code is amended to read:

24667. (a) Under regulations prescribed by the Franchise Tax Board, a person who regularly sells or otherwise disposes of personal property on the installment plan may return as income therefrom in any taxable year that proportion of the installment payments actually received in that year which the gross profit, realized or to be realized when payment is completed, bears to the total contract price.

(b) For purposes of subdivision (a), the total contract price of all sales of personal property on the installment plan includes the amount of carrying charges or interest which is determined with respect to such sales and is added on the books of account of the seller to the established cash selling price of such property. This paragraph shall not apply with respect to sales of personal property under a revolving credit type plan or with respect to sales or other dispositions of property the income from which is, under Section 24668, returned on the basis and in the manner prescribed in subdivision (a).

(c) The amendments in this section shall apply in respect to sales made in annual accounting periods beginning after December 31, 1963.

SEC. 331. Section 24668 of said code is amended to read:

24668. (a) Income from—

(1) A sale or other disposition of real property; or

(2) A casual sale or other casual disposition of personal property (other than property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year) for a price exceeding one thousand dollars ($1,000),

may (under regulations prescribed by the Franchise Tax Board) be returned on the basis and in the manner prescribed in Section 24667.

(b) Subsection (a) shall apply—

(1) In the case of a sale or other disposition during an annual accounting period beginning after December 31, 1954, only if in the taxable year of the sale or other disposition—

(A) There are no payments; or

(B) The payments (exclusive of evidences of indebtedness of the purchaser) do not exceed 30 percent of the selling price.

(2) In the case of a sale or other disposition during an annual accounting period beginning before January 1, 1955, only if the income was (by reason of Section 25292 of the Bank and Corporation Tax Law of 1954) returnable on the basis and in the manner prescribed in Section 25292 of such law.

SEC. 332. Section 24669 of said code is amended to read:

24669. (a) If a taxpayer entitled to the benefits of Section 24667 elects for any taxable year to report its income on the installment basis, then in computing its income for such year (referred to in this section as "year of change") or for any subsequent year—

(1) Installment payments actually received during any such year on account of sales or other dispositions of property made in any annual accounting period before the year of change shall not be excluded; but

(2) The tax imposed by this part for any annual accounting period (referred to in this section as "adjustment year") beginning after December 31, 1954, shall be reduced by the adjustment computed under subsection (b).

(b) In determining the adjustment referred to in subsection (a)(2), first determine, for each annual accounting period before the year of change, the amount which equals the lesser of—

(1) The portion of the tax for such prior accounting period which is attributable to the gross profit which was included in gross income for such prior accounting period, and which by reason of subsection (a)(1) is includable in gross income for the taxable year; or

(2) The portion of the tax for the adjustment year which is attributable to the gross profit described in paragraph (1) The adjustment referred to in subsection (a)(2) for the adjustment year is the sum of the amounts determined under the preceding sentence.

(3) For purposes of subsection (b), the portion of the tax for a prior annual accounting period, or for the adjustment year, which is attributable to the gross profit described in such subsection is that amount which bears the same ratio to the tax imposed by this part (or by the corresponding provisions of prior laws) for such accounting period (computed without regard to subsection (b)) as the gross profit described in such subsection bears to the gross income for such accounting period. For purposes of the preceding sentence, the provisions of this part of the Bank and Corporation Tax Law of 1954 shall be treated as the corresponding provisions of the Bank and Corporation Tax Law of 1954.

SEC. 333. Section 24670 of said code is amended to read:

24670. (a) If an installment obligation is satisfied at other than its face value or distributed, transmitted, sold, or otherwise disposed of, gain or loss shall result to the extent of the difference between the basis of the obligation and—

(1) The amount realized, in the case of satisfaction at other than face value or a sale or exchange; or

(2) The fair market value of the obligation at the time of distribution, transmission, or disposition, in the case of the distribution, transmission, or disposition otherwise than by sale or exchange.

Any gain or loss so resulting shall be considered as resulting from the sale or exchange of the property in respect of which the installment obligation was received.

(b) The basis of an installment obligation shall be the excess of the face value of the obligation over an amount equal to the income which would be returnable were the obligation satisfied in full.

(c) (1) If—

(A) An installment obligation is distributed by one corporation to another corporation in the course of a liquidation, except in the case of a distribution to which Section 24504 (b)(2) applies; and

(B) Under Section 24502 (relating to complete liquidations of subsidiaries) no gain or loss with respect to the receipt of such obligation is recognized in the case of the recipient corporation;

then except as provided in subparagraph (A) no gain or loss with respect to the distribution of such obligation shall be recognized in the case of the distributing corporation.

(2) If—

(A) An installment obligation is distributed by a corporation in the course of a liquidation; and

(B) Under Sections 24512, 24513 and 24514 (relating to gain or loss on sales or exchanges in connection with certain

liquidations) no gain or loss would have been recognized to the corporation if the corporation had sold or exchanged such installment obligation on the day of such distribution; then no gain or loss shall be recognized to such corporation by reason of such distribution.

(d) In the case of a disposition of an installment obligation by any person other than a life insurance company (as defined in Section 801(a) of the Internal Revenue Code of 1954) to such an insurance company, no provision of this part providing for the nonrecognition of gain shall apply with respect to any gain resulting under subsection (a). If a corporation which is a life insurance company for the taxable year was (for the preceding annual accounting period) a corporation which was not a life insurance company, such corporation shall, for purposes of this subsection and subsection (a), be treated as having transferred to a life insurance company, on the last day of the preceding annual accounting period, all installment obligations which it held on such last day.

SEC. 334 Section 24672 of said code is amended to read:

24672 Where a taxpayer elects to report income arising from the sale or other disposition of property as provided in this article, and the entire income therefrom has not been reported prior to the year that the taxpayer ceases to be subject to the tax measured by net income imposed under Chapter 2 or Chapter 3 of this part, the unreported income shall be included in the measure of the tax for the last year in which the taxpayer is subject to the tax measured by net income imposed under Chapter 2 or Chapter 3 of this part This section shall not be applicable where the installment obligation is transferred pursuant to a reorganization as defined in Sections 24562 and 24563 to another taxpayer a party to the reorganization subject to tax under the same chapter as the transferor, or is transferred to any exempt nonprofit cemetery corporation as defined in Section 23701e of this code.

SEC. 335 Section 24673 of said code is amended to read:

24673. Where a corporation subject to the tax imposed by Chapter 2 is engaged in the performance of a contract in this state which will require more than a year to complete, the Franchise Tax Board may require that the income from the contract be reported on the basis of percentage of completion unless the corporation furnishes bond or other security guaranteeing the payment of a tax measured by the income received on the completion of the contract

SEC. 336. Section 24674 of said code is amended to read·

24674 (a) If, in the case of a taxpayer owning any noninterest-bearing obligation issued at a discount and redeemable for fixed amounts increasing at stated intervals the increase in the redemption price of such obligation occurring in the taxable year does not (under the method of accounting used in computing its income) constitute income to it in such year, such taxpayer may, at its election made in its return for any taxable year, treat such increase as income received in

such taxable year If any such election is made with respect to any such obligation, it shall apply also to all such obligations owned by the taxpayer at the beginning of the first taxable year to which it applies and to all such obligations thereafter acquired by it and shall be binding for all subsequent taxable years, unless on application by the taxpayer the Franchise Tax Board permits it, subject to such conditions as the Franchise Tax Board deems necessary, to change to a different method.

(b) In the case of any obligation—

(1) Of the United States, or

(2) Of a state, a territory, or a possession of the United States, or any political subdivision of any of the foregoing, or of the District of Columbia, which is issued on a discount basis and payable without interest at a fixed maturity date not exceeding one year from the date of issue, the amount of discount at which such obligation is originally sold shall not be considered to accrue until the date on which such obligation is paid at maturity, sold, or otherwise disposed of.

SEC. 337. Section 24675 of said code is amended to read:

24675 If an amount representing compensatory damages is received or accrued by a taxpayer during a taxable year as the result of an award in a civil action for infringement of a patent issued by the United States, then the tax attributable to the inclusion of such amount in gross income for the taxable year shall not be greater than the aggregate of the increases in taxes which would have resulted if such amount had been included in gross income in equal installments for each month during which such infringement occurred.

SEC. 338 Section 24676 of said code is amended to read:

24676 (a) Prepaid subscription income to which this section applies shall be included in gross income for the taxable years during which the liability described in subsection (d)(2) exists

(b) In the case of any prepaid subscription income to which this section applies—

(1) If the liability described in subsection (d)(2) ends, then so much of such income as was not includable in gross income under subsection (a) for preceding taxable years shall be included in gross income for the taxable year in which the liability ends.

(2) If the taxpayer ceases to be subject to tax measured by net income imposed under Chapter 2 (commencing at Section 23101) or Chapter 3 (commencing at Section 23501) of this part, then so much of such income as was not includable in gross income under subsection (a) for preceding taxable years shall be included in the measure of tax for the last year in which the taxpayer is subject to the tax measured by net income imposed under Chapter 2 or Chapter 3 of this part.

(c) (1) This section shall apply to prepaid subscription income if and only if the taxpayer makes an election under this section with respect to the trade or business in connection with which such income is received. The election shall be made

in such manner as the Franchise Tax Board may by regulations prescribe No election may be made with respect to a trade or business if in computing net income the cash receipts and disbursements method of accounting is used with respect to such trade or business.

(2) An election made under this section shall apply to all prepaid subscription income received in connection with the trade or business with respect to which the taxpayer has made the election; except that the taxpayer may, to the extent permitted under regulations prescribed by the Franchise Tax Board, include in gross income for the taxable year of receipt the entire amount of any prepaid subscription income if the liability from which it arose is to end within 12 months after the date of receipt. An election made under this section shall not apply to any prepaid subscription income received before the first taxable year for which the election is made.

(3) (A) A taxpayer may, with the consent of the Franchise Tax Board, make an election under this section at any time.

(B) A taxpayer may, without the consent of the Franchise Tax Board, make an election under this section for his first annual accounting period (i) which begins after December 31, 1960, and (ii) in which it receives prepaid subscription income in the trade or business. Such election shall be made not later than the time prescribed by law for filing the return for the taxable year (including extensions thereof) with respect to which such election is made.

(4) An election under this section shall be effective for the taxable year with respect to which it is first made and for all subsequent taxable years, unless the taxpayer secures the consent of the Franchise Tax Board to the revocation of such election. For purposes of this part, the computation of net income under an election made under this section shall be treated as a method of accounting.

(d) For purposes of this section—

(1) The term "prepaid subscription income" means any amount (includable in gross income) which is received in connection with, and is directly attributable to, a liability which extends beyond the close of the taxable year in which such amount is received, and which is income from a subscription to a newspaper, magazine, or other periodical.

(2) The term "liability" means a liability to furnish or deliver a newspaper, magazine, or other periodical.

(3) Prepaid subscription income shall be treated as received during the taxable year for which it is includable in gross income under Section 24661 (without regard to this section).

(e) Notwithstanding the provisions of this section, any taxpayer who has, for taxable years prior to the first taxable year to which this section applies, reported his income under an established and consistent method or practice of accounting for prepaid subscription income (to which this section would

apply if an election were made) may continue to report his income for taxable years to which this part applies in accordance with such method or practice

SEC. 339. Section 24677 of said code is amended to read:

24677. (a) If an amount representing damages is received or accrued by a bank or corporation during a taxable year as a result of an award in a civil action for breach of contract or breach of a fiduciary duty or relationship, then the tax attributable to the inclusion in gross income for the taxable year of that part of such amount which would have been received or accrued by the bank or corporation in a prior taxable year or years but for the breach of contract, or breach of a fiduciary duty or relationship, shall not be greater than the aggregate of the increases in taxes which would have resulted had such part been included in gross income for such prior taxable year or years.

(b) A bank or corporation in computing said tax shall be entitled to deduct all credits and deductions for depletion, depreciation, and other items to which it would have been entitled, had such income been received or accrued by the bank or corporation in the year during which it would have received or accrued it, except for such breach of contract or for such breach of fiduciary duty or relationship. The credits, deductions, or other items referred to in the prior sentence, attributable to property, shall be allowed only with respect to that part of the award which represents the bank or corporation's share of income from the actual operation of such property.

(c) Subsection (a) shall not apply unless the amount representing damage is three thousand dollars ($3,000) or more.

SEC. 340. Section 24678 of said code is amended to read:

24678. (a) If an amount representing damages is received or accrued during a taxable year as a result of an award in, or settlement of, a civil action brought under Section 4 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914 (commonly known as the Clayton Act), for injuries sustained by a bank or corporation in its business or property by reason of anything forbidden in the antitrust laws, then the tax attributable to the inclusion of such amount in gross income for the taxable year shall not be greater than the aggregate of the increases in taxes which would have resulted if such amount had been included in gross income in equal installments for each month during the period in which such injuries were sustained by the bank or corporation.

(b) This section shall apply to annual accounting periods ending after the date that this section is enacted, but only with respect to amounts received or accrued after such date as a result of awards or settlements made after such date.

SEC 341. Section 24681 of said code is amended to read:

24681. (a) The amount of any deduction or credit allowed by this part shall be taken for the taxable year which is the proper taxable year under the method of accounting used in computing income.

(b) (1) If the income is computed under an accrual method of accounting, then, at the election of the taxpayer, any real property tax which is related to a definite period of time shall be accrued ratably over that period

(2) Paragraph (1) shall not apply to any real property tax, to the extent that such tax was allowable as a deduction under the Bank and Corporation Tax Law of 1954 for an annual accounting period which began before January 1, 1955. In the case of any real property tax which would, but for this subsection, be allowable as a deduction for the first annual accounting period of the taxpayer which begins after December 31, 1954, then, to the extent that such tax is related to any period before the first day of such first accounting period, the tax shall be allowable as a deduction for such first accounting period

(3) (A) A taxpayer may, without the consent of the Franchise Tax Board, make an election under this subsection for its first annual accounting period which begins after December 31, 1954, and ends after the date of enactment of this part in which the taxpayer incurs real property taxes Such an election shall be made not later than the time prescribed by law for filing the return for such accounting period (including extensions thereof)

(B) A taxpayer may, with the consent of the Franchise Tax Board, make an election under this subsection at any time.

SEC 342. Section 24684 of said code is amended to read:

24684 If—

(a) The taxpayer contests an asserted liability,

(b) The taxpayer transfers money or other property to provide for the satisfaction of the asserted liability,

(c) The contest with respect to the asserted liability exists after the time of the transfer, and

(d) But for the fact that the asserted liability is contested, a deduction would be allowed for the taxable year of the transfer (or for an earlier taxable year), then the deduction shall be allowed for the taxable year of the transfer

SEC. 343. Section 24703 of said code is amended to read:

24703. In inventorying goods specified in the application described in Section 24702, the taxpayer shall:

(a) Treat those remaining on hand at the close of the taxable year as being first, those included in the opening inventory of the taxable year (in order of acquisition) to the extent thereof, and second, those acquired in the taxable year;

(b) Inventory them at cost; and

(c) Treat those included in the opening inventory of the taxable year in which such method is first used as having

been acquired at the same time and determine their cost by the average cost method.

SEC. 344. Section 24704 of said code is amended to read:

24704. Section 24702 shall apply only if the taxpayer establishes to the satisfaction of the Franchise Tax Board that the taxpayer has used no procedure other than that specified in subsections (a) and (c) of Section 24703 in inventorying such goods to ascertain the income, profit, or loss of the first taxable year for which the method described in Section 24703 is to be used, for the purpose of a report or statement covering such taxable year—

(a) To shareholders, partners, or other proprietors, or to beneficiaries; or

(b) For credit purposes.

SEC. 345. Section 24705 of said code is amended to read:

24705. In determining income for the annual accounting period preceding the taxable year for which the method described in Section 24703 is first used, the closing inventory of such preceding year of the goods specified in the application referred to in Section 24702 shall be at cost

SEC. 346. Section 24706 of said code is amended to read:

24706. If a taxpayer, having complied with Section 24702, uses the method described in Section 24703 for any annual accounting period, then such method shall be used in all subsequent taxable years unless—

(a) With the approval of the Franchise Tax Board a change to a different method is authorized; or,

(b) The Franchise Tax Board determines that the taxpayer has used for any such subsequent taxable year some procedure other than that specified in Section 24703(a) in inventorying the goods specified in the application to ascertain the income, profit, or loss of such subsequent taxable year for the purpose of a report or statement covering such taxable year (1) to shareholders, partners, or other proprietors, or beneficiaries, or (2) for credit purposes, and requires a change to a method different from that prescribed in Section 24703 beginning with such subsequent taxable year or any taxable year thereafter

If subsections (a) or (b) of this section applies, the change to, and the use of, the different method shall be in accordance with such regulations as the Franchise Tax Board may prescribe as necessary in order that the use of such method may clearly reflect income.

SEC 347. Section 24721 of said code is amended to read:

24721. In computing the taxpayer's net income for any taxable year (referred to in this article as the "year of the change")—

(a) If such computation is under a method of accounting different from the method under which the taxpayer's net income for the preceding annual accounting period was computed, then

(b) There shall be taken into account those adjustments which are determined to be necessary solely by reason of the change in order to prevent amounts from being duplicated or omitted, except there shall not be taken into account any adjustment in respect of any taxable year to which this article does not apply unless the adjustment is attributable to a change in the method of accounting initiated by the taxpayer.

SEC. 348. Section 24722 of said code is amended to read:

24722. (a) If—

(1) The method of accounting from which the change is made was used by the taxpayer in computing his income for the two annual accounting periods preceding the year of the change, and

(2) The increase in net income for the year of the change which results solely by reason of the adjustments required by Section 24721(b), other than the amount of such adjustments to which Section 24722.1 applies, exceeds three thousand dollars ($3,000),

then the tax under this part attributable to such increase in net income shall not be greater than the aggregate increase in the taxes under this part (or under the corresponding provisions of prior laws) which would result if one-third of such increase in net income were included in net income for the year of the change and one-third of such increase were included for each of the two preceding annual accounting periods.

(b) If—

(1) The increase in net income for the year of the change which results solely by reason of the adjustments required by Section 24721(b), other than the amount of such adjustments to which Section 24722.1 applies, exceeds three thousand dollars ($3,000); and

(2) The taxpayer establishes its net income (under the new method of accounting) for one or more annual accounting periods consecutively preceding the year of the change for which the taxpayer in computing net income used the method of accounting from which the change is made;

then the tax under this part attributable to such increase in net income shall not be greater than the net increase in the taxes under this part (or under the corresponding provision of prior tax laws) which would result if the adjustments required by Section 24721(b), other than the amount of such adjustments to which Section 24722.1 applies, were allocated to the year or years specified in paragraph (2) to which they are properly allocable under the new method of accounting and the balance of the adjustments required by Section 24721(b), other than the amount of such adjustments to which Section 24722.1 applies, was allocated to the year of the change.

(c) The increase or decrease in the tax for any taxable year for which an assessment of any deficiency, or a credit or refund of any overpayment, is prevented by any law or rule of

law, shall be determined by reference to the tax previously determined for such year.

SEC. 349. Section 24722 1 of said code is amended to read:

24722 1. Except as provided in Section 24722.2—

(a) The net amount of the adjustments required by Section 24721, to the extent that such amount does not exceed the net amount of adjustments which would have been required if the change in method of accounting had been made in the first annual accounting period beginning after December 31, 1954, shall be taken into account by the taxpayer in computing net income in the manner provided in subsection (b), but only if such net amount of such adjustment would increase the net income of such taxpayer by more than three thousand dollars ($3,000).

(b) One-tenth of the net amount of the adjustments described in subsection (a) shall (except as provided in subsection (c)) be taken into account in each of the 10 taxable years beginning with the year of the change The amount to be taken into account for each taxable year in the 10-year period shall be taken into account whether or not for such year the assessment of tax is prevented by operation of any law or rule of law If the year of the change was an annual accounting period ending before January 1, 1961, and if the taxpayer so elects (at such time and in such manner as the Franchise Tax Board shall by regulations prescribe), the 10-year period shall begin with the first annual accounting period which begins after December 31, 1960 If the taxpayer elects under the preceding sentence to begin the 10-year period with the first annual accounting period which begins after December 31, 1960, the 10-year period shall be reduced by the number of years, beginning with the year of the change, in respect of which assessment of tax is prevented by operation of any law or rule of law on the date of the enactment of this section.

(c) The net amount of any adjustments described in subsection (a), to the extent not taken into account in prior annual accounting periods under subsection (b), shall, if the taxpayer ceases to be subject to tax measured by net income imposed under Chapter 2 (commencing at Section 23101) or Chapter 3 (commencing at Section 23501) of this part, be included in the measure of the tax for the last year in which the taxpayer is subject to the tax measured by net income imposed under Chapter 2 or Chapter 3 of this part unless such net amount of such adjustment is required to be taken into account by the acquiring corporation under Section 24567(m).

(d) The provisions of this section shall not apply with respect to changes in methods of accounting made in annual accounting periods beginning after December 31, 1964.

SEC. 350 Section 24722 3 of said code is amended to read

24722.3 (a) The provisions of Sections 24722 1 and 24722 2 and the 1961 amendments to Sections 24721 and 24722

shall apply with respect to any change in a method of accounting where the year of the change (within the meaning of Sections 24721 through 24724) is an annual accounting period beginning after December 31, 1954

(b) The amendments to Sections 24721 and 24722 shall not apply if before the date of enactment of this section—

(i) The taxpayer applied for a change in the method of accounting in the manner provided by regulations prescribed by the Franchise Tax Board, and

(ii) The taxpayer and the Franchise Tax Board agreed to the terms and conditions for making the change.

SEC 351. Section 24723 of said code is amended to read:

24723 In the case of any change described in Section 24721, the taxpayer may, in such manner and subject to such conditions as the Franchise Tax Board may by regulations prescribe, take the adjustments required by Section 24721(b) into account in computing the tax imposed by this part for the taxable year or years permitted under such regulations.

SEC. 352 Section 24832 of said code is amended to read:

24832. In the case of oil and gas wells the allowance for depletion under Section 24835 shall be 27½ percent of the gross income from the property during the taxable year, excluding from such gross income an amount equal to any rents or royalties paid or incurred by the taxpayer in respect of the property. Such allowance shall not exceed 50 percent of the net income of the taxpayer (computed without allowance for depletion) from the property, except that in no case shall the depletion allowance under Section 24835 be less than it would be if computed without reference to this section.

SEC 353 Section 24833 of said code is amended to read:

24833 The allowance for depletion under Section 24835 shall be:

(a) In the case of sand, gravel, slate, stone (including pumice and scoria), brick and tile clay, shale, oystershell, clamshell, granite, marble, sodium chloride, and, if from brine wells, calcium chloride, magnesium chloride, and bromide, 5 percent;

(b) In the case of coal, asbestos, brucite, dolomite, magnesite, perlite, wollastonite, calcium carbonates, and magnesium carbonates, 10 percent,

(c) In the case of metal mines aplite, bauxite, fluorspar, flake graphite, vermiculite, beryl, garnet, feldspar, mica, talc (including pyrophyllite), lepidolite, spodumene, barite, ball clay, sagger clay, china clay, phosphate rock, rock asphalt, trona, bentonite, gilsonite, thenardite, borax, fuller's earth, tripoli, refractory and fire clay, quartzite, diatomaceous earth, metallurgical grade limestone, chemical grade limestone, and potash, 15 percent;

(d) In the case of sulfur, 23 percent;

of the gross income from the property during the taxable year, excluding from such gross income an amount equal to

any rents or royalties paid or incurred by the taxpayer in respect of the property.

Such allowance shall not exceed 50 percent of the net income of the taxpayer (computed without allowance for depletion) from the property except that in no case shall the depletion allowance under Section 24835 be less than it would be if computed without reference to this section.

SEC. 354. Section 24835 of said code is amended to read:

24835. In the case of mines, oil and gas wells, other natural deposits and timber, *there shall be allowed as a deduction in computing net income* a reasonable allowance for depletion and for depreciation of improvements according to the peculiar conditions in each case, such reasonable allowance in all cases to be made under rules and regulations to be prescribed by the Franchise Tax Board. In any case in which it is ascertained as a result of operations or of development work that the recoverable units are greater or less than the prior estimate thereof, then such prior estimate (but not the basis for depletion) shall be revised and the allowance under this section for subsequent taxable years shall be based upon such revised estimate. In the case of leases the deductions shall be equitably apportioned between the lessor and the lessee.

SEC. 355. Section 24836 of said code is amended to read:

24836. (a) Except as provided in subsection (b), there shall be allowed as a deduction in computing income all expenditures paid or incurred during the taxable year for the development of a mine or other natural deposit (other than an oil or gas well) if paid or incurred after the existance of ores or minerals in commercially marketable quantities has been disclosed. This section shall not apply to expenditures for the acquisition or improvement of property of a character which is subject to the allowance for depreciation provided in Section 24349, but allowances for depreciation shall be considered, for purposes of this section, as expenditures.

(b) At the election of the taxpayer, made in accordance with regulations prescribed by the Franchise Tax Board, expenditures described in subsection (a) paid or incurred during the taxable year shall be treated as deferred expenses and shall be deductible on a ratable basis as the units of produced ores or minerals benefited by such expenditures are sold. In the case of such expenditures paid or incurred during the development stage of the mine or deposit, the election shall apply only with respect to the excess of such expenditures during the taxable year over the net receipts during the taxable year from the ores or minerals produced from such mine or deposit. The election under this subsection, if made, must be for the total amount of such expenditures, or the total amount of such excess, as the case may be, with respect to the mine or deposit, and shall be binding for such taxable year.

(c) The amount of expenditures which are treated under subsection (b) as deferred expenses shall be taken into account in computing the adjusted basis of the mine or deposit,

except that such amount, and the adjustments to basis provided in Section 24916, shall be disregarded in determining the adjusted basis of the property for the purpose of computing a deduction for depletion under Section 24831.

SEC. 356. Section 24837 of said code is amended to read:

24837. (a) In the case of expenditures paid or incurred during the taxable year for the purpose of ascertaining the existance, location, extent, or quality of any deposit of ore or other mineral, and paid or incurred prior to the beginning of the development stage of the mine or deposit, in computing net income there shall be allowed as a deduction so much of such expenditures as does not exceed seventy-five thousand dollars ($75,000).

This section shall apply only with respect to the amount of such expenditures which, but for this section, would not be allowable as a deduction for the taxable year.

This section shall not apply to expenditures for the acquisition or improvement of property of a character which is subject to the allowance for depreciation provided in Section 24349, but allowances for depreciation shall be considered, for the purposes of this section, as expenditures paid or incurred.

In no case shall this section apply with respect to amounts paid or incurred for the purpose of ascertaining the existence, location, extent, or quality of any deposit of oil or gas.

(b) If the taxpayer elects, in accordance with regulations prescribed by the Franchise Tax Board, to treat as deferred expenses any portion of the amount deductible for the taxable year under subsection (a), such portion shall not be deductible under subsection (a) but shall be deductible on a ratable basis as the units of produced ores or minerals discovered or explored by reason of such expenditures are sold. An election made for any taxable year shall be binding for such year.

(c) This section shall not apply to any amounts paid or incurred in any taxable year if in any four preceding years the taxpayer, or any individual or corporation who has transferred to the taxpayer any mineral property under circumstances which make the provisions of Section 17883, 18135, 24552, 24553, 24577, 24575, 24988, 25404, or 29461 applicable to such transfer, has either (1) been allowed a deduction under subsection (a) of this section or (2) made the election provided under subsection (b) of this section.

(d) The amount of expenditures which are treated under subsection (b) as deferred expenses shall be taken into account in computing the adjusted basis of the mine or deposit, but such amounts, and the adjustments to basis provided in Section 24916 shall be disregarded in determining the adjusted basis of the property for the purpose of computing a deduction for depletion under this chapter.

SEC. 357. Section 24916 of said code is amended to read:

24916. Proper adjustment in respect of the property shall in all cases be made—

(a) For expenditures, receipts, losses, or other items properly chargeable to capital account, but no such adjustment shall be made for taxes or other carrying charges or for expenditures described in Section 24364 and Section 24369 for which deductions have been taken by a bank or corporation in determining net income for the taxable year or prior annual accounting periods,

(b) For exhaustion, wear and tear, obsolescence, amortization, and depletion

(1) In the case of banks or corporations subject to the tax imposed by Chapter 2, to the extent sustained prior to January 1, 1928, and to the extent allowed (but not less than the amount allowable) under this part, except that no deduction shall be made for amounts in excess of the amount which would have been allowable had depreciation not been computed on the basis of January 1, 1928, value and amounts in excess of the adjustments required by Section 113(b)(1)(B) of the Federal Revenue Act of 1938 for depletion prior to Janaury 1, 1932

(2) In the case of a taxpayer subject to the tax imposed by Chapter 3, to the extent sustained prior to January 1, 1937, and for periods thereafter to the extent allowed (but not less than the amount allowable) under the provisions of this part.

(3) If a taxpayer has not claimed an amortization deduction for an emergency facility, the adjustment under paragraph (1) shall be made only to the extent ordinarily provided under Sections 24349, and 24372

(c) In the case of stock (to the extent not provided for in the foregoing subsections) for the amount of distributions previously made which, under the law applicable to the year in which the distribution was made, either were tax free or were applicable in reduction of basis (not including distributions made by a corporation, which was classified as a personal service corporation under the provisions of the Federal Revenue Act of 1918 or 1921, out of its earnings or profits which were taxable in accordance with the provisions of Section 218 of the Federal Revenue Act of 1918 or 1921).

(d) (1) In the case of banks or corporations subject to the tax imposed by Chapter 2, in the case any bond (as defined in Section 24363) to the extent of the deductions allowable pursuant to Section 24360 with respect thereto.

(2) In the case of taxpayers subject to the tax imposed by Chapter 3, in the case of any bond (as defined in Section 24363) the interest on which is wholly exempt from the tax imposed by this part, to the extent of the amortizable bond premium disallowable as a deduction pursuant to Section 24361, and in the case of any other bond (as defined in Section 24363) to the extent of the deductions allowable pursuant to Section 24361 with respect thereto.

(3) In the case of property pledged to the Commodity Credit Corporation, to the extent of the amount received as a loan from the Commodity Credit Corporation and treated by the taxpayer as income for the year in which received pursuant to Section 24273, and to the extent of any deficiency on such loan with respect to which the taxpayer has been relieved from liability.

(e) For amounts allowed as deductions as deferred expenses under subdivision (b), of Section 24836 (relating to certain expenditures in the development of mines) and resulting in a reduction of the taxpayer's tax, but not less than the amounts allowable under such section for the taxable year and prior years

(f) For amounts allowable as deductions as deferred expenses under subdivision (b) of Section 24837 (relating to certain exploration expenditures) and resulting in a reduction of the taxpayer's tax, but not less than the amounts allowable under such section for the taxable year and prior years

(g) For amounts allowed as deductions as deferred expenses under Section 24366(a) (relating to research and experimental expenditures) and resulting in a reduction of the bank or corporations' taxes under this part, but not less than the amounts allowable under such section for the taxable year and prior years

(h) For amounts allowed as deductions for expenditures treated as deferred expenses under Section 24368 1 (relating to trademark and trade name expenditures) and resulting in a reduction of the taxpayer's taxes under this part, but not less than the amounts allowable under such section for the taxable year and prior years.

SEC. 358 Section 24918 of said code is amended to read:

24918. Where any amount is excluded from gross income under Section 24307(a) (relating to income from discharge of indebtedness) on account of the discharge of indebtedness the whole or a part of the amount so excluded from gross income shall be applied in reduction of the basis of any property held (whether before or after the time of the discharge) by the taxpayer during any portion of the taxable year in which such discharge occurred The amount to be so applied (not in excess of the amount so excluded from gross income, reduced by the amount of any deduction disallowed under Section 24307(a)) and the particular properties to which the reduction shall be allocated, shall be determined under regulations (prescribed by the Franchise Tax Board) in effect at the time of the filing of the consent by the taxpayer referred to in Section 24307(a). The reduction shall be made as of the first day of the taxable year in which the discharge occurred, except in the case of property not held by the taxpayer on such first day, in which case it shall take effect as of the time the holding of the taxpayer began.

SEC. 359. Section 24943 of said code is amended to read:

24943. If property (as a result of its destruction in whole or in part, theft, seizure, or requisition or condemnation or threat or imminence thereof) is compulsorily or involuntarily converted—

(a) Into property similar or related in service or use to the property so converted, no gain shall be recognized.

(b) Into money, and the disposition of the converted property occurred before January 1, 1953, no gain shall be recognized if such money is forthwith in good faith, under regulations prescribed by the Franchise Tax Board, expended in the acquisition of other property similar or related in service or use to the property so converted, or in the acquisition of control of a corporation owning such other property, or in the establishment of a replacement fund If any part of the money is not so expended, the gain shall be recognized to the extent of the money which is not so expended (regardless of whether such money is received in one or more taxable years and regardless of whether or not the money which is not so expended constitutes gain). For purposes of this subsection and Section 24944, the term "disposition of the converted property" means the destruction, theft, seizure, requisition, or condemnation of the converted property, or the sale or exchange of such property under threat or imminence of requisition or condemnation.

For purposes of this section and Section 24944, the term "control" means the ownership of stock possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote and at least 80 percent of the total number of shares of all other classes of stock of the corporation.

SEC. 360. Section 24944 of said code is amended to read:

24944. If property (as a result of its destruction in whole or in part, theft, seizure, or requisition or condemnation or threat or imminence thereof) is compulsorily or involuntarily converted into money or into property not similar or related in service or use to the converted property, and the disposition of the converted property (as defined in Section 24943(b)) occurred after December 31, 1952, the gain (if any) shall be recognized except to the extent hereinafter provided in this section:

(a) If the taxpayer during the period specified in subsection (b), for the purpose of replacing the property so converted, purchases other property similar or related in service or use to the property so converted, or purchases stock in the acquisition of control of a corporation owning such other property, at the election of the taxpayer the gain shall be recognized only to the extent that the amount realized upon such conversion (regardless of whether such amount is received in one or more taxable years) exceeds the cost of such other property or such stock Such election shall be made at such time and in such manner as the Franchise Tax Board may by regulations prescribe. For purposes of this subsection—

(1) No property or stock acquired before the disposition of the converted property shall be considered to have been acquired for the purpose of replacing such converted property unless held by the taxpayer on the date of such disposition; and

(2) The taxpayer shall be considered to have purchased property or stock only if, but for the provisions of Section 24947, the unadjusted basis of such property or stock would be its cost within the meaning of Section 24912.

(b) The period referred to in subsection (a) shall be the period beginning with the date of the disposition of the converted property, or the earliest date of the threat or imminence of requisition or condemnation of the converted property, whichever is the earlier, and ending—

(1) One year after the close of the first annual accounting period in which any part of the gain upon the conversion is realized; or

(2) Subject to such terms and conditions as may be specified by the Franchise Tax Board, at the close of such later date as the Franchise Tax Board may designate on application by the taxpayer. Such application shall be made at such time and in such manner as the Franchise Tax Board may by regulations prescribe.

SEC. 361 Section 24945 of said code is amended to read:

24945. If a taxpayer has made the election provided in Section 24944(a), then—

(a) The statutory period for the assessment of any deficiency, for any taxable year in which any part of the gain on such conversion is realized, attributable to such gain shall not expire prior to the expiration of four years from the date the Franchise Tax Board is notified by the taxpayer (in such manner as the Franchise Tax Board may by regulations prescribe) of the replacement of the converted property or of an intention not to replace; and

(b) Such deficiency may be assessed before the expiration of such four-year period notwithstanding the provisions of any other law or rule of law which would otherwise prevent such assessment.

SEC. 362. Section 24946 of said code is amended to read:

24946. If the election provided in Section 24944(a) is made by the taxpayer and such other property or such stock was purchased before the beginning of the last taxable year in which any part of the gain upon such conversion is realized, any deficiency, to the extent resulting from such election, for any annual accounting period ending before such last taxable year may be assessed (notwithstanding the provisions of Section 25663 or the provisions of any other law or rule of law which would otherwise prevent such assessment) at any time before the expiration of the period within which a deficiency for such last taxable year may be assessed.

SEC. 363. Section 24961 of said code is amended to read:

24961. In the case of the property acquired by a corporation, during a period of affiliation, from a corporation with which it was affiliated, the basis of such property, after such period of affiliation, shall be determined, in accordance with regulations prescribed by the Franchise Tax Board without regard to intercompany transactions in respect of which gain or loss was not recognized. The basis in case of property acquired by a corporation during any period, in the year 1929 or any subsequent year, in respect of which a consolidated return is made by such corporation under Article 9 of Chapter 2 or Section 141 of the Federal Revenue Act of 1928 or the Federal Revenue Act of 1932 or the Federal Revenue Act of 1934 or the Federal Revenue Act of 1936, or in the case of a corporation subject to the tax imposed by Chapter 3, the Federal Revenue Act of 1938, shall be determined in accordance with regulations prescribed under Article 9 of Chapter 2 or Section 141 of the Federal Revenue Act of 1928 or the Federal Revenue Act of 1932 or the Federal Revenue Act of 1936, or in the case of a corporation subject to the tax imposed by Chapter 3, the Federal Revenue Act of 1938. The basis in the case of property held by a corporation during any period, in the year 1929 or any subsequent year, in respect of which a consolidated return is made by such corporation under Article 9 of Chapter 2 or Section 141 of the Federal Revenue Act of 1928 or the Federal Revenue Act of 1932 or the Federal Revenue Act of 1934 or the Federal Revenue Act of 1936, or, in the case of a corporation subject to the tax imposed by Chapter 3, or the Federal Revenue Act of 1938, shall be adjusted in respect of any items relating to such period, in accordance with regulations prescribed under Article 9 of Chapter 2 or Section 141 of the Federal Revenue Act of 1928 or the Federal Revenue Act of 1932 or the Federal Revenue Act of 1934 or the Federal Revenue Act of 1936, or in the case of a corporation subject to the tax imposed by Chapter 3, or the Federal Revenue Act of 1938, applicable to such period.

SEC. 364. Section 24962 of said code is amended to read:

24962. (a) If the property was acquired, after February 28, 1913, in any year beginning before January 1, 1934, and the basis thereof, for purposes of the Revenue Act of 1932 was prescribed by Section 113(a) (6), (7), or (9) of such act (47 Stat. 199), then for purposes of this part the basis shall be the same as the basis therein prescribed in the Revenue Act of 1932.

(b) If the property was acquired, after February 28, 1913, in any year beginning before January 1, 1937, and the basis thereof, for purposes of the Revenue Act of 1934, was prescribed by Section 113(a) (6), (7), or (8) of such act (48 Stat. 706), then for purposes of this part the basis shall be the same as the basis therein prescribed in the Revenue Act of 1934.

(c) If the property was acquired after February 28, 1913, in a transaction to which the Bank and Corporation Tax Law

of 1954 applied, and the basis thereof, for purposes of the Bank and Corporation Tax Law of 1954, was prescribed by Section 25071(d), 25071(e), or 25071(f) of such law, then for purposes of this part the basis shall be the same as the basis therein prescribed in the Bank and Corporation Tax Law of 1954

(d) Stock rights acquired after February 28, 1913, and before January 1, 1955, shall have the basis assigned to such property under Section 25071m of the Bank and Corporation Tax Law of 1954.

SEC. 365 Section 24971 of said code is amended to read:

24971 If the sale or exchange of property (including stock in a corporation) is certified by the Federal Communications Commission to be necessary or appropriate to effectuate a change in a policy of, or the adoption of a new policy by the commission with respect to the ownership and control of radio broadcasting stations, such sale or exchange shall, if the taxpayer so elects, be treated as an involuntary conversion of such property within the meaning of Sections 24943 to 24947, inclusive. For purposes of such sections as made applicable by the provisions of this section, stock of a corporation operating a radio broadcasting station, whether or not representing control of such corporation, shall be treated as property similar or related in service or use to the property so converted, The part of the gain, if any, on such sale or exchange to which Sections 24943 to 24947, inclusive, is not applied shall nevertheless not be recognized, if the taxpayer so elects, to the extent that it is applied to reduce the basis for determining gain or loss on sale or exchange of property, of a character subject to the allowance for depreciation under Section 24349, remaining in the hands of the taxpayer immediately after the sale or exchange, or acquired in the same taxable year. The manner and amount of such reduction shall be determined under regulations prescribed by the Franchise Tax Board. Any election made by the taxpayer under this section shall be made by a statement to that effect in its return for the taxable year in which the sale or exchange takes place, and such election shall be binding for the taxable year and all subsequent taxable years.

SEC 366 Section 25001 of said code is amended to read:

25001. On the recovery in the taxable year of any money or property in respect of property considered under Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954, as destroyed or seized, the amount of such recovery shall be included in gross income to the extent provided in Section 25002, unless Sections 25004 to 25006, inclusive, apply to the taxable year pursuant to an election made by the taxpayer under Section 25009.

SEC 367. Section 25003 of said code is amended to read:

25003 (a) To the extent that the amount of the recovery plus the aggregate of the amounts of previous such recoveries do not exceed that part of the aggregate of the allowable

deductions in prior taxable years on account of the destruction or seizure of property described in Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 which did not result in a reduction of any tax of the taxpayer under this part, such amount shall not be includable in gross income and shall not be deemed gain on the involuntary conversion of property as a result of its destruction or seizure.

(b) To the extent that such amount plus the aggregate of the amounts of previous such recoveries exceed that part of the aggregate of such deductions, which did not result in a reduction of any tax of the taxpayer under this part and do not exceed that part of the aggregate of such deductions which did result in a reduction of any tax of the taxpayer under this part, such amount shall be included in gross income but shall not be deemed a gain on the involuntary conversion of property as a result of its destruction or seizure.

(c) To the extent that such amount plus the aggregate of the amounts of previous such recoveries exceed the aggregate of the allowable deductions in prior taxable years on account of the destruction or seizure of property described in Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954, such amount shall be considered a gain on the involuntary conversion of property as a result of its destruction or seizure and shall be recognized or not recognized as provided in Sections 24943 to 24947, inclusive (relating to involuntary conversions)

(d) If for any previous taxable year the taxpayer chose under Article 3 Chapter 6 of the Bank and Corporation Tax Law of 1954 to treat any obligations and liabilities as discharged or satisfied out of the property or interest described in Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954, and if such obligations and liabilities were not so discharged or satisfied, the amount of such obligations and liabilities treated as discharged or satisfied under such Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 shall be considered for purposes of this part as a deduction by reason of such Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 which did not result in a reduction of any tax of the taxpayer under this part.

(e) For purposes of this section, an allowable deduction for any taxable year on account of the destruction or seizure of property described in Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 shall, to the extent not allowed in computing the tax of a taxpayer for such a taxable year, be considered an allowable deduction which did not result in a reduction of any tax of the taxpayer under this part.

SEC. 368 Section 25004 of said code is amended to read:

25004 If this section applies to the taxable year pursuant to an election made by the taxpayer under Section 25009 or Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954, the amount of the recovery in the year of any money or property in respect of property considered under Article 3

of Chapter 6 of the Bank and Corporation Tax Law of 1954 as destroyed or seized, shall be an amount equal to the aggregate of such money and the fair market value of such property, determined as of the date of the recovery. For purposes of this section and Sections 25005 and 25006, in the case of the recovery of the same property or interest considered under Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 as destroyed or seized, the fair market value of such property or interest shall, at the option of the taxpayer, be considered an amount equal to the adjusted basis (for determining loss) of such property or interest in the hands of the taxpayer on the date such property or interest was considered under Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 as destroyed or seized. The amount of the recovery determined under this section shall be reduced for purposes of Sections 25005 and 25006 by the amount of the obligations or liabilities with respect to the property considered under Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 as destroyed or seized in respect of which the recovery was received, if the taxpayer for any previous year chose under Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 to treat such obligations or liabilities as discharged or satisfied out of such property, and such obligations or liabilities were not so discharged or satisfied before the date of the recovery.

SEC. 369. Section 25005 of said code is amended to read.

25005. That part of the amount of the recovery, in respect of any property considered under Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 as destroyed or seized, which is not in excess of the allowable deductions in prior years on account of such destruction or seizure of the property (the amount of such allowable deductions being first reduced by the aggregate amount of any prior recoveries in respect of the same property) shall be excluded from gross income for the year of the recovery for purposes of computing the tax under this part; but there shall be added to, and assessed and collected as a part of, the tax under this part for the year of the recovery the total increase in the tax under this part for all years which would result by decreasing, in an amount equal to such part of the recovery so excluded, such deductions allowable in the prior years with respect to the destruction or seizure of the property. Such increase in the tax for each such year so resulting shall be computed in accordance with regulations prescribed by the Franchise Tax Board Such regulations shall give effect to previous recoveries of any kind (including recoveries described in Section 24310, relating to recovery of bad debts, etc) with respect to any prior year, and shall provide for the case where there was no tax for the prior year.

