PREFACE

Digests

The Summary Digest consists of a short summary of each law enacted, and of each concurrent or joint resolution adopted by the Legislature in 1997.

The text of the Summary Digest is arranged numerically by chapter number.

Superior numbers following the title refer to a Governor's Message affecting that law. These are printed after the digests in the "Digest Chapters Superior Numbers" section.

Cross Reference Tables

Cross reference tables are arranged numerically by bill or resolution number and indicate the chapter number of each.

New General Laws

Lists new general laws passed in the years 1989–1997 which do not specifically amend, add to, or repeal any existing code or general law.

Index

A subject matter index to all measures, including resolutions, is included.

Statutory Record

This edition of the Summary Digest includes a statutory record for 1989–1997. Superior numbers following the *Effect* refer to a special condition affecting that section.

Cumulative statutory records for 10-year periods, 1979–1988, 1969–1978, 1959–1968 and 1949–1958, and for the 16-year period, 1933–1948, are published in separate volumes, which supplement the original statutory record, 1850–1932, published in 1933.

EFFECTIVE DATES

Regular Session

The 1997–98 Regular Session convened on December 2, 1996, and the interim study recess commenced on September 13, 1997. Statutes enacted in 1997, other than those taking immediate effect, will become effective January 1, 1998. In absence of other considerations, the provisions of a statute become operative on the date it takes effect. Digests indicate statutes taking immediate effect.

An urgency statute, and a statute calling an election, providing for a tax levy, or making an appropriation for the usual current expenses of the state may take effect immediately. Such a statute becomes *effective* on the date it is filed with the Secretary of State.

However, any statute may, by its own terms, delay the *operation* of its provisions until the happening of some contingency, until a specified time, or until a vote of the electors at a statewide election. Also, a later statute or a general provision in a particular code may delay the operation of a statute to a time after its effective date.

The effective date of a joint or concurrent resolution is the date it is filed with the Secretary of State.

A constitutional amendment proposed by the Legislature and adopted by the people takes effect the day after the election unless the measure provides otherwise.

Extraordinary Sessions

An urgency statute enacted at a special session of the Legislature takes effect immediately, as outlined above, and the same rules apply with respect to a delayed *operative date*. A nonurgency statute takes effect on the 91st day after adjournment of the special session at which the bill was passed. The effective date of a concurrent resolution is the date it is filed with the Secretary of State.

The 1997–98 First Extraordinary Session convened in the Assembly on January 14, 1997, and in the Senate on January 13, 1997. This Extraordinary Session had not been adjourned prior to publication of this Summary Digest; please refer to the succeeding year's Summary Digest.

DIGESTS OF STATUTES
ENACTED IN 1997

1997–98 REGULAR SESSION

BILL CHAPTERS

Ch. 1 (AB 18) Mazzoni. Schools: teachers.

(1) Existing law, that is effective but not operative because its operation is contingent on the chaptering of AB 2460, a bill that was not enacted during the 1995-96 Regular Session, provides all of the following:

(a) That, until July 1, 1999, the earnings paid to a member of the State Teachers' Retirement System who retired from service with an effective date on or before July 1, 1996, and who is employed by a school district to provide direct instruction to pupils in grades kindergarten through 12 is exempt from specified provisions relating to the amount of compensation that may be received without a reduction in his or her retirement allowance if specified conditions are met, including, among others, the condition that the employment is necessary to meet the objectives of the Class Size Reduction Program.

(b) That, with respect to a person holding a valid California credential who is employed for purposes of the Class Size Reduction Program, that person may be employed on a temporary basis by the governing board of a school district if he or she has been employed in a position requiring certification in any school district within 39 months prior to employment with the district, or on the condition that he or she will take the state basic skills proficiency test within one year of the date of his or her employment, as specified.

(c) The deletion of a requirement that, before hiring a district intern, the governing board of any school district that maintains kindergarten or grades 1 to 12, inclusive, or that maintains specified programs, certify to the Commission on Teacher Credentialing that an insufficient number of fully credentialed teachers are available, and the enactment of a requirement that any district interns be hired in consultation with an accredited institution of higher education offering an approved program of pedagogical teacher preparation.

(d) The reappropriation of \$4,500,000 from the Proposition 98 Reversion Account of the General Fund to the Commission on Teacher Credentialing in augmentation of Item 6360-101-0001 of the Budget Act of 1996 for incentive grant funding to school districts and county offices of education participating in the alternative teacher certification program.

(e) The appropriation of \$100,000 from the General Fund to the Commission on Teacher Credentialing for the administration of the incentive grant program for alternative teacher certification in augmentation of Item 6360-001-0001 of the Budget Act of 1996.

This bill would repeal the condition that prevents the operation of these provisions, thereby causing these provisions to become operative and making an appropriation.

(2) To the extent the funds appropriated by this bill are allocated to a school district, as defined by existing law for purposes of Section 8 of Article XVI of the California Constitution, those funds may be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 2 (SB 20) Maddy. Cal-bred awards.

(1) Under existing law, any association conducting a race meeting that includes Arabian horseracing is required to deposit a specified percentage of the handle with the officially recognized organization representing Arabian horsemen designated by the California Horse Racing Board for distribution as breeder premiums, owners' awards, stallion awards, and for the promotion of California-bred races and programs.

This bill would conform provisions of the horseracing laws relating to the distribution of the takeout at satellite wagering facilities in the northern zone to that requirement.

(2) Existing law requires 20% of the total advertised purse for any open race, except purses for stakes races, to be distributed as an owner premium to the owner of a California-bred thoroughbred horse conceived by a registered eligible thoroughbred stallion that finishes first in the race, and an amount equal to 10% of the total advertised purse for any open race, except purses paid for stakes races, to be distributed as an owner

premium to the owner of a California-bred thoroughbred horse that finishes first in the race and that was not conceived by a registered eligible thoroughbred stallion.

This bill would require percentages of the winner's share of the purse of a qualifying race, as defined, instead of the total advertised purse for any open race, to be distributed as owner premiums. The bill would also require the official registering agency to develop a policy for the payment of owner premiums in the event of a dead heat that involves one or more registered California-bred horses.

(3) Existing law requires any association conducting a race meeting that includes thoroughbred racing to deposit certain sums with the official registering agency for thoroughbred horses, and requires the official registering agency to distribute a portion of those sums annually to the California-bred race fund for the promotion of California-bred races and for purses for California Cup Day and other California-bred races.

This bill would require any funds not used for those purposes during any year to be redistributed to augment the breeder fund and the stallion fund.

(4) This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 3 (SB 21) Lockyer. State trial court funding.

Existing law, the Budget Act of 1996, appropriates \$192,984,000 from the General Fund to the Trial Court Trust Fund for state trial court funding.

This bill would appropriate an additional \$290,500,000 from the General Fund to the Trial Court Trust Fund in augmentation of the above item.

The bill would declare that it is to take effect immediately, as an urgency statute.

Ch. 4 (SB 181) Kopp. Environmental quality: ballpark property: relocation of occupants or uses: storm or flood damaged public facilities and private levees.

(1) Existing law, the California Environmental Quality Act, requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if the lead agency finds that the project will not have that effect, unless the project is exempt from the act. Existing law exempts from the act emergency repairs to public service facilities necessary to maintain service; projects undertaken, carried out, or approved by a public agency to maintain, repair, restore, demolish, or replace property or facilities damaged or destroyed as a result of a disaster in a disaster-stricken area in which a state of emergency has been proclaimed by the Governor; specific actions necessary to prevent or mitigate an emergency; and emergency projects undertaken, carried out, or approved by a public agency to maintain, repair, or restore an existing highway, damaged as a result of fire, flood, storm, earthquake, or land subsidence, as specified.

This bill would exempt from the act, until January 1, 1999, specified repair, reconstruction, restoration, or rehabilitation of a public facility or private levee damaged or destroyed by the storms and floods of 1997 in a disaster-stricken area for which the Governor has proclaimed a state of emergency.

(2) The bill would also exempt from the act the relocation of occupants or uses from real property under specified provisions pertaining to relocation assistance, and the relocation of occupants or uses from real property of the Port of San Francisco to other real property of the port, if the real property is proposed to be used for an open-air ballpark for major league baseball, is located in a special zoning district permitting, or conditionally permitting, that use, which district was established by the voters of the city and county in which the property is located, and the relocation activities, if considered independently of the proposed ballpark use of the property, would be exempt from the act.

(3) The bill would impose a state-mandated local program by imposing new duties on local agencies with regard to determining the applicability of, and filing and posting notice of, the exemptions.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 5 (AB 74) Bowler. Vehicles: driver's licenses: controlled substances.

(1) Under existing law, until March 1, 1997, the Department of Motor Vehicles, with specified exceptions, is required to immediately suspend or delay the privilege of any person to drive a motor vehicle for 6 months upon receipt of a duly certified abstract of the record of any court showing that the person has been convicted of any specified controlled substance offense. The department is also required, for each successive offense, to suspend or delay the privilege for an additional 6 months.

Until March 1, 1997, a court that convicted a person of any specified controlled substance offense is required to require all driver's licenses held by the person to be surrendered to the court except as specified. The court is also required to transmit a certified abstract of the conviction, together with any driver's license surrendered, to the department not later than 10 days after the conviction.

Until March 1, 1997, the payment of a \$24 fee is required to be made to the department before a driver's license may be issued, reissued, or returned to a person after the suspension or delay of a person's privilege to operate a motor vehicle pursuant to the above provisions.

This bill would enact provisions substantially identical to those specified above and would, additionally, require any law enforcement officer who arrests a person, or issues a notice to appear to a person, for any violation of the specified controlled substance provisions to inform the person of the driver's license sanctions specified above, either orally or in a written form approved by the Judicial Council. The bill would require the law enforcement officer to follow a specified procedure when providing that information. Because the bill would thereby create new duties for local law enforcement entities, it would impose a state-mandated local program.

The bill would make those provisions inoperative on June 30, 1999, and would repeal those provisions on January 1, 2000.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) The bill would provide that it would become operative only if SB 131 of the 1997-98 Regular Session of the Legislature is enacted.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 6 (SB 131) Kopp. Vehicles: controlled substances.

Existing federal law (P.L. 101-516) requires states to enact laws that mandate suspending or revoking the driver's license of any person convicted of specified controlled substance violations or that declare that a state does not wish to impose that sanction. A state's failure to enact those laws would result in the state's loss of federal transportation funds. California enacted a law that terminates on March 1, 1997, that meets the federal requirements.

This bill would declare that the Governor and the Legislature do not wish to impose the sanctions described in the federal law.

The bill would become operative only if AB 74 is also enacted and becomes operative on or before January 1, 1998.

Ch. 7 (SB 39) Johannessen. Income taxes: designations: California Military Museum: D.A.R.E. California.

The Personal Income Tax Law authorizes taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be contributed to the California Military Museum Fund or the D.A.R.E. California (Drug Abuse Resistance Education) Fund. Existing law requires the Franchise Tax Board to determine annually the total amount that is so designated by taxpayers and to notify the Controller of the amounts to be transferred by the Controller from the Personal Income Tax Fund to the Franchise Tax Board and the Controller for the reimbursement of related costs and to the California Military Museum Fund or the D.A.R.E. California (Drug Abuse Resistance Education) Fund. Existing law conditions the expenditure of the moneys in the California Military Museum Fund and in the D.A.R.E. California (Drug Abuse Resistance Education) Fund for the support of the museum and that program, respectively, upon the appropriation of those moneys by the Legislature.

This bill would appropriate moneys in the California Military Museum Fund to the Franchise Tax Board and the Controller for reimbursement of their related costs, not otherwise funded in the Budget Act, and for the support of the museum. The bill would also appropriate \$135,000 from the D.A.R.E. California (Drug Abuse Resistance Education) Fund to the Controller for allocation to D.A.R.E. California for the support of that program.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 8 (SB 23) Johnson. Security interests.

Chapter 49 of the Statutes of 1996, among other things, revised provisions relating to security interests in leases, rents, issues, and profits in real property. That statute provides that sections in effect prior to January 1, 1996, govern contracts entered into and actions and proceedings initiated prior to January 1, 1997.

This bill would revise that provision to provide that sections in effect prior to January 1, 1997, govern contracts entered into prior to January 1, 1997, and actions and proceedings initiated on the basis of these contracts.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 9 (SB 350) Lee. Violence against women.

There is an existing federal law the STOP (Services-Training-Officers-Prosecutors) Violence Against Women Formula Grant Program.

This bill would appropriate \$11,453,000 from the Federal Trust Fund from moneys received by the state from the federal government pursuant to that grant program for allocation to law enforcement, prosecution, victim services, and other programs, as specified. The bill would require all entities receiving funds to report annually to the Legislature and the Office of Criminal Justice Planning on the activities and accomplishments of each individual project or program, including an account of all public and private funds received by the entities for the previous year.

This bill would provide that up to 5% of this appropriation shall be transferred, upon the approval of the Director of Finance, to the Office of Criminal Justice Planning to administer these programs.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 10 (AB 169) Bordonaro. State fire protection.¹

Existing law, items of the Budget Act of 1996, appropriated funds for support of the Department of Forestry and Fire Protection that are available for fire protection.

This bill would appropriate, for expenditure in the 1996-97 fiscal year, \$70,972,000 from the General Fund to the Controller for allocation, in augmentation of those budget items, in accordance with a specified schedule. The bill would authorize the Director of Finance to withhold authorization for the expenditure of certain of those funds available for emergency fire suppression and detection costs until, and to the extent that, preliminary estimates of potential deficiencies are verified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 11 (SB 1) Burton. Health: prostate cancer.

Existing law imposes certain duties on physicians and surgeons in providing services in the diagnosis and treatment of cancer. Existing law urges physicians and surgeons to

NOTE: Superior numbers appear as a separate section at the end of the digests.

make specified information concerning the treatment of prostate cancer available to patients when appropriate.

This bill would establish the Grant H. Kenyon Prostate Cancer Detection Act and would require a physician and surgeon who, during a physical examination, examines a patient's prostate gland, to provide information to the patient about the availability of appropriate diagnostic procedures, including, but not limited to, the prostate specific antigen (PSA) test, if certain conditions are present. The bill would provide that violation of its provisions constitutes unprofessional conduct.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 12 (SB 69) Burton. State trial court funding.

Existing law, the Brown-Presley Trial Court Funding Act, provides for quarterly disbursements by the Controller to the counties of moneys for trial court operations, as specified.

This bill would specify that the Controller may not make the next quarterly trial court funding apportionment after the enactment of the bill to any county until that county has certified to the Controller the total compensation, if any, paid by the county to superior court judges, municipal court judges, and subordinate judicial officers.

The bill would declare that it is to take effect immediately, as an urgency statute.

Ch. 13 (SB 449) Sher. Wrongful death: standing to sue.

Existing law provides for the standing of parties in actions for wrongful death, as specified.

This bill would state that this existing law applies to any cause of action arising on or after January 1, 1993, and that the intent of the Legislature was not to adversely affect the standing of parties in certain actions for wrongful death.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 14 (AB 239) Ortiz. Family law: support.

(1) Existing law requires a court to make an expedited support order if specified information is filed, including the minimum amount the obligated parent or parents are required to pay pursuant to the statewide uniform guideline for support or specified minimum basic standards for adequate care.

This bill instead would specify that the alternative to the statewide uniform guideline would be the minimum basic standards of adequate care for Region 1, as specified.

(2) Existing law requires the use of simplified summons, complaint, and answer forms for specified child support actions brought on and after January 1, 1997.

This bill would require the district attorney to continue to use until September 30, 1997, the procedures and forms in effect on December 31, 1996, for establishing paternity and support orders, unless the district attorney has implemented the new procedures and forms prior to the effective date of this bill.

(3) This bill would declare that it shall take effect immediately as an urgency statute.

Ch. 15 (SB 84) Ayala. Athlete agents: talent agencies.

The Miller-Ayala Athlete Agents Act regulates the activities of athlete agents, as specified. Under the act, certain professional persons are excluded from the definition of "athlete agent" if the professional person offers or provides the type of services customarily provided by that person's profession and does not otherwise recruit or solicit an athlete to enter into any agent contract, endorsement contract, financial services contract, or professional sports services contract, or engage in other specified activities. Existing law also regulates talent agencies, which are licensed by the Labor Commissioner.

This bill would additionally exclude from the definition of "athlete agent" a licensed talent agency, unless the talent agency recruits or solicits a student athlete, as specified, or unless the talent agency, for compensation, seeks to obtain employment for any person to perform on-field play with a professional sports team or organization.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 16 (SB 191) Ayala. Prima facie speed limit: local ordinances.

Existing law had authorized any county or city, which is contained, in whole or in part, within the South Coast Air Quality Management District to declare by ordinance a reduced prima facie speed limit for air pollution control purposes, as specified. That law was repealed as of January 1, 1997.

This bill would reinstate that authorization.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 17 (SB 947) Committee on Judiciary. Maintenance of the Codes.

Existing law directs the Legislative Counsel to advise the Legislature from time to time as to legislation necessary to maintain the codes.

This bill would restate existing provisions of law to effectuate the recommendations made by the Legislative Counsel to the Legislature for consideration during 1997, and would not make any substantive change in the law.

Ch. 18 (SB 115) Burton. Criminal procedure: civil compromise.

Under existing law, when a person injured by an act constituting a misdemeanor has a remedy by a civil action, the offense may be compromised by the victim upon receiving compensation for the injury. Civil compromise is not allowed in cases of domestic violence when the defendant previously has civilly compromised a domestic violence offense within 7 years.

This bill would eliminate the condition on civil compromise in domestic violence cases, thereby prohibiting civil compromise in all domestic violence cases.

Ch. 19 (AB 249) Cunneen. Criminal procedure: conditional examination: recorded testimony.

Existing law authorizes the conditional examination of a witness in specified cases, requires that the testimony of the witness be reduced to writing and authenticated in the same manner as that taken in support of an information, and provides that the deposition or a certified copy may be read in evidence by either party if the court finds that the witness is unavailable.

This bill would authorize the testimony of a witness conditionally examined to be video-recorded and would provide that the recording may be shown by either party at trial if the court finds that the witness is unavailable.

Ch. 20 (AB 710) Kuehl. Alcoholic beverages: on-sale licenses.

The Alcoholic Beverage Control Act provides for the issuance of an on-sale general license and provides for the issuance of various special or temporary licenses.

This bill would authorize the issuance of an on-sale general bona fide public eating place license to any nonprofit charitable arts trust, as defined, that meets specified conditions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 21 (AB 114) Battin. Alcoholic beverages: licenses: golf course facility.

The Alcoholic Beverage Control Act provides that a club license for a golf club entitles the licensee to make sales of alcoholic beverages from any golf cart, as defined, operating on the golf club premises.

This bill would delete that provision and instead provide that any license issued to any golf course facility, or any license issued to a licensee that operates at any golf course facility, entitles the licensee to make sales of alcoholic beverages from any golf cart, as defined, that the licensee operates on the golf course premises.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 22 (AB 163) Baugh. Grand juries: exculpatory evidence.

Under existing law, the grand jury is not required to hear evidence for the defendant, but is required to weigh all the evidence submitted to it. When it has reason to believe that other evidence within its reach will explain away the charge, the grand jury is required to order that evidence to be produced, and for that purpose may require the district attorney to issue process for witnesses.

This bill would require the prosecutor, if he or she is aware of exculpatory evidence, to inform the grand jury of the nature and existence of this evidence and of the duties of the grand jury as specified above. The bill would provide that if a failure to comply with this provision results in substantial prejudice, that failure shall be grounds for dismissal of the portion of the indictment related to that evidence.

Ch. 23 (AB 979) Leach. Boating under the influence: arrest.

Existing law makes it a crime to operate any vessel or manipulate water skis, an aquaplane, or a similar device while under the influence of an alcoholic beverage, any drug, or the combined influence of an alcoholic beverage and any drug.

This bill would provide that information, as specified, obtained from certain officers of the United States Coast Guard who directly observed the offense may be used as the sole basis for establishing the necessary reasonable cause for a peace officer of this state to make an arrest for violations of those provisions.

Ch. 24 (AB 1536) R. Wright. Child abuse and neglect: reports.

Existing law requires specified persons to confidentially report known or suspected child abuse to a child protective agency. Unauthorized disclosure of these reports is a misdemeanor. However, a specific exception authorizes the Board of Prison Terms to subpoena reports that are not unfounded and concern only the current incidents upon which parole revocation proceedings are pending against a parolee charged with child abuse.

This bill would expand this exception to authorize the Board of Prison Terms to also subpoena an employee of a county welfare department who can provide relevant evidence.

Ch. 25 (AB 1603) Bustamante. Liability: common consumer products.

Existing law provides that in a product liability action, a manufacturer or seller is not liable if the product is a common consumer product intended for personal consumption, such as, among other things, tobacco, is inherently unsafe, and is known to be unsafe by the ordinary consumer, as specified.

This bill would provide that the above provision does not apply to an action brought by a public entity to recover the value of benefits provided to individuals injured by a tobacco-related illness caused by the tortious conduct of a tobacco company or its successor in interest. The bill would also provide that the barring of an injured individual's claim by the above provision shall not constitute a defense to an action brought by a public entity. The bill would state that it does not constitute a change in, but is declaratory of, existing law.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 26 (AB 973) Papan. Alcoholic beverages: tied-house restrictions: signs.

The Alcoholic Beverage Control Act provides that any manufacturer, winegrower, manufacturer's agent, rectifier, distiller, bottler, importer, or wholesaler, or any officer, director, or agent of any of those persons, may furnish, give, lend, or rent specified types of signs. Existing law includes signs relating to malt beverages advertising the beer manufacturer's product and principally bearing the manufacturer's name, including acrylic table tentholders.

This bill would revise those provisions relating to signs by referring to beer instead of malt beverages and would remove acrylic table tentholders from the list of signs that those persons may furnish, give, lend, or rent.

Ch. 27 (AB 1562) Committee on Budget. Budget Act of 1996: contingencies, emergencies, and deficiencies.

(1) The Budget Act of 1996 appropriated \$5,000,000 from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies or emergencies upon written authorization from the Director of Finance.

This bill would appropriate \$466,159,000, as scheduled, in augmentation of these Budget Act appropriations. This bill would authorize the Director of Finance to withhold

authorization for the expenditure of funds appropriated in the bill until preliminary estimates of potential deficiencies are verified.

(2) The Budget Act of 1996 appropriated \$312,291,000 from the General Fund for the support of the Department of the Youth Authority.

This bill would appropriate \$10,000,000 from the General Fund in augmentation of that appropriation, as a 6-month, interest-free loan to the Department of the Youth Authority to allow it to meet operational cash-flow needs resulting from delays in the department's recovery of reimbursements.

(3) The Budget Act of 1996 appropriated \$74,665,252 from the Federal Trust Fund for the support of the State Department of Education.

This bill would appropriate \$459,000 from the Federal Trust Fund in augmentation of that appropriation, for administrative costs of the department for mediation and fair hearing services in connection with designated special education programs for exceptional children.

(4) The Budget Act of 1996 appropriated \$24,136,000 from the General Fund to the Department of Corrections for local assistance purposes.

This bill would appropriate \$11,540,000 from the General Fund in augmentation of that appropriation, to make immediate payment pursuant to that item of the unpaid claims of counties.

(5) This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 28 (SB 203) Lewis. Insurers: mortality tables.

Existing law regulates the types of benefits to be paid under a policy of life insurance in the event of a default in premium payments or upon surrender of the policy, and also regulates the manner in which reserves are to be maintained by insurers issuing life insurance policies and annuity and pure endowment contracts. Existing law provides for insurers to use certain mortality tables for these purposes that have been approved by the Insurance Commissioner through promulgation of a regulation.

This bill would alternatively allow the commissioner to approve mortality tables through issuance of a bulletin.

Ch. 29 (AB 700) Alby. Sex offenses: statute of limitation.

Existing law provides a statute of limitations period within which a criminal prosecution may be filed. For felony sex offenses, that period of limitations is 6 years. Existing law also provides two exceptions for specified sex offenses where the 6-year statute of limitations has expired. These provisions provide that the general period of limitations does not commence to run until the offense has been reported to a responsible adult or a law enforcement agency under specified conditions. Existing law also provides that effective July 1, 1997, these provisions are to apply retroactively and shall revive any cause of action barred by the general period of limitations under specified conditions. Existing law further provides that for the first 180 days of 1997, cases that were subject to these provisions, but were either not filed or were filed and dismissed, may be filed or refiled pursuant to these provisions.

This bill would extend this 6-month period of forgiveness within which a criminal prosecution may be filed or refiled pursuant to the above provisions, by providing that a charging document may be filed or refiled within 180 days after a decision by either the California Supreme Court or the United States Supreme Court, deciding whether retroactive application of these provisions is constitutional.

This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 30 (SB 1261) Sher. Special education.

(1) Existing law authorizes the Superintendent of Public Instruction to conduct a statewide pilot program for the 1992-93, 1993-94, 1994-95, 1995-96, and 1996-97 fiscal years to enable and encourage school districts and county offices of education, either individually or through special education local plan areas, to establish programs in public schools for individuals with exceptional needs who are currently placed in nonpublic, nonsectarian schools and to develop plans for the return of these pupils to an appropriate public school program, with a view of determining whether these new programs can

provide an effective mainstreaming education program in a less restrictive environment that is appropriate to each pupil's needs for services as specified in his or her written individualized education program.

Existing law requires the Superintendent of Public Instruction to conduct a similar pilot program in San Mateo County and in the Contra Costa County special education local plan area for the 1993-94, 1994-95, 1995-96, and 1996-97 fiscal years to encourage and enable the San Mateo County Office of Education and the Contra Costa County special education local plan area to identify pupils who currently are placed into a nonpublic school program by San Mateo County school districts or Contra Costa County school districts, respectively, but are able to be returned to an appropriate public school program, and to identify seriously emotionally disturbed pupils who currently are in a public school program who are imminently at risk of placement in a nonpublic school program or another more restrictive setting. The purpose of each pilot program is to establish new public school programs that maintain an effective mainstreaming education program that is appropriate to each pupil's needs for the services specified in a pupil's individualized education program, and thereby avoid placing those pupils in a nonpublic school setting. These pilot programs and the statewide pilot program operate through the 1996-97 fiscal year and the provisions governing these programs are repealed as of January 1, 1999.

This bill would extend the operation of the pilot programs in San Mateo County and Contra Costa County and the statewide pilot project to the 1997-98 fiscal year, thereby imposing a state-mandated local program, and would repeal these provisions on January 1, 2000.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 31 (SB 349) McPherson. California State University: authority to perform specified functions.

Existing law authorizes the Trustees of the California State University, notwithstanding the Property Acquisition Law and the general authority of the Director of General Services over state real property, to perform specified functions without prior approval of any other state department or agency, when necessary to carry out the purposes of the California State University.

This bill would authorize the trustees, without that approval, to sell improvements located on the land at the California State University, Monterey Bay campus that was transferred to the trustees from the United States of America and used for housing purposes in circumstances in which the underlying ownership in the land remains in the trustees.

The bill would require the trustees to deposit in local trust accounts moneys received from the sale of those improvements and would require that funds so deposited be continuously appropriated without regard to fiscal years for specified purposes, thereby constituting an appropriation.

Ch. 32 (AB 1164) R. Wright. Private Postsecondary and Vocational Education Reform Act of 1989.

(1) Existing law renders the Private Postsecondary and Vocational Education Reform Act of 1989 inoperative on June 30, 1997, and repeals the act on January 1, 1998.

This bill would render the act inoperative on July 18, 1997, and would repeal the act on January 1, 1998. Thus, the bill would extend the existence of criminal penalties under the act until July 18, 1997, thereby imposing a state-mandated local program. The bill also would make an appropriation by continuing the operation of continuous appropriations in the act until July 18, 1997.

The bill also would repeal the delegation authority of the Council for Private Postsecondary and Vocational Education which is included in the act.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 33 (AB 1398) Oller. Peace officers: Washoe tribal law enforcement officers.

Existing law expressly includes all persons designated by a Native American tribe recognized by the United States Secretary of the Interior, who are deputized by the county sheriff as reserve or auxiliary sheriffs or reserve deputy sheriffs, among those reserve officers who are considered peace officers, if they satisfactorily complete an introductory course of training.

This bill would provide that any qualified person who is appointed as a Washoe tribal law enforcement officer is not a California peace officer, but may exercise the powers of a Washoe tribal peace officer when engaged in the enforcement of Washoe tribal criminal laws against any person who is an Indian on Washoe tribal land.

Ch. 34 (AB 728) Bowler. Bail: serious felonies.

Under existing law, in setting, reducing, or denying bail, the judge or magistrate is required to take into consideration the protection of the public, the seriousness of the offense charged, the previous criminal record of the defendant, and the probability of his or her appearing at trial or hearing of the case.

This bill would provide that, before reducing the bail of a person charged with a serious felony below the amount established by the bail schedule approved for the county, the court shall make a finding of unusual circumstances and shall set forth those facts on the record. The bill would provide that "unusual circumstances" do not include the fact that the defendant has made all prior court appearances or has not committed any new offenses.

Ch. 35 (AB 1448) Committee on Labor and Employment. Employment: wages: penalties.

Existing law prohibits an employer or other person acting either individually or as an officer, agent, or employee of another person, from paying or causing to be paid to any employee a wage less than the minimum fixed by an order of the Industrial Welfare Commission. Existing law imposes, for any initial violation that is intentionally committed by an employer or that person, a civil penalty of \$50 for each underpaid employee for each pay period for which the employee is underpaid. Existing law imposes, for any subsequent violation for the same specific offense, a civil penalty of \$100 for each underpaid employee for each pay period for which the employee is underpaid regardless of whether the initial violation is intentionally committed.

This bill would increase the amount of the civil penalty from \$100 to \$250 that may be imposed for any subsequent violation of the same specific offense.

Ch. 36 (SB 197) Craven. Political Reform Act of 1974: statements of economic interests: assuming office.

Existing provisions of the Political Reform Act of 1974 require elected officials, candidates for elective office, and specified officials and employees of state and local agencies to periodically file a statement of economic interests disclosing specified financial interests of the official including, among other things, specified sources of gifts and income to, and investments and real property interests of, the official. When persons are appointed to specified public offices, such as an elective office or certain high-ranking appointive offices, they are required to file a statement of economic interests, known as an assuming office statement, within 10 days after assuming that office.

This bill would require persons who are appointed to these specified public offices to file their assuming office statements within 30 days, instead of 10 days, after the date of assuming office.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

Ch. 37 (AB 1380) Ashburn. Human services.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which each county provides services to eligible aged, blind, and disabled persons, in order to permit them to remain in their own homes and avoid institutionalization.

Under existing law, the City and County of San Francisco is permitted to increase the wages of all IHSS providers in the 1995–96 and 1996–97 fiscal years.

This bill would extend this authority to the 1997–98 fiscal year.

Existing law establishes the California Partnership for Long-Term Care Pilot Program, to link private long-term care insurance and health care service plan contracts with in-home supportive services and Medi-Cal benefits.

Under existing law, resource protection provided by this pilot project, under which individuals who would otherwise be ineligible for certain social and health services benefits would remain eligible to receive them, shall be effective only for long-term care policies and health care service plan contracts that cover long-term care services, when the policy or contract is delivered, issued for delivery, or renewed during an enrollment period of July 1, 1993, to the earlier of June 30, 1998, or before the termination of the pilot project.

This bill would extend this date from June 30, 1998 until June 30, 2000.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 38 (SB 919) Rainey. Local government taxes, fees, assessments, and charges.

Article XIII C of the California Constitution generally requires a majority vote of the electorate for a local government to impose, extend, or increase any general tax and a $\frac{2}{3}$ vote of the electorate to impose, extend, or increase any special tax and permits the use of the initiative to affect local taxes, assessments, fees, and charges. Article XIII D of the California Constitution generally requires that assessments, fees, and charges be submitted to property owners for approval or rejection after the provision of written notice and the holding of a public hearing.

This bill would enact the Proposition 218 Omnibus Implementation Act to prescribe specific procedures and parameters for local jurisdictions in complying with Article XIII C and Article XIII D of the California Constitution.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 39 (AB 150) Alby. Unemployment compensation: independent contractors: chiropractors.

Existing law provides for the payment of unemployment compensation to unemployed individuals who meet certain eligibility requirements. Existing law excludes from "employment" professional services performed by an individual working as an independent contractor and establishes a rebuttable presumption that services provided by certain individuals are rendered as an independent contractor.

This bill would include services provided by a chiropractor among the services rendered as an independent contractor for purposes of this provision.

Ch. 40 (AB 315) Granlund. Alcoholic beverages: tied-house restrictions.

Existing provisions of the Alcoholic Beverage Control Act, known as "tied-house" restrictions, generally prohibit manufacturers, winegrowers, bottlers, importers, wholesalers, and others from performing certain activities, with specified exceptions. Existing law allows any winegrower, wine blender, beer manufacturer, brandy manufacturer, distilled spirits manufacturer, distilled spirits manufacturer's agent, rectifier, distilled spirits wholesaler, and beer and wine wholesaler, or their authorized agents, to perform certain services for off-sale retail licensees at or on the premises of the off-sale retail licensee with the licensee's permission relating to stacking, rotating, servicing, and taking inventory of stock.

This bill would allow any beer manufacturer or beer and wine wholesaler, or their authorized agents, to provide these same services to any on-sale retail licensee with respect to beer only. The bill would also make technical and clarifying changes.

Ch. 41 (AB 485) Papan. Schools: youth center.

Existing law permits the governing board of any school district to grant the use of school facilities or grounds as a civic center, as specified, for supervised recreational activities including, but not limited to, sports league activities for youths that are arranged for and supervised by entities, as specified.

This bill would specify that the governing board of any school district may grant the use of school facilities or grounds as a civic center, as specified, for a community youth center.

Ch. 42 (SB 257) Lee. Redevelopment: low- and moderate-income housing.

Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, including, among other specified conditions, a high crime rate that constitutes a serious threat to the public safety and welfare, in those communities. Also under the Community Redevelopment Law, not less than 20% of all tax-increment revenues that are allocated to a redevelopment agency are required to be held in a separate Low- and Moderate-Income Housing Fund and used by the agency for the purposes of increasing, improving, and preserving the community's supply of low- and moderate-income housing available at affordable housing cost to persons and families of specified income levels.

This bill would establish a pilot program that would permit redevelopment agencies in specified urban counties in order to encourage county peace officers, as defined, who are assigned to that community based on a contract for law enforcement services with a county, to purchase homes, as a principal residence, located within an urban neighborhood, as defined, in the community where the crime rate, as defined, is at least 110% of the countywide crime rate over the last year, by providing the peace officer with a downpayment, not to exceed 20% of the purchase price of the home, with prescribed restrictions and obligations through the use of funds from its Low- and Moderate-Income Housing Fund. This bill also would require the governmental entity employing the peace officer, pursuant to specified provisions of law, to reimburse the actual and necessary moving expenses of the peace officer, or any member of his or her immediate family residing with the officer, where the officer has found it necessary to relocate because he or she has received a credible threat to his or her life because of the employment.

The bill also would require a redevelopment agency that provides downpayments under these provisions to transmit a report, on or before January 1, 2002, to the Chairs of the Assembly Housing and Community Development Committee and Senate Housing and Land Use Committee containing specified information that describes the effect of the program on the incidence of crime in the affected urban neighborhoods and in the relevant county.

The bill also would make findings of the Legislature that criminal activity, including violent crimes, is prevalent in some urban neighborhoods constituting a serious threat to the public safety and welfare and that the presence of peace officers who also reside in urban neighborhoods can reduce criminal activities.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique circumstances within the Counties of Alameda, Contra Costa, Los Angeles, Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Mateo, Santa Clara, and Ventura, and within cities in other counties if the city has a population of greater than 100,000 residents, that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

This bill would repeal its provisions as of January 1, 2003, unless a later enacted statute, that is enacted before January 1, 2003, deletes or extends that date.

Ch. 43 (SB 419) Karnette. County employees: retirement.

The County Employees Retirement Law of 1937 generally requires regular interest to be credited to all contributions in the retirement fund.

This bill would require regular interest to be credited to the accounts of former members who have not terminated employment.

Existing law requires written notification of retirement eligibility to be transmitted to former county employees who have attained age 70 years.

This bill would make a technical, nonsubstantive change in that procedure.

The bill would also prescribe an unclaimed benefit procedure.

Ch. 44 (AB 1272) Pacheco. Statewide Pupil Assessment Review Panel.

Existing law requires the Statewide Pupil Assessment Review Panel to review tests and assessments, as specified, submitted by the State Board of Education. Existing law prohibits these tests and assessments from containing any questions or items that solicit or invite disclosure of a pupil's, or his or her parents' or guardians', personal beliefs or practices in sex, family life, morality, or religion, or evaluate personal behavior characteristics, including but not limited to, honesty, integrity, sociability, or self-esteem.

This bill would permit the Statewide Pupil Assessment Review Panel to meet in closed session with a publisher of tests or assessments for the purpose of addressing questions and clarifying issues that relate to ensuring that the content of the publisher's tests or assessments do not contain any questions or items that are prohibited, as specified.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 45 (SB 344) Monteith. Transportation: local funding.

Existing law requires a local transportation planning agency, as defined, to allocate money from the local transportation fund to the agency, to counties and cities, and to transit operators in specified amounts for specified purposes.

This bill would require that funds made available as specified above to the County of Stanislaus and the cities in that county be allocated in other specified amounts for other specified purposes.

The bill would require that specified apportionments and allocations made by the Stanislaus Area Association of Governments to the county and the cities in the county be in accordance with a specified cost-sharing criteria approved by the association.

Ch. 46 (AB 463) Machado. Nonprofit cooperative associations.

Existing law provides for the formation of nonprofit cooperative associations for the purpose of producing, processing, marketing, shipping, or selling the agricultural products of its members, manufacturing, selling, or supplying its members with machinery, equipment, or supplies, or financing of the activities of its members. The bylaws of such an association may prescribe the amount of any dividends, not to exceed 8% per annum, that may be declared on the stock or membership capital.

This bill would specify that the 8% per annum limit on the amount of dividends applies only to dividends that are payable out of the excess of association income over association expenses attributable to business transacted with or for members.

Ch. 47 (AB 211) Baca. Criminal justice administration fees.

(1) Existing law provides that any city, special district, school district, community college district, college, university, or other local arresting agency whose officer or agent arrests a person is entitled to recover any criminal justice administration fee imposed by a county from the arrested person if the person is convicted of any criminal offense related to the arrest. Existing law requires a judgment of conviction to contain an order for payment of the criminal justice administration fee by the convicted person, and authorizes execution to be issued on the order in the same manner as a judgment in a civil action.

This bill would require execution to be issued on the order in the same manner as a judgment in a civil action.

(2) Existing law provides that any person booked into a county jail pursuant to any arrest by any governmental entity not specified in (1) above is subject to a criminal justice administration fee for administration costs incurred in conjunction with the arresting and booking if the person is convicted of any criminal offense relating to the

arrest and booking. Existing law requires, if the person has the ability to pay, a judgment of conviction to contain an order for payment of the criminal justice administration fee by the convicted person, and authorizes execution to be issued on the order in the same manner as a judgment in a civil action.

This bill would require execution to be issued on the order in the same manner as a judgment in a civil action.

Ch. 48 (AB 340) Alby. Domestic violence: protective orders.

Existing law provides that, in all cases where the defendant is charged with a crime of domestic violence, the court, upon a good cause belief that harm to, or intimidation or dissuasion of, a victim or witness has occurred or is reasonably likely to occur, shall consider issuing specified orders on its own motion.

This bill would provide, in addition, that in those cases in which a complaint, information, or indictment charging a crime of domestic violence has been issued, a restraining order or protective order against the defendant issued by the criminal court in that case has precedence over any other outstanding court order against the defendant.

Ch. 49 (AB 359) House. Employee Housing Act.

Existing law, known as the Employee Housing Act, provides for the licensure and regulation of employee housing, formerly known as labor camps, as defined, by the Department of Housing and Community Development.

This bill would require every occupant of employee housing to properly use the facilities furnished and to comply with the relevant maintenance and sanitation provisions of the Employee Housing Act.

The bill would provide that the provisions of the Employee Housing Act relating to enforcement of the act would not apply to these provisions.

Ch. 50 (AB 669) R. Wright. Real property: foreclosure.

(1) Existing law provides for the regulation of a contract between an equity purchaser, who is defined as a specified person who acquires title to a defined residence in foreclosure, and an equity seller, who is defined as the seller of a residence in foreclosure, that is incident to the sale of a residence in foreclosure. Existing law provides that the equity seller has, in addition to a right of rescission, the right to cancel any contract with an equity purchaser until midnight of the 5th business day following the day on which the equity seller signs any contract or until 8 a.m. on the day scheduled for the sale of the property pursuant to a deed of trust, whichever occurs first.

This bill would provide that the right to cancel extends until midnight of the 5th business day following the day on which the equity seller signs a contract subject to the above-described regulatory provisions or until 8 a.m. on the day scheduled for the sale of the property, as specified.

(2) Existing law requires the equity purchaser to provide the equity seller with a copy of the contract and notice of cancellation specifying the date and time by which the equity seller may cancel the sale without any penalty or obligation.

This bill would allow the equity seller to cancel the contract until the equity purchaser has complied with this requirement.

(3) Existing law states that when an equity purchaser purports to hold title as a result of an absolute conveyance by an equity seller who either reserved the right to repurchase, or was given the option of repurchasing the residence, the equity purchaser shall not cause any encumbrances to be placed on the property without the written consent of the equity seller.

This bill would provide that nothing in the above-described provision precludes the application of existing law prohibiting an equity purchaser from transferring or encumbering an interest in the residence in foreclosure to a 3rd party, as specified.

(4) Existing law provides for the regulation of defined foreclosure consultants. Existing law requires a court to award exemplary damages of at least three times the compensation received by the foreclosure consultant for the violation of specified provisions.

This bill would revise this provision to also require an award of exemplary damages of 3 times the homeowner's actual damages for any violation of other specified provisions.

(5) Existing law requires a foreclosure consultant to provide the owner with a copy of the contract and attached notice of cancellation.

This bill would allow the owner to cancel the contract until the foreclosure consultant has complied with this requirement.

(6) This bill also would add a provision regarding legislative intent, as specified.

Ch. 51 (AB 769) Baugh. Orange County Sanitation District: formation.

Existing law, the County Sanitation District Act, provides for the formation, consolidation, officers, and sets forth the powers of, county sanitation districts.

This bill would, notwithstanding other provisions of law, require a sanitation district in Orange County created by prescribed consolidation to be referred to as a consolidated sanitation district for purposes of this provision and would specify the composition and organization of its governing board.

Ch. 52 (AB 1097) Committee on Governmental Organization. Open meetings.

Under existing law, the meetings of a state body are required to be open and public. Existing law authorizes a state body to hold an open or closed meeting by teleconference as defined and repeals that authority on January 1, 1998.

This bill would delete that repeal date.

Ch. 53 (AB 1502) Campbell. Redevelopment: transfer of territorial jurisdiction.

Under the existing Community Redevelopment Law, if all, or a substantial portion, of the noncontiguous territory of a redevelopment project area of a county redevelopment agency is subsequently annexed to a city or included within the boundaries of a new city, the jurisdiction of the county redevelopment agency over all, or a substantial portion of the noncontiguous area may be transferred to the city redevelopment agency, as specified.

This bill would provide that if all, or any portion, including a subarea of a project area, of the Orange County Neighborhood Development and Preservation Project is presently within, or subsequently annexed to a city or otherwise included within the boundaries of a city, the territorial jurisdiction of the agency of the county over all, or any portion including a subarea of the project area, of the territory in that project area may be transferred from the agency of the county to the agency of the city pursuant to existing provisions of law, except that the city ordinance adopting the same redevelopment plan as adopted by the board of supervisors may amend the plan.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique circumstances within the County of Orange that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

Ch. 54 (AB 281) Hertzberg. Schools: school district governing board.

Existing law specifies the membership requirements of the governing board of a school district situated in certain cities and declares that those requirements do not apply to a school district that is situated in a city governed by a charter that provides for a governing board consisting of 7 members, as prescribed.

This bill would, instead, provide that those requirements do not apply to a school district that is situated in a city governed by a charter that provides for a governing board consisting of not less than 7 members who are elected from districts that contain, as nearly as practicable, equal fractions of the total population of the school district.

Ch. 55 (AB 943) Washington. Buildings: buildings in violation of the State Housing Law: City of Los Angeles.

The existing State Housing Law requires an enforcement agency that has determined that a building is substandard to commence proceedings to abate the violation by repair, rehabilitation, or demolition of the building. Existing law permits the enforcement

agency to require vacation and demolition or to vacate, repair, or demolish the building if the repair work is not done as scheduled, or if the owner does not make a timely choice to repair or demolish the building or selects an option which cannot be undertaken or completed within a reasonable period of time, as determined by the department. The State Housing Law requires an enforcement agency to give preference to the repair of a building whenever it is economically feasible to do so without having to repair more than 75% of the dwelling, as determined by the enforcement agency.

This bill would make technical, nonsubstantive changes in these provisions. The bill also would require that, within the City of Los Angeles, an enforcement agency give preference to the repair of a vacant single-family dwelling whenever it is economically feasible to do so without having to repair more than 50% of the dwelling, as determined by the agency.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, because of the unique circumstances applicable to the City of Los Angeles and set forth in the bill, a general statute cannot be made applicable and a special statute is therefore necessary.

Ch. 56 (AB 1098) Ortiz. Dissolution of marriage.

Existing law authorizes a court in a proceeding for dissolution of marriage to sever and grant an early and separate trial on the issue of the dissolution of the marriage apart from other issues. The court is authorized to impose any of certain enumerated conditions for granting that severance, including requiring indemnification of the other party for certain expenses and adverse consequences.

The bill would require the service of a preliminary declaration of disclosure with a completed schedule of assets and debts on the nonmoving party, except as specified. The bill would also provide that if a party dies after the entry of judgment granting dissolution, the obligations imposed by the provisions described above would continue to be enforceable, as specified.

Ch. 57 (SB 456) Lewis. Postsecondary education.

(1) Existing law, governing the sale or lease of real property by the governing board of a community college district, requires the governing board to establish a bidding process and to call for oral bids before accepting any written proposal.

This bill would permit, notwithstanding these and other provisions of existing law, the Board of Governors of the California Community Colleges to authorize the governing board of any community college district within Orange County to enter into a negotiated sale of real property owned by the district if that governing board previously opened the bidding process 2 or more times to sell the real property and did not accept any bids.

(2) Existing law, until January 1998, authorizes a community college district in Orange County, that is unable to access funds of the community college district deposited into the county treasury as a result of the financial crisis that led to the filing of a petition for the declaration of bankruptcy of Orange County, to deposit the proceeds derived from the sale of surplus property of the district into the general fund of the district and to expend those proceeds for general fund purposes. Existing law also requires the proceeds from the sale of surplus property to first be used to replenish fully any capital outlay funds or accounts that were lost due to the Orange County financial crisis.

This bill would continue that existing law beyond January 1, 1998, by extending that repeal date to January 1, 2000.

(3) The bill would declare the necessity for a special law applicable only to community college districts in Orange County.

Ch. 58 (SB 1318) Polanco. Education: charter schools: county offices of education.

Existing law, known as the Charter Schools Act of 1992, authorizes a procedure for the establishment of charter schools. Under existing law, charter schools receive public funding in accordance with specified provisions, but are not generally subject to the laws governing school districts. Existing law authorizes school districts to review petitions for

the establishment of, and to grant charters for the operation of, charter schools, as specified.

This bill would provide that charter schools operating under a charter approved before June 1, 1997, by the County Board of Education for the County of Los Angeles and that serve at-risk pupils may continue to operate until June 30, 1999.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 59 (AB 157) Villaraigosa. Personal rights: breastfeeding.

Existing law guarantees certain personal rights, including the right to privacy.

This bill would authorize a mother to breastfeed her child in any location, except as specified, where she and her child are otherwise authorized to be present.

Ch. 60 (AB 286) Honda. Public employees' retirement.

The Public Employees' Retirement Law prescribes different levels of benefits for various categories of safety members.

This bill would authorize contracting agencies to elect to include specified officers or employees in the "local firefighter" category.

Ch. 61 (AB 729) Bowler. Probation and parole.

Existing law provides that a person who has successfully completed probation shall have the accusations or information dismissed and shall be released from all penalties and disabilities resulting from the offense, except as specified. A person who has successfully completed parole may petition for a certificate of rehabilitation and pardon, except as specified.

This bill would provide that these provisions as they relate to a certificate of rehabilitation shall not apply to persons convicted of specified sex offenses.

Ch. 62 (AB 1160) Shelley. Deeds of trust.

Existing law authorizes a borrower under any note or evidence of indebtedness secured by a deed of trust or mortgage on specified real property to terminate future payments for specified private mortgage insurance or mortgage guaranty insurance, as defined, if several conditions are satisfied, except as otherwise provided.

This bill would, notwithstanding the above described provisions and except as specified, provide that the lender or servicer of the loan may not charge or collect future payments from a borrower for private mortgage insurance or mortgage guaranty insurance if specified conditions are met.

Ch. 63 (AB 1165) Richter. Probate: summary disposition.

Existing law provides for the summary disposition of small estates, as specified. Existing law authorizes a public administrator who takes possession or control of, or is appointed personal representative of, an estate pursuant to these provisions, to summarily dispose of the estate in specified circumstances.

This bill would require petitions filed pursuant to these provisions of existing law to contain specified information regarding the decedent and his or her estate.

This bill would incorporate changes made to Section 7660 of the Probate Code proposed by SB 696, to be operative only if SB 696 and this bill are both chaptered and become effective January 1, 1998, and this bill is chaptered last.

Ch. 64 (AB 1365) Ashburn. County employees' retirement.

The County Employees Retirement Law of 1937 limits the application of specified alternative retirement allowance calculations.

This bill would provide that in Kern County these limitations are only applicable to persons who first became members of the retirement system on and after January 1, 1994.

Ch. 65 (SB 26) Maddy. California-bred races.

Existing law requires every licensee conducting a horseracing meeting to provide for the running of at least one race each racing day limited to California-bred horses, to be known as the "California-bred race." Existing law declares the intent of the Legislature that racing associations achieve a goal of distributing at least 10% of the total stakes purses for the racing meeting as purses for California restricted stakes racing.

This bill would require the total amount distributed to horsemen and horsewomen for California-bred stakes races from the purse account to be not less than 10% of the total amount distributed for all stakes races from the purse account at that racing meeting.

Ch. 66 (SB 98) Haynes. Judgments: collection by public agencies.

Existing law provides for the collection of the filing fee in judgments in favor of a public agency in specified actions.

This bill would provide that collection of the filing fee is at the discretion of the public agency when it constitutes the sole amount of the judgment.

Ch. 67 (SB 109) Kopp. Political Reform Act of 1974: foreign entities: contributions and expenditures.

Existing federal law generally prohibits a foreign national from making contributions and expenditures in connection with an election for local, state, or federal public office.

This bill would prohibit a foreign government or foreign principal from making any contribution, expenditure, or independent expenditure in connection with the qualification or support of, or opposition to, any state or local initiative, recall, or referendum measure. The bill would also prohibit any person and any committee from soliciting or accepting a contribution from a foreign government or foreign principal in connection with the qualification or support of, or opposition to, any state or local initiative, recall, or referendum measure. The bill would exempt from this prohibition, a contribution, expenditure, or independent expenditure made by a domestic subsidiary of a foreign corporation if the decision to contribute or expend funds is made by an officer, director, or management employee of the corporation who is a United States citizen or lawfully admitted permanent resident.

The bill would impose a state-mandated local program by making any person who violates this prohibition guilty of a misdemeanor and subject to a fine in an amount equal to the amount contributed or expended.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

Ch. 68 (SB 160) Watson. Health: informed consent.

Existing law, the Protection of Human Subjects in Medical Experimentation Act, prohibits any person from being subjected to any medical experiment unless the informed consent of the person is obtained.

This bill would provide an exemption from the act, until January 1, 2001, for any medical experimental treatment that benefits a patient subject to a life-threatening emergency that is conducted in accordance with prescribed requirements.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 69 (SB 215) Alpert. Criminal procedure: continuance of proceeding.

Existing law specifies the procedures by which a motion to continue any hearing in a criminal proceeding, including the trial, may be made. Continuances may be granted only upon a showing of good cause, which includes, but is not limited to, cases involving allegations of sexual assault or child abuse where the prosecuting attorney assigned to the case has another criminal proceeding in progress in that or another court.

This bill would add cases involving allegations of domestic violence to those cases constituting good cause for a continuance.

Ch. 70 (SB 228) Kelley. Local government reorganization.

Existing law establishes a local agency formation commission in each county to review and approve or disapprove of local governmental agency changes of organization or reorganization within the county and to perform other related functions.

Under existing law, the commission is required to order a commission-initiated change of organization or reorganization to be subject to voter confirmation if the conducting authority finds that a petition requesting confirmation has been signed by at least 10% of the landowners owning at least 10% of the assessed value of land within the territory or by at least 10% of the voters entitled to vote within the affected territory, as specified.

This bill would provide that if the number of landowners or voters entitled to vote, as the case may be, is less than 300, the petition shall be signed by at least 25% of the landowners who own at least 25% of the assessed value of land within the territory of the affected territory or by at least 25% of the voters entitled to vote, as specified.

Existing law provides, among other things, that a change of organization or reorganization may be made subject to various specified terms and conditions including (1) the establishment, continuation, termination, combining, consolidation or separation of offices, departments, or boards and (2) the designation of the method for selection of members of the legislative body of a district, or the number of those members, or both, where there are proceedings for a consolidation or a reorganization providing for a consolidation or formation of a new district where those changes are authorized by the principal act under which a district is established.

Existing law, the Community Services District Law, specifies the number of directors of the board of a community services district and the method for the increase of the number of directors.

This bill would provide that the commission, in approving either a consolidation or reorganization of two or more community services districts into a single district, may increase the number of directors to serve on the board of the directors of the consolidated or reorganized district to 7, 9, or 11 directors. The bill would also require that as members' terms expire the number of members of the new legislative body would be reduced to the number specified by the commission in approving the consolidation or reorganization. The bill would also permit the board of directors not to fill vacancies, as specified.

Ch. 71 (SB 384) Craven. Housing: manufactured homes and mobilehomes.

Existing law makes provisions for the disclosure of specified information upon the transfer of residential real property applicable to the resale of a manufactured home or mobilehome, as defined, on or after January 1, 1999.

This bill would provide that the disclosure requirements would apply to the manufactured home or mobilehome if they are classified as personal property.

Existing law also expresses the intent of the Legislature that the Senate and Assembly jointly appoint an advisory task force, as specified, and requires the task force to report its findings and recommendations to the Legislature no later than July 1, 1997.

This bill would instead require the task force to report its findings no later than January 1, 1998.

This bill would provide that it is to take effect immediately as an urgency statute.

Ch. 72 (SB 484) Craven. Mobilehomes.

Existing law, the Mobilehome Residency Law, provides for the regulation of specified aspects of residency in a mobilehome park. Existing law provides that specified provisions of the Mobilehome Residency Law govern the rights of a resident who has an ownership interest in the space, subdivision, cooperative, or condominium, or resident-owned mobilehome park in which his or her mobilehome is located or installed, and that the other provisions apply only to a resident of a subdivision, cooperative, or condominium for mobilehomes who rents or leases a space on which his or her mobilehome is located or installed.

This bill would, among other things, revise and recast these provisions to provide that they govern the rights of a resident who has an ownership interest in the subdivision, cooperative, or condominium for mobilehomes, or resident-owned mobilehome park in which his or her mobilehome is located or installed, and that in a subdivision, cooperative, or condominium for mobilehomes, or resident-owned mobilehome park, the other

provisions apply only to a resident who does not have such an ownership interest. It would define "resident-owned" mobilehome park.

The bill also would authorize a defined senior homeowner to share his or her mobilehome with any person 18 years of age or older if that person is providing live-in health care, supportive care, or supervision pursuant to a physician's written treatment plan, as specified. It also would authorize the residency of specified relatives of senior homeowners, notwithstanding rules or regulations restricting age requirements, if the relative requires live-in health care, supportive care, or supervision pursuant to a physician's written treatment program.

Ch. 73 (SB 538) Greene. Firefighters: employment: cities and counties.

Existing law generally regulates the powers and duties of cities and counties relating to their officers and employees, with respect to matters that include provision of annual leave for firefighters, and employment contracts generally.

This bill would authorize, upon the approval of its governing body, a fire protection district or the fire department of a city, including a charter city, county, or city and county, pursuant to enumerated procedures, to appoint as a member or officer any person who was serving as a civilian federal firefighter at any United States military installation within the state, who was terminated as a consequence of the closure of the military installation. The bill would provide that the appointment authority it creates takes precedence over any existing charter, ordinance, or resolution that governs employment of firefighters, as specified. It would also specify duties of the California Firefighter Joint Apprenticeship Program, respecting these provisions.

This act would declare that it is to take effect immediately as an urgency statute.

Ch. 74 (SB 665) Johnson. Real property.

(1) Existing law provides for the recording of a notice of rescission of the trustee's deed to restore the condition of record title to the real property described in a trustee's deed and the existence and priority of all lienholders to the status quo prior to the recordation of the trustee's deed upon sale.

This bill would provide that the notice of rescission may only be filed by the trustee or beneficiary who caused the trustee's deed to be recorded or a successor in interest.

(2) Existing law regulates the procedures for the foreclosure of a mortgage or deed of trust. Existing law specifies the maximum trustee's or attorney's fees that may be charged, as specified on the basis of the amount of the unpaid principal sum secured. Existing law requires the notice of sale to specify the total amount of the unpaid balance and specified costs.

This bill would provide that, for the purpose of computing trustee's or attorney's fees, the unpaid principal sum secured is calculated on the date the notice of default is recorded. This bill would also make a clarifying change regarding the postponement of the sale of the property pursuant to the above-described procedures and would specify the method of the calculation of time for these procedures.

(3) Existing law provides that, in the event that a trustee under a deed of trust is named in an action or proceeding in which that deed of trust is the subject, and in the event that the trustee maintains a reasonable belief that it has been named in the action or proceeding solely in its capacity as trustee and not arising out of any wrongful acts or omissions in the performance of its duties as trustee, then the trustee may file a declaration of nonmonetary status. In the event that there is no objection, the trustee would not be required to participate in the proceeding, unless a demand to participate is filed and served.

The bill would require the demand to set forth the factual basis for the demand.

Ch. 75 (SB 928) Burton. Alcoholic beverages.

The Alcoholic Beverage Control Act contains so-called tied-house restrictions, which generally prohibit a manufacturer, winegrower, manufacturer's agent, California winegrower's agent, rectifier, distiller, bottler, importer, or wholesaler from, among other things, holding the ownership, directly or indirectly, of any interest in any on-sale or off-sale license, licensee, or licensed premises. Existing law contains various exemptions from this restriction on tied interests.

This bill would provide an additional exemption for any of the aforementioned entities having an interest in a retail licensee, a retail on-sale license, or a licensed premises where the licensed premises are an integral part of an interactive entertainment facility, as defined, provided certain conditions are met relating to the licensee's purchase and service of alcoholic beverages to be sold or served on the premises. This bill would make legislative findings to the effect that the purpose and intent of the general prohibition against tied interests is not violated by the exemption granted by this bill.

Ch. 76 (SB 612) Costa. Fuel taxes.

The Motor Vehicle Fuel License Tax Law provides, among other things, that specified export certificates shall be executed and filed in support of specified exemptions from the license taxes imposed. That law also provides specified procedures regarding overpayments and refunds.

This bill would delete the provisions relating to export certificates. It would make specified changes relating to the amounts required to be withheld, claims for refunds, payments on the claims, and the payment of interest on refunds, as provided.

The Diesel Fuel Tax Law provides, until July 1, 1997, that a purchaser of diesel fuel from a supplier may elect to remit the fuel tax to the supplier on terms agreed upon between the purchaser and supplier, as provided.

This bill would delete the July 1, 1997, operative date.

The Diesel Fuel Tax Law provides, until July 1, 1997, that with respect to specified worthless accounts, a supplier is relieved from liability for diesel fuel tax, as provided.

This bill would delete the July 1, 1997, operative date.

The Diesel Fuel Tax Law provides that a specified claim for refund with respect to diesel fuel is allowed only if certain conditions apply.

This bill would also apply those refund provisions to diesel fuel that is sold by any person to a train operator, as provided, to diesel fuel that is lost, as specified, and to diesel fuel for which no original purchase invoice was created, but for which a proper electronic invoice is provided.

The Diesel Fuel Tax Law provides that no refunds of taxes shall be granted for losses in handling, transporting, or storing diesel fuel.

This bill would repeal those provisions.

The Diesel Fuel Tax Law provides that if a purchaser of a business or stock of goods fails to withhold certain purchase amounts and becomes liable for those amounts, the purchaser is relieved of that liability if the State Board of Equalization fails to mail a specified notice within a prescribed period of time.

This bill would modify that prescribed period of time.

The Diesel Fuel Tax Law allows interest to be paid on refunds from the last day of the month following the day the diesel fuel was purchased.

This bill would allow that interest from the first day of the calendar month following the day a properly completed claim for refund is received, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 77 (SB 819) Calderon. Postsecondary education.

(1) Existing law, renders the Private Postsecondary and Vocational Education Reform Act of 1989, which includes the Council for Private Postsecondary and Vocational Education, inoperative on July 18, 1997, and repeals the act on January 1, 1998.

This bill would extend the operation of the act and the council until January 1, 1998. Thus, the bill would extend the existence of criminal penalties under the act until January 1, 1998, thereby imposing a state-mandated local program. The bill also would make an appropriation by continuing the operation of continuous appropriations in the act until January 1, 1998.

In addition, this bill, until January 1, 1998, would authorize the council to delegate certain matters to the director of the council. The bill also would require the director of the council to obtain approval from the chair of the council, or the Undersecretary of the State and Consumer Services Agency in the chair's absence, prior to taking any enforcement actions or prior to initiating any legal actions, or both, and would authorize the chair, or the undersecretary in the chair's absence, to delegate that authority.

(2) Under the act, a private postsecondary educational institution, before enrolling a student in instruction in English as a second language (ESL), is required to document (a) the nature of the student's existing knowledge, training, or skills, and (b) that ESL instruction is necessary to enable the student to use that existing knowledge, training, or skills.

The act provides that if the results of a test indicate that the student has not attained adequate English language proficiency after the completion of ESL instruction at a private postsecondary educational institution, the institution shall make a full refund of the total charge for the ESL instruction or offer the student the choice of either enrolling without charge in additional ESL instruction until the student attains adequate English proficiency or obtaining a full refund of the total charge for the ESL instruction.

This bill, instead, under these circumstances, until January 1, 1998, would require the institution to offer the student additional instruction, without charge, for a period of up to 50% of the number of hours of instruction previously offered by the institution to the student, to enable the student to attain adequate English language proficiency.

(3) The bill also would specify that notwithstanding any other provision of law, if the council, prior to the effective date of this bill, has received from an institution a complete application for the modification of the wording of a degree title and the council does not provide a site visit within the time prescribed by law, the council shall approve the application within 30 days after the effective date of this bill and the approval shall be valid until the council, or its successor, the Bureau for Private Postsecondary and Vocational Education, completes the required site visit. The bill also would state that it is the intent of the Legislature that this provision continue to be operative on and after January 1, 1998.

(4) This bill would specify that its provisions shall become operative only if Assembly Bill 71 of the 1997-98 Regular Session is enacted and enacts the Private Postsecondary and Vocational Education Reform Act of 1989.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 78 (AB 71) R. Wright. Private postsecondary education.

(1) The existing Private Postsecondary and Vocational Education Reform Act of 1989, until July 18, 1997, establishes various requirements and standards for the approval of private postsecondary educational institutions to operate in California and to award degrees and diplomas.

The existing act establishes the Council for Private Postsecondary and Vocational Education with specified duties and responsibilities.

This bill would repeal and reenact those provisions, and in doing so would make numerous substantive changes. The bill would create a Bureau for Private Postsecondary and Vocational Education in the Department of Consumer Affairs, operative January 1, 1998, to administer and enforce the act. This bill would specify that, in addition to any immunity afforded by a specified section of the Civil Code, any person serving on a special committee of the bureau, a visiting team, or any other peer review body impaneled by the bureau who provides information to the bureau or its staff in the course and scope of evaluating any institution subject to the act or who testifies at any administrative hearing arising under the act, has the same defenses and immunities to any action arising out of information or testimony to the bureau that person would have if he or she were a public employee. These provisions would be repealed on January 1, 2005.

(2) Under the existing act, it is a crime, punishable as specified, for any person or business entity, regardless of the form of organization, to willfully violate specified provisions of the act.

This bill, in addition, would make it a crime, punishable as specified, for any person or business entity, regardless of the form of organization, to willfully violate specified provisions governing refunds to students and requiring each institution to provide

prospective students with information concerning the institution's general performance standards. The bill would also specify criminal penalties for violating certain other provisions of the act. Thus, because the bill would expand the scope of an existing crime and create new crimes, it would impose a state-mandated local program.

(3) Under the existing act, if the council has evidence that an institution has violated specified provisions governing prohibited activities and determines that immediate action is necessary to protect students, prevent misrepresentations to the public, or prevent the loss of public funds or tuition and other money paid by students, the council is authorized to suspend the approval of an institution to operate. In addition, after notice and, if requested by the institution, a hearing, if the council concludes that grounds exist for the suspension or revocation of the institution's approval to operate, the council may order probation and a penalty, or may condition the institution's approval to operate as the council deems appropriate.

This bill, in addition, would authorize any party aggrieved by the bureau's final decision to seek judicial review, as specified.

(4) The bill, among other things, also would (a) require educational services that provide intensive English language programs, short-term seminar training, short-term career training, or that assist students to prepare for an examination for licensure, with a specified exception, to register with the bureau, (b) require those educational services to comply with specified provisions of the act, (c) revise the method for calculating student tuition refunds, (d) reenact and revise various provisions governing student protections, and (e) revise the act to provide for notices and alternative dispute resolutions, as specified.

(5) The bill would make the bureau subject to the sunset review process conducted by the Joint Legislative Sunset Review Committee, as specified.

(6) Under existing law, the Private Postsecondary and Vocational Education Administration Fund and the Student Tuition Recovery Fund are continuously appropriated to the council for purposes of the act.

This bill would continue both of those funds in existence but would provide that only the Student Tuition Recovery Fund is continuously appropriated to the bureau for the purposes of the act.

(7) This bill would specify that its provisions shall become operative only if Senate Bill 819, or any other bill, of the 1997-98 Regular Session extends the operative date of the Private Postsecondary and Vocational Education Reform Act of 1989 until at least December 31 1997, and is enacted and takes effect on or before July 18, 1997.

(8) The bill would state that its provisions are severable.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 79 (SB 260) Kelley. Recycled water.

Existing law authorizes a California regional water quality control board to issue a master reclamation permit to a supplier or distributor, or both, of reclaimed water.

This bill would authorize a regional board to issue a master reclamation permit to a supplier or distributor, or both, of reclaimed water, with the consent of the proposed permittee.

Ch. 80 (AB 213) Wildman. Sex offenders: registration.

Existing law generally requires specified sex offenders to register with local law enforcement officials within 5 working days of coming into a city, county, or city and county in which the offender temporarily resides or is domiciled for that length of time. Those who are required to register include persons who have been convicted in any other court, including any federal or military court, of any offense that, if committed in this state, would have been punishable as a sex offense in this state.

This bill would clarify that the registration requirement applies to persons who have been convicted of an offense in another state court that, if committed in this state, would have been punishable as a sex offense in this state. The bill also would require the

registration to include a notice to these persons that they have a duty to register in any state where they may relocate.

This bill would require the Attorney General to work with local law enforcement agencies to determine whether the existing state registry of sex offenders is meeting the needs of law enforcement, to work with the chief law enforcement officers of other states to develop a national registry of sex offenders, and to work with Attorney Generals of other states to enact amendments to existing registration statutes that inform persons required to register as sex offenders of their responsibility to register in any state where they may relocate.

Ch. 81 (AB 1130) Oller. Airports: land use commissions.

Under the State Aeronautics Act, each county in which there is an airport served by a scheduled airline and, with a specified exception, each county with an airport operated for the benefit of the general public, is required to establish an airport land use commission.

This bill would specifically authorize the boards of supervisors and city selection committees to establish an intercounty airport land use commission for any intercounty airport.

Ch. 82 (AB 451) Havice. Homestead exemption.

Under existing law, a specified portion of the value of a homestead is exempt from execution to satisfy a judgment debt. Existing law provides a \$100,000 homestead exemption if the judgment debtor or his or her spouse who resides in the homestead is, at the time of the attempted sale of the homestead, a person 65 years of age or older, a person physically or mentally disabled, as specified, or a person 55 years of age or older in certain limited circumstances.

This bill would increase this homestead exemption to \$125,000.

Ch. 83 (AB 327) Havice. Sexual assault.

Existing law defines "sexual abuse" as sexual assault or sexual exploitation, for purposes of the Child Abuse and Neglect Reporting Act. "Sexual assault" is defined under the act to include several specified sex offenses. Failure to report known or suspected instances of child abuse, including sexual abuse, under the act is a misdemeanor.

This bill would add unlawful sexual intercourse with a child under the age of 16 years when the perpetrator is over the age of 21 years and lewd and lascivious acts with a child of 14 or 15 years of age when the perpetrator is more than 10 years older than the victim to the offenses included in the definition of sexual assault. Because the bill would expand the scope of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 84 (AB 292) Floyd. Employment: safety: cargo tanks.

Existing law requires the State Air Resources Board to adopt test procedures to determine compliance with vapor emission standards by vapor recovery systems of cargo tanks on tank vehicles used to transport gasoline.

This bill would specify that any test procedures adopted by a state agency to determine compliance with this type of standard shall not require any person to climb upon the cargo tank during loading operations.

Ch. 85 (SB 342) McPherson. Monterey Peninsula Water Management District.

The Monterey Peninsula Water Management District law creates the Monterey Peninsula Water Management District and prescribes the territory of the district.

This bill would exclude from the territory of the district any territory located within the City of Marina on January 1, 1998.

Ch. 86 (AB 132) Campbell. Education technology.

Existing law, the Morgan-Farr-Quackenbush Educational Technology Act of 1992 (hereafter the act), has the primary mission of ensuring that the procurement and use of technology is clearly guided by the needs of pupils and is established to accomplish specific purposes, including providing access to education technology to every learner. The act provides for school-based education technology grants to develop, adopt, or expand existing technological applications to support general education, English acquisition, and non-English-speaking parent education programs pursuant to specified conditions. Existing law also declares the Legislature's intent that all school facilities construction projects be designed and constructed to maximize the use of educational technology.

This bill would require a school district that provides pupils with access to the Internet or an on-line service to adopt a policy regarding access by pupils to Internet and on-line sites that contain or make reference to harmful matter, as defined. The bill would require a school district to provide a copy of the policy to the parents or guardians of pupils to whom the policy applies.

Ch. 87 (SB 78) M. Thompson. Income taxes: contributions: endangered species.

Existing law relating to the administration of income tax laws allowed individual taxpayers, until January 1, 1997, to contribute amounts in excess of their tax liability to the Rare and Endangered Fish, Wildlife, and Plant Species Account in the Fish and Game Preservation Fund. All money contributed to the fund pursuant to these provisions was continuously appropriated to the Department of Fish and Game for specified purposes, and was subject to review by the budget committees of the Legislature.

This bill would reinstate those rare and endangered fish, wildlife, and plant species contribution provisions, and would extend their operation until January 1, 2002. This bill would also require that all money contributed to the account pursuant to these provisions, upon appropriation by the Legislature, be allocated to the Franchise Tax Board for the costs of collection and administration of the funds, and to the Department of Fish and Game for specified purposes.

Ch. 88 (SB 154) M. Thompson. Transactions and use taxes: counties: public libraries.

Existing law authorizes various local governmental entities, in accordance with certain requirements and limitations, to levy transactions and use taxes pursuant to the Transactions and Use Tax Law.

This bill would additionally authorize the board of supervisors of a county to impose a transactions and use tax at a rate of 0.125% or 0.25% by the adoption of an ordinance, as specified, if certain conditions are met. Revenues from the tax could be used only for funding public library construction, acquisition, programs, and operations within the county, as provided.

Ch. 89 (SB 396) Kelley. Service authority for freeway emergencies.

Existing law authorizes a county, and cities within the county, to create a service authority for freeway emergencies for the purpose of establishing and implementing an emergency motorist aid system, including emergency call boxes and emergency mechanical service patrols, on portions of the California Freeway and Expressway System located within the county in which the authority is established. Existing law requires the Department of the California Highway Patrol to answer the calls and provide central dispatching services for the system on specified freeways and highways.

Existing law authorizes the service authority in the County of San Diego, with the concurrence of the department, under specified conditions, to conduct a demonstration program to evaluate the effectiveness of contracting out response and dispatching services that are supplemental to the services provided by the department.

This bill would authorize service authorities for freeway emergencies to contract with the department or a private entity to handle calls in accordance with a contract that shall contain guidelines developed by the department, following consultation with the authority, for services to be provided. The bill would require the service authority, with the concurrence of the department, to approve or deny any contract and to establish appropriate performance standards. The bill would prohibit contract services from being

at a cost to the state and would provide immunity to the department or state from any liability incurred for the actions of the contractors. The bill would repeal the above authorization for the County of San Diego.

Ch. 90 (SB 572) Maddy. Alcoholic beverages: school premises.

Existing law generally prohibits the sale or consumption of alcoholic beverages in or on a public schoolhouse or any of the grounds thereof, with certain exceptions.

This bill would provide that the prohibition against the sale or consumption of alcoholic beverages in or on a public schoolhouse or any of the grounds thereof does not apply if the alcoholic beverages are acquired, possessed, or used during events, as defined, at a college-owned or college-operated stadium with a capacity of over 18,900 people located in a county of a certain class, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 91 (SB 584) O'Connell. Veterans' homes.

Existing law establishes a Veterans' Home of California Yountville and authorizes the Department of Veterans Affairs to establish and construct a 2nd home located on one or more sites in certain counties in southern California. Existing law requires the initial site to be the Veterans' Home of California, Barstow.

This bill would require the 2nd site to be the Veterans' Home of California, Chula Vista, situated in Chula Vista, San Diego County and the 3rd site to be the Veterans' Home of California, Lancaster, situated in Lancaster, Los Angeles County, pursuant to the recommendations made by the Governor's Commission on a southern California veterans home. The bill would require the 4th site to be the Veterans' Home of California , Ventura, situated in the community of Saticoy, Ventura County.

Ch. 92 (SB 1071) Polanco. Compensation: agricultural employees.

Existing law provides specific penalties for failure to pay wages when due. These penalties do not apply for failure to pay agricultural employees, as defined.

This bill would apply these penalties for failure to pay agricultural employees.

Under existing law, an employee who quits his or her employment after providing a 72-hour notice is generally entitled to immediate payment and an employee who quits without providing notice is generally entitled to payment within 72 hours.

This bill would apply this provision to agricultural employees.

Ch. 93 (SB 696) Rainey. Estates and trusts: public administrator and guardian.

(1) Existing law requires, if a person in a hospital, convalescent hospital, or board and care facility dies without known next of kin, the person in charge of the hospital or facility to provide immediate notice to the public administrator of the county of this fact.

This bill would require a funeral director or cemetery authority in control of the decedent's remains to notify the public administrator if specified persons do not exist, cannot be found after reasonable inquiry, or cannot be contacted by reasonable means.

(2) Existing law provides that, if a public administrator takes possession or control of a decedent's estate, the public administrator may summarily dispose of the estate, as specified, if either the total value of the estate does not exceed \$100,000 and there is a court order or the total value of the estate does not exceed \$10,000.

This bill would revise the latter amount to \$20,000.

(3) Existing law prohibits appointment of a public guardian as a trustee of a trust unless a court finds, as specified, that no other qualified person is willing to act as trustee. Existing law generally regulates the compensation of the trustee and provides that, upon proper showing, the court may fix or allow greater compensation than could be allowed under the terms of the trust in certain instances.

This bill would provide that, notwithstanding these provisions and the terms of the trust, a public guardian who is appointed as a trustee shall be paid from the trust property for specified expenses.

(4) Existing law requires a trustee to administer the trust with reasonable care, skill, and caution under the circumstances then prevailing that a prudent person acting in a like capacity would use in the conduct of an enterprise of like character and with like aims to accomplish the purposes of the trust as determined by the trust instrument.

Existing law also provides that a trustee who invests and manages trust assets owes a duty to the beneficiaries of the trust to comply with the prudent investor rule, as specified.

This bill would provide that, notwithstanding these provisions and the terms of the trust, all trust funds that come within the custody of the public guardian who is appointed as trustee of the trust may be deposited or invested in the same manner, and would be subject to the same terms and conditions, as a deposit or investment by the public administrator of funds in the estate of a decedent, as specified.

(5) This bill would incorporate changes made to Section 7660 of the Probate Code proposed by AB 1165, to be operative only if AB 1165 and this bill are both chaptered and become effective January 1, 1998, and this bill is chaptered last.

Ch. 94 (SB 76) Kopp. Property taxation.

Existing law requires, until July 1, 1997, each life insurance company that owns real property in a separate account to file a signed property statement, prior to July 1, 1996, as provided, and to specify certain information with respect to the real property held in the separate account and transfers of those real property interests. Existing law also provides penalties for failure to file the statement as required.

This bill would require a county assessor, on or before July 1, 1998, to compile a list of life insurance companies that have filed a property statement pursuant to those provisions. The bill would provide that, notwithstanding any other provision of law, this list shall be a public record, as specified. This bill would also extend the operation of those provisions until January 1, 2004. By requiring county assessors to compile this list, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 95 (SB 1146) Schiff. Criminal procedure: prior convictions.

Under existing law, if a defendant who is charged in the accusatory pleading with having suffered a prior conviction answers that he or she has not suffered the prior conviction, the question whether or not he or she has suffered the prior conviction is tried by the jury which tries the issue upon the plea of not guilty, or in case of a plea of guilty, by a jury impaneled for that purpose, or by the court if a jury is waived.

This bill would require instead that the question of whether the defendant is the person who has suffered the prior conviction be tried by the court without a jury. However, this provision would not apply to prior convictions alleged in order to determine the existence of special circumstances in a murder conviction nor to prior convictions alleged as an element of a charged prior offense.

Ch. 96 (SB 511) Committee on Insurance. Insurance adjusters.

Existing law, the Insurance Adjuster Act, sets forth various requirements with respect to operation as an insurance adjuster in this state and defines the term "insurance adjuster."

This bill would require a manager of a person licensed as an insurance adjuster to comply with certain provisions relative to expiration and renewal of licenses, as specified.

The bill would also express legislative intent with regard to the provision of law defining the term "insurance adjuster."

Ch. 97 (SB 556) Watson. Public health.

Existing law requires the State Director of Health Services to conduct a comprehensive review of the statutes governing the protection of the public health as principally embodied in the Health and Safety Code. Existing law requires the director to conduct that review in cooperation with county and city representatives and the

California Conference of Local Health Officers and to produce, among other things, a reorganization by chapter and section for all public health laws.

This bill would make technical nonsubstantive conforming changes to the reorganized divisions of the Health and Safety Code.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 98 (SB 212) Burton. Workers' compensation.

Existing law, until January 1, 1999, defines the term "physician" as including acupuncturists for purposes of treating injured employees entitled to workers' compensation medical benefits.

This bill would delete the repeal date and would make conforming changes. The bill would also declare that the inclusion of acupuncturists in the above provision does not imply any right or entitle any acupuncturist to represent, advertise, or hold himself or herself out as a physician or surgeon holding an M.D. or D.O. degree.

Ch. 99 (AB 1004) B. Thompson. Insurance: workers' compensation fraud.

(1) Existing law provides for a program to fund increased investigation and prosecution of workers' compensation fraud, funded by assessments on employers, and on certain fines, which are deposited into the Fraud Account in the Insurance Fund. Existing law provides that, upon appropriation and after incidental expenses, 50% shall be provided to the Bureau of Fraudulent Claims of the Department of Insurance, and 50% shall be provided to district attorneys submitting an application for funds, as specified.

This bill would instead provide that at least 40% shall be provided to the Bureau of Fraudulent Claims of the Department of Insurance, and at least 40% shall be provided to district attorneys.

(2) This bill would also incorporate additional changes to Section 1872.83 of the Insurance Code proposed by AB 349, contingent upon the prior enactment of that bill.

Ch. 100 (AB 566) McClintock. Death penalty: witnesses to execution.

Existing law requires the warden of a state prison to be present at the execution of a judgment of death and requires him or her to invite the presence of 2 physicians, the Attorney General, and at least 12 reputable citizens of his or her choice.

This bill would require the warden also to invite the members of the immediate family of the victim or victims of the defendant if a member so requests in writing.

Ch. 101 (AB 139) Poochigian. Inmate release: notification.

Under existing law, when notice is sent to local law enforcement authorities that a violent felon is scheduled to be released on parole, the paroling authority is also required to send a notice of the inmate's release to all persons who have requested that notice, including victims of, and certain witnesses to, the violent crime for which the inmate was incarcerated. Notice of the inmate's release to the community in which the person is scheduled to reside is also required to be given if the community is, among other things, within 25 miles of the actual residence of a witness, victim, or family member of a victim who has requested notification.

This bill would change that distance to within 100 miles of the actual residence of any of those persons.

Ch. 102 (AB 245) Cunneen. Insurance: surplus line brokers.

(1) Existing law generally requires insurance transacted in the state to be provided by an admitted insurer. However, existing law permits the sale of insurance from nonadmitted insurers in certain cases if various requirements are met, including insurance that cannot be obtained from admitted insurers. Existing law generally requires insurance from nonadmitted insurers to be transacted by surplus line brokers.

This bill would provide that a licensed surplus line broker may originate surplus lines business, or may accept that business from any other originating licensee. The bill would require the originating licensee to use due care and diligence in the collection, preparation, and transmission of the information to the surplus line broker.

(2) Existing law requires every nonadmitted insurer or surplus line broker, for any insurance with a nonadmitted carrier, to make a specified disclosure to the policyholder and applicant.

This bill would provide that, in fulfillment of this responsibility, the nonadmitted insurer and the surplus line broker may rely, if it is reasonable under all the circumstances to do so, on the disclosure statement received from any licensee involved in the transaction as prima facie evidence that the disclosure statement and appropriate signature from the applicant have been obtained.

(3) The bill would incorporate additional amendments to Section 1764.1 of the Insurance Code proposed by AB 816, contingent upon the prior enactment of that bill.

Ch. 103 (AB 81) R. Wright. Alcoholic beverages: event permit.

The Alcoholic Beverage Control Act authorizes the issuance of a caterer's permit to any licensee under an on-sale general license, a club license, or a veterans' club license. Existing law requires the licensee to obtain consent for each event for which the permit will be used from the Department of Alcoholic Beverage Control in the form of a catering authorization.

This bill would provide a similar authorization to any licensee under an on-sale general license for an event permit authorizing at specified events the sale of beer, wine, and distilled spirits only for consumption on property adjacent to the licensed premises and owned or under the control of the licensee, as specified. The bill would provide for an annual fee of \$100 for an event permit and a fee of not more than \$10 for each event authorization to be deposited in the Alcohol Beverage Control Fund.

This bill would require any event authorization to be approved by the appropriate local law enforcement agency, thereby creating a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 104 (SB 1313) Leslie. Disaster assistance loans for housing for farmworker households.

Under existing law, the Department of Housing and Community Development administers the Farmworker Housing Grant Program. Existing law establishes the Farmworker Housing Grant Fund and continuously appropriates this fund to the department to make grants for specified purposes, including, under special conditions, in counties in which a disaster has been declared by the Governor for a specified period of time for farmworker housing and to defray the department's costs in administering the program. These grants may be made to local public entities and nonprofit corporations for the construction or rehabilitation of housing for agricultural employees, as defined, and their families and of related support facilities, among other purposes.

This bill would authorize the Department of Housing and Community Development to make loans from the continuously appropriated Farmworker Housing Grant Fund to local public entities, nonprofit corporations, and private property owners to repair, rehabilitate, or replace housing previously used exclusively by migrant farmworker households or unaccompanied migrant farmworker adults which will be used in the future for those purposes, subject to specified terms and conditions, in counties in which a disaster has been declared by the Governor for a period of 12 months after the declaration.

This bill also would appropriate the sum of \$1,000,000 from the Special Fund for Economic Uncertainties to the Farmworker Housing Grant Fund for allocation to the Department of Housing and Community Development for loans pursuant to these provisions and administrative costs, as specified. The bill would provide that the first priority of loans under these provisions would be in Yuba County and that any funds not

awarded within 6 months after the effective date of these provisions would be available for use in any county in which the Governor declared a disaster and migrant farmworker housing was damaged or destroyed by the 1997 floods.

The bill also would state the intent of the Legislature to provide disaster assistance for farmworkers displaced by the 1997 floods in the most expeditious and fiscally sound manner possible and that the Department of Housing and Community Development administer these provisions in accordance therewith.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 105 (SB 327) Greene. Criminal history information: access by public housing authority.

(1) Existing law, in effect until November 30, 1997, authorizes local law enforcement agencies to furnish state summary criminal history information for the purpose of screening prospective residents and prospective and current staff of a regional, county, city, or other local public housing authority, at the request of the chief executive officer of the authority or his or her designee, upon a showing by the authority that it operates housing at which children under the age of 18 years reside or operates housing for persons categorized as aged, blind, or disabled.

This bill would delete this repeal date, thereby extending these provisions indefinitely.

This bill also would extend the provision governing release of information relating to convictions to include a conviction for any felony offense that involves controlled substances or alcoholic beverages, and would delete provisions pertaining to the release of summary criminal history information concerning a person who is on probation or parole.

(2) Existing law prohibits local law enforcement agencies from releasing pursuant to the law described in (1) above any information concerning any conviction that occurred more than 10 years before the date on which the request for information is submitted to the Attorney General.

This bill instead would require local law enforcement agencies to release any information concerning any conviction or release from custody that occurred within 10 years of the date on which the request for information is submitted, unless the conviction is based upon a felony offense that involved controlled substances, alcoholic beverages, or any activity related to controlled substances or alcoholic beverages, in which case the release of information would be required only if the conviction occurred within 5 years of the request date.

This bill also would require that the information released to the local public housing authority pursuant to this section be released to parole or probation officers at the same time.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 106 (SB 33) Maddy. Property taxation: taxable possessory interest: use of public facility: exclusion.

Existing provisions of the California Constitution authorize the Legislature, with the approval of $\frac{2}{3}$ of the membership of each legislative house, to allow a county board of supervisors to exempt from property taxation those properties having a full value too low to justify the costs of assessment and collection.

Existing property tax law implementing this authority limits any exemption granted thereunder by a county board of supervisors to property with a base year value or full value of \$5,000 or less, and to \$50,000 in the case of a possessory interest, for a temporary and transitory use, in a publicly owned convention or cultural facility, as defined.

This bill would extend the \$50,000 limitation to apply in the case of a possessory interest, for a temporary and transitory use, in a publicly owned fairground or fairground facility.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

Ch. 107 (SB 107) Kelley. Automotive repair.

Under existing law, a person engaged in automotive repair is generally required to register with the Director of Consumer Affairs unless specifically exempt from registration. Registration is not required for, among others, a person whose primary business is the wholesale supply of new or rebuilt automotive parts who engages in the remachining of individual automotive parts without compensation for warranty adjustments and who does not engage in repairing or diagnosing malfunctions of motor vehicles or motorcycles, if specified customer notice requirements are met. This exemption will be repealed on January 1, 1998.

This bill would delete the repeal date for this exemption, thereby extending the exemption indefinitely.

Ch. 108 (SB 127) Ayala. Horseracing.

Existing law provides, with certain exceptions, that a license granted to an association other than a fair shall be only for one type of horseracing.

This bill would permit an association licensed to conduct quarter horse racing or a fair to conduct races that include paint racing and Appaloosa racing in the same race. The bill would require the consent of the organization representing quarter horse horsemen and horsewomen when paint horses race with quarter horses or when a race that includes paint horses replaces a quarter horse race with more than 7 entries.

Ch. 109 (SB 186) Solis. Crimes: sentence enhancements: attempted sex offenses.

Existing law provides for enhanced prison sentences for any person who uses a firearm or deadly weapon or who inflicts great bodily injury during the commission of specified sex offenses.

This bill would provide that these enhanced prison sentences also shall apply to any person who uses a firearm or deadly weapon or who inflicts great bodily injury during the attempted commission of those offenses. By expanding the scope of existing sentence enhancements, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 110 (SB 198) Kelley. Tobacco: minors.

(1) Existing law provides that every person, firm, or corporation which sells or deals in tobacco or any preparation thereof shall post conspicuously and keep posted in his, her, or their place of business a copy of the provisions in the Penal Code prohibiting the selling of tobacco products to, and the purchasing of tobacco products by, minors. The failure to post the provisions subjects the violator to fines ranging from \$10 to \$50, and to imprisonment in a county jail for not more than 30 days.

This bill would instead require the posting of the notice required by the Stop Tobacco Access to Kids Enforcement Act set forth in the Business and Professions Code, which must state, among other things, that selling tobacco products to anyone under 18 years of age is illegal and subject to penalties. By revising an existing crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 111 (SB 282) Leslie. Police: radio transmission: interference.

Existing law makes it a misdemeanor to willfully obstruct any peace officer in the discharge of his or her duty. Existing law also generally makes it a misdemeanor to knowingly and maliciously interrupt, disrupt, impede, or otherwise interfere with the

transmission of a communication over an amateur or a citizen's band radio frequency, the purpose of which communication is to inform or inquire about an emergency.

This bill would make it a misdemeanor to knowingly and maliciously interrupt, disrupt, impede, or otherwise interfere with the transmission of a communication over a police radio frequency. This bill would make it a felony to knowingly and maliciously interrupt, disrupt, impede, or otherwise interfere with the transmission of an emergency communication over a police radio frequency when that offense results in serious bodily injury or property loss in excess of \$10,000. By creating new crimes, this bill would impose a state-mandated local program upon local government.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 112 (SB 338) Karnette. Contracts: rental purchase; dance studio.

Existing law regulates the terms and conditions of contracts for dance studio lessons and other services. Existing law requires these contracts to contain a statement that the studio is bonded and that information concerning the bond may be obtained from the Secretary of State at a specified address.

This bill would revise the address to which the inquiry concerning bond information should be directed.

Existing law, the Karnette Rental-Purchase Act, regulates the contents of rental-purchase agreements, as defined. Existing law requires these agreements to make specified disclosures on the agreement in a prescribed manner.

This bill would make a clarifying change to conform to other notice requirements required by the act.

Ch. 113 (SB 343) Calderon. Insurance: cancellation.

Existing law provides that an owner of a policy of life insurance may cancel the policy during the cancellation period, and provides that cancellation shall void the policy from the beginning, and the parties shall be in the same position as if no policy had been issued. Existing law requires all premiums paid and any policy fee paid for the policy shall be refunded by the insurer to the owner within 30 days from the date that the insurer is notified that the insured has canceled the policy.

However, existing law provides for a policy issued to a senior citizen, in the case of variable annuity contracts, variable life insurance contracts, and modified guaranteed contracts, return of the contract during the cancellation period shall entitle the owner to a refund of account value and any policy fee paid for the policy.

This bill would generally provide that, in the case of variable annuity contracts, variable life insurance contracts, and modified guaranteed contracts, return of the contract during the cancellation period shall entitle the owner to a refund of account value and any policy fee paid for the policy.

Ch. 114 (SB 354) Johannessen. Vehicles: firefighter and "Pearl Harbor Survivor" license plates.

(1) Existing law requires the Department of Motor Vehicles to issue, upon the payment of special fees, environmental and other special interest license plates, including special interest license plates to firefighters who meet prescribed requirements. The revenue derived from the payment of these special fees for firefighter's license plates, less the department's costs, are required to be deposited in the California Firefighters' Memorial Fund until January 1, 1999, and, thereafter, those revenues are required to be deposited in the California Fire and Arson Training Fund.

This bill would extend the time in which the described revenues are to be deposited into the California Firefighters' Memorial Fund until January 1, 2001, thereby delaying the deposit of those funds into the California Fire and Arson Training Fund until that date. The bill would also make a technical change in a cross-reference.

(2) Under existing law, a survivor of the attack on Pearl Harbor on December 7, 1941, may apply for and be issued special "Pearl Harbor Survivor" license plates for use on a vehicle. Existing law prohibits the transfer of those special plates to any other person.

This bill would instead provide that upon the death of a person issued those special license plates, the person's surviving spouse may retain the special license plates subject to certain conditions.

Ch. 115 (SB 358) Rainey. Public employee retirement.

The Public Employees' Retirement Law authorizes the Board of Administration of the Public Employees' Retirement System to enter into agreements with terminating agencies respecting benefits and funding.

This bill would require the board to enter such agreements unless it determines that it is not in the best interests of the system.

Ch. 116 (SB 362) Maddy. Tuberculosis: health facility.

Existing law prohibits a health facility, local detention facility, or state correctional institution from discharging, releasing, or transferring any person known to have or when the facility or institutional medical staff have reasonable grounds to believe the person has active tuberculosis, unless notification and a written treatment plan have been received by the local health officer, except as specified.

This bill would provide that no health facility that declines to discharge, release, or transfer a person pursuant to that provision shall be civilly or criminally liable or subject to administrative sanction as a result, if the health facility complies with that provision and acts in good faith. The bill would also provide that the local health officer under this provision is not relieved of any other duty imposed under state law governing tuberculosis control.

Ch. 117 (SB 366) Hughes. Commission on Peace Officer Standards and Training.

(1) Existing law requires the Commission on Peace Officer Standards and Training, for the purpose of raising the level of competence of local law enforcement officers, to adopt rules establishing minimum standards relating to the physical, mental, and moral fitness that shall govern the recruitment of these officers.

This bill would require the commission to review minimum training and selection standards for peace officers who are employed by a school district and members of a security or police department of a school district, and to report its findings and recommendations to the Legislature by January 1, 1998.

(2) Existing law authorizes state aid from the Peace Officers' Training Fund to be provided for training expenses of full-time regularly paid peace officer employees of eligible agencies from cities, counties, or districts.

This bill would provide that money appropriated in a specific item of the Budget Act of 1996 for the training program for law enforcement personnel operated by the Simon Weisenthal Center-Museum of Tolerance shall be allocated to eligible agencies for reimbursement of training expenses for regular and sworn officers and nonsworn personnel who have contact with the public, if the center gives priority to training sworn officers.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 118 (SB 372) Peace. San Diego Unified Port District.

(1) Under the existing San Diego Unified Port District Act, the San Diego Unified Port District is authorized to do work and make improvements without letting contracts, as specified.

This bill would, instead, require public projects, as defined, to be carried out in accordance with the provisions of the Public Contract Code governing port districts. In addition, the bill would require the district to adopt policies and procedures governing purchases of supplies and equipment by the district. To the extent this requirement would impose new duties on the district, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 119 (SB 430) Knight. Trial court funding: penalties.

Existing law imposes penalties on counties for the delinquent payment of specified moneys to the Controller for deposit in the Trial Court Trust Fund. Those penalties are calculated by multiplying the amount of the delinquent payment by the Pooled Money Investment Account rate at the end of the prior fiscal year.

This bill would provide, instead, for the calculation of those penalties by multiplying the amount of the delinquent payment at a daily rate equivalent to 1¹/₂% per month for the number of days the payment is delinquent.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 120 (SB 497) Brulte. Health care service plans: providers: prescribing controlled substances.

Under existing law, the Knox-Keene Health Care Service Plan Act of 1975, health care service plans are regulated by the Department of Corporations. Willful violation of those provisions is a crime.

This bill would prohibit a health care service plan from requiring registration under the federal Controlled Substances Act of 1970 as a condition for participation by an optometrist certified by the State Board of Optometry to use therapeutic pharmaceutical agents.

By changing the definition of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 121 (SB 498) Kelley. California Egg Commission.

(1) Existing law provides for the California Egg Commission in state government in order to promote the marketing of eggs and egg products.

This bill would make technical, nonsubstantive changes in the definition of "handler" for purposes of the provisions governing the egg commission and would make other conforming changes in those provisions.

(2) Under existing law, for purposes of the provisions governing the commission, "process" is defined to mean the liquidizing, drying, freezing, or altering the whole or any part of the egg from the original shell form.

This bill would repeal that definition.

(3) Under existing law, the commission is composed of 8 handler members and one public member. Of the handler members, 4 are required to be elected by and from handlers from District 1, 3 are required to be elected by and from handlers from District 2, and one at-large handler is required to be elected who exclusively handles eggs or egg products produced outside of California.

This bill, instead, would require the one at-large handler to be elected who pays assessments exclusively on eggs or egg products produced outside of California, rather than who exclusively handles eggs or egg products produced outside of California.

(4) Existing law also provides for 3 alternate handler members to be elected to the commission, who may serve in place of any absent handler member. Of the 3 alternates, one is required to be elected from each district and the third alternate is required to be elected who exclusively handles eggs or egg products outside of California.

This bill would require the third alternate to be elected who pays assessments exclusively on eggs or egg products produced outside of California, rather than who exclusively handles eggs or egg products produced outside of California.

Ch. 122 (SB 518) Monteith. Clinical laboratory technology: hemodialysis technician training program.

Existing law governs the practice of clinical laboratory technology and requires any hemodialysis training and testing program operated by a hemodialysis clinic or unit within a licensed clinic or hospital to be approved by the State Department of Health Services, to comply with regulations, and to include various elements.

This bill would require a hemodialysis technician training program and competency test that is provided by an accredited college, accredited university, or private training program to meet these requirements, except as prescribed.

Existing law prohibits any person from providing hemodialysis technician services without meeting certain alternative requirements, including certification by the department as being a graduate of a local training and testing program operated by an accredited college or university.

This bill would revise this requirement to include, as an alternative, certification by the department as being a graduate of a private training program approved by the department.

Ch. 123 (SB 531) Polanco. Transportation: local government finance.

Existing law authorizes a county board of supervisors, pursuant to a contract with the State Board of Equalization, to provide for the deposit in a local transportation fund of those revenues attributable to a specified portion of the sales and use tax rate levied in a county pursuant to the Bradley-Burns Uniform Local Sales and Use Tax Law.

Existing law, Chapter 518 of the Statutes of 1995, authorizes, among other things, the Board of Supervisors for the County of Los Angeles to modify its contract with the State Board of Equalization to require that \$150,000,000 of those revenues be deposited in the county general fund during the 1995–96 fiscal year.

This bill would, on and after a specified date, authorize the board of supervisors for any county of the first class (Los Angeles County) to modify, for one fiscal year, its contract with the State Board of Equalization to require that not more than \$60,000,000 of the specified county sales and use tax revenues be deposited in the county general fund instead of the local transportation fund. The bill would limit the amount that may be deposited in the county general fund under this provision and would exempt these deposits from specified provisions regarding repayment of certain funds.

The bill would require that funds deposited in the county's local transportation fund pursuant to a final determination of a court of appellate jurisdiction invalidating Chapter 518 of the Statutes of 1995 be allocated exclusively to a county transportation authority created under specified provisions, in addition to any other funds that would otherwise be allocated to that authority. Any refund made pursuant to that final determination to that authority would be required to be expended in accordance with specified provisions relating to local transportation funds.

These provisions would become operative on the date that a court of appellate jurisdiction renders a final determination invalidating Chapter 518 of the Statutes of 1995 to the extent that the final determination requires repayment of the funds transferred under that chapter. A provision providing for a reduction in the amount of revenues to be allocated to the Los Angeles County Metropolitan Transportation Authority, under specified circumstances, would apply in those fiscal years for which this provision is operative.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 124 (SB 562) Alpert. Subdivision Map Act: housing: security.

Existing law and local ordinances authorize or require, under specified circumstances, the furnishing of security with respect to the performance of various acts or agreements subject to the Subdivision Map Act. Existing law specifies the types of security that may be used at the option of, and subject to the approval of, the local agency, as well as the standards for the complete or partial release of security for public improvements.

This bill would provide that if the security furnished by the subdivider is a letter of credit, the legislative body shall release the letter of credit by returning it to the issuer thereof upon performance of the act or final completion and acceptance of the work. The bill also would allow the legislative body, if it is unable to return the original letter of

credit, to release the security by written notice sent by certified mail to the subdivider and issuer, as specified.

Ch. 125 (SB 590) Johnson. Minors: county juvenile facilities.

Existing law provides for the administration of county juvenile facilities, as specified.

This bill would authorize, upon approval of the county board of supervisors, the probation officer to establish a juvenile facility store; and if such a store is established, would require the probation officer or similar county official to establish a Ward Welfare Fund in the county treasury, to be funded by the sale of sundries to wards or detainees, a percentage from the sale of confined minor hobbycraft, and specified telephone refunds and rebates, and to be expended for specified purposes benefiting the wards and detainees.

Ch. 126 (SB 691) Committee on Local Government. Validations.

This bill would enact the First Validating Act of 1997, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 127 (SB 786) Knight. Reserve or auxiliary officers.

Existing law provides that every person deputized or appointed as a reserve peace officer shall have the powers of a peace officer only when the person has completed specified training and is (1) deputized or appointed as a level I reserve officer pursuant to specified provisions and assigned, or when assigned, to the prevention and detection of crime and the general enforcement of the laws of this state, (2) assigned to the prevention and detection of crime and the general enforcement of the laws of the state while under the immediate supervision of a specified peace officer, and engaged in a certain field training program, or (3) deployed and authorized only to carry out limited duties not requiring general law enforcement powers in their routine performance under the direct supervision of a peace officer, as specified.

This bill would revise and recast these provisions to consolidate the training requirements and peace officer authority of level I reserve officers, and revise the training and supervision requirements of level II and III reserve officers.

Ch. 128 (SB 925) Ayala. Criminal procedure: probation reports.

Existing law provides that any report of the probation officer filed with the court, including any report arising out of a previous arrest of the person who is the subject of the report, may be inspected or copied only as specified.

This bill would specify that a probation report may be inspected or copied, in addition, by the district attorney of the county at any time and by the subject of the report at any time.

Ch. 129 (SB 927) Ayala. Land use.

Existing law provides procedures for a city or county to adopt as an urgency measure an interim ordinance prohibiting any uses that may be in conflict with a contemplated general plan, specific plan, or zoning proposal. However, the legislative body is prohibited from adopting or extending an interim ordinance unless the ordinance contains a finding that there is a current and immediate threat to the public health, safety, or welfare, and that the approval of additional subdivisions, use permits, variances, building permits, or any other applicable entitlement for use which is required in order to comply with a zoning ordinance would result in that threat to public health, safety, or welfare. Existing law relating to these procedures, also provides that when an interim ordinance has been adopted, every subsequent ordinance adopted pursuant to those procedures, covering the same property, terminates and is of no further force or effect upon the termination of the first interim ordinance or any extension of that ordinance.

This bill would add to those provisions that upon termination of a prior interim ordinance, the legislative body may adopt another interim ordinance under those provisions if the new interim ordinance is adopted to protect the public safety, health, and welfare from an event, occurrence or set of circumstances different from the event,

occurrence, or set of circumstances that led to the adoption of the prior interim ordinance. The bill would state that it is the intent of the Legislature that an ordinance that complies with its provisions and that was in existence on or before April 14, 1997, shall not be invalidated if challenged pursuant to the provision of existing law summarized above that provides for automatic termination of the first interim ordinance, or any extension of that ordinance.

Ch. 130 (SB 1058) Schiff. Juvenile offenders.

Existing law generally provides for the confidentiality of juvenile court records. Existing law authorizes a law enforcement agency to disclose the name of any minor 14 years of age or older who is taken into custody for the commission of any of certain felonies, under certain conditions.

This bill would permit the presiding judge of the juvenile court to authorize a law enforcement agency, upon petition by the agency, to disclose the name and other information necessary to identify a minor who is lawfully sought for arrest as a suspect in the commission of specified felonies where that disclosure is imperative for the apprehension of the minor, as specified.

Ch. 131 (SB 1153) Johnson. Insurance.

Existing law authorizes public entities to pool self-insured claims or losses among themselves pursuant to a joint powers agreement.

This bill would provide, with respect to such an agreement, including an agreement by public agencies conducting fairs or exhibitions, that if any peril insured or covered under the contract has existed and the joint powers authority or other parties to the pool have been liable for any period, the agreement may provide that the party insured or covered under the contract is not entitled to the return of premiums or other payments for that particular risk.

The bill would further provide that the agreement may provide that termination by any party to the agreement shall not be construed as a completion of the purpose of the agreement and shall not require the repayment or return to the parties of contributions or payments until the agreement is rescinded or terminated as to all parties. The bill would also provide that the agreement may provide for the return of surplus money remaining in the pool after the completion of the purpose of the agreement.

The bill would state the intent of the Legislature that the bill shall not apply to any lawsuits filed on or before May 2, 1994.

Ch. 132 (SB 1159) Schiff. Governmental tort liability.

Existing law provides that specified local officials, including members of city councils, are not vicariously liable for injuries caused by an act or omission of the public entity or advisory body, except as specified.

This bill would specify that until January 1, 2000, locally elected members of town councils established by members of boards of supervisors to advise the board, as specified, are not vicariously so liable for those injuries.

Ch. 133 (AB 79) Granlund. Criminal procedure: return of property.

(1) Existing law provides that 60 days after the final determination of a criminal action or proceeding, the clerk of the court shall dispose of all exhibits introduced and filed in the case and remaining in the clerk's possession. Existing law provides that, on application of the owner or any person entitled to possession of exhibits or an agent designated in writing by the owner, the court shall order the release of any exhibits that will not prejudice the state.

This bill would provide instead that if the name and address of the person from whom the exhibit was taken is contained in the court record, the clerk shall notify the person that he or she may make application to the court for release of the exhibits within 15 days of receipt of the notification, and the court shall order the release of exhibits free of charge, without prejudice to the state, upon application, first, to the person from whom the exhibits were taken into custody, provided that the person was in lawful possession of the exhibits, and 2nd, to a person establishing title to, or a right to possession of, the

exhibits. By imposing additional duties on court employees with respect to case exhibits, this bill would impose a state-mandated local program.

(2) Existing law provides that each sheriff or police chief shall submit descriptions of serialized property which has been reported stolen, lost, found, recovered, or under observation, directly into the appropriate Department of Justice automated property system for firearms, stolen bicycles, stolen vehicles, or other property.

This bill would generally provide, in addition, that if a law enforcement agency identifies serialized property that has been reported lost or stolen by the owner or a person entitled to possession of the property and the property has been entered into the appropriate Department of Justice automated property system pursuant to the above provision, the agency shall notify the owner or person entitled to possession of the property of the location of the property within 15 days of making the identification. This bill would create a state-mandated local program by imposing additional duties on local law enforcement with respect to serialized property.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 134 (AB 273) Sweeney. Counseling programs: payment.

Existing law provides that if a person is convicted of child abuse and probation is granted, the court shall require the person to successfully complete a child abuser's treatment counseling program. Existing law also provides that if a person is convicted of domestic violence and probation is granted, the court shall require the person to attend an appropriate counseling program on domestic violence.

This bill would provide that the terms of probation for any of these offenders shall not be lifted until all reasonable fees due to the counseling program have been paid in full, but would not extend the period of probation beyond that period provided for in existing law. The bill also would provide that if the court finds that the defendant does not have the ability to pay the fees based on the defendant's changed circumstances, the court may reduce or waive the fees. By increasing probation supervision duties, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 135 (AB 330) Bordonaro. Grape crusher processors: reporting.

(1) Existing law requires every processor who crushes grapes in California to furnish to the Secretary of Food and Agriculture reports on the total number of tons of grapes purchased by the processor in California during the preceding crush within each grape-pricing district and information concerning the final prices, as specified.

This bill would revise those reporting provisions, as specified.

(2) The bill also would make corresponding and other technical, nonsubstantive changes.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 136 (AB 389) Cunneen. Corporations.

(1) Under existing law, in effect until January 1, 1998, the members of the board of directors of a for-profit corporation, nonprofit public benefit corporation, nonprofit mutual benefit corporation, and nonprofit religious corporation may participate in a

meeting through use of electronic video screen communication or similar communications equipment, as long as certain conditions are met such as all members participating in the meeting are able to communicate with all other members concurrently, and participation in a meeting under these circumstances constitutes presence in person at that meeting.

This bill would extend the operation of these provisions to January 1, 2003. The bill would also incorporate certain changes to these provisions, as specified, including a provision that participation in a meeting through use of conference telephone constitutes presence in person at a meeting as long as all members participating in the meeting are able to hear one another, and that participation in a meeting through use of electronic video screen communication or other communications equipment (other than conference telephone) constitutes presence in person at the meeting if all of certain specified conditions apply. The bill would also make related changes.

(2) Existing law provides for an agreement between 2 or more shareholders of a close corporation as respects the voting of shares. Such an agreement terminates when the corporation ceases to be a close corporation, except as provided.

This bill would make that provision applicable to a corporation rather than a close corporation and would delete the provision for termination of the agreement.

(3) Existing law provides that a proposed amendment of articles of incorporation must be approved by the outstanding shares of a class whether or not the class is entitled to vote thereon by provisions of the articles, if, among other things, the amendment would effect an exchange, reclassification, or cancellation of all or part of the shares of the class, other than a stock split.

This bill would specifically include within that provision a reverse split but exclude a stock split.

Ch. 137 (AB 519) Richter. Wage garnishment: authorization of deductions.

The existing Wage Garnishment Law provides for the withholding of the earnings of an employee, as defined, for the payment of a debt, subsequent to an earnings withholding order. Under existing law, the employer, as defined, shall pay the amount required to be withheld from the employee's earnings, as defined, pursuant to the order to the levying officer on a monthly basis, according to specified procedures.

This bill would authorize the employer to deduct from the earnings of the employee the sum of \$1 for each payment made in accordance with an earnings withholding order.

Ch. 138 (AB 552) Leach. Certificated school employees.

Existing law requires that a certificated employee who completes service as a district intern and is further reelected and employed during the succeeding school year be classified as, and become a permanent employee of the district upon reelection to the next succeeding school year. Existing law prohibits a so-called university intern from acquiring tenure while serving on an internship credential but requires each year of service as an intern to count toward the achievement of tenure.

This bill would require a person who, after completing a so-called university teaching internship program, is employed for one complete school year in a position requiring certification qualifications by the school district that employed the person as an intern during the immediately preceding school year and is then reelected for the next succeeding school year to a position requiring certification qualifications, to acquire tenure at the commencement of the next succeeding school year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 139 (AB 564) McClintock. Health care service plans: enforcement.

Existing law prohibits the imposition of monetary liability on the part of professional societies and members of peer review committees that review the quality of various professional health care services for acts performed within the scope of the functions of peer review, if that committee or member acts without malice, has made a reasonable effort to obtain the facts, and acts in reasonable belief that his or her action is warranted.

This bill would provide that, except as specified, no cause of action shall arise against any consultant on account of the communication by that consultant when that communication is to specified persons for the purpose of determining whether health

care services have been or are being arranged or provided in accordance with provisions of existing law, known as the Knox-Keene Health Care Service Plan Act of 1975, or regulations adopted thereunder, and the consultant acts in accordance with prescribed criteria.

Ch. 140 (AB 575) Richter. Resort improvement districts: voting.

(1) Under existing law, the Resort Improvement District Law, voters in resort improvement districts are required to be owners of real property, or the officer appointed therefor by the board of directors of a corporation owner, or the legal representative of the owner, as specified, unless the voters of the district approve a proposition entitling residents of the district to vote in district elections, and prescribes procedures for the submission of such a proposition to the voters.

The district law prescribes procedures for the election of members to the board of directors of the district and requires that the district board of directors, exclusive of the supervisory member, be registered electors in the district or landowners, or officers or legal representatives of landowners.

This bill would require that district directors, exclusive of the supervisory member, be voters, as defined, in the district. The bill would require that, at the first general district election held after January 1, 1998, the number of directors elected by voters in the district be equal to the number of directors whose terms have expired by the date of that election, and would allow any director whose term has not expired by the date of that election, to continue to serve until the person's term of office expires and the person's successor has been elected by the voters in the district.

The bill would, as a conforming change, delete those provisions prescribing procedures for landowner voters to elect to allow residents of the district to vote in district elections.

By imposing new requirements on resort improvement districts with regard to district elections, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 141 (AB 591) Aguiar. Mobilehome Residency Law.

Existing law provides that, in the event a homeowner, former homeowner, or former resident of a park is the prevailing party in a civil action against the management to enforce his or her rights under the Mobilehome Residency Law, the homeowner or resident, in addition to damages afforded by law, may, in the discretion of the court, be awarded an amount not to exceed \$500 for each willful violation of that law by the management.

This bill would specify that such an action may be brought in small claims court, and would increase the discretionary damages for willful violation from \$500 to \$2,000.

Ch. 142 (AB 603) Kuykendall. Cemeteries.

Existing law requires a cemetery authority to file with the Cemetery Board annually a written report, including prescribed information on endowment care funds. Existing law requires the report to be certified by the accountant or auditor preparing the report.

This bill would instead require the endowment care information to be accompanied by an annual audit report of the endowment care fund and special care fund signed by a certified public accountant or public accountant.

Existing law requires a copy of each annual audit report to be transmitted to the board and to be a public record, open for public inspection at the offices of the cemetery authority.

This bill would instead require a copy of the most recent written report to be a public record, open for public inspection at the offices of the cemetery authority.

Existing law, the Cemetery Act, regulates endowment care funds of cemetery authorities. Existing law regulating private cemeteries requires the principal of all funds

for endowment care to be invested and the income used for the care, maintenance, and embellishment of the cemetery.

This bill would require a cemetery authority to provide records to substantiate the expenditures of income of trust funds upon the request of the Department of Consumer Affairs and make other technical changes. The bill would also allow the department to have access to the books, records, and accounts of a cemetery authority if it fails to reasonably comply with the request.

This bill would also require a city, county, or city and county to be eligible for reimbursement from available income from any endowment care fund in existence for a cemetery within its jurisdiction, if the city, county, or city and county exercises its authority to address public health, safety, or welfare issues in connection with the cemetery and the costs associated with the action constitute care, maintenance, or embellishment of the cemetery, and if certain other conditions are met.

Existing law provides for licensure and regulation of cemetery salespersons. Existing law prohibits a section of law relating to a written examination of an applicant for a cemetery broker's license from applying to an applicant for a cemetery salesperson's license, until January 1, 1998.

This bill would delete that repeal date.

Existing law authorizes an applicant for a cemetery salesperson's license to take another examination under certain circumstances if the applicant fails the required written examination.

This bill would delete that provision.

Existing law requires every cemetery authority to make a good and substantial map or plat of the land, mausoleum, crematory, or columbarium of the cemetery authority.

This bill would require the maps or plats, upon modification of an existing section, as defined, after January 1, 1990, or development of a new section after January 1, 1990, to be filed with the county recorder or local agency within 12 months of an initial sale. By requiring additional duties of a county or local official, the bill would impose a state-mandated local program.

Existing law authorizes a cemetery authority to commingle endowment care funds and special care funds for investment and requires the investment therefrom to be divided proportionally.

This bill would limit the commingling to endowment care funds and those special care funds consisting of trust funds created by irrevocable trust agreements. The bill would require special care funds derived from trusts created by a revocable agreement to be accounted for separately from all other funds.

Existing law authorizes a cemetery authority to appoint a board of trustees.

This bill would require each member of the board of trustees to provide signatory acknowledgment of understanding of the role of a trustee in managing trust funds in enumerated areas.

Existing law prohibits any sum in excess of 5% of the income derived from an endowment care fund in any year from being paid as compensation to the board of trustees for its services.

This bill would instead limit that sum to any amount in excess of 5% of the net income, as defined, derived from an endowment care fund, or special care fund, or both. The bill would impose no compensation limit if a bank or trust company is appointed as sole trustee.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 143 (AB 688) Bowler. Firearms: juveniles.

Existing law makes it a crime for persons convicted of specified offenses to own or possess a firearm for a specified period. With regard to juvenile offenders, this prohibition

applies until the age of 30 years to any person who is alleged to have committed specified offenses, is found to be a fit and proper subject to be dealt with under the juvenile court law, and is subsequently adjudged a ward of the juvenile court for the commission of specified offenses.

This bill would delete the requirement that the person be found to be a fit and proper subject to be dealt with under the juvenile court law. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 12021 of the Penal Code proposed by AB 78, to be operative if AB 78 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 144 (AB 924) Richter. Vehicles: disaster service workers: flashing amber warning lights.

Existing law restricts the types of vehicles that may display flashing amber warning lights. Among those vehicles are disaster service vehicles owned or leased and operated by the American National Red Cross.

This bill would authorize the display of flashing amber warning lights on any vehicle operated by a disaster service worker who has received specified training and used by that worker in the performance of described emergency or disaster services.

Ch. 145 (AB 937) Vincent. Political Reform Act of 1974.

(1) Under existing law, a public official of a state agency may not, for compensation, act as an agent or attorney for, or otherwise represent, any other person by making any formal or informal appearance before, or by making any oral or written communication to, his or her state agency or any officer or employee thereof, if the appearance or communication is made for the purpose of influencing action on a contract, grant, loan, license, permit, or other entitlement for use.

This bill would exempt from this prohibition any board member, officer, employee, or consultant of an advisory body to a state agency when that public official is representing his or her employing state, local, or federal agency in an appearance before, or communication to, the advisory body.

(2) Existing provisions of the Political Reform Act of 1974 require specified public officials to file annually, and when they assume and leave office, statements of economic interests, that set forth certain financial interests of the official. For purposes of determining whether an official who is subject to these provisions has assumed or left office, the act provides that a person who completes a designated term of office and immediately begins another term of office in the same jurisdiction is not deemed to assume office or leave office.

This bill would extend these provisions to an official who completes a term of office and within 30 days begins another term of office in the same jurisdiction.

The Political Reform Act of 1974, an initiative measure, provides that the legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

Ch. 146 (AB 1129) Prenter. Livestock slaughter: penalties.

(1) Existing law provides that any person who is found guilty of violating the California Meat and Poultry Inspection Act is subject to imprisonment in a county jail for not more than one year or a fine of not more than \$1,000, or both that imprisonment and fine.

This bill, in addition, would provide for civil and administrative penalties for violating these provisions, as specified.

(2) Existing law provides that any person who violates the California Meat and Poultry Supplemental Inspection Act is subject to criminal prosecution punishable as a misdemeanor and a civil penalty in an amount not to exceed \$500 for each violation.

This bill would increase the civil penalty to an amount not to exceed \$15,000 for each serious, or second or subsequent violation of those provisions.

The bill, in addition, would provide for administrative penalties for violating these provisions, as specified.

Ch. 147 (AB 1279) Bustamante. Endangered species: recovery strategy.

(1) Existing law requires the Department of Fish and Game to develop and implement a recovery strategy pilot program for endangered or threatened species until January 1, 2004. Existing law contains a cross-reference to a nonexistent statute.

This bill would delete that cross-reference.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 148 (AB 1436) Cardoza. Public safety officers: Procedural Bill of Rights.

(1) The Public Safety Officers Procedural Bill of Rights Act provides that no punitive action, nor denial of promotion on grounds other than merit, shall be undertaken by any public agency without providing the public safety officer with an opportunity for administrative appeal.

This bill would prohibit any punitive action, or denial of promotion on grounds other than merit, from being undertaken for any act, omission, or other allegation of misconduct occurring on or after January 1, 1998, if the investigation of the allegation is not completed within one year of the public agency's discovery of the allegation of an act, omission, or other misconduct, except in specified circumstances. It would also provide that if, after investigation and any predisciplinary response or procedure, the public agency decides to impose discipline on a public safety officer, the public agency shall notify the public safety officer in writing of its intent to impose discipline, including the date the intended discipline will be imposed, within 30 days of its decision.

(2) Existing law provides that the superior court shall have initial jurisdiction over any proceeding brought by any public safety officer against any public safety department for alleged violations of the Public Safety Officers Procedural Bill of Rights Act.

This bill would make a clarifying change in this provision.

To the extent that these new requirements would apply to local government employers, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 149 (AB 1522) Thomson. Recycled water.

Existing law declares that, under certain circumstances, the use of potable domestic water for toilet and urinal flushing in nonresidential structures and other specified structures is a waste or an unreasonable use of water and, with certain exceptions, allows a public agency to require the use of recycled water for those purposes in those structures if certain requirements are met.

This bill would, instead, make those provisions apply to structures that are commercial, retail, and office buildings, theaters, auditoriums, schools, hotels, apartments, barracks, dormitories, jails, prisons, reformatories, and other structures as determined by the State Department of Health Services.

Ch. 150 (AB 296) Vincent. Vehicles: local authorities: signs: alleys.

Existing law authorizes local authorities to erect yield right-of-way signs at the entrances to intersections or highways under their jurisdiction.

This bill would authorize local authorities to place signs, mirrors, or other visual or audible devices at exits from alleys that are under their jurisdiction to warn drivers to watch for pedestrians and bicyclists on the sidewalk prior to exiting the alley.

Ch. 151 (AB 1143) Murray. Transportation: Los Angeles County Metropolitan Transportation Authority: alternate members: chief executive officer: contracts.

(1) Existing law authorizes specified appointing authorities to appoint alternate members to the Los Angeles County Metropolitan Transportation Authority to represent regular members who cannot attend a meeting of the authority.

This bill would delete the provisions authorizing the appointment of alternate members to the authority and make a related change.

(2) Existing law requires the authority to appoint a chief executive officer.

Existing law requires the authority to approve contracts for construction that exceed \$5,000,000.

This bill would require the chief executive officer to be appointed to a term of 4 years and be removed from office only if a $\frac{2}{3}$ majority of the members of the authority votes for removal, the chief executive officer violates a federal or state law, regulation, local ordinance, or policy or practice of the authority, relative to ethical practices, including, but not limited to, the acceptance of gifts or contributions, or both of those things occur.

The bill would require the chief executive officer, instead of the authority, to approve and award all contracts for construction, based upon the lowest responsive bid submitted.

Ch. 152 (AB 1259) Ackerman. Outdoor advertising: advertising displays: permits: fees.

Under the Outdoor Advertising Act, the Department of Transportation regulates the placement of outdoor advertising displays that are within view of the public highways in unincorporated areas. The act requires the Director of Transportation, upon receiving an application in compliance with the act, to issue a permit to place an advertising display for the remainder of the calendar year in which the permit is issued. Under the act, permits can be renewed on January 1 of each year upon the application and the payment of fees, and expire on December 31 of that year. The act requires all license and permit fees collected by the director and his or her authorized agents to be deposited in the State Highway Account in the State Transportation Fund, as specified. The act requires all fines imposed and recovered under the act to be payable to that fund. The bill authorizes the director or any authorized employee to remove and destroy any advertising display placed or maintained in violation of the act.

This bill would require the director to establish a renewal term of 5 years, and to adopt regulations for permit renewal, as specified. The bill would make related changes. The bill would require all license, permit, application, and renewal fees, and all fines, to be deposited in the fund, as specified. The bill would require any display owner who does not remove an advertising display that is placed or maintained in violation of the act and is removed and destroyed by the director or any authorized employee, to pay to the director a fine in an amount equivalent to any costs related to that removal or destruction.

Ch. 153 (AB 1278) Cardenas. Vehicles: safety belts.

(1) The Private Passenger Motor Vehicle Safety Act defines a "private passenger motor vehicle," for purposes of the act, as any passenger vehicle or any motortruck of less than 6,001 pounds unladen weight. Existing law makes it an infraction for any person to operate a private passenger motor vehicle on the highway without having that person and all passengers 16 years of age or over restrained by a safety belt. It is unlawful for any parent or legal guardian, when present in a private passenger motor vehicle to permit his or her child or ward who is between 4 years and 16 years of age to be transported on the highway in the vehicle without using a safety belt. It is also unlawful for any parent or legal guardian, when present in a private passenger motor vehicle to permit his or her child or ward who is less than 4 years of age to be transported on the highway in the vehicle without using a specified child passenger restraint system.

This bill would, instead, make the crimes specified above applicable to persons in any passenger vehicle or any motortruck or truck tractor. By expanding the scope of the specified crimes, the bill would impose a state-mandated local program.

(2) Existing law prohibits any person 16 years of age or over from being a passenger in a private passenger motor vehicle on a highway unless that person is properly restrained by a safety belt.

This bill would make that prohibition inapplicable to a passenger in a sleeper berth, as defined.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 154 (SB 104) Craven. Veterans' farm and home purchase: mobilehomes.

Existing law provides for farm and home purchase benefits for qualifying veterans under the Veterans' Farm and Home Purchase Act of 1974, and subsequent acts. Existing law establishes the maximum purchase price of a home, the maximum costs of construction of a home, and the maximum purchase price of a mobilehome sited on a foundation on a purchaser-owned lot, to be \$250,000. Existing law establishes the maximum purchase price of a mobile home that is to be sited in a mobilehome park, to be \$70,000.

Existing law, the Mobilehome Parks Act, requires the Department of Housing and Community Development to establish regulations for the mobilehome foundation systems, including, but not limited to, permit, evidence of title, plan approval, fee, and recordation requirements. Existing law deems a mobilehome sited on a foundation in compliance with these provisions to be a fixture and a real property improvement to the real property to which it is affixed.

Existing law permits a registered owner of a manufactured home or mobilehome in a mobilehome park, converted or proposed to be converted to a resident-owned subdivision, cooperative, condominium or nonprofit corporation, when the owner is a participant in the resident ownership, to apply for voluntary conversion of the mobilehome or manufactured home to a fixture and improvement to the underlying realty without compliance with the above mobilehome foundation requirements.

This bill would, for purposes of the Veterans' Farm and Home Purchase Act of 1974, set the purchase price of a mobilehome converted to a fixture and improvement to the underlying real property in a mobilehome park that has been converted to a resident-owned subdivision, cooperative, condominium, or nonprofit corporation as set forth in prescribed provisions of law, at an amount not to exceed \$250,000.

Ch. 155 (SB 574) Knight. Veterans benefits: eligibility.

Existing law defines "veteran" for the purposes of the various programs bestowing benefits upon veterans, and for the purposes of a program that requires state departments that issue bonds on behalf of the state to have statewide participation goals for disabled veteran business enterprises for contracts awarded for professional bond services.

Existing law relating to veterans benefits generally, including, but not limited to, educational assistance and farm and home purchase, includes within the definition of veteran any person who served in the active military, naval, or air service of the United States for a period not less than 90 days or was discharged within that 90-day period, and who received an honorable discharge or was released from active duty under honorable conditions, and who served during prescribed time periods and settings.

This bill would include service on or after February 28, 1961, and prior to August 5, 1964, in the case of a veteran who served in the Republic of Vietnam during that period as one of the periods of service covered within this definition of veteran.

This bill would also include within this definition of veteran any person who qualifies under federal laws for revenue bond or unrestricted funds, served in the active military, naval, or air service of the United States for a period not to exceed 90 consecutive days,

and received an honorable discharge or was released from active duty under honorable conditions.

Existing law, the Veterans Farm and Home Purchase Act of 1974, authorizes the department to prescribe and determine the qualifications for all veterans and requires that certain veterans be given preference over other veterans based upon the nature of their service, including, but not limited to, that veterans who are otherwise qualified and who were wounded or disabled as a result of their service shall be given first priority, and that fifth preference is to be given to veterans eligible for a subsequent loan.

This bill would, instead, give first priority to veterans who are otherwise qualified because of service during a time of war, who were wounded or disabled as a result of their service, would require certain service given third and fifth preference to be for service during a time of war, and would give sixth preference to veterans eligible for a subsequent loan.

The bill would make a conforming, technical, nonsubstantive change in a related provision.

Ch. 156 (SB 846) Mountjoy. Veterans farm and home purchase program.

Existing law permits the department to acquire the farm or home from its owner or to contract with a veteran for the construction of a dwelling house or other improvements for a home, upon terms agreed under prescribed conditions, including, but not limited to, that the veteran has filed adequate plans and specifications, a contract, and a contractor's bond approved by the department and executed by a surety company.

This bill would delete the requirement for the bond, and would, instead, authorize the department to require a bond or other security in an amount determined by the department, issued by a surety company or other financial institution, and would make conforming changes.

Existing law authorizes the department to sell or otherwise dispose of property covered by forfeiture, requires that when the department elects to sell forfeited property it notify prescribed local governmental agencies in the region where the property is located describing the property and summarizing the procedures for bid submittal, and requires that the department give first priority to a veteran who qualifies under the veterans farm and home purchase program.

This bill would delete the requirement that the department notify the local governmental agencies, and would require that the department give first priority to a veteran who qualifies under the veterans farm and home purchase program, and who served during a time of war.

Existing law permits a veteran who has purchased a farm or home under the program to be granted a subsequent opportunity to purchase a farm or home when the farm or home is sold or when the veteran's interest is divested through divorce or dissolution of marriage, and the purchase contract is paid in full.

This bill would, also, include refinancing of the original farm or home as a condition permitting a veteran to purchase a subsequent farm or home under the program, and would delete the requirement that the purchase contract of the original home be paid in full.

Existing law permits only one home purchased under the program to be owned by a veteran and spouse at any one time, except any interest acquired upon dissolution of marriage or legal separation.

This bill would delete the exception for any interest acquired upon dissolution of marriage or legal separation.

Existing law permits a subsequent purchase for veterans who served during more than one period of active service in which eligibility is granted if the initial purchase contract is paid in full, or in the case of a veteran and spouse who both qualify.

This bill would delete these provisions.

Ch. 157 (AB 47) Murray. Employees: licensed child day care facility: activities.

Existing law prohibits an employer who employs 25 or more employees working at the same location from discharging or discriminating against an employee who is a parent, guardian, or grandparent having custody of a child in kindergarten or grades 1 to 12, inclusive, for taking off up to 40 hours per school year for the purpose of participating

in school activities, subject to specified conditions including a limitation of 8 hours in any calendar month of the school year.

This bill would extend the applicability of these provisions to an employee who is a parent, guardian, or grandparent having custody of a child attending a licensed child day care facility who takes time off for the purpose of participating in activities of the licensed child day care facility. The bill would revise the maximum hours that may be taken off by an employee under these provisions from 40 hours each school year to 40 hours each year, subject to specified conditions including a limitation of 8 hours in any calendar month of the year.

Ch. 158 (AB 78) Granlund. Firearms: transporting exemption.

(1) Existing law provides exemptions from the prohibition against the manufacture, import, sale, giving, lending, or possession of specified weapons and firearms. Existing law also provides exemptions for the possession of handgun ammunition.

This bill would add to these exemptions all of the following:

(a) The circumstance where any instrument, ammunition, weapon, or device listed in these prohibitions that is not a firearm is found and possessed for a specified period of time by a person who is not in a specified prohibited class and is transporting the weapon or device to a law enforcement agency for disposition according to law.

(b) Any firearm, other than a short-barrelled rifle or short-barrelled shotgun, that is found and possessed by a person under the circumstance described in (a) above who additionally has given prior notice to the law enforcement agency and is transporting the firearm in a locked container.

(c) The possession of any weapon, device, or ammunition by a forensic laboratory or any authorized agent or employee thereof in the course and scope of his or her authorized activities.

(2) Under existing law, one of the weapons subject to the prohibition described in (1) above is a dirk or dagger that is carried concealed upon the person. For purposes of this prohibition, a dirk or dagger is defined as a knife or other instrument with or without a handguard that is capable of ready use as a stabbing weapon that may inflict great bodily injury or death.

This bill would specify that a nonlocking folding knife, a folding knife that is not a switchblade knife having a blade 2 or more inches in length, or a pocketknife is capable of ready use as a stabbing weapon that may inflict great bodily injury or death only if the blade of the knife is exposed and locked into position.

(3) Under existing law, any person who is subject to the prohibition on owning, possessing, or having a firearm under his or her custody or control because of specified misdemeanor convictions prior to January 1, 1991, may petition the court only once for relief from the prohibition.

This bill would instead permit any person who is subject to the prohibition because of a conviction of an offense prior to the offense being added to the specified offenses that are subject to the prohibition, to petition the court only once for relief from the prohibition.

(4) Existing law provides that no person prohibited by state law from owning or possessing a firearm shall own, possess, or have under his or her custody or control, any ammunition or reloaded ammunition.

This bill would specify conditions that justify a violation of this prohibition.

(5) Existing law makes it a misdemeanor for any person with knowledge of any change, alteration, or obliteration to buy, receive, dispose of, sell, or possess any pistol, revolver, or other firearm with changed, altered, or obliterated identification marks.

This bill would exempt from this provision persons in specified classes, including certain on-duty peace officers and persons transporting a firearm to a law enforcement agency for disposition, as specified.

(6) This bill would incorporate additional changes in Section 12021 of the Penal Code proposed by AB 688, to be operative if AB 688 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(7) This bill would incorporate additional changes in Section 12316 of the Penal Code proposed by AB 1221, to be operative if AB 1221 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

Ch. 159 (AB 90) Cunneen. Registered nurses: clinical nurse specialists.

Existing law provides for the licensure of registered nurses, and the certification of nurse-midwives, nurse practitioners, and nurse anesthetists by the Board of Registered Nursing.

Existing law requires the Board of Registered Nursing to conduct a study regarding the recognition and definition of clinical nurse specialists and report the findings to the Legislature on or before January 1, 1995. This provision requires that the study address, among other things, public confusion about the use and misuse of the title "clinical nurse specialist."

This bill would prohibit any person from holding himself or herself out as a clinical nurse specialist unless he or she is a nurse licensed by the board and meets the standards for a clinical nurse specialist established by the board. This bill would require licensees holding themselves out as clinical nurse specialists, or desiring to do so, to submit certain information to the board for a determination whether he or she qualifies to use that title. The bill would describe clinical nurse specialists and would authorize the board to establish standards for clinical nurse specialists, and to establish categories of clinical nurse specialists. It would provide that, in setting the standards, the board shall consult with certain individuals and organizations. The bill would also require the board to issue a certificate to qualified clinical nurse specialists. The bill would delete the obsolete provision requiring the Board of Registered Nursing to conduct a study and report its findings.

This bill would require the payment of certain fees by clinical nurse specialists. By providing for the deposit of additional moneys in the Board of Registered Nursing Fund, a continuously appropriated fund, and by revising the purposes for which money in the fund may be expended, this bill would make an appropriation.

This bill would make these provisions operative on July 1, 1998.

Under existing law, violation of any of the provisions relating to licensure of nurses is a misdemeanor.

By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 160 (AB 133) Scott. Crimes: probation.

Existing law provides that a person who is convicted of a felony while on parole for a violent felony, or who is convicted of a violent felony while on parole for any felony, is ineligible for probation for the new offense.

This bill would provide, in addition, that a person convicted of a serious felony who was on parole for a felony offense at the time of the commission of the new offense, or convicted of any felony while on parole for a serious felony, is ineligible for probation. By increasing the punishment for existing crimes, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 161 (AB 143) Cunneen. Crimes: receiving stolen property.

Under existing statutory law, every swap meet vendor, as defined, and every person whose principal business is dealing in or collecting used or secondhand merchandise or personal property, and every agent, employee, or representative of that person, who buys or receives any property that has been stolen under circumstances that should cause the person to make reasonable inquiry to ascertain that the person from whom the property was bought or received had the legal right to sell or deliver it, without making reasonable inquiry, is presumed to have bought or received the property knowing it to

have been stolen. However, the California Supreme Court in *People v. Roder*, 33 Cal. 3d 491, held that this provision should be construed as authorizing only a permissive inference, not a mandatory presumption. The offense of buying or receiving stolen property under these circumstances is punishable as either a felony or a misdemeanor, except where the district attorney or grand jury determines in the case where the value of the property does not exceed \$400 that it would be in the interests of justice to specify in the accusatory pleading that the offense shall be a misdemeanor.

This bill would repeal this presumption, make the offense under the above circumstances punishable as only a misdemeanor if the value of the property does not exceed \$400, and provide that the offense applies to every person whose principal business is dealing in or collecting any merchandise or personal property, not just used or secondhand merchandise or personal property. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 162 (AB 198) Wayne. Coastal resources: California Coastal Commission: appointments.

(1) Existing law, the California Coastal Act of 1976, establishes the California Coastal Commission, and prescribes procedures for the appointment of members to the commission by the Governor, the Senate Committee on Rules, and the Speaker of the Assembly from among regional nominations.

In regions composed of 3 counties, the act requires the board of supervisors and the city selection committee in each county within the region to each nominate one or more supervisors or city council members.

The act also requires that, within 60 days from the date of receipt of a notice rejecting all nominees from a region, the boards of supervisors and city selection committees within the region nominate and send to the appointing authority the names of additional nominees.

This bill would revise those procedures to require that, in regions composed of 3 counties, the board of supervisors and the city selection committee in each county within the region nominate one or more supervisors and one or more city council members. The bill would require all regional nominations to be made within 45 days from the date of receipt of a request for nominations by the appointing authority and would decrease to 45 days the time within which the names of additional nominees must be sent to the appointing authority following rejection of the original nominations.

By imposing new duties on local governments with respect to the nomination of members to serve on the commission, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 163 (AB 223) Papan. Insurance.

Existing law generally requires that, prior to issuing private passenger collision or comprehensive coverage, an insurer must inspect the insured vehicle. Existing law contains related provisions, including requirements for the inspection, exemptions, and authority for the adoption of regulations by the Insurance Commissioner.

This bill would repeal those provisions on January 1, 1999, and would state legislative intent.

Ch. 164 (AB 303) Runner. Local governmental agencies: Los Angeles County.

Existing law provides for the establishment of various local governmental agencies.

This bill would, upon the adoption of resolutions by the governing bodies of one or more local agencies, as defined, that have an aggregate population of 2,000,000 or more, create a local agency known as the Los Angeles County Division Commission.

The commission board would consist of representatives appointed by the governing boards of participating local agencies. The commission would be required to issue a report with recommendations to the Board of Supervisors of the County of Los Angeles, the Governor, and the Legislature by January 1, 2001. The report would be required to include, but not be limited to, analyses of the fiscal health and the capability and efficiency of service delivery by the County of Los Angeles, whether the division of the county into 2 or more smaller counties would result in enhanced fiscal health of the county and increased capability and efficiency in service delivery, and whether the division would be detrimental to the fiscal health or capability and efficiency of service delivery of any territory affected by the division.

The bill would repeal its provisions on January 1, 2001.

Ch. 165 (AB 311) Granlund. Local agencies: annual financial report: due date.

Existing law requires the officer of each local agency who has charge of the financial records to furnish to the Controller a report of all the financial transactions of the local agency during the next preceding fiscal year. Under existing law, this report shall be furnished within 90 days after the close of each fiscal year.

This bill would, in the case of a report filed in electronic format as prescribed by the Controller, extend the time within which the report shall be furnished to within 110 days after the close of each fiscal year.

Ch. 166 (AB 339) Takasugi. Sales and use taxes: revenue allocation: local public safety services.

Existing law requires that revenues derived from a specified state sales and use tax rate imposed by the California Constitution be apportioned to certain counties, to be allocated to those counties and the cities within those counties for the funding of local public safety services, as defined. Existing law generally requires, for the 1996–97 fiscal year and each fiscal year thereafter, that each recipient county allocate these sales and use tax revenues to those cities within its boundaries that provide public safety services in accordance with an allocation factor determined as a ratio for each of those cities in accordance with a specified formula. The formula contains a specified percentage cap that limits the size of this ratio.

This bill would eliminate this general allocation requirement, and would require, commencing with September 1997, that each recipient city be allocated a reconciliation amount, as defined, in 36 monthly installments. This bill would also generally require, for the 1997–98 fiscal year and each fiscal year thereafter, that each recipient city be allocated an amount determined in accordance with the portion of revenues that was allocated to that city for the 1995–96 fiscal year. By imposing new duties with respect to the allocation of sales and use tax revenues within certain counties, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would incorporate additional changes in Section 30055 of the Government Code, proposed by AB 334, to be operative only if AB 334 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

This bill would provide that it would be operative only if AB 334 of the 1997–98 Regular Session is enacted and becomes effective on or before January 1, 1998.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 167 (AB 345) Granlund. Libraries.

Existing law requires that the state allocation for a library's foundation program be equal to 10% of that program and requires the proportional reduction of the state allocation to a library for its foundation program if local revenues total less than 90% of the cost of the foundation program.

This bill would no longer require the proportional reduction of the state allocation to a library for its foundation program if specified requirements in funding are met, thus providing the state's share of the cost of the foundation program to each library based only on its population served, as certified by the State Librarian. This bill would state that the intent of this change is to make this change without harm to any library currently receiving an unreduced share of the state's cost of the foundation program.

Ch. 168 (AB 348) Cunneen. Dentistry: dental corporations.

The Dental Practice Act requires dental corporations subject to the Moscone-Knox Professional Corporation Act to obtain a certificate of registration from the Board of Dental Examiners and to provide certain information to the board upon application for a certificate and annually thereafter. A dental corporation is required to pay various fees to the board, as specified.

Existing law also provides that the provisions of the General Corporation Law apply to professional corporations, including dental corporations, except when in conflict with the Moscone-Knox Professional Corporation Act.

This bill would provide that a dental corporation is not required to register with the Board of Dental Examiners. The bill would also delete the requirements for a dental corporation to provide information or pay fees to the board, and would make other conforming changes.

Ch. 169 (AB 350) Firestone. Stalking: emergency protective order.

Existing law makes any person who willfully, maliciously, and repeatedly follows or harasses another person and who makes a credible threat with the intent to place that person in reasonable fear of his or her safety or the safety of his or her family guilty of the crime of stalking. Existing law authorizes a person who has suffered harassment to seek a temporary restraining order and an injunction prohibiting harassment. Existing law authorizes a judicial officer to issue an ex parte emergency protective order, as specified, to prevent the occurrence or recurrence of domestic violence, child abuse, or child abduction.

This bill would authorize a judicial officer to issue an ex parte emergency protective order where a peace officer, as defined, asserts reasonable grounds to believe that a person is stalking another person. The bill would specify the procedures for issuance of an ex parte emergency protective order under the bill which would be similar to the procedures used for issuance of those orders under the law relating to prevention of domestic violence. The bill would require the Judicial Council to adopt forms, instructions, and rules for carrying out the bill. The bill would create a crime by making any intentional disobedience of any emergency protective order authorized by the bill punishable as a contempt of court, but would provide, in lieu of that punishment, for a violation to be punishable as felony stalking under specified circumstances.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 170 (AB 433) Hertzberg. County investigators: auditor-controller or director of finance.

(1) Existing law on financial privacy generally provides that no officer, employee, or agent of a state or local agency or department thereof, in connection with a civil or criminal investigation of a customer, may request or receive copies of the financial records of any customer from a financial institution, unless specified requirements are met. Existing law exempts from this prohibition requests to a financial institution for customer account information made by a specified list of state or local agencies for

specified purposes. Existing law makes the intentional violation of the provisions on financial privacy a misdemeanor.

This bill would also exempt from this prohibition requests for customer account information made by a county auditor-controller or director of finance when investigating fraud. This bill would further provide that a county auditor-controller or director of finance who unlawfully discloses the information he or she is authorized to request is guilty of the unlawful disclosure of confidential data, a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

(2) Existing law specifies a list of persons who, while not peace officers and unable to carry firearms, may, under specified circumstances, exercise the powers of arrest of a peace officer and the power to serve warrants, and are eligible to receive state summary criminal history information.

This bill would also provide that persons employed as investigators of an auditor-controller or director of finance of any county and persons employed by a city and county who conduct investigations under the supervision of the controller of the city and county, who are regularly employed and paid in that capacity, may exercise the power to serve warrants and be eligible to receive state summary criminal history information, provided that the primary duty of these persons is to engage in investigations related to the theft of funds or the misappropriation of funds or resources, or investigations related to the duties of the auditor-controller or finance director.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 171 (AB 517) Cunneen. Santa Clara County Transit District: competitive negotiation.

Existing law requires that the purchase of all supplies, equipment, and materials, when the expenditure required exceeds \$25,000, by the Santa Clara County Transit District be by contract let to the lowest responsible bidder.

This bill would authorize the board of directors of the district, by a $\frac{2}{3}$ vote, to purchase specified electronic equipment and apparatus, and specialized rail transit equipment by competitive negotiation, as defined, pursuant to specified procedures.

Ch. 172 (AB 525) Aroner. Healthy Start Support Services.

(1) Existing law, the Healthy Start Support Services for Children Act (the act), requires the Superintendent of Public Instruction to award grants to local educational agencies or consortia to fund programs in qualifying schools that provide designated support services to eligible pupils and their families. The act authorizes the issuance of both planning grants and operational grants to local educational agencies or consortia that provide support services, as defined, to pupils and their families, and authorizes the issuance of county or regional planning and coordinating grants to a specified number of local educational agencies or consortia each year, for the purposes of increasing the local planning and coordinating efforts among school districts, county offices of education, county governments, community organizations, and nonprofit organizations, as specified.

This bill would extend to 5 years the period for which an operational grant is awarded.

(2) Existing law specifies that operational grants are awarded for not more than \$300,000 and may include one-time startup grants of \$100,000.

This bill would specify that recipients of operational grants may also receive one-time startup grants in an amount not to exceed \$100,000.

(3) Existing law authorizes the Superintendent of Public Instruction to offer a planning grant to a local educational agency or consortium that submits an application for an operational grant that does not meet the specified criteria, provided that the local educational agency or consortium has not previously received a planning grant.

This bill would authorize the Superintendent of Public Instruction to offer a planning grant to a local educational agency or consortium that submits an application on behalf of a school for an operational grant that does not meet the specified criteria, provided

that the local educational agency or consortium has not previously received a planning grant on behalf of that school.

Ch. 173 (AB 543) Perata. Transportation funding: San Francisco Bay Area.

(1) Existing law defines "sponsoring agency," for the purposes of specified provisions relating to transportation funding in the San Francisco Bay Area, to mean a governmental agency existing at the time of the enactment of Division 12.5 (commencing with Section 131000) of the Public Utilities Code that has transportation responsibilities for the county in which a retail transactions and use tax ordinance has been approved.

This bill would revise that definition to delete the requirement that the agency existed at the time of the enactment of that division.

(2) Existing law prohibits an agency that administers a retail transactions and use tax ordinance adopted pursuant to Division 12.5 (commencing with Section 131000) of the Public Utilities Code from being a sponsoring agency.

This bill would delete that prohibition.

Ch. 174 (AB 606) Martinez. Education: school nutrition report.

Existing law establishes specified school nutrition programs.

This bill would require the State Department of Education to prepare a written school nutrition report, as specified. The bill would specify the subject matter of the report, and would require the report to be submitted to the Legislature on or before November 15, 1998.

Ch. 175 (AB 637) Alby. Municipal utility districts.

Existing law prohibits a municipal utility district furnishing light, heat, or power from expending funds for advertising when the advertising encourages increased consumption of those services or commodities.

This bill would provide that the above prohibition shall not apply to the expenditure of funds for advertising for the purposes of economic development that benefits ratepayers, retaining customers, marketing competitive services and commodities, or promoting electrotechnologies that enhance productivity or provide environmental benefits.

Existing law, with specified exceptions, prohibits a city or district from providing new or extended services outside its jurisdiction without prior written approval of the local agency formation commission.

This bill would state that these provisions do not apply to a local publicly owned electric utility, as defined, providing electric services, which do not involve the acquisition, construction, or installation of electric distribution facilities outside of the utility's jurisdictional boundaries.

Ch. 176 (AB 649) Napolitano. Insurance: domestic violence.

Existing law prohibits disability insurers providing health coverage and health care service plans from denying, refusing to insure, refusing to renew, canceling, restricting, terminating, excluding, or limiting coverage, or charging a different rate for the same coverage, on the basis that the applicant or insured person is, has been, or may be a victim of domestic violence.

This bill would provide that life insurers may not refuse to accept an application for insurance, refuse to issue or renew a policy, cancel a policy, or deny coverage under any policy because the applicant for insurance or any person who is or would be insured is, or has been, a victim of domestic violence, except as specified.

Ch. 177 (AB 708) Ackerman. Hazardous waste management: fees.

Existing law requires each person who disposes of hazardous waste in this state to pay a fee for the disposal of hazardous waste to land, based on the type of waste placed in a disposal site, as prescribed, including a fee of \$7.50 per ton for non-RCRA hazardous waste generated in specified actions or in any other cleanup, removal, or remediation of a hazardous substance.

This bill would specify that the non-RCRA hazardous waste fee category includes any other cleanup, removal, or remediation of a hazardous substance or non-RCRA hazardous waste, whether required or voluntary.

Ch. 178 (AB 806) Morrow. Highways: nonmotorized grade crossings.

Under existing law, the California Transportation Commission is required to make allocation for grade separation projects. Grade separation is defined as the structure that actually separates the vehicular roadway from the railroad tracks.

This bill would state legislative intent regarding the allocation, transfer, or disbursement of federal funds for the purpose of constructing nonmotorized grade crossings.

Ch. 179 (AB 938) Vincent. Political Reform Act of 1974: statute of limitations: administrative actions.

Existing provisions of the Political Reform Act of 1974 regulate, among other things, the disclosure of contributions received and expenditures made by candidates and committees engaged in elections, conflicts of interest of public officials, and the conduct of lobbyists, lobbying firms, and lobbyist employers. Existing provisions of the act provide the Fair Political Practices Commission with authority to seek monetary penalties and other remedies for violations of the act in an administrative action, which requires the holding of a hearing to determine whether there is probable cause to believe that a violation has occurred before the administrative action may proceed. Existing provisions of the act do not place a time limitation on when the Fair Political Practices Commission may commence these types of administrative actions.

This bill would prohibit the Fair Political Practices Commission from commencing an administrative action seeking monetary penalties or other remedies under the act more than 5 years after the date on which the alleged violation occurred.

This bill would provide that the Fair Political Practices Commission's service of the probable cause hearing notice upon an alleged violator constitutes the commencement of the administrative action.

This bill would provide that specified actions by an alleged violator would toll the 5-year period in which an administrative action must be commenced.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

Ch. 180 (AB 951) Margett. Horseracing: Standardbred Sire Stakes Program.

Existing law provides that the California Standardbred Sires Stakes Committee consists of 6 members and 2 alternates, with 3 members and one alternate selected from and by the harness horsemen's organization contracting with the associations with respect to the conduct of racing meetings, and 3 members and one alternate selected from and by the organization responsible for the registration of California-bred harness horses.

This bill would provide that the committee shall consist of 5 members and one alternate selected from and by the California Harness Horse Owners and Breeders Association.

The bill would also provide that additional specified funds may be available to supplement the purses distributed by the California Standardbred Sires Stakes Program upon agreement by the recognized harness horsemen's organization and the harness racing association conducting the live racing meeting.

Ch. 181 (AB 1025) Torlakson. Common interest developments: assessments.

Existing law, the Davis-Stirling Common Interest Development Act, requires a common interest development to record a declaration that, if recorded on or after January 1, 1986, contains, among other things, a legal description of the common interest development and the name of the governing association.

This bill would provide that an association may record a statement or amended statement with prescribed information. This bill would also provide that the county recorder may charge a fee for recording the statement.

By imposing additional recording duties upon local officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 182 (AB 1319) Alquist. Property taxation: assessment.

Existing property tax law allows for an appeal for a reduction in an assessment.

This bill would, for specified years, prohibit any person from preparing an opinion of value on real property, intended for submission in an assessment appeal, for an owner of certain real property, for compensation or in expectation of compensation, unless that opinion of value is an appraisal report prepared in accordance with specified standards or contains a notation that it is not to be construed as an appraisal report.

Ch. 183 (AB 1372) Morrow. Court reporters: official reporter.

Existing law provides that the report of the official reporter or official reporter pro tempore of any court, as specified, when transcribed and certified as being a correct transcript of the testimony and proceedings in a case, is prima facie evidence of that testimony and proceedings.

This bill would specifically provide that the report described above, when prepared as a rough draft transcript, shall not be certified and cannot be used, cited, or transcribed as the official certified transcript of the proceedings. The bill would also provide that the rough draft transcript may not be cited or used to rebut or contradict the official certified transcript and that the production of a rough draft transcript shall not be required.

Ch. 184 (SB 13) Mountjoy. Sales and use taxes: exemptions: contact lenses.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax, including a partial exemption for ophthalmic materials used or furnished by a licensed optometrist, physician and surgeon, or registered dispensing optician, in the case of specified materials.

This bill would additionally provide a partial exemption for replacement contact lenses dispensed by a licensed pharmacist, as specified.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemption from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provided that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but would become operative as provided.

Ch. 185 (SB 122) Alpert. Adoption.

(1) Existing law makes it a misdemeanor for any person or agency to pay or offer to pay money or anything of value to a parent for the placement for adoption, consent to adoption, or cooperation in the completion of an adoption, of his or her child.

This bill instead would make it a misdemeanor for any person or agency to pay, offer to pay, or to receive money or anything of value for the placement for adoption or for the consent to adoption of a child. The bill would exempt from this prohibition any fee paid for adoption services provided by the State Department of Social Services, a licensed adoption agency, specified adoption services providers or an attorney providing

adoption legal services. Because the bill would increase the scope of a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 186 (SB 144) M. Thompson. Fish.

(1) Existing law prohibits the taking of anchovies in Humboldt Bay for any purposes, except that anchovies may be taken for live bait between September 1 and December 1, with certain conditions. Existing law provides that anchovies may only be taken in Humboldt Bay north of a line extending through channel markers 9 and 10 and that the annual seasonal take of anchovy shall not exceed 15 tons.

This bill would allow anchovies to be taken in Humboldt Bay for live bait between May 1 and December 1 and further allow anchovies to be taken for dead bait between May 1 and August 31. The bill would relocate the boundary line described above to be north of a line extending through channel markers 8 and 9 in Humboldt Bay. The bill would also specify that not more than 15 tons of anchovies may be taken between May 1 and August 31 and not more than 15 tons may be taken between September 1 and December 1.

(2) Existing law regulates the taking, possession, and sale of Dungeness crab for commercial purposes. In particular, existing law prohibits a vessel that is undocumented, or that is licensed or registered in another state, from taking or landing Dungeness crab in Fish and Game District 10 for commercial purposes after December 1 if the commercial crab fishing season has been delayed in this state or in a state for which the vessel is licensed to take, possess, or land Dungeness crab.

This bill would repeal that provision and, instead, would provide that no person shall take Dungeness crab for commercial purposes in specified ocean waters for 30 days after the opening of the Dungeness crab fishing season if the opening of the season has been delayed in those waters and that person has taken, possessed, or landed Dungeness crab in other specified waters prior to that opening. The bill would provide that a violation of these provisions shall not constitute a misdemeanor; instead, the bill would require the Fish and Game Commission to revoke the permit of any person who violates these provisions.

(3) Existing law prohibits taking, possessing, or landing Dungeness crab for commercial purposes using Dungeness crab traps unless the owner has a Dungeness crab vessel permit for that vessel.

This bill, notwithstanding those provisions, would authorize the owner of a permitted vessel to contract for the use of a vessel for which a commercial boat registration has been issued, as specified, and for which a Dungeness crab vessel permit has not been issued to assist the crew of the permitted vessel in the deployment of Dungeness crab traps. The bill would prohibit an unpermitted vessel used for that purpose from possessing on board any equipment for the retrieval of Dungeness crab traps and from possessing on board at any time any Dungeness crab. Since a violation of these prohibitions would be a crime under other provisions of existing law, this bill would impose a state-mandated local program by creating new crimes.

(4) Under existing law, a violation of the Fish and Game Code is generally a misdemeanor. Existing law, which is to be repealed on January 1, 1999, prohibits taking of white sharks with specified exceptions.

This bill would continue that law beyond January 1, 1999, by repealing the repeal date. Since a violation of these provisions is a crime under existing law, this bill would impose a state-mandated local program by continuing in existence a crime that would otherwise be repealed.

(5) Under existing law, finfish may not be taken by traps for commercial purposes except pursuant to a valid finfish permit and in accordance with specified conditions. These conditions, which are to become inoperative on April 1, 1998, and are to be repealed as of January 1, 1999, include limitations on the number, size, location, and use of the traps.

This bill would extend the above dates to April 1, 2002, and January 1, 2003, respectively. Since a violation of these provisions is a crime under existing law, this bill would impose a state-mandated local program by extending the repeal date of a crime.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 187 (SB 188) Kelley. Corporations.

(1) Existing law requires a foreign corporation to file annually with the Secretary of State an officers' certificate setting forth specified data unless the corporation has outstanding securities listed on a national exchange or if all of its voting shares are owned by the corporation. Existing law also requires the Secretary of State, if a foreign corporation fails to file the statement, to forfeit the right of the foreign corporation to transact intrastate business, and provides procedures for relief from these forfeitures.

This bill would repeal these provisions and would make related changes.

(2) Existing law provides for, among other things, the filing for record in the office of the county recorder of any county in this state in which any of the real property of a disappearing corporation or disappearing other business entity is located of a certificate prescribed by the Secretary of State with respect to the real property of the disappearing corporation or disappearing other business entity, as specified.

This bill would remove that provision.

(3) Existing law, with respect to a credit union merger and the vesting of real property, provides for the filing in the office of the county recorder of any county in which any of the property of the disappearing credit union is located of a copy of a certificate of dissolution certified by the Secretary of State, as specified.

This bill would, instead, provide for the filing of certificates of merger and requisite attachments, as specified, for those purposes.

Ch. 188 (SB 229) Johnston. Federally qualified health centers.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Under existing law and regulations one of the methods for the provision of Medi-Cal services is through contracts between the department and local initiatives.

Existing law provides that the department require, as a condition of obtaining a contract with the department, any local initiative, as defined, to offer a subcontract to any federally qualified health center providing specified services that operates in the service area covered by the local initiative's contract with the department.

Existing law provides that, if specified conditions are met, the department shall, for a local initiative commencing operation during the 1995-96 fiscal year, within 3 months after 6 months of plan operation, perform an interim reconciliation to determine the variance between the funds paid to the local initiative in its capitation rates to reflect the dollar value of federally qualified health center interim rate payments made to these entities in the Medi-Cal fee-for-service program and the amount that the plan has paid to these centers.

Existing law also requires the department to perform a final reconciliation after the initial contract period ending September 30, 1997, in accordance with specified requirements.

This bill would revise those provisions, and would require the department to perform reconciliations for each local plan submitting required expenditure data in the form and manner required by the department after the first 6 months of operation and annually thereafter, subject to an annual reconciliation audit, and would require the finalization of the payments to or recoupments from the local initiative.

Ch. 189 (SB 310) Costa. Flood protection.

Existing law provides for state cooperation with the federal government in the construction of specified flood control projects.

This bill would adopt and authorize the project for flood control on the Kaweah River, Terminus Dam, in accordance with prescribed recommendations, at an estimated cost to the state of the sum that may be appropriated by the Legislature for state participation, upon the recommendation and advice of the Reclamation Board. The bill would authorize the board to pay 50% of the nonfederal capital costs of the recreation and fish and wildlife enhancement features of the project. The bill would prescribe related matters.

Ch. 190 (SB 433) Lewis. Industrial loan companies: branch office applications.

(1) Existing law permits an industrial loan company to establish and maintain one or more branch offices, upon approval of the Commissioner of Corporations and pursuant to a resolution of its board of directors.

This bill would authorize the commissioner to exempt any establishment and maintenance of a branch office of an industrial loan company from the approval requirement under certain conditions.

(2) Existing law provides that an industrial loan company may solicit and make loans and acquire obligations at a place of business other than designated in its certificate of authorization, by written request and written approval of the commissioner, without obtaining a certificate of authorization to conduct business at a branch office, as specified. Existing law also requires an industrial loan company to provide written notice to the commissioner and obtain his or her authorization if it desires to change its place of business to a street address other than that designated in its authorization.

This bill would authorize the commissioner to exempt an industrial loan company from these provisions under certain conditions.

Ch. 191 (SB 437) Johnston. Reclamation District No. 800.

(1) Existing law creates Reclamation District No. 800 and prescribes the boundaries, powers, and duties of the district.

This bill would revise the boundaries of the district and would provide that the district is subject to Division 15 (commencing with Section 50000) of the Water Code, which generally governs the operation of reclamation districts. By changing the boundaries of the district, the bill would impose additional duties on the district, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 192 (SB 504) Johnston. Administrative law: written communication.

Existing law imposes requirements on adjudicative proceedings of state agencies.

This bill would require that any person submitting a written communication, as defined, to a state agency in a quasi-judicial proceeding, as defined, that is directly paid for by anyone other than the person submitting the written communication, clearly indicate any person who paid to produce the written communication. The bill would authorize a state agency to refuse or ignore a written communication submitted by an attorney or any other representative on behalf of a client in a quasi-judicial proceeding, unless the written communication clearly indicates the client.

Ch. 193 (SB 563) Brulte. Workers' compensation: health benefits: firefighters and peace officers.

Existing law, which took effect on September 30, 1996, provides that whenever a specified firefighter or peace officer is killed in the performance of his or her duty or dies as the result of an accident or injury caused by external violence or physical force incurred in the performance of his or her duty, the employer shall continue providing health benefits to the deceased employee's spouse and minor dependents under the same terms and conditions provided prior to the death of the employee, unless the

surviving spouse elects to receive a lump-sum survivor's benefit in lieu of monthly benefits.

This bill would require the employer to continue providing health benefits to the deceased employee's spouse and minor dependents under the same terms and conditions provided prior to the death, or prior to the accident or injury that caused the death, of the employee, and would require local employers to continue to provide these health benefits to the spouses and dependents of deceased firefighters or peace officers who died in the line of duty prior to September 30, 1996.

Ch. 194 (SB 568) Sher. Uniform Interstate Family Support Act.

Existing law establishes the Uniform Reciprocal Enforcement of Support Act. The act governs the reciprocal enforcement of orders of support made in this state and other states. The act specifies the rights and remedies available to enforce an order for support issued by another state. The act also provides for the registration of support orders issued by another state.

This bill would repeal those provisions and instead enact the Uniform Interstate Family Support Act.

Among other things, the bill would clarify the jurisdiction of this state and another state in cases where both states have issued child support orders with respect to the same obligor and child, and specify the procedure for enforcing or modifying a support order or income withholding order issued in another state.

The bill would also provide for the enforcement of income-withholding orders issued in another state, without requiring that those orders be registered in this state.

By imposing additional duties on local agencies, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 195 (SB 595) Burton. Public Utilities Commission: appointees and employees: conflict of interest.

Under existing law, no person may be appointed to or hold the office of public utilities commissioner, or be appointed or employed by the Public Utilities Commission who also is employed by, holds any official relation with, owns stocks or bonds of, or is in any manner pecuniarily interested in, any corporation or person that is subject to regulation by the commission.

This bill would recast these provisions and would delete the portion of these provisions that prohibit persons appointed or employed by the Public Utilities Commission from holding these interests.

The bill would require the commission to adopt an updated Conflict of Interest Code and Statement of Incompatible Activities, by February 28, 1998, in a manner consistent with applicable law.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 196 (SB 650) Lewis. Marriage, family, and child counselors and social workers.

Existing law provides for the licensing of marriage, family, and child counselors. Existing law requires that applicants for licensure obtain certain supervised practical experience as a trainee or intern. The experience as a trainee may be gained in various settings, including a governmental entity, a school, college, or university, a nonprofit and charitable corporation, or a licensed health facility, as defined.

This bill, in addition, would permit the supervised practical experience as a trainee to be gained in a social rehabilitation facility or a community treatment facility, as defined, a pediatric day health and respite care facility, as defined, or a licensed alcoholism or drug abuse recovery or treatment facility, as defined.

Existing law requires a marriage, family, and child counselor and a social worker, on and after January 1, 1999, to complete 36 hours of approved continuing education to renew a license.

This bill would change the date for this requirement to on and after January 1, 2000. The bill would require a marriage, family, and child counselor or social worker renewing during 1999, to complete 18 hours of approved continuing education.

Existing law requires the above described continuing education to be obtained from certain sources and requires the board to establish a procedure for approving providers of the continuing education courses.

This bill would authorize the board to revoke or deny the right of a provider to offer continuing education coursework pursuant to this provision for failure to comply with the requirements of the continuing education provisions.

Ch. 197 (SB 785) Johnson. Cal-Vet loans.

Existing law provides for farm and home purchase benefits for qualifying veterans under the Veterans' Farm and Home Purchase Act of 1974, and subsequent acts. Existing law establishes the maximum purchase price of a home, the maximum costs of construction of a home, and establishes requirements relating to the purchaser's payment responsibilities, including, but not limited to, the requirement that the purchaser pay interest at a rate determined by the department pursuant to a prescribed procedure.

Existing law requires the department to set the rate of interest to be paid by purchasers at an amount established by a $\frac{2}{3}$ vote of the California Veterans Board with the approval of the Veterans' Finance Committee of 1943. Existing law requires the board and the committee to periodically, at least once a year, make a finding as to the rate of interest to be charged.

This bill would delete the $\frac{2}{3}$ vote requirement, and would, instead, require that the department, within 60 days of receipt of the survey of the financial condition of the Division of Farm and Home Purchases required at the close of each fiscal year by an independent public accounting firm of recognized standing as provided under the various veterans bond acts, to report to the board and the committee regarding the recommended rate of interest to be approved by the board and the committee, and would make conforming changes, and other related changes of a technical, nonsubstantive nature.

Existing law authorizes the department to advance to any purchaser sums for certain purposes, including, but not limited to, paying taxes and assessments, or making certain improvements, and requires that all of the money advanced to a purchaser be added to the deferred principal of the purchaser's account and bear the same interest at the same rate.

This bill would, instead permit any of the money so advanced be added to the deferred principal of the purchaser's account bearing the same interest at the same rate.

Existing law provides that the advanced moneys may be in addition of the maximum price of the farm or home pursuant to prescribed provisions of the Veterans' Farm and Home Purchase Act of 1974.

This bill would provide that the advanced moneys may be in addition of the maximum price of the farm or home pursuant to the Veterans' Farm and Home Purchase Act of 1974, and acts supplementary thereto.

Existing law, with certain exceptions, prohibits requirement of an impound or trust account for the payment of taxes, insurance, or other purposes relating to real property, as a condition of a real property sale or loan.

This bill would permit any money required by the department to be paid for the purpose of taxes, insurance premiums, and other charges when they become due to be maintained by the department using the escrow accounting method in accordance with lending industry standards and the laws governing escrow accounts of this type.

Ch. 198 (SB 792) Burton. Probate: notices.

Existing law provides various notice requirements with respect to probate proceedings, as specified.

This bill would require a notice to be mailed by specified persons or the court, to a surety who has filed a court bond, as specified.

Ch. 199 (SB 922) M. Thompson. Telemedicine.

Existing law regulates the practice of telemedicine, which is the practice of health care delivery, diagnosis, consultation, treatment, transfer of medical data, and education using interactive audio, video, or data communication.

This bill would change that definition to exclude telephone conversations and electronic mail messages between a health care practitioner, as defined, and a patient. The bill would extend the rights granted to a patient of telemedicine to the patient's legal representative. The bill would revise some of the protections granted to patients of telemedicine to require that all existing laws regarding patient access to medical information and copies of medical records and surrogate decisionmaking, as defined, are to apply.

Ch. 200 (SB 1017) Leslie. Medicine.

Existing law, the Medical Practice Act, provides for the licensure, regulation, and discipline of physicians and surgeons administered by the Medical Board of California. The disciplinary activities of the board with regard to physicians and surgeons are carried out by the Division of Medical Quality.

This bill would provide that the Medical Board of California is the only licensing board authorized to investigate or commence disciplinary actions, as defined, relating to physicians and surgeons who have been issued a physician's and surgeon's certificate.

Ch. 201 (SB 1041) Johnson. Industrial loan companies.

(1) Existing law authorizes an industrial loan company to make a loan or acquire an obligation that is repayable in unequal periodic payments throughout its term and that is secured by real or personal property, or both, provided that it is not a consumer loan or obligation.

This bill would delete provisions permitting the above loans to be secured by both real or personal property.

(2) Existing law prohibits an industrial loan company from making a consumer loan or acquiring a consumer obligation other than a loan or obligation secured by a motor vehicle unless the loan or obligation is repayable by equal or substantially equal periodic payments during its term.

This bill would repeal this prohibition.

(3) Existing law provides that the aggregate principal balance of loans or other obligations that are secured partially by real property, but not secured primarily by real property, shall in no event exceed 25% of the industrial loan company's outstanding loans and obligations. Existing law also provides that certain specified secured loans or obligations must be secured by motor vehicles or other personal property collateral of a market value of at least 100% or real property collateral of a market value of at least 115% of the principal amount owing on the loans or obligations, and that the personal property or collateral held as security shall be of a kind or class that has been declared eligible by regulation of the Commissioner of Financial Institutions.

This bill would repeal these provisions.

(4) Existing law permits an industrial loan company to purchase, sell, or originate lease obligations in accordance with specified provisions upon the authorization of the commissioner.

This bill would repeal this provision.

(5) Existing law prohibits an industrial loan company from making any loan to, purchasing a contract, loan, or chose in action from, holding a lease obligation of, or purchasing a lease contract from specified persons and entities, including officers and directors of the company. This prohibition does not apply to the purchase of a contract, loan, or chose in action from a finance lender, a mortgage broker, a mortgage banker, a real estate broker, or other licensed lender, provided written authorization for the purchase is obtained from the commissioner, or to the purchase of life insurance by the company on behalf of an officer or director as part of a benefit plan package.

This bill would provide that the prohibition also does not apply to a transaction between an industrial loan company and a subsidiary corporation or other entity in which the industrial loan company is the owner of 50% or more of the common stock or equity interest, or directly controls the management of the corporation or other entity, or to the purchase of loans or other obligations by an industrial loan company from an affiliated company pursuant to a sale and repurchase agreement.

Ch. 202 (SB 1118) Monteith. Transportation: intercity passenger rail service: San Joaquin Corridor.

Existing law authorizes specified local agencies to form a joint exercise of powers board for the purpose of assuming responsibility for intercity passenger rail service in the San Joaquin Corridor, as defined.

This bill would authorize the Steering Committee of the Caltrans Rail Task Force to confer with the Secretary of the Business, Transportation and Housing Agency to coordinate intercity passenger rail service for the San Joaquin Corridor, including assisting in the development of an appropriate management structure for the San Joaquin Corridor as an element of a coordinated statewide intercity rail system.

Ch. 203 (SB 1215) Burton. San Francisco filled tidelands: Mission Bay Development Area and Western Pacific Property.

Under existing law, the State Lands Commission was authorized to grant to the City and County of San Francisco, subject to such reservations as the commission may determine to be appropriate, filled tidelands and submerged lands within the Mission Bay Development Area, as described, for the purpose of effectuating specified exchanges of lands between the city and county and private property owners to promote public trust uses in accordance with the Mission Bay Specific Plan adopted by the city and county.

This bill would include specified "Western Pacific Property," as described, within those provisions and specify related matters. The bill would impose conditions on any sale or exchange of land involving that property, including a conveyance to the University of California, as prescribed.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 204 (SB 1287) Calderon. Local government investment.

(1) Under the Mello-Roos Community Facilities Act of 1982, the proceeds of any bond, note, or other security issued under the act are required to be deposited or invested in specified investments.

This bill would instead authorize these funds to be deposited or invested in one or more of the instruments, securities, or obligations that are eligible legal investments of the local agency that created the community facilities district.

(2) Existing law specifies that the treasurer or other official responsible for funds of a local agency that are invested in the county treasury for the purpose of investment by the county treasurer (the so-called "county treasury pool") is authorized to withdraw the funds at any time with 30-days' notice of his or her intent to do so. Existing law also specifies that any local agency that has funds deposited in a county treasury pool and seeks to withdraw funds to deposit or reinvest them elsewhere is first required to submit the request to the county treasurer who evaluates each proposed withdrawal, as specified, and is required to find that the proposed withdrawal will not adversely affect the interests of other depositors in the county treasury pool prior to approving the withdrawal.

This bill would delete the specific authority of a local agency treasurer or other official to withdraw these funds at any time with 30-days' notice and instead specify that the local agency treasurer or official may withdraw the funds of the local agency pursuant to the aforementioned procedure that requires the county treasurer to evaluate each proposed withdrawal and approve the withdrawal if it will not adversely affect the interests of other depositors.

Ch. 205 (SB 1352) Johannessen. Transportation: state-local partnership program.

Existing law prescribes a state-local partnership program for funding highway and exclusive public mass transit guideway improvement projects. Under that law, construction contracts for a project on the eligibility list are required to be let by June 30 of the fiscal year for which funds for the state's share of funding for the project are appropriated, except as provided.

This bill would extend that deadline for Siskiyou County to June 30, 1999, for any construction project which would otherwise have been required to be let by June 30, 1997.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 206 (SB 949) Schiff. Public officials and candidates.

Existing law prohibits a person who holds, or who is seeking election or appointment to, any office or employment in a state or local agency, from using, promising, threatening, or attempting to use any office, authority, or influence to confer upon or secure for any individual, or from aiding or obstructing any individual person in securing, any position, nomination, confirmation, promotion, or change in compensation or position, within the state or local agency upon corrupt condition or consideration.

This bill would prohibit a person who holds, or who is seeking election or appointment to, any office from, directly or indirectly, offering or arranging for any increase in compensation or salary for an employee of a state or local agency in exchange for, or a promise of, a contribution or loan to any committee controlled directly or indirectly by the person who holds, or who is seeking election or appointment to an office.

This bill would make a violation of this provision a crime punishable by imprisonment in the county jail not exceeding one year, a fine not exceeding \$5,000, or both. This bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 207 (SB 939) Schiff. Sex offenders.

(1) Under the Uniform Criminal Extradition Act, the Governor is required to have arrested and delivered up to the executive authority of any other state any person charged in that state with treason, felony, or other crime, who has fled from justice and is found in this state, upon receiving a demand for the extradition of that person from the executive authority of the other state.

This bill would make it a crime for any person to flee to this state with the intent to avoid prosecution for, or custody or confinement imposed for conviction of, specified sex offenses committed in the jurisdiction from which the person fled. This bill also would impose a 2-year enhancement for a conviction of any felony sex offense, as specified, committed after fleeing to this state under the circumstances described in this bill. By creating a new crime and a new sentence enhancement, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 208 (AB 121) Battin. Seed: labeling.

Under the California Seed Law, the Secretary of Food and Agriculture, by regulation, may establish methods and procedures for the conciliation or mediation of disputes between labelers of agricultural or vegetable seed, or both, and any persons concerning the conformance with label statements as required by the law.

This bill also would authorize the secretary, by regulation, to establish methods and procedures for the arbitration of those disputes.

Ch. 209 (AB 685) Wayne. Crimes: detention facilities.

Under existing law, an employee or officer of a public entity or an employee, officer, or agent of a private person or entity that provides a detention facility or staff for a detention facility under contract with a public entity, who engages in sexual activity with a consenting adult who is confined in a detention facility, as defined, is guilty of a misdemeanor. A second violation of that provision is a felony.

This bill would add to the definition of “detention facility,” for purposes of that provision, a health facility, as defined, in which the victim has been detained involuntarily. Because the bill would increase the scope of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 210 (AB 1257) House. Vehicles: commercial vehicles: inspections: weight limit.

(1) Existing law requires the Department of the California Highway Patrol to inspect, at least every 25 months, every terminal, as defined, of any motor carrier who, at any time, operates any of specified commercial vehicles. A motor carrier is required to schedule an inspection with the department for those vehicles, as prescribed. As used in that law, commercial vehicles are described as combinations of vehicles where the gross vehicle weight limit of the towing vehicle exceeds 10,100 pounds. Existing law authorizes the department to establish and implement an incentive program to encourage truck terminal operators to attain continuous satisfactory compliance ratings.

This bill would revise the description of combinations of vehicles to include a towing vehicle with a gross vehicle weight limit of 10,000 pounds, rather than 10,100 pounds, not including a pickup truck. Because this would expand the scope of an existing requirement, the violation of which would be a crime, the bill would impose a state-mandated local program. The bill would also modify the incentive program specified above by, among other things, conditioning certain parts of that program on the agreement by the motor carrier to accept random, unannounced inspections by the department.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 211 (AB 1294) Aguiar. Medi-Cal benefits: individualized health and support plans.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law specifies that those services covered under the Medi-Cal program include specified local educational agency services.

This bill would add targeted case management services for children with an individualized health and support plan (IHSP) to the schedule of those local educational agency services that may be provided under the Medi-Cal program.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 212 (SB 16) Knight. Crime: terrorizing.

Under existing law, any person who explodes, ignites, or attempts to explode or ignite any destructive device or any explosive, or who commits arson, in or about any of several specified places, for the purpose of terrorizing another or in reckless disregard of terrorizing another is guilty of a felony.

This bill would add to that list of places any public or private school providing instruction in kindergarten or grades 1 to 12, inclusive. Because the bill would expand the scope of an existing crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 213 (SB 833) Rosenthal. Physical therapy: students.

Existing law provides for the licensure and regulation of physical therapists and physical therapist assistants by the Medical Board of California. Existing law authorizes the board to approve physical therapist education programs that comply with certain minimum requirements, and provides that programs that are recognized by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association shall be deemed approved by the board, unless the board determines otherwise.

This bill would delete the term "recognized" and insert the term "accredited." The bill would also prohibit construing the provisions governing physical therapy as preventing a regularly matriculated student of a course of instruction in an approved physical therapist education program, or supervised clinical training of such a program from performing physical therapy as a part of his or her course of study. The bill would also apply a similar provision to a physical therapist assistant student.

Ch. 214 (AB 464) Richter. County transportation: director of transportation: authority.

Existing law requires the board of supervisors of each county to appoint a road commissioner for all road districts in the county. Any county that has done so may authorize the road commissioner to have any work upon county highways done under his or her supervision and direction. Existing law also authorizes the board of supervisors of any county to abolish the office of road commissioner, if the board transfers all duties of the road commissioner to the county director of transportation. Under existing law, the director of transportation shall not be required to have any special permit, registration, or license.

This bill would extend the existing provisions relating to authorization of work on county highways to counties that have abolished the office of road commissioner in compliance with existing law, where the work is under the supervision or direction of a registered civil engineer under the direction of the county director of transportation.

The bill would make technical, nonsubstantive changes to existing law.

This bill would additionally incorporate amendments to Section 20395 of the Public Contract Code proposed by both this bill and AB 683, which would only become operative if (1) both bills are enacted and become effective on January 1, 1998, (2) each bill amends Section 20395 of the Public Contract Code, and (3) this bill is enacted after AB 683.

Ch. 215 (AB 683) Morrow. Public works contracts: change orders.

Existing law sets forth the procedures pursuant to which changes or additions may be made in the work being performed under local construction contracts, county highway contracts, local contracts for works of improvement, and drainage district construction contracts. Under these provisions, for contracts whose original cost exceeds \$250,000, the extra cost for any change or addition to the work so ordered may not exceed \$25,000 plus 1% of the amount of the original contract cost in excess of \$250,000, and in no event may any such change or alteration exceed \$100,000.

This bill would, instead, specify that, for those contracts, the extra cost for any change or addition to the work so ordered may not exceed \$25,000 plus 5% of the amount of the original contract cost in excess of \$250,000, and in no event may any such change or alteration exceed \$150,000.

This bill would additionally incorporate amendments to Section 20395 of the Public Contract Code proposed by both this bill and AB 464, which would only become operative if (1) both bills are enacted and become effective on or before January 1, 1998, (2) each bill amends Section 20395 of the Public Contract Code, and (3) this bill is enacted after AB 464.

Ch. 216 (AB 100) Granlund. Aging.

Existing law establishes the Mello-Granlund Older Californians Act which is administered by the California Commission on Aging and the California Department of Aging. Existing law prescribes the composition of the commission, and provides that a commissioner who fails to attend 2 consecutive monthly meetings or who fails to attend 9 meetings per year, without acceptable written excuse, shall cause the commission to notify the appointing authority which may declare the position vacant.

This bill would make this provision applicable upon failure of a commissioner to attend 4 meetings per year.

Existing law establishes the Linkages Program as a community-based services program to provide specified services to assist frail elderly and functionally impaired adults to remain as independent as possible for as long as possible in their communities.

This bill would revise and recast the provisions of this program. The bill would provide that the purpose of the program is to provide care and case management services to frail elderly and functionally impaired adults to help prevent or delay placement in nursing facilities.

Existing law requires the department to make efforts to increase public awareness about areas of importance to California's older individuals, their families, and other caregivers, through the use of various media.

This bill would authorize the department to accomplish this purpose through the use of symposiums or educational efforts by public or private schools, colleges, and universities.

Existing law requires defined long-term care facilities to post a prescribed notice relating to the State Long-Term Care Ombudsman in a conspicuous location.

This bill would revise the definition of long-term care facility for purposes of this provision.

The bill would also make related changes.

Ch. 217 (AB 334) Wildman. Sales and use taxes: revenue allocation: local public safety services.

Existing law requires that revenues derived from the imposition of a portion of the state sales and use taxes be apportioned to certain counties to be allocated to those cities within those counties that provide public safety services, as defined, to be expended exclusively for the funding of those services.

Existing law generally requires, subject to certain exceptions, for the 1996-97 fiscal year and each fiscal year thereafter, that these allocations be made in accordance with an allocation factor determined as a ratio for each of those cities pursuant to a specified formula. The formula contains a specified percentage cap that limits the size of this ratio.

This bill would establish, as an additional exception to these general allocation requirements, a specific allocation formula, including provisions for the allocation of reconciliation amounts, as defined, for cities within Los Angeles County. By imposing new duties with respect to the allocation of sales and use tax revenues in the County of Los Angeles, this bill would impose a state-mandated local program.

This bill would state the Legislature's intent in enacting the bill, and would make legislative findings and declarations as to the necessity for a special statute.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would incorporate additional changes in Section 30055 of the Government Code, proposed by AB 339, to be operative only if AB 339 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

This bill would provide that it would become operative only if AB 339 of the 1997-98 Regular Session is enacted and becomes effective on or before January 1, 1998.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 218 (AB 725) Papan. Finance lenders.

(1) Existing law prohibits a licensed finance lender from conducting the business of making loans within any office, room, or place of business in which any other business is solicited or engaged in, or in association or conjunction therewith, except as authorized by the Commissioner of Corporations.

This bill would specify that the products or services of an affiliated corporation of a licensee that is a supervised financial institution, or a parent or subsidiary of a supervised financial institution that is an affiliate of the licensee, as defined, may be provided, offered, or sold at the licensed location of the licensee without authorization by the commissioner.

(2) Existing law prohibits a licensed finance lender from transacting business or making a loan under any other name or place of business than that named in the license except pursuant to a currently effective written order of the commissioner authorizing the other name or other place of business.

This bill would specifically authorize a licensee to make any loan and engage in any other business at a place other than the licensed location under specified conditions.

Ch. 219 (AB 752) Migden. Tobacco: advertising.

Under existing law, a person, firm, or corporation may be subject to criminal penalties for knowingly selling or giving away cigarettes or tobacco products to a person who is under 18 years of age. Existing law, the Stop Tobacco Access to Kids Enforcement Act or the STAKE Act, among other things, requires the State Department of Health Services to develop a program to reduce the availability of tobacco products to persons under 18 years of age. The STAKE Act requires that all persons engaging in the retail sale of tobacco products check the identification of tobacco purchasers to determine the purchaser's age if the purchaser appears to be under 18 years of age. The STAKE Act authorizes the department to assess civil penalties in accordance with a prescribed schedule against any person, firm, or corporation that sells tobacco products or other controlled substances to persons who are under 18 years of age.

This bill would prohibit any person, firm, corporation, partnership, or other organization from advertising, or causing to be advertised, tobacco products, on any outdoor billboard located within 1,000 feet of any public or private elementary school, junior high school, or high school, or public playground, as specified, and would provide that this prohibition is a minimum standard and that local standards imposing a more restrictive or complete ban on billboard advertising or any tobacco-related billboard advertising would not be preempted by the prohibition and would control in the event of a conflict. The bill would also provide for civil penalties to be assessed by the State Department of Health Services for violations of these provisions, as specified.

Ch. 220 (SB 68) Kopp. Administrative adjudication.

Existing law, operative July 1, 1997, contains provisions regarding the administrative adjudication provisions of the Administrative Procedure Act.

This bill would make these administrative adjudication provisions of the act applicable to a decision by a quasi-public entity, as defined, with a specified exception, if a statute vests the power of decision in the entity and, under the federal or state Constitution or a federal or state statute, an evidentiary hearing for determination of facts is required for formulation and issuance of the decision.

The bill would also provide that whenever the State Department of Health Services is authorized or required by statute, regulation, due process, or a contract to conduct an adjudicative hearing leading to a final decision of the Director of Health Services or the department, in addition to the administrative adjudication provisions otherwise applicable to state agencies, a specific procedure would be prescribed that would, in certain areas of administrative law, govern instead of the otherwise applicable provisions. The bill would make conforming changes to other provisions relating to state hearings.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 221 (AB 811) Brewer. State contracts: deposit of withheld payments.

The State Contract Act sets forth the provisions for the investment of moneys or securities withheld to ensure performance on a state contract by a public agency. The act provides for an alternative procedure, under which, at the discretion of the agency, the payment of retentions earned may be deposited directly with a person licensed under specified provisions of law as the escrow agent, upon approval by the agency, who shall deposit the payment in a trust account in a chartered bank or savings association, subject to specified conditions. These provisions specify that this alternative shall not be applicable to payments deposited on or after January 1, 1997.

This bill would delete the limitation on these alternative provisions with respect to payments deposited on or after January 1, 1997.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 222 (AB 1258) Ackerman. Civil procedure: attachment.

(1) Existing law generally permits the use of a prejudgment attachment in civil actions to recover on certain obligations secured by personal property, or secured by fixtures under the Commercial Code or, in limited cases, secured by real property. Existing law excludes from the amount that may be secured by attachment the value of any security interest held by the plaintiff in the defendant's property to secure the defendant's indebtedness to the plaintiff, together with any decrease in the value of the security by reason of acts of the plaintiff or person to whom the security interest was transferred.

Under existing law these provisions would be repealed on January 1, 1998, and other provisions would become operative that, with certain exceptions, preclude the use of a prejudgment attachment.

This bill would revise and recast these provisions, as specified.

This bill would provide that, in an action to foreclose a mortgage or deed of trust on real property or an estate for years, pursuit of any remedy authorized by the law relating to attachment shall not constitute an action for the recovery of a debt secured by a mortgage or deed of trust or a failure to comply with other specified requirements to proceed first against the security.

(2) Existing law prescribes the procedures to obtain a writ of attachment and to determine the amount that may be attached.

This bill would revise these provisions, as specified.

Ch. 223 (AB 1598) Committee on Public Employees, Retirement and Social Security. County employees retirement.

The County Employees Retirement Law of 1937 authorizes boards of supervisors and district governing boards, on recommendation of the board of retirement, to pay any portion of member contributions.

This bill would delete the board of retirement recommendation requirement.

Existing law conditions nonmember retirement upon the amount of member credited service on the date of marriage dissolution or legal separation.

This bill would condition that eligibility upon the member's credited service on the date of the nonmember's retirement.

Ch. 224 (AB 268) Campbell. Retail food facilities.

Existing law, the California Uniform Retail Food Facilities Law, establishes sanitation standards for retail food facilities and requires local agencies to enforce its provisions. Existing law makes violation of these provisions a crime. Existing law requires that these provisions be enforced by the State Department of Health Services and primarily by local health agencies.

Existing law, with certain exceptions, requires each food establishment to be fully enclosed.

This bill would, during operating hours, exclude from this enclosure requirement operations for customer self-service of nonpotentially hazardous bulk beverage dispensing that meet prescribed requirements.

By increasing the enforcement duties of local health agencies, this bill would impose a state-mandated local program.

This bill would make other changes of a technical, nonsubstantive nature.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 225 (SB 206) Ayala. Colorado River Board.

Existing law requires the Colorado River Board to maintain an office in the County of Los Angeles and to hold meetings there or elsewhere upon call of the chairperson or 3 members of the board.

This bill would instead require the board to determine, by majority vote, where to maintain its office and to hold meetings at that office or elsewhere upon call of the chairperson or 3 members of the board. The bill would authorize the local agencies that are represented on the board to pay the relocation or commuting expenses, or both, incurred by the employees of the board as the result of a change in the location of the office of the board, as prescribed.

Ch. 226 (AB 197) Thomson. California State Lottery.

(1) The California State Lottery Act of 1984 requires the California State Lottery Commission to promulgate regulations specifying the manner of distribution, dissemination, or sale of lottery tickets.

This bill, in addition, would permit the commission to promulgate regulations to authorize the use of an electronic or electromechanical device to dispense lottery tickets to be used in the play of any lottery game, if the device satisfies certain specifications.

The bill also would specify that these provisions are not intended to prohibit or restrict the commission from adopting regulations to authorize the use of electronic or electromechanical devices, in addition to those specified above, that are in conformity with the act and specified provisions of the Penal Code governing gaming.

(2) An initiative measure, the act provides that none of its provisions may be changed except to further its purpose by a bill passed by a $2/3$ vote of each house of the Legislature and signed by the Governor.

This bill, in conformance with those requirements, would declare that its provisions further the purpose of the act and would require a $2/3$ vote.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 227 (AB 240) Takasugi. Property taxation.

Existing law permits persons over 55 years of age and persons who are severely and permanently disabled, as specified, to transfer the base year value of their home to a replacement home in the same county, and until January 1, 1999, authorizes the transfer of the base year value of a person's home in another county in certain circumstances.

This bill would additionally authorize the transfer of the base year value of a person's home in another county under those circumstances on and after January 1, 1999, as provided.

Ch. 228 (AB 364) Baca. Personal income taxes: exclusions: discharge of indebtedness.

The Personal Income Tax Law allows various deductions and exclusions in computing the income that is subject to the taxes imposed by that law. Existing law, by reference to a specified federal statute, provides that the discharge of indebtedness is income; however, the discharge of a student loan made to an individual under specified circumstances is not considered income if, as a condition of the loan, a discharge is allowed if the individual works for a certain period of time in certain professions.

This bill would provide that any loan made pursuant to the Forgivable Loan Program of the California State University shall be deemed to be a student loan for purposes of those provisions, and the exclusion from income shall apply to any discharge of the loan that is made in connection with the borrower's performance of services for the California State University.

This bill would take effect immediately as a tax levy.

Ch. 229 (AB 289) Baca. California Finance Lenders Law: licensing.

(1) The California Finance Lenders Law requires a person to be licensed in order to engage in the business of a finance lender or broker. An application for a license must be in the form and contain the information prescribed by the Commissioner of Corporations. The commissioner may issue subsidiary licenses to a person who is the holder of a master license, as defined. The commissioner is also required to investigate the applicant, and specified persons connected to the applicant, if the applicant is a partnership, corporation, trust, or association, upon the filing of a license application.

This bill would provide that the investigation of an existing licensee who applies for an additional location license may be limited to certain information.

(2) The California Finance Lenders Law also exempts various entities from its provisions.

This bill would specifically exempt any person who makes no more than one commercial loan in a 12-month period.

(3) Existing law provides for the designation of a license issued as a masters license and authorizes the conducting of business through subsidiary corporations under a subsidiary license.

This bill would delete those provisions and provide that nothing shall be construed to prevent a licensee from engaging in the business of a finance lender through a licensed subsidiary corporation, as specified. It would authorize a licensee with one or more licensed locations seeking an additional license to file a short form license application.

(4) This bill would also make various clarifying changes and state legislative intent.

Ch. 230 (AB 313) Thomson. Gas: producers' cooperatives.

Existing law permits 3 or more natural persons engaged in the production of gas to form a cooperative association for purposes of selling gas produced by the association's members and performing other specified related functions.

This bill would permit an association to acquire a real property easement from a public utility for the purpose of accommodating the association's gas plant, and would provide that the easement shall be deemed to be held for a public purpose by the association, provided that the Public Utilities Commission finds that the use by the association is in the public interest.

Ch. 231 (AB 331) Figueroa. California Earthquake Authority.

Existing law provides for creation of the California Earthquake Authority, which is authorized to transact insurance for the purpose of selling policies of basic residential earthquake insurance, as specified. Existing law requires the authority to operate pursuant to a written plan of operations, which shall establish in detail the policies and procedures of the authority on various matters, including methods of premium collection.

This bill would require the plan of operations to include provisions that establish a mechanism for policyholders to make installment payments of the annual premium paid to the authority for earthquake coverage. The authority would be authorized to charge a nominal fee to policyholders who opt to make installment payments, as specified.

Ch. 232 (AB 447) Kuykendall. Real estate.

(1) Existing law authorizes the Real Estate Commissioner to charge a real estate broker for the cost of an audit, as specified.

This bill would provide that if a broker fails to pay for the cost of an audit within 60 days of mailing a notice of billing, the commissioner may suspend the broker's license or deny renewal of the license. The suspension or denial would remain in effect until the cost is paid or the broker's right to renew has expired.

(2) Existing law requires the commissioner to adopt regulations as to an appropriate form of testing, examination, or evaluation by the sponsor of certain approved educational programs.

This bill would provide that the regulations pertain to correspondence or homestudy educational programs. The bill would also revise certain continuing education requirements for applicants for the renewal of a real estate license, as specified.

(3) Existing law authorizes the Secretary of the Business, Transportation and Housing Agency to adopt regulations to permit lenders, upon the security of residential real property, to make loans and advance credit thereon, and requires the secretary to make a specified report to the Legislature.

This bill would repeal these provisions and would make a related change.

(4) Existing law provides for certain fee amounts related to real estate license, examination, and subdivision application fees. Section 28 of Chapter 416 of the Statutes of 1993 provides that these fee provisions will be repealed or operative, as specified, if at any time during specified fiscal years funds are transferred from the Real Estate Fund to the General Fund. Existing law also requires the commissioner to issue regulations to reduce these fees during those fiscal years if as of June 30 the balance of the funds in the Real Estate Fund exceeds an amount equal to 50% of the authorized budget for the following fiscal year of the Department of Real Estate.

This bill would repeal certain of the fee provisions that provide for lower fee amounts. The bill would also provide that at any time funds are transferred from the Real Estate Fund to the General Fund by the Budget Act, specified real estate license, examination, and subdivision application fees shall be reduced to a specified maximum amount.

Ch. 233 (AB 503) Cardoza. Weights and measures: combination of vehicles.

Under existing law, a weighmaster is prohibited from weighing a vehicle or combination of vehicles for certification when part of the vehicle or combination is not resting on the scale.

This bill would exempt from that prohibition multiple draft or in-motion weighing operations as specified.

Ch. 234 (AB 558) Miller. Public works.

Existing law authorizes the State Public Works Board to develop energy conservation and cogeneration measures and alternate energy supply services for state agencies, and to enter into energy service contracts, as defined, with state agencies at the request of and with the consent of an agency.

This bill would define state agency to include any local government as defined for purposes of the above provisions. The bill would also provide that any local government that enters into an energy service contract with the board shall include specific contract provisions to meet its energy service contract obligation and shall authorize the Controller to withhold sufficient payments from specific moneys it would otherwise receive from the state to meet its energy service contract obligation if necessary. The bill would require the governing body of a local government entering into an energy service contract with the board to annually budget and appropriate the amounts payable under the contract and require the officer of the local government responsible for disbursements to transfer sums to make the payments if the governing body fails or neglects to make the appropriations.

Ch. 235 (AB 689) Bowler. Firearms.

(1) Existing law authorizes any firearms eligibility determination involving the issuance of any license, permit, or certificate to include the submission of the applicant's fingerprints to the Federal Bureau of Investigation.

This bill would require each application that requires any firearms eligibility determination involving the issuance of any license, permit, or certificate to include two copies of the applicant's fingerprints on forms prescribed by the Department of Justice. The bill would authorize one copy of the fingerprints to be submitted to the Federal Bureau of Investigation.

(2) Existing law requires the Department of Justice to conduct a background check of the purchaser of any firearm by examining its records, and specified records of the State Department of Mental Health, in order to determine if the purchaser is within any of the classes of persons prohibited from possessing firearms.

This bill would authorize the Department of Justice to participate in the National Instant Criminal Background Check System (NICS), to the extent that funding is available, and if that participation is implemented, require the department to notify the

dealer and the chief of police or sheriff of the city or county in which the sale was made, that the purchaser is a person prohibited from acquiring a firearm under federal law.

(3) Existing law prohibits, with certain exceptions, the sale, lease, or transfer of firearms without a license and specifies waiting periods applicable to the sale, lease, or transfer of firearms. Existing law also requires every firearms dealer to keep a register in which information concerning the buyer of a firearm is entered pursuant to specified procedures. Violations of these provisions are punishable as criminal offenses. Under existing law, deliveries, transfers, or sales of firearms made to persons properly identified as full-time paid peace officers, as specified, or made to authorized representatives of cities, cities and counties, counties, or state or federal governments for use by those governmental agencies are exempt from these provisions.

This bill would revise and recast this exemption with respect to authorized law enforcement representatives of cities, counties, cities and counties, or state or federal governments, to require, prior to the delivery, transfer, or sale of any firearm, presentation of written authorization from the head of the agency authorizing the transaction to the person from whom the purchase, delivery, or transfer is being made. The bill also would require, within 10 days of the date a concealable firearm is acquired by the agency, a record of the same to be entered as an institutional weapon into the Automated Firearms System (AFS) via the California Law Enforcement Telecommunications System (CLETS) by the law enforcement or state agency. By imposing additional duties on local entities, the bill would create a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 236 (AB 854) Mazzoni. Shellfish sanitation standards.

Existing law requires the State Department of Health Services to adopt regulations regarding shellfish, including the minimum requirements for growing and harvesting areas, harvesting and plant facility specifications, and fees.

Existing law authorizes the department to adopt any regulations that it determines necessary to interpret and enforce those provisions of law dealing with the sanitary control of shellfish. Existing law requires that the regulations conform so far as possible to the relevant standards adopted by the National Shellfish Sanitation Program.

This bill would instead require the department to adopt regulations to interpret and enforce those provisions of law dealing with the sanitary control of shellfish by January 1, 1999. The bill would require the department to provide in the rulemaking process a written finding describing the public health need for any standards and procedures that exceed the standards and procedures established in the guidelines adopted by the National Shellfish Sanitation Program and would make conforming changes.

Ch. 237 (AB 950) Davis. Disorderly conduct: subsequent offense.

Existing law makes it a misdemeanor for anyone, while loitering, prowling, or wandering upon the private property of another, at any time, to peek in the door or window of any inhabited building or structure, where the person has no visible or lawful business with the owner or occupant. Existing law also makes it a misdemeanor for anyone who looks through a hole or opening or views, by means of any instrumentality, into the interior of a room, where the occupant has a reasonable expectation of privacy, with the intent to invade that privacy. A misdemeanor is punishable by imprisonment in a county jail not exceeding 6 months, by a fine not exceeding \$1,000, or by both.

This bill would authorize the court, upon conviction for either of the above offenses, to require counseling as a condition of probation. This bill would also make the 2nd or subsequent conviction for either offense a misdemeanor punishable by imprisonment in a county jail not exceeding one year, by a fine not exceeding \$1,000, or by both. By

increasing the penalty for an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 238 (AB 1451) Cardoza. Department of Food and Agriculture.

Existing law provides for the Department of Food and Agriculture in state government. The department is charged with the general duty of promoting and protecting the agricultural industry of the state, and of executing the provisions of the Food and Agricultural Code.

This bill would set forth general provisions governing licenses, registrations, certificates, permits, exceptions, and other indicia of authority issued by the department pursuant to any of the provisions of the Food and Agricultural Code. The bill would specify the events upon which licenses, registrations, certificates, permits, exceptions, and other indicia of authority would be deemed forfeited by operation of law, and the grounds upon which the department may deny an application for, or may condition, suspend, or revoke, licenses, registrations, certificates, permits, exceptions, and other indicia of authority.

Ch. 239 (SB 18) Rosenthal. Insurance: funds.

Under existing law, property held by a business that is unclaimed for more than 3 years escheats to the state and, in general, is deposited into the Unclaimed Property Fund. Existing law also provides that insurance rebates ordered under Proposition 103 that cannot be made escheat to the state, and provides that, for the 1996-97 fiscal year, amounts in excess of \$14,000,000 are deposited in the Insurance Fund to repay a specified loan, and amounts that escheat in the 1997-98 fiscal year also shall be deposited in the Insurance Fund in an amount necessary to repay that loan.

This bill would provide that funds subject to escheat under the above provisions that are subject to escheat on or after July 1, 1997, shall be transferred by the Controller to the Department of Insurance for deposit in the Insurance Fund up to the amount that will repay principal and interest on the General Fund loan authorized by the Budget Act of 1996. It would provide that those funds are continuously appropriated for that purpose. It would provide for a transfer to the General Fund on June 30, 1998, and, if necessary, on June 30, 1999. The bill would make related changes.

Since the bill would affect the distribution of insurance rebates ordered under Proposition 103, it would amend Proposition 103 and, thus, would require a $\frac{2}{3}$ vote for enactment.

This bill would also require the Controller to transfer \$10,000,000 from the General Fund to the Insurance Fund in equal payments over 3 years, to commence during the first quarter of the 1997-98 fiscal year, to resolve the issues raised by pending litigation in a specified case concerning the alleged unlawful transfer of money from the Insurance Fund to the General Fund. It would authorize the payment of a sum not to exceed \$50,000 for payment of plaintiffs' attorneys' fees in that case. It would provide for the use of the funds by the Department of Insurance for specified purposes.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 240 (SB 183) M. Thompson. Fish.

Existing law requires any person taking steelhead trout in inland waters to have a steelhead trout catch report-restoration card issued by the Department of Fish and Game and requires cardholders to record certain information on the card relative to fishing. Existing law restricts the use of the revenue from the fees for the cards, until July 1, 1997, to monitoring, restoration, and enhancement of steelhead trout resources. Existing law required the department to make a report to the Legislature by July 1, 1996, regarding the implementation of the catch report-restoration card program.

This bill would specify that cardholders shall record the required information on the card whenever the cardholder finishes fishing for the day, moves to another river or stream, or retains steelhead trout.

This bill would extend the restriction on the use of the revenues for those purposes until July 1, 2002, and would require a report to the Legislature on or before July 1, 2000.

This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 241 (SB 457) Costa. Controlled substances: forfeitures.

(1) Existing law generally provides that the interest of any registered owner of a boat, airplane, or vehicle which has been used as an instrument to facilitate the possession for sale or sale of specified amounts of specified controlled substances, and all moneys, negotiable instruments, or securities used or intended to be used to facilitate any violation of specified controlled substance offenses are subject to forfeiture. Existing law provides that in all cases where the property is seized and forfeited to a state or local governmental entity and, where necessary, sold, the money forfeited or the proceeds of sale shall be distributed by the state or local governmental entity to specified persons or entities for specified purposes.

This bill would provide, in addition, that the interest of any registered owner of a boat, airplane, or vehicle which has been used as an instrument to facilitate the manufacture of specified amounts of specified controlled substances is subject to forfeiture. In addition, all moneys, negotiable instruments, or securities used or intended to be used to facilitate any of the following would be subject to forfeiture:

(a) The felonious construction, possession, or use of a false compartment with intent to conceal a controlled substance.

(b) The commission by an adult of specified controlled substance offenses involving a minor.

(c) The unlawful possession of specified chemicals with the intent to manufacture specified controlled substances.

The bill would also make conforming or technical, nonsubstantive changes to related provisions. By increasing the penalties for existing crimes, this bill would impose a state-mandated local program. By increasing the amount of money and assets subject to forfeiture and distribution, the bill would make an appropriation.

(2) Existing law provides that money forfeited or the proceeds of sale of property forfeited shall be distributed by the state or local governmental entity to the state or local entity for all expenditures made or incurred by it in connection with the sale of the property, including expenditures for any necessary repairs, storage, or transportation of any property seized.

This bill would expressly include in these reimbursable expenditures any necessary costs for required notice that were incurred by the state agency or local governmental entity in connection with the sale of the property.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 242 (SB 421) Johnson. Education: school finance: Newport-Mesa Unified School District: South Orange County Community College District.

(1) Existing law prescribes a method for the calculation of the revenue limit for each school district for each fiscal year.

This bill would provide that the amounts that, under existing law, should have been allocated to the Newport-Mesa Unified School District in the 1994-95 fiscal year, but that were not received by the district until the 1996-97 fiscal year and beyond due to the bankruptcy proceedings of the County of Orange, shall not be included in revenue limit computations for the 1996-97 fiscal year and future fiscal years. The bill would provide that these amounts be treated as being received by the district in the 1994-95 or 1995-96 fiscal year, or both.

(2) Existing law prescribes a method for the calculation of the revenue limit for each community college district for each fiscal year.

This bill would provide that the amounts that, under existing law, should have been allocated to the Saddleback Community College District, now named the South Orange County Community College District, in the 1994–95 fiscal year, but that were not received by the district until the 1996–97 fiscal year and beyond due to the bankruptcy proceedings of the County of Orange, shall not be included in revenue limit, or full-time equivalent student (FTES) funding, computations for the 1996–97 fiscal year and future fiscal years. The bill would provide that these amounts be treated as being received by the district in the 1994–95 or 1995–96 fiscal year, or both.

(3) This bill would express a legislative finding and declaration that, due to the unique circumstances created by the bankruptcy of the County of Orange and that are addressed by the bill, a general statute cannot be made applicable within the meaning of the California Constitution, and that the enactment of a special statute is therefore necessary.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 243 (SB 97) Alpert. Civil compromise: crimes against children and elders.

Existing law establishes a procedure for the civil compromise of misdemeanor offenses whereby when a person injured by an act constituting a misdemeanor has a remedy through a civil action, the criminal proceeding may be stayed by the court and the defendant discharged if the victim acknowledges receiving satisfactory compensation for the injury. Civil compromise is not allowed in certain cases, including cases of domestic violence under certain conditions.

This bill would add to those types of cases in which civil compromise is not allowed violations of specified protective orders relating to minors and cases involving elder abuse or child abuse or molestation.

This bill would also incorporate additional changes in Section 1377 of the Penal Code enacted by SB 115 (Ch. 18, Stats. 1997).

Ch. 244 (AB 354) Mazzoni. Class Size Reduction Program: evaluation.

Existing law provides that the State Department of Education shall contract for an independent evaluation of the Class Size Reduction Program to be completed on or before March 28, 2002. Existing law provides that the evaluation shall determine whether this program has been effective in improving pupil achievement and shall identify components of a successful class size reduction program.

This bill would require the Superintendent of Public Instruction and the State Board of Education to develop and submit to the Governor and the Legislature an evaluation research design on or before November 30, 1997. The bill would provide that the primary purpose of the evaluation research design is to provide the method of assessment for the evaluation of pupil achievement resulting from the reduction of class size in kindergarten and grades 1 to 3, inclusive.

This bill would also require the evaluation research design to include the method of assessment for the evaluation of secondary issues related to the Class Size Reduction Program, as specified.

This bill would require an evaluation research design to be developed in cooperation with an advisory panel for submittal to the State Board of Education. The advisory panel would include parents, teachers, administrators, school board members, and representatives from the State Board of Education and the Governor's Office of Child Development and Education. The bill would require the advisory panel to advise as to the estimated cost and duration of the evaluation.

This bill would provide that costs related to the evaluation research design and advisory panel shall be funded from the existing Class Size Reduction Program administrative budget within the State Department of Education.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 245 (AB 442) Gallegos. Real estate loans.

The Real Estate Law requires a real estate broker who negotiates a loan to be secured by real property to deliver to the borrower a statement in writing containing certain information about the terms and costs of the loan, as specified.

This bill would provide that these requirements may be satisfied in the case of a federally regulated residential mortgage loan if the borrower receives a “good faith estimate” pursuant to the federal Real Estate Settlement Procedures Act, all applicable disclosures required by the federal Truth in Lending Act, and a disclosure with respect to loans with balloon payment provisions, as specified.

Ch. 246 (AB 788) Thomson. Local government finance: county audits for special districts: reclamation districts.

(1) Under existing law, a county auditor shall either make or contract with an accountant to make an annual audit of the accounts and records of every special purpose district within the county for which an audit is not otherwise provided, under specified conditions. Existing law further authorizes a special district to replace the annual special audit with a biennial audit covering a 2-year period, or with an audit covering a 5-year period under certain circumstances. Existing law exempts a special district from the requirement of an annual audit if the financial statements are audited by the Controller to satisfy federal audit requirements.

This bill would authorize a board of supervisors to replace a special district audit with a financial review, in accordance with specified federal definitions, of a special district under certain circumstances.

(2) Under the existing Reclamation District Act, the board of trustees is the governing body of a water reclamation district. The board is required to elect one of its members as its president, and one of its members, or any other person, as its secretary. Under existing law, the treasurer or treasury of the county in which the whole or the greater portion of the land of a district is situated have a variety of district functions relating to bonds, warrants, property sale, and other fiscal matters.

This bill would designate the county treasurer as ex officio treasurer of the district unless the board, by resolution, and with the written consent of the county treasurer, appoints a district treasurer. The bill would set forth the procedures to be followed if the resolution to appoint a district treasurer is adopted. This bill would create a state-mandated local program, by imposing new duties on county treasurers.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 247 (AB 848) Cunneen. Child care.

Existing law requires the Superintendent of Public Instruction to adopt rules and regulations pursuant to the Child Care and Development Services Act (the act) and rules, regulations, and guidelines to facilitate the funding and reimbursement procedures required by the act.

This bill would require those rules, regulations, and guidelines to permit reimbursement for interest paid by contractors on private sector debt financing for the purchase, lease-purchase, repair, or renovation of child care and development facilities owned or leased by contractors providing center-based care. The bill would require the Superintendent of Public Instruction to adopt regulations requiring contractors to demonstrate that the amount of interest paid in a year on private sector debt financing for those purposes does not exceed the value obtained by the state in the use of the facilities during the year for the child care and development services program. The bill would require the regulations to include, but not be limited to, specified methods of demonstration that may be used by contractors.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 248 (AB 927) B. Thompson. Libraries.

(1) Existing law requires Los Angeles County to transfer back to a city or library jurisdiction that is withdrawing from the Los Angeles County free library system, that

portion of the property tax proceeds attributable to properties located within the withdrawing city or library district and specified surrounding jurisdictions being used for Los Angeles County free library purposes. Existing law also requires that the personal and real property used for Los Angeles County free library purposes within the withdrawing city or library jurisdiction be transferred to the city or library district upon their request, as specified.

This bill would include within these provisions Riverside County and cities and library jurisdictions withdrawing from the Riverside County free library system. To the extent the bill would thereby impose new duties upon Riverside County, those duties would be a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 249 (AB 1178) Davis. Consumer representation.

Existing law provides that certain advertising related practices are unlawful, and makes a violation of those provisions a misdemeanor as well as grounds for civil actions.

Among other things, it is unlawful for a nongovernmental entity to solicit information, or the purchase of a product or service, or a contribution by means of a mailing that contains a symbol that implies a government connection unless it has consent of a government entity, the solicitation bears a statement on its face, or the envelope or outside cover contains a specified notice.

This bill would specify that the nongovernmental entity either must have consent of a government entity, or the solicitation must bear a statement on its face and the envelope or outside cover must contain a specified notice.

Existing law makes it unlawful for a person to make an untrue or misleading statement in connection with the offering or performance of a homestead filing service. Existing law also requires specified disclosures by those services, and limits the fee charged to \$25.

This bill would impose similar requirements for homeowners' exemption filing services and assessment appeal application filing services, except that no fee limit would be imposed for the latter.

Since a violation of these provisions would be a crime, the bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 250 (AB 1261) Baugh. Household goods carriers: violations.

(1) Under existing law, a member of the California Highway Patrol, upon reasonable belief that any vehicle is being operated in violation of the Vehicle Code or in an unsafe condition, may require the driver of the vehicle to stop and submit to an inspection of the vehicle, and its equipment, license plates, and registration card.

Under the Household Goods Carriers Act, only those household good carriers who have been issued permits under that act are entitled to engage in the business of transporting certain goods for compensation.

The bill would authorize any traffic officer to stop any commercial, rental vehicle and inspect certain documents to determine whether the driver is in violation of the Household Goods Carriers Act if the officer has probable cause to believe that the vehicle is being operated in violation of that act. Because a refusal to submit to the inspection would be an infraction, the bill would impose a state-mandated local program by creating a new crime.

The bill would require a copy of any citation for a violation of the above-described offenses to be submitted by the department that employs the traffic officer to the

Director of the Consumer Services Division of the commission and would provide for an administrative hearing regarding the citation.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 251 (AB 1263) Poochigian. Instructional materials: adoption.

Existing law requires the State Board of Education (state board) to adopt basic instructional materials for use in kindergarten and grades 1 to 8, inclusive, for use by governing boards of school districts. The state board is also required to adopt procedures for the submission of basic instructional materials, including a procedure for the submittal of instructional materials for adoption in specified subject areas at least every 2 years. Existing law requires items placed on a listing of instructional materials to remain on the list from the date of the adoption of the item until a date established by the state board, but requires that date to be the earlier of not more than 8 years from the date of adoption of the item or the date on which the state board adopts instructional materials based upon a new or revised curriculum framework.

This bill would change that procedure by providing that instructional materials may be submitted for adoption by the state board in specified subject areas not less than 2 times every 6 years and in other specified subject areas not less than 2 times every 8 years. The bill would require the state board to ensure that curriculum frameworks are reviewed and adopted in each subject area consistent with the 6 and 8 year submission cycles and that the criteria for evaluating instructional materials developed by the curriculum development and supplemental materials commission are consistent with criteria used by the state board in reviewing and adopting or recommending for adoption basic instructional materials.

This bill would provide that the date established by the state board for continuing items on the list of instructional materials shall be not more than the earlier of 6 years from the date of adoption for specified subject areas and 8 years from the date of adoption for other specified subject areas or the date on which the state board adopts instructional materials based upon a new or revised curriculum framework. The bill would authorize the state board to delete from the lists any instructional material that did not receive an order from any district during the previous 2 years.

This bill would make conforming changes to existing provisions of law.

Ch. 252 (SB 47) Kopp. Transportation: Capitol Corridor Joint Powers Authority: tolls.

(1) Existing law authorizes the establishment of the Capitol Corridor Joint Powers Board, subject to being organized when at least 2 of specified jurisdictions elect to appoint members to the board.

This bill would, instead, authorize the establishment of the Capitol Corridor Joint Powers Authority when at least 2 of specified jurisdictions execute a joint powers agreement for the purpose of assuming responsibility for intercity passenger rail service in the Capitol Corridor and elect to appoint members to the board.

(2) Existing law requires the Department of Transportation to collect tolls on state-owned toll bridges.

This bill would, not later than 60 days after the effective date of the bill, require all those tolls to be based on the number of axles on a vehicle or that total number of axles on a vehicle plus a drawn trailer or vehicle.

(3) Existing law specifies the disposition of revenues derived from increasing to \$1 the tolls on bridges within the jurisdiction of the Metropolitan Transportation Commission.

This bill would delete the current toll and would, not later than 60 days after the effective date of the bill, set forth a specific uniform toll schedule for all bridges under the jurisdiction of the Metropolitan Transportation Commission, based upon the number of axles on a vehicle.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 253 (SB 138) Kopp. Open meetings: local agencies.

The Ralph M. Brown Act generally requires that the meetings of legislative bodies of local agencies be conducted openly. The act defines “meeting” for purposes of the act and expressly excludes certain activities from the application of the act.

This bill would provide that the act does not apply to the attendance of a majority of the members of a legislative body at an open and noticed meeting of a legislative body of another local agency. The bill would also provide that the act does not apply to the attendance of a majority of the members of a legislative body at an open and noticed meeting of a standing committee of that body, provided that the attending members of the legislative body who are not members of the standing committee attend only as observers.

The act authorizes the legislative body to use video teleconferencing, as defined, in connection with any meeting or proceeding authorized by law, as specified. The act limits this teleconferencing to the receipt of public comment or testimony and to deliberations of the legislative body.

This bill would change references to video teleconferencing to refer instead to teleconferencing, and would define that term as a meeting of individuals in different locations, connected by electronic means, through either audio or video, or both. The bill would expand the purposes for which teleconferencing may be used in a meeting or proceeding, and would require the teleconferenced meeting or proceeding to comply with all requirements of the act and all otherwise applicable provisions of law relating to a specific type of meeting or proceeding.

The act requires the legislative body of a local agency to provide the time and place for holding regular meetings.

This bill would instead require each legislative body of a local agency, except for advisory committees and standing committees, to provide the time and place for holding regular meetings.

The act requires the legislative body of a local agency to give mailed notice of regular meetings and special meetings, as specified, to any person who has filed a written request for the notice.

This bill would instead require that, upon receipt of a written request, which must be made annually, the legislative body or its designee shall cause a copy of the agenda, or a copy of all the documents constituting the agenda packet, of any meeting to be mailed to the person making the request. This requirement would impose a state-mandated local program. The bill would permit the legislative body to establish a fee not to exceed the cost of providing the service.

The act permits the legislative body to take action on an item of business not on the agenda when $\frac{2}{3}$ of the legislative body, or all of the legislative body if less than $\frac{2}{3}$ are present, determines that there is a need for immediate action on an item that came to the attention of the body subsequent to the posting of the agenda.

This bill would permit that determination to be made by a $\frac{2}{3}$ vote of the members of the legislative body present at the meeting or by all the members if less than $\frac{2}{3}$ are present.

The act permits a special meeting to be called by the presiding officer of the legislative body or by a majority of the members of the legislative body by delivering personally or by mail written notice to each member and local news media requesting notice in writing.

This bill would permit the notice to be delivered personally or by any other means.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 254 (AB 180) Torlakson. County employees: retirement.

The County Employees Retirement Law of 1937 authorizes the Contra Costa County Board of Supervisors to adopt a Tier Two retirement benefit program for county officers and employees.

This bill would authorize that board to adopt a specified Tier Three retirement benefit program.

Ch. 255 (AB 216) Wayne. Criminal procedure: appeal.

Existing law specifies the cases that the people may appeal from a judgment or order of an inferior court, in an infraction or misdemeanor case, to the superior court of the county in which the inferior court is located.

This bill would add to these cases the imposition of an unlawful sentence, whether or not the court suspends the execution of sentence. The bill would define "unlawful sentence" for these purposes. The bill also would provide that the defendant shall have the right to counsel in the people's appeal of an unlawful sentence under the same circumstances that he or she would have under existing law for a similar appeal from a felony conviction. By providing the right to counsel in these appeals, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 256 (AB 237) Figueroa. Workers' compensation: vocational rehabilitation services: fees.

(1) Existing law requires the Administrative Director of the Division of Workers' Compensation to establish a vocational rehabilitation unit, that includes appropriate professional staff, and that has specified duties, including a requirement to establish the maximum aggregate permissible fees for evaluation, plan development, and job placement services.

This bill would instead establish a fee schedule that would permit up to \$3,000 for vocational evaluation, evaluation of vocational feasibility, initial interview, vocational testing, counseling and research for plan development, and preparation of a specified form and \$3,500 for plan monitoring, job seeking skills, and job placement research and counseling, but in no event would the aggregate of these categories exceed \$4,500.

(2) Existing law provides that if the employee is determined to be a qualified injured worker, and the employer notifies the injured worker that the employer will be unable to provide modified or alternative work to that injured worker, the qualified rehabilitation representative and the employee, jointly, shall develop an agreed-upon vocational rehabilitation plan. Existing law further provides that these plans shall be completed within an 18-month period after approval of the plan and shall not include a period of job placement exceeding 60 days.

This bill, instead, would provide that these plans shall not include a period of job placement exceeding 60 days unless the plan is exclusively utilizing transferable skills and experience for direct placement activities, in which case, the period of job placement may be up to 90 days.

Ch. 257 (AB 299) Ducheny. Motorcycles: safety program: vessels: fees.

(1) Under existing law, the Department of Motor Vehicles is required, until December 31, 1997, to collect an additional \$2 initial and renewal registration fee for every motorcycle subject to registration, which fees are used for a motorcycle safety program. Those provisions are to be repealed on January 1, 1998.

This bill would extend the date for collecting the additional fees to December 31, 2002, and the repeal date to January 1, 2003.

(2) Existing law requires the owner of each vessel requiring numbering, as specified, to file an initial application for a number with the Department of Motor Vehicles or with an agent authorized by the department on forms approved by the department, as specified. The form is required to be accompanied by a fee of \$9, except that an owner of a vessel registered outside this state who is submitting an application for registration in this state is required to pay a fee of \$37.

This bill would require that, in addition to the fees specified above, the initial application for a certificate of number be accompanied by a \$5 fee for original

registrations that become due on an even-numbered year and a \$10 fee for original registrations that become due between December 1 and December 31 of an odd-numbered year.

(3) Existing law, until January 1, 1998, requires a certificate of number for a vessel to be renewed before midnight of the expiration date every year by presentation of the certificate of number last issued for the vessel or by presentation of a potential registration card issued by the department. Until January 1, 1998, the fee for renewal is \$5 per year. On and after January 1, 1998, the certificate of number is required to be renewed before midnight of the expiration date every second year, and the fee for renewal is \$10 for each 2-year period.

This bill would, instead, require that an application for renewal of a certificate of number that expires before, and is renewed before, December 30, 1997, be accompanied by the \$5 fee specified above. On or after September 1, 1997, applications for renewal of certificates of number that expire on or after, or are renewed on or after, December 31, 1997, would be for 2 years and would be required to be accompanied by the \$10 fee specified above.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 258 (AB 317) Ortiz. Foster care.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which payments are made on behalf of low-income children placed in foster care, including certain qualified placements with relatives. Existing law also provides for the Aid to Families with Dependent Children (AFDC) program, under which each county provides cash assistance and other benefits to qualified low-income families. Payment rates under this program are lower than that provided for under the AFDC-FC program.

Existing law requires the State Department of Social Services, if federal approval is obtained, and if counties agree to participate, to establish 5-year pilot projects in 5 specified counties. The projects involve only specified dependents of the court who are placed with relatives and who are receiving federal AFDC-FC payments. Existing law requires the department and the pilot counties or an entity under contract to conduct an evaluation of the pilot projects, to be provided to the Legislature and the Governor.

This bill would include Sacramento County and other counties that submit a plan and secure department approval among the counties that may agree to participate. This bill would provide that the pilot project shall be deemed a success if at least 75% of the children participating achieve permanent placement. The bill would require the evaluation of the pilot projects to be provided to the Legislature and the Governor 3 years following implementation.

Ch. 259 (AB 380) Pacheco. Courts: constitutionality of state laws.

(1) Existing law sets forth the duties of trial courts in actions and proceedings, as specified.

This bill would require the Judicial Council, on or before January 1, 1999, to adopt a rule of court providing that, upon entry of judgment in a contested action or special proceeding in which a state statute or regulation has been declared unconstitutional by the court, notice of entry of judgment is mailed to the Attorney General, and a certificate of that mailing is placed in the court's file in the cause. The bill would impose a state-mandated local program by requiring new duties of trial court personnel. The bill would also provide that the Attorney General has the right to intervene and participate in any appeal of a case in which the notice described above was required, as specified, but has no direct right of appeal. The bill would require the Attorney General to file a statement, as specified, with the Legislature and Judicial Council if he or she elects not to intervene in the appeal.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 260 (AB 477) Leonard. Explosives: incendiary device: permits.

(1) Under existing law, a person is required to apply for and obtain a permit to manufacture, sell, receive, store, possess, transport, or use explosives. Existing law prohibits the issuance of this permit to any person prohibited from owning or having in his or her possession or control any firearm and any person convicted of specified offenses.

This bill would require the issuing authority, for purposes of determining whether a person meets the prescribed criteria for denial of a permit, to obtain 2 sets of fingerprints from all persons applying for a permit pursuant to these provisions and to submit the fingerprints to the Department of Justice. The bill also would require the department to make inquiries regarding the criminal background of applicants for a permit. By imposing new duties on local governmental agencies, this bill would impose a state-mandated local program.

(2) Existing law makes it a misdemeanor or a felony for any person to possess any flammable, explosive, or combustible material or substance, or any device in an arrangement or preparation, with intent to willfully and maliciously use this material, substance, or device to set fire to or burn any structure, forest land, or property. Existing law also makes it a felony to possess, manufacture, or dispose of a firebomb.

This bill would recast these provisions by deleting the provisions related to a "firebomb" and incorporating "incendiary device," as defined. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 261 (AB 578) Martinez. Public utilities: electrical restructuring.

(1) The existing restructuring of the electrical services industry provides for the authorization of direct transactions between electricity suppliers and end use customers, subject to implementation of nonbypassable charge, and for the creation of an Independent System Operator and Power Exchange. An Oversight Board is also created to, among other things, oversee the Independent System Operator and Power Exchange, and to determine the composition and terms of service and to appoint the members of the governing boards of the Independent System Operator and the Power Exchange.

This bill would rename the Oversight Board the Electricity Oversight Board. This bill would authorize the Governor to designate one of the voting members of the Oversight Board as chairperson, provide that 2 voting members shall constitute a quorum, require a majority vote of the voting members for any decision or action of the Oversight Board, and provide that the members of the Oversight Board shall serve without compensation, but may be reimbursed for necessary expenses incurred in the performance of their duties.

(2) Existing law requires the Oversight Board to take the steps necessary to ensure the earliest possible incorporation of the Independent System Operator and the Power Exchange as separately incorporated public benefit, nonprofit corporations under the Corporations Code.

This bill would set forth certain authority of the Oversight Board, permit the Oversight Board to adopt as emergency regulations, regulations adopted within 120 days of the effective date of this bill, subject the Oversight Board to specified open meeting

requirements, and require the voting members of the Oversight Board to file financial disclosure statements with the Fair Political Practices Commission.

(3) Existing law required the Independent System Operator to adopt inspection, maintenance, repair, and replacement standards for the transmission facilities under its control no later than March 31, 1997.

This bill would extend this deadline to September 30, 1997, and would require the Independent System Operator to report to the Oversight Board regarding the development and implementation of these standards, at such times as the Oversight Board may specify.

(4) Existing law requires the Independent System Operator, in consultation with certain agencies, to provide a report to the Legislature within 6 months after the Federal Energy Regulatory Commission approval of the Independent System Operator.

This bill would require the Independent System Operator to also provide this report to the Oversight Board.

Since existing law makes any public utility, as defined, and any corporation other than a public utility, that violates the Public Utilities Act guilty of a misdemeanor, and the provisions of the bill would be within the act, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 262 (AB 666) Ortiz. State property.

Existing law authorizes the Director of General Services to lease real property owned by the state within a specified core area of Sacramento and not under the jurisdiction of any other state agency, for purposes consistent with the Capitol Area Plan under terms and conditions that the director deems appropriate.