SEC. 370. Section 25006 of said code is amended to read·

25006 The amount of any recovery or part thereof, in respect of property considered under such Article 3 of Chap-

ter 6 of the Bank and Corporation Tax Law of 1954 as destroyed or seized which is not excluded from gross income under Section 25005, shall be considered for a year of the recovery as gain on the involuntary conversion of property as a result of its destruction or seizure and shall be recognized or not recognized as provided in Sections 24943 to 24947, inclusive.

SEC. 371. Section 25009 of said code is amended to read.

25009. If the taxpayer elects to have Sections 25004 to 25006, inclusive, apply to a taxable year in which it recovered any money or property in respect of property considered under Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954, as destroyed or seized, Sections 25004 to 25006, inclusive, shall apply to all annual accounting periods of the taxpayer beginning after December 31, 1941, and such election, once made, shall be irrevocable. The election shall be made in such manner and at such time as the Franchise Tax Board may by regulations prescribe, except that no election under this section may be made unless the taxpayer recovers money or property (in respect of property considered under Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 as destroyed or seized) during a year for which the election is made If pursuant to such election Sections 25004 to 25006, inclusive, apply to any taxable year—

(a) The period of limitations provided in Section 25663 on the making of assessments and the beginning of distraint or a proceeding in court for collection shall not, with respect to—

(1) The amount to be added to the tax for such a taxable year under Sections 25004 to 25006, inclusive; and

(2) Any deficiency for such a taxable year or for any other taxable year, to the extent attributable to the basis of the recovered property being determined under Section 25010(b), expire before the expiration of two years following the date of the making of such election, and such amount and such deficiency may be assessed at any time before the expiration of such period notwithstanding any law or rule of law which would otherwise prevent such assessment and collection; and

(b) In case refund or credit of any overpayment resulting from the application of Sections 25004 to 25006, inclusive, to such taxable year is prevented on the date of the making of such election, or within one year from such date, by the operation of any law or rule of law, refund or credit of such overpayment may, nevertheless, be made or allowed if claim therefor is filed within one year from such date.

In the case of any annual accounting period ending before the date of the making by the taxpayer of an election under this section, no interest shall be paid on any overpayment resulting from the application of Sections 25004 to 25006, inclusive, to such accounting period, and no interest shall be assessed or collected with respect to any amount or any deficiency specified in subsection (a) for any period before the

expiration of six months following the date of the making of such election by the taxpayer.

SEC. 372 Section 25010 of said code is amended to read:

25010. (a) The unadjusted basis of property recovered in respect of property considered as destroyed or seized under Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 shall be determined under this section Such basis shall be an amount equal to the fair market value of such property, determined as of the date of the recovery, reduced by an amount equal to the excess of the aggregate of such fair market value and the amounts of previous recoveries of money or property in respect of property considered under such Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 as destroyed or seized over the aggregate of the allowable deductions in prior years on account of the destruction or seizure of property described in such Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954, and increased by that portion of the amount of the recovery which, under Sections 25002 and 25003, is treated as a recognized gain from the involuntary conversion of property On application of the taxpayer, the aggregate of the basis (determined under the preceding sentence) of any properties recovered in respect of properties considered under such Article 3 of Chapter 6 of the Bank and Corporation Tax Law of 1954 as destroyed or seized may be allocated among the properties so recovered in such manner as the Franchise Tax Board may determine under regulations prescribed by the Franchise Tax Board, and the amounts so allocated to any such property so recovered shall be the unadjusted basis of such property in lieu of the unadjusted basis of such property determined under the preceding sentence.

(b) In the case of a taxpayer who has made an election under Section 25009, the basis of property recovered shall be an amount equal to the value at which such property is included in the amount of the recovery under Section 25004 (determined without regard to the last sentence thereof), reduced by such part of the gain under Section 25006 which is not recognized as provided in Sections 24943 to 24947, inclusive.

SEC. 373. Section 25101 of the said code is amended to read:

25101 When the income of a taxpayer subject to the tax imposed under this part is derived from or attributable to sources both within and without the state, the tax shall be measured by the net income derived from or attributable to sources within this state.

Nonbusiness income shall be allocated as provided in Sections 25108 and 25109

Business income derived from or attributable to sources within this state shall be determined by an allocation formula consisting of the factors of sales, payroll, and property as defined in this chapter or by reference to any of these

or other factors or by such other method of allocation as is fairly calculated to determine the net income derived from or attributable to sources within this state; provided, however, that any such factors or other method of allocation shall take into account as income derived from or attributable to sources without the state, income derived from or attributable to transportation by sea or air without the state, whether or not such transportation is located in or subject to the jurisdiction of any other state, the United States or any foreign country. Income attributable to isolated or occasional transactions in states or countries in which the taxpayer is not doing business shall be allocated to the state in which the taxpayer has its commercial domicile

If the Franchise Tax Board reallocates net income upon its examination of any return, it shall, upon the written request of the taxpayer, disclose the basis upon which its reallocation has been made

SEC. 374. Section 25101 1 of said code is amended to read:

25101 1. The amendments made at the 1957 Regular Session of the Legislature to Section 25101 of the Revenue and Taxation Code shall be applicable only with respect to annual accounting periods beginning after December 31, 1956. The determination as to whether income derived from or attributable to transportation by sea or air is allocable to or taxable by California for any annual accounting period beginning before January 1, 1957, shall be made as if Section 25101 had not been amended at the 1957 Regular Session of the Legislature and without inferences drawn from the fact that such amendments were not expressly made applicable with respect to annual accounting periods beginning before January 1, 1957.

SEC. 375. Section 25106 is added to said code, to read:

25106 As used in this chapter:

(a) "Business income" means income arising from transactions and activity in the regular course of a trade or business of the taxpayer and includes income from tangible and intangible property if the acquisition, management, or disposition of the property constitutes an integral part of a trade or business of the taxpayer. It also includes income from the disposition of property used in a trade or business of the taxpayer.

(b) "Commercial domicile" means the principal place from which the trade or business of the taxpayer is managed.

(c) "Compensation" means wages, salaries, commissions and any other form of remuneration paid or payable to employees for personal services.

(d) "Nonbusiness income" means all income other than business income.

(e) "State" means any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, and any foreign country or political subdivision thereof.

(f) "Sales" means all gross receipts of the taxpayer derived from the conduct of business, except receipts from the sale or other disposition of property not held for sale in the regular course of a trade or business of the taxpayer and receipts of the type referred to in Sections 25108 and 25109 to the extent not constituting business income

SEC. 376 Section 25107 is added to said code, to read:

25107. For purposes of this chapter, a taxpayer is taxable in another state if (a) any portion of its business income is derived from or attributable to sources within that state, and (b) such other state has jurisdiction to tax such income under the Constitution and laws of the United States *or would have such jurisdiction if the Constitution and laws of the United States were applicable thereto*.

SEC 377. Section 25108 is added to said code, to read:

25108. Income from real property or tangible personal property, including rents and royalties and gains and losses from the sale or other disposition of such property, to the extent not constituting business income shall be allocated to the state where the property is located; provided, however, that if such personal property is not permanently located in any state, such income shall be allocated to the state of the taxpayer's commercial domicile.

SEC 378 Section 25109 is added to said code, to read:

25109. (a) Income from stocks, including dividends and gains and losses from the sale or other disposition of stocks *to the extent not constituting business income*, shall be allocated to the state of the taxpayer's commercial ~~domicile, unless the taxpayer is engaged in a trade or business of selling such property, in which case the income therefrom is business income~~ *domicile.*

(b) Income from notes, bonds, accounts receivable, patents or copyrights, or other intangibles including interest, royalties and gains and losses from the sale or other disposition of such intangibles, to the extent not constituting business income, shall be allocated to the state of the taxpayer's commercial domicile.

SEC 379 Section 25110 is added to said code, to read.

25110 When formula allocation is used to determine the net income of a trade or business derived from or attributable to sources within this state, the allocation formula shall be applied as follows: The average of the factors utilized shall be ascertained, and that average then shall be applied to the total net business income of the taxpayer from that trade or business

SEC. 380. Section 25111 is added to said code, to read:

25111. The numerator of the property factor is the average value of the taxpayer's real and tangible personal property used in this state in producing business income during the taxable year, whether owned or rented

SEC 381. Section 25112 is added to said code, to read:

25112. The denominator of the property factor is the average value of all the taxpayer's real and tangible personal property used in producing business income during the taxable year, whether owned or rented.

SEC. 382. Section 25113 is added to said code, to read:

25113. When property is used both within and without the state during the taxable year, the extent of the use within the state shall be determined in such reasonable manner as the Franchise Tax Board may provide When property is used only in part for producing business income during the taxable year, the extent of the use for producing business income shall likewise be determined in such reasonable manner as the Franchise Tax Board may provide.

SEC. 383. Section 25114 is added to said code, to read:

25114. Property owned by the taxpayer shall be valued at an amount equal to its basis for determining gain from its sale or other disposition. Property rented by the taxpayer shall be valued at eight times the rent payable or accruable during the taxable year, provided the rent payable or accruable fairly reflects the fair rental value of the property as of the date of the rental agreement. If rent is not payable for all or any portion of the year, or if for any reason the rent does not fairly reflect the fair rental value of the property at the date of the rental agreement, the property shall be valued at eight times the fair rental value of the property as of the date of the rental agreement.

SEC. 384. Section 25115 is added to said code, to read:

25115 The average value of property shall be determined by averaging the values at the beginning and ending of the taxable year, but the Franchise Tax Board may require the averaging of monthly values during the taxable year if reasonably required to reflect properly the average value of the taxpayer's property.

SEC. 385. Section 25116 is added to said code, to read:

25116. Compensation for services related to business income shall be considered paid or payable in this state and included in the numerator of the payroll factor if:

(a) The employee's service is performed entirely within this state; or

(b) The employee's service is performed both within and without this state, but the service performed without this state is incidental to the employee's service within this state; or

(c) Some of the employee's service is performed in this state and (1) the base of operations or, if there is no base of operations, the place from which the service is directed or controlled is in this state, or (2) the base of operations or the place from which the service is directed or controlled is not in any state in which some part of the service is performed, but the employee's residence is in this state.

SEC. 386. Section 25117 is added to said code, to read:

25117. The denominator of the payroll factor shall include all compensation paid or payable to employees for services related to business income. When services are related only in part to business income during the taxable year, to the extent of the compensation for services related to business income shall be determined in such reasonable manner as the Franchise Tax Board may provide.

SEC. 387. Section 25118 is added to said code, to read:

25118. Sales of tangible personal property shall be considered made in this state and included in the numerator of the sales factor if:

(a) The property is delivered or shipped to a purchaser, other than the U.S. government, or to the designee of the purchaser within this state regardless of the f.o b. point or other conditions of the sale; or

(b) The property is shipped from an office, store, warehouse, factory, or other place of storage in this state and (1) the purchaser is the U S. government, or (2) the taxpayer is not taxable in the state to which the property is delivered or shipped.

SEC. 388. Section 25119 is added to said code, to read:

25119. The denominator of the sales factor shall include sales as defined in subdivision (f) of Section 25106.

SEC. 389. Section 25120 is added to said code, to read.

25120. The extent to which sales other than sales of tangible personal property are attributable to this state shall be determined in such reasonable manner as the Franchise Tax Board may provide.

SEC. 390. Section 25201 of said code is amended to read:

25201. In the case of a contract with the United States or any agency thereof, or any subcontract thereunder, which is made by the taxpayer, if a renegotiation is made in respect of such contract or subcontract and an amount of excessive profits received or accrued under such contract or subcontract for an annual accounting period (hereinafter referred to as "prior year") is eliminated and, in an annual accounting period ending after December 31, 1941, the taxpayer is required to pay or repay to the United States or any agency thereof the amount of profits eliminated or the amount of profits eliminated is applied as an offset against other amounts due the taxpayer, then the profits so eliminated shall be excluded from gross income for the prior year if they were included in gross income for the prior year. For the purposes of this article—

(a) The term "renegotiation" includes any transaction which is a renegotiation within the meaning of the federal renegotiation act applicable to such transaction, any modification of one or more contracts with the United States or any agency thereof, and any agreement with the United States or any agency thereof in respect of one or more such contracts or subcontracts thereunder

(b) The term "excessive profits" includes any amount which constitutes excessive profits within the meaning as-

signed to such term by the applicable federal renegotiation act, any part of the contract price of a contract with the United States or any agency thereof, any part of the subcontract price of a subcontract under such a contract, and any profits derived from one or more such contracts or subcontracts.

(c) The term "subcontract" includes any purchase order or agreement which is a subcontract within the meaning assigned to such term by the applicable federal renegotiation act.

(d) The term "federal renegotiation act" includes Section 403 of the Sixth Supplemental National Defense Appropriation Act (Public Law 528, 77th Congress, Second Session), as amended or supplemented, the Renegotiation Act of 1948, as amended or supplemented, and the Renegotiation Act of 1951, as amended or supplemented.

SEC 391. Section 25202 of said code is amended to read:

25202. In the case of a cost-plus-a-fixed-fee contract between the United States or any agency thereof and the taxpayer, if an item for which the taxpayer has been reimbursed by the United States or any agency thereof is disallowed as an item of cost chargeable to such contract, and, in an annual accounting period ending after December 31, 1941, the taxpayer is required to repay the United States or any agency thereof the amount disallowed, or the amount disallowed is applied as an offset against other amounts due the taxpayer, for the purposes of this part the amount so disallowed or so applied as an offset shall be allowed as a deduction in the taxable year in which the reimbursement for such item was received or was accrued to the extent that the taxpayer's taxable net income for the year in which the cost was incurred would have been reduced had no such reimbursement been received or accrued.

SEC. 392 Section 25204 of said code is amended to read:

25204. The foregoing provisions of this article shall not apply in respect of any contract if the taxpayer shows to the satisfaction of the Franchise Tax Board that a different method of accounting for the amount of the payment, repayments, or disallowance clearly reflects income, and in such case the payment, repayment, or disallowance shall be accounted for with respect to the taxable year provided for under such method.

SEC 393. Section 25206 of said code is amended to read:

25206. If prior to the payment of the tax for the taxable year the taxpayer becomes entitled to the exclusions or deductions provided in this article for its taxable year, the taxpayer may, under regulations prescribed by the Franchise Tax Board, file a claim in abatement of any unpaid tax or portion thereof, but not in excess of the reduction in tax resulting from the application of this article.

SEC 394 Section 25208 of said code is amended to read:

25208. (a) If, pursuant to a price redetermination provision in a subcontract to which this section applies, a repayment with respect to an amount paid under the subcontract is made by one party to the subcontract (hereinafter referred to as the "payor") to another party to the subcontract (hereinafter referred to as the "payee"), then—

(1) The tax of the payor for prior years shall be recomputed as if the amount received or accrued by it with respect to which the repayment is made did not include an amount equal to the amount of the repayment, and

(2) The tax of the payee for prior years shall be recomputed as if the amount paid or incurred by it with respect to which the repayment is made did not include an amount equal to the amount of the repayment.

(b) Subsection (a) shall apply only to a subcontract which is subject to renegotiation under the applicable federal renegotiation act

(c) Subsection (a) shall not apply to any repayment to the extent that Sections 25201 through 25207 apply to the amount repaid

(d) The amount of any repayment to which subsection (a) applies shall not be taken into account by the payor or payee for the year in which the repayment is made, but any overpayment or underpayment of tax resulting from the application of subsection (a) shall be treated as if it were an overpayment or underpayment for the year in which the repayment is made.

(e) This section shall apply only with respect to subcontracts entered into after December 31, 1960, and only to repayments for annual accounting periods beginning after December 31, 1960

SEC 395 Section 25401 of said code is amended to read:

25401 (a) Every taxpayer subject to the tax imposed by this part shall, within 2 months and 15 days after the close of its taxable year, or within 2 months and 15 days after the effective date of dissolution or withdrawal provided in Section 23331, transmit to the Franchise Tax Board a return in a form prescribed by it, specifying for the taxable year, all such facts as it may by rule, or otherwise, require in order to carry out the provisions of this part A tax return, disclosing net income for any taxable year, filed pursuant to Chapter 2 or Chapter 3 of this part shall be deemed filed pursuant to the proper chapter of this part for the same period, if the chapter under which filed is determined erroneous.

(b) Except in the case of dissolution or withdrawal as provided in subdivision (a), returns of cooperative associations described in Section 24404 shall be filed on or before the 15th day of the 9th month following the close of the taxable year

SEC 396 Section 25401b of said code is amended to read:

25401b. (1) For purposes of this part the amount deducted and withheld under Section 26131 during any calendar year

shall be allowed to the bank or corporation from which such amount was deducted and withheld as a credit against the tax imposed by this part.

(2) The amount so withheld during any calendar year shall be allowed as a credit for the taxable year of the bank or corporation with respect to which such amount was withheld

(3) For purposes of Section 26073, any tax actually deducted and withheld during any calendar year under Section 26131 shall, in respect of the bank or corporation from which such amount was deducted and withheld, be deemed to have been paid by it on the 15th day of the third month following the close of the taxable year with respect to which such tax was deducted and withheld

SEC. 397. Section 25441 of said code is amended to read:

25441. Every taxpayer subject to the tax imposed by this part shall, within 5 months and 15 days after the beginning of its taxable year, transmit to the Franchise Tax Board a declaration of estimated tax containing such pertinent information as the Franchise Tax Board may by forms or regulations prescribe, the estimated tax to be computed on the basis of the estimated net income of the taxable year

SEC. 398. Section 25442 of said code is amended to read:

25442. A taxpayer may make amendments of a declaration filed during the taxable year under regulations prescribed by the Franchise Tax Board

SEC. 399 Section 25443 of said code is amended to read:

25443. A taxpayer with a taxable year of less than 12 months shall make a declaration in accordance with regulations prescribed by the Franchise Tax Board

SEC 400. Section 25552b of said code is amended to read:

25552b The sum of the first and second installments, provided for in Sections 25552 and 25552a, shall not exceed 10 percent of the net income of each such taxpayer subject to the tax imposed by Article 3 of Chapter 2.

SEC 400.5. Section 25553 of said code is amended to read:

25553 Beginning with the calendar year 1965 and fiscal years beginning in 1965, in the case of taxpayers subject to the tax imposed by Article 3 of Chapter 2, there shall be due and payable on or before the 15th day of the 3rd month following the close of the preceding year from each such taxpayer a percentage of its net income as disclosed by its return which is equal to the rate applicable to corporations subject to the tax imposed by Article 2 of Chapter 2 plus the difference between such rate and the rate determined by the Franchise Tax Board in December of the preceding year pursuant to Section 23186a, *23186.5 or 23186.7, whichever is applicable,* less the credit allowable by Section 23184. The payment by financial corporations, other than credit unions whose gross income is twenty thousand dollars ($20,000) or less, shall not be less than the minimum tax of one hundred dollars ($100). The payment by credit unions whose gross income is twenty

thousand dollars ($20,000) or less shall not be less than twenty-five dollars ($25)

SEC 400 7 Section 25553 5 of said code is amended to read:

25553 5 The amount of tax payable by taxpayers subject to the tax imposed by Article 3 of Chapter 2 as set forth in a notice mailed to such taxpayers pursuant to Section 23186a, *23186 5 or 23186 7, whichever is applicable,* shall be due and payable or or before the 15th day following the mailing of the notice by the Franchise Tax Board

~~SEC 401 Section 25553 7 is added to said code, to read:~~

~~25553 7 Notwithstanding the provisions of Section 25553 and Section 25553 5 the tax for banks and financial corporations for the calendar year 1965 and fiscal years beginning in 1965, at the rate provided in Section 25181 2, shall be due and payable on or before the 15th day of the 3rd month following the close of the taxable year; but in no event shall the tax of a financial corporation be less than one hundred dollars ($100), except that in the case of a credit union the tax shall not be less than twenty-five dollars ($25). In computing its tax a financial corporation shall not be allowed the offset provided by Section 23181~~

SEC 401 5 Section 25562 of said code is amended to read:

25562 For purposes of this article, in the case of banks and financial corporations, the term "estimated tax" means the amount which the bank or financial corporation estimates as the amount of the tax imposed by this part at the rate determined by the Franchise Tax Board for the preceding year pursuant to Section 23186a, *23186 5 or 23186 7, whichever is applicable,* less the credit allowable by Section 23184, but in no event shall the estimated tax of a financial corporation be less than one hundred dollars ($100), except that in a case of a corporation described in subsection (a) of Section 23153 the estimated tax shall not be less than twenty-five dollars ($25).

SEC 402 Section 25563 of said code is amended to read:

25563 If the amount of estimated tax with respect to which a declaration is required under Article 2 5 of this chapter does not exceed one hundred dollars ($100), or twenty-five dollars ($25) in the case of a corporation described in Section 23153, the entire amount of the estimated tax shall be due and payable within 5 months and 15 days after the beginning of the taxable year. If the amount of estimated tax exceeds one hundred dollars ($100), or twenty-five dollars ($25) in the case of a corporation described in Section 23153, the amount payable within 5 months and 15 days after the beginning of the taxable year shall be—

(a) For the calendar year 1965 or taxable years beginning in that calendar year, one hundred dollars ($100) or 20 percent of the amount of the estimated tax (or twenty-five dollars ($25) or 20 percent of the estimated tax in the case of a corporation described in Section 23153), whichever is greater,

(b) For the calendar year 1966 or taxable years beginning in that calendar year, one hundred dollars ($100) or 35 percent of the amount of the estimated tax (or twenty-five dollars ($25) or 35 percent of the estimated tax in the case of a corporation described in Section 23153), whichever is greater;

(c) For taxable years beginning on or after January 1, 1967, one hundred dollars ($100) or 50 percent of the amount of the estimated tax (or twenty-five dollars ($25) or 50 percent of the estimated tax in the case of a corporation described in Section 23153), whichever is greater.

SEC 403 Section 25564 of said code is amended to read:

25564 The application of this article to taxable years of less than 12 months shall be in accordance with regulations prescribed by the Franchise Tax Board

SEC 404 Section 25761 of said code is amended to read·

25761 If the Franchise Tax Board finds that the assessment or collection of a tax or deficiency for any year, current or past, will be jeopardized in whole or in part by delay, it may mail or issue notice of its finding to the taxpayer, or its transferee or transferees, liable for the tax imposed under this part, together with a demand for immediate payment of the tax or deficiency declared to be in jeopardy, including interest and penalties and additions thereto.

In the case of a tax for a current period, the Franchise Tax Board may declare the taxable period of the taxpayer immediately terminated and shall mail or issue notice of its findings and declaration to the taxpayer, together with a demand for a return and immediate payment of the tax based on the period declared terminated, including therein income accrued and deductions incurred up to the date of termination if not otherwise properly includable or deductible in respect of such period, and such tax shall be immediately due and payable whether or not the time otherwise allowed by law for filing the return and paying the tax has expired

SEC. 405 Section 25952 of said code is amended to read:

25952 For the purposes of Section 25951 the amount of the underpayment shall be the excess of—

(a) The amount which would be required to be paid if the estimated tax were equal to 70 percent of the tax shown on the return for the taxable year, or in the case of the tax imposed by Article 3 of Chapter 2 the amount of the tax shown on the return for the taxable year plus or minus the amount of tax payable or refundable, respectively, as shown on the notice of determination mailed by the Franchise Tax Board pursuant to Section 23186a for the taxable year, or, if no return was filed, 70 percent of the tax for such year, over

(b) The amount, if any, paid on or before the last date prescribed for payment.

SEC. 406. Section 25953 of said code is amended to read:

25953. The period of the underpayment shall run from the date the payment was required to be made to whichever of the following dates is the earlier—

(a) The 15th day of the third month following the close of the taxable year.

(b) With respect to any portion of the underpayment, the date on which such portion is paid.

SEC. 407. Section 25954 of said code is amended to read:

25954. Notwithstanding the provisions of the preceding sections of this article, the addition to the tax with respect to any underpayment shall not be imposed if the amount of estimated tax paid on or before the last date prescribed for the payment equals or exceeds the amount which would have been required to be paid on or before such date if the estimated tax were whichever of the following is the lesser—

(a) The tax shown on the return of the taxpayer for the preceding annual accounting period if a return showing a liability for tax was filed by the taxpayer for the preceding year and such preceding year was a year of 12 months. The tax shown on the return, in the case of the tax imposed by Article 3 of Chapter 2, means the amount of tax shown on the return for the annual accounting period plus or minus the amount of tax payable or refundable, respectively, as shown on the notice of determination mailed by the Franchise Tax Board pursuant to Section 23186a for the taxable year.

(b) An amount equal to the tax computed at the rates applicable to the taxable year but otherwise on the basis of the facts shown on the return of the taxpayer for, and the law applicable to, the preceding taxable year.

(c)(1) An amount equal to 70 percent of the tax for the taxable year computed by placing on an annualized basis the taxable income for the first three months or for the first five months of the taxable year.

(2) For purposes of this subsection, the taxable income shall be placed on an annualized basis by—

(A) Multiplying by 12 the taxable income referred to in paragraph (1), and

(B) Dividing the resulting amount by the number of months in the annual accounting period referred to in paragraph (1).

"Taxable income" as used in this section means, in the case of the tax imposed by Chapter 2, income includable in the measure of the tax.

SEC. 408 Section 25956 of said code is amended to read:

25956. The application of this article to taxable years of less than 12 months shall be in accordance with regulations prescribed by the Franchise Tax Board.

SEC. 408.5 Section 26312 is added to said code, to read:

26312 (a) The Franchise Tax Board is authorized to provide with respect to any amount required to be shown on a form, return, statement, or other document, that if such amount of such item is other than a whole-dollar amount, either—

(1) The fractional part of a dollar shall be disregarded; or

(2) The fractional part of a dollar shall be disregarded unless it amounts to one-half dollar or more, in which case the amount (determined without regard to the fractional part of a dollar) shall be increased by one dollar ($1).

(b) Any person making a return, statement, or other document shall be allowed, under regulations prescribed by the Franchise Tax Board, to make such return, statement, or other document without regard to subdivision (a)

(c) The provisions of subdivisions (a) and (b) shall not be applicable to items which must be taken into account in making the computations necessary to determine the amount required to be shown on a form, but shall be applicable only to such final amount.

SEC 408 7. Section 26313 is added to said code, to read:

26313 The Franchise Tax Board may by regulations provide that in the allowance of any amount as a credit or refund, or in the collection of any amount as a deficiency or underpayment, of any tax imposed by this part, a fractional part of a dollar shall be disregarded, unless it amounts to 50 cents or more, in which case it shall be increased to one dollar ($1)

~~SEC. 409. The heading of Part 13 (commencing with Section 30001) of Division 2 of said code is amended to read:~~

~~PART 13. CIGARETTE AND TOBACCO TAX~~

~~SEC. 410. Section 30001 of said code is amended to read:~~

~~30001. This part is known and may be cited as the "Cigarette and Tobacco Tax Law."~~

~~SEC. 411. Section 30001 is added to said code, to read:~~

~~30001. "Tobacco product" means any article or product, other than a cigarette, made in whole or in part of tobacco, prepared or processed for consumption by smoking, chewing, or as snuff.~~

~~SEC. 412. Section 30005 of said code is amended to read:~~

~~30005. "Untaxed cigarette" or "untaxed tobacco product" means any cigarette or tobacco product which has not yet been distributed in such manner as to result in a tax liability under this part.~~

~~SEC. 413. Section 30007 is added to said code, to read:~~

~~30007. "Wholesale price" means the price at which a distributor purchases a tobacco product before the allowance of any discount, rebate or any other deduction. If the distributor is also the manufacturer of the tobacco product, it means the price at which the manufacturer sells a tobacco product before the allowance of any discount, rebate or any other deduction.~~

~~Sec. 414.~~ *SEC 409.* Section 30008 of said code is amended to read:

30008. "Distribution" includes:

(a) The sale of untaxed cigarettes ~~or untaxed tobacco products~~ in this state,

(b) The use or consumption of untaxed cigarettes ~~or untaxed tobacco products~~ in this state;

(c) The placing in this state of untaxed cigarettes in a vending machine or in retail stock for the purpose of selling the cigarettes to consumers,

~~(d). The receiving, handling or holding in this state, except by the manufacturer, of untaxed tobacco products for sale.~~

~~Sec. 415. Section 30009 of said code is amended to read:~~

~~30009. "Use or consumption" includes the exercise of any right or power over cigarettes or tobacco products incident to the ownership thereof, other than the sale of the cigarettes or tobacco products or the receiving, handling or holding thereof for the purpose of sale.~~

~~Sec. 416. Section 30011 of said code is amended to read:~~

~~30011. "Distributor" includes:~~

~~(a) Every person who, after 4 o'clock a.m. on July 1, 1950, and within the meaning of the term "distribution" as defined in this chapter, distributes cigarettes.~~

~~(b) Every person who, after 12:01 o'clock a.m. on July 1, 1965, and within the meaning of the term "distribution" as defined in this chapter, distributes tobacco products.~~

~~(c) Every person who sells or accepts orders for cigarettes or tobacco products which are to be transported from a point outside this state to a consumer within this state.~~

~~Sec. 417. Section 30012 of said code is amended to read:~~

~~30012. "Dealer" includes every person, other than one holding a distributor's license, who engages in this state in the sale of cigarettes or tobacco products.~~

~~Sec. 418. Section 30014 of said code is amended to read:~~

~~30014. "Transporter" means any person transporting in this state, cigarettes not contained in packages to which are affixed California cigarette tax stamps or meter impressions, or any person transporting in this state tobacco products obtained from a source located outside this state, or obtained within this state from any person neither licensed as a distributor under this part nor holding a permit issued pursuant to Article 2 of Chapter 2 of the Sales and Use Tax Law; provided however, transporter shall not include:~~

~~(a) a licensed distributor,~~

~~(b) a common carrier, or~~

~~(c) a person transporting cigarettes or tobacco products under Federal Internal Revenue bond or customs control that are nontax-paid under Chapter 52 of the Internal Revenue Act of 1954 as amended.~~

~~Sec. 419.~~

SEC. 410. Section 30016 of said code is repealed.

~~Sec. 420.~~

SEC. 411 Section 30101 of said code is amended to read:

30101 Every distributor shall pay a tax upon his distributions ~~of cigarettes and tobacco products at the following rates:~~

~~(a) At the rate of one and one-half mills ($0.0015) for the distribution of each cigarette until 12:01 o'clock a.m. on July 1, 1965, and at the rate of four mills ($0.004) for the distribution of each cigarette on and after 12:01 o'clock a.m. on July 1, 1965.~~

~~(b) At the rate of twenty percent (20%) of the wholesale price for the distribution of tobacco products on and after 12:01 o'clock a.m. on July 1, 1965.~~

tions of cigarettes at the rate of one and one-half mills ($0.0015) for the distribution of each cigarette after 4 o'clock a.m on July 1, 1959, to and including 12:01 o'clock a.m. on July 1, 1965, and at the rate of four mills ($0.004) thereafter.

~~Sec. 421. Section 30101.5 is added to said code, to read:~~

~~30101.5. When tobacco products that would otherwise be "untaxed tobacco products" except for the operation of subdivision (d) of Section 30008 are sold, used or consumed by a distributor in a manner that would be exempt from the taxes imposed by this part if they were "untaxed tobacco products," they shall be deemed to be "untaxed tobacco products" for the purpose of the sale, use or consumption and the distributor shall be allowed a tax credit equal to the tax liability imposed upon him for the distribution of the tobacco products arising from the operation of subdivision (d) of Section 30008.~~

~~Sec. 422. Section 30102 of said code is amended to read:~~

~~30102. The taxes imposed by this part shall not apply to the sale of cigarettes or tobacco products to:~~

~~(a) U.S. Army, Air Force, Navy, Marine Corps or Coast Guard exchanges and commissaries and Navy or Coast Guard ships' stores, or~~

~~(b) The U.S. Veterans Administration.~~

~~Sec. 423.~~

SEC. 412. Section 30102.5 of said code is amended to read:

30102.5. The taxes imposed by this part shall not apply to the distribution of cigarettes or tobacco products that are non-tax paid under the provisions of the Internal Revenue Act of 1954 as amended, and the cigarette or tobacco products are under Internal Revenue bond or customs control.

~~Sec. 424 Section 30103 of said code is amended to read:~~

~~30103. The taxes imposed by this part shall not apply to the sale of cigarettes or tobacco products by the manufacturer to a licensed distributor.~~

~~Sec. 425 Section 30104 of said code is amended to read:~~

~~30104. The taxes imposed by this part shall not apply to the sale of cigarettes or tobacco products by a distributor to a common carrier engaged in interstate or foreign passenger service or to a person authorized to sell cigarettes or tobacco products on the facilities of such carrier. Whenever cigarettes or tobacco products are sold by distributors to common carriers~~

~~engaged in interstate or foreign passenger service for use or sale on facilities of the carriers, or to persons authorized to sell cigarettes or tobacco products on those facilities, the tax imposed by Section 30101 shall not be levied with respect to the sales of the cigarettes or tobacco products by the distributors, but a tax is hereby levied upon the carriers or upon the persons authorized to sell cigarettes or tobacco products on the facilities of the carriers, as the case may be, for the privilege of making such sales in California at the same rate as set forth in Section 30101. Such common carriers and authorized persons shall pay the tax imposed by this section and file reports with the board, as provided in Section 30186.~~

~~SEC. 426. Section 30105.5 of said code is amended to read:~~

~~30105.5. The taxes imposed by this part shall not apply to the sale or gift of federally tax-free cigarettes or tobacco products when the cigarettes or tobacco products are delivered directly from the manufacturer under Internal Revenue bond to a veterans' home of the State of California or a hospital or domiciliary facility of the U.S. Veterans Administration for gratuitous issue to veterans receiving hospitalization of domiciliary care. The tax shall not be imposed with respect to the use or consumption of such cigarettes or tobacco products by the institution or by the veteran patients or domiciliaries.~~

~~SEC. 427. Section 30106 of said code is amended to read:~~

~~30106. The taxes imposed by this part shall not apply to the use or consumption of untaxed cigarettes transported to this state in a single lot or shipment of not more than 200 cigarettes, or of not more than 200 untaxed cigarettes obtained at one time from any of the instrumentalities listed in Section 30102.~~

~~SEC. 428. Section 30107 of said code is repealed.~~

~~SEC. 429. Section 30107 is added to said code, to read:~~

~~30107. The taxes resulting from a distribution of cigarettes or tobacco products within the meaning of subdivision (b) of Section 30008 shall be paid by the user or consumer.~~

~~SEC. 430. Section 30108 of said code is amended to read:~~

~~30108. Every distributor engaged in business in this state and selling or accepting orders for cigarettes or tobacco products with respect to the sale of which the tax imposed by Section 30101 is mappleable shall, at the time of making the sale or accepting the order or, if the purchaser is not then obligated to pay the tax with respect to his distribution of the cigarettes or tobacco products, at the time the purchaser becomes so obligated, collect the tax from the purchaser, if the purchaser is other than a licensed distributor, and shall give to the purchaser a receipt therefor in the manner and form prescribed by the board.~~

~~"Distributor engaged in business in the state" means and includes any of the following:~~

~~(a) Any distributor maintaining, occupying, or using, permanently or temporarily, directly or indirectly, or through a subsidiary, or agent, by whatever name called, an office, place~~

of distribution, sales or sample room or place, warehouse or storage place or other place of business.

(b) Any distributor having any representative, agent, salesman, canvasser or solicitor operating in this state under the authority of the distributor or its subsidiary for the purpose of selling, delivering, or the taking of orders for cigarettes or tobacco products.

SEC. 431. Section 30109 of said code is amended to read:

30109. Unless the contrary is established, it shall be presumed that all cigarettes or tobacco products acquired by a distributor are untaxed, and that all cigarettes or tobacco products manufactured in this state or transported to this state, and no longer in the possession of the distributor, have been distributed.

SEC. 432. Section 30111 of said code is amended to read:

30111. The taxes imposed by this part are in lieu of all other state, county, municipal, or district taxes on the privilege of distributing cigarettes and tobacco products.

This section does not prohibit the application of Part 1 (commencing at Section 6001) or Part 1.5 (commencing at Section 7200) of Division 2 of this code to the sale, storage, use or other consumption of cigarettes and tobacco products.

SEC. 433.

SEC. 113. Article 2 (commencing at Section 30115) of Chapter 2 of Part 13 of Division 2 of said code is repealed

SEC. 434.

SEC. 414. Article 3 (commencing with Section 30121) of Chapter 2 of Part 13 of Division 2 of said code is repealed.

SEC. 435.

SEC. 415. Article 3 (commencing with Section 30126) is added to Chapter 2 of Part 13 of Division 2 of said code, to read:

Article 3. Floor Stocks and Indicia Adjustment Taxes

30126. For the privilege of holding or storing cigarettes or tobacco products for sale, use or consumption, a floor tax is hereby imposed upon every dealer at the rate of two and one-half mills ($0.0025) for each cigarette and in the amount of twenty percent (20%) of the dealer's purchase price for all tobacco products, in the possession of the dealer or under his control in this state at 12:01 o'clock a.m. on July 1, 1965.

30127. Every dealer shall take an inventory as of 12:01 o'clock a.m. on July 1, 1965, of all cigarettes and tobacco products in his possession or under his control. He shall file a report with the board on or before July 28, 1965, in such form as the board may prescribe, showing the number of cigarettes and the tobacco products with his purchase price of such tobacco products, in his possession or under his control at 12:01 o'clock a.m. on July 1, 1965. The amount of tax required to be paid on the cigarettes and tobacco products shall be computed and shown on the dealer's return.

30128. For the privilege of distributing cigarettes as a licensed distributor and for holding or storing cigarettes for sale, use or consumption a floor tax and cigarette indicia adjustment tax is hereby imposed upon every licensed distributor as follows:

(a) In the amount of five cents ($0 05) for each California cigarette tax stamp or meter impression bearing the designation "20" and in the amount of two and one-half cents ($0 025) for each California cigarette tax stamp bearing the designation "10," which is affixed to any package of cigarettes in the possession of the licensed distributor or under his control at 12 01 o'clock a m on July 1, 1965

(b) In the amount of five cents ($0 05) for each unaffixed California cigarette tax stamp bearing the designation "20" and two and one-half cents ($0 025) for each unaffixed California cigarette tax stamp bearing the designation "10" and fifty cents ($0 50) for each unused meter register unit, in the possession of the licensed distributor or under his control at 12 01 o'clock a.m. on July 1, 1965. The amounts levied under this subdivision shall be reduced by a discount of two percent (2%).

30129. Every licensed distributor shall take an inventory as of 12:01 o'clock a m. on July 1, 1965, of all packages of cigarettes to which are affixed California cigarette tax stamps or meter impressions and all unaffixed California cigarette tax stamps and unused meter register units in his possession or under his control. Every licensed distributor shall file a report with the board on or before July 28, 1965, in such form as the board may prescribe, showing:

(a) The number of California cigarette tax stamps and meter impressions, with the designations thereof, which were affixed to packages of cigarettes in his possession or under his control at 12 01 o'clock a m on July 1, 1965

(b) The number of unaffixed California cigarette tax stamps, with the designations thereof, and unused meter register units which were in his possession or under his control at 12 01 o'clock a m on July 1, 1965

The amount of tax required to be paid with respect to the stamp, meter impressions and meter register units shall be computed and shown on the distributor's return

30130 The taxes required to be paid by this article are due and payable on or before July 28, 1965. Payments shall be made by remittances payable to the board and the payments shall accompany the reports required to be filed by this article Any amount required to be paid by this article which is not timely paid shall bear interest at the rate of one-half of one percent per month or fraction thereof from July 28, 1965, until paid, and shall be subject to determination, and redetermination, and any penalties provided with respect to determinations and redeterminations.

30131. The provisions of this article shall not apply with respect to cigarettes ~~and tobacco products~~ which are non-tax

paid under the provisions of Chapter 52 of the Internal Revenue Act of 1954, as amended, and are in internal revenue bond or customs control.

~~30132. Tobacco products taxed under this article shall not be otherwise subject to the taxes imposed by this part, and a dealer shall not be required to obtain a distributor's license for the handling, holding for sale or the selling of such tobacco products.~~

~~SEC. 436. Section 30140 of said code is amended to read:~~

~~30140. Every person desiring to engage in the sale of cigarettes or tobacco products as a distributor, (including a common carrier or authorized person mentioned in Section 30104) except a person who desires merely to sell or accept orders for cigarettes or tobacco products which are to be transported from a point outside this state to a consumer within this state, shall file with the board an application, in such form as the board may prescribe, for a distributor's license. A distributor shall apply for and obtain a license for each place of business at which he engages in the business of distributing cigarettes or tobacco products.~~

~~SEC. 437.~~

SEC. 416 Section 30142 of said code is amended to read:

30142 The board shall fix the amount of the bond or bonds required of any distributor and may increase or reduce the amount at any time A minimum bond or bonds in the amount of one thousand dollars ($1,000) shall be furnished by every distributor required to be licensed. If a distributor desires to defer payments for stamps or meter register settings, as provided in Article 2 of Chapter 3 5 of this part, the board shall require a bond or bonds equal to the amount, as fixed by the board, of the distributor's purchases of stamps and meter register settings for which payment may be deferred

~~SEC. 438.~~

SEC. 417 Section 30167 of said code is amended to read:

30167. A licensed distributor may apply to the board to fix the maximum amount of deferred-payment purchases of stamps and meter register settings which the distributor may ~~make in any~~ *have unpaid at any time* ~~calendar month~~. Upon receipt of the application and the bond or bonds required pursuant to Section 30142, the board shall fix such amount. The board at any time may designate the sales locations where the distributor may make deferred-payment purchases of stamps and meter register settings and fix the amount of such purchases which the distributor may ~~make within each monthly period~~ *have unpaid at any time with respect to purchases made* at the designated sales locations.

~~SEC. 439.~~

SEC 418. Section 30168 of said code is amended to read:

30168 Amounts owing for stamps and meter register settings purchased on the deferred-payment basis in any calendar month beginning with July 1965 shall be due and payable on

or before the ~~20th~~ *28th* day of the following calendar month. Payment shall be made by a remittance payable to the board.

Amounts owing for purchases made from June 16, 1965, to and including June 30, 1965, shall be due and payable on or before July 28, 1965.

SEC. 419. Section 30170 of said code is amended to read:

30170. The board may suspend without prior notice a distributor's privilege to purchase stamps or meter register settings on the deferred-payment basis or may reduce the amount of permissible ~~monthly~~ *unpaid* purchases fixed for the distributor, if the distributor fails to promptly pay for stamps or meter register settings when payment is due, if the bond or bonds of the distributor are canceled, become void, impaired, or unenforceable for any reason, or if in the opinion of the board, collection of any amounts unpaid or due from the distributor under this part are jeopardized.

SEC. 420. Section 30179 of said code is amended to read:

30179. Interest shall be computed, allowed and paid upon any overpayment for the purchase of stamps or meter register settings at the rate of one-half of 1 percent per month from the due date for payment of the purchase for which the overpayment was made, but no refund or credit shall be made of any interest imposed upon the claimant with respect to the amount being refunded or credited The interest shall be paid:

(a) In the case of a refund, to the ~~15th~~ *20th* day of the calendar month following the date upon which the claimant is notified by the board that a claim may be filed or the date upon which the claim is certified to the State Board of Control, whichever date is the earlier

(b) In the case of a credit, to the same date as that to which interest is computed on the tax or amount against which the credit is applied.

~~SEC. 440.~~

SEC. 421. Section 30181 of said code is amended to read:

30181. When any tax imposed under Article 1 of Chapter 2 of this part is not paid through the use of stamps or meter impressions, the tax shall be due and payable monthly on or before the 20th day of the month following the calendar month in which a distribution of cigarettes ~~or tobacco products occurs, or in the case of a sale of cigarettes or tobacco products on the facilities of a common carrier for which the tax~~ *occurs, or in the case of a sale of cigarettes on the facilities of a common carrier for which the tax* is imposed pursuant to Section 30104, the tax shall be due and payable monthly on or before the 20th day of the month following the calendar month in which a sale of cigarettes ~~or tobacco products~~ on the facilities of the carrier occurs

~~SEC. 441.~~

SEC. 423. Section 30182 of said code is amended to read:

30182 On or before the 20th day of each month, every distributor shall file on forms prescribed by the board a report respecting his distributions of cigarettes ~~and tobacco~~

~~products~~ and purchases of stamps and meter register units during the preceding month and such other information as the board may require to carry out the purposes of this part.

~~SEC. 412.~~

SEC. 423. Section 30183 of said code is amended to read:

30183. On or before the 20th day of each month every distributor required under Section 30108 to collect any tax during the preceding month shall file a report with the board on forms prescribed by the board showing the number of cigarettes ~~and the tobacco products~~ with respect to which he was required to collect the tax and such other information as the board may require to carry out the purposes of this part.