This bill would also authorize the director to sell this real property to a joint powers authority created by the Department of General Services and the City of Sacramento. The bill would also specifically authorize the director to sell property to the joint powers authority if specified deed restrictions are included in the conveyance, at a price that is determined to be its fair market value, and with terms that have been determined to be appropriate to stimulate timely development to meet the goals set forth in the 1997 update of the Capitol Area Plan.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 263 (AB 757) Escutia. Infant safety.

Existing law prohibits a commercial user, as defined, from remanufacturing, selling, leasing, or placing in the stream of commerce, among other things, a full-size or non-full-size crib, as defined, that is unsafe for any infant using the crib. Under existing law, a full-size or non-full-size crib is unsafe when it does not conform to certain regulatory standards, or when it has specified dangerous features or characteristics.

Existing law provides for the licensure and regulation of health facilities and child day care facilities, which includes day care centers and family day care homes. A willful or repeated violation of those provisions is a crime.

This bill would, on or after July 1, 1998, prohibit a child day care facility from using or having on the premises of the facility any full-size or non-full-size crib that is unsafe for any infant using the crib, except as specified. Unsafe for purposes of this provision has the same meaning as provided under the above prohibitions applicable to a commercial user.

Existing law requires health facilities and midwives to provide information and instructional materials relating to shaken baby syndrome, if available, free of charge to parents or guardians of newborns, and requires the State Department of Social Services to provide this information and instructional materials, if available, free of charge to child care providers upon licensure and at the time of a site visit. Existing law does not require persons or agencies to provide duplicative or redundant materials.

This bill would require information and instructional materials relating to sudden infant death syndrome to be provided to parents or guardians of newborns by hospitals or midwives, to hospitals and to child care facilities by the State Department of Health Services in a camera-ready typesetting format, and to family day care homes and certain other child day care facilities by the State Department of Social Services.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 264 (AB 820) Brewer. Local government operations: videotape retention.

Under existing law, unless otherwise provided by law, the head of a city department may destroy any city record, document, instrument, book, or paper, under his or her charge, without making a copy thereof, after the same is no longer required, except those records less than 2 years old, among specified others. Existing law further authorizes the head of a department of a city, county, or city and county, public safety communications center, or the head of a special district to destroy recordings of telephone and radio communications maintained by the department or the special district after 100 days. Existing law also authorizes the destruction of duplicate records, as defined, less than 2 years old.

This bill would authorize the head of a department to destroy recordings of routine video monitoring, as defined, after 1 year. The bill would also include recordings of routine video monitoring among those duplicate city records permitted to be destroyed before 2 years.

Ch. 265 (AB 866) Thomson. Human services: Solano County: pilot program.

Existing law provides for various health and social services for eligible individuals.

Existing law requires Placer County, with the assistance of the appropriate state departments, to implement a pilot program in Placer County, upon approval by that county, for the funding and delivery of services and benefits through an integrated and comprehensive county health and human services system.

This bill would enact similar provisions for a pilot project in Solano County.

This bill would make its provisions inoperative on July 1, 2002, and would repeal them as of January 1, 2003.

Ch. 266 (AB 1132) Alby. Restitution.

(1) Existing law requires the Director of Corrections, in any case in which a prisoner owes a restitution order or a restitution fine, to deduct specified amounts from the wages and trust account deposits of the prisoner, and to transfer those amounts to the State Board of Control for direct payment to the victim or deposit in the Restitution Fund.

This bill would require any compensatory or punitive damages awarded by trial or settlement to a prisoner in connection with a civil action brought against any jail, prison, or correctional facility, or any official or agent thereof, to be paid directly, after payment of reasonable attorney's fees and litigation costs approved by the court, to satisfy any outstanding restitution orders or restitution fines against the prisoner. The bill would require the Department of Corrections to notify the victims of the crime for which the prisoner was convicted concerning the pending payment of any compensatory or punitive damages. The bill also would authorize the Director of Corrections to deduct an administrative fee of 5% of any amount paid from a prisoner settlement or award in satisfaction of an outstanding restitution order or fine.

(2) Existing law authorizes the Director of the Youth Authority to release any trust funds of a ward committed to the authority in his or her possession for any purpose when authorized by the ward. When the sum held in trust for any ward exceeds \$500 the amount in excess may be expended by the director pursuant to a lawful order of a court directing payment of the funds without the authorization of the ward.

This bill would require the Director of the Youth Authority to deduct the balance owing on a restitution order or restitution fine from the trust account deposits of a ward, and to transfer that amount directly to the victim or the State Board of Control for deposit

in the Restitution Fund. The bill also would require any compensatory or punitive damages awarded by trial or settlement to a minor or adult committed to the Department of the Youth Authority in connection with a civil action brought against any jail or correctional facility, or any official or agent thereof, to be paid directly, after payment of reasonable attorney's fees and litigation costs approved by the court, to satisfy any outstanding restitution orders or restitution fines against the minor or adult. The bill would require the Department of the Youth Authority to notify the victims of the crime for which the minor or adult was committed concerning the pending payment of any compensatory or punitive damages. The bill also would authorize the Director of the Youth Authority to deduct an administrative fee, as specified.

Ch. 267 (AB 1152) Poochigian. Juveniles: escape.

(1) Under existing law, any person in custody in, or committed to, any of enumerated county juvenile facilities who escapes or attempts to escape from the facility or during transportation to or from the facility, is guilty of a misdemeanor punishable by imprisonment in the county jail for up to one year; and if escape is made by means of force or violence, by imprisonment in the county jail for up to one year or by imprisonment in the state prison.

This bill would provide that a minor on probation who removes an electronic monitor and, for more than 48 hours, violates the terms of probation with respect to the monitor, is guilty of a misdemeanor. This bill would also provide for restitution for damaged or discarded electronic monitoring equipment, as specified. Because the bill would establish a new crime and impose additional duties on local agencies it would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that the bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide costs does not exceed \$1,000,000, shall be payable from the State Mandates Claims Fund.

Ch. 268 (AB 1196) Shelley. Juveniles: placement of dependent children.

Under current law, a child may be determined to be a dependent child and removed from the physical custody of his or her parents. In those cases, the child may be placed with a relative if appropriate. In determining whether a placement is appropriate, consideration must be given to certain factors.

This bill would include among those factors the ability of the relative to facilitate implementation of all elements of the case plan and to provide a permanent home for the child if the child cannot return home, whether any person residing in the home has a history of prior violent criminal acts or has been held responsible for child abuse or neglect, and the safety of the relative's home. This bill would require a county social worker to conduct a safety assessment of the relative's home.

Since county social workers would be required to consider additional matters with respect to the placement of the child and conduct a safety assessment, this bill would impose a state-mandated local program.

Existing law requires a court order changing or modifying a previous order and removing a minor from a parent, guardian, relative, or friend and directing placement in a foster home or commitment to a private or county institution, to be made only after a noticed hearing on a supplemental petition filed by a probation officer.

This bill would require, in case of placement with a relative, that the supplemental petition by the probation officer contain facts sufficient to show that placement with a relative is not appropriate. By imposing additional duties on a probation officer, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 269 (AB 1215) Mazzoni. Long-term care.

Existing law provides for the licensure and regulation of residential care facilities for the elderly, as defined, and community care facilities, as defined, administered by the State Department of Social Services. Existing law provides for the licensure and regulation of health facilities, as defined, including long-term health care facilities, administered by the State Department of Health Services. Existing law also provides for the regulation of adult day health care centers, as defined, administered by the Department of Aging or the State Department of Health Services pursuant to an interagency agreement.

Under existing law, the Health and Welfare Agency consists of the State Departments of Health Services, Mental Health, Developmental Services, Social Services, and Alcohol and Drug Abuse, the Departments of Aging, Rehabilitation, and Community Services and Development, and the Employment Development Department. The agency also includes the Office of Statewide Health Planning and Development and the State Council on Developmental Disabilities.

This bill would require the Health and Welfare Agency, in consultation with certain other state agencies, to prepare a report on the long-term care programs that provide services to adults and are administered by the state departments within the agency, and to submit the report to the Legislature by January 1, 1999. It would require the report to include information regarding an inventory of long-term care programs, options for the integration of key programs administered by different state departments, options for integrating licensure functions for long-term care facilities, including community care facilities and health facilities, and a timetable for implementation of these options.

Ch. 270 (AB 1542) Ducheny. Welfare reform.

Existing law provides for the Aid to Families with Dependent Children (AFDC) program, under which each county provides cash assistance and other benefits to qualified low-income families. The AFDC program is funded, in part, by the federal Temporary Assistance for Needy Families (TANF) program, subject to federal requirements. Each county is required to pay a share of the cost of both aid grant and administrative costs for the AFDC program.

This bill would rename that program the California Work Opportunity and Responsibility to Kids (CalWORKs) program and would recast provisions relating to the funding and administration of that program and other social services programs. This bill would impose work participation requirements and time limits upon the receipt of aid.

This bill would provide that a community college shall provide various educational services to CalWORKs recipients. Because the bill would impose additional responsibilities upon community college districts, the bill would impose a state-mandated local program.

This bill would require the establishment of job creation and development programs for CalWORKs recipients and other low-income individuals.

This bill would also permit counties to implement various types of CalWORKs demonstration projects.

Existing law, the Child Care and Development Services Act, provides for the operation of child care and development programs. Existing law also contains provisions for child care for AFDC recipients. This bill would revise funding allocations and eligibility requirements for the provision of child care services and provisions regarding the administration of those services.

By imposing additional duties on counties and school districts, this bill would impose a state-mandated local program.

Existing law establishes eligibility requirements for benefits under the AFDC program, including limitations on the amount of income and resources that may be available to an eligible applicant or recipient.

This bill would revise eligibility requirements and apply them to the CalWORKs program.

By revising eligibility standards for receipt of benefits for this continuously appropriated funded program, this bill would result in an increase in appropriated funds, thereby making an appropriation. By increasing amounts of income and resources that will not be considered in determining CalWORKs recipient eligibility, the bill would increase the class of persons eligible for the CalWORKs program, and so would impose a state-mandated local program. This bill would also revise cost-of-living adjustments under that program.

Existing law provides for the reduction of aid payments under the AFDC program in the case of prior overpayments.

This bill would revise the method of calculating the reduction of those aid payments, thereby resulting in the increase of funds continuously appropriated for the CalWORKs program, resulting in an appropriation.

Existing law provides for procedures for the collection and distribution of child support owed or paid to custodial parents who are recipients of benefits under the AFDC program.

This bill would make revisions in these procedures.

This bill would also impose a state-mandated local program by requiring each county to provide diversion services, as described, as an alternative to CalWORKs benefits under certain circumstances.

Existing law, the Greater Avenues for Independence (GAIN) program, requires the provision of various employment training services to AFDC recipients.

This bill would recast these provisions to refer to welfare-to-work activities and would revise service and participation requirements. By imposing additional duties on counties in the provision of these services, this bill would result in a state-mandated local program.

Existing law provides for the federal Food Stamp Program, under which each county distributes food stamps provided by the federal government to eligible households.

This bill would establish the Electronic Benefits Transfer Committee to oversee the development and implementation of a statewide electronic benefits transfer system, which would apply to food stamps and other benefits, and would require counties to contract for the provision of certain benefits through the system.

Existing law provides for employers to pay contributions into the Employment Training Fund at a specified rate, and generally requires money in the fund to be allocated by the Employment Training Panel only for specified job training purposes.

This bill would provide for allocation, by the panel, of \$20,000,000 from the Employment Training Fund each year for training programs designed for workers who are current or recent recipients of benefits under the CalWORKs program and for other related purposes, subject to appropriation by the Legislature.

Existing law requires each county to provide aid and health care to its poor and indigent residents not supported by other means. These programs are commonly referred to as county general assistance programs.

This bill would impose certain restrictions upon eligibility for county general assistance programs.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients, including AFDC recipients, and certain other low-income persons.

This bill would specify that CalWORKs recipients and individuals who are ineligible for aid under the CalWORKs program but who meet the eligibility criteria for aid under the AFDC program in effect on July 16, 1996, shall be eligible for Medi-Cal benefits. Because counties are responsible for the determination of eligibility for benefits under the Medi-Cal program, this bill, by requiring the provision of Medi-Cal benefits to persons otherwise ineligible for those benefits, would result in a state-mandated local program.

This bill would only become operative when the Budget Act of 1997 is chaptered.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 271 (SB 1296) Lockyer. Civil procedure.

Existing law provides that a cause of action against a person arising from any act of that person in furtherance of the person's right of petition or free speech under the United States or California Constitution in connection with a public issue, as specified, shall be subject to a special motion to strike, unless the court, after considering the pleadings and supporting and opposing affidavits, determines that there is a probability that the plaintiff will prevail on the claim and sets forth the intent of the Legislature in this regard.

This bill would revise the declaration of legislative intent to provide that the section shall be construed broadly and would specify that the section is applicable to any conduct in furtherance of the constitutional right of petition or of free speech in connection with a public issue.

Ch. 272 (SB 112) Kopp. Vehicles: service authorities for the abatement of abandoned vehicles.

(1) Existing law authorizes the establishment of service authorities for the abatement of abandoned vehicles and provides for funding of those authorities with allocations by the Controller from the Abandoned Vehicle Trust Fund. Existing law authorizes a service authority to impose a \$1 service fee on vehicles registered to an owner with an address in the county that established the service authority, as prescribed. Existing law requires any of those funds received by a service authority that are not expended to abate abandoned vehicles pursuant to an approved abandoned vehicle abatement program within 90 days of the close of the fiscal year in which the funds were received to be returned to the Controller for deposit in the Motor Vehicle Account in the State Transportation Fund.

This bill would require, instead, if any funds received by a service authority pursuant to this section are not expended to abate abandoned vehicles pursuant to an approved abandoned vehicle abatement program within 90 days of the close of the fiscal year in which the funds were received and the amount of those funds exceeds the amount expended by the service authority for the abatement of abandoned vehicles in the previous fiscal year, that the fee be suspended for one year, commencing the following January 1.

(2) Under existing law, the Department of the California Highway Patrol is required to provide guidelines for abandoned vehicle abatement programs, including, but not limited to, requiring each service authority receiving funds from the fund to report to the department on a quarterly basis, in a manner prescribed by the department, the manner that the funds were disbursed, and the number of vehicles abated, pursuant to an approved abandoned vehicle abatement program. The report is required to be submitted to the department not later than 90 calendar days following the end of the previous quarter. The Controller is prohibited from making any allocations for a calendar year to a service authority when, among other things, the service authority has failed to provide its quarterly report as required by the department's guidelines. A service authority is required to apportion the funds it receives to its member governmental agencies, based on the percentage of vehicles abated by each agency of the total number of abandoned vehicles abated by all member agencies.

This bill would require a service authority to calculate a formula to apportion 50% of those funds to a member governmental agency based on the percentage of vehicles abated by the governmental agency of the total number of abandoned vehicles abated by all member agencies, and 50% based on population and geographic area, as determined by the service authority, thereby imposing a state-mandated local program.

The bill would require that the quarterly report to the department be submitted, instead, to the Controller.

The bill would also appropriate \$480,000 from the Abandoned Vehicle Trust Fund to the Controller for allocation to the service authorities for the abatement of abandoned vehicles in the City and County of San Francisco and the County of San Benito, from which funds were withheld during the 1997 calendar year by the Controller under the provision specified above, with those allocations to be in an amount equal to the amount that was withheld in that calendar year.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 273 (SB 113) Lewis. Air pollution: south coast district: school district trip reduction.

(1) Existing law, the Lewis-Presley Air Quality Management Act, establishes the South Coast Air Quality Management District and requires the south coast district to amend a specified rule governing the reduction of mobile source emissions to apply to employers meeting certain employee thresholds and to meet other prescribed requirements.

Existing law provides for the collection of registration fees on motor vehicles, including a \$2 fee, which may be increased to \$4, which may be imposed by the south coast district and used to reduce air pollution from motor vehicles, as specified.

This bill would, until January 1, 2010, or until that south coast district rule governing the reduction of mobile source emissions is repealed, require the south coast district to waive any fee imposed upon a school district for the submission or review of a trip reduction plan or alternative compliance plan. The bill would instead require the south coast district to recover that amount from those vehicle registration fees. By imposing new duties on the south coast district with regard to the use of those fee revenues, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 274 (SB 373) Kelley. Wastewater treatment plant operators: water treatment plant operator certification.

Existing law requires supervisors and operators of municipal or private utility wastewater treatment plants to possess a certificate of competency issued by the State Water Resources Control Board. Wastewater treatment plants are facilities that are used in the treatment or reclamation of sewage and industrial wastes.

Existing law requires all persons responsible for the operation of water treatment plants to possess an appropriate grade certificate issued by the State Department of Health Services. Water treatment plants are facilities that treat or condition a water supply, affecting the physical, chemical, or bacteriological quality of water distributed or otherwise offered to the public for domestic use.

Existing law permits the state board to approve the use of a water treatment plant operator of appropriate grade certified by the department, in lieu of a properly certified wastewater treatment plant operator, where water reclamation is involved.

This bill would instead permit the state board to approve, for supervisors and operators of water recycling treatment plants, the use of a water treatment plant operator of appropriate grade certified by the department in lieu of a wastewater treatment plant operator, provided that the state board may refuse to approve or revoke its approval of

the use of an operator certified by the department if the operator commits certain prohibited acts.

This bill would authorize the department to suspend, revoke, or refuse to grant or renew any operator or operator-in-training certificate to operate or supervise the operation of a water treatment plant and place on probation or reprimand a certificate holder upon any reasonable grounds, including certain designated grounds. The bill would require the department to provide the certificate holder with a hearing prior to revocation of a valid operator certificate.

The bill would require a regional water quality control board having jurisdiction to enforce applicable water reclamation or waste discharge requirements to notify the department in writing if, pursuant to a prescribed inspection, it makes a determination that there are reasonable grounds for not issuing, or for suspending or revoking a certificate of a certified water treatment plant operator who is operating or supervising the operation of a water recycling treatment plant. By requiring the regional boards to notify the department, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 275 (SB 477) Peace. Public utilities: electrical restructuring.

(1) The existing restructuring of the electrical services industry provides for the authorization of direct transactions between electricity suppliers and end use customers, subject to implementation of a nonbypassable charge.

Existing law provides for the issuance of rate reduction bonds for the recovery of transition costs, as defined, by electrical corporations, pursuant to the restructuring of the electrical services industry.

This bill would revise the definitions of "special purpose trust" and "transition property" for purposes of the issuance of the rate reduction bonds, would set forth the method for creating and perfecting a consensual security interest in transition property, and would make various technical changes in these provisions.

(2) Existing law establishes various consumer protections, including the requirement that each entity, other than an electrical corporation, offering electrical service to residential and small commercial customers within the service territory of an electrical corporation register with the Public Utilities Commission, and provide specified information to the commission. These provisions would be repealed on January 1, 2002.

This bill would make legislative findings and declarations regarding the need for restructuring of the electrical industry.

The bill would extend the consumer protection provisions indefinitely, would include electrical corporations, as well as unregulated affiliates and subsidiaries, within the purview of these requirements, and would exempt a public agency that aggregates electrical services pursuant to existing law within its jurisdiction from these requirements.

The bill would expand the registration provisions to require additional information and payment of a registration fee, as specified, and would direct the commission to require any electrical corporation or entity that requires a deposit or advance payment prior to rendering electrical services to procure a performance bond prior to registration. This bill would set forth specified criteria for approval, denial, suspension, and revocation of registration.

The bill would require the commission to adopt rules that contain various standards of conduct for the entities that are required to be registered, and would provide specified rights and remedies for consumers who deal with the registered entities, and sanctions for those entities that violate the applicable provisions. It would require the commission to annually determine the costs of administering the registration program, and other

facets of consumer protection directly related to the direct access transactions of registered entities.

The bill would also require, as specified, the commission to compile and regularly update information on competitive market options to be available to consumers, and require the commission to issue public alerts about unauthorized or fraudulent companies attempting to do business in the state. It would impose additional consumer protections, including requiring the commission to maintain a list of residential customers who do not wish to be solicited.

This bill would reorganize existing law provisions relating to voluntary aggregation of customer electrical loads.

Under existing law, a public utility may not change any rate or alter a classification, contract, practice, or rule unless a showing is made before the commission and a finding is made that the change is justified. The utility is required to furnish its affected customers with notice of its application for approval of the new rate containing, among other information, the mailing address of the commission to which customer inquiries may be made.

This bill would require the notice to also include the e-mail address of the commission, if it is available.

(3) Since existing law makes any public utility, as defined, and any corporation other than a public utility, that violates the Public Utilities Act guilty of a misdemeanor, and these provisions of the bill would be within the act, this bill would impose a state-mandated local program by creating a new crime.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 276 (SB 448) Sher. Public records.

Existing law, the California Public Records Act, requires that public records, as defined, be open to inspection at all times during the office hours of the state or local agency and that every person has a right to inspect any public record, with specified exceptions. Existing law permits the disclosure of certain public utility customer information for specified law enforcement purposes.

This bill would provide that the act shall not be construed to require the disclosure of specified information concerning utility customers of local agencies, except for specified purposes.

Ch. 277 (SB 789) Sher. Department of Transportation: State Highway Route 109.

Existing law generally requires the Department of Transportation to improve and maintain state highways. As an exception to this requirement, existing law provides that the department is not responsible for the maintenance or operation of State Highway Route 109, except certain segments, and that funds shall not be allocated to any State Highway Route 109 projects, except as provided.

This bill would delete the exceptions currently applicable to State Highway Route 109, thereby making the general requirements as to the responsibilities of the department applicable to that route.

The bill would authorize the department to maintain and operate the segment of State Highway Route 109 within the City of East Palo Alto upon a determination by the department and the city that the segment is in an acceptable state of repair.

Ch. 278 (SB 1137) Kopp. Insurance: viatical settlements.

Existing law contains provisions that regulate viatical settlements, which are agreements between a person owning a life insurance policy on the life of a person with a catastrophic or life-threatening illness or condition and another person by which the policy owner receives compensation or value less than the death benefit of the policy in return for a transfer of the policy or policy benefits.

Existing law imposes various requirements on viatical settlements, and requires persons entering into or soliciting viatical settlements to be licensed.

This bill would specify for that purpose that person includes any natural or legal entity and specifically includes life and disability insurance agents. It would require the life and disability insurance agent to file a declaration that the person's life and disability agent license is valid and in good standing with the Insurance Commissioner. It would also require the life and disability insurance agent to provide copies of all endorsements and appointments received by the agent to engage in the business of viatical settlements. The bill would provide that, if the commissioner determines that the agent's life and disability agent license is invalid or not in good standing, or the agent has failed to submit any fees or proper endorsements or appointments, the commissioner may suspend the agent's ability to transact or otherwise be involved in viatical settlements.

Existing law authorizes the commissioner to adopt rules and regulations to govern viatical settlements.

This bill would require the commissioner to adopt regulations to address those conflicts of interest that may arise, including referrals by viatical settlement brokers to viatical settlement providers who have patterns of unreasonable payments to viators, and regulations restricting the period of time within which a life or disability agent is prohibited from charging or accepting a fee or commission for viaticating a policy previously sold by that agent, as specified.

Because a violation of these provisions would be a misdemeanor, the bill would impose a state-mandated local program by expanding the scope of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 279 (SB 123) Peace. Criminal procedure.

(1) Under existing law, a defendant may move for the return of property or to suppress as evidence any tangible or intangible thing obtained as a result of a search or seizure based on specified grounds, including the ground that the search or seizure without a warrant was unreasonable. Existing law permits the motion to be heard at a preliminary hearing, a special hearing, or at a trial, as specified.

This bill would require the motion to be made in writing and accompanied by a memorandum of points and authorities and proof of service. The bill also would require the defendant, with respect to a motion made at the preliminary examination, to file and personally serve on the people the written motion and memorandum of points and authorities at least 5 court days before the date set for the preliminary examination. This bill would additionally authorize the magistrate, at the preliminary hearing, to grant the defendant a continuance to file and serve the motion upon a specified showing.

(2) Existing law provides that the preliminary examination shall be completed at one session unless the magistrate postpones it for good cause, but the postponement shall not be for more than 10 court days unless the defendant personally waives his or her right to a continuous preliminary hearing or the prosecution establishes good cause.

This bill would provide that a request for a continuance of the preliminary hearing by the defendant or his or her attorney of record shall be deemed a personal waiver of the defendant's right to a continuous preliminary examination.

Ch. 280 (SB 292) Committee on Appropriations. Claims against the state: appropriation.

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate \$7,034,631.43 from various funds and accounts of the state, as specified, to the Executive Officer of the State Board of Control to pay claims accepted by the State Board of Control.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 281 (SB 1204) Schiff. Youth Authority: mentoring programs: wards.

Existing law specifies the duties of the Department of the Youth Authority, as specified, and authorizes a pilot project with respect to youth mentoring.

This bill would require the Department of the Youth Authority to annually recognize certain exemplary participants in youth mentoring programs, as specified.

This bill would also require the Department of the Youth Authority to annually recognize outstanding achievements of current and former wards of the juvenile court who were committed to state institutions or community-based programs.

Ch. 282 (AB 107) Ducheny. 1997-98 Budget.²

This bill would make appropriations for support of state government for the 1997-98 fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 283 (AB 1008) Ashburn. Aid: substance abuse.

Existing state law provides for the Aid to Families with Dependent Children (AFDC) program, pursuant to which qualified families are provided with cash assistance. Existing federal law provides for allocation of federal funds through the federal Temporary Assistance for Needy Families (TANF) program to states that participate in the TANF program. Federal law prohibits using TANF block grant funds for aid to a person convicted of a felony related to the possession, use, or distribution of a controlled substance unless a state specifically exempts those persons from this prohibition.

This bill would specify that a person convicted of that category of felony would be ineligible for aid under the AFDC program.

Existing law requires each county to provide aid and care to its indigent residents, with these programs commonly referred to as general assistance programs.

This bill would also provide that an individual ineligible for AFDC benefits pursuant to the bill, and who is in an assistance unit receiving AFDC benefits shall be ineligible for non-health care general assistance benefits.

Existing law provides for the payment of aid under the AFDC program, and authorizes counties to provide for the payment of aid under that program with vouchers and vendor payments in certain circumstances.

This bill would require a county to issue vouchers or vendor payments to an eligible family under the AFDC program if the family includes a member who is ineligible due to a conviction of a felony related to the possession, use, or distribution of a controlled substance, and, by increasing the responsibilities of counties in the implementation of the aid payments, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 284 (AB 1260) Ashburn. Aid: substance abuse.

Existing state law provides for the Aid to Families with Dependent Children (AFDC) program, pursuant to which qualified families are provided with cash assistance. Existing federal law provides for allocation of federal funds through the federal Temporary Assistance for Needy Families (TANF) program to states that participate in the TANF program. Federal law prohibits using TANF block grant funds for aid to a person convicted of a felony related to the possession, use, or distribution of a controlled substance unless a state specifically exempts those persons from this prohibition.

This bill would specify that a person convicted of that category of felony would be ineligible for aid under the AFDC program.

Existing law requires each county to provide aid and care to its indigent residents, with these programs commonly referred to as general assistance programs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would also provide that an individual ineligible for AFDC benefits pursuant to the bill, and who is in an assistance unit receiving AFDC benefits, shall be ineligible for nonhealth care general assistance benefits.

Existing law provides for the payment of aid under the AFDC program, and authorizes counties to provide for the payment of aid under that program with vouchers and vendor payments in certain circumstances.

This bill would require a county to issue vouchers or vendor payments to an eligible family under the AFDC program if the family includes a member who is ineligible due to a conviction of a felony related to the possession, use, or distribution of a controlled substance, and, by increasing the responsibilities of counties in the implementation of the aid payments, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 285 (AB 751) Escutia. Class Size Reduction Program.

Existing law provides for class size reduction in kindergarten and grades 1 to 3, inclusive, pursuant to the Class Size Reduction Program. Existing law provides for 2 options for school districts to receive funding under the program. Existing law, for Option One, requires a school district to provide a reduced class size for all pupils in each classroom for the full regular schoolday, as specified, in each grade level for which funding is claimed.

This bill would authorize the State Board of Education to grant a waiver to school districts that cannot provide the facilities for class size reduction, as specified. The bill would require districts requesting a waiver to submit, as specified, a comprehensive plan to mitigate the facilities impact of class size reduction. The bill would permit school districts receiving the waiver to receive Option One funding, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 286 (AB 1086) Mazzoni. Reading instruction.

Existing law establishes a program to provide each certificated teacher of pupils enrolled in kindergarten and grades 1 to 3, inclusive, with the knowledge and skills necessary to effectively teach pupils to read. The State Department of Education is required to allocate funds appropriated for that program to each school district on the basis of an equal amount per pupil in enrollment statewide in kindergarten and grades 1 to 3, inclusive, as of October 1996. As a condition to receiving funds for that program, each school district must certify, among other things, that not less than 90% of its certificated employees who provide direct instructional services to pupils enrolled in kindergarten or any of grades 1 to 3, inclusive, have received specified in-service training and that funds will be spent by the school district only for the purposes of providing in-service training in reading instruction in the 1996-97 school year.

This bill would repeal most of the existing conditions to receive funding and replace those conditions with new conditions that would include, that funds received pursuant to the program shall be expended only for the purposes of providing programs of in-service training in reading instruction that consist of, and are limited to, specified subjects, as defined, that all teachers of pupils in those grades have received or will receive the training to the extent feasible, as specified, and that funds received for these purposes shall be spent only for programs of in-service training that do not cause a reduction in pupil instructional time and that do not include teacher release time. The bill would delete the limitation of expenditure of funds to the 1996-97 school year.

This bill would also establish a teacher reading instruction development program for grades 4 to 8, inclusive. The bill would require that funds received pursuant to the program shall be expended only for the purposes of providing programs of in-service training in reading instruction that consist of, and are limited to, specified subjects, as

defined, that all teachers of pupils in those grades have received or will receive the training to the extent feasible, as specified, and that funds received for these purposes be spent only for programs of in-service training that do not cause a reduction in pupil instructional time and that do not include teacher release time.

The bill would require the State Board of Education, in consultation with the Commission on Teacher Credentialing, to develop a list of approved contract providers of in-service training in reading instruction and would require the State Department of Education to provide staff support to the board in carrying out these responsibilities. The bill would require that any person or entity that seeks to appear on the list of providers of in-service training in reading instruction to submit an application, as specified. The bill would require the board to establish criteria for the approval of providers of in-service training in reading instruction. The bill would authorize a school district to provide in-service training in reading instruction to its employees using its own current or former employees as instructors if certain conditions are met. The bill would require each school district that receives funding pursuant to these provisions and provides instruction in departmentalized classes for pupils in grades 4 to 8, inclusive, to designate those teachers in each school and at each grade level who are responsible for teaching reading to pupils who have reading deficiencies, or who provide direct instructional services to pupils in reading.

The bill would require the Superintendent of Public Instruction to administer the grant application process and would provide that the minimum grant awarded shall be for no less than \$1,000 and the maximum grant awarded to a school district shall not exceed twice the total amount of funding provided for the purposes of this program in any fiscal year divided by the number of pupils enrolled statewide in grades 4 to 8, inclusive, in that fiscal year, multiplied by the number of pupils enrolled in the school district in those grades.

The bill would provide that the provisions relating to the teacher reading instruction development program for grades 4 to 8, inclusive, would become inoperative on June 30, 2005, and, as of January 1, 2006, would be repealed.

The bill would provide that up to \$150,000 of the Goals 2000 funds allocated in the Budget Act of 1997 to the State Department of Education for state operations may be encumbered by the State Department of Education to administer the bill, thereby making an appropriation.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 287 (AB 1576) Bustamante. Food assistance.

Existing law provides for the federal Food Stamp Program, under which each county distributes food stamps provided by the federal government to eligible households.

This bill would, under specified circumstances, require, effective September 1, 1997, that the State Department of Social Services establish a Food Assistance Program for legal immigrants who are 65 years of age or older or children losing eligibility for food stamp benefits due to Public Law 104-193. The provision would become inoperative July 1, 2000, and would be repealed on January 1, 2001.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 288 (AB 1582) Bowen. Department of Parks and Recreation: California Conservation Corps: Budget Act of 1997: state park system.

(1) Prior Budget Acts have authorized the expenditure of funds for the operation and support of the Department of Parks and Recreation and the California Conservation Corps.

This bill would prescribe procedures for the operation and funding of the department and the corps during the 1997-98 fiscal year, as specified. The bill would prescribe related matters.

(2) The bill would require the department to submit annual reports to the Legislature describing the allocation and expenditure of specified funds.

(3) The Governor's Mansion and the Stanford House State Historic Park are historical units of the state park system.

This bill would define "suitable residence" for purposes of provisions pertaining to the Governor's Mansion and provide that the residence may include the Stanford Mansion.

- (4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 289 (AB 1584) Prenter. Local funding.

(1) Existing law establishes in each county treasury a Supplemental Law Enforcement Services Fund (SLESF). Existing law requires the county auditor and city treasurer to monthly detail and summarize allocations from the county's or city's SLESF, as applicable, in a written report filed with specified local officials. On or before September 1, 1998, and annually on or before September 1 thereafter, the auditor and treasurer are required to file with these officials a consolidated written report of the same nature as the monthly report regarding SLESF allocations for the entirety of the immediately preceding fiscal year.

This bill would cause the provisions relating to supplemental law enforcement funding to become inoperative on July 1, 2000, and to be repealed on January 1, 2001. The bill would also recast the requirements regarding these reports and require that a summary of the annual reports be submitted by the Supplemental Law Enforcement Oversight Committee in a format developed by the Controller, in conjunction with specified organizations, to the Controller on or before October 15, 1998, and each year thereafter. This requirement would impose a state-mandated local program.

(2) The bill would state the intent of the Legislature that at least \$100,000,000 be appropriated in fiscal years 1998–1999 and 1999–2000 to fund supplemental local law enforcement funding provisions.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

- (4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 290 (AB 1589) Pringle. Local government: finance.

(1) Existing law generally requires the county auditor, in each fiscal year, to allocate property tax revenue to each local jurisdiction in an amount equal to the sum of that amount of revenue allocated to that jurisdiction in the prior fiscal year, and that jurisdiction's portion of the annual tax increment, as defined. Existing property tax law modifies this general provision by requiring that, for purposes of determining property tax revenue allocations in each county for the 1992–93 and 1993–94 fiscal years, the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance with certain formulas. It requires, for the 1992–93 and 1993–94 fiscal years, and each subsequent fiscal year, that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund (ERAF) in that county for allocation to school districts, community college districts, and the county office of education. For the purpose of determining the total annual revenues of a special district that provides fire protection or fire suppression services, specified moneys are excluded for the determination of total annual revenues, including any appropriation by a board of supervisors pursuant to a specified authorization for fire protection received by the district.

This bill would provide that, for purposes of determining the total annual revenues of a special district that provides fire protection or fire suppression services, in counties that contract with the state to protect state responsibility areas, the total amount of all funds, regardless of the source, that are appropriated to a special district, including a fire department, pursuant to specified authorizations for fire protection, are excluded.

This bill would, for purposes of making the determination required by existing reduction formulas with respect to the amount allocated for fire protection activities from a specified fund in the 1992–93 fiscal year to a special district engaged in those activities, for counties of the second class, specify that an amount “allocated” to that

district means an amount or revenue identified for transfer to that district, rather than the amount actually received by the district pursuant to that transfer.

This bill would state that these amendments do not constitute a change in, but are declaratory of, existing law.

(2) Existing property tax law prohibits a county auditor, for the 1994–95 fiscal year and each fiscal year thereafter, from reducing the amount of ad valorem property tax revenue that is deemed allocated in the prior fiscal year to any of certain types of local library entities for purposes of increasing the amount of ad valorem property tax revenues allocated to a different jurisdiction.

This bill would clarify that this prohibition does not preclude a county auditor from allocating ad valorem property tax revenues to the county's Educational Revenue Augmentation Fund, rather than to a library entity as described in existing law, as a result of a reduction made pursuant to specified statutes in the 1992–93 and 1993–94 fiscal years in the amounts of property tax revenue deemed allocated to that entity in the fiscal years prior to those fiscal years. This bill would specify that these clarifying provisions do not constitute a change in, but are declaratory of, existing law.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 291 (AB 1591) House. Vehicles: Registration and transfer fees.

(1) Existing law imposes a \$27 registration fee for the privilege of operating on the public highways in this state any vehicle of a type that is subject to registration.

This bill would, on and after November 1, 1997, increase that fee to \$28.

(2) Existing law sets forth a schedule of fees imposed for the transfer of vehicles.

This bill would increase those fees on September 1, 1997, on July 1, 1998, and on July 1, 1999, as specified.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 292 (AB 1592) Leonard. Personal income taxes: renter's credit: budget implementation.

The Personal Income Tax Law authorizes various credits against the taxes imposed by that law, including a refundable credit for qualified renters. A "qualified renter," generally, is an individual who was a resident of this state and who rented and occupied premises in this state as a principal residence during at least 50% of the taxable year. This credit is suspended, under existing law, until January 1, 1997.

This bill would suspend the renter's credit until January 1, 1998.

This bill would take effect immediately as a tax levy.

Ch. 293 (SB 271) M. Thompson. State Lands Commission revenues.

Under existing law, with specified exceptions, revenue, money, and remittances received by the State Lands Commission are required to be applied to specified obligations in a prescribed order, including specified amounts deposited in the General Fund. Those provisions also contain provisions pertaining to the California Sea Grant Program.

This bill would repeal those provisions.

The bill would provide that the revenue, money, and remittances be applied first to the General Fund to make specified payments, then to the California Housing Trust Fund in the amount of \$2,000,000 each fiscal year, and then, as specified, to the Resources Trust Fund that the bill would create. The bill would create the Salmon and Steelhead Trout Restoration Account in the trust fund and create the Natural Resources Infrastructure Fund as an account in the trust fund. The bill would provide for the allocation of trust fund money between the account and the infrastructure fund, as prescribed. The bill would prescribe the uses of the money in the account and the infrastructure fund and specify related matters. These provisions would become inoperative July 1, 2003, and be repealed January 1, 2004.

The bill would provide for the Department of Fish and Game to grant funds from the account for fish habitat projects, as specified, subject to specified requirements.

The bill would relocate the provisions pertaining to the California Sea Grant Program.

The bill would require the Controller to transfer the sum of \$29,549,000 in revenue, money, and remittances received by the commission in the 1996–97 fiscal year to the General Fund.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 294 (SB 391) Solis. Health.

Existing law authorizes the Department of Food and Agriculture to establish a program designed to provide eligible persons with coupons that may be exchanged for fresh, nutritious foods at farmers' markets pursuant to a program established by federal law, the WIC Farmers' Market Nutrition Act of 1992.

This bill would delete this authority and would instead authorize the State Department of Health Services to establish this program.

Existing law specifies that the provisions requiring the implementation of the Comprehensive Perinatal Outreach Program shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal the provision repealing the program.

Existing law requires the Secretary of the Health and Welfare Agency to establish an Office of Rural Health, or an alternative organizational structure, in one of the departments of the Health and Welfare Agency to promote a strong working relationship between the state government and local and federal agencies, universities, and other entities, develop health initiatives, and maximize the use of existing resources relating to health services.

This bill would, until July 1, 1998, require that council, through the Office of Statewide Health Planning and Development, to develop and administer a program of grants for projects located in rural areas, as determined by the council.

Existing law provides for the allocation of funds to local lead agencies for the implementation of tobacco use prevention programs, and specifies that no local lead agency shall receive an allocation of less than \$110,000.

This bill would increase that minimum allocation limit to \$150,000.

Existing law specifies that the provisions requiring the implementation of the Tobacco Use Prevention Program shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal that provision repealing the program.

Existing law specifies that the provisions requiring the implementation of the Cigarette and Tobacco Product Surtax Medical Research Program shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal the provision repealing that program.

Existing law specifies that the provisions requiring the reimbursement of selected primary care clinics for the delivery of medical services, including preventative health care and smoking prevention and cessation services, including case management services, to eligible beneficiaries whose income is under 200% of the federal poverty level shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal the provision repealing that program.

Existing federal regulations for the federal Early Intervention Program for Infants and Toddlers with Disabilities requires participating states to establish a state interagency coordinating council in order to receive federal financial assistance.

This bill would prohibit any member of the council from casting a vote on any matter that would provide direct financial benefit to that member or otherwise give the appearance of a conflict of interest.

Under existing law, the California Early Intervention Services Act, various state departments provide coordinated services to infants and toddlers with disabilities and their families. Existing law requires early intervention services to be provided directly to eligible infants and toddlers and their families through the regional center system and the local education agency system. Under existing law, the act will repeal on January 1, 1998, unless the state terminates its participation in a specified federal program before that date.

This bill would require these services to be provided by family resource centers that provide certain services. The bill would extend the operation of the act to January 1, 2000.

Existing law establishes requirements for the certification of radon measurement laboratories, radon testing and consulting specialists, and radon mitigation contracts, and requires the application fees for certification to be deposited into the Radon Contractor Certification Fund.

This bill would instead require these fees to be deposited in the General Fund.

Existing law establishes requirements regarding the issuance of export documents for the exportation of food, drugs, or devices manufactured or produced in this state, and establishes an Export Document Program Fund.

This bill would require all fees collected by the State Department of Health Services pursuant to requests to conduct a voluntary medical device review to be deposited into the Export Document Program Fund and to be expended, upon appropriation, for the purpose of determining if the device is a new device or is substantially equivalent to a current or previously marked device.

Existing law establishes requirements regarding the licensing and regulation of sources of ionizing radiation.

This bill would amend certain of these provisions to notwithstanding a provision contained in the Government Code that prohibits prescribed governmental bodies from paying certain filing fees.

Existing law requires medical expenses to be reimbursed in an amount not to exceed \$25,000 when incurred due to a severe adverse reaction to an immunization required by state law.

This bill would repeal this provision.

Existing law requires, to the extent funds are appropriated, the department to establish and administer a program to provide drug treatments to persons infected with HIV.

This bill would establish additional client assistance provisions applicable if the department utilizes a contractor or subcontractor to administer any aspect of this program.

Existing law requires the State Director of Health Services to develop a list of drugs to be provided under a program for the treatment of the human immunodeficiency virus (HIV) and requires manufacturers of drugs on the list to pay the department a rebate of 15% of the average wholesale cost price of each drug.

This bill would instead require these manufacturers to pay the department a rebate that is equal to the rebate that would apply to the drug under certain provisions of federal law.

Existing law establishes the AIDS Vaccine Research and Development Grant Program.

This bill would repeal certain provisions of law relating to the creation and implementation of this program.

Existing law requires the department and each county to administer a tuberculosis control, prevention, and detention program.

This bill would prohibit individuals housed under this program, other than criminal offenders, from residing in correctional facilities. It would require the department and local health jurisdiction, by January 1, 1998, to identify a detention site for recalcitrant tuberculosis patients for each local health jurisdiction.

Existing law specifies that the provisions requiring the implementation of the Access for Infants and Mothers (AIM) Program and establishment of the continuously appropriated Perinatal Insurance Fund shall become inoperative July 1, 1997, and shall be repealed on January 1, 1998, unless a later enacted statute revises or repeals that date.

This bill would repeal the provision for the repeal of that program, and would make conforming changes to provisions authorizing the Major Risk Medical Insurance Board to adopt regulations for administration of that program.

Existing law requires the State Department of Health Services to maintain a program of maternal and child health.

This bill would authorize the department to maintain a child health program in each county, and to allocate funds to counties for these purposes that submit plans in compliance with minimum standards established by the department.

Existing law provides for various benefits through the implementation of programs for persons with developmental disabilities (consumers) through the State Department of Developmental Services. Existing law provides for the delivery of services to consumers through regional centers pursuant to contracts with the department.

This bill would require the department to contract with an independent agency or organization for the tracking and monitoring of consumers who are moved from state hospitals to the community to ensure that they are receiving necessary services and supports. The bill would require the department to monitor corrective actions taken by regional centers as a result of this tracking and monitoring and to establish a task force to review the findings of the contractor and make recommendations regarding tracking and monitoring.

The bill would provide for the provision of services on an emergency basis when the community placement of a consumer is at risk of failing and admittance to a state developmental center is likely. The bill would require the department to immediately seek admission to a state developmental center when it determines that admission is necessary to protect the health and welfare of the consumer.

This bill would require the department to contract with a nonprofit agency or agencies to provide clients' rights advocacy services, beginning January 1, 1998.

Existing law establishes area boards on developmental disabilities to protect and advocate the rights of all persons in the area who have developmental disabilities.

This bill would require the State Department of Developmental Services, by July 1, 1998, to enter into an interagency agreement with the Organization of Area Boards, on behalf of area boards, under which each area board would conduct life quality assessments of consumers at least once every 3 years or more frequently on the request of a consumer or, when appropriate, a family member, subject to appropriation of funds in the Budget Act.

Under existing law, a consumer who has been determined to be eligible for services by a regional center shall be considered eligible by any other regional center if he or she moves to another location within the state.

This bill would provide for the provision of equivalent levels and types of services when a consumer transfers from one regional center catchment area to another, pending the development of a new individual program plan.

This bill would require the governing board of a regional center to annually contract with an independent accounting firm for an audited financial statement.

Existing law requires the department to annually establish reimbursement rates for developmental services, including reimbursement rates for out-of-home care, with these rates to be reviewed by the State Council on Developmental Disabilities. Existing law requires that, in establishing reimbursement rates for out-of-home care services, one of the cost elements to be included is an adequate amount to be paid to facilities for the basic living needs of a person with developmental disabilities. The department is required to make a redetermination of basic living costs every 3 years, with the first report to be made on March 1, 1999.

This bill would, instead, require that the first report be made by March 1, 2000. The bill would provide for the increase of the rate schedule for the 1997-98 fiscal year based on the amount appropriated in the Budget Act of 1997.

Under existing law, a person cannot be tried or adjudged to punishment while that person is mentally incompetent. Existing law sets forth procedures under which a criminal defendant who was adjudged mentally incompetent and who has regained mental competence, shall be returned to the committing court, and subsequently returned to a hospital or other commitment facility based on a need for continued treatment in order to maintain competence to stand trial.

This bill would revise these procedures, and would require the State Department of Mental Health to report to the Legislature regarding specified time limits.

Existing law states legislative intent that persons committed to a secure facility for mental health treatment shall be placed in Atascadero State Hospital unless unique circumstances preclude the placement.

This bill would instead require Atascadero State Hospital to be used whenever a person is committed to a secure facility for mental health treatment and is placed in a state

hospital at the direction of the department, unless unique circumstances preclude the placement.

Under existing law, the State Department of Mental Health has jurisdiction over 4 state hospitals for the care, treatment, and education of the mentally disordered.

This bill would provide for the commitment of sexually violent predators to Atascadero State Hospital. The bill would limit the number of patients whose placement has been required pursuant to the Penal Code to 980, who may be placed at Napa State Hospital and would limit the hospital's total patient population to 1,200. This bill would require the department to regularly consult with the Napa State Hospital Task Force on proposed policy or structural modifications to the hospital that may affect the Napa community.

This bill would provide for grounds privileges or passes for patients in these state hospitals whose placement has been required pursuant to the Penal Code.

Under existing law, the State Department of Mental Health is required to evaluate each patient committed to state hospitals pursuant to specified provisions of the Penal Code to determine whether they need to be treated in a secure setting, and requires the department to treat all Penal Code commitments and mentally disordered sex offenders who do not require a secure treatment setting as near to the patient's community as possible.

This bill would instead provide that prior to admission to the Napa State Hospital or Metropolitan State Hospital, the department shall evaluate these patients. The bill would provide that patients determined to be a high security risk shall be treated in the department's most secure facilities, and that those patients not needing this level of security shall be treated as near to the patient's community as possible if an appropriate treatment program is available.

This bill would prohibit the admission to Napa State Hospital of patients whose placement has been required pursuant to the Penal Code, until specified conditions are met, except as provided. The bill would prohibit placement of those patients whose placement is required under the Penal Code outside of the perimeter security fence, with certain exceptions, and would limit the number of those patients that may be placed at that facility. The bill would prohibit placement of high security risk patients at Metropolitan State Hospital or Napa State Hospital. The bill would require the department to develop policies and procedures at each state hospital, to notify appropriate law enforcement agencies in the event of a patient escape or walkaway. The bill would require the department to issue a state hospital administrative directive to require patients whose placement has been required pursuant to the Penal Code and other patients within the secured perimeter at each state hospital to wear clothing that enables them to be readily identified.

This bill would state legislative intent to complete the 250-bed addition at Atascadero State Hospital as expeditiously as feasible and to provide funding for the construction phase of this project in the Budget Act of 1998.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law provides for extended eligibility for Medi-Cal benefits for a limited time for families whose eligibility for Medi-Cal benefits is terminated due to the loss of eligibility for assistance due to increased hours of employment, income from employment, or the loss of earned income disregards.

This bill would require the department, if federal financial participation is available, to notify beneficiaries of the availability of extended assistance under these provisions to seek a waiver from the federal government to simplify these extended benefits, to contract for an independent evaluation of changes to the program, and to develop a community outreach campaign to inform beneficiaries of the availability of extended benefits. The department would be permitted to implement the community outreach campaign through a contract that would be exempt from approval by the Director of General Services and from the Public Contract Code. The bill would also require the department to monitor participation rates and would, if federal financial participation is available, alter eligibility for these extended benefits. Since each county is required to

determine Medi-Cal eligibility, modification of eligibility for extended Medi-Cal benefits would constitute a state-mandated local program.

The bill would also require the department, not later than 6 months following the effective date of the bill, to create and implement a simplified eligibility process for pregnant women and children, as described.

The bill would also require the department, not later than 6 months following the effective date of the bill, to develop and conduct a community outreach and education campaign to help people learn about and apply for Medi-Cal benefits.

Existing law authorizes the department to enter into contracts with hospitals for inpatient services to be rendered to Medi-Cal program beneficiaries. These contracts are negotiated by the California Medical Assistance Commission.

This bill would create the Medi-Cal Medical Education Supplemental Payment Fund and the Large Teaching Emphasis Hospital and Children's Hospital Medi-Cal Medical Education Supplemental Payment Fund in the State Treasury, to be under the administrative control of the State Department of Health Services, and to consist of moneys from specified sources. The bill would require that moneys deposited in these funds qualify for federal financial participation, and would require moneys in these funds to be paid to specified types of hospitals for medical education costs incurred for services rendered to Medi-Cal beneficiaries. The bill would require the department to obtain federal matching funds to the full extent permitted by law. The bill would provide that these funds shall be continuously appropriated, thereby making an appropriation.

This bill would make these provisions inoperative on June 30, 1999, and repeal them by January 1, 2000.

This bill would state legislative intent that the University of California work with the department and the commission to develop a federal demonstration project to address future funding of graduate medical education in the state, and that implementing legislation be enacted by June 30, 1999. The bill would request the University of California to submit a progress report to the Governor and the Legislature by November 1, 1998.

Existing law relating to the Medi-Cal program requires the State Department of Health Services to establish the County Administrative Cost Control Plan to establish standards and performance criteria to which counties are required to adhere. Existing law authorizes a county to petition the department for an augmentation of its plan in order to implement a plan for the outstationing of one or more eligibility workers at alternative sites in order to facilitate receipt and processing of applications for Medi-Cal eligibility for pregnant women, infants, and children.

This bill would revise the requirements applicable to that petition process and would recast that provision to authorize a county to petition for an augmentation of its county administrative cost control plan to implement a plan for outstationing eligibility workers at all types of outstation locations meeting specified federal requirements.

Under existing law, services covered under the California Children's Services program, when provided to Medi-Cal recipients, prohibited from being incorporated into any Medi-Cal managed care contract entered into after August 1, 1994, and pursuant to specified provisions of law, until 3 years after the effective date of the contract.

This bill would, instead prohibit these services from being incorporated into a contract until August 1, 2000, and would exempt from this prohibition contracts entered into for county-organized health systems in the Counties of San Mateo, Santa Barbara, Solano, and Napa.

Under existing law, low-income children in foster care are covered under the Medi-Cal program.

This bill would require the county child welfare agency with the responsibility for the care and placement of the child, in consultation with the child's foster care giver, to determine whether it is in the best interest of the child to enroll in a Medi-Cal managed care plan. By imposing this requirement on local agencies, this bill would impose a state-mandated local program.

Existing law, under the Medi-Cal program, provides that home and community-based services, in-home medical care services, and early and periodic screening, diagnosis, and treatment for individuals under 21 years of age may be covered if certain conditions are met.

This bill would require that any decision to transfer a child who is being case managed by the California Children's Services program to the home setting, for whom any of the above services has been requested, be made in consultation with the child's California Children's Services program case manager.

Existing law requires the department, in administering the Medi-Cal program, to enter into contracts with manufacturers of drugs for the best price and requires that the contract provide for an equalization payment amount to be remitted to the department quarterly. The law requires that the department submit an invoice to each manufacturer for the equalization payment based on supporting data.

This bill would require transmittal of the invoice and the supporting data within 30 days of the federal Health Care Financing Administration's file of manufacturer rebate information, would establish procedures for the calculation and payment of rebate interest, and would provide a procedure for contesting the invoice amount. This bill would establish certain collection procedures for rebate payments, including default and termination provisions. The bill would establish procedures for availability of drugs upon prior approval.

Existing law provides that drugs of any manufacturer who did not renew or enter into a contract within a prescribed period of time would be available only through prior approval.

This bill would delete this provision.

Existing law authorizes Medi-Cal reimbursement for transitional inpatient care, as defined, in general acute care hospitals and other specified health facilities.

Existing law provides, however, that, for the initial 2 years following implementation of reimbursement for this care, transitional inpatient care shall be made available only to persons 18 years of age or over, and that this care shall not be available to patients in acute care hospitals defined as small and rural.

This bill would indefinitely extend these limitations.

Existing law imposes certain requirements regarding the implementation of prior authorization procedures for the provision of services under the Medi-Cal program.

This bill would require the department to use certain criteria to identify providers to be placed on prior authorization for noninvasive testing procedures.

Existing law requires the department to administer certain provisions related to child health and disability prevention programs.

This bill would require the department to report to the Legislature by January 1, 1998, regarding prescribed data with respect to the programs.

Under the Medi-Cal program, the department is required to make supplemental payments to certain disproportionate share hospitals based on specified criteria. Existing law generally defines a disproportionate share hospital as a hospital that has proportionately higher costs, volume, or services related to the provision of services to Medi-Cal or other low-income patients than the statewide average. Payments are made from moneys paid by hospitals into the Medi-Cal Inpatient Payment Adjustment Fund, with this fund being continuously appropriated for specified purposes, including, for the 1994-95 and 1995-96 fiscal years, an annual transfer of \$239,757,690, and for the 1996-97 fiscal year and each fiscal year thereafter, an annual transfer of \$229,757,690, to the Health Care Deposit Fund.

This bill would provide that the amount to be transferred each fiscal year subsequent to the 1996-97 fiscal year to the Health Care Deposit Fund would be \$154,757,690.

By increasing the amount available in the fund for appropriation to disproportionate share hospitals, this bill would make an appropriation.

This bill would authorize a local initiative entity that has performed unanticipated work resulting in additional costs attributable to the development of its local initiative health delivery system to file a claim with the department under the disproportionate share hospital reimbursement provisions for the costs due to delays in start dates.

Existing law requires a prepaid health plan to maintain financial records and to have an independent annual audit or additional audits, and requires the department to perform routine auditing of prepaid health plan contractors and affiliated subcontractors providing services under the Medi-Cal program.

This bill would require the department to make only the final report of each external review available to the Legislature within 30 calendar days of completion, and to the public upon request.

This bill would require the department to implement a management information and decision support system to integrate data from managed care plans to monitor and evaluate the quality of care, to provide the Legislature with annual progress reports, and to provide the Legislature with system or information access with the most cost-effective technology available.

Existing law requires each county to provide aid and medical care to indigent persons. These programs are known as county general assistance programs.

Existing law prescribes a formula under which counties must provide minimum aid grant levels for general assistance recipients, but specifies that counties may reduce these levels by, among other things, the monthly actuarial value of up to \$40 per month of medical care. A recent court decision held that this provision permitted a county either to make the aid grant reduction or not provide any medical care if it chose not to make the reduction.

This bill would provide that, notwithstanding this court decision, this provision was not intended, and shall not be construed, to give a county or city and county specified authority relating to the provision of health care services, except that this provision would cease to be implemented if, and only to the extent that, a final court decision holds that the provisions imposes a state-mandated local program.

This bill would also declare that it confirms and is declarative of, rather than a change in, existing law.

Existing law, operative until July 1, 1997, and repealed on January 1, 1998, provides for the provision of perinatal services, perinatal outreach, coordination, and expansion services, provides limitations on the use of funds from the Health Education Account in the Cigarette and Tobacco Products Surtax Fund for purposes of the perinatal outreach, coordination, and expansion services.

This bill would repeal the provision for the repeal of that program.

Existing law contained in the California Health Care for the Indigent Program (CHIP) provides, operative until July 1, 1997, and repealed on January 1, 1998, for the allocation of money from the Cigarette and Tobacco Products Surtax Fund to the counties to provide health care benefits, and requires each county that receives CHIP funds to submit reports containing specified information to the State Department of Health Services.

This bill would repeal the provision for the repeal of that program, and would make conforming changes to provisions for the administration of the program.

This bill would authorize the Director of Finance to authorize the augmentation or reduction of amounts appropriated in the Budget Act for the programs authorized by this act if the funds in the Cigarette and Tobacco Products Surtax Fund are insufficient to support the Budget Act appropriations for the programs authorized by this act, and, by authorizing the augmentation of those appropriated funds, this bill would result in an appropriation.

This bill would specify that the State Department of Health Services may adopt emergency regulations to implement this bill.

This bill would specify that funds appropriated in the Budget Act of 1999 for certain tobacco use prevention media campaign grant programs shall be available for expenditure only until July 1, 2000, and would make funds appropriated in the Budget Act of 1997 for the Tobacco Use Prevention Program and for the rural health improvement grant program established by this bill available for expenditure until July 1, 1999. By extending the period those appropriations would be available for expenditure, this bill would result in an appropriation.

Existing law requires the department to administer certain programs relating to AIDS.

This bill would authorize the department to use the sum of \$1,600,000 appropriated pursuant to Item 4260-111-0001 of the Budget Act of 1997 for the extension of the term of contracts with entities receiving funds in the 1996-97 fiscal year to provide HIV testing services, would authorize the department to amend these contracts for the 1997-98 fiscal year, and would authorize advance payments not to exceed 25% of the expected funding,

thereby making an appropriation. This provision would become inoperative on July 1, 1998, and would be repealed on January 1, 1999.

Existing law provides for the funding of clinics for the provision of health care under the seasonal and migratory workers program, the rural health services development program, and the expanded access to primary care program.

This bill would require a clinic funded under those programs to provide nonelective primary health care to all persons eligible for these programs who are impacted by a declared emergency or disaster and who present themselves for treatment at the clinic. The bill would require the department to deny payment to any clinic funded by these programs that charges patients for care without utilizing a sliding-fee scale based on income.

This bill would authorize the State Department of Health Services to adopt emergency regulations to implement this act and specified Medi-Cal benefits established by the Budget Act of 1997.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 295 (SB 1320) Sher. Environmental protection.

(1) Existing law required the Director of Environmental Health Hazard Assessment, on or before June 30, 1994, to convene an advisory committee, as prescribed, to conduct a comprehensive review of the policies, methods, and guidelines followed by the boards, departments, and offices within the California Environmental Protection Agency for the identification and assessment of chemical toxicity, as specified.

This bill would delete those provisions and, instead, require the California Environmental Protection Agency, or a board, department, or office within the agency, to enter into an agreement with the National Academy of Sciences, the University of California, the California State University, or any similar institution of higher learning, or any combination of those entities, or with a scientist or group of scientists of comparable stature and qualifications that is recommended by the President of the University of California, to conduct an external scientific peer review of the scientific basis for any rule proposed by any board, department, or office within the agency, and would prescribe procedures for conducting that scientific peer review, as specified.

(2) Existing law requires the Department of Toxic Substances Control to establish specified funding for site operations and maintenance for remedial measures affecting a specified San Gabriel Valley Superfund site, and to deposit sufficient funds to cover the costs of operation and maintenance of carbon absorption treatment systems at the Richwood, Hemlock, and Rurban Homes Mutual Water Companies for 20 years.

This bill would require the department to determine whether it is more economical to provide Richwood residents with a substitute source of water supply than to maintain, operate, or repair a treatment system. If the department determines that a substitute source of water supply is more economical, the bill would allow the expenditure of specified funds to provide Richwood residents with a substitute source of water supply, subject to approval as prescribed.

Ch. 296 (AB 1579) Strom-Martin. Elementary and secondary education: education finance: staff development.

(1) Existing law authorizes school districts to conduct various staff development programs. Existing law authorizes school districts to make school development plans, and to include in those plans staff development activities directly related to the annual school improvement objectives, as specified. Existing law authorizes school districts to offer up to 8 days of staff development during the school year under specified circumstances.

This bill would declare the intent of the Legislature to increase the number of schooldays in a school year by providing funding to school districts to conduct staff development activities, as specified. The bill would require the Superintendent of Public Instruction to provide each eligible school district with a staff development allowance of \$220 per day for each certificated employee of the school district who participates in staff development, as provided by the school district in academic content and instructional methods in the core curricular areas. To be eligible to receive funding, the staff development program provided by the school district would be required, among other specified requirements, to meet local educational priorities, to be consistent with regulations developed by the Superintendent of Public Instruction, and to be offered on days that are not counted as instructional time or days. This provision would be operative in any fiscal year only to the extent funds are provided therefor in the Budget Act.

This bill would require that, each fiscal year, any school district that did not offer 180 days of instruction to pupils in the fiscal year prior to the first fiscal year in which grant funds were received by that school district under the bill to increase the number of days of instruction by one day for each noninstructional day on which the school district conducts staff development programs under the bill until a total of 180 days of instruction to pupils are being offered by that school district, as specified.

This bill would declare the intent of the Legislature to appropriate \$50,000,000 in the Budget Act of 1997 for these purposes.

(2) Existing law sets forth the period of time constituting a school year and a school month. Existing law also sets forth provisions establishing financial incentives for school districts based upon the length of the schoolday and school year in that school district.

This bill would require school districts to notify parents or guardians of pupils of the schedule of minimum days, as specified, thereby imposing a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 297 (AB 1593) Machado. Flood protection.

Existing law provides for state cooperation with the federal government in the construction of specified flood control projects.

This bill would adopt and authorize a specified flood protection project along the American River, at an estimated cost to the state of the sum that may be appropriated by the Legislature for state participation, upon the recommendation and advice of the Department of Water Resources or the Reclamation Board, as prescribed. The bill would specify related matters in connection with that project, and make an additional, technical change.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 298 (SB 804) O'Connell. Education: class size reduction.

Existing law establishes the Class Size Reduction Program to provide funding to school districts to reduce class size in kindergarten and grades 1 to 3, inclusive, to not more than 20 pupils per certificated teacher. A school district establishing a class size reduction program with funds from the program is required to reduce class size at each schoolsite according to specified priorities.

Existing law establishes 2 options under which a school district may apply for Class Size Reduction Program funding. Under Option One, the Superintendent of Public Instruction is required to apportion to each applicant district an amount equal to \$650 per pupil enrolled in classes participating in the program, as specified, for class size reduction, provided the district certifies that it has met certain requirements. Under Option Two, the superintendent is required to apportion an amount equal to \$325 per

pupil enrolled in each class that is reduced, as specified, for at least $\frac{1}{2}$ of the instructional minutes offered per day.

Existing law, for Option One, requires a school district to provide a reduced class size for all pupils in each classroom for the full regular schoolday, as specified, in each grade level for which funding is claimed.

Existing law, for Option One, permits a school district, as a part of the application for funding, to request that the State Board of Education grant the district a 2-year authorization to have a teacher-pupil ratio that averages 1 to 20, inclusive, whether or not each group of 20 pupils is enrolled in separate grades, as specified. Existing law prohibits the board from renewing or extending that authorization, as specified. Existing law authorizes the board to grant the authorization if, among other things, the district submits a plan demonstrating that it will fully meet the requirements pertaining to Option One.

Existing law requires a school district to apply for the Class Size Reduction Program for the 1997-98 school year, and any subsequent school year, by June 30 prior to the new school year.

This bill would change the amount the superintendent is required to apportion under Option One and Option Two to \$800 and \$400, respectively. The bill, for the 1997-98 school year, would permit funding for expanding or adding new classes in the Class Size Reduction Program after the beginning of the 1997-98 school year, as specified. The bill would state the intent of the Legislature that first priority for any funds appropriated for the Class Size Reduction Program in the 1997-98 Budget Act that are not expended for that program be made available, on a one-time basis, for specified class size reduction facilities purposes. The bill would permit Class Size Reduction Program funds to be used for facilities funding for class size reduction for new classes in the Class Size Reduction Program in the 1997-98 school year on a conditional grant basis, as specified.

This bill, for school years subsequent to the 1997-98 school year, would delete the authorization for exceptions to the teacher-pupil ratio. The bill would express the Legislature's intent that the next statewide general obligation bond for school facilities address the overall facilities needs for the Class Size Reduction Program, as specified.

This bill would authorize a school district to implement a program to reduce class size in 3 grade levels at a schoolsite that exclusively enrolls pupils in kindergarten and grades 1 and 2 and, in addition, reduce class size in grade 3 at a schoolsite that exclusively enrolls pupils in grades 3 to 5, inclusive, as specified. The provision would remain in effect until July 1, 1999, as specified.

This bill would require the Controller to develop appropriate instructions for the conduct of audits, as specified, for the purpose of determining the level of compliance with the Class Size Reduction Program.

This bill would change the application deadline for the 1997-98 school year and any subsequent school year to not later than 90 days after the annual Budget Act is chaptered, unless otherwise specified in regulations adopted by the State Board of Education. The bill would prohibit state agencies from reducing the apportionments made to a school district for either the Class Size Reduction Program or the Class Size Reduction Facilities Program during the 1996-97 or 1997-98 school year, if the only reason for the reduction is that an audit included a finding that the school district received Class Size Reduction Program incentive funding for one or more classes having an annual average daily class size, as defined, that was in excess of 20, as specified. The bill would also make conforming changes to related provisions of law.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 299 (AB 1578) Migden. Education Trailer Bill to the Budget Act of 1997.³

(1) Existing law sets forth the title of a specified article of the Education Code as "California State Council on Vocational Education."

This bill would amend that title to conform to the changes described in (2) to (7), inclusive, below.

(2) Existing law creates the California State Council on Vocational Education, consisting of 13 members appointed by the Governor, as specified.

This bill would repeal this provision.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law specifies the membership of the California State Council on Vocational Education.

This bill would repeal this provision.

(4) Existing law requires that the members of the California State Council on Vocational Education serve without compensation and instead receive their actual necessary expenses incurred in the performance of their duties.

This bill would repeal this provision.

(5) Existing law specifies the duties and responsibilities of the California State Council on Vocational Education.

This bill would repeal this provision.

(6) Existing law requires the State Board of Education and the Board of Governors of the California Community Colleges to either accept or reject each recommendation made by the California State Council on Vocational Education and to return to the council, the Governor, and the Legislature any recommendation that has been rejected, together with the reasons for the rejection.

This bill would repeal this provision.

(7) Existing law authorizes the California State Council on Vocational Education to obtain the services of any professional, technical, and clerical personnel to enable it to carry out its functions and to contract for any services necessary to carry out its evaluation functions, as specified.

This bill would repeal this provision.

(8) Existing law requires the Superintendent of Public Instruction to administer state preschool programs and to transmit the numbers of 4-year-old and 3-year-old children enrolled in state preschool programs to the Legislature and the Governor by December 1 of each fiscal year.

This bill would instead require this information to be transmitted to the Legislature and the Governor by February 1 of each fiscal year.

(9) Existing law establishes various programs for the provision of child care to schoolage children. Among those programs is a program to provide funding to applicant public elementary schoolsites according to specified priorities for the purpose of operating extended day care programs.

This bill would establish the Child Care Facilities Revolving Fund in the State Treasury to provide funding for the purchase of new child care facilities for lease to child care and development contracting agencies. The bill would authorize the Superintendent of Public Instruction to transfer state funds appropriated for child care facilities into this fund for allocation for child care and development contractors for the purchase, transportation, and installation of facilities for replacement and expansion of capacity, as specified. The bill would continuously appropriate this fund to the Superintendent of Public Instruction without regard to fiscal year, as specified.

(10) Existing law prohibits contractors who provide schoolage community child care services programs administered by the Superintendent of Public Instruction from being reimbursed more than the maximum reimbursable amount stated in the contract with the State Department of Education.

This bill would require the maximum reimbursable amount to be reduced, as specified, if an extended day care program contractor fails to operate at 98% of the minimum days of operation required in its contract or ceases operating before the end of the contract term.

(11) Existing law permits pupils with low incidence disabilities to receive all or a portion of their instruction in the regular classroom, as specified. Existing law also authorizes the State Board of Education, upon the request of a governing board of a school district or a county board of education, to waive all or a part of any provision of the Education Code or any regulation adopted by the State Board of Education that implements a provision of the Education Code, except as specified.

This bill would require that, notwithstanding any other provision of law, the State Board of Education not approve any waiver of the provision that relates to the full inclusion of pupils with low incidence disabilities.

(12) Existing law, as set forth in Section 8 of Article IX of the California Constitution, requires the state to apply a minimum amount of funding for each fiscal year for the support of school districts, as defined, and community college districts (hereafter the

state's minimum funding obligation under Section 8). Existing law directs that the amount of state funding appropriated in each fiscal year comply with the state's minimum funding obligation under Section 8, and be distributed to school districts, as defined, to community college districts, and to state-operated schools according to a specified formula.

This bill would specify that this provision does not apply to the 1997-98 fiscal year.

(12.5) Existing law requires that the revenue limit for each school district for the 1994-95 fiscal year be reduced by an 11.01% deficit factor, a 10.12% deficit factor for the 1995-96 fiscal year, and a 9.967% deficit factor for the 1996-97 and 1997-98 fiscal years, as adjusted pursuant to a specified statute relating to the calculation of equalization adjustments.

This bill would instead require that adjustment to be made pursuant to a specified statute relating to the calculation of the amount to be appropriated for the minimum constitutional funding obligation for the public schools.

(13) Existing law authorizes only certain pupils who are referred by the county probation department under specified provisions, after an individualized review and certification of the appropriateness of enrollment in the county group home and institution's school or county community school, to be enrolled and eligible for apportionments in county community schools and, for purposes of making apportionments from the State School Fund, to be deemed to be enrolled in a county juvenile hall or camp.

This bill would expand the categories of pupils who are referred by the county probation department under specified provisions that may be enrolled in county community schools and, for purposes of making apportionments from the State School Fund, to be deemed to be enrolled in a county juvenile hall or camp. The bill would make these changes retroactive to July 1, 1996.

(14) Existing law requires the Superintendent of Public Instruction to allocate a specified percentage of funds designated for school districts for the purpose of making equalization adjustments to the base revenue limit of school districts for the 1996-97 fiscal year and to allocate a specified percentage of these funds to county superintendents of schools for the purpose of reducing the deficit factors applied to the revenue limits computed for county superintendents of schools and school districts. Existing law also requires the Superintendent of Public Instruction to allocate the funds for equalization adjustments prior to the allocation of funds for reducing deficit factors.

This bill would delete the requirement that the funds for equalization adjustments be allocated prior to the allocation of funds for reducing deficit factors.

(15) Existing law requires each county superintendent of schools to make specified calculations to determine a base revenue limit for each school district in the county. As part of that computation, existing law requires the Superintendent of Public Instruction to compute a revenue limit equalization adjustment for the 1995-96 fiscal year for each school district's base revenue limit pursuant to a specified formula. The county superintendent of schools, in conjunction with the Superintendent of Public Instruction, is required to compute an equalization adjustment for each school district in the county so that no district's 1996-97 base revenue limit per unit of average daily attendance is less than the 1995-96 fiscal year statewide average base revenue limit for the appropriate size and type of district, as adjusted for inflation.

This bill would instead require the equalization adjustment to result in no school district's 1996-97 base revenue limit per unit of average daily attendance being less than the 1995-96 fiscal year statewide average base revenue limit for the appropriate size and type of district without being adjusted for inflation.

(16) Existing law establishes a program to provide each certificated teacher of pupils enrolled in kindergarten and grades 1 to 3, inclusive, with the knowledge and skills necessary to effectively teach pupils to read. The State Department of Education is required to allocate funds appropriated for that program to each school district on the basis of an equal amount per pupil in enrollment statewide in kindergarten and grades 1 to 3, inclusive, as of October 1996. As a condition to receiving funds for that program, each school district must certify, among other things, that not less than 90% of its certificated employees who provide direct instructional services to pupils enrolled in kindergarten or any of grades 1 to 3, inclusive, have received specified in-service training

and that funds will be spent by the school district only for the purposes of providing in-service training in reading instruction in the 1996–97 school year.

The bill would require the Superintendent of Public Instruction to administer the grant application process and would provide that the minimum grant awarded shall be for no less than \$1,000 and the maximum grant awarded to a school district shall not exceed twice the total amount of funding provided for the purposes of this program in any fiscal year divided by the number of pupils enrolled statewide in grades 1 to 3, inclusive, in the prior fiscal year, multiplied by the number of pupils enrolled in the school district in those grades.

(17) The bill would also require the Superintendent of Public Instruction to administer a grant application process similar to that set forth in (16) above for grades 4 to 8, inclusive.

(18) Existing law requires the governing boards of any 2 school districts that have been requested by a pupil's parent or legal guardian to enter into an agreement for interdistrict attendance to give consideration to the child care needs of the pupil. Existing law requires the governing board of a school district that has entered an agreement for interdistrict attendance of a pupil based upon child care needs and the governing board of any high school district whose feeder elementary school has entered into such an agreement to allow that pupil to remain continuously enrolled in the school district of choice and to attend school through the 12th grade in the same district, subject to specified provisions. These provisions are effective until July 1, 1998.

This bill would extend the effective date of these provisions until July 1, 2003, thereby imposing a state-mandated local program.

(19) Existing law provides that a pupil shall be deemed to have complied with the residency requirements for school attendance in a school district, provided the pupil meets one of the specified requirements, including that one or both of the parents or legal guardians of an elementary school pupil is employed within the boundaries of the school district. Under existing law, the school district within which the pupil's parents or guardians are employed is not required to admit the pupil. The provision permitting school district attendance based upon employment within the boundaries of a school district is effective until July 1, 1998.

This bill would extend the effective date of this provision until July 1, 2003, thereby imposing a state-mandated local program.

(20) Existing law requires the Superintendent of Public Instruction to issue a maximum of 100 grants to school districts maintaining high schools that meet specified requirements for the purposes of planning, establishing, and maintaining partnership academies.

This bill would authorize the Superintendent of Public Instruction to issue a maximum of 155 grants per year for the 1997–98 fiscal year for purposes of planning partnership academies.

(21) Existing law requires county superintendents of schools to compute instructional personnel services units for each school district and county office of education operating special education programs and related services for the purposes of making apportionments for those programs. Under existing law, for the 1996–97 fiscal year, no amount may be allocated for instructional personnel services units for services to children with exceptional needs who are younger than 3 years of age if those units are generated by an extended year program.

This bill would instead apply this provision to funds allocated for the 1997–98 fiscal year.

(21.5) Existing law establishes the California Community Colleges Economic Development Program (EDNet Program), which, with its economic development program centers and industry-driven regional collaboratives, is required to provide specified services and to perform specified functions as participants of regional business resource, assistance, and innovation networks. Under existing law, the program shall become inoperative on June 30, 1998, and as of January 1, 1999, is repealed.

This bill would make the program inoperative on June 30, 1999, and would repeal it on January 1, 2000. The bill would make substantive changes in the provisions governing the program and, among other things, would provide for economic development program centers and participation in industry-driven regional collaboratives, as specified.

The bill would permit allocation from a specified appropriation an amount not to exceed \$10 million from the General Fund for the support of eligible activities if, as a result of the work force improvement services provided to employers, entry-level positions are created within industry clusters, as specified.

In addition, the bill would specify that of the funds appropriated to the ED|Net Program, funding for economic development program centers and economic development program industry-driven regional collaboratives matching requirements shall be waived for services to participating employers who create employment opportunity for recipients of Aid to Families with Dependent Children.

(22) Existing law establishes the Commission for the Establishment of Academic Content and Performance Standards. The commission is required to develop academically rigorous content standards and performance standards to be used in public schools maintaining kindergarten and grades 1 to 12, inclusive. Existing law requires that, on or before October 1, 1997, the commission shall develop and submit the academically rigorous content standards and performance standards for all core curriculum areas and all grade levels to the State Board of Education for approval by the board. Under existing law, the provisions relating to the commission are repealed on July 1, 1998.

This bill would require the commission to develop and submit the academically rigorous content standards and performance standards for the core curriculum areas of reading, writing, and mathematics on or before October 1, 1997. The bill would require, on or before August 1, 1998, the commission to develop and submit the standards for science and history/social science. The bill would provide that the provisions relating to the commission become inoperative on July 1, 1999, and are repealed on January 1, 2000.

(23) Existing law provides for the reimbursement of state-mandated local costs. Existing law appropriates \$50,000,000 from the General Fund as a contingency expenditure, to be authorized by the Department of Finance for allocation as appropriate for the reimbursement of state-mandated cost claims submitted by school districts and county offices of education.

This bill would provide that this appropriation is available without regard to fiscal year.

(24) This bill would declare that, notwithstanding any other provision of law, any and all funds appropriated in 6 specified items of the Budget Act of 1997 are in lieu of amounts that would otherwise be required to be appropriated pursuant to any other provision of law.

(25) Existing law provides for the transfer of money from the General Fund of the state to Section A of the State School Fund, which is that portion of the school fund restricted for elementary and high school purposes.

This bill would provide that, notwithstanding any other provision of law, for the purposes of these provisions, the Superintendent of Public Instruction shall certify to the Controller amounts that do not exceed the amounts needed to fund the revenue limits of school districts, as determined in accordance with specified procedures.

(26) This bill would establish an advisory committee of 6 members that shall assist in the selection of programs to be funded with federal Goals 2000 funds to be evaluated and the development of the evaluation plans, as specified.

(27) This bill would require that, prior to the expenditure or obligation of funds anticipated to be received, pursuant to a specified provision, the governing board of the school district or county office of education to discuss proposals and plans for expenditure of the funds at a public hearing, as specified.

(28) Existing law requires the State Department of Education to implement the standardized account code structure approved by the State Board of Education. Before fully implementing recommendations regarding that structure, existing law requires the standardized account code structure to be tested and the plan for implementation to be revised as deemed necessary by the department pursuant to the tests.

This bill would require that a specified amount of funds appropriated in the bill for the purpose of implementing the standardized account code structure be allocated to Phase I participants to fully fund their contract agreements and grant awards entered into before the 1997-98 fiscal year and to provide funding for a consortium. The bill would also require that a specified amount of funds appropriated in the bill for the purpose of implementing the standardized account code structure be allocated to Phase II participants at the rate of \$5 per unit of average daily attendance, as specified. The bill

would provide that under certain conditions Phase II participants may receive \$75,000 instead of \$5 per unit of average daily attendance.

(29) Under existing law, the Legislature is required to provide for a system of common schools. This bill would appropriate \$518,545,000, as follows:

(a) The sum of \$600,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Los Angeles Unified School District for the purpose of providing an early intervention program for at-risk pupils in grades 6 to 8, inclusive, who are otherwise eligible to be served by The sum of community day schools pursuant to a specified provision of existing law.

(b) The sum of \$16,969,000 from the General Fund to implement the Standardized Account Code Structure, as specified.

(c) The sum of \$2,800,000 from the General Fund to the Kern County Office of Education for a joint communications network plan involving the superintendents of schools of the counties of Kern and San Luis Obispo. The bill would specify the components of this plan.

(d) The sum of \$6,000,000 from the General Fund to the State Department of Education, to be available in the 1997–98 and 1998–99 fiscal years, for development of the statewide pupil assessment instrument, as specified.

(e) The sum of \$98,472,000 from the General Fund for transfer by the Controller to Section B of the State School Fund for the purpose of providing one-time block grants to community college districts for the 1997–98 fiscal year. The bill would specify that the allocations made pursuant to this provision be for the purpose of one-time high-priority instruction equipment and library material replacement, technology infrastructure, or scheduled maintenance and special repairs.

(f) The sum of \$10,000,000 from the General Fund to the Chancellor of the California Community Colleges for allocation as child care facility grants through a request-for-proposal process, as specified.

(g) The sum of \$20,000,000 from the General Fund to the California Community Colleges for the purposes of allocating funds to community college districts for one-time scheduled maintenance/special repair projects for the 1996–97 fiscal year.

(h) The sum of \$1,841,000 from the General Fund to the Controller, to be expended upon authorization by the Department of Finance for allocation as appropriate for the reimbursement of state-mandated local cost claims submitted by school districts for the 1994–95, 1995–96, 1996–97 fiscal years.

(i) The sum of \$4,500,000 from the General Fund to the Commission on Teacher Credentialing for the purpose of providing incentive grant funding to school districts and county offices of education participating in the alternative teacher certification program.

(j) The sum of \$90,646,000 from the General Fund and transferred to the State School Deferred Maintenance Fund to be available for funding of applications received by the Office of Public School Construction for the purposes of payments for K-12 school deferred maintenance projects.

(k) The sum of \$148,159,000 from the General Fund to the Controller as a contingency expenditure, to be authorized by the Department of Finance for allocation as appropriate for the reimbursement of state-mandated local cost claims submitted by local education agencies and community college districts for the 1994–95, 1995–96, and 1996–97 fiscal years.

(L1) The sum of \$59,479,000 from the General Fund to the State Department of Education to cover deficiencies in the 1996–97 fiscal year appropriation for special education growth units and other entitlements, as specified.

(m) The sum of \$920,000 from the General Fund to the Controller for payment of state-mandated local cost claims submitted by school districts pursuant to provisions of law pertaining to schoolbus safety, as specified.

(n) The sum of \$622,000 from the General Fund to the Controller for payment of state-mandated local cost claims submitted by school districts pursuant to provisions of law pertaining to pupil health screenings, as specified.

(o) The sum of \$3,600,000 from the General Fund to the Superintendent of Public Instruction, for allocation pursuant to the High-Risk Youth Education and Public Safety Program, as specified.

(p) The sum of \$25,000,000 for transfer from a specified item of the Budget Act of 1997 to the Child Care Facilities Revolving Fund.

(q) The sum of \$1,000,000 from the General Fund to the Superintendent of Public Instruction for allocation, on a one-time basis in the 1997-98 fiscal year to the La Grand Union High School District for costs associated with the planning and construction of the La Grand Vocational Agricultural Building.

(r) The sum of \$1,225,000 from the General Fund to the Controller for reimbursement of approved claims received from the Richgrove and Allensworth elementary school districts for voluntary desegregation programs, as specified.

(s) The sum of \$750,000 from the General Fund to the Superintendent of Public Instruction for allocation to the California Foundation Museum for the 1997-98 fiscal year for educational purposes, as specified.

(t) The sum of \$50,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Pasadena Unified School District for the 1997-98 fiscal year for a survey and report on child care services, as specified.

(u) The sum of \$500,000 from the General Fund to the Superintendent of Public Instruction for allocation, as specified, in the 1997-98 fiscal year, for the purpose of the after-school youth violence prevention, as specified, for the San Diego Unified School District, the Sweetwater Union School District, the Vista Unified School District, and the South Bay Unified School District.

(v) The sum of \$100,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Los Angeles Unified School District in the 1997-98 fiscal year for allocation to specified schools in the district for the drug awareness programs.

(w) The sum of \$500,000 from the General Fund to the Chancellor of the California Community Colleges for allocation, on a one-time basis in the 1997-98 fiscal year, to the Riverside Community College District for costs associated with the planning of a new campus library.

(x) The sum of \$200,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Fresno Unified School District in the 1997-98 fiscal year for a truancy reduction program, as specified.

(y) The sum of \$300,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Contra Costa County Office of Education, the Merced School District, and the Burbank Unified School District in the 1997-98 fiscal year for the purchase and installation of computers in school libraries for homework help centers, as specified.

(z) The sum of \$175,000 from the General Fund to the Superintendent of Public Instruction for allocation to the La Canada Unified School District in the 1997-98 fiscal year for technology-related costs for the joint use library project, as specified.

(aa) The sum of \$500,000 from the General Fund, to the Superintendent of Public Instruction for allocation to the Los Angeles Unified School District in the 1997-98 fiscal year for education programs at the California Museum of Latino History, Art, and Culture, as specified.

(bb) The sum of \$50,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Lodi School District in the 1997-98 fiscal year for a central coordinator to recruit and train mentors in the establishment of a "Job Shadowing" program, as specified.

(cc) The sum of \$250,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the Napa Valley Unified School District for the Napa County Regional Occupational Center program, as specified.

(dd) The sum of \$2,000,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the Hollywood Entertainment Museum for a multifaceted education program, as specified.

(ee) The sum of \$147,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the San Mateo-Foster City School District for costs associated with specified litigation.

(ff) The sum of \$45,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the South Bay Union School District for a specified science program.

(gg) The sum of \$10,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the Los Angeles Unified School District for extended learning programs as specified, at the Telfair Elementary School.

(hh) The sum of \$3,721,000 from the General Fund to the Superintendent of Public Instruction for reimbursement of the 1995-96 shortfall in year-round incentive grant calculations, as specified.

(ii) The sum of \$700,000 from the General Fund to the Controller for reimbursement of approved claims of the San Francisco Unified School District for court-ordered desegregation, as specified.

(jj) The sum of \$1,101,000 from the General Fund to the Controller for reimbursement of approved claims from the Carlsbad Unified School District and the San Dieguito Union High School District for voluntary desegregation, as specified.

(kk) The sum of \$1,500,000 from the General Fund to the Superintendent of Public Instruction for allocation to Indian education centers in the 1997-98 fiscal year, as specified.

(L1}{L1}) The sum of \$200,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Inglewood Unified School District for a pilot project to enhance instruction in mathematics, as specified.

(mm) The sum of \$12,674,000 from the General Fund to the Controller for reimbursement of approved claims from the East San Jose School District's collaboration, as specified, for voluntary desegregation, as specified.

(nn) The sum of \$1,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to school districts in the 1997-98 fiscal year to ensure children's safety on school playgrounds and reduce playground injuries by upgrading, refurbishing, or replacing school playgrounds and playground facilities.

(oo) The sum of \$100,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the Los Angeles County Office of Education for domestic violence prevention training.

(pp) The sum of \$400,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to school districts to fund 4 community policing school safety pilot projects for a 3-year period, as specified.

(qq) The sum of \$2,000,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to school districts for the California Collaborative for Improving Academic Preparation.

(rr) The sum of \$800,000 from the General Fund to the Superintendent of Public Instruction in the 1997-98 fiscal year for allocation to the Los Angeles County Office of Education for the development of an English language development exam, as specified.

(ss) The sum of \$2,273,000 from the General Fund to the California Public School Library Protection Fund for allocation in the 1997-98 fiscal year to school districts, as specified.

(tt) The sum of \$3,000,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to school districts for specified assistance.

(uu) The sum of \$450,000 from the General Fund to the Superintendent of Public Instruction in the 1997-98 fiscal year to provide incentive grants to school districts to expand the number of middle college high schools, as specified.

(vv) The sum of \$200,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the Santa Clara County Office of Education for a pilot project to enhance mathematics instruction, as specified.

(ww) The sum of \$1,646,000 from the General Fund to the Superintendent of Public Instruction for equal allocation to the San Joaquin County Office of Education for educational and operational costs for the Professional Development Center; technology training for teachers, pupils, and support staff; and reading and mathematics projects.

(xx) The sum of \$125,000 from the General Fund to the Superintendent of Public Instruction for equal allocation in the 1997-98 fiscal year to the Glendale Unified School District for Project YES.

(yy) The sum of \$200,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the Grossmont Unified School District for capital improvements to school facilities in that district.

(zz) The sum of \$100,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997–98 fiscal year to the St. Helena Unified School district for costs associated with the establishment of an agricultural center at St. Helena High School.

(aaa) The sum of \$100,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997–98 fiscal year to the Bellflower Unified School District for the Educational Career Options program at Bellflower High School.

(bbb) The sum of \$395,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997–98 fiscal year to the Lompoc Unified School District for the Cabrillo High School Aquarium expansion project.

(ccc) The sum of \$450,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997–98 fiscal year to the Burbank Unified School District for technology modernization at John Muir Middle School.

(ddd) The sum of \$2,000,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997–98 fiscal year to the Simon Wiesenthal Center Museum of Tolerance for the purpose of providing teacher training on tolerance and diversity.

(eee) The sum of \$500,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997–98 fiscal year to the 100th/442nd/MIS World War II Memorial Foundation for the purpose of providing educational programs for teachers and pupils on the involvement of Japanese Americans in World War II, the Japanese American internment, and civil liberties issues.

(fff) The sum of \$500,000 from the General Fund to the Los Angeles Unified School District for planning and site preparation for the New California Center for Culture, Education, and Economic Development.

(ggg) The sum of \$2,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to specified school districts in the 1997–98 fiscal year, as specified, for school library books, reference materials, laser discs, maps, charts, globes, and materials in an electronic format for school libraries.

(hhh) The sum of \$3,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to specified school districts in the 1997–98 fiscal year, as specified, to be used to purchase computers for use in classroom instruction or to cover any infrastructure improvements necessary to accommodate computers in the classroom.

(iii) The sum of \$170,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Livermore Valley Joint Unified School District in the 1997–98 fiscal year for deferred maintenance, repair, or modernization projects.

(jjj) The sum of \$50,000 from the General Fund to the Superintendent of Public Instruction for allocation to the San Ramon Valley Unified School District in the 1997–98 fiscal year for subsequent allocation to the Greenbrook Elementary School for deferred maintenance, repair, or modernization projects.

(L1}{L1}{L1)) The sum of \$450,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Long Beach Unified School District in the 1997–98 fiscal year for subsequent allocation to specified schools for deferred maintenance, repair, or modernization projects.

(mmm) The sum of \$1,700,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Garden Grove Unified School District in the 1997–98 fiscal year to accommodate computer technology on a wide area network at elementary, intermediate, and high school sites in the district.

(nnn) The sum of \$275,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Walnut Creek School District in the 1997–98 fiscal year to establish at least one science, mathematics, or computer laboratory at each of its 5 elementary school sites.

(ooo) The sum of \$30,000 from the General Fund to the Superintendent of Public Instruction for allocation to the San Bernardino County Office of Education for costs incurred by local education agencies in the 1997–98 fiscal year to work in collaboration with the City of Rancho Cucamonga to develop an after school at-risk youth program.

(ppp) The sum of \$75,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Bobby Duke Elementary School in the Coachella Valley

School District in the 1997–98 fiscal year for costs incurred by the district in its collaboration with the Coachella Boys and Girls Club.

(qqq) The sum of \$250,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Oxnard Elementary School in the 1997–98 fiscal year for costs incurred by the district in participating in a community reading resources project.

(rrr) The sum of \$2,000,000 from the General Fund to the Superintendent of Public Instruction for allocation for costs associated with the Discovery Science Center in Orange County in the 1997–98 fiscal year.

(30) Existing law requires that the revenue limit for each school district and county office of education be reduced by a designated percentage, known as a deficit factor, for each of several specified fiscal years. Existing law provides that, in making revenue limit computations for any fiscal year, the revenue limit for those entities be computed as if each had not been reduced by a deficit factor in previous fiscal years. Existing law directs the Superintendent of Public Instruction to certify to the Controller by July 15th of each year certain ascertainable amounts to be appropriated to local educational entities as an advance apportionment. Existing law directs the Controller each year to transfer certain amounts from the General Fund to Section A of the State School Fund to fund apportionments to local educational entities, as specified.

This bill would direct the Superintendent of Public Instruction to notify local educational entities of the Legislature's intent to consider enacting a deficit factor for the 1998–99 fiscal year, and would declare that, if the Budget Act of 1998 is not enacted prior to the distribution of the advanced apportionment of the 1998–99 fiscal year, the advanced apportionment of that fiscal year shall be calculated based upon the deficit factor for the 1997–98 fiscal year.

(31) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(32) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 300 (AB 1586) R. Wright. State administration. ⁴

(1) This bill would declare the intent of the Legislature to make the necessary statutory changes to implement the Budget Act of 1997 relative to state administration.

(2) Under existing law, the first \$832,765 of revenues that the California Science Center receives each year from parking facilities, rental of museum facilities, or other business activities is required to be deposited in the General Fund. All revenues in excess of that amount are required to be deposited in the Exposition Park Improvement Fund, and upon appropriation, used for improvements to Exposition Park.

This bill would delete the provision requiring the first \$832,765 of those revenues to be deposited in the General Fund, thereby increasing by that amount the funds deposited in the Exposition Park Improvement Fund.

This bill would also prohibit the City of Los Angeles and the County of Los Angeles from imposing any tax upon tickets purchased authorizing the use of parking facilities owned by the California Science Center.

(3) Existing law provides that any person who makes any one of various false claims against the state shall be liable to the state or to the political subdivision for specified damages, costs, and civil penalties, and authorizes the Attorney General to bring a civil action against a person who makes a false claim, as specified.

This bill would specifically designate the above body of existing law the False Claims Act. The bill would create the False Claims Act Fund in the State Treasury, and would provide that proceeds from a civil action or settlement of a claim by the Attorney General pursuant to the False Claims Act shall be deposited into the fund. The bill would provide that, upon appropriation by the Legislature, moneys in the fund shall be used by the Attorney General to support the ongoing investigation and prosecution of false claims. This bill would also make technical, nonsubstantive changes to existing law.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) Existing law authorizes any agency of the state to dispose of surplus residential property, according to specified guidelines.

This bill, with a specified exception, would prohibit the Department of Transportation from disposing of any surplus property in the City of South Pasadena prior to January 31, 1998, and would require that the department submit a report to the Legislature by December 1, 1997, on the planned disposition of surplus property in that city.

(5) The Knox-Keene Health Care Service Plan Act of 1975 sets forth the requirements for payment of specified reimbursements to the Commissioner of Corporations by health care service plans applying for licensure under its provisions, and sets forth the amounts and methods of payment of additional types of reimbursements.

This bill would make various revisions to these provisions.

(6) Under the existing Alatorre-Zenovich-Dunlap-Berman Agricultural Labor Relations Act of 1975, the Agricultural Labor Relations Board is established to regulate labor relations between employers and employees engaged in the agricultural industry. Existing law authorizes the board to order an employer to pay monetary relief to an employee for back pay or loss of pay that results from the violation by the employer of the act.

This bill would require any monetary relief ordered by the board pursuant to the act to be paid by an employer to an employee to be collected by the board on behalf of the employee. The bill would require all money collected by the board to be remitted to the employee for whom the board collected the money. The bill would require the board to make a diligent effort to locate any employee for whom the board has collected money. The bill would provide that if the board is unable to locate the employee or the lawful representative of the employee for a period of 2 years after the date the board collected the monetary relief, the board would be required to deposit the money in the Agricultural Employee Relief Fund, which the bill would create as a special fund in the State Treasury.

The bill would continuously appropriate moneys in the fund to the board for the purpose of paying affected employees the unpaid balance of any monetary relief ordered by the board pursuant to the act that is unpaid by the employer, as specified.

(7) Existing law, administered by the Veterans Memorial Commission, authorizes the construction of a memorial to all California veterans on the grounds of the State Capitol. Existing law requires that funds for the construction of the memorial be provided through private contributions. Existing law establishes the Veterans Memorial Account in the General Fund, a continuously appropriated fund, in which moneys received by the commission for purposes of the memorial are deposited.

This bill would authorize, when appropriated by the Legislature, the use of General Fund moneys for the purposes of completing the construction of the memorial.

This bill would repeal the Veterans Memorial Commission, and provisions affecting that commission, as of January 1, 1998.

(8) Existing law establishes the California Tourism Marketing Act which provides procedures for the establishment of an industry-approved assessment and the creation of a nonprofit corporation named the California Tourism Marketing Commission utilizing a referendum process.

Existing law authorizes the Secretary of Trade and Commerce to use records held by the state to establish and maintain an accurate list of businesses to be assessed.

This bill would repeal that provision.

Existing law authorizes the Franchise Tax Board to provide the Secretary of Trade and Commerce, acting within the capacity authorized in the California Tourism Marketing Act, with information relating to specified types of income or franchise tax returns or other records, subject to certain conditions.

This bill would repeal that provision.

Existing law exempts from assessment certain travel agencies and tour operators.

This bill would also exempt small businesses, as defined, and revenues of regular route intrastate and interstate bus service, with prescribed exceptions.

Existing law provides that a person who provides false information concerning an assessment or willfully renders or furnishes false or fraudulent reports, statements, or records is guilty of a misdemeanor punishable by a fine or imprisonment, or both.

This bill would repeal that provision.

(9) This bill would set forth the conditions pursuant to which the Department of General Services and the Department of Consumer Affairs are required or authorized to carry out specified functions relating to state personnel matters, to contracts for personal services, and to services that state agencies are required or authorized to purchase from the department or that the department can provide on a cost-competitive basis. It would specify that these provisions shall remain in effect only until the effective date of the Budget Act of 1998 or June 30, 1998, whichever occurs later.

(10) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 301 (AB 116) Runner. Open meetings: regional water control boards.

Existing law, relating to open meetings of state bodies, as defined, requires a state body to provide notice of its meeting at least 10 days in advance to any person who requests notice in writing.

This bill would, with respect to regional water quality control boards, additionally require notice in writing to be given at least 10 days prior to any and all board hearings to clerks of the city councils and county boards of supervisors, and newspapers with a circulation of at least 10,000, within the board's jurisdiction, as specified. This bill would require each clerk to distribute the notice of the board hearing to all members of the respective city council or county board of supervisors within the regional board's jurisdiction and would thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 302 (AB 210) Hertzberg. Explosive devices.

Under existing law, the punishment for a person who explodes, ignites, or attempts to explode or ignite any destructive device or any explosive with intent to commit murder is imprisonment in the state prison for a period of 5, 7, or 9 years.

This bill would increase the penalty for that crime to life with the possibility of parole.

Ch. 303 (AB 298) Murray. Recording or audiovisual work.

Under existing law, a person is guilty of failure to disclose the origin of a recording or audiovisual work, punishable as a misdemeanor or a felony, when, for commercial advantage or private financial gain, he or she knowingly advertises or offers for sale or resale, or sells or resells, or causes the sale or resale, or rents, or manufactures, or possesses for these purposes, any recording or audiovisual work, the outside cover box or jacket of which does not clearly and conspicuously disclose specified information.

This bill instead would provide that a person is guilty of this crime when the cover, box, jacket, or label of the recording or audiovisual work does not clearly or conspicuously disclose the specified information. The bill would also make clarifying changes to related provisions. By changing the definition of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 304 (AB 658) Scott. Public employee retirement.

The Public Employees' Retirement Law authorizes various public agencies to enter into contracts for participation in the retirement system.

This bill would authorize the Western Association of Schools and Colleges to enter into a contract for participation if it obtains a specified federal agency opinion regarding the effect of participation on the retirement system's tax exempt status.

Ch. 305 (AB 946) Washington. Crimes: battery: operators of public transit vehicles.

Existing law makes battery against a public transit operator, driver, passenger, or station agent punishable by imprisonment, as specified, or by a fine not exceeding \$2,000, or by both the imprisonment and fine.

This bill would increase the maximum fine to \$10,000.

Ch. 306 (AB 1565) Committee on Budget. Local costs: claims.

Existing law requires the governing board of each school district to adopt a policy authorizing teachers to provide that the parent or guardian of a pupil, who has been suspended by a teacher for specified reasons, attend a portion of a schoolday in his or her child's classroom.

Existing law provides interagency responsibilities for providing services to children with exceptional needs, including requiring counties to provide mental health services when required in a pupil's individualized education program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would appropriate \$940,000 from the General Fund to the Controller for the payment of claims from school districts and county offices of education seeking reimbursement for state-mandated local costs incurred pursuant to the provision requiring the governing board of each school district to adopt a policy authorizing teachers to provide that a parent or guardian of a pupil, who has been suspended by a teacher, attend a portion of a schoolday in his or her child's classroom.

This bill would appropriate \$8,443,000 from the General Fund to the Controller for the payment of claims from counties seeking reimbursement of state-mandated local costs incurred pursuant to the provisions pertaining to interagency responsibilities for providing services to children with exceptional needs.

This bill would appropriate \$7,400,000 from the General Fund to the Controller for payment of claims from school districts and county offices of education seeking reimbursement of the state-mandated local costs incurred pursuant to provisions pertaining to annual parent notification.

This bill would appropriate \$3,488,000 from the General Fund to the Controller for the payment of claims from school districts and county offices of education seeking reimbursement of state-mandated local costs incurred pursuant to provisions pertaining to interdistrict pupil transfers.

This bill would appropriate \$60,179,223 from the General Fund to the Controller for the payment of claims, as scheduled, for reimbursement of state-mandated local costs for various other programs and responsibilities performed by local government agencies.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 307 (AB 1607) Committee on Budget. Judgments and settlement claims against the state.

Pursuant to existing law, the Legislature may make appropriations it deems proper for the payment of claims against the state under certain circumstances.

This bill would appropriate \$13,357,884 from the General Fund to the Attorney General to pay specified judgments and settlement claims against the state, and would specify that any funds remaining from this amount after those payments are made shall revert to the General Fund on June 30 of the fiscal year in which the final payment is made.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 308 (SB 114) Johnson. Pharmacy: dialysis.

Existing law provides for the regulation and licensure of the practice of pharmacy, and authorizes a pharmacist, and a manufacturer, wholesaler, or other supplier of hemodialysis drugs and devices who meet certain prescribed requirements, to distribute dangerous drugs and devices directly to hemodialysis patients pursuant to regulations

adopted by the board. It also, among other things, requires home hemodialysis patients who receive these drugs or devices to complete a full course of home training given by a renal dialysis center licensed by the State Department of Health Services.

This bill would amend these provisions to apply them to dialysis instead of hemodialysis.

Existing law requires home dialysis patients who receive dangerous drugs or devices pursuant to provisions authorizing distribution of dangerous drugs and devices directly to dialysis patients, to have completed a full course of home training given by a renal dialysis center.

This bill would, instead, require the patients to have completed a full course of home training given by a dialysis center.

Existing law authorizes the California State Board of Pharmacy to adopt regulations as necessary to ensure the safe distribution of these dangerous drugs and devices to dialysis patients without interruption of supply, and specifies the contents of the regulations, including, but not limited to, vendor licensing, records and labeling, patient receipts, and patient training.

This bill would delete the provisions specifying the contents of the regulations.

Ch. 309 (SB 156) Johannessen. Real property: acquisition by Wildlife Conservation Board: valuation.

Existing law requires the Wildlife Conservation Board to determine what areas, lands, or rights in lands or waters should be acquired by the state in order to effectuate a coordinated and balanced program resulting in the maximum restoration of wildlife in the state and in the maximum recreational advantages to the people of the state. Existing law requires the board to authorize the acquisition of the real property, rights in real property, water, or water rights as may be necessary to carry out the purposes of the Wildlife Conservation Law of 1947.

This bill would prohibit the purchase price for real property acquired by the board, other than by eminent domain, from exceeding the fair market value of the property, as defined in specified provisions of existing law. The bill would require the fair market value to be set forth in an appraisal that is prepared by a licensed real estate appraiser and approved by the Department of General Services.

Ch. 310 (SB 170) Lewis. Trading stamp companies.

(1) Existing law contains provisions with respect to the regulation of trading stamp companies, including a requirement that a corporation obtain a license from the Commissioner of Corporations to engage in business as a trading stamp company.

This bill would repeal these provisions and enact other provisions governing trading stamp companies and the issuance and redemption of trading stamps. The bill would provide that a willful violation of these provisions is a crime, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 311 (SB 192) Peace. Vehicles: registration: penalties.

Existing law requires the Department of Motor Vehicles to waive any penalties that may be due for late payment of registration fees for a vehicle that is repossessed and sold at a wholesale motor vehicle auction, as specified, if all registration renewal fees for the vehicle are paid not later than 60 days after the date of sale.

This bill would require the department to waive the specified penalties for a vehicle that is sold through a wholesale motor vehicle auction if immediately prior to the sale the vehicle was registered as a leased vehicle, delivery of the vehicle to the dealer conducting the wholesale motor vehicle auction was not later than 25 days after the termination of the lease, and the date of termination of the lease and the date of delivery to the auction is reported on the application for registration, or application for transfer and registration, in a format that is acceptable to the department.

Ch. 312 (SB 204) Lewis. Insurance.

(1) Under existing law, an insurer may invest in or otherwise acquire or loan upon securities and investments in a foreign country that are substantially of the same kinds, classes, and investment grades as those eligible for investment under the Insurance Code, subject to certain limitations. A domestic insurer with admitted assets in excess of \$500,000,000 may acquire any foreign investment if the insurer abides by specified limits. These limitations restrict the percentage of the insurer's admitted assets in investments that receive specified ratings from the National Association of Insurance Commissioners Securities Valuation Office.

This bill would provide that these limitations apply to foreign investments.

(2) Existing law requires every insurance production licensee, such as an insurance agent or broker, to prominently affix, type, or cause to be printed its license number to every price quotation and print advertisement.

This bill would exempt certain life insurance policy illustrations and cost indexes, which are required by law, from this requirement.

Ch. 313 (SB 357) Rainey. Municipal utility districts: competitive bid contracts.

Existing law requires competitive bidding on all purchases of supplies and materials in excess of \$20,000 for municipal utility districts and permits the board to authorize the general manager of the district to reject all bids and either readvertise or, after the specified vote, purchase the supplies and materials in the open market.

This bill would increase the purchase amount requiring competitive bidding to \$50,000 in any district with a population over 250,000, as annually adjusted by the percentage change in the Implicit Price Deflator for State and Local Government Purchases of Goods and Services for the United States, as published by the U.S. Department of Commerce.

The bill would also permit the board of a district which has owned and operated water distribution or sewage disposal systems for at least 8 years and has a population of 250,000 or more to authorize the general manager to act for the board in determining the lowest responsible bidder and awarding a contract to that bidder where the expenditure required by the bid price is less than \$100,000. The bill would require that when acting for the board, the general manager notify the board of the action taken.

Ch. 314 (SB 481) Dills. Quarter horse racing.

(1) Existing law permits the California Horse Racing Board to adopt rules and regulations of the Pacific Coast Quarter Horse Association and the Pacific Coast Quarter Horse Racing Association for the regulation of quarter horse racing.

This bill would delete the rules and regulations of the Pacific Coast Quarter Horse Association from that authorization.

(2) Existing law provides for the award of breeder premiums, owners' awards, and stallion awards to breeders, owners, and stallion owners of California-bred quarter horses to encourage agriculture and the breeding of high quality horses in this state, and requires that those awards be based upon certain eligible earnings.

This bill would change the definition of "eligible earnings" for those purposes.

Ch. 315 (SB 482) Lewis. Insurance: financial statements.

(1) Under existing law, an insurer doing business in California is required to file specified statements with the commissioner each year in quadruplicate reflecting its financial condition.

This bill would instead require these statements to be filed in triplicate.

(2) Existing law requires a domestic insurer to publish a synopsis of certain matters required to be disclosed, such as the insurer's assets, liabilities, income, expenditures, premiums collected, and other financial information, as specified. The Insurance Commissioner is required to prescribe the matters to be shown in the synopsis by providing printed forms for use by insurers.

This bill would repeal the requirement to disclose these specified matters and the requirements related to the publication of the synopsis.

Ch. 316 (SB 486) Craven. County veterans service centers: interagency agreements.

Existing law establishes various state benefits for veterans, including, but not limited to, programs providing educational and home or farm purchase assistance, and authorizes the Department of Veterans Affairs to assist every veteran of any war of the United States and the dependent of every veteran in presenting and pursuing various claims against the United States arising out of war service, and in establishing any rights under the laws of the United States or this state. Existing law authorizes a county board of supervisors to appoint a county veterans service officer to perform prescribed veteran related services.

This bill would authorize the Department of Veterans Affairs and the Department of Employment Development to enter into interagency agreements by July 1, 1999, with individual counties that elect to participate to provide resources and staff, or both, as necessary to locate within a single facility owned by the participating county, under the coordination of the county veteran service director, a more complete and convenient local service program for veterans that is determined to be nonduplicative and that does not conflict with any federal one-stop service program. The bill would require the veteran service center to be staffed with persons knowledgeable in employment and veterans benefits issues, and to contain all necessary resources, information, forms, and other materials necessary for a veteran to receive full employment assistance and a complete assessment of veterans benefits to which he or she is entitled.

This bill would require the Department of Veterans Affairs and the Department of Employment Development, after consulting with participating counties, to jointly report to the Legislature by January 1, 2002.

Ch. 317 (SB 573) Johnson. City of Newport Beach: tide and submerged lands.

Existing law grants in trust to the City of Newport Beach all tide and submerged lands, whether filled or unfilled, bordering upon and under the Pacific Ocean or Newport Bay, as described, subject to specified conditions.

The legislative grant requires the city to establish a separate tidelands trust fund or separate tidelands trust funds as may be approved by the State Lands Commission and requires the city to deposit in the fund or funds all money received directly from, or indirectly attributable to, the granted tide and submerged lands, including a city tideland capital fund, into which revenues from Parcels A, B, and C, as described, are required to be deposited, to be available only for the acquisition of real property that will further the purposes of the trust.

Existing law creates the Land Bank Fund in the State Treasury, which is appropriated to the commission for the management and improvement of public trust lands. The legislative grant requires a specified percentage of lease revenue from Parcel D, as described, to be deposited in that fund.

This bill would revise the legislative grant to require the city to establish a Tideland Capital Fund, a Tideland Operation and Maintenance Fund, and an Upper Newport Bay Restoration Fund. The bill would require that 80% of the revenues from Parcels A, B, and C be deposited in the Tideland Capital Fund and in the Tideland Operation and Maintenance Fund, allocated as determined by the city, and would require 10% of those revenues to be deposited in the Upper Newport Bay Restoration Fund and 10% in the Land Bank Fund. The bill would prescribe the uses for which the money in the funds could be expended.

The bill would authorize the city to transfer, subject to commission approval, city-owned real property not subject to the public trust to the trust created pursuant to the legislative grant, and to compensate its general fund for any such transfer, as specified.

The bill would require the city, by December 31, 1998, to dedicate as public trust lands to be held subject to the public trust and the provisions of the legislative grant, any lands that the commission has determined have equal or greater value and utility to the public trust than Parcels A, B, and C and that would provide a satisfactory substitution.

The bill would make related changes in the legislative grant.

Ch. 318 (SB 608) Johannessen. County veteran service officers: disbursements to counties.

Existing law authorizes the county board of supervisors to appoint a county veteran service officer, and permits the county to provide the officer with any assistance and facilities that it determines to be necessary. Existing law requires the Department of Veterans Affairs to disburse funds appropriated to the department for the purpose of supporting county veteran service officers pursuant to the annual Budget Act, on a pro rata basis to counties that comply with certain conditions. Commencing January 1, 2001, existing law includes the condition that county funds are allocated to county veteran service officers in an amount not less than that allocated in the 1988–89 fiscal year.

This bill would require the Department of Veterans Affairs to annually determine the amount of new or increased monetary benefits paid to eligible veterans by the federal government attributable to the assistance of county veteran service officers and to annually transmit its determination for the preceding fiscal year to the Department of Finance. The bill would require the Department of Finance to review the Department of Veterans Affairs' determination in time to use the information in the annual Budget Act. The bill would state legislative findings and declarations and encourage the Department of Finance, after reviewing the Department of Veterans Affairs' determination, to consider an increase in the annual budget for county veteran service officers, in an amount not to exceed \$5,000,000 if it is justified.

Ch. 319 (SB 618) Watson. Notaries public: duties: proofs of execution: payment of fees: journal and seal.

(1) Existing law relating to the recording of transfers provides that proof of the execution of an instrument, when not acknowledged, may be made by any party executing the instrument, a subscribing witness, or by specified other witnesses. Existing law relating to the duties of county recorders provides that before an instrument can be recorded, its execution shall be acknowledged, as specified, or proved by a subscribing witness or as otherwise specified, except for a grant deed, other than a trustee's deed or deed of reconveyance, mortgage, deed of trust, or security agreement.

This bill would expand this existing exception with respect to grant deeds to also include quitclaim deeds. The bill would provide a form for a proof of execution, but would not preclude the use of other forms that are substantially similar.

(2) Under existing law, the duties of a notary public include to demand acceptance and payment of foreign and inland bills of exchange, or promissory notes, to protest them for nonacceptance and nonpayment, and to exercise any other powers and duties that may be performed by notaries according to specified laws or commercial usages.

This bill would provide that a notary's duty to exercise other powers and duties under the above circumstances shall exist only with regard to the nonacceptance or nonpayment of bills and notes.

(3) Existing law regulating the functions and duties of notaries public specifies the manner in which a notary shall maintain his or her sequential journal of official acts and official seal, as defined.

Existing law authorizes the Secretary of State to appoint and commission notaries public, as specified, and sets forth the grounds for refusal, revocation, or suspension of a notary's commission by the Secretary of State. Existing law requires the Secretary of State to establish fees to cover the costs of commissioning notaries public and the enforcement of laws governing notaries public.

This bill would require a notary public to keep one active sequential journal of official acts at a time, and the official seal in a locked and secured area, under the direct and exclusive control of the notary, and would further provide that failure to secure the journal or seal shall be cause for the Secretary of State to take administrative action against the commission held by the notary public. The bill would further provide that the journal and seal are the exclusive property of the notary public, and shall not be surrendered to the notary's employer, or any other person, except to the county clerk, or a peace officer, as specified. It would require the notary public to provide the journal for examination and copying, in the presence of the notary public, upon receipt of a subpoena duces tecum or a court order, and would require the notary public to certify copies of portions of the journal, if requested. The bill would also require the notary

public to permit inspection and copying of journal transactions by a duly designated auditor or agent of the notary's employer, with respect to transactions that are directly associated with the employer's business purposes. The bill would provide that, upon the employer's request, the notary shall regularly provide copies of transactions that are directly associated with the employer's business purposes.

This bill would also authorize the Secretary of State to cancel the commission of a notary public if a check or other remittance accepted as payment for the application, commission, and fingerprint fee is not paid upon presentation to the financial institution upon which the check or other remittance was drawn.

Ch. 320 (SB 708) Greene. School facilities: relocatable buildings.

Existing law authorizes the State Allocation Board to approve requests from school districts for the waiver of Field Act provisions requiring approval of plans and relating to the structural safety of school buildings for specified owned and leased relocatable buildings, and specifies that any waiver that will expire on or before September 30, 1996, is extended until September 30, 1997. Those provisions are repealed as of September 30, 1997, at which point other provisions become operative that do not provide for that waiver of the Field Act.

This bill would require that the provisions of the Field Act be met for the specified relocatable buildings that are owned or leased prior to September 30, 1997, and for which no waiver has been granted before September 30, 1997, and be met for relocatable buildings, as specified, that are purchased or leased on or after September 30, 1997. This bill would specify that any waiver granted by the State Allocation Board to a school district, that is in effect on September 29, 1997, is extended until September 30, 2000.

This bill would declare that it is to take effect immediately as an urgency statute and be operative on September 30, 1997.

Ch. 321 (SB 784) Peace. Secured transactions.

Existing commercial law provides for regulation of security interests in personal property and fixtures, and provides that these regulations do not apply to certain transactions.

This bill would additionally exempt a transfer of an interest in a letter of credit from these regulations, other than the rights to proceeds of a written letter of credit.

Ch. 322 (SB 815) Leslie. Tahoe Regional Planning Compact: Transportation District.

Existing law, contained in the bistate Tahoe Regional Planning Compact, among other things, establishes the Tahoe Transportation District, as a special purpose district managed by a board of directors of 6 members appointed by local entities, as prescribed, and authorized to own and operate a public transportation system to the exclusion of all other publicly owned transportation systems in the region and to exercise specified related powers.

This bill would revise the compact to add additional members to the board of directors of the district, as prescribed, and would make related changes. The bill would specify additional powers of the district and related matters.

Ch. 323 (SB 849) Kelley. Water resources.

(1) Existing law authorizes the State Water Resources Control Board to adopt decisions and orders that impose administrative civil liability for prescribed violations of the Water Code.

This bill would authorize the board to apply to the clerk of the appropriate court for a judgment to collect the administrative civil liability that is imposed in accordance with that provision, as prescribed.

(2) Existing law requires an application for a permit to appropriate water to include prescribed information.

This bill would require an application to include sufficient information to demonstrate a reasonable likelihood that unappropriated water is available for the proposed appropriation.

(3) Existing law allows an applicant to appropriate water who has filed a defective application to file an amended and perfected application within 60 days from the date on which the applicant is notified of the defect.

This bill would also allow the applicant to file an amended and perfected application within any additional period of time that the board agrees to. The bill would authorize the board to request additional information with regard to a perfected application to appropriate water for the purpose of clarifying, correcting, or otherwise supplementing the information submitted in connection with the application, as specified. If the applicant does not provide the additional information within the time period allowed, the bill would provide that the application shall be canceled, unless the board allows additional time within which to submit the requested information.

(4) Existing law allows interested persons to file a written protest with regard to an application to appropriate water and requires the protestant to clearly set forth the objections to the application.

This bill would also require the protestant to specifically set forth his or her objections and to state the bases for those objections and would require the protest to be served on the applicant, as prescribed. The bill would authorize the board to request from the protestant additional information to clarify, correct, or otherwise supplement the information required to be submitted in connection with the protest. The bill would require the protestant and the applicant to make a good faith effort to resolve the protest and would authorize the board to request information from the parties to attempt to resolve the protest, as prescribed. The bill would authorize the board to cancel a protest or application for failure to provide information requested by the board, as specified.

(5) Existing law requires the Division of Water Rights to conduct a field investigation and prepare a staff analysis of all minor protested applications to appropriate water. Existing law allows the board to act on a minor application to appropriate water without a hearing unless a hearing is requested, as prescribed.

This bill would delete the requirement relating to the preparation of the staff analysis and require the board to notify the parties of the field investigation not less than 20 days prior to conducting the investigation. The bill would repeal the provisions relating to the holding of a hearing in connection with a minor protested application. The bill would, instead, authorize the Division of Water Rights to request the parties to submit information in support of their positions and to conduct additional proceedings pursuant to a prescribed informal hearing procedure. The bill would authorize the Division of Water Rights to issue a decision with regard to a minor protested application, which would be subject to a specified review procedure, unless the board determines that additional proceedings should be conducted, as prescribed.

(6) Existing law declares that no hearing is necessary to issue a permit in connection with an unprotested application or to reject a defective application after notice, unless the board elects to hold a hearing.

This bill would, instead, declare that no hearing is necessary to issue a permit in connection with an unprotested application, or if the undisputed facts support the issuance of the permit and there is no disputed issue of material fact, unless the board elects to hold a hearing. The bill would declare that no hearing is necessary if the application is defective, the applicant fails to provide requested information, or the facts support the denial of the application and there is no disputed issue of material fact.

(7) Existing law requires the Division of Water Rights to conduct a field investigation and prepare a staff analysis of all minor protested petitions to change the point of diversion, place of use, or purpose of use. Existing law allows the board to act on a minor petition for change without a hearing unless a hearing is requested, as prescribed. Existing law requires a request for a hearing to specify the unresolved issues and requires the board to restrict any hearing to consideration of those issues.

This bill would delete the requirement relating to the preparation of the staff analysis and require the board to notify the parties of the field investigation not less than 20 days prior to conducting the investigation. The bill would repeal the provisions relating to the holding of a hearing in connection with a minor protested petition for change. The bill would, instead, authorize the Division of Water Rights to request the parties to submit information in support of their positions and to conduct additional proceedings pursuant to a prescribed informal hearing procedure. The bill would authorize the Division of

Water Rights to issue a decision with regard to a minor protested petition for change, which would be subject to a specified review procedure, unless the board determines that additional proceedings should be conducted, as prescribed.

(8) Existing law requires each person who diverts water after December 31, 1965, to file with the board a prescribed statement of diversion and use and declares that the statement does not constitute a claim of right to divert or use water, as prescribed.

This bill would delete that declaration. The bill would allow the board to rely on the names and addresses included in the statements submitted under those provisions of existing law for the purpose of determining the names and addresses of persons who are to receive notices with regard to proceedings before the board. The bill would provide that the notices shall not be determined to be inadequate on the basis that notice was not received by a person, other than a party to whom the board's action is directed, who fails to file a required statement pursuant to those provisions. The bill would specify related matters.

Ch. 324 (SB 871) Committee on Public Safety. Crimes.

(1) Existing law provides for crime victims to obtain restitution through compensation from the Restitution Fund.

This bill would correct a cross-reference for purposes of these provisions.

(2) Existing law authorizes (a) a peace officer to arrest a person without a warrant when the person commits an assault or battery on school property during hours when school activities are being conducted, as specified, and (b) a public officer or employee, when authorized by ordinance, to arrest a person without a warrant whenever the officer or employee has reasonable cause to believe that the person to be arrested has committed a misdemeanor in the presence of the officer or employee that is a violation of a statute or ordinance that the officer or employee has the duty to enforce. Existing law also authorizes counties to impose an assessment of \$2 for every \$10, or fraction thereof, of fines, forfeitures, and penalties collected for the unauthorized use of parking spaces designated for disabled persons. Existing law further requires specified persons to report known or suspected instances of child abuse to a child protective agency.

This bill would correct cross-references and make other nonsubstantive, technical changes in these provisions.

(3) Existing law provides for the payment of an administrative fee by a defendant accused of a felony or misdemeanor controlled substance offense at the time of enrollment in a diversion program. Existing law also provides for the payment of a diversion restitution fee by a defendant charged with a felony or misdemeanor whose case is diverted.

This bill would define diversion for the purposes of the above provisions to also mean deferred entry of judgment, as specified.

(4) This bill would provide that the changes in Section 13960 of the Government Code proposed by the bill shall not become operative if AB 535 is enacted and becomes effective on or before January 1, 1998, and also amends Section 13960 of the Government Code.

Ch. 325 (SB 1324) Johannessen. Veterans home: eligibility.

Existing law establishes a Veterans' Home of California at specified sites for aged and disabled veterans who served in the armed forces of the United States during a war period or period of hostility, as defined, or in time of peace in a campaign or expedition for service in which a medal has been authorized by the government of the United States.

This bill would delete the requirement that the services be during a war period or period of hostility, as defined, or in time of peace in a campaign or expedition for service in which a medal has been authorized, and would instead give priority to veterans who served during a time of war over veterans who served during a time of peace.

Ch. 326 (AB 64) Baca. Education technology.

Existing law, the Morgan-Farr-Quackenbush Educational Technology Act of 1992, expresses its primary mission as ensuring that the procurement and use of technology is clearly guided by the needs of pupils. The Morgan-Farr-Quackenbush Educational Technology Act of 1992 is established to accomplish specific purposes, including

providing access to education technology to every learner. The Morgan-Farr-Quackenbush Educational Technology Act of 1992 provides for school-based education technology grants to develop, adopt, or expand existing technological applications to support general education, English acquisition, and non-English-speaking parent education programs pursuant to specified conditions. The Morgan-Farr-Quackenbush Educational Technology Act of 1992 is repealed as of June 30, 1998.

Existing law establishes the Education Technology Grant Program of 1996, to be repealed as specified, for the purposes of awarding technology implementation grants on a 50% matching basis to school districts and county offices of education, as specified, for the wiring of and between classrooms, as specified, and the purchase of hardware and software necessary to utilize telecommunications and information services for instructional purposes.

This bill would establish the Digital High School Education Technology Grant Program of 1997, consisting of one-time installation grants and ongoing technology support and staff training grants, to provide all high school pupils with basic computer skills, to improve pupil achievement in all academic subjects, and to increase collaboration among high schools, private industry, postsecondary education institutions, and community organizations. Matching resources, as specified, would be required to be provided at high schools receiving grants. The Superintendent of Public Instruction would administer the application process, as specified.

This bill would specify the procedure for awarding technology installation grants, for allocating appropriated funds among school districts and county offices of education that operate high schools, and determining the total amount of a technology installation grant. The bill would require that each high school that receives a technology installation grant also receive an annual technology support and staff training grant commencing in the second fiscal year following the year in which it receives the installation grant.

This bill would require specified staff training to include use of computers, networks, software, and other equipment that are part of the installation project and subsequent upgrades and modifications, integration of technology into the curriculum, as well as methods to instruct pupils in the use of computers, networks, software, and other equipment. The bill would require the Superintendent of Public Instruction to annually report to the Governor and the Legislature on the results of the Digital High School Education Technology Grant Program, as specified.

This bill would provide that it would become operative only if AB 1578 of the 1997-98 Regular Session is enacted and becomes effective on or before January 1, 1998.

This bill would declare that it shall take effect immediately as an urgency statute.

Ch. 327 (SB 60) Kopp. Transportation: funding.

(1) Existing law provides alternative procedures for specified highway seismic retrofit work, including an exemption from the California Environmental Quality Act. This exemption is to be repealed on June 30, 2001, or on the date the Director of Finance certifies to the Chair of the Joint Legislative Budget Committee that the proceeds of the Seismic Retrofit Bond Act of 1996 have been fully expended, whichever is sooner.

This bill would extend that repeal date until the date the Director of Transportation certifies to the Secretary of Business, Transportation and Housing that all construction activities for the seismic retrofit of all state-owned toll bridges is complete, or June 30, 2005, whichever occurs first.

(2) Existing law provides that the Department of Transportation shall only use funds in the 1996 Seismic Retrofit Account in the Seismic Retrofit Bond Fund of 1996 for seismic retrofit of state-owned toll bridges and bridges in the second phase of that process and that no other state funds, including toll revenues or funds in the State Highway Account, may be used for those purposes.

This bill would repeal those provisions and require that other additional funds be used for that seismic retrofit, as prescribed.

(3) Existing law requires the Department of Transportation to maintain the San Francisco-Oakland Bay Bridge as a primary state highway and to cause the bridge to comply at all times with all lawful orders of any governmental agency or authority having jurisdiction thereof.

This bill would prohibit local and state permitting authorities from imposing any requirement that a bicycle, pedestrian, or mass transit facility be constructed on the bridge as a condition for issuing any permit, granting any easement, or granting any other form of approval needed, for the construction of a new bridge.

(4) Existing law authorizes the San Diego Association of Governments to impose a toll on vehicles crossing the San Diego-Coronado Bridge, with a requirement that the revenues generated thereby be used for specified purposes, including the payment of maintenance costs.

This bill would require the association to deposit \$33,000,000 in the Toll Bridge Seismic Retrofit Account, as described under (5), and to submit to the Legislature and the department a prescribed financial plan on or before January 1, 1998, thereby imposing a state-mandated local program. The bill would require the maintenance of the bridge to be funded by the state pursuant to a specified provision of law.

(5) Existing law requires the Department of Transportation to collect tolls on state-owned toll bridges.

This bill would, until a specified date, impose a seismic retrofit surcharge equal to \$1 per vehicle for passage on the state-owned toll bridges in the region within the area of the jurisdiction of the Metropolitan Transportation Commission, except for vehicles that are authorized toll-free passage on those bridges.

The bill would require that revenue generated from the surcharge be deposited in the Toll Bridge Seismic Retrofit Account, which the bill would create in the State Transportation Fund, and which would be continuously appropriated without regard to fiscal years to the Department of Transportation for the purpose of funding seismic retrofit of currently listed bridges. The bill would thereby make an appropriation.

The bill would authorize the department to transfer or loan, or both, funds between the account and the State Highway Account for cash-flow purposes to accomplish individual toll bridge seismic retrofit requirements.

The bill would require the department to determine the date when (a) sufficient funds have been generated for the completion of seismic retrofit and the replacement of the San Francisco-Oakland Bay Bridge, as specified, and (b) sufficient funds have been generated to pay for any costs added under a specified provision relating to the San Francisco-Oakland Bay Bridge. The bill would require the department to notify the Secretary of State of that date, immediately upon making that determination.

(6) The bill would appropriate \$200,000,000 from the State Highway Account in the State Transportation Fund to the Department of Transportation for the purposes of a prescribed state-local partnership program for expenditure in the 1998-99 fiscal year, of which amount \$250,000 would be required to be allocated to counties, as prescribed.

(7) The bill would set forth specific legislative findings and declarations.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 328 (SB 226) Kopp. Transportation: funding.

(1) Existing law specifies the disposition of revenues derived from increasing to \$1 the tolls on bridges within the jurisdiction of the Metropolitan Transportation Commission and, with regard to those bridges, specifies the duties and responsibilities of the commission as well as the duties and responsibilities of the California Transportation Commission.

This bill would transfer certain duties currently imposed on the California Transportation Commission as to the above-described bridges to the Bay Area Toll Authority which is created by the bill and is the same entity as the Metropolitan Transportation Committee, as described, except as expressly provided, thereby imposing a state-mandated local program. The bill would provide that toll revenues, and other income, except seismic retrofit surcharges, shall be deposited in the Bay Area Toll

Account, which the bill would create, and would provide for the transfer of moneys to that account, as specified. The bill would make related changes.

The bill would authorize the authority to issue toll bridge revenue bonds, as specified.

(2) Existing law authorizes the Metropolitan Transportation Commission to allocate up to 3% of the revenues derived from prescribed toll increases on all bridges within their jurisdiction for prescribed transportation projects.

This bill would require that an additional 2% of those toll revenues be allocated by the commission for the planning, construction, operation, and acquisition of rapid water transit systems.

(3) The bill would make certain changes in provisions proposed by SB 60 as to financing seismic retrofit of state-owned bridges.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 329 (AB 440) Prenter. Dairy products.

(1) Existing law regulates the content and standards for various dairy products, including the amount of milk solids not fat and milk fat that these products may contain.

This bill would revise the standards for all of the following products: skim milk, nonfat milk, cultured milks, flavored milk products, flavored high nutrient lowfat milk, yogurt, acidified milk products, kefir, fromage frais, and UHT milk and flavored milk products.

The bill would eliminate the use of the designation "1% lowfat milk" and would also provide for the use of the phrases "fat-free milk," "light milk," and "reduced-fat milk." The bill would change the labeling requirements of various dairy products. The bill would also require evaporated or condensed lowfat milk to be referred to as "reduced-fat" evaporated or condensed milk. Since under existing law, a violation of these provisions would be a crime, this bill would impose a state-mandated local program.

The bill would repeal the provisions setting forth the standards for sour half and half and sour half and half dressing.

(2) Existing law provides that dairy products may not be sold as organic unless they are produced, distributed, and processed without a prohibited material, as defined, having been applied or administered.

This bill would permit an exception to the foregoing for the first 10 months of the year preceding taking milk, during which period 80% of the feed administered to dairy livestock would be required to consist of materials in compliance with regulations adopted by the Secretary of Food and Agriculture.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 330 (AB 770) Margett. Surface impoundments: exemption.

Existing law provides for the granting by a California regional water quality control board of an exemption from the prohibition against discharging any restricted hazardous waste into surface impoundments, if the exempted surface impoundments are used for the temporary storage and treatment of boiler cleaning wastes at fossil-fueled powerplants owned or operated by a public utility, as specified.

This bill would, under specified conditions, provide for the transfer of such an exemption to a subsequent owner, regardless of whether the subsequent owner is a public utility or sells the electricity generated to the public, in accordance with prescribed procedures and requirements.

Ch. 331 (SB 389) Monteith. Official State Soil.

This bill would express legislative intent to commemorate the completion of the state's most comprehensive soil inventory, as conducted by specified entities, by designating an official State Soil. The bill would designate San Joaquin Soil as the official State Soil, and would make legislative findings and declarations in support of that designation.

Ch. 332 (AB 523) Lempert. Physicians and surgeons: special faculty permits.

Existing law provides for the licensure and regulation of physicians and surgeons by the Medical Board of California, and prohibits the practice of medicine, as defined, without a license issued by the board. Existing law authorizes the Division of Licensing of the board to grant a certificate of registration to engage, to a limited extent, in the practice of medicine to a person who does not immediately qualify for a physician's and surgeon's certificate, who is offered a full-time faculty position in an approved medical school, and who meets other requirements. Existing law restricts the certificate holder to practicing medicine only to the extent the practice is incident to and a necessary part of his or her duties in connection with the faculty position.

This bill would authorize any person who meets certain eligibility requirements to apply for a special faculty permit that would authorize the holder to practice medicine, without a physician's and surgeon's license issued by the board, within the medical school itself and certain affiliated institutions. It would authorize the permit holder, after the first renewal of the permit, to hold a part-time faculty position that otherwise meets the requirements that would be imposed by the bill. The bill would also establish procedures for application for, and renewal of, the permit, and the grounds for denial or discipline. The bill would also require fees to be imposed for permit holders and would provide for the deposit of those fees in the Contingent Fund of the Medical Board of California. This bill would also require the board to report to the Legislature on the implementation and status of the special faculty permit program.

By increasing the source of money to be deposited to a continuously appropriated fund, this bill would make an appropriation.

Ch. 333 (SB 245) Haynes. Insurance: aircraft: skydiving.

The Uniform Aircraft Financial Responsibility Act requires an operator of an aircraft involved in an accident to file a report with the Department of Transportation, as specified, and to comply with certain financial responsibility requirements. Existing law provides that an aircraft insurance policy or bond is not effective unless it meets certain requirements, but provides that a policy or bond need not cover a guest or any other person riding in or upon an aircraft without giving compensation, among other exclusions.

This bill would additionally provide that an aircraft insurance policy or bond need not cover any liability for bodily injury or death of any occupant riding in or upon an aircraft or exiting an aircraft for purposes of skydiving or sport parachuting when that occupant's injury or death is solely related to hazardous risks associated with skydiving or sport parachuting activities. However, it would require that a notice be provided, as specified, to any person who is not covered under a liability insurance policy in connection with skydiving or sport parachuting activities disclosing the fact of such noncoverage.

This bill would also require any person who causes damage to an aircraft that may reasonably be expected to affect the airworthiness of the aircraft to notify the owner or person in charge of the aircraft, as specified. A violation of this provision would be a misdemeanor.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 334 (SB 299) Mountjoy. Contractors.

(1) Existing law requires an applicant for a contractor's license to show that there has never been a refusal of licensure or a revocation for reasons that would preclude the granting of the license for which an application was made.

This bill would provide that where the Contractors' State License Board has denied an application it shall inform the applicant of the earliest date upon which he or she may reapply for licensure, which shall be one year from a specified date, unless the board prescribes an earlier date, as specified.

(2) Existing law requires the Registrar of Contractors upon the finding that any licensed or registered contractor has willfully and deliberately violated any state or local law relating to the issuance of building permits, as specified, to suspend or revoke licensure.

This bill would instead require the registrar to take disciplinary action against the contractor's license.

Ch. 335 (SB 335) Johannessen. Veterans: health care.

Existing law provides for the establishment and operation of the Veterans' Home of California, under the management and control of the Department of Veterans Affairs, at various sites for aged and disabled veterans who served in the armed forces of the United States during a war period or a period of hostility, as defined by law, or in time of peace in a campaign or expedition for services in which a medal has been authorized by the government of the United States.

This bill would require the department to conduct a prescribed study to determine the health care needs and the associated costs of providing appropriate care to meet the identified health care needs of current and future members of the Veterans' Home of California who are suffering from Alzheimer's disease and other dementia diseases. The bill would require the department to submit the study to the Legislature on or before July 1, 1998.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 336 (SB 578) Rosenthal. Health care coverage.

Existing law provides for the licensure and regulation of health care service plans by the Department of Corporations, and provides that a willful violation of these provisions is subject to criminal sanction. Existing law also provides for the licensure and regulation of disability insurers by the Department of Insurance. Existing law defines a late enrollee of a plan contract or insurance policy and provides exceptions to this definition for employees or dependents who meet certain prescribed criteria.

This bill would provide additional exceptions to the definition of a late enrollee.

Existing law prohibits preexisting conditions of a plan contract or insurance policy from excluding coverage for more than 6 months following the effective date of coverage, and establishes procedures regarding the determination of whether a preexisting condition provision or a waiting period applies to an individual.

This bill would revise certain of the terms for determining the application of a preexisting condition, or waiting period or affiliation period, as defined, including requiring a plan or insurer to credit, for purposes of a preexisting condition or waiting or affiliation period, any time an eligible employee is required to wait before enrolling in the plan, including any affiliation, or employer-imposed, waiting period. The bill would prohibit the imposition of a preexisting condition exclusion on certain persons.

Existing law requires health care service plan contracts and certain disability insurance policies offered to a small employer to be renewable, except if certain conditions are met.

This bill would revise those conditions. In addition, the bill would make similar provisions applicable to all group and individual health care service plans and certain disability insurers.

Existing law authorizes plans and insurers to enter into contractual agreements with qualified associations, as defined, under which the qualified associations may assume responsibility for performing specific administrative services for their members pursuant to specified requirements. Existing law defines a qualified association as a nonprofit corporation that conforms to certain prescribed requirements.

This bill would revise these requirements for a qualified association.

Existing law requires a multiple employer welfare arrangement to offer health care coverage benefits to any new eligible person and his or her dependents pursuant to certain prescribed requirements.

The bill would prohibit a health care service plan and disability insurer from excluding otherwise eligible employees or dependents based on certain health status-related factors, with certain exceptions, and would also apply this prohibition to a multiple employer welfare arrangement. The bill would require the employer welfare arrangement to, in addition, comply with certain requirements regarding exclusions for preexisting conditions and late enrollees.

Existing law requires health care service plans and certain disability insurers to credit qualifying prior coverage, as defined, in determining whether an exclusion of benefits for a preexisting condition may be applied to an open enrollment period for Medicare supplement coverage.

This bill would instead require those health care service plans and disability insurers to credit creditable coverage, as defined.

Existing law prohibits blocks of business sold to employer groups with fewer than 3 eligible employees from being closed unless certain conditions are met.

This bill would instead make that provision applicable to employer groups with fewer than 2 eligible employees.

Since a violation of the provisions governing health care service plans is subject to criminal sanction, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 337 (SB 602) Alpert. Personal income taxes: contributions: California Breast Cancer Research Fund.

The Personal Income Tax Law allows taxpayers, until January 1, 1998, to designate on their tax returns that a specified amount in excess of their tax liability be contributed to the California Breast Cancer Research Fund. Existing law requires money in that fund, upon appropriation by the Legislature, to be allocated to the State Department of Health Services to make contracts or grants to conduct research relating to the prevention, cure, screening, and treatment of breast cancer. Existing law also requires the department to allocate a specified amount of money each year to promote the fund.

This bill would instead provide that money in that fund shall, upon appropriation by the Legislature, be allocated to the University of California for the support of the Breast Cancer Research Program for the purposes of that program that are related solely to breast cancer research. The bill would also remove the requirement that the department allocate a specified amount of money to promote the fund. This bill would extend the operation of those provisions to January 1, 2003.

Existing law also provides that if the specified repeal date of this contribution program is deleted, in any calendar year the Franchise Tax Board estimates that the contributions made in the calendar year are less than \$250,000, adjusted for inflation as specified, the contribution program is repealed.

This bill would delete the requirement that the repeal date be deleted before the \$250,000 test is applicable, thus providing that the program could be deleted in any taxable year if less than that amount of contributions is received under the program. The bill would also revise the inflation factor adjustment, thus deleting accrued inflation adjustments and requiring that the \$250,000 amount be adjusted beginning in 1998.

This bill would also state the Legislature's intent to encourage persons who prepare state income tax returns, as specified, to inform their clients in writing, prior to the completion of any return, that they may make a voluntary contribution to certain funds or programs, as provided on the state income tax return if they choose.

Ch. 338 (SB 959) Kopp. Emergency services.

This bill would appropriate \$20,358,000 for support of the Disaster Assistance Branch of the Office of Emergency Services from January 1, 1998, to June 30, 1998, inclusive, from various sources, to enable the office to comply with legislative intent that the office rely

on interagency agreements with one or more state agencies to provide the work force necessary for claims processing. As a condition to receipt of the funds, the Governor would be required to provide a plan to the Legislature to limit the role of the office with respect to disaster claims processing to the absolute minimum number of staff required.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 339 (SB 1057) Mountjoy. Recreational vehicles: dealers.

(1) Existing law requires a dealer, prior to being issued a temporary branch license for selling new recreational vehicles, as defined, at a show, to submit to the department a manufacturer's written authorization specifying certain information. If 9 or fewer dealers are participating in the show, existing law limits the issuance of the temporary license to a dealer whose established place of business or permanent branch office is located 50 miles or less from the show and certain restrictions apply.

This bill would require the issuance of a temporary branch license to a dealer participating in an annual show sponsored by a national trade association of recreational vehicle manufacturers without subjecting the issuance to the conditions described above or to the restrictions regarding 9 or fewer participating dealers, as described above, if specified requirements are met.

Because a violation of these provisions would be a crime under current law, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 340 (SB 1095) Lockyer. Pupils: High-Risk Youth Education and Public Safety Program.

(1) Existing law provides for various experimental school programs, including, among others, individualized instruction based upon performance criteria, alternative schools, demonstration programs in intensive instruction, and gang risk intervention. Existing law authorizes the establishment of opportunity schools for pupils who are, or are in danger of becoming, insubordinate or disorderly during their attendance upon instruction. Existing law authorizes a county board of education to enroll in community schools pupils who are expelled, referred by a school district as a result of the recommendation by a school attendance review board, or probation referred or on probation or parole, and not in attendance at any school, among others who may be enrolled in those schools.

Existing law requires a county board of education to provide, as specified, for the administration and operation of juvenile court schools, as defined. Existing law authorizes the governing board of a school district to establish one or more community day schools for pupils who are expelled, referred by a school district as a result of the recommendation by a school attendance review board, or probation referred.

This bill would establish the High-Risk Youth Education and Public Safety Program. The program would assist county offices of education and school districts to implement prevention and early intervention strategies for youth who are seriously at risk of becoming chronic, repeat offenders. The program established by the bill would include a specified component for high-risk first-time offenders and a specified component for pupils transitioning high-risk youth. The bill would require the Superintendent of Public Instruction to make specified apportionments to participating county superintendents of schools for the purposes of the program, as specified, provided that funds are appropriated therefor in the annual Budget Act or in other legislation, or both. By requiring each school district and county superintendent of schools to notify the Superintendent of Public Instruction by July 1 of each calendar year as to whether that school district or county office of education would participate in the program established by the bill, the bill would impose a state-mandated local program.

(2) This bill would reappropriate \$350,000 to the State Department of Education from a specified item of the Budget Act of 1997 for the purpose of administering the High-Risk

Youth Education and Public Safety Program and would specify that no more than \$200,000 of that amount would be available for contracting with an independent evaluator to assess the overall success of the program, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

(4) This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 341 (SB 388) Karnette. Juvenile offenders: confidentiality.

Existing law authorizes a law enforcement agency to release the name of, and any descriptive information about, a minor who has escaped from a secure detention facility, if a law enforcement agency finds that release of the information would be necessary to assist in capturing the minor or to protect the public from substantial harm.

This bill, until January 1, 2000, would additionally authorize a law enforcement agency to release the name of, and any descriptive information about, a minor, 14 years of age or older, and the offenses allegedly committed by that minor, if there is an outstanding warrant for the arrest of that minor for the commission of murder, as specified.

This bill would only become operative if both this bill and SB 1058 are enacted and become effective on or before January 1, 1998.

Ch. 342 (SB 465) Rainey. Community colleges.

(1) Existing law authorizes a community college to build campus facilities on school, local government, or other public property not owned by the community college, if the community college obtains permission from the owner of the public property.

This bill, in addition, would authorize a community college to develop a public-private partnership for the purpose of establishing education buildings or education centers. The bill also would (a) authorize the facilities to be constructed on a site donated through the public-private partnership agreement between the community college and the private sector, and (b) specify that the construction of any education building or education center is subject to approval by the Board of Governors of the California Community Colleges if the education building or education center is eligible for state funding for construction, equipment, or ongoing maintenance.

The bill would prohibit community colleges from being eligible to receive state funds for off-campus centers unless recommended by the California Postsecondary Education Commission pursuant to specified provisions of existing law.

The bill also would provide that, if a community college requests state funding for a facility constructed through a public-private partnership, funding for that facility shall not supersede community college facilities that have been previously prioritized by the board of governors and are awaiting state funding. The bill also would authorize a community college to request state funding for instructional equipment for an education building or education center that is constructed through a public-private partnership or that is acquired without state funding, and would specify that funding for that equipment shall be provided in the same manner as for other community college facilities, provided that the construction or acquisition of the facility otherwise would have qualified as a priority project for state funding.

(2) Existing law authorizes the Department of Finance and the State Public Works Board to approve obligations incurred by state agencies that are to be met during the fiscal year following the year of a project completion, for the purchase of equipment related to capital outlay projects for which the Legislature has appropriated construction funds.

This bill, in addition, would authorize these agencies to approve obligations incurred by community college districts that are met during the fiscal year following the year of any project completion, for the purchase of equipment related to that project regardless

of whether the project was built or purchased with funds appropriated by the Legislature.

(3) The bill would require the board of governors to adopt regulations to implement the changes made by this bill.

Ch. 343 (SB 626) Karnette. Vehicles: parking: local authorities.

Existing law authorizes local authorities to prohibit or restrict the stopping, parking, or standing of vehicles on certain streets or highways, or portions thereof, during all or certain hours of the day. A local authority may also designate certain streets upon which preferential parking privileges are given to residents and merchants adjacent to the streets for their use and the use of their guests, under which the residents and merchants may be issued a permit or permits to exempt them from the specified prohibition or restriction.

This bill would authorize local authorities to authorize preferential parking permits for members of organizations, professions, or other designated groups to park on specified streets if the local authority determines that the use of the permits will not adversely affect parking conditions for residents and merchants in the area.

Ch. 344 (SB 674) M. Thompson. Teacher credentialing: emergency credentials.

Existing law requires the Commission on Teacher Credentialing to establish procedures for the initial issuance and renewal of teacher credentials and permits, including, among others, emergency permits. Under existing law, an emergency permit is valid for one year or as the commission determines.

This bill would provide for the issuance and reissuance of emergency permits. The bill would provide that on or after January 1, 1998, an emergency permit issued prior to January 1, 1998, may be reissued for additional one-year periods, as the commission may determine, not to exceed a total of 5 one-year reissue periods. The bill would provide that an emergency permit issued on or after January 1, 1998, may be reissued, as the commission may determine, for additional one-year periods, not to exceed a total of 4 one-year reissue periods.

Ch. 345 (SB 952) Johnson. Workers' compensation: apprenticeship programs.

Existing law provides that any school district, county superintendent of schools, or school administered by the State Department of Education, that provides training to pupils through work experience education, cooperative vocational education, or community classrooms, as those terms are defined by regulations, is considered to be an employer for the purpose of provisions of law governing workers' compensation, as specified.

This bill would extend these provisions to apprenticeship programs registered by the Division of Apprenticeship Standards of the Department of Industrial Relations, relative to registered student apprentices, as defined. The bill would also make technical, nonsubstantive changes to these provisions.

Ch. 346 (SB 1063) Peace. Workers' compensation.

(1) Existing law provides that medical services for workers' compensation may be provided by various organizations, including a workers' compensation health care provider organization, and provides for the authorization and regulation of those organizations by the Commissioner of Corporations.

This bill would repeal the provisions providing for workers' compensation health care provider organizations authorized by the Commissioner of Corporations, and would instead provide for the authorization of workers' compensation health care organizations by the Administrative Director of the Division of Workers' Compensation.

The bill would make related changes.

(2) Existing law requires a workers' compensation claim form to contain certain information including a statement that it is a felony to make or cause the making of any false or fraudulent material statement or representation for the purpose of obtaining or denying workers' compensation benefits or payments.

This bill would permit, but not require, the statements required to be printed or displayed by an insurer relating to false or fraudulent claims under a contract of insurance to appear on the workers' compensation claim form.

Ch. 347 (AB 356) Figueroa. Court orders.

(1) Existing law provides for restraining orders and protective orders, as specified.

This bill would revise the requirements for service of those orders in family law matters, specify the immunity of peace officers from civil liability for arrest in the enforcement of those orders, as specified, specify the priority for the enforcement of multiple orders, and require the Judicial Council, on or before January 1, 1999, to establish uniform forms for specified restraining or protective orders, emergency protective orders, and a standardized custody and visitation attachment for use with these forms, to be used by all trial courts. The bill would impose a state-mandated local program by requiring new duties of local officials.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 348 (AB 622) Miller. Juveniles: arrests.

Existing law specifies the procedures by which a person arrested for a misdemeanor or infraction who does not demand to be taken before a magistrate may be released and given a written notice to appear in court. If the person appears to be under the age of 18 years, and the arrest is for a violation of specified offenses, the notice shall provide instead that the person shall appear before the juvenile court, a juvenile court referee, or a juvenile traffic hearing officer.

This bill would specify that these procedures do not apply to an arrest for an offense involving a firearm.

The bill also would provide that in counties where an Expedited Youth Accountability Program is operative, a peace officer may issue a citation and written promise to appear in juvenile court or record the minor's refusal to sign the promise to appear and serve notice to appear in juvenile court. The bill would provide that this provision shall become operative only if AB 1105 is enacted and becomes effective on or before January 1, 1998.

Ch. 349 (SB 106) Kelley. County water authorities.

The County Water Authority Act authorizes an authority formed pursuant to that act to invest any surplus money in the authority treasury that is not required for the immediate necessities of the authority in specified financial instruments, as prescribed. The act requires the controller and treasurer of the authority to jointly perform the investment of surplus, with the approval of the authority attorney.

This bill would, instead, authorize an authority to invest that surplus money in the treasury pursuant to specified law governing the investment of surplus by local agencies. The bill would require only the treasurer to perform that investment and delete the requirement for attorney approval.

Ch. 350 (SB 380) Peace. Insurance.

Existing law imposes continuing education requirements on insurance agents and brokers.

This bill would exempt a licensee from that requirement if he or she submits proof satisfactory to the commissioner that he or she has been a licensee in good standing for 30 continuous years in this state and is 70 years of age or older.

Existing law requires certain insurers to annually report specified information to the Insurance Commissioner on a calendar year basis. Under existing law, the required information includes the number of policies written, the direct premiums written, the direct premiums earned, the direct losses paid, the direct losses incurred, the direct losses

unpaid, the number of outstanding claims at yearend, the number of claims paid in the preceding year, the allocated loss adjustment expense, and the percentage of allocated loss adjustment expense attributable to defense attorney expenses.

This bill, instead of requiring the report to include the information specified above, would require the report to include information specified by the commissioner that is collected by a licensed advisory organization. The bill would delete the requirement that the report be on a calendar year basis.

This bill would provide that an insurer may fulfill its obligation to file or submit the experience, data, statistics, or other information listed in or designated under the above provisions by reporting its records to a licensed advisory organization that maintains the insurer's records and those of other insurers, makes the insurer's records available for examination and inspection by the commissioner or reports the records of an insurer to the department upon a specific request of the commissioner, and reports the aggregate records of insurers to the department according to reasonable schedules approved by the commissioner. It would provide that the reports of aggregate records shall not disclose the information of any individual insured, insurer, or insurer group.

Ch. 351 (SB 435) McPherson. Interior designers: sunset.

Existing law defines certified interior designers and interior design organizations, and permits a certified interior designer to obtain and use a stamp identifying the designer. All documents submitted to any government regulatory agency by a certified interior designer must be affixed by the stamp. Certified interior designers are prohibited from designating themselves as "state certified." All provisions governing certified interior designers are subject to review by the Joint Legislative Sunset Review Committee, and will become inoperative on July 1, 1997, and be repealed on January 1, 1998.

This bill would delete the inoperative date and extend the repeal date to January 1, 1999.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 352 (SB 496) Maddy. Wages: form of payment.

Existing law prohibits the payment of wages by use of various instruments unless they are negotiable and payable in cash, on demand, without discount, at an established place of business in the state. Existing law requires that the name and address of that business must appear on the instrument. Under existing law, violation of this provision is a misdemeanor.

This bill would instead provide that, if the drawee is a bank, the address of the drawee may be omitted if the instrument is payable as specified, at any place of business of the drawee chosen by the person entitled to enforce the instrument. By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 353 (SB 594) C. Wright. Property taxation: transfer of base year value: disaster relief.

Existing provisions of the California Constitution authorize the property tax base year value of real property that is substantially damaged or destroyed by a disaster, as declared by the Governor, to be transferred to a comparable property located within the same county that is acquired or newly constructed within 3 years after the disaster as a replacement property.

This bill would revise these provisions to allow a comparable replacement property to be acquired or newly constructed within 5 years after the Northridge earthquake. This bill would impose a state-mandated local program by imposing additional duties on a county assessor with respect to the transfer of the property tax base year value of damaged or destroyed properties.

This bill would make legislative findings as to the necessity for a special statute.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 354 (SB 631) Burton. Crimes: illegal slugs and tokens.

Existing law prohibits possession for any illegal purpose or making, selling, issuing, or putting in circulation any slug or token of specified sizes and shapes within .06 of an inch of any United States coin.

This bill instead would provide that this prohibition applies to any slug or token that does not conform to specified limitations on size, shape, weight, construction, and use. Because this bill would increase the number of coins that are subject to this prohibition, it would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 355 (SB 688) Ayala. Electronic surveillance.

(1) Existing law allows a judge, upon application, to authorize interception of wire, electronic digital pager, or electronic cellular telephone communications, if he or she determines, among other things, that probable cause exists to believe that an individual is committing, has committed, or is about to commit specified crimes. A violation of these provisions is a misdemeanor or a felony. These provisions regulating the interception of wire, electronic digital pager, or electronic cellular telephone communications are scheduled to be repealed on January 1, 1998, and the provisions regulating the interception of wire communications only are scheduled to be repealed on January 1, 1999.

This bill would repeal the provisions regulating the interception of wire communications only and would extend until January 1, 2003, the operation of provisions regulating the interception of wire, electronic digital pager, or electronic cellular telephone communications. By extending the time of operation of crimes related to the interception of wire, electronic digital pager, or electronic cellular telephone communications, this bill would impose a state-mandated local program.

(2) Existing law refers to "peace officer" throughout the provisions authorizing the interception of wire, electronic digital pager, or electronic cellular telephone communications.

This bill would refer instead to "peace officer or federal law enforcement officer."

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 356 (SB 690) Polanco. Vehicles: Department of Motor Vehicles: New Motor Vehicle Board.

Existing law creates within the Department of Motor Vehicles a New Motor Vehicle Board, which adjudicates disputes between new motor vehicle franchisees and their respective franchisors and hears appeals on decisions of the department affecting new motor vehicle dealers. The board also mediates disputes between consumers of new motor vehicles and the vehicle dealers, distributors, and manufacturers.

This bill would revise procedures applicable to the board's proceedings.

Ch. 357 (SB 805) Alpert. Alcoholic beverages: sales to minors.

(1) The Alcoholic Beverage Control Act prohibits the sale of alcoholic beverages to, or the purchase of alcoholic beverages by, persons under the age of 21 years. Existing law provides that any person who violates those provisions shall be punished by a fine of not less than \$250, or not less than 24 hours or more than 32 hours of community service, or a combination thereof as determined by the court.

This bill would change that fine to \$250. This bill also would, in the case of a person who furnishes or causes an alcoholic beverage to be furnished to a minor, increase those penalties to a fine of \$1,000 and not less than 24 hours of community service. This bill would impose a state-mandated local program by changing the penalty for a crime.

(2) The Alcoholic Beverage Control Act prohibits a clerk from making an off sale of alcoholic beverages unless the clerk executes, under penalty of perjury, on the first day he or she makes that sale, an application and acknowledgment, on a form prepared by the department, that includes at a minimum a summary of certain requirements and prohibitions in the act, as specified. Existing law also requires an off-sale licensee to post a notice relating to prohibited sales to persons under the age of 21 years, as specified.

This bill would require a retail licensee to post a notice that contains and describes the fines and penalties for the sale of alcoholic beverages to, or the purchase of alcoholic beverages by, persons under the age of 21 years. Since a violation of this provision would constitute a crime, the bill would impose a state-mandated local program by creating a new crime.

This bill would also authorize the Department of Alcoholic Beverage Control to adopt rules and appropriate fees for licensees that it determines necessary for the administration of those provisions.

This bill would repeal a substantially duplicative provision.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 358 (SB 839) Karnette. Vehicles: weight limits: local exception.

Existing law authorizes the Department of Transportation, upon adoption of an appropriate ordinance or resolution by both the City of Long Beach and the City of Los Angeles, to issue a special permit to the operator of a vehicle that exceeds the maximum gross weight limits, as specified, permitting the operation and movement of the vehicle and its load on prescribed state highways, if the vehicle meets specified criteria. This authorization is to remain in effect only until January 1, 1998, on which date it is to be repealed.

This bill would extend the January 1, 1998, repeal date until January 1, 2003.

Ch. 359 (AB 103) Figueroa. Physicians and surgeons: professional reporting.

(1) Existing law requires every insurer providing professional liability insurance to a physician and surgeon to report to his or her licensing board a claim or action, and any judgment of a claim, for damages for death or personal injury caused by the physician and surgeon's negligence, error, or omission in practice, or rendering of unauthorized professional services as to any settlement or arbitration award over \$30,000. Existing law also requires every physician and surgeon who does not possess professional liability insurance and, in certain circumstances, claimants who receive the settlement or arbitration award, to similarly report to the appropriate licensing board a claim or action for the above-described damages and failure to so report is subject to criminal sanction.

This bill would delete the requirement that the arbitration award be over \$30,000, thereby requiring that the claim or action for damages, and any judgment of a claim for damages with regard to arbitration awards of any amount be reported. By changing the definition of a crime, this bill would impose a state-mandated local program.

(2) Existing law requires the clerk of the court that renders a judgment for damages in an amount in excess of \$30,000 for any death or personal injury caused by the negligence, error or omission in practice, or rendering of unauthorized professional services of certain licensed health professionals, including physicians and surgeons, to

report that judgment, within 10 days after the judgment, to the agency that issued the license, certificate, or other similar authority.

This bill would, instead, authorize the clerk of the court to report those judgments for damages of any amount with regard to a physician and surgeon. By changing the definition of a crime, this bill would impose a state-mandated local program.

(3) Existing law requires the Medical Board of California and the California Board of Podiatric Medicine to disclose to inquiring members of the public information received from the court clerk pursuant to (2) above regarding felony convictions of, and judgments in excess of \$30,000 against, a physician and surgeon or doctor of podiatric medicine.

This bill would delete the restriction to judgments in excess of \$30,000, thereby authorizing disclosure under this provision of information received from the court pursuant to (2) above regarding any judgment.

(4) Existing law requires the Medical Board of California and the Board of Podiatric Medicine to disclose to an inquiring member of the public certain information regarding the status of the license of a licensee and any enforcement actions taken against a licensee by either board or by another state or jurisdiction.

This bill would require the Medical Board of California to additionally disclose under this provision any malpractice judgments, arbitration awards, and summaries of hospital disciplinary actions that result in the termination or revocation of a licensee's staff privileges for a medical disciplinary cause or reason.

(5) Existing law requires any employer who pays or has entered against that employer, a judgment, settlement agreement, or arbitration award over \$30,000 against a physician and surgeon or doctor of podiatric medicine to report that occurrence to the appropriate board.

This bill would delete the requirement that the judgment or arbitration award be over \$30,000, thereby requiring that all of such judgments or arbitration awards be reported.

(6) Existing law requires the chief of staff of a medical or professional staff or other chief executive officer, medical director, or administrator of any peer review body and the chief executive officer or administrator of any licensed health care facility or clinic to file a report with the relevant agency whenever certain actions are taken as a result of a determination of a peer review body. Existing law provides that the information reported or disclosed pursuant to this provision shall be kept confidential, with some exceptions.

This bill would except, from those confidentiality provisions, information disclosed to the public pursuant to this bill.

This bill also would require the Medical Board of California to post on the Internet certain information regarding licensed physicians and surgeons, and to provide links to other web sites on the Internet that provide information on certain board certifications. This bill would also authorize the board to provide links to other Internet websites relating to health care service plans, health insurers, hospitals, or other facilities, and on the affiliations of licensed physicians and surgeons.

(7) Existing law, the Medical Practice Act, establishes the Medical Board of California and vests within the board jurisdiction over administration of laws relating to the practice of medicine. Existing law provides that all moneys paid to and received by the Medical Board of California shall be credited to the Contingent Fund of the Medical Board of California, a continuously appropriated fund. The contingent fund is for the use of the board to pay all salaries and other expenses necessarily incurred in carrying into effect the Medical Practice Act.

This bill would authorize the Medical Board of California to expend \$21,000 from the Contingent Fund of the Medical Board of California during the 1997-98 fiscal year for purposes of this bill, thereby making an appropriation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 360 (AB 170) Papan. Claims against the state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that a state agency that fails to make any payment for goods and services to certain entities pursuant to a contract shall be subject to an interest penalty fee, according to specified criteria.

This bill would specify that these provisions may not be waived, altered, or limited by the state agency with respect to a contract entered into on or after January 1, 1998, or the person or business contracting on or after that date with the state agency. This bill would provide that these provisions are not to be construed to require a person or business contracting with a state agency to have to submit a claim or invoice for payment of an interest penalty fee.

This bill would require that in order to avoid late payment penalties state agencies shall pay promptly submitted, undisputed invoices within 45 days and would specify procedures and exclusions relating to that requirement. The provisions described in this paragraph would become operative only if SB 1132 of the 1997-98 Regular Session is enacted.

Ch. 361 (AB 256) Cunneen. Hazardous waste code system.

(1) Existing law requires any person generating hazardous waste that is transported, or submitted for transportation, for offsite handling, treatment, storage, disposal, or any combination thereof, to complete a manifest prior to the time that the waste is transported or offered for transportation. The Department of Toxic Substances Control is required to determine the form and the manner in which the manifest is completed and the information required to be contained in the manifest. A violation of the regulations adopted pursuant to the hazardous waste control laws is a crime.

This bill would make a statement of legislative intent concerning the existing system for tracking the shipment of manifested hazardous waste and would require the department, by December 31, 1998, to revise the hazardous waste code identification system established in specified regulations so as to meet specified requirements. The bill would require the system to be proposed and adopted by the department in accordance with specific procedures and requirements. Since a violation of the regulations would be a crime, the bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 362 (AB 300) Escutia. Child care and development facilities.

(1) Existing law provides funding for child care and development facilities, and authorizes the State Allocation Board to administer these funds. Existing law establishes a priority in funding of capital outlay grants or relocatables for child care and development facilities from specified funds.

This bill would repeal the existing specified priorities and require the State Allocation Board to give first priority to programs experiencing emergencies as defined by the Superintendent of Public Instruction and the State Allocation Board. Second priority would be given applicants and contracting agencies for the replacement of facilities lost due to the Class Size Reduction Program. Third priority would be given to applicants for the expansion of child care services.

(2) Existing law creates the State Child Care Facilities Fund for purposes of funding capital outlay projects for extended day care services.

Existing law authorizes the State Allocation Board to reimburse any public, nonprofit joint powers agency, as specified, for the installation of initial utility services in any relocatable child care and development facility, as specified, and to establish regulations for allocation of funds for capital outlay and for reimbursement of initial utility installation costs, as specified.

Existing law requires a priority in funding capital outlay grants or relocatables from specified funds allocated but unencumbered to applicants or contracting agencies providing, or seeking to provide, extended child care facilities in, or in close proximity to, public housing projects, or in areas of high density of recipients of benefits under the

Aid to Families with Dependent Children program to serve participants under the Greater Avenues for Independence Act of 1985, as specified.

This bill would repeal these provisions, except for the allocation, pursuant to the Public Education Facilities Bond Act of 1996, of bond funds for the acquisition of relocatable child care and development facilities for the purposes of providing extended day care.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 363 (AB 335) Wayne. Hazardous waste and substances: administrative penalties.

(1) Under existing law, the Department of Toxic Substances Control, a unified program agency, authorized local health officer, or designated local public officer, as prescribed, is authorized to issue an order specifying a schedule for compliance or correction with certain statutes, including the hazardous waste control laws and the Carpenter-Presley-Tanner Hazardous Substance Account Act (California Superfund) and to impose an administrative penalty if there is a violation of those laws or any permit, rule, regulation, standard, or requirement issued or adopted pursuant to those laws.

This bill would allow the department to apply to the clerk of the appropriate court for a judgment to collect an administrative penalty imposed by administrative order or decision issued pursuant to the hazardous waste control laws or the hazardous substance account act, if the administrative order or decision has become final and, if applicable, a petition for judicial review of the final order or decision has not been filed within specified time limits. The bill would require the court clerk to enter judgement immediately, thereby imposing a state-mandated local program by imposing new duties upon local agencies. The bill would provide that the judgement has the same force and effect as a judgement in a civil action and may be enforced, as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 364 (AB 349) Firestone. Insurance: fraud.

(1) Existing law requires each insurer doing business in this state to pay an annual fee for each vehicle it insures, in order to fund increased investigation and prosecution of fraudulent automobile insurance claims and economic automobile theft. These funds are available for distribution by the Insurance Commissioner to district attorneys, upon application, as specified. Both the application for moneys and the distribution of moneys are public documents, except that information submitted to the commissioner concerning active cases is to be confidential.

This bill would provide that information submitted under these provisions concerning active or inactive criminal investigations shall be confidential.

(2) Existing law also provides for an assessment on employers to be used for enhanced investigation and prosecution of workers' compensation fraud. These funds are available to the Bureau of Fraudulent Claims of the Department of Insurance, and also for distribution by the Insurance Commissioner to district attorneys, upon application, as specified. Applications, annual reports, or other documents relative to these moneys are public records.

This bill would delete the general provision concerning public records, provide that the application for moneys and the distribution of moneys shall be public documents, and provide that information submitted to the commissioner under these provisions concerning active or inactive criminal investigations shall be confidential.

(3) This bill would also incorporate additional changes to certain of its provisions proposed by AB 1004 and SB 695, contingent on the prior enactment of those other bills.

Ch. 365 (AB 361) Cunneen. Hazardous materials: business plans.

(1) Existing law requires businesses handling specified amounts of hazardous materials to submit an inventory and a business plan to administering agencies. A handler is required to review the submitted business plan at least once every 2 years, to determine if a revision is needed, and to certify to the administering agency that the review was made and that any necessary changes were made to the plan. The handler is also required to annually submit a completed inventory form to the administering agency of the county or city in which the handler is located. A knowing violation of those requirements, after reasonable notice of the violation, is a misdemeanor.

This bill would change the schedule for when a handler is required to review the business plan to at least once every 3 years from the initial date of submission.

(2) The bill would also require the administering agency to exempt a business operating an unstaffed remote facility located in an isolated sparsely populated area from the requirements for a business plan and inventory if specified requirements are met, including submission of a specified notice to the administering agency. The bill would require an administering agency to forward a copy of the notification to certain agencies, thereby imposing a state-mandated local program by imposing new duties upon local agencies.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 366 (AB 396) Kaloogian. Food facilities.

Existing law, the California Uniform Retail Food Facilities Law, administered by the State Department of Health Services, establishes uniform health and sanitation standards for retail food facilities, as defined. The law requires the State Department of Health Services to adopt regulations to implement and administer those provisions, and delegates primary enforcement duties to local health agencies. Violation of the California Uniform Retail Food Facilities Law and regulations adopted pursuant thereto is a crime.

Existing law requires that all potentially hazardous food be held at or below 5 degrees Celsius (41 degrees Fahrenheit) or kept at or above 60 degrees Celsius (140 degrees Fahrenheit) at all times, with certain exceptions.

The bill would require that all ready-to-eat foods prepared at the food facility from raw or incompletely cooked animal tissues be thoroughly cooked prior to serving, as prescribed, with certain exceptions for ready-to-eat foods made from or containing eggs, comminuted meat, or single pieces of meat, including fish and seafood, where there is a specific consumer order. The bill would prescribe higher minimum internal temperatures and additional preparation requirements for foods containing raw or incompletely cooked animal tissues that are prepared in a microwave.

The bill would require that potentially hazardous food cooked, cooled, and reheated by a food facility and subsequently reheated for the purpose of immediate serving or hot holding, be heated to a minimum internal temperature of 74 degrees Celsius (165 degrees Fahrenheit). However, the bill would require instead that certain ready-to-eat potentially hazardous food be heated to a temperature of at least 60 degrees Celsius (140 Fahrenheit) for hot holding.

The bill would repeal the above provisions on January 1, 2001. This bill would require the department to report to the Legislature on or before July 1, 1999, regarding the enforcement of these provisions.

By changing the definition of an existing crime and expanding the enforcement duties of local health agencies, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 367 (AB 672) Honda. Mobilehome parks: mobilehome transfers.

Existing law allows the management of a mobilehome park, in the event of a sale of the mobilehome to a 3rd party, to require that the mobilehome be removed from the park if, among other factors, it is in a significantly rundown condition or in disrepair. In these circumstances, the management of the park is prohibited from requiring repairs or improvements to the park space or property owned by the management, except as specified.

This bill would provide that, in the context of any sale or transfer of a mobilehome that will remain in the park, the management of the park shall also be prohibited from requiring repairs or improvements to the park space or property owned by the management, except as specified. It also would make a conforming change.

Ch. 368 (AB 692) Morrow. County Water Authority Act.

(1) Under the County Water Authority Act, each member of the board of directors of a county water authority is subject to recall by the majority vote of the governing body of the public agency from which the member is appointed.

This bill would declare that a member of the board serves at the will of the governing body of the public agency from which the member is appointed and may be removed by a majority vote of the governing body without a showing of good cause.

(2) Under the act, each member of the board is entitled to vote on all questions, orders, resolutions, and ordinances coming before the board, and is entitled to cast one vote for each \$5,000,000, or major fractional part thereof, of assessed valuation of property taxable for authority purposes in the public agency represented by that member, as specified.

This bill would revise and recast that provision and related provisions. The bill would authorize each board member to cast one vote for each \$5,000,000, or major fractional part thereof, of the total financial contribution paid to the authority that is attributable to the public agency of which the member is a representative, as prescribed. The bill would define the term "total financial contribution." The bill would specify the total financial contribution and the vote of each member public agency for the San Diego County Water Authority, as of July 1, 1997. The bill would prescribe related matters. By imposing additional duties on a county water authority, the bill would impose a state-mandated local program.

The bill would authorize a member of the board to designate another member of the board to vote, in his or her absence, as specified.

(3) Under the act, the representative of a military reservation on the board is entitled to cast one vote on all matters coming before the board, notwithstanding the assessed valuation of property taxable for authority purposes within the military reservation.

This bill would delete that provision and, instead, declare that, for purposes of the act, a military reservation is deemed to be a public agency.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 369 (AB 711) Ackerman. Check cashers: permits.

Existing law requires every owner of a check casher's business to obtain a permit from the Department of Justice, as specified, and to renew the permit annually.

This bill would provide that a violation of these provisions of existing law is punishable by a civil penalty, as specified, for a first or 2nd offense, or as a misdemeanor, as specified, for a subsequent offense within 10 years, with any civil penalties or fines to be apportioned 50% to the State Treasury and 50% to the city or county treasury, as

specified. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 370 (AB 723) Takasugi. Fidelity Corporation.

The Escrow Agent's Fidelity Corporation exists under current law for the purpose of indemnifying its members, who are licensed escrow agents, against loss. In addition to payment for losses, the corporation issues Fidelity Corporation Certificates, which are required for employment as an escrow agent. Under existing law, the application for a certificate is required to contain a statement advising the applicant that a dispute concerning the denial of a certificate may be submitted to arbitration and may not be challenged by civil action, subject to specified exceptions. A certificate may be denied, revoked, or suspended by the corporation for specified grounds.

This bill would require the application statement to advise the applicant that, in addition to disputes over the denial of a certificate, the arbitration requirement also applies to disputes over the suspension or revocation of a certificate.

Existing law provides that a member of the Escrow Agent's Fidelity Corporation who is aggrieved by an action or decision of the corporation may appeal to the Commissioner of Corporations within 30 days.

This bill would repeal that provision and instead establish procedures for appeals to the commissioner, including appeals upon request for a hearing. The bill would require all matters relating to claims for loss of trust obligations to be decided under the procedure established for appeals with a hearing. The bill further would require the commissioner to abstain from exercising jurisdiction of claims for loss of trust obligations under certain circumstances, and to conduct hearings and render decisions within specified time limits.

Ch. 371 (AB 793) House. Sex offenders: sentence enhancements.

Existing law provides for sentence enhancements for persons who are convicted of specified violent felonies and have served prior prison terms.

This bill would add rape in concert to the list of these felonies. By expanding the scope of an existing sentence enhancement, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 667.5 of the Penal Code proposed by AB 115, to be operative if AB 115 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 372 (AB 1148) Cunneen. California Insurance Guarantee Association.

(1) Existing law requires the formation of the California Insurance Guarantee Association, which exists for the purpose of providing insolvency insurance to its members. Insurers offering certain classes of insurance are required to participate in the association. The association is required to pay and discharge covered claims of participating insurers. Covered claims are currently defined not to include obligations of an insolvent insurer arising out of reinsurance contracts.

This bill would provide that covered claims also include the obligations assumed by an assuming insurer from a ceding insurer where the assuming insurer subsequently becomes an insolvent insurer if, at the time of the insolvency of the assuming insurer, the ceding insurer is no longer admitted to transact business in this state and if certain other requirements are met.

(2) This bill would also incorporate additional changes to Section 1063.1 of the Insurance Code proposed by SB 1277, contingent on the prior enactment of that bill.

Ch. 373 (AB 1316) Alquist. Santa Clara County Transit District.

Under the Santa Clara County Transit District Act, the Santa Clara County Transit District was formed to adopt a general transit plan for the district and provide transit service for the transportation of passengers. The act specifies the duties and responsibilities of the district, and defines various terms.

This bill would clarify various provisions of the act relating to the definitions of "transit" and "persons," agreements among specified cities in the County of Santa Clara, and powers of the district, including specified employees. The bill would delete obsolete provisions and make related changes.

The bill would incorporate additional changes in Section 22050 of the Public Contract Code proposed by SB 79 to become operative only if this bill and SB 79 are enacted and become effective on or before January 1, 1998, each bill amends Section 22050 of the Public Contract Code, and this bill is enacted last.

Ch. 374 (AB 1366) Lempert. Parks and recreation: land grants.

(1) Under existing law, the Department of Parks and Recreation is required to operate, manage, and maintain units of the state park system, and the Director of Parks and Recreation has been authorized to grant, in trust, and subject to prescribed conditions, all of the rights, title, and interest of the state in specified lands to specified counties for specified beach, park, and recreational purposes.

This bill would authorize the director to grant, in trust, and subject to specified conditions, all of the rights, title, and interest of the state in all lands located within the boundaries of Durham Ferry State Park, including any improvements on those lands, to the San Joaquin County Office of Education, and would require the office to use any such lands, and any improvements thereon, for use only for park, recreational, or educational purposes.

(2) Under existing law, counties are authorized to develop and maintain recreational lands, such as trails, and the department, at the state level, is responsible for the California Hiking and Riding Trail Program.

Existing law authorizes regional park and open-space districts to acquire, and to lease or dispose of, real property, and rights in real property, within or without the regional district, that are necessary to the full exercise of the regional district's powers.

This bill would authorize the department to convey, to the County of San Mateo and to the Midpeninsula Regional Open Space District, respectively, in trust for the development, improvement, operation, and maintenance of trails, as specified, all rights, title, and interest held or owned by the state in lands consisting of 9 specified segments of land and 5 specified segments of land, respectively, located in the county within the boundaries of the California Hiking and Riding Trail. The bill would specify related matters.

The bill would prohibit the department from conveying any of those lands unless the department includes appropriate deed restrictions in the conveyance documents that will require the granted lands to be used by the grantee, in perpetuity, for the specified public purposes.

Ch. 375 (AB 1432) Papan. Financial institutions: banks.

(1) The Banking Law provides for the regulation of banks by the Commissioner of Financial Institutions. Under these provisions, the articles of incorporation of a bank are required to provide for assessment by the bank of its common shares upon order of the commissioner for the purpose of correcting an impairment of contributed capital, as defined.

This bill would repeal these and other related provisions.

(2) The Banking Law provides for the Attorney General to bring actions at the request of the commissioner relative to recovery of penalties, liabilities, or forfeitures imposed for violations of the law.

This bill would repeal these provisions and enact other provisions authorizing the commissioner to bring these and other related actions. The bill would provide for

court-appointed receivers, monitors, conservators, or other designated fiduciary officers in certain cases and would also authorize the commissioner to make claims for restitution, disgorgement, or damages on behalf of injured persons, as specified.

(3) The Banking Law authorizes the commissioner to take possession of the property and business of a bank under certain circumstances.

This bill would additionally authorize the commissioner to take possession if the bank's tangible shareholders' equity is less than certain specified amounts.

(4) The Banking Law and other provisions of existing law authorize the commissioner to charge fees for bank examinations on a per diem basis.

This bill would instead provide for fees to be charged on an hourly basis.

(5) Existing law provides for the commissioner to act as Administrator of Local Agency Security with respect to the investment of funds of local agencies.

This bill would instead provide for the State Treasurer to act in this capacity.

Ch. 376 (AB 1445) Shelley. Interpreters.

Existing law provides for the regulation of court interpreters. Existing law requires any person who interprets in a court proceeding using a language not designated by the Judicial Council to be qualified by the court under specified procedures and guidelines.

This bill would provide that this person shall be designated a "registered interpreter" if he or she also passes an examination offered by an entity approved by the Judicial Council. This bill would authorize a registered interpreter regularly employed by the court to file an oath, as specified.

Ch. 377 (AB 1548) Committee on Consumer Protection, Governmental Efficiency and Economic Development. Seller assisted marketing plans.

(1) Existing law governing seller assisted marketing plans requires a seller to provide, prior to the execution of the plan contract or the receipt of any consideration, a prospective purchaser of this plan with prescribed information. A seller must give information regarding the criminal background and civil liability of the seller's officers, directors, trustees, and general or limited partners and individuals who have management responsibilities in connection with the seller's business activities. Existing law provides that it is a crime for a person to willfully violate these provisions.

This bill would require this disclosure to include information regarding the criminal background and civil liability of the seller and any other company managed by the above-described persons. By changing the definition of a crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 378 (AB 1549) Committee on Insurance. Earthquake insurance.

Under existing law, a policy of residential property insurance may not be issued or delivered or, under certain circumstances, initially renewed by an insurer unless the named insured is offered coverage for loss or damage caused by an earthquake. The offer of earthquake coverage is required to contain certain language, as specified.

This bill would authorize the Insurance Commissioner to approve modifications to the language to be used in an offer of earthquake insurance only if the modifications are not in conflict with or in derogation of the language otherwise required or other specified provisions, are necessary to accurately reflect the coverage provided, and are limited to necessary changes.

Ch. 379 (SB 4) Kopp. Trespass: punishment.

(1) The Bridge and Highway District Law makes it a misdemeanor to, among other things, climb, without permission, upon any railing, cable, tower, or superstructure of a toll bridge.

This bill would make these provisions applicable to climbing on any suspender rope of the bridge or to otherwise trespass on any portion of the bridge that is not intended

for public use. The bill would make a violation of those provisions punishable by imprisonment in the county jail not exceeding one year, by a fine not exceeding \$10,000, or by both that imprisonment and fine.

The bill would require the court, if probation is granted to a person committing any of those acts, to impose as a condition of that probation that the person perform not less than 40 hours and not more than 160 hours of community service, as described. The bill would also require a person to reimburse the bridge district for costs resulting from a violation of these provisions.

The bill would also make it a misdemeanor to trespass on any other district property.

By expanding the scope of the crime and by requiring the imposition of certain conditions upon a person granted probation, the bill would impose increased duties on local criminal justice systems, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 380 (SB 80) Kopp. Veterinary medicine: euthanasia.

Existing law regulates the licensure of veterinarians and the practice of veterinary medicine, defines the practice of veterinary medicine, surgery, and dentistry, and prohibits any person from practicing veterinary medicine or any branch thereof without being licensed. These provisions are administered by the Veterinary Medical Board. Existing law approves registered veterinary technicians to perform those animal health care services prescribed by law under the supervision of a veterinarian licensed or authorized to practice in this state and authorizes them to perform animal health care services on those animals impounded by a state, county, city, or city and county agency pursuant to the direct order, written order or telephonic order of a veterinarian licensed or authorized to practice in this state.

Existing law provides that the laws relating to the regulation of veterinary medicine do not prohibit a person from administering sodium pentobarbital for euthanasia of sick, injured, homeless, or unwanted domestic pets or animals, without the presence of a veterinarian, when the person is an employee of an animal control shelter and its agencies or humane society and has received proper training in the administration of sodium pentobarbital for those purposes.

This bill would authorize, for purposes of the latter provision, a registered veterinary technician to apply for registration from the federal Drug Enforcement Administration that authorizes the direct purchase of sodium pentobarbital for the performance of euthanasia without the supervision or authorization of a licensed veterinarian. The bill would authorize the board to adopt regulations, as needed, to define this provision, including, but not limited to, procedures for citations and fines.

Ch. 381 (SB 210) Ayala. County officers: auditors: qualifications.

Existing law requires a person elected or appointed to the office of county auditor to meet at least one of certain enumerated criteria, in any county that has adopted these criteria, as specified. Under existing law, these criteria include possessing a valid certificate issued by either the California State Board of Accountancy or the Institute of Internal Auditors, as specified, serving as a county auditor, chief deputy county auditor, or chief assistant county auditor for a continuous period of not less than 3 years, or possessing a baccalaureate degree from an accredited university, college, or other 4-year institution, with a major in accounting or its equivalent, as specified.

This bill would require any person serving in the capacity of county auditor in a county that has adopted the above criteria to complete at least 40 hours of qualifying continuing education every 2 years, as specified. The bill would designate appropriate subjects for the continuing education, and would authorize county auditors who are licensed or certificated by other specified entities to apply continuing education for license or certificate renewal to satisfy the continuing education requirements of the bill.

In addition, this bill would augment the qualification requiring possession of a baccalaureate degree from an accredited university, college, or other 4-year institution,

to additionally require the person to have served within the previous 5 years in a senior fiscal management position in a county, city, or other public agency, a private firm, or a nonprofit organization, for a continuous period of not less than 3 years.

This bill would also make technical nonsubstantive changes to existing law.

Ch. 382 (SB 407) Polanco. Speech language pathology and audiology.

Existing law provides for the licensure of speech-language pathologists and the licensure of audiologists and prohibits the practice of speech-language pathology without a license. For purposes of these provisions, existing law defines the practice of audiology to include, among other activities, the planning, directing, conducting, supervising, or participating in programs of identification of auditory disorders, hearing conservation, aural habilitation, and rehabilitation.

This bill would include planning, directing, conducting, supervising, or participating in programs of cerumen removal, as defined, within the definition of the practice of audiology. It would also require that cerumen removal performed pursuant to these provisions be performed by a licensed audiologist.

Ch. 383 (SB 509) M. Thompson. Alcoholic beverages: on-sale or off-sale wine license.

The Alcoholic Beverage Control Act provides for the issuance of on-sale and off-sale beer and wine licenses and provides for the issuance of various special or temporary licenses.

This bill would authorize the issuance of a special temporary on-sale or off-sale wine license to certain nonprofit corporations having an agricultural purpose to sell wine, donated or sold to the nonprofit corporation by the member winegrowers, to consumers for the purpose of fundraising, as specified.

This bill would limit the number of cases of wine per year that may be sold by the nonprofit corporation under the license and that may be donated or sold by individual member winegrowers to the nonprofit corporation.

This bill would preclude the issuance of this special license to a nonprofit corporation whose name includes the designation of an American viticultural area (AVA) recognized under federal law unless its membership includes a majority of winegrowers located in the AVA. This bill would also require that if the corporation's name includes a recognized AVA, the wines sold under the special license must be entitled to use the named AVA as the appellation of origin.

This bill would declare that it would take effect immediately as an urgency statute.

Ch. 384 (SB 571) C. Wright. Radiologic technology: venipuncture.

Existing law authorizes a radiologic technologist, under the general supervision, as defined, of a physician and surgeon, to assist a physician and surgeon in completing an injection to administer contrast materials after the performance of venipuncture or arterial puncture by a person authorized to perform these tasks.

This bill would instead authorize a radiologic technologist, under the general supervision of a physician and surgeon, to perform venipuncture in an upper extremity to administer contrast materials if the radiologic technologist has received certain training and education and been issued a certificate.

Ch. 385 (SB 1315) Burton. Insurance.

Under existing law, an insurer is required to give the insured and the producer of record written notice of the nonrenewal of certain commercial insurance and workers' compensation insurance policies within a specified time before the end of the policy period.

This bill would, for those policies, require the insurer, on receiving a written request, to provide a premium and loss history report for the account's tenure or the past 3 years, whichever is shorter, plus loss experience during the current policy year, within 15 business days for commercial insurance, and within 10 business days for workers' compensation insurance, of receiving the request.

Ch. 386 (SB 629) Karnette. Public employees retirement.

(1) The State Teachers' Retirement Law prescribes alternative disability benefits for members with less than 4 years of service if they have on-the-job injuries.

This bill would make those alternative disability benefits applicable to members with less than 5 years of credited service whose disabilities are due to unlawful acts of bodily harm.

(2) The Public Employees' Retirement Law prescribes increased special death benefits for state or local miscellaneous members whose deaths were a direct consequence of violent acts that arose out of and in the course of their official duties. The benefits are available for local miscellaneous members whose employers elect to provide those benefits.

This bill would provide those benefits to school members for acts occurring on and after January 1, 1998.

Ch. 387 (SB 1080) Calderon. Limited liability partnerships.

The Uniform Partnership Act and the Uniform Partnership Act of 1994 require a registered limited liability partnership or foreign limited liability partnership to maintain and provide for security for claims against it by maintaining a policy or policies of insurance or by other alternative methods, as specified. With respect to these limited liability partnerships that provide accountancy services for claims based upon acts, errors, or omissions arising out of the practice of public accountancy, the security may be provided through the maintenance of a policy or policies of insurance the maximum amount of which need not exceed \$5,000,000, for claims initially asserted in any one calendar year, less amounts paid in defending, settling, or discharging those claims, or through the maintenance in trust or bank escrow, bank certificates of deposit, United States Treasury obligations, bank letters of credit, or bonds of insurance companies the maximum amount of which need not exceed \$5,000,000, for claims initially asserted in any one calendar year, less amount paid in defending, settling, or discharging those claims. Existing law contains comparable provisions regarding security with respect to registered limited liability partnerships or foreign limited liability partnerships that provide legal services, except that the maximum amount need not exceed \$7,500,000. An accountancy partnership may also meet the security requirement by confirming that it has a net worth of at least \$10 million, while a legal partnership may also meet the security requirement through a guarantee by each partner.

This bill would, with respect to the policies of insurance described above, authorize those policies to be issued on a claims made or occurrence basis and would further provide that the impairment or exhaustion of the aggregate limit of liability by amounts paid in connection with the settlement, discharge, or defense of claims would not require the partnership to acquire additional insurance coverage for the policy period. The bill would further provide that these policies of insurance may be subject to a deductible or self-insured retention, as specified.

The bill also would, with respect to security provided through the alternative methods specified above, provide that a partnership remains in compliance with the security provisions notwithstanding the amounts paid during a calendar year in defending, settling, or discharging those claims as long as the amount of the security was a specified amount on the first business day of that calendar year. The bill would also deem a partnership to be in compliance with this requirement if the partnership has designated and segregated the necessary funds within 30 days after the time that a claim is initially asserted. The bill would also allow accountancy partnerships to meet the security requirement through a guarantee by each partner and would allow legal partnerships to meet the security requirement by confirming a net worth of at least \$15 million. The bill would make related changes.

The bill would also revise provisions relating to the election of a limited liability partnership to be subject to the law in effect prior to January 1, 1997, or current law. Among other things, it would provide that the election shall terminate on January 1, 1999, rather than January 1, 1998.

Ch. 388 (SB 1295) Maddy. Marriage, family, and child counselors and clinical social workers: patient access to health records.

Existing law, with some exceptions, guarantees patients and former patients of health care providers, as defined, and certain representatives of patients and former patients, the right to inspect health records. However, existing law provides that if a health care provider determines there is a substantial risk of significant adverse or detrimental consequences to a patient in seeing or receiving a copy of mental health records requested by the patient, the provider may decline to permit inspection or provide copies of the records to the patient if, among other things, the health care provider permits inspection by, or provides copies of, the mental health records to a licensed physician and surgeon or licensed psychologist designated by request of the patient.

This bill would, for purposes of these provisions concerning mental health records, also require the health care provider to permit inspection by, or provide copies of the mental health records to, a licensed marriage, family, and child counselor or licensed clinical social worker designated by request of the patient. This bill would also require that the licensed physician and surgeon, licensed psychologist, licensed marriage, family, and child counselor, or licensed clinical social worker to whom these records are provided for inspection or copying not permit inspection or copying by the patient.

Ch. 389 (AB 38) Figueroa. Health coverage: maternity benefits.

(1) Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, a willful violation of any of these provisions is punishable as either a felony or a misdemeanor. Existing law also provides for the regulation of policies of disability insurance administered by the Insurance Commissioner.

Existing law requires that health care service plans and disability insurers provide coverage for certain benefits and services.

This bill would prohibit every health care service plan contract and certain disability insurance policies issued, amended, delivered, or renewed on or after the effective date of the bill, that provide maternity coverage, from restricting benefits for inpatient hospital care to a time period less than 48 hours following a normal vaginal delivery and less than 96 hours following a delivery by caesarean section, unless specified conditions are met.

The bill would further prohibit these contracts and policies from reducing or limiting the reimbursement of the attending provider for providing care to an individual enrollee or insured in accordance with the coverage requirements; providing monetary or other incentives to an attending provider to induce the provider to provide care to an individual enrollee or insured in a manner inconsistent with the coverage requirements; denying a mother or her newborn eligibility, or continued eligibility, to enroll or to renew coverage solely to avoid the coverage requirements; providing monetary payments or rebates to a mother to encourage her to accept less than the minimum coverage requirements; restricting inpatient benefits for the 2nd day of hospital care in a manner that is less than favorable to the mother or her newborn than those provided during the preceding portion of the hospital stay; and requiring the treating physician to obtain authorization from the health care service plan or insurer prior to prescribing any services covered by this provision. This bill would also require these contracts and policies to include notice of the coverage specified above in the plan's or the insurer's evidence of coverage for evidences of coverage issued on or after January 1, 1998, and to provide additional written notice of this coverage during the course of the enrollee's or insured's prenatal care.

Because a willful violation of the provisions applicable to health care service plans is a crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 390 (AB 611) Villaraigosa. Educational facilities.

(1) Existing law requires the Department of General Services to supervise the construction of any public school building, and to supervise an alteration or reconstruction of, or addition to, any public school building when the estimated cost exceeds \$20,000. Existing law requires the Department of General Services to pass on the construction of any public school building, and to pass on any alteration of a public school building when the estimated cost exceeds \$20,000. Existing law requires a structural engineer to examine and report, as specified, on any alteration of a public school building, when the estimated cost exceeds \$10,000 but does not exceed \$20,000.

This bill would require the Department of General Services to pass on an alteration of any public school building when the estimated cost exceeds \$25,000. This bill would require a licensed structural engineer to examine and report, as specified, on any alteration of a public school building, when the estimated cost exceeds \$25,000 but does not exceed \$100,000. This bill would require a design professional, as specified, to certify that the plans and specifications for any alteration of a public school building meet specified requirements when the alteration does not involve structural elements.

(2) Existing law permits a school district to prequalify prospective bidders for contracts with the district, as specified.

This bill would permit a school district to establish a process for prequalifying bidders on a quarterly basis and would authorize that prequalification to be considered valid for up to one calendar year following the date of initial prequalification.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 391 (AB 721) Firestone. Securities: federal regulation.

(1) The California Corporate Securities Law of 1968 (hereafter California Securities Law) defines an investment adviser as a person who is compensated for advising other persons as to the value of securities or the advisability of investing, purchasing or selling securities, or who publishes evaluations of securities. It is generally unlawful to act as an investment adviser without obtaining a certificate from the Commissioner of Corporations.

This bill would define an investment adviser representative or associated person of an investment adviser, and would prohibit a person from engaging in certain activities on behalf of the investment adviser unless the investment adviser and that person comply with the commissioner's rules. The bill would also provide that an investment adviser registered under the federal Investment Advisers Act of 1940, a person exempt from registration under that act, or a person registered as an investment adviser or exempt from registration in another state, is not subject to or is exempt from the requirement of obtaining a certificate from the commissioner, under certain conditions.

(2) The California Securities Law requires the qualification of a security before it can be offered or sold in an issuer or nonissuer transaction in this state. The federal Capital Markets Efficiency Act of 1996 provides that no law, rule, regulation, or other administrative action of a state requiring qualification of a security may apply to a covered security, as defined by federal law.

Certain classes of securities are exempt from the state qualification requirement, including any security issued by an issuer registered as an open-end management company or unit investment trust, if certain requirements are met. In addition, a security issued by an issuer listed on a national securities exchange not certified by the commissioner, a security issued by an issuer of a security registered or exempt from registration under specified provisions of federal law, or a security registered under the Investment Company Act of 1940, if certain forms are filed with the commissioner, are also exempt.

This bill would delete the above exemptions. The bill would also provide that a security that is exempt from registration under the federal Securities Act of 1933, a transaction involving a qualified purchaser, and the purchase or sale of a security exempt from registration under specified provisions of federal law, is not subject to qualification, if certain requirements are met, including filing forms with the commissioner. The bill would impose fees for the filing of these forms.

(3) Existing law authorizes the commissioner to order an issuer to stop offering or selling a security that is subject to qualification and is not qualified.

This bill would additionally authorize the commissioner to order an issuer to stop offering or selling a security that must meet certain requirements in order to maintain its status as not being subject to qualification, if those requirements have not been met.

(4) The bill would also make related and conforming changes.

(5) The bill would also incorporate additional changes in Section 25100 of the Corporations Code proposed by SB 633, contingent upon prior enactment of that bill.

Ch. 392 (AB 754) Kuykendall. Real property: sales of series of notes and undivided interests.

The Corporate Securities Law of 1968 provides that it is unlawful for any person to offer or sell any security in an issuer transaction unless the sale has been qualified, with specified exemptions.

This bill would also exempt from the qualification requirement a transaction that is the sale of a series of notes secured directly by an interest in the same property or the sale of undivided interests in a note equivalent to a series transaction, if the notes or interests are sold by or through a licensed real estate broker and if the transaction complies with specified notice, advertising, trust account, reporting, and other related requirements. The bill would require the real estate directly securing the notes or interests to be in this state, and would require the notes or interests to not be sold to more than 10 persons, as specified.

The bill would require the notes or interests of purchasers to be identical in their underlying terms, but would not preclude different selling prices for interests. The bill would require the interest of each purchaser to be recorded.

The bill would also establish limitations on the combined total of the aggregate principal amount of the notes or interests sold and the unpaid principal amount of any senior encumbrances on the real property, and would require that the documentation of the transaction include a contractual obligation that a default on any interest or note is a default on all interests or notes. The bill contains other related provisions. Because a violation of provisions relating to real estate would be a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 393 (AB 1465) Bordonaro. Purses.

Existing law continuously appropriates up to 10% of all revenues distributed to racing associations for payment to the state as license fees from satellite wagering facilities located at fairs in the northern zone to the Department of Food and Agriculture for supplementing purses at fair meetings in order to accomplish certain goals. Existing law requires the department to annually determine the percentage of revenues necessary to accomplish those goals.

This bill would appropriate 10%, instead of up to 10%, of all revenues distributed to racing associations for payment to the state as license fees from satellite wagering facilities located at fairs in the northern zone to the department, would eliminate the duty of the department to annually determine the percentage of revenues necessary to accomplish those goals, and would provide that any funds remaining after meeting those goals shall be used at fair meetings in the northern zone as additional purses. By increasing the amount of funds continuously appropriated, and by expanding the purposes for which continuously appropriated funds may be expended, the bill would make an appropriation.

Ch. 394 (SB 363) Lewis. Filing requirements: contributions and expenditures.

Existing provisions of the Political Reform Act of 1974 provide that any report or statement required to be filed with any official under specified provisions of the act may be faxed by the applicable deadline if certain conditions are met, including that a copy of the faxed document also be sent to the filing officer either by first-class mail or by any other guaranteed overnight delivery service within 24 hours.

This bill would provide that the copy of the faxed document may also be delivered to the filing officer by personal delivery within the 24-hour time period.

This bill would provide that the faxed report or statement shall not be deemed filed if the faxed report or statement is not a true and correct copy of the original or copy of the report or statement personally delivered or sent by first-class mail or guaranteed overnight delivery service, and would require a filing officer who receives a faxed report or statement to make the report or statement available to the public in the same manner as otherwise provided in the act.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on certain persons who violate the provisions of the bill.

Existing provisions of the Political Reform Act of 1974 define the term "contribution," as used in the act, to include the use of a candidate's own money or property on behalf of his or her own candidacy.

This bill would exclude from this definition personal funds of the candidate used to pay either a filing fee for a declaration of candidacy or a candidate statement prepared pursuant to a specified provision of the Elections Code.

Existing provisions of the act define the term "expenditure," as used in the act, to include a payment unless it is clear from the surrounding circumstances that it is not made for political purposes.

This bill would exclude from this definition the use of a candidate's own money to pay either a filing fee for a declaration of candidacy or a candidate statement prepared pursuant to a specified provision of the Elections Code.

Existing provisions of the Political Reform Act of 1974 require that prior to the solicitation or receipt of contributions or loans, candidates must first file with the Secretary of State an original signed statement of their intention to become a candidate for a specific office, as well as one duplicate of that statement. Candidates are also required to establish a campaign contribution account, and disclose in a statement to the Secretary of State the number of the account and the name and location of the financial institution where the account was opened. A duplicate of that statement must be sent along with the original to the Secretary of State.

This bill would provide that, in the case of a statement of intent to become a candidate for a specific office, no duplicate need be filed with the Secretary of State. The bill would likewise provide that in the case of a campaign contribution account disclosure statement, no duplicate need be filed with the Secretary of State.

This bill would incorporate additional changes in Section 82015 of the Government Code proposed by SB 124, to become operative only if SB 124 and this bill are chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the Political Reform Act of 1974, would therefore require a $\frac{2}{3}$ vote.

Ch. 395 (SB 544) Maddy. Discovery: depositions: transcripts distribution.

Existing law permits a party to a civil action to obtain a copy of a deposition transcript taken by another party. Existing law provides that the deposition officer shall be responsible for certifying transcripts of a deposition and notifying parties of the availability of the transcripts for review and correction, as specified.

This bill would require a deposition officer who receives a request for an original or a copy of a deposition transcript from one party, under specified circumstances, to immediately notify the other parties that attended the deposition of the request and,

upon request of any other party, to make that original or a copy available to all parties at the same time.

Existing law requires the deposition officer to certify that the deponent was duly sworn and that the transcript or recording is a true record of testimony given or changes made by the deponent.

This bill would prohibit transcripts of depositions prepared as rough drafts from being certified and used, cited, or transcribed as the certified transcript, or used or cited to rebut or contradict the certified transcript, as specified.

Existing law governs the conduct of discovery in civil actions. Existing law specifies the procedure for conducting the deposition of any party.

This bill would provide that unless the court issues an order to the contrary, a copy of the transcript, videotape, or other recording of testimony at the deposition, if still in the possession of the deposition officer, shall be made available by the deposition officer to any person requesting a copy thereof upon payment of a reasonable charge set by the deposition officer. If a copy is requested from the deposition officer, the deposition officer would be required to give all parties attending the deposition and the deponent notice of anyone seeking a copy thereof, and of his or her right to seek a protective order prior to making a copy available, as specified.

Ch. 396 (SB 564) Solis. Domestic violence: visitation.

Existing law governs proceedings to determine the custody and visitation of a child. Existing law states that nonparent parties may not seek a determination of custody or visitation rights in a proceeding under the Domestic Violence Prevention Act. Existing law, however, excludes, among others, an alleged or presumed parent, foster parent, or stepparent from its definition of "nonparent."

Existing law authorizes the district attorney to bring an action to recover child support in specified circumstances.

This bill would provide that a party who has not established a parent and child relationship may not seek a determination of custody or visitation rights in a proceeding under the Domestic Violence Prevention Act. The bill would also make technical, clarifying changes with respect to proceedings to determine the custody or visitation of a child in specified actions brought by the district attorney to recover child support.

Existing provisions of the Domestic Violence Prevention Act authorize a court to issue an ex parte order determining the temporary custody of a minor child on the conditions the court determines. That act also authorizes a court to issue an ex parte order determining the right of a party to visit a minor child on the conditions the court determines in various specified proceedings.

This bill would delete the latter provisions and instead authorize the court to issue an ex parte order for temporary custody and visitation on the conditions the court determines to a party who has established a parent and child relationship, as specified. The bill would also authorize a court to award temporary sole legal and physical custody of a child to a party to whom a restraining order has been issued and to make an order of no visitation to the other party, where that other party has not established a parent and child relationship, pending establishment of that relationship, as specified. The bill also would authorize a court to make appropriate custody and visitation orders in situations in which a party who has requested custody or visitation has not established a parent and child relationship, but has taken steps to establish that relationship, as specified.

Ch. 397 (AB 1173) Olberg. Controlled substances.

(1) Existing law provides that any manufacturer, wholesaler, retailer, or other person who sells, transfers, or otherwise furnishes specified chemical substances to any person in this state shall submit a report to the Department of Justice of any transaction prior to the transaction which report shall include specified identification information from the purchaser. Existing law provides that these provisions do not apply to specified transactions involving specified individuals or drugs, including specified manufacturers or wholesalers licensed by the California State Board of Pharmacy who sell, transfer, or otherwise furnish specified chemical substances to a licensed pharmacy, physician, dentist, podiatrist, or veterinarian, and specified transactions involving any drug

containing ephedrine, pseudoephedrine, norpseudoephedrine, or phenylpropanolamine. Existing law provides, however, that specified transactions involving preparations in solid dosage form containing ephedrine as the only active medicinal ingredient are not exempt from the provisions. Failure to submit a report or to knowingly submit a false report, and a violation of the provisions on proper identification, are crimes.

This bill would specify that it is a manufacturer, wholesaler, retailer, or other person in this state who sells, transfers, or otherwise furnishes any of the list of specified chemical substances to any person or business entity in this state or any other state who is required to submit the above report. The bill would revise the definition of "proper identification" for purposes of the above provisions. The bill would provide that any manufacturer licensed by the State Department of Health Services who sells, transfers, or otherwise furnishes specified chemical substances to the above specified healing arts practitioners or specified retail distributors shall also be exempt from the reporting requirements, provided that records of suspicious transactions, as determined by the Department of Justice, are submitted, and that while specified transactions involving preparations in solid dosage form containing ephedrine, pseudoephedrine, norpseudoephedrine, or phenylpropanolamine as the only active medicinal ingredient are not exempt from the reporting requirements, specified sales of ephedrine, pseudoephedrine, norpseudoephedrine, or phenylpropanolamine products are exempt from the reporting requirements. The bill also would exempt from the reporting requirements any transfer of these specified controlled substances for purposes of lawful disposal as waste.

The bill would make conforming changes to related provisions. By revising existing crimes, this bill would impose a state-mandated local program.

(2) Existing law provides that the theft or loss of any regulated chemical substance by any licensee, and any difference between the quantity of a regulated chemical substance received and the quantity shipped, shall be reported to the Department of Justice.

This bill would refer to "permittee" instead of "licensee" and would require the reports to the Department of Justice to be in writing.

(3) Existing law provides that any manufacturer, wholesaler, retailer, or other person who sells, transfers, or otherwise furnishes specified chemical substances to a person in this state, or who obtains from a source outside of the state specified chemical substances shall submit an application to, and obtain a permit for the conduct of that business from, the Department of Justice. Existing law provides that an application may be denied, or a permit may be revoked or suspended, for specified reasons. Existing law further provides that selling, transferring, or otherwise furnishing or obtaining the specified chemical substances without a permit is a misdemeanor or a felony.

This bill would include as a reason to deny an application, or revoke or suspend a permit, the violation of any federal, state, or local criminal statute, rule, or ordinance regulating the manufacture, maintenance, disposal, sale, transfer, or furnishing of the specified chemical substances. The bill would also require that, in the event of subsequent changes in ownership, management, or employment, the permittee shall notify the Department of Justice in writing within 15 calendar days of the changes. By revising the definition of an existing crime, this bill would impose a state-mandated local program.

(4) This bill would provide a procedure pursuant to which the Bureau of Narcotic Enforcement may, upon petition, issue an interim order suspending any permittee or imposing permit restrictions if there is evidence that the permittee engaged in acts or omissions constituting a violation of the Health and Safety Code or has been convicted of a crime substantially related to the permitted activity, or that permitting the permittee to operate, or to continue to operate without restrictions, would endanger the public health, safety, or welfare.

(5) Existing law provides that any manufacturer, wholesaler, retailer, or other person who sells to any person in this state any laboratory glassware or apparatus, any chemical reagent or solvent, or any combination thereof, where the value of the goods sold exceeds \$100 and payment for the goods is by specified means, shall require proper purchaser identification and retain the bill of sale, as specified. A violation of these provisions is a misdemeanor.

This bill would revise the requirements for the sale of goods with a value exceeding \$100, and provide that those requirements also apply to the purchase for sale of goods with a value exceeding \$100. By changing the definition of an existing crime, this bill would impose a state-mandated local program.

(6) Existing law provides that any manufacturer, wholesaler, retailer, or other person who sells to any person in this state any quantity of specified chemical substances shall require proper purchaser identification and retain the bill of sale, as specified. A violation of this provision is a misdemeanor.

This bill would revise the requirements for the sale of specified chemical substances, add similar requirements for the purchase of those items, and include iodine and hydrogen chloride gas in the list of chemical substances regulated under those provisions. By changing the definition of an existing crime, this bill would impose a state-mandated local program.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 398 (SB 699) Rainey. Fish: striped bass.

(1) Former provisions of law, repealed on January 1, 1995, required a person taking striped bass to have a striped bass stamp affixed to his or her sportfishing license. The stamp was issued by the Department of Fish and Game for a fee of \$3.50. The revenue from the fees was required to be used for specified purposes relating to striped bass, as recommended by the Striped Bass Stamp Fund Advisory Committee appointed by the Director of Fish and Game pursuant to that former law.

This bill would reenact those provisions to be operative until January 1, 2002, on which date they would be repealed. This bill also would require 15% of the funds derived from the striped bass stamp to be used for projects that benefit salmon habitat.

Because other provisions of existing law would make a violation of this bill a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would require the revenues from the stamp fees to be deposited in the Fish and Game Preservation Fund and would authorize the expenditure of that revenue by the department. Existing law continuously appropriates the money in that fund to the department to pay specified refunds and to pay all necessary expenses incurred in carrying out the Fish and Game Code and any other laws for the protection and preservation of birds, mammals, reptiles, and fish.

This bill would make an appropriation by imposing new duties on the department under that code and by providing new or increased revenue to that fund.

Ch. 399 (AB 799) Bowler. Oil spill contingency plans: grants.

Existing law, for purposes of the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, defines "marine waters" to mean those waters subject to tidal influence, except for waters in the Sacramento-San Joaquin Delta upstream from a line running north and south through the point where Contra Costa, Sacramento, and Solano Counties meet.

The act authorizes any local government with jurisdiction over, or directly adjacent to, marine waters to apply for a grant to complete, update, or revise an oil spill contingency plan element.

This bill would specify that for purposes of those provisions authorizing grants for oil spill contingency planning, "marine waters" includes the waterways used for waterborne commercial vessel traffic to the Port of Stockton and the Port of Sacramento.

The bill would become operative only if AB 667 is enacted and takes effect.

Ch. 400 (AB 174) Napolitano. Healing arts: acupuncture.

Existing law provides for the licensure and regulation of the practice of acupuncture, and provides that any person who practices acupuncture without a license is guilty of a misdemeanor, with certain exceptions.

This bill would make it unprofessional conduct for a physician and surgeon, osteopathic physician, dentist, or podiatrist to direct or supervise the performance of acupuncture involving the application of a needle to the human body by a person licensed as a healing arts practitioner who is not licensed under the Acupuncture Licensure Act.

This bill would make it unprofessional conduct for a person licensed as a healing arts practitioner who is not licensed under the Acupuncture Licensure Act to perform acupuncture involving the application of a needle to the human body at the direction or under the supervision of a physician and surgeon, osteopathic physician, dentist, or podiatrist.

This bill would provide that any person, other than a physician, osteopathic physician, dentist, or podiatrist, who is a licensed healing arts provider but is not licensed to practice acupuncture, who practices acupuncture involving the application of a needle to the human body, performs any acupuncture technique or method involving the application of a needle to the human body, or directs, manages, or supervises another person in the performance of acupuncture involving the application of a needle to the human body is guilty of a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 401 (SB 780) Kelley. Consumer affairs.

(1) Existing law provides for the existence of the Bureau of Security and Investigative Services within the Department of Consumer Affairs, under the supervision and control of the Director of Consumer Affairs. The director is charged with administering the provisions governing locksmiths, repossessioners, private investigators, private patrol operators, alarm company operators, and alarm agents. The provisions set fees for various services, including license applications, renewals, branch office registrations, initial registration, and fingerprinting.

This bill would instead provide that as of July 1, 1998, these provisions establish the maximum fees that may be charged for these services.

(2) The Collateral Recovery Act, which governs persons engaged in repossession of collateral, requires licensing of persons or entities engaged in repossession, and certification of persons who are in active control of businesses engaged in repossession. An unlicensed or uncertified person may work with a temporary registration or renewal registration for no more than 90 days.

This bill would extend this period to 120 days.

(3) Under existing law, a registration under the Collateral Recovery Act expires one year following its issuance or assigned renewal date.

This bill would provide that an initial registration expires one year from the date of issuance, and a renewal registration expires 2 years from the date of renewal unless renewed.

(4) The Collateral Recovery Act provides that it is unlawful for a person or financial institution to knowingly engage a nonexempt unlicensed person to repossess collateral. However, a legal owner, debtor, lienholder, lessor, or lessee is not guilty of a violation of this prohibition if, at the time of the assignment, the party making the assignment has a copy of the repossessioner's valid license and does not know of a suspension or revocation of the license. The bill would also make related and conforming changes.

(5) Existing law provides that a license as a private investigator, private patrol operator, alarm company operator, alarm agent, branch office certificate, pocket card, and all registrations issued under the Private Security Services Act, must be placed on a cyclical renewal, expiring 2 years from the date of issuance or assigned renewal date, according to a specified manner of establishing renewal groups.

This bill would repeal the provisions establishing renewal groups, and would provide that for a private investigator, security guard, private patrol operator, alarm company operator, or alarm agent issued a license who is also issued or renews a firearms qualification card, the license or registration must be placed on a renewal cycle so that the license or registration expires on the same date as the firearms qualification card.

(6) The Private Security Services Act, the Alarm Company Act, the Collateral Recovery Act, the Private Investigators Act, and provisions governing locksmiths provide for the issuance of pocket cards to persons licensed or registered under the acts. Under existing law, the pocket cards are issued as evidence of the licensure or registration of the holder of the card.

This bill would provide that an applicant may request to be issued an enhanced pocket card that would be required to be made of a durable material, and would permit the bureau to charge a fee sufficient to reimburse costs of furnishing the pocket card not to exceed \$6. The bill would require the Department of Consumer Affairs to issue a standard card at no cost if the applicant does not request an enhanced pocket card. The bill would also require every person to display a valid pocket card while engaged in any activity for which registration or licensure is required. Because a violation of these acts is a misdemeanor, this bill would impose a state-mandated local program by expanding the scope of an existing crime. With respect to licensure under the Alarm Company Act, the bill would permit the pocket card to serve as a firearms qualification card if so indicated on the face of the card.

The bill would also make clarifying, related, and conforming changes.

(7) The Electronic and Appliance Repair Dealer Registration Law provides for registration and regulation of service dealers and service contractors by the Bureau of Electronic and Appliance Repair in the Department of Consumer Affairs.

Provisions of existing law regulating service contractors will be repealed on January 1, 1998. Among other things, these provisions require persons acting as service contractors to be registered, and provide for various criminal penalties for a violation of those provisions.

This bill would extend the operation of these provisions until January 1, 2003. Because the criminal penalties would be extended, the bill would impose a state-mandated local program by expanding the scope of a crime.

The bill would also authorize the Director of Consumer Affairs to adopt regulations relating to service contractors, would require the director to gather evidence of violations by service contractors, and would make related changes.

(8) Existing law provides that a registration under the Electronic and Appliance Repair Dealer Registration Law that is delinquent more than 2 years may not be renewed. Existing law also requires the bureau to design and approve a sign containing certain consumer information to be placed in all electronic and appliance repair locations operated by a service dealer.

This bill would delete both of these provisions and make other related changes.

(9) The Electronic and Appliance Repair Dealer Registration Law specifies various maximum registration fees applicable to persons required to register with the board. The actual fees are set by the Director of Consumer Affairs, and are paid into the State Treasury to the credit of the Electronic and Appliance Repair Fund, which is a continuously appropriated fund.

This bill would increase the maximum amounts at which these fees may be set by the director, as specified, thereby making an appropriation.

(10) The Home Furnishings and Thermal Insulation Act provides for the licensing and regulation of certain persons in the home furnishings and thermal insulation businesses by the Bureau of Home Furnishings and Thermal Insulation in the Department of Consumer Affairs, as specified. Violations of the act are punishable as misdemeanors.

The bill would include persons who rebuild bedding within the definition of "bedding renovator," thereby expanding the scope of the act, and would also prohibit the rebuilding of an article of upholstered furniture or bedding without specified labeling, thus changing the definition of a crime and thereby imposing a state-mandated local program. It would also make other related changes.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 402 (AB 111) Battin. Agriculture.

(1) Existing law sets forth the qualifications for, and provides for the appointment of, each county agricultural commissioner by the board of supervisors of that county. Existing law also requires the Secretary of Food and Agriculture, when a vacancy in the office of commissioner occurs, to immediately transmit to the board of supervisors or other appointing power a list of persons who are licensed by the secretary to be eligible for the position. Existing law provides that if the appointing power fails to appoint a commissioner from the list within 30 days after receipt of the list, the secretary is required to appoint a commissioner from that list.

This bill would revise this latter provision by requiring the secretary to appoint a commissioner from the list if the appointing power fails to appoint a commissioner within 60, rather than 30, days after receipt of the list of eligible persons.

(2) Under existing law, in effect until January 1, 1998, upon recommendation of the county agricultural commissioner and upon making a finding that extraordinary circumstances have resulted in the need for inspection of imported fruits, nuts, or vegetables, the board of supervisors of a county is authorized to establish a schedule of fees to be charged to the importer, by the commissioner, for the recovery of costs connected with the commissioner's inspection.

This bill would continue that existing law beyond January 1, 1998, by deleting the repeal date.

(3) The bill also would make technical, nonsubstantive changes, by referring to the secretary, rather than to the director, of the Department of Food and Agriculture.

Ch. 403 (AB 593) Cardoza. Food: raw eggs.

Existing law, the California Uniform Retail Food Facilities Law, requires raw shell eggs to be stored and displayed at 45°F, commencing January 1, 1998 until January 1, 2000, except under certain conditions.

Existing law provides for the regulation of the production and marketing of eggs. Repeat violations of these provisions or any regulation adopted pursuant thereto is a misdemeanor. These provisions define "egg handler" as a person engaged in the business of producing, candling, grading, packing, or otherwise preparing shell eggs for market or who engages in the operation of selling or marketing eggs that he or she has produced, purchased, or acquired from a producer, or which he or she is marketing on behalf of a producer, whether as owner, agent, employee, or otherwise.

This bill would make it unlawful for an egg handler to hold, store, transport, or display eggs that are packed or graded for human consumption unless the eggs are held, stored, transported, or displayed at an average ambient temperature of 45°F or lower or at a temperature equal to or less than that established by regulations of the United States Department of Agriculture. The bill would set forth exceptions to this requirement. The bill would make it unlawful for an egg handler to sell, offer for sale, or expose for sale eggs (1) that are packed or graded for human consumption that are not accompanied with notice of refrigeration requirements using designated labeling on the consumer container or prescribed signs at the point of sale and (2) that are packed for human consumption that are not labeled with prescribed "Sell-by" information on the container and subcontainer and the identification of the plant of origin. By changing the definition of a crime and increasing the duties of county agricultural commissioners, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 404 (AB 1023) Mazzoni. Teacher credentialing.

Existing law prescribes the minimum requirements for the preliminary multiple or single subject teaching credential.

This bill, commencing January 1, 2000, would add demonstration of basic competency in the use of computers in the classroom, as specified, to those minimum requirements.

Existing law requires completion of designated studies for the professional multiple or single subject teaching credential, including the study of computer-based technology and the uses of technology in educational settings.

This bill would require the above-referenced studies to be completed in accordance with the commission's standards of program quality and effectiveness, and that the study of computer-based technology be of advanced computer-based technology.

Ch. 405 (AB 307) Kaloogian. Pupils: suspension and expulsion.

Existing law specifies the acts for which a pupil may be suspended or expelled. Those acts include causing, attempting to cause, or threatening to cause physical injury to another person; possessing, selling, or otherwise furnishing an explosive or other dangerous object, as specified; causing or attempting to cause damage to school or private property; and disrupting school activities or otherwise willfully defying the valid authority of school personnel engaged in the performance of their duties.

This bill would add making terroristic threats, as specified, against school officials or school property, or both, to the acts for which a pupil may be suspended or expelled.

Ch. 406 (AB 1310) Wayne. Air pollution: San Diego district budget: permit fees.

Existing law generally prohibits air pollution control districts and air quality management districts with an annual budget of less than \$1,000,000, or of \$1,000,000 or more, respectively, from increasing fees for permits to construct or operate by more than 30% or 15%, respectively, in a calendar year, except as specified. Those provisions do not apply to the South Coast Air Quality Management District.

This bill would provide that the San Diego County Air Pollution Control District's individual fees for those permits, effective January 1, 1998, may reflect the district's actual costs and, on and after January 1, 1999, the bill would authorize the San Diego district to increase individual fees for authority-to-construct permits or permits to operate by more than 15% in any fiscal year only if the total, aggregate increase in existing fees for those permits does not exceed 15% in the fiscal year. Those provisions would become inoperative upon the occurrence of a specified condition.

Ch. 407 (AB 1564) Committee on Budget. Claims against the state: appropriation.

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate \$840,350.60 from various funds and accounts of the state, according to a specified schedule, to the Executive Officer of the State Board of Control to pay claims accepted by the State Board of Control.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 408 (SB 146) Johnston. Firearms: licenses.

Existing law authorizes the chief or other head of a municipal police department of any city or county to issue a license to carry a concealed firearm to a qualified resident of the county in which the city is located.

This bill instead would provide that the chief or other head of a municipal police department of a city or county may only issue a license to carry a concealed firearm to a qualified resident of that city.

Ch. 409 (SB 355) Monteith. Transactions and use taxes: City of Madera.

Existing law authorizes various local governmental entities, in accordance with certain requirements and limitations, to levy transactions and use taxes pursuant to the Transactions and Use Tax Law.

This bill would authorize the City of Madera to impose a transactions and use tax at a rate of 0.25% by the adoption of an ordinance or resolution, as specified, if certain

conditions are met. Revenues from the tax could be used only for funding public safety services, as provided.

Ch. 410 (SB 914) Brulte. Criminal procedure: sentencing: arraignment.

(1) Existing law provides that an act or omission that is punishable in different ways by different provisions may be punished by either of those provisions.

This bill instead would provide that the act or omission shall be punished under the provision that provides the longest potential term of imprisonment, but in no case shall the act or omission be punished under more than one provision. The bill would further provide that if any provision that would otherwise apply to the person prohibits the granting of probation, then the person shall not be granted probation. By increasing the punishment for existing crimes, this bill would impose a state-mandated local program.

(2) Existing law, scheduled to be repealed on January 1, 1998, provides that when an accusatory pleading is filed in Sierra County and the defendant is in the custody of Nevada County, he or she may be arraigned before a court in Nevada County.

This bill would extend the operation of this provision until January 1, 2001.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 411 (SB 605) Maddy. Bernard E. Witkin State Law Library.

Existing law provides for a California State Library under the direction of a State Librarian.

This bill would express the Legislature's findings and declarations of the importance of the work of the late legal scholar Bernard E. Witkin. The bill would authorize the State Librarian to name the law library of the California State Library as the Bernard E. Witkin State Law Library of California, and would permit appropriate physical designation by using nonstate funds.

Ch. 412 (AB 445) Pacheco. Crimes: attempts: sentencing.

Existing law generally provides that every person who attempts, but fails, to commit any crime shall be punished by $\frac{1}{2}$ the term of imprisonment or fine provided for the completed crime. Notwithstanding this provision, a person guilty of attempted murder of a peace officer or firefighter, when the person knows or reasonably should know that the victim is a peace officer or firefighter engaged in the performance of his or her duties, or attempted willful, deliberate, and premeditated murder of any person, shall be punished by imprisonment in the state prison for life with the possibility of parole. The minimum term of imprisonment for a person sentenced to life with possibility of parole is 7 years.

This bill would provide that a person guilty of attempted willful, deliberate, and premeditated murder of a peace officer or firefighter, when the person knows or reasonably should know that the victim is a peace officer or firefighter engaged in the performance of his or her duties, shall be punished by imprisonment in the state prison for 15 years to life and that the person shall not be released prior to serving 15 years in confinement.

Ch. 413 (AB 446) Pacheco. Murder: punishment.

Existing law, amended by initiative statute, provides that any person guilty of murder in the 2nd degree shall suffer confinement in the state prison for a term of 25 years to life if the victim was a peace officer who was killed while engaged in the performance of his or her duties, and the defendant knew, or reasonably should have known, that the victim was such a peace officer engaged in the performance of his or her duties.

This bill would increase this term of punishment to confinement in the state prison for life without possibility of parole when the defendant specifically intended to kill the peace officer or to inflict great bodily injury on the peace officer, or personally used a dangerous or deadly weapon or a firearm in the commission of the offense.

This bill would incorporate additional amendments to Section 190 of the Penal Code proposed by Chapter 598 of the Statutes of 1996 but not yet approved by the voters, to be operative if that chapter is approved by the voters at a statewide special election held in 1997 or if no such election is held in 1997.

This bill would provide that it shall become effective only when submitted to, and approved by, the voters.

Ch. 414 (SB 1039) M. Thompson. Disabilities: regional centers.

Existing law requires the State Department of Developmental Services to contract with regional centers for the provision of various services and supports to persons with developmental disabilities.

This bill would require the department, the State Council on Developmental Disabilities, area boards on developmental disabilities, and regional centers to make their best efforts to ensure representation by persons with developmental disabilities (consumers) and family members representing California's multicultural diversity when convening any task force or advisory group.

This bill would require certain services, including planning and review, for the transition process from a developmental center to a community living arrangement.

This bill would state the intent of the Legislature that the department ensure that regional centers meet their obligations in providing services to persons with developmental disabilities.

Under existing law, consumers may be released from state hospitals for provisional placement, with consent from specified persons, for not to exceed 6 months.

This bill would instead provide that consumers may be released from developmental centers for provisional placement, with consent from specified persons, for not to exceed 12 months.

This bill would require the Health and Welfare Agency to contract with an independent consultant to conduct an evaluation of the policies and procedures used by the department and regional centers in providing services and supports to consumers. The bill would appropriate \$500,000 from the General Fund to the Health and Welfare Agency for this purpose.

This bill would provide for the appointment of a representative to assist a consumer with regard to his or her rights and interests under specified circumstances.

Existing law sets forth a procedure under which area boards on developmental disabilities are required, to the extent that resources are available, to review the policies and practices of publicly funded agencies that serve consumers to determine if the programs are meeting their obligations under law.

This bill would revise this procedure.

This bill would provide that consumers in regional centers are eligible to receive supplemental services including additional staffing.

Existing law contains requirements that must be met by an agency seeking to contract with the department as a regional center. One of these requirements is that a minimum of 50% of the members of the governing board shall be persons with developmental disabilities or their parents or legal guardians.

This bill would revise these requirements on July 1, 1999.

Existing law requires the department to enter into 5-year contracts with regional centers, subject to specified requirements and limitations.

This bill would require that each contract include a provision requiring a regional center to render services in accordance with applicable provisions of state laws and regulations, as well as specified annual performance objectives.

Existing law requires the department to perform various duties in order to ensure regional center contract compliance.

This bill would impose additional requirements on the department concerning its duties for ensuring regional center contract compliance.

Existing law sets forth provisions governing meetings of the board of directors of each regional center, and requires these meetings to be open and public.

This bill would revise these requirements.

Existing law requires that the services and supports to which a consumer is entitled are to be determined in accordance with his or her individual program plan.

Existing law establishes a process for developing this plan.

This bill would modify provisions relating to the process for development of individual program plans, as well as provisions relating to the contents of these plans.

This bill would also establish a complaint process for consumers and their representatives who believe that any right to which the consumer is entitled has been abused, punitively withheld, or improperly denied by a regional center, developmental center, or service provider, except that this process would not apply to certain disputes for which an appeal procedure exists in law. This provision would be operative on January 1, 1998.

Existing law imposes certain requirements applicable in the event of an unallocated reduction in a regional center's budget, or if an individual regional center notifies the department that it will be unable to provide services and supports to eligible consumers throughout the fiscal year within the level of funding available in the contract, including a requirement that the regional center implement modifications of its plan upon approval of the department.

This bill would require that if the required plan modification is significant, the department shall require the regional center to hold an additional public hearing to review and comment upon the modification.

Existing law requires the State Council on Developmental Disabilities to request from all regional centers information on priority services needed, but currently unavailable.

This bill would, instead, require that the council request information, not less than once every 3 years, from all regional centers on the types and amounts of services and supports needed, but currently unavailable.

This bill would make related changes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 415 (AB 175) Torlakson. Environmental quality: development projects: notification.

Existing law, the California Environmental Quality Act, requires a state or local lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, as defined.

The act exempts specified development projects of not more than 45 units.

This bill would apply that exemption to those projects of not more than 100 units, and make related changes.

The bill would require the Office of Planning and Research to ensure that affected agencies are notified regarding early consultation requested by a lead agency with respect to certain projects, and meetings that are requested with respect to certain of those projects.

Ch. 416 (AB 206) Hertzberg. Citizen Complaint Act of 1997.

Existing law provides for the establishment and operation of state agencies.