~~SEC. 443.~~

SEC. 424 Section 30186 of said code is amended to read.

30186 On or before the 20th day of each month the common carriers and authorized persons specified in Section 30104 shall file with the board a report of the sales of cigarettes ~~and tobacco products~~ made by them on the facilities of the carriers in California in the preceding calendar month in such detail and form as the board may prescribe, submitting with the report the amount of the tax due under Section 30104

~~SEC. 444.~~

SEC. 425. Section 30187 of said code is amended to read:

30187. Every consumer or user subject to the tax resulting from a distribution of cigarettes ~~or tobacco products~~ within the meaning of subdivision (b) of Section 30008 from whom the tax has not been collected under Section 30108 shall on or before the 20th day of the month following receipt of cigarettes ~~or tobacco products~~ file with the board a report of the amount of cigarettes ~~and a description and the purchase price of tobacco products~~ received by him in the preceding calendar month in such detail and form as the board may prescribe, submitting with the report the amount of tax due

~~SEC. 445~~

SEC 426. Section 30202 of said code is amended to read:

30202. The amount of the determination, exclusive of penalties, shall bear interest at the rate of one-half of 1 percent per month, or fraction thereof, from the date the amount of the tax, or any portion thereof, should have been reported until the date of payment

~~SEC. 446. Section 30221 of said code is amended to read:~~

~~30221. If any person fails to make a report, the board shall make an estimate of the number of cigarettes and the quantities and prices of tobacco products distributed by him. The estimate shall be made for the month or months in respect to which the person failed to make a report and shall be based upon any information available to the board. Upon the basis of this estimate the board shall compute and determine the amount required to be paid to the state, adding to the sum thus fixed a penalty equal to 10 percent thereof. One or more determinations may be made for one or more than one month.~~

~~SEC. 447.~~

SEC. 427. Section 30223 of said code is amended to read:

30223. The amount of the determination, exclusive of penalties, shall bear interest at the rate of one-half of 1 percent per month, or fraction thereof, from the date the amount, or any portion thereof, should have been reported until the date of payment.

~~SEC. 448.~~

SEC. 427.1. Section 30244 is added to said code, to read:

30244. Any notice required by this article shall be served personally or by mail in the manner prescribed for service of notice of deficiency determination.

~~SEC. 449. Section 30366 of said code is amended to read:~~

SEC. 428. Section 30362 of said code is amended to read:

30362. No refund shall be allowed or approved after three years from the ~~fifteenth~~ *20th* day after the close of the monthly period for which the overpayment was made, or, with respect to a determination made under Chapter 4 of this part, after six months from the date the determination becomes final, or after six months from the date of overpayment, whichever period expires the later, unless a claim therefor is filed with the board within such period. No credit shall be approved or allowed after the expiration of such period unless a claim for credit is filed with the board within such period.

SEC. 429. Section 30366 of said code is amended to read:

30366. Interest shall be computed, allowed, and paid upon any overpayment of any amount of tax at the rate of one-half of 1 percent per month from the 20th day of the calendar month following the monthly period for which the overpayment was made, but no refund or credit shall be made of any interest imposed upon the claimant with respect to the amount being refunded or credited.

The interest shall be paid:

(a) In the case of a refund, to the 20th day of the calendar month following the date upon which the claimant is notified by the board that a claim may be filed or the date upon which the claim is certified to the State Board of Control, whichever date is the earlier.

(b) In the case of a credit, to the same date as that to which interest is computed on the tax or amount against which the credit is applied.

~~SEC. 450. Article 1.5 (commencing with Section 30371) is added to Chapter 6 of Part 13 of Division 2 of said code, to read:~~

~~Article 1.5. Unsalable Tobacco Products~~

~~30371. The board shall, pursuant to regulations prescribed by it, refund or credit to a distributor the amount of tax paid on tobacco products, which have prior to sale become unfit for use, unsalable or have been destroyed, or which after sale have been returned for credit or have been replaced, and the~~

board has proof of the tobacco products not being consumed in this state.

SEC. 451. Section 30131 of said code is amended to read:

30131. Any transporter desiring to possess or acquire for transportation or transport upon the highways, roads or streets of this state more than 200 cigarettes which are not contained in packages to which are affixed California cigarette tax stamps or meter impressions or tobacco products of more than five dollars ($5) in retail value, shall obtain a permit from the board authorizing such transporter to possess or acquire for transportation or transport the cigarettes or tobacco products, and he shall have the permit in the transporting vehicle during the period of transportation of the cigarettes or tobacco products. The application for the permit shall be in such form and shall contain such information as may be prescribed by the board. The board may issue a permit for a single load or shipment or for a number of loads or shipments to be transported under specified conditions.

SEC. 452. Section 30132 of said code is amended to read:

30132. Each transporter who shall transport or possess or acquire for the purpose of transporting upon the highways, roads or streets of this state more than 200 cigarettes which are not contained in packages to which are affixed California cigarette tax stamps or meter impressions or tobacco products of more than five dollars ($5) in retail value, is required to have in the transporting vehicle during the period of transportation invoices, bills of lading or delivery tickets covering the cigarettes or tobacco products being transported which shall show the name and address of the consignor or seller, the name and address of the consignee or purchaser and the quantity and brands of the cigarettes and tobacco products transported.

SEC. 453. Section 30133 of said code is repealed.

SEC. 454. Chapter 7.5 (commencing with Section 30136) is added to Part 13 of Division 2 of said code to read:

CHAPTER 7.5. SEIZURE AND FORFEITURE

30136. The following property, upon seizure by the board, is hereby forfeited to the State of California:

(a) Cigarettes and tobacco products transported upon the highways, roads or streets of this state in violation of the provisions of Section 30131 or Section 30132.

(b) Cigarettes not contained in packages to which are affixed California cigarette tax stamp or meter impressions, which are offered for sale, possessed, kept, stored or owned by any person with the intent of the person to sell the cigarettes without payment of the taxes imposed by this part.

(c) Untaxed tobacco products offered for sale, possessed, kept, stored or owned by any person with the intent of the person to sell them without a license in violation of this part.

~~(d) Any cigarette vending machine, together with the cigarettes, money or other contents thereof, which has been loaded in whole or in part with packages of cigarettes which do not have California cigarette tax stamps or meter impressions affixed.~~

~~30437. Notice of the seizure and forfeiture of the property shall be given by the board by personal service or by registered or certified mail to all persons known by the board to have any right, title or interest in the property seized. Unknown persons, or any known person who cannot be found, having any right, title or interest in the property shall be served by one publication of the notice of seizure and forfeiture in a newspaper of general circulation in the county where the seizure was made. The notice shall include a description of the property, the reason for the seizure, and the time and place of the seizure.~~

~~30438. Any person owning or claiming any interest in the property may file a verified petition with the board stating his interest in the property and requesting the release or recovery of the property on the ground that the property was erroneously or illegally seized. Any person served personally or by mail under Section 30437 shall file the petition within 20 days from the date of the personal service upon him or the date of the mailing of the notice to him. Any person not served personally or by mail under that section shall file the petition within 20 days from the date of publication of the notice. The failure of any such person to file a timely verified petition shall constitute a bar to his right to any interest in the property, except insofar as the rights of any such person may be established in an action filed by the board under this chapter.~~

~~30439. If the board determines that the property was seized erroneously or illegally, it shall order the release of the property. If the board denies the petition for the release or recovery of the property, notice of the denial shall be mailed within five days to the petitioner.~~

~~30440. Within 20 days from the date of the mailing of the board's notice of denial of the petition, the petitioner may file an action against the board in the Superior Court of the County of Sacramento for the release or recovery of the property on the ground that the property was erroneously or illegally seized. The failure of the petitioner to file a timely action shall constitute a bar to his right to any interest in the property, except insofar as the rights of the petitioner may be established in an action filed by the board under this chapter. The court shall determine whether the seizure of the property was in accordance with law and shall enter an appropriate order for the disposition of the property.~~

~~30441. Within 20 days after the seizure of property under this chapter, any person owning or claiming an interest in the property may offer to deposit with the board an amount of money equal to the fair market value of the property as determined by the board. If the board is satisfied that the property~~

~~will not be used, transported or sold in violation of any provision of this part, the board shall accept the deposit and release the property. The money so deposited shall be held by the board in lieu of the seized property and shall be treated in all respects in the same manner as that property.~~

~~30412. Notwithstanding any other provisions of this chapter, upon making a seizure of property under Section 30436, the board may at any time prior to the sale or other disposition of the property commence an action to determine the rights of the state to the property. The action shall be commenced in the superior court of the county in which the seizure was made by petitioning the court for a judgment confirming the seizure and forfeiture of the property. The petition shall describe the property, the grounds for seizure and the time and place of the seizure.~~

~~30413. Copies of the petition shall be served personally or by registered or certified mail on all persons known by the board to have any right, title or interest in the property seized. Unknown persons, or any known person who cannot be found, having any right, title or interest in the property shall be served by one publication of the petition in the manner prescribed for publication of the notice of seizure and forfeiture under Section 30437.~~

~~30414. Any person claiming any right, title or interest in the property may within 20 days after service of the petition upon him file an answer to the petition. The answer shall allege facts to show the interest of the claimant in the property and to establish that the seizure and forfeiture was erroneous or illegal. A copy of the answer shall be served on the board at its office in Sacramento.~~

~~30415. If at the expiration of 20 days after the petition has been personally served, mailed or published there is no answer on file, the court shall within 30 days thereafter receive evidence in support of the seizure and forfeiture and shall, upon being satisfied of the validity thereof, enter judgment confirming the seizure and forfeiture.~~

~~30416. If a timely answer has been filed, the proceeding shall be set for hearing on a day within 30 days after the expiration of the period for filing of an answer. Notice of the hearing shall be given by the clerk of the court to each person filing an answer.~~

~~30417. At the time set for the hearing any person having a timely answer on file may offer evidence to establish that the seizure and forfeiture of the property was erroneous or illegal.~~

~~30418. The court shall determine whether the seizure of the property was in accordance with law and enter an appropriate order for the disposition of the property.~~

~~30419. Any property, except money, forfeited to the state under this chapter shall be sold by the board at public auction. The proceeds of the sale and any money forfeited to the state shall be deposited in the State Treasury to the credit of the General Fund.~~

~~SEC. 455. Section 30453 of said code is amended to read:~~

~~30453. Every distributor and every person dealing in, transporting, or storing cigarettes or tobacco products in this state shall keep such records, receipts, invoices, and other pertinent papers with respect thereto in such form as the board may require.~~

~~SEC. 456. Section 30454 of said code is amended to read:~~

~~30454. The board or its authorized representative may make such examinations of the books, papers, records, and equipment of any person dealing in, transporting, or storing cigarettes or tobacco products and such other investigations as it may deem necessary in carrying out the provisions of this part.~~

~~In addition to any other reports required under this part, the board may, by rule and otherwise, require additional other, or supplemental reports from distributors, dealers, transporters, common and private carriers, warehousemen, bailees, and other persons and prescribe the form, including verification, of the information to be given on, and the times for filing of, such additional, other, or supplemental reports.~~

~~SEC. 457. Section 30455 of said code is amended to read:~~

~~30455. It is unlawful for the board or any person having an administrative duty under this part to make known in any manner whatever the business affairs, operations, or information obtained by an investigation of records and equipment of any person visited or examined in the discharge of official duty, or the amount or source of income, profits, losses, expenditures, or any particular thereof, set forth or disclosed in any report, or to permit any report or copy thereof or any book containing any abstract or particulars thereof to be seen or examined by any person. However, the Governor may, by general or special order, authorize examination of the records maintained by the board under this part by other state officers, by tax officers of another state, by the federal government, if a reciprocal arrangement exists, or by any other person.~~

~~Nothing in this section shall prevent the board from exchanging with officials of other states information concerning interstate shipments of cigarettes and tobacco products.~~

~~Any violation of this section is a misdemeanor and is punishable by a fine not exceeding one thousand dollars ($1,000), by imprisonment not exceeding one year, or by both, in the discretion of the court.~~

~~SEC. 458. Section 30461 of said code is amended to read:~~

~~30461. All amounts required to be paid to the state under this part shall be paid to the board in the form of remittances payable to the State Board of Equalization of the State of California. The board shall transmit the payments to the State Treasurer to be deposited in the State Treasury to the credit of the Cigarette and Tobacco Tax Fund, which fund is hereby created. All amounts remaining in the Cigarette Tax Fund at the time this act becomes operative shall be transferred to the Cigarette and Tobacco Tax Fund.~~

SEC. 459. Section 30462 of said code is amended to read:

30462. All money deposited in the Cigarette and Tobacco Tax Fund under this part shall, upon order of the State Controller, be drawn therefrom for refunds under this part or be transferred to the General Fund of this state.

SEC. 460. Section 30475 of said code is repealed.

SEC. 461. Section 30475 is added to said code, to read:

30475. Any transporter who transports cigarettes or tobacco products upon the highways, roads or streets of this state without having obtained a permit or without having a permit in the transporting vehicle as prescribed by Section 30431 or without having in the transporting vehicle the invoices, bills of lading or delivery tickets for the cigarettes as prescribed by Section 30432 is guilty of a misdemeanor and upon conviction thereof shall be fined not more than one thousand dollars ($1,000) or be imprisoned for not more than one year in the county jail, or be subject to both fine and imprisonment in the discretion of the court.

SEC. 462. Section 30476 is added to said code, to read:

30476. Any person in possession or control of, or having access to, a cigarette vending machine who knowingly or willfully places for sale in the vending machine, any cigarettes not contained in packages to which are affixed California tax stamps or meter impressions, is guilty of a misdemeanor and upon conviction thereof shall be fined not more than one thousand dollars ($1,000) or be imprisoned for not more than one year in the county jail, or be subject to both fine and imprisonment at the discretion of the court.

SEC. 463. Section 30476 of said code is amended and renumbered to read:

30477. Any violation of the provisions of this part, except as otherwise provided, is a misdemeanor and is punishable as such.

SEC. 464. Part 16 (commencing with Section 36001) is added to Division 2 of said code, to read:

PART 16. GAS, ELECTRICITY, TELEPHONE AND TELEGRAPH SALES AND USE TAXES

CHAPTER 1. GENERAL PROVISIONS AND DEFINITIONS

36001. This part is known and may be cited as the "Gas, Electricity, Telephone and Telegraph Sales and Use Tax Law."

36002. Except where the context otherwise requires, the definitions given in this chapter govern the construction of this part.

36003. "Sales tax" means the tax imposed by Chapter 2 of this part.

36004. "Use tax" means the tax imposed by Chapter 3 of this part.

~~36005. "Person" includes any individual, firm, copartnership, joint venture, association, corporation, estate, trust, business trust, receiver, assignee for the benefit of creditors, trustee, trustee in bankruptcy, syndicate, the United States, this state, any county, city and county, municipality, district, or other political subdivision of the state, or any other group or combination acting as a unit.~~

~~36006. "Sale" means and includes any transfer of title, exchange, barter, or furnishing in any manner or by any means whatsoever of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services for a consideration.~~

~~36007. A "retail sale" or "sale at retail" means a sale of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services for any purpose other than resale in the regular course of business in the same form as purchased.~~

~~36008. "Purchase" means and includes any transfer of title, exchange, barter or receipt in any manner or by any means whatsoever of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services for a consideration.~~

~~36009. "Sales price" means the total amount for which gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services are sold, valued in money, whether paid in money or otherwise, without any deduction on account of any of the following:~~

~~(a) The cost of the property or services sold.~~

~~(b) The cost of materials used, labor or service cost, interest charged, losses, or any other expenses.~~

~~The total amount for which gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services are sold includes all of the following:~~

~~(a) Any services that are a part of the sale.~~

~~(b) Any amount for which credit is given to the purchaser by the seller.~~

~~"Sales price" does not include any of the following:~~

~~(a) The amount of any tax (not including, however, any manufacturer's or importer's excise tax) imposed by the United States upon or with respect to retail sales of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services whether imposed upon the retailer or the consumer.~~

~~(b) The amount of any tax imposed by any city, county or city and county within the State of California upon or with respect to retail sales of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services, measured by a stated percentage of sales price or gross receipts, whether imposed upon the retailer or the consumer.~~

~~(c) The amount of any tax imposed by any city, county or city and county within the State of California with respect to~~

~~the use or other consumption in such city, county or city and county of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services, measured by a stated percentage of sales price or purchase price, whether such tax is imposed upon the retailer or the consumer.~~

~~36010. "Gross receipts" mean the total amount of the sale price of the retail sales of retailers, valued in money, whether received in money or otherwise, without any deduction on account of any of the following:~~

~~(a) The cost of the property or services sold.~~

~~(b) The cost of materials used, labor or service cost, interest paid, losses, or any other expenses.~~

~~The total amount of the sale price includes all of the following:~~

~~(a) Any services that are a part of the sale.~~

~~(b) All receipts, cash, credits and property of any kind.~~

~~(c) Any amount for which credit is allowed by the seller to the purchaser.~~

~~"Gross receipts" do not include any of the following:~~

~~(a) The amount of any tax (not including, however, any manufacturer's or importer's excise tax) imposed by the United States upon or with respect to retail sales of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services whether imposed upon the retailer or the consumer.~~

~~(b) The amount of any tax imposed by any city, county or city and county within the State of California upon or with respect to retail sales of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services, measured by a stated percentage of sales price or gross receipts, whether imposed upon the retailer or the consumer.~~

~~(c) The amount of any tax imposed by any city, county or city and county within the State of California with respect to the use or other consumption in such city, county or city and county of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services, measured by a stated percentage of sales price or purchase price, whether such tax is imposed upon the retailer or the consumer.~~

~~(d) The amount of coins deposited in any coin operated telephone provided that "gross receipts" shall include any agreed minimum service charge for such telephone.~~

~~36011. "Business" includes any activity engaged in by any person or caused to be engaged in by him with the object of gain, benefit, or advantage, either direct or indirect.~~

~~36012. "Seller" includes every person engaged in the business of selling gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services.~~

~~36013. "Retailer" includes any seller who makes any retail sale or sales of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services.~~

~~36014. "In this state" or "in the state" means within the exterior limits of the State of California and includes all ter-~~

~~ritory within these limits owned by or ceded to the United States of America.~~

~~36015. "Gas" means any natural or manufactured gas for light, heat or power.~~

~~CHAPTER 2. THE SALES TAX~~

~~Article 1. Imposition of Tax~~

~~36051. For the privilege of selling gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services at retail a tax is hereby imposed upon all retailers at the rate of 2 percent of the gross receipts of any retailer from the sale of all gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services sold at retail in this state on or after July 1, 1965.~~

~~36052. The tax hereby imposed shall be collected by the retailer from the consumer insofar as it can be done.~~

~~36053. The board may by regulation provide that the amount collected by the retailer from the consumer in reimbursement of the tax be separately stated.~~

~~36054. A retailer is relieved from liability for sales tax due under this part which became due and payable subsequent to July 1, 1965, insofar as the measure of the tax is represented by accounts which have been found to be worthless and charged off for income tax purposes. If the retailer has previously paid the tax, he may, under rules and regulations prescribed by the board, take as a deduction the amount found worthless and charged off for income tax purposes. If any such accounts are thereafter, in whole or in part, collected by the retailer, the amount so collected shall be included in the first return filed after such collection and the tax paid with the return.~~

~~Article 2. Registration~~

~~36066. Every person desiring to engage in or conduct business as a seller within this state shall register with the board. Every application for registration shall be made upon a form prescribed by the board and shall set forth the name under which the applicant transacts or intends to transact business, the location of his place or places of business, and such other information as the board may require. The application shall be signed by the owner if a natural person; in the case of an association or partnership, by a member or partner; in the case of a corporation, by an executive officer or some person specifically authorized by the corporation to sign the application, to which shall be attached the written evidence of his authority. No fee shall be charged for registration.~~

~~36067. A person who engages in business as a seller in this state without registering with the board, or after his registration has been suspended, and each officer of any corporation which so engages in business, is guilty of a misdemeanor,~~

~~Article 3. Presumptions and Resale Certificates~~

~~36091. For the purpose of the proper administration of this part, and to prevent evasion of the sales tax, it shall be presumed that all gross receipts are subject to the tax until the contrary is established. The burden of proving that a sale is not a sale at retail is upon the seller unless he takes from the purchaser a certificate to the effect that the gas, electricity, telephony or telegraphy or the gas, electrical, telephone or telegraph service is purchased for resale.~~

~~36092. The certificate relieves the seller from the burden of proof only if taken in good faith from a person who is engaged in the business of selling gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services and who is registered with the board as provided in Article 2 of this chapter and who, at the time of the purchaser, intends to sell the gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services in the regular course of business or is unable to ascertain at the time of the purchase the extent to which the gas, electricity, telephone or telegraph services will be sold or used for some other purpose.~~

~~36093. The certificate shall be signed by and bear the name and address of the purchaser and shall be substantially in such form as the board may prescribe.~~

~~36094. If a purchaser who gives a certificate makes any use of the gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services other than holding the same for sale in the regular course of business, the use shall be taxable to the purchaser pursuant to Chapter 3 of this part as of the time of the first use by him.~~

~~36095. Any person who gives a resale certificate for purchases of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph service which he knows at the time of purchase is not to be resold by him in the regular course of business for the purpose of evading payment to the seller of the amount of tax applicable to the transaction, is guilty of a misdemeanor.~~

~~CHAPTER 3. THE USE TAX~~

~~Article 1. Imposition of Tax~~

~~36201. An excise tax is hereby imposed on the use or other consumption in this state of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services purchased from any retailer on or after July 1, 1965, for use or other consumption in this state at the rate of 2 percent of the sales price of the gas, electricity, telephony or telegraphy or of the gas, electrical, telephone or telegraph services.~~

~~36202. Every person using or consuming in this state gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services purchased from a retailer is liable for the~~

~~tax. His liability is not extinguished until the tax has been paid to this state except that a receipt from a retailer engaged in business in this state and given to the purchaser pursuant to Section 36203, is sufficient to relieve the purchaser from further liability for the tax to which the receipt refers.~~

~~36203. Every retailer engaged in business in this state and making sales of gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services for use or other consumption in this state not exempted under Chapter 4 of this part shall, at the time of making the sales or, if the use or other consumption of the gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services is not then taxable hereunder, at the time the use or other consumption becomes taxable, collect the tax from the purchaser and give to the purchaser a receipt therefor in the manner and form prescribed by the board.~~

~~"Retailer engaged in business in this state" as used in this and the preceding section means and includes any retailer maintaining, occupying or using, permanently or temporarily, directly or indirectly, or through a subsidiary, or agent, by whatever name called, an office, place of distribution, or storage place or other place of business in this state.~~

~~36204. A retailer is relieved from liability to collect use tax which became due and payable subsequent to July 1, 1965, insofar as the measure of the tax is represented by accounts which have been found to be worthless and charged off for income tax purposes. If the retailer has previously paid the amount of the tax, he may, under rules and regulations prescribed by the board, take as a deduction the amount found worthless and charged off for income tax purposes. If any such accounts are thereafter in whole or in part collected by the retailer, the amount so collected shall be included in the first return filed after such collection and the amount of the tax thereon paid with the return.~~

~~36205. The tax required to be collected by the retailer constitutes a debt owed by the retailer to this state.~~

~~36206. The tax required to be collected by the retailer from the purchaser shall be separately stated.~~

~~Article 2. Registration~~

~~36226. Every retailer selling gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services for use or other consumption in this state shall register with the board and give the name under which it is engaged in business in this state and the address of any office, place of distribution or storage place or other place of business in this state, and such other information as the board may require.~~

Article 3. Presumptions and Resale Certificates

36241. For the purpose of the proper administration of this part and to prevent evasion of the use tax and the duty to collect the use tax, it shall be presumed that all purchases of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services sold by any person for delivery in this state are sold for use or other consumption in this state until the contrary is established. The burden of proving the contrary is upon the seller unless he takes from the purchaser a certificate to the effect that the gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services is purchased for resale.

36242. The certificate relieves the seller from the burden of proof only if taken in good faith from a person who is engaged in the business of selling gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services and who is registered with the board as provided for by Article 2, Chapter 2, of this part and who, at the time of purchase, intends to sell the gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services in the regular course of business or is unable to ascertain at the time of the purchase the extent to which the gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services will be sold or used for some other purpose.

36243. The certificate shall be signed by and bear the name and address of the purchaser and shall be substantially in such form as the board may prescribe.

36244. If a purchaser who gives a certificate makes any use of the gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services other than holding the same for sale in the regular course of business, the use shall be taxable as of the time of the first use.

CHAPTER 4. EXEMPTIONS

Article 1. General Exemptions

36351. "Exempted from the taxes imposed by this part," as used in this article, means, in case of the sales tax imposed by Chapter 2 of this part, exempted from the computation of the amount of tax imposed.

36352. There are exempted from the taxes imposed by this part, the gross receipts from the sale of and the use or other consumption in this state of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services, the gross receipts from the sale of which, or the use or other consumption of which this state is prohibited from taxing under the Constitution or laws of the United States or under the Constitution of this state.

~~36353. There are exempted from the taxes imposed by this part, the gross receipts from the sale, furnishing or service of, and the use or other consumption of gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services subject to the taxes imposed by Part 1 of this division.~~

~~Article 2. Exemptions from Sales Tax~~

~~36381. There are exempted from the computation of the amount of the sales tax imposed by Chapter 2 of this part, the gross receipts from the sale of gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services to:~~

~~(a) The United States, its unincorporated agencies and instrumentalities;~~

~~(b) Any incorporated agency or instrumentality of the United States wholly owned by the United States or by a corporation wholly owned by the United States.~~

~~Article 3. Exemptions from Use Tax~~

~~36401. The use or other consumption in this state of gas, electricity, telephony or telegraphy or of gas, electrical, telephone or telegraph services, the gross receipts from the sale of which are required to be included in the measure of the sales tax imposed under Chapter 2 of this part, is exempted from the use tax imposed under Chapter 3 of this part.~~

~~Article 4. Exemption Certificates~~

~~36421. If a purchaser certifies in writing to a seller that the gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services purchased will be used in a manner or for a purpose entitling the seller to regard the gross receipts from the sale as exempted by this chapter from the computation of the amount of the sales tax imposed by this part and uses the property in some other manner or for some other purpose, the purchaser shall be liable for payment of any sales tax imposed by this part as if he were a retailer making a retail sale of the gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services at the time of such use, and the cost of the gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services to him shall be deemed the gross receipts from such retail sale.~~

~~CHAPTER 5. ADMINISTRATION~~

~~36451. The following portions of Part 1 of this division, insofar as not inconsistent with the express provisions of this~~

part, are adopted, made applicable to and shall govern the administration of this part.

(a) Chapter 5 of Part 1 of this division relating to determinations, excepting therefrom Sections 6454.5 (relating to liability of purchasers of motor vehicles), 6457 (relating to rentals and leases), and 6458 (relating to tax stamps).

(b) Chapter 6 of Part 1 of this division relating to collection of tax, excepting therefrom Section 6701 (relating to security).

(c) Chapter 7 of Part 1 of this division relating to overpayments and refunds.

(d) Chapter 8 of Part 1 of this division relating to administration, excepting therefrom Section 7057 (relating to registration of employers).

For the purpose of the proper administration of this part, "tangible personal property" or "property" as used in Part 1 of this division means and includes gas, electricity, telephony or telegraphy or gas, electrical, telephone or telegraph services, except where the context requires otherwise.

CHAPTER 6. DISPOSITION OF PROCEEDS

37101. All fees, taxes, interest, and penalties, imposed and all amounts of tax required to be paid to the state under this part shall be paid to the board in the form of remittances payable to the State Board of Equalization of the State of California. The board shall transmit the payments to the State Treasurer to be deposited in the State Treasury to the credit of the Gas, Electrical, Telephone and Telegraph Services Tax Fund.

37102. The money in the fund shall, upon order of the Controller, be drawn therefrom for refunds under this part or be transferred to the General Fund of the state.

CHAPTER 7. VIOLATIONS

37151. Any retailer or other person who fails or refuses to furnish any return required to be made, or who fails or refuses to furnish a supplemental return or other data required by the board, is guilty of a misdemeanor and subject to a fine of not exceeding five hundred dollars ($500) for each offense.

37152. Any person required to make, render, sign, or verify any report who makes any false or fraudulent return, with intent to defeat or evade the determination of an amount due required by law to be made is guilty of a misdemeanor. He shall for each offense be fined not less than three hundred dollars ($300) and not more than five thousand dollars ($5,000), or be imprisoned for not exceeding one year in the county jail, or be subject to both the fine and imprisonment in the discretion of the court.

~~37153. Any violation of this part, except as otherwise provided, is a misdemeanor.~~

~~37154. Any prosecution for violation of any of the penal provisions of this part shall be instituted within three years after the commission of the offense.~~

~~CHAPTER 8. RES JUDICATA~~

~~37176. In the determination of any case arising under this part the rule of res judicata is applicable only if the liability involved is for the same quarterly period as was involved in another case previously determined.~~

~~SEC. 465. Division 3 (commencing with Section 38001) is added to said code, to read:~~

DIVISION 3. LOCAL TAXES

PART 1. COUNTY REAL PROPERTY TRANSFER TAX

CHAPTER 1. AUTHORIZATION AND DEFINITIONS

38001. The board of supervisors of any county or any city and county may by ordinance impose a tax in accordance with this part upon transfers of lands and other realty situated within the county or city and county.

38002. "Transfer" shall include any conveyance, grant, assignment or quitclaim of the ownership, of or title to lands or other realty, or any interest therein, for a consideration, and any contract for such conveyance, grant, assignment, or quitclaim, or any lease or other contract under which possession is given to the purchaser, or any other person by his direction, while title is retained by the vendor as security for the payment of the purchase price.

38003. "Transfer" shall not include a conveyance by gift, devise or inheritance, a conveyance of a leasehold interest other than of a type described in Section 38002, or a mortgage deed of trust or other conveyance of an interest in real property merely to secure a debt.

38004. "Value" shall mean the total consideration, valued in money, paid or delivered or contracted to be paid or delivered in return for the transfer of lands or other realty, or any interest therein, and shall include the amount of any encumbrance arising or resulting from a special assessment levied or imposed by any public district or agency, a mortgage, deed of trust or other contract indebtedness, either given to secure the purchase price or remaining unpaid at the time of transfer.

38005. "County" shall include a city and county.

CHAPTER 2. RATE OF TAX, PAYMENT AND EXEMPTIONS

Article 1. Computation and Payment of Tax

38011. The tax authorized by this part shall be computed at the rate of one percent (1%) of the value of the real property transferred up to twenty-five thousand dollars ($25,000), and at the rate of one and one-half percent (1½%) of the value in excess of twenty-five thousand dollars ($25,000). The vendor and the purchaser of the property transferred shall be jointly and severally liable for payment of the tax.

38012. The tax authorized by this part shall be paid through the use of stamps purchased from the county and affixed to the instrument of transfer. No instrument of transfer shall be accepted by the county recorder for filing or recording unless (a) it is accompanied by a completed statement as required by Section ~~36021~~ *38021* and (b) the tax shall have been paid and evidenced by stamps affixed to the instrument for the amount of the taxable value as shown by the statement, or exemption from the tax is claimed in the statement

Article 2. Exemptions

38016. There shall be exempted from the tax authorized by this part:

(a) A transfer to the United States, this state, a municipal corporation, or any political subdivision of this state

(b) A transfer to any college, church or private school of less than collegiate grade.

(c) A transfer between husband and wife or parents and children.

(d) A transfer of improved real property up to the first fifteen thousand dollars ($15,000) of value

(e) Any person or entity that the county is prohibited from taxing under the Constitution or laws of the United States or under the Constitution of this state.

CHAPTER 3 INFORMATION REQUIRED, ADMINISTRATION AND PENALTIES

Article 1. Statement of Value

38021 Every instrument of transfer of any lands or other realty when presented to the county recorder for filing or recording shall be accompanied by a statement, in triplicate, on forms to be furnished by the county, executed by the vendor or purchaser under penalty of perjury, setting forth the full names and addresses of the vendor and purchaser, a description of the property transferred, the true, full and complete value thereof, the date of transfer, and such other information as may be required by the board of supervisors or the State Board of Equalization. If the transfer is not subject

to the tax authorized by this part, the statement shall specify the reasons for the exemption.

38022. The county recorder shall retain one copy of the statement and shall transmit two copies to the county assessor. The assessor shall insert the most recent assessed value for each parcel of the transferred real property on both copies of the statement and shall transmit one copy to the State Board of Equalization.

Article 2. Administration and Enforcement

38026 The board of supervisors shall administer and enforce the tax authorized by this part. It may by ordinance provide all procedures and penalties necessary for that purpose, including but not limited to procedures for assessing tax deficiencies and refunding erroneous or excessive payments, and may adopt and enforce rules and regulations relating thereto. The officers and employees of the county shall assist in the administration and enforcement of the tax, as required by this part and as directed by the board of supervisors.

Article 3. Penalties

38031. Any person who falsely or fraudulently makes, forges, alters, reuses or counterfeits any stamp issued by a county, as provided for or authorized under this part, or causes or procures to be falsely or fraudulent made, forged, altered, reused or counterfeited any such stamp, or knowingly and willfully utters, publishes, passes or tenders as genuine any such false, forged, altered, reused or counterfeited stamp for the purpose of evading the tax imposed by the county under authority of this part, is guilty of a felony and subject to imprisonment for not less than 1 year and not more than 10 years, or to a fine of not less than one thousand dollars ($1,000) and not more than ten thousand dollars ($10,000), or to both fine and imprisonment.

CHAPTER 4. STATE BOARD OF EQUALIZATION

38036. A county imposing the tax authorized by this part shall furnish to the State Board of Equalization such statistical data with respect to the tax as it may require.

38037. The State Board of Equalization shall prescribe by regulation, and any county imposing the tax authorized by this part shall reproduce and furnish upon request, a standard form for making the statement required by Section 38021.

38038. The State Board of Equalization upon request may assist any county in the administration and enforcement of the tax authorized by this part, and may adopt rules and regulations necessary to carry out the provisions of this chapter.

SEC. 466. Section 18711 of the Business and Professions Code is amended to read:

18711. Except as provided in Section 18713, every club licensed under this chapter shall, within 72 hours after the determination of every contest, match, or exhibition for which an admission fee is charged and received, furnish to the commission a written report duly verified by one of its officers, showing the number of tickets issued or sold for such contest, match, or exhibition, the amount of the gross receipts or value thereof, and the gross price charged directly or indirectly and no matter by whom received, for the sale, lease, or other exploitation of broadcasting and television rights of such contest, match, or exhibition, and without any deductions whatsoever for commissions, brokerage, distribution fees, advertising, or any other expenses, charges, and recoupments in respect thereto and such other matters as the commission may prescribe. Such club shall also, within the same time, pay to the commission a tax, exclusive of any federal taxes paid thereon, of one cent ($0.01) for each twenty cents ($0.20), or fraction thereof, of the amount paid for admission to such contest, match, or exhibition, and of the gross price as described above for the sale, lease, or other exploitation of broadcasting or television rights thereof, except that in no case shall such tax be less than twenty-five dollars ($25). Said tax shall apply uniformly at the same rate to all clubs subject to the tax. The tax on admissions applies to the amount actually paid for admission, and not to the regular established price No tax is due in the case of a person admitted free of charge.

SEC. 467. Section 4204 of the Government Code is amended to read:

4204. To be approved, the contractor's bond shall provide that if the person or his subcontractors, fail to pay for any materials, provisions, provender or other supplies, or teams, used in, upon, for or about the performance of the work contracted to be done, or for any work or labor thereon of any kind, or for amounts due under the Unemployment Insurance Code with respect to such work or labor, or for all amounts required to be deducted, withheld and paid over to the Franchise Tax Board from the wages of employees of the contractor and his subcontractors pursuant to Section 18806 of the Revenue and Taxation Code, with respect to such work or labor, that the surety or sureties will pay for the same, in an amount not exceeding the sum specified in the bond, and also, in case suit is brought upon the bond, a reasonable attorney's fee, to be fixed by the court. The contractor may require of his subcontractors a bond to indemnify the contractor for any loss sustained by the contractor because of any default by the subcontractors under this section.

SEC. 468. Section 15607 of said code is amended to read:

15607. The board shall summon assessors to meet with it or its duly authorized representatives at least once annually, at places within the state it designates, to study or discuss prob-

lems of administration of assessment and taxation laws and to promote uniformity of procedure in tax matters throughout the state. The expenses, including any registration fees for institutes or conferences, of any assessor attending these sessions is a charge against his county or city, to be paid in the same manner as other county or city charges The governing body of the county or city may provide for the payment of such expenses for members of the assessor's staff attending such conferences.

SEC. 469. Section 20532 of said code is amended to read:

20532. The governing body of a contracting agency having taxing power, or of a school district included under Chapter 4 5 of this part, shall, if necessary, include in its budget the amount estimated by the governing body to be required to provide sufficient revenue to meet the obligations of the agency or district for contributions to this system under and after termination of the contract. Such contracting agency, other than a school district, may levy a tax at a rate to produce the amount so estimated, in addition to the annual rate of taxation otherwise allowed by law to be levied in such agency. Any member of, or recipient of a benefit from, this system by reason of such a contract may maintain any appropriate action or proceeding to require performance of the duty herein and by Section 20564 imposed on a governing body

SEC. 469.5. Section 43002 of said code is amended to read:

43002 Tax liens attach on the first ~~Monday in March~~ *day of January* of each year

SEC. 470. Section 43007 of said code is amended to read:

43007. Notwithstanding any other contrary provisions of law, the city legislative body may by ordinance provide that every person of the city who at 12 01 a m of the first day of January of any year was the owner of, or had in his possession, or under his control, any taxable improvement, which improvement was thereafter destroyed without his fault by fire or by any other means prior to July 31 of that year and cannot be thereafter rebuilt because of a zoning prohibition, may on or before a date to be specified in such ordinance make application for the reassessment of such improvement and deliver to the assessing official of the city a written statement under oath, accompanied by a certificate of a disinterested competent person or authority showing the condition and value, if any, of the improvement immediately after the destruction, and that the assessor shall, on or before October 31 of that year, assess the improvement, or reassess it if it has already been assessed, according to the condition and value immediately after the destruction and upon such notice as it may find to be proper the board of equalization for the city may, until November 30 of that year, equalize any such assessment or reassessment It may also be provided in such ordinance that the tax rate fixed for property on the roll on which the improvement so assessed appears or the improvement so reassessed appeared at the time of its original assessment shall be applied to the amount of equalized as-

sessment or reassessment determined in accordance with this section. In the event that the resulting figure is less than the tax theretofore computed, the ordinance may provide that the taxpayer shall be liable for tax only for the lesser amount and that the difference shall be canceled. If the taxpayer has already paid the tax previously computed, the ordinance may provide that such difference shall be refunded to the taxpayer. This section shall be applicable to all cities to which the Constitution does not prevent it from being applied.

SEC 471. Section 51501 of said code is amended to read:

51501. By ordinance, a city legislative body may transfer the duties of the city treasurer to the treasurer of the county in which the city is situated, and shall, by January 1, 1967 transfer the assessment and tax collection duties performed by the city assessor and tax collector to the assessor and tax collector of the county in which the city is situated, and no city shall establish the offices of city assessor and tax collector after that date.

SEC 472. Section 51505 of said code is amended to read:

51505. The ordinance transferring the duties of the treasurer is effective until repealed. Certified copies of the ordinance repealing the transfer of the treasurer's duties shall be served upon the county auditor, tax collector, and treasurer

SEC. 473 Section 51515 of said code is amended to read:

51515 When the duties of the city treasurer have been transferred to the county treasurer, one-fourth of 1 percent shall be deducted from the money collected by the county tax collector as compensation for the services of the county treasurer and paid into the county salary fund.

SEC. 474 Section 54902 of said code is amended to read:

54902. On or before December 1st of the year prior to the year in which the assessments or taxes are to be levied, the statement and map or plat shall be filed with each assessor whose roll is used for the levy and with the State Board of Equalization.

SEC. 475. Article 7 (commencing with Section 1791) of Chapter 1, Division 5 of the Education Code is repealed.

SEC 476 Article 3 (commencing with Section 20801) of Chapter 3, Division 16 of said code is repealed.

SEC. 476.5. Article 3 (commencing with Section 20803) is added to Chapter 3, Division 16 of said code, to read:

Article 3. Provisions for Increase and Decrease of Maximum Tax Rates of School Districts

20803. Any maximum rate of tax for any district may be increased and, having been increased, may be decreased by an amount equal to or less than the amount of such increase, by a majority vote of the qualified electors of the school district at an election which may be ordered by the governing board of the school district of its own motion and shall be ordered within 90 days after the filing with the governing board of a

petition signed by not less than 10 percent of the registered voters of the district, requesting that an election be ordered, unless the petitioners request that the election be consolidated with the annual election for members of the governing board, or that the election be consolidated with the general election.

Any decrease in an increased maximum tax rate pursuant to this section shall not be in an amount which will reduce the tax rate for the district below the maximum specified in Section 20751. The governing board shall determine whether the increase or decrease shall remain in effect for a specified or unspecified period of time, unless the petition filed by the electors provides for a specified or unspecified period of time. If a specified period is provided for in the petition or determined upon by the governing board, such period shall be stated on the ballot.

Pursuant to the order of the governing board, the election shall be called, held, and conducted by the county superintendent of schools, as nearly as is practicable in accordance with the provisions of Chapter 6 of Division 4 of this code. The statement of the purposes of the election in the card notice of election shall contain only the following:

(a) The amount of the proposed decrease or increase in the maximum tax rate. If the proposed increase is a continuation of a previously authorized tax rate that fact shall be so stated.

(b) A brief summary of the issues involved.

The specification of the election order shall contain the text of the statement of the purposes of the election in the form in which it is to appear on the card notice of election. The same information shall be furnished the county superintendent of schools by the governing board of the district for all maximum tax increase or decrease elections ordered by it.

The costs incurred by the county clerk or registrar of voters and the county superintendent of schools in connection with this section shall be paid out of the funds of the district.

Except as otherwise herein provided, the ballot used in the election shall contain substantially the words "Shall the proposed (increase decrease) in the maximum tax rates from _____ to _____, (such rate to be in effect in the _____ school district for the school year (or years) 19___ to 19___,) be authorized?" Opposite such words, in separate lines, the words "Yes" and "No" shall be printed, with a voting square opposite each such word. If, at any prior election held in the district, the maximum tax rate of the district was increased for a specified period of time, and if the election is called for the purpose of continuing in effect the previously authorized increase in the maximum tax rate of the district, the words to appear on the ballot shall be "Continuation of existing maximum tax rate of _____ for the school years 19___ to 19___, yes" and "Continuation of existing maximum tax rate of _____ for the school years 19___ to 19___, no" or words of similar import. Each voter shall stamp or print a cross in the voting square after the answer he desires to give.

If a proposal is submitted to the electors under this section for an increase or decrease in the maximum tax rate, the ballot shall show the maximum tax rate of the district which will be in effect if the proposal is defeated. If a proposal is submitted to the electors under this section for the continuation of a prior increase authorized for a specified time, the ballot shall show the maximum tax rate which will be in effect in the district at the end of such specified time if the proposal is defeated. If a proposal is submitted to the electors under this section for an additional increase while a prior authorized increase is still in effect, the ballot shall show the maximum rate which will be in effect in the district if the proposal is defeated, and, if the prior authorized increase is for a specified time, the ballot shall also show the maximum tax rate which will be in effect in the district at the end of such specified time if the proposal is defeated.

If an election for a decrease in an increased maximum tax rate of a district is held in any year prior to or concurrently with the district election for governing board members, any decrease adopted at such election shall become effective on July 1st following the election If an election for a decrease in an increased tax rate of a district is held in any year after the date of the district election for governing board members, any decrease adopted at such election shall not become effective until July 1st of the next succeeding year.

20804. Any such increase in tax rates shall remain in effect only for the period specified on the ballot, if such period was specified by the governing board.

20804.1. When either a separate high school district, the boundaries of which are not coterminous with a junior college district, or a unified school district, operates a junior college and has, pursuant to the provisions of Section 20803, increased the maximum tax rate otherwise applicable to the district, and thereafter, while such increased tax rate continues in effect, ceases to operate the junior college, the maximum tax rate as so increased shall, beginning with the school year in which the district ceases to operate the junior college, be reduced by thirty-five cents ($0.35) on each one hundred dollars ($100) of assessed valuation

20804 3 Notwithstanding any provision of law to the contrary, no election for the purpose of increasing or decreasing any maximum tax rate for any school district shall be held within 45 days before a statewide election or within 45 days after a statewide election unless conducted at the same time as such statewide election, subject to the provisions of Chapter 4 (commencing with Section 23300) of Part 2 of Division 12 of the Elections Code.

20805. Any election called pursuant to Sections 20801 to 20804, inclusive, may be consolidated with any other election pursuant to the provisions of Chapter 4 (commencing with Section 23300) of Part 2 of Division 12 of the Elections Code.

SEC 477. Section 1828 of said code is amended to read:

1828 When a portion of a school district is taken from the district and annexed to, transferred to, or included in, any other district, with or without affirmative action taken by the residents within such portion and real property or fixtures of the district from which the portion is taken are situated in such portion, or when a high school district or unified district ceases to maintain a junior college by virtue of its inclusion in a new or reorganized junior college district, the district in which the portion is annexed, transferred or included, or the new junior college district, as the case may be, if it receives the property of the other district pursuant to this division and if it does not assume the bonded indebtedness incurred by the other district on account of the acquisition or improvement of the property, shall pay the other school district for the use of such property as provided in this section.

Within 60 days after the annexation, transfer, or inclusion has been effected, the board of supervisors of the county which has jurisdiction over the district from which the property is taken shall, by order entered upon its minutes, determine what proportion of the then outstanding bonded indebtedness of the school district from which the property was taken was incurred for the acquisition or improvement of the real property and all fixtures therein or thereon. Commencing one year after the date of the determination, the school district receiving the property of the other district shall pay annually to the other school district for the use of such property an amount equal to the annual amount required for the payment of interest and redemption of the portion of the bonded indebtedness determined by the board of supervisors.

~~SEC 478 Section 3255 of said code is repealed~~

SEC. 479 Section 3256 of said code is repealed.

SEC. 480. Section 3347 of said code is amended to read:

3347. Any unified or otherwise reorganized district which includes at the time of unification or other reorganization under this chapter any district having outstanding bonded indebtedness shall pay, in accord with proposals made under Sections 3258 and 3260, for the use of the school property of the included district acquired or constructed from the proceeds of its own bonds, an annual charge to the account of such included district, to be administered as a trust fund by or under the direction of the county superintendent of schools. The annual charge shall be equal to the annual amount required for the interest and redemption of the bonds.

The county superintendent of schools may apply the annual charge to the interest and bond redemption of the included district or use it for any other lawful purpose for the use and benefit of the area comprising the included district.

The governing board of any unified school district shall include in its annual budget an amount equal to the annual charge. If it fails to do so, the county superintendent of schools

shall add the amount to the budget submitted by the governing board.

The county board of supervisors shall include in the annual tax to be levied upon the assessed valuation of the unified district a tax sufficient to provide for the annual charge While the annual charge is in effect, the board of supervisors need not levy a tax on the assessed valuation of the included district for its interest and bond redemption if the amount of the annual charge upon the unified district is sufficient for and is actually used for the interest and bond redemption.

The annual charge shall continue for the entire period during which any bonded indebtedness is outstanding against any included district. Upon the retirement of the entire bonded indebtedness of the included district the charge shall cease to accrue, and the school property of the included district shall become the property of the unified district.

SEC 481. Section 3353 of said code is repealed.

SEC. 482. Section 5605 5 of said code is amended to read:

5605.5. The governing board of a high school district which maintains a junior high school shall prior to July 1 of each fiscal year compute on the basis of current estimates of cost and average daily attendance the amount by which costs during the succeeding fiscal year of educating pupils in grades seven and eight exceeds the total of federal and state apportionments and the tuition payments to be received by the district during the succeeding fiscal year for such pupils. The governing board shall also divide the amount so computed by the number of units of such average daily attendance to ascertain the amount of such cost which is attributable to each such unit of average daily attendance.

If an elementary district within the high school district has 10 percent or less of the pupils in grades 7 and 8 residing in the district attending a junior high school of the high school district, the high school district shall certify to the elementary district prior to July 1 of each fiscal year the amount computed under this section that is attributable to each unit of average daily attendance of pupils who reside in such elementary district and attend the junior high school of the high school district. The amount certified by the high school district shall be paid to such district by the elementary district as tuition for such pupils. The governing board of the elementary district shall include the amount so certified in its budget The remainder of the amount computed under this section may be raised by a tax levied upon the assessed valuation of the high school district excluding the assessed valuation of the elementary district affected by this subdivision.

SEC. 483 Section 5605 6 of said code is amended to read:

5605.6. For the purposes of Section 5605, the assessed valuation of the district shall be that as shown by the current equalized assessment roll of the district plus a sum determined by adding to such assessed valuation an amount which would, if the current tax rate, as defined in Section 17604 as it read

on January 1, 1963, of such district were levied on such added amount, produce or will produce 75 percent of the equivalent of all miscellaneous funds as miscellaneous funds are defined in Section 17606 as it read on January 1, 1963, received or to be received by such district for the fiscal year for which such added amount was determined.

SEC. 484. Section 5661 of said code is amended to read:

5661. If the elementary school district is located entirely within one county, the board of supervisors shall, at the time and in the manner prescribed by Sections 20701 and following, levy a tax on all taxable property in the elementary school district sufficient to raise the amount set forth in the certificate If the elementary school district is located in more than one county, such tax shall be levied in the manner prescribed by Sections 20701 and following

SEC. 485. Section 6352 of said code is amended to read:

6352. For the purpose of crediting attendance for apportionments from the State School Fund during the 1954–1955 fiscal year and thereafter, "adult" means any person who has attained his 21st birthday on or before September 1st or February 1st of the semester for which he has enrolled, and who has enrolled in *less than* 10 periods of not less than 40 minutes each per week for high school districts.

SEC 486. Section 6741 of said code is amended to read:

6741. A student shall be deemed to be a resident of the high school district in which he lived at the time of his admission to the program and the excess cost for a school year of educating such student shall be paid by the high school district of which he is a resident to the county superintendent who is providing education for the students. The excess cost shall be determined by dividing the total current expense of education as defined in Section 17503 and also excluding expense of boarding and lodging during such school year by the total number of units of average daily attendance in such school or classes during such school year, less state and federal apportionments on account of such average daily attendance.

Average daily attendance of students shall be computed, for purposes of this article, by dividing the number of days such student attended the schools or classes by the number of days that the schools or classes were taught, except that with respect to a student attending such schools or classes for more than 175 days in a school year, the average daily attendance shall be computed by using the divisor of 175.

For purposes of computing average daily attendance 180 minutes of class attendance shall be deemed to constitute a schoolday, and no more than 15 hours of class time per week shall be considered.

Not later than July 15th of each year, the superintendent of schools of the county providing education for students shall forward his claim for the excess expense reimbursement to the high school district of residence of each student during the pre-

ceding school year, and the governing board of such high school district shall upon receipt thereof pay such claims

The governing board of the high school district to which the claim is presented may include in its budget the amount necessary to pay the claim, and, if the amount is included in the budget, the board of supervisors shall levy a school district tax to raise the amount

SEC 487. Section 6854 of said code is amended to read:

6854. The governing board of the district to whom the claim prescribed by Section 6853 is presented may include in its budget the amount necessary to pay the claim

SEC 488. Section 6855 of said code is amended to read:

6855 The governing board of any school district maintaining a school or classes at a tuberculosis or polio ward, hospital or sanatorium, may include in its budget the amount necessary to maintain such school or classes

SEC. 489 Section 6913 1 of said code is amended to read:

6913 1 The governing board of any school district which maintains or has entered into an agreement with another district for educational services or facilities, including the rental of property or purchase of equipment, for mentally retarded minors who come within the provisions of Sections 6902 and 6903 shall include in its budget the amount necessary to maintain such services or facilities or to meet its obligations under said agreement No amounts shall be included in its budget pursuant to this section for the purchase or improvement of school sites or the construction of school buildings

SEC. 490. Section 8955 of said code is amended to read:

8955. The county superintendent of schools shall, with the approval of the county board of education, certify to the county auditor and the county board of supervisors, on or before July 15th of each year, the amount of money required to be raised by a tax for the education of mentally retarded minors who come within the provisions of Section 6902 and for the rental of property and the purchase of equipment by the county superintendent of schools for special training schools and classes for such minors The amount shall be determined by subtracting from the total cost of the education of such minors, including transportation, to the county superintendent of schools (1) the total of any balances remaining to be expended for this purpose, and (2) the total amount to be apportioned by the Superintendent of Public Instruction to the county school service fund for the education of mentally retarded minors who come within the provisions of Section 6902 and by adding to the result the amount required for rental of property and purchase of equipment.

The county auditor and the county board of supervisors shall determine the tax necessary to produce the amount certified when levied upon the taxable property of all the districts under the jurisdiction of the county superintendent of schools which during the preceding fiscal year had less than 901 units of average daily attendance in the elementary schools of the

district. The board of supervisors shall at the time of levying other county taxes add the tax so determined to the other taxes levied for each school district which had during the preceding fiscal year less than 901 units of average daily attendance in the elementary schools of the district, except that the tax added shall not exceed ten cents ($0.10) for each one hundred dollars ($100) of assessed valuation.

The county superintendent of schools shall adjust the budget of the district to reflect the amount to be received from the tax and the transfer of the same amount to the county school service fund. The amount received from the tax shall be transferred to the county school service fund by the county auditor upon the order of the county superintendent of schools.

In the event the amount received from the tax levied is less than the amount certified by the county superintendent of schools the difference shall, with the approval of the Superintendent of Public Instruction, be paid the county superintendent of schools from funds withheld pursuant to Section 18352.2.

SEC. 491. Section 11451 of said code is amended to read:

11451. The units of average daily attendance of pupils resident of a junior college district enrolled in 13th- and 14th-grade courses shall be computed in the following manner:

(a) For the first semester by dividing by 30 the sum of the total number of whole and partial class hours of regularly enrolled pupils' attendance as recorded for the fourth week of five consecutive schooldays of the semester and for the first week of five consecutive schooldays in December.

(b) For the second semester by dividing by 30 the sum of the total number of whole and partial class hours of regularly enrolled pupils' attendance as recorded for the fourth week, or for the first week, thereafter, containing five consecutive schooldays of the semester and for the last week of five consecutive schooldays next preceding April 15th.

(c) By computing the mean average of the quotients derived under (a) and (b).

SEC. 492. Section 11451.01 of said code is repealed.

SEC. 493. Section 11451.02 of said code is amended to read:

11451.02. The attendance of all pupils not residents of a junior college district, enrolled in regular 13th- and 14th-grade courses of the junior college shall be kept separately from all other attendance and the units of average daily attendance for such pupils shall be computed on an individual basis in the manner prescribed in Section 11451.

SEC. 494. Section 11706 of said code is repealed

~~SEC. 495. Section 14214 of said code is amended to read:~~

~~14214. The governing board of any school district shall include in its budget an amount for the purpose of providing funds not to exceed the amount which may be necessary to make the contributions to the Permanent Fund and the Retirement Annuity Fund required by any school district under this article (commencing with Section 14201).~~

~~SEC. 496. Section 14657 of said code is amended to read:~~

~~14657. The governing board of any school district shall include in its budget an amount for the purpose of providing funds which may be necessary to make the payments required by any district retirement plan. For the purposes of this section any local retirement system shall be deemed to be a district retirement plan.~~

~~SEC. 497. Section 14758 of said code is amended to read:~~

~~14758. The governing board of any school district shall include in its budget an amount for the purpose of providing funds which may be necessary to make the payments required by any joint district retirement plan.~~

SEC. 498. Section 16633 of said code is amended to read:

16633. Pursuant to Sections 20501 to 21001, inclusive, the governing board of any school district maintaining a child care center may include in its budget the amount necessary to carry out its child care center program pursuant to this chapter (commencing at Section 16601) and the board of supervisors shall levy a school district tax necessary to raise such amount.

SEC. 499. Section 16635 of said code is amended to read:

16635. In any county or school district in which local conditions demand or make desirable the furnishing of additional services or facilities, a school district or a county may provide, either jointly or severally, for such additional services or facilities of the child care centers established and maintained in such school district or county. Any additional services or facilities furnished pursuant to this section shall meet all of the requirements of this chapter. Any county desiring to provide such additional services or facilities may levy a tax to provide funds for such purpose Pursuant to Sections 20501 to 21001, inclusive, the governing board of any school district desiring to provide such additional services or facilities may include in its budget the amount necessary therefor and the board of supervisors shall levy a school district tax necessary to raise such amount

SEC. 500. Section 16645 12 of said code is amended to read:

16645.12. Pursuant to Sections 20501 to 21001 inclusive, the governing board of any school district maintaining a child care center may include in its budget the amount necessary to carry out its program pursuant to this article (commencing at Section 16645.1) and the board of supervisors shall levy a school district tax necessary to raise such amount.

SEC. 501. Section 16645.16 of said code is amended to read:

16645.16. In any county or school district in which local conditions demand or make desirable the furnishing of additional services or facilities, a school district or a county may provide, either jointly or severally, for such additional services or facilities of the child care centers established and maintained in such school district or county. Any additional services or facilities furnished pursuant to this section shall meet all of the requirements of this article (commencing at Section

16645.1). Any county desiring to provide such additional services or facilities may levy a tax to provide funds for such purpose. Pursuant to Sections 20501 to 21001, inclusive, the governing board of any school district desiring to provide such additional services or facilities may include in its budget the amount necessary therefor and the board of supervisors shall levy a school district tax necessary to raise such amount

SEC. 502. Section 17200 of said code is amended to read:

17200. Beginning July 1, 1966, the accounting system used to record the financial affairs of any school district shall be designed to provide separate recording and clear distinction between expenditures for salaries of classroom teachers employed by the district and expenditures for other purposes of the district.

As used in this section "salaries of classroom teachers" means:

(a) The salary paid to each teacher employed by the district whose duties require that the full time for which the teacher is employed be devoted to the teaching of pupils of the district.

(b) The portion of the salary of each teacher whose duties require that a part, but not all, of the full time for which the teacher is employed be devoted to the teaching of pupils of the district, which is equal to the portion of such full time actually devoted by the teacher to teaching pupils of the district.

As used in this section a "teacher" means a full-time equivalent classroom teacher as used and defined in Section 17507.

SEC. 503. Section 17263.1 of said code is amended to read:

17263.1. Whenever it appears that a district's state equalization aid will be less than they would be if no modification of the district's assessed valuation were required under Section 17262, the governing board of the district shall estimate the amount of the difference and shall certify the amount to the county superintendent of schools The estimate shall be made by averaging the factors certified for the two immediately preceding years under Section 17261 and a factor for the current year derived by dividing the ratio for the county published pursuant to Section 1819 of the Revenue and Taxation Code into the statewide average ratio for the current year. The county superintendent of schools shall certify to the county auditor of the county in which the districts are included the amounts required to offset such decrease of equalization aid in all the districts under his jurisdiction The county auditor shall certify such amounts to the county board of supervisors who shall, at the time other taxes are levied, levy a tax upon all the assessed valuation of the county sufficient to provide the total of the amounts certified Upon the collection of such taxes the county auditor shall pay to each school district the amount certified as required to offset the decrease in equalization aid.

SEC. 504. Section 17301 of said code is amended to read:

17301. (a) The State Controller shall during each fiscal year transfer from the General Fund of the state to the State School Fund such sums, in addition to the sums accruing to the State School Fund from other sources, as shall provide in the State School Fund for apportionment during the fiscal year a total amount per pupil in average daily attendance during the preceding fiscal year credited to all kindergarten, elementary, high school and junior college schools in the state and to the county school tuition funds, as certified by the Superintendent of Public Instruction, one hundred eighty dollars ($180).

(b) The Controller shall also transfer, as needed during each fiscal year, such additional amounts from the General Fund to the State School Fund as are certified from time to time by the Superintendent of Public Instruction to be necessary to meet actual computed apportionments from the State School Fund for the purposes set forth in Section 17303.5; provided that the total of such additional amounts transferred in a fiscal year shall not exceed, except pursuant to subdivision (c) of this section, forty dollars and eighty-eight cents ($40.88) for the fiscal year 1964–65, fifty-five dollars and sixty-four cents ($55.64) for the fiscal year 1965–1966 and ~~one hundred seventy-one dollars and nine cents ($171.09)~~ *one hundred sixty-eight dollars and fifty-three cents ($168.53)* for the fiscal year 1966–1967 and fiscal years thereafter, for pupil in average daily attendance during the preceding fiscal year credited to all kindergarten, elementary, high school and junior college schools in the state and to the county school tuition funds, as certified by the Superintendent of Public Instruction, less the amount, if any, by which one dollar and sixty cents ($1.60) multiplied by the number of units of average daily attendance credited during the preceding fiscal year to all kindergarten, elementary, high school and junior college schools in the state and to the county school tuition funds exceeds twenty-one dollars and fifty cents ($21.50) multiplied by the total average daily attendance credited during the preceding school year to elementary school districts which during the preceding school year had less than 901 units of average daily attendance, to high school districts which during the preceding school year had less than 301 units of average daily attendance, and to unified districts which during the preceding school year had less than 1,501 units of average daily attendance.

(c) In addition to the amounts authorized to be transferred to the State School Fund from the General Fund under subdivisions (a) and (b) of this section, the Controller shall transfer from the General Fund to the State School Fund during the fiscal year, upon certification of the Superintendent of Public Instruction, if necessary to meet actual computed apportionments for the fiscal year for the purposes set forth in Sections 17303 and 17303.5, an amount not to exceed the lesser of: (1) 1 percent of the total apportionment from the

State School Fund in the preceding fiscal year for the purposes set forth in Sections 17303 or 17303.5, or (2) the net amount, if any, by which the total amounts authorized to be transferred from the General Fund to the State School Fund under subdivisions (a) and (b) of this section in prior fiscal years have exceeded the total amounts actually apportioned in prior fiscal years for the purposes set forth in Sections 17303 and 17303.5.

(d) He shall also transfer to the State School Fund any additional amounts appropriated thereto by the Legislature in augmentation of any of the amounts prescribed for any of the purposes set forth in Sections 17303 and 17303.5 and such additional amounts shall be allowed and apportioned by the Superintendent of Public Instruction and warrants therefor drawn by the Controller in the manner provided in Articles 1 and 2 (Sections 17301 to 17354, inclusive) of this chapter and in Sections 11256, and 17251, and Sections 17401 to 17417, inclusive, and Sections 17601 to 18460, inclusive.

SEC. 505. Section 17303.5 of said code is amended to read:

17303.5. The amount transferred pursuant to subdivision (b) of Section 17301 shall be expended in accordance with the following schedule:

(a) Twenty-one dollars and fifty cents ($21.50) multiplied by the total average daily attendance credited during the preceding school year to elementary school districts which during the preceding school year had less than 901 units of average daily attendance, to high school districts which during the preceding school year had less than 301 units of average daily attendance, and to unified districts which during the preceding school year had less than 1,501 units of average daily attendance, but not to exceed an amount equal to one dollar and sixty cents ($1.60) multiplied by the average daily attendance credited during the preceding fiscal year to all kindergarten, elementary, high school and junior college schools in the state and to county school tuition funds, for allowance to county school service funds pursuant to subdivision (a) of Section 18352.

(b) Four dollars ($4) multiplied by the total average daily attendance credited to all kindergarten, elementary, high school, and junior college schools in the state and to county school tuition funds during the preceding school year for the purposes of Article 10 (commencing with Section 18051) of Chapter 3 of this division.

(c) Nine dollars and sixty-three cents ($9.63), multiplied by the total average daily attendance credited to all kindergarten, elementary, high school, and junior college schools in the state and to county school tuition funds during the preceding school year, for the purposes of Sections 18060 and 18062, and Articles 11, 12 and 13 (commencing with Sections 18102, 18152, and 18202, respectively) of Chapter 3 of this division

(d) Three dollars and six cents ($3 06) multiplied by the total average daily attendance credited to all kindergarten, elementary, high school, and junior college schools in the state and to county school tuition funds during the preceding school year for allowances to county school service funds pursuant to subdivision (b) of Section 18352.

(e) Eighty cents ($0.80) multiplied by the average daily attendance during the preceding fiscal year credited to all kindergarten, elementary, high school, and junior college schools in the state and to county school tuition funds for allowances to school districts for the purposes of Section 6426.

(f) Twenty-one dollars and seventy-nine cents ($21.79) during the fiscal year 1964–1965, thirty-six dollars and fifty-five cents ($36 55) for the fiscal year 1965–1966 and ~~one hundred fifty-two dollars ($152)~~ *one hundred forty-nine dollars and forty-four cents ($149.44)* for the fiscal year 1966–1967 and fiscal years thereafter, multiplied by the average daily attendance during the preceding fiscal year credited to all kindergarten, elementary, high school, and junior college schools in the state and to county school tuition funds during the preceding school year for basic aid, equalization aid, supplemental support, allowances for adults, and allowances to the county school tuition funds to be apportioned on account of average daily attendance

SEC. 506 Section 17602 of said code is amended to read:

17602 Whenever in this chapter any computation is required to be made which is based in whole or in part on the assessed valuation of a school district as shown by the equalized assessment roll of the district for the fiscal year, there shall be substituted for such assessed valuation, as to such computation, a sum determined by adding to such assessed valuation an amount which would, if the current tax rate, as defined in Section 17604, of such district were levied on such added amount, produce or will produce 75 percent of the equivalent of all miscellaneous funds as miscellaneous funds are defined in Section 17606, received or to be received by such district for the fiscal year for which such added amount was determined.

SEC 507. Section 17602 5 of said code is amended to read:

17602 5. For purposes of computing transportation allowances under Article 10 (commencing with Section 18051) of this chapter for any school district coming within the provisions of Section 17702.2, there shall be substituted for the assessed valuation of the school district shown by the equalized assessment roll of the district for the fiscal year, as to such computation, a sum determined by adding to such assessed valuation an amount which would, if the current tax rate, as defined in Section 17604, of such district were levied on such added amount, produce or will produce 75 percent of the equivalent of all miscellaneous funds as miscellaneous funds are defined in Section 17606, received or to be received by such

district for the fiscal year for which such added amount was determined

SEC 508. Section 17603 of said code is amended to read:

17603 The amount computed to be allowable as equalization aid to those elementary school districts and high school districts which come under the provisions of Section 17702.2, shall be reduced by amounts determined as follows:

(a) Determine the sum of 75 percent of the miscellaneous funds as miscellaneous funds are defined in Section 17606, including all miscellaneous funds so defined which have been received or are to be received by such district for the fiscal year

(b) Divide the sum as determined in subdivision (a) by the current tax rate of the district as defined in Section 17604.

(c) The amount of reduction of elementary district equalization aid shall be determined by multiplying the amount in subdivision (b) for the district by 0 0060

(c) The amount of reduction of elementary district equalization aid shall be determined by multiplying the amount in subdivision (b) for the district by 0 0050

SEC 509. Section 17603.5 is added to said code, to read:

17603.5. In each fiscal year, the amounts computed as allowable to any school district for state equalization aid shall be reduced by fifty percent (50%) of federal funds as defined by Section 17605 In no event shall the reduction exceed the total amount allowable as equalization aid to the school district for the fiscal year For such purposes, federal funds, as defined in Section 17605, received by a unified school district, shall be allocated to the kindergarten and elementary, high school and junior college grades, respectively, on the basis of the proportion of the districts total average daily attendance in each such grade level, and the provisions of Section 17601 shall be applicable

Should the amount of federal funds as defined in Section 17605 actually received by a school district for any fiscal year be more or less than that reported for such district by the U S. Commissioner of Education to the Superintendent of Public Instruction, the Superintendent of Public Instruction shall during the fiscal year next succeeding that in which the district has received all of the federal funds actually paid the district for the first mentioned fiscal year withhold from or add to the apportionment made to the district from the State School Fund the amount of the excess or deficiency produced by the operation of this section or Section 17603, as the case may be, in the apportionment of state equalization aid and supplemental support from the State School Fund for the preceding year, if the amount of the excess or deficiency in such apportionment was one hundred dollars ($100) or more

SEC 510 Section 17653 of said code is repealed

SEC. 511 Section 17654 5 of said code is amended to read:

17654 5. For each elementary school district which maintains only one school with an average daily attendance of less

than 101, he shall make one of the following computations, whichever provides the lesser amount:

(1) For each small school which has an average daily attendance during the fiscal year of less than 26, exclusive of pupils attending the seventh and eighth grades of a junior high school, and for which school at least one teacher was hired full time, he shall compute for the district five thousand nine hundred seventy-five dollars ($5,975) for the fiscal year 1965–66, and nine thousand seven hundred fifty dollars ($9,750) for the fiscal year 1966–67 and fiscal years thereafter

(2) For each small school which has an average daily attendance during the fiscal year of 26 or more and less than 51, exclusive of pupils attending the seventh and eighth grades of a junior high school, and for which school at least two teachers were hired full time for more than one-half of the days schools were maintained, he shall compute for the district eleven thousand nine hundred fifty dollars ($11,950) for the fiscal year 1965–1966, and nineteen thousand five hundred dollars ($19,500) for the fiscal year 1966–67 and fiscal years thereafter.

(3) For each small school which has an average daily attendance during the fiscal year of 51 or more but less than 76, exclusive of pupils attending the seventh and eighth grades of a junior high school, and for which school three teachers were hired full time for more than one-half of the days schools were maintained, he shall compute for the district seventeen thousand nine hundred twenty-five dollars ($17,925) for the fiscal year 1965–1966, and twenty-nine thousand two hundred fifty dollars ($29,250) for the fiscal year 1966–1967 and fiscal years thereafter.

(4) For each small school which has an average daily attendance during the fiscal year of 76 or more and less than 101, exclusive of pupils attending the seventh and eighth grades of a junior high school, and for which school four teachers were hired full time for more than one-half of the days schools were maintained, he shall compute for the district twenty-three thousand nine hundred dollars ($23,900) for the fiscal year 1965–1966, and thirty-nine thousand dollars ($39,000) for the fiscal year 1966–1967 and fiscal years thereafter

SEC 512. Section 17655 5 of said code is amended to read:

17655.5. (a) For each district on account of each necessary small school (giving regard to the number of teachers actually employed or average daily attendance), he shall make one of the following computations, whichever provides the lesser amount:

(1) For each necessary small school which has an average daily attendance during the fiscal year of less than 26, exclusive of pupils attending the seventh and eighth grades of a junior high school, and for which school at least one teacher was hired full time, he shall compute for the district five thousand nine hundred seventy-five dollars ($5,975) for the fiscal year 1965–66, and nine thousand seven hundred fifty dollars

($9,750) for the fiscal year 1966–1967 and fiscal years thereafter.

(2) For each necessary small school which has an average daily attendance during the fiscal year of 26 or more and less than 51, exclusive of pupils attending the seventh and eighth grades of a junior high school, and for which school at least two teachers were hired full time for more than one-half of the days schools were maintained, he shall compute for the district eleven thousand nine hundred fifty dollars ($11,950) for the fiscal year 1965–1966, and nineteen thousand five hundred dollars ($19,500) for the fiscal year 1966–1967 and fiscal years thereafter.

(3) For each necessary small school which has an average daily attendance during the fiscal year of 51 or more but less than 76, exclusive of pupils attending the seventh and eighth grades of a junior high school, and for which school three teachers were hired full time for more than one-half of the days schools were maintained, he shall compute for the district seventeen thousand nine hundred twenty-five dollars ($17,925) for the fiscal year 1965–1966, and twenty-nine thousand two hundred fifty dollars ($29,250) for the fiscal year 1966–1967 and fiscal years thereafter.

(4) For each necessary small school which has an average daily attendance during the fiscal year of 76 or more and less than 101, exclusive of pupils attending the seventh and eighth grades of a junior high school, and for which school four teachers were hired full time for more than one-half of the days schools were maintained, he shall compute for the district twenty-three thousand nine hundred dollars ($23,900) for the fiscal year 1965–1966, and thirty-nine thousand dollars ($39,000) for the fiscal year 1966–1967 and fiscal years thereafter.

(b) For each district on account of each small school not determined to be a necessary small school under Section 17655 he shall make one of the following computations, whichever applies:

(1) If the total of the units of average daily attendance of the district during the fiscal year, exclusive of pupils attending the seventh and eighth grades of a junior high school, is less than 901, he shall multiply the units of average daily attendance in the school by two hundred thirty-nine dollars ($239) for the fiscal year 1965–1966, and three hundred ninety dollars ($390) for the fiscal year 1966–1967 and fiscal years thereafter.

(2) If the total of the units of average daily attendance in the district during the fiscal year, exclusive of pupils attending the seventh and eighth grades of a junior high school, is 901 or more, he shall multiply the units of average daily attendance by two hundred forty-nine dollars ($249) for the fiscal year 1965–1966, and four hundred dollars ($400) for the fiscal year 1966–1967 and fiscal years thereafter.

SEC. 513. Section 17656 of said code is amended to read:

17656. For each elementary school district which, exclusive of pupils attending the seventh and eighth grades of a junior high school, has an average daily attendance of 101 or more but less than 901 during the fiscal year, he shall compute an amount determined by multiplying the total average daily attendance, exclusive of pupils attending the seventh and eighth grades of a junior high school and pupils for whom a foundation program is computed under Section 17655 5, by two hundred thirty-nine dollars ($239) for the fiscal year 1965–1966, and three hundred ninety dollars ($390) for the fiscal year 1966–1967 and fiscal years thereafter.

For each elementary school district which, exclusive of pupils attending the seventh and eighth grades of a junior high school, has an average daily attendance of 901 or more during the preceding fiscal year, he shall compute an amount determined by multiplying the total average daily attendance, exclusive of pupils attending the seventh and eighth grades of a junior high school, and pupils for whom a foundation program is computed under Section 17655.5 by two hundred forty-nine dollars ($249) for the fiscal year 1965–1966, and four hundred dollars ($400) for the fiscal year 1966–1967 and fiscal years thereafter.

SEC 514 Section 17660 of said code is amended to read:

17660 For each elementary school district with an average daily attendance, exclusive of pupils attending the seventh and eighth grades of a junior high school, of less than 901 during the fiscal year, on account of the attendance during the fiscal year of pupils in the seventh and eighth grades of a junior high school which attendance is credited to the elementary school district pursuant to Sections 11404 and 5612, he shall multiply the average daily attendance in such grades by two hundred thirty-nine dollars ($239) for the fiscal year 1965–1966, and three hundred ninety dollars ($390) for the fiscal year 1966–1967 and fiscal years thereafter

For each elementary school district with an average daily attendance, exclusive of pupils attending the seventh and eighth grades of a junior high school, of 901 or more during the fiscal year, on account of the attendance during the fiscal year of pupils in the seventh and eighth grades of a junior high school which attendance is credited to the elementary school district pursuant to Sections 11404 and 5612, he shall multiply the average daily attendance in such grades by two hundred forty-nine dollars ($249) for the fiscal year 1965–1966, and four hundred dollars ($400) for the fiscal year 1966–1967 and fiscal years thereafter

SEC. 515. Section 17664 of said code is amended to read:

17664 (a) For each district on account of each necessary small high school the Superintendent of Public Instruction shall make one of the following computations selected with regard only to the number of certificated employees employed

or average daily attendance, whichever provides the lesser amount:

(1) For one which has an average daily attendance during the fiscal year of less than 21 and for which at least three certificated employees were employed full time, he shall compute thirty-three thousand three hundred dollars ($33,300) for the fiscal year 1965–1966, and thirty-six thousand three hundred twenty dollars ($36,320) for the fiscal year 1966–1967 and fiscal years thereafter.

(2) For one which has an average daily attendance during the fiscal year of 21 or more and less than 41 and for which at least four certificated employees were employed full time, he shall compute thirty-eight thousand seven hundred fifty dollars ($38,750) for the fiscal year 1965–1966, and forty-five thousand two hundred ninety-three dollars ($45,293) for the fiscal year 1966–1967 and fiscal years thereafter.

(3) For one which has an average daily attendance during the fiscal year of 41 or more and less than 61 and for which at least five certificated employees were employed full time, he shall compute forty-four thousand two hundred dollars ($44,200) for the fiscal year 1965–1966, and fifty-four thousand two hundred sixty-six dollars ($54,266) for the fiscal year 1966–1967 and fiscal years thereafter.

(4) For one which has an average daily attendance during the fiscal year of 61 or more and less than 76 and for which at least six certificated employees were employed full time, he shall compute forty-nine thousand six hundred fifty dollars ($49,650) for the fiscal year 1965–1966, and sixty-three thousand two hundred forty dollars ($63,240) for the fiscal year 1966–1967 and fiscal years thereafter

(5) For one which has an average daily attendance during the fiscal year of 76 or more and less than 91 and for which at least seven certificated employees were employed full time, he shall compute fifty-five thousand one hundred dollars ($55,100) for the fiscal year 1965–1966 and seventy-two thousand two hundred thirteen dollars ($72,213) for the fiscal year 1966–1967 and fiscal years thereafter.

(6) For one which has an average daily attendance during the fiscal year of 91 or more and less than 106 and for which at least eight certificated employees were employed full time, he shall compute sixty thousand five hundred fifty dollars ($60,550) for the fiscal year 1965–1966, and eighty-one thousand one hundred eighty-six dollars ($81,186) for the fiscal year 1966–1967 and fiscal years thereafter

(7) For one which has an average daily attendance during the fiscal year of 106 or more and less than 121 and for which at least nine certificated employees were employed full time, he shall compute sixty-six thousand dollars ($66,000) for the fiscal year 1965–1966, and ninety thousand one hundred sixty dollars ($90,160) for the fiscal year 1966–1967 and fiscal years thereafter.

(8) For one which has an average daily attendance during the fiscal year of 121 or more and less than 136 and for which at least 10 certificated employees were employed full time, he shall compute seventy-one thousand four hundred fifty dollars ($71,450) for the fiscal year 1965–1966, and ninety-nine thousand one hundred thirty-three dollars ($99,133) for the fiscal year 1966–1967 and fiscal years thereafter.

(9) For one which has an average daily attendance during the fiscal year of 136 or more and less than 151 and for which at least 11 certificated employees were employed full time, he shall compute seventy-six thousand nine hundred dollars ($76,900) for the fiscal year 1965–1966, and one hundred eight thousand one hundred six dollars ($108,106) for the fiscal year 1966–1967 and fiscal years thereafter.

(10) For one which has an average daily attendance during the fiscal year of 151 or more and less than 181 and for which at least 12 certificated employees were employed full time, he shall compute eighty-two thousand three hundred fifty dollars ($82,350) for the fiscal year 1965–1966, and one hundred seventeen thousand eighty dollars ($117,080) for the fiscal year 1966–1967 and fiscal years thereafter.

(11) For one which has an average daily attendance during the fiscal year of 181 or more and less than 221 and for which at least 13 certificated employees were employed full time, he shall compute eighty-seven thousand eight hundred dollars ($87,800) for the fiscal year 1965–1966, and one hundred twenty-six thousand fifty-three dollars ($126,053) for the fiscal year 1966–1967 and fiscal years thereafter

(12) For one which has an average daily attendance during the fiscal year of 221 or more and less than 261 and for which at least 14 certificated employees were employed full time, he shall compute ninety-three thousand two hundred fifty dollars ($93,250) for the fiscal year 1965–1966, and one hundred thirty-five thousand twenty-six dollars ($135,026) for the fiscal year 1966–1967 and fiscal years thereafter

(13) For one which has an average daily attendance during the fiscal year of 261 or more and less than 301 and for which at least 15 certificated employees were employed full time, he shall compute ninety-eight thousand seven hundred dollars ($98,700) for the fiscal year 1965–1966, and one hundred forty-four thousand dollars ($144,000) for the fiscal year 1966–1967 and fiscal years thereafter.

(14) For one which has an average daily attendance of less than 21 and for which fewer than three certificated employees were employed, he shall compute five thousand four hundred fifty dollars ($5,450) for each of the teachers employed in the school for the fiscal year 1965–1966, and eight thousand nine hundred seventy-three dollars ($8,973) for each such teacher for the fiscal year 1966–1967 and fiscal years thereafter.

(b) For each district on account of each small high school not determined to be a necessary small high school under Sec-

tions 17663, 17663 5, and 17663 7, he shall make one of the following computations, whichever applies:

(1) If the total of the units of average daily attendance in the district during the fiscal year is less than 301, he shall multiply the units of average daily attendance during the fiscal year in the school by three hundred twenty-nine dollars ($329) for the fiscal year 1965–1966, and four hundred eighty dollars ($480) for the fiscal year 1966–1967 and fiscal years thereafter.

(2) If the total of the units of average daily attendance in the district during the fiscal year is more than 300, he shall multiply the units of average daily attendance during the fiscal year in the school by three hundred thirty-nine dollars ($339) for the fiscal year 1965–1966, and four hundred ninety dollars ($490) for the fiscal year 1966–1967 and fiscal years thereafter.

For the purposes of this section a "certificated employee" is an equivalent full-time position of an individual holding a credential authorizing service, and performing service in grades 9 through 12 in any secondary school. Any fraction of an equivalent full-time position shall be deemed to be a full-time position.

The foundation program established by this section for high schools with an average daily attendance of less than 301 shall not apply to any high school established after July 1, 1961 unless the establishment of such schools has been approved by the Superintendent of Public Instruction.

SEC. 516 Section 17665 of said code is amended to read:

17665 For each high school district which has an average daily attendance of 301 or more during the fiscal year, he shall multiply the average daily attendance by three hundred thirty-nine dollars ($339) for the fiscal year 1965–1966, and four hundred ninety dollars ($490) for the fiscal year 1966–1967 and fiscal years thereafter.

SEC. 517. Section 17665.5 of said code is amended to read:

17665.5. For a high school district which has an attendance credited pursuant to Section 10815, he shall multiply the average daily attendance by three hundred thirty-nine dollars ($339) for the fiscal year 1965–1966, and four hundred ninety dollars ($490) for the fiscal year 1966–1967 and fiscal years thereafter.

SEC 518 Section 17666 2 of said code is amended to read:

17666 2. For each junior college district, he shall multiply the number of units of average daily attendance, during the fiscal year, in grades 13 and 14 computed for the district under Sections 11451 and 11501, subject to the provisions of Section 17611, by six hundred dollars ($600).

For purposes of this section, and Sections 17851 and 17905.2, the average daily attendance of a junior college district shall, subject to the provisions of Section 17611, be computed in the manner prescribed by Sections 11451 and 11501 except that

there shall be excluded from the computation the attendance of all students who resided in territory which was not a part of any district maintaining a junior college, the attendance of all students deemed nonresidents as provided in Sections 25505 and 25505.5, and there shall be included in the computation the attendance of all students residing in the district who were in attendance at a junior college in another district under an interdistrict attendance agreement entered into pursuant to Section 10801. Notwithstanding the above provisions of this section, the attendance of students deemed nonresidents as provided in Sections 25505 and 25505.5 shall not be excluded from the average daily attendance of junior college districts for the purposes of Section 17851.

The Superintendent of Public Instruction shall exclude from the computation provided by this section the average daily attendance during the fiscal year of inmates of any state institution for adults or of any city, county, or city and county jail, road camp or farm for adults.

SEC. 519. Section 17667 of said code is amended to read:

17667. Each computation required by this article (commencing at Section 17651) for high school districts shall be made after excluding from the average daily attendance for the fiscal year the average daily attendance of adults, as adults are defined in Section 6352, and the average daily attendance in classes for inmates of any state institution for adults or of any city, county, or city and county jail, road camp or farm for adults during the fiscal year.

SEC. 520. Section 17671 of said code is amended to read:

17671. For school districts which are eligible, commencing with the 1965–1966 fiscal year, under the standards prescribed by this article, the Superintendent of Public Instruction shall, for the fiscal year 1965–1966 and fiscal years thereafter, compute increases in the applicable foundation program or programs as follows:

(a) He shall increase the foundation program computed for a district under Sections 17655.5, 17656, and 17660 by fifteen dollars ($15) per pupil in average daily attendance for the fiscal year 1965–1966, and for the fiscal year 1966–1967 and fiscal years thereafter by twenty-five dollars ($25) per pupil in average daily attendance.

(b) He shall increase the foundation program computed for a district under Sections 17664, 17665 and 17665.5 by fifteen dollars ($15) for the fiscal year 1965–1966, and twenty-five dollars ($25) for the fiscal year 1966–1967 and fiscal years thereafter, per pupil in average daily attendance, excluding the average daily attendance of adults, as adults are defined in Section 6352, and the average daily attendance in classes for inmates of any state institution for adults or of any city, county, or city and county jail, road camp or farm for adults during the fiscal year.

SEC 521 Section 17676 of said code is amended to read:

17676. The foundation program computed under Article 2 (commencing with Section 17651) of this chapter for any school district which is not otherwise eligible for the increase in foundation program prescribed by Section 17671 shall, nevertheless, be increased in the next fiscal year by fifteen dollars ($15) for the fiscal year 1965–1966, and twenty-five dollars ($25) for the fiscal year 1966–1967 and fiscal years thereafter, for each unit of average daily attendance of the district exclusive of the average daily attendance of adults, as adults are defined in Section 6352, and the average daily attendance in classes for inmates of any state institution for adults or of any city, county, or city and county jail, road camp, or farm for adults, for the fiscal year if the Superintendent of Public Instruction determines that:

(a) The district was included within territory proposed for reorganization by a master plan or plans and recommendations developed under Chapter 9 or Chapter 10 of Division 5, which master plan or plans and recommendations complied with the standards prescribed by Section 17672 or Section 17673.

(b) The master plan or plans and recommendations were defeated at an election held within the territory involved after the effective date of this section.

(c) A majority of the votes cast in the district at the most recent such election were cast in favor of the reorganization proposed

SEC 522 Section 17702 of said code is amended to read:

17702 The Superintendent of Public Instruction shall compute for each district described herein, which does not come within the provisions of Section 17702.2, the amount, to be known as district aid, which a tax levied on each one hundred dollars ($100) of 100 percent of the assessed valuation in such district as shown by the equalized assessment roll of the district for the current year would produce if levied, if such tax was.

(a) Ninety cents ($0.90) in an elementary school district.

(b) Seventy-five cents ($0.75) in a high school district.

(c) Twenty-five cents ($0.25) in a junior college district

SEC. 522.1. Section 17702.2 of said code is amended to read:

17702.2 Commencing on the first day of July following an unsuccessful election for unification held after the effective date of the enactment of this section at the 1964 First Extraordinary Session of the Legislature, or commencing with the fiscal year 1966–1967, whichever first occurs, the Superintendent of Public Instruction shall compute the areawide aid to be utilized in determining state apportionments to be made for the support of elementary school districts and high school districts with respect to which an areawide foundation program is computed under Article 2.5 (commencing with Section 17680) of this chapter. Areawide aid shall be the amount which a tax levied on each one hundred dollars ($100) of 100 percent

of the assessed valuation for the current fiscal year, modified where necessary pursuant to Section 17262, of the area comprising all of such elementary school districts and all of such high school districts would produce, if levied, if such tax were:

(a) ~~Sixty cents ($0.60)~~ *Ninety cents ($0.90)* in the case of the elementary school districts

(b) ~~Fifty cents ($0.50)~~ *Seventy-five cents ($0.75)* in the case of the high school districts.

SEC. 523. Section 17702.3 of said code is amended to read.

17702.3. For purposes of making the computations prescribed by Section 17702.2, the Superintendent of Public Instruction shall, where necessary, adjust the assessed valuation of the territory involved, in the same manner and on the same basis as is required for individual districts pursuant to Chapter 1.5 (commencing with Section 17261) of this division and Sections 17703, 17704, and 17705. Losses in state equalization aid arising from the operation of Chapter 1.5 (commencing with Section 17261) of this division, shall be provided for in the manner prescribed in Section 17263.1.

SEC. 524. Section 17906.2 of said code is amended to read:

17906.2. No state equalization aid shall be allowed unless there shall have been levied pursuant to this code, for a district during the fiscal year, a tax, exclusive of taxes levied under Sections 3356, 16633, 19443, 19619, 20801, and 22101, as follows:

For purposes of allowances for the fiscal year 1963–1964 and for the fiscal years following, not less than ninety cents ($0.90) if any elementary district, seventy-five cents ($0.75) if a high school district, and twenty-five cents ($0.25) if a junior college district.

SEC. 525. Article 7.1 (commencing with Section 17920) of Chapter 3 of Division 14 of said code is repealed.

~~SEC. ——~~

SEC. 525.5. Section 17951 of said code is amended to read:

17951. Beginning with the fiscal year 1964–1965 and for each fiscal year thereafter, the allowance for each unit of average daily attendance during the fiscal year for adults, as adults are defined in Section 6352, shall be as follows:

(a) For high school districts the allowance shall be ~~five hundred dollars ($500)~~ *three hundred twenty dollars ($320)* less the product of ~~seventy-five cents ($.75)~~ *fifty cents ($0.50)* multiplied by each one hundred dollars ($100) of the assessed valuation of the district per unit of average daily attendance exclusive of adults.