This bill would require state agencies, including the California State University, to make available on their Internet websites, on or before July 1, 1998, or within 6 months of the establishment of such a site, whichever is later, a plain language form through which individuals can register complaints or comments relating to the performance of that state agency. This bill would require state agencies making a complaint form available on their Internet websites, to the extent feasible, to advise individuals calling to lodge a complaint of specified information and to include their Internet website address in the telephone directory. This bill would also authorize public libraries, to the extent permitted through donations and other means, to provide Internet access to their patrons and to advertise that they provide Internet access. These provisions would be known as the Citizen Complaint Act of 1997. This bill would require all state agencies that have Internet websites to implement these provisions in a manner that is consistent with the statewide strategy for electronic commerce as established by the Department of Information Technology.

Ch. 417 (AB 259) Scott. Pupils: interdistrict attendance: expulsion appeal.

(1) Existing law permits a pupil expelled by the governing board of a school district to appeal that decision to the county board of education.

This bill would permit a county board of education in a class 1 or class 2 county, as specified, to have a hearing officer or impartial administrative panel, as specified, hear the appeal and to submit a recommended decision, including any findings or conclusions required for that decision, to the county board of education for a final order of the county board of education.

(2) Existing law permits a person having legal custody of a pupil who has requested interdistrict attendance to appeal the denial of that request to the county board of education.

This bill would permit a county board of education in a class 1 or class 2 county, as specified, to have a hearing officer or impartial administrative panel, as specified, conduct any hearing that is scheduled by the county board of education, and would specify the time in which a decision must be made following any hearing by either the county board of education or the hearing officer or impartial administrative panel.

Ch. 418 (AB 421) Baugh. Air pollution: refrigerated trailers.

Existing law does not expressly provide for the regulation of air pollution from refrigerated trailers.

This bill would require refrigerated trailers to be classified as mobile sources and regulated by the State Air Resources Board on a statewide basis to prevent confusion concerning whether the trailers are stationary sources when not being driven and to prevent inconsistent regulation by air pollution control districts and air quality management districts of vehicles that are operated in more than one district. The bill would require the state board to develop regulations by January 1, 2000, to achieve reductions in emissions from refrigerated trailers.

Ch. 419 (AB 467) Goldsmith. Highway tolls: transit service: demonstration project.

Existing law authorizes the San Diego Association of Governments (SANDAG), in cooperation with the Department of Transportation, to conduct a demonstration program pursuant to which single-occupant vehicles are allowed to use the high-occupancy vehicle lane on a specified portion of Interstate Highway Route 15 (I-15) for a fee. This authorization will be repealed on January 1, 1998.

This bill would extend the repeal date until January 1, 2000.

Ch. 420 (AB 719) Torlakson. State-County Property Tax Administration Program.

Existing property tax law authorizes an eligible county, as defined, upon the recommendation of the assessor and by resolution of its board of supervisors, to elect to participate in the State-County Property Tax Administration Program, pursuant to which a participating county may, in each of the 1995–96, 1996–97, and 1997–98 fiscal years, receive a loan from the state, as specified, for the purposes of providing supplemental funding for that county's local administration of the ad valorem property tax.

This bill would modify these provisions to instead authorize a county participating in the State-County Property Tax Administration Program to receive a loan, as specified by existing provisions, in each fiscal year from the 1995–96 fiscal year to the 2000–01 fiscal year, inclusive.

Existing law provides that any loans to a county under this program shall not be used to supplant the current level of funding. Existing law requires a participating county to maintain a base staffing level, including contract staff, and a total funding level in the county assessor's office, independent of any loan proceeds, equal to the levels in the 1994–95 fiscal year, except for certain amounts.

This bill would provide that, commencing with the 1996–97 fiscal year, if a county was otherwise eligible but was unable to participate in this program in the 1995–96 fiscal year because it did not meet the required funding level and staffing, that county shall maintain a base staffing level, including contract staff, and a total funding level in the county assessor's office equal to the levels in the 1995–96 fiscal year.

This bill would also require an assessor, prior to recommending participation in the program, to consult with the county tax collector, and any other county agency directly involved in property tax administration, to discuss the needs of the program for the duration of the contractual agreement.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 421 (AB 1209) Olberg. Vehicles: moderate density residential districts; speed limits; demonstration programs.

Existing law provides that the prima facie speed limit is 15 miles per hour under certain circumstances and 25 miles per hour under other specified circumstances. Existing law requires that the prima facie speed limit be applicable unless changed as authorized in the Vehicle Code, and, if so changed, only when signs have been erected giving notice thereof.

This bill would, additionally, provide that, until March 1, 2001, the prima facie speed limit is 35 miles per hour on any highway, other than a state highway, in any moderate density residential district, as defined, within the boundaries of the Town of Apple Valley when posted with a sign giving notice of that speed limit, unless a different speed is determined by local authority under procedures set forth in the Vehicle Code.

The bill would, until March 1, 2001, authorize the Town of Apple Valley, in conjunction with the Department of Transportation and the Department of the California Highway Patrol, to conduct a demonstration program, as specified, that establishes a prima facie speed limit of 35 miles per hour, as described above. The bill would require the Town of Apple Valley to report to the Legislature, as specified.

Ch. 422 (SB 196) Knight. Animal abuse.

Under existing law, any authorized officer making an arrest for specified animal abuse offenses involving fighting animals or birds is authorized to lawfully take possession of all birds or animals and all paraphernalia used or employed in the violation of any of the criminal provisions relating to the fighting of birds or animals.

This bill would revise and recast this provision to, among other things, make the provision applicable to additional animal abuse offenses involving fighting animals or birds, including owning, possessing, or training any bird or animal with the intent that the bird or animal shall be engaged in an exhibition of fighting, or being present at an exhibition of the fighting of birds or animals. The bill would require the officer, upon taking possession, to inventory the items seized and question the persons present as to the identity of the owner or owners of the items. The bill also would authorize the court to order the destruction of any animal or bird for which ownership cannot be determined, as specified, and to order the arrested person, upon conviction, to make payment to the appropriate public entity for the costs incurred in the housing, care, feeding, and treatment of the animals or birds.

Ch. 423 (SB 259) Haynes. Mobilehome parks: attachment and installation.

Existing law, the Mobilehome Parks Act, requires the Department of Housing and Community Development to establish statewide regulations respecting manufactured home, mobilehome and commercial coach foundation systems. Existing law requires that prior to the installation of a manufactured home, mobilehome, or commercial coach on a foundation system, the owner or a licensed contractor must obtain a building permit from the appropriate enforcement agency.

The existing Mobilehome Parks Act separately requires that a permit be obtained from the appropriate enforcement agency relating to, and provides standards and procedures for, the initial installation or subsequent reinstallation of a manufactured home or mobilehome, on any site for the purpose of human habitation or occupancy as a dwelling.

Existing law limits dealers, with respect to the sale of manufactured homes, mobilehomes, and commercial coaches that have not been installed on a foundation system, to solicit or obtain listings, engage in multiple listings only with other dealers, or engage in payments only to other dealers or groups of dealers.

This bill would allow dealers, with respect to the sale of used manufactured homes or mobilehomes that have not previously been installed on a foundation system, to solicit

or obtain listings, engage in multiple listings, or engage in payments with other dealers, groups of dealers, or real estate licensees.

Under existing law, any person who knowingly violates any provision of the Mobilehome Parks Act, or related rules or regulations, is guilty of a misdemeanor.

This bill would apply the permit requirements required of an owner or licensed contractor when a manufactured home, mobilehome, or commercial coach is installed as a fixture or improvement to real property. However, when a manufactured home, mobilehome, or commercial coach is installed as a chattel, the bill would apply standards and procedures for the initial installation or subsequent reinstallation of a manufactured home or mobilehome, on any site for the purpose of human habitation or occupancy as a dwelling.

Because it would change the definition of crimes, the bill would impose a state-mandated local program.

This bill would also make technical and conforming changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 424 (SB 263) McPherson. Fish and game: licenses.

(1) Existing law provides for the issuance of lifetime sport fishing and sportsman's licenses by the Department of Fish and Game for specified fees.

This bill would, additionally, authorize the department to issue lifetime hunting licenses for specified fees. The bill would also change the amount of the fees and the age classifications for lifetime sport fishing and sportsman's licenses. Because a violation of those laws are crimes under existing law, the bill would impose a state-mandated local program by changing the definitions of crimes.

In addition, the bill would provide that upon payment of additional specified fees, a person holding a lifetime sport fishing license, a lifetime hunting license, or a lifetime sportsman's license would be entitled to additional fishing and hunting privileges, as specified.

The bill would authorize the department to designate a nonprofit organization, organized under the laws of this state, or the California chapter of a nonprofit organization, organized under the laws of another state, as a license agent for the sale of the lifetime licenses, as specified.

The bill would provide that a person who received a valid lifetime sport fishing license or a valid lifetime sportsman's license prior to January 1, 1998, may obtain a refund of the difference between the amount paid for the license and the license fee in effect on January 1, 1998.

(2) The bill would require the department, on or before January 1, 2001, and January 1, 2003, to prepare and submit a report to specified committees of the Legislature with regard to the issuance of lifetime sportsman's licenses, lifetime hunting licenses, and lifetime sport fishing licenses and the status of the Lifetime License Trust Account in the Fish and Game Preservation Fund.

(3) Existing law continuously appropriates the money in the fund to the department to carry out the Fish and Game Code.

Because this bill would require that a portion of the revenue received from the sale of lifetime hunting licenses and that revenue received from the sale of additional fishing and hunting privileges to be deposited in the funds, and because the bill would change and impose duties on the department, the bill would make an appropriation.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 425 (SB 367) Sher. Air pollution: bay district: motor vehicle fee revenues.

(1) Existing law requires specified motor vehicle fee revenues generated in the Bay Area Air Quality Management District to be subvented to the bay district and used for specified purposes that include, until January 1, 1998, implementation of specified bicycle facility improvement projects.

This bill would continue, until January 1, 2000, the inclusion of those bicycle facility improvement projects among the projects for which those revenues are required to be expended, thereby creating a state-mandated local program by imposing new duties on local agencies.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 426 (SB 416) Kelley. State Highway Route 94: restrictions.

(1) Existing law authorizes the Department of Transportation to restrict the use of, or close, any state highway under specified circumstances.

This bill would require, upon conclusion of a departmental study and a determination by the Director of Transportation, with the concurrence of the Commissioner of the California Highway Patrol, that certain truck traffic constitutes a safety hazard to schoolbus operations, the department to determine methods of mitigating the safety hazard, including, but not limited to, prohibiting the use of truck tractor-trailer combinations on a certain portion of State Highway Route 94 during specific hours on those days that public school districts utilize that portion of the highway to operate schoolbuses.

Because the bill would make it a crime to operate a vehicle in violation of this restriction, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 427 (SB 454) Kelley. Irrigation districts: 500,000-acre districts: board of directors: salaries.

The Irrigation District Law, with regard to 500,000-acre districts, authorizes each director to receive a salary fixed by the board of directors of the district at an amount not to exceed \$1,000 per month.

This bill would instead authorize each director to receive any salary fixed by an ordinance that is subject to referendum and adopted by the board in an amount that does not exceed the salary of a member of the Imperial County Board of Supervisors. The bill would subject the adoption of the ordinance to specified provisions of the Water Code.

Ch. 428 (SB 464) Rainey. Pesticides.

Existing law requires a thorough evaluation by the Department of Pesticide Regulation before a substance is registered as a pesticide for the first time in this state.

This bill would require the Director of Pesticide Regulation, by January 1, 1999, to implement a program for the expedited registration or the expedited amendment of the registration of any pesticide classified by the United States Environmental Protection Agency as a "public health pesticide" or "antimicrobial pesticide" and that is determined by the director to have human health protection benefits that warrant eligibility for expedited processing. The bill also would authorize the director to provide expedited registration for any other pesticide product.

The bill would permit the director to waive the submission or review, or both, of efficacy data developed by a registrant as a prerequisite for registration of any antimicrobial pesticide product if specified conditions are met.

Ch. 429 (SB 515) Polanco. Cosmetology: barbering: electrology: school requirements.

Under existing law various schooling, licensing, and continuing education provisions of the Barbering and Cosmetology Act will become inoperative July 1, 1997, and will be repealed effective January 1, 1998.

This bill would, with respect to those provisions, extend the date of inoperation until July 1, 2001, and the date of repeal until January 1, 2002. The bill would also impose certain requirements for schools of barbering and requirements for schools of electrology subject to the July 1, 2001, inoperative date and January 1, 2002, repeal date.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 430 (SB 707) Calderon. Pupil health assessment.

(1) Existing law requires the State Department of Education, the State Department of Health Services, and the State Department of Social Services to jointly enter into a collaborative agreement with the California State University, the University of California, and the California medical schools, to establish a standardized health assessment of the children within public schools. The University of California is the agency responsible for coordinating that effort.

This bill, instead, would designate the California State University as the agency responsible for coordinating that effort and would make changes to related provisions of law.

(2) Existing law requires the health assessment to be conducted over a 4-year period and to be completed on or before December 31, 1996.

This bill would instead require the health assessment to be completed on or before December 31, 2002.

(3) Existing law requires the University of California to notify each school selected to participate in the health assessment about any pupils at that school for whom the assessment has detected any health problems.

This bill would eliminate that requirement.

(4) Existing law provides that the agencies described in (1) are only required to implement that health assessment upon the availability of sufficient private sector funding to cover all costs relating to the health assessment.

This bill would declare the intent of the Legislature that each fiscal year funds be appropriated to the California State University for the purposes of the health assessment in an amount equal to the private sector funds received for the relevant fiscal year, up to a maximum of \$120,000 in state funds in any fiscal year. The bill would provide that under no circumstances shall state funds appropriated for the purposes of the program be apportioned in any fiscal year until the private funds necessary to fully fund the assessment have been received.

Ch. 431 (SB 744) Hughes. Local Agency Public Construction Act.

The existing Local Agency Public Construction Act authorizes a county board of supervisors to award annual contracts which do not exceed \$1,000,000 for repair, remodeling, or other repetitive work to be done according to unit prices, as defined.

This bill would increase the maximum contract amount that the board is authorized to award under these circumstances to \$3,000,000 each, to be adjusted annually, and would make technical changes to existing law.

Ch. 432 (SB 850) Kelley. Health: local agency joint powers agreement.

Existing law requires counties to provide or secure certain public health care services, and authorizes the formation of local health care districts and the establishment of municipal hospitals for the purpose of providing needed public health care services.

Existing law, the Joint Exercise of Powers Act, permits 2 or more public agencies to enter into an agreement to jointly exercise any power common to the contracting parties.

This bill would provide that, notwithstanding the law relating to joint exercise of powers, a private, nonprofit hospital in a county of the 21st and 33rd class may enter into joint powers agreements with a public agency. However, the bill would prohibit nonprofit hospitals and public agencies participating in a joint powers agreement entered into under this provision from reducing or eliminating any emergency services, as a result of that agreement, following the creation of the joint powers authority without a public hearing by the authority. The bill would require the joint powers authority to

provide public notice of the hearing, as prescribed, to the communities served by the authority. The bill also would provide that these provisions shall not be construed to grant any power to any nonprofit hospital that participates in an agreement, to levy any tax or assessment, or to permit any entity, other than a nonprofit hospital corporation or a public agency, to participate as a party to an agreement authorized under these provisions.

This bill would also provide that, notwithstanding the law relating to joint exercise of powers, a nonprofit hospital in a county of the 3rd class may enter into joint powers agreements with a public agency and would state the intent of the Legislature in this connection. The bill would impose on the participants of and authority so formed the requirement of a noticed public hearing before any reduction or elimination of emergency services.

The bill would also state the finding and declaration of the Legislature that a special law is necessary and that a general law cannot be made applicable.

Ch. 433 (SB 908) Lee. Alameda-Contra Costa Transit District: special taxes.

Under existing law, the Board of Directors of the Alameda-Contra Costa Transit District is authorized to impose special taxes that must be applied uniformly to all taxpayers or all real property within the district.

This bill would make those provisions applicable to real property within any portion of the district that is coterminous with the boundaries of a city or the boundaries of contiguous cities, including properties added to the district.

The bill would require the proceeds of the special taxes to be used to provide, within the area taxed, for the operation, maintenance, or acquisition of any public improvement or utility for transportation purposes.

Ch. 434 (SB 997) Schiff. Title insurance: Antirebate Compliance Bureau.

Existing law prohibits a title insurer, a controlled escrow company, and an underwritten title company from making any rebate of any portion of the fee or charge shown by its schedule of title policy rates filed with the Insurance Commissioner.

This bill would create, until 3 years after the effective date of the bill, the Antirebate Investigation and Enforcement Unit within the Department of Insurance and would require the commissioner to ensure that the unit aggressively pursues all reported incidents of probable unlawful rebates and related activities, and forwards to the appropriate disciplinary body the names and supporting evidence of any licensed individuals suspected of actively engaging in that unlawful activity. The bill would require any title insurer, underwritten title company, or controlled escrow company, or any other person that believes that an unlawful rebate is being made to send to the department, on a form prescribed by the department, the information requested by the form and any additional information relative to the circumstances of the unlawful rebate, and would require the department to review each report and investigate those it deems necessary to establish the validity of the allegations and take other specified actions.

The bill would also require that the unit's costs of investigation and enforcement be borne by all the title insurers, underwritten title companies, and controlled escrow companies admitted to transact the business of title insurance in the state, and would require the department to divide these costs among those title companies on a pro rata basis, as specified. It would create the Title Insurance Fund in the State Treasury into which all assessments would be deposited and that would be available for expenditure, upon appropriation to the department, for the exclusive support of investigations and enforcement relating to antirebate activities.

This bill, in addition, would declare that it is to take effect immediately as an urgency statute.

Ch. 435 (SB 1100) Solis. Libraries.

(1) Existing law requires state funds for a library's foundation program to supplement, but not supplant, local revenues appropriated for the public library. Under existing law, in order for a public library to receive state funds for its foundation program, the total amount of local revenues, as defined, appropriated for the public library for that fiscal year is required to be equal to at least the total amount of local revenues, as defined,

appropriated for the public library in the previous fiscal year. Existing law authorizes any city, county, district, or city and county to request a waiver of this requirement by demonstrating that the percentage of the reduction in local revenues appropriated for the public library is no greater than the percentage of the reduction of local revenues received by the city, county, district, or city and county operating the public library as a result of certain statutory changes having the effect of shifting property tax revenues from cities, counties, special districts, and redevelopment agencies to school districts and community colleges.

This bill would authorize any city, county, district, or city and county also to request a waiver by demonstrating the percentage of reduction in local revenues appropriated for the library is no greater than the percentage of reduction of local revenues received by the city, county, district, or city and county operating the public library as a result of the addition of Article XIII D, otherwise known as the Right to Vote on Taxes Act, to the California Constitution as approved by the voters at the November 5, 1996, general election.

(2) This bill would incorporate additional changes in Section 18025 of the Education Code, proposed by AB 345, to be operative only if AB 345 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 436 (AB 816) Brewer. Surplus line brokers: disclosure statements.

Existing law generally requires insurance to be transacted in this state with admitted insurers, but permits insurance to be transacted with nonadmitted insurers through surplus lines brokers, and places various restrictions on that insurance.

Existing law provides that certain of these restrictions do not apply to reinsurance, and certain transportation insurance, but requires that insurance, other than reinsurance, to be placed by a special lines' surplus line broker.

This bill would extend the exemption to spacecraft insurance.

This bill would also provide that the placement of special lines' insurance by a surplus line broker is not subject to a requirement that the insurer establish its financial stability with the Insurance Commissioner and meet related requirements.

This bill would authorize the commissioner to order a licensee to no longer place special lines' insurance with a particular insurer. Since a violation these provisions would be a misdemeanor, the bill would impose a state-mandated local program.

Existing law requires that the signature of an applicant be obtained on a disclosure statement with respect to insurance purchased from a nonadmitted insurer or surplus line broker. In the case of commercial insurance coverage a faxed signature or comparable electronic transmittal is authorized, as specified.

This bill would delete the applicability of that provision only to commercial insurance coverage.

The bill would incorporate additional changes to Section 1764.1 of the Insurance Code proposed by AB 245, contingent upon the prior enactment of that bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 437 (SB 1312) Leslie. Fisheries management: drinking water.

Existing law provides for the California Safe Drinking Water Act and directs the State Department of Health Services to adopt and enforce primary drinking water standards.

This bill would provide that the Department of Fish and Game may not introduce a poison to a drinking water supply for purposes of fisheries management unless the State Department of Health Services determines that the activity will not have a permanent adverse impact on the quality of the drinking water supply or wells connected to the drinking water supply. The bill would set forth requirements for making that determination.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 438 (AB 1317) Ducheny. Postsecondary education: resident classification.

(1) Existing law establishes uniform student resident requirements for purposes of ascertaining the amount of fees to be paid by students at public postsecondary educational institutions. Existing law entitles certain students to resident classification notwithstanding certain rules used to determine the place of residence. These provisions do not apply to the University of California unless the Regents of the University of California, by resolution, make them applicable.

This bill would entitle any amateur student athlete, as defined, in training at the United States Olympic Training Center in Chula Vista to resident classification for tuition purposes until the student athlete has resided in the state the minimum time necessary to become a resident. Under provisions of existing law summarized above, this provision would not apply to the University of California unless the regents, by resolution, make it applicable. To the extent the bill would require community colleges to change practices or procedures with respect to determining residency, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 439 (AB 407) Napolitano. County employees: retirement.

The County Employees Retirement Law of 1937 prescribes a \$750 retired death payment.

This bill would authorize boards of supervisors to elect to increase that amount to up to \$5,000.

Ch. 440 (AB 489) Figueroa. Life insurance.

(1) Existing law does not generally regulate the inclusion of incontestability clauses in life insurance policies that provide that coverage is incontestable on the grounds of suicide for a period of time after the policy is in effect, except in the case of fraternal benefit societies. Existing law provides for viatical settlements in which the owner of life insurance transfers rights in exchange for compensation less than the death benefit.

This bill would provide that if a group life insurance policy contains a provision that makes a certificate holder's coverage contestable on the grounds of suicide for a period following commencement of coverage, only the unexpired portion of that period shall be applied to a certificate holder's individual conversion policy of an equal or lesser amount of coverage.

(2) Existing law provides that a person insured under a group life insurance policy may make to any person, other than the policyholder, an assignment of all or any part of the incidents of ownership conferred on him by the policy or by law, but existing law provides that this right is subject to the terms of the policy, or an agreement between the insured, the group policyholder, and the insurer.

This bill would provide that a person diagnosed with a terminal illness has a right to make an absolute assignment for value of his or her interest in life insurance.

The bill would require the viatical broker to notify the spouse of a terminally ill viator of the viatication.

Ch. 441 (AB 620) Baugh. Criminal records: dissemination.

Existing law requires that specified persons be furnished with state summary criminal history information when needed in the course of their duties.

This bill would provide that an individual's known aliases and booking photograph, information identifying whether an individual has been convicted of any violent felony, and an unaltered copy of the booking and property record, excluding any medical information, may be furnished to a licensed bail agent or bail bond licensee upon request to a local law enforcement agency when a bench warrant has been issued for a client of

the agent or licensee. The agent or licensee would be required to pay a fee equal to the cost of providing the information. This bill would provide that any information obtained pursuant to these provisions is confidential and any violation of this confidentiality is a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 442 (AB 758) Morrow. Civil procedure: bank notices.

(1) Existing law requires, with specified exemptions, any person who makes more than 10 service of processes within the state during any calendar year to register as a process server with the county clerk of the county in which he or she resides. Under existing law, a certificate of registration as a registered process server includes prescribed information and may be issued to a natural person or to a partnership or a corporation upon payment of a \$100 fee to the county clerk for registration.

This bill would instead require a person, corporation, or partnership to file and maintain a verified certificate of registration as a process server if the person, corporation, or partnership serves process for compensation or in the expectation of compensation, as specified. The bill would require the registrant to sign the certificate of registration under penalty of perjury. The bill would require that a completed fingerprint card be submitted to the Department of Justice and the Federal Bureau of Investigation as part of the initial filing and would authorize a presiding judge of the superior court to review a criminal record and revoke the registration. The registrant would be required to pay a \$100 fee, a fingerprint card fee, and an identification card fee to the county clerk. The bill would impose a state-mandated local program by imposing new or increased duties on county clerks with respect to the registration of process servers. The bill would also create new crimes by expanding the registration requirements and revise the definition of a crime by expanding the crime of perjury.

(2) Existing law authorizes issuance of a subpoena for the personal records of any consumer, as defined, and for employment records, and requires that a witness be given notice of a motion to quash or modify the subpoena for employment records.

This bill would provide that the notice of a motion to quash or modify a subpoena for personal records of any consumer may be given to a deposition officer, as defined. The bill would provide that the notice of a motion to quash or modify the subpoena for employment records be given at least 5 days prior to production to the witness and the deposition officer.

(3) Existing law authorizes a court to make an order quashing a subpoena, modifying it, or directing compliance with specified terms or conditions.

This bill would specify that the terms and conditions may include protective orders.

(4) Existing law, operative January 1, 1998, revises provisions governing bank notices to customers regarding account statements.

This bill would extend that operative date to January 1, 2001.

(5) Existing law authorizes an attorney or his or her representative to review and obtain specified patient records prior to the filing of any action if written authorization is given by the patient and prohibits copying by a medical provider, as specified.

This bill would prohibit copying by the medical provider's employer.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state,

reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 443 (AB 829) Thomson. Grand juries.

(1) Existing law provides that, when the grand jury is impaneled, the court shall give the grand jurors specified information.

This bill would require the court to ensure that the grand jury also receives training, as specified.

(2) Existing law requires each grand jury, no later than the end of each fiscal or calendar year, to submit to the presiding judge of the superior court a final report of its findings and recommendations that pertain to county government matters.

This bill would require the grand jury foreperson and his or her designees to be available during the 45-day period following the expiration of the term to clarify the recommendations of the grand jury's report, and require the grand jury to meet with the subject of the investigation, except as specified. This bill would also require the superior court to provide a meeting room and other support to the grand jury.

(3) The act would be known as the Civil Grand Jury Training, Communication, and Efficiency Act of 1997. The bill would include a statement of legislative intent.

(4) This bill would establish a state-mandated local program by imposing new duties on local officials.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 444 (AB 870) Hertzberg. Elder abuse: law enforcement training.

(1) Existing law requires various law enforcement officers to meet specified training standards pursuant to courses of training certified by the Peace Officers Standards and Training (POST) program.

This bill would require every city police officer or deputy sheriff at a supervisory level and below to complete an elder abuse training course certified by POST. By imposing additional duties on local agencies, it would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 445 (AB 1093) Committee on Judiciary. Arbitration.

Existing law governing the enforcement of arbitration agreements provides that, except as specified, in any arbitration pursuant to an arbitration agreement involving a claim for damages when a person is proposed for nomination or appointment to serve as a neutral arbitrator, as specified, that person shall disclose, within 10 days of service of notice of the proposed nomination or appointment, to all parties, certain information concerning the names of prior or pending cases arbitrated by that proposed arbitrator. Existing law provides for the disqualification of a proposed nominee or appointee, as prescribed.

This bill would revise and recast these provisions by, among other things, revising the procedures relating to the disqualification of a neutral arbitrator, as specified and revising the contents of a required notice.

This bill would also make conforming changes.

The bill would also incorporate changes to Section 1286.2 of the Code of Civil Procedure proposed by SB 19, contingent upon its prior enactment.

Ch. 446 (AB 1308) Cardenas. Peace officers.

Under existing law, a security officer of the Department of General Services of the City of Los Angeles designated by the general manager of the department is a peace officer, as specified. These peace officers may be authorized to carry firearms, with the approval of the mayor, when a local emergency has been proclaimed. The authorization to carry firearms continues only while the local emergency remains in effect.

This bill would provide instead that these peace officers are authorized to carry firearms only if authorized by, and under the terms and conditions specified by, the department and that these peace officers are not authorized to carry a firearm while off-duty. This bill would also provide that these peace officers shall complete firearm training and requalification in the use of firearms every 6 months.

Ch. 447 (AB 1325) Bordonaro. Youthful offenders.

Existing law provides for the issuance of a warrant of arrest for a minor if the minor presents a danger to himself or herself or to others, or if the home environment may endanger the minor.

Existing law also requires the clerk of the juvenile court to serve upon a minor a notice and a copy of the petition to declare the minor a ward of the juvenile court. Existing law prescribes the procedure for serving that notice upon a minor who was not detained in custody.

This bill would provide that personal service of the notice and a copy of the petition described above, upon a minor who is not detained in custody, is not required if the whereabouts of the minor are unknown, and all reasonable efforts to locate the minor have failed, or the minor has willfully evaded service of process.

This bill also would revise the above described provision authorizing the issuance of a warrant of arrest for a minor to additionally authorize the issuance of such a warrant if (a) personal service upon the minor is unsuccessful, or the whereabouts of the minor are unknown, and all reasonable efforts to locate the minor have failed or (b) the minor has willfully evaded service of process.

Ch. 448 (AB 1390) House. County recorders.

Existing law prescribes the duties of the county recorder. Existing law provides, among other things, that if the recorder willfully and maliciously commits any of specified acts, including neglecting or refusing to record a document within a reasonable time of receipt, he or she is liable to the aggrieved party for 3 times the amount of damages occasioned by that act.

This bill would exclude documents deemed unrecordable by the county recorder, as defined, from these provisions and would authorize the recorder to provide a form that provides notice to the person attempting to file the unrecordable document that he or she has a right to judicial review. The bill would also require that the form provide notice that it is a public offense to further attempt to record the document without a court order. The bill would also provide that if the court determines the document is recordable, the recorder shall pay the filing fees for the review.

This bill would make it a misdemeanor or an infraction for any person to subsequently attempt to record a document without a court order after the recorder has judged the document unrecordable, as specified. By creating a new crime, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 19.8 of the Penal Code proposed by AB 99, to be operative if AB 99 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 449 (AB 1526) Escutia. Children.

Existing law authorizes the court to appoint private counsel to represent the interests of a child in a custody or visitation proceeding if the court determines that it would be in the child's best interests. The child's counsel is charged with the representation of the child's interests and has specified duties.

Existing law provides that a child's counsel shall have specified rights when ordered by the court.

This bill would provide that the child's counsel, if requested by the court, would have a duty to prepare a written statement of issues and contentions setting forth the facts that bear on the best interests of the child. The statement would be required to set forth a summary of information received by counsel, a list of the sources of information, the results of the counsel's investigation, and other matters as the court may direct. The bill would require a statement of issues and contentions of the child's counsel to be considered when a judicial determination is made regarding custody or visitation. The bill also would authorize the Judicial Council to specify standards for preparation of the statement of issues and contentions and promulgate a model statement with regard thereto.

The bill would delete the provision granting the rights of a child's counsel only when ordered by a court and would also revise, recast, and expand those rights.

Ch. 450 (SB 124) Karnette. Political Reform Act of 1974: contributions: gifts: income.

(1) Existing provisions of the Political Reform Act of 1974 require candidates and committees, as defined, to periodically disclose on reports filed with specified public agencies the political contributions they receive. The act also limits the amount in contributions that candidates, committees, and political parties may receive in elections. The act defines the term "contribution" to include a payment, except to the extent that full and adequate consideration is received unless it is clear from the surrounding circumstances that it is not made for political purposes. The act also includes within the definition of the term "contribution" an expenditure that is made at the behest of a candidate.

This bill would amend the act's definition of the term "contribution" to provide that a payment made at the behest of a candidate is not a contribution when full and adequate consideration is received from the candidate for the payment or when it is clear from the circumstances that the payment was made for purposes unrelated to his or her candidacy. This bill would provide specified circumstances in which it is presumed that a payment made at the behest of a candidate is unrelated to his or her candidacy and specified circumstances in which this type of payment would be deemed to be related to a candidate's candidacy. For payments made at the behest of a candidate who holds public office but that are unrelated to his or her candidacy, this bill would require the candidate to file a document with his or her agency within 30 days identifying, among other things, the amount and source of payments that, in the aggregate, equal or exceed \$5,000 in a calendar year, and that a copy of that document be forwarded to the Fair Political Practices Commission or to the officer with whom elected officers of that candidate's agency file their campaign statements, as specified.

(2) Existing provisions of the Political Reform Act of 1974 regulate the making of gifts to specified public officials and require specified public officials to periodically file a statement of economic interests disclosing, among other things, sources of gifts and income, as defined, to the official. However, the act exempts from the definition of "gift," among other things, a gift to an official that, within 30 days of receipt, is returned to the donor or delivered to a "charitable organization" without being claimed as a deduction for tax purposes. Furthermore, the act exempts from the definition of "income," among other things, travel expenses and per diem received from a bona fide "educational, academic or charitable organization."

This bill would amend the act's definition of "gift" to clarify that a gift is a payment that confers a personal benefit and to provide that an official does not receive a "gift" if, within 30 days after receipt, he or she donates the gift to a nonprofit entity that is exempt from taxation under Section 501(c)(3) of the Internal Revenue Code, rather

than any "charitable organization," and does not claim the donation as a deduction for tax purposes.

This bill would amend the act's definition of "income" to provide that travel expenses and per diem received from a bona fide nonprofit entity that is exempt from taxation under Section 501(c)(3) of the Internal Revenue Code, rather than from an "educational, academic or charitable organization," are exempt from the definition of "income."

(3) Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on persons who violate the provisions of the bill.

(4) This bill would incorporate additional changes in Section 82015 of the Government Code, proposed by SB 363, to be operative only if SB 363 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

(5) This bill would incorporate additional changes in Section 82030 of the Government Code, proposed by SB 946, to be operative only if SB 946 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 451 (SB 220) Rosenthal. Charity racing days: beneficiaries of proceeds.

Existing law requires each licensed racing association, except as specified, to designate a certain number of racing days as charity days, the proceeds of which are distributed to qualified beneficiaries.

This bill would require at least 20% of the distribution to be made to charities associated with the horseracing industry.

Ch. 452 (SB 243) Peace. Security services: concealed firearms.

(1) The Private Investigator Act requires licensing of persons acting as private investigators, subject to specified exemptions. The act does not require licensing of a person who serves process if that person is registered as a process server.

This bill would make technical changes in these provisions.

(2) The Private Security Services Act requires a person who engages in any business regulated by the act to be licensed, as specified. Certain persons are exempt from the act, including, among others, peace officers that meet specified requirements.

This bill would additionally exempt from the act a peace officer acting in accordance with provisions permitting casual or part-time employment as a private security guard or patrolman for a public or private entity. The bill would also delete outdated provisions related to the employment of peace officers as security guards or patrolmen, and make technical changes.

(3) The Private Security Services Act prohibits a licensee, qualified manager, or registered security guard from engaging in specified acts, including carrying a concealed firearm. This prohibition does not apply when certain circumstances exist, including that the person has been issued a permit to carry the concealed firearm. The act also provides that any licensee, qualified manager, or a registered uniformed security guard who wishes to carry a baton in the performance of his or her duties shall qualify to do so pursuant to specified provisions of law.

This bill would, in addition, provide that the prohibition against carrying a concealed firearm does not apply to certain peace officers. It would also exempt certain peace officers who have successfully completed a course of study in the use of batons from the baton carrying requirements. It would also, with respect to certain peace officers, delete the requirement, when carrying a firearm, of possessing a valid firearms qualification card and would make related changes. It would also permit a pocket card to serve as a firearms qualification card contingent upon the enactment of SB 780.

(4) Existing provisions of the Alarm Company Act prohibit a licensee, qualified manager, branch office manager, or alarm agent from carrying a concealed firearm unless a permit to do so has been issued.

This bill would, in the alternative, permit the carrying of a concealed firearm if the person is an honorably retired peace officer authorized to carry a concealed firearm, or a duly appointed peace officer, as specified, authorized to carry a concealed firearm. It would also, with respect to certain peace officers, delete the requirement, when carrying a firearm, of possessing a valid firearms qualification card.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 453 (SB 468) Rainey. Community care facilities: placement with relatives.

Existing law, the California Community Care Facilities Act, requires the State Department of Social Services or any other approving authority to do a criminal record check on an applicant for a license, special permit, or certificate for a foster family home or certified family home and on other persons, including, nonclients who reside in the facility and staff and employees. The act exempts from its requirements certain living arrangements, including, any arrangement involving the receipt and care of persons by a relative.

This bill would authorize, upon adoption of a resolution by the board of supervisors of a county, any county child welfare agency to secure from municipal, county or state law enforcement personnel a criminal record through the California Law Enforcement Telecommunications System or an automated mobile and fixed location fingerprint identification system for the purpose of assessing any relative agreeing to receive and care for a minor and all other adults living in the relative's residence, before the minor would be placed with the relative.

Ch. 454 (SB 609) Karnette. Alcoholic beverages: retail license.

The Alcoholic Beverage Control Act authorizes the Department of Alcoholic Beverage Control to place reasonable conditions upon retail licensees or upon any licensee exercising retail privileges in certain specified situations. Existing law authorizes the department to remove or modify conditions which were placed on a license issued by the department upon, among other things, the filing of a petition by the licensee or a transferee requesting the removal or modification of those conditions.

This bill would require written notice to the local governing body of the area in which the premises are located and a hearing before the modification or removal of any condition to which the local governing body files an objection, as specified.

Ch. 455 (SB 946) Maddy. Political Reform Act of 1974.

(1) Existing provisions of the Political Reform Act of 1974 require, among other things, that specified public officials periodically disclose their sources of income on statements of economic interests that are filed with certain public agencies. Existing provisions of the act also prohibit public officials from participating in governmental decisions if the decision will have a specified financial effect on, among other things, the official's source of income of \$250 or more during the previous 12-month period. Existing provisions of the act include within the definition of income specified loans made to the official but exempt from the definition, among other things, loans made to the official by a financial institution for the purchase of, to refinance the purchase of, or for improvements to the official's residence and loans made to the official by specified family members.

This bill would amend the act's definition of income to exempt any loans made to an official by a financial institution that are secured by the residence of the official and to further exempt payments made to the official by specified members of the official's family on loans made by the official to those family members.

(2) Under existing law, no public official at any level of state or local government may make, participate in making, or in any way attempt to use his or her official position to influence a governmental decision in which he or she knows or has reason to know he or she has a financial interest. Under existing law, a public official has a financial interest in a decision within the meaning of this prohibition if it is reasonably foreseeable that the decision will have a material financial effect, distinguishable from its effect on the public generally, on the official, a member of his or her immediate family, or on, among other specified things, any source of income, as defined, aggregating \$250 or more in value provided to, received by, or promised to, the public official within 12 months prior to the time when the decision is made.

This bill would make a technical, nonsubstantive change.

(3) Existing provisions of the Political Reform Act of 1974 require elected officials, members of specified boards and commissions, other specified high-ranking public officials, and other defined public agency officials known as designated employees to periodically disclose their financial interests by filing a statement of economic interests with certain public agencies. While all of these officials are required to disclose certain financial interests on their statements of economic interests, only designated employees are required to disclose the names of for-profit entities in which they are a director, officer, partner, trustee, employee, or in which they hold a position of management.

This bill would require elected officials, members of specified boards and commissions, and other specified high-ranking public officials to disclose on their statements of economic interests the names of for-profit entities in which they are a director, officer, partner, trustee, employee, or in which they hold a position of management.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on certain persons who violate the provisions of the bill.

(4) Existing provisions of the Political Reform Act of 1974 require each state or local government agency to develop and submit a proposed conflict of interest code by the appropriate code reviewing body.

This bill would delete provisions establishing obsolete deadlines and would require that a new agency submit its proposed conflict of interest code not later than 6 months after it comes into existence.

This bill would make technical corrections in cross references to incorrect or nonexistent provisions of the act.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

(8) This bill would incorporate additional changes in Section 82030 of the Government Code, proposed by SB 124, to be operative only if SB 124 and this bill are both chaptered and become effective January 1, 1998, and this bill is chaptered last.

Ch. 456 (SB 1077) Schiff. Elections: voters: registration.

Existing law requires any person who, for payment, assists another to register to vote by receiving the completed affidavit of registration, to sign in his or her handwriting and affix on the affidavit, his or her full name, telephone number, address, and the name and telephone number of the payer, if any. Existing law also requires any person, company, or organization that pays a person who assists another to register to vote by receiving the completed affidavit of registration to maintain a list of the names, addresses, and telephone numbers of individuals the payer has agreed to compensate.

This bill would recast these provisions, and would, in addition, require any person, company, or organization who for payment assists another to register to vote, to affix on the affidavit received an acknowledgment that the affidavit fully complies with specified provisions of existing law that regulate the form of an affidavit of registration and would prohibit a person from receiving any money or other valuable consideration for any affidavit that does not comply with the specified voter registration requirements. The bill also would require a person, company, or organization that pays a person who assists another to register to vote by receiving the completed affidavit of registration, to identify, at the time of submission of affidavits to the elections official, those affidavits that do not comply with the requirements of this bill relating to the form of the affidavit. The bill would require an elections official to notify any person, company, or other organization that agrees to pay a person who assists another to register to vote by receiving the completed affidavits of registration, that 3 or more affidavits of registration submitted by the person do not comply with specified requirements relating to the form of the affidavit or violate certain criminal provisions. This bill also permits the elections official to forward copies of the noncomplying affidavits to the district attorney. By changing the duties of elections officials, this bill would impose a state-mandated local program.

Existing law imposes criminal penalties upon a person who, for payment, assists another to register to vote by receiving the completed affidavit of registration, and who fails to affix the required information on the affidavit of registration.

This bill would impose a state-mandated local program by (1) increasing the criminal penalties for the prohibited conduct, (2) broadening the application of these criminal penalties to any person, company, or organization who renders payment or promised consideration to any person to assist another to register to vote, and (3) adding other specified prohibitions relating to voter registration contained in existing law to the prohibitions contained in these provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 457 (SB 1144) Rosenthal. Satellite wagering: out-of-state races.

(1) Existing law permits the California Horse Racing Board to authorize an association conducting a racing meeting in this state to accept wagers on the results of certain out-of-state feature races and certain stakes races.

This bill would permit the board to additionally authorize a harness racing association in this state to accept wagers on races conducted by the racing association that conducts the Breeder's Crown Stakes, if the race is conducted on the same day as the Breeder's Crown Stakes and if the association in this state that accepts those wagers is then conducting a live racing meeting. The bill would also permit the board to additionally authorize a licensed quarter horse racing association that is conducting a live racing meeting in this state to accept wagers on races conducted by the racing association that conducts the American Quarter Horse Racing Challenge, if the races are conducted on the same day as the American Quarter Horse Racing Challenge.

(2) Under existing law, all revenues distributed to the state as license fees from horseracing are required to be deposited in the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes.

This bill would authorize additional wagering, and would increase the amount of continuously appropriated license fees, thereby making an appropriation. This bill would also result in a change in state taxes for the purpose of increasing state revenues within

the meaning of Section 3 of Article XIII A of the California Constitution, and thus would require for passage the approval of $\frac{2}{3}$ of the membership of each house of the Legislature.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 458 (SB 1192) Schiff. Public employee retirement.

The Public Employees' Retirement Law authorizes contracting agencies, under certain circumstances, to encourage the retirement of employees by granting up to an additional 4 years of service credit during specified fiscal years. That authorization expires on July 1, 1997.

This bill would extend that authority for the 1997-98 and 1998-99 fiscal years.

The County Employees Retirement Law of 1937 authorizes boards of supervisors, under certain circumstances, to encourage the retirement of employees by offering up to an additional 4 years of service credit during specified fiscal years. That authorization expires on July 1, 1997.

This bill would extend that authority for the 1997-98 and 1998-1999 fiscal years.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 459 (AB 304) Scott. Firearms.

(1) Existing law prohibits a person from, among other things, carrying concealed within any vehicle which is under his or her control or direction any pistol, revolver, or other firearm capable of being concealed upon the person.

This bill would include in this prohibition the act of any person who causes to be carried concealed within any vehicle in which he or she is an occupant any pistol, revolver, or other firearm capable of being concealed upon the person. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 460 (AB 491) Keeley. Firearms: criminal storage.

(1) Existing law establishes the crime of criminal storage which arises when a person keeps any loaded firearm within any premises that is under his or her custody or control and he or she knows or reasonably should know that a child under 14 years of age is likely to gain access to the firearm without the permission of the child's parent or legal guardian and the child obtains access to the firearm and thereby either (a) causes death or great bodily injury to himself, herself, or any other person, or (b) causes injury, other than great bodily injury, to himself, herself, or any other person, or exhibits the firearm either in a public place or as specified. A violation of (a) is criminal storage in the 1st degree, punishable as either a misdemeanor or a felony, and a violation of (b) is criminal storage in the 2nd degree, punishable as a misdemeanor.

This bill instead would apply these provisions to a child under 16 years of age. The bill would revise (b) above to apply when the child carries, rather than exhibits, the firearm to a public place or as specified. The bill also would provide that a person who keeps a pistol, revolver, or other firearm capable of being concealed upon the person within any premises that are under his or her custody or control and he or she knows or reasonably should know that a child under the age of 16 years is likely to gain access to that firearm without the permission of the child's parent or legal guardian and the child obtains access to that firearm and carries it off-premises or injures or kills a person on the premises where access to the firearm was gained, is guilty of a misdemeanor.

The bill also would require a firearms dealer to post a notice on the licensed premises of the duty imposed pursuant to the above provisions. The above provisions would not apply under specified circumstances. Because this bill would create a new crime, it would impose a state-mandated local program.

(2) This bill would incorporate additional changes in Section 12071 of the Penal Code proposed by AB 1124, to be operative if AB 1124 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 461 (AB 797) Takasugi. Economic development.

(1) The Enterprise Zone Act authorizes a governing body to include a targeted employment area in an enterprise zone to encourage businesses to hire eligible residents of certain geographic areas.

This bill would authorize an enterprise zone jurisdiction that has designated a target employment area to request the redesignation of an area using more current census data, as specified.

(2) Under existing law, in evaluating proposals for contracts for services in excess of \$100,000, with a specified exception, the state is required to award 5% preference on the price submitted by state-based companies that certify that they shall perform the contract at a worksite located in an enterprise zone.

This bill would instead require the state to award the preference to state-based companies that certify that not less than 90% of the labor required to perform the contract shall be accomplished at a worksite located in an enterprise zone.

(3) Existing law requires the Trade and Commerce Agency to submit a report to the Legislature every 5 years that evaluates the effect of the enterprise zone program on employment, investment, and incomes, and on state and local tax revenues in designated enterprise zones.

This bill would require an enterprise zone governing body to provide information at the request of the agency as necessary for the agency to prepare this report.

(4) The bill would require the Franchise Tax Board to annually make available to the Trade and Commerce Agency and the Legislature information, by enterprise zone and city or county, on the dollar value of tax credits that are claimed each year by businesses.

(5) The bill would make findings and declarations regarding economic development corporations.

(6) Existing law prescribes various procedures for a county to sell or lease county property, but permits the board of supervisors to sell or lease property in specified circumstances without compliance with those procedures by a $\frac{4}{5}$ vote of the board.

This bill would, until January 1, 2011, also authorize the Sacramento County Board of Supervisors, by a $\frac{4}{5}$ vote, to sell or enter into a lease, concession, or managerial contract involving property that the county has acquired from the federal government due to the closure of Mather Air Force Base or McClellan Air Force Base without complying with those procedures if specified conditions regarding reuse and county procedures have been met, or the board of supervisors makes a finding that the conditions were satisfied at the time the property was acquired from the federal government.

Ch. 462 (AB 991) Shelley. Firearms.

(1) Existing law regulates the delivery, sale, or transfer of a firearm by persons who are licensed under federal law and whose licensed premises are located in this state.

This bill, commencing on or after January 1, 1998, would require any of these persons who is a personal handgun importer to comply with certain prescribed conditions within 60 days of bringing a pistol, revolver, or other firearm capable of being concealed upon the person into this state. The bill also would require any of these persons, also licensed as collectors, who acquire and take actual possession outside of this state of a pistol, revolver, or other firearm capable of being concealed upon the person that is a curio or relic to report to the Department of Justice in a prescribed format his or her acquisition of that firearm within 5 days of transporting that firearm into this state. These provisions would not apply to a person who reports his or her ownership of a concealable firearm after the grace periods specified in these provisions if the violation occurs as a result of the person submitting the prescribed report specified in these provisions. A violation of these requirements would be punishable as a misdemeanor, except under specified circumstances. Because this bill would create new crimes, it would impose a state-mandated local program.

(2) Existing law provides that a person is guilty of carrying a concealed firearm when he or she carries concealed upon his or her person or within any vehicle which is under his or her control or direction any pistol, revolver, or other firearm capable of being concealed upon the person, except as specified.

This bill would except from this provision the transportation of a firearm by a person in order to comply with the requirements described in (1) above, and the transportation of a firearm by a person who finds the firearm, as specified.

(3) Existing law authorizes any firearms eligibility determination involving the issuance of any license, permit, or certificate to include the submission of the applicant's fingerprints to the Federal Bureau of Investigation.

This bill would require each application that requires any firearms eligibility determination involving the issuance of any license, permit, or certificate to include 2 copies of the applicant's fingerprints on forms prescribed by the Department of Justice. The bill would authorize one copy of the fingerprints to be submitted to the United States Federal Bureau of Investigation. By imposing additional duties on local government, the bill would create a state-mandated local program.

(4) Existing law requires the Department of Justice to conduct a background check of the purchaser of any firearm by examining its records and specified records of the State Department of Mental Health in order to determine if the purchaser is within any of the classes of persons prohibited from possessing firearms.

This bill would authorize the Department of Justice to participate in the National Instant Criminal Background Check System (NICS), to the extent that funding is available, and if that participation is implemented, would require the department to notify the dealer and the chief of police or sheriff of the city or county in which the sale was made that the purchaser is a person prohibited from acquiring a firearm under federal law.

(5) The bill also would require the Department of Food and Agriculture at any inspection station maintained at or near the California border to display specified notices concerning the bringing of firearms into this state.

(6) This bill would incorporate additional changes in Section 12072 of the Penal Code proposed by AB 1124, to be operative if AB 1124 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(7) This bill would incorporate additional changes in Section 12076 of the Penal Code proposed by SB 591, to be operative if SB 591 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 463 (AB 1221) Aroner. Firearms: ammunition and reloaded ammunition.

Existing law prohibits any person, corporation, or dealer from selling ammunition or reloaded ammunition to a person knowing that person to be a minor under 18 years of age.

This bill would include in this prohibition ammunition or reloaded ammunition designed and intended for use in a pistol, revolver, or other firearm capable of being concealed upon the person to a person knowing that person to be under 21 years of age. Because the bill would expand the scope of an existing crime, it would create a state-mandated local program.

This bill would incorporate additional changes in Section 12316 of the Penal Code proposed by AB 78, to be operative if AB 78 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 464 (SB 57) Ayala. Disarming an officer.

Under existing law, every person who, while willfully resisting, delaying, or obstructing any public officer, peace officer, or emergency medical technician in the discharge or attempt to discharge of his or her duties, removes or takes a firearm from an officer, is guilty of a felony punishable by imprisonment in the state prison for 16 months or 2 or 3 years. If the person attempts to remove or take a firearm from an officer under those circumstances, he or she is guilty of a public offense, punishable by imprisonment in a county jail for a period not to exceed one year or in the state prison for 16 months or 2 or 3 years.

This bill would provide that when the removal or taking of the firearm does not occur while the person willfully resists, delays, or obstructs any of those persons and is not done with the intent to permanently deprive the officer of the firearm, the person shall be punished by imprisonment in a county jail for a period not to exceed one year or in the state prison for 16 months or 2 or 3 years.

This bill would also incorporate additional changes in Section 148 of the Penal Code enacted by SB 282 (Ch. 111, Stats. 1997).

This bill would also make technical, nonsubstantive changes.

Ch. 465 (SB 1224) Kopp. Murder: peace officers: special circumstances.

(1) Existing law, as added by initiative statute, provides that every person guilty of murder in the 2nd degree shall suffer confinement in the state prison for a term of 25 years to life if the victim was a peace officer who was killed while engaged in the performance of his or her duties, and the defendant knew, or reasonably should have known, that the victim was such a peace officer engaged in the performance of his or her duties.

This bill would provide that, notwithstanding the above provision, every person guilty of the above offense shall suffer confinement in the state prison for a term of life without the possibility of parole, if any one of 4 specified facts is charged and found true. By increasing the penalty for an existing crime, this bill would impose a state-mandated local program.

The bill would provide that this provision shall become inoperative if and when AB 446 is approved by the voters at a statewide election, and as of the date of that approval is repealed.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 466 (AB 235) Takasugi. California Housing Finance Agency: bonds.

Existing law sets forth various powers and duties of the California Housing Finance Agency in conjunction with the financing of housing. Under existing law the agency is authorized to issue revenue bonds in an amount not exceeding \$5,350,000,000 outstanding at any time, exclusive of indebtedness incurred to refund or renew bonds previously issued by the agency, the proceeds of which are used to finance housing developments and other residential structures.

The bill would make an appropriation by increasing the authorization of bonds to be issued by the agency, by \$1,400,000,000, which under existing provisions of law are required to be deposited in the continuously appropriated California Housing Finance Fund.

Ch. 467 (AB 379) Alquist. Commissioner of the California Highway Patrol: contract.

(1) Existing law requires the Commissioner of the California Highway Patrol to enforce all laws regulating the operation of vehicles on, and the use of, certain expressways in the County of Santa Clara, if requested to do so by a city or the county, as prescribed.

This bill would repeal that provision and would authorize the commissioner to enforce laws regulating the operation of vehicles on, and the use of, expressways in Santa Clara County, if requested by affected cities or the county and a contract, as specified, is entered into between the parties.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 468 (AB 500) Ashburn. Prisons: federal contracts.

Existing law requires the sheriff of a county to maintain federal prisoners in county jail who have been committed thereto by order of the federal government if the sheriff determines that there is adequate space in the facility to do so. The federal government is required to provide support for the prisoner.

This bill would authorize a county board of supervisors or city council to enter into a contract with the federal government, or any department or agency thereof, to manage, control, and operate a federal prison located within the boundaries of that county or city.

Ch. 469 (AB 772) Margett. Contractors.

Existing law provides that when any person licensed to engage in business as a contractor is named as a judgment debtor in an unsatisfied final judgment, the qualifying person and any member of that licensee or personnel of the licensee are automatically prohibited from serving as an officer, director, associate, partner, owner, qualifying individual, or other personnel of record of another licensee. Existing law provides that this suspension constitutes a disassociation of the qualifying individual or a license cancellation, and provides that if a qualifier who is disassociated is not replaced within 90 days, this shall result in the automatic suspension of the license.

This bill would instead, with respect to the effect of the prohibition against serving as an officer, director, associate, partner, owner, qualifying individual, or other personnel of another licensee, provide that the prohibition shall cause the license of any other existing renewable licensed entity with any of the same personnel of record as the judgment debtor licensee to be suspended until the license of the judgment debtor is reinstated or until those same personnel of record disassociate themselves from the renewable licensed entity.

Ch. 470 (AB 882) Wayne. Hazardous waste: definition.

Existing law defines the term "waste" for purposes of the hazardous waste control laws and excludes from the definition of "waste" a discarded material that is an intermediate manufacturing process stream, as defined.

This bill would make clarifying changes in that definition of waste and would additionally exclude, from the definition, to the extent consistent with the federal Resource Conservation and Recovery Act of 1976, a coolant, lubricant, or cutting fluid necessary to the operation of manufacturing equipment or connected equipment, as specified.

Ch. 471 (AB 996) Sweeney. Outdoor advertising: on-premises advertising displays: business centers.

(1) The Outdoor Advertising Act exempts from its provisions, except for certain licensing and regulatory provisions, an on-premises advertising display for a business center that is adjacent to or visible from an interstate or primary highway if it is placed and maintained in compliance with specified conditions.

This bill would exempt from the act an on-premises advertising display that is located within a business center and visible from an interstate or primary highway, if it is placed and maintained as prescribed, and would revise those specified conditions.

(2) Other existing law requires an on-premises advertising display that is located within the boundaries of a development project, as defined, that identifies either the

name of the development project, its business logo, or the goods, wares, and services existing or available within the development project, to continue to be deemed an on-premise advertising display regardless of any of specified occurrences.

This bill would include among those specified occurrences the subdivision of the parcel that includes the development project in accordance with the Subdivision Map Act and make a related change.

(3) Existing law provides that the provisions of existing law described above in (1) and (2) shall remain in effect only until January 1, 1999, and as of that date are repealed, unless a later enacted statute, which is enacted before January 1, 1999, deletes or extends that date.

This bill would repeal that provision, thereby continuing those provisions indefinitely.

Ch. 472 (AB 1054) Goldsmith. Gift certificates.

(1) Under existing law, it is unlawful for any person or entity to sell a gift certificate to a purchaser containing an expiration date, except for gift certificates distributed to a consumer for promotional purposes without any money or other thing of value being given in exchange.

This bill would also exempt from the prohibition specified gift certificates issued after January 1, 1998, that are sold below face value, as specified, or that are issued for a food product. It also would revise the existing exemption to make it applicable to specified gift certificates distributed by the issuer after January 1, 1998, to a consumer pursuant to an awards, loyalty, or promotional program, as specified.

(2) Existing law provides that a gift certificate sold without an expiration date is valid continuously except when refunded or replaced with a new gift certificate.

This bill would recast this provision to provide that a gift certificate sold without an expiration date is valid until redeemed or replaced.

(3) Existing law provides that certain tangible personal property which remains unclaimed for more than 3 years after it is payable escheats to the state, whereupon the proceeds thereof are deposited in the Abandoned Property Account in the Unclaimed Property Fund, a continuously appropriated account. Existing law provides that gift certificates subject to the prohibition described in (1) are not subject to escheat.

This bill would provide that the provisions relating to escheat apply to certain gift certificates having an expiration date, thereby making an appropriation by expanding the proceeds of property deposited in the Abandoned Property Account in the Unclaimed Property Fund.

Ch. 473 (AB 1237) Granlund. Outdoor advertising: display relocation: permit revocation.

(1) Existing law allows any legally permitted advertising display situated on property being acquired by the Department of Transportation for a public use to be relocated on the remainder of the particular property so long as the relocation does not cause a reduction in federal-aid highway funds.

This bill would allow the display to be relocated, subject to the approval of the public agency acquiring the property and the approval of the jurisdiction in which the display will be relocated, without requiring the department to acquire the property and without restricting the relocation on the remainder of the particular property.

(2) Existing law authorizes the Director of Transportation to revoke any license or permit under the Outdoor Advertising Act for the failure to comply with that law and to remove and destroy any advertising display placed or maintained in violation of that law after 10 days' written notice posted on the structure or sign and a copy forwarded by mail to the display owner at his or her last known address.

This bill would authorize the removal and destruction of the display after 30 days' written notice, rather than 10 days' written notice.

Ch. 474 (AB 1543) Committee on Human Services. Developmental disabilities: regional centers.

Existing law provides for the delivery of services to persons with developmental disabilities through regional centers pursuant to contracts with the State Department of Developmental Services. Existing law, until June 30, 1998, authorizes a regional center,

with the approval of the department, and in consultation with specified entities, to implement regional center service delivery alternatives for consumers living in the community. Under existing law, a regional center is required to conduct at least one public hearing to receive comments on its proposal regarding service delivery alternatives.

This bill would revise these provisions to, among other things, require regional centers to submit an annual report to the department, require notice of the public hearing to contain specified information, and prohibit the department from delegating its authority to review and approve these proposals. The bill would extend the operation of this program to January 1, 2000.

Ch. 475 (AB 1546) Committee on Consumer Protection, Governmental Efficiency and Economic Development. Consumer affairs.

(1) Existing law (Chapter 908 of the Statutes of 1994) transferred the licensing and regulation of various occupations and professions administered by various boards in the Department of Consumer Affairs to the department itself.

This bill would authorize the director of the department to enter into interagency agreements with appropriate entities within the department and to delegate to them the duties, powers, purposes, responsibilities, and jurisdiction that have been succeeded to and vested with the department, as specified. It would authorize an entity receiving that delegation to establish technical committees to regulate the profession subject to the authority that has been delegated.

(2) The Architects Practice Act (hereafter the act) authorizes the California Board of Architectural Examiners to contract with architect consultants.

This bill would specify the types of services that architect consultants may perform.

(3) Existing law permits a licensee under the act to renew an unexpired license by applying for renewal on a prescribed form and paying the renewal fee.

This bill would provide that the renewal form shall contain a statement by the licensee of whether he or she was convicted of a crime or disciplined by another public agency during the preceding renewal period and a statement that the representations in the application are true, correct, and contain no material omissions of fact, to the best knowledge of the licensee.

(4) Existing law provides for the existence of a California State Board of Landscape Architects the duties and powers of which are vested in the Department of Consumer Affairs as of the date the provisions establishing the board become inoperative and are repealed.

This bill would transfer the duties and powers from the department to the California Board of Architectural Examiners, which would be authorized to delegate its authority to a Landscape Architect Technical Committee, as specified. The bill would make related changes.

(5) The State Board of Guide Dogs, under existing law, is scheduled to become inoperative on July 1, 1997, and will be repealed on January 1, 1998, unless extended by future legislation.

This bill would extend the inoperative and repeal dates for the board for 5 years.

(6) The Funeral Directors and Embalmers Law provides for the licensure and regulation of funeral directors and embalmers, and provides for the licensing of funeral establishments.

This bill would provide that every funeral establishment holding a funeral director's license on December 31, 1996, shall, upon application and payment of fees, be issued a funeral establishment license.

(7) Existing law requires any person employed by, or an agent of, a licensed funeral establishment who consults with a family of a deceased person or its representatives concerning the arranging of funeral services to receive documented training and instructions on laws, rules, and regulations pertaining to specified subjects.

This bill would exclude from that requirement anyone who has successfully passed the funeral directors examination, as specified.

(8) Under existing law, the Court Reporters Board of California administers the provisions governing the practice of shorthand reporting and issues certificates permitting the practice of shorthand reporting, as defined, to qualified persons. It is

unlawful for a person to engage in shorthand reporting unless that person is the holder of a valid certificate issued by the board.

This bill would make various revisions to provisions affecting certified shorthand reporters, including stating the public status of citations, fines, and orders of abatement issued against licensees. The bill would also require passing the licensing exam in order to renew a certificate that is not renewed within 3 years of its expiration, and would require written notice to the board of all name changes. The bill would make various changes to provisions governing reimbursement from the Transcript Reimbursement Fund, which is a continuously appropriated fund, for transcripts in non-fee-generating cases involving low-income litigants, including permitting reimbursement for per diem charges. This authorization for reimbursement for per diem charges would constitute an appropriation.

(9) Existing law governs the disposition of the remains of a deceased person.

This bill would make various revisions to these provisions. The bill would also make technical, conforming changes.

(10) Since a violation of the provisions governing certified shorthand reporters is a misdemeanor, this bill would create a state-mandated local program by expanding the scope of an existing crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 476 (SB 189) Kelley. Weights and measures.

(1) Existing law authorizes any sealer to levy a civil penalty against a person who violates specified laws or regulations governing weights and measures, with specified exceptions. Under existing law, payment of the civil penalty is a complete defense to a criminal prosecution for the same acts. Existing law requires that, before a civil penalty is levied, the person charged with the violation be given written notice of the proposed action and the right to request a hearing, as specified. Existing law sets forth the procedures that apply to an appeal of the sealer's decision. Under existing law, these provisions are repealed 2 years following a 30-day period after specified regulations are filed with the Secretary of State. Existing law requires that those regulations be adopted on or before July 1, 1995.

This bill would extend the repeal date of those provisions until January 1, 2001. The bill would also require the Legislative Analyst to study the effectiveness of the civil penalties and report findings, as specified, to the Legislature and Governor by January 1, 2000.

(2) Existing law, which is to be repealed on January 1, 1998, authorizes counties to charge an annual device registration fee, within prescribed limits, to recover the costs of the county sealer of inspecting or testing weighing and measuring devices pursuant to designated provisions.

This bill would extend the repeal date of those provisions until January 1, 2001.

Ch. 477 (SB 219) Rosenthal. Property taxation: tax sale: purchase by nonprofit organization.

Existing property tax law authorizes a nonprofit organization to file an objection to the sale of residential or vacant real property that has been deeded to the state and to apply to purchase the property for the purposes of rehabilitation and sale to low-income persons, construction of a residential dwelling on the vacant property and sale to low-income persons, or dedication of the vacant property to public use.

This bill would instead authorize a nonprofit organization, in those circumstances, to rehabilitate and rent to, or otherwise use the property to serve, low-income persons, to construct residential dwellings on the vacant property for rent to low-income persons, or to dedicate the vacant property to public use for these same purposes.

Existing property tax law provides that when residential or vacant property has been tax defaulted for 5 years or more, that property may be purchased by a nonprofit organization, as defined, for the purpose of acquisition of either single-family dwellings for rehabilitation and sale to low-income persons or the acquisition of vacant land for

construction of residential dwellings and subsequent sale to low-income persons, or dedication of that vacant land to public use.

This bill would expand those provisions to permit nonprofit organizations to acquire single-family or multifamily dwellings for rehabilitation and sale or rent to low-income persons, or for other use to serve low-income persons, or to acquire vacant land for construction of residential dwellings and subsequent sale or rent to low-income persons, or for other use to serve low-income persons.

Ch. 478 (SB 238) Haynes. Juveniles: costs of support.

Existing law provides that the father, mother, spouse, or other person liable for the support of a minor, the estate of that person, and the estate of the minor, shall be liable for the reasonable costs of support of the minor while the minor is placed, or detained in, or committed to any institution or other place, as specified; and provides for any excess paid to the county for these purposes, as specified, to be held in trust for, or paid directly to, the minor.

This bill would provide that the father, mother, spouse, or other person liable for the support of the minor would not be liable under these provisions if the basis for the placement, detention, or commitment of the minor is that the minor is found by a court to have committed a crime against that person.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 479 (SB 252) Kelley. Public utilities: electrical restructuring.

The existing restructuring of the electrical services industry provides for the authorization of direct transactions between electricity suppliers and end use customers, subject to implementation of a nonbypassable charge.

This bill would require the Energy Resources Conservation and Development Commission, in consultation with the Public Utilities Commission, to submit a report to the Regional Council of Rural Counties, and to the Chairs of the Senate Committee on Energy, Utilities and Communications and the Assembly Committee on Utilities and Commerce, by July 1, 1998, on assessment of options relating to aggregation of electrical purchases by small rural counties and recommendations for legislation which may be necessary to achieve any identified potential net economic benefits attributable to electrical load aggregation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 480 (SB 294) Monteith. Land use: subdivisions: taxes and assessments.

Existing law provides that whenever any part of a subdivision is subject to a lien for taxes or special assessments collected as assessments, the final map or parcel map shall not be recorded until the owner or subdivider files an official estimate of those taxes and assessments and executes and files security conditioned upon the payment of all taxes and assessments, as specified.

This bill would add provisions to authorize a county to require, by ordinance, that if a property owner or subdivider deposits cash to secure the payment of those estimated taxes or special assessments, the county tax collector would be required to draw upon the cash deposit, at the request of the property owner, to pay the special taxes or special assessments when they are payable. This bill also would allow a county to waive the requirement to secure the payment of estimated taxes or special assessments for a final parcel map of 4 or fewer parcels or for a lot line adjustment.

Ch. 481 (SB 329) McPherson. Depredation: wild pigs.

(1) Existing law provides that, except for mountain lions, the owner or tenant of land or property that is being damaged or destroyed by specified mammals, including wild pigs, may apply to the Department of Fish and Game for a permit to kill the animal. Existing law requires the department to provide the applicant for a depredation permit to take wild pigs with specified information on available options for wild pig control.

This bill would require the department to also furnish that information to a person who reports the taking of wild pigs that are found in the act of damaging or destroying property. In addition, the bill would authorize the department to maintain and make available to these persons lists of hunters interested in wild pig hunting and lists of

nonprofit organizations that are available to take possession of depredating wild pig carcasses.

(2) Existing law designates those mammals that are game mammals, including wild pigs, for purposes of the Fish and Game Code and regulations adopted pursuant to that code. Existing law makes it unlawful for a person to take wild pigs, except those damaging or destroying property, unless the person has a hunting license and license tag, or to possess a wild pig that is not tagged.

This bill would exempt the possession of certain depredating wild pigs from that tagging requirement.

(3) Existing law authorizes the immediate taking of a bear or wild pig that is encountered in the act of inflicting injury to, molesting, or killing livestock if the taking is reported to the department no later than the next working day.

This bill would, instead, with respect to wild pigs, authorize the immediate taking of a wild pig that is encountered while in the act of pursuing or worrying livestock or damaging or destroying, or threatening to immediately damage or destroy, land or property, including, but not limited to, rare, threatened, or endangered native plants, wildlife, or aquatic species, by the owner of the livestock, land, or property or the owner's agent or employee, or by an agent or employee of any federal, state, county, or city entity when acting in his or her official capacity. The bill would require the person taking a wild pig under the bill to report the taking no later than the next working day to the department and to make the carcass available to the department. The bill would authorize possession of the carcass of a wild pig taken under the bill, unless otherwise directed by the department. The bill would require the person possessing the carcass to make use of the carcass and would authorize the transfer of the carcass to another person or entity without compensation. The bill would also define "damage" for certain other provisions of law relating to damage caused by depredating wild pigs, and would require the department to develop statewide guidelines for determining the damage caused by wild pigs.

(4) Existing law requires the department to prepare a plan for the management of wild pigs, including specified matters.

This bill would authorize the plan to encourage mitigation of depredation by sport hunting and provide for live trapping and relocation of wild pigs to areas suitable and accessible to mitigation of depredation with the consent of the landowner and after consultation with adjacent landowners who may be impacted.

(5) Because a violation of the bill or regulations adopted pursuant to the bill would be a misdemeanor under existing law, the bill would impose a state-mandated local program.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) Existing law continuously appropriates the money in the Fish and Game Preservation Fund, among other things, to pay specified refunds and to pay all necessary expenses incurred in carrying out the Fish and Game Code and any other laws for the protection and preservation of birds, mammals, reptiles, and fish.

Because this bill would change and impose new duties on the department, it would make an appropriation.

Ch. 482 (SB 471) Burton. School employee retirement.

The State Teachers' Retirement Law defines the term "creditable compensation" for various purposes.

The bill would revise that definition and make related changes.

Ch. 483 (SB 603) Monteith. Pesticides: evaluation.

Existing law requires every manufacturer of, importer of, or dealer in any pesticide to obtain a certificate of registration from the Department of Pesticide Regulation before the pesticide is offered for sale in this state. Existing law requires a thorough evaluation

before a substance is registered as a pesticide for the first time, and also requires pesticides for which a renewal of registration is sought to be evaluated in a like manner.

This bill would require the initial evaluation of a pesticide to be timely.

Ch. 484 (SB 651) C. Wright. Local health funding.

Existing law prescribes the membership of the health board of community mental health services.

The bill would delete the requirement that an equal number of appointees be appointed by each member of the board of supervisors.

Existing law requires the State Department of Mental Health to contract with counties for funds appropriated to, and allocated by, the department, that have been designated for local mental health services, requires that 10% of the cost of all services shall be borne by the counties, and exempts certain smaller counties from the financial participation requirement.

This bill would specify that the cost requirement for local financial participation shall be waived for funds for the implementation of managed mental health care contracts.

Existing law authorizes counties to request the Controller to deposit any portion of the county's allocation of funds into the County Medical Services Program Account of the County Health Services Fund, and deems those deposits to have been made to a county or city local health and welfare trust fund.

This bill would exclude deposits made into the Vehicle License Collection Account from that provision.

Existing law provides for the allocation of money from the continuously appropriated Local Revenue Fund to counties for various stated purposes, including mental health services, and specifies the allocation of tax revenues into the various accounts and subaccounts of the Local Revenue Fund, including the Sales Tax Growth Account, which includes various subaccounts, including the Caseload Subaccount.

Existing law requires the Controller to deposit into the Caseload Subaccount of the Sales Tax Growth Account of the Local Revenue Fund, from funds deposited into the Sales Tax Growth Account, an amount sufficient to fund the net costs for the realigned portion of the county or city or city and county share of growth in social services caseloads.

This bill would revise that calculation to revise the calculation of money to be deposited in to Caseload Subaccount of the Sales Tax Growth Account to include an amount equal to any share of growth from the previous year or years for which sufficient revenues were not available in the Caseload Subaccount.

By revising the method of determining the allocation of funds to the Caseload Subaccount in the Sales Tax Growth Account in the continuously appropriated Local Revenue Fund, this bill would change the purposes for which those funds may be used, and would result in an appropriation.

Existing law requires the Controller to deposit funds in the Sales Tax Growth Account of the continuously appropriated Local Revenue Fund remaining in that account after specified allocations into various equity and growth subaccounts.

This bill would exclude cities from participation in the allocations from the State Hospital Mental Health Equity Subaccount and the Indigent Health Equity Subaccount, and would revise the method of calculating equity allocations of those 2 subaccounts among the counties.

Existing law provides for the allocation of additional county funding allocations from equity subaccounts of the continuously appropriated Local Revenue Fund to those counties that have a poverty-population shortfall, as defined.

This bill would revise the method of calculating the poverty-population shortfalls for purposes of determining those funding allocations.

Existing law provides for the monthly allocation of funds from the General Growth Subaccount in the Sales Tax Growth Account in the Local Revenue Fund to local health and welfare trust funds of each city, county, and city and county, on the basis of a given percentage of the statewide resource base.

This bill would require the recalculation of the resource base used in determining the General Growth Subaccount allocations for the 1994-95 fiscal year and fiscal years thereafter.

Existing law requires that for the allocation of funds from the Special Equity Subaccount of the Sales Tax Growth Account of the Local Revenue Fund, they shall be made to Orange County, San Diego County, and Santa Clara County in accordance with a specified schedule.

This bill would require counties receiving those special equity allocations of funds to report to the Department of Finance the amount deposited into the health subaccount of the local health and welfare trust fund that shall be credited to the indigent health resource base and the community resource base for purposes of determining the poverty-population shortfall for purposes of allocation of funds from the Indigent Health Equity Subaccount, the Community Health Equity Subaccount, the Mental Health Equity Subaccount, and the State Hospital Mental Health Equity Subaccount of the Sales Tax Growth Account of the Local Revenue Fund to eligible counties with a poverty population shortfall.

Existing law requires, as a condition of receiving funds from the Sales Tax Account in the continuously appropriated Local Revenue Fund, that a county or city deposit a specified amount of general purpose revenues into the health account of the county health and welfare trust fund, and imposes an additional condition that a city or county deposit general purpose revenues into the mental health account of the local health and welfare trust fund at least equal to the amount of funds transferred on the basis of excess vehicle fee revenues in the Vehicle License Fee Account of the Local Revenue Fund.

This bill would revise that additional condition for the deposit of county general purpose revenues into the mental health account of the county health and welfare trust fund to instead require the deposit of general purpose funds into the mental health account of the local health and welfare trust fund based on allocations from the Vehicle License Collection Account of the Local Revenue Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 485 (SB 692) Committee on Local Government. Validations.

This bill would enact the Second Validating Act of 1997, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 486 (SB 693) Committee on Local Government. Validations.

This bill would enact the Third Validating Act of 1997, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

Ch. 487 (SB 703) Rainey. Franchises.

Existing law requires a transportation customer, as defined, who receives transportation service from an energy transporter, as defined, to pay a municipal surcharge, as specified, for the use of public lands by a transportation customer.

This bill would specify that for electricity, the energy transporter shall use that portion of the otherwise applicable utility rate or charge which, pursuant to commission order, is removed from the bill of a retail electric customer who has elected direct access to reflect the fact that the customer is purchasing energy from a nonutility provider exclusive of any California sourced franchise fee factor in provisions concerning the calculation of the required surcharge.

The bill would provide that the surcharge amount for electricity shall be inapplicable to the sale of electricity from a nonutility facility to an entity for resale to a retail customer.

The bill would provide as an alternative to the requirements for separately stating the surcharge on the transportation customer's normal bill, that an energy transporter may elect to state on each customer's bill, including both transportation customers and customers receiving bundled services, the amount of that bill which is attributable to local franchise fee charges.

The bill would also exclude from the definition of a transportation customer a cogeneration or nonutility generation facility when the facility transports electricity

through its own electric transmission or distribution system or otherwise delivers electricity, as specified.

Ch. 488 (SB 716) Alpert. Pacific Beach Mobile Recycling Program.

Existing law, the California Beverage Container Recycling and Litter Reduction Act, authorizes the Department of Conservation to pay handling fees to supermarket sites, as defined. Those provisions will be repealed January 1, 1999.

The act requires the department to certify one operator meeting specified qualifications to establish a pilot program, the Pacific Beach Pilot Mobile Recycling Program, incorporating all convenience zones in the Pacific Beach area of San Diego County, as defined, which will remain in effect until January 1, 1998. The department is required, on or before April 11, 1997, to submit a report to the Legislature evaluating the pilot program. A minimum volume of beverage containers is required to be recycled as a condition of the program.

This bill would delete references to the Pacific Beach program being a pilot program, delete that report requirement, and revise the qualifications for the recycling center operator. The bill would repeal the minimum volume requirement for the continuation of the program.

The bill would make conforming changes.

Ch. 489 (SB 883) Committee on Local Government. Local Government Omnibus Act of 1997.

Existing law authorizes a county board of supervisors to lend its available funds to any of specified districts to enable the district to perform its functions and meet its obligations.

Existing law relating to the government of counties authorizes the Boards of Supervisors of Butte, Los Angeles, Merced, Orange, San Bernardino, and Ventura Counties to contract with private enterprise to provide services that require special experience, education, and training possessed by the county, and to charge a fee for these services.

Existing law permits a county board of supervisors by a $\frac{4}{5}$ vote to assign to a state licensed collection agency for collection delinquent bills, claims, and accounts.

Existing law authorizes the establishment by boards of supervisors of safety programs designed to encourage county officers and employees to follow recognized safety practices.

Existing law creates in any county containing 2 or more cities a city selection committee to appoint city representatives to boards, commissions, and agencies as required by law.

The Crossing Guard Maintenance District Act of 1974 prescribes the organization of crossing guard maintenance districts.

Existing law establishes the Vallejo Sanitation and Flood Control District which is governed by a board of 8 trustees appointed by specified methods.

Existing law establishes the Fairfield-Suisun Sewer District, makes specified county officers ex officio officers of the district, and creates a district fund in the Solano County Treasury.

Existing law requires the boards of supervisors of Colusa, Glenn, and Yolo Counties to each appoint a director to the governing board of the Colusa Basin Drainage District.

This bill, the Local Government Omnibus Act of 1997, would declare the intent of the Legislature to combine several minor, noncontroversial statutory changes relating to public agencies into a single measure, in order to avoid waste and duplication, and to reduce operating costs by reducing the number of separate bills affecting related topics. The bill would make various technical and clarifying changes to existing law relating to local government.

This bill would include Riverside County and Santa Clara County within the group of counties authorized to contract for special services in the manner described above. The bill would revise existing provisions relating to safety programs, including removing the \$20 limit on awards for these purposes.

This bill would delete the requirement that the collection agency assigned the county bills, claims, and accounts be licensed by the state.

This bill would specify that in San Mateo County the city selection committee may be the same as San Mateo County's Council of Cities.

This bill would repeal the Crossing Guard Maintenance District Act of 1974.

This bill would delete county officers as ex officio officers of the Fairfield-Suisun Sewer District, permit the governing board to establish a district treasury, and to appoint a district treasurer, as specified.

This bill would permit the Solano County Board of Supervisors to appoint an alternate to the Board of Trustees of the Vallejo Sanitation and Flood Control District.

This bill would specify that the boards of supervisors may appoint supervisors to the Board of Directors of the Colusa Basin Drainage District.

Ch. 490 (SB 1003) McPherson. Aquatic nuisance species.

(1) Existing law requires the operators of all vessels that carry ballast water and enter a port in this state to complete and return a ballast water control report form to the Department of Fish and Game. A violation of that requirement is an infraction punishable by a specified fine. Existing law places responsibility on the department to develop, distribute, and receive these report forms. This existing law is to be repealed on January 1, 1998.

This bill, instead, would provide that the department shall adopt a ballast water control report form consistent with the form developed by the United States Coast Guard. The bill would require the department to assist the Coast Guard with distributing the form, which would be completed and returned to the Coast Guard. The bill would require the department to enter into an agreement with the Coast Guard to obtain information from the completed forms, as appropriate.

The bill would require operators of all vessels that have the capacity to take on or discharge ballast water to complete and return the form as a condition of using the waters of this state.

The bill would extend the above repeal date to January 1, 2000. Since a violation of these provisions is an infraction under existing law, the bill would impose a state-mandated local program by modifying and continuing in existence until January 1, 2000, a crime that would otherwise be repealed.

(2) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the department to carry out the Fish and Game Code. Because this bill would continue the above-described existing duties imposed on the department during the extended operation of those provisions, the bill would make an appropriation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 491 (SB 1020) Committee on Public Employment and Retirement. County employees: retirement.

The County Employees Retirement Law of 1937 authorizes counties to provide various health and insurance plan programs.

This bill would authorize boards of retirement to provide long-term care insurance programs for retired members and boards of supervisors to elect to provide long-term care insurance programs for active members.

Ch. 492 (SB 1049) Maddy. Hospice services.

Existing law provides for the licensure and regulation by the State Department of Health Services of persons or agencies providing hospice services for persons, and the families of persons, who are experiencing the last phases of life due to a terminal disease. Violation of provisions of law or regulations relating to hospices is a crime.

This bill would provide that multiple locations, as defined, of a hospice need not obtain separate hospice licenses, would require multiple locations to be listed on the license of the parent agency, as defined, would require multiple locations to each pay the licensing fee, and would make conforming changes.

Existing law defines hospice to mean a specialized form of multidisciplinary health care, and defines the plan of care as a plan developed by the multidisciplinary team.

This bill would, instead, define hospice as a specialized form of interdisciplinary health care, and would make conforming changes. This bill would define the plan of care to mean a written plan developed by the attending physician and surgeon, the medical director, or physician and surgeon designee, and the interdisciplinary team. This bill would provide that "skilled nursing services" means nursing services provided by or under the direction of a registered nurse under the plan of care.

Existing law permits any person or governmental agency that is operating a hospice as of January 1, 1991, to continue to operate the hospice if certain conditions are met, including, but not limited to, that they do not charge for services and they do not receive 3rd-party payment for services rendered.

This bill would permit continued operation of hospices that meet the conditions if, instead, they do not charge patients or families for hospice services and do not receive 3rd-party insurance payments for services rendered.

Existing law requires an applicant for hospice licensure to make provision for certain basic services, including, but not limited to, skilled nursing services and bereavement services, and requires that the services meet the Standards for Quality Hospice Care, 1993.

This bill would include home health aide services, as defined, within these basic services, and would make conforming changes. The bill would require that the services, instead, meet the Standards for Quality Hospice Care, 1996.

Ch. 493 (SB 1177) Johnson. Vehicles: driving under the influence: probation.

Existing law provides that if a court grants probation to any person upon a 2nd or subsequent conviction, as specified, of the offense of driving a vehicle while under the influence of an alcoholic beverage, any drug, or both, driving with an excessive blood-alcohol concentration, or driving when addicted to any drug, the court, in addition to any other terms and conditions, is required to require the person to participate in a prescribed treatment program for a specified number of months subsequent to the underlying conviction.

Existing law provides that if a court grants probation to any person upon a 2nd or subsequent conviction, as specified, of the offense of driving a vehicle while under the influence of an alcoholic beverage, any drug, or both, or driving with an excessive blood-alcohol concentration, and who does a forbidden act which causes bodily injury to any person other than the driver, the court is required to require the person to participate in a treatment program for a specified period of months subsequent to the underlying conviction.

This bill would require those persons to enroll and participate in the treatment program for the specified number of months subsequent to the date of the underlying violation. The bill would require those persons to complete the entire program subsequent to the date of the current violation and would prohibit those persons from receiving credit for any program activities completed prior to that date.

Ch. 494 (SB 1231) Watson. Residential care for the elderly: home health care: incidental medical care.

Existing law provides for the licensure and regulation of residential care facilities for the elderly, administered by the State Department of Social Services. Existing law provides, with certain exceptions, that residents of residential care facilities for the elderly shall not be admitted or retained if they are bedridden, as defined, or if they require 24-hour skilled nursing, or intermediate care.

Existing law also provides for the licensure and regulation of home health agencies. Existing law defines a "home health agency" as an organization that provides or arranges for the provision of skilled nursing services to persons in their temporary or permanent place of residence.

This bill would authorize a residential care facility for the elderly to provide incidental medical care through a home health agency, as defined, when certain conditions are met.

Ch. 495 (SB 1240) Costa. Williamson Act: contract rescissions: lot line adjustments.

Existing law, known as the California Land Conservation Act of 1965, or the Williamson Act, authorizes a city or county, by contract, to limit the uses of land to agricultural uses or as an agricultural preserve. The existing act requires the Department of Conservation to make a biennial report to the Legislature containing specific information relative to the implementation of the act. In addition, existing law separately sets forth procedures by which a lot line adjustment may be made between 2 or more existing adjacent parcels.

This bill would, notwithstanding any other provision of the act, and upon petition of a landowner, authorize a city or county to enter into an agreement with the landowner to rescind a contract pursuant to the act, in order to simultaneously place other land under an agricultural conservation easement, as defined. The bill would require specified findings to be made regarding the agreement, the easement, and the land involved. This bill would provide that the Director of Conservation shall not approve an agreement to establish an agricultural conservation easement if the easement has been purchased with funds from the Agricultural Land Stewardship Program Fund.

This bill would also provide that in order to facilitate a lot line adjustment, as specified, the parties to a contract may rescind the contract by mutual agreement, and simultaneously enter into a new contract under the act, provided that the board of supervisors or city council involved makes specified findings. The bill would provide that it shall not limit any other authority of a board or council to restrict or condition lot line adjustments.

This bill would require the biennial status report made by the department in the year 2002 to include a review of the performance of the provisions of the bill relating to lot line adjustments. The bill would state that its provisions relating to lot line adjustments for lands covered by the act shall remain in effect only until January 1, 2003, and as of that date is repealed, unless a later enacted statute, that is enacted on or before January 1, 2003, deletes or extends that date.

Ch. 496 (SB 1262) Johnston. Insurance: blood test.

Existing law authorizes a life or disability income insurer to decline an insurance application or enrollment request on the basis of a positive ELISA test followed by a Western Blot Assay performed by or at the discretion of the insurer on the same specimen of the applicant's blood.

This bill would delete any reference to "blood" and instead refer to the same specimen of the applicant. It would make related changes.

Ch. 497 (SB 1277) Leslie. California Insurance Guarantee Associations.

(1) Existing law provides for the liquidation or rehabilitation of insurers by the Insurance Commissioner, and specifies that claims allowed in those proceedings shall be given an order of preference. Under existing law, claims for unpaid charges owed by an insurer for an examination by the commissioner are 2nd in priority, taxes due to the State of California are 3rd in priority, and claims having preference under state law are 4th in priority.

This bill would reduce those claims to 4th, 5th, and 6th in priority, respectively, placing those claims below claims by organizations that insure the obligations of insolvent insurers, including the California Insurance Guarantee Association, and after certain claims against insolvent insurers.

(2) Existing law requires the formation of the California Insurance Guarantee Association, which exists for the purpose of providing insolvency insurance to its members. Insurers offering certain classes of insurance are required to participate in the association. The association is required to pay and discharge covered claims of participating insurers. Certain types of claims are not covered, including any amount sought as a return of a premium under a policy providing retroactive insurance of a known loss.

This bill would provide that the above type of claim would not be excluded from being a covered claim.

(3) Existing law requires the formation of the California Life and Health Insurance Guarantee Association, to provide insolvency insurance to its members. Existing law

provides for the payment of various claims if an insurer becomes insolvent or impaired, including health insurance claims. Existing law limits health insurance benefits to, among other things, \$200,000.

This bill would specify that the limit applies to any one individual receiving health care benefits, regardless of the number of policies or contracts, and makes technical changes.

(4) This bill would also incorporate additional changes to Section 1063.1 of the Insurance Code proposed by AB 1148, contingent on the prior enactment of that bill.

Ch. 498 (AB 207) Frusetta. Witness or victim: disclosure of address or telephone number.

(1) Existing law, added by initiative statute, generally provides that no attorney may disclose or permit to be disclosed to a defendant the address or telephone number of a victim or witness whose name is disclosed to the attorney through discovery, unless specifically permitted to do so by the court after a hearing and a showing of good cause. The initiative statute provides that any amendment of its provisions by the Legislature shall require a $\frac{2}{3}$ vote of the membership of each house.

This bill would generally provide, in addition, that no attorney may disclose or permit to be disclosed the address or telephone number of a victim or witness to members of the defendant's family or anyone else. However, the bill would provide an exception to this general rule and authorize the disclosure of that information to persons employed by the attorney and persons appointed by the court to assist in the preparation of the defendant's case, if that disclosure is required for that preparation. The bill would provide that persons provided this information by an attorney shall be informed by the attorney that further dissemination of the information is prohibited. The bill would provide that willful violation of these provisions by an attorney, persons employed by the attorney, or persons employed by the court is a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) Because it would amend an initiative statute, the bill would require a $\frac{2}{3}$ vote.

Ch. 499 (SB 941) Leslie. Evidence: gang-related crimes.

Existing law governs the admissibility of evidence in criminal proceedings. Existing law provides exceptions to the hearsay rule.

This bill would create an exception to the hearsay rule for evidence of a prior statement made by a declarant under penalty of perjury if the declarant is deceased and the statement is relevant to the criminal prosecution of a gang-related crime, as specified. The bill would authorize a peace officer to administer and certify oaths for these purposes. The bill would also set forth the intent of the Legislature in this regard.

Ch. 500 (SB 940) Leslie. Crimes: intimidation of witnesses and victims.

(1) Existing law makes it a misdemeanor for any person to knowingly and maliciously prevent or dissuade or knowingly and maliciously attempt to prevent or dissuade any witness or victim from attending or giving testimony at any trial, proceeding, or inquiry authorized by law.

This bill instead would make these offenses punishable as either a misdemeanor or a felony. This bill also would provide that evidence that the defendant was a family member who interceded to protect the witness or victim shall create a presumption that the act was without malice.

(2) Existing law imposes an enhanced penalty for the commission of a felony by a member of a criminal street gang, if the felony is committed with intent to promote, further, or assist in any criminal conduct by gang members.

This bill would impose an additional and consecutive penalty of 3 years imprisonment if a credible threat of violence or death were made by a criminal street gang member to prevent or dissuade a witness or victim of a violent felony from attending or testifying at the trial of the violent felony.

By increasing the penalties for an existing crime and establishing a new sentence enhancement, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would become operative only if AB 856 is enacted and becomes effective on or before January 1, 1998.

Ch. 501 (SB 695) Rainey. Automobile Insurance Claims Depository.

(1) Existing law provides for an Automobile Insurance Claims Depository to permit insurers and law enforcement agencies to deposit automobile claims data in a common data base within the Bureau of Fraudulent Claims.

This bill would repeal the provisions creating the depository. The bill would require that certain claims information be available to law enforcement agencies, as specified. The bill would state legislative intent.

(2) Existing law requires an applicant seeking a license as an insurance claims analysis bureau to meet certain qualifications and to file certain documents including statements with the Insurance Commissioner.

This bill would revise the qualifications and require the filing of an additional statement regarding the ability of certain insurers to submit claims information to the bureau and the availability of information on the bureau's data base to state law enforcement agencies.

(3) This bill would also incorporate additional changes to Section 1872.8 of the Insurance Code proposed by AB 349, contingent upon the prior enactment of that bill.

Ch. 502 (AB 731) Keeley. Transportation.

(1) Existing law provides for an 11-member California Transportation Commission consisting of 9 voting members appointed by the Governor with the advice and consent of the Senate and prohibits those members from simultaneously holding an elected public office, or serving as any local or regional public board or commission with business before the commission. Under existing law, there is a 9-member High-Speed Rail Authority.

This bill would provide that a voting member of the commission may also serve on the High-Speed Rail Authority.

(2) Existing law establishes a state transportation funding plan for the expenditure, during the 10-year period from July 1, 1990, to June 30, 2000, of new revenues resulting from the enactment of transportation revenue measures in 1989. That plan calls for the expenditure of \$3,000,000,000 for intercity rail, commuter rail, and urban rail transit, and specifies the eligible rail corridors within each category.

This bill would include the San Jose-Oakland-Gilroy-Watsonville-Santa Cruz corridor and San Francisco Bay area-San Jose-Oakland-Gilroy-Salinas-Monterey corridor among the eligible intercity rail corridors.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 503 (AB 4) Bordonaro. Sentencing: firearms.

Under existing law, any person who is armed with a firearm in the commission or attempted commission of a felony shall be punished, in addition to the punishment prescribed for the felony, by an additional term of one year. If the firearm with which he or she is armed is an assault weapon, the additional term is 3 years.

Under existing law, any person who uses a firearm in the commission or attempted commission of a felony shall be punished by an additional 3, 4, or 10 years. If the felony is a carjacking or attempted carjacking, the additional term is 4, 5, or 10 years. If the person uses an assault weapon, the additional term is 5, 6, or 10 years. Existing law sets forth additional enhancements under other specified circumstances.

This bill would provide that, notwithstanding any other law, a person convicted of a specified felony who was charged as a principal in the commission of the offense and personally used a firearm during the commission of the offense shall be punished by an

additional term of 10 years in the state prison, to be imposed consecutive to the punishment prescribed for the felony. If the firearm is intentionally discharged under those circumstances, the person would be punished by an additional term of 20 years in the state prison, to be imposed consecutive to the punishment prescribed for the felony. If great bodily injury was proximately caused to any person other than an accomplice as a result of the firearm being discharged under those circumstances, the person would be punished by an additional term of 25 years to life in the state prison, to be imposed consecutive to the punishment prescribed for the felony. By increasing the penalty for existing crimes, the bill would impose a state-mandated local program.

This bill would provide that it shall not apply to the use or discharge of a firearm by a police officer or by a person in lawful self-defense or defense of others or property.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 504 (AB 115) Havice. Sentencing.

Existing law requires the court to impose a 3-year sentence enhancement for each prior separate prison term served by the defendant if the prior term was for a "violent felony," which includes a robbery perpetrated in an inhabited structure where the defendant personally used a deadly or dangerous weapon.

This bill would, for purposes of this provision, expand the definition of "violent felony" to add robbery of the first degree of an inhabited structure when committed in concert with 2 or more other persons. By expanding the scope of an existing sentence enhancement, the bill would impose a state-mandated local program.

This bill would include, in Section 667.5 of the Penal Code, a cross-reference to Section 12022.53 of that code as proposed by AB 4, to be operative only if AB 4 is enacted and becomes effective on or before January 1, 1998.

This bill also would incorporate additional changes in Section 667.5 of the Penal Code enacted by AB 793 (Ch. 371, Stats. 1997).

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 505 (AB 513) Hertzberg. Controlled substances.

Existing law provides that persons convicted of the unlawful possession for sale, transportation, importation, sale, or furnishing of, or certain related offenses involving methamphetamine, amphetamine, or phencyclidine (PCP) shall receive additional terms of imprisonment depending on the weight or volume of the substances.

This bill would add the manufacture of methamphetamine, amphetamine, or PCP to the offenses specified for purposes of this provision. By expanding the scope of an existing sentence enhancement, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 506 (AB 853) Hertzberg. Community Law Enforcement and Recovery Demonstration Project.

Existing law establishes several community crime prevention projects, including the Community Violence Prevention and Conflict Resolution Project, the California Community Crime Resistance Program, the Gang Violence Suppression Program, and the Rural Crime Prevention Demonstration Project.

This bill would authorize the City and County of Los Angeles to establish and operate for 2 years a Community Law Enforcement and Recovery (CLEAR) Demonstration

Project, a multiagency gang intervention program, to be administered by the City of Los Angeles under a joint powers agreement with the Los Angeles County Sheriff's Department, the Los Angeles County District Attorney's office, the Los Angeles County Probation Department, the Los Angeles Police Department, and the Los Angeles City Attorney's office. The bill would require the parties to the agreement to work together to provide a flexible and coordinated response to crime perpetrated by criminal street gangs by addressing each community's gang problems and identifying the gangs associated with each community. The bill would specify the roles of each party to the agreement.

This bill would require an independent evaluation of the project to be prepared and submitted to the Legislature 2 years from the date that funds are initially appropriated by the Legislature for the project, or 6 months after the end of the project, whichever is earlier. It would require that the Board of Corrections choose the entity that will conduct the evaluation through a competitive bidding process after sending out requests for proposals.

This bill would appropriate \$1,200,000 from the General Fund to the City of Los Angeles to implement the CLEAR project.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 507 (AB 856) Hertzberg. Crime prevention: Witness Protection Program.

(1) Existing law prohibits intimidation of witnesses and establishes a Victim-Witness Assistance Fund as well as local assistance centers for victims and witnesses.

This bill would establish the Witness Protection Program and require that the program be administered by the Attorney General to provide for the relocation or other protection of a witness in a criminal proceeding where there is credible evidence, as defined, of substantial danger that the witness may suffer intimidation or retaliatory violence. The Attorney General would be authorized to enter into an agreement with the witness in accordance with specified terms.

The bill would provide that a witness selected by the Attorney General to receive services under the program because he or she has been or may be victimized due to the testimony he or she will give shall be deemed a victim.

The bill would appropriate \$3,000,000 from the Restitution Fund to the Attorney General for the purpose of implementing the program.

Ch. 508 (AB 21) Olberg. Endangered, threatened, or candidate species: permits and memoranda.

Under the California Endangered Species Act, the Department of Fish and Game, through permits or memorandums of understanding, may authorize individuals, public agencies, universities, zoological gardens, and scientific or educational institutions to import, export, take, or possess any endangered species, threatened species, or candidate species for scientific, educational, or management purposes.

Under the federal Endangered Species Act of 1973, each federal agency is required to ensure that any action authorized, funded, or carried out by that agency is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of habitat of that species that is determined to be critical, as specified, unless the agency is granted an exemption for that action. Any activity that is necessary to carry out the action for which an exemption is granted is not a taking of any endangered species or threatened species. The federal act prohibits, among other things, the taking of any endangered species of fish or wildlife listed pursuant to the federal act or the violation of any regulation pertaining to those endangered species or threatened species. The federal act also authorizes the Secretary of the Interior to issue a permit authorizing the taking of endangered species incidental to, and not the purpose of, the carrying out of an otherwise lawful activity.

This bill would provide that if any person obtains from the Secretary of the Interior or the Secretary of Commerce an incidental take statement or incidental take permit pursuant to the federal act that authorizes the taking of an endangered species or threatened species listed pursuant to the federal act and that is an endangered species, threatened species, or candidate species pursuant to the California act, no further authorization or approval is necessary under the California act for that person to take the

endangered species, threatened species, or candidate species identified in, and in accordance with, the incidental take statement or incidental take permit, if that person notifies the Director of Fish and Game, as specified.

The bill would provide that, if the director determines within a specified period of time that the incidental take statement or incidental take permit described above is not consistent with the California act, the taking of that species may only be authorized pursuant to the California act.

The bill would provide that these provisions would remain operative until the federal provisions for issuing incidental take statements or incidental take permits are amended, as specified, and on that date the provisions would be repealed.

Ch. 509 (AB 127) Morrow. Jury selection.

Existing law provides for the selection of trial jurors, as specified.

This bill would require the Judicial Council to conduct a jury selection pilot project in 3 counties, with specified goals and rules, and to report to the Legislature on or before January 1, 2001. The bill would require the pilot project to include the development of processes for improving selection of jurors, as specified, and to test the routine use of questionnaires to screen prospective jurors and reduce the number of people called into the courtroom for face-to-face interviews. The bill would also require the Judicial Council to collect and analyze data regarding juror utilization and service, evaluate changes resulting from the project, and assess the potential use of such a system on a statewide basis.

The provisions added by the bill would be repealed on July 1, 2001, unless that date is extended or deleted by later legislation.

Ch. 510 (AB 329) Caldera. Dependent children.

Existing law provides a comprehensive body of law governing the protection and placement of minors who are, or who may become, dependent children of the juvenile court. A referee may hear cases and issue orders and findings in matters concerning dependent children, as specified. Existing law authorizes a minor or parent or guardian to apply to the juvenile court for a rehearing directed to all or any part of the order and findings of a referee.

Existing law also provides for the removal of a minor from the custody or control of a parent. An appeal from a judgment freeing a minor who is a dependent child of the juvenile court from parental custody and control has precedence over all other cases before the court hearing the appeal.

Existing law requires that reunification services be provided to parents in specified dependency cases. However, a court is authorized to terminate these services under certain conditions, and to terminate parental rights.

In addition, a court must place a child with a legal guardian or in long-term foster care if the court finds that neither adoption nor termination of parental rights is in the interest of the minor, or if the court finds that specified conditions, such as the failure to provide reasonable reunification services, are applicable, as specified.

This bill would provide that an appeal from a judgment denying a recommendation to free a minor from parental custody or control shall also have precedence over other cases before the court hearing the appeal. The bill would also authorize a county welfare department to apply to the juvenile court for a rehearing of an order and findings of a referee in a dependency proceeding.

The bill would also revise the last specified provision of existing law described above by directing a court to place a child with a legal guardian or in long-term foster care only where the court finds that adoption or termination of parental rights is not in the interest of the minor because one of the specified conditions applies.

Ch. 511 (AB 441) Richter. Tissue donors: sperm donors.

Existing law prohibits the transfer of any tissues, as defined, into the body of another person unless the donor of the tissues has been screened and found nonreactive for evidence of infection with HIV, agents of viral hepatitis, human T lymphotropic virus-1, and syphilis.

This bill would create an exception to that prohibition by authorizing a recipient of sperm to consent to therapeutic insemination of sperm or other reproductive use of sperm even if the donor of the sperm is found reactive for hepatitis B, hepatitis C, or syphilis, if the sperm donor is the spouse, partner, or designated donor, of the recipient and if certain other conditions are met.

Existing law prohibits using tissues from donors who test reactive for agents of viral hepatitis (HBV and HCV), human T lymphotropic virus-1 (HTLV-1), or syphilis in California for transplantation by means of therapeutic insemination or ingestion.

This bill would delete this prohibition. The bill would also prohibit the deposit of human breast milk into a milk bank for human ingestion when the milk is from donors who test reactive for agents of viral hepatitis (HBV and HCV), human T lymphotropic virus-1 (HTLV-1), HIV, or syphilis.

Ch. 512 (AB 482) Aroner. Psychiatric health facilities: discharge information.

Existing law provides for various types of health facilities in which inpatient psychiatric services are provided.

This bill would require that when a psychiatric patient is being discharged from any of specified health facilities the discharge or aftercare plan to be provided to the caregiver shall include specified basic information about the nature of the patient's illness and the followup required, in order to facilitate the patient's care after he or she is discharged.

Ch. 513 (AB 553) Leach. School facilities.

Existing law, the Leroy F. Greene State School Building Lease-Purchase Law of 1976, provides for state funding to reconstruct, remodel, or replace existing school buildings that are educationally inadequate or that do not meet present-day structural safety requirements. Existing law requires the State Allocation Board to require school districts as a condition of obtaining state funding for a project to make, at the school district's expense, all necessary repairs, renewals, and replacements to ensure that a project is at all times kept in good repair, working order, and condition. Existing law also requires, as specified, prior to the State Allocation Board approving a project, that an applicant school district establish a restricted account within the district's general fund for the purpose of providing moneys for regular maintenance and routine repair of school buildings, as specified.

This bill would require the State Allocation Board to require school districts whose projects are funded on or after July 1, 1998, to annually certify that the school plan has been prepared and implemented, as specified, a plan for major maintenance, repair, and replacement needs for the project. The bill would require that the plan include specified provisions, be available for public inspection, and be updated each fiscal year as part of the school district's annual budget process. The bill would also require the school district's annual budget to specify the total funding available in reserve for the major maintenance, repair, and replacement needs specified in the plan, and that the budget include an explanation if the amount of the reserves is less than that specified in the plan, as updated.

Ch. 514 (AB 563) Prenter. Physicians and surgeons: licensure.

Existing law provides for the licensure and regulation of physicians and surgeons by the Medical Board of California. Existing law requires that the revocation, suspension, or other discipline, restriction, or limitation imposed by another state upon a license or certificate to practice medicine issued by that state, or the revocation, suspension, or restriction of the authority to practice medicine by an agency of the federal government, that would have been grounds for discipline in California of a licensed physician and surgeon or podiatrist, constitutes grounds for disciplinary action for unprofessional conduct against the licensee in this state.

This bill would provide that if a physician and surgeon's license to practice medicine in another state, or pursuant to authority granted by a federal government agency, is suspended or revoked outright and is reported to the National Practitioners Data Bank, the physician and surgeon's certificate issued by the board would be required to be automatically suspended unless terminated or rescinded under these provisions,

pursuant to prescribed procedures, for the duration of the suspension or revocation by the other state or by the federal government, except under certain circumstances. This bill would not apply to a physician and surgeon who maintains his or her primary practice in California, as evidenced by having maintained a practice in this state for not less than one year immediately preceding the date of the suspension or revocation.

The bill would also provide that its provisions shall not preclude a suspension under any other provision of law or apply to a suspension or revocation imposed by a state that is based solely on the prior discipline of the physician and surgeon by another state and that the other provisions of law governing the suspension or revocation of a physician's and surgeon's certificate would not apply to summary suspensions issued pursuant to these provisions.

Ch. 515 (AB 605) Ashburn. Endangered species.

(1) The existing California Endangered Species Act requires the Fish and Game Commission to publish a notice in the California Regulatory Notice Register of the receipt of a petition to add a species to, or remove a species from, the list of endangered species or the list of threatened species.

This bill would also require the commission to publish a notice upon receipt of a petition to change the status of a threatened or endangered species and would further require the notice to include the location where interested persons can submit information to the Department of Fish and Game relating to the petitioned species. The bill would require the department to notify the petitioner regarding the content of any information received within 10 days.

(2) Under the act, within 90 days of receipt of a petition to either add a species to, or remove a species from, the list of endangered species or the list of threatened species, the department is required to evaluate the petition and make a recommendation to the commission, based on the information in the petition, that there is, or is not, sufficient information to indicate that the petitioned action may be warranted.

This bill, among other things, would authorize the commission, upon the request of the Director of Fish and Game, to grant the department an extension of time, not to exceed 30 days, to allow the department additional time to further analyze and evaluate the petition and complete its evaluation report.

(3) The bill would allow a petitioner to amend a petition at any time prior to the beginning of a meeting held by the commission and would require the commission to schedule the petition for consideration not sooner than 30 days after receipt and public release of the evaluation report.

(4) This bill would provide that upon appropriation of funds in the annual Budget Act from the Natural Resources Infrastructure Fund to the commission, the funds appropriated shall be used to carry out peer reviews in connection with the department's status reviews of candidate species.

Ch. 516 (AB 764) Davis. Food and drug inspections.

Existing law, the Sherman Food, Drug, and Cosmetic Laws, requires the State Department of Health Services to cause a special investigation of the preparation and sale of drugs and food and their adulteration. Existing law also requires the department to perform duties that are required by law for the detection and prevention of the adulteration of articles used for food and drink, and for the punishment of persons who are found guilty of violating any law that provides against their adulteration.

Existing law provides that it is unlawful for any person to use to his or her own advantage, or to reveal to any person other than to the director, officers, or employees of the department, or to the courts when relevant in any judicial proceeding under the Sherman Food, Drug, and Cosmetic Laws, any information acquired under authority of that law concerning any method or process which as a trade secret is entitled to protection.

This bill would permit an authorized agent of the department to receive the trade secret information. The bill would authorize the department to reveal trade secret information in connection with the responsibilities of the department under the Sherman Food, Drug, and Cosmetic Laws, to any employee of the federal Food and Drug Administration who is authorized in writing by the Chief of the Food and Drug Branch

of the department or his or her designee to receive this type of information. The employee receiving this type of information would be subject to certain procedures relating to maintaining the confidentiality of the information.

Existing law provides that it is unlawful for any person to use on the labeling of any drug or device, or any advertisement relating to any drug or device, any representation or suggestion that an application is effective under a prescribed provision of law relating to new drugs and devices or that the drug or device complies with that law.

This bill would revise this provision to no longer apply to an advertisement relating to any drug or device.

Existing law provides that it is unlawful for any person to advertise any drug or device represented to have any effect in enumerated conditions, disorders, or diseases.

This bill would create an exception to that provision if the advertisement is disseminated or distributed as prescribed or, as to certain advertisements, has received approval or clearance for that marketing through designated means.

Under existing law, it is unlawful for any person to disseminate any false advertisement of any food, drug, device, or cosmetic. Existing law provides that an advertisement of a drug or device represented to have an effect in enumerated conditions, disorders, or diseases is not unlawful, under this and other provisions, if it is disseminated only to members of the medical, dental, pharmaceutical, or veterinary professions, or appears only in the scientific periodicals of these professions, or is disseminated only for the purpose of public health education by persons not commercially interested, directly or indirectly, in the sale of drugs or devices.

This bill would provide that an advertisement that a drug or device has a specific curative or therapeutic effect on the enumerated conditions, disorders, or diseases mentioned above is not unlawful under these provisions if the drug or device is approved or cleared for marketing for that specific curative or therapeutic effect through any one of designated means.

Existing law provides that whenever the department determines that an advance in medical science has made any type of self-medication safe and effective as to any of the enumerated conditions, disorders, or diseases mentioned above, the department shall, by regulation, authorize the advertisement of that drug or device as having a curative or therapeutic effect for the disease, subject to conditions and restrictions as the department may consider necessary to the interests of public health.

This bill would repeal this provision.

Existing law requires the department to inspect each place of business for the manufacture of any drug or device prior to issuing a license or renewing a license annually.

This bill would delete the requirement that the department inspect each place of business prior to renewing an annual license. The bill would require the department, in addition to the inspection prior to issuing an initial license, to inspect the place of business once every 2 years. The bill would require the department to use the information contained in the written documentation pertaining to an inspection conducted within the previous 2 years by the United States Food and Drug Administration (USFDA) and would authorize the department to inspect to obtain information not included or not sufficiently clear in the USFDA written documentation. It would also authorize the department to use, in lieu of all or part of any inspection required under these provisions, information from audits conducted pursuant to various quality system standards or other information identified by the department by regulation.

Existing law prohibits any person from manufacturing any drug or device without a license from the department and exempts from that licensure requirement certain entities.

This bill would also exempt from licensure any person who has registered an establishment and listed all products in compliance with a prescribed federal law and submits a copy of the federal registration and listing to the department in accordance with regulations established by the department.

Ch. 517 (AB 877) Miller. Workers' compensation: insurance classification.

(1) Existing law authorizes the Insurance Commissioner to disapprove a rate if a workers' compensation or employers' liability insurer fails to comply with certain filing

requirements. A party affected by an action of such an insurer or a rating organization in a request to review the manner in which a rating system has been applied in connection with insurance afforded or offered may appeal to the commissioner within 30 days after written notice of the action and after a hearing held upon not less than 10 days' written notice to the applicant and to the insurer or rating organization. The commissioner may affirm, modify, or reverse the action.

This bill would provide that the hearing be held within 60 days from the date on which the party requests the appeal or longer upon agreement of the parties. It would provide that if the commissioner has information on the subject, as specified, the appeal may be denied without a hearing.

(2) Existing law requires the commissioner to designate a rating organization to assist him or her, among other things, in developing a classification system for workers' compensation insurance. Existing law provides that any person aggrieved by any decision, action, or omission to act of an insurer or a rating organization may request reconsideration, as specified.

This bill would require the commissioner, on or before January 1, 1999, to adopt regulations to implement and consolidate an appeals process, as specified.

Ch. 518 (AB 968) Knox. Air pollution: fine particles: monitoring program.

Existing law does not specifically regulate air pollution from particles smaller than 2.5 microns in diameter.

This bill would require the State Air Resources Board to conduct a specified program to monitor those particles and report annually by January 1 to the Legislature on the status and results of the program.

Ch. 519 (AB 1061) Machado. Air pollution: districts: rules and regulations.

(1) Existing law requires air pollution control districts and air quality management districts to publish a list of regulatory measures scheduled or tentatively scheduled for consideration during the following year. Existing law prohibits districts from adopting or amending a rule or regulation unless a public hearing is held after specified notice is given. Existing law requires a district board, before adopting, amending, or repealing a rule or regulation, to make specified findings, based on relevant information presented at that hearing.

This bill would authorize any person, after the district's publication of the list of regulatory measures proposed for adoption in the following year, to inform the district of any existing federal or state, or proposed, as specified, or existing district, air pollution control requirement or guideline that applies to the same equipment or source type as any proposed new or amended district rule or regulation on the district's list. The bill would require a district, whenever it intends to propose the adoption, amendment, or repeal of a rule or regulation, to prepare a written analysis, as prescribed, of federal air pollution control requirements and existing or proposed district rules, regulations, requirements, or guidelines that apply to the same equipment or source type as the proposed change, thereby creating a state-mandated local program by imposing new duties on the districts. The bill would additionally require a district board to base those specified findings regarding the adoption, amendment, or repeal of a rule or regulation on the information developed pursuant to the bill and information in the rulemaking record.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 520 (AB 1089) Miller. Hazardous waste: source reduction.