(b) The allowance provided by this section for each unit of average daily attendance of an adult, as an adult is defined in Section 6352, not residing in the district shall be limited to one hundred twenty-five dollars ($125) as basic state aid and no allowance shall be made based on state equalization aid. The total of basic and equalization aid allowed each district shall not be less than one hundred twenty-five dollars ($125) or exceed two hundred thirty dollars ($230) for each unit of

average daily attendance during the fiscal year for resident adults, exclusive of average daily attendance in classes for inmates of any state institution for adults and for inmates of any city, county, or city and county jail, road camp or farm for adults

If any computation made under any of the preceding paragraphs of this section produces an allowable amount not in excess of one hundred twenty-five dollars ($125) per unit of average daily attendance, such allowable amount computed shall be adjusted if, and to the extent necessary, so that the actual allowance shall not exceed one hundred twenty-five dollars ($125) per unit of average daily attendance of the adults in high schools during the preceding fiscal year.

SEC. 525 6. Section 20751 of said code is amended to read:

20751 ~~(1)~~ Except as otherwise provided in this code, the maximum rate of school district tax which may be levied for all school purposes, exclusive of bond interest and redemption, for any school district in any school year on each one hundred dollars ($100) of assessed valuation within the district shall be as follows.

(a) ~~Except as provided in subdivision (b) of this section, in~~ *In* any separate elementary school district the boundaries of which are not coterminous with those of a high school district, eighty cents ($0 80) for elementary school purposes, or ninety cents ($0.90) for combined kindergarten and elementary school purposes.

~~(b) In any separate elementary school district the boundaries of which are not coterminous with those of a high school district and whose current expenses of education for the 1963-64 fiscal year were less than twice the amount of the foundation program applicable to the district, one dollar and twenty-five cents ($1 25) for elementary school purposes, or one dollar and thirty-five cents ($1 35) for combined kindergarten and elementary school purposes.~~

~~(c) Except as provided in subdivision (d) of this section, in~~ *(b) In* any separate high school district, the boundaries of which are not coterminous with those of an elementary school district or with those of a junior college district, seventy-five cents ($0 75) for high school purposes, or one dollar and twenty cents ($1.20) for combined high school and junior college purposes.

~~(d) In any separate high school district, the boundaries of which are not coterminous with those of an elementary school district or with those of a junior college district, and whose current expenses of education for the high school purposes for the 1963-64 fiscal year were less than twice the amount of the foundation program computed for high school purposes, eighty-five cents ($0 85) for high school purposes, or one dollar and twenty cents ($1.20) for combined high school and junior college purposes.~~

(c) ~~(e)~~ In any separate junior college district, the boundaries of which are not coterminous with those of a high school

district, thirty-five cents ($0 35) for junior college purposes.

(d) ~~(f)~~ In any unified school district one dollar and fifty-five cents ($1 55) for combined elementary school and high school purposes; or one dollar and sixty-five cents ($1.65) for combined kindergarten, elementary school, and high school purposes; or one dollar and ninety cents ($1.90) for combined elementary school, high school, and junior college purposes; or two dollars ($2), for combined kindergarten, elementary school, high school, and junior college purposes.

~~(g) Any unified school district whose current expenses of education per unit of average daily attendance for the 1963-64 fiscal year were less than six hundred dollars ($600), two dollars and ten cents ($2.10) for combined elementary school and high school purposes, two dollars and twenty cents ($2.20) for combined kindergarten, elementary school, and high school purposes, or two dollars and fifty-five cents ($2.55) for combined kindergarten, elementary school, high school, and junior college purposes.~~

(e) ~~(h)~~ In any high school and junior college district the boundaries of which are coterminous and which are governed by the same governing board, one dollar and twenty cents ($1 20) for combined high school and junior college purposes

~~(2) If the maximum tax rate of a school district in effect on the effective date of the amendment to this section adopted at the 1961 First Extraordinary Session of the Legislature is, because of an increase adopted by the district electors pursuant to Section 20803, more than the applicable rate prescribed in subdivision (1) of this section, the maximum tax rate of such district shall continue to be the maximum rate prescribed by this section prior to such 1961 amendment plus the amount of the increase over such rate adopted by the district electors pursuant to Section 20803 prior to the 1964 amendment to this section, for the period for which such increase was adopted by the voters. If any such voted increase in effect on such effective date results in a maximum rate which is less than that prescribed in subdivision (1) of this section as so amended in 1961, the maximum rate of such district shall be that prescribed in subdivision (1) of this section as so amended. Nothing in this section shall be construed to prevent a change in the maximum tax rate of a school district subject to and in the manner prescribed by Section 20803.~~

~~SEC. 526. Section 20751.2 is added to said code, to read:~~

~~20751.2. (a) For the fiscal year 1966-1967, the maximum rate of school district tax which may be levied for all school purposes, exclusive of bond interest and redemption and state building loan repayment, shall be a rate which is sufficient to produce for a school district an amount which when added to the total amount of income received by the district for the fiscal year 1966-1967, is equal to, but not greater than, 105 percent of all revenues received by the district from all sources in the fiscal year 1965-1966.~~

~~(b) As used in this section "total amount of income received by the district" means all income received by a district, including amounts received as state apportionments or federal allocations except all of the following:~~

~~(1) Amounts received from district taxes.~~

~~(2) Amounts received from the sale of district bonds.~~

~~(3) Amounts received under the State School Building Aid Law of 1952 (Chapter 10, commencing with Section 19551, Division 14).~~

~~(4) Amounts received under Article 2.1 (commencing with Section 17671) of Chapter 3 of Division 14.~~

~~(5) Amounts received pursuant to Section 17263.1.~~

~~(6) Amounts received under any federal act enacted at the 89th Session of Congress, which is directed to the strengthening and improvement of educational quality and educational opportunities in the nation's elementary and secondary schools.~~

SEC 526 Section 20751.2 is added to said code, to read:

20751.2 Except as provided in Section 20751.3,

(a) For the fiscal year 1966–67, the maximum rate of school district tax which may be levied for all school purposes, exclusive of bond interest and redemption, state building loan repayment, employee retirement, and capital construction, shall be a rate which is sufficient to produce for a school district an amount which when added to the total amount of income credited to the district for the fiscal year 1966–67, is equal to 100 percent of all General Fund revenues per unit of average daily attendance in 1965–66 multiplied by the estimated number of units of average daily attendance in 1966–67, plus an amount equal to ten dollars ($10) per unit of estimated average daily attendance in 1966–67

(b) As used in this section "total amount of income received by the district" means all income received by a district, including amounts received as state apportionments or federal allocations except all of the following:

(1) Amounts received from district taxes.

(2) Amounts received from the sale of district bonds

(3) Amounts received under the State School Building Aid Law of 1952 (Chapter 10, commencing with Section 19551, Division 14)

(4) Amounts received under Article 2.1 (commencing with Section 17671) of Chapter 3 of Division 14

(5) Amounts received pursuant to Section 17263.1

(6) Amounts received under any federal act enacted at the 89th Session of Congress, which is directed to the strengthening and improvement of educational quality and educational opportunities in the nation's elementary and secondary schools.

SEC. 527. Section 20751.3 is added to said code, to read:

20751.3 Beginning with the fiscal year 1966–1967, and for fiscal years thereafter, the maximum rate of school district taxes which may be levied for all school purposes, exclusive of

bond interest and redemption and state building loan repayment, shall be the greater of the following:

(a) The maximum rate specified in Section 20751.

(b) The maximum rate computed pursuant to Section 20751.2.

(c) The rate established by a vote of the people after the effective date of this section pursuant to Section 2080.3 of this code

Any rate of tax for any district which was otherwise increased by a majority vote of the qualified electors of a school district at an election held for that purpose prior to the effective date of this section shall be of no force and effect

SEC. 527.5. Section 20751.4 is added to said code, to read:

20751.4. The maximum rate of school district tax which may be levied for all school purposes, exclusive of bond interest and redemption, for any elementary, high school, unified or junior college district, may be increased by such amount, not to exceed twenty-five cents ($0.25) for one hundred dollars ($100) of assessed value for elementary, high school and junior college districts or fifty cents ($0.50) per one hundred dollars ($100) of assessed value for a unified district, as will produce the sum required to acquire any school sites or school facilities, or to construct any school buildings or other educational facilities to be used in the regular instructional program conducted by the district.

SEC. 528. Section 20752 of said code is repealed.

SEC. 529 Section 20753 of said code is repealed.

SEC. 530. Section 20930 of said code is amended to read:

20930. The maximum rate of school district tax otherwise authorized by law to be assessed for any school district for elementary school and high school purposes shall be reduced by:

The applicable rates provided for in Section 20912, except that when the amount of tax moneys allocated under Article 2 of this chapter to a district is less than the amount that such a rate would raise if levied for the district, the maximum rate shall be reduced by the amount of the tax rate that would raise the amount of the allocation ~~less~~ *plus* the increase, if any, in state equalization aid.

For purposes of this section, the phrase "maximum rate of school district tax otherwise authorized by law to be assessed" shall mean the maximum rates prescribed by Section 20751 for elementary school or high school purposes.

SEC 531. Section 25445 of said code is repealed.

~~SEC. 532. Section 25541.5 of said code is repealed.~~

SEC. 533. Section 25542 of said code is repealed.

SEC 534. Section 681.1 is added to the Harbors and Navigation Code, to read:

681.1. (a) When the ownership of an undocumented vessel required to be numbered under this code has changed and application is made for issuance, transfer or reassignment of a certificate of number for the vessel, the applicant shall fur-

nish the Division of Small Craft Harbors with or as part of the application, a signed statement of the applicant showing:

(1) The date of the sale or other transfer of ownership of the vessel.

(2) The name and address of the seller or transferor.

(3) The name and address of the buyer or transferee

(4) The total consideration (valued in money) given for the sale or other transfer of the vessel, including any motor or other component part of the vessel included in the sale or other transfer.

(b) The Division of Small Craft Harbors shall withhold the ~~issuance, transfer or reassignment of a certificate of number and the~~ issuance or transfer of a certificate of ownership of any undocumented vessel numbered or required to be numbered under this code until the applicant furnishes the information required by subdivision (a) of this section

(c) When the Division of Small Craft Harbors acquires knowledge that the ownership of a vessel required to be numbered under this code has changed, it shall forward to the State Board of Equalization information from its records identifying the vessel together with information showing the data required by subdivision (a). The information shall be transmitted as promptly as feasible and in such form and manner as shall be agreed between the division and the board.

SEC 535 Section 4997 of the Public Resources Code is amended to read:

4997. A trainee shall be deemed to be a resident of the high school district in which he lived at the time of his admission to the program and the excess cost for a school year of educating such trainee shall be paid by the high school district of which he is a resident to the county superintendent who is providing education for the trainees The excess cost shall be determined by dividing the total current expense of education during such school year (for the maintenance of a high school level school or classes for trainees), by the total number of units of average daily attendance in such school or classes during such school year, less state and federal apportionments on account of such average daily attendance.

Average daily attendance of trainees shall be computed, for purposes of this chapter, by dividing the number of days such trainee attended the schools or classes by the number of days that the schools or classes were taught, except that with respect to a trainee attending such schools or classes for more than 175 days in a school year, the average daily attendance shall be computed by using the divisor of 175.

For purposes of computing average daily attendance 180 minutes of class attendance shall be deemed to constitute a school day, and no more than 15 hours of class time per week shall be considered.

Not later than July 15 of each year, the superintendent of schools of the county providing education for trainees shall forward his claim for the excess expense reimbursement to the

high school district of residence of each trainee during the preceding school year, and the governing board of such high school district shall upon receipt thereof pay such claims.

The governing board of the high school district to which the claim is presented may include in its budget the amount necessary to pay the claim, and, if the amount is included in the budget, the board of supervisors shall levy a school district tax to raise the amount.

SEC. 536. Section 1652 of the Streets and Highways Code is amended to read:

1652. The assessor shall then ascertain from his records the assessed value of such incorporated or annexed property on the first day of the preceding January at 12:01 a.m. and shall certify to the county auditor such value thus ascertained.

SEC. 537. Section 1653 of said code is amended to read:

1653. The auditor shall then calculate the proportion that the assessed value, on the first day in the preceding January at 12:01 a.m., of the property annexed or incorporated bears to the total assessed value, as of that day and hour, of all the property in the district from which the annexation or incorporation was made He shall prepare a claim in favor of the city, to be allowed by the board of supervisors and paid by warrant on the treasurer, for that part of the unencumbered funds of the district which bears the same proportion to the whole of such unencumbered funds as the assessed value of the property annexed or incorporated bears to the total assessed value of all the property in the district from which the annexation or incorporation was made

SEC. 538. Section 4000 of the Vehicle Code is amended to read:

4000 (a) No person shall drive, move, or leave standing any motor vehicle, trailer, semitrailer, pole or pike dolly, logging dolly, or auxiliary dolly upon a highway unless it is registered and the appropriate fees have been paid under this code.

No person shall drive, move, or leave standing any motor vehicle upon a highway which has been registered in violation of Chapter 3 (commencing at Section 24378) of Division 20 of the Health and Safety Code.

(b) The provisions of this section shall not apply, following payment of fees due for registration, during such time that registration and transfer is being withheld by the Department of Motor Vehicles pending the investigation of any use tax due under the provisions of the Revenue and Taxation Code.

SEC. 539. Section 4300.5 of said code is amended to read:

4300.5. An application for registration under Chapter 1 (commencing with Section 4000) of Division 3 of the Vehicle Code of a motor vehicle previously registered outside of this state must be accompanied by payment of the amount required to be paid under Part 1 (commencing with Section 6001), Division 2 of the Revenue and Taxation Code with respect to the use of the motor vehicle by the applicant

SEC. 540. Section 4451 of said code is amended to read:

4451. The certificate of ownership shall contain:

(a) Not less than the information required upon the face of the registration card.

(b) Provision for notice to the department of a transfer of the title or interest of the owner or legal owner.

(c) Provision for application for transfer of registration by the transferee.

(d) Certificates of ownership issued by the department for the year 1958 and subsequent years shall contain provision for a statement by the transferor, other than the legal owner, to the effect that the proposed transfer of title or other interest in the motor vehicle is not in violation of the provisions of Article 5 (commencing with Section 16100), Chapter 1, Division 7 of this code.

SEC. 542. Section 4750.5 of said code is amended to read:

4750.5. (a) The department shall withhold the registration or the transfer of registration of any motor vehicle sold at retail to any applicant by any person other than a vehicle manufacturer or dealer holding a license and certificate issued pursuant to Chapter 4, Division 5 of the Vehicle Code, or an automobile dismantler holding a license and certificate issued pursuant to Chapter 3, Division 5 of the Vehicle Code, until the applicant pays to the department the use tax measured by the sales price of the motor vehicle as required by the Sales and Use Tax Law, together with penalty, if any, unless the State Board of Equalization finds that no use tax is due If the applicant so desires, he may pay the use tax and penalty, if any, to the department so as to secure immediate action upon his application for registration or transfer of registration, and thereafter he may apply through the Department of Motor Vehicles to the State Board of Equalization under the provisions of the Sales and Use Tax Law for a refund of the amount so paid.

(b) The department shall transmit to the State Board of Equalization all collections of use tax and penalty made under this section. This transmittal shall be made at least monthly, accompanied by a schedule in such form as the department and board may prescribe.

(c) The State Board of Equalization shall reimburse the department for its costs incurred in carrying out the provisions of this section. Such reimbursement shall be effected under agreement between the agencies, approved by the Department of Finance.

(d) In computing any use tax or penalty thereon under the provisions of this section dollar fractions shall be disregarded in the manner specified in Section 9559 of this code. Payment of tax and penalty on this basis shall be deemed full compliance with the requirements of the Sales and Use Tax Law insofar as they are applicable to the use of motor vehicles to which this section relates.

SEC. 543. Section 5600 of said code is amended to read:

5600. No transfer of the title or any interest in or to a vehicle registered under this code shall pass, and any attempted transfer shall not be effective, until the parties thereto have fulfilled either of the following requirements:

(a) The Transferor has made proper endorsement and delivery of the certificate of ownership and delivery of the registration card to the transferee as provided in this code and the transferee has delivered to the department or has placed the certificate and card in the United States mail addressed to the department when and as required under this code with the proper transfer fee, together with the amount required to be paid under Part 1 (commencing with Section 6001), Division 2 of the Revenue and Taxation Code with respect to the use by the transferee of the vehicle, if a motor vehicle, and thereby makes application for a transfer of registration except as otherwise provided in Sections 5905, 5906, 5907, and 5908.

(b) The transferor has delivered to the department or has placed in the United States mail addressed to the department the appropriate documents for the registration or transfer of registration of the vehicle pursuant to the sale or transfer except as provided in Section 5602.

SEC. 544. This act provides for a tax levy within the meaning of Article IV of the Constitution and shall go into immediate effect, but shall become operative on July 1, 1965, except as otherwise provided herein.

SEC. 545. Notwithstanding the provisions of Section 544, Sections 6051, 6051.5, 6052.5, 6201, 6201.5, 7102, 7103, 7202, and 7203 of the Revenue and Taxation Code, as affected by this act, shall become operative on April 1, 1966. Sections 17181.5 and 18405 5 of said code shall be applicable only to taxable years beginning on or after January 1, 1966, and Section ~~19521~~ *19601* shall be applicable for the taxable year 1965 and for fiscal years beginning during the calendar year 1965. All other sections of said code relating to the Personal Income Tax Law, as affected by this act, *and Section 4204 of the Government Code* shall become operative on January 1, 1966.

SEC. 546. (a) Notwithstanding the provisions of Section 544, the provisions of Article 3 of Chapter 19 of the Bank and Corporation Tax Law in effect on December 31, 1964, shall be applicable to the payment of taxes in the case of income years ending prior to the effective date of this section.

(b) Except for provisions of the Bank and Corporation Tax Law in this act relating to a change in the tax rates, the provisions of such law, except as may otherwise be specifically provided, shall become operative on January 1, 1965, with respect to the computation of taxes on or measured by the net income of the calendar year 1965 or on the first day of the fiscal year with respect to the computation of taxes on or measured by the net income of fiscal years beginning after January 1, 1965.

(c) The provisions of this act affecting changes in the rate of tax under the Bank and Corporation Tax Law shall be applied in the computation of taxes for all income years (as defined by Section 23042, prior to the enactment of this section) ending after December 31, 1964 and all taxable years as defined in the Bank and Corporation Tax Law contained in this act beginning on or after January 1, 1965 ~~Provided, however, that in the case of banks and financial corporations the maximum rate provided for by Sections 23181.2 and 23183.2, for the calendar year 1965 and fiscal years beginning in 1965 shall not exceed 6 percent.~~ Banks and corporations whose income year (as defined by Section 23042, prior to the enactment of this section), began prior to January 1, 1965, and ends on or before November 30, 1965, shall compute their tax by applying the rate in effect as of December 31, 1964, and the rate provided for by the Bank and Corporation Tax Law contained in this act on and after such date, to their net income for the entire year in accordance with the method prescribed by Section 24251.

Any tax, for a taxable year specified in the Bank and Corporation Tax Law contained in this act, in addition to that disclosed by the return, made necessary solely by such provisions affecting changes in the rate of tax shall accrue on January 1, 1965, and shall be due and payable within 10 days from the date of notice and demand from the Franchise Tax Board, or on or before the 15th day of the third month following: (1) the close of the income year, or (2) the effective date of this section, whichever is later. If not so paid, interest shall be added thereto in the manner provided by Section 25901. Any additional tax shall not be considered a deficiency assessment within the meaning of Article 1 of Chapter 20 (commencing with Section 25661).

SEC. 547. Notwithstanding the provisions of Section 544, the provisions of the Education Code in this act shall become operative and applicable with respect to the fiscal year 1966–1967, except where any such provision expressly provides otherwise.

SEC 548 Notwithstanding the provisions of Section 544, Sections 17101 through 17108, inclusive, of the Revenue and Taxation Code, as amended by this act, and Sections 17109 through 17112, inclusive, of said code, as added by this act, shall be applied in the computation of taxes on annuities with payments commencing on or after January 1, 1966, and Sections 17101 through 17108, inclusive, of said code, as were in effect immediately prior to the amendments made by this act, shall continue to be applied in the computation of taxes on annuities with payments commencing prior to January 1, 1966.

SEC ~~548~~ *549*. If any part, sentence, subdivision or clause of this act is for any reason held invalid or to be unconstitutional such decision shall not affect the validity of the remaining portions of this act and if this act is held invalid or unconstitutional as applied in the computation of tax for the year

1965 then taxes shall be determined under this part as if this act had never been enacted.

SEC. 549.1. In view of pending litigation concerning the proper tax treatment of intercompany dividends, it is not intended by enactment of this act that any inference be drawn from it in such litigation. Subdivision (a) of Section 25109 of the Revenue and Taxation Code as added by this act is to be construed as a codification of existing law.

SEC. 550. The Legislature finds and declares that local government property taxes have risen to levels which cause them to be regressive and to weaken the ability of local government to meet its responsibilities to the people of California. For these reasons, the Legislature further declares that it is the purpose of the State Legislature to reduce the burden of local property taxes by making available funds to offset certain property tax exemptions.

IMPACT OF AB 2270 ON LOCAL GOVERNMENT

The following pages show the impact of AB 2270 on county government, on cities and on school districts.

The first section entitled "Impact on County Government" refers to the impact on the county government, not on all government units in the county. The "loss of revenue" column for counties and cities actually reflects the reduction in property tax revenue due to the elimination of household furnishings and inventories from taxation

The school district section has been organized in a slightly different manner. The impact of AB 2270 on school districts is shown in terms of rate reductions and additional new money for schools In other words, schools will receive funds from the state to cover the loss of revenue caused by the exemptions and to provide for the mandatory rate reduction as shown Some schools will get additional funds beyond those required for the rate reduction but this is money which is in excess of the school's present budgetary requirements and should be treated as additional new money. It must be re-emphasized that the figures shown in the right hand column of the school section represent brand new money for schools—over and above replacement money for the property tax reductions.

Data for cities and counties were prepared by Miss Evelyn Love of the Assembly Revenue and Taxation Committee staff. Data for school districts were prepared by Gil Oster of the Assembly Education Committee staff.

"Net additional revenue" is money above and beyond that which school districts will receive to compensate for losses in property tax revenue due to reductions in rates and assessed values. An increase in the Unification Bonus is the primary source of the new money

* Denotes base rate

† This new money results from the fact that Petaluma will receive new state money which would require a tax rate reduction below 90 cents. As 90 cents is the minimum local tax rate, this extra money will be used to improve the educational program. This results because Petaluma Elementary is a district with a small amount of wealth behind each child

‡ This comes from the increase in the unified bonus which each unified district will receive

** City did not levy property tax in fiscal year 1964-65

Appendix C

IMPACT OF AB 2270 ON AN INDIVIDUAL IN THE STOCKTON UNIFIED SCHOOL DISTRICT

1.

Salary $6,000 per year
Married—two children
Smokes one pack of cigarettes per day
Home - $15,000—assessed at $3,375 (22.5 percent) with personal property assessed at $200

Increases	
Income tax	$10 00
Cigarette tax	18 25
Sales tax	19.00
	$47 25

Decreases

1 Exemption of household furnishings from property tax.
2 School tax rate reduction of $1 45

Computation.

Tax on present assessed value ($3,575) at $10 18 rate	$363 93
Tax on new assessed value ($3.375) at $8 73 rate	294 63
Property Tax Reduction	$69 30

Net Effect of AB 2270

Increase	$47 25
Decrease	69.30
Net Decrease	$22 05

2.

Salary: $10,000 per year
Married—two children
Smokes one pack of cigarettes per day
Home, $22,500—assessed at $5,062 (22 5 percent) with personal property assessed at $300.

Increases	
Income tax	$38 00
Cigarette tax	18.25
Sales tax	27 50
	$83.75

Decreases

1 Exemption of household furnishings from property tax.
2 School tax rate reduction of $1 45.

Computation:

Tax on present assessed value of $5,362 at $10 18 rate	$545.85
Tax on new assessed value of $5,602 at $8 73 rate	441 91
Property Tax Reduction	$103 94

Net Effect of AB 2270

Increase of tax	$83 75
Decrease of tax	103 94
Net Decrease	$20 19

3.

Salary $20,000
Married—two children
Smokes one pack of cigarettes a day
Home $40,000—assessed at $9,000 (22 5 percent) with personal property assessed at $1,100

Increases	
Income tax	$176 00
Cigarette tax	18 25
Sales tax	45 00
	$239.25

Decreases

1 Exemption of household furniture from property taxation
2 Reduction of school tax rate of $1 45

Computation

Tax on present assessed value ($10,000) at $10 18 tax rate	$1,028 18
Tax on new assessed value ($9,000) at $8 73 tax rate	785 70
Tax Reduction	$242 48

Net Effect of AB 2270

Tax Increases	$239 25
Tax Reduction	242 48
Net Reduction	$3 23

IMPACT OF AB 2270 ON A SENIOR CITIZEN IN THE STOCKTON UNIFIED SCHOOL DISTRICT

Retirement Salary: $200 per month ($2,400 per year)
Married—no children living at home
Smokes one pack of cigarettes per day
Home $15,000—assessed at $3,375 (22 5 percent) with personal property assessed at $200

Increases	
Income tax	$0 00
Cigarette tax	18.25
Sales tax	7.75
	$26 00

Decreases

1 Exemption of household furnishings from property tax.
2 School tax rate reduction of $145
3 Reimbursement of 55 percent of property tax for those over age 65 in this income group

Computation

Tax on present assessed value ($3,575) at $10 18 rate	$363 93
Tax on new assessed value ($3,375) at $8 73 rate	294 63
Tax Reduction	$69 30
Reimbursement of 55 percent of property tax (55 percent of $294 63)	162 04
Total Tax Reduction	$231 34

Net Effect of AB 2270

Increase in taxes	$26 00
Decrease in taxes	231 34
Net Decrease	$205 34

Appendix D

AN ANALYSIS OF THE PETRIS-UNRUH PROGRAM FOR PROPERTY TAX REFORM

By Professor Malcolm M. Davisson * (as presented to the Spring 1965 meeting of the City Managers' Department and the League of California Cities' Committee on Revenue and Taxation)

There appears to be general agreement that property tax relief and reform are among the most important fiscal issues facing California. The only question is how this is to be accomplished. The mandatory 25 percent reduction in school district property taxes would account for more than half of the proposed property tax relief, with the benefit accruing to all property owners within the more than 1,600 districts in the state Since school district taxes account for half or more of total tax levies in most counties, this would appear to be a good place to begin major tax reduction

Assessment of household goods has long been a dismal failure and 19 states have abandoned taxation of such property Many localities in five other states also exempt household goods under provisions permitting local governments to choose between taxation and exemption No rational defense can be made for inclusion of household goods in the ad valorem tax base and exemption would relieve assessors of what is perhaps their greatest headache and at the same time would clear the consciences of householders who quite naturally feel that they cannot afford to cooperate with the assessor in determining a value for their household and personal possessions.

Tax relief for the low-income aged is certainly entirely defensible, and the procedure contemplated in the Petris program would appear to provide relief to those most in need of it and to protect against abuse

Many years ago California abandoned ad valorem taxation of intangibles except for solvent credits which are taxed at a rate of one-tenth of 1 percent This relic of the tax on intangibles is an oddity today· the rate of one-tenth of 1 percent is uniform throughout the state and bears no relation to local revenue needs, assessment is difficult, and yield is small ($5 million)

The largest exemption in dollar terms is business inventories—$230 million of local tax relief Several arguments are advanced in support of this exemption:

(1) There is no common method of valuing inventories and as a result of nonuniformity inequities are widespread It is frequently alleged that industrial and mercantile inventories are assessed at a higher percentage of actual value than is other personal property and real property, and there is some evidence that this is the case

(2) Some businesses are harder hit than others under the current practice of assessing as of the first Monday in March The use

* Professor of Economics, University of California, Berkeley, and consultant to the League of California Cities

of an averaging procedure in lieu of a fixed lien date, which is the practice in a number of states, has not met with anywhere near unanimous support of business firms, and it is argued that provision of a choice between averaging and a fixed lien date would result in different systems and compound difficulties of administration and enforcement Futher, there is no consistent relationship among firms with regard to the ratio between the ad valorem tax on inventories and income of the business

(3) Exemption of inventories would improve California's business climate

Tax reduction through exemption of inventories would doubtless be welcomed by business firms, but whether it can be justified in terms of California's tax position relative to other industrial states is another matter. A study of California's tax treatment of manufacturing industry published in 1961 by the Economic Development Agency compared *total* tax burdens of firms located in this state with those of firms in various other parts of the country The conclusion was this.

"California imposes higher than average tax obligations on manufacturing State and local taxes in California are not, however, as high as they are in states like Michigan, Wisconsin, or Washington . . . state and local tax costs appear to run around two to five percent of total costs which are affected by geographical location The other cost factors are labor, freight, and public utility services For many industrial activities, this amount is significantly less than utility service costs There is evidence that the lower utility costs alone in California, as compared to most states, can offset California's somewhat higher tax costs

The fragmentary evidence suggests that tax differentials—within existing ranges—are largely offset by other cost advantages in the state, and there is a strong probability that California, for the majority of industries, affords higher than average profit potential. It does not appear necessary, or even desirable, that California make tax concessions to industrial firms to 'lure' them to locate or expand their activities here "

It should be noted that this study applied only to manufacturing industries Even though the effect of taxes on business location is probably exaggerated, the fact remains that this is a powerful argument that must be reckoned with.

It is difficult, if not impossible, to predict in advance where the benefits of tax relief to business firms would ultimately accrue Those who support such relief frequently argue that tax reduction would by the force of competition be reflected in lower prices of goods and services and thus benefit consumers. But whether or not this would be the case depends on the nature of the market in which the seller operates. About all that one can say is that the benefits of tax reduction to business firms would accrue in indeterminate proportions to the firms involved and to those who buy their products or services.

The same question arises in connection with tax relief for owners of rental property. To what extent would tax reduction be reflected in

downward revision of rents? Here again the nature of the market is the controlling factor and the only reasonable answer is that the benefits of tax reduction would accrue in indeterminate proportions to owners of rental property and their tenants

Funds in the amount of approximately $1 billion for state reimbursement of local governments for property tax relief and for the block grants and for state's own use would come from income, sales, inheritance, and commodity and service excise taxes in these proportions: 42 percent from taxes on incomes of individuals and banks and corporations, with by far the largest share from individuals, 35 percent from the sales tax; 13 percent from taxation of cigarettes and tobacco products, 8 percent from a gross receipts tax on public utilities (gas, electricity, and telephone), and 1 percent from the inheritance tax

Compared with other states using the personal income tax, California now makes relatively light use of this source of revenue, our exemptions tending to be higher and our rate structure lower than elsewhere This fiscal year, 1964-65, California will receive about 13 percent of its total tax revenue from the personal income tax compared with more than 40 percent in New York and about one-third in Massachusetts and Wisconsin. Our personal exemptions are $1,500 for a single taxpayer, $3,000 for a married taxpayer, and $600 for each dependent compared with $600 per person in New York Our rate range is from 1 to 7 percent compared with 2 to 10 percent in New York and Wisconsin

The personal income tax has several advantages over the sales tax, even one such as ours with foodstuffs and services exempt. If it is accepted that some minimum amount of income, increasing with the number of dependents the taxpayer has to support, should be exempted from tax burden, such exemptions are readily incorporated in the income tax structure Any attempt to make allowance for minimum living expenses under the sales tax, however, is necessarily both imprecise and inefficient

With regard to establishing an equitable set of tax rates for different individuals and families, income taxation is much more precise than sales taxation Under the income tax, rates can be made to vary in any fashion that is desired Under the sales tax, however, a precise result can be obtained only by using a perfectly general tax with a single rate. As soon as some commodities are exempted, or some taxed at higher rates than others, the effective burdens imposed on different people become uncontrollable What emerges is a highly irregular and haphazard tax rate structure.

Finally, the income tax tends to be more sensitive to increase in personal income than the sales tax That the California sales tax is not more responsive to increase in personal income appears to be largely attributed to its exclusion of personal services.

It is difficult to determine with precision how any given county, city or school district would come out under the tax revision program, but Assemblyman Petris states that local governments would be "more than completely compensated for any loss in revenue"

Neither is it possible to determine with precision how any individual taxpayer would come out At a press conference Assemblyman Petris

estimated that if the full program were enacted, a family of four with a $6,000 annual income and a $15,000 home would realize a net tax cut of $21 32 a year The same family with a $10,000 income would pay $15 50 less in state and local taxes under the overall program There are several variables that make extremely difficult the job of estimating tax saving and determining the cut-off point where taxes would begin to rise—e g What is the level of assessment for ad valorem taxation? To what income tax deductions is the individual entitled? Is he a smoker? Does he lease equipment? Will he benefit from lower prices of goods and services resulting from tax reduction for business firms? What will be the ultimate incidence of the gross receipts tax on public utilities?

Notwithstanding these difficulties, it seems clear that net tax reductions would go to those most in need of it and that the shift from property taxes to other sources of tax revenue is, in varying degrees, a move in the direction of a more equitable overall tax structure.

Appendix E

EXPLANATION OF THE SCHOOL FINANCE AMENDMENTS WHICH THE AUTHOR PLANNED TO INSERT IN THE BILL

1. *Change in Section 526 of the bill as amended May 17, 1965.*

This is the tax-cutting section of the bill. In order to make clear the Legislature's intent in cutting school tax rates, the section was rewritten to require that actual school district tax rates be reduced by the amount of the new state aid received under AB 2270, less any amount received on account of pupil growth, and less amounts received as unification bonus. This wording would have insured massive reduction in school property taxes

2. *Changes in various sections of the bill relating to adult education*

The intent of AB 2270 was to provide the regular foundation program for adults in junior colleges in regular graded classes. The May 17 bill inadvertently increased to $600 the program for all adults in junior colleges. Amendments were prepared to limit this increase to adult junior college students in regular graded classes.

3 *Override Tax for Capital Outlay*

The original intent of the bill was to encourage pay-as-you-go capital construction in school districts by authorizing a permissive override tax for this purpose. It was determined later that such an authorization might weaken the tax relief required by the bill. Consequently, the tax authority for such capital construction was reduced from $0 25 in nonunified, and $0 50 in unified districts, to $0 15 and $0 30, respectively and it was limited to districts not on the State School Building Aid Program. This would force all districts on the program to make a choice of financing capital outlay either on a pay-as-you-go basis or on a state loan basis.

Appendix F(1)

LOS ANGELES CITY SCHOOL DISTRICTS

STATEMENT REGARDING ASSEMBLY BILL 2270

Prepared by Richard H Lowrence
Legislative Coordinator
Los Angeles City School Districts

Assembly Bill 2270 merits the support of the State Legislature because it is the only measure introduced in recent years which recognizes the fact that the greatest mass migration in recorded history has so drastically changed the social and economic structure of California that there is urgent need for changes in fiscal policy that will result in more equitable and adequate financing of public services that are properly the responsibility of state government

In the important area of school finance, Assembly Bill 2270 offers a more realistic approach to the problem of state versus local support than has ever been proposed in previous legislation. This bill recognizes the urgent need for relief to local property taxpayers for the support of the public schools by establishing foundation program support levels which more closely reflect actual operating costs, and by establishing safeguards against unreasonable increases in local tax rates for school purposes At the same time, it provides sufficient flexibility to permit local school districts to cope with problems of growth, or to enrich their educational programs to the extent desired by the citizens of a particular community

The most significant fact about Assembly Bill 2270 is that it makes intelligent use of information gathered by the Legislature over a period of several years concerning California's economy, the nature of its wealth, and the manner in which it is distributed. The application of this knowledge is reflected in those sections of the bill which seek to ease the unequal burden presently being borne by the property taxpayers for the support of local government as well as schools It is also reflected in proposals that will bring more revenue to the state in the form of taxes paid by individuals who in the past have enjoyed the benefits of educational and governmental services without paying their fair share of the cost of such services.

Assembly Bill 2270 has received the endorsement of educators familiar with California's fiscal needs because it offers the most promising solution yet proposed to the pressing problem of providing adequate financing for the public schools of this state.

Appendix F(2)

CALIFORNIA ASSOCIATION OF SCHOOL ADMINISTRATORS

Burlingame, May 20, 1965

THE HONORABLE NICHOLAS PETRIS
State Capitol, Sacramento

Re: AB 2270

Dear Assemblyman Petris:

It is our pleasure to inform you that the Cooperative Finance Committee representing CASA, CASSA, CESAA, CJCA, CAPSBO unanimously recommended to their respective association full support of AB 2270 Subsequently the Joint Legislative Committee representing all of the above associations except CJCA took similar action.

For your information, we include the motion approved by the Cooperative Finance Committee together with some related comments.

Motion: MSC that the Cooperative Finance Committee recommend to their respective associations that they render strong support to the Petris-Unruh bill, AB 2270, and that we give a major portion of our time and effort to implementation and statewide publicity to this bill.

The comments were as follows:

1. This proposal is forward looking and establishes a new basis for the support of public education which we consider to be sound.
2. The foundation program established is approximately the same as current costs of public education at the elementary level and improves the situation at the secondary level
3. It will reduce the difference in the relative ability of districts to support an adequate educational program and includes more districts within the equalization program.
4. It results in substantial property tax relief, and at the same time provides for much needed increase in public school support
5. In repealing most of the permissive override taxes, it eliminates the "cookie jar" approach in school finances, freeing the local district to utilize financial resources as needed.
6. It is very beneficial in potential long term effects in establishing a new pattern of support in which the state obviously recognizes the necessity and responsibility for assuming a greater proportion of the support of public education.

Thank you very much, Mr. Petris, for your part and that of the Revenue and Taxation Committee of the Assembly and all others concerned for the development of and presentation of AB 2270.

Sincerely yours,

J. H. CORSON
Executive Secretary

Appendix F(3)

LEAGUE OF WOMEN VOTERS OF CALIFORNIA, INC.

San Francisco, May 11, 1965

HONORABLE JESSE M UNRUH
State Capitol, Sacramento

Dear Mr. Unruh:

Re: AB 2270; The League of Women Voters of California supports the school finance provisions incorporated in AB 2270

We cannot comment on the equity of specific tax measures included in the proposal because we do not have a state finance position which would authorize us to take a stand, however our members are cognizant of the need for adequate revenues to provide a public school system of high standards. We believe a strong, well-financed public school system is essential to the maintenance of our American way of life

In recent years, the League has been particularly concerned with the need for better financing of our schools We have been aware that the costs of education have increased greatly and the local property taxpayers have had to bear a large share of this increased cost The great inequalities in educational opportunity among the districts of the state as measured by money spent per pupil, and the inequities in local tax effort required to provide a given level of support, have also been of concern to our members

We believe strongly that the State of California has the responsibility for insuring an adequate educational opportunity for children, and the state should use its broader taxing powers to equalize the great variation in what local districts can equitably contribute to the education of their own pupils. It was, therefore, distressing to us to realize that, in spite of the increases voted by the Legislature in 1964, the foundation guarantees still fell far short of the actual amounts being spent—so far short that it was clear they could not meet anyone's criteria of what is needed to provide an adequate education.

It is our opinion that the changes in the Education Code included in AB 2270 will provide more adequate support for our public school system; will provide much greater equalization of educational opportunity for pupils through the state; and will assure that the state will assume a larger share of public school costs. The League of Women Voters enthusiastically supports all of these aims

The elimination of the special purpose tax rates will, we feel, be helpful to local boards of education as well as to citizens by simplifying school finance procedures and by allowing local school budgets to reflect more clearly the needs of the community.

We note that AB 2270, as introduced, would eliminate the possibility of increasing the new maximum tax rates by vote of the people Since we are convinced that one of the strengths of our public school system is in having its roots deep in individual communities, we believe that local citizens should always have the right to increase the local tax rate in order to provide improvements which they believe important. We urge that this bill be amended to conform to the stated intent of the authors, that local tax maximums can be raised by vote of the citizens.

The League of Women Voters is convinced that the problems of public school finance in California can be solved only by a very large increase in the State School Fund such as proposed in AB 2270. We know that such an increase is impossible without additional state revenues, and we, therefore, are very pleased to have these improvements in school finance offered in connection with a plan for providing the necessary revenue for the state

Very truly yours,

MRS RUSSELL STOCKWELL, *President*

Appendix G(1)

STATE OF CALIFORNIA, OFFICE OF LEGISLATIVE COUNSEL

Sacramento, April 27, 1965

HON. NICHOLAS C PETRIS
Assembly Chamber

SALES AND USE TAXES—NO. 16822

Dear Mr Petris:

QUESTION NO. 1

Are the provisions in Assembly Bill No 2270, as introduced, relating to a credit against state sales and use taxes for such taxes imposed by local government, constitutional?

OPINION NO. 1

In our opinion, the courts would uphold these provisions.

ANALYSIS NO. 1

Assembly Bill No 2270, as introduced, proposes to amend Sections 6051 and 6201 of the Revenue and Taxation Code to increase state sales and use taxes from 3 to 5 percent, effective April 1, 1966. It would also add Sections 6051 5 and 6201 5 to the same code to allow a credit for sales and use taxes imposed by local government in accordance with the provisions of the Bradley-Burns Uniform Local Sales and Use Tax Law, which is set forth in Part 1.5 (commencing with Section 7200) of Division 2 of the Revenue and Taxation Code The bill also authorizes counties to increase county sales and use taxes from 1 percent to 1 08 percent, effective the same date, but a county would be obliged to allow a credit against the 1 percent sales and use tax imposed by a city within the county (Sec 7202, R. & T C.).

We find two possible constitutional issues with respect to these particular provisions of the bill First, the theory could be advanced that the state has made an invalid classification in imposing a sales and use tax of 5 percent in some areas of the state, while granting a credit against a portion of such tax in others Second, it might be argued that the Legislature is attempting to impose a state tax for local purposes in violation of Section 12 of Article XI of the Constitution of the State of California

While we believe neither objection is valid with respect to these provisions of the bill, the two issues will be discussed in turn

The power of the Legislature to make classifications for the purpose of taxation is very broad In making such classifications a sound discretion is accorded the Legislature Every reasonable presumption in support of a classification will be indulged in and if the classification

can be reconciled on any reasonable and natural theory it will be upheld (*Roth Drug, Inc* v *Johnson* (1936), 13 Cal App. 2d 720, 733).

In our opinion, a distinction between those who pay a local tax on the same privilege and those who do not would be upheld as reasonable The Supreme Court of the United States has stated that "Duplicated taxes, or burdens that approach them are recognized hardships that government, state or national, may properly avoid" (*Charles C Steward Machine Co* v *Davis* (1937), 301 U.S 548, 589, 81 L Ed. 1279, 1292). Provisions of law which allow taxpayers who have paid a tax to one governmental body to credit such payment against a similar tax imposed by another governmental body have been upheld (*Steward Machine Co* v *Davis,* supra, relating to social security; *State of Florida* v *Mellon* (1927), 273 U S 12, 71 L Ed. 511, relating to death taxes, *Gillum* v *Johnson* (1936), 7 Cal. 2d 744, relating to social security).

Moreover, we note that the Bradley-Burns Uniform Local Sales and Use Tax Law has been operative since April 1, 1956 (Sec. 2, Ch. 1311, Stats 1955), and has contained a provision providing for a credit against county sales and use taxes for such taxes paid to a city since that time (Sec. 7202, R. & T C). Although the validity of this credit provision was not called in question, apportionment of funds under this law was in issue in *City of Commerce* v. *State Board of Equalization* (1962), 205 Cal App 2d 387, and the court gave no indication that it deemed the law invalid

Therefore, it is our opinion that the crediting of local sales and use taxes against such taxes imposed by the state would be upheld by the courts against an attack on the ground that such procedure amounted to an invalid classification

With respect to the second possible objection to this bill on the basis that its credit provisons amount to the imposition of a state tax for local purposes, Section 12 of Article XI of the State Constitution provides, in part.

> "Sec 12 Except as otherwise provided in this Constitution, the Legislature shall have no power to impose the taxes upon counties, cities, towns or other public or municipal corporations, or upon the inhabitants or property thereof, for county, city, town, or other municipal purposes, but may, by general laws, vest in the corporate authorities thereof the power to assess and collect taxes for such purposes. . . . "

By general law, the Legislature has already authorized counties and cities to impose sales and use taxes (Secs. 7202, 7203, R. & T.C.; Sec. 37101, Gov C.). These local taxes have operated in conjunction with state taxes imposed on the same privileges for many years We know of no reason why a state tax for state purposes would take on the character of a state tax imposed for local purposes merely because a credit for taxes imposed by local agencies would be allowed as a credit against the state tax Therefore, it is our opinion that the provisions in Assembly Bill No 2270 relating to a credit against state taxes would be upheld against an attack based upon Section 12 of Article XI of the State Constitution

QUESTION NO. 2

Are the provisions in Assembly Bill No 2270 constitutional as they pertain to allocating a portion of state revenue derived under the Sales and Use Tax Law to cities and cities and counties?

OPINION NO. 2

If the money allocated were used for state purposes, it is our opinion that the courts would uphold these provisions in the bill.

ANALYSIS NO. 2

This bill would amend Section 7102 of, and add Section 7103 to, the Revenue and Taxation Code to provide for the following distributions of money from the Retail Sales Tax Fund·

"7102 The money in the ~~fund shall, upon order of the Controller, be drawn therefrom for refunds under this part or be transferred to the General Fund of the State~~ *Retail Sales Tax Fund shall be distributed as follows:*

"(a) The money in the fund shall, upon order of the Controller, be drawn therefrom for refunds under this part

"(b) That sum of money collected and deposited in the fund which is equal to seventeen hundredths of one percent (.17%) of the measure of the taxes collected under this part shall, upon order of the Controller, be transferred to the City Property Tax Relief Fund, which fund is hereby created

"(c) The money remaining in the Retail Sales Tax Fund shall, upon order of the Controller, be transferred to the General Fund of the state."

"7103 The money in the City Property Tax Relief Fund shall, upon order of the Controller, be paid quarterly to each of the cities and cities and counties of this state in the proportion that the taxes levied against locally assessed personal property by each such city and city and county in the tax year 1963–1964 bears to the sum of the taxes levied against locally assessed personal property during that time by all the cities and cities and counties in this state This proportion shall be determined by the board "

With respect to this proposal, Section 12 of Article XI, as noted earlier, denies power to the Legislature to impose state taxes for local purposes

Two cases are of interest in construing the above constitutional provision In *City of Los Angeles* v *Riley* (1936), 6 Cal 2d 621, the court was concerned with the validity of the Motor Vehicle License Fee Act (Ch 362, Stats 1935; see now Pt 5 (commencing with Sec 10701), Div 2, R & T C) The act, among other things, imposed an annual license fee on vehicles at the rate of 1¾ percent of a vehicle's market value and specified that the revenue derived from such fees would be deposited in the State Treasury to the credit of the Motor Vehicle License Fee Fund After payment of certain costs of administration, subdivision (b) of Section 9 of the act appropriated 25 percent of the

money remaining in the fund to be paid to cities and cities and counties to be used for the following purposes·

> ". . . The moneys so paid shall be expended by the cities and cities and counties for law enforcement and the regulation and control and fire protection of highway traffic "

After pointing out that the Legislature was prohibited by Section 12 of Article XI from imposing a state tax for local purposes, the court went on to say, commencing on page 623 and with citations omitted·

> "What constitutes a local and what a state purpose is a question not always free from doubt There are some functions performed by cities that are both local and state in nature The constitutional provision above quoted does not prohibit state taxation for a state purpose, even though, under some circumstances, the purpose could also be local To some extent the spheres of operation of the two overlap In the present case, the purposes designated in the state are 'law enforcement and the regulation and control and fire protection of highway traffic ' There cannot be any reasonable doubt but that those purposes are state in character, within the meaning of the above constitutional provision "

In addition to the foregoing, subdivision (c) of Section 9 of the Motor Vehicle License Fee Act of 1935 also allocated a portion of the moneys in the Motor Vehicle License Fee Fund to counties and cities and counties but, in this case, did not specify for what purposes the money was to be used On the same date that it upheld the allocation of state money to cities to be used for state purposes, the California Supreme Court upheld the allocation to counties in *County of Los Angeles* v *Riley* (1936), 6 Cal 2d 625

In this latter case, after pointing out in some detail the different relationship between the state and counties, as opposed to the relationship between the state and municipal corporations, since counties are political subdivisions of the state for purposes of government, the court stated, on page 628·

> "Keeping the above discussion concerning the nature of counties in mind, we have in the instant case a statute general in its terms, appropriating money to counties from a fund collected by a general state tax already held to be valid without expressly limiting its use As already pointed out, the state could levy a general tax and appropriate the sums collected in whole or in part to the counties to assist them in performing their many state functions The Constitution prohibits a tax for local purposes Under such circumstances, may it not be presumed that the Legislature had in mind in passing section 9(c) the provisions of article XI, Section 12? Must we not, in interpreting section 9(c), read into it the limitations found in the constitutional provision? We think that the answers to these questions is clear We are of the opinion that, properly interpreted, section 9(c) appropriates the moneys therein mentioned to the counties, as limited by article XI, section 12, i e , for state purposes."

As will be noted, both of the *Riley* cases were concerned with application of Section 12 of Article XI of the State Constitution, as it relates to the imposition of state taxes for local purposes. As far as the cities were concerned, the court held that the specified purposes for which moneys from the Motor Vehicle License Fee Fund could be used constituted state purposes As for the counties, the court implied that such money would be used for state purposes, even though the statute was silent with respect to the purposes for which the money could be used. However, in reaching this latter conclusion, the court placed certain emphasis on the special relationship of the state to counties, as opposed to the state's relationship to municipal corporations

We have found no case specifically holding that a state purpose would be implied when revenues derived from a state tax are allocated to cities with no specific directions as to the uses for which the money is intended However, it is our opinion that the same result would be reached by the courts as was reached by the court in the second *Riley* case, i e, that the money could only be used for state purposes and that such a limitation would be read into the statute.

In the context presently under discussion, Section 12 of Article XI is allied to Section 31 of Article IV, which provides, in part·

> "Sec 31. The Legislature shall have no power . to make any gift or authorize the making of any gift, of any public money or thing of value to any individual, municipal or other corporation whatever. . ."

As is the case with the imposition of state taxes for use by local government, the courts have held that the provisions of Section 31 of Article IV are not violated by the expenditure of public funds for a state purpose, even though local purposes might also be served thereby (*City of Los Angeles* v *Post War Public Works Review Board* (1945), 26 Cal 2d 101, 114)

On this ground, it is our opinion that the provisions in Assembly Bill No 2270, as introduced, pertaining to an allocation of state revenue derived under the Sales and Use Tax Law to cities and cities and counties would be deemed to be constitutional by the courts, so long as the allocations were used for state purposes We believe the courts would read this limitation into Section 7103, which the bill proposes to add to the Revenue and Taxation Code

SENIOR CITIZENS PROPERTY TAX REIMBURSEMENT—NO. 16792

Dear Mr. Petris:

QUESTION

Is the Unruh-Petris Senior Citizens Property Tax Reimbursement Act, as contained in Assembly Bill No 2270, as introduced at the 1965 Regular Session, constitutional?

OPINION

We are unaware of any case in which the courts have considered the questions raised by this proposal However, if satisfactory evidence could be produced to show that, on the whole, persons 65 years of age or older who are paying property taxes on their principal personal residences and who have annual incomes of not more than $3,500 were in need of such assistance, it is our opinion that the courts would uphold the act.

ANALYSIS

Assembly Bill No 2270, as introduced, proposes, among other things, to add Chapter 25 (commencing with Section 19501) to Part 10 of Division 2 of the Revenue and Taxation Code * This chapter would establish a procedure, whereby state funds could be allocated to persons 65 years of age or older in accordance with a formula computed on the basis of such a person's income and the amount of property tax paid (see Secs 19504, 19521) Income for purposes of obtaining such an allocation is defined as follows.

> "19502 'Income' shall mean all income of the claimant and spouse and of all other individuals living in the principal personal residence from whatever source derived. It shall include but not be limited to the sum of adjusted gross income as used for purposes of the California Personal Income Tax Law (including items of income excluded by Article 3 of Chapter 3), plus alimony, support money, cash public assistance and relief, the gross amount of any pensions or annuities including railroad retirement benefits, all benefits received under the Federal Social Security Act and veteran's disability payment, all interest received from the federal government or any of its instrumentalities, all interest received from the State of California or any of its political subdivisions, realized capital gains, workmen's compensation and the gross amount of loss of time insurance benefits, life insurance proceeds, and gifts It does not include surplus food or other relief in kind supplied by a governmental agency.

* Unless otherwise indicated, all future section citations refer to sections proposed to be added to the Revenue and Taxation Code by this bill

"Total income shall be determined for the calendar year (or approved fiscal year ending within such calendar year) which ends within the fiscal year for which the property taxes have been assessed."

The Unruh-Petris Act formula would include consideration of the tax on only the principal personal residence of an elderly person and only to the first $5,000 of assessed valuation (Secs 19503, 19521, 19522). Only one claim for each principal personal residence would be allowed, even though more than one person might otherwise be eligible to make a claim under the act (Sec 19522). The amount of state money to be allocated under the act is then determined by a scale set forth in Section 19523.

The scale would allow an allocation of an amount equal to 95 percent of the amount of tax accrued and paid on the first $5,000 of assessed valuation of a principal personal residence, if the claimant's annual income was not more than $1,000. This allocation would decrease by one percentage point on the amount of tax accrued and paid as income increased by $25 increments, until a claimant with an annual income of not more than $3,500 would only be allocated 1 percent of the amount of tax accrued and paid.

Thus, the question for consideration is whether the Legislature has power to enact legislation to allocate state moneys to persons 65 years of age or older who have an annual income of not more than $3,500 and who are paying property taxes on their principal personal residences. As the act is worded, it seems safe to assume that individual allocations would not be in large amounts, due to the fact that the formula contains a limitation on assessed valuation (Sec 19522), and includes the following definition of "property tax accrued":

"19507. 'Property taxes accrued' means current property taxes (exclusive of special assessments, interest, penalties, principal payments on improvement bonds and charges for service) assessed against a claimant's principal residence by any city, city and county, or county for any fiscal year beginning on or after July 1, 1965 . . ."

Initially, it should be noted that while the Unruh-Petris Act speaks of "property tax reimbursement," it actually constitutes a payment of state funds to elderly persons in accordance with the formula since property taxes on private residences are collected by local taxing entities, while the act would provide for "reimbursement" from state funds.

It follows that the proposal is, in essence, a plan to make grants-in-aid to elderly persons from the General Fund of the state. These grants would be made on the basis of a person's income and the amount of his property taxes on his home, even though he might own considerable other property which was producing limited revenue.

Therefore, if the Unruh-Petris Act were to be adopted, the principal question as to its validity would be raised by Section 31 of Article IV of the State Constitution. This section denies power to the Legislature "to make any gift or authorize the making of any gift, of any

public money or thing of value to any individual, municipal or other corporation whatever . . . "

It is well settled that this provision does not apply to expenditures of public funds if a public purpose is being served thereby (see *San Bernardino County* v. *Way* (1941), 18 Cal. 2d 647) Therefore, the question before us is to determine whether or not gifts from the State Treasury under the Unruh-Petris Act would serve a public purpose

Subdivision (2) of Section 22 of Article IV of the State Constitution authorizes the Legislature to grant aid to "aged persons in indigent circumstances " Under the Old Age Security Law (Sec 2000 and following, W & I C), a recipient is able to own certain property without reference to its value and remain eligible for public assistance (Secs 452, 454, W & I C) Moreover, the courts have held that the care and relief of aged persons who are in need is a matter of state concern and does not constitute a gift of public funds within the constitutional prohibition (*County of Los Angeles* v *La Fuente* (1942), 20 Cal 2d 870, 877; see also *Board of Social Welfare* v *County of Los Angeles* (1945), 27 Cal 2d 81) Finally, it should be noted that an applicant for assistance under the Old Age Security Law, generally speaking, is entitled to an amount of aid which, when added to the income of the applicant, equals $105 per month, plus a cost of living adjustment (Sec. 2020, W & I C , but cf Secs 458, 2020 001, W & I C)

Thus, it may be seen that even though the Old Age Assistance Law is based on need, the income of a recipient may become a factor more important than the recipient's assets in determining eligibility for assistance As pointed out earlier, this could also be the case in many instances under the Unruh-Petris Act

Whether or not the Unruh-Petris Act, if adopted in California, would be deemed to carry out a purpose similar to the Old Age Assistance Law is open to some doubt However, if satisfactory evidence could be produced to show that, on the whole, persons 65 years of age or older who are paying property taxes on their principal personal residences and who have annual incomes of not more than $3,500 were in need of such assistance, it is our opinion that the courts would probably find that the plan served a public purpose and did not constitute an invalid gift of public funds

In reaching this conclusion, we have considered the possibility that this act might be considered as an invalid classification in that some elderly persons with modest incomes would be denied benefits under the program, as they were paying no property taxes (see Amend. 14, U S Const.; Art I, Sec. 11, Art. IV, Secs 22 and 25, Cal Const) However, it is our opinion that there is ample authority to uphold the act against an attack on this ground (see *Roth Drug. Inc* v *Johnson* (1936), 13 Cal App. 2d 720, 733; *Watson* v. *Greely* (1924), 67 Cal. App 2d 328, 344, 345).

INCONSEQUENTIAL RESOURCES—NO. 21873

Dear Mr Petris

QUESTION

Does the language in lines 48 and 49 on page 95 of Assembly Bill No 2270, as amended in Assembly May 17, 1965, make it clear that benefits received under the Unruh-Petris Senior Citizens Property Tax Reimbursement Act shall be excluded from income as defined for public assistance recipients?

OPINION

In our opinion, the language makes it clear that such benefits should not be includible in the income of a recipient of public assistance

ANALYSIS

Assembly Bill No 2270, among other things, proposes to add Chapter 25 (commencing with Section 19501) to Part 10 of DIVISION 2 of the Revenue and Taxation Code to establish procedures for paying state funds to certain persons 65 years of age or older with limited incomes in accordance with a formula based on income and property taxes accrued and paid With respect to payments received by elderly persons pursuant to this proposed act, it is stated in lines 48 and 49 on page 95 of the bill:

> ". . Any reimbursement received under this chapter shall be deemed to be inconsequential resources" (Proposed Sec 19523, R & T C)

Section A-211 07 of the State Department of Social Welfare's Manual of Policies and Procedures on Old Age Security provides the following definition

> "A-211 07 Income from an inconsequential resource is the net return from an interest in real or personal property which makes no appreciable contribution to the continuing needs of a recipient under the OAS standard Such income is not to be considered in determining the amount of the aid payment" (See also subd (b), Sec 443, W & I C)

In view of the above definition and the express language proposed to be added to the Revenue and Taxation Code, it is our opinion that benefits received by persons 65 years of age or older under the Unruh-Petris Act would not be includible in their incomes for public assistance purposes

Very truly yours,

GEORGE H MURPHY

CHANGING THE LIEN DATE—NO. 16791

Dear Mr Petris.

QUESTION

Would it violate the Constitution to change the lien date from the first Monday in March to the first day of January, as proposed by Assembly Bill No 2270, as introduced at the 1965 Regular Session of the Legislature?

OPINION

While the matter would not be entirely free from doubt until tested in the courts, it is our opinion that the Legislature could constitutionally change the lien date in the manner proposed

ANALYSIS

Assembly Bill No 2270, among other things, proposes to amend Sections 405 and 751 of the Revenue and Taxation Code to require county assessors and the State Board of Equalization to assess all taxable property at 12 01 a m on the first day of January, rather than at noon on the first Monday in March It would amend various other provisions to conform to this change (see, for example, Secs 220, 225, R. & T C in the bill), and would provide that tax liens would attach annually at the earlier date (Sec 2192, R & T C)

The courts have held that the power of the Legislature in the field of taxation is limited only by constitutional restrictions (*Delaney* v *Lowery* (1944), 25 Cal 2d 561, 568) And we have found no express limitation on the Legislature's power in the Constitution which would prohibit it from changing the lien date from the first Monday in March to the first day of January.

Some confusion in this regard has resulted from the language of Section 8 of Article XIII of the State Constitution, which reads:

> "The Legislature shall by law require each taxpayer in this State to make and deliver to the county assessor, annually, a statement, under oath, setting forth specifically all the real and personal property owned by such taxpayer, or in his possession, or under his control, at 12 o'clock meridian, on the first Monday of March "

We find nothing in any of this language that can be construed to constitute a requirement of the kind mentioned. The section merely relates to the filing with the county assessor of an annual statement showing the property that the taxpayer owns, possesses or controls as of noon of the first Monday in March It provides that the Legislature shall enact

legislation to require such filing. It is entirely silent, however, on the subject of valuation

There is judicial authority to the effect that the taxable status of property is fixed as of the first Monday in March on the basis of the following: Section 8 of Article XIII, provisions, now in Section 441 of the Revenue and Taxation Code, which merely implement Section 8 of Article XIII by duplicating its provisions, and provisions, now in Section 405 of the Revenue and Taxation Code, which require the assessor to assess taxable property to the person owning, claiming, possessing or controlling it as of noon of the first Monday in March (*Dodge v. Nevada Nat Bank*, 109 Fed 726) However, neither in that authority nor in any other of which we are cognizant is there any support for the view that Section 8 of Article XIII in and of itself fixes the taxable status of property, for valuation or any other purpose, as of noon of the first Monday in March

We conclude, therefore, that Section 8 of Article XIII would be no bar to the proposed legislation insofar as an assessment date for such fiscal year other than the first Monday in March would thereby be prescribed in respect to the property involved

However, this constitutional provision does require that taxpayers deliver a statement to the county assessor setting forth all the real and personal property owned by them at noon on the first Monday in March. Assembly Bill No 2270, as introduced, proposes to amend Section 448 of the Revenue and Taxation Code in the following manner

> "448. The property statement shall show all information as of ~~noon on the first Monday in March~~ *12:01 a.m. on the 1st day of January and as of noon on the first Monday in March The statement shall set forth all the real and personal property owned by such taxpayer, or in his possession, or under his control at 12:00 meridian on the first Monday of March.*
>
> *"Additional information required by this article shall be furnished regarding property owned, controlled by or in the possession of a taxpayer on the 1st day of January Additional information with respect to property owned or in the possession of a taxpayer at noon on the first Monday in March beyond that required by this section shall not be necessary"*

In other words, Section 448, if amended in the manner proposed, would require taxpayers to submit the information specified in Section 8 of Article XIII concerning their property at noon on the first Monday in March, but would require all additional information with respect to such property set forth in Article 2 (commencing with Section 441) of Chapter 3 of Part 2 of Division 1 of the Revenue and Taxation Code only for the January lien date The information required by this article relates to such matters as the situs of property, debts to be deducted from solvent credits and a legal description of real estate (see, for example, Secs 443, 444, 447, R & T C).

We think the above proposal satisfies the constitutional requirement that taxpayers report on their property as of noon on the first Monday in March Moreover, we find nothing in Section 8 of Article XIII of the

Constitution which we would construe as prohibiting the Legislature from requiring a property statement at some date in addition to the first Monday in March

Therefore, while the matter will not be entirely free from doubt until this particular proposal is construed by the courts, it is our opinion that the Legislature may constitutionally change the lien date from the first Monday in March to the first day in January

Very truly yours,

GEORGE H. MURPHY

STATE OF CALIFORNIA, OFFICE OF LEGISLATIVE COUNSEL

Sacramento, June 5, 1965

HON. ROBERT T. MONAGAN
Assembly Chamber

PASSAGE OF BILLS—NO. 22983

Dear Mr Monagan

QUESTION NO. 1

If A B. 2270 is passed by the Assembly with a majority vote but less than two-thirds, and it is then sent to the Senate, what happens to the provisions of the bill requiring a two-thirds vote; that is, do they automatically drop out of the bill or are they still in the bill but merely inoperative?

OPINION NO. 1

In our opinion the provisions would remain in the bill, but could not become effective unless, at the final stage in the proceedings, the bill receives a two-thirds vote in each house

ANALYSIS NO. 1

A B 2270, as amended on May 17, 1965, would substantially revise and supplement the laws of the state relating to taxation The bill contains certain provisions which require a two-thirds vote for passage, notably, provisions exempting personal property from taxation (Secs 6, 8, 15), provisions making appropriations (e g. Sec 93), and provisions increasing the rate of taxation under the Bank and Corporation Tax Law (Secs 245, 248, 250, 253)

Unless the Constitution otherwise provides, the vote necessary for final passage of a bill is a majority of the elected members of both houses of the Legislature (Cal Const, Art IV, Sec 15). There is no exception in the case of a bill which is to take effect immediately as a tax levy (*Roth Drug, Inc* v *Johnson*, 13 Cal App 2d 720, 727–729)

It follows that A B 2270, as amended, with the exception of those provisions of the bill which require a two-thirds vote, could be passed by a majority vote It also follows that unless the bill receives a two-thirds vote, those provisions of the bill which require such a vote will not become effective We think that the courts would hold those provisions are severable from the remainder of the bill and failure to secure sufficient votes to enact the provisions requiring a two-thirds vote would not necessarily affect the validity of the other sections

It is our opinion, therefore, that if A B 2270 receives a majority, but less than a two-thirds, vote in the Assembly, and is sent to the Senate, the provisions of the bill requiring a two-thirds vote would not be effective, unless the necessary vote is obtained in the Assembly at the final stage in the proceedings

There is nothing in the law or rules that would cause the provisions in question to drop from the bill upon the failure of the Assembly to give a two-thirds vote Affirmative action would have to be taken to amend the provisions out of the bill Otherwise, they would remain in the bill, even though they could not be given effect

QUESTION NO. 2

Assuming the inoperative provisions are still in the bill, and the bill eventually receives a two-thirds vote in both houses (i e , adoption of conference report), would the previously inoperative provisions become operative?

OPINION NO. 2

In our opinion if the bill ultimately receives a two-thirds vote in both houses, the provisions would become operative

ANALYSIS NO. 2

We think that whenever the Constitution calls for a two-thirds vote on a bill or measure, the reference must be construed to require a two-thirds vote on final passage of the bill or measure This office has consistently held to this position

There appears no basis on which to make an exception in the case of A B 2270 The constitutional provision calling for a two-thirds vote on increases under the Bank and Corporation Tax Law speaks of the vote on passage of the bill (Cal Const , Art XIII, Sec 16), while the provision requiring a two-thirds vote on property tax exemptions simply states that "The Legislature, two-thirds of all of the members elected to each of the two houses voting in favor thereof . . may exempt entirely from taxation any or all forms, types, or classes of personal property" (Cal Const , Sec 14). With respect to appropriations, the Constitution provides that appropriations from the General Fund shall be void unless "two-thirds of all the members elected to each house of the Legislature vote in favor thereof " (Const Art. IV, Sec 34a). In all of these instances, we think that the Constitution has reference to the final vote on passage of the measure in each house.

The Assembly Rules declare that the vote on concurrence or upon the adoption of a conference report shall be deemed the vote upon final passage of the bill. We are of the opinion, therefore, that if A.B 2270 were amended in the Senate, and the Assembly concurred in the amendments or in a conference report concerning the bill, and gave a two-thirds vote in doing so, all of the provisions of the bill would become operative.

Very truly yours,

GEORGE H MURPHY
Legislative Counsel

Appendix I

SAMPLE LETTER SENT IN RESPONSE TO OBJECTION RAISED ABOUT PROPERTY TRANSFER TAX PORTION OF AB 2270

Dear Mr. _____

One of the perils and unpleasant features of tackling tough assignments in the Assembly is that every now and then we run smack into opposition from supporters and friends.

You write in connection with the portion of AB 2270 which would allow counties to impose a real property transfer tax This authorization was included in the proposed tax package as an alternate source of revenue for county government. If the real property transfer tax were standing alone, I would oppose it But our whole concept in AB 2270 is to correct a large number of problems in one big package We are eliminating some bad inequities from our tax structure, such as the taxes on household furniture and furnishings, business inventory and solvent credits. But the money thereby taken away from local government must be made up from other tax sources more fair and equitable

Attractive as it is, I would not vote for (in fact in the past I have repeatedly voted against) repeal of the tax on household furniture and furnishings unless there was replacement money ($45 million) for local government.

In addition to exempting inventories and household furnishings, this bill also mandates a sizable reduction in tax rates. School taxes will be reduced by an average of 25 percent throughout the state Tighter controls are also imposed to insure that this tax relief will continue making homeownership much more attractive The net effect of the bill will be seen in lower monthly payments for all homebuyers, even assuming a transfer tax is enacted locally

In addition to the fact that the massive decrease in property taxes far outweighs tax liabilities of a transfer tax, several other points should be kept in mind:

1—The first $15,000 of improved property will be exempt from the transfer tax so the total tax on a $25,000 house would be only $100.

2—It appears that the federal government will repeal its transfer tax—abandoning this source to the states.

3—The transfer tax is not imposed by this bill It will still be up to counties to actually impose the tax

4—Twelve other states impose a property transfer tax

In conclusion, let me remind you that we have to balance the equities of certain sections against others in order to determine if (1) the overall impact of AB 2270 is fair and equitable, (2) there is a net gain to the hard-pressed homeowner I think the bill meets these tests

There are a great number of other property and income tax reforms in this bill which I feel certain you would support Would you have them all defeated because of objections to this one feature?

Thanks for writing to me.

Sincerely yours,

Appendix J

LIST OF REVENUE SOURCES WITH THEIR YIELD

Revenue Source	*Estimated yield per year ($ in millions) 1965–66*

Appendix K

The letter reproduced below was presented as a minority report on that portion of the bill which mandates a standard ratio for use in assessing property values.

ASSEMBLY, CALIFORNIA LEGISLATURE
December 11, 1964

HON NICHOLAS C PETRIS, *Chairman*
Assembly Interim Committee on Revenue
and Taxation
State Capitol, Sacramento

Dear Mr. Petris:

I do not agree with one of the recommendations made in the final report of the Committee on Revenue and Taxation The committee has suggested that a mandatory ratio of appraised value to full cash value be accepted as standard practice in this state.

After our year long survey of the California tax structure, I am convinced that in any consideration of proposals for additions or changes in the revenue system three questions are all important These are.

(1) Will it produce the desired result? (purpose)
(2) Is it beneficial or restrictive? (economic effect)
(3) Is it workable? (administrative feasibility)

Let us consider a statutory or mandatory ratio of assessed value to estimated full cash value in the light of these three questions

I—PURPOSE

Proponents assert a stipulated or fixed ratio will (a) legalize the long prevalent practice of percentage assessments, and (b) produce a higher degree of uniformity of assessments than is now being attained.

I would say that percentage assessments are an established fact of life, long sanctioned by the Legislature and by the people, and repeatedly given validity by the courts

In California's more progressive counties, equality of property assessments is demonstrably greater now than ever before and the quality of the assessment rolls is steadily improving.

II—ECONOMIC EFFECT

Proponents imply more than is openly stated An implied "floor" under assessments will, in reality, become a "ceiling".

Economic benefits to all are implied However, if, as it is claimed, that *state assessed* properties are presently carried on assessment rolls at a ratio to full cash value which is 60 or 70 percent greater than the ratio of locally assessed properties, then this proposal raises a very real threat of economic shock of no small magnitude, varying greatly in the numerous dissimilar jurisdictions.

That portion of net total taxable valuation which was state assessed on the 1964–65 assessment rolls ranged from a low of 7.35 percent in Santa Clara County to a high of 75 3 percent in Plumas County

For 20 counties this range was from 7 35 percent to 11.75 percent These counties' rolls carried approximately 73 percent of the state's valuation base.

For 20 counties, the range was from 12 04 percent to 21 62 percent These counties' rolls carried approximately 17 percent of the state's evaluation base.

For 18 counties, the range was from 22 25 percent to 75 30 percent. These counties' rolls carried approximately 9 percent of the state's valuation base.

Equally wide-ranging variations exist among the numerous jurisdictions within California's 58 counties

For example, in San Diego County, with 13 incorporated cities and the usual proliferation of school and other special districts, *state assessed* property comprises 6 percent of total taxable value in the City of Coronado and 52 percent in the City of Carlsbad

Any abrupt alteration in such truly significant segments of California's taxable valuation base would create reverberations of unforeseeable consequence throughout the entire economy.

III—ADMINISTRATIVE FEASIBILITY

Is it workable? More to the point in this case, is it more workable than that which it is proposed to replace?

First, just what would it replace?

Existing statutes provide each of the 58 counties with a practical measure of local administrative control at the county level

Intracounty equalization is achieved at the local, the county, level.

That a high degree of intercounty uniformity is being developed under existing statutes and practices would seem to be evidenced by the fact that since 1955 the State Board of Equalization has issued only 19 orders to counties to change assessment rolls

In 522 reviews of county assessment ratios, the State Board action affirms 96 4 percent acceptability.

To assert that a statutory ratio will make for greater uniformity of assessments within counties, or between counties, is to look away from one ever-present reality, best stated in this question

PERCENT OF WHAT?

Property values are never static. Among numerous properties there is no such thing as a uniform rate of change Yet the disturbed taxpayer, or the easily misled group of irate property owners usually direct their indignation at changes in assessed valuations.

Selling price is proof of desire for ownership It may also be evidence of poor judgment on the part of some one buyer or seller It may also be the result of a distress sale

Mandatory ratio may readily become a cudgel in the hands of any taxpayer who is alert to advantages created by such a law.

No "fixed percentage" statute will produce the high degree of uniformity which is the mark of good assessment administration

No entirely valid assessment is to be achieved by adoption of a fixed percentage of a sale price, nor a fixed percentage of an opinion

Qualitative judgments called for, preclude any such eventualities

The indicated solution will not be found in a frozen ratio. It must come in an unfreezing of assessed valuations—only attainable within a realistic short-term cycle of review of all properties—a short-term in which value trends may be recognized and effectively dealt with before they get out of hand.

Current value can be estimated, can be defended, can be understood by property owners But keeping a county's assessment roll up-to-date demands a continuing program of equalization, not the once-in-awhile bucking of the economic tide which inevitably prepares the seed bed of taxpayer revolt

This is fundamental.

This is simple, inescapable, reality

This is the core of every assessment administrator's challenge.

A frozen ratio is no solution A frozen ratio will *create,* not *solve,* problems

What every assessor needs most is (1) a comprehending Board of Supervisors, and (2) and understanding citizenry. Given these, a dedicated staff can maintain a sound and equitable valuation base reflecting current levels of value With that accomplishment—and some progressive counties are proving it is attainable—the taxpayers may more profitably direct their attention toward those decisions which annually find expression in the budget

CONCLUSION

If, as is claimed by some, state assessed property is currently assessed at 40 percent or more of full value, and

If, as the State Board of equalization reports, properties on some county local rolls are now assessed at 20 percent or less, and if a fixed ratio were deemed necessary,

Then to cushion the inevitable adverse economic shocks, a period of several years should be permitted in which to "merge" the various components of the state's valuation base under a mandatory ratio

In today's dynamic and extremely complex economy, the 58 dissimilar counties will need to be provided with a realistically broad tolerance range to achieve even a pretense of a workable mandatory ratio of assessment, for the ultimate goal is the ever-elusive concept: value

Very truly yours,

RICHARD J. DONOVAN

LETTER OF TRANSMITTAL

ASSEMBLY INTERIM COMMITTEE ON FISH AND GAME
January 8, 1965

THE HONORABLE JESSE M. UNRUH
Speaker of the Assembly
MEMBERS OF THE ASSEMBLY
Assembly Chamber

Gentlemen:

In accordance with House Resolution 500.8, your Interim Committee on Fish and Game herewith presents a report of findings and conclusions together with recommendations and substantiating material concerning those subjects and bills assigned and studied by this committee for the interim period 1963/1965.

Respectfully submitted,

PAULINE L. DAVIS, *Chairman*
Assembly Interim Committee
on Fish and Game

INTRODUCTION

All through the interim period, the question of how to place value and what kind of value should be placed on the state's natural resources came again and again before the committee at hearings, and through the mails

This, most certainly, is not a new problem, but our population pressures and increasing interest in outdoor recreation by millions of Americans have given the question of value a new acuteness The question is not entirely one of economics, of general or special funds, nor of who pays the bill for increased efforts to enhance or preserve our natural resources There are esthetic values, the preservation of natural beauty, that often are set aside and ignored in favor of dollar values The act of ignoring such other values, however, is in effect, a decision *against* natural resource preservation and enhancement

When the coastal forests were logged decades ago, and hundreds of streams were choked with timber debris, and later erosion further damaged the streams, the age-old beauty of the forest was disturbed, but the silver salmon, an important recreational and economic asset, was pushed to near extinction

The economic advantage accruing to the timber interests from these methods of harvesting a natural resource was done at the expense of another vast, important economic resource of the future, the silver salmon fisheries

When decisions were made to build an irrigation system including damming the San Joaquin River, the economics of agriculture dictated the necessity, but the San Joaquin River's king salmon runs suffered near extinction and the pollution of the rivers which followed served to further the damage to the fishlife of that drainage system When freeway construction, in the interest of economy of route, damages, destroys or forever alters a natural setting, any other value has been set aside or negated in the interest of economy

No one can question the value of increased irrigation water to the general economy or the need for good highway transportation, but a serious question can be raised as to the lack of planning to prevent the loss to the economy of an important commercial and sport fishery, and to the virtual disregard of other values

Economic values are an important incentive, an easy-to-define and understood basis for public decisionmaking There is no question that economic values to society must be considered in expenditure of public funds, and appropriate criteria for defining areas of state responsibility to the general public and to specific segments of the public are seriously needed

If the commercial activities of the salmon fisheries contribute jobs, taxes and benefits to the whole state, then, perhaps, the state's efforts to increase the number of salmon, protect spawning gravel, and conduct research might well be supported by the economy as a whole

This is an example of economic criteria for making decisions which are not available to policymakers in California because no effort has been made to discover or define the contribution made by the state's natural resources to the general economy.

There is also another seriously needed element in public policy formation. In consideration of economic decisions, how do you justify the inclusion in the deliberations and give weight to criteria which are subjective; i e, beauty, spiritual uplift, the outdoor experience, the access to solitude—these are additional criteria for decisionmaking that are difficult to assess and, hence, more often completely excluded from public policy formation.

It is the intention of this committee to open both the question of defining economic criteria for decisions in natural resource policy and the question of subjective criteria as a base for public decision. If our society is to progress, it must find a balance between these two. Subduing the natural environment is no longer man's greatest task or greatest challenge Other tasks and challenges are absorbing his collective attention now, and the natural endowments of our state might well slip away into oblivion if some criteria to prevent this is not defined and utilized by the policymakers of our state

FISCAL AFFAIRS
Department of Fish and Game

Prepared by
OFFICE OF LEGISLATIVE ANALYST
STATE OF CALIFORNIA

TABLE OF CONTENTS

NOVEMBER 1964

I. ORIGIN AND SCOPE OF THE STUDY

This study of the Department of Fish and Game was undertaken at the request of the Assembly Interim Committee on Fish and Game and the Assembly Rules Committee The committees asked for a review of the programs of the department from a fiscal point of view and identification of areas needing attention of the Legislature either in the form of budgetary revisions or new legislation

The requested study proposed a review of the objectives of the Department of Fish and Game and provided that on the basis of the objectives and fiscal data available, or to be gathered in the study, the activities of the department were to be arranged in a program format Analysis of the program format was to be the final step in the study to identify problem areas on which suggestions or recommendations to the committees would be made

As the study progressed, it became evident, as discussed in more detail in the next chapter, that the lack of clear departmental objectives did not permit developing at this time a format adequate for program analysis The emphasis of this study was therefore shifted to explore more fully the problems of defining departmental objectives and to give particular attention to the possibilities of resolving these problems In addition, the committees added a further request for a review of General Fund versus Fish and Game Preservation Fund financing of the Department of Fish and Game Finally, this report includes an enumeration of specific problem areas in which suggestions or recommendations are made for savings, increased efficiency or other improvements which were identified during the course of the study

In 1958 the Legislature ordered an extensive review of the Department of Fish and Game It contained an extensive review of the department's planning, administrative and organizational problems In contrast the present study of the Department of Fish and Game does not contain any analysis of fish, game and wildlife management as a specialized field of knowledge since it is beyond the scope of the study Our study does touch on many of the department's planning, administrative and organizational problems discussed in the 1958 report It is interesting to note that many of the department's problems of this type are essentially the same ones found in 1958

A large number of the resources management recommendations made in the 1958 report have been adopted by the department and several of the internal management recommendations have been adopted in part Other innovations or improvements in the report have also been adopted by the department in the past few years Unfortunately, some of its problems have grown rapidly also and new ones have occurred so that, overall, the department is still confronted with many serious problems Basic to many of these problems seems to be the continuing difficulties in clarifying the objectives of the department.

II. OBJECTIVES OF THE DEPARTMENT OF FISH AND GAME

Essential to the most efficient and rational operation of any governmental undertaking is a clear definition and understanding of the objectives an organization is to achieve Otherwise, it is difficult for any governmental program to be organized, financed, executed and finally evaluated. Much of the difficulty in the state's activities with respect to fish and game can be traced directly to the uncertainty or lack of agreement on objectives because these objectives have changed with time and with differing uses for the resources involved

The Fish and Game Code states that the fish and wildlife of the state belong to the people of the state. Currently the use of fish and game by the general public is as a food supply made available through commercial food channels In other respects the public ownership of fish and wildlife is largely for its aesthetic and moral value. Thus, there is a broad and vague public interest in all fish and wildlife and a very special interest among hunters and fishermen in certain species of fish and wildlife that they prefer to take either for its food or recreational value.

The hunters and fishermen are a minority of the citizens of California. For example, 641,038 hunting licenses and 1,587,773 sport fishing licenses were issued in 1962 calendar year and 1962–63 fiscal year, respectively, out of a total state population of 17,044,000 in July 1962. It is not unusual for the State of California to establish a special organization operating out of a special fund to finance work done by the state in behalf of a segement of its population These programs frequently lead to controversy, however, if the general public interest is not clearly defined and distinguished from the special interests

The Department of Fish and Game manages the fish and game resources of the state primarily in behalf of the hunters and fishermen who support its activities through their purchases of hunting and fishing licenses This naturally leads the department to give utmost consideration to the wishes of the hunters and fishermen because, among other reasons, it has an interest in keeping revenues coming into the department to pay the costs of departmental operations Yet the department also has a fundamental objective to preserve and protect fish and wildlife throughout the state whether or not of interest to fishermen and hunters who support the department For example, whenever the department proposes to discontinue the wildlife refuges it operates in order to maximize hunting, elements of the general public oppose these efforts in the belief that a public interest is served by the refuges

It is generally agreed that the department also has another prime objective to manage the fish and game resources of the state in order to "conserve" such resources Webster defines "conservation" as "a conserving, preserving, guarding, or protecting, a keeping in a safe or entire state, preservation" Conservation usually includes reasonable use of naturally occurring resources such as minerals and timber to meet the needs of mankind and where possible to provide for natural regrowth to develop a sustained yield or continuing supply. Conservation does not normally include the farming approach, i.e., raising a supply to meet a demand The farming approach is frequently used in "put and take" operations of fish and game management and creates

confusion when it is not clearly distinguished from the conservation approach such as natural habitat improvement

Lack of clarity in basic programs can also lead to confusion in derivative programs. Thus, proponents of water projects are disturbed by the fact that the department exerts strong opposition to many water resources development projects on the grounds that they may destroy a natural fishery, while it simultaneously spends large sums for put and take fishing and is actively engaged in perfecting the use of water project reservoirs for a warm water fishery. This indicates the existence of alternative solutions to the fishery problem created by water development projects, but there is no clear policy for applying these alternatives The department certainly should not be criticized for desiring to utilize all available resources and for exploring new techniques to increase resources, but it is difficult to tell when the department is doing this and when it is only reacting to diverse pressures

In the preparation of this report, an effort was made to identify that portion of the work of the Department of Fish and Game which has a broad, general public interest The following were identified: import quarantines on various undesirable animals, certain aspects of water pollution control, operation of sanctuaries and refuges where no hunting is allowed, and protection of certain rare species With the exception of the department's water pollution control work, which is discussed in Chapter VI, the activities of the department with a broad public interest are minimal in nature and involve virtually no money. For example, although the Department of Fish and Game has a quarantine on starlings it is doing no work on the control of starlings and their depredations

A number of activities which directly benefit fishing and hunting were found to be supported by the General Fund, or are generally expected to be financed from the General Fund Among these are the projects of the Wildlife Conservation Board and the payments for enhancement of fish and wildlife at water projects These are discussed in detail in Chapter V.

Most of the activities of the department fall between the above two categories because they serve both a general public interest, to a limited extent, and a special interest on the part of hunters and fishermen, to a major extent This is the area where the most money is spent, where state policy is very uncertain and where most of the difficulties in establishing departmental objectives and programs occur

A further grouping has arisen among fishermen and hunters This consists of clubs and the commercial hunting establishments with limited memberships and rather expensive dues Whereas in the put and take programs for catchable trout, the trout are placed in public waters that are easily accessible to the public, the clubs and commercial establishments raise much of their own catches under the close supervision and sometimes with the assistance of the department, or as in the case of duck clubs, are favorably located next to publicly owned and operated management areas These clubs and commercial establishments have tended to produce "easy" hunting Their activities serve neither the general public nor the typical licensee yet the department spends money to assist them.

An effort was made in this study to determine the existence of a comprehensive, generally recognized budgetary rationale or philosophy covering the expenditure of state funds for fish and wildlife activities based on the beneficiaries identified in the preceding paragraphs None was found It was found that as a practical matter the department's statutory responsibility to protect and preserve all fish and wildlife in the state has required the department on occasion to expend its special fund money for the public benefit At the same time it was found, as discussed in Chapter V, that the state spends a substantial sum of General Fund money for purposes which exceed the public interest and directly serve the interests of the fishermen and hunters

Since the public own the fish and game of the state, it would be reasonable to surmise that the people of the state have placed some financial burden on the hunters and fishermen of the state in return for the privilege of taking their fish and game This burden might reasonably be assumed to be the protection of all the fish and wildlife of the state in behalf of the general public As already noted this appears to be the practical effect of the present law However, the general attitude seems to be developing within the department and among conservationists that it is a General Fund responsibility to protect that part of the fish and wildlife of the state which hunters and fishermen do not wish to take Such a policy might mean that the hunters and fishermen have an obligation to the people of the state only for the protection and replenishment of the fish and game species they wish to take Either way, the concept of the relative responsibility which should be borne by the public or the hunters and fishermen to protect fish and wildlife remains a point of debate As a practical matter under present practices it seems to vary with the species involved

The State Constitution authorizes the Legislature to delegate legislative authority to the Fish and Game Commission and this has been done This may be one reason why the Fish and Game Code does not give adequate recognition to the need for clearly stated objectives and fiscal or operating policies derived from such objectives The interests of the general public versus those of the licensed fishermen and hunters are not adequately defined Broad programs are authorized without stating how they relate to other programs Directives to conserve what is natural and if possible restore it leave an almost unlimited area of discretion to the Department of Fish and Game The regulations and policies of the Fish and Game Commission narrow the area of discretion somewhat, but still leave a broad area for departmental discretion (See Fish and Game Code Sections 325, 355, 452, 1000, 1007, 1008, 1009, 1120, 5650 for examples)

In an attempt to solve the problems of uncertain departmental objectives, a major public information and conservation education program by the Department of Fish and Game was undertaken Its purpose was to win public acceptance for the department's views on management of fish and game and particularly the either-sex deer hunt Such an information and education program has been undertaken by the department, but it is doubtful that it has contributed much even though almost $600,000 was spent last year Sound programs and public acceptance of fish and game management would probably result more directly from discussion of basic departmental objectives and agreement on

them If agreement on objectives can be reached, the need for selling the department's programs will diminish because the basis for much of the controversy will have been removed

At this point, however, it is important to recognize that the status of public reaction and thinking may not permit agreement on certain objectives Even if this is the situation, it is desirable to establish the extent of this condition and to recognize that public information activities alone will not resolve it It is also important for purposes of this study to recognize that resolution of the department's objectives in a satisfactory manner is an important step leading to sound decisions on fiscal problems This study emphasizes developing processes to clarify objectives, policies and programs rather than to evaluate any particular decision Consistent, although not perhaps fully rational, programs can be constructed around almost any reasonable set of objectives. This is not possible, however, when these objectives are in conflict or unclear

III. DEPARTMENTAL PLANNING

A departmental planning effort was not undertaken until last fiscal year when, as part of the State Development Plan, the Department of Fish and Game began to develop a significant planning effort The concept of planning for the Department of Fish and Game is changing Present planning efforts are more sophisticated and reflect the need to integrate planning for the future of our fish and game resources not only to supply program data to the Department of Fish and Game but to integrate these data in a plan for the comprehensive utilization of all the state's natural resources

Last year our analysis of the fiscal year 1964–65 Budget Bill reviewed the impact of the State Development Plan on the Resources Agency It suggested that the departments of the Resources Agency should carry the primary responsibility for meeting their planning needs, rather than turning the work over to outside planners or consultants We are pleased to note that this is the direction of the planning effort in the Department of Fish and Game We are also pleased to note that the Administrator of the Resources Agency has established a Resources Agency Programing Committee, representing the constituent departments of the agency, with the responsibility to advise the administrator on the following

(a) Definition of long-range planning policies, objectives and programs of the agency,
(b) Advice, review, and encouragement of development and implementation of long-range planning programs by constituent units of the agency,
(c) Coordination of the long-range planning programs of the agency units,
(d) Coordination of the long-range planning interests of the agency with the planning efforts of outside organizations

The planning efforts of the Department of Fish and Game are therefore included in provisions to integrate them with related planning involving forestry, water resources, recreation, soil conservation, etc, going on in state government

Federal grant funds available to the State Office of Planning for expenditure on the State Development Plan in the amount of $110,000 have been allocated to the Department of Fish and Game for the planning work A small departmental coordinating staff has been organized which reports to the deputy director This staff provides planning coordination and instructions to the regional managers and the staff branches in Sacramento who actually are doing the planning work. The planning effort consists of three stages The first stage is an inventory of all fish and game resources and habitat, the second stage is a projection of land-use changes and patterns of development to show how the presently-existing resources will be changed in the future, and the third stage is the determination of the needs for fish and game resources in the next 20 years Finally, conclusions will be made on the best methods to supply the estimated needs The work now underway is scheduled to be completed in October 1965

Our review of the department's planning effort indicates that it is making progress The results that may be available from this 18 months' project will surely be limited and leave much to be desired because this is a first effort Just how much the department can reasonably accomplish is not known, but it appears to be making a genuine effort for which it should be commended

It has already been pointed out that the planning function can provide invaluable information to resolve some of the conflicts in basic objectives of the department A look ahead will provide significant guidance on the extent to which the department can be a conservation agency or will be forced to adopt put and take farming approaches Coordination with resources planning work of other departments may develop compromises to set aside areas where conservation efforts will be paramount while designating other areas where farming approaches will be employed For example, it is already becoming apparent from the long-range planning work that the Department of Fish and Game is doing with the Department of Water Resources in the north coastal area that water resources development on the lower Klamath River will be expensive and that the construction of a large dam on the lower river may destroy the anadromous fisheries of the river As the Department of Fish and Game develops information on the future demands for this type of fishing and the future resources available, it may be possible to make an informed decision whether the river should be preserved in a wild, undeveloped state

A promising planning job has been done by the Department of Fish and Game, under financing provided by the Department of Water Resources, to solve the most important problems of fish and wildlife protection associated with the Delta Water Project In this case the necessary work was carefully determined, attention of the personnel was concentrated on important features and extraneous influences eliminated The results have been startling and appear to demonstrate how water can be transferred across the delta by a peripheral canal without significant detriment to fish and wildlife and with major enhancement The findings of the department are reported in the third progress report with simple language and logical discussion A highly controversial problem has probably been greatly eased by diligent planning.