(1) Existing law, the Hazardous Waste Source Reduction and Management Review Act of 1989, requires specified generators of hazardous waste to maintain certain plans, reports, and summaries with regard to hazardous waste reduction practices. The act states that its purpose is to reduce the generation of hazardous waste by 5% per year from the years 1993 to 2000 and requires the Department of Toxic Substances Control to make

specified recommendations to the Legislature by January 1, 2000, for a new annual goal. The act authorizes the department to request, from any generator subject to the act, a copy of the generator's hazardous waste management report, hazardous waste management performance report summary, source reduction evaluation review and plan, and source reduction evaluation review and plan summary, and to make specified determinations concerning those plans, reports, and summaries. The act authorizes the department to impose specified civil penalties if the department determines, among other things, that a generator has failed to implement the measures included in the review and plan or plan summary. The act requires a generator subject to the act to prepare a specified progress report concerning the review and plan's implementation.

A violation of the act is a crime.

This bill would revise the act to delete the requirement that a generator subject to the act prepare a hazardous waste management performance report summary, and a source reduction evaluation review and plan summary. The bill would exclude from the act a generator whose hazardous waste generating activity consists solely of receiving offsite hazardous waste and generating residuals from that waste. The bill would authorize a unified program agency to request and review a generator's review and plan or report and impose civil penalties for a failure to submit a revised review and plan or report or to implement the review and plan measures. The bill would revise the information required to be included in the review and plan and in the report, thereby imposing a state-mandated local program by revising the definition of a crime. The bill would delete provisions requiring the preparation of a generator progress report and would instead require a summary progress report, as prescribed.

The bill would make related changes and delete obsolete provisions.

(2) The act requires the Director of Toxic Substances Control to prepare a biennial report regarding implementation of the act and to submit the report to the Governor and the Legislature.

This bill would delete the requirement that the report be submitted to the Governor and the Legislature.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 521 (AB 1128) Miller. Publicly owned utilities for furnishing water service: sale or lease.

Existing law sets forth procedures by which a municipal corporation may lease, sell, or transfer a public utility owned and operated by it for furnishing water service.

This bill would permit the City of West Covina to sell the entire water utility of that city pursuant to these provisions where part of the utility is inside and part is outside the city boundaries under specified conditions.

The bill would contain legislative findings and declarations that a special statute is necessary and that a general statute cannot be made applicable, within the meaning of Section 16 of Article IV of the California Constitution, because of unique circumstances applicable to the City of West Covina.

The provisions of the bill would be repealed on January 1, 2001.

Ch. 522 (AB 1280) Bustamante. Endangered species: recovery strategy program.

(1) Under the existing California Endangered Species Act, the Department of Fish and Game is required to develop and implement a recovery strategy pilot program for endangered or threatened species until January 1, 2004. Under existing law, the department is required to identify 5 threatened or endangered species for inclusion in the program prior to January 1, 1997. Guidelines for developing recovery strategies are specified. Existing law makes these provisions operative only if funds are appropriated in the annual Budget Bill or another statute to fund the cost of implementing those provisions.

This bill would, instead, specify that the department shall develop and implement a recovery strategy for the Greater Sandhill crane. The bill would also authorize the department, upon appropriation of funds by the Legislature, to identify 4 additional species that are listed as candidate, threatened, or endangered for inclusion in the program.

This bill would specify that the \$200,000 appropriated in the Budget Act of 1997 for the recovery strategy pilot program shall be used for the Greater Sandhill crane.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 523 (AB 1399) Cardenas. Insurance: home protection contracts.

Under existing law, provisions governing home protection contracts do not apply to certain performance guarantees or service contracts given by the builder of a home or for repairs or service of a home appliance or other system or component, under specified circumstances.

This bill would provide that the provisions governing home protection contracts also do not apply to a repair or maintenance program for a home electrical system, or a component of such a wiring system, where the program is offered by a person or affiliate of a person whose business is regulated by the Public Utilities Commission provided that any such repair or maintenance program is related to a service provided by the person or affiliate of the person.

These provisions would remain in effect until January 1, 2004, when they would be repealed.

Ch. 524 (AB 1460) Bordonaro. Nacimiento Reservoir.

Under existing law, the Monterey County Water Resources Agency operates the Nacimiento Reservoir. Under existing law, bodily contact with water is generally prohibited in a reservoir in which water is stored for domestic use.

This bill would authorize recreational activity in which there is bodily contact with the water by any participant, in the Nacimiento Reservoir, in accordance with certain requirements.

Ch. 525 (AB 1505) Ashburn. Isabella Dam and Reservoir.

Existing law declares it to be the policy of the state to conserve, protect, restore, and enhance any endangered species or any threatened species and its habitat.

This bill would require the Director of Fish and Game to use the resources of the Department of Fish and Game to coordinate with the federal government to promote the preservation of species, including species that are listed as endangered species or threatened species under the federal Endangered Species Act of 1973 and the California Endangered Species Act and their habitats within the locale of Isabella Dam and Reservoir in Kern County in order to facilitate the continued operation of those facilities for flood control and water conservation storage, as specified.

Ch. 526 (AB 1545) Committee on Human Services. Care facilities: incidental medical services: foster care and adult care.

(1) Existing law regulates the licensure of community care facilities and authorizes a community care facility to provide incidental medical services.

This bill would authorize facility staff who are not licensed health care professionals to provide incidental medical services in a community care facility for adults if, among other things, they are trained by a licensed health care professional and supervised according to an individualized health care plan for clients which is prepared by a health care team and reassessed at least every 12 months or as more frequently determined by the client's physician or nurse practitioner.

(2) Existing law requires the State Department of Social Services to develop a program to establish specialized foster care homes for children with special health care needs. Existing law permits a child with special health care needs to remain in a licensed foster family home or licensed small family home operating as a specialized foster care home, as defined, after the age of 18 years, if certain conditions are met, including that the department notifies the foster care provider, as part of its orientation process, that the Foster Family Home and Small Family Home Insurance Fund does not expand

existing coverage for liability resulting from the provision of care to individuals over the age of 18 years.

This bill would require this notice to instead go to the foster care applicant and would make related and technical changes.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 527 (SB 150) Kopp. Restitution.

(1) Existing law establishes the Recovery Account in the Real Estate Fund which is funded by crediting a specified percentage of any real estate license fee collected. Under existing law, when an aggrieved person obtains a final judgment in a court of competent jurisdiction or an arbitration award against a defendant based upon the defendant's fraud, misrepresentation, or deceit, made with intent to defraud, or conversion of trust funds arising directly out of any transaction in which the defendant, a real estate licensee, performed acts for which his or her license was required, the aggrieved person may file an application with the Department of Real Estate for payment from the Recovery Account of the amount unpaid on the judgment which represents an actual and direct loss to the claimant in the transaction. The Recovery Account is a continuing appropriation for these purposes.

This bill would provide that a final judgment includes a state or federal criminal restitution order for purposes of this provision, thereby making an appropriation from the Recovery Account.

(2) Under existing law, each municipal court has original jurisdiction of civil cases and proceedings in, among other things, all cases at law in which the demand, exclusive of interest, or the value of the property in controversy amounts to \$25,000 or less, except as specified.

This bill would extend the jurisdiction of the municipal court to include all actions to enforce restitution orders or restitution fines that were imposed by the municipal court.

(3) Existing workers' compensation law requires every employer to post and keep posted in a conspicuous location a notice for employees containing information about the employer's insurance and the employees' rights to receive care and benefits.

This bill additionally would require every employer to give any employee who is a victim of a crime that occurred at the employee's place of employment written notice that the employee is eligible for workers' compensation for injuries that may have resulted from the place of employment crime.

(4) Existing law requires the court to order a defendant to make restitution to any victim or victims who have suffered economic loss as a result of the defendant's conduct, in an amount established by court order. Under existing law, the defendant has the right to a hearing to dispute the determination of the amount of restitution, and the court is authorized to modify the amount, on its own motion or on the motion of the district attorney or the defendant.

This bill additionally would authorize the court to modify the amount of the restitution order on the motion of the victim or victims.

Ch. 528 (SB 231) Costa. Endangered species: routine and ongoing agricultural activities: incidental and accidental take of species.

(1) Under existing law, the California Endangered Species Act, it is a misdemeanor to import, export, take, possess, purchase, or sell any species that the Fish and Game Commission has determined to be an endangered species or a threatened species, as defined, except as specified. Existing law requires the commission to maintain lists of threatened species and endangered species. The act requires the commission to maintain a list of candidate species for which it has accepted a petition to consider adding the species to the list of threatened species or to the list of endangered species.

The act permits the Department of Fish and Game to authorize the import, export, take, or possession of candidate species, threatened species, or endangered species for scientific, educational, or management purposes.

This bill would require the department, in cooperation with the Department of Food and Agriculture and others, as specified, to adopt regulations that authorize locally designed voluntary programs for routine and ongoing agricultural activities on farms or ranches to encourage habitat for candidate, threatened, and endangered species, and

wildlife generally. The bill would require the department to propose regulations for these programs on or before July 1, 1998, and would require the programs to include, among other things, management practices that will, to the maximum extent practicable, avoid and minimize take of listed species, while encouraging the enhancement of habitat. Under the bill, authorization for these voluntary programs would be automatically renewed every 5 years.

The bill would authorize the take of species listed as candidate, threatened, or endangered incidental to routine, ongoing agricultural activities, while the management practices developed under the bill are followed.

The bill would require the department, beginning in 2000, and every 5 years thereafter, to report to the appropriate policy committees of the Legislature on the effect of the programs.

Because other provisions of existing law would make a violation of the regulations adopted by the department a crime, the bill would impose a state-mandated local program by creating a new crime.

(2) This bill would also provide that, until December 31, 2002, accidental take of candidate, threatened, or endangered species resulting from inadvertent or ordinary negligent acts that occur on a farm or a ranch in the course of otherwise lawful routine and ongoing agricultural activities is not prohibited by the bill's provisions.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 529 (SB 359) Rainey. Alcoholic beverages: tied-house restrictions.

Existing provisions of the Alcoholic Beverage Control Act, known as "tied-house" restrictions, generally prohibit a winegrower from having an ownership interest in an on-sale alcoholic beverage license, with limited exceptions. Existing law exempts from the tied-house restrictions any licensed winegrower who meets specified conditions, including that the on-sale licensed premises are licensed as a bona fide public eating place or bed and breakfast, and that all alcoholic beverages sold and served on the premises are purchased only from California wholesale licensees, unless an applicable exception applies.

This bill would expand that exemption from the tied-house restrictions to also include any winegrower who has a wholesale license, if the above requirements are also met. The bill would also revise the above condition requiring that all alcoholic beverages sold and served on the premises are purchased only from California wholesale licensees by excluding from eligible wholesale licensees a licensed winegrower who has a wholesale license and an interest in an on-sale license.

Ch. 530 (SB 365) Lewis. Pesticides.

Existing law requires every manufacturer or importer of, or dealer in any pesticide, with prescribed exceptions, to obtain a certificate of registration from the Department of Pesticide Regulation before the pesticide is offered for sale in this state.

This bill would permit the Director of Pesticide Regulation to exempt from those provisions a liquid chemical sterilant product for use on a critical or semi-critical medical device that is exempt from the federal Insecticide, Fungicide, and Rodenticide Act pursuant to a particular provision of that act.

Ch. 531 (SB 383) O'Connell. California Strawberry Commission.

(1) Existing law relating to the California Strawberry Commission (a) defines "strawberries" as those produced for commercial purposes and prepared for market within the state and (b) provides that for the purpose of shipper and processor assessments, strawberries include all strawberries marketed within the state regardless of where the strawberries are produced.

This bill, instead, would define "strawberries" as those produced in California for commercial purposes.

(2) Under existing law, the commission consists of 8 districts composed of different geographical areas.

This bill would repeal District 7 which consists of the Counties of Santa Cruz and San Mateo and the City and County of San Francisco and District 8 which consists of the Counties of Alameda, Santa Clara, and San Benito, and would place these counties within existing District 6 which, under existing law, consists of the County of Monterey.

(3) Under existing law, the commission is composed of 13 producers, 5 shippers, and 5 processors, who are elected from their respective segments, and one public member, who is appointed by the Secretary of Food and Agriculture. Existing law also authorizes the commission to modify the number of producers in each district, and shippers and processors who serve on the commission, and authorizes the commission to elect producers, shippers, and processors to serve as members at large of the commission, provided that the total number of producer, shipper, and processor members does not exceed 28.

This bill would revise the selection of producer members, as specified, to coincide with the changes specified in (2) and would change this latter provision to specify that the total number of producer, shipper, and processor members on the commission shall not exceed 32.

(4) Existing law provides that an alternate member shall serve in place of the member of the commission for whom he or she is the alternate member when the member is absent.

This bill would permit an alternate member to serve in the place of any other absent member of the same classification from the same district if that member's alternate is also absent.

(5) Existing law requires every shipper and processor to keep a complete and accurate record of all strawberries shipped or processed by him or her with the name of the producer whose strawberries were shipped or processed.

This bill, in addition, would require a producer who delivers or markets strawberries to persons other than to a shipper or processor to keep a complete and accurate record of all those strawberries, as specified. Because these provisions would have the result of subjecting these producers to criminal penalties concerning the preparation and submission of reports to the commission, the bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

(6) Existing law imposes producer assessments upon strawberry producers.

This bill, in addition, would require a producer who delivers or markets strawberries to persons other than to a shipper or processor to pay an assessment directly to the commission at the time and in the manner prescribed by the commission.

(7) The bill also would make technical, nonsubstantive changes.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 532 (SB 467) Rainey. County water districts.

Existing law grants to any regular employee of a county water district who is a deputy sheriff and is designated by a resolution of the board of the district the authority to issue prescribed citations for violations of state law or city or county ordinances with regard to trespass upon, damage to, interference with, or contamination of, any water, watercourse, structure, or facility owned, used, or controlled by the district.

This bill would, in addition, grant that authority to any regular employee of a district who has successfully completed a peace officer training course, as specified, and who is designated by a resolution of the district board. The bill would expand the authority to include citations for violations of the ordinances of the district. The bill would include among the violations for which citations may be issued those violations respecting trespass upon, damage to, interference with, or contamination of, land owned, used, or controlled by the district.

Ch. 533 (SB 472) Maddy. Fish: triploid grass carp.

(1) Under existing law, the Department of Fish and Game may issue permits to use triploid grass carp to control aquatic plant pests under specified conditions only in the Counties of Imperial, Riverside, and San Bernardino. Existing law requires the department to report to the appropriate policy and fiscal committees of the Legislature on or before June 1 of each year on the use of triploid grass carp for aquatic plant pest control.

This bill would require the department to manage triploid grass carp and would require the department to define management for this purpose to mean handling, controlling, destroying, or moving species.

This bill would also require the department, beginning in 1998, to include in a specified report to the appropriate policy and fiscal committees of the Legislature, its finding with respect to whether the use of triploid grass carp to control aquatic plant pests should be expanded to 6 more counties or statewide. Upon a finding that the use of triploid grass carp should be expanded to 6 more counties or statewide, the bill would provide for that expansion beginning January 1 of the following year. The bill would specify the 6 counties for expansion, if applicable. Under the bill, if the department finds that the use of triploid grass carp should not be expanded, the department would be required to reconsider that finding in the next year's report. If the department fails to submit the annual report as required, the bill would provide that it shall be conclusively deemed to be the finding of the department that the use of triploid grass carp to control aquatic plant pests should be expanded statewide beginning June 1 of that year.

By authorizing the issuance of permits in additional counties, the revenues from which would be deposited in the Fish and Game Preservation Fund, which is a continuously appropriated fund, the bill would make an appropriation.

This bill would provide that if the department obtains documented and verifiable evidence of escapements of triploid grass carp, unauthorized use of grass carp, or threats to fish, wildlife, and their habitats, and the Director of Fish and Game makes a written finding to that effect, the department may suspend the permit process, as specified.

(2) Existing law provides that the costs for conducting triploid grass carp programs during the first year of operation shall be funded by a loan from the Pooled Money Investment Account in the General Fund, as specified.

This bill would repeal those provisions.

Ch. 534 (SB 494) Maddy. District agricultural associations.

When a district agricultural association becomes insolvent, existing law requires the Department of Food and Agriculture to assume control of the association in order to ensure restoration of fiscal solvency. In those circumstances, existing law requires the Secretary of Food and Agriculture, among other things, to implement substantial changes in the district's fiscal policies and practices, including filing a petition under the federal Bankruptcy Act, if necessary.

This bill would permit the department to assume control of a district agricultural association if the department determines that there is insufficient fiscal or administrative control, and would also permit the department to petition a court for an order appointing the department, or a person designated by the department, as a receiver if an association is insolvent or is in impending danger of insolvency, as defined.

Ch. 535 (SB 508) M. Thompson. Alcoholic beverages: tied-house restrictions.

The Alcoholic Beverage Control Act contains so-called tied-house restrictions, which generally prohibit a manufacturer, winegrower, manufacturer's agent, California winegrower's agent, rectifier, distiller, bottler, importer, or wholesaler from, among other things, holding the ownership, directly or indirectly, of any interest in any on-sale or off-sale license, licensee, or licensed premises. Existing law contains various exemptions from this restriction on tied interests, including an exception permitting any winegrower, or its direct or indirect subsidiaries, as specified, to hold an ownership interest or financial or representative relationship in any on-sale license or the business conducted under that license, provided that certain conditions are met. Existing law includes as a condition that the winegrower's principal place of business be located in Napa County and that the winegrower meet certain other requirements with respect to the period of its continuous ownership and the volume of its annual wine production.

Existing law also makes legislative findings to the effect that the purpose and intent of the general prohibition against tied interests is not violated by that exemption.

This bill would remove that condition limiting the exemption to a winegrower whose principal place of business is located in Napa County and who meets certain other requirements. The bill would also state the intent of the Legislature to maintain the authority of winegrowers to sell wine and brandy to individual consumers and certain licensees.

Ch. 536 (SB 525) Maddy. Vehicles: golf carts.

(1) Existing law authorizes, until January 1, 1998, any city or county to establish a golf cart transportation plan establishing golf cart lanes, as defined, for the travel of golf carts on roadways designated in the plan. The plan is required to include construction of separated golf cart lanes and certain criteria for seatbelts and a covered passenger compartment.

Existing law prohibits any person from operating a golf cart on any highway except in a speed zone of 25 miles per hour or less. Among other exceptions to that prohibition is, until January 1, 1998, a person operating a golf cart in a golf cart lane that is part of a golf cart transportation plan.

This bill would exempt the construction of separated golf cart lanes in a residence district located within any city, as described, if the speed limit in that district is 25 miles per hour or less.

This bill would authorize, rather than require, the plan to include requirements for seatbelts and a covered passenger compartment.

This bill would extend the repeal dates specified above to January 1, 2001.

Because violations of certain provisions that the bill would thus extend are infractions, the bill would impose a state-mandated local program by extending the duration of existing crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 537 (SB 548) Solis. Residential dwellings.

Existing law requires the lessor of a building intended for human occupation to maintain the building in a condition fit for human occupation, absent an agreement in which the lessee undertakes to improve, repair, or maintain all or stipulated portions of the building. Existing law provides that a building is untenable if it lacks prescribed affirmative standard characteristics, such as floors, stairways, and railings maintained in good repair and effective waterproofing and weather protection of roof and exterior walls.

This bill would require a landlord of a building intended for human habitation, on and after July 1, 1998, to install and maintain locks on doors and security or locking devices on windows, as specified, and to install specified locks on doors to common areas.

Ch. 538 (SB 638) O'Connell. Air pollution: nonagricultural burning: American flag.

Existing law governing nonagricultural burning generally prohibits the use of open outdoor fires for the purpose of disposal or burning of specified materials. Existing law exempts from that prohibition burning to dispose of the combustible or flammable solid waste of a single- or two-family dwelling on its premises and outdoor fires used only for cooking food for human beings or for recreational purposes.

This bill would also exempt the burning, in a respectful and dignified manner, of an unserviceable American flag that is no longer fit for display.

Ch. 539 (SB 713) Rosenthal. Dentistry: dental auxiliaries.

Existing law provides for the licensure and regulation of the practice of dentistry, which includes the conduct of dental auxiliaries, by the Board of Dental Examiners of California.

Existing law establishes within the jurisdiction of the board the Committee on Dental Auxiliaries that consists of 9 members appointed by the Governor to make recommendations to the board regarding the licensure and functions that may be performed by dental auxiliaries and the settings within which they may work.

This bill would require the appointment of a public member who has not been licensed by the board within 5 years of the appointment date and both a dental hygienist and dental assistant in extended functions, if either is available.

This bill would require the Committee on Dental Auxiliaries to evaluate all suggestions or requests for regulatory changes related to dental auxiliaries and to hold informational hearings in order to report and make recommendations to the board.

Existing law provides that the board may modify or revoke recommendations made by the committee within 60 days of adoption by the committee.

This bill would, instead, require the board to approve, modify, or reject the committee's recommendation within 90 days of its submission. The bill would also provide that the committee may request that the board provide its reasons in writing if it rejects or significantly modifies the intent or scope of the recommendation.

Ch. 540 (SB 795) Kopp. Real estate loans: mortgage loan broker requirements.

Existing law sets forth various requirements with respect to regulation of real property loans and, among other things, requires a real estate broker who meets specified criteria, including making 20 transactions in an aggregate amount in excess of \$2,000,000, or making collections of payments in an aggregate amount of \$500,000 or more on behalf of owners or obligors of promissory notes secured directly or collaterally by liens on real property, owners or lenders of real property sales contracts, or both, to file annual reports and periodic trust fund status reports with the Real Estate Commissioner. Existing law further provides that loans with certain lenders or purchasers shall not be used in determining whether the broker has met the criteria for purposes of the reporting requirement.

This bill would revise those numerical and monetary limits thus requiring every broker placing 10 or more loans in an aggregate amount of more than \$1,000,000 to comply with those reporting requirements. It would lower to \$250,000 the aggregate collections of payments amount and make related changes. The bill would also add an institutional investor that issues mortgage-backed securities, as specified, to the list of lenders or purchasers whose loans shall not be used in determining whether the broker has met the criteria for reporting. It would require a broker to list his or her license number on specified advertisements, and to send conformed copies of a deed of trust to the investor or lender and to the borrower within a reasonable amount of time. When he or she is no longer servicing or arranging loans, as specified, the broker would be required to notify the Department of Real Estate.

Ch. 541 (SB 726) Kopp. Criminal procedure: dismissal of action.

Existing law guaranteeing a criminal defendant's right to a speedy trial requires the court to dismiss the action when the defendant is not brought to trial within a specified time unless the defendant enters a general waiver of that time limit. Existing law also provides that whenever a defendant has been ordered to appear in superior court on a case set for trial or set for a hearing prior to trial, if the defendant fails to appear on that date and a bench warrant is issued, the defendant shall be brought to trial within 60 days after the defendant next appears in the superior court unless a trial date previously had been set which is beyond that 60-day period.

This bill would provide that when a defendant in a misdemeanor case is not brought to trial within 30 days, as specified, in the absence of an express general waiver, the inferior court shall set a trial date. This bill, in addition, would provide that whenever a misdemeanor defendant has been ordered to appear in municipal court on a case set for hearing prior to trial, if the defendant fails to appear on that date and a bench warrant is issued, the defendant shall be brought to trial within 30 days or 45 days, as specified, after the defendant is arraigned on the bench warrant.

Ch. 542 (SB 916) Vasconcellos. Foster care: self-esteem.

Existing law regulates foster family homes and provides for their licensure by certified foster family agencies, the county, or the State Department of Social Services. Existing law requires a foster family agency to issue a certificate of approval to the certified family home upon determining that it has met the standards established by the department prior to placing any child in the home. Existing law establishes the Foster Children and Parent Training Fund and provides that the moneys be expended exclusively for foster parent training. Existing law requires every licensed foster parent to complete specified preplacement training and additional annual training.

This bill would require the preplacement training to include the importance of self-esteem, and would require the annual training to include positive discipline and the importance of self-esteem.

This bill would require the department to annually distribute information declaring the importance of promoting self-esteem with respect to foster children to specified entities.

Ch. 543 (SB 920) M. Thompson. Olive oil: labeling.

Existing law makes it a crime to manufacture, sell, offer for sale, give away, or possess imitation olive oil, as defined. Existing law excludes from this prohibition the blending of olive oil with other edible oils if the blend is not labeled as olive oil or imitation olive oil, and if the contents and proportions of the blend are prominently displayed on the label.

This bill would specify that the exemption from the prohibition applies if the contents and proportions of the blend are prominently displayed on the container's label.

This bill would require any olive oil produced, processed, sold, offered for sale, given away, or possessed in this state that indicates on its label "California Olive Oil," or uses words of similar import, that indicate that California is the source of the oil, to be made of oil derived solely from olives grown in California.

Existing federal law establishes certain approved American Viticultural Areas with defined boundaries for the purposes of regulating the labeling of wine products.

This bill would require any olive oil produced, processed, sold, offered for sale, given away, or possessed in this state, that indicates on its label that it is from an area that is one of the approved American Viticultural Areas under federal law, to be made of oil 75% of which is derived solely from olives grown in that approved American Viticultural Area.

Since violation of these requirements would be a crime under existing provisions of law, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 544 (SB 993) Burton. Alcoholic beverages: licensees.

The Alcoholic Beverage Control Act permits licensed winegrowers and out-of-state winegrowers to conduct wine tastings under specified conditions. Existing law also authorizes licensed beer manufacturers, out-of-state beer manufacturers, and incorporated beer manufacturers' trade associations to conduct beer tastings under specified conditions.

This bill would authorize a licensed distilled spirits manufacturer to conduct tastings of distilled spirits on the licensed premises under specified conditions. The bill would also authorize a licensed distilled spirits manufacturer or a licensee designated by an out-of-state distilled spirits manufacturer to conduct tastings of distilled spirits off licensed premises only for events sponsored by certain nonprofit organizations and only if persons attending the event are affiliated with the sponsor, as specified. The bill would require the sponsoring organization to obtain a permit from the Department of Alcoholic Beverage Control.

The Alcoholic Beverage Control Act prohibits any licensee from giving any premium, gift, or free goods in connection with the sale or distribution of any alcoholic beverage,

except as provided. Existing law provides an exception for the furnishing or giving of any retailer advertising specialty with respect to distilled spirits and wines.

This bill would provide that no rule of the department may impose a dollar limit for consumer advertising specialties furnished by a distilled spirits supplier to a retailer or to the general public of less than a specified amount per unit original cost to the supplier who purchased it.

Ch. 545 (SB 1015) Schiff. Special education: licensed child care institutes.

Existing law establishes a program for the provision of special education and related services to pupils with exceptional needs, including pupils who reside in licensed children's institutions, as defined. Existing law entitles any special educational local plan area that is a single school district and that is severely impacted by pupils who reside in licensed children's institutions to a support services amount, computed as specified. Under existing law that provision remains in effect only until January 1, 1998.

This bill would instead repeal that provision as of January 1, 1999.

Ch. 546 (SB 1107) Committee on Revenue and Taxation. Property taxation.

(1) Existing property tax law provides that the amount unpaid under a certificate of delinquent tax on unsecured property, along with any applicable interest and any penalty, constitutes a judgment lien upon all real and personal property in the county owned by and assessed to that same person.

This bill would provide that execution shall issue upon that lien upon request of the tax collector and sales shall be held under that execution, as specified.

(2) Existing law provides that 30 years after any property tax becomes a lien, the lien ceases to exist and the tax is conclusively presumed to be paid, excepting property which has been tax defaulted for nonpayment of taxes.

This bill would instead except from that provision property for which a power to sell has been recorded for nonpayment of taxes.

(3) Existing law authorizes a tax collector to require any taxpayer who makes an aggregate payment of \$100,000 or more on the 2 most recent regular installments on the secured roll or on the one installment of the most recent unsecured tax roll to make subsequent payments by electronic funds transfer.

This bill would make that provision applicable to aggregate payments of \$50,000 or more.

(4) Existing property tax law provides that secured roll taxes are due on the applicable specified date.

This bill would revise those provisions to state that those taxes are due and payable on the applicable specified date.

(5) Existing property tax law requires each property tax bill to contain specified information.

This bill would revise that provision to refer to each property tax bill, whether mailed or electronically transmitted.

(6) Existing property tax law authorizes a tax collector to mail a tax bill on every assessment on the unsecured roll on which taxes are due.

This bill would delete that authorization when the total tax bill amount due is too small to justify the cost of collection.

This bill would provide that the failure to receive a tax bill shall not relieve the lien of taxes nor prevent the imposition of penalties, as specified.

(7) Existing property tax law authorizes a tax collector to sell tax-defaulted property that is subject to a nuisance abatement lien.

This bill would clarify when the tax collector may sell tax-defaulted property subject to a nuisance abatement lien.

(8) Existing property tax law provides that any increase in an assessment resulting from a correction shall be entered on the roll prepared or being prepared for the current assessment year and collected like other taxes on the roll.

This bill would, with the approval of the tax collector, allow those assessments added after the lien date to be added to the current roll being collected.

(9) Existing property tax law provides, as specified, for the payment of escape assessments for prior fiscal years over a 4-year period.

This bill would authorize the tax collector to establish a fee for the actual cost of processing a request to pay escaped assessments in installments.

(10) Existing property tax law provides that certain individuals who own a residential dwelling may request postponement of property taxes. Existing law requires that claimants have equity in the property of at least 20% of the assessed value as shown on the tax bill.

This bill would revise that provision to allow the Controller, in instances of state-assessed property, to make that equity determination, as specified. This bill would provide that the 20% equity requirement shall be met at the time the claimant files an initial postponement claim.

(11) Existing law prohibits the Department of Motor Vehicles from renewing the certificate of a vessel until delinquent property taxes with respect to that vessel, as reported to the department by the county tax collector, are paid, and authorizes the county tax collector to so notify the owner of the tax delinquent vessel. Existing law also provides that whenever a vessel subject to that provision is transferred or not renewed for 2 renewal periods, the department shall notify the county tax collector of that fact.

This bill would instead provide that the department shall notify the county tax collector whenever a vessel is transferred or not renewed for 26 months.

(12) This bill would also make various clarifying or technical, nonsubstantive changes.

(13) By requiring new duties on county officials relating to property tax administration, this bill would impose a state-mandated local program.

(14) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 547 (SB 1111) Costa. Health care: mental health.

Existing law provides that a general acute care hospital, its licensed professional staff, or any physician and surgeon providing emergency medical services to a person at the hospital, shall not be civilly or criminally liable for detaining a person, or for the actions of the person following release from the hospital, if certain conditions exist. Existing law provides that these conditions include that in the opinion of the treating physician and surgeon the person cannot be safely released from the hospital because he or she presents a danger to himself or others or is gravely disabled, and that the hospital staff or treating physician and surgeon have made, and documented, repeated unsuccessful efforts to find appropriate mental health treatment for the person.

This bill would amend these provisions to require the opinion of the treating physician and surgeon or clinical psychologist, who meets certain requirements, that the person cannot be safely released, and would require the hospital staff, treating physician and surgeon, or an appropriate licensed mental health professional to have made and documented repeated unsuccessful efforts to find appropriate mental health treatment for the person.

Ch. 548 (SB 1245) Costa. Groundwater: report.

Existing law authorizes various local public agencies to adopt and implement groundwater management plans pursuant to specified provisions of law.

This bill would require the Department of Water Resources, on or before April 1, 1998, to prepare and publish in a prescribed bulletin a report on the number of agencies that have adopted and implemented groundwater management plans, or that manage groundwater. The bill would require the department to include other specified information in the report and would authorize the department to include certain other information in the report, as specified. The bill would require the department to update the report periodically, as needed.

Ch. 549 (SB 1349) Committee on Business and Professions. Vocations: Pharmacy Law: sanitizers.

(1) Existing law, the Pharmacy Law, provides for the licensing and regulation of the practice of pharmacy under the jurisdiction of the Board of Pharmacy of the State of

California. Existing law makes it a misdemeanor to knowingly violate the Pharmacy Law, where no other penalty is provided, and makes all other violations an infraction.

Existing law sets forth various provisions related to the board and its members.

This bill would modify provisions with regard to the board related to the method of reimbursement of the board members, the appointment of the executive officer by the board, restrictions upon a member of the board teaching pharmacy, the authority of the board to adopt rules and regulations pertaining to establishments wherein certain activities are conducted with drugs or devices, provisions that set forth the authorized functions of a pharmacist, the authority of the board to inspect or investigate, the authority of inspectors of pharmacy to inspect places in which certain activities are conducted with drugs or devices, and the authority of the board to collect all accrued and unpaid renewal fees and applicable penalty fees for a pharmacist license that has been delinquent for more than one year.

(2) Existing law sets forth definitions for purposes of the Pharmacy Law.

This bill would revise and add to these definitions.

(3) Under existing law, it is generally unlawful for any person, other than a pharmacist, to manufacture, compound, sell, or dispense any dangerous drug or device, or to dispense or compound any prescription to a medical practitioner.

This bill would extend this prohibition to apply to the act of furnishing, thereby changing the definition of a crime.

(4) Existing law exempts from the prohibition in (3) above, among others, a veterinary food-animal drug retailer that sells or dispenses veterinary food-animal drugs for food-producing animals if certain requirements are met. Existing law also exempts a manufacturer, wholesaler, or other supplier of hemodialysis drugs and devices distributed directly to patients under specified circumstances.

This bill would provide that an exemptee certificate issued under the above provision related to a veterinary food-animal drug retailer is valid only at the location for which it is issued, prescribe notification requirements when an exemptee is no longer employed by the licensee at the location for which the exemptee certificate was issued, and prohibit the licensee from operating without a pharmacist or an exemptee approved for that location.

The bill also would expand the above described exemption related to a manufacturer, wholesaler, or other supplier of hemodialysis drugs and devices to apply, instead, to dialysis drugs and devices, as defined.

(5) Existing law prescribes the authority of a pharmacist.

This bill, additionally, would authorize a pharmacist to provide consultation to patients and professional information, including clinical or pharmacological information, advice, or consultation to other health care professionals. The bill would authorize a pharmacist to order and otherwise provide advice or information or patient consultation from outside a premises if certain conditions are met.

(6) Existing law prohibits a person from furnishing any dangerous drug, except upon the prescription of a physician, dentist, podiatrist, or veterinarian.

This bill would authorize under this provision a person to furnish a dangerous drug upon the prescription of any other person authorized by law to prescribe. The bill would prohibit the ordering of dangerous drugs and dangerous devices, except by an entity licensed by the board and would require that the drugs and devices be delivered as provided and would prohibit the transfer, sale, or delivery of dangerous drugs and dangerous devices to anyone, except to designated persons within the state, and to any person outside the state, unless in compliance with the laws of this state, the United States, and the state or country to which the drugs or devices are to be transferred, sold, or delivered, thereby creating a new crime.

(7) Existing law sets forth procedures under which a prescription for a dangerous drug or device may be refilled without the prescriber's authorization if the prescriber is unavailable to authorize the refill and if, in the pharmacist's professional judgment, failure to refill the prescription might present an immediate hazard to the patient's health and welfare or might result in intense suffering. These provisions require the pharmacist to inform the patient and the prescriber and make every reasonable effort to contact the prescriber.

This bill would recast this provision. The bill would apply this provision if the prescriber is unavailable to authorize the refill and it is the pharmacist's professional judgment that failure to refill the prescription might interrupt the patient's ongoing care and have a significant adverse effect on the patient's well-being. The bill would provide that a person may possess a dangerous drug or dangerous device furnished without prescription pursuant to this provision, notwithstanding the prohibition in (6) above or any other law.

(8) Existing law authorizes a prescriber to authorize his or her agent on his or her behalf and designated healing arts licentiates to orally or electronically transmit a prescription to the furnisher and requires the furnisher to record the name of the authorized agent of the prescriber who transmits the order.

This bill, in addition, would require the furnisher to take appropriate steps to determine that the person who transmits the prescription is authorized to do so.

(9) Existing law requires the board to provide each pharmacy with a list of the drugs that pose substantial risk to a person consuming the drug when taken in combination with alcohol or if the drug may impair a person's ability to drive a motor vehicle. Existing law requires that a pharmacist be responsible for providing a specific label or enclosure with the drug container whenever the prescribed drug has not previously been dispensed to the patient, or whenever the prescribed drug has been dispensed in a different dosage, form, strength, or with different written instructions.

This bill would delete these provisions, and, would instead, authorize the board to adopt requirements, by regulation, for additional information or labeling.

(10) Existing law prohibits, with certain exceptions, a person from dispensing any dangerous drug upon prescription except in a container correctly labeled with prescribed information.

This bill would prohibit a person from placing a false or misleading label on a prescription and would prohibit a prescriber from directing that a prescription be labeled with any information that is false or misleading, thereby creating a new crime.

(11) Existing law requires that all stock of any dangerous drug or device of a manufacturer, wholesaler, pharmacy, medical device retailer, veterinary food-animal drug retailer, physician, dentist, podiatrist, veterinarian, or laboratory, or of shipments through a customs broker or carrier be, at all times during business hours, open to inspection by authorized officers of the law.

This bill would delete the list of entities to which the provision applies. The bill would require instead that all stock of any dangerous drug or dangerous device or of shipments through a customs broker or carrier be, at all times during business hours, open to inspection by authorized officers of the law.

(12) Existing law provides that all records of manufacture and of sale, purchase, or disposition of dangerous drugs or devices shall be, at all times during business hours, open to inspection by authorized officers of the law.

This bill would replace "purchase" with "acquisition" in, and make other changes to, these provisions.

(13) Existing law requires the owner or manager of a pharmacy, veterinary food-animal drug retailer, or medical device retailer or other store, shop, building or premises retailing or storing drugs, when called upon by an officer, a member of the board, or a duly authorized inspector, to furnish the names of certain persons together with a brief statement of the capacity in which the persons are employed on the premises.

This bill would delete the authority of an officer or a member of the board to request the above described information, apply this provision to any entity licensed by the board, and revise this provision to apply to retailing, wholesaling, or storing drugs or devices.

(14) Existing law requires a pharmacist to give specific notification to the executive officer of the board of changes regarding his or her name or address.

This bill would extend this notice requirement to a intern pharmacist, technician, or exemptee.

(15) Existing law requires a pharmacist who takes charge of, or acts as manager of, a pharmacy who terminates his or her employment to notify the board within 30 days of the termination.

This bill would revise this provision to replace “manager” with “pharmacist-in-charge,” apply this provision to a pharmacist in charge of any other entity licensed by the board, and provide for similar notice requirements for any exemptee who takes charge of, or acts as manager of, a wholesaler, medical device retailer, or veterinary food-drug animal retailer.

(16) Existing law authorizes a pharmacist to perform skin puncture for purposes of training patients to withdraw their blood in order to perform self-assessment tests.

This bill would revise these provisions to authorize the pharmacist to perform skin puncture for purposes of training and assisting patients in the performance of drug-therapy related patient assessment procedures to monitor medical conditions.

(17) Existing law also authorizes a pharmacist to take a person’s blood pressure, inform of the results, render an opinion, and advise the person to consult a physician of the person’s choice. However, existing law requires the pharmacist to have received training in the standard method of blood pressure measurement, prior to undertaking blood pressure measurement.

This bill would delete the above described specific requirement that a pharmacist have received training prior to undertaking blood pressure measurement.

This bill would require pharmacies to have in place procedures for taking action to protect the public when (a) a licensed individual employed by or with the pharmacy is known to be chemically, mentally, or physically impaired to the extent it affects his or her ability to practice the profession or occupation authorized by his or her license with safety to himself or herself or to the public or (b) an individual employed by or with the pharmacy is known to have engaged in the theft or diversion or self-use of prescription drugs belonging to the licensed entity. The bill would authorize the board to, by regulation, establish requirements for reporting to the board this conduct or these incidents.

This bill would require that all records or other documentation of the acquisition and disposition of dangerous drugs and dangerous devices by any entity licensed by the board be retained on the licensed premises in a readily retrievable form and the bill would set forth provisions governing the removal, retention, and maintenance of these records and prescribing the circumstances under which a waiver from the requirements of this provision may be granted.

(18) Existing law regulates the conduct of a pharmacy and prohibits a person from conducting a pharmacy unless he or she has obtained a license from the board. Existing law requires that the license be renewed annually and provides that it is not transferable.

This bill would revise these provisions regulating the conduct of a pharmacy to authorize the board, by regulation, to determine the circumstances under which a license may be transferred, require every pharmacy to within 30 days of designating its pharmacist-in-charge to provide the board with a prescribed notice, authorize a pharmacy to transfer a reasonable supply of dangerous drugs to another pharmacy and authorize the pharmacy to repack and furnish to a prescriber a reasonable quantity of dangerous drugs and devices for prescriber office use, for purposes of these provisions, replace the reference to “out-of-state pharmacy” with “nonresident pharmacy,” authorize, as an alternative to designated posting requirements of a pharmacy, the provision to consumers of a written receipt that contains the required information on the notice, and eliminate the maximum amount that a pharmacist is authorized to request for price quotations for more than 20 drugs and, instead, authorize the pharmacist to charge a reasonable fee.

(19) Existing law regulates the conduct of a medical device retailer and prohibits a person from conducting a medical device retailer unless he or she has obtained a license from the board.

This bill would revise these provisions regulating the conduct of a medical device retailer to require a medical device retailer to notify a patient or primary caregiver that consultation about the proper use of dangerous devices and related supplies furnished by the medical device retailer is available, clarify that a medical device retailer may be in charge of a pharmacist and eliminate specific annual requirements of an exempt person supervised by a medical device retailer to complete board-approved courses of home health education, and require a nonresident medical device retailer to register

before that retailer can sell or distribute dangerous devices in this state through any person or media other than a wholesaler who is licensed under the Pharmacy Law.

The bill would set forth registration requirements for a person acting as principal or agent for any unlicensed out-of-state medical device retailer to conduct the business of selling or distributing dangerous devices within the state.

(20) Existing law regulates the conduct of a wholesaler and prohibits a person from acting as a wholesaler for purposes of the Pharmacy Law, unless he or she has obtained a license from the board. Existing law also sets forth licensing requirements for an out-of-state manufacturer or wholesaler located or doing business in this state.

This bill would revise these provisions regulating a wholesaler and manufacturer of drugs and devices to clarify that a separate license is required for each place of business owned or operated by a wholesaler of any drug or device, extend application of these provisions to dangerous devices, provide registration requirements for a principal or agent of a medical device retailer, require any manufacturer who sells or transfers any dangerous drug or dangerous device into this state or who receives, by sale or otherwise, any dangerous drug or dangerous device from any person in this state to furnish, on request of an authorized officer of the law, all records or other documentation of that sale or transfer, make any wholesaler or other distributor that uses the services of any carrier liable for the security and integrity of any dangerous drug or dangerous device through that carrier until the drugs or devices are delivered to the transferee at its board-licensed premises, and prohibit a wholesaler from obtaining any dangerous drugs or dangerous devices that it cannot maintain, in a secure manner, on the premises licensed by the board.

(21) Existing laws regulates the conduct of a prescriber, as defined, and prohibits a prescriber from dispensing drugs or dangerous devices to patients in his or her office or place of practice unless certain conditions are met. The Medical Board of California, the State Board of Optometry, and the Osteopathic Medical Board of California are authorized to enforce this and related provisions.

This bill would add a person who holds a license to practice dentistry to the definition of prescriber and would expressly authorize the Board of Dental Examiners to enforce the above described provisions regarding prescriber dispensing.

(22) Existing law authorizes certain nonprofit or free clinics to purchase drugs at wholesale for administration or dispensing, under the direction of a physician, to patients registered for care at the clinic.

This bill would authorize certain other clinics to purchase drugs for purposes of this provision.

(23) Existing law requires the board to license and issue a certificate to any applicant who meets certain requirements, including, but not limited to, passing a written and practical examination given by the board.

This bill would provide that on or after July 1, 1998, an applicant who fails to pass the examination required by this provision after 4 attempts shall not be eligible for further examination until the applicant has successfully completed a minimum of 16 semester units of education in pharmacy. The bill would require the board, commencing July 1, 1998, to collect data on the applicants who are admitted to, and take, the licensure examinations required under these provisions and to report to the Legislature after June 1, 2004, and before December 31, 2004, regarding the impact on those applicants of the 4-attempt limit imposed by this bill. The bill would repeal these provisions as of January 1, 2005.

This bill would authorize the board to issue a retired license to a pharmacist who has been licensed by the board for 20 years or longer, and who holds a license that is current and capable of being renewed, that is not suspended, revoked, or otherwise disciplined, or subject to pending discipline, under the Pharmacy Law. The bill would establish the fee for issuance of a retired license. The bill would prohibit the holder of a retired license from engaging in any activity for which an active pharmacist's license is required and require the holder to pass the initial licensing examination to restore his or her license to active status.

(24) Existing law requires that an applicant for registration as a pharmacy technician be issued a certificate of registration if he or she meets any one of certain requirements,

including, but not limited to, that the applicant is eligible to take the board's pharmacist licensure examination.

This bill would limit application of this provision to when the applicant is eligible to take the board's pharmacist licensure examination, but has not been licensed by the board as a pharmacist. The bill would provide that once licensed as a pharmacist, the pharmacy technician registration is no longer valid and the pharmacy technician certificate of registration must be returned to the board within 15 days.

(25) Existing law establishes the Committee for the Continuing Education of Pharmacies, under the jurisdiction of the board, consisting of 6 members appointed by the board for a term of 2 years.

This bill would repeal this provision.

(26) Existing law authorizes the board to issue a probationary license to any applicant for a pharmacist license who is guilty of unprofessional conduct and who has met all other requirements for licensure.

This bill would expand this authority to issue a probationary license to include any applicant to the board for a license.

(27) Existing law requires the board to take action against any holder of a license who is guilty of unprofessional conduct or whose license has been procured by fraud or misrepresentation or issued by mistake. "Unprofessional conduct" is defined for this purpose to include, but is not limited to, gross negligence.

This bill would revise the definition of unprofessional conduct. Among other changes, the bill would add engaging in any conduct that subverts or attempts to subvert an investigation of the board to the definition of unprofessional conduct. The bill would also provide that unprofessional conduct for a pharmacist may include acts or omissions that involve, in whole or in part, the exercise of his or her education, training, or experience as a pharmacist whether or not the act or omission arises in the course of the practice of pharmacy or the ownership, management, administration, or operation of a pharmacy or other entity licensed by the board.

Existing law authorizes the board to deny, revoke, or suspend a nonresident pharmacy registration for failure to comply with any requirement of certain provisions of the Pharmacy Law.

This bill would extend this authorization to any significant or repeated failure to comply with specific requirements related to dispensing prescriptions and labeling containers and informing a patient of the harmful effects of a drug dispensed by prescription if it poses a substantial risk to the person consuming the drug when taken in combination with alcohol or if the drug may impair a person's ability to drive a motor vehicle.

(28) Existing law requires any person who has obtained a license to conduct a pharmacy to notify the board within 30 days of the termination of employment of any pharmacist who takes charge of, or acts as manager of the pharmacy. Existing law subjects this person to immediate suspension or revocation of his or her license to conduct a pharmacy if he or she fails to notify the board pursuant to this provision and continues to operate, as specified, except by a pharmacist. Existing law also sets forth notification requirements of the pharmacist who takes charge of, or acts as manager of the pharmacy, upon his or her termination of employment.

This bill would revise this provision to provide for summary, rather than immediate suspension or revocation of the license to conduct a pharmacy. The bill would provide similar notification requirements upon termination of the employment of any person who has obtained a license to conduct a wholesaler, medical device retailer, or veterinary food-animal drug retailer and any pharmacist or exemptee who takes charge of, or acts as manager of a wholesaler, medical device retailer, or veterinary food-animal drug retailer.

(29) Existing law prohibits any person from serving as a manager, administrator, owner, member, officer, director, associate, or partner of a licensee for a designated time period if certain actions related to the denial, revocation, suspension, failure to renew, or probationary status of a license occur.

This bill would define "manager, administrator, owner, member, officer, director, associate, or partner" for purposes of the above prohibition to refer to a pharmacist or to any other person who serves in that capacity in or for a licensee, thereby expanding

the definition of a crime. The bill would provide that this provision may be alleged in any pleading filed pursuant to the adjudication provisions of the Administrative Procedure Act. However, the bill would require any order issued in that case to be as to a person who is named in the caption, as to whom the pleading alleges the applicability of this provision, and where the person has been given notice of the proceeding.

(30) Existing law authorizes a person whose license has been revoked or suspended or who has been placed on probation to petition the board for reinstatement or modification of penalty. Existing law authorizes the petition to be heard by the board or a committee of the board, or the board to assign the petition to an administrative law judge.

This bill would revise this provision to authorize the petition to be heard by the board sitting with an administrative law judge or a committee of the board sitting with an administrative law judge, or the board may assign the petition to an administrative law judge. The bill would provide that where the petition is heard by an administrative law judge sitting alone, the decision shall be subject to review by the board. The bill would also provide that the board may investigate any and all matter pertaining to the petition and documents submitted with or in connection with the application.

(31) Existing law requires the automatic suspension of any license issued by the board, or the holder thereof, during any time that the person is incarcerated after conviction of a felony, requires the summary suspension of any license issued by the board where a conviction of the holder of the license meets certain conditions, and requires the suspension of any license issued by the board, or the holder thereof, if the board determines that the felony conviction of the holder of the license is substantially related to the qualifications, functions, or duties of the licensee. For purposes of these provisions, existing law provides procedures authorizing various hearings before the board or a committee of the board, or upon assignment by the board, before an administrative law judge.

This bill would revise the hearing provisions to authorize the hearings to be before the board sitting with an administrative law judge or a committee of the board sitting with an administrative law judge, or before an administrative law judge, at the board's discretion, and subject to review by the board.

(32) Existing law provides procedures for a determination by the board of whether a person has been automatically suspended by virtue of incarceration, and, if so, the duration of the suspension and requires the board to notify the person suspended of the suspension.

This bill would require the board to notify the person that he or she has a right to request a hearing, solely as to whether he or she is incarcerated pursuant to a felony conviction.

(33) Existing law authorizes the district attorney of the county wherein violations of the Pharmacy Law occur to conduct all felony prosecutions and other actions and prosecution at the request of the board.

This bill would require the city attorney of the city wherein violations of the Pharmacy Law occur to conduct, other than felony, all actions and prosecutions at the request of the board, thereby imposing a state-mandated local program.

(34) Existing law generally makes it a misdemeanor to knowingly violate the Pharmacy Law and makes all other violations of the Pharmacy Law an infraction, unless otherwise indicated. Existing law makes it a misdemeanor for any person to attempt to secure or secure licensure for himself or herself or any other person under the Pharmacy Law by making or causing to be made any false representations, or to fraudulently represent himself or herself to be registered.

This bill would increase the penalties for these violations, thereby changing the punishment for a crime.

The bill would make it a misdemeanor for any person to obtain a hypodermic needle or hypodermic syringe by a false or fraudulent representation or design or by forged or fictitious name or in violation of the Pharmacy Law.

(35) Existing law makes it a misdemeanor for any person who is neither a pharmacist nor an exemptee to take charge of a medical device retailer or veterinary food-animal drug retailer.

This bill would apply this prohibition to taking charge of a wholesaler. This bill would also make it a misdemeanor for any person who has obtained a license to conduct a wholesaler to fail to place in charge of that wholesaler a pharmacist or exemptee, or for any person, by himself or herself, or by any other person, to permit the dispensing of prescriptions, except by a pharmacist or exemptee, or as otherwise provided in the Pharmacy Law.

(36) Existing law makes it a misdemeanor, punishable as prescribed, to willfully fail to keep on file and open for inspection by authorized officers of the law for a period of at least 3 years all prescriptions filled by a pharmacy.

This bill would provide, instead, that it is a misdemeanor to fail to maintain on the premises and available for inspection by authorized officers of the law for a period of at least 3 years all prescriptions filled by a pharmacy and all other records required pursuant to (12) above. The bill would require, in cases where the pharmacy discontinues business, that these records be maintained in a board-licensed facility for a period of at least 3 years. The bill would increase the penalty for a violation of this provision. The bill would authorize the board to grant a waiver from the prescription and record maintenance requirements of these provisions.

(37) Existing law provides for the establishment of a diversion program to rehabilitate pharmacists whose competency is impaired due to abuse of alcohol and other drugs or due to mental illness, administered by a contracting employee assistance program. Existing law requires that the board or the employee assistance program, as the case may be, provide certain information to each pharmacist referred to, or who voluntarily participates in, the employees assistance program.

This bill would make various changes with regard to this employees assistance program, including, the addition of provisions that require that the above described information be in writing.

(38) Existing law provides that any pharmacist license that is not renewed within 3 years following its expiration may not be renewed, restored, or reinstated and shall be canceled by operation of law at the end of the 3-year period.

This bill would provide that any other license issued by the board shall be canceled by operation of law if the permit or license is not renewed within 60 days after its expiration. The bill would prohibit the reissuance of any license canceled under this provision and would require a new application. The bill would provide that this authority is in addition to the authority of the board to institute any other administrative, civil, or criminal action.

(39) Existing law provides that a person practices veterinary medicine, surgery, and dentistry, and the various branches thereof, when he, among other things, diagnosis or prescribes a drug, medicine, appliance, or application or treatment of whatever nature for the prevention, cure, or relief of a wound, fracture, or bodily injury or disease of animals.

This bill would make various clarifying changes with reference to the authority of a veterinarian for purposes of the Pharmacy Law.

(40) Existing law provides for the regulation of various persons engaged in the manufacture, repair, renovation, or sanitization of, or retail or wholesale of home furnishings and insulation administered by the Bureau of Home Furnishings and Thermal Insulation in the Department of Consumer Affairs.

This bill would exempt from the licensure requirement for sanitizers any person who holds a license as an upholstered furniture and bedding dealer, retail furniture and bedding dealer, retail bedding dealer, or custom upholsterer. It would make related changes.

(41) Existing law provides for various fees and other moneys collected on behalf of the board in connection with the licensure of wholesalers of dangerous drugs, pharmacies, and medical device retailers to be credited to the Pharmacy Board Contingent Fund. Existing law continuously appropriates the moneys in the Pharmacy Board Contingent Fund.

Because the bill would prescribe registration requirements for a retired pharmacist license, and a nonresident medical device retailer, it would provide for the deposit of additional moneys in the Pharmacy Board Contingent Fund and would thereby make an appropriation.

This bill would make technical and conforming changes and correct obsolete cross references.

This bill would incorporate additional changes in Sections 4001, 4003, and 4008 of the Business and Professions Code, proposed by SB 827, to be operative only if SB 827 and this bill are both chaptered and become effective January 1, 1998, and this bill is chaptered last.

Because this bill would create new crimes and change the definition of existing crimes, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 550 (AB 221) Goldsmith. Health: blood glucose monitoring.

Existing law regulates the practice of clinical laboratory technology and exempts from that regulation certain clinical laboratories, and persons performing clinical laboratory tests or examinations in these clinical laboratories.

This bill would also exempt those clinical laboratories that have registered with the State Department of Health Services to perform blood glucose testing for the purpose of monitoring a minor child diagnosed with diabetes when the person performing the test has been entrusted with the care and control of the child by the child's parent or legal guardian and certain requirements are satisfied. The bill would require any place where blood glucose testing is performed pursuant to these provisions to register, and it would exempt registrants pursuant to these provisions from registration or renewal fees and routine inspection by the State Department of Health Services.

Existing law, the Medical Practice Act, prohibits the unauthorized practice of medicine, but also provides that it does not prohibit service in the case of emergency, or the domestic administration of family remedies.

This bill would provide that the act shall not be construed to prohibit obtaining a blood specimen by skin puncture for the purpose of performing blood glucose testing for the purposes of monitoring a minor child with diabetes in accordance with specified requirements.

Existing law provides for the licensure and regulation of child day care facilities by the State Department of Social Services.

This bill would authorize blood glucose testing for the purposes of monitoring a minor child with diabetes to be performed in a child day care facility in accordance with specified requirements. The bill would prohibit any provision of law from requiring an insulin injection to be administered to a child in a child day care facility.

Ch. 551 (AB 293) Cunneen. Crimes: Economic Crime Act of 1992: sentence enhancement: destruction of property.

(1) Existing law, known as the Economic Crime Act of 1992, provides for specified limitations with respect to probation for, and the imposition of specified restitution orders and a surcharge on, a defendant convicted of a felony for theft of an amount exceeding \$50,000. The Economic Crime Act of 1992 is scheduled to be repealed on January 1, 1998.

This bill would extend the operation of the Economic Crime Act of 1992 until January 1, 2008. Because it would extend the responsibilities of county officers under the Economic Crime Act of 1992, this bill would impose a state-mandated local program.

(2) Existing law provides for sentence enhancements based upon the amount of property loss for any person who takes, damages, or destroys any property in the commission or attempted commission of a felony, with the intent to cause that taking,

damage, or destruction. This provision will be repealed by its own terms on January 1, 1998.

This bill would extend the operation of this provision to January 1, 2008. Because it extends the operation of existing sentence enhancements, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 552 (AB 768) Gallegos. Medi-Cal: disproportionate share hospitals.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. The Medi-Cal program provides for a special methodology of reimbursement of disproportionate share hospitals for the provision of inpatient hospital services. Existing law generally defines a disproportionate share hospital as a hospital that has proportionately higher costs, volume, or services related to the provision of services to Medi-Cal or other low-income patients than the statewide average.

Under the Medi-Cal program, the department is required to make supplemental payments to certain disproportionate share hospitals based on specified criteria. Payments are made from defined intergovernmental transfers that are paid into the Medi-Cal Inpatient Payment Adjustment Fund, as required, with this fund being continuously appropriated for specified purposes.

This bill would revise the methodology of reimbursement of disproportionate share hospitals.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 553 (AB 904) Miller. Controlled substances: penalties.

Existing law prohibits the manufacture of controlled substances and the possession of certain precursors of controlled substances with the intent to manufacture those controlled substances.

This bill would provide that any person convicted of violating these provisions, or of an attempt to violate these provisions, as they relate to methamphetamine or phencyclidine, when the commission or attempted commission of the offense causes the death or great bodily injury of another person other than an accomplice, shall be punished by an additional term of one year in the state prison. By increasing the penalty for an existing crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 554 (AB 1127) Knox. Telecommunications equipment.

(1) Existing law makes it a crime to use a telecommunications device, as defined, intending to avoid the payment of any lawful charge for service to the device, or to possess or manufacture a telecommunications device with intent to sell or offer to sell the device to another, intending to avoid the payment of any lawful charge for service to the device.

This bill instead would make it a crime to (a) knowingly advertise illegal telecommunications equipment, as defined; (b) possess or use illegal telecommunications equipment intending to avoid the payment of any lawful charge for

telecommunications service or to facilitate other criminal conduct; or (c) possess or manufacture illegal telecommunications equipment with intent to sell, transfer, or furnish or offer to sell, transfer, or furnish the equipment to another, intending to avoid the payment of any lawful charge for telecommunications service or to facilitate other criminal conduct. The bill would delete the definition of telecommunications device and instead set forth a definition of illegal telecommunications equipment. The bill would provide that in the event that a person violates these provisions with the intent to avoid the payment of any lawful charge for telecommunications service to a telecommunications service provider, the court shall order the person to pay restitution to the telecommunications service provider, as specified. By creating new crimes, this bill would impose a state-mandated local program.

(2) Existing law provides that it is a crime for any person to knowingly buy, sell, receive, dispose of, conceal, or possess any personal property from which the manufacturer's serial number, or any other distinguishing number or identification mark has been removed, defaced, covered, altered, or destroyed.

This bill would also make it a crime for any person to knowingly buy, sell, receive, dispose of, conceal, or possess any personal property from which the manufacturer's identification number or electronic serial number has been removed, defaced, covered, altered, or destroyed. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 555 (SB 381) Watson. Adult residential care facilities and residential care facilities for the elderly: licensee and administrator training.

Existing law requires the Director of Social Services, in consultation with the Director of Mental Health and the Director of Developmental Services, to establish a training program to ensure that licensees, operators, and staffs of adult residential facilities have appropriate training to provide the care and services for which a license or certificate is issued. Existing law requires that the training include a 35-hour training program in prescribed subjects, for administrators and licensee administrators, and 40 hours of continuing education in these subjects for renewal of the 2-year certificates.

Existing law separately requires the administrator of a residential care facility for the elderly, unless exempted under specified circumstances, to successfully complete a certification program for licensees of those facilities. Existing law specifies the contents of the certification programs, and prescribes the duties of the State Department of Social Services in providing the certification. Under existing law, certificates issued pursuant to the described certification procedures to administrators of residential care facilities for the elderly, and adult residential care facilities, expire 2 years from the anniversary date of the initial issuance of the certificate.

This bill would require that the State Department of Social Services, in consultation with the State Department of Mental Health and the State Department of Developmental Services, develop or approve the curriculum content and training materials for the 35-hour training program and for the 40-hour continuing education program, and would, under specified conditions, exempt persons who were employed as administrators prior to July 1, 1996, from the 35-hour training program.

This bill would revise existing certification requirements for administrators of the above residential care facilities, including permitting waiver of fingerprint submission under certain circumstances. It would require that the process for issuing a certificate shall not begin until the department receives, among other things, a certificate of completion of training and fingerprints. The bill would also revise requirements for department approval of vendors of continuing education for administrators of residential care facilities for the elderly. The bill would make other technical, clarifying, and conforming changes to the existing certification provisions.

Ch. 556 (SB 461) Karnette. Optometry: unprofessional conduct.

Existing law provides for the licensure and regulation of optometrists, and provides that certain acts by an optometrist constitute unprofessional conduct. Existing law also provides that all money collected pursuant to these provisions be paid into the Optometry Fund in the State Treasury.

Existing law requires applicants for examination for a certificate of registration as an optometrist to meet certain requirements.

This bill would require all applicants who matriculate in a school of optometry on or after September 1, 1997, to show evidence that they have received education in child abuse detection and the detection of alcoholism and other chemical substance dependency. This bill would also require the board to encourage every optometrist to take courses in pharmacology and pharmaceuticals as a part of continuing education, to consider requiring certain optometrists to take courses in child abuse detection and elder abuse detection, and to develop and disseminate materials regarding child abuse and neglect and elder abuse and neglect.

This bill would authorize a licensee to be ordered to undergo a professional competency examination if the board determines there is reasonable cause to believe the licensee is unable to practice optometry with reasonable skill and safety to patients. It would define the criteria for demonstrating reasonable cause, and would provide that the results of the competency examination are admissible as direct evidence in a disciplinary or interim proceeding against the licensee.

This bill would provide that the following acts, as prescribed, constitute unprofessional conduct: (1) conviction of violating any state or federal statute or regulation regulating dangerous drugs or controlled substances, (2) knowingly making or signing a document relating to optometry that falsely represents facts or (3) altering, modifying, or creating a medical record of any person with fraudulent intent.

The bill would also authorize the State Board of Optometry to impose a civil penalty of \$500 for the altering or modifying of a medical record, or creating a false record, with fraudulent intent. By increasing the source of money for a continuously appropriated fund, this bill would make an appropriation.

Ch. 557 (SB 641) Polanco. Pretrial release: failure to appear.

Existing law requires that a hearing be held before any person who is arrested for a violent felony or certain other offenses involving spousal rape, domestic violence, or harassing and threatening another person is released on bail in an amount that is more or less than the amount contained in the schedule of bail for the offense, or on his or her own recognizance.

This bill would extend the application of this provision to persons who are arrested for serious felonies other than residential burglaries. The bill would require that the court consider evidence regarding release of the person detained, as specified, and would require the court to appoint defense counsel for the hearing. By imposing increased duties on local criminal justice systems that are equivalent to those imposed by the establishment of a new crime, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 558 (SB 945) C. Wright. Health.

Existing law requires a training and certification program for home health aides and for nurse assistants in certain health facilities and provides for the issuance of certificates by the State Department of Health Services. The certification process requires that, upon enrollment in a training program for nurse assistant or home health aide certification, a candidate for training submit a training examination application to the department. Existing law requires that the application include a question whether the applicant has been convicted of any crime, other than a minor traffic violation, and authorizes the department to request various information to establish the applicant's identity.

This bill would require a nurse assistant or home health aide candidate for training to submit to the department fingerprint cards with the training and examination

application upon enrollment and prior to direct contact with residents. The bill would require the applicants to pay the costs associated with rolling the fingerprint cards. The bill would provide that the fee to cover the processing costs, other than the costs associated with rolling the fingerprint cards, of the Department of Justice shall not exceed \$32 per card. The bill would set forth a process for certain unemployed new nurse assistant or home health aide applicants to temporarily waive this fee requirement. The bill would delete the latter provisions that require the application to inquire whether the applicant has been convicted of a crime and authorize the department to request information that establishes the applicant's identity.

Existing law requires that a criminal record clearance be made for all nurse assistants and home health aides and requires the department to deny a training and examination application and deny, suspend, or revoke a certificate if the applicant or certificate holder has been convicted of certain offenses.

This bill would add to the offenses that subject an applicant to sanction under these criminal record clearance provisions.

Existing law authorizes a nurse assistant or home health aide applicant or certificate holder who receives written notification that the department has denied an application or denied, suspended, or revoked a certificate to request an administrative hearing, upon written request, that includes the opportunity to present his or her position, with or without legal representation and to subpoena and cross-examine witnesses.

This bill would provide, instead, that, upon receipt of a written request, the department shall hold an administrative hearing pursuant to designated procedures, except where the procedures are inconsistent with these provisions.

Under existing law, the criminal record clearance process includes procedures for resolving the question of the identity of the applicant and requires the applicant to pay for the cost of fingerprinting and processing that may be required by the department under this provision, but requires the department to reimburse the applicant for this cost if the search demonstrates that the applicant does not have any criminal convictions. The process also requires the department, prior to taking any action, to give notice to the applicant if the applicant is found to have a criminal conviction, other than a minor traffic violation. Existing law requires that a criminal record clearance for purposes of these provisions be implemented beginning July 1, 1995, and be phased in for all renewals of certificates by June 30, 1997.

This bill would revise the criminal record clearance procedure to (1) delete the provisions regarding providing notice to the applicant and procedures for resolving the question of the identity of the applicant under certain circumstances, (2) require that a criminal record clearance for purposes of these provisions be implemented beginning July 1, 1998, and phased in for all renewals of certificates by June 30, 2000, and (3) require the use of fingerprint live scan technology implemented by the department by 1999 to be used by the department for purposes of positive fingerprint identification.

This bill would revise certain of the fee provisions for certified home health aides and nurse assistants.

Existing law requires that all initial certified nurse assistant and certified home health aides shall as a requirement for certification to provide services to elderly and dependent adults, undergo a criminal background check, and authorizes the State Department of Health Services to establish a fee for a background check of certified home health aide applicants at no more than \$15.

Existing law requires, until July 1, 1997, employers to reimburse nurse assistant and home health aide certificate holders who are their employees in the amount of \$7 for the cost of the criminal background check upon receipt of evidence that the renewal application has been submitted.

This bill would delete the provisions that authorize the department to establish a fee for certified home health aide applicants for purposes of the criminal background check. The bill would also delete the above reimbursement provisions.

The bill would provide that nurse assistants and home health aides certified prior to July 1, 1998, shall, as a condition of renewal of their certificate, undergo a criminal background check pursuant to these provisions and that nurse assistants and home health aide applicants submitting applications on or after July 1, 1998, shall, undergo a criminal background check pursuant to these provisions.

Existing law provides for the licensure of home health agencies, as defined, by the department. This law sets forth the qualifications for a home health agency license.

This bill would add to these qualifications for a home health agency license a requirement that the owner, or any person having 10% or greater interest in a corporation, partnership, or association that owns, and the administrator of the home health agency submit to a criminal record check, at their expense, but not to exceed \$32. The bill would generally require that an application for licensure be denied or the person be prohibited from providing service in the home health agency if the criminal record discloses a felony or any crime that evidences an unfitness to provide home health services.

Existing law requires the Department of Justice to make available to the State Department of Health Services, at no cost, access to the California Law Enforcement Telecommunications System (CLETS).

This bill would provide, as an alternative to and in lieu of the application of this provision, that the Department of Justice and the State Department of Health Services may negotiate and enter into a contract that specifies the method and terms upon which the cost of the Department of Justice to access the California Law Enforcement Telecommunications System for purposes of the State Department of Health Services are allocated between the respective departments. The bill would provide that the above requirement shall apply upon the termination, for any reason, of the contract and would prohibit the contract from containing any provisions to the contrary.

Ch. 559 (SB 1121) Craven. Adoption.

Under existing law, an adoption service provider, as defined, has specified duties relating to independent adoptions, including the duty to advise each birth parent of his or her rights to counseling, among other things.

This bill would authorize a licensed marriage, family, and child counselor with a minimum of 5 years' experience providing professional adoption casework services while employed by a licensed California adoption agency or the department, to be an adoption service provider. The department would be required to review the qualifications of each individual to determine his or her professional adoption casework experience. The bill would also require that the birth parent be advised of his or her choices regarding counselors, as specified.

Ch. 560 (AB 6) Bowler. Controlled substances: gamma-hydroxybutyrate.

Existing law categorizes controlled substances into 5 schedules and places the greatest restrictions on those contained in Schedule I. Controlled substances contained in Schedule II may be lawfully prescribed under limited circumstances.

This bill would include in Schedule II the sedative and hypnotic drug gamma-hydroxybutyrate. This bill would impose a state-mandated local program upon local governments by creating new crimes with respect to gamma-hydroxybutyrate.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 561 (AB 323) Baca. Community care facilities: group homes.

Existing law provides for the licensure and regulation of community care facilities, including group homes, by the State Department of Social Services. Violation of these provisions is subject to criminal sanction.

This bill would establish a pilot project, to be repealed on January 1, 2001, for San Bernardino County. The bill would require the department to report to the Legislature on the effectiveness of the pilot project upon the project's conclusion.

Existing law requires community care facilities with 6 or fewer residents, except certain family homes, to establish an approved procedure for immediate response to incidents and complaints.

This bill would provide that, for purposes of the pilot project, a group home of any size in San Bernardino County must also comply with this requirement.

Existing law provides that any person may request the inspection of a community care facility by notifying the department of an alleged violation of the law regulating community care facilities.

This bill would require the department, on or before July 1, 1998, to develop a plan to be submitted to the Legislature for the creation of a toll-free "800" number that will allow callers in San Bernardino County to access the Inland Empire Office-Residential in order to notify the department of an alleged violation by a group home operator of the laws regulating community care facilities. The bill would allow the department to request the voluntary assistance of the Care Facilities Task Force in the development of the plan if a resolution creating the task force becomes effective.

The bill would require the department to use existing resources to perform the duties prescribed by its provisions.

This bill would require the owner or licensee of a group home in San Bernardino County, on or after July 1, 1998, to provide notice about the complaint procedure to any person who makes a complaint to the group home or asks how to make a complaint about the group home. The notice shall include notice of the approved procedure for immediate response to incidents and complaints, notice of the right to request an inspection of the facility, a statement that the department will not investigate a complaint if the department determines that the complaint is willfully intended to harass a licensee or is without any reasonable basis, and the telephone number of the Inland Empire Office-Residential. By changing a definition of a crime these requirements would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 562 (AB 590) Ashburn. Fairs.

Existing law provides for the California Exposition and State Fair, district agricultural association fairs, and county fairs. Existing law sets forth the powers of the Board of Directors of the California Exposition and State Fair and of the district agricultural associations, which includes the power to enter into contracts.

This bill would permit these boards to enter into agreements to secure donations, memberships, sponsorships, and marketing and licensing agreements for the receipt of money, or services or products in lieu of money. The bill would permit the board of directors of a county fair to enter into those types of agreements. The bill would also permit these boards to employ or enter into an agreement with an entity or person to develop, solicit, sell, and service these agreements.

Ch. 563 (AB 749) Papan. University of California: bidding requirements.

(1) Existing law requires the Regents of the University of California, except as specified, to let any contract for a project to the lowest responsible bidder. For these purposes, "project" includes the erection, construction, alteration, repair, or improvement of any University of California structure, building, road, or other improvement that will exceed in cost a total of \$50,000.

This bill would specify that the cost of a project includes labor and materials for these purposes.

(2) Existing law authorizes University of California projects to be done on a time and materials basis, by contract upon informal bids, by University of California employees, by day labor under the direction of the regents, or by a combination thereof, in case of emergency due to an act of God, earthquake, flood, storm, fire, landslide, public disturbance, vandalism, or failure that causes damage to a university-owned building, university-owned real property, or any improvements thereon, when that work or those remedial measures are required immediately and are necessary to protect the public health, safety, and welfare.

This bill also would authorize projects to be done by contract upon informal bids when the emergency causes damage to a university-owned structure.

(3) Existing law authorizes the Regents of the University of California to perform projects with university employees if the regents deem that the award of a contract, the acceptance of bids, or the acceptance of further bids is not in the best interests of the university, provided that the estimated value of work to be so performed shall not exceed \$20,000, the project is for the erection, construction, alteration, repair, or improvement of experimental or diagnostic equipment, or the work is to be performed at a research facility located in a remote and sparsely populated area and the estimated cost does not exceed \$50,000. These provisions do not apply to the painting or repainting of a structure, building, road, or improvement of any kind if the estimated value of the painting or repainting work exceeds \$10,000.

This bill would expand the threshold for painting or repainting work to a value of \$25,000. It would include specialized research equipment within the authorization. The bill would also expand the cost limitation on work to be performed by university employees to a value of \$50,000 and would delete the authorization relating to work at a research facility in a remote and sparsely populated area.

(4) This bill would provide that where the nature of the work, in the opinion of the Regents of the University of California, is such that the application of all of specified provisions of law relating to competitive bidding by the university is not required in connection with that work, and the cost of the project does not exceed \$100,000, the regents shall solicit bids in writing and shall award the work to the lowest responsible bidder or reject all bids.

(5) The bill also would correct an incorrect cross-reference.

Ch. 564 (AB 849) Sweeney. Alcoholic beverages: licenses.

The Alcoholic Beverage Control Act prohibits the application for, and issuance of, until January 1, 1998, an original retail off-sale beer and wine license for any premises if the applicant premises are located in a city, county, or city and county where the number of retail off-sale beer and wine licenses or total number of retail off-sale beer and wine licenses and off-sale general licenses exceeds one license for a certain number of inhabitants. Notwithstanding any other provision of law, existing law, until January 1, 1998, allows a retail off-sale beer and wine replacement license to be issued under specified conditions.

This bill would recast and extend the operation of those provisions indefinitely. The bill would make related changes.

Existing law also provides that, notwithstanding that prohibition, until January 1, 1998, the Department of Alcoholic Beverage Control may: (1) approve an application for a retail off-sale beer and wine license in those areas if the applicant shows that public convenience and necessity would be served by the issuance and certain other conditions are met, and (2) issue a retail off-sale beer and wine license to a licensed beer and wine wholesaler if certain conditions relating to location of the license and types of sales are met.

This bill would extend the operation of those enabling provisions indefinitely and would make conforming changes.

Existing law allows the Department of Alcoholic Beverage Control to issue additional on-sale or off-sale general licenses for each specified increase in the number of inhabitants in a county.

This bill would provide similar authorization with respect to off-sale beer and wine licenses for each specified increase in the number of inhabitants in a city, county, or city and county.

Existing law prohibits the Department of Alcoholic Beverage Control from restricting the number of beer, off-sale beer and wine, beer and wine wholesaler's, or winegrower's licenses in any county, as specified.

This bill would eliminate that prohibition with respect to off-sale beer and wine licenses, thereby allowing the department to restrict the issuance of off-sale beer and wine licenses in a county to a certain number, as specified.

This bill would state the Legislature's intent concerning a limitation on the number of premises licensed for the off sale of beer and wine.

Ch. 565 (SB 275) Kopp. Redevelopment.

(1) The existing Community Redevelopment Law requires each redevelopment agency to present an annual report to its legislative body containing specified information including an independent financial audit, a fiscal statement for the previous fiscal year, a description of the agency's activities affecting housing and displacement, and any other information the agency believes useful to explain its programs.

This bill would impose a state-mandated local program by requiring each redevelopment agency to include in its annual report a description of the agency's progress in alleviating blight in the previous fiscal year, as specified, a list of, and status report on, all loans made by the redevelopment agency that are \$50,000 or more that were in default in the previous fiscal year, or not in compliance with the terms of the loan approved by the redevelopment agency, and a description of the number and nature of the properties that the agency has acquired in the previous fiscal year.

(2) Under existing law, redevelopment agencies must publish notice of hearings in a newspaper of general circulation, and mail notice to all assesses, residents, occupants, and businesses within the boundaries of a proposed plan, as well as to the governing body of any agency that levies taxes within that area. This notice currently includes a legal description of the boundaries of the proposed areas of the plan as well as a general statement of the scope and objectives of the plan.

This bill would provide that, instead of a legal description, redevelopment agencies shall publish and mail notice which includes a legible map of the boundaries of the proposed plan, along with notice that a legal description is available for public inspection during the agency's normal business hours, and that a copy is available upon request, free of charge. These requirements would constitute a state-mandated local program.

(3) Under existing law, a redevelopment agency may require lessees or purchasers of property acquired in a redevelopment project to comply with certain requirements or conditions, as specified.

This bill would impose a state-mandated local program by requiring redevelopment agencies to obligate lessees or purchasers of property acquired in a redevelopment project to comply with the redevelopment agency's requirements or conditions, including any covenants, conditions, or restrictions imposed by the redevelopment agency to prevent speculation or excess profit-taking. This bill would also provide that the conditions imposed by the redevelopment agency can include a right of reverter to the agency, and conditions protecting the interests of lenders.

(4) Under existing law, purchasers of property acquired in a redevelopment plan may sell that property to a 3rd party for a profit, subject only to covenants and conditions imposed by the redevelopment agency.

This bill would express the intent of the Legislature that these properties not be the subject of speculation.

(5) Under existing law, a redevelopment agency is authorized to make mortgage or construction loans to finance residential construction.

This bill would require all loans made by a redevelopment agency to be made according to a regulation that contains standards, qualifications, and criteria for the making and approval of loans and that has been adopted by the redevelopment agency at a public meeting. These requirements would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 566 (SB 543) Committee on Agriculture and Water Resources. Water resources.

(1) The Water Conservation District Law of 1931 requires the board of a water conservation district to hold regular meetings in its office at prescribed times.

This bill would allow the board to change, by resolution, the location for holding regular meetings in accordance with a specified notification procedure.

(2) Existing law authorizes the Department of Water Resources to enter into contracts and agreements to carry out its responsibilities relating to the State Water Project.

This bill would allow those contracts and agreements to include prescribed indemnification provisions.

(3) The Water Conservation Act of 1927 imposes duties on the county treasurer and the county auditor in connection with the operation of districts subject to that act.

This bill would authorize the board of a district to assume responsibilities over the deposit and disbursement of funds of a district, as prescribed.

(4) Under the Clean Water Bond Law of 1984, the Water Conservation and Water Quality Bond Law of 1986, and the Water Conservation Bond Law of 1988, the department may make loans to local agencies, upon approval of the Legislature by statute, for prescribed purposes.

This bill would make an appropriation by authorizing loans from the Water Conservation Account in the 1984 State Clean Water Bond Fund, the Water Conservation and Groundwater Recharge Account in the 1986 Water Conservation and Water Quality Bond Fund, and the 1988 Water Conservation Fund to specified entities for specified projects in accordance with those bond laws.

(5) Existing law authorizes any jurisdiction to levy an ad valorem property tax rate in excess of the rate permitted pursuant to Section 1 of Article XIII A of the California Constitution for bonded indebtedness for the acquisition or improvement of real property that is approved by $\frac{2}{3}$ of its voters after June 4, 1986. Article XIII C and Article XIII D of the California Constitution establish various approval and other procedural requirements with respect to the imposition of local taxes and with respect to the imposition of local assessments, and fees and charges, as defined. The California Water District Law authorizes California water districts to impose prescribed assessments on property owners within those districts.

This bill would declare that those assessments are ad valorem taxes that are imposed in accordance with Article XIII A of the California Constitution and are not subject to the requirements of Article XIII D of the California Constitution.

(6) Existing law requires the Department of Toxic Substances Control to establish specified funding for site operations and maintenance for remedial measures affecting a specified San Gabriel Valley Superfund site, and to deposit sufficient funds to cover the costs of operation and maintenance of carbon absorption treatment systems at the Richwood, Hemlock, and Rurban Homes Mutual Water Companies for 20 years.

This bill would require the department to determine whether it is more economical to provide Richwood residents with a substitute source of water supply than to maintain, operate, or repair a treatment system. If the department determines that a substitute source of water supply is more economical, the bill would allow the expenditure of specified funds to provide Richwood residents with a substitute source of water supply, subject to approval, as prescribed.

(7) The Safe, Clean, Reliable Water Supply Act requires the unallocated funds remaining in the Agricultural Drainage Water Account in the 1986 Water Conservation and Water Quality Bond Fund on November 6, 1996, to be transferred to the Drainage Management Subaccount of the Clean Water and Water Recycling Account in the Safe, Clean, Reliable Water Supply Fund.

This bill would, additionally, require any unallocated money, as defined, deposited into the Agricultural Drainage Water Account from the sale of any bonds that are sold after November 6, 1996, to be transferred to the Drainage Management Subaccount.

(8) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 567 (SB 879) Johnston. Endangered species.

Under the existing California Endangered Species Act, it is a misdemeanor to import, export, take, possess, purchase, or sell any species that the Fish and Game Commission has determined to be an endangered species or a threatened species, as defined, except as specified. Existing law requires the commission to maintain lists of threatened species and endangered species.

Existing law permits the Department of Fish and Game to authorize the import, export, take, or possession of any endangered species, threatened species, or candidate species for scientific, educational, or management purposes.

This bill would, additionally, authorize the department to issue a permit to authorize the incidental take of those species under specified conditions.

The bill would provide that nothing in the California Endangered Species Act or any other law prohibits the taking or incidental taking of any endangered, threatened, or candidate species, if the taking was authorized by the department, as specified, if the application process for the authorization commenced on or before April 10, 1997, and the department approved the authorization to take within specified timeframes. The bill would deem all of those permits, memoranda of understanding, plans, agreements, and amendments thereto, except as specified, to be in full force and effect as of the date approved or entered into by the parties insofar as they authorize the take of species.

Ch. 568 (SB 987) Sher. Air pollution: aerosol paints.

(1) Existing law requires the State Air Resources Board to adopt, by January 1, 1995, regulations requiring the maximum feasible reduction in volatile organic compounds emitted from the use of aerosol paints, as specified.

This bill would specifically include acetone among the volatile organic compounds included in a specified baseline year measurement used for the calculation of emissions reduction.

The bill would delete an exemption for aerosol paints from provisions prohibiting the adoption of a regulation that requires the elimination of a product form. Since, under other provisions, a violation of those state board regulations would be a misdemeanor, the bill would create a state-mandated local program by changing the definition of a crime.

(2) The bill would incorporate additional changes to Section 41712 of the Health and Safety Code proposed by SB 230, to be effective if both bills are enacted and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 569 (SB 1027) Schiff. School employees retirement.

The State Teachers' Retirement System authorizes members to redeposit refunded contributions.

The bill would authorize members to redeposit contributions withdrawn by nonmember spouses.

Existing law authorizes credit for service prior to July 1, 1944, in other states.

This bill would authorize purchases of additional service credit for out-of-state public school employment without any date restriction. These provisions would become operative on January 1, 1999.

Ch. 570 (SB 67) Kopp. Product liability actions: tobacco.

Existing law exempts a manufacturer or seller from liability in a product liability action if (1) the product is inherently unsafe and is known to be unsafe by the ordinary consumer, as specified, and (2) the product is a common consumer product intended for personal consumption, such as sugar, castor oil, alcohol, tobacco, and butter, as specified.

Existing law also states that these provisions do not apply to actions brought by a public entity in specified cases to recover the value of benefits provided to individuals injured by a tobacco-related illness caused by the tortious conduct of a tobacco company, as specified.

This bill would revise these provisions. The bill would delete tobacco from the illustrative list of common consumer products and would also specify that the exemption described above does not exempt the manufacture or sale of tobacco products by tobacco manufacturers from product liability actions. This bill would also declare that there is no statutory bar to tobacco-related personal injury, wrongful death, or other tort claims

against tobacco manufacturers by smokers or others, as specified, and that such claims shall be determined on their merits. The bill would also provide that these provisions shall not be construed to grant immunity to tobacco industry research organizations.

The bill also would make a related legislative declaration.

Ch. 571 (AB 1088) Committee on Judiciary. Courts: staffing: juries: FAIR program.

(1) Under existing law, opposition papers and reply papers to specified noticed motions in civil actions are required to be filed with the court and served on each party at specified times before the hearing on the motions.

This bill would require that these papers be served by a means reasonably calculated to ensure delivery to the other party or parties not later than the close of the next business day after the time of their filing, as specified.

(2) Existing law sets forth the organization of, and the number, classification and compensation of officers, employees, and various attachés of, the superior and municipal courts. Existing law also sets forth procedures for jury selection.

This bill would, among other things, revise the organization of, or the number, compensation or classification, as applicable, of officers, employees and attachés of, the Kern and Shasta County Superior Courts and the municipal courts in the Counties of Alameda, Contra Costa, Fresno, Kern, Los Angeles, Madera, Mariposa, Napa, San Diego, San Joaquin, San Luis Obispo, Santa Barbara, Santa Clara, and Tuolumne, as specified. The bill would also revise procedures for creating a pool of prospective jurors for purposes of jury selection in Nevada County.

(3) Existing law requires each nonprofit agency that is utilized by a court for purposes of monitoring traffic violator schools to monitor each classroom location represented on the agency's statewide referral list at least every 90 days.

This bill would limit the monitoring of traffic violator schools to those classroom locations that are situated within the judicial districts in which that agency provides services to the courts.

(4) Existing law, the Family Assessment Intervention and Resource program known as FAIR, creates centers in several counties offering judicially supervised prevention and early intervention programs to children at risk of entering the juvenile justice system, as either dependent children of the court or as juvenile offenders, and the families of those children. The program requires the Judicial Council to report to the Legislature on the effectiveness of the program not later than July 1, 1997. The provisions enacting the FAIR program are repealed on January 1, 1998.

This bill would extend the repeal date of those provisions, until January 1, 2001, and would direct the Judicial Council to submit the above described report on the effectiveness of the program not later than July 1, 1998.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 572 (AB 686) Baugh. School employee retirement.

(1) The State Teachers' Retirement Law defines the term "class of employees" for purposes of various benefit determinations.

This bill would authorize specified county offices of education to revise the definition of that term.

(2) The State Teachers' Retirement Law authorizes school governing boards to encourage retirements by providing additional service credit and provides that those retired members are subject to postretirement school employment limitations.

This bill would exempt certain types of postretirement school employment from that restriction after the person has been retired for one year.

Ch. 573 (AB 1296) Morrow. Liability.

Existing law provides that neither public entities nor public employees are liable to any person who participates in a hazardous recreational activity. Existing law defines "hazardous recreational activities" for these purposes to include various activities.

This bill would provide that skateboarding at a public skateboard park is a hazardous recreational activity for purposes of those provisions if the person skateboarding is 14 years of age or older, the skateboarding activity was stunt, trick, or luge skateboarding, and the skateboard park is on public property, as specified. The bill would require appropriate local public agencies to maintain a record of all known or reported injuries incurred by skateboarders in a public skateboard park or facility, and other information regarding those incidents, as specified, and would require copies of these records to be filed with the Judicial Council annually, beginning in 1999. By imposing additional duties on local public agencies, the bill would create a state-mandated local program. The bill would require the Judicial Council to submit a report to the Legislature regarding this information on or before March 31, 2000, as specified.

The bill would provide for the repeal of these provisions on January 1, 2003.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 574 (AB 837) Thomson. Political Reform Act of 1974: lobbyists: certification.

Existing provisions of the Political Reform Act of 1974 regulate the activities of lobbyists, lobbying firms, and lobbyist employers, as defined, in connection with attempts to influence legislative and administrative action by legislative and other state officials. As part of this regulatory activity, the act requires that lobbying firms and lobbyist employers register with the Secretary of State and that each lobbyist who is a partner, owner, officer, or employee of a lobbying firm or who is an employee of a lobbyist employer, complete a certification. Among other things, the certification requires the lobbyist to state that he or she has completed an orientation course on the ethical issues and laws relating to lobbying within the previous 24 months. In the case of a new lobbyist certification, where the lobbyist has not completed the course within the previous 24 months, the certification must include a statement that the lobbyist will complete a course within a reasonable period of time, in which case the certification will be accepted on a conditional basis and, within a reasonable time after the lobbyist completes the course, the lobbyist must file a new certification with the Secretary of State which shall replace the conditional certification.

This bill would revise the procedures for the certification of a lobbyist relating to the completion of the specified ethics orientation course. This bill would require that the ethics course be provided semi-annually, and at least once prior to June 30 each year. Under the bill, a lobbyist who filed and completed a lobbyist certification in connection with the last regular session of the Legislature is required to include a statement that he or she has completed within the previous 12 months, or will complete no later than June 30 of the following year, the ethics orientation course. Moreover, under the bill, if the latter alternative is applicable to the lobbyist, the lobbyist's certification would be required to be accepted on a conditional basis and if the lobbyist completes the course within the required period, a new lobbyist certification would be required to be filed with the Secretary of State replacing the conditional certificate. In the case of new lobbyist certifications, filers would be required to complete the ethics course within 12 months. In either case, if the lobbyist fails to complete the course within the required period contrary to his or her statement, the bill would provide that conditional lobbyist certification is void, thereby disqualifying the individual from acting as a lobbyist, until he or she completes the course and files the prescribed lobbyist certification, which certifies the date that he or she completed the course.

The bill would provide that acting as a lobbyist pursuant to this title after the conditional certificate has become void is a violation of the act.

Existing law requires lobbying firms and lobbyist employees to renew their registrations within 20 days after the opening of each regular session of the Legislature.

This bill would require lobbying firms and lobbyist employers to file renewals of their registration between November 1 and December 31 of each even-numbered year.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on certain persons who violate the provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

Ch. 575 (AB 397) Kuykendall. Postsecondary education: Selective Service Registration.

(1) Existing federal law, the Military Selective Service Act, requires certain males residing in the United States to present themselves for, and submit to, registration at the time and place, and in the manner, determined by proclamation of the President of the United States and by rules and regulations adopted pursuant to that federal law. Existing federal law also requires a person who is required to register under the act to file with the institution of higher education that the person intends to attend or is attending, a statement of compliance with the act and implementing regulations in order to receive any grant, loan, or work assistance under specified provisions of existing federal law. Existing state law requires all state agencies to cooperate with the United States Selective Service System in efforts to publicize the necessity of, and requirements for, compliance with that act.

This bill would require each public postsecondary educational institution to make every reasonable effort to inform all male applicants for undergraduate admission of their obligation to register in accordance with the federal Military Selective Service Act, as specified. Under provisions of existing law, this requirement would not apply to the University of California except to the extent that the Regents of the University of California, by appropriate resolution, make it applicable. The imposition of this requirement on community colleges and community college districts would impose a state-mandated local program.

The bill also would prohibit any person subject to the federal Military Selective Service Act from receiving any student financial aid pursuant to specified provisions of existing state law if that person has not registered in accordance with that act.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 576 (AB 738) Papan. University of California: real property sales.

(1) Existing law sets forth the requirements pursuant to which the Regents of the University of California may dispose of real property. Among other things, the regents are required to provide public notice of a sale of real property situated in California if the estimated value of the real property to be sold exceeds \$50,000 net to the seller, by

publication once a week for at least 2 consecutive weeks next preceding the day set for receiving bids, in a newspaper of general circulation in the county in which the property is situated, as well as in 2 other newspapers of general circulation, one published in Los Angeles and one in San Francisco. Published notices are required to specify the general description of the property and the conditions of sale, and the date and place for the receiving of sealed bids.

This bill would revise the amount of the estimated value of real property to be sold pursuant to these provisions to \$500,000 net to the seller. It would provide that notice shall be by publication a minimum of 6 times, between 2 and 12 weeks preceding the day set for receiving bids, three times in at least one newspaper of general circulation in the county in which the property is situated, and at least three times in a newspaper of general circulation in one of specified cities. It would delete the requirement that the published notices specify the conditions of sale, and instead require them to specify the source for bid materials and information.

(2) Existing law requires that, with respect to bids submitted for the sale of real property by the Regents of the University of California, the regents shall accept in public the bid offering the combination of price and terms deemed to be in the best interest of the university, or reject all bids.

This bill would specify that in the case of nonperformance by the successful bidder, the regents may accept, from the remaining bids, the bid that offers the combination of price and terms that they deem to be in the best interest of the university.

(3) Existing law exempts specified types of transactions from the provisions applying to the disposition of real property by the Regents of the University of California. One exemption is the disposition of realty acquired as part of an investment transaction pursuant to which the regents are contractually obligated to resell property to a specified party.

This bill would delete this exemption and, instead, provide that the disposition of real property acquired through exercise of a power of sale pursuant to a deed of trust, or held as an asset in the university's investment portfolio is exempt from these provisions. It would additionally exempt exchanges to acquire real property from these provisions.

Ch. 577 (AB 387) Miller. State government: State Personnel Board and state civil service.

(1) Existing law authorizes the State Personnel Board to issue subpoenas for state officers and employees and other witnesses for hearings and investigations, subject to geographic and other restrictions and to issue subpoenas duces tecum.

This bill would revise those provisions to broaden the range of those subpoenas and make other changes.

(2) Existing civil service law provides that a person who claims immunity prior to testimony or the production of books or papers, shall not be prosecuted, punished, or subjected to any penalty or forfeiture for testifying or producing documentary evidence, except for perjury committed in testifying.

This bill would apply this provision to a person who claims and is granted use and derivative use, or transactional immunity.

(3) Existing civil service law provides that when ordered to do so, a witness shall not be excused from testifying or from producing any documentary evidence in the investigation or hearing upon the ground that the testimony or documentary evidence required of the witness may tend to incriminate or subject the witness to penalty or forfeiture, provided the witness is granted use and derivative use immunity.

This bill would provide that a witness shall not be excused from testifying or from producing any documentary evidence in these circumstances provided the witness is granted immunity.

(4) This bill would also make a technical change.

Ch. 578 (AB 195) Murray. Money laundering: financial institutions.

(1) Existing law provides that any person who conducts or attempts to conduct a transaction within a 24-hour period involving monetary instruments of a total value exceeding \$5,000 through a financial institution with the intent to promote, manage, establish, or carry on any criminal activity, or knowing that the monetary instrument

represents the proceeds of, or is derived directly or indirectly from the proceeds of, criminal activity, is guilty of the crime of money laundering.

This bill instead would provide that a person guilty of the crime of money laundering must have a specific intent to promote, manage, establish, or carry on any criminal activity, and that the crime of money laundering is committed when the prohibited transactions are conducted within a 7-day period involving monetary instruments exceeding a total value of \$5,000 or a total value exceeding \$25,000 within a 30-day period, rather than a 24-hour period. The bill would provide that the aggregation periods do not create an obligation for financial institutions to record, report, create, or implement tracking systems or otherwise monitor transactions involving monetary instruments in any time period. The bill would also provide that a financial institution for the purposes of these provisions includes any person or business regularly engaged in the delivery, transmittal, or holding of mail or packages, or any person or business that conducts a transaction involving the transfer of title to any real property, vehicle, vessel, or aircraft. The bill would further revise the definition of monetary instrument, as specified. This bill would impose a state-mandated local program by increasing the scope of an existing crime.

(2) Existing law requires specified financial institutions to make and keep a record of, and file a report with the Department of Justice regarding, each transaction by, through, or to, the financial institution that involves currency of more than \$10,000, and makes a violation of these provisions a crime.

Existing law further provides that the Department of Justice shall destroy a report filed with it at the end of the 5th calendar year after receipt of the report, unless the report or information contained in the report is known by the Department of Justice to be the subject of an existing criminal proceeding or the Department of Justice has received subsequent reports concerning the person or persons involved in the reported transaction, and shall destroy a report filed with it at the end of the 10th calendar year, unless the report or information contained in the report is the subject of existing criminal proceedings.

This bill would provide instead that the Department of Justice shall destroy a report filed with it at the end of the 5th calendar year after receipt of the report, unless the report or information contained in the report is known by the Department of Justice to be the subject of an existing criminal proceeding or investigation.

(3) This bill would incorporate additional changes in Section 186.9 of the Penal Code proposed by SB 8, to be operative if SB 8 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 579 (SB 236) Solis. Vehicles: exclusive or preferential use lanes: mass transit vehicles.

Existing law authorizes the Department of Transportation and local authorities, with respect to highways under their respective jurisdictions, to authorize or permit exclusive or preferential use of highway lanes for high-occupancy vehicles. The department and local authorities are required to place and maintain signs and other official traffic control devices to designate the exclusive or preferential lanes, to advise motorists of the applicable vehicle occupancy levels, and, except where ramp metering and bypass lanes are regulated with the activation of traffic signals, to advise motorists of the hours of high-occupancy vehicle usage. Driving a vehicle upon those lanes except in conformity with the instructions imparted by the official traffic control devices, is prohibited. A motorcycle is authorized to be operated upon those exclusive or preferential use lanes unless specifically prohibited by a traffic control device.

This bill would authorize a mass transit vehicle, as defined, to be operated upon those exclusive or preferential lanes unless specifically prohibited by a traffic control device, if the Director of Transportation makes a specified determination.

Ch. 580 (SB 320) Committee on Housing and Land Use. Housing and Land Use Omnibus Act of 1997.

Existing law generally regulates, pursuant to separate bodies of law, the areas of land use, housing, and redevelopment.

This bill would enact the Housing and Land Use Omnibus Act of 1997 and would state legislative intent to combine several minor statutory changes relating to housing, land use, and related topics into a single measure, and would make related findings and declarations.

Existing law provides that, after making a survey in conformity with the practice of land surveying, the surveyor or civil engineer may file with the county surveyor in the county in which the survey was made, a record of the survey, and requires that a record of the survey relating to land boundaries or property lines shall be filed if the survey discloses any of specified conditions. Existing law relating to the practice of land surveying specifies standards for the use of monuments in surveys.

This bill would make revisions in these provisions relating to the resolution of differences with respect to records of survey between the surveyor or civil engineer and the county surveyor and would make provisions relating to monuments applicable to a record of survey.

Existing law requires every city, county, and city and county to revise the housing element of its general plan as frequently as is appropriate, but not less than every 5 years, to reflect the results of the periodic review of the housing element. Existing law also provides that specified councils of governments must complete the 3rd and 4th revisions of the housing elements of their general plans by specified dates. Existing law further provides that previous modifications to those deadlines shall not be construed to reinstate any state-mandated local program suspended by specified prior budget acts nor limit the responsibility of any jurisdiction to adopt a housing element in accordance with existing law.

This bill would extend the deadlines by which the specified councils of governments and other local governments must complete the 3rd and 4th revisions of the housing elements of their general plans and would add that the extension of those deadlines provided in this bill would not be construed to reinstate any state-mandated local program suspended by the Budget Act of 1997.

Existing law prescribes the requirements for a final subdivision parcel map.

This bill specifies a procedure that permits public streets or public easements to be abandoned by the filing of a final subdivision map including a procedure requiring the clerk of the local legislative body to certify each abandonment on the applicable map. This latter requirement would create a state-mandated local program.

Existing law prescribes the requirements for a parcel map.

This bill specifies a procedure that permits public streets or public easements to be abandoned by the filing of a parcel map.

Existing law, known as the State Housing Law, which is administered by the Department of Housing and Community Development and local enforcement agencies, generally regulates the construction, use, maintenance, and occupancy of buildings used for human habitation, including the use of CPVC piping in building construction as an alternate material.

This bill would make technical, nonsubstantive amendments to these provisions to conform outdated references to current law.

Existing provisions of the Health and Safety Code require the Department of Housing and Community Development and the State Fire Marshal to adopt and submit building standards for approval by the California Building Standards Commission and publication in the California Building Standards Code.

This bill would make technical, nonsubstantive changes to certain of these provisions to conform outdated references to current law.

Under the existing State Building Standards Law, the California Building Standards Commission is authorized to review proposed building standards, adopt or reject these proposed standards, and codify and publish the adopted standards in the California Building Standards Code. Under existing law, local agencies have the responsibility for the enforcement of numerous provisions of the California Building Standards Code. Under these provisions of the State Building Standards Law, safety guidelines are

established for the construction of structures, including single-family dwellings, that use baled rice straw, as defined, as a loadbearing or nonloadbearing material.

This bill would state that the statutory straw-bale guidelines neither increase nor decrease local building officials' authority to approve or disapprove alternative construction methods. The bill would provide that this statement is declaratory of existing law.

The Community Redevelopment Law contains provisions authorizing the establishment of a redevelopment project area located within the boundaries of a military base that has been closed pursuant to the actions of the federal Defense Base Closure and Realignment Commission.

This bill would reorganize certain provisions relating to the base closures and conversions contained in the Community Redevelopment Law by renumbering sections to place them in more appropriate locations of that law. The bill also would repeal obsolete provisions relating to the closure of Los Angeles Air Force Base and provisions relating to prohibitions on providing assistance to specified gambling or gaming operations.

Under existing law, the California Infrastructure and Economic Development Bank, which formerly was established within the California Housing and Finance Agency, was removed from that agency by legislation enacted in 1995.

This bill would repeal obsolete provisions relating to the California Infrastructure and Economic Development Bank within the jurisdiction of the California Housing and Finance Agency to conform to existing law.

The existing Farmworker Housing Assistance Program authorizes specified credits relating to qualified amounts paid or incurred by a taxpayer to construct or rehabilitate farmworker housing to meet the requirements of the Employee Housing Act.

This bill would revise the definition of "farmworker housing" and make other revisions in that program to delete references to the Employee Housing Act.

Under existing law, predevelopment loans may be made by the Department of Housing and Community Development from the Rural Predevelopment Loan Fund to eligible sponsors for assisted housing in rural areas to be occupied by persons of low income.

This bill would require the Department of Housing and Community Development to calculate a land purchase loan as a predevelopment loan under this program once the borrower has received a mortgage finance commitment.

Under existing law, the California Housing and Finance Agency is authorized to enter into agreements to provide staffing for the Farmer's Home Administration of the federal Department of Agriculture for federal loan programs for housing for low- and moderate-income families.

This bill would repeal that authorization.

Under existing law, the California Housing and Finance Agency is authorized to renegotiate, refinance, or foreclose on mortgages in default. With respect to housing developments, the agency is required to require that mortgage servicing and foreclosure practices, including forbearance and recasting of mortgages in default, conform to agency regulations.

This bill instead would require those practices of the California Housing and Finance Agency relating to mortgage servicing and foreclosure practices with respect to housing developments to conform to its policies and resolutions.

Under existing law, the California Housing and Finance Agency is required to develop a program for financing the development of second units to serve the housing needs of lower income households. Under the Second Unit Financing Program, the agency is authorized to utilize whatever funds are available and authorized to be utilized for those purposes, including proceeds from the issuance of revenue bonds by the agency.

This bill would repeal the Second Unit Financing Program.

Under the existing Senior Citizens Housing Assistance Program, the California Housing and Finance Agency is authorized to issue revenue bonds to finance the development, construction, and rehabilitation of rental housing for senior citizens. Under this program there exists in the State Treasury a Senior Citizens Housing Annuity Account which is continuously appropriated for use by the agency to be utilized to reduce rent levels in assisted housing units.

This bill would repeal the Senior Citizens Housing Assistance Program.

This bill also would repeal the California Housing and Jobs Investment Bond Act of 1993, which did not become operative because it was rejected by the voters at the November 2, 1993, general election, but which remains a part of the Health and Safety Code.

This bill would make other technical, nonsubstantive changes to existing law for organizational reasons or to conform obsolete references to current law.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 581 (SB 392) Rosenthal. Health care coverage: termination of Medi-Cal coverage.

Existing law governs the licensure and regulation of health care service plans and insurers, and defines a "late enrollee" as an eligible employee or dependent who has declined health coverage under the health benefit plan offered through employment or sponsored by an employer at the time of the initial enrollment period provided under the terms of the health benefit plan and who subsequently requests enrollment in that plan. Existing law provides exceptions under which an eligible employee or dependent is not considered a late enrollee.

This bill would add to this list of exceptions a person who is a dependent of an enrolled eligible employee who has lost or will lose his or her no share-of-cost Medi-Cal coverage and requests enrollment within 30 days of notification of this loss of coverage.

Since a violation of the provisions governing health care service plans is subject to criminal sanctions, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 582 (SB 514) Hayden. Education curriculum: Great Irish Famine.

Existing law specifies the course of study for grades 7 to 12, inclusive, and requires the State Department of Education to incorporate specified materials in department publications used as curriculum resources.

This bill would express the Legislature's intent that all state and local professional development activities provide teachers with content background and resources to assist in teaching about the Great Irish Famine of 1845-50. This bill would require that the Great Irish Famine of 1845-50 be considered in the next cycle in which the history/social science curriculum framework and its accompanying instructional materials are adopted.

Ch. 583 (AB 1226) Granlund. Vehicle license fees: revenue allocation: recently incorporated cities.

Existing law requires the Controller to distribute a specified percentage of vehicle license fee revenues, gasoline taxes, and diesel fuel taxes collected by the state to each city, and city and county, in accordance with the proportion that the population of each city, and city and county, bears to the total population of all cities, and cities and counties, in the state. It also requires the Controller, for purposes of these distributions, to determine the population of certain cities that were incorporated on or after January 1, 1987, to be the greater of the number of registered voters in that city as of the date of incorporation multiplied by a factor of 3, or the population of that city as calculated pursuant to a specified statutory provision. Existing law applies this latter requirement for only the first 8 or 5 full fiscal years of the subject city or city and county, as provided. Existing law also specifies the manner of calculating the population of territory that is newly annexed to a city subject to this requirement, but does not specify the manner in

which a population figure that is so calculated is to be applied for purposes of implementing the requirement.

This bill would extend the existing 8-year and 5-year limitations, to 10-year and 7-year limitations, respectively, but would apply the extended limitations only to the distribution of vehicle license fee revenues to cities that (1) are not annually restricted, as provided, in the number of housing units that may be constructed within their boundaries or (2) have prepared and adopted a housing element in compliance with a specified statute. This bill would also require that the population of newly annexed territory as calculated under current law be added to the annexing city's population, whether that population is determined on the basis of a multiple of the number of registered voters in that city on the date of incorporation or pursuant to a specified statutory provision.

Ch. 584 (SB 969) Burton. Judges' retirement.

The Judges' Retirement Law provides for the reduction of the retirement allowance of a judge who does not retire subsequent to the term of office in which he or she attains age 70.

The bill would require the Judicial Council, in cooperation with the Public Employees' Retirement System, to submit a study to the Legislature on that reduction on or before March 1, 1998.

Ch. 585 (SB 1072) Burton. Judges' retirement.

The Judges' Retirement Law authorizes persons who became judges on or before January 1, 1974, whose service was discontinued by any means other than death, resignation, recall, impeachment, or retirement to elect to allow their accumulated contributions to remain in the Judges' Retirement Fund and prescribes their maximum retirement allowance.

This bill would require the Judicial Council, in cooperation with the Public Employees' Retirement System, to conduct a study, and to report on or before March 1, 1998, to the Governor and the Legislature on providing service credit for judges who are in deferred retirement and are sitting on assignment.

Ch. 586 (SB 1302) Leslie. Employees: criminal history information.

Existing law requires every person, firm, association, partnership, or corporation offering or conducting private school instruction on the elementary or high school level to notify, in writing, the parents or guardians who reside with each pupil of that school whenever that school hires an employee who, in the course of his or her employment, will come in contact with minor pupils and who has been convicted of a sex offense, as defined.

Existing law authorizes a human resource agency or employer to request from the Department of Justice records of all convictions or any arrest pending adjudication involving specified sex or controlled substances offenses of a person who applies for employment or a volunteer position in which he or she would have minors in his or her care.

This bill would require a human resource agency or employer, where a request pursuant to this provision reveals that a prospective employee or volunteer has been convicted of any specified sex offense, and where the agency or employer hires the prospective employee or volunteer, to notify the parents or guardians of any minor who will be supervised or disciplined by the employee or volunteer at least 10 days prior to the day the employee or volunteer begins his or her duties or tasks. The bill would exempt any person who conveys or receives information in good faith conformity with the provision from prosecution under criminal laws relating to the unlawful furnishing of state summary criminal history information for that conveying or receiving of information.

This bill would revise those sex offenses to which this provision applies by, among other things, including the offenses of sexual battery, rape or penetration with an object by force in concert, and loitering and molesting pupils.

Ch. 587 (SB 720) Lockyer. Vehicles: registration fee: fingerprint identification.

(1) Existing law imposes fees upon the registration and renewal of registration of vehicles.

This bill would, in addition to the other fees imposed for the registration of a vehicle, impose, upon the adoption of a specified resolution by a county board of supervisors, with certain exceptions, an additional fee of \$1, and continuously appropriates the money to fund local programs that enhance local law enforcement to provide fingerprint identification. The bill would require that data from these programs be made available to local public agencies for purposes of criminal history backgrounds involving employment. To the extent that the bill would impose this requirement on local law enforcement agencies, the bill would create a state-mandated local program. These provisions are to be repealed as of January 1, 2003.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 588 (AB 1610) Ortiz. School employees.

(1) Existing law requires every person, firm, association, partnership, or corporation offering or conducting private school instruction on the elementary or high school level to require each new employee having contact with minor pupils and not possessing a valid California state teaching credential, or not currently licensed by another state agency that requires a criminal record summary, to submit on or before the first day of his or her employment, two sets of fingerprints to the Department of Justice for the purpose of obtaining a criminal record summary from the Department of Justice and the Federal Bureau of Investigation and specifies that this requirement is a condition of employment.

This bill would instead require the fingerprints to be submitted by applicants for employment, as specified. The bill would require the Department of Justice to ascertain whether the applicant has been arrested or convicted of any crime and to forward the information to the employer designated by the applicant submitting the fingerprints no more than 15 working days after receiving the fingerprint identification cards and within 3 working days once the department implements an electronic fingerprinting system, as specified. The bill would prohibit an employer from employing a person until the department completes its obligations regarding the arrest and conviction information and from employing a person who has been convicted of a violent or serious felony, as defined.

(2) Existing law requires the governing board of a school district to require each person to be employed, or employed, in a position not requiring certification qualifications to have fingerprint cards prepared by a local public law enforcement agency, requires that agency to transmit the cards to the Department of Justice, and requires the Department of Justice to ascertain whether the applicant or employee has been arrested or convicted of any crime and to furnish all information of which it has a record and which pertains to the person whose fingerprints were transmitted. Existing law authorizes the exemption from these provisions of substitute and temporary employees, employed for less than a school year and specified school districts.

This bill would remove those exemptions, thereby imposing a state-mandated local program. The bill would prohibit the governing board of a school district from employing a person in a position not requiring certification qualifications until the Department of Justice completes its obligations regarding the arrest and conviction information. The bill would require the governing board of each school district to report, as specified, to the Department of Justice whether or not a criminal background check has been completed on each employee and would require the Department of Justice to complete those obligations within 30 working days for current employees and for fingerprint cards currently in its possession, within 15 days once this backlog is cleared, and within 3 working days once the department implements an electronic fingerprinting system, as specified. These provisions would not apply to secondary school pupils employed in a temporary or part-time position by the governing board of the school district having jurisdiction over the school attended by the pupil.

This bill would also require, with specified exceptions, employees of any entity that has a contract with a school district to provide specified services to submit or have submitted their fingerprints to the Department of Justice if the employees are to have more than limited contact with pupils. The bill would prohibit an entity having a contract with a school district to provide specified services from permitting an employee to come in contact with pupils if it is ascertained that the employee has been convicted of a felony, as defined.

(3) This bill would provide that it will become operative only if AB 1612 of the 1997-98 Regular Session is enacted.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 589 (AB 1612) Alby. School employees.

(1) Existing law authorizes a county or city and county board of education to issue temporary certificates, valid for not more than one calendar year, for the purpose of authorizing salary payments to certified employees whose teaching credential applications are being processed or to personnel employed in children's centers or other preschool educational programs whose permit applications are being processed. Existing law also authorizes the issuance of a temporary certificate of clearance, as specified.

This bill would require a county or city and county board of education to obtain a criminal record summary about the applicant from the Department of Justice before issuing a temporary certificate and would prohibit the issuance of a temporary certificate if the applicant has been convicted of a violent or serious felony, as defined. The bill would also require a school district to obtain a criminal record summary about the applicant from the Department of Justice before issuing a temporary certificate of clearance and would prohibit the issuance of a temporary certificate of clearance if the applicant has been convicted of a violent or serious felony, as defined.

(2) Existing law requires the Commission on Teacher Credentialing to deny an application for the issuance of a credential or for the renewal of a credential made by an applicant who has been determined to be a sexual psychopath, as specified, has been convicted of any sex offense, as defined, has been convicted of any controlled substance offense, as defined, or has been found to be insane through a criminal proceeding, as specified.

This bill would require the commission to deny any application for the issuance of a credential made by an applicant who has been convicted of a violent or serious felony, as defined, and to revoke any credential issued to a person whose employment has been terminated by a school district because the person has been convicted of a violent or serious felony, as defined.

(3) Existing law requires the governing board of a school district to require each person to be employed, or employed, in a position not requiring certification qualifications to have fingerprint cards prepared by a local public law enforcement agency, requires that agency to transmit the cards to the Department of Justice, and requires the Department of Justice to ascertain whether the applicant or employee has been arrested or convicted of any crime and to furnish all information of which it has a record and which pertains to the person whose fingerprints were transmitted. Existing law authorizes the exemption from these provisions of substitute and temporary employees, employed for less than a school year.