Other difficult decisions confronting the department should also receive assistance in their solution by the right type of long and short range planning Thus planning will provide some leads to the type of research that the department should be concentrating on by showing the relative magnitude and the nature of some of its future problems. Planning of the right type should also assist the department in distributing its available funds and manpower more precisely among the various approaches to species management such as habitat improvement, hatchery operations, artificial environments, etc In short, planning should provide a powerful basis for formulation of more efficient programs within the department

IV. PROGRAM FORMULATION, BUDGETING, AND COST ACCOUNTING

A program budget presents the proposed expenditures for a department on the basis of money requested to carry out a given program or activity. The purposes, timing, expected results and reasons for doing the work are spelled out in the budget justification material Essentially, program budgeting involves requesting funds on the basis of what is to be accomplished with the money rather than costing out the positions and operating expenses of a department Emphasis is placed on both work to be done and its cost rather than on cost alone

Most state departments have prepared their budgets by computing the costs of the positions needed and the operating costs associated with these positions The accounting systems of these departments have been based on a similar approach, one that determines the expenditures for salaries and wages and associated operating expenses in an organization This is the traditional accounting system used in government at all levels, but it differs markedly from the system used by business Business firms prefer a cost accounting system that reports the cost of producing a given product or each of a variety of products manufactured A cost accounting system has seldom been used in government except for capital outlay projects, perhaps because its application requires a definition of the work to be done before costs can be charged to the individual tasks or projects

Program budgeting and cost accounting are complementary and can be fitted together for governmental use to make a complete program control system to improve the internal management of a department as well as to serve the budgetary and accounting requirements of government The common denominator is the definition of a department's programs on a basis adequate for both budgeting and accounting purposes, so that the accounting for expenditures can be made against the same work used in budgeting and requesting funds In addition, for certain activities a work order system can be added which controls the timing and rate of expenditure, so that no employee can charge expenditures to a given job until a work order for that job is issued The work order should contain both a description of the work and authorization to charge a given amount of money up to the amount stated in the budget. A work order can be kept open from one fiscal year to another so that expenditures for a long-range project can be accumulated on it, or it can be terminated to assure that no expenditures for the work it covers are made at any time the work is not desired.

The Assembly Ways and Means Committee, the Resources Agency Administratrator, the Department of Finance, and the Legislative Analyst have been urging the adoption of program budgeting in the Resources Agency. Program budgeting and a cost accounting system are well suited for the work of a department such as the Department of Fish and Game. Much of the work of the Department of Fish and Game is represented by individual projects which can be clearly defined and which, when properly organized into a rational budgetary arrangement, constitute an annual plan to accomplish given objectives.

Particular attention is given to program budgeting and cost accounting in this report because it represents an extremely important step which the Department of Fish and Game is now taking and which is probably the greatest improvement in its management that can be made at this time. A review of the actions now underway is needed to clarify the present status of events and develop needed legislative action.

Last year the Department of Fish and Game prepared its first program budget for "information purposes." It was a revision of the official line item or organization budget recast into an approximation of a program budget format. It was recognized to be a first step and is to be followed this year with another informational program budget prepared on a revised and improved basis. The official budget of the department will still be the line item budget.

The program budget of the Department of Fish and Game was deficient in that it grouped expenditures into such large programs or activities that it communicated less information than the old line item budget. For example, the federal government has required that Pittman-Robertson and Dingell-Johnson grant moneys be detailed on a project by project basis. These projects have been regularly included in the line item budget of the department which to this extent has approximated a limited program budget. When the department prepared its program budget last year it consolidated these projects under vague titles such as "fact gathering" and "evaluation." This consolidation actually reduced the overall ability of the program budget to provide information although some new information was added by other programs that were identified. The department should be moving in the opposite direction so that the various projects it finances with Fish and Game Preservation Fund money are detailed in a manner similar to that now done in the line item budget for federal expenditures.

Although the federal projects are detailed in the Governor's Budget at this time, no comparable data are available for related work done by the department using state rather than federal funds. Obviously a very close program relationship exists, but it cannot be evaluated through the present budgetary processes. A comparison of the federal and state programs gives a clear illustration of the value of program budgeting when compared to line item budgeting.

The program budget not only can communicate much significant information for budgetary purposes to the Legislature and other interested groups but it also can facilitate the preparation of better departmental programs and budgets as well as contributing to sounder decisions by departmental management. It is extremely difficult to evaluate the results of many departmental activities under the present budget because it is not clear what is to be done or what is hoped to be accom-

plished Without this information it is almost impossible for anyone in a management position to judge accurately whether the expenditure of funds was sound and wisely administered

It is clear that the department does have problems in its program execution For example, a review of the Final Segment Report, dated August 21, 1964, for Dingell-Johnson program expenditures shows innumerable examples of work scheduled which could not be done because of higher priorities for other work, shortage of manpower, inadequate planning and other reasons A highly decentralized organization such as the Department of Fish and Game has a special need for strong program control and budgeting because of the autonomy necessary if each of the five regional offices is to react to its diverse local problems However, without strong program direction from the Sacramento office, the regions can become too autonomous and develop independent and duplicating activities in fish and game management studies, research, or fact gathering without sufficient regard to the work of other regions and the knowledge of the central office specialists

Legislation was enacted in 1959 to require the Department of Fish and Game to establish a cost accounting system This system has been established and quarterly cost accumulation reports on departmental expenditures are furnished to the Legislature The present system appears to represent more motion than substance since the accounts are excessively broad categories of work and there is little evidence that it is being used by management of the department for programing or expenditure control purposes since the cost accounts are not integrated into a work order system nor are they set up on the basis of projects or investigations In addition, the present practice of spreading costs for "other activities" distorts the expenditure figures by adding to each expenditure account some portion of "other activities" expenditures which do not relate to the account to which it is added It has also been noted that a new account for "planning" does not include expenditures by field personnel. These personnel are currently devoting major portions of their time to the planning inventory but are charging their time to other accounts and thereby undermining the cost accounting system

The Department of Fish and Game presently has two separate accounting systems, the traditional line item accounting system for budgetary control and the cost accounting system Under present law it is required to have both, but it does not need both and should not have both An unnecessary expenditure of Fish and Game Preservation Fund money is required to keep both systems going No department of state government has yet established either a cost accounting system or a program budget which has not involved setting up at least a partially duplicating accounting system This statewide practice is becoming increasingly expensive The Department of Fish and Game presents an excellent opportunity to integrate its cost accounting system and its program budgeting to provide a single system that meets all accounting and control requirements (including personnel transactions and other needs) without duplicate accounting systems

It is recommended that Sections 13200–13204 of the Fish and Game Code be revised to require that the cost accounting system of the depart-

ment be perfected and be made the official basis for control of all aspects of internal management and budgeting

In summarizing the results of this study regarding the broad aspects of fiscal management of the Department of Fish and Game, it may be stated that:

(1) The department and the Legislature should act to clarify as much as possible the uncertain and conflicting objectives of the department

(2) The department should proceed with its planning efforts and should develop planning approaches that will assist in increasing the precision of its programming by facilitating the evaluation of alternative programs with a view to long-range considerations.

(3) An integrated program budget and cost accounting system should be developed so that the internal management of the department's programs can benefit from more specific and direct channeling of the department's funds and manpower into projects and investigations which are clearly defined and which demonstrate the greatest promise for both long- and short-range results.

Disproportionate emphasis on any individual phase of management such as planning, program budgeting, cost accounting or other management improvements will not by itself produce the most effective results for the department All of these management tools should be developed and applied simultaneously and in a carefully conceived pattern to produce major improvements In view of the great variety of field activities of the department's personnel and the almost unlimited choices before these personnel in making program decisions, it is especially important that program formulation be placed on a basis which emphasizes clear definition of the program, the nature of the work to be done and the expected results so that adequate evaluation of the proposal and the results can be made

V. SOURCES OF FUNDS FOR DEPARTMENT PROGRAMS

The request for this study of the Department of Fish and Game specifically included a review of sources of funds Historically, the main source of funds for operating the department has been the Fish and Game Preservation Fund According to the Constitution as well as the Fish and Game Code, all money collected under any law of the state relating to the protection, conservation, propagation or preservation of fish and game and all fines imposed by any court for the violation of such laws must be used and expended exclusively for the protection, conservation, propagation and preservation of fish and game, and for administering and enforcing laws relating to fish and game.

By far the greatest source of revenue to the fund has been the sale of hunting and fishing licenses and stamps Over the years the department has operated within its annual revenues or utilized the revenues along with some of the accumulated surplus in the Fish and Game Preservation Fund During the early part of the 1950's, the department's operations began to eat into the surplus of the fund and, in 1957, the Legislature increased certain hunting and fishing license fees.

Since that time, the surplus in the fund has increased until today the amount of the surplus is larger than it has been at any time during the past 15 years

FISH AND GAME PRESERVATION FUND
ACCUMULATED SURPLUS, END OF EACH FISCAL YEAR
MARINE RESEARCH COMMITTEE FUNDS EXCLUDED

Fiscal Year	*Amount*	*Fiscal Year*	*Amount*
1950–51	$5,940,649	1958–59	$3,373,676
1951–52	5,667,177	1959–60	4,527,340
1952–53	5,421,193	1960–61	4,987,615
1953–54	5,285,078	1961–62	5,149,998
1954–55	5,129,036	1962–63	5,418,437
1955–56	4,662,079	1963–64	6,481,300
1956–57	3,275,472	1964–65*	6,200,958
1957–58	2,615,891		

* Estimated

While the accumulated surplus in the fund is at a relatively high level in comparison to prior years, the ratio of the surplus to the department's annual budget has declined In fiscal year 1950–51, the budget for the department was roughly comparable to the amount of the accumulated surplus in the fund The 1964–65 surplus is about the same but the budget is roughly twice as great as the surplus The present fund revenues cover all expenditures and leave some increase in surplus They are therefore considered to be adequate and there does not appear to be any necessity for an increase in license fees to support the department's programs at their current level No other higher level has been given major consideration by the department

In addition to support from the Fish and Game Fund, the department also receives financial assistance from the federal government through the Pittman-Robertson and the Dingell-Johnson Acts. The Pittman-Robertson program is financed from a federal exise tax on sporting arms and ammunition and Dingell-Johnson from a tax on sport fishing tackle and equipment The federal government pays approximately 75 percent of the cost of approved projects undertaken with this money while the state pays the balance of about 25 percent

According to the federal laws, the funds for these two programs may be spent on wildlife restoration projects, including acquistion and development, and research into problems of wildlife and fisheries management The department has elected to utilize its federal game funds for the operation of waterfowl management areas and some waterfowl and upland game investigation projects The fisheries' money has been allocated to projects and research on inland fisheries and marine sport fishing in the proportion which the number of license buyers for ocean sport fishing bears to the number of licenses to fish on inland waters The present apportionment is approximately 65 percent for inland fisheries and 35 percent for marine fisheries projects

Although most of the funds for the operation of the department come from federal or state moneys derived from hunters and fishermen, there are several areas in which the General Fund pays for fish and game progams Included among these is the Wildlife Conservation Board which was established in 1947 The purpose of the board, according to the code is " .. to acquire and restore to the highest possible level, and maintain in a state of high productivity, those areas that can be most

successfully used to sustain wildlife and which will provide adequate and suitable recreation " As provided in Section 19632 of the Business and Professions Code, support of the Wildlife Conservation Board programs comes from the annual transfer of $750,000 of horserace license revenues to the Wildlife Restoration Fund This revenue would otherwise go to the General Fund

In the early years of the board's operations, funds were allocated mostly for such large capital outlay projects as hatcheries and waterfowl management areas However, the board did not provide funds for the maintenance and operation of these newly acquired facilities The responsibility for the upkeep of the facilities fell upon the Department of Fish and Game and became a drain on department revenues Since that time the board has shifted its emphasis to the development of projects for which there is assurance that maintenance and operation will be provided by a local agency

Proposition 1, the recreation bond issue, was approved by the voters on November 3, 1964 This proposition includes $5,000,000 which is specifically earmarked for the projects of the Wildlife Conservation Board In the past the projects being constructed by the Wildlife Conservation Board were not subject to budgetary approval Proposition 1 requires that projects financed by the $5,000,000 shall be approved by the Resources Agency Administrator after being placed in a priority arrangement with other related projects financed under Proposition 1 It also makes the money available only after appropriation by the Legislature The availability of this large sum of bond money will require a careful reevaluation of the program of the Wildlife Conservation Board in relation to the total fish and game program of the state and the current program orientation of the board toward projects containing large elements of local interest and responsibility

As of July 1964, the Wildlife Conservation Board had allocated over $19 million for projects as follows

Fish hatchery and stocking projects	$4,434,499
Fish habitat development and improvement	2,593,933
Angling access (includes boat launching ramps and piers)	5,278,731
Game farm projects	140,805
Game habitat development and improvement	6,024,135
Hunting access	378,154
Miscellaneous	238,297
Total allocated to specific projects	$19,074,684

Several activities are carried on by General Fund supported departments which are beneficial to the wildlife and fisheries resources of the State For example, grants are made by the Soil Conservation Commission for wildlife habitat improvement by soil conservation districts, in accordance with the policy of the Soil Conservation Commission A few soil conservation districts have carried out these projects under the guidance of the Department of Fish and Game

The sole purpose of the Tule Elk Reserve in Kern County is to preserve the tule elk species as a matter of public interest The reserve is financed from the General Fund and operated by the Division of Beaches and Parks at an annual cost of $20,000 All other elk herds are under the control of the Department of Fish and Game except a

herd maintained as an incidence to operation of the Prairie Creek Redwoods State Park

As a general practice, departments that utilize inmate labor from conservation camps reimburse the Department of Conservation, Division of Forestry, for the costs Generally, the Department of Fish and Game follows this practice and so does the Wildlife Conservation Board when it finances the work However, service provided the Department of Fish and Game by inmate labor from the Mono-Inyo Conservation Camp located near Bishop has not been reimbursed In the past fiscal year, the Department of Fish and Game received approximately $32,000 in services from this conservation camp for such projects as clearing and cleaning rearing pools at hatcheries, construction of rock walls, and stream clearance projects Inmate labor from the Mono-Inyo Camp is also provided without charge to Bodie State Historic Park of the Division of Beaches and Parks, which is a General Fund supported project

A major source of financial support beneficial to fish and game interests results from the expenditure under the Burns-Porter Act of water project funds for the enhancement of fish and wildlife at state and local water projects It is generally expected that all of this expenditure will eventually become a General Fund charge although not all of the fiscal transactions involved have been spelled out by legislation or administrative policy

The Davis-Grunsky Act authorizes grants for local water projects to cover the costs of a local project allocated to fish and wildlife enhancement and other purposes A total of $130,000,000 is authorized under the Burns-Porter Act for loans and grants Of this amount, many millions of dollars will eventually be expended primarily to benefit fishermen under terms of present law and assuming the continuation of the grants during the next ten or more years These grants will primarily pay for reservoirs made usable for fishing, access to the reservoirs and perhaps some downstream fisheries enhancement

Large sums of money will be allocated to fish and wildlife enhancement at the various features of the State Water Project now being constructed by the Department of Water Resources The Department of Water Resources has estimated that perhaps as much as $200,000,000 of the eventual construction costs of the State Water Project will be allocated to recreation and enchancement of fish and wildlife For example, the capital costs allocated to fish and wildlife enhancement in the construction of the peripheral canal in the delta are presently estimated by the Interagency Delta Committee to be $46,000,000 to be shared equally by the state and federal governments Although there are now available only rough estimates of the costs which will eventually be incurred and allocated to fish and wildlife enhancement, it is possible that under present policies more than $100 000,000 in benefits may be received by hunters and fishermen from the State Water Project

The present level of expenditure from the Fish and Game Preservation Fund to support the Department of Fish and Game is approximately $12,000,000 annually, and this may be expected to increase moderately over the next few years General Fund money or money eventually expected to come from the General Fund and expended by the Wildlife Conservation Board and the Department of Water Resources, plus small expenditures made by other departments which are

beneficial to fish and wildlife, may approximate the magnitude of Fish and Game Preservation Fund expenditures or even exceed them There is presently no basis for accurate, comparison but available data suggest that only about half of the total state expenditures beneficial to fish and game will be contributed by the direct beneficiaries The General Fund will eventually pay the rest.

It has already been noted in Chapter II that there is no budgetary philosophy differentiating costs for activities of the Department of Fish and Game which benefit the general public from those which benefit the licensed hunters and fishermen Departmental costs benefiting the general public, to the minor extent they are incurred, are paid from the Fish and Game Preservation Fund

The policy is stated in Sections 11912 and 11913 of the Water Code that costs of state water projects allocated to enhancement of fish and game are nonreimbursable to the project's water contractors, that this enhancement benefits the general public and shall therefore be paid from the General Fund However, the fish and game resources enhanced by the project are not available to the general public, but only to those portions of the general public who purchase licenses and thereby contribute revenues to the Fish and Game Preservation Fund. In the case of recreation expenditures at state water projects, these expenditures supplement the programs of the Division of Beaches and Parks which is a General Fund program maintained in behalf of the general public, and are therefore consistent with the financing pattern established.

It is recommended that the Legislature explore and develop new and more consistent financing patterns for the fish and game programs of the state A general objective consistent with the present policies of self-support for the Department of Fish and Game should be for self-support of all fish and game programs and benefits The major area needing financing lies in the extensive costs of water projects allocated to the enhancement of fish and wildlife (primarily fisheries benefits) which are now anticipated eventually to be General Fund costs. Guidelines for determining the extent to which such water project costs should be allocated for payment by fishing licenses should be established by the Fish and Game Commission and the Legislature.

The material contained in Chapters II and V represents a search for the basic elements needed to formulate a fiscal rationale for the Department of Fish and Game As such, it is only a beginning that will require much additional work and it should be viewed in that light rather than as firm conclusions

VI. SPECIFIC RECOMMENDATIONS

1. Eliminate Some Hearings for Antlerless Deer Hunts

In 1964, the department recommended 37 antlerless hunts. The Fish and Game Commission set 20 hearings for 38 hunts in 20 counties. There was no opposition at the hearings in 12 of the 20 counties

The cost of the hearings is not great, involving mostly travel, stenographic, and duplicating costs but there is no usefulness in hearings where the program is well known and no controversy exists.

It is recommended that the Fish and Game Code be amended so that whenever there was no opposition at hearings during the previous year

and no written opposition is received by the commission within a certain period of time after published notice, no hearing be held.

2. *Remove Restrictions on Surplus in Fish and Game Preservation Fund*

Section 13005 of the Fish and Game Code requires that 50 percent of all revenue attributable to the increase in license fees established by the Legislature in the 1957 Regular Session shall not be available for expenditure unless and until specifically appropriated by the Legislature. Currently, 50 percent of the increase amounts to about $1.7 million As a practical matter, this restriction has no effect Language added each year in the department's support appropriation has the effect of removing the restriction. The unrestricted surplus of $4 7 million in the Fish and Game Preservation Fund is sufficiently large also to negate the restriction Meanwhile, the department continues to determine monthly the amount of 50 percent of these increased revenues The section only requires additional accounting work and keeps ineffective language in the Fish and Game Code It should be deleted from the code

3. *Transfer Certain Water Pollution Control Enforcement Work*

NOTE The Committee on Fish and Game, because of the far-reaching implications of this recommendation, withheld its own recommendation until further study and research can be accomplished

The department spends approximately $225,000 a year on activities relating to investigation, analysis and evaluation of water quality, and the enforcement of water pollution laws and regulations These activities include field investigations of existing or potential pollution problems, laboratory investigations on potential pollutants to determine effects on fish and wildlife, special investigations at the request of regional water pollution control boards, the review of pollution control board requirements and participation in court cases

It is extremely difficult with available information to determine whether there is any significant amount of duplication between the work of other state agencies with responsibilities in water pollution control and the department There are presently four agencies in water pollution control work and substantial amounts of unproductive effort result merely because of the major efforts needed to coordinate all the various agencies involved One means of eliminating any expenditures that are not absolutely essential to water pollution control is to concentrate the work in those agencies that have the most important responsibilities for each phase of the work The Department of Fish and Game has a major responsibility for research on fisheries problems involving water quality and for recommending provisions of waste discharge requirements where fishlife is affected This important responsibility should remain with the Department of Fish and Game.

Four agencies of the state have the responsibility for enforcement of waste discharge requirements The Department of Fish and Game is one of these agencies but the primary responsibility lies with the individual discharger and the regional water pollution control boards In all state agencies except the Department of Fish and Game, the enforcement activities are supported from the General Fund Maintaining good quality water throughout the state is in the interest of the general public and is properly a General Fund responsibility after waste discharge

requirements are set Unless the fishing and hunting interests of the state wish to use their money for financing the enforcement of waste discharge requirements which are of general public interest, this enforcement activity should be eliminated and left to the other state agencies concerned, principally the regional water pollution control boards In view of the scattered nature of this work as performed by the Department of Fish and Game, it is not possible to determine the precise impact of this recommendation, however, it is likely that only a few man-years of work are at issue Since the recommendation is not to transfer the work but for the Department of Fish and Game to withdraw from work which is essentially already being done by other agencies, no significant additional funding from the General Fund is expected to be needed To the extent that personnel of the Department of Fish and Game travel in the headwater areas of the state and observe pollution conditions, an exception should be made, and these personnel should gather a sample of the polluted water and report the condition to the regional boards In other areas of the state the Department of Fish and Game should withdraw from enforcement activities

4. Application for Permits Before the State Water Rights Board

The Department of Fish and Game reviews applications of proposed water projects to determine the effect the construction will have on fish and wildlife resources of the state The department spends annually approximately $375,000 in this activity, a major portion of which is related to applications filed with the State Water Rights Board The workload of the department could be more efficiently handled and perhaps eventually reduced if the agency requesting a project which will divert or affect a stream would include in its application to the State Water Rights Board data on preservation of fish and wildlife Eventually provisions to meet fish and wildlife needs must be formulated as the project progresses to hearing, and experience indicates that provision for fish and wildlife will be included under present laws where it is important An amendment to the Water Code to require that data on fish and wildlife be included in the application for a permit to appropriate water would provide a more orderly and efficient means of doing what is now done in an inefficient and haphazard manner.

5. Wildlife Protection

The wildlife protection activities of the department account for the largest expenditure of funds of all the activities in the department The current rate is about 31 percent of the department's budget, or approximately $3,750,000 The work consists of patroling with the intent to prevent violations, issuing warnings and citations, checking licenses of hunters and fishermen, investigating and apprehending violators of fish and game laws, and assistance in presenting court cases In addition, the warden force is responsible for hunter safety training, including the training of instructors Originally the wardens made up the entire Department of Fish and Game However, as time went on it became apparent that the preservation of habitat and the management of wildlife resources was as important as the enforcement of the laws regulating the taking of fish and game

The size of the warden force has remained fairly constant in recent years However, there has been no detailed evaluation as to whether the wardens are being utilized most effectively in view of the knowledge that current wildlife management possesses In 1954, the Department of Fish and Game requested the Department of Finance to survey the Wildlife Protection Branch " to establish a basis upon which to judge the effectiveness, and present and future staffing requirements of this important function " The Department of Finance issued a report which was" not intended as a final answer since study of the problem has not been exhausted " However, the report did recommend that fish and game wardens be budgeted on the basis of one such position for each 7,500 angling and hunting licenses sold According to the report, "admittedly this ratio of wardens to licenses is an arbitrary one " In other words, the scope of the study by the Department of Finance was too limited to cope with the problem of developing criteria for the staffing of the warden force

In 1958, the Booz, Allen and Hamilton report on the Department of Fish and Game did not evaluate the work of the wardens but recommended that the "generalist" concept be adopted in the department This approach would have integrated the field personnel and activities of the Wildlife Protection Branch with inland fisheries and game management field work The recommendations would have required a departmental reorganization of major proportions and therefore was not followed

It is our understanding that the department has begun an evaluation of the Wildlife Protection Branch with a goal of establishing criteria for the number and location of wardens The study is approriate and should be helpful in future evaluation of this activity

Included in the wildlife protection activities is the enforcement of marine fishing regulations along the coast The department has several boats for this purpose The largest is a relatively new, steel-hulled patrol boat, the *Albacore* The boat is stationed at Sausalito and is responsible for patroling the coast northward from San Francisco About 90 feet in length the boat was built in the late 1950's for the department at a cost of approximately $280,000 The crew consists of a warden captain, a boarding officer warden, an engineer and three deckhands Fully staffed, the annual direct operating costs of the vessel are about $70,000, according to the department Amortizing the cost of the vessel and including overhead costs, the annual cost of operating the boat is roughly $90,000

The *Albacore* is proving a costly operation for the effectiveness it has displayed According to the daily log of the vessel, the crew during the period from July 1, 1963, through June 7, 1964, a period three weeks short of one year, carried out enforcement activities as follows

Angling licenses checked	50
Commercial licenses checked	91
Registrations checked	45
Citations issued	4

Of the four citations issued, three were for commercial fishing without a license, and one was for the commercial taking of crab within the closed area of Humboldt Bay We do not suggest that workload effectiveness be measured exclusively by citations, but an expensive enforcement

vessel must do more than make an appearance and give token effort to enforcement if it is to justify its cost.

The department believes the north coast area needs some marine patrol It is recommended that the department investigate alternatives for patrolling the fishing activity in that area and alternate uses or disposal of the *Albacore* in favor of a smaller, less expensive craft or even in favor of leasing a boat as needed

VII. SUMMARY OF RECOMMENDATIONS

1 The department and the Legislature should act to clarify as much as possible the uncertain and conflicting objectives of the department.

2. The department should proceed with its planning efforts and should develop planning approaches that will assist in increasing the precision of its programing by facilitating the evaluation of alternative programs with a view to long-range considerations.

3 An integrated program budget and cost accounting system should be developed so that the internal management of the department's programs can benefit from more specific and direct channeling of the department's funds and manpower into projects and investigations which are clearly defined and which demonstrate the greatest promise for both long and short range results

4 The Legislature should explore and develop new and more consistent financing patterns for the fish and game programs of the state A general objective consistent with the present policies of self-support for the department should be for self-support of all fish and game programs and benefits. The major area needing financing lies in the extensive costs of the water projects allocated to the enhancement of fish and wildlife, primarily fisheries benefits, which are now anticipated eventually to be General Fund cost

5. The Fish and Game Code should be amended so that whenever there was no opposition at antlerless deer hunt hearings during the previous year and no written opposition is received by the commission within a certain period of time after public notice, no hearing need be held

6 Section 13005 of the Fish and Game Code, which requires that 50 percent of all revenue attributable to the increase in license fees established by the Legislature in the 1957 Regular Session shall not be available for expenditure unless and until specifically appropriated by the Legislature, should be deleted from the code

7. The department should withdraw from certain enforcement activities concerning water pollution control requirements The primary responsibility for enforcement lies with the individual discharger and the regional water pollution control boards (See page 25 for committee reservation of this report.)

8. The department reviews applications of proposed water projects to determine the effect the construction will have on fish and wildlife resources of the state. The workload of the department could be more efficiently handled and perhaps eventually reduced if the agency requesting the project which will divert or affect a stream would include

in its application to the State Water Rights Board data on preservation of fish and wildlife.

9 The department should investigate alternatives for the marine patrol of fishing activity in the north coast area and alternate uses or disposal of the patrol boat *Albacore* in favor of a smaller, less expensive craft.

By Assemblywoman Davis

HOUSE RESOLUTION NO. 407

Relating to a Study of Salmon

Resolved by the Assembly of the State of California, That the Assembly Rules Committee is directed to assign to the appropriate interim committee the study of salmon fisheries of the Pacific Coast, including the effect of the Alaskan, Canadian and northwestern states activities on the California salmon resources, and to direct the interim committee to report to the Legislature not later than the fifth legislative day of the 1965 Regular Session of the Legislature

FINDINGS

1 That the salmonoid and anadomous fish of California are vital natural assets of great economic value which have been ill used by man's manipulation and depredation of the habitat

2 That a great deal of effort has been made to end the long decline of the salmon and these efforts have apparently been successful for the silver salmon of the coastal area and much less so for the king salmon of the Sacramento River

3 That much effort and several facilities are yet needed to provide the maximum effort in rehabilitating the once-great salmon resource of the several dramage systems of California

4 That the salmon, because it is a marine resource fished by commercial and sport fisheries of several states, is, in part, an interstate concern and, as such, the federal government should participate in efforts to preserve and enhance this resource

RECOMMENDATIONS

1 That the California Legislature memorialize the Congress of the United States concerning the favorable consideration of legislation pending before that body relating to the conservation, enhancement, and development of the nation's anadromous fish in participation with the several states

2 That the Department of Fish and Game prepare priority lists of those projects, including their costs, which could be undertaken under federal-state cooperative program to improve the anadromous fish resource

3 That the subject of salmonoid and anadromous fish be studied further, within the fabric of the broader study discussed in the introduction to this report

TEXT

It is estimated that the salmon and anadromous fish resource produces an economic return in excess of 20 million dollars annually through the recreational and commercial fisheries

In the last fiscal year, the Department of Fish and Game spent $1,400,000 in license fee revenues, and the Wildlife Conservation Board provided $784,600 from its General Fund allocation, for programs or facilities for the preservation of salmon and other anadromous fish (A total of $241,058 of the Wildlife Conservation Board's funds has been allocated for as yet uncompleted projects.)

Federal legislation which would provide California with approximately $11,000,000 over a five-year period has been pending before Congress. Assemblywoman Pauline L. Davis, chairman of the committee, visited Washington to urge passage of the bill which would provide the funds to carry out some seriously needed preservation and enhancement programs to improve the salmon resource in California.

The federal funds would be in the form of matching funds for projects undertaken by the state. Some of the urgent actions which are needed in California were pointed out by a representative of the State Department of Fish and Game in testimony before the U.S. Congress Subcommittee on Fisheries and Wildlife Conservation of the Committee on Merchant Marine and Fisheries. These were:

"A hatchery should be constructed at Keswick on the Sacramento River to take care of the winter king salmon run. The Nimbus Hatchery on the American River should be expanded. To bolster the silver salmon and steelhead populations, an additional silver salmon and steelhead hatchery should be built. Futhermore, a central hatchery on the coast could serve as a base hatchery for runs of many streams.

"There are several major water diversions where fish screens are badly needed, since large percentages of salmon fry are presently being lost on these locations. These are as follows: Woodbridge on the Mokelumne River, Anderson-Cottonwood on the Sacramento River, Glenn-Colusa on the Sacramento River, Hallwood-Cordua on the Yuba River, West Stanislaus on the San Joaquin River, Banta Carbona on the San Joaquin River, and the P.G.&E. Van Arsdale on the Main Eel River.

"Fish passage facilities are needed at Asa Bean Creek on the Eel River, Upper Deer Creek, Middle Deer Creek, and Clear Creek on the Sacramento River, Los Padres Dam on the Carmel River, and the Big Sur River.

"Spawning channels, incubation channels, spawning control weirs and holding ponds are needed in the Klamath River, Big River, and lower Battle Creek.

"Stream clearance of coastal streams, gravel loosening in the Klamath River, vegetation removal from the Tuolumne, Stanislaus, Feather and Merced Rivers, gravel restoration in the Stanislaus, Cosumnes, Tuolumne, and Mokelumne Rivers, streambed realignment in the Merced, Cosumnes, Feather, and Yuba Rivers, and correction of erosion and siltation are also necessary for restoration of salmon.

"Controlled waterflows for salmon would necessitate water storage. Engineering investigations and biological studies for water storage facilities in Cottonwood Creek, Cow Creek, Stillwater Creek, Thomes Creek, and Paper Mill Creek need to be inaugurated.

"A flow-control structure at Old River in the delta is necessary to allow adult migration of salmon into the San Joaquin River system by preventing existing flow reversal caused to a major degree by pumping at Tracy by the U.S. Bureau of Reclamation for the Central Valley Project.

"Completion of this work would bring the salmon environment into a favorable position to take advantage of mitigation or enhancement features connected with future water developments in the entire San Joaquin River drainage."

By Assemblywoman Davis

HOUSE RESOLUTION NO. 494

Relating to a Study of an Interstate Deer Herd Commission

Resolved by the Assembly of the State of California, That the Assembly Rules Committee is directed to assign to an appropriate interim committee the study of the desirability of creating an elective commission to regulate the migrating deer herds which migrate between California and Oregon and California and Nevada, with the interim committee to report to the Assembly not later than the fifth day of the 1965 Legislature

By Assemblywoman Davis

ASSEMBLY JOINT RESOLUTION NO. 20

Relating to Range Improvement

Requests Congress to appropriate adequate funds for improving and enhancing deer ranges and forage

FINDINGS

1 The decline of the California-Oregon Mule Deer Herd is apparently a result of the combination of excessive hunting pressure and long-recognized general decline in the capacity of the ranges frequented by this herd

2 That research efforts to improve techniques of range improvement and revegetation are being conducted

3 The size and quantity of legally taken deer in the interstate herd is of considerable importance to the economy of the northeastern counties of California The hunters from other areas who hunt the interstate deer herd contribute greatly through their purchase of equipment, supplies and services

4 Buck deer size in the mule deer herd is a function of age Both states have held hunts of forked horn or yearling bucks which result in fewer young deer living to attain the age and size expected by the layman hunter of the mule deer

5 If the ranges and the interstate herd are to be successfully rehabilitated, closer coordination between the States of Oregon and California and other public agencies concerned is required.

6 That unfair advantage of the migratory herd is being taken by hunters who have built tree stands and chairs in areas near the state line through which the deer must pass

RECOMMENDATIONS

1 Inasmuch as a large part of the range frequented by the interstate mule deer herd is located on federally owned and controlled land, the respective state agencies should make every effort to cooperate, assist, and recommend to the appropriate federal agencies in matters pertaining to the improvement of the forage and browse of the herd's ranges.

2 That all agencies interested in and responsible for research and improvement of wildlife habitat coordinate their activities, and cooperate wherever feasible, to accelerate the acquisition of knowledge in this subject

3 That legislation be introduced in California requiring the California Fish and Game Commission to annually submit its recommendations and request for funds as it pertains to range improvement on federal land to federal agencies, and that this be done in time for budget considerations of the agencies involved

4 That the "three-point buck law" and restrictions on antlerless hunting be maintained in District 1¾ until legislative determination of its effect is made

5 That a no-hunting "buffer strip" be established by legislation in both states along the state line as a protective measure during the hunting season in behalf of fair play for the interstate herd as it migrates.

6 That legislation be introduced in each state requiring the two Commissions of Fish and Game to meet in informal, joint sessions at least annually to discuss the management of the interstate migratory mule deer herd and possible hunting regulations pertaining thereto, and to consider other fish and game matters to common interest to both states

TEXT

The California-Oregon interstate mule deer herd migrates annually across the state line in the region encompassing Modoc and eastern Siskiyou Counties

The interstate deer herd, in normal winters, migrates to the winter ranges in California The 1962–63 winter was an unusually mild winter and the California State Department of Fish and Game estimated from track counts that the migration consisted of about 5,000 fewer deer than the previous year. The 1950 to 1963 estimates of the interstate deer herd population, made from track counts, are as follows·

1950	13,256	1957	**11,696**
1951	17,570	1958	12,819
1952	10,547	1959	14,642
1953	11,601·	1960	14,203
1954	17,615	1961	13,091
1955	17,170	1962	12,112
1956	12,240	1963	7,191

In the 12-year period, beginning in 1950, the deer kill consisted of the following

	Bucks	*Does*
California	7,618	7,545
Oregon	45,733	25,260

The Oregon figures are close estimates derived from mail sampling of sportsmen by the Oregon State Department of Fish and Game and not as reliable as the tag counts maintained by California

The 1964 year's deer season in Oregon ran from September 28 to October 20, which is a shorter season than previous years and Oregon did not allow antlerless, nor less than forked-horn bucks to be taken

California instituted a "three-point buck law," and also did not allow a doe kill

These steps were taken by both states to relieve some of the hunting pressure on the interstate deer herd It may also serve to make the relative share of deer kill in the two states more equitable

The Economic Impact

The contribution to the economy of the counties visited by the hunters of deer of the interstate herd was summed up by Mr J D Proctor of the Inter-Counties Chamber of Commerce of Northern California

He said "We are also interested in the economic feature involved and, believe me, it is tremendous The hotel operators, the motel operators, the service stations, the bars everyone on the highway is affected by the recreation dollar It can and will reduce our taxes and help carry the load of state and county administration all the way through This interstate herd is a good big piece of this recreation dollar"

Herd Condition

The condition of the deer herd was described by James D Stokes, regional manager for the California Department of Fish and Game·

"In my estimation, the trend of the deer numbers has been down since 1938 There have been fluctuations or undulations in this trend, but over the long period, the trend has been down

"The major reason for that downward trend has been an equal downward trend in the quality of the deer range The range also has had fluctuations which are directly tied into annual precipitation and distribution.

"These herds are very vulnerable to the hunter This area is predominantly an easy terrain, very adequately covered with roads, particularly accessible to 4-wheel-drive equipment This has made it possible for the hunters to crop the bucks very heavily

"The range improvement is the vital thing, because if we do nothing to stop our downward trend of range, we are inevitably going out of the picture with the deer The downward trend, I feel, is directly tied in with the forage on the range, and, particularly, the forage that is on the winter range itself."

Management of the Herd

In 1945, members of the Fish and Game Commissions of California and Oregon recognized that the interstate deer herd posed a joint problem, as a result of studies done by the Forest Service and technicians assigned to the area Since that meeting of 1945, the two commissions had not held a joint meeting until this year, when prompted by action of this committee, they met together on January 9, 1964, in Klamath Falls Oregon The interest in 1945 on the part of the commissions culminated in the formation of the Interstate Deer Herd Advisory Committee The committee consists of technicians of the two states' Departments of Fish and Game, and of the U S Forest Service, and the Bureau of Land Management The committee is a study group charged

with ascertaining the facts that were pertinent to management of the interstate herd The recommendations of the Interstate Deer Herd Advisory Committee reflect the professional aspect of its membership, and to obtain better balance in the formation of the management policy of the interstate deer herd, members of the Fish and Game Committee felt that some representation of local residents and interests should be introduced Inasmuch as the California Fish and Game Commission is constituted to represent and mitigate the various elements of public policy formation in fish and game matters, it was the Assembly committee's unanimous decision to recommend legislation which would require the California Fish and Game Commission to meet with its Oregon counterpart to better coordinate the management of the interstate mule deer herd

It was felt that joint consideration of the facts relating to setting of seasons, bag limits, and age and sex to be hunted would result in better management of this vital natural and economic resource

The chairman of the committee also strongly urged the retention of the "three-point law" until such time as a legislative determination of its effect in District $1\frac{3}{4}$ could be made

Range Improvement

Some limited range improvement programs are being carried out, for the most part, by federal agencies The Bureau of Land Management, through its timing and limitation on the number of cattle grazing permits and recently instituted research in the areas near and including the interstate deer herd winter range, has acted to relieve the effect of overgrazing of the ranges There is some indication that this removal from the public ranges will increase the grazing pressure on private ranges, which have provided a great deal of winter forage for the interstate deer herd

The Forest Service is also expending funds to improve the range through revegetation, controlled burning, and wildlife habitat improvements These include planting, well drilling, check dam construction, building fences, and noxious weed eradication In addition, the Forest Service has prepared and submitted through the President to Congress a 10-year program of range improvement in Modoc National Forest

One presentation of the U S Forest Service reported that the critical problem of the winter range was the competition between deer for forage and browse Because of excessive grazing, both cattle and deer, in the 1940's, continued poor vigor of the principal browse, the bitterbrush plants, and severe drought, the trend in all of the key winter deer ranges condition is downward

The growth conditions of the bitterbrush for 1962 were better than previous years, but it would take several years of better than average growth, more than in 1962, to successfully reverse the range condition trend

In-the-field research is being conducted by the Pacific Southwest Forest and Range Experiment Station, a Forest Service facility, for

the purpose of improving deer habitat throughout the State of California The experiment station has been working in the northern deer ranges for more than 10 years.

"The Buffer Strip No-hunting Zone"

It was revealed in testimony before the joint committees that because of geographical formations along the migratory route of the interstate herd which cause the deer to concentrate in areas very near the state line, some hunters had permanently fixed chairs and stands in trees

The California committee unanimously voted to recommend the establishment of a buffer strip, consisting of a mile-wide strip, extending from the state line southward, if a like refuge were established by Oregon on its side of the state line The purpose of this recommendation was to stop unsportsmanlike killing of deer from chair stands fixed in trees, in areas where the deer have to pass during their migration

By Assemblywoman Davis

HOUSE RESOLUTION NO. 288

Relating to a Study of Marine Research

Resolved by the Assembly of the State of California, That the Assembly Committee on Rules is directed to assign to an appropriate interim committee the study of the research which has been done by the Marine Research Committee and persons under contract with the committee, and to direct the Marine Research Committee to report to such interim committee on all research projects undertaken by it and persons under contract with it, with such interim committee to report to the Legislature not later than the fifth calendar day of the 1965 Regular Session of the Legislature

FINDINGS

1 That the purpose of state-sponsored marine research is to discover where man can enter the ecology of the California current system for the maximum gain and benefit and to discover the wise use of the resources found there—to ultimately acquire the knowledge to manipulate those marine resources in order to achieve the maximum potential benefits which they offer.

2. That the Marine Research Committee in its association and assistance to the California Cooperative Ocean Fisheries Investigation (CAL-COFI) is proceeding towards the accomplishment of the above goals

3. That the support of the Marine Research Committee through a tax upon certain species of the commercial fisheries catch is not burdensome to the industry and is considered a good investment by union and company representatives and that expenditures from this revenue represent only a portion of the total amount being spent for the benefit of all ocean resources research.

RECOMMENDATIONS

1. That the Marine Research Committee be continued in its quest for greater knowledge of our marine resources.

2. That the Marine Research Committee be encouraged to accomplish more orderly dissemination of its research findings through regular complete progress reports, and to become more active advocates of the accomplishment of recommendations derived from its research.

3 That legislation be introduced, amending Section 726 of the Fish and Game Code, so that it will read "fish" rather than "sardines," for now there are not enough representatives of sardine packers on the board to make the board technically legal.