Existing law requires the Commission on Teacher Credentialing to adopt rules and regulations requiring every applicant for a credential or the renewal of a credential to submit reasonable evidence of identification and good moral character. The adopted rules and regulations are required to include, among other things, the offenses that constitute grounds for the mandatory denial or revocation of a credential. Existing law

requires each applicant for a teaching credential or the renewal of a teaching credential to submit with his or her application duplicate personal identification cards with his or her fingerprints. Existing law authorizes the Commission on Teacher Credentialing to require the production of information, records, reports, and other data from any public agency.

This bill would prohibit, as specified, school districts, as defined to also include county offices of education and the state special schools, from employing any individual, whether in a certificated or classified position, who has been convicted of a violent or serious felony, as defined. The bill would prohibit, as specified, a school district from retaining in employment a current certificated or classified employee who has been convicted of a violent or serious felony, and who is a temporary, substitute, or probationary employee, as specified. The bill would also apply this prohibition to charter schools. The bill would require the Department of Justice to directly notify the school district, as specified, when an individual who is an applicant for employment, regarding the criminal information of the applicant. The bill would require the Department of Justice to forward a copy of that information to the Commission on Teacher Credentialing when the individual is an applicant for a position requiring certification qualifications. To the extent these provisions would operate to impose new duties on local education entities, this bill would impose a state-mandated local program.

(4) The bill would require the Department of Justice to implement and manage an electronic fingerprinting system with terminals located statewide upon an appropriation by the Legislature for that purpose. The bill would specify that terminals may be provided to state agencies and local governments that are authorized statutorily to receive confidential criminal history information. The bill would require the Department of Justice to develop guidelines for the purpose of approving applications submitted by state agencies and local governments for the receipt of a terminal. The bill would require the Department of Justice to report, as specified, to the Legislature on the status of implementing the provisions of this act.

(5) This bill would provide that it will become operative only if AB 1610 of the 1997-98 Regular Session is enacted.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 590 (AB 181) Kuykendall. Crimes: seduction of minors: electronic mail.

Existing law makes it a crime for a person, with knowledge that a person is a minor, or who fails to exercise reasonable care to know the minor's age, to knowingly distribute harmful matter by any means, including telephone, to a minor for the purpose of seducing the minor and exempts a telephone corporation from the provisions of this law.

This bill, in addition, would expressly make it a crime for every person who, with knowledge that a person is a minor, knowingly distributes or exhibits by electronic mail, the Internet as defined, or a commercial online service, any harmful matter, as defined, to any minor for the purpose of seducing a minor. This bill would also expand the list of service providers exempt from this law.

Ch. 591 (AB 995) Pacheco. Battery: gassing.

Under existing law, every person confined in a state prison who commits battery upon the person of any individual who is not confined in the prison is guilty of a felony and shall be imprisoned in the state prison for two, three, or four years, to be served consecutively.

This bill would provide, until January 1, 2001, that every person confined in the state prison who commits a battery upon the person of any officer or employee of the state prison by gassing is guilty of aggravated battery and shall be punished by imprisonment in the state prison for 2, 3, or 4 years. The bill would authorize the chief medical officer

of the state prison, when he or she deems it medically necessary to protect the health of the officer or employee who may have been subject to a violation of this offense, to order the person who committed the aggravated battery to receive an examination or test for hepatitis and tuberculosis, as specified, and to provide the results of any examination or test to the officer or employee who was the target of the aggravated battery. By creating a new crime, the bill would impose a state-mandated local program.

The bill also would require the Department of Corrections to report to the Legislature, by January 1, 2000, its findings and recommendations on gassing incidents at the state prison and the medical testing authorized by this provision.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 592 (AB 149) Runner. Crimes: battery; punishment.

Under existing law, a battery that results in injury inflicted on the victim against various persons including peace officers, firefighters, emergency medical technicians, mobile intensive care paramedics, lifeguards, or process servers is punishable by imprisonment, as specified, or by a fine not exceeding \$2,000.

This bill would specify that when this offense is committed against a peace officer, the maximum fine is \$10,000. The bill also would modify the victims to whom this provision applies by deleting mobile intensive care paramedics and revising the definition of "emergency medical technician" to include a person who is either an EMT-I, EMT-II, or EMT-P (paramedic), and possesses a valid certificate or license in accordance with specified standards.

Ch. 593 (AB 202) Scott. Destructive devices.

(1) Existing law prohibits the manufacture, import, sale, gift, loan, or possession of various weapons and related products, including any explosive substance other than fixed ammunition.

This bill would include any metal military practice handgrenade or metal replica handgrenade in this prohibition. The bill also would make a first offense involving any metal military practice handgrenade or metal replica handgrenade an infraction unless the offender is an active participant in a criminal street gang. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(2) Existing law prohibits advertising the sale of any specified weapon or device whose possession is prohibited.

This bill would include within this prohibition any destructive device, as defined, handgun ammunition designed primarily to penetrate metal or armor, boobytrap, or silencer.

(3) This bill would incorporate additional changes in Section 12020 of the Penal Code proposed by AB 78, to be operative if AB 78 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 594 (AB 1222) R. Wright. Children.

(1) Existing law prohibits registered sex offenders and persons convicted of certain other offenses against minors, as specified, from being granted custody of, or unsupervised visitation with, a child, except as specified.

This bill would prohibit a person from obtaining custody of, or visitation with, a child if the person has been convicted of rape and the child was conceived as a result of that crime. The bill would also provide that a court may order that child support to be paid by a registered sex offender, a person convicted of certain offenses against minors, or a person who conceives a child in the course of a rape of which he is convicted, be paid

to the district attorney, as specified. The bill would restrict disclosure of information about the custodial parent and the child.

(2) Existing law authorizes the bringing of a court proceeding for the purpose of declaring a minor child free of the custody or control of either or both parents under specified circumstances.

This bill would authorize the mother of a child to bring a proceeding against the father of a child conceived as a result of a rape for the purpose of declaring the child free of the custody or control of the father. The bill would specify that there is a conclusive presumption that the father is unfit to have custody or control over the child.

Ch. 595 (AB 1611) Ortiz. Vehicles: certificate to transport persons with developmental disabilities.

(1) Existing law does not require a person who is employed primarily as a driver of a motor vehicle for hire that is used to transport persons with developmental disabilities to possess a valid special driver certificate issued by the Department of Motor Vehicles in order to transport those persons.

This bill would, on or after March 1, 1998, impose that requirement as to a person employed by a business or nonprofit organization or agency. The bill would require the person to clear a criminal history background check by the Department of Justice and, if applicable, by the Federal Bureau of Investigation, and to pay certain additional fees. This bill would prohibit the employment of a person who is employed by a business or nonprofit organization or entity and which employee is employed primarily as a driver of motor vehicles for hire that is used for the transportation of persons with developmental disabilities unless that person operates the vehicle in compliance with the certificate requirement. Because a violation of these requirements would, under existing law, be a crime, this bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 596 (SB 532) Solis. California Firefighters' Memorial Fund: contributions: income tax return.

Under existing law regulating the administration of personal income taxes and bank and corporation taxes, individual taxpayers are allowed to contribute amounts in excess of their tax liability for the support of specified funds or accounts, including among others, the California Firefighters' Memorial Fund. Existing law specifies that these provisions relating to contributions to the California Firefighters' Memorial Fund are repealed as of January 1, 1999.

This bill would extend the repeal date for these contribution provisions to January 1, 2001.

Existing law also provides that if the specified repeal date of this contribution program is deleted, in any calendar year the Franchise Tax Board estimates that the contributions made in the calendar year are less than \$250,000, adjusted for inflation as specified, the provisions establishing the contribution program are repealed.

This bill would instead provide that if in any calendar year the Franchise Tax Board estimates that the contributions made in the calendar year are less than \$100,000 for taxable years beginning in 1999, or less than \$250,000 for taxable years beginning in 2000, the provisions establishing the contribution program are repealed.

Ch. 597 (AB 450) Torlakson. Housing: Relocation Assistance Act.

Existing law, known as the Relocation Assistance Act, requires a public entity to provide compensation and advisory services to any person, business, or farm operation that is displaced because of the acquisition of real property for public use. Existing law governs the provision of relocation assistance, including benefits for displaced persons, as defined, and procedural protections for persons required to move from their homes.

For purposes of the Relocation Assistance Act, a person who is temporarily displaced for not more than 180 days, and who is offered occupancy of a comparable replacement dwelling unit located within the same apartment complex that contains the unit from which he or she has been displaced, is not deemed a "displaced person" if, among other conditions, the resident is offered the right to return to his or her original unit, with rent for the first 12 months subsequent to that return being the lower of (1) up to 5% higher than the rent at the time of displacement, or (2) up to 25% of household income.

This bill would revise the 2nd alternative of the above condition from 25% to 30% of household income.

Also, for purposes of the Relocation Assistance Act, "comparable replacement dwelling" is defined to mean, among other specified things, any dwelling that is, in the case of a displaced person who is a renter, one in which the monthly rental cost of the dwelling minus any replacement housing payment available to the person does not exceed 25% of the person's average monthly income. Additionally, under the act, rent supplements necessary to enable displaced tenants to lease or rent a comparable replacement dwelling extend for a period not to exceed 48 months, with the exception of supplements for displacements caused by publicly funded transportation projects, which extend for only 42 months.

This bill would revise the definition of "comparable replacement dwelling" for purposes of the Relocation Assistance Act by raising the percentage that a displaced person pays for housing expenses from 25% to 30% of the average monthly income as the standard of a replacement dwelling that is within the person's financial means unless the displaced person meets one or more of specified conditions, and would reduce the period authorized for rent supplements necessary to enable displaced tenants to lease or rent a comparable replacement dwelling, from 48 months to 42 months unless the displaced person meets one or more of specified conditions.

The bill would specify that it would apply prospectively only from January 1, 1998, and only to the extent that its provisions would not adversely affect existing rights of persons or households entitled to benefits under existing provisions on or before December 31, 1997.

Ch. 598 (SB 633) Ayala. Mutual water companies.

(1) Existing law authorizes any corporation organized for or engaged in the business of selling, distributing, supplying, or delivering water for irrigation purposes, or for domestic use, to provide in its articles or bylaws that water shall be sold, distributed, supplied, or delivered only to owners of its shares and that these shares shall be appurtenant to certain lands described in the certificate issued therefor.

This bill would require a corporation organized for or engaged in the business of selling, distributing, supplying, or delivering water for domestic use to have these provisions in its articles or bylaws.

This bill would require a mutual water company formed on and after January 1, 1998, in connection with the offering for sale or lease, or with the sale or lease, of lots within a subdivision, as defined, and organized to sell, distribute, supply, or deliver water for domestic use to owners of the lots to meet the specified requirements of the bill regarding, among other things, supply and distribution system design standards and water service standards. The bill would provide that such a mutual water company formed before January 1, 1998, may elect to meet all of these requirements.

This bill would require any person who intends to offer for sale or lease lots within a subdivision in this state and to provide water for domestic use to purchasers of the lots through the formation of this mutual water company to attach to an application for a public report a document with prescribed information. This bill would require the Real Estate Commissioner to prescribe the form and content of this document.

(2) Existing law exempts certain securities from requirements in existing law regarding the issuance of securities. These exempt securities include securities consisting of any interest in all or portions of a parcel or parcels of real property that are subdivided or in a real estate development, except as specified.

This bill would also exempt any security of a mutual water company issued in connection with subdivided lands pursuant to the provisions of this bill.

(3) Existing provisions of the Civil Code pertain to various types of corporations, including bridge, ferry, wharf, chute, and pier corporations, water and canal corporations, cable television corporations, societies for the prevention of cruelty to animals, and agricultural marketing associations.

This bill would delete these provisions and reenact them in the Corporations Code and would make related changes.

(4) The bill would also incorporate additional changes to Section 25100 of the Corporations Code proposed by AB 721, contingent upon prior enactment of that bill.

Ch. 599 (AB 573) Kuehl. Child support: Franchise Tax Board: collection.

Existing law requires the district attorney to establish, modify, and enforce child support when the child is receiving public assistance, and when appropriate, to take the same actions on behalf of a child who is not receiving public assistance. Under existing law, the district attorney may refer child support delinquencies to the Franchise Tax Board for collection.

This bill would, additionally, authorize the district attorney to refer child support obligations to the Franchise Tax Board for collection, as specified.

The bill also would require the Employment Development Department to prepare and submit a study to the Governor and the Legislature that identifies possible methods for establishing a state mechanism for the reporting of the income of service providers for the purpose of collecting delinquent child support, as specified.

The bill would make related changes.

Existing law establishes procedures for the determination of paternity and for the enforcement of parental financial obligations.

This bill would revise those procedures.

This bill would provide that it shall become operative only if AB 1395 and SB 247 of the 1997-98 Regular Session are enacted and become effective on or before January 1, 1998.

Ch. 600 (AB 713) Caldera. Taxpayers' rights: conformity.

Existing federal tax law includes a Taxpayers' Bill of Rights with respect to those taxes collected and administered pursuant to the Internal Revenue Code. Existing state law also includes the Katz-Harris Taxpayer Bill of Rights Act, that applies with respect to those taxes collected and administered by the Franchise Tax Board under the Personal Income Tax Law and the Bank and Corporation Tax Law.

This bill would partially conform state tax law to the most recent amendments to federal taxpayers' rights provisions by modifying and adding to the provisions of the Katz-Harris Taxpayer Bill of Rights, and by amending or repealing certain provisions of the Personal Income Tax Law, the Bank and Corporation Tax Law, and state statutes governing the administration of those laws, in specific regard to the following subjects: the filing of a joint tax return after the filing of separate tax returns; the telephone numbers of persons filing certain information returns; installment payment agreements; the extension of interest-free periods after a notice and demand for the payment of deficiencies; service of subpoenas on 3rd-party recordkeepers; the abatement of interest for errors and delays resulting from ministerial or managerial acts of the Franchise Tax Board; relief from the retroactive application of regulations; reimbursements of the litigation or appeal costs and expenses, including attorney's fees, of taxpayers; releases of levies and liens; unauthorized actions taken by tax officials to secure the disclosure of information about taxpayers; the burden of proof in protest hearings and refund appeals as to the accuracy of tax information; notices to taxpayers for unassociated payments; notices of outstanding delinquent accounts; and the authorized use of private delivery services in filing items with tax agencies.

Ch. 601 (SB 247) Lockyer. Collection of child support.

Existing law requires a district attorney to take appropriate action to establish, modify, and enforce child support orders when the child is receiving public assistance, and when appropriate, to take the same actions on behalf of a child who is not receiving public assistance. Under existing law, the district attorney may refer child support delinquencies to the Franchise Tax Board for collection and is required to receive credit for no less than 50% of the amount collected.

This bill would require a district attorney enforcing child support obligations to refer all child support delinquencies to the Franchise Tax Board for collection. The bill would also require the district attorney to utilize the collection services of the Franchise Tax Board, as specified. The bill would impose a state-mandated local program by requiring a new duty of district attorneys. The bill would provide that the district attorney would receive credit for the amount collected when a referral is made.

Existing law requires amounts collected by the Franchise Tax Board to be applied to debts in a specified order.

This bill would provide that a voluntary payment by an obligated parent for a child support delinquency would be applied solely to the child support delinquency.

Existing law specifies information to be contained within a certificate of live birth.

This bill would make technical, nonsubstantive changes to this provision.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would provide that it shall become operative only if AB 573 and AB 1395 are enacted and become effective on or before January 1, 1998.

Ch. 602 (AB 1217) Bustamante. Economic development: targeted tax areas: tax incentives.

The Enterprise Zone Act provides for the designation of enterprise zones by the Trade and Commerce Agency, according to specified criteria, pursuant to which certain entities may receive regulatory, tax, and other incentives for private investment and employment.

This bill would require the agency to designate, as a single targeted tax area, a selected community that applies for the designation and satisfies specified criteria. Qualified businesses within a selected area would be eligible for specified tax incentives or credits available in enterprise zones based on the standard industrial classification of the business.

The Personal Income Tax Law and the Bank and Corporation Tax Law allow a taxpayer to claim certain tax incentives for activities conducted in an enterprise zone, the Los Angeles Revitalization Zone (LARZ), or in a local agency military base recovery area (LAMBRA), including credits for the amount of sales or use tax paid or incurred in connection with the purchase of qualified property and for certain wages paid to specified employees, treatment of the cost of certain depreciable property as an expense that is deductible, and a deduction for net operating losses.

This bill would authorize a credit against those taxes for each taxable and income year beginning on or after January 1, 1998, in an amount equal to the sales or use tax paid or incurred during the taxable or income year in connection with the taxpayer's purchase of qualified property used in a targeted tax area, as specified. The bill would also authorize a credit against those taxes for each taxable and income year beginning on or after January 1, 1998, in an amount equal to a specified percentage of wages paid to a qualified employee, as defined, that is employed by the taxpayer during the taxable or income year in a targeted tax area. The bill would also permit a taxpayer to elect to treat the cost of specified property that is acquired by purchase for exclusive use in a trade or business conducted within a targeted tax area as an expense that is not chargeable to the capital account and deductible, as provided. This bill would also allow a specified net operating loss deduction with respect to a taxpayer engaged in the conduct of a qualified business, as defined, within a targeted tax area.

Ch. 603 (SB 965) Costa. Enterprise zones.

The Enterprise Zone Act provides for the designation of enterprise zones by the Trade and Commerce Agency, according to specified criteria, pursuant to which certain entities may receive regulatory, tax, and other incentives for private investment and employment.

This bill would provide that enterprise zones and program areas designated pursuant to former sections that have been repealed and reenacted by acts that became effective

on January 1, 1997, shall be deemed to remain in existence for taxable or income years beginning on and after January 1, 1996, and before January 1, 1997. The bill would make conforming changes with regard to a carryover of any unused credits or deductions attributable to activities in enterprise zones or program areas.

The bill would make other repeals and revisions in the Personal Income Tax Law and the Bank and Corporation Tax Law with regard to tax credits available for activities in enterprise zones and make other conforming changes to those laws in connection with those credits. The bill would also state the intent of the Legislature that the changes to these laws made by the bill shall be deemed to be in effect as of January 1, 1997.

The bill would take effect immediately as a tax levy.

Ch. 604 (SB 1106) Committee on Revenue and Taxation. Taxation.

(1) Existing law requires any board, as defined under the Business and Professions Code, including the State Bar and the Department of Real Estate, and the Insurance Commissioner to require that any licensee at the time of issuance or renewal of a license provide its federal employer identification number, if the licensee is a partnership, or his or her social security number for all others. Existing law also provides that any licensee failing to provide this information shall be reported by the licensing entity to the Franchise Tax Board, as specified, and shall be subject to a penalty if the licensee fails to provide the required information after notification by the Franchise Tax Board.

This bill would make technical clarifying changes in those provisions.

(2) The Personal Income Tax Law and the Bank and Corporation Tax Law allow to qualified taxpayers, as defined, a credit against the taxes imposed by those laws in an amount equal to 6% of the amount paid or incurred during the taxable or income year for qualified property, as defined, that is placed in service in this state. These provisions refer to the Standard Industrial Classification (SIC) Manual published by the United States Office of Management and Budget, 1987 edition, and as further amended.

This bill would delete the reference to the amended version of that manual and would also make a technical change in those provisions.

(3) The Personal Income Tax Law and the Bank and Corporation Tax Law provide for the levy of an alternative minimum tax in partial conformity with federal law, subject to certain modifications that include a tentative minimum tax. The alternative minimum tax provides that alternative minimum taxable income does not include adjustments and items of tax preference attributable to the trade or business of a qualified taxpayer, as defined.

This bill would clarify the definition of "qualified taxpayer" by defining the terms "aggregate gross receipts, less returns and allowances," "gross receipts, less returns and allowances," and "proportionate interest," as used therein.

(4) The Personal Income Tax Law and the Bank and Corporation Tax Law allow a taxpayer to claim certain tax incentives for activities conducted in an enterprise zone or the Los Angeles Revitalization Zone, including a deduction for net operating losses. Existing law provides that any net operating loss may be used only to reduce income attributable to the zone business activities. Existing law allows any net operating loss to be carried forward after the zone designation expires.

This bill would additionally provide that a taxpayer may use any net operating loss carryover against the income that a taxpayer derived from a business conducted in an expired zone as if the zone remained in existence.

(5) The Personal Income Tax Law and the Bank and Corporation Tax Law, in conformity with federal income tax laws, provide for the postponement of gain from the exercise of specified types of stock options until the sale of the stock.

Both laws also establish a California qualified stock option that allows the specified postponement of taxes upon the exercise of any other type of stock option, if the stock option is limited to a specified number of shares and value, and is exercised by individuals who are employees with earned income below a specified amount and who meet other specified conditions.

This bill would modify the characteristics of a California qualified stock option and would authorize a corporation to designate that the stock option that is otherwise a California qualified stock option is to be treated as such at the time the option is granted,

as provided. This bill would make related technical and conforming changes to specified provisions of the alternative minimum tax.

(6) The Personal Income Tax Law provides that no deduction shall be allowed for any tax imposed under the Bank and Corporation Tax Law.

This bill would make a technical nonsubstantive change to those provisions by deleting a confusing and unnecessary reference.

(7) The Personal Income Tax Law and the Bank and Corporation Tax Law provide specified conformity to federal income tax laws relating to the mark to market accounting method for securities dealers for taxable or income years beginning on or after January 1, 1998.

This bill would revise those provisions to conform for taxable or income years beginning on or after January 1, 1997.

(8) The Bank and Corporation Tax Law allows an exemption from taxation for a limited liability company or a limited liability partnership that is commencing or dissolving operations if the entity did no business in California during the taxable or income year and the taxable or income year was 15 days or less.

This bill would provide similar relief for corporations and limited partnerships.

(9) The Personal Income Tax Law, among other things, requires partnerships and limited liability companies to make returns that include specified information.

This bill would require the Franchise Tax Board to prescribe the manner and extent to which the specified information shall be included in the returns, as provided.

(10) The Bank and Corporation Tax Law imposes a franchise tax on banks and financial corporations that is in lieu of all other state, county, and municipal taxes and licenses, except as specified. The in-lieu tax is imposed on banks because national banks are exempt from most local taxes. The "in-lieu" tax was extended to financial corporations for income years beginning on or after January 1, 1981. Existing law, for income years beginning on or after January 1, 1981, allows financial corporations to offset specified local taxes against the franchise tax and provides that the intent of those provisions is to minimize the difference between banks and financial corporations. Existing law provides that final action on the allowance of an offset under those provisions is deferred until a final court determination of whether charter cities may impose local taxes on financial corporations.

This bill would repeal those offset provisions as obsolete on the basis that financial corporations are exempt from local taxation to the same degree as banks. The bill would also make related and conforming changes.

(11) Existing law pertaining to the administration of franchise and income taxes requires all apportioning taxpayers to maintain specified information.

This bill would make a technical, nonsubstantive change to those provisions by deleting an obsolete reference.

(12) Existing law permits, until 1999, the referral of fines, state or local penalties, forfeitures, restitution fines, or restitution orders imposed by specified courts upon a person for criminal offenses under certain conditions to the Franchise Tax Board for collection under guidelines prescribed by that board. Amounts collected are deposited in the General Fund in the Court Collection Account, which is continuously appropriated for the purpose of distribution to the county or the state fund to which the amount was originally due.

This bill would extend that authority to 2002 and to other amounts imposed by those courts upon a person for criminal offenses. By providing for the collection of these other amounts which would be continuously appropriated, this bill would make an appropriation. The bill would also make an appropriation to the Franchise Tax Board, in augmentation of the Budget Act of 1997, for the purpose of funding its court collection responsibilities. This bill would revise those provisions to provide that it is the intent of the Legislature that costs to the Franchise Tax Board to administer the provisions shall not exceed 15%, instead of 9%, of the amount it collects.

This bill would also require that restitution orders may be referred to the Franchise Tax Board by a government entity that meets specified additional criteria. The bill would also provide that amounts collected pursuant to a restitution fine or restitution order be deposited and disbursed in accordance with the laws relating to reimbursement of the State Restitution Fund.

This bill would make other related and conforming changes.

(13) Existing laws relating to the administration of personal income and bank and corporation taxes provide for the allowance and payment of interest on any overpayment in respect of any tax, as specified, and require that any credit first be credited on any taxes due from the taxpayer under the Personal Income Tax Law or the Bank and Corporation Tax Law.

This bill would instead require that any credit first be credited on any amounts due from the taxpayer under those laws, the Nonadmitted Insurance Tax Law, or the laws relating to the administration of those laws. This bill would also provide that a voluntary payment by an obligated parent for a child support delinquency would be applied solely to the child support delinquency.

(14) The Bank and Corporation Tax Law provides that a corporation that incorporates under the laws of this state or qualifies to transact interstate business in this state shall prepay a specified minimum franchise tax of \$800, except for a qualified new corporation, as defined. Existing law defines a "qualified new corporation" as a corporation that reasonably estimates that, for the income year, it will have both gross receipts, less returns and allowances reportable to the state, of less than \$1,000,000 and a tax liability that does not exceed \$800. This exception does not apply to a corporation if 50% or more of its stock is owned by another corporation.

This bill would clarify that definition to instead refer to gross receipts, less returns and allowances reportable to the state, of \$1,000,000 or less. This bill would instead provide that the exception does not apply to a corporation if 50% or more of its stock is, or will be upon the initial issuance of stock, owned by another corporation.

(15) The Personal Income Tax Law, by reference to a specified federal statute, conforms to federal income tax laws relating to sales of stock to employee stock ownership plans or certain cooperatives.

This bill would, under the Bank and Corporation Tax Law, provide the same conformity to federal income tax laws relating to sales of stock to employee stock ownership plans or certain cooperatives.

(16) This bill would make technical changes in various provisions of the Personal Income Tax Law and the Bank and Corporation Tax Law regarding discharge of indebtedness and other provisions of law regarding disclosure of employee registry information to the Franchise Tax Board.

(17) Existing law defines the term "taxable year" for purposes of the Personal Income Tax Law, and also defines the term "income year" for purposes of the Bank and Corporation Tax Law. Existing law also specifies that the provisions of Chapter 952 of the Statutes of 1996, which contains various provisions in both the Personal Income Tax Law and the Bank and Corporation Tax Law, shall be applied to taxable years beginning on or after January 1, 1997.

This bill would instead specify that the provisions of Chapter 952 of the Statutes of 1996 shall be applied to both taxable and income years beginning on or after January 1, 1997.

(18) This bill would take effect immediately as a tax levy; however certain provisions would become operative, as specified in a particular 1996 statute.

Ch. 605 (AB 1040) Committee on Revenue and Taxation. Personal income and bank and corporation taxes.

(1) Existing law requires any board, as defined under the Business and Professions Code, including the State Bar and the Department of Real Estate, and the Insurance Commissioner to require that any licensee at the time of issuance or renewal of a license provide its federal employer identification number if the licensee is a partnership or his or her social security number for all others. Existing law also provides that any licensee failing to provide this information shall be reported by the licensing entity to the Franchise Tax Board, as specified, and shall be subject to a penalty if the licensee fails to provide the required information after notification by the Franchise Tax Board.

This bill would make technical clarifying changes in those provisions.

(2) The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws, including credits for the amount of sales or use tax paid or incurred in connection with the purchase of qualified property in the Los Angeles Revitalization Zone (LARZ), for the amount of sales or use tax paid

or incurred in connection with the purchase of qualified property for exclusive use in a local agency military base recovery area, and for certain wages paid to specified employees employed in a local agency military base recovery area. Existing law requires a taxpayer whose expenses may qualify for more than one credit to elect which credit to claim among all the credits allowed under those laws.

This bill would instead provide that only one applicable credit is allowed with respect to the amount of the expenditure claimed.

(3) The Personal Income Tax Law provides that no deduction shall be allowed for any tax imposed under the Bank and Corporation Tax Law.

This bill would make a technical nonsubstantive change to those provisions by deleting a confusing and unnecessary reference.

(4) Existing law relating to the administration of franchise and income taxes and the Bank and Corporation Tax Law contain various tax and tax administration provisions that are specifically applicable to both banks and corporations, various provisions that are specifically applicable either to banks or to corporations generally, but not both, and various provisions which are specifically applicable to corporations, but are administratively applied also to banks.

This bill would modify the definition of "corporation" to include banks, unless specifically provided otherwise, would provide specific language to exempt banks from certain existing provisions of the above tax and tax administration laws where intentional differences between the treatment of banks and corporations are clear, and would replace the phrase "bank or corporation" with the term "corporation" throughout the remaining provisions of those laws.

(5) Existing laws relating to the administration of personal income and bank and corporation taxes provide for the allowance and payment of interest on any overpayment in respect of any tax, as specified, and require that any credit first be credited on any taxes due from the taxpayer under the Personal Income Tax Law or the Bank and Corporation Tax Law.

This bill would instead require that any credit first be credited on any amounts due from the taxpayer under those laws or the laws relating to the administration of those laws.

(6) Existing law relating to the administration of income and franchise taxes requires any person required to file an information return under specified provisions of federal law to report that information to the Franchise Tax Board.

This bill would additionally require, with certain exceptions, that any person who makes specified payments of exempt-interest dividends aggregating \$10 or more, as specified, file an information return with the Franchise Tax Board. The bill would also require, with certain exceptions, that any person who receives certain interest that is exempt from federal tax, as specified, as a nominee and who makes payments to any other person aggregating \$10 or more, as specified, file an information return with the Franchise Tax Board.

(7) Existing law permits the Franchise Tax Board to obtain a copy of the federal information return of any person if a return was required in specified circumstances.

This bill would additionally permit the Franchise Tax Board to obtain a copy of the federal information return of any person if a return was required to be filed regarding the cancellation of indebtedness by certain financial entities.

(8) Existing law relating to the administration of franchise and income taxes requires all apportioning taxpayers to maintain specified information.

This bill would make a technical, nonsubstantive change to those provisions by deleting an obsolete reference.

(9) The Bank and Corporation Tax Law imposes a franchise tax on banks and financial corporations that is in lieu of all other state, county, and municipal taxes and licenses, except as specified. The in-lieu tax is imposed on banks because national banks are exempt from most local taxes. The "in-lieu" tax was extended to financial corporations for income years beginning on or after January 1, 1981. Existing law, for income years beginning on or after January 1, 1981, allows financial corporations to offset specified local taxes against the franchise tax and provides that the intent of those provisions is to minimize the difference between banks and financial corporations. Existing law provides that final action on the allowance of an offset under those provisions is deferred

until a final court determination of whether charter cities may impose local taxes on financial corporations.

This bill would repeal those offset provisions as obsolete on the basis that financial corporations are exempt from local taxation to the same degree as banks. The bill would also make related and conforming changes.

(10) Existing law defines the term "taxable year" for purposes of the Personal Income Tax Law, and also defines the term "income year" for purposes of the Bank and Corporation Tax Law. Existing law also specifies that the provisions of Chapter 952 of the Statutes of 1996, which contains various provisions in both the Personal Income Tax Law and the Bank and Corporation Tax Law, shall be applied to taxable years beginning on or after January 1, 1997.

This bill would instead specify that the provisions of Chapter 952 of the Statutes of 1996 shall be applied to both taxable and income years beginning on or after January 1, 1997.

(11) The Personal Income Tax Law and the Bank and Corporation Tax Law allow to qualified taxpayers, as defined, a credit against taxes imposed by those laws in an amount equal to 6% of the amount paid or incurred during the taxable or income year for qualified property, as defined, that is placed in service in this state. Existing law provides that qualified property includes tangible personal property for use by a qualified taxpayer, as defined, primarily for the manufacturing, processing, refining, fabricating, or recycling of property, as specified. Existing law provides that a qualified taxpayer is a taxpayer engaged in those lines of business described in specified code sections of the Standard Industrial Classification Manual published by the United States Office of Management and Budget, 1987 edition.

This bill would state the intent of the Legislature to replace those code section references with code section references to the North American Industry Classification System (NAICS), expected to be published in 1997.

(12) This bill would incorporate additional changes in Section 23038 of the Revenue and Taxation Code, proposed by SB 1234, to be operative only if SB 1234 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

(13) This bill would incorporate additional changes in Section 24416.2 of the Revenue and Taxation Code, proposed by SB 1106, to be operative only if SB 1106 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

Ch. 606 (AB 67) Escutia. Social services.

Existing law specifies that an employment agency that refers a child care provider to parents or guardians who are not required to be a licensed child day care facility shall not make a placement of a provider who is not a trustline applicant or a registered trustline child care provider.

This bill would make any violation of that requirement a misdemeanor, and by extending the application of a crime to this provision, this bill would result in a state-mandated local program.

Existing law authorizes the Adjutant General, under the direction of the Governor, to make and enforce regulations for the government and control of state armories, as defined, for use by the state militia. It authorizes the Adjutant General to appoint a Community Advisory Committee to advise the Adjutant General on the use of state armories as shelters for the homeless.

Existing law requires certain state armories to be made available, until March 15, 1997, to specified cities and counties for use by homeless persons for emergency shelter purposes during defined periods of the year.

Existing law requires any authorized county or city electing to use a state armory for these purposes, to obtain a license from the Military Department in compliance with prescribed requirements.

This bill would impose additional requirements upon a county or city obtaining a license for these purposes. This provision would be operative only if specified bills are chaptered in 1997.

Under existing law, the state and each county share the administrative costs for implementation of various public social services programs.

Existing law provides that, until June 30, 1997, if county-imposed funding reductions prevent a county from fully funding the county share of the nonfederal administrative costs for these public social services programs, the reimbursements to counties for the state share of these costs shall not be reduced.

This bill would extend those provisions until June 30, 1998, but would limit the application of the extended provision to the In-Home Supportive Services program.

Existing law provides for a system of identification of applicants for licenses, permits, and certificates of approval for persons to operate certain care facilities.

This bill would revise those requirements, would provide that the requirements generally apply to volunteers providing services in those care facilities, but would exempt volunteers in certain circumstances, and would impose civil penalties for failure to meet certain requirements for the submission of fingerprints and information relative to criminal records identification for those purposes. The bill would also state the intent of the Legislature regarding requiring obtaining criminal records of individuals who would come in contact with clients of community care facilities when live-scan technology is operational. The bill would require the Department of Justice to charge a fee to cover its cost of providing fingerprint identification services pursuant to this bill.

Existing law provides for local child death review teams to investigate child deaths resulting from abuse.

This bill would require the State Department of Social Services to work with child death review teams and child protective services agencies in order to identify child death cases that were or should have been reported to or by child protective services agencies.

Existing law requires the Employment Development Department to develop state and area plans for providing job training and placement.

This bill would require the department to convene groups representing various local entities for the purpose of developing local plans under this program for coordination of employer outreach activities and the solicitation of entry-level and other job listings. It would require the Employment Development Department to submit a report to the Legislature on these local plans, and another report on the effectiveness of this program.

Existing law requires each employer to file a report of employer contributions, and a report of unemployment contributions and a report of wages paid to his or her workers.

This bill would revise those requirements, and would provide for the electronic transmission of that information, commencing July 1, 1998.

Existing law provides for employers to pay contributions into the Employment Training Fund at a specified rate, and generally requires money in the fund to be allocated by the Employment Training Panel only for specified job training purposes.

Existing law authorizes the Employment Training Panel to allocate money in the Employment Training Fund for various purposes.

This bill would revise the method of allocating funds for the panel's administrative costs.

Existing law specifies that the state's share of the costs of the child welfare program, the county services block grant, and the IHSS program administration shall be 70% of the actual nonfederal expenditures or the amount appropriated by the Legislature, whichever is less.

This bill would specify that the amount of funds appropriated in the annual Budget Act that equates to the amount claimed under the Emergency Assistance Program that has been included in the state's TANF block grant for child welfare services shall be considered federal funds for purposes of calculating a county's share of costs, and would limit a county's share of cost requirements regarding the county services block grant and the IHSS program for the 1996-97 fiscal year.

Existing law requires the provision of assistance and other benefits to needy individuals and families under certain programs.

Under Assembly Bill 1542, as passed by the Legislature at the 1997 portion of the 1997-98 Regular Session, the State Department of Social Services and each county would be required to administer statewide electronic benefits transfer systems.

This bill would, instead, require management of these systems to be transferred from the department to the Health and Welfare Agency Data Center.

This bill would require the Health and Welfare Agency Data Center to implement a statewide automated welfare system for various public assistance programs, and to report

to appropriate committees of the Legislature on the implementation of that system. It would also contain provisions relating to the payment of certain county costs incurred prior to participation in an automated system.

Existing law provides for the CalWORKs program, under which each county provides cash assistance and other benefits to qualified low-income families.

This bill would permit the State Department of Social Services to approve county demonstration projects to provide employment and training services to nonsupporting noncustodial parents of children receiving CalWORKs benefits.

This bill would also create the Temporary Assistance for Needy Families Fund in the State Treasury, into which would be deposited federal Temporary Assistance for Needy Families block grant funds.

Existing law, operative January 1, 1998, requests the University of California to establish and administer a program or programs to support welfare research and evaluation of the CalWORKs program.

This bill would require the State Department of Social Services to enter into an interagency agreement with the University of California for implementation of these provisions, and would appropriate \$1,000,000 to the department, out of federal Temporary Assistance for Needy Families block grant moneys, for implementation of that interagency agreement.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law relating to the Medi-Cal program includes the provision of various benefits under the Medi-Cal program to eligible individuals, including personal care option services, until July 1, 1998, to the extent that federal financial participation is available.

Existing law provides for the federal Supplemental Security Income (SSI) program and the State Supplementary Program for the Aged, Blind and Disabled (SSP), under which, through a combination of federal and state funds, qualified low-income aged, blind, and disabled persons are provided with cash assistance. Persons eligible for SSI/SSP benefits are automatically eligible for the IHSS and Medi-Cal programs.

The federal Personal Responsibility and Work Opportunity Reconciliation Act of 1996 makes qualified aliens, as defined, with certain exceptions, and certain children, ineligible for SSI/SSP benefits and also causes these persons to become ineligible for the IHSS program and for personal care services under the Medi-Cal program.

This bill would extend until July 1, 2002, the personal care option services under the Medi-Cal program, and extend eligibility for those services to persons who would be eligible but for Public Law 104-193.

This bill would specify that persons who are ineligible for IHSS benefits due to the federal law, would be eligible for those benefits but for that federal law, and continue to meet eligibility and disability requirements, shall be eligible for benefits under the IHSS program.

Because counties are responsible for administration of the IHSS program and participate in the funding of that program, this bill, by requiring the provision of IHSS benefits to persons otherwise ineligible for IHSS benefits, would result in a state-mandated local program.

Counties are responsible for the administration of the Medi-Cal program through the determination of eligibility for benefits for the Medi-Cal program, and, therefore, by requiring counties to determine the eligibility of those persons for Medi-Cal benefits, this bill would result in a state-mandated local program.

Existing law creates the Alternative Assistance Program, for AFDC applicants and recipients who choose not to receive a cash grant.

This bill would eliminate this program.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which payments are made on behalf of low-income children in foster care placements, including group homes.

Existing law contains ratesetting provisions for group homes that require rate adjustments commencing on November 1, 1997.

This bill would delay application of these provisions until November 1, 1998.

Existing law specifies that a group home AFDC-FC reimbursement rate shall not increase, during the period commencing July 1, 1994, and ending July 1, 1997, as a result of a program change, except under specified circumstances.

This bill would extend this requirement to apply to the 1997-98 fiscal year.

This bill would specify that the amount of funds appropriated from the General Fund in the annual Budget Act that equates to the amount claimed under the Emergency Assistance Program that has been included in the TANF block grant program for foster care payments shall be considered federal funds for purposes of calculating the county share of cost.

Existing law provides for the State Supplementary Program for the Aged, Blind and Disabled (SSP), which requires the department to contract with the United States Secretary of Health and Human Services to make payments to SSP recipients to supplement Supplemental Security Income (SSI) payments made available pursuant to the federal Social Security Act.

Existing law requires that an automatic cost-of-living adjustment be made to SSP benefit levels on January 1, 1998.

This bill would delay that adjustment until January 1, 1999.

Existing law contains provisions for making emergency payments to SSP recipients under certain special circumstances, as defined.

This bill would delay the operative date of these provisions until July 1, 1998.

Existing law establishes the In-Home Supportive Services (IHSS) program, under which services are provided to low-income aged, blind, and disabled persons in order to enable them to remain in their own homes.

Under existing law, a county may either administer its own IHSS program or provide for its administration through the establishment of a public authority or pursuant to contract with a nonprofit consortium.

This bill would require that the annual administrative cost for a public authority or nonprofit consortium, exclusive of specified increases in provider wages or benefits or employer taxes, shall be shared by the state and the counties as prescribed under provisions of existing law applicable to the sharing of these costs when the IHSS program is administered by the county.

The bill would also revise provisions for the allocation of funds for incentive payments for collections used to reduce aid payments and other payments to aid agencies on behalf of children.

This bill would also permit the Director of Finance, to the extent authorization is provided pursuant to statute, including the Budget Act, and upon written notice to the chairpersons of specified committees of the Legislature, to transfer moneys in the Federal Trust Fund derived from the Temporary Assistance for Needy Families block grant for augmentation of the Child Care and Development Block Grant and the county social services block grant for which funds are received pursuant to provisions of the federal Social Security Act.

Existing law provides for a demonstration project for the provision of services for children who are exposed to alcohol or drugs or who are HIV positive, and terminates that program January 1, 1998.

This bill would indefinitely extend these provisions and would delete provisions limiting this project to only 10 counties and making this program a demonstration project.

Existing law provides for an intensive foster care program, and provides for the establishment of rates for foster family agencies participating in the program.

This bill would provide for the increase in the standardized rates for reimbursement under that program, commencing November 1, 1997.

The bill would provide that funding for the Child Victim of Crimes program shall be provided from the amount appropriated in the Budget Act of 1997 to the Office of Child

Abuse Prevention for expenditure in the 1997–98 and 1998–99 fiscal years for the purposes of the Child Victims of Crime Program.

This bill would also establish the Emergency Food Assistance Program Advisory Board, in order to provide advice and assistance to the State Department of Social Services in the operation of the Emergency Food Assistance Program.

Existing law provides for the provision of services to eligible individuals with disabilities through independent living centers.

This bill would specify that for the 1997–98 fiscal year, each independent living center, with certain exceptions, shall receive a minimum base grant, to the extent funds are appropriated for the purpose, and would make that allocation only if the appropriation in the Budget Act of 1997 exceeds the amount appropriated in the Budget Act of 1996 by a specified amount.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 607 (AB 122) Brown. Tax relief: vineyards: Pierce's Disease.

The California Constitution specifies that grapevines are exempt from property taxation until 3 years after the season in which they were planted in vineyard form. Existing statutory provisions authorize a county board of supervisors to provide by ordinance that, thereafter, the property tax base year value of substantially equivalent grapevines that are planted to replace certain grapevines that were removed solely as a result of a phylloxera infestation, shall be the property tax base year value of the removed grapevines factored to the lien date of the first taxable year of the replacement grapevines.

This bill would expand this valuation authorization to apply to substantially equivalent grapevines that are planted to replace grapevines removed solely as a result of Pierce's Disease.

The Personal Income Tax Law and Bank and Corporation Tax Law each specify a 5-year period for purposes of accelerated cost recovery or depreciation provisions, and a 10-year period or class life for purposes of alternative depreciation, with respect to grapevines replaced in a vineyard in California in a taxable or income year beginning on or after January 1, 1992, as a direct result of a phylloxera infestation in that vineyard.

This bill would expand these provisions to also apply to any grapevine replaced in a vineyard in California in a taxable or income year beginning on or after January 1, 1997, as a direct result of Pierce's Disease in that vineyard.

This bill would incorporate additional changes in Sections 17250 and 24349 of the Revenue and Taxation Code proposed by AB 1155 or SB 455, or both, to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

This bill would take effect immediately as a tax levy.

Ch. 608 (SB 1234) Alpert. Personal Income Tax Law: Bank and Corporation Tax Law: corporations and limited liability companies: classification.

The Personal Income Tax Law imposes, for each taxable year beginning on or after January 1, 1997, a specified tax upon limited liability companies doing business in this state. For purposes of this tax, a "limited liability company" is defined to mean an organization that is, among other things, classified as a partnership for California tax purposes.

This bill would eliminate this portion of the definition of a limited liability company and instead include in that definition that the entity is not taxable as a corporation. This bill would eliminate related provisions with respect to tax liability. This bill would, as provided, also require each limited liability company that is disregarded for tax purposes pursuant to specified provisions of the Bank and Corporation Tax Law to file a return containing specified information.

The Personal Income Tax Law and the Bank and Corporation Tax Law each generally specifies certain limitations and requirements with respect to the application of credits against the taxes imposed under those laws.

This bill would, for purposes of both of these laws, specify certain additional limits on the application and carryover of credit amounts with respect to any taxpayer that owns a business entity that is disregarded for tax purposes under specified provisions of the Bank and Corporation Tax Law.

The Personal Income Tax Law defines a "corporation" to include, among other entities, business trusts.

This bill would also include within that definition other business entities taxable as a corporation under regulations of the Franchise Tax Board.

The Bank and Corporation Tax Law defines the term "corporation" to exclude banks and include associations, excluding banking associations and including nonprofit associations that perform services, borrow money, or own property, and Massachusetts or business trusts, as defined.

This bill would instead define the term "corporation" to include banks, unless specifically provided otherwise. This bill would also define the term "corporation," for income and taxable years beginning on or after January 1, 1997, to exclude banking associations and to include associations, as provided, business trusts, and other business entities that are classified under regulations, as provided, of the Franchise Tax Board as associations taxable as corporations.

This bill would incorporate additional changes in Section 18633.5 of the Revenue and Taxation Code, proposed by SB 1106, to be operative only if SB 1106 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

This bill would incorporate additional changes in Section 23038 of the Revenue and Taxation Code, proposed by AB 1040, to be operative only if AB 1040 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

This bill would take effect immediately as a tax levy.

Ch. 609 (SB 200) Kelley. Enterprise zones.

The Enterprise Zone Act provides for the designation of enterprise zones by the Trade and Commerce Agency, according to specified criteria, pursuant to which certain entities may receive regulatory, tax, and other incentives for private investment and employment.

This bill would require the agency to designate up to 2 Manufacturing Enhancement Areas requested by the governing board of cities, each of which meet certain specified criteria.

The Personal Income Tax Law and the Bank and Corporation Tax Law provide various credits against the taxes imposed by those laws, including a hiring credit for employees hired by taxpayers engaged in a trade or business within an enterprise zone.

This bill would provide for a credit under both laws for a qualified taxpayer, as defined, hiring qualified disadvantaged individuals in the designated areas in connection with the wages paid or incurred with respect to those individuals.

This bill would make various technical changes in related credit and deduction provisions.

This bill would provide that specified provisions would become operative or would not become operative depending upon whether this bill, AB 1040, and SB 965 are enacted, as provided.

Ch. 610 (SB 5) Lockyer. Income and bank and corporation taxes: gains: "S corporation."

The Personal Income Tax Law provides for the manner in which taxable gains are to be recognized upon the disposition of property, including real property that is the principal residence of the taxpayer.

This bill would, as provided, conform these provisions, with respect to the recognition of gain upon the disposition of a principal residence, to recent changes in federal income tax law.

The Bank and Corporation Tax Law, in specified conformity to federal income tax law, provides that an election to be treated as an "S corporation" may be made by a small business corporation, as defined, that, among other things, does not have more than 35 shareholders.

This bill would provide additional conformity to federal income tax law by providing, among other things, that the corporation not have more than 75 shareholders for purposes of that requirement and by providing other "S corporation" changes relating to electing small business trusts as shareholders, post-death qualification for certain trusts, financial institutions permitted to hold safe-harbor debt, termination of elections of "S" status, authorization of "S" subsidiaries, treatment of distributions during loss years, carryover of disallowed losses and deductions under at-risk rules, treatment of inherited stock, treatment of gain from subdivided real estate, and "S corporation" status for certain financial institutions and exempt organizations, as provided.

The bill would permit an "S corporation" to apply to transfer an overpayment of estimated tax to the personal income tax accounts of its shareholders, in accordance with specified procedures. This bill would also increase the tax rate applicable to "S corporations."

This bill would provide additional conformity to federal income tax law with respect to sales of stock to employee stock ownership plans or certain cooperatives.

This bill would take effect immediately as a tax levy; however, except as otherwise provided, its provisions would apply to taxable years beginning on or after January 1, 1997.

Ch. 611 (SB 455) Alpert. Income and bank and corporation taxes.

Under the Personal Income Tax Law and the Bank and Corporation Tax Law, various provisions of the federal Internal Revenue Code as enacted as of a specified date are referenced in various sections of the Revenue and Taxation Code. That law provides that for taxable years beginning on or after January 1, 1993, the specified date of those referenced Internal Revenue Code sections is January 1, 1993, unless otherwise specifically provided.

Existing law provides that for any introduced bill which proposes changes in any of those dates, the Franchise Tax Board shall prepare a complete analysis of the bill which describes all changes to state law which will automatically occur by reference to federal law as of the changed date. It further requires the Franchise Tax Board to immediately update and supplement that analysis upon any amendment to the bill, and requires that analysis to be made available to the public and to be submitted to the Legislature for publication in the daily journal of each house of the Legislature.

This bill would change the specified date of those referenced Internal Revenue Code sections to January 1, 1997, for taxable years beginning on or after January 1, 1997, and thereby would make numerous substantive changes to both the Personal Income Tax Law and the Bank and Corporation Tax Law with respect to those areas of preexisting conformity that are subject to changes under federal laws enacted after January 1, 1993, and that have not been or are not being excepted or modified.

This bill would make certain other changes in federal income tax laws applicable, with specified exceptions and modifications, for purposes of the Personal Income Tax Law or the Bank and Corporation Tax Law, or both, with respect to the following subjects: certain publicly traded partnerships treated as corporations; the substantiation requirement for the deduction of certain charitable contributions; disclosure related to quid pro quo contributions; the deduction for specified health insurance costs; the indexing of the qualified transportation fringe benefit and the de minimis exception to unrelated business income; provisions to prevent conversion of ordinary income to capital gain, including provisions related to interest embedded in financial transactions, the repeal of certain exceptions to market discount rules, the treatment of stripped

preferred stock, capital gain treatment under the limitation on investment interest, and the treatment of appreciated inventory; the reduction in the deductible portion of business meals and entertainment; the reduction in the compensation taken into account in determining contributions and benefits under qualified retirement plans; the denial of the deduction for lobbying expenses; the modification of the accuracy-related penalty; returns relating to the cancellation of indebtedness by certain financial entities; long-term care benefits; returns relating to certain purchases of fish; the modification of specified involuntary conversion rules for certain disaster-related conversions; employer-provided educational assistance; modification of fixed-base percentage for startup companies for purposes of the research and development credit; 50% exclusion for gain from certain small business stock; recognition of gain or loss in connection with certain vessels; rollover of gain from sale of publicly traded securities into specialized small business investment companies; modification to minimum tax depreciation rules; increase in expensing treatment for assets of small business; earned income tax credit; real estate investments by pension funds; exclusion from gross income for income from discharge or qualified real property business indebtedness; income of a child included on parent's return; the use of excess pension assets for retiree health benefits; rounding rules for cost-of-living adjustments; partnership distributions of marketable securities; pension plan funding; amortization of child care facilities; deferral of income from deposits for merchant marine shipbuilding; treatment of certain contributions in aid of construction; interest on Polish bonds; denial of deduction for indirect contributions to political parties; repeal of exclusion of state officials' expense allowance; amortization of reforestation expenditures; information reporting requirements for certain foreign corporations; estimated payments of corporate taxes; medical savings accounts; the treatment of dues paid to agricultural or horticultural associations; the treatment of abandonment of lessor improvements at termination of a lease; savings incentive plans for employees of small businesses; underpayments of estimated payments; the treatment of depreciation under the income forecast method; the treatment of qualified long-term care insurance; the exclusion from income for employee death benefits; the basis of property acquired through involuntary conversion; the exclusion of energy conservation subsidies provided by public utilities; the imposition of the minimum tax on financial asset securitization investment trusts (FASIT); and the treatment of "Subchapter S" corporations.

This bill would also provide that certain provisions relating to "Subchapter S" corporations shall only apply if this bill and SB 5 are both chaptered, this bill is chaptered last, and other specified conditions are met.

This bill would provide specified conformity of state employment tax treatment of simple retirement accounts to the federal employment tax treatment of those accounts.

This bill would incorporate additional changes to certain of its provisions proposed by other bills if those bills and this bill are enacted and become effective as specified, and this bill is enacted last.

This bill would take effect immediately as a tax levy, but its provisions would apply to taxable and income years, as specified.

Ch. 612 (SB 1233) Lockyer. Income and bank and corporation taxes.

The Personal Income Tax Law authorizes various credits against the taxes imposed by that law, including a credit of \$67 for taxable years beginning in 1996, and adjusted for inflation thereafter, as specified, for each dependent.

This bill would instead authorize a credit of \$120 against those taxes for each taxable year beginning on or after January 1, 1998, and before January 1, 1999, and a credit of \$222 for each taxable year beginning on or after January 1, 1999, adjusted for inflation thereafter, as specified, for each of those dependents.

The Personal Income Tax Law provides for the manner in which taxable gains are to be recognized upon the disposition of property, including real property that is the principal residence of the taxpayer.

This bill would, as provided, conform these provisions, with respect to the recognition of gain upon the disposition of a principal residence, to recent changes in federal income tax law.

Under the Personal Income Tax Law and the Bank and Corporation Tax Law, various provisions of the federal Internal Revenue Code as enacted as of a specified date are referenced in various sections of the Revenue and Taxation Code.

This bill would also make certain recent changes in federal income tax laws applicable, with specified exceptions and modifications, for purposes of the Personal Income Tax Law, with respect to individual retirement accounts, including the use of retirement funds for higher education expenses, for acquisition of a personal residence by a first-time homebuyer, as specified, and health insurance of self-employed individuals.

This bill would also, for purposes of the Bank and Corporation Tax Law, make nonsubstantive, technical changes to provisions pertaining to "S corporations."

This bill would incorporate additional changes in Sections 17054 and 17062 of the Revenue and Taxation Code proposed by SB 455, to be operative only if SB 455 and this bill are both enacted and become effective as specified, and this bill is enacted last. This bill would incorporate additional changes in Section 17152 of the Revenue and Taxation Code proposed by SB 5, to be operative only if SB 5 and this bill are both enacted and become effective as specified, and this bill is enacted last.

This bill would take effect immediately as a tax levy.

Ch. 613 (AB 1042) Wayne. Personal income and bank and corporation taxes.

Under the Personal Income Tax Law and the Bank and Corporation Tax Law, various provisions of the federal Internal Revenue Code as enacted as of a specified date are referenced in various sections of the Revenue and Taxation Code.

This bill would make certain changes in federal income tax laws applicable, with specified exceptions and modifications, for purposes of the Personal Income Tax Law or the Bank and Corporation Tax Law, with respect to the credit for qualified research expenses.

This bill would take effect immediately as a tax levy, but its provisions would be operative for taxable or income years beginning on or after January 1, 1998.

Ch. 614 (AB 1395) Escutia. Child support: enforcement of delinquencies: Franchise Tax Board.

Existing law requires a district attorney to take appropriate action to establish, modify, and enforce child support orders when the child is receiving public assistance, and when appropriate, to take the same actions on behalf of a child who is not receiving public assistance. Under existing law, the district attorney may refer child support delinquencies to the Franchise Tax Board for collection.

This bill would require, or authorize under specified circumstances, the district attorney enforcing child support obligations to refer all child support delinquencies, as specified, to the Franchise Tax Board for collection, except that a county would be authorized to apply for an exemption from the State Department of Social Services if the county collection program meets specified conditions.

Existing law authorizes a county district attorney, when a child support delinquency is reported to the State Department of Social Services, as specified, to refer the delinquency to the Franchise Tax Board for collection.

This bill would, as provided, also authorize the district attorney to refer to the Franchise Tax Board cases in which the social security number of the noncustodial parent is unknown, to assist the district attorney in establishing or enforcing a child support order. The bill would impose a state-mandated local program by adding to the duties of district attorneys. The bill would provide that the district attorney would receive credit for the amount collected when a referral is made.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would provide that it shall become operative only if AB 573 and SB 247 of the 1997-98 Regular Session are enacted and become effective on or before January 1, 1998.

Ch. 615 (AB 366) Havice. Sales and use taxes: exemptions: bunker fuel.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax, including an exemption, until 1998, for the sale of fuel and petroleum products to a water common carrier for immediate shipment outside this state for consumption in the conduct of its business as a common carrier after the first out-of-state destination, if specified conditions are met.

This bill would extend the 1998 repeal date to 2003, thereby extending this exemption provision until 2003.

This bill would require the Legislative Analyst's Office to make a specified report to the Legislature in connection with the exemption extended by this bill.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy.

Ch. 616 (SB 566) M. Thompson. Local government: capital investment incentive payments.

Existing law authorizes a local agency to rebate certain amounts of ad valorem property tax revenue that are received by that agency as a result of the ad valorem taxation of "economic revitalization manufacturing property," as defined.

This bill would authorize the governing body of a county, city and county, or city to pay capital investment incentive amounts, as defined, over a period of up to 15 consecutive fiscal years, to a requesting proponent of a qualified manufacturing facility, as defined.

The bill would also permit a city, special district, or school district to pay to the county, city and county, or city similar amounts.

Ch. 617 (AB 747) Alby. Care facilities.

Existing law requires a foster family agency licensed by the State Department of Social Services to use only a certified family home that has been certified by that agency or a licensed foster family home approved by the licensing county. Existing law requires the foster family agency to review and qualify the home by certifying to the department that the home meets the department's licensing standards.

This bill would require the foster family agency to cease any further review of an application of a foster family home for a certificate of approval for prescribed periods of time or until reinstatement if the applicant had a license for a clinic, health facility, residential care facility for the elderly, child day care facility, or family day care home, or had a certificate of approval by a foster family agency that was revoked, within the preceding 2 years, or the applicant was excluded from various facilities licensed by the department. The bill would also require the cessation of any further review if the applicant had previously applied for a license for any of the above listed facilities and the application was denied within the last year or the applicant had previously applied for a certificate of approval with a foster family agency and the department ordered the foster family agency to deny the application.

Existing law provides for the licensure and regulation of community care facilities, residential care facilities for persons with a chronic, life-threatening illness, residential care facilities for the elderly, and child day care facilities administered by the department. Existing law provides criminal sanction for a violation of these provisions.

Existing law sets forth provisions under which the department is required to cease the review of an application for a license for these facilities if the application for a license or special permit indicates, or the department determines during the application review process, that the applicant previously was issued a license or special permit for a clinic, health facility, residential care facility for the elderly, child day care facility, or family day care home and that license or special permit was revoked within the preceding 2 years or the applicant had previously applied for a license for one of these facilities and the application was denied within the last year.

This bill would require a cessation of the review of an application for a license or special permit for these facilities under these provisions if the applicant had been previously issued a certificate of approval by a foster family agency that was revoked by the department within the preceding 2 years, the applicant had previously applied for a certificate of approval with a foster family agency and the department ordered the foster family agency to deny the application, or the applicant was excluded from various facilities licensed by the department.

Existing law requires the department or any other approving authority to do a criminal record check on an applicant for a license or special permit to operate or manage a community care facility, residential care facility for persons with a chronic, life-threatening illness, residential care facility for the elderly, child day care facility, or for a license, special permit, or certificate for a foster family home or certified family home, and on other persons, including, nonclients who reside in these facilities or homes, staff, and employees. Existing law requires the Department of Justice to notify the department and the department to deny the above applications, unless an exemption is granted, if it is found that the applicant or any of the other designated persons has been convicted of, or, in the case of community care facilities, is awaiting trial for, prescribed crimes.

This bill would revise these provisions for purposes of any applicant or designated person who is awaiting trial, to require the department, upon notification by the Department of Justice, to cease processing the application until the conclusion of the trial rather than to deny the application. The bill would also authorize the department to revoke the license of a facility or foster family home or the certificate of approval of a certified family home if it is found after licensure or the granting of a certificate of approval that the licensee, certified family home, or any person, other than a client, residing in the facility has been convicted of prescribed crimes, unless the director grants an exemption.

Existing law requires that an application for a license or special permit for any one of the care facilities described above be denied if it is found that the applicant or any of the designated persons has been convicted of any crime other than a minor traffic violation. Existing law requires that an application for a license, special permit, or certificate of approval for a foster family home or certified family home be denied if it is determined that the person or any of the designated persons has been convicted of specified sex offenses against a minor and various other designated offenses.

This bill would revise the prescribed crimes to which this provision applies with regard to an applicant for a license, special permit, or certificate for a foster family home or certified family home to apply to any crime other than a minor traffic violation.

Existing law requires the department, upon determining that a person has been convicted of or is awaiting trial for certain crimes, to notify the licensee to act immediately to terminate the person's employment, remove the person from the facility, or bar the person from entering the facility.

This bill would provide that a licensee's failure to comply with these requirements shall be grounds for disciplining the licensee pursuant to designated provisions.

Existing law authorizes the Department of Justice to provide subsequent arrest notification to any agency authorized under certain provisions to receive state summary criminal history information to assist in fulfilling employment, licensing, or certification duties, upon the arrest of any person whose fingerprints are maintained on file at the Department of Justice as the result of an application for licensing, employment, or certification. Existing law requires the notification to consist of a current copy of the person's state summary criminal history transcript.

This bill would authorize the inclusion of subsequent arrest information pursuant to those provisions for purposes of a criminal record check conducted under the above provisions related to various care facilities and family homes. For purposes of these care facilities and family homes, the bill would revise the provisions governing the conduct of a criminal record check to authorize the State Department of Social Services to obtain any arrest or conviction records or reports from any law enforcement agency as necessary to the performance of its duties to inspect, license, and investigate community care facilities and individuals associated with a community care facility. The bill would make conforming changes.

Existing law authorizes the department to periodically inspect and evaluate for quality of care every licensed community care facility and requires the department to notify the facility in writing of all deficiencies. Existing law authorizes the department, upon a finding of noncompliance, to require a foster family agency to deny or revoke the certification of approval of a certified family home.

This bill would require, if the department requires a foster family agency to deny or revoke the certification of approval of a certified family home under these circumstances, the department to serve an order of denial or revocation upon the certified or prospective foster parent and foster family agency giving notification of the basis of the department's action and of the certified or prospective foster parent's right to a hearing. The bill would set forth a process to appeal the department's order of denial or revocation. The bill would provide that a foster family agency's failure to comply with the department's order to deny or revoke the certificate of employment by placing or retaining children in care would be grounds for disciplining the licensee.

Existing law authorizes the department to prohibit a licensee of a community care facility, residential care facility for persons with a chronic, life-threatening illness, residential care facility for the elderly, or child day care facility from employing, or continuing the employment of, or allowing in a licensed facility, or allowing contact with clients of a licensed facility by, any employee or prospective employee who has committed or engaged in certain prohibited acts. Existing law sets forth procedures under which the employee or prospective employee (1) is provided notice of the department's action and his or her right to a hearing, (2) may be excluded from the facility, and (3) may be subject to disciplinary proceedings.

This bill would extend these provisions to apply to any person who is not a client and who has committed or engaged in certain prohibited acts. This bill would prohibit a person excluded from a facility under these provisions from working in any facility or being licensed to operate any facility licensed by the department, or from being a certified foster parent for the remainder of the person's life, but would provide a right to petition for reinstatement.

This bill would also require the department to exclude a person from these facilities (1) if that person suffered a revocation of, or the denial of an application for, a license or special permit for any of the facilities or of a certificate of approval of a foster family agency or (2) if the person applied for a certificate of approval with a foster family agency and the department ordered the foster family agency to deny the application.

Because this bill would change the definition of existing crimes, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 618 (AB 1269) Granlund. Diesel fuel.

The Diesel Fuel Tax Law imposes a tax of a specified amount per gallon of diesel fuel that is used in a qualified motor vehicle in this state by an interstate user.

This bill would, in addition to that tax, impose a tax, at a specified rate, for the privilege of using diesel fuel in a qualified motor vehicle in this state by an interstate user. It would also allow an interstate user a credit or refund of those taxes on diesel fuel purchased in this state and used in a qualified motor vehicle by an interstate user, as provided.

This bill would make a specified statement of legislative intent regarding the taxation of the interstate use of diesel fuel.

This bill would take effect immediately as a tax levy.

Ch. 619 (SB 506) Committee on Transportation. Transportation.

(1) Existing law imposes requirements for the issuance of a yacht broker's license.

This bill would provide that an applicant for a yacht broker's license is qualified to submit that application if the applicant has owned and operated a marine business selling new or used yachts for a minimum of 3 continuous years immediately preceding the application.

(2) Existing law provides for the making of claims for funds for facilities provided for the exclusive use of pedestrians and bicycles.

This bill would specify that up to 20% of the amount available each year to a city or county from the local transportation fund may be allocated to restripe class II bicycle lanes.

(3) Under existing law, within each 4-year period beginning July 1, 1988, the funds from the State Highway Account in the State Transportation Fund, with the exception of those for specified programs, are required to be expended in accordance with the so-called county minimums and north-south split formulas. For purposes of this funding, county boards of supervisors may elect to pool their counties' minimum programming with adjacent counties. Existing law also allows the regional transportation planning agency in Placer and El Dorado Counties to pool its county minimum programming with adjacent counties that adopt similar resolutions.

This bill would with respect to those county boards of supervisors and the regional transportation planning agency in Placer and El Dorado Counties, allow the pooling to occur with those counties that adopt similar resolutions without requiring the counties to be adjacent.

(4) Existing law continuously appropriates specified sums from revenues derived from taxes imposed under the Motor Vehicle Fuel License Tax Law and the Use Fuel Tax Law for allocation to counties for various highway purposes, including a sum equal to the total of all reimbursable costs of snow removal on county roads, as specified, or \$5,500,000, whichever is less.

This bill would include snow grooming, as defined, within those reimbursable costs, thereby making an appropriation.

(5) Existing law prohibits the Department of Motor Vehicles from accepting any application for the issuance or renewal of a driver's license or identification card that does not include the applicant's social security account number or driver's license or identification number.

This bill would prohibit the department from completing, rather than accepting, those applications.

(6) Existing law provides that all records of the Department of Motor Vehicles relating to certain matters are open to public inspection, except as specified.

This bill would specify the number of years that records are required to be open for inspection and available and would prohibit the availability or disclosure of personal information unless the disclosure is in compliance with federal law. Because a violation of this prohibition would be a crime, the bill would impose a state-mandated local program by creating a new crime.

(7) Existing law authorizes the Department of Motor Vehicles to permit inspection of, or sell, or both, information from its records concerning the registration of any vehicle or information from the files of drivers' licenses at a charge sufficient to pay the actual cost to the department for providing the inspection or sale of the information, with the charge for the information to be determined by the director. The department is authorized to sell stamps or coupons in appropriate denominations for the convenient enforcement of this provision, to be used to accompany requests for information in lieu of cash.

This bill would delete the provision authorizing the sale of the specified stamps or coupons.

(8) Existing law prohibits, with regard to the inspection or sale of certain information from the department's files, the department from providing photocopies to the public.

This bill would delete that prohibition.

(9) The bill would make technical, nonsubstantive changes in other provisions of existing law.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 620 (SB 1102) Committee on Revenue and Taxation. Taxation.

The Motor Vehicle Fuel License Tax Law, the Use Fuel Tax Law, the Oil Spill Response, Prevention, and Administration Fees Law, the Underground Storage Tank Maintenance Fee Law, and the Diesel Fuel Tax Law, among other things, authorize the State Board of Equalization to disclose specified tax information, as provided.

This bill would authorize the board to furnish specified motor fuel tax information to other specified governmental agencies that are investigating violations of, and enforcing, motor fuel laws, as provided.

The Sales and Use Tax Law provides that a retailer engaged in business in this state includes, among others, specified retailers who solicit orders, as provided.

This bill would delete those provisions.

Under the existing Bradley-Burns Uniform Local Sales and Use Tax Law and the Transactions and Use Tax Law, the State Board of Equalization deducts from its periodic transmittals of sales and use tax revenues and transactions and use tax revenues to counties, cities, redevelopment agencies, and districts, as defined, their respective shares of refunds of those taxes which are due to taxpayers.

This bill would, with certain exceptions, require the board, upon the request of a city or county, as specified, to remit to the city or county that portion of the refund deducted from tax revenue transmittals by the board which exceed \$50,000 in a calendar quarter and to thereafter deduct a pro rata share of that portion from future transmittals of tax revenues, as specified, until the portion is fully deducted.

The Diesel Fuel Tax Law provides that any person that fails to provide or post the required notice with respect to any dyed diesel fuel is presumed to know for purposes of a specified penalty that the diesel fuel will be used for a taxable use. That law also provides that any person who willfully evades or attempts to evade or defeat the payment of taxes imposed by that law is subject to a specified penalty in specified circumstances.

This bill would, instead, apply specified penalties when, among other things, a person knows, or has reason to know, that they are using dyed diesel fuel for a taxable use.

The Diesel Fuel Tax Law requires every person operating a qualified motor vehicle in interstate commerce to apply for a license and post security, as specified.

This bill would provide that those requirements apply to every person operating a qualified motor vehicle within and without this state or the United States, and would make it unlawful for any person to be an interstate user without first securing a license. It would provide additional monetary penalties and prescribe specified administrative procedures in connection therewith.

This bill would also make various technical, nonsubstantive changes relating to the allocation of revenues from fuel taxes to counties and cities.

Existing law governing the State Board of Equalization generally prohibits members, ex-members, and agents of the board and persons obtaining information from any of the foregoing from divulging certain information concerning the business affairs of the companies reporting to the board. The Cigarette and Tobacco Products Tax Law includes a similar prohibition.

This bill would allow the board, under these provisions, to give information to successors, receivers, trustees, executors, administrators, assignees, and guarantors, if directly interested, as to the items included in the measure and amounts of any unpaid tax or amounts of tax required to be collected, interest, and penalties.

Existing law requires that an amount equal to all revenues, less refunds, derived from sales and use tax revenue collected on gasoline, diesel, and alternative fuels, be transferred from the Retail Sales Tax Fund to the Transportation Planning and

Development Account. The Clean Air and Transportation Improvement Act of 1990, an initiative measure that added this provision, requires that amendments to the act must be consistent with and further the act's purposes and, if those requirements are met, also requires a $\frac{2}{3}$ vote of both houses of the Legislature for passage.

This bill would provide that sales and use tax revenues on diesel fuel covered by the Diesel Fuel Tax Law are subject to transfer to the Transportation Planning and Development Account. This bill would declare that it is consistent with and furthers the purposes of the act, and would require a $\frac{2}{3}$ vote for passage.

The Use Fuel Tax Law requires that the flat rate fuel tax be an annual tax.

This bill would provide that, when an owner or operator elects to pay the annual flat rate fuel tax on more than one vehicle, the owner or operator may request that the State Board of Equalization prorate the tax due on a vehicle added during the annual period, so that all vehicles have the same annual period.

Under the Cigarette and Tobacco Products Tax Law, the Alcoholic Beverage Tax Law, the Energy Resources Surcharge Law, the Hazardous Substances Tax Law, the Integrated Waste Management Fee Law, the Oil Spill, Response, Prevention, and Administration Fees Law, the Underground Storage Tank Maintenance Fee Law, the Fee Collection Procedures Law, and the Diesel Fuel Tax Law, the State Board of Equalization administers various provisions respecting the payment of interest on refunds.

This bill would make changes in those provisions concerning the dates and time periods that affect the calculation of interest due on refunds.

This bill would incorporate additional changes in Section 7102 of the Revenue and Taxation Code, proposed by AB 1269, to be operative only if AB 1269 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

This bill would incorporate additional changes in Section 2104 of the Streets and Highways Code, proposed by SB 506, to be operative only if SB 506 and this bill are both chaptered and become effective January 1, 1998, and this bill is chaptered last.

This bill would incorporate additional changes in Section 2107 of the Streets and Highways Code, proposed by AB 1226, to be operative only if AB 1226 and this bill are both chaptered and become effective January 1, 1998, and this bill is chaptered last.

This bill would declare that, due to the unique financial concerns within the County of Napa which a specified provision of the bill is intended to remedy, a general statute within the meaning of Section 16 of Article IV of the California Constitution is not applicable and a special statute is necessary.

Ch. 621 (AB 258) Floyd. Sales and use taxes: retailers and sellers: conventions and trade shows.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law imposes the sales tax upon "retailers," as defined, and requires every person desiring to engage in or conduct business as a "seller," as defined, to obtain a sales tax permit. Existing law provides that every retailer engaged in business in this state and making sales of tangible personal property for storage, use, or other consumption in this state, that engages in specified activity in this state shall, at the time of sale or at the time the storage, use, or other consumption becomes taxable, collect the tax from the purchaser.

This bill would provide that a retailer shall not be considered a retailer engaged in business in this state, except as specified, if that retailer's sole physical presence in this state is to engage in convention and trade show activities, as specified, and if the retailer does not engage in those convention and trade show activities for more than 7 days, in whole or in part, in this state during any 12-month period and did not derive more than ten thousand dollars (\$10,000) of gross income from those activities in this state during the prior calendar year. However, the retailer would be liable for tax with respect to any sale occurring at, or pursuant to an order taken at or during, the convention and trade show activities.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemption from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 622 (SB 45) Kopp. Transportation funding.

Existing law prescribes a process for estimating the amount of state and federal funds to be available for transportation projects in the state, and for appropriating and allocating the available funds to those projects.

This bill would substantially revise that process, by changing the 7-year state transportation improvement program to a 4-year program, changing the components of the regional and state transportation improvement programs, changing the name of the Transportation Planning and Development Account to the Public Transportation Account, and making changes in the way funds are allocated from that account. The bill would declare the Legislature's intent regarding budget estimates by the Department of Transportation and the California Transportation Commission based on specified factors. The bill would eliminate various transportation-related programs, including traffic systems management, flexible congestion relief, commuter and urban rail transit, and the state-local transportation partnership program. The bill would provide that the department is continued as the responsible agency for the state highway system, as specified.

This bill would provide that by the enactment of this bill, the Legislature intends that nothing contained in this bill shall be construed to expand or restrict the authority or responsibility of the department to perform the components developed in the state transportation improvement program. The bill would make related changes.

This bill would incorporate additional changes in Section 14524 of the Government Code proposed by AB 87, to be operative only if AB 87 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

This bill would incorporate additional changes in Section 14525 of the Government Code proposed by AB 87, to be operative only if AB 87 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

Ch. 623 (AB 1126) Villaraigosa. Children's health coverage.

Existing law establishes various health care programs to provide health care to low-income uninsured persons.

This bill would create the Healthy Families Program, to be administered by the Managed Risk Medical Insurance Board, to arrange for the provision of health services to eligible children. Coverage would be afforded using a purchasing pool model, issuance of insurance purchasing credits, or other appropriate means, and would be provided by a broad range of health plans, including insurers, health care service plans, county organized health systems, health care authorities, and local initiatives. Medical, dental, and vision services would be provided, as specified.

The bill would provide for eligibility of persons older than 12 months, and less than 19 years of age, who meet other criteria, including having a gross annual household income equal to or less than 200% of the federal poverty level and meeting citizenship and immigration requirements. The bill would limit premiums and copayments.

The bill would enact related provisions.

The bill would establish the Healthy Families Fund, which would be continuously appropriated for the purposes of the bill.

These provisions would be implemented only if federal financial participation is provided, as specified. They would remain in effect only until January 1, 2004, and as of that date would be repealed.

The bill would become operative only if SB 903 is enacted.

Because a violation of certain provisions would be a crime, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 624 (SB 903) Lee. Children's health care coverage.

(1) Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

This bill would, for purposes of Medi-Cal eligibility, provide that to the extent that federal financial participation is available, the department shall disregard all family income up to 100% of the federal income poverty level for the size of the family and adopt a birth date, earlier than September 30, 1983, so that the age requirement is met for those who have not yet attained the age of 19 years.

The bill would require the department to create and implement a simplified application package for specified applicants.

The bill would provide for an implementation of a program to provide for one month of additional Medi-Cal eligibility for children in certain circumstances.

The bill would provide for a community outreach program relating to the Healthy Families program, which is created by another bill.

(2) Existing law requires the State Department of Health Services to adopt a federal option to waive the use of an asset test for determining the eligibility of pregnant women and infants for Medi-Cal benefits.

This bill would require the department to adopt a federal option to waive the use of a resource standard for determining the eligibility of pregnant women, infants, and children.

(3) The bill would be implemented only if the State Department of Health Services determines that federal financial participation is available.

(4) This bill would become operative only if A.B. 1126 is enacted and becomes operative.

(5) Because the bill would impose various duties on counties, and because the bill would increase county responsibilities with respect to determining eligibility for Medi-Cal benefits, it would create a state-mandated local program.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 625 (AB 1572) Villaraigosa. Health services.

(1) Existing law permits a special commission to be created in San Mateo County, San Bernardino County, Santa Barbara County, and Ventura County, in order to, among other things, enter into contracts for the provision of health care services to the county's Medi-Cal recipients.

This bill would, in addition, permit these commissions to enter into contracts for the provision of health care services to subscribers in the Healthy Families Program proposed to be created by AB 1126 of the 1997-98 Regular Session.

(2) The bill would appropriate \$1,770,000 from the General Fund for allocation, as specified, in the 1997-98 fiscal year, to the Managed Risk Medical Insurance Board for the establishment of the Healthy Families Program, and to the State Department of Health Services to implement specified changes in Medi-Cal and to develop and operate an education and outreach campaign proposed pursuant to SB 903 of the 1997-98 Regular

Session. The bill would also appropriate \$3,132,000 from the federal trust fund for allocation, as specified in the 1997-98 fiscal year, for these purposes.

(3) The bill would also make changes to the Healthy Families Program proposed to be created by AB 1126 and SB 903 of the 1997-98 Regular Session related to participation of geographic managed care plans, as defined, in the Healthy Families Program to be operated by the Managed Risk Medical Insurance Board.

(4) The bill would declare that it should take effect immediately as an urgency statute.

Ch. 626 (AB 217) Figueroa. Medi-Cal.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

SB 903 would, if enacted, provide for purposes of Medi-Cal eligibility, that to the extent that federal financial participation is available, the department shall disregard all family income up to 100% of the federal income poverty level for the size of the family and adopt a birth date earlier than September 30, 1983, so that the age requirement is met for those who have not yet attained the age of 19 years.

This bill would repeal this provision, and would, instead, require the department in determining Medi-Cal eligibility for children under a specified federal provision, to the extent that federal financial participation is available, to designate a birth date by which all children who have not attained the age of 19 years will meet the age requirement for eligibility under that federal provision.

Because the bill would impose various duties on counties, and because the bill would increase county responsibilities with respect to determining eligibility for Medi-Cal benefits, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would provide that it would become operative only if SB 903 is enacted during 1997.

Ch. 627 (AB 2) Ashburn. Public assistance payments.

Existing state law provides for the Aid to Families with Dependent Children (AFDC) program, pursuant to which qualified families are provided with cash assistance. Existing federal law provides for allocation of federal funds through the federal Temporary Assistance to Needy Families (TANF) program to states that participate in the TANF program.

Under existing state law, a county may make direct vendor payments when AFDC recipients have been found to have mismanaged funds.

This bill would permit the Director of Social Services, with the approval of Kern County, to conduct a demonstration project in that county, for not more than 3 years, under which direct rental payments may be made under the AFDC program or any successor program without a finding that a recipient has mismanaged funds. The project would be subject to specified requirements.

This bill would state that Tulare County shall not be liable to repay the state the unpaid balance as of July 1, 1997, of a specified state audit claim concerning the implementation of an automated welfare system in that county.

Ch. 628 (AB 838) Pacheco. Education: Credentialed Out-of-State Teacher Recruitment and Retention Act of 1997.

(1) Existing law requires the Commission on Teacher Credentialing to establish standards for the issuance and renewal of teaching credentials, certificates, and permits. Existing law authorizes the commission to waive specified provisions relating to credentialing to accomplish specified purposes.

This bill would enact the Credentialed Out-of-State Teacher Recruitment and Retention Act of 1997. Notwithstanding any other provision of law, the bill would authorize a school district to employ any teacher holding an elementary, secondary, and special education credential from a state other than California to provide instructional services if specified conditions are met, including the possession of a valid credential from the state other than California at the time the teacher commences to provide instructional services for the school district and the successful completion of a background check in accordance with the requirements of a specified provision relating to criminal background checks for school employees. The bill would require the Commission on Teacher Credentialing to grant a 5-year preliminary multiple or single subject teaching credential or education specialist credential to these teachers. The bill would specify requirements to be met by these teachers in order to be eligible to continue teaching under the bill, and, if any of these requirements are not met, would require the Commission on Teacher Credentialing to inactivate these preliminary credentials until the requirements are met. After the completion of these requirements, and 5 years of teaching under the bill, the bill would require the Commission on Teacher Credentialing to issue professional clear credentials to these teachers.

(2) Existing law authorizes the Commission on Teacher Credentialing to levy and collect various fees. Existing law requires all fees levied and collected by the commission to be deposited in the Teacher Credentials Fund.

This bill would authorize the Commission on Teacher Credentialing to levy and collect a fee of \$200 for the issuance of a 5-year preliminary credential for out-of-state teachers. The bill would require the proceeds of this fee to be used to offset the costs of the out-of-state teacher credential program established by, and to develop a tracking system to ensure compliance with, the bill. The bill would require the Director of Finance to annually recommend to the Legislature a level for this fee so that the fee may generate sufficient revenue to meet these goals.

Ch. 629 (AB 865) Pringle. School facilities.

Under existing law a leased building that does not meet the specified safety requirements of the Field Act may not be used as a school building after September 1, 1990. Existing law imposes on members of the governing board of a school district and the school district liability for injury to persons and property resulting from the fact a building is used as a school, and the building has not been built to meet the requirements of the Field Act. Existing law also makes it a felony for any person to violate designated provisions of the Field Act.

This bill would provide that a school district may lease a commercial building prior to January 1, 2003, that does not meet the requirements of the Field Act, for use as a school building, as defined, if the governing board of the school district finds that the building was constructed in accordance with seismic safety standards for commercial buildings constructed within an earthquake zone, the building permit for the initial construction of the building was issued on or after January 1, 1990, a structural engineer inspected the building and submitted a report, as specified, to the governing board of the school district, and the governing board submitted the report to the Division of the State Architect to determine if the building is in substantial compliance with the Field Act, as specified. This bill would also limit the personal liability, as specified, of school employees and members of governing boards of school districts when the commercial building does not meet the requirements of the Field Act, as specified. This bill would specify that the limitation of personal liability for school employees and members of governing boards of school districts is not intended to limit the liability of the school district or to limit the liability of the school district for the actions of the governing board members and district employees. This bill would specify that the provision making it a felony to violate the Field Act does not apply to a building leased or used, as specified.

Ch. 630 (AB 1033) Frusetta. Taxpayer contributions: State Children's Trust Fund.

Provisions relating to the administration of personal income taxes allowed individual taxpayers, until January 1, 1997, to contribute amounts in excess of their tax liability to the State Children's Trust Fund by designation on their tax returns. All money that was

contributed to the fund pursuant to these provisions was continuously appropriated for specified purposes.

The bill would reinstate those contribution provisions for taxable years beginning on or after January 1, 1997, and continue their operation until January 1, 2002. This bill would provide that all money contributed to the fund pursuant to the provisions of this bill would be subject to appropriation by the Legislature, as specified, and would make related and conforming changes to provisions that continuously appropriate the State Children's Trust Fund.

Ch. 631 (SB 1061) Vasconcellos. Long-term health care facilities.

Existing law requires that every contract of admission, as defined, of a long-term health facility comply with a prescribed form and contain certain information, terms, and conditions for admission of a patient to the facility. Existing law prescribes various prohibitions with regard to the content of the contract. Existing law requires every facility, as directed by the department, to submit a copy of its current contract of admission for review by the State Department of Health Services and to submit amendments as they occur.

This bill would repeal the latter provisions that require the submission of a contract of admission to the department for review. The bill would require instead, by January 2000, every skilled nursing facility, intermediate care facility, and nursing facility to use a standard admission agreement developed and adopted by the department. The bill would prohibit any skilled nursing facility, intermediate care facility, or nursing facility from altering the standard agreement, unless directed by the department and would authorize the department to develop an abbreviated admission agreement for patients whose length of stay is anticipated to be 14 days or less.

Existing law prescribes the rights of patients in a skilled nursing facility or intermediate care facility and requires that written policies regarding the rights of patients be established and made available to the patient, other parties, and the public.

This bill would require, by January 1, 2000, the department to develop a comprehensive Patients' Bill of Rights to be made available to all long-term health care facilities in the state. The Patients' Bill of Rights would include provisions contained in state statutes and regulations and federal regulations. The bill would require that a copy of the Patients' Bill of Rights be a mandatory component of a contract of admission at every skilled nursing facility, intermediate care facility, and nursing facility. The bill would require the department to ensure the translation of the bill of rights into Spanish, Chinese, and other languages, as needed. This bill would also declare that it is not intended to change existing statutory or regulatory requirements governing the care provided to nursing facility residents or the liability of nursing care facilities, as defined, related to their compliance with these requirements.

Ch. 632 (AB 76) Miller. Common interest developments.

(1) Provisions of the Davis-Stirling Common Interest Development Act, repealed as of January 1, 1997, required a prospective managing agent of a common interest development to provide a written statement to the board of directors of the association of the development containing prescribed information regarding the owners or general partners of the managing agent. Among other things, that information was required to include the status of any professional licenses, certifications, or designations held by those persons.

This bill would reenact these provisions. The bill would also require that the managing agents provide information specifying the dates that any professional licenses, certifications, or designations held are valid, rather than the status of those licenses, certifications, or designations. It also would specify that a professional common interest development manager, rather than a certified property manager or professional association manager, is included in the certifications or designations required to be included in the statement.

(2) Existing law requires the owner of a separate interest in a common interest development to provide prescribed documents relating to operation of the common interest development to the prospective purchaser of the separate interest, except as specified.

This bill would require the owner to provide the prospective purchaser with a copy of the preliminary list of defects provided to each member of the association pursuant to existing law, except as specified, and specified information regarding settlement agreements regarding defects in common areas or separate interests. The bill would require the list of defects to include a specified statement.

(3) Existing law requires the board of directors of the association of a common interest development to provide each member of the association who appears on the association records with a prescribed written notice not later than 30 days prior to the filing of any civil action by the association against a declarant or other developer of the common interest development for, among other things, alleged damage to the separate interests that the association is obligated to maintain or repair, or alleged damage to the separate interests that arises out of, or is integrally related to, damage to the common areas or separate interests that the association is obligated to maintain or repair.

This bill would require the association to, in writing, inform only the members whose names appear on the association records of prescribed information as soon as is reasonably practicable after the resolution of a dispute, as specified, regarding alleged defects in prescribed common areas, alleged defects in separate interests that the association is obligated to maintain or repair, or for alleged defects in the separate interests that arise out of, or are integrally related to, defects in the common areas or separate interests that the association is obligated to maintain or repair. The bill would define "defects" to include any damage resulting from defects.

(4) Existing law provides specific requirements for the association to meet before it commences an action for damages against a builder of a common interest development based upon a claim for defects in the design or construction of the development. Existing law requires, in a certain situation, the association's board of directors to hold a meeting of the association members and provide a written notice to each member that specifies, among other things, the options that are available to address the problems, including the filing of a civil action.

This bill would also require the notice to include a statement of the various, reasonably foreseeable alternatives to pay for those options.

Ch. 633 (AB 125) Pacheco. Building standards: closed military bases: County of Riverside.

Existing law authorizes the governing body of a city, county, or city and county to adopt an ordinance that allows a building or other structure located on a military base selected for closure by action of the federal Defense Base Closure and Realignment Commission to comply with specified provisions of state building standards and state standards of fire safety, or to any regulations or standards adopted pursuant to state building standards, in a graduated manner over a period of no more than 3 years from the earlier of either the date the property has been transferred by, or the date a lease of the building or other structure is entered into with, the federal government, provided that specified conditions are met.

This bill would authorize the governing body of the County of Riverside or a city or joint powers authority within that county with jurisdiction over March Air Force Base, March Air Reserve Base, or the March Joint Powers Authority to adopt an ordinance that allows a building or other structure, as specified, located on the former March Air Force Base to comply with specified provisions establishing state building standards and state standards of fire safety, or to any regulations or standards adopted pursuant to state building standards, in a graduated manner over a period of no more than 7 years from the date the property has been transferred by federal government, provided that specified conditions are met. This provision would be applicable only to a building or other structure for which a local agency adopts a graduated compliance plan, as specified prior to January 1, 2000. The bill would require the local agency, prior to adopting a graduated compliance plan, to form a Compliance Plan Review Committee, as specified, to comment on, and make recommendations to, the governing board of the local agency, concerning the compliance plan.

This bill would become operative only if AB 1071 is also enacted and becomes operative on or before January 1, 1998, and would repeal its provisions on January 1, 2007.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique problems within the County of Riverside, that this bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

Ch. 634 (AB 178) Gallegos. Vehicles: automotive products.

(1) Under existing law, the Department of Food and Agriculture is required to establish specifications for engine coolants or antifreeze or prediluted engine coolants or prediluted antifreeze that do not fall below the minimum specifications for those products established by the American Society for Testing and Materials.

This bill would allow the department to grant a variance from the chloride standard imposed by those specifications for recycled engine coolants or antifreeze, upon application by a producer of engine coolants or antifreeze or a manufacturer of an engine coolant or antifreeze recycling system, if the department is satisfied that certain conditions are met, including, among other things, that the chloride content is less than 150 parts per million.

The bill would provide that its provisions shall remain in effect only until January 1, 2000, or until 150 days after the formal adoption by the American Society for Testing and Materials of standards for recycled engine coolants or antifreeze, whichever occurs first.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 635 (AB 280) Keeley. Special districts.

(1) Existing property tax law establishes various procedures and requirements with respect to the annual allocation of ad valorem property tax revenues derived from the ad valorem taxation of both locally and state assessed property. For specified fiscal years, the auditor of the County of Santa Cruz is required to deposit those property tax revenues that would otherwise be allocated to enterprise special districts into a supplemental allocation fund. The board of supervisors is required to allocate moneys from the fund to either enterprise special districts or the county library fund.

This bill would instead require the deposit of those revenues in the supplemental allocation fund upon the written mutual agreement, as provided, of the county and an enterprise special district. The bill would also require that, during the term of the agreement, the county board of supervisors allocate the moneys in the fund to either enterprise special districts or to the county's parks and recreation district, described as specified. By changing those allocation requirements, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 636 (AB 318) Takasugi. Unemployment.

(1) Existing law authorizes the Director of Employment Development, or the chief counsel, if authorized by the director, to recommend to the Unemployment Insurance Appeals Board a settlement of certain civil employment tax matter disputes.

This bill would, instead, provide that the director may approve a settlement involving a reduction of tax in settlement of \$7,500 or less, and would impose specified procedures for settlements, including approval by the Attorney General, the administrative law judge, or the appeals board under certain conditions.

(2) Existing law provides that those settlements arising out of a disagreement on the status of a worker as an employee or independent contractor may include an agreement on the prospective classification of that worker and similar workers.

This bill would specify that the agreement is for employment tax purposes, and does not operate to deprive workers of their eligibility for unemployment, workers' compensation, or disability insurance benefits, and is subject to additional limits.

(3) Existing law provides that no person shall discharge or discriminate against any employee because the employee has filed a bona fide complaint or claim or exercised rights under the jurisdiction of the Labor Commissioner, and provides for investigation by the Labor Commissioner and a remedy of reinstatement and reimbursement of lost wages and benefits.

This bill would provide that no business entity shall discharge or otherwise discriminate against any person because he or she has sought information from the department concerning his or her rights under the Unemployment Insurance Code or the Labor Code, cooperated with any investigation undertaken by the Employment Development Department, or has testified or is about to testify in any proceeding brought pursuant to the Unemployment Insurance Code or the Labor Code. This bill would provide for the same remedies as set forth above with respect to rights under the jurisdiction of the Labor Commissioner.

Ch. 637 (AB 412) Wildman. Pupils: suspension and expulsion.

Existing law specifies the acts for which a pupil may be suspended or expelled from school, and includes an act that has caused, attempted to cause, or threatened to cause physical injury to another person.

This bill would add to those acts the willful use of force or violence upon the person of another, except in self-defense.

This bill would impose a state-mandated local program by requiring each school district to specifically identify, by offense committed, in all appropriate official records of a pupil each suspension or expulsion of that pupil for the commission of any of these acts or the commission of any of the acts set forth in several other specified provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 638 (AB 627) Scott. Political Reform Act of 1974: public officials: personal loans.

(1) Existing provisions of the Political Reform Act of 1974 provide that, subject to certain exceptions, a personal loan made to a public official is income and, if the loan exceeded a specified amount and was made to the official within the 12-month period prior to when the official would participate in a governmental decision that has a specified financial effect on the maker of the loan, the official would be prohibited from participating in the decision.

This bill would prohibit elected state and local officials and other specified public officials from receiving personal loans from officials and employees of, and contractors with, their governmental agencies which, in the aggregate, exceed \$250 per lender at any given time. This bill would exempt certain types of loans from this prohibition, including loans made to the campaign committee of a candidate for elective office or elected officer, loans from specified family members of the public official, and loans made, or offered in writing, prior to the operative date of the bill.

(2) Existing provisions of the Political Reform Act of 1974 do not prohibit elected state or local officials or other public officials from receiving personal loans, so long as the officials report specified loans on their statements of economic interests, which they are required to periodically file with specified state or local governmental agencies.

This bill would require all public officials and candidates who are required to file statements of economic interests and who report loans thereon to report, in addition to other specified information already required concerning loans, the term of the loan.

This bill would prohibit elected state and local officials from receiving personal loans in excess of \$500 unless specified terms of the loan are in writing.

This bill would exempt certain types of loans from the prohibition, including loans made to the campaign committee of a candidate for elective office or elected officer, loans from specified family members of the official, and loans made, or offered in writing, prior to the operative date of this bill.

(3) Existing provisions of the Political Reform Act of 1974 regulate gifts made to specified public officials. Among other things, the act currently prohibits these officials from receiving gifts in excess of \$290 from a single source in a calendar year and requires these officials to report gifts of \$50 or more on their statements of economic interests.

This bill would provide that a loan made to one of these officials would become a gift under the act in specified circumstances when the loan is either not being repaid or is being repaid below defined amounts. This bill would exempt certain types of loans from these provisions. In addition, this bill would exempt loans from these provisions when the creditor has taken specified actions in regards to collection of the loan or where the debtor has had the loan discharged in bankruptcy.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on certain persons who violate the provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

Ch. 639 (AB 680) House. Local public health service: Medi-Cal reimbursement procedures.

Existing law authorized, prior to January 1, 1992, upon request of the board of supervisors of any county of less than 40,000 population and upon the appropriation for public health purposes by that county of a certain amount, the department to organize and operate a local public health service in that county. Existing law provides, effective until January 1, 1998, that any county that was eligible for organization and operation of local public health services by the department under those provisions as of January 1, 1988, shall continue to be eligible, notwithstanding an increase in total population beyond the 40,000 limit established by those provisions.

This bill would extend the effective date of the latter provision to January 1, 1999.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law establishes procedures for the reimbursement of providers under the Medi-Cal program.

This bill would authorize the department to negotiate settlements with acute care hospitals in Stanislaus and Tuolumne Counties with psychiatric units that unintentionally violate Medi-Cal cost reimbursement policies or procedures, and to waive all or part of the overpayments made under the Medi-Cal program to the hospital.

Ch. 640 (AB 727) Martinez. Education: physical education instruction.

(1) Existing law requires all pupils, except pupils excused or exempted pursuant to a specified statute, to attend upon courses of physical education for a total period of time of not less than 400 minutes each 10 schooldays, or in the case of elementary schools maintaining any of grades 1 to 8, inclusive, 200 minutes each 10 schooldays.

This bill would express the intent of the Legislature that all children shall have access to a high-quality, comprehensive, and developmentally appropriate physical education

program on a regular basis. The bill would impose a state-mandated local program by requiring that not less than 10% of the school districts of the state, as selected by the Superintendent of Public Instruction as specified, report to the Superintendent of Public Instruction in the Coordinated Compliance Review as to the extent of its compliance with the minimum time requirements of physical education instruction during that school year. The bill would require that, for purposes of determining compliance with these provisions, the Superintendent of Public Instruction shall not count the time spent in recesses and the lunch period.

This bill would require a school district that fails to comply with the existing statutory requirements to issue a corrective plan to the State Department of Education within one year of receiving a noncompliance notification from the department.

The bill would not be applicable to high schools.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 641 (AB 777) Prenter. Vehicles: cotton module mover: definition registration: exemption.

(1) Existing law defines a cotton module mover as a motortruck or semitrailer that is equipped with a self-loading bed and is designed and used exclusively to transport field manufactured cotton modules to a cotton gin.

This bill would include within that definition a truck tractor, in combination with a semitrailer, that meets the description specified above.

(2) Existing law exempts cotton module movers from certain vehicle registration requirements.

This bill would require that, in order to maintain the exemption from registration for a truck tractor, in combination with a semitrailer, that has been exempted as a cotton module mover, the owner of that vehicle (a) not operate it during the exemption period in any manner other than as a cotton module mover, (b) register the vehicle with the department before operating it as a commercial motor vehicle, and (c) apply to the department on a yearly basis for any renewal of the exemption from registration. The bill would specify that exemption from registration under these provisions does not exempt a truck tractor, in combination with a semitrailer, operating as a cotton module mover from applicable safety requirements imposed by statute or regulation, as specified. The bill would also specify that truck tractors exempt from registration under these provisions are subject to specified vehicle registration fees imposed under existing law and to any other vehicle fees that are imposed by statute on or after January 1, 1998, and are deposited in the Motor Vehicle Account.

Ch. 642 (AB 839) Thomson. Veterinary medicine.

(1) Existing law vests in the Veterinary Medical Board in the Department of Consumer Affairs the administration of provisions regulating the practice of veterinary medicine.

(2) Existing law prescribes the qualifications of members of the board.

This bill would require the nonpublic members of the board to be veterinarians licensed by the state.

(3) Existing law authorizes the board to require any or all officers of the board to give a bond to the state. Existing law provides that the secretary of the Veterinary Medical Board shall receive expenses and shall not receive a salary for acting in the capacity of secretary.

This bill would delete the above provision that authorizes the board to require officers to give a bond. The bill would delete obsolete references to the secretary of the board.

(4) Existing law provides that a person practices veterinary medicine, surgery, and dentistry, and the various branches thereof, when he or she does certain activities for the

prevention, cure, or relief of a wound, fracture, bodily injury, or disease of animals. Existing law excepts these activities from the practice of veterinary medicine if administered by an animal health technician or an unregistered assistant under designated direction and supervision.

This bill would delete reference to an animal health technician and refer instead to a registered veterinary technician for purposes of this provision.

(5) Existing law makes it a misdemeanor for any person to violate or aid or abet in the violation of the provisions regulating the practice of veterinary medicine and provides for a fine of not less than \$500, nor more than \$2,000 and a minimum 30-day jail sentence.

This bill would make technical nonsubstantive changes to this provision.

(6) Existing law establishes within the jurisdiction of the board, a Registered Veterinary Technician Examining Committee to assist the board in the examination of applicants for veterinary technician registration and in the inspection and approval of schools or institutions offering a curriculum for training registered veterinary technicians and to make various recommendations. The committee consists of 8 members appointed as follows: one public member appointed by the Senate Committee on Rules, one public member appointed by the Speaker of the Assembly, and 6 members appointed by the Governor, 3 licensed veterinarians and 3 registered veterinary technicians. Under existing law, the provisions establishing the committee become inoperative on July 1, 1998, and are repealed January 1, 1999.

This bill would, commencing July 1, 1998, delete the provision establishing the Registered Veterinary Technician Examining Committee. The bill would instead require the board to establish an advisory committee on issues pertaining to the practice of veterinary technicians to be known as the Registered Veterinary Technician Committee and authorize that committee to assist the board, as provided, and make various recommendations.

(7) Existing law establishes the Registered Veterinary Technician Examining Committee Fund, a continuously appropriated fund, that consists of revenue received under the provisions regulating registered veterinary technicians. Existing law also establishes the Veterinary Medical Board Contingent Fund, a continuously appropriated fund, that consists of various fees the board is authorized to collect for purposes of the regulation of veterinarians.

This bill would, commencing July 1, 1998, (a) repeal the provision establishing the Registered Veterinary Technician Examining Committee Fund, (b) require that all unappropriated funds in the Registered Veterinary Technician Examining Committee Fund on July 1, 1998, be transferred to the Veterinary Medical Board Contingent Fund, and (c) require that all funds collected by the board under the provisions regulating registered veterinary technicians be deposited in the Veterinary Medical Board Contingent Fund. By changing the purpose of and increasing the source of moneys in a continuously appropriated fund, this bill would make an appropriation.

(8) Existing law requires that applications for a license be upon a form furnished by the board and accompanied by a diploma from a veterinary college recognized by the board.

This bill would permit the application to be accompanied by a diploma or any other verification of graduation.

(9) Existing law requires the examination for licensure to practice veterinary medicine to consist of a written and practical examination, with certain exceptions for out-of-state applicants. Existing law authorizes the board to waive the examination requirements and issue a license if the applicant meets certain requirements, including that the applicant has graduated from a veterinary college recognized by the board or possesses a certificate issued by the Educational Commission for Foreign Veterinary Graduates of the American Veterinary Medical Association which was issued as prescribed.

This bill would delete reference to the American Veterinary Medical Association for purposes of this provision and would delete the prescriptions related to the basis of issuance of the certificate.

(10) Existing law requires a licensed veterinarian to conspicuously display his or her license at his or her principal place of business. Existing law also requires an applicant

for renewal of a license to specify in his or her application whether he or she has changed the address of his or her place of practice.

This bill would require instead the licensed veterinarian to conspicuously display a copy of his or her license at his or her principal place of business. The bill would instead require that the applicant for renewal of a license specify in the application whether he or she has changed his or her mailing address.

(11) Existing law requires that all premises where veterinary medicine, veterinary dentistry, or veterinary surgery is being practiced be registered with the board. Existing law subjects equipment and drugs on the premises, or any other place, where veterinary medicine, veterinary dentistry, or veterinary surgery is being practiced to inspection by the board.

This bill would apply the above registration requirement and inspection provisions to premises where the various branches of veterinary medicine, veterinary dentistry, or veterinary surgery are being practiced.

(12) Existing law authorizes the board to deny, revoke, or suspend a license or assess a fine for false or misleading advertising having for its purpose or intent deception or fraud and for disciplinary action taken by any public agency for any act substantially related to the practice of veterinary medicine.

This bill would delete the requirement that the false or misleading advertising have for its purpose or intent deception or fraud. The bill would extend the provision relating to disciplinary action taken to apply to any public agency, in any state or territory.

(13) Existing law provides that the maximum fee that the board can establish for veterinarians to file an application for examination is \$325 for the national examination and \$250 for the California state board examination. However, if the provisions establishing the board are repealed under existing law, the maximum fee to file an application for the national examination is \$250.

This bill would revise these fee provisions. The bill would establish the maximum fee to file an application for examination at \$100. The bill would establish a maximum fee of \$325 for the licensing examination and a maximum fee of \$150 for the California state board examination.

By increasing the source of moneys in a continuously appropriated fund, this bill would make an appropriation.

Ch. 643 (AB 875) Takasugi. Community correctional centers.

Existing law authorizes the Director of Corrections to establish and operate community correctional centers to provide housing, supervision, counseling, and other correctional programs for persons committed to the Department of Corrections.

Existing law authorizes the director to enter into an agreement with a city, county, or city and county, to permit transfer of prisoners in the custody of the director to a local correctional facility in which prisoners participate in programs, including work furlough rehabilitation programs. Existing law also authorizes the director to enter into a long-term agreement, not to exceed 20 years, with a city, county, or city and county, to place parole violators and other state inmates in a facility specifically built to house those prisoners.

This bill would authorize the director to enter into a long-term agreement, not to exceed 20 years, for transfer of prisoners to, or placement of prisoners in, community correctional centers. The bill also would authorize the director to contract for the establishment and operation of community correctional facilities that offer substance abuse treatment programs pursuant to the therapeutic community model, under certain circumstances. The bill would provide for the review and audit of those programs.

Ch. 644 (AB 1020) Firestone. Highways: Bicycle Lane Account.

Existing law requires that \$30,000 be transferred monthly from the Highway Users Tax Account in the Transportation Tax Fund to the Bicycle Lane Account in the State Transportation Fund. Money in that account is continuously appropriated for specified purposes.

This bill would increase the amount required to be transferred to that account to \$1,000,000 during each of the calendar years 1998, 1999, and 2000, \$2,000,000 during each of the calendar years 2001 and 2002, \$3,000,000 during the calendar year 2003, and

\$5,000,000 during the calendar year 2004 and annually thereafter. The bill would thereby make an appropriation by increasing the amount transferred to a continuously appropriated fund.

Ch. 645 (AB 1071) Cardoza. Housing: building standards.

Existing law requires the Department of Housing and Community Development to adopt and submit building standards for approval by the California Building Standards Commission and publication in the California Building Standards Code and to adopt other specified regulations. The standards, rules, and regulations of the department are required to impose substantially similar requirements as are contained in various uniform industry codes, and the department is required to adopt those requirements by reference, with the exception of additions and deletions to them made by the department.

This bill would make technical, nonsubstantive changes to certain of these provisions to conform outdated references in current law.

Existing law requires the Department of Housing and Community Development to notify specified entities of the dates that each of the various uniform codes described in existing law are approved by the California Building Standards Commission.

This bill would, instead, require the department to notify these entities of the dates that each of the uniform codes published by the specific organizations described in existing law are approved by the commission.

Existing law requires the Department of Housing and Community Development, in conjunction with the office of the State Fire Marshal, to report annually to the California Building Standards Commission the modifications and changes made by cities and counties to the building standards published in the California Building Standards Code and to report any more stringent building standards related to fire and panic safety adopted by a city, county, city and county, or fire protection district.

This bill would delete that requirement.

Existing law, which is repealed January 1, 2003, allows the governing body of a city, county, or city and county to adopt an ordinance that allows a building or other structure located on a military base selected for closure to comply with the California Building Standards Code and other provisions of state law regarding liability in relation to fires in a graduated manner over a period of no more than 3 years if certain conditions including, among other things, that the use of the building or structure is not hazardous to life safety, fire safety, health or sanitation, that the building or other structure has been transferred by the federal government to specified local governmental entities or is under lease between the federal government and any of the specified local governmental entities, and that a compliance plan has been adopted, are met before January 1, 2000.

This bill would include a specified joint powers agency with those specified local governmental entities affected by the bill.

This bill would allow the governing body of a local agency to adopt an ordinance permitting certain buildings or other structures located on military bases, as specified, to comply with specified provisions establishing state building standards and state standards of fire safety, or to any regulations or standards adopted pursuant to state building standards, in a graduated manner over a period of no more than 7 years from the date the property has been transferred by the federal government, provided that specified conditions are met. This provision would be applicable only to a building or other structure for which a local agency adopts a graduated compliance plan, as specified, prior to January 1, 2000. The bill would require the local agency to submit its proposed compliance plan to an engineer, architect, or building inspector for review for compliance with these provisions and to file the approved plan with the California Building Standards Commission. The bill would repeal these provisions on January 1, 2007.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique problems found at the former military bases affected by specified provisions of the bill, a general statute within the meaning of

specified provisions of the California Constitution cannot be made applicable, and that therefore, this bill is necessary.

This bill would provide that its provisions shall only become operative if AB 125 of the 1997-98 Regular Session is enacted and becomes operative, on or before January 1, 1998.

Ch. 646 (AB 1104) Knox. Point-of-sale transactions.

Existing law provides that if the sale of a good or service is conducted at an ATM, the operator of that ATM shall disclose the total price of the good or service and any fee charged solely for ATM usage.

This bill would prohibit the operator of a point-of-sale device, as defined, from imposing any fee upon a customer for usage of the device unless the fee is disclosed prior to the customer being obligated to pay for any goods or services, as specified.

Ch. 647 (AB 1206) Martinez. Education: bilingual education.

(1) Existing law authorizes the offering of bilingual education in those situations when this instruction is educationally advantageous to pupils.

This bill would, notwithstanding any other provision of law, define bilingual education as a system of instruction which builds upon the language skills of a pupil whose primary language is neither English nor derived from English, as defined. The bill would prohibit school districts from utilizing, as part of a bilingual education program, state funds or resources for the purpose of recognition of, or instruction in, any dialect, idiom, or language derived from English, as defined in the bill.

The bill would impose a state-mandated local program by requiring each school district to submit a written report, including specified information relating to the expenditure, as of January 1, 1996, of state funds for the purpose of recognition of, or instruction in, any dialect, idiom, or language derived from English, as specified, on or before June 1, 1998. The bill would require any school district that has utilized state funds for these purposes to restore these funds, as specified, prior to January 1, 1999.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 648 (AB 1306) Granlund. Mental health services.

Existing law requires the State Department of Mental Health to implement mental health managed care services for Medi-Cal beneficiaries.

Existing law requires the department to adopt emergency regulations to implement provisions relating to sanctions that the department may impose under these provisions.

This bill would also permit the department to adopt emergency regulations implementing the payment systems for these mental health managed care services.

Existing law provided that, to the extent permitted by federal law, either the department or a contracting mental health plan may request that contracting negotiations be reopened during the course of a contract due to substantial changes in the cost of covered benefits that result from new legislative requirements affecting the scope of services or the eligible population or due to another unanticipated event.

This bill would limit the grounds for reopening negotiations to an unanticipated event.

This bill would also specify that a mental health plan's obligations may only be changed by contract or contract amendment, and that a change may be made during a contract term or at the time of contract renewal, where there is a change in obligations required by federal or state law or required by a change in the interpretation of federal or state law or regulations.

The bill would also require the department to establish, by regulation, a risk-sharing arrangement between the department and counties that contract to provide mental health managed care services, in order to provide, under specified circumstances, an increase in the state General Fund allocation.

This bill would declare that it would take effect immediately as an urgency statute.

Ch. 649 (AB 1337) Shelley. Medi-Cal.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law contains provisions relating to the use of federally qualified health centers for the provision of services under commercial plans and local initiatives contracting with the department to provide Medi-Cal services.

This bill would permit the State Department of Health Services to establish not more than 2 pilot programs for reimbursement methodologies for federally qualified health centers.

Ch. 650 (AB 1425) Campbell. Highways: environmental mitigation.

Existing law declares the Legislature's intent to annually allocate \$10,000,000 to the Environmental Enhancement and Mitigation Demonstration Program Fund to be used for making grants to local, state, and federal agencies and nonprofit entities that undertake projects to mitigate the adverse environmental effects of existing and future transportation facilities. Funds were appropriated in the Budget Act of 1994 (Ch. 139, Stats. 1994) to the Department of Transportation for this purpose, including the Trabuco Creek Trail Project and the Sierra Azul Resource Lands Project.

This bill would appropriate \$400,000 from that fund to the department for allocation to complete the Trabuco Creek Trail bridge overcrossing of the Foothill Transportation Corridor in Orange County.

The bill would also appropriate \$226,259 from that fund to the department for allocation to the completion of the Sierra Azul Resource Lands Project by the Midpeninsula Regional Open Space District in Santa Clara County.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 651 (AB 1480) Bordonaro. Cattle: sale: slaughterer.

(1) Existing law prohibits the release of cattle from a public stockyard, public salesyard, public cattle sales market, or any other public consignment sale or private auction sale unless they are accompanied by a brand inspection certificate or by a bill of sale or certificate of sale that is issued and signed by a representative of the salesyard, as agents for the consignor.

This bill would require the bill of sale or certificate of sale to be press-numbered.

(2) Existing law prohibits a person from slaughtering any bovine animal unless the person has a slaughterer's license issued by the Bureau of Livestock Identification within the Department of Food and Agriculture. Existing law exempts a mobile slaughter operator who slaughters cattle for the owner of the cattle on the owner's premises from this licensing requirement.

This bill would, instead, require a mobile slaughter operator to register with the bureau as an unlicensed mobile slaughterer. The bill would authorize the Secretary of Food and Agriculture to cancel the registration of any unlicensed mobile slaughterer for failing to comply with specified record-keeping requirements.

(3) Existing law requires every person who is not a licensed slaughterer who slaughters cattle to keep a record of all cattle that he or she slaughters. Existing law prescribes the contents of the record.

This bill would require the record also to include the name and location of the food locker to which the slaughtered animal is, or the slaughtered animals are, delivered for butchering.

(4) Existing law provides for the regulation and licensing of brokers, cash buyers, commission merchants, and dealers of farm products by the department. These licensees, among other things, receive farm products on consignment or sell farm products on commission.

This bill would exempt from those provisions any person engaged in the business of buying or selling cattle who is bonded under the federal Packers and Stockyards Act, 1921.

(5) Existing law prescribes criminal penalties for violations of law concerning cattle protection. By creating new crimes, this bill would impose a state-mandated local program.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 652 (AB 1518) Committee on Transportation. Vehicles: motor carriers of property.

(1) Existing law provides for the regulation of motor carriers of property by the Department of Motor Vehicles. Existing law also provides for the regulation of public utilities, including highway carriers, household goods carriers, and charter-party carriers. Under existing law, the Department of the California Highway Patrol is required to enforce certain of these provisions.