This is because there are not enough companies in California dealing chiefly with packing and processing of sardines to place the required number of members on the board

TEXT

The Marine Research Committee was formed in 1947 by action of the Legislature Its nine members are appointed by the Governor. Five members of the committee, according to law, must be actively engaged

in the sardine industry, one member must represent an organized sportsman's group, and at least one must represent organized labor. It conducts coordinated research programs jointly with Scripps Institution of Oceanography, the Division of Fish and Game, the California Academy of Sciences, Stanford University's Hopkins Marine Station, and the United States Fish and Wildlife Service All work undertaken by the Marine Research Committee is done by contract with the various participating agencies

The main research and marine investigation programs carried out by the Marine Resources Committee with the aid of its contractual agencies have centered around the sardine, but the committee also sponsors research on mackerel, anchovy, herring and other game and food fishes

In addition, studies of oceanography, food habits and migrations of fish, the abundance of various species and their relationship to each other and to oceanographic conditions have made up part of the contractual studies

In order to avoid duplicating ocean research by other agencies, the Marine Research Committee assisted in formation of the California Cooperative Ocean Fisheries Investigation (CAL-COFI) in which interested governmental and commercial entities participate

The research conducted by CAL-COFI is directed towards making it possible for the public to more fully utilize the poorly known and little understood living marine resources The CAL-COFI program is a coordinated effort based on voluntary association of several agencies, each concerned with the same or overlapping problems The coordinated effort prevents duplication and permits an approach to problems too large or too diverse for a single agency to undertake The Marine Research Committee provides the stimulus for CAL-COFI coordination and assists financially and provides a liaison between the needs of the public and the work of the scientist

The financial support for the Marine Research Committee and its participation in CAL-COFI is derived by a tax of $1 per ton of certain species of fish caught by the commercial fisheries of California This tax is supported by industry and unions alike as a good investment The Marine Research Committee's authority to collect the tax is renewed each two years and a small reserve is held in anticipation of an orderly phasing out of projects should the Legislature see fit not to continue the authority at some future date

By Assemblyman Thomas

HOUSE RESOLUTION NO. 297

Relating to a Study of Marine Resources

Resolved by the Assembly of the State of California, That the Assembly Committee on Rules is directed to assign to an appropriate interim committee the study of this State's marine resources, including, but not limited to

(a) The extent and condition of all species of fish,

(b) The economic impact the commercial and sport fishing industry has on the economy of the State;

(c) The changes which have taken place and the future developments in the methods and costs of taking fish;

(d) How California's marine resources and their utilization and development compare with other states; with such interim committee to report to the Legislature not later than the fifth calendar day of the 1965 Regular Session

TEXT

The subject of California marine resources, because of its immensity, does not lend itself to "findings" or "conclusions" in the usual legislative sense

Certain factors were requested to be examined by House Resolution No 297 and these can best be reported as they were treated by the witnesses before the committee at the San Pedro hearing on September 26 and 27, 1963

Assembly Bill No 2738, relation to a reduction of anchovies, was also discussed at the San Pedro hearing

WALTER T. SHANNON, DIRECTOR OF THE CALIFORNIA DEPARTMENT OF FISH AND GAME

"In general, the marine fish resources off California are in very good condition, with the exception of a few species that are depleted or may be being harvested too heavily

"The sardine population is seriously depleted with no sign of recovery in the immediate future under present fishing practices.

"The Pacific mackerel fishery used to produce much more than it does today. There is a good chance that Pacific mackerel are presently being overharvested

"California halibut appear to be adequately harvested, although the halibut population seems to have recovered somewhat in the last couple of years.

"Yellowfin tuna, although not usually found adjacent to the California coast, have been harvested past the limit need to maintain the maximum yield, and are presently under internation regulations, and proposals for international regulations are under consideration.

"But aside from these species, the marine resources are, as I said, in good shape

"There are many latent resources in the sea which are virtually untapped

"In addition to the species mentioned, there are many others that could be better utilized The saury is a small species that lives near the surface and feeds on minute animals, it is extremely abundant and extends clear across the Pacific Over 400,000 tons a year are taken off Japan The Russians take a similar amount They are fished by attracting them with powerful night lights and catching them with blanket nets

"The hake population also is a resource relatively unfished [1]

"The task ahead of the department is to find out what and where our potential resources are, and how they may be caught We also must find out how many can be caught without depletion

"As far as we know, no survey of the economic impact of the sport and commercial fisheries on the economy of California has ever been conducted [2]

"We have computed values of the price paid to fishermen for commercial landings and shipments in California. In 1961—the latest figures available—this price was over 74 million dollars

"We have also roughly estimated the number of ocean sportfishing angler days The total annual marine angler day figure is probably somewhere around five million, exclusive of pier and jetty anglers, which represents an extensive recreational expenditure

"Turning to the state of ocean fishing today, we find a greatly different situation than that which prevailed not too many years ago

"The greatest advances have been been in the field of technological improvement The use of fathometers, radio, radar, and similar electronic equipment has wrought vast changes in the makeup of the fishing fleets

"Sportfishing boats have increased their size and the distance they can travel from their home ports

"The use of airplanes for fish spotting has made location of fish much more positive and has greatly reduced the number of hours previously spent at sea in search of fish

"The technique of refrigeration, of course, gave the commercial fishermen the impetus to go on the high seas for extended periods of time rather than having to fish locally

"All of this improved equipment is extremely expensive, but it is also far more efficient than what has existed before And efficiency is vital to our fishing industry, for there is a major problem ahead This is competition with other nations for the marine resources of the world

"To meet the needs of the expanding world population, it is necessary to turn to the sea. Between 1938 and 1961, the world's fish and sea food production doubled It went from 20 5 million metric tons to 41.2 During this time, the United States increased its production by only 22 percent

"Since 1956, the United States dropped from second place among nations to fifth Japan leads with 6 7 million metric tons. Peru is second with 5 2—Communist China third, with 5 million, the USSR, fourth,

[1] Testimony of John Radovich, Chief, Marine Fisheries Branch, California Department of Fish and Game

[2] It would be within the purview of the Subcommittee on Economic Development of the Assembly Committee on Ways and Means, within the scope of the broader study proposed in the introduction of this report to conduct such a survey

with 3.2—and the United States, in fifth place, produces 2 9 million metric tons

"Compounding our problems of competition with other nations is the oceanic fishing fleet which is being put to sea by Japan and the USSR This fleet can and does fish right up to within a few miles of our coast. This has caused considerable consternation, particularly off Alaska on this coast To date, foreign nations have abstained from fishing under conditions where we are adequately harvesting our resources, where we are actively conducting research, and where we are managing the resources It behooves us, then, to adequately harvest our marine resources, to manage them, and to conduct research on them if we are to keep them for ourselves

"California leads the states in *value* of seafood production Except for a few years in the last two decades, California has also led all other states in *volume* of seafood production. San Pedro leads all over United States ports

"It is imperative that California develop these resources, and, more important, manage them wisely.

"If we do not provide adequate facilities and personnel now to study these resources and to manage them wisely and successfully, we may very well begin to lose them in direct competition with foreign nations —competition for our own resources

"We will also be faced with a tremendously growing demand—from our own commercial fishermen and the expanding throng of recreation-seeking, marine sportfishermen for more and more use of our ocean fisheries."

PROFESSOR JOHN ISAACS, SCRIPPS INSTITUTION OF OCEANOGRAPHY, INSTITUTE OF MARINE RESEARCH

"We're not in a position to ask knowledgeable questions of the ocean, and to conduct knowledgeable and sophisticated experiments on a broad scale, but only step by step

"In general, the wide expanse of oceans are not highly productive. It has been estimated that the entire production of organic material, that is the basic plant life in the ocean, is about the same as on total land—but unlike the land, where the decay takes place in the sunlit layers of the soil, at sea, the decay and release of the nutrients take place only after the debris has settled down deep into the lower zones of the water where no plant can hope to grow

"Thus, although the California current remains rich and productive year after year, we believe, the temperature of the water and the type of food available to its creatures, undergoes both short- and long-term changes One would imagine that these changes would be reflected in the abundance of the resident fish, and we believe that this is so; and in the case of the sardine and anchovy, we believe that we understand how these species are influenced by changing conditions

"The California current provides a handsome home and sets a bountiful table for her myriad children, but in some years, some are served better than others Thus, any single species will undergo considerable fluctuation from natural effects alone, but the sum of species will probably be well fed.

"I believe that in all cases, the utilization of the marine environment there are no fundamental conflicts, as between fisheries and sewage disposal, waste heat disposal, atomic energy disposal, resalination and brine disposal, nor, as I have said, between sport and commercial fisheries themselves Each time I have looked into one of these conflicts, I have concluded that if properly and thoughtfully developed, each use of the ocean can actually benefit the other users.

"I believe that real progress has been made in understanding this conflict and the conflict exists only because of the limitations of our vision, and knowledge, and will dissolve, I believe, for there is abundant resource for all

"Thus, even in the relatively sterile broad oceans of the world, there is an abundance, and in this richer California current, there is also an abundant resource for both sport and commercial fisheries, and the development of the state can well benefit from the basic economic input of the commercial fisheries

"We cannot consider the weather, the oceanography, nor the fish use events of California isolated, but rather only in the context of the entire North Pacific or even the entire northern hemisphere

"It is my prime point that California possesses the safeguards, and the responsibility to begin these sophisticated experiments quite unlike conventional management, and the use of her resources, and to ultimately guide the world in the rational utilization of ocean wealth of this planet, and I firmly believe this is destined to be California's true marine product

"A more important point, though, I think is this: that it is not the destiny of the State of California to forever produce fish meal and oil, or canned fish, but rather, by acting rationally on the resources that are rightfully hers, it is her destiny, I believe to point out to the world the basic scientific management of these resources

"In the future, she will export not fish meal or oil, any more than we now export the hide and tallow of the Spanish Regime, but rather we will export the ideas and the understanding and from an economic point of view, the specialists in the education, the tools, and the methods and the investments in the marine realm that will call California their home port

"Already California's scientists, industrialists, and fishermen stand high in world status This is something like the present trend in the development of the tuna and shrimp industry, where California interests are widely ranging about the world This has emerged almost entirely from development and research that took place in California "

RESERVATION OF WATER AND FISHLIFE

Assembly Bill No 1977 (1963), as introduced by Assemblywoman Pauline L Davis, Chairman of this Committee, was intended to create and stimulate debate on the present authority of the Department of Fish and Game to provide water reserves to protect and enhance fish and wildlife in California waters

Two major areas of difficulty have been identified by the Legislative Analyst at the request of this committee in regard to water reservations

These are discussed in the specific recommendations part of the Fiscal Affairs Section In brief, these were.

(1) The current practice of rather haphazard pollution control work by the Department of Fish and Game, which rarely results in sufficient punitive action, and

(2) The present review procedure of applications of proposed water projects by the Department of Fish and Game to determine the effect the construction will have on fish and wildlife resources of the state. The Legislative Analyst's office has suggested that a more efficient handling of this review would be accomplished if all applications to appropriate water submitted to the State Water Rights Board were required to include information regarding fish and wildlife preservation

PROPOSED BILLS STEMMING FROM THE CONTENTS

of

THE REPORT

INTRODUCTION:

House Resolutions requesting appropriate interim study of

1 Economic criteria for natural resource decisions

2 Subjective criteria for public decision making.

ANADROMOUS FISH:

1 Memorialize Congress to favorably consider the passage of bills pending before previous Congress on the protection, enhancement, and improvement of salmon and anadromous fish

2 House resolution requiring Department of Fish and Game to prepare a priority list of projects and costs for possible federal-state cooperative salmon enhancement programs.

INTERSTATE DEER HERD:

1 Resolution requiring the California Fish and Game Commission to annually submit the recommendations and requests for range improvement and research funds to cognizant federal agencies in time for federal budgetary consideration.

2 Resolution requiring maintenance of "three-point buck" law

3 Bill requiring the establishment of a no-hunting "buffer strip" on the Oregon border, if Oregon also establishes one

4 House resolution requiring Fish and Game Commission to meet annually with Oregon counterpart

MARINE RESEARCH:

1 Commendatory-type resolution, suggesting more orderly and active dissemination of Marine Research Committee's findings and research results.

2 Bill changing Section 726 of Fish and Game Code to legalize board's present makeup by substituting "fish" for "sardine" in the language of that section

RESERVATION OF WATER:

1 Resolution requiring interim study of the pollution control work of the Department of Fish and Game, as recommended by the Legislative Analyst.

2 A bill requiring that applications for appropriations of water to the State Water Rights Board include the proposed action to protect fish and wildlife affected by the proposed construction or appropriation

TABLE OF CONTENTS

January 11, 1965

LETTER OF TRANSMITTAL

TO THE SPEAKER AND MEMBERS OF THE ASSEMBLY:

Your Interim Committee on Municipal and County Government in accordance with H R 500 of the 1963 Regular Session submits herewith its final report to the 1965 Legislature The report covers six different subjects and is contained in two parts

Part I contains the findings, recommendations and conclusions of the committee on the subjects of

1 Problems of Construction on Expansive Soil
2 Neighborhood Parks in New Subdivisions.
3 The Adequacy of the Current Formula for Apportioning Fines and Forfeiture Revenue (Penal Code Section 1463.)

Part II contains similiar materials on the subject of:

1 Control of Special District Securities
2. A District Reorganization Law
3 Review of the Operations of the Local Agency Formation Commission

In this connection, Assemblyman George Zenovich has indicated that he does not wish to concur in the recommendations of the committee on the subject of "Control of Special District Securities"

Assemblyman Frank Lanterman does not concur in the recommendations of the committee on the subjects of

Local Agency Formation Commission
District Reorganization Law
Neighborhood Parks in New Subdivisions

Mr Lanterman has succinctly explained the reasons for his dissent in a letter which I have attached to this letter of transmittal

Respectfully submitted,

JOHN T KNOX
Chairman

JOHN P QUIMBY
Vice Chairman

Don A Allen, Sr

STATEMENT OF ASSEMBLYMAN FRANK LANTERMAN

January 7, 1965

HONORABLE JOHN T KNOX
Chairman, Interim Committee
Municipal and County Government
State Capitol, Sacramento, California

Dear John:

The following are my comments of dissent relating to the committee's recommendations for change in the Local Agency Formation Commission, the District Reorganization Law and the Neighborhood Parks in New Subdivisions proposal

1 *Local Agency Formation Commission*

Mr Lanterman dissents with most of the proposed committee recommendations in this section relating to local agency formation commissions He especially points out the lack of control checks under (B) and (C) of Paragraph 2, and the loss of local government control of the functioning of the commission if outside assistance grants may be accepted in designing a master plan for consolidation of local government He basically disapproves of any broadening of the authority of the commission unless there is provision for an appeal by the people affected, other than resort to the courts He earnestly recommends that an appeal procedure be established on the order of a four-fifths vote of the elected legislative body of jurisdiction to which the appeal has been made by the persons affected

2 *District Reorganization Law*

Assemblyman Lanterman dissents with the committee recommendation contained in the last sentence of the final paragraph because it would tend to extend the authority of the commission to become, in fact, a master planning agency for the entire county with no provision for appeal to an elected body by the people affected and could ultimately provide for the dissolution of all district forms of government regardless of the will of the electorate of the district in question

3 *Neighborhood Parks in New Subdivisions*

Mr. Lanterman dissents with the proposed amendments to the Subdivision Map Act as unenforceable and potentially confiscatory without sufficient protections in either paragraphs 3 or 4

Cordially yours,

FRANK LANTERMAN

PART I

REPORT ON PROBLEMS OF CONSTRUCTION ON EXPANSIVE SOIL

FINDINGS

1 Hundreds of homes built upon expansive soil in California have cracked to such an extent as to make continued habitation therein uncomfortable, unsafe, and, in many cases, impossible

2 Existing state law regulating home construction does not extend to soil conditions, and local ordinances requiring soil analysis prior to home construction are virtually nonexistent. Consequently, the potential homebuyer is without minimum assurance that his purchase will be a safe and habitable home

3 Where extensive structural damage has occurred, home repairs have proved too costly to be practicable

4 Aggrieved homeowners have found no recourse available to them other than civil litigation which is lengthy, expensive, and generally unsatisfactory Moreover, such a course of action is further complicated by the fact that laws dealing with the specific source of their problem—construction on expansive soil—have yet to be written

5 Professional engineers specializing in soils unanimously agree that the existence of expansive soil on a potential building site can be easily identified by standardized and relatively inexpensive tests

6 The same engineers are similarly agreed that the application of presently available engineering solutions to expansive soil situations can insure that homes will escape any significant structural damage The additional cost of such engineering solutions has been estimated to be minimal and easily financed both by the builder and by the subsequent homebuyer.

CONCLUSIONS

1. The occurrence of critically expansive soils throughout the state, together with the graphic evidence of damage such soil may cause to homes unwittingly or unknowingly constructed upon it, poses a major problem. The problem, although local in nature, is statewide in scope.

2. In general local governments have not yet developed an adequate response to this problem Local requirements for soils investigation prior to home construction are sporadic, after-the-fact, and generally insufficient to guarantee the health and safety of the homeowner or the security of his investment.

3. The principal answer to this problem does not lie in direct state intervention in the field of local building ordinances, but in state insistence that all local governments face up to this problem and enact appropriate local ordinances to protect potential homebuyers In this fashion, prerogatives of home rule can be preserved while minimum protections are extended to the consumer.

4. Specifically, the following legislative recommendations are made

(a) Appropriate sections should be added to the State Housing Law requiring each city and county to enact ordinances requiring preliminary soils reports to be made prior to home construction. These sections should also empower local building officials to determine what corrective actions shall be taken when such analyses reveal the presence of dangerously expansive soil

(b) The Subdivision Map Act should be amended to require that each subdivision map indicate the types of soil or soil conditions present in a subdivision, noting particularly the expansive characteristics of the soil.

(c) The provisions of the Business and Professions Code which regulate real estate transactions should be amended to require that the notice of intention to sell or lease subdivided land which must be filed with the Real Estate Commissioner include a statement revealing the soil conditions within the subdivision together with a statement indicating that the soil has been, or will be, reasably prepared so that structural damage will not occur.

(d) The State Housing Law should be amended to require each city and county to retain one copy of approved plans and specifications for homes constructed within subdivisions for a period of one year.

(Draft legislation implementing these recommendations may be found in Appendix pp. 25–28).

5. Two suggested courses of action are *specifically rejected* as inadequate.

(a) Amending the Subdivision Map Act to require cities and counties to adopt ordinances regulating soil bearing qualities in subdivisions would have uneven application Such a requirement would apply only to new subdivisions even though the perils of expansive soil are potentially present in all residential construction. Such a mild attempt at regulation moreover, provides no assurance that subsequent local ordinances would address themselves to the problem of soils analysis

(b) Reliance on the Uniform Building Code to protect the homebuyer would be ineffective and unrealistic The U B C may, or may not, be adopted by local governments as they see fit; once adopted, it may not be regularly updated In addition it is a proprietary code, outside the jurisdiction or control of government, and can be amended at any time by its authors It is subject to pressure and influence by producers of building materials and cannot guarantee that the most inexpensive and progressive techniques will be employed to protect the homebuyer Necessary regulation should take the form of thoughtful ordinances drafted by local officials to meet the exigencies of local conditions.

I. INTRODUCTION

Numerous unfortunate California homebuyers have discovered that the foundations and walls of their new homes have buckled and cracked because they had been built upon a type of soil which expands when wet and contracts when dry Such soil is found throughout California and the consequences of construction upon it without necessary precautions have been drastic and costly for the state's homeowners, builders and lenders.

Several very pointed examples of the effects of unregulated, or improperly regulated, construction upon expansive soil have highlighted the immediacy of this problem The personal tragedies and heavy financial losses suffered by Californians because natural expansive-contractive properties of soil had been ignored prompted the introduction of H R 192 (Donovan) at the 1963 session of the Legislature The resolution directed an interim study of the protection afforded buyers from improper prior preparation of land upon which houses are built

Pursuant to this directive the committee began a program of extensive research, study and preparation, climaxed by a two-day hearing on February 25–26, 1964 in San Diego, an area hard-hit with expansive soil problems At the hearing statements were presented by homeowners, builders, lenders, engineers, and by representatives of federal, state, and local agencies which had in some way been connected with problems of construction on expansive soil All interests were fully represented, from those of the Attorney General to those of professional lending institutions Testimony ranged from the recitation of personal grievances by homeowners to the highly technical expositions of engineers

The balance of this report outlines the expansive soil problem, examines the alternative avenues of protection for both consumer and builder, and provides the basis for legislative recommendations which would insure that personal and community losses due to expansive soils will be curtailed throughout the state

II. EFFECTS OF EXPANSIVE SOIL—CASE STUDIES

A. Spring Valley

In late 1958 a development firm began construction of approximately 1,800 homes in the Spring Valley section of San Diego County These homes were to sell in the $13,000–$14,500 price range During the rainy seasons of 1959–1960 and 1960–1961 some of the homes began to show initial signs of structural damage due to soil expansion. After the 1961–1962 rainy season the cumulative effect of the expansive soil exhibited itself—in severe foundation and structural failure.

Slab foundations cracked and buckled This initial failure began a chain reaction Walls cracked, sagged and pulled away from ceilings Cabinets pulled away from the walls Doors opened and closed improperly or not at all Carpeting and other floor covering were saturated by rainwater seeping through cracks in the floor slabs. Some homes were even invaded by insects which made their way through the cracks in the flooring and walls

Hundreds of homes were severely damaged, a situation which had the added effect of promoting the disintegration of a new, suburban community Pride of ownership was stifled in its infancy and a large segment of the area has since become inhabited by a transient population which is unconcerned about the problems of creating or maintaining a viable community

Affected homeowners complained to the county board of supervisors, the district attorney, the Better Business Bureau and the State Contractors' Licensing Board, all to no avail Fifty-seven homeowners have undertaken civil action and embarked upon a lengthy, expensive, and at times disheartening course of litigation Their case is still pending [1]

B. Conejo Valley

In 1962, Ventura County suffered more than 300 foundation failures in residences which had been built on slabs during or before 1961 The damage was due to construction upon expansive soil and was comparable in character to that which occurred in Spring Valley.

The Ventura County Grand Jury investigated the failures in 1962 and found that no felonies had been committed More significantly, it also found that existing ordinances were inadequate and that more and better inspection personnel were needed Homeowners petitioned the Governor and the Attorney General, but neither of these officers found any grounds for intervention Complaints filed with the State Contractors' Licensing Board failed to return a decision against the contractors and claims for damages filed against Ventura County by 38 homeowners were denied by the board of supervisors

The lending institutions holding mortgages repaired some homes by lifting them off their foundations and by placing heavily reinforced 11-inch slabs over the original slabs at a cost of approximately $2,500 to $5,000 per house

Because the source of the damage was improperly or inadequately prepared expansive soil, a situation not covered by existing building ordinances, Ventura County immediately set about revising its ordinances in this respect The county has currently adopted an amend-

[1] For further details of the Spring Valley situation see the transcript of hearing on the subject of *Problems of Construction Upon Expansive Soil*, Assembly Interim Committee on Municipal and County Government, meeting in San Diego, California, February 25–26, 1964 Two volumes (hereafter referred to as *Transcript*)

ment to the Uniform Building Code but has been under some pressure to modify these standards because builders maintain that present controls are unnecessarily restrictive and expensive [2]

C. Calexico

The Hermosa Homes tract in Calexico, Imperial County, is composed of 86 units in the $10,000 price range The tract was the first urban redevelopment project completed in the State of California The first year following completion of the homes, some cracking of walls and foundations appeared and was patched by the builder It was not until the warranty period had expired and the tract had experienced its first heavy rainfall that severe structural damage occurred Slabs cracked badly causing such distortion in the homes that doors are ofttimes impossible to close and lock, water pipes and windows break repeatedly, and many of the homes are, or are becoming, virtually uninhabitable.

The Hermosa Homes tract marked the first venture into property-owning for most of its residents and the experience has not been a pleasant one Aid has been sought from local, state and federal agencies but it has not been forthcoming. The Administrator of the United States Housing and Home Finance Agency has expressed concern, but relief from the federal government does not appear to be imminent Through an oversight, FHA building standards which might have prevented such damage were not applied to this project.[3]

SUMMARY

Additional complaints have been filed with the committee from northern California, especially from the areas of Santa Clara and Contra Costa Counties. The facts in each of these cases are somewhat different, but the effects in terms of personal loss are much the same. There has been little or no protection offered to the homebuyer in these instances and his avenues of recourse have been very narrow. Local ordinances requiring soil analyses are virtually nonexistent. Thus when a soil deficiency occurs the burden of action, the expense and aggravation of pursuing remedies have fallen upon the largely unprotected citizen. The fact that some local agencies have subsequently revised local subdivision standards is of very little comfort to the family who has invested and is forced to live in a home with cracked floors and walls

III. "CHARACTERISTICS" OF EXPANSIVE SOIL

Expansive soil is composed primarily of fine clay materials. It exhibits the characteristic of expanding in volume when wet and of shrinking in the process of drying Different soils and soil mixtures

[2] For further details on the Conejo Valley situation, see statement of M C Lorenz, Director of Public Works, Ventura County *Transcript*, Volume 2, pp 78–87

[3] For additional details of the Calexico situation, see *Transcript*, Volume 1, statements of
Luis M Legaspi, City Councilman, City of Calexico, pp 37–39
Harold D Blaser, Zone Site Engineering Advisor, Federal Housing Administration Zone 6, pp 44–48
Statement of John H Stepping, publisher, Calexico *Chronical*, pp 114–116

are expansive or nonexpansive to varying degrees Thus some soils will expand and contract a great deal when alternately wet and dried, while under comparable conditions, other soils will expand and contract only slightly.

Engineers have developed several classification systems for soils which reflect this expansive characteristic The American Association of Highway Officials, for example, uses a classification system which rates soils by expansiveness and load carrying capacity They group soils in general categories from A-1 through A-7 Groups A-1 through A-3 are composed of granular materials and exhibit relatively little expansibility and high load carrying capacity. Soil groups A-4 through A-7 are composed of silt-clay materials and exhibit increased plasticity and decreased load carrying capacity In general one might say with confidence that A-1 soils would expand the least and possess the greatest load carrying capacity while A-7 soils would expand most and possess the least load carrying capacity.

Expansive soil lacks load carrying capacity for two related reasons When soil contracts, it pulls away from the structure resting upon it. Consequently, any weight or load exerted upon that structure must be borne by the structure alone, without the necessary support of the underlying soil Second, when the soil expands in volume, it commonly exerts upward pressures which may amount to two, three, and four thousand pounds per square foot Because such soils are capable of exerting such enormous upward pressures through expansion and because they can lose substantial volume through contraction, homes built directly upon them are subject to severe structural damage When the soil expands and subsequently contracts, foundations may crack and buckle, causing walls to crack and to pull away from floors and/or ceilings.

Expansive soils which can produce serious structural damage in homes occur fairly commonly throughout the State of California. The degree of soil expansibility often varies considerably within small areas, and the total area affected tends to be relatively small vis-à-vis the total area of the state It has been roughly estimated that approximately 10 percent of the land surface of the State of California is composed of expansive type soils Not all such soil can be accurately termed "critically" expansive Whenever soil is measurably expansive, however, additional tests should be made before building to determine the degree of expansibility and to establish appropriate precautions which must be taken [4]

IV. ENGINEERING SOLUTIONS TO EXPANSIVE SOIL CONDITIONS

There are two general categories of solutions which may be applied to the problem of construction upon expansive soil They are (1) soil solutions and (2) structural solutions. Prerequisite to either type of solution is recognition of the problem and identification of the soil

[4] For a thorough discussion of the character and effect of expansive soils by a number of licensed engineers, specializing in soils investigation and analysis, see *Transcript*, Volume 1, pp 11-25, 77-116, Volume 2, pp 6-11, 40-44

If preliminary soils analyses are undertaken by qualified, licensed engineers, the major step toward control will have been completed Once the soil has been identified as requiring corrective measures, the following solutions may be applied.

A. Soil Solutions

1 The expansive soil is removed to depths greater than three feet below the finished grade of the building area Then nonexpansive fill is placed and compacted over the expansive soil in horizontal 6-inch layers at an optimum moisture content of at least 90 degrees of maximum dry density in the upper three feet This procedure obviates need for special building foundations or steel reinforcements

2 Expansive soil may be presaturated under engineering control before building begins This method must be accompanied by the use of structural techniques which will assure the retention of the wet condition of the soil Such techniques include the placement of sand between the slab and presaturated soil and the placement of a waterproof membrane within or beneath the slab

The rationale behind all techniques of presaturation is to raise and maintain the moisture content of the soil to such a level before, during, and after construction that any additional moisture reaching the soil would cause only minor movements The presaturation solution is very difficult to implement and requires a series of special circumstances together with extraordinary expertise and patience In addition it requires maintenance of substantially constant moisture content in the soil throughout the life of the structure

3 The expansive soil may be removed, mixed with an additive such as lime, and then replaced This is also a difficult solution in application, but has been found to be effective, particularly in heavy highway construction.

B. Structural Solutions

1 A 10- to 12-inch thick, heavily reinforced concrete slab can be built under the house This type of construction will generally prevent the cracking of the slab, but may result in the tipping or rocking of the entire structure under the heaving pressures of the soil

2 Raised wood floors built on reinforced concrete grade beams and cast-in-place concrete piles can be constructed In this plan, the load of the structure is carried by the piles which extend to nonexpansive soil.

3 Raised wood floors can be built on continuous reinforced concrete foundation [5]

C. Controls Presently Required by F.H.A. and V.A.

The Federal Housing Administration recognized early in the 1950s that steps had to be taken to safeguard against the possible effects of uncontrolled construction upon "cut and fill" sites After thorough investigation of the kinds of soil problems that might be encountered in home construction, F H A developed the comprehensive control pro-

[5] For a further discussion of soils solutions and structural solutions, see *Transcript*, Volume 1, pp 77–113, Volume 2, pp 32–35, 39–42, 69–87

cedures contained in Data Sheet No 79 Because the nationwide building boom has reached its greatest momentum in California, F H A developed separate procedures for various California locales even before the national control program went into effect

In general the F H A procedure requires a preliminary soils report which identifies the type of soil found on the building site If the soil is determined to be dangerously or critically expansive, the F H A requires that proposed engineering recommendations for dealing with the soil condition be submitted for its approval The agency approves or disapproves fill and foundation specifications before construction is allowed to begin It further requires that continuous engineering supervision be maintained at the site to insure that specified fill, compaction, or structural operations are, in fact, carried out [6]

Where these procedures have been followed, they have proved adequate to insure against subsequent structural damage from expansive soils [7]

The Veteran's Administration requires similar controls for construction on expansive soil and the two agencies accept each other's inspection reports The effects of the V A requirements have been quite as salutary as those of the F H A [8]

V. AVERAGE COSTS OF SOLVING EXPANSIVE SOILS PROBLEMS

A. Soil Analysis

Hearings testimony indicated that the cost of a soils analysis would vary according to circumstances, but that the range of variance would not be very wide and would be predictable The following estimates represent the judgment of professionals and are believed to be very representative.

Assuming it would be necessary to drill to average depths of around 15 feet and to drill four to six times on a subdivision of 50 to 100 lots, the cost would be from $1,000 to $2,000 This would include laboratory testing of representative samples of each soil stratum taken in the drilling [9]

If preliminary analysis revealed that it would be necessary to analyze each lot, field identification procedures could be employed to tell if soils were expansive After grading had been completed, borings would then be necessary to classify the soils One boring per lot would run approximately $10 or $15. If more borings were necessary the price would be commensurately higher [10]

Thus an initial test might cost $2,000 for a 100 lot subdivision or $20 per lot. If additional tests were found to be necessary, the cost might rise another $15 per lot for a total of $35 per lot [11]

---

[6] Federal Housing Administration *Land Planning Bulletin #3*, "Lot Improvements—Data Sheet 79"

[7] Harold D Blaser *Transcript*, Volume 1, pp 41–51

[8] The Office of Architecture and Construction, School Section, in the State Department of General Services also has rigid requirements for construction on expansive soil which have proved satisfactory Since these procedures are applicable only to schoolhouse construction, they are not discussed here

[9] Philip H Benton *Transcript*, Volume 1, pp 29–30

[10] *Ibid*, p 29

[11] *Ibid*, p 29

B. Soil Solutions

The cost of moving soils and/or of burying expansive soils is dependent upon the source of the nonexpansive soil to be used in the upper three feet If nonexpansive soil must be imported or over-excavation is required, this alternative could be costly If the nonexpansive soil is very close to the site or on other parts of the subdivision site, the cost of moving could be minimal The unit cost for earthmoving and compaction on the same site can vary from a probable minimum of $0 25 per cubic yard to several times as much depending on length of haul, source of materials, and other factors

The presaturation method has so many variants and can include so many structural adjuncts that it is also very difficult to estimate its cost in advance Suffice to say that because of structural requirements, it will generally be more expensive than the soil replacement or soil burying solution.

Repacking the soil with a lime additive, although technically feasible, has not been employed to any significant extent in home construction Thus no estimates of this method are available

C. Structural Solutions

The cost of thick, steel reinforced concrete slabs may run from $500–$700 per house [12]

Raised wood floors on grade beam and pile foundations would run about $500 more than a slab foundation which was not intended to compensate for the expansive soil [13]

In summary, preliminary soil analyses would not cost more than $75 for a single lot or more than $300 for a 25-house tract This would mean an increased monthly house payment to a subsequent homeowner of less than $10 Assuming that a structural solution was decided upon to answer the problem, it might cost an additional $800–$1,000 to build a home properly on expansive soil Representatives of large institutional lending organizations indicate that such costs would mean an additional monthly payment of $6–$8 per $1,000 on a normal loan amortization Such an increase, they indicate, would not impair the ability of any reputable institution to finance the home construction [14]

Contrast these costs with the actual cost of repairs to homes damaged by expansive soil Two estimates concerning the cost of repairing houses in Conejo Valley were presented at the hearing One put the cost of repair of slabs at between $1,500 and $6,000 per house, depending upon severity of damage [15] The Director of Public Works of Ventura County put the cost at between $2,500 to $5,000 per house Repair was undertaken by mortgage holding banks and entailed jacking up each house and placing a heavy, reinforced 11″ concrete slab over the original slab.[16]

VI. CONCLUSIONS

Existing requirements and industry practices in regard to construction on expansive soils are generally inadequate to safeguard homebuyers from subsequent major structural damage and financial loss. The following summary lists present practices and their inadequacies.

Both the State Housing Law [17] and the California Administrative Code [18] provide local agencies with the discretionary authority to require soils investigation prior to new residential construction Unfortunately the various local agencies responsible for enacting building codes have not employed these provisions widely enough to prevent the occurrences described in this report.[19] Although some local ordinances have been developed after widespread damage had occurred, such steps are of no value to the homeowners who have suffered the damage

Although the Federal Housing Administration and the Veteran's Administration have successfully established controls over construction on expansive soils, the great majority of new homes constructed in the state are not insured by either agency and thus not subject to these controls.

Some private lending institutions have established their own control procedures [20] Because many homes are not financed through these institutions, and because the only authority available to them is denial of loans, this type of regulation is not comprehensive enough to be effective

The Subdivision Public Report of the Division of Real Estate contains reference to the depth of fill on each lot and to the degree of compaction in each filled lot being offered for sale The Subdivision Public Report does not indicate the presence or absence of expansive soil Moveover the Subdivided Lands Law primarily gives the Real Estate Commissioner power to require disclosure of certain conditions in the Public Report. The commissioner could not prohibit the sale of parcels containing critically expansive soil even if the seller had disclosed that fact.

The Contractors State License Board also has some jurisdiction in this area, in that it can revoke the licenses of contractors or otherwise penalize them for violation of building codes. When building codes are nonexistent or inadequate, as in the case with those dealing with expansive soil, the contractors will not be held responsible by the board for cracking of foundations by expansive soil Even if he were, the homebuyer would not benefit from the revocation or suspension of contractors' licenses Because of the long period which generally elapses before the extent or true nature of the damage becomes obvious, the statute of limitations applicable to complaints before the board may exclude the possibility of action in these cases

[17] Health and Safety Code, Div 13, Part 1 5
[18] Title 8 Chapter 9, Article 8
[19] In 1960 the Portland Cement Association conducted a survey of cities and counties to determine what codes were in effect covering concrete floor construction for residential housing The result of this survey indicated that virtually no city or county had adequate codes covering concrete residential floor construction on expansive soil
See statement of Leo Nicholson, Portland Cement Association *Transcript*, Volume 2, pp 47–48
[20] Elwood A Teague *Transcript*, Volume 2, pp 19–20.

In order to alleviate the present situation in regard to construction on expansive soil, to guarantee minimum standards of health and safety to homebuyers and to preserve authority over enforcement of building standards at the local level, the committee makes the following recommendations for corrective legislation

1 That appropriate sections be added to the State Housing Law requiring each city and county to enact ordinances requiring preliminary soils reports to be made prior to the issuance of a building permit These sections should also empower local building enforcement agencies to determine what corrective actions may be taken when soils reports reveal the presence of dangerously expansive soil Such a requirement will insure that steps are taken at the local level to prevent damage to homes due to their construction upon expansive soil Involving only minimum state action, it leaves major responsibility, discretion, and power in the hands of local officials These specific provisions will also enable the buyer of a defective home to demonstrate the negligence of a developer in the event legal action were necessary because of damage caused by improper preparation of foundation pads

2 That the Business and Professions Code provisions which regulate sales of subdivided land be amended to provide that the notice of intention to sell or lease subdivided land which must be filed with the Real Estate Commissioner must include a statement of the amount of fill used or proposed to be used on the indicated lot The notice should be required to include a statement revealing the soil conditions within the subdivision and a statement indicating that the soil has been or will be prepared so that structural damage will not occur The legislation should also provide that failure to report as indicated would be grounds for the denial of a public report The present requirement that the public report be given to prospective purchasers prior to the sale or lease of subdivision lots or parcels of lots should be extended to include lots or parcels of lots which are being offered for sale or lease after repossession

Such legislation would increase the protection available to the homebuyer by enlarging the disclosure requirement placed upon the subdivider. It would place no additional burden upon the subdivider, who would have to submit a similar report to local authorities under the new sections which would be added by the previous recommendation.

3 That the Subdivision Map Act be amended to require that the subdivision map indicate the types of soil or soil conditions present on a subdivision The map should indicate further whether or not adverse effects could result from a change in the moisture content of the soil

Such an amendment would guarantee that both builder and local building authorities would be aware, prior to construction, of any need for special measures to obviate the effect of expansive soil

4. That the State Housing Law be amended to require each city and county to retain one copy of approved plans and specifications for dwellings constructed within subdivisions The copy of plans and specifications would be filed with the local building department for at least two years

In many cases plans and specifications of buildings are not retained by builders, contractors or building departments This discard of documents makes it difficult to repair buildings and obstructs the cause of any future litigation

In conclusion two approaches to the problem of expansive soil should be specifically rejected as inadequate solutions The alternative of amending the Subdivision Map Act to require cities and counties to adopt ordinances "regulating and controlling" the design, improvement and soil bearing qualities of subdivisions[21] would tend to be uneven in its application The Subdivision Map Act applies only to subdivisions and control over expansive soil is necessary in the case of all new residential construction, not just that in new subdivisions In addition, such an amendment would provide only a casual injunction to local government to "regulate and control" the soil bearing qualities in subdivisions This kind of open-ended discretion already exists and has not proved effective

Secondly the alternative of relying on the Uniform Building Code to protect the homebuyer would be ineffective and unrealistic The Uniform Building Code may or may not be adopted by local governments as they see fit, once adopted it may or may not be regularly updated In addition it is a proprietary code outside the regularized control of governmental bodies and can be amended at any time by its authors It is subject to extraordinary pressure and influence by producers of building materials and cannot guarantee that the most inexpensive and progressive techniques will be employed to safeguard the homebuyer In short, the Uniform Building Code has not provided in the past uniform, satisfactory protection to the builder and the consumer Even if it were incorporated by reference into the State Housing Law, it would be unlikely to have that effect in the future.

[21] See proposal submitted by Charles Christensen, California Council of Civil Engineers and Land Surveyors *Transcript*, Volume 2, pp 35–36

APPENDIX

Model Legislation

An act to add Sections 17953 and 17954 to the Health and Safety Code, relating to housing.

The people of the State of California do enact as follows:

SECTION 1 Section 17953 is added to the Health and Safety Code, to read:

17953. Each city, county, and city and county shall enact an ordinance which requires a preliminary soil analysis, based upon adequate test borings or excavations, of every subdivision, as defined in Sections 11535 and 11535 1 of the Business and Professions Code, and of each lot not within a subdivision upon which it is proposed to construct a dwelling

The preliminary soil analysis may be waived if the building department of the city, county or city and county, or other enforcement agency charged with the administration and enforcement of the provisions of this part, shall determine that, due to the knowledge such department has as to the soil qualities of the soil of the subdivision or lot, no preliminary analysis is necessary.

If such analysis indicates the presence of critically expansive soils or other soil problems which, if not corrected, would lead to structural defects, such ordinance shall require a soil analysis of each lot in the subdivision, or of the lot not included within a subdivision, as the case may be

SEC 2 Section 17954 is added to said code, to read

17954 The building department of each city, county, or city and county, or other enforcement agency charged with the administration and enforcement of the provisions of this part, shall determine what corrective action is required to assure that dwellings will not suffer structural damage because of the soil conditions indicated by the analyses required by Section 17953 Appeal from such determination shall be to the local appeals board

(See recommendation 4 (a) p 10)

An act to amend Section 11567 of the Business and Professions Code, relating to subdivision maps.

The people of the State of California do enact as follows:

SECTION 1. Section 11567 of the Business and Professions Code is amended to read

11567. The final map shall conform to all of the following provisions:

(a) It shall be clearly and legibly drawn in black waterproof india ink upon good tracing cloth, including affidavits, certificates and acknowledgments, except that such certificates, affidavits and acknowledgements may be legibly stamped or printed upon the map with opaque ink when recommended by the county recorder and authorized by the local governing body by ordinance

(b) The size of each sheet shall be 18 by 26 inches A marginal line shall be drawn completely around each sheet, leaving an entirely blank margin of one inch The scale of the map shall be large enough to show all details clearly and enough sheets shall be used to accomplish this end The particular number of the sheet and the total number of sheets comprising the map shall be stated on each of the sheets, and its relation to each adjoining sheet shall be clearly shown.

(c) It shall show all survey and mathematical information and data necessary to locate all monuments and to locate and retrace any and all interior and exterior boundary lines appearing thereon, including bearings and distances of straight lines, and radii and arc length or chord bearings and length for all curves, and such information as may be necessary to determine the location of the centers of curves

(d) Each lot shall be numbered and each block may be numbered or lettered. Each street shall be named.

(e) The exterior boundary of the land included within the subdivision shall be indicated by colored border. The map shall show the definite location of the subdivision, and particularly its relation to surrounding surveys.

(f) It shall show the type or types of soil, whether expansive soil conditions are present, and indicate the nature of adverse effects, if any, that will develop as a result of change in moisture content or the addition of water to the soil

(g) It shall also satisfy any additional survey and map requirements of the local ordinance.

(See recommendation 4 (d) p. 10.)

An act to amend Sections 11010, 11018 and 11018.1 of the Business and Professions Code, relating to subdivided lands.

The people of the State of California do enact as follows:

SECTION 1. Section 11010 of the Business and Professions Code is amended to read:

11010. Prior to the time when subdivided lands are to be offered for sale or lease, the owner, his agent or subdivider shall notify the commissioner in writing of his intention to sell or lease such offering

The notice of intention shall contain the following information:

(a) The name and address of the owner.

(b) The name and address of the subdivider.

(c) The legal description and area of lands

(d) A true statement of the condition of the title to the land, particularly including all encumbrances thereon

(e) A true statement of the terms and conditions on which it is intended to dispose of the land, together with copies of any contracts intended to be used.

(f) A true statement of the provisions, if any, that have been made for public utilities in the proposed subdivision, including water, electricity, gas and telephone facilities

(g) A true statement of the use or uses for which the proposed subdivision will be offered

(h) A true statement of the provisions, if any, limiting the use or occupancy of the parcels in the subdivision.

(i) A true statement of the amount of fill used, or proposed to be used on each lot, and a true statement on each lot, and a true statement on the soil conditions in the subdivision supported by engineering reports showing the soil has been, or will be, prepared in such a manner that structural damage will not result.

(j) Such other information as the owner, his agent, or subdivider, may desire to present

SEC. 2. Section 11018 of said code is amended to read:

11018. The Real Estate Commissioner shall make an examination of any subdivision, and shall, unless there are grounds for denial, issue to the subdivider a public report authorizing the sale or lease in this state of the lots or parcels within the subdivision The commissioner may publish the report

The grounds for denial are

(a) Failure to comply with any of the provisions in this chapter or the regulations of the commissioner pertaining thereto.