This bill would revise the definitions of "motor carrier of property," "commercial motor vehicle," and related terms for purposes of those provisions. This bill would revise provisions relating to suspension or revocation of a motor carrier's permit by the Department of Motor Vehicles or a carrier's operating authority by the Public Utilities Commission, for failure to maintain described vehicles in a safe operating condition or to enroll all drivers in the required pull notice system. This bill would require motor carriers who contract or subcontract transportation service for other motor carriers to retain certain required records.

(2) Existing law prohibits motor carriers of property from operating a motor vehicle on a public highway unless it registers with the Department of Motor Vehicles, obtains a permit, and obtains and displays carrier identification, as specified.

This bill would revise the requirements applicable to motor carriers regarding obtaining and displaying a carrier identification number issued by the Department of Motor Vehicles, and would prohibit the operation by a motor carrier of property of a commercial motor vehicle on a public highway while his or her permit is suspended. This bill would authorize the Department of the California Highway Patrol to impound a vehicle or combination of vehicles for violation of those requirements. This bill would also prohibit any person from contracting with, or utilizing the services of, a motor carrier of property until that carrier provides certification of compliance with the requirements regarding carrier identification, and would require that person to retain the certification for a specified period of time.

This bill would revise requirements for motor carriers of property to maintain proof of financial responsibility and adequate protection against liability. This bill would also change the additional penalties that may be imposed for violations that result in suspension or revocation of a permit.

This bill would repeal provisions requiring annual allocations to the Commercial Motor Carrier Safety Enforcement Fund, would change the name of that fund, and would make various technical and conforming changes.

(3) Existing law authorizes motor carriers of property to elect to participate in certain uniform rules relating to transport of cargo in accordance with specified provisions of federal law.

This bill would prescribe certain methods for exercising that election, and would authorize carriers to cancel that election.

(4) Under existing law, violations of certain of the provisions relating to motor carriers of property is a misdemeanor.

By changing the definition and expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(5) This bill would incorporate additional changes in Section 16020 of the Vehicle Code proposed by AB 651, to be operative only if AB 651 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 653 (AB 1547) Committee on Consumer Protection, Governmental Efficiency and Economic Development. State government.

(1) Under existing law, specified expenditures made by the Controller from the Unclaimed Property Fund that exceed \$200 are subject to approval by the State Board of Control.

This bill would repeal this provision.

(2) Existing law authorizes the State Board of Control to discharge from accountability any state agency or employee that is required to collect any state taxes, licenses, fees, or money owed to the state for any reason that is due and payable if the moneys are uncollectible or the amount does not justify the cost of collection.

This bill would delete this authority and related provisions and instead authorize the Controller to discharge any state agency or employee from accountability for the collection of taxes, licenses, fees, or money if the debt is uncollectible or the amount of the debt does not justify the cost of its collection. The bill would also authorize a state agency not to collect these moneys if the amount involved is \$250 or less and the amount owed is uncollectible or does not justify the cost of collection.

(3) This bill would also authorize the Controller rather than the State Board of Control to adopt rules and regulations to permit state agencies to retain overpayments made to those agencies where a demand for refund is not made within 6 months after the refund becomes due.

Ch. 654 (AB 1555) Committee on Health. Physicians and surgeons.

(1) Existing law provides for the licensure and regulation of physicians and surgeons by the Medical Board of California. Existing law provides a procedure for physicians who are not citizens but who are legally admitted to the United States and who seek postgraduate study in an approved medical school under which the physicians may participate in the professional activities of the department in the medical school to which they are appointed as guest physicians. Existing law requires a physician applying to be a guest physician to be board eligible, board certified, or the equivalent in his or her basic discipline.

This bill would delete this requirement.

(2) Existing law provides an exemption from licensure for a physician and surgeon, lawfully practicing medicine in another state or country, for practicing medicine in this state at the invitation of the XV FIFA World Cup Organizing Committee or the United States Olympic Committee to provide medical services at designated training sites or events, subject to certain conditions.

This bill would amend this provision to delete the references to the XV FIFA World Cup Organizing Committee.

(3) Existing law authorizes the Division of Licensing of the board to issue a physician and surgeon's certificate to an applicant, based on reciprocity principles, who meets certain requirements, including that the applicant holds an unlimited license as a physician and surgeon in another state that was issued pursuant to certain procedures, and that the applicant has practiced medicine with an unrestricted license in a state or states, in Canada, or as a member of the military or other public agencies.

This bill would amend the requirement that the applicant hold an unlimited license as a physician and surgeon in another state to provide that the unlimited license may also be from a Canadian province. It would amend the provisions requiring that the applicant have practiced medicine with an unrestricted license to instead require the applicant to have held an unrestricted license to practice medicine.

(4) Existing law provides that an applicant who fails to pass the oral examination or any part of the written examination after 2 attempts shall not be eligible to be reexamined until he or she completes additional appropriate medical instruction in a program conducted under the auspices of a medical school.

This bill would also authorize the instruction to be in an approved postgraduate training program.

(5) Existing law establishes certain provisions regarding the practice of telemedicine.

This bill would prohibit construing these provisions to alter the scope of practice of any health care provided or to authorize the delivery of health care services in a setting, or in a manner, not otherwise authorized by law.

This bill would incorporate additional changes in Section 2290.5 of the Business and Professions Code, proposed by SB 922, to be operative only if SB 922 and this bill are both chaptered and become effective January 1, 1998, and this bill is chaptered last.

(6) Existing law prescribes certain fees for the issuance of fictitious name permits, and provides for the deposit of these fees into the State Treasury, to be credited to the Contingent Fund of the Medical Board of California, a continuously appropriated fund.

This bill would provide that the duplicate permit fee shall not exceed the cost of processing, up to a maximum of \$50.

By increasing the source of money to a continuously appropriated fund, this bill would make an appropriation.

Ch. 655 (AB 1556) Committee on Health. Podiatric medicine.

Existing law sets forth the requirements for licensure as a doctor of podiatric medicine, including requirements for a curriculum providing for adequate instruction in certain subjects.

This bill would, effective January 1, 2000, revise the curriculum requirements to, among other things, add instruction in alcoholism and other chemical substance detection, local anesthesia, child abuse detection, human sexuality, geriatric medicine, psychiatric problem detection, and spousal or partner abuse detection.

Existing law requires the Board of Podiatric Medicine to administer a diversion program for the rehabilitation of doctors of podiatric medicine whose competency is impaired due to the abuse of drugs or alcohol. Existing law authorizes the board to establish one or more diversion evaluation committees for purposes of these provisions, establishes criteria for acceptance into the diversion program, prescribes causes for termination from the program, and authorizes the board to charge a fee for participation in the program.

Existing law also requires the Division of Medical Quality of the Medical Board of California to administer a diversion program for physicians and surgeons, under the direction of one or more diversion evaluation committees with prescribed powers.

This bill would repeal the provisions pertaining to a diversion program for doctors of podiatric medicine and require instead that the Board of Podiatric Medicine establish and administer a diversion program for doctors of podiatric medicine in accordance with the provisions for a diversion program for physicians and surgeons.

Ch. 656 (SB 66) Greene. Class size reduction.

(1) Existing law establishes the Class Size Reduction Facilities Funding Program for the purpose of assisting school districts with the facilities-related costs associated with reducing class size in kindergarten and grades 1 to 3, inclusive, pursuant to the Class Size Reduction Program. Existing law provides that any school district that seeks to qualify for funding under the Class Size Reduction Facilities Funding Program and that does not currently qualify for new construction funding under the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (Greene Act) shall complete specified calculations, which include determining the number of available teaching stations.

This bill would repeal, add and repeal the Class Size Reduction Facilities Funding Program in order to preserve the program from repeal January 1, 1998, due to Legislation reorganizing a portion of the Education Code.

(2) Existing law establishes the Class Size Reduction Program to provide funding to school districts and charter schools to reduce class size in kindergarten and grades 1 to 3, inclusive, to not more than 20 pupils per certificated teacher. Existing law appropriates \$771,000,000 to the Superintendent of Public Instruction for the exclusive purpose of allocating funds to school districts pursuant to the Class Size Reduction Program. Existing law establishes the Class Size Reduction Facilities Funding Program for the purpose of assisting school districts and charter schools with the facilities-related costs associated with the implementation of the Class Size Reduction Program. Existing law appropriates \$200,000,000 to the Superintendent of Public Instruction for allocation to school districts for the purposes of the Class Size Reduction Facilities Funding Program.

This bill would require the Superintendent of Public Instruction to certify to the Controller the amount of funds remaining from the \$771,000,000 appropriation that will not be allocated to school districts in the 1996–97 fiscal year for the purposes of the Class Size Reduction Program. The bill would provide that any of the \$771,000,000 appropriation made for the purposes of the Class Size Reduction Program that is not allocated by the Superintendent of Public Instruction to school districts in the 1996–97 fiscal year shall be reappropriated, without regard to fiscal year, to the Superintendent of Public Instruction for allocation to school districts for the purposes of the Class Size Reduction Facilities Funding Program.

This bill would require a school district to already have on file an existing application or to file a new or amended application for the Class Size Reduction Facilities Funding Program by a date specified by the Superintendent of Public Instruction, in order to be eligible to receive any funds reappropriated by this act, and would limit any new or amended application to new classes established during the 1996–97 fiscal year for class-size reduction, as specified.

This bill would require the Superintendent of Public Instruction to apportion to applicant school districts the funds reappropriated pursuant to this act first for all existing, amended, and new applications for reducing class size in grade 1, then for all existing, amended, and new applications for reducing class size in grade 2, then for all existing applications for reducing class size in kindergarten or grade 3, and finally for all amended and new applications for reducing class size in kindergarten or grade 3.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 657 (SB 89) Hayden. Transportation: Los Angeles County Metropolitan Transportation Authority: members: employees: recordable injuries.

(1) Existing law requires the Los Angeles County Metropolitan Transportation Authority to adopt an ordinance, as specified, regulating the making of gifts to members and designated employees of the authority.

This bill would impose limitations on the making of contributions of over \$10 in value or amount to members, alternate members, and employees of the authority, and their immediate families, by any construction company, engineering firm, consultant, legal firm, or any company, vendor, or business entity seeking a contract with the authority, and on the acceptance, solicitation, or direction of those contributions by a member, alternate member, employee, or any member of their immediate families. The bill would also impose limitations on making or participating in contracts by a member, alternate member, or employee who had knowingly accepted a contribution of over \$10 in value or amount from a participant in the contract.

The bill would prohibit a specified former member, alternate member, or employee of the authority, for a period of 3 years after leaving the authority, from accepting employment with any company, vendor, or business entity that was awarded a contract as a result of the individual's participation, evaluation, award, or implementation of that contract.

(2) Under existing law, the authority may contract with any person upon the terms and conditions that the authority finds to be in its best interest.

This bill would require a construction firm that contracts with the authority to report total recordable injuries, as defined, to the authority on a monthly basis. The bill would require the authority to annually determine if the number of recordable injuries reported to the authority during the preceding calendar year exceeded the national average of similar injuries as reported by the Bureau of Labor Statistics for the most recent published year. The bill would, if the authority determines that the number of recordable injuries reported to the authority during the preceding calendar year exceeded the national average, prohibit the authority from basing any authority safety bonus program for contractors on injuries that result in lost time and would require the authority to base that program on the overall rate of recordable injuries.

Ch. 658 (SB 291) Committee on Appropriations. Judgments and settlement claims against the state: appropriation.

(1) Existing law requires the Attorney General to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state.

This bill would appropriate \$525,000 from the Property Acquisition Law Account in the General Fund, as scheduled, to the Attorney General to pay judgments and settlement claims. The bill would appropriate \$1,930,261 from the General Fund, as scheduled, to the Attorney General, to pay attorney fees, including interest, as specified.

(2) Existing law authorizes public entities to pay punitive damages on behalf of employees or former employees it has defended in specified types of actions arising out of their employment with the entity, under certain circumstances.

This bill would authorize the Department of Corrections to pay \$10,564 from specified funds appropriated to the department in the Budget Act of 1997 to satisfy the judgment, including interest, for punitive damages in a specified court decision.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 659 (SB 368) Peace. Energy resources: federal oil overcharge funds.

Under existing law, funds in the Petroleum Violation Escrow Account, as defined in federal law, consisting of federal oil overcharge funds, have been disbursed to this state by the federal government and deposited in the Federal Trust Fund in the State Treasury, a continuously appropriated fund.

This bill would appropriate \$32,646,000 of those funds to designated agencies for specified projects, to be disbursed by the Controller subject to approval by the Director of Finance as to which court judgment or federal agency order is the proper source of the funds.

Ch. 660 (SB 417) Burton. Vessels.

(1) Existing law declares that the maritime industry is necessary for the continued economic well-being and cultural development of all California citizens and also declares the need for pilot regulations and licensing.

This bill would further declare that the physical safety and well-being of pilots is important for providing required pilot services.

(2) Under existing law, the Board of Pilot Commissioners for the Bays of San Francisco, San Pablo, and Suisun is comprised of 7 members who are responsible for making and enforcing rules and regulations for the regulation of pilots. Existing law provides that five of those board members shall be a resident of one of the following counties: San Francisco, Alameda, Contra Costa, Marin, Sacramento, San Mateo, Santa Clara, Solano, San Joaquin, Napa, Sonoma, or Yolo.

This bill would add the Counties of Mendocino, Monterey, and Santa Cruz to the above list.

(3) Existing law authorizes the board to appoint an executive director to perform various duties, including assisting the board with investigation of navigational incidents.

This bill would provide that whenever safety violations concerning pilot hoists or pilot ladders are suspected and reported, the executive director shall assign a commission investigator to inspect the equipment. The bill would require the commission investigator to report preliminary conclusions to the executive director within 24 hours and to submit a written report to the board, as specified. The bill would require the board to consider the commission investigator's findings at its next monthly meeting and file its own findings and recommendations with the United States Coast Guard.

(4) Under existing law, the board is required to revoke or suspend the license of a pilot or inland pilot if it finds, after hearing, that the pilot or inland pilot is guilty of any misconduct. The order of suspension is required to be entered of record in the minutes of the board by the secretary.

This bill would require the order to be entered by the administrative assistant/secretary.

(5) Existing law continuously appropriates the funds in the Board of Pilot Commissioners' Special Fund for the payment of the compensation and expenses of the board, its officers and employees, and training programs.

By imposing the duties described in (3), the bill would make an appropriation.

Ch. 661 (SB 492) Rosenthal. State agencies and regulatory boards: Internet.

Existing law requires various state agencies to make information available to the public, as specified.

This bill would require certain specified entities within the Department of Consumer Affairs and the Department of Real Estate, on or before January 1, 1999, to provide information, excluding personal information, on the Internet relative to the status of every license issued by the entity, including information relative to suspensions and revocations of licenses issued by the state agency or regulatory board and other related enforcement action taken against persons, businesses, or facilities subject to licensure or regulation by a state agency or regulatory board, as specified.

Ch. 662 (SB 550) O'Connell. Education.

(1) Existing law provides for the calculation of the base revenue limit for newly organized school districts in accordance with a prescribed procedure.

This bill would require that, with respect to a school district that unifies effective July 1, 1997, and that has an average daily attendance in the 1996-97 fiscal year of more than 1,500 units, this calculation include a calculation based on the equalization adjustment amounts of the component districts of the newly unified district for the 1996-97 fiscal year. The bill would provide that these equalization adjustment amounts be derived from calculations made pursuant to specified statutes.

(2) Existing law provides funding to school districts to reduce class size in kindergarten and grades 1 to 3, inclusive, to no more than 20 pupils per certificated teacher. Existing law requires that the class size reduction program be implemented at each schoolsite according to specified priorities that require, among other things, the class size of grade 1 to be reduced if only one grade level is reduced at a schoolsite.

This bill would authorize, until July 1, 1999, as specified, the Nevada City School District and the Templeton Unified School District to implement a program to reduce class size in 3 grade levels at a schoolsite that exclusively enrolls pupils in kindergarten and grades 1 and 2 and, in addition, reduce class size in grade 3 at a schoolsite that exclusively enrolls pupils in grades 3 to 5, inclusive, as specified.

This bill would make a declaration of special circumstances in that regard.

Ch. 663 (SB 628) Kopp. Elders and dependent adults: conservatorships.

Under existing law, a conservatorship of the person of a nonresident has the same powers and duties as a conservator of the person of a resident while the nonresident is in this state. A conservator of the estate of a nonresident has the same powers with respect to the property of the nonresident within the state as a conservator of the estate of a resident.

This bill would, until January 1, 2001, prohibit establishing a conservatorship of the person in this state if the person is a nonresident and a conservatorship has been established or a protective order issued in another state with respect to that person, or a proceeding to establish a conservatorship or obtain a protective order is pending in another state with respect to that person, except as specified.

Existing law defines abuse of an elder or dependent adult.

This bill would add abduction, as defined, to the definition of abuse of an elder or dependent adult.

Existing law imposes liability for the physical or fiduciary abuse or neglect of an elder or dependent adult.

This bill would impose liability for damages, costs, and attorney's fees for the abduction of an elder or dependent adult and would define the scope of that liability.

Existing law provides that the department of the superior court having jurisdiction over probate conservatorships shall also have concurrent jurisdiction over civil actions and proceedings involving a claim for relief arising out of the abuse of an elderly or dependent adult, if a conservator has been appointed for plaintiff prior to the initiation of the action for abuse.

This bill would include civil actions and proceedings involving a claim for relief arising out of an abduction of an elderly or dependent adult within the scope of the jurisdiction of that court.

Ch. 664 (SB 657) Sher. Hazardous materials: businesses inventory.

(1) Existing law requires businesses handling specified amounts of hazardous materials to submit an inventory and a business plan to administering agencies. The

business is required to annually submit a completed inventory form to the administering agency of the county or city in which the business is located. The Office of Emergency Services is required, in consultation with administering agencies, to adopt, by regulation, a single comprehensive hazardous material reporting form for businesses to submit to administering agencies for purposes of reporting hazardous material inventories and each administering agency is required to adopt this form. A knowing violation of those reporting requirements, after reasonable notice of the violation, is a misdemeanor.

This bill would define the term "certification statement" and would allow an administering agency to permit a business to submit a form designated by the administering agency for purposes of the hazardous materials inventory instead of that hazardous material reporting form. However, the bill would require an administering agency to accept the reporting form if a business chooses to submit the form, thereby imposing a state-mandated local program by imposing new duties upon local agencies.

The bill would allow a business to annually submit to the administering agency, instead of the annual inventory, a certification statement, if the business meets specified requirements. Since a knowing violation of the certification requirements would be a crime, the bill would impose a state-mandated local program by creating a new crime.

(2) The term "business" is defined as including the federal government, as specified, or any agency, department, office, board, commission, or bureau of state government, including, but not limited to, the campuses of the California Community Colleges, the California State University, and the University of California.

This bill would delete obsolete provisions with regard to that definition of "business."

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 665 (SB 719) Johnston. Health coverage: continuation of coverage.

(1) Existing law provides for the regulation of health care service plans by the Commissioner of Corporations, and of policies of disability insurance by the Insurance Commissioner.

Existing law also requires certain group plans and policies to provide for conversion benefits. Existing federal law, added by the Consolidated Omnibus Budget Reconciliation Act of 1985, and known as COBRA, requires that certain employers provide former employees with continuation of benefits.

This bill would enact the California Continuation Benefits Replacement Act (Cal-COBRA) that would require every group health care service plan contract and group disability insurance contract or policy providing specified coverage to employers with 2 to 19 eligible employees to offer continuation coverage to a qualified beneficiary under the contract upon a qualifying event without evidence of insurability. The qualified beneficiary would, upon election, be able to continue his or her group benefit plan, subject to the contract's terms and conditions, and subject to the requirements of the bill. The bill would limit premiums to a percentage of the rate charged to a covered employee.

The bill would exclude certain individuals including those who are subject to specified federal laws. This bill would require disclosure of this coverage to employees.

(2) Existing law requires health care service plan contracts and disability insurance policies issued, amended, delivered, or renewed in this state on or after January 1, 1996, that provide hospital, medical, or surgical expense coverage under the plan of an employer subject to COBRA, to offer the opportunity to continue coverage after COBRA coverage ends to former employees of the employer who worked for the employer for at least 5 years and who were at least 60 years of age on the date employment ended and to the spouses and former spouses of employees or former employees, as specified. This continuation coverage automatically terminates under certain conditions.

This bill, with respect to an employer plan which must offer Cal-COBRA coverage, would require health care service plan contracts and disability insurance policies to offer the opportunity to continue coverage after Cal-COBRA coverage ends to former

employees and spouses of employees or former employees under the same conditions applicable to COBRA continuation coverage.

These provisions would become operative on January 1, 1999.

(3) Since a violation of these provisions by a health care service plan would be a crime, the bill would impose a state-mandated local program by expanding the definition of a crime.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 666 (SB 810) Johnson. Boating.

(1) Existing law prohibits the operation of motorboats, as defined, in or upon the inland waters of this state that exceed specified noise levels, requires the exhaust of motorboats to be effectively muffled as necessary to comply with that noise level requirement, and prohibits the sale of internal combustion engines for use on motorboats that exceed specified noise levels.

This bill would, instead, make those provisions applicable to motorized recreational vessels.

(2) Existing law makes a violation of certain regulations of the Department of Boating and Waterways relating to the rules of the road and pilot rules a misdemeanor.

This bill would make a violation of those regulations relating to vessel equipment requirements an infraction punishable by a fine of not more than \$250.

(3) Existing law authorizes a traffic hearing officer to hear and dispose of any case in which a minor under the age of 18 years on the date of the offense is charged with specified crimes, including a violation of the registration provisions of the Harbors and Navigation Code.

This bill would, instead, authorize a traffic hearing officer to hear and dispose of any case in which a minor under the age of 18 years on the date of the offense is charged with a violation of the registration provisions of the Vehicle Code.

(4) Because the bill would change the definition and punishment of crimes, the bill would impose a state-mandated local program.

(5) This bill would incorporate additional changes to Section 668 of the Harbors and Navigation Code proposed by SB 347 and SB 545, to be operative only if all 3 bills, or a combination thereof, are enacted and become operative on or before January 1, 1998, and this bill is enacted last.

The bill would incorporate additional changes to Section 256 of the Welfare and Institutions Code proposed by AB 1105, to be operative only if this bill and AB 1105 are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 667 (SB 812) Hayden. Vehicles: commercial weight fees: license fees: exemptions.

Existing law imposes specified license fees and weight fees on vehicles and commercial vehicles, as defined, and exempts specified vehicles from those fees, including, among others, any vehicle purchased with federal funds under the authority of specified provisions of federal law for the purpose of providing specialized transportation services to senior citizens and handicapped persons by public and private nonprofit operators of specialized transportation service agencies.

This bill would, additionally, exempt from the specified license and weight fees any vehicle operated solely for the purpose of providing specialized transportation services to senior citizens and persons with disabilities, by a nonprofit, public benefit consolidated transportation service agency designated under a specified provision of existing law. The

bill would prohibit that license fee exemption from applying to more than 600 vehicles at any given time.

Ch. 668 (SB 894) Lee. Postsecondary education: Cal Grant awards.

Existing law establishes the Cal Grant Program, a state educational opportunity grant program that is based upon the financial need of the applicant. Existing law authorizes the Student Aid Commission, under that program, to increase the amount of award for one academic year for students who accelerate college attendance, proportional to the period of additional attendance resulting from attendance at a summer term, session, or quarter.

This bill, instead, would require the commission, commencing in 1999, to increase the amount of award proportional to the period of additional attendance resulting from attendance in classes that fulfill requirements or electives for graduation during summer terms, sessions, or quarters.

The bill would require the commission to notify Cal Grant award recipients of the availability of funding for the summer term, session, or quarter, as specified.

The bill also would make technical, nonsubstantive changes.

Ch. 669 (SB 921) M. Thompson. County health services.

Existing law provides, until January 1, 1998, that the board of supervisors of a county that contracted with the State Department of Health Services pursuant to a specified provision of law during the 1990–91 fiscal year and any county with a population under 300,000, as determined in accordance with the 1990 decennial census, by adopting a resolution to that effect, may elect to participate in the County Medical Services Program for state administration of health care services to eligible persons in the county.

Existing law would revise the procedures for county participation in that program on January 1, 1998.

This bill would delay, until January 1, 2003, the repeal date of the existing procedures counties are required to follow to participate in the program and the operative date of the revised participation requirements.

Existing law, until January 1, 1998, specifies the amount that each county must pay the department in order to participate in the program.

This bill would extend the duration of these provisions until January 1, 2003, but would provide that the amount that a county must pay as a condition of participation would be either the amount provided for under existing law or an amount specified by the County Medical Services Program Governing Board.

Existing law provides for the allocation of sales tax revenues deposited into the Local Revenue Fund, a continuously appropriated fund, to local agencies for various welfare programs, including deposits from the Health Subaccount of the Sales Tax Account of the Local Revenue Fund to the local health and welfare trust fund health account required to be established by each county.

Existing law requires that, in accordance with a specified schedule, the Controller allocate moneys to each county, city, or city and county, as general purpose revenues, from the Vehicle License Fee Account of the Local Revenue Fund.

This bill would change the formula for the allocation of those moneys.

Ch. 670 (SB 951) Johnson. Peace officers: Franchise Tax Board.

(1) Existing law provides that specified state employees, including, among others, employees of the Division of Investigation of the Department of Consumer Affairs, designated employees of the Department of Motor Vehicles, investigators of the State Departments of Health Services and Mental Health, and investigators of the office of the Controller, are peace officers whose authority extends to any place in the state for the purpose of performing their primary duty or when making an arrest.

This bill would provide that designated employees of the Franchise Tax Board are peace officers, provided that the primary duty of these peace officers is the enforcement of specified provisions of the Revenue and Taxation Code.

(2) The Public Employees' Retirement Law provides increased benefits and higher contribution rates for peace officer/firefighter members than those provided for state miscellaneous members. The state's employer contributions to the Public Employees'

Retirement Fund are appropriated from the General Fund and other funds in the state treasury.

Since this bill would provide that designated employees of the Franchise Tax Board are peace officers, thereby including these employees within the category of peace officer/firefighter members, it would make an appropriation from the General Fund by increasing the state's contributions to the Public Employees' Retirement Fund for these new state peace officer/firefighter members.

(3) This bill would incorporate additional changes in Section 830.3 of the Penal Code proposed by SB 826, to be operative if SB 826 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

Ch. 671 (SB 999) Maddy. Escheat claims.

Existing law provides for the escheat of property to the state. Existing law requires all property, that escheats to the state, except permanently escheated property, to be deposited, as specified, in the Unclaimed Property Fund, which is continuously appropriated for specified purposes. Existing law establishes procedures for submitting a claim for property that has escheated. Existing law requires the Attorney General to commence actions to have title to escheated property permanently transferred to the state.

This bill would provide that a named beneficiary of property that escheats or a blood relative of the beneficiary may claim, for payment, as specified, property that has been adjudged to belong to the state within 5 years after entry of that judgment, except as specified. By authorizing additional claims against the Unclaimed Property Fund, this bill would create an appropriation.

Ch. 672 (SB 1066) Sher. Solid waste: market development.

(1) Existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, establishes an integrated waste management program. The act requires each city and each county to develop a source reduction and recycling element that includes an implementation schedule that shows how the city or county will divert 25% of all solid waste from landfill or transformation facilities by January 1, 1995, and 50% by January 1, 2000, through source reduction, recycling, and composting activities.

The act authorizes the board to grant a one-year time extension from those diversion requirements, subject to specified conditions, including that the board makes a specified finding of adverse market conditions.

This bill would instead authorize one or more single or multiyear time extensions from the diversion requirements if the city or county makes specified demonstrations to the board.

The bill would require the board in making a decision to grant an alternative source reduction, recycling, and composting requirement to consider specified circumstances.

(2) Existing law requires the board to develop a comprehensive market development plan using existing resources, that will stimulate market demand in the state for postconsumer waste material and secondary waste material generated in the state, including specified goals.

This bill would require the plan to also include efforts to encourage and promote cooperative, regional programs to expand markets for recycled materials, including activities to address problems and opportunities that are unique to rural, urban, and suburban areas of the state.

The bill would require the board to develop a plan, using existing resources, to provide assistance to local agencies when requested, in the implementation of cost-effective programs that provide a quality supply of recycled materials for markets. The bill would also authorize the board to develop a program to increase the use of compost products in agricultural applications, as prescribed.

The bill would require the board, the Trade and Commerce Agency, and the Treasurer to coordinate activities that will leverage financing for market development projects and encourage joint activities to strengthen markets for recycled materials.

The bill would require the board to assist market development efforts by the board, local agencies, and the private sector, to use existing data resources collected from

recycling, composting, and disposal facilities, or from other sources, and to provide periodic information on the recovery and availability of recycled materials.

The bill would require the board, not later than September 1, 1998, to submit a report to the Governor and the Legislature that details specified matters regarding regulations and procedures concerning recycling by state agencies.

The bill would make related legislative findings and declarations.

Ch. 673 (SB 1094) Schiff. Medicine: employment of physicians and surgeons.

Existing law governing the licensure of clinics prohibits the operation of a clinic without a license from the State Department of Health Services. Existing law provides certain exceptions to this requirement for, among other things, a clinic operated by a nonprofit corporation that conducts medical research and health education and provides health care through a group of 40 or more physicians who are independent contractors and meet other prescribed requirements. Existing law, the Medical Practice Act, also establishes certain restrictions regarding the employment of licensed physicians and surgeons and podiatrists by a corporation or other artificial legal entity.

This bill would provide an exception to the licensure requirement for a clinic that is a nonprofit corporation, as described, and satisfies prescribed requirements regarding medical research and the receipt of charitable contributions and bequests. The bill would also amend the Medical Practice Act to provide an exemption for this type of clinic from the restrictions on the employment of licensed physicians and surgeons and podiatrists by corporations provided that the clinic does not interfere with, control, or otherwise direct a physician and surgeon's professional judgment.

This bill would also require this type of clinic and any other interested party to make a report to the Legislature and it would also provide that the above-described exception to the licensure requirement would remain operative only until January 1, 2003.

Ch. 674 (SB 1141) Johnson. Workers' compensation: individually identifiable information.

Existing law requires the Administrative Director of the Division of Workers' Compensation, in consultation with the Insurance Commissioner, to develop a workers' compensation information system to perform certain specified functions.

This bill would prohibit any person or public or private entity not a party to a workers' compensation claim from obtaining individually identifiable information, as defined, obtained or maintained by the Division of Workers' Compensation, except as expressly permitted under specified provisions. The bill would also require the administrative director to adopt regulations governing access to this information by certain divisions of the Department of Industrial Relations, and by other persons or public or private entities for the purpose of bona fide statistical research, and would provide that these provisions shall not operate to exempt from disclosure any information that is considered to be a public record contained in an individual's file once an application for adjudication has been filed. The bill would also provide that these provisions shall not operate to restrict access to information by any law enforcement agency or district attorney's office or to limit admissibility in any criminal proceeding.

This bill, in addition, would declare that it is unlawful for any person who has received individually identifiable information pursuant to these provisions to provide that information to any person who is not entitled to it.

Ch. 675 (SB 1268) Kelley. Water corporations: public water system: acquisition.

Existing law provides that water corporations, as defined, are public utilities subject to regulation by the Public Utilities Commission, including the commission's approval of rates charged by water corporations. In regulating these rates, the commission is authorized to consider the value of the public utility.

This bill would require the Public Utilities Commission to, for ratesetting and all other purposes within the commission's jurisdiction, use the standard of fair market value when establishing the rate base value for the distribution system of a public water system, as defined, acquired by a water corporation. If the fair market value exceeds reproduction cost, determined in accordance with existing law, the commission would be permitted to include the difference in the rate base for ratesetting purposes if it finds that the

additional amounts are fair and reasonable. This bill would set forth specified criteria that the commission must consider in making the determination as to whether this amount is fair and reasonable. The bill also would make its provisions applicable to the acquisition of a sewer system by a sewer system corporation.

Existing law sets forth procedures by which a municipal corporation may lease, sell, or transfer a public utility owned and operated by it for furnishing water service.

This bill would require the municipal corporation, public agency, or public utility water corporation proposing to acquire a municipal corporation public utility for furnishing water service to disclose to the customers of the public water system to be acquired, a written statement of the price, terms, charges, savings, and added costs of the proposed acquisition.

Ch. 676 (SB 1299) Watson. Medi-Cal.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law provides for the membership of the separate public agency established by the Los Angeles County Board of Supervisors for the operation of a local initiative for health care in that county, and specifies that one member of the commission shall be a representative of federally qualified health centers, who shall be nominated by an entity or group recognized by the board of supervisors as representing federally qualified health centers.

This bill would specify that that member shall be representative of federally qualified health centers, or if that status no longer exists, an equivalent group of health centers.

Ch. 677 (SB 1347) Committee on Business and Professions. Healing arts.

(1) Existing law establishes certain educational and examination requirements for persons who hold themselves out as perfusionists. Existing law provides that the performance of certain procedures are included in the definition of perfusion services, and provides that this does not exempt perfusionists from the requirements of the Clinical Laboratory Improvement Amendments Act of 1988 (CLIA), or from the nonpersonnel related requirements of state laws governing the practice of clinical laboratory technology.

This bill would delete the reference to CLIA, and would refer to all of the state laws governing the practice of clinical laboratory technology.

Existing law provides that a person may be deemed to have completed the examination and education requirements if, among other things, he or she has performed at least 40 cases of cardiopulmonary bypass during cardiopulmonary surgery in a licensed health facility.

This bill would require the cardiopulmonary bypass procedures to be performed during cardiac surgery.

Existing law provides that after completion of an approved perfusion training program, and until notification of passage of the entire examination, that person shall identify himself or herself only as a "graduate perfusionist."

This bill would provide that use of the title "graduate perfusionist" is valid for no more than 3 years from the date of completion of the approved training program. The bill would make other technical changes.

(2) Existing law provides for the licensure and regulation of the practice of optometry by the State Board of Optometry. Existing law provides that the use or consumption of alcoholic beverages by a licensee to the extent or in a manner as to be dangerous or injurious to the person, or any other person, or the public, constitutes unprofessional conduct.

This bill would amend this to also apply it to the use or consumption of narcotic drugs. Since a violation of this provision would be subject to criminal sanction, this bill would impose a state-mandated local program by changing the definition of a crime.

Existing law also provides that the conviction of the certificate holder of more than one misdemeanor or any felony involving the use or consumption of alcoholic beverages constitutes unprofessional conduct.

This bill would delete this provision.

Existing law authorizes the board to establish a system for the issuance of citations, and the assessment of administrative fines, as deemed appropriate by the board where a licensee is in violation of specified provisions. Existing law requires the citation system to include prescribed provisions regarding the amount of the fines and the right to a hearing.

This bill would delete the requirement that the citation system contain the prescribed provisions, and would instead require the citation system to be as deemed appropriate by the board, and in accordance with provisions of existing law that establish a citation system for other healing arts professions.

(3) Existing law regulates the practice of occupational therapy and physical therapy and prohibits certain false or misleading statements.

This bill would prohibit any person who does not meet certain requirements from representing himself or herself as a recreation therapist or recreation therapy assistant, or from representing that the services are recreational therapy or are related to recreational therapy. The bill would prohibit a person not meeting those standards from using specified words and abbreviations in connection with his or her services, name, or place of business.

A person who violates these provisions would be subject to civil suit for \$1,500 for the first violation, to be recovered by the person injured by the violation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 678 (AB 640) Aguiar. High school academies: Juvenile Crime Reduction and Education Academy Pilot Project.

(1) Existing law authorizes county superintendents of schools, with the approval of the county board of education and board of supervisors, to establish and maintain classes or schools for prisoners in any county jail, county honor farm, or any county industrial farm or county or joint county road camp. Existing law provides for the issuance of diplomas or certificates by, and the provision of funding for, these classes or schools.

This bill would authorize the county superintendent of schools, with the approval of the county board of education and board of supervisors, to establish and maintain classes or schools for at-risk pupils, as defined, in any high school academy in San Bernardino County. The bill would define a high school academy to mean a school, not located within a correctional facility, that is established to service at-risk pupils. The bill would authorize the issuance of diplomas or certificates by high school academies and would provide for the funding of high school academies, as specified.

The bill would make these provisions inoperative on July 1, 2000, and would provide for their repeal on January 1, 2001.

(2) Existing law sets forth the powers and duties of the Board of Corrections, the Department of the Youth Authority, the juvenile courts, and local law enforcement authorities, including county sheriffs and probation officers.

This bill would authorize the San Bernardino County Sheriff's Department, in conjunction with certain city and county officers and agencies, and other interested organizations, to conduct a pilot project to be known as the Juvenile Crime Reduction and Education Academy Pilot Project, for the purpose of reducing juvenile crime and delinquency, as described.

This bill would provide that the pilot project shall operate for one year from the date of the first instructional day. The bill would provide for the pilot project to be evaluated through an independent assessment conducted as specified. The bill would specify the goals that must be equaled or exceeded for the pilot project to be deemed successful.

This bill would make these provisions inoperative on July 1, 2000, and would provide for their repeal on January 1, 2001.

Ch. 679 (AB 1105) Hertzberg. Juvenile hearing officers.

Existing law sets forth a comprehensive body of law governing proceedings in the juvenile court concerning delinquent minors. Existing law also specifies the powers and

duties of traffic hearing officers for purposes of those provisions. Existing law provides that traffic hearing officers may hear and dispose of any case in which a minor is alleged to have committed specified misdemeanors and any infraction.

This bill would delete references to traffic hearing officers and instead provide for the appointment and powers of juvenile hearing officers, as specified. The bill also would provide that a juvenile court would be known as the Informal Juvenile and Traffic Court when a juvenile hearing officer hears a case pursuant to these provisions.

Existing law provides that where a petition has been filed in juvenile court alleging that a minor has engaged in criminal conduct, notice of hearing and a copy of the petition shall be served, as specified.

The bill would create the Expedited Youth Accountability Program to be operative in Los Angeles County, and in other counties upon approval of the board of supervisors, as specified. The program would provide for the issuance of citations requiring the appearance of minors not detained for any felony or misdemeanor offense, and not cited to the Informal Juvenile and Traffic Court, before the juvenile court. It would require participating counties to establish deadlines that would ensure that a case brought pursuant to these provisions would be heard within 60 calendar days after the minor is cited. The citation would include a detailed description of the person and a written promise by that person to appear or a notice to appear, as specified. It also would require the issuance of such a citation to the parent or guardian of a minor. Failure to appear would be a misdemeanor. Because the bill would both establish a new crime and expand the definition of a crime by requiring specified statements to be made under penalty of perjury as well as impose new duties on local juvenile justice systems similar to those imposed by the creation of a new crime, it would establish a state-mandated local program.

This bill would incorporate additional changes to Section 256 of the Welfare and Institutions Code proposed by SB 810, to be operative only if this bill and SB 810 are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 680 (AB 1275) Baca. Parole: Law Enforcement Automated Data System (LEADS).

Existing law provides for the Department of Corrections to establish a pilot project in San Bernardino County to provide specified information regarding parolees to local law enforcement agencies via computer-to-computer transfer.

This bill would make this program available statewide and would include a digitized image of the photograph and at least a single digit fingerprint of a parolee and a geographic coordinate for the parolee's residence location within the list of information on parolees provided by the Department of Corrections to local law enforcement agencies.

The bill would generally provide that the Department of Corrections shall be the agency primarily responsible for the implementation of the program for the release of information regarding parolees, but that the Department of Justice shall be the agency primarily responsible for the release of information that relates to fingerprint cards. The bill would also provide that funding to implement the program is contingent upon the appropriation of funds for this purpose in the annual Budget Act.

Ch. 681 (AB 1423) Martinez. Hotels and motels: telephone charges: notice.

Existing law requires a telephone corporation, as part of an agreement with a nonpublic utility provider of telephone services that is a hotel, motel, hospital, university, or similar place of temporary accommodation, to require the display or posting, on or near the telephone equipment so as to be easily seen by telephone users, of a notice of the charges applicable to all of the available telephone services, as specified.

This bill would instead require every nonpublic utility provider of telephone services to display or post on or near the telephone equipment, so as to be easily seen by telephone

users, a notice of the charges applicable to all of the available telephone services. It would require the charges to be separately stated and include specified information.

Existing law imposes misdemeanor penalties upon any person who, acting individually or as an officer, agent, or employee of a corporation other than a public utility, violates the public utilities act. By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 682 (AB 1433) Olberg. California Community Colleges: resident classification.

Existing law establishes uniform student residency requirements for purposes of ascertaining the amount of fees to be paid by students who attend the California Community Colleges. Existing law, which is to be repealed on January 1, 2000, entitles a student who is a member of the armed forces of the United States stationed in this state on active duty, except a member of the armed forces assigned for educational purposes to state-supported institutions of higher education, to resident classification at any campus of the California Community Colleges.

This bill would continue that existing law beyond January 1, 2000, by deleting the repeal date.

Ch. 683 (AB 1537) Machado. School facilities: training of inspectors.

Existing law requires the Department of General Services to inspect construction of school facilities, as specified. Existing law requires the school district, city, city and county, or the political subdivision within the jurisdiction of which any school building is constructed or altered to provide for and require competent, adequate, and continuous inspection during construction or alteration. Existing law requires that the inspector be satisfactory to the architect or structural engineer and the Department of General Services. Existing law requires the inspector to act under the direction of the architect or structural engineer, as the board may direct, and to be responsible to the governing board.

This bill would require the Department of General Services to evaluate and provide training for inspectors as specified. This bill would require the inspector to act under the direction of the governing board and the architect or structural engineer, as the board may direct. This bill would require the inspector to be responsible to the governing board for employment purposes, and to be responsible to the Department of General Services for enforcement of the plans and specifications of the school project. This bill would permit the Department of General Services to charge a fee for the evaluation or reevaluation, as specified, and a fee for the examination administered in an evaluation or reevaluation, as specified, which fees would be deposited in the Public School Planning, Design, and Construction Review Revolving Fund, a continuously appropriated fund, thereby making an appropriation.

Ch. 684 (SB 136) Costa. Crimes: gassing.

(1) Under existing law, every person confined in a state prison who commits battery upon the person of any individual who is not confined in the prison is guilty of a felony and shall be imprisoned in the state prison for 2, 3, or 4 years, to be served consecutively.

This bill would do the following until January 1, 2001:

(a) Require the sheriff or other person in charge of a local correctional facility to refer all reports of battery by gassing by persons confined in the local correctional facility to the local district attorney for prosecution.

(b) Require the sheriff or other person in charge of a local correctional facility to use every available means to immediately investigate all reported or suspected batteries by gassing by persons confined in the local correctional facility.

(c) Authorize the chief medical officer of the local correctional facility, when he or she deems it medically necessary to protect the health of an officer or employee who may

have been subject to a battery by gassing, to order the person who committed the battery to receive an examination or test for hepatitis and tuberculosis, as specified.

(d) Authorize the chief medical officer of the local correctional facility to provide the results of any examination or test to the officer or employee who was the target of the battery.

(e) Require the sheriff or other person in charge of a local correctional facility to report to the Board of Corrections information about each gassing incident in the local correctional facility.

By imposing new duties on the sheriff or other person in charge of a local correctional facility with respect to battery by gassing by persons confined in the local correctional facility, this bill would impose a state-mandated local program.

The bill also would require the Board of Corrections to report to the Legislature by January 1, 2000, its findings and recommendations on gassing incidents at local correctional facilities and the medical testing authorized by this bill.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 685 (SB 458) Peace. State agencies: mail: disclosure of personal information.

Existing law provides for the conduct and operation of state agencies.

This bill would prohibit a state agency, including the California State University, from sending any outgoing United States mail, as described, to an individual that contains personal information about that individual unless the personal information is contained within sealed correspondence and cannot be viewed from the outside of that sealed correspondence.

Ch. 686 (SB 1104) Committee on Revenue and Taxation. Sales and use taxes: managed audit program.

The Sales and Use Tax Law permits the State Board of Equalization, if it is not satisfied with the return or returns of the tax or the amount of the tax or other amount, to compute and determine the amount required to be paid upon the basis of facts contained in the return or returns or upon the basis of any information within its possession or that may come into its possession. Existing law permits the board or any person authorized by it in writing to examine the books, papers, records, and equipment of any person selling tangible personal property or any person liable for the use tax.

This bill would additionally authorize the board, until January 1, 2001, to determine which accounts are to be eligible for a managed audit program and would require the board to identify specified information for a person whose account is selected for a managed audit. No person would be required to participate in a managed audit program, but in the case of a liability covered by a managed audit, interest on that liability would be computed at $\frac{1}{2}$ the rate that would otherwise be imposed.

This bill would also make specified findings and declarations of the Legislature in connection with a managed audit program.

The bill would require the State Board of Equalization to submit a report to the Legislature that evaluates the programmatic and fiscal benefit of the managed audit program on or before February 1, 2001, as specified.

Ch. 687 (SB 1273) Hurtt. State agencies: electronic mail.

Existing law provides for the establishment and operation of various state agencies.

This bill would provide that notwithstanding any other provision of law, any requirement that a state agency send material, information, notices, correspondence, or other communication through the United States mail shall be deemed to include the authority for the state agency to send that material, information, notice, correspondence, or other communication by electronic mail upon the request of the recipient, unless

impracticable to do so, or unless contrary to state or federal law. This bill would authorize a state agency to require that direct costs incurred by the agency involving the electronic transmission of requested information shall be paid by the requester, as specified.

This bill would state that nothing in its provisions shall be construed to permit an agency to act in a manner inconsistent with the standards adopted pursuant to specified existing law relating to the availability of public records and information.

Ch. 688 (SB 1344) Johnston. Human cloning.

Existing law regulates medical experimentation on humans.

This bill would prohibit a person from cloning, as defined, a human being, and from purchasing or selling an ovum, zygote, embryo, or fetus for the purpose of cloning a human being. The bill would authorize the State Director of Health Services to levy administrative penalties for violation of \$1,000,000 on a corporation, firm, clinic, hospital, laboratory, or research facility and \$250,000 on an individual, or twice the amount of pecuniary gain from the violation, if greater, to be paid into the General Fund.

The bill would provide that violation of the prohibition constitutes unprofessional conduct for purposes of the Medical Practice Act. The bill would require city business licenses and county business licenses to be revoked for violation of the prohibition.

The bill would repeal its provisions on January 1, 2003.

Ch. 689 (SB 230) Alpert. Air pollution: volatile organic compounds.

(1) Existing law requires the State Air Resources Board to adopt regulations to achieve the maximum feasible reduction in volatile organic compounds emitted by consumer products, as defined, if the state board determines that adequate data exists to establish that the regulations are necessary to attain state and federal ambient air quality standards and are commercially and technologically feasible and necessary.

This bill would prohibit the state board from regulating disinfectants any sooner than December 1, 2003, and would require the state board to comply with its volatile organic compound emission reduction obligations under the 1994 State Implementation Plan, or any amendments thereto, and to ensure that there is no loss of emission reductions as a result of its compliance with that prohibition.

(2) The bill would incorporate additional changes to Section 41712 of the Health and Safety Code proposed by SB 987, to be effective if both bills are enacted and this bill is enacted last.

Ch. 690 (SB 408) Maddy. State Auditor.

(1) Existing law prohibits the State Auditor from releasing to the public, among other things, papers, correspondence, or memoranda pertaining to any audit or investigation not completed if the State Auditor determines that disclosure will impede the audit or investigation. Existing law also prohibits the disclosure of papers, correspondence, or memoranda pertaining to any audit or investigation that has been completed if the materials are not used in support of any report resulting from the audit or investigation.

This bill would instead prohibit the release of papers, correspondence, memoranda, or any information pertaining to any audit not completed, delete references to an investigation in these provisions, and delete the requirement that the State Auditor determine that disclosure will impede the audit. The bill would also delete an obsolete provision relating to the Auditor General or Acting Auditor General serving as the Acting State Auditor.

(2) Existing law requires the Auditor General to annually conduct a review of allocations and expenditures of state transportation funds made under specified transportation related acts.

This bill would revise this requirement to apply to the State Auditor and end the requirement on January 1, 1999, or on the date of a report by the Joint Legislative Audit Committee, whichever is earlier.

(3) Existing law requires the Auditor General to prepare a report every 6 months regarding Medi-Cal drug treatment authorization requests.

This bill would revise this requirement to apply to the State Auditor and end the requirement on January 1, 1999, or on the date of a report by the Joint Legislative Audit Committee, whichever is earlier.

(4) Existing law requires the Auditor General to conduct a fiscal audit every 3rd fiscal year and a programmatic review and audit every 5 years of the business enterprises for the blind program.

This bill would revise this requirement to apply to the State Auditor and require that the fiscal audit be conducted until January 1, 2002, and the programmatic audit until January 1, 2003.

(5) Existing law requires the Auditor General, during the annual fiscal audits of major departments, to include an audit of how each agency is complying with state law regarding consulting contracts.

This bill would revise this requirement to apply to the State Auditor and end the requirement on January 1, 1999, or on the date of a report by the Joint Legislative Audit Committee, whichever is earlier.

Ch. 691 (SB 445) Monteith. Pesticides.

Existing law requires every manufacturer of, importer of, or dealer in any pesticide, except as specified, to obtain a certificate of registration from the Department of Pesticide Regulation before the pesticide is offered for sale in this state.

This bill would permit the Director of Pesticide Regulation to exempt from the provisions governing the registration of pesticides certain products that are exempt under the federal Insecticide, Fungicide, and Rodenticide Act, and that are determined to be of a character unnecessary to be subject to that act.

Ch. 692 (SB 466) Rainey. Local agencies.

The existing Cortese-Knox Local Government Reorganization Act of 1985 provides that territory may not be annexed to a city unless it is located in the same county, and unless otherwise provided by the act, territory may not be annexed to a city unless it is contiguous to the city at the time the proposal is initiated.

This bill would state, notwithstanding the above provisions, that upon approval of the local agency formation commission, the City of Tehachapi may annex noncontiguous territory of not more than 1,680 acres in area, that is located in the County of Kern, and that constitutes a correctional facility, under specified conditions.

Existing law generally requires those local agencies affected by a proposed jurisdictional change to negotiate, in accordance with specified procedures, an exchange of property tax revenues to reflect the changes in service area obligations that will result from the jurisdictional change. Existing law limits this negotiation period to no more than 30 days.

This bill would increase this 30-day limit to 60 days, and would specify additional analysis, mediation, and arbitration requirements in the case of certain city annexations, initiated within a certain time period, for which an exchange of property tax revenues is not negotiated by the city and the county within the 60-day negotiation period.

Ch. 693 (SB 614) M. Thompson. Resources: water pollution.

(1) Under existing law, it is unlawful to deposit, abandon, dispose of, or throw away, within 150 feet of the high-water mark of the waters of this state, any cans, bottles, garbage, and among other things, motor vehicles. Existing law excepts from this provision the placement of a vehicle on privately owned property along a streambank by the property owner or tenant for the purpose of preventing erosion of the streambank.

This bill would remove that exception and would expressly prohibit the placement of a vehicle on privately owned property along a streambank by the property owner or tenant for the purpose of preventing erosion of the streambank. Since a violation of this provision would be a crime under other provisions of existing law, this bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 694 (SB 972) Greene. California Exposition and State Fair.

(1) Existing law provides for the California Exposition and State Fair as a separate entity in state government, governed by its board of directors. Existing law sets forth the powers of the Board of Directors of the California Exposition and State Fair, which includes the power to enter into contracts.

This bill would additionally authorize the board, with the approval of the Department of General Services, to purchase, acquire, or hold real or personal property, to make permanent improvements on publicly owned real property adjacent to, or in the vicinity of, real property owned by the California Exposition and State Fair, and to pledge revenues, moneys, accounts, and other rights.

(2) Existing law limits the administrative oversight authority of the Department of Food and Agriculture to the approval of the California Exposition and State Fair's budget.

This bill would repeal that provision and would instead grant the Department of Food and Agriculture administrative oversight authority over the California Exposition and State Fair, including the authority to prescribe standards to be met by that fair.

(3) Existing law creates the California Exposition and State Fair Enterprise Fund in the State Treasury, and requires funds received by the California Exposition and State Fair to be deposited in the fund and remain in the fund until expended by the California Exposition and State Fair. Existing law also permits the board to establish and maintain a bank checking account or a savings and loan association account for depositing funds appropriated pursuant to a specific provision to the California Exposition and State Fair.

This bill would repeal the provision creating the California Exposition and State Fair Enterprise Fund in the State Treasury, and would permit the board to establish and maintain a bank checking account or a savings and loan association account for depositing all funds received by the California Exposition and State Fair. The bill would continuously appropriate all funds in the account to the board to carry out the functions for which the California Exposition and State Fair is formed. The bill would transfer all funds remaining in the California Exposition and State Fair Enterprise Fund on the effective date of the bill to the board for deposit in the bank checking or savings and loan account. This bill would also authorize the board to establish a program for paying vendors who contract with the California Exposition and State Fair.

(4) Existing provisions of the Food and Agricultural Code provide that whenever, pursuant to that code, any state department, officer, board, agency, committee, or commission is authorized to adopt rules and regulations, the regulations shall be adopted in accordance with those provisions of the Administrative Procedure Act that govern the adoption of regulations.

This bill would exempt the board from that requirement.

(5) Existing law requires the Controller to install and operate a uniform state payroll system for all state agencies.

This bill would exempt the California Exposition and State Fair from that provision, and would also authorize the board to operate a payroll system for paying employees, and a system for accounting for vacation and sick leave credits of employees.

(6) Existing law requires the Department of Finance to determine which funds, other than the General Fund, shall be charged a share of administrative costs for supervision or administration of the state government or for services to the various state agencies, and the amount to be charged against any such fund as its fair share of administrative costs.

This bill would require the Department of Finance, in determining the fair share of the California Exposition and State Fair, to take into account any reduction in the services provided to that agency as a consequence of the assumption of the various functions that agency is authorized to assume by this act, and to reduce the fair share of the California Exposition and State Fair accordingly.

(7) Existing law permits the Governor to order the Controller to direct the transfer of all or any part of the moneys not needed in other funds or accounts to the General Fund when the General Fund is, or will be, exhausted.

This bill would require interest to be paid on all moneys transferred to the General Fund from any funds retained by, or in the possession of, the California Exposition and State Fair.

Ch. 695 (SB 1161) Costa. Pesticide mill assessment.

(1) Until June 30, 1997, existing law requires every registrant of a pesticide product to pay to the Director of Pesticide Regulation an assessment of 22 mills per dollar of sales for all sales by that person of registered pesticides for use in this state. Under existing law, that assessment consists of 9 mills per dollar of sales that is in effect indefinitely, and an additional 13 mills per dollar of sales that is in effect until June 30, 1997. After July 1, 1997, the assessment will be lowered to 9 mills per dollar of sales.

This bill would set the mill assessment at 15.15 mills from January 1, 1998, to March 31, 1999, inclusive, and at 17.5 mills from April 1, 1999, to December 31, 2002, inclusive, per dollar of sales for all sales of pesticides for use in this state, and during that same period of time, permit the collection of up to an additional $\frac{3}{4}$ mill if necessary to fund certain duties of the Department of Food and Agriculture. Commencing January 1, 2003, the mill assessment rate would be reduced to 9 mills per dollar of sales for all sales of pesticides for use in this state. The bill would require the distribution of specified amounts from those funds to the counties as reimbursement for their costs in carrying out and enforcing certain duties relating to the use of pesticides. The bill would also require the director and the county agricultural commissioners to jointly develop regulations specifying the criteria to be used in allocating pesticide mill assessment funds to the counties based upon each county's pest control activities, costs, workload, and performance, thereby imposing a state-mandated local program.

(2) Existing law provides for the licensing of pesticide brokers.

This bill would revise and recast those provisions.

(3) Existing law requires the director to take samples of pesticides, make analyses or examinations of them, and make such investigations as are necessary for the full enforcement of the laws relating to pesticides.

This bill would permit, rather than require, the director to do so.

(4) Existing law requires the director, at least annually, to print and distribute the results of examinations or chemical analyses of official samples of pesticides that are taken by the director.

This bill would repeal that provision.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 696 (SB 1198) Costa. Produce dealers and processors of farm products.

(1) Existing law continuously appropriates the sum of \$100,000 from the Department of Food and Agriculture Fund each fiscal year to the Department of Food and Agriculture for litigation expenses incurred by the Bureau of Market Enforcement in civil actions undertaken by the bureau and charged by the Attorney General.

This bill would permit these funds to be used by the bureau for litigation expenses, without regard to whether they are connected with civil actions undertaken by the bureau and charged by the Attorney General. By expanding the purposes for which continuously appropriated funds may be spent, this bill would make an appropriation.

(2) Existing law provides for the regulation and licensing of brokers, cash buyers, commission merchants, and dealers of farm products by the department. These licensees, among other things, receive farm products on consignment or sell farm products on commission. Existing law sets forth the procedures governing licensures, including the grounds upon which licenses may be denied, suspended, or revoked, and the procedures to be followed in those cases. Existing law also sets forth the amount of the annual licensing fee.

This bill would exempt from those provisions any person engaged in the business of buying or selling cattle who is bonded under the federal Packers and Stockyards Act, 1921. This bill would require an applicant for a license to sign a release authorizing the department to have access to and obtain financial information from specified sources.

The bill would recast the provisions governing the denial, suspension, or revocation of licenses. The bill would permit the department to obtain access to a licensee's or agent's criminal record during the course of licensing investigation, and would require the Department of Justice to furnish that information to the department upon request. The bill would reduce these annual licensing fees over a 2-year period commencing January 1, 1999, and would require the department to reevaluate the fees in fiscal years 1998-99 and 1999-2000, and to report to the Legislature on the fee structure subsequent to June 30, 2000.

(3) Existing law specifies the circumstances under which a person licensed pursuant to these provisions is prohibited from employing a person as an agent without the approval of the Secretary of Food and Agriculture.

This bill would include within those circumstances the conviction of a crime that includes as one of its elements the financial victimization of another person.

(4) Existing law permits the filing of a complaint with the secretary by a farm products producer, farm products consigner, or the seller of farm products.

This bill would also permit an aggrieved grower or licensee with a complaint not subject to specified federal acts to seek resolution of that complaint by filing an action with the department.

(5) Existing law requires each applicant for a license as a processor of farm products or produce dealer to pay a 50% surcharge to the Director of Pesticide Regulation. These funds are deposited in the Food Safety Account in the Department of Pesticide Regulation Fund.

This bill would repeal the collection of the surcharge as of January 1, 1999.

(6) Existing law provides for the Farm Products Trust Fund. Pursuant to the statutory scheme, each applicant for a license, or for the renewal of a license, as either a processor of farm products or a produce dealer, is required to pay to the secretary an annual fee of \$125 before the secretary issues or renews the license. All fees collected are required to be deposited in the products fund and used to pay for farm products grown or produced within this state that have not been otherwise paid for.

This bill would provide that no claims may be made against the fund subsequent to January 1, 1998, and no assessment may be collected for deposit in the fund after January 1, 1999. The bill would require the department to administer the funds, and to distribute the funds remaining in the trust fund after the payment of claims on a pro rata basis to licensees. The bill would also provide for the repeal of the provisions establishing the fund on the date upon which all the funds have been distributed.

(7) Because certain violations of the requirements of the bill relating to licensees are misdemeanors under existing law, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 697 (AB 702) Villaraigosa. Child support: dependents: collection.

Existing law provides that when a child support delinquency is reported to the State Department of Social Services, as specified, the county district attorney reporting that delinquency may, under specified guidelines, refer the delinquency to the Franchise Tax Board for collection.

This bill would require the Franchise Tax Board, through a cooperative agreement with the State Department of Social Services, and in cooperation with financial institutions, as defined, doing business in this state, to operate a Financial Institution Match System, as specified, to provide certain information for each noncustodial parent who maintains an account at the institution. The bill would provide that the California Right to Financial Privacy Act shall not apply to the Financial Institution Match System, but would provide that unauthorized disclosure is a misdemeanor, thereby imposing a state-mandated local program by the creation of a new crime. The bill would relieve financial institutions of liability for any disclosure of information or any action taken in good faith under the provisions of this bill. The bill would enact related provisions and

would require the board to report to the Legislature on the implementation of the Financial Institution Match Program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 698 (SB 1238) Johannessen. Sentence enhancement: elder and dependent adult abuse.

(1) Existing law provides that it is a crime, punishable by imprisonment in a county jail not exceeding one year, or in the state prison for 2, 3, or 4 years, for any person, under circumstances or conditions likely to produce great bodily harm or death, to willfully cause or permit any elder or dependent adult to suffer, or to inflict thereon unjustifiable physical pain or mental suffering, or for any person having the care or custody of any elder or dependent adult to willfully cause or permit the person or the health of the elder or dependent adult to be injured or endangered.

This bill would provide that if in the commission of the above crime, the victim suffers great bodily injury, the defendant shall receive an additional term in the state prison of 3 years, except that if the victim is 70 years of age or older the defendant shall receive an additional term of 5 years.

This bill would also provide that if in the commission of the above crime, the defendant proximately causes the death of the victim, the defendant shall receive an additional term in the state prison of 5 years, except that if the victim is 70 years of age or older the defendant shall receive an additional term of 7 years. By establishing new sentence enhancements, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 699 (SB 1052) Vasconcellos. Insurance: long-term care.

Existing California law regulates long-term care insurance, and requires that insurance to provide certain benefits. Existing law authorizes the Insurance Commissioner to waive certain of those requirements under certain circumstances.

Existing federal law provides that long-term care insurance is entitled to certain favorable tax treatment if it meets certain requirements.

This bill would require every policy that is intended to be a qualified long-term care insurance contract as provided by federal law to be identified as such with a specified disclosure statement, and, similarly would require every policy that is not intended to be a qualified long-term care insurance contract as provided by federal law to be identified as such. It would require insurers that offer policies or certificates that are intended to be federally qualified long-term care insurance contracts, including riders to life insurance policies providing long-term care coverage, to fairly and affirmatively concurrently offer and market policies and certificates that are not intended to be federally qualified long-term care.

The bill would revise various definitions.

Existing law imposes various requirements on the marketing of long-term care insurance, including various disclosure requirements.

This bill would require that a specific shoppers guide be provided to prospective applicants.

The bill would require insurers to make certain reports regarding lapses and replacements.

The bill would require that premium adjustments be made for replacement policies.

The bill would require insurers and other marketers of long-term care insurance to utilize specified suitability standards. It would require that insurers provide notifications regarding denial of claims.

The bill would require insurers to offer or provide certain rights and benefits in connection with long-term care insurance, including rights to increase and decrease benefits. The bill would impose requirements on inflation protection benefits.

The bill would enact related provisions.

The bill would become operative only if SB 527 and AB 1483 are also enacted.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 700 (AB 1483) Gallegos. Insurance: long-term care.

Existing California law regulates long-term care insurance, and requires that insurance to provide certain benefits. Existing law authorizes the Insurance Commissioner to waive certain of those requirements under certain circumstances.

Existing federal law provides that long-term care insurance is entitled to certain favorable tax treatment if it meets certain requirements.

This bill would require every policy that is intended to be a qualified long-term care insurance contract as provided by federal law to be identified as such with a specified disclosure statement, including riders to life insurance policies, and, similarly would require every policy that is not intended to be a qualified long-term care insurance contract as provided by federal law be identified as such. It would require insurers that offer policies or certificates that are intended to be federally qualified long-term care insurance policies to also fairly and affirmatively offer and market policies that are not intended to be federally qualified long-term care contracts.

The bill would set forth eligibility criteria for policies and certificates intended to be qualified long-term care insurance contracts as provided by federal law as well as for policies and certificates that are not intended to be federally qualified. The bill would revise various definitions.

The bill would become operative only if SB 527 and SB 1052 are also enacted.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 701 (SB 527) Rosenthal. Insurance: long-term care.

Existing California law regulates long-term care insurance, and requires that insurance to provide certain benefits.

Existing federal law provides that long-term care insurance is entitled to certain favorable tax treatment if it meets certain requirements.

This bill would provide that if an insurer provides long-term care insurance intended to qualify for favorable tax treatment under federal law, the insurer shall also offer coverage that conforms to the current state eligibility requirements, as specified.

The bill would require insurers to provide a specified notice at the time of solicitation, and a specified notice in the application form.

Certain provisions of the bill would become inoperative upon a finding by the Insurance Commissioner that federal law or regulations, or other relevant federal decisions, allow long-term care coverage that conforms to the California eligibility requirements to qualify for favorable tax treatment, and certain provisions would be repealed on January 1, following that finding. If they do not become inoperative under this provision, they would become inoperative on July 1, 2001, and would be repealed on January 1, 2002, as specified.

The bill would become operative only if AB 1483 and SB 1052 are also enacted.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 702 (SB 110) Dills. Sales and use taxes: disclosure of information: Bradley-Burns Bill of Rights.

(1) The Sales and Use Tax Law and the Bradley-Burns Uniform Local Sales and Use Tax Law impose a tax on the storage, use, or other consumption in this state of tangible personal property purchased from any retailer. Existing law authorizes the State Board of Equalization to establish a procedure for the issuance of direct payment permits, as specified, so that certain consumers with those permits may pay the retailer's sales tax liability directly to the board.

This bill would authorize the issuance of a use tax direct payment permit to an applicant allowing the holder, under specified conditions, to self-assess and pay state and

local use tax directly to the board and to report the county, city, city and county, or redevelopment agency in which the first "use," as defined, occurs.

(2) Existing law prohibits the disclosure of any information concerning any taxpayer by the State Board of Equalization, except as specifically authorized by statute. It permits the disclosure, when requested by resolution of the legislative body of any county, city and county, city, or district, of sales or transactions and use tax records of the board pertaining to sales or transactions and use taxes collected for that entity, as specified.

This bill would, subject to certain restrictions on the examination of taxpayer records, revise that exception to specifically allow the examination of sales or transactions and use tax records of the board pertaining to the ascertainment of sales or transactions and use taxes to be collected for the local entity.

(3) The Bradley-Burns Uniform Local Sales and Use Tax Law permits cities and counties to impose local sales and use taxes in conformity with the Sales and Use Tax Law. These local taxes are administered by the State Board of Equalization. The Sales and Use Tax Law contains the Harris-Katz California Taxpayer's Bill of Rights that is intended to ensure that the rights, privacy, and property of California taxpayers are adequately protected and to promote voluntary taxpayer compliance, as specified.

This bill would additionally enact the Bradley-Burns Bill of Rights to establish specific rights of contracting local jurisdictions, as specified. The bill would establish the right of local jurisdictions to rely on written advice of the board.

Ch. 703 (SB 162) Haynes. Fines and forfeitures: comprehensive collection programs.

(1) Existing law authorizes county boards of supervisors to consolidate specified county offices, including authorizing the board in counties of the 13th to 58th classes, inclusive, to consolidate county offices in various combinations, including (1) county clerk, assessor, and recorder, and (2) sheriff, coroner, and public administrator. Under existing law, Riverside County is classified as a county of the 11th class.

This bill would authorize the Board of Supervisors of Riverside County to consolidate either or both of the following combinations: (1) the offices of county clerk, assessor, and recorder, and (2) the offices of sheriff, coroner, and public administrator.

(2) Under existing law, to be repealed June 30, 1997, any county or court that implements a comprehensive program to identify and collect fines and forfeitures that have not been paid after 60 days from the date on which they were due and payable, with or without warrant having been issued against the alleged violator, and for which the base fine excluding state and county penalties is at least \$100, may deduct and deposit in the county treasury the cost of operating that program, excluding capital expenditures, from any revenues collected prior to making any distribution of revenues to other governmental entities required by any other provision of law.

This bill would authorize reimbursement of a county or court pursuant to this provision for the cost of operating a comprehensive collection program to identify and collect fines and forfeitures.

(3) Existing law requires a county that exercises the authority granted under the above provisions for the purpose of enhancing revenue collections to file an annual report of its activities with the Legislature.

This bill would specify the county officers required to file the report and the legislative committees with which the report is required to be filed.

(4) Existing law requires that in the Counties of Los Angeles, Orange, San Diego, San Joaquin, and Stanislaus, \$50 for each conviction of specified Vehicle Code violations shall be deposited in a special account for exclusive allocation by the administrator of the county's alcoholism program, with the approval of the board of supervisors, for alcohol programs and services for the general population.

This bill would include in this provision the Counties of Sonoma and San Luis Obispo.

(5) Existing law requires a fee to be collected from every person ordered or permitted to attend traffic violator school, in an amount equal to the total bail set forth for the eligible offense on the uniform countywide bail schedule.

This bill would increase that fee by \$24 until December 31, 1998, and would require this increase to be deposited in the General Fund.

(6) This bill would repeal the provisions in (2) and (3) above, as of January 1, 2000.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 704 (SB 826) Greene. Dentistry: Board of Dental Examiners of California and Committee on Dental Auxiliaries.

Existing law provides that the Chief of the Division of Investigation in the Department of Consumer Affairs and all investigators of that division, the Medical Board of California, and the Board of Dental Examiners have the authority of peace officers while engaged in exercising the powers granted or performing the duties imposed upon them or the division in investigating the laws administered by the various boards comprising the department or commencing directly or indirectly any criminal prosecution arising from any investigation conducted under these laws.

Existing law provides that this authority as a peace officer extends to any place in the state for the purpose of performing their primary duty or making an arrest as to any public offense with respect to which there is immediate danger to person or property, or of the escape of the perpetrator of that offense, or in a state of emergency. Existing law authorizes these peace officers to carry firearms only if authorized and under those terms and conditions as specified by their employing agencies.

This bill would require the number of investigators with peace officer authority designated by the Director of Consumer Affairs assigned to the Board of Dental Examiners to be 7. This bill would also protect the positions, status, and rights of those investigators who are subsequently transferred as a result of these provisions. The bill would also require the transfer of these employees to occur by July 1, 1999. The bill would require the board to conduct a study and report to the Legislature on the scope of duties of investigators hired by the board, the level of complexity of the investigations, and the volume of complaints according to complexity.

Existing law vests in the Board of Dental Examiners of California in the Department of Consumer Affairs the administration of the law regulating the practice of dentistry and authorizes the board to appoint an executive officer. Under existing law, these administrative authority provisions become inoperative on July 1, 1998, and are repealed on January 1, 1999.

This bill would extend these inoperative and repeal dates to July 1, 2002, and January 1, 2003, respectively.

Existing law authorizes the Committee on Dental Auxiliaries within the jurisdiction of the board to make recommendations with regard to the administration of the law regulating dental auxiliaries who are persons authorized to perform dental supportive procedures. Under existing law, this provision becomes inoperative on July 1, 1998, and is repealed on January 1, 1999.

This bill would extend these inoperative and repeal dates to July 1, 2002, and January 1, 2003, respectively.

Existing law authorizes the board to organize a standing committee to deal with auxiliary matters.

This bill would eliminate this authority of the board and would require, instead, that the committee be directly responsible for all matters concerning dental auxiliaries. The bill would set forth the duties and responsibilities of the committee in this regard.

Existing law requires the Joint Legislative Sunset Review Committee to perform various functions and duties with respect to evaluating and determining whether a board or regulatory program has demonstrated a public need for the board's or program's continued existence, and to report its findings and recommendations to the Department of Consumer Affairs for review.

This bill would provide that the repeal of the Board of Dental Examiners of California and the Committee on Dental Auxiliaries pursuant to this bill renders the board subject to the review of the Joint Legislative Sunset Review Committee.

This bill would incorporate additional changes in Section 1601 of the Business and Professions Code, proposed by AB 471, to be operative only if AB 471 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

This bill would incorporate additional changes in Section 830.3 of the Penal Code, proposed by SB 951, to be operative only if SB 951 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

Ch. 705 (SB 828) Greene. Professional engineers and land surveyors.

(1) The Professional Engineers Act establishes the State Board of Registration for Professional Engineers and Land Surveyors in the Department of Consumer Affairs, and requires the board to appoint an executive officer at a salary to be fixed and determined by the board with the approval of the Director of Finance. The Professional Land Surveyors' Act provides that the board shall also administer that act. These provisions are to become inoperative on July 1, 1998, and, as of January 1, 1999, are repealed.

This bill would extend the operation of the board, and its appointment authority with respect to an executive officer, until July 1, 2000, and would repeal these provisions as of January 1, 2001.

(2) The act, except for those provisions that apply to civil engineers and civil engineering, provides that it is not applicable to the performance of engineering work by a manufacturing, mining, public utility, research and development, or other industrial corporation, or by employees of that corporation, provided this work is in connection with, or incidental to, the products, systems, or services of the corporation or its affiliates.

This bill would include consultants, temporary employees, contract employees, and those persons hired pursuant to 3rd-party contracts as "employees" for purposes of the above provision.

(3) Existing law requires the Joint Legislative Sunset Review Committee to perform various functions and duties with respect to evaluating and determining whether a board or regulatory program has demonstrated a public need for the board's or program's continued existence, and to report its findings and recommendations to the Department of Consumer Affairs for review.

This bill would provide that the repeal of provisions on January 1, 2001, relating to the operation of the State Board of Registration for Professional Engineers and Land Surveyors shall render the board subject to the above review, but that the review of the board shall be limited to only those unresolved issues identified by the Joint Legislative Sunset Review Committee.

Ch. 706 (SB 1135) O'Connell. Hazardous waste treatment: biotechnology elementary neutralization activities.

Existing law requires hazardous waste facilities, including, but not limited to, treatment facilities, to operate under hazardous waste facilities permits or other grants of authorization issued by the Department of Toxic Substances Control. Existing law exempts from hazardous waste facilities requirements an owner or operator of an elementary neutralization unit that neutralizes wastewaters that are hazardous solely due to corrosivity or toxicity that results only from alkaline or acidic materials used in the owner's or operator's food processing operations.

This bill would exempt from the requirements relating to generators, tanks, and tank systems imposed pursuant to the hazardous waste control laws, and from the requirement to obtain a hazardous waste facilities permit, biotechnology elementary neutralization activities, as defined, if specified conditions are met with regard to the hazardous wastes and if the generator complies with specified requirements. The bill would also exempt these activities from any statute or regulation requiring the elementary neutralization unit to have secondary containment for piping and equipment, except as specified.

Ch. 707 (AB 153) Baldwin. Youth groups: use of beach and recreation areas: carrier exemption.

(1) Existing law provides for the use of local public land and property, as specified.

This bill would prohibit any state or local agency from adopting or enforcing any ordinance, regulation, or other law that requires a youth group, as defined, to pay a charge, as defined, in excess of any charge that is imposed on a group composed of a similar number of persons for the use of, or access to, a public beach or recreation area, as defined, or that requires a youth group to obtain a permit for that use or access unless such a group is also required to obtain a permit.

(2) Under existing law, the Passenger Charter-Party Carriers' Act, the furnishing of specified passenger transportation services by a charter-party carrier of passengers is subject to the jurisdiction and control of the Public Utilities Commission and is required

to be furnished pursuant to a certificate of public convenience and necessity or a permit issued by the commission.

This bill would exempt from the act transportation services incidental to the operation of a youth camp that are provided by either a nonprofit tax-exempt organization or an organization that operates an organized camp, as defined, serving youth 18 years of age or younger. However, the bill would require those transportation services to comply with various requirements relating to the registration, operation, maintenance, and insurance of vehicles, as specified.

Ch. 708 (AB 167) Brewer. School finance.

Existing law establishes the minimum number of schooldays for a school district, as specified, to receive an apportionment based on average daily attendance.

Existing law sets forth a method of providing school districts with financial incentives to lengthen the schoolday and school year. Those financial incentives were added to the respective revenue limits of school districts during the 1984–85, 1985–86, and 1986–87 fiscal years, as specified. School districts that offered an amount of instructional minutes in the 1982–83 fiscal year, that exceeded the minimum number of instructional minutes set forth in the 1986–87 fiscal year, must maintain the actual number of instructional minutes offered in the 1982–83 fiscal year to receive the incentive funding. The Superintendent of Public Instruction is required to reduce the base revenue limit of a school district in any fiscal year subsequent to a fiscal year in which the school district that received longer day incentive apportionments as part of its revenue limit reduces the amount of instructional time required to receive the apportionments. That reduction also applies to the base revenue limit of a school district required to maintain instructional time at the level maintained in the 1982–83 fiscal year, as specified.

This bill would instead provide that, commencing with the 1990–91 fiscal year and each fiscal year through the 1995–96 fiscal year, for any school district that does not maintain the number of instructional minutes for a particular grade level that the school district maintained for the 1982–83 fiscal year, as adjusted to comply with the maximum instructional day allowed for kindergarten, that school district is not subject to a reduction to its base revenue limit if the school district maintains the minimum number of instructional minutes for each grade level that is set forth for the 1986–87 fiscal year.

This bill would also require the Superintendent of Public Instruction to take any steps necessary, including, but not limited to, adjustments to the respective base revenue limits of those school districts for the 1990–91, 1991–92, 1992–93, 1993–94, or 1994–95 fiscal years, or the 1995–96 fiscal year for districts whose instructional minutes were adjusted to comply with the maximum instructional day allowed for kindergarten, to ensure that those school districts do not have their base revenue limits reduced in the 1990–91 fiscal year, or any fiscal year through the 1994–95 fiscal year, or the 1995–96 fiscal year for districts whose instructional minutes were adjusted to comply with the maximum instructional day allowed for kindergarten, if they maintain, at a minimum, the number of instructional minutes set forth for the 1986–87 fiscal year.

This bill would also provide that certain school districts that failed to maintain the level of instructional minutes required in any of the fiscal years 1990–91 to 1994–95, inclusive, or with respect to a specified school district, fiscal years 1990–91 to 1995–96, inclusive, and subject to fiscal penalties resulting from audits of instructional minutes, shall pay the lesser of $\frac{1}{4}$ of the required fiscal assessment or 5% of the total revenue limit of the district commencing with the 1997–98 fiscal year and continuing until the full amount of the required fiscal assessment is paid. The bill would require the Superintendent of Public Instruction to make the necessary adjustments to facilitate withholding the appropriate amounts from each school district's apportionments. The bill would also provide that an additional amount equal to $\frac{1}{2}$ the amount specified above be withheld from the apportionments to the Graves Elementary School District if the district failed to comply with the 175-day minimum school year, as specified.

Ch. 709 (AB 827) Thomson. Highways: Safety Enhancement-Double Fine Zones.

(1) Existing law, until January 1, 1998, requires the Department of Transportation, in consultation with the Department of the California Highway Patrol, to develop specified

pilot projects to designate and identify certain highway segments as “Safety Enhancement-Double Fine Zones” and impose increased fines for traffic violations occurring within these zones.

This bill would extend the date specified above to January 1, 2000.

The bill would also specify that only the base fine is to be increased pursuant to the pilot program and that any additional penalty, forfeiture, or assessment imposed by any other statute shall be based on the amount of the base fine and shall not be based on the amount of the enhanced fine imposed pursuant to the pilot program.

The bill would require the departments to develop a pilot project for a designated portion of State Highway Route 12. Because the bill would create certain additional duties for local authorities, it would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 710 (AB 1029) Frusetta. Vehicles: safety belts: motorcycles: helmets: exemption: traffic lanes.

(1) Existing law prohibits certain vehicles from being operated on traffic lanes that have been designated exclusive or preferential use lanes for high-occupancy vehicles.

Existing law requires that a vehicle be driven entirely within a single lane whenever any roadway has been divided into 2 or more clearly marked lanes for traffic in one direction, except as specified.

This bill would specify that these provisions of existing law apply to a fully enclosed 3-wheeled motor vehicle of specified dimensions, thereby imposing a state-mandated local program by creating a new crime with regard to preferential use lanes.

(2) Existing law defines a motorcycle, for purposes of the Vehicle Code, as any motor vehicle having a seat or saddle for the use of the rider, designed to travel on not more than 3 wheels in contact with the ground, and weighing less than 1,500 pounds.

Existing law requires a driver and any passenger to wear a safety helmet that meets specified standards when riding on, among other things, a motorcycle.

This bill would exempt a person operating, or riding as a passenger in, a fully enclosed 3-wheeled motor vehicle of specified dimensions that meets prescribed requirements from the safety helmet requirement specified above.

(3) Existing law makes it an infraction for any person to operate a private passenger motor vehicle, as defined, on the highway without having that person and all passengers 16 years of age or over restrained by a safety belt. It is unlawful for any parent or legal guardian, when present in a private passenger motor vehicle to permit his or her child or ward who is between 4 years and 16 years of age to be transported on the highway in the vehicle without using a safety belt.

Existing law makes it unlawful for any parent or legal guardian, when present in a private passenger motor vehicle to permit his or her child or ward who is less than 4 years of age to be transported on the highway in the vehicle without using a specified child passenger restraint system.

This bill would make those provisions applicable to drivers and passengers in a fully enclosed 3-wheeled motor vehicle of specified dimensions. Because the bill would thereby expand the scope of existing crimes, it would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 711 (AB 1394) Figueroa. Packaging and labeling.

(1) Existing law, known as the Fair Packaging and Labeling Act, provides for the regulation by the Department of Consumer Affairs of labeling of all commodities for distribution or sale, as specified. A violation of any provision thereof is a misdemeanor. Existing law sets forth general requirements for commodities containers, as specified, and more rigorous requirements for food containers subject to the Federal Food, Drug and Cosmetic Act, as specified.

This bill would repeal those general requirements for commodities containers and, instead, add requirements for commodities containers that are similar to existing requirements for food containers. Since a violation of the provisions applicable to packaging and labeling of commodities is a crime, this bill would impose a state-mandated local program.

This bill would also authorize any sealer to seize any container in violation of those new requirements. It would therefore impose a state-mandated local program by imposing additional responsibilities upon county sealers.

(2) Existing law also provides for the regulation by the Department of Health Services of the packaging and labeling of foods, drugs, devices, and cosmetics, and provides that the department may prohibit the nonfunctional slack fill of packages, as defined.

This bill would repeal that provision, and instead, add requirements for commodities containers that are similar to existing requirements for food containers under the Fair Packaging and Labeling Act.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 712 (AB 1472) Thomson. Transactions and use taxes: City of Woodland.

Existing law authorizes various local governmental entities, in accordance with certain requirements and limitations, to levy transactions and use taxes pursuant to the Transactions and Use Tax Law.

This bill would additionally authorize the City of Woodland, subject to voter approval, to levy a transactions and use tax pursuant to the Transactions and Use Tax Law at a rate of 0.25% or 0.5% for general revenue purposes.

This bill would contain legislative findings and declarations as to the necessity of a special statute.

Ch. 713 (AB 1583) Shelley. Air pollution.

Existing law authorizes the State Air Resources Board to require air pollution control districts or air quality management districts to impose additional permit fees on nonvehicular sources within their jurisdiction, to be expended only for the purposes of recovering the costs of additional state programs related to nonvehicular sources. The state board was required to submit a report to the Legislature concerning those fees by January 1, 1993. These provisions became inoperative on July 1, 1997, and will be repealed on January 1, 1998.

This bill would instead make those provisions inoperative on July 1, 1999, and would be repealed on January 1, 2000. The bill would establish a priority for expenditure of the permit fees collected. The bill would require the state board to submit the report to the Governor, as well as the Legislature, and would require additional information to be included in the report, as specified.

Ch. 714 (SB 3) Leslie. Controlled substances: gamma-hydroxybutyrate.

Existing law categorizes controlled substances into 5 schedules and places the greatest restrictions on those contained in Schedule I. Controlled substances contained in Schedule II may be lawfully prescribed under limited circumstances.

This bill would include in Schedule II the sedative and hypnotic drug gamma-hydroxybutyrate. This bill would impose a state-mandated local program upon local governments by creating new crimes with respect to gamma-hydroxybutyrate.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 715 (AB 242) Honda. Emergency homeless shelters.

Under existing law, the Emergency Housing and Assistance Program, the Department of Housing and Community Development is authorized to make grants from the continuously appropriated Emergency Housing and Assistance Fund to local governments and nonprofit organizations to provide emergency or temporary housing for the homeless, as specified.

This bill would appropriate \$1,062,360 from the General Fund to the State Controller for allocation and disbursement to the fund. The bill would require \$810,000 of this sum to be made available to certain counties in specified allotments during the 1997-98 and 1998-99 fiscal years. The bill would provide that a designated local board or a county shall be eligible for its allotment by submitting an application containing specified information to the department.

This bill would become operative only if SB 255 and AB 67 are enacted and become operative.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 716 (SB 255) Lee. Armories: homeless shelters.

Existing law requires the Military Department to, until March 15, 1997, make certain state armories available to specified cities and counties for use by homeless persons for emergency shelter purposes.

This bill would extend this requirement until March 15, 1999. It would delete Van Nuys, and would add Sylmar, the City of Glendale armory, and the City of Glendale to the above-described provisions. The bill would delete the armories in Calxico, Chico, Corona, El Cajon, Roseville, and San Rafael but would authorize a city or county to request use of one of the armories in those communities through the Office of Emergency Services if the city or county has exhausted all other available resources for housing homeless persons.

Existing law requires an authorized county or city electing to use an armory for these purposes to provide a report to the Department of Economic Opportunity on January 1, 1996, and on January 1, 1997, describing progress toward a long-range, permanent shelter plan for homeless persons to take effect on March 15, 1997.

This bill would repeal that provision, and would, instead, require a county government utilizing the armory shelter program to provide a report no later than June 30, 1998, to the Governor, the Senate Committee on Governmental Organization, the Assembly Committee on Local Government, and the Senate and Assembly Budget Committees, describing the progress towards providing alternative emergency shelters in lieu of the armory shelter, and would prohibit making armories available to the local government for the emergency shelter program after July 1, 1998, if the report is not provided by June 30, 1998.

Existing law requires any authorized county or city electing to use a state armory for these purposes to obtain a license from the Military Department in compliance with prescribed requirements.

This bill would require each county that obtains a license to establish, on or before November 1, 1997, a local shelter advisory committee with prescribed membership and responsibilities.

Existing law requires that prior to March 15, 1997, an evaluation of the effectiveness of the temporary armory shelter arrangement and the progress of participating counties and cities toward long-range future shelter plans for homeless persons shall be prepared jointly by the Military Department, the Department of Economic Opportunity, the Department of Housing and Community Development, and a representative of the participating counties and cities selected by participating groups, and requires that the report be sent to the Governor, the Senate Committee on Governmental Organization, and the Assembly Committee on Local Government, prior to March 15, 1997.

This bill would repeal this provision, and instead require the Legislative Analyst to file a report by March 1, 1998.

The bill would require its provisions to become operative only if AB 242 and AB 67 are enacted and become operative.

This bill would declare that it is to take effect immediately, as an urgency statute.

Ch. 717 (AB 55) Mazzeni. Counties: officers: appointment.

Under existing law, in a county of the 11th, 15th, 17th, 21st, 22nd, 25th, or 36th class, as specified, a registrar of voters may be appointed by the board of supervisors in the same manner as other county officers are appointed.

This bill would include a county of the 18th class within the category of counties in which the board is authorized to appoint a registrar of voters in the above manner.

Ch. 718 (AB 308) Leonard. Commercial bribery: real estate sales.

(1) Existing law provides, except as specified, that every employee, as defined, who solicits, accepts, or agrees to accept any money or thing of value from any person other than his or her employer, other than in trust for the employer, corruptly, as defined, and without the knowledge or consent of the employer, in return for using or agreeing to use his or her position for the benefit of that other person, and any person who offers or gives an employee money or any thing of value under those circumstances, is guilty of commercial bribery, except as specified. Existing law further provides that commercial bribery is punishable by imprisonment in a county jail for not more than one year if the amount of the bribe is \$1,000 or less, or by imprisonment in a county jail, or in the state prison for 16 months, or 2 or 3 years if the amount of the bribe exceeds \$1,000.

This bill would provide that an employee of a title insurer, underwritten title company, or controlled escrow company who corruptly violates a certain statutory provision by paying, directly or indirectly, a commission, compensation, or other consideration to a real estate salesperson or real estate broker, or a real estate salesperson or real estate broker who corruptly violates another statutory provision by receiving from an employee of a title insurer, underwritten title company, or controlled escrow company a commission, compensation, or other consideration, as an inducement for the placement or referral of title business, is also guilty of commercial bribery, which would be punishable by imprisonment in a county jail for not more than one year, or by a fine of \$10,000 for each unlawful transaction, or by both a fine and imprisonment.

(2) Existing law authorizes the Real Estate Commissioner, after hearing in accordance with certain provisions, to suspend or revoke the license of a real estate licensee who claims, demands, or receives a commission, fee, or other consideration, as compensation or inducement, for referral of customers to any escrow agent, structural pest control firm, home protection company, or underwritten title company.

This bill would prohibit a licensee from being disciplined for reporting to the commissioner violations of the above provision by another licensee, unless the licensee making the report had guilty knowledge of, or committed or participated in, the violation of that provision. By making the crime of commercial bribery applicable to a new category of persons, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 719 (AB 475) Pringle. Office of Permit Assistance: reports.

Existing law requires the Office of Permit Assistance, in the Trade and Commerce Agency, to establish, compile, and maintain a list of all fees or charges assessed or collected by any state board, agency, or department for each quarter, based on quarterly reports submitted by those entities submitted on or before the last day of the following quarter, commencing with the first quarter of calendar year 1997. Existing law requires the office to create and make available an annual inventory, within 90 days from the end of the calendar year which is the subject of the inventory, which, based on information in the quarterly list, shall list the total dollar amount of fees or charges assessed or collected by all state boards, agencies, or departments during the preceding calendar year.

This bill would, instead, require, commencing with calendar year 1999, the California Environmental Protection Agency, the Resources Agency, and the State Board of Equalization to submit to the Trade and Commerce Agency an annual report of the total dollar amount of fees or charges collected or assessed by each of those agencies and subdivisions thereof. It would require, commencing with calendar year 2000, each state board, agency, or department to submit to the Trade and Commerce Agency an annual report of the total dollar amount of fees or charges collected or assessed by each state board, agency, or department. This bill would permit these annual reports to be submitted on a fiscal year basis if the applicable state board, agency, or department already collects the required information on a fiscal year basis. It would require the report for each year to be submitted on or before the last day of the first quarter following that year, with an extension for that submission being granted under specified circumstances.

This bill would require the California Environmental Protection Agency, in consultation with the Trade and Commerce Agency, other state agencies, and the Joint Legislative Audit Committee to develop, no later than July 31, 1998, a form to be used for submitting the report required by these provisions. It would further provide that, commencing with the first quarter of calendar year 2000, this form may be used by each state board, agency, or department when submitting a report. It would authorize each state board, agency, or department to submit the required information in a format different from the form developed for this purpose.

This bill would also require that commencing in 2000, the annual inventory be created, as specified, by the Trade and Commerce Agency within 120 days from the end of the calendar year that is the subject of the inventory.

Ch. 720 (AB 515) Ashburn. Psychiatric technicians.

Existing law, the "Psychiatric Technicians Law," provides for the licensure and regulation of psychiatric technicians and defines a psychiatric technician as any person who, for compensation or personal profit, implements procedures and techniques that involve understanding of cause and effect and that are used in the care, treatment, and rehabilitation of mentally ill, emotionally disturbed, or mentally retarded persons and who has certain defined responsibilities. A violation of this law is a misdemeanor.

This bill would authorize a psychiatric technician, when prescribed by a physician and surgeon, to perform various activities on a patient with a mental illness or developmental disability related to administering medications by hypodermic injection while working in a mental health facility or developmental disability facility, withdrawing blood from a patient with a mental illness or developmental disability if the psychiatric technician has been certified by the Board of Vocational Nurse and Psychiatric Technician Examiners of California, and administering skin tests and immunizations. The bill would require a psychiatric technician, in performing skin tests and immunizations, to demonstrate competence in certain requirements. Because the bill would create a new crime, it would impose a state-mandated local program.

Existing law requires regulating fees to be imposed by the Board of Vocational Nurse and Psychiatric Technician Examiners of California, for payment into the Vocational Nurse and Psychiatric Technician Examiners Fund, which is continuously appropriated.

This bill would add regulatory fees of \$20 for certification in blood withdrawal and \$150 biennially for a provider of a course to meet certification requirements for blood withdrawal. By increasing revenues deposited into a continuously appropriated fund, the bill would constitute an appropriation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 721 (AB 957) Migden. Child development teacher and supervisor grant program.

Existing law establishes the Child Development Teacher Loan Assumption Program under which participants agree to teach or supervise in the field of child care and development in exchange for assumption of both state and federal loans. Existing law requires, to the extent permitted by federal law, that federal funds received, designated for, or permitted to be used for the training, retention, or improvement of quality in the child care profession be used to fully fund the program on an annual basis.

(1) This bill would limit the application of the loan assumption program to loans approved by the Student Aid Commission prior to December 31, 1997.

(2) The bill would establish a grant program to replace the loan assumption program for participants who intend to teach or supervise in the field of child care and development in a licensed children's center.

The bill would establish criteria for admission to the program. The bill would require the commission to develop appropriate mechanisms to ensure compliance with the teaching requirements of the program and to report specified information to the Governor and the Legislature by January 1, 2001.

The grant program established by the bill would not be implemented unless and until federal funds are made available for the purposes of the program.

The bill would specify that these provisions would become inoperative on June 30, 2002, and would be repealed on January 1, 2003.

Ch. 722 (AB 994) Sweeney. Local Agency Public Construction Act: architectural design services: bids.

The Local Agency Public Construction Act sets forth the procedures pursuant to which local agencies may solicit and evaluate bids or proposals for, and award, contracts for the construction of public works.

This bill would, as of July 1, 1998, require any local agency subject to the act, in the procurement of architectural design services requiring an expenditure in excess of \$10,000, to include in any request for proposals for those services or invitation to bid from a prequalified list for a specific project, a disclosure of any contract provision that would require the contracting architect to indemnify and hold harmless the local agency against any and all liability, whether or not caused by the activity of the contracting architect. It would provide that, in the event a local agency fails to disclose such a contract provision in the request for proposals or invitation to bid, that local agency would (1) be precluded from requiring the selected architect to agree to any contract provision requiring the selected architect to indemnify or hold harmless the local agency against any and all liability not caused by the activity of the selected architect, (2) be required to cease discussions with the selected architect and reopen the request for proposals or invitations to bid, or (3) be required to mutually agree to an indemnity clause acceptable to both parties.

Ch. 723 (AB 1139) Gallegos. Medi-Cal: disproportionate share hospitals.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

The Medi-Cal program provides for a special methodology of reimbursement of disproportionate share hospitals for the provision of inpatient hospital services. Existing law generally defines a disproportionate share hospital as a hospital that has disproportionately higher costs, volume, or services related to the provision of services to Medi-Cal or other low-income patients than the statewide average.

This bill would provide that disproportionate share hospitals meeting specified requirements that have submitted final plans for an eligible capital project may submit

substitute final plans and shall qualify for supplemental reimbursement for the revised capital project if specified conditions are met.

Ch. 724 (AB 1172) Kaloogian. Estates and trusts.

(1) Existing law authorizes the appointment of referees, as specified, to try any or all issues in a civil action or proceeding, whether of fact or law, and to report a statement of decision thereon or to ascertain a fact necessary to enable a court to determine an action or proceeding. Existing law provides specified grounds upon which a party may object to the appointment of a referee, including the ground that the person does not meet statutory qualifications to be a juror.

This bill would provide an exception to this ground if the statutory qualifications require the referee to be a resident of a particular county in the state.

(2) Existing law defines a fiduciary for purposes of the Probate Code to mean a personal representative, guardian, conservator, or other legal representative.

This bill would revise this definition to mean prescribed persons who are legal representatives subject to the Probate Code.

(3) Existing law establishes the right to a hearing and notice regarding various actions under the Probate Code.

This bill would provide for an evidentiary hearing, upon request, on any contested issue of fact in any matter under the code and would provide that no notice is required to be given to children under 12 if one of 2 specified conditions is met.

(4) Existing law generally regulates accounts to be filed with a court.

This bill would revise these regulatory provisions, as specified.

(5) Existing law requires any request for a court order to give a conservator the power to consent to medical treatment to be accompanied by a declaration by a licensed physician or psychologist within the scope of his or her practice.

This bill would revise this provision to instead prohibit the court order from being issued unless accompanied by this declaration.

(6) Existing law establishes the right to appeal the making or denial of various orders or judgments specified in the Probate Code.

This bill would revise and recast these provisions, as specified.

(7) Existing law prohibits the issuance of letters of guardianship or conservatorship before a copy of the court order appointing the guardian or conservator is mailed to the ward if 14 years of age or older.

This bill would repeal this provision.

(8) Existing law provides, with specified exceptions, that if a testator fails to provide in his or her will for a surviving spouse who married the testator after the execution of the will, the omitted spouse is required to receive one-half of the testator's community and quasi-community property and a share of the separate property of the testator equal in value to that which the spouse would have received if the testator had died intestate, but in no event is this share to be more than one-half the value of the separate property in the estate.

Existing law provides that if a testator fails to provide in his or her will for his or her child born or adopted after the execution of the will, the omitted child is required to receive a share in the estate equal in value to that which the child would have received if the testator had died intestate, except as specified.

This bill would revise and recast these provisions to provide that if a decedent fails to provide by a testamentary instrument for his or her child born or adopted after the execution of all the decedent's testamentary instruments, the omitted child is required to receive a share in the decedent's estate equal in value to that which the child would have received if the decedent had died intestate and had not executed a testamentary instrument, except as specified.

This bill would also provide that if a decedent fails to provide by testamentary instrument for his or her surviving spouse who married the decedent after the execution of all the decedent's testamentary instruments, the omitted spouse is required to receive one-half of the decedent's community and quasi-community property and a share of the separate property of the decedent equal in value to that which the spouse would have received if the decedent had died intestate, but in no event is this share to be more than one-half the value of the separate property in the estate, except as specified.

(9) Existing law authorizes the admission of a will to probate notwithstanding the prior admission of another will. Existing law provides that the subsequent will may not affect property previously distributed, but authorizes the court to determine how this will affect property not yet distributed and the provisions of the other will.

This bill would prohibit the proponent of the subsequent will from petitioning to admit the will after specified conditions are met.

(10) Existing law provides that a person who is appointed a personal representative is not liable for any otherwise proper act done in good faith if the order of appointment is reversed on appeal.

This bill would delete this provision.

(11) Existing law imposes a duty upon a trustee to keep the beneficiaries of a trust reasonably informed and requires a trustee to provide, upon request, a beneficiary with a report of prescribed information regarding the trust, trustee, and administration of the trust.

This bill would require a trustee to provide other specified information regarding certain events in connection with an irrevocable trust or irrevocable portion of a trust, as specified, and would prohibit a person who receives a notice pursuant to these provisions from bringing an action to contest the trust after a specified period of time.

(12) Existing law prohibits donative transfers to prescribed persons, except as specified.

This bill would extend the applicability of this prohibition to donative transfers to care custodians of a dependent adult, as defined.

(13) Existing law prohibits the disclosure of confidential information regarding applicants and recipients of public assistance benefits, with certain exceptions.

This bill would revise these provisions to, among other things, provide that an adult protective services employee or ombudsman is authorized to truthfully answer specified questions in the context of a proceeding for the appointment of a conservator for a prescribed person or in the context of a criminal prosecution, as specified.

(14) Existing law defines "fiduciary abuse," as specified.

This bill would revise this definition to include a prescribed situation.

(15) This bill would also make various technical and clarifying changes.

Ch. 725 (AB 1447) Washington. Parklands conversion: West Park: City of Compton.

The State Beach, Park, Recreational, and Historical Facilities Bond Act of 1974 and the California Parklands Act of 1980 require that property acquired or developed with bond act grant funds be used by the grantee only for the purpose for which the funds were requested and that no other use be permitted except by a specific act of the Legislature.

This bill would authorize the City of Compton to convert a 3-acre parcel of land known as West Park, which is located in the City of Compton, and which was acquired and developed with state funds granted to the city pursuant to those bond acts, if the city uses the proceeds of the sale of West Park to acquire and develop substitute parklands at a new site located at 2701 Alondra Boulevard in the city.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 726 (AB 1558) Committee on Agriculture. Agricultural commissions.

(1) Existing law establishes numerous marketing advisory and promotional councils and commissions to promote the state's agricultural and seafood products.

This bill would authorize each commission established pursuant to specified provisions of existing law to commence or participate in administrative and civil actions relative to the activities of the commission.

(2) Existing law provides for the California Pistachio Commission in state government. The purpose of the commission is, among other things, to promote the sale of pistachios by advertising and other promotional means. Under existing law, the operating costs of the commission are financed by an assessment that is imposed on producers of pistachios. The assessment is based on the average price paid to producers, computed on a per pound or on a basis reasonably equivalent to the per pound computation, as determined by the commission.

This bill would require the assessment to be based on the average price received by producers. The bill would substitute the term “producer-supplier” for the term “handler” in the provisions governing the commission. The bill would permit the commission to require processors and producer-suppliers to provide records and other information necessary for the commission to carry out its duties, and would make it a misdemeanor to fail or refuse to furnish any report, statement, or record required by the commission, thereby imposing a state-mandated local program.

(3) Existing law establishes the California Grape Rootstock Improvement Commission and defines terms for purposes of the law governing that commission.

Existing law defines “grape rootstock nursery” or “nursery,” for these purposes, as any person in this state which operates under a California state nursery license and grows grape rootstock for distribution or sale.

This bill, instead, would define these terms to mean any person in this state which operates under a California state nursery license and grows grape rootstock for commercial use or distribution.

Under these provisions, existing law defines “invoicable unit,” for these purposes, to mean any rootstock cutting, or rooted rootstock cutting, or bench grafted grape rootstock distributed or sold for which sales records are kept.

This bill, instead, would define “invoicable unit” to mean any rootstock cutting, or rooted rootstock cutting, or grafted grape rootstock that is used or distributed by a nursery for commercial purposes.

The bill also would define the term “distribute,” for these purposes.

(4) Under existing law, the California Avocado Commission consists of 10 avocado producers who are not handlers, 4 avocado handlers, and one public member. Existing law provides for the staggering of terms for the first members of the commission.

This bill would specify that subsequent to the election of the first members of the commission, the terms of commissioners shall continue to be staggered.

(5) Under existing law, the California Tomato Commission consists of 10 producers, 6 handlers, and may include one public member, at the discretion of the commission. Under these provisions, producers within the respective districts, as described, are required to elect producer members to the commission.

This bill would increase the handler members of the commission from 6 to 7, and would revise the makeup of the districts and the election of producer members from those districts, as specified. In addition, the bill would designate a new District 3 as Baja California (Mexico) and would require handlers in California who exclusively handle tomatoes produced in this district to elect one handler as a member of the commission. The bill would require an individual serving on the commission as a representative of District 3 to be a United States citizen.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 727 (AB 1559) Cardoza. Food and agriculture.

(1) Existing law provides for the seizure and disposition of estrayed stock and domestic animals. Existing law requires the Secretary of Food and Agriculture to cause a notice of the taking up of the animal to remain posted for a period of 14 days on a bulletin board in each office of the Bureau of Livestock Identification.

This bill would additionally permit the secretary to distribute the notice to the county department of agriculture and all sales yards in the state.

(2) Existing law requires every person to register with the State Department of Health Services upon first engaging in the manufacture, packing, or holding of processed food in this state. Existing law also requires each of these registrants to pay a surcharge of \$100 to the Department of Pesticide Regulation, which funds are deposited in the Food Safety Account in the Department of Pesticide Regulation Fund.

This bill would rename that surcharge the “food safety fee” and would require that fee to be paid to the State Department of Health Services. The bill would require the deposit of those funds in the Food Safety Fund in the State Treasury. The bill would specify that

the funds shall be used by the state department, upon appropriation, to assist in developing and implementing education and training programs related to food safety. These provisions governing the food safety fee would be repealed on January 1, 2001.

(3) Existing law creates the Department of Pesticide Regulation Fund.

This bill would require the Director of Pesticide Regulation to transfer a portion of that fund into the Food Safety Account, to be used for the pesticide residue monitoring program and for testing produce for pesticide residues.

Ch. 728 (AB 1575) Committee on Human Services. Community care facilities: foster care.

Existing law provides for the licensure and regulation of community care facilities, as defined, by the State Department of Social Services. Existing law authorizes the department to suspend or revoke the license of a community care facility based on specified grounds, and pursuant to certain administrative hearing procedures. Existing law sets forth procedures under which the Director of Social Services is authorized to temporarily suspend any license prior to any hearing when, in the opinion of the director, the action is necessary to protect residents or clients of the facility from physical or mental abuse, abandonment, or any other substantial threat to health or safety.

This bill, instead, would authorize the director to temporarily suspend the license under the above circumstances if the action is urgent to protect residents as provided above. The bill would revise the procedures under which the department is authorized to temporarily suspend any license to require the director, when serving the licensee with the temporary suspension, to include designated other evidence and the names of the department's witnesses.

Existing law grants the licensee a right to an interim hearing on an order of temporary license suspension, requires the office of Administrative Hearings, upon setting an interim hearing, to post public notice of the hearing, and specifies that nothing in these provisions precludes a licensee from proceeding directly to a full evidentiary hearing.

This bill would specify that nothing in these provisions precludes a licensee from seeking review of the temporary suspension order by the superior court without first requesting an interim hearing nor requires resolution of the interim hearing prior to review by the superior court. The bill would provide that the relief that may be ordered is a stay of the temporary suspension order. The bill would also delete the requirement that the office post public notice, as designated.

Under existing law, the interim hearing on the order is limited to the issue of whether the department abused its discretion under these provisions in issuing the order and the evidence at the interim hearing is limited to the department's accusation and order of temporary license suspension.

This bill would delete the above limitations. The bill would require, instead, that the interim hearing provide to the licensee and the department, at a minimum, designated rights. The bill would require the administrative law judge to vacate the temporary suspension upon a finding that there is a reasonable probability that the licensee will prevail in the underlying action and the likelihood of physical or mental abuse, abandonment, or other substantial threat to the health or safety of residents or clients in not sustaining the order does not outweigh the likelihood of injury to the licensee in sustaining the order.

Existing law requires the administrative law judge to issue a verbal interim decision at the conclusion of the interim hearing and issue a written interim decision within one working day following the conclusion of the hearing, limited in scope to sustaining or vacating the order.

This bill would require, instead, the written interim decision within 5 working days following the hearing, delete the above limitation in the scope of the decision, and require that the decision include findings of fact and a conclusion articulating the connection between the evidence produced at the hearing and the decision reached.

Existing law subjects the interim decision to review pursuant to designated provisions of the Code of Civil Procedure and restricts the hearing on the interim decision to the issue of whether the department abused its discretion under these provisions in issuing the order of temporary license suspension.

This bill would delete the above restriction as to the hearing on the interim decision.

Existing law provides that the department is deemed to have abused its discretion in issuing an order of temporary license suspension only if the department's accusation and order of temporary license suspension fail to allege facts and conditions showing that issuance of the order is necessary as described above.

This bill would delete this provision.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which payments are made on behalf of low-income children placed in foster care. For purposes of these provisions, including the setting of group home rates, the reasonable costs of affiliated leases for shelter care for foster children are allowable costs. However, reimbursement of shelter costs is prohibited from exceeding 12% of the fair market value of owned, leased, or rented buildings, exclusive of idle capacity and capacity used for nongroup home programs and activities.

This bill would provide that the reasonable costs of leases for shelter care for foster children are allowable costs. The bill would authorize the department to adopt emergency regulations to implement the above provisions related to the reimbursement of shelter costs.

Existing law, for purposes of reimbursement of shelter costs under the above provisions, subjects the allowable costs of affiliated leases to a review by the Charitable Trust Section of the Department of Justice.

This bill would provide that allowable costs of affiliated leases shall be permitted to the extent allowed by federal law for federal financial participation.

Ch. 729 (SB 450) Peace. Workers' compensation.

Existing law requires the Administrative Director of the Division of Workers' Compensation of the Department of Industrial Relations to develop a workers' compensation information system in consultation with the Insurance Commissioner and the Workers' Compensation Insurance Rating Bureau, as specified.

This bill would require the administrative director to adopt regulations specifying the data elements for the information system to be collected by electronic data interchange. The bill would also require the information system to be cost efficient.

Ch. 730 (SB 617) Monteith. County health services.

Existing law provides for the continuous appropriation of money from the state Local Revenue Fund for allocation to local entities for the provision of social and health benefits.

Existing law, as contained in provisions which would become inoperative on July 1, 1997, and would be repealed on January 1, 1998, allocates a portion of the money in the Local Revenue Fund to the Hospital Services Account of that fund for local funding of emergency health services provided by county and noncounty hospitals.

Existing law further provides that in any county that comprises not more than 50% of the total state population and in which there are a county hospital and a noncounty hospital with emergency rooms located within 2 miles of each other, the county hospital may surrender its emergency room permit without penalties in specified circumstances, including San Luis Obispo County.

This bill would, contingent upon enactment of legislation extending the duration of these provisions, also apply this provision to Stanislaus County. This bill would also provide for public hearings regarding the availability of clinic services.

Ch. 731 (SB 970) Committee on Health and Human Services. Hospitals: safety standards.

Existing law, known as the Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983, requires the Office of Statewide Health Planning and Development to be responsible for the enforcement of building standards relating to hospital buildings, including plan checking and the inspection of the design and details of the architectural, structural, mechanical, electrical, and fire and life safety systems. That act requires that all plans and specifications relating to hospital construction be prepared under the responsible charge of an architect or a structural engineer.

This bill would authorize the Office of Statewide Health Planning and Development to exempt, by regulation, projects from the requirement that all plans and specifications

relating to hospital construction be prepared under the responsible charge of an architect or a structural engineer where the plans and specifications are not ordinarily, in the usual practice in the industry, prepared by licensed architects or registered engineers and are not a component of a project prepared under the responsible charge of a licensed architect or registered engineer, or both. Regulations that implement these provisions would be required to specify which projects may be exempted from the requirement that all plans and specifications be prepared under the responsible charge of an architect or a structural engineer.

The existing Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983 also requires the Office of Statewide Health Planning and Development to approve certain classes of inspectors of construction or alteration of hospital buildings and defines those classes of inspectors as follows:

(1) Class "A" inspectors are defined as those who may inspect all phases of construction, including, but not limited to, structural.

(2) Class "B" inspectors are defined as those who may inspect all phases of construction, except structural.

(3) Class "C" inspectors are defined as those who may inspect all phases of construction projects that the office determines do not materially alter the mechanical, electrical, architectural, or structural integrity of the health facility.

This bill would change the definition of Class "C" inspectors to those who may inspect one or more areas of construction specialty, including structural, but may not inspect the scope of construction specialties authorized for Class "A" or "B" inspectors.

Ch. 732 (SB 1034) Maddy. Health facilities and services: medical waste: trauma scene waste management.

(1) Existing law governing clinics requires the Office of Statewide Health Planning and Development, in consultation with the Community Clinics Advisory Committee, to prescribe minimum construction standards of adequacy and safety for the physical plants of clinics. Existing law requires a city or county to have plan review and building inspection responsibilities for, and authorizes the office to have plan review responsibilities for, the construction or alteration of surgical clinics and chronic dialysis clinics, as prescribed.

This bill would provide that for these buildings, construction and alteration would include conversion of a building for purposes of a surgical or chronic dialysis clinic.

(2) Existing law, the Medical Waste Management Act, administered by the State Department of Health Services, regulates the management and handling of medical waste, as defined. A violation of the medical waste act is a crime.

Existing law does not specifically provide for the regulation of medical waste that is trauma scene waste.

This bill would enact the Trauma Scene Waste Management Act, as part of the Medical Waste Management Act, to specially provide for the management of trauma scene waste, as defined. The department would be the sole enforcement agency with regard to the management of trauma scene waste.

The bill would allow trauma scene waste to be transported by a trauma scene waste management practitioner, as defined, who would be subject to prescribed registration requirements, and would specify related matters. Trauma scene waste would be required to be removed from a trauma scene, as defined, immediately upon completion of the removal phase of a trauma scene waste removal operation.

The bill would require a specified registration fee to be paid to the department, which would be deposited in the Medical Waste Management Fund. The bill would allow the department to expend those fee revenues, upon appropriation by the Legislature, for implementation of the trauma scene waste act.

The bill would require the department to maintain an inventory of trauma scene waste management practitioners, as prescribed.

The bill would authorize a business that contracts with or employs a person whose services include the cleanup of trauma scene waste, as specified, to apply to the department for an exemption from the registration requirements imposed by the bill. The exemption, to be known as an incidental trauma scene hauling permit, would be available for one cleanup event upon payment of a \$25 application fee to the department.

The bill would make conforming changes in the Medical Waste Management Act and specify related matters.

Since a violation of the bill's requirements regarding trauma scene waste transportation, removal, and storage would be a crime, the bill would impose a state-mandated local program by creating new crimes.

(3) The existing Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983 requires that the construction or alteration of a building in which outpatient clinic services are provided and which is separated from a building in which hospital services are provided, is subject to plan review and inspection by a city, county, or city and county.

This bill would provide that for buildings subject to these provisions that are used for chronic dialysis and surgical services, construction or alteration would include conversion of a building to be used for outpatient services.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 733 (SB 1101) Alpert. Sales and use taxes: exemptions: ground control station.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property and provides various exemptions from the taxes imposed by that law. That law provides an exemption for aircraft used as a common carrier, as specified, or sold to any person who is not a resident of this state and who will not use the aircraft in this state.

This bill would also provide an exemption for a "ground control station," as defined, sold to any foreign government or nonresident for use outside the state.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 734 (SB 1307) Costa. Public water systems.

(1) Existing law sets forth definitions governing the California Safe Drinking Water Act.

This bill would revise some of those definitions and would also require those definitions to govern a provision of law relating to certification of persons to supervise and operate water treatment plants.

(2) Existing law prohibits the California Safe Drinking Water Act from applying to certain irrigation canal systems or in areas where the water service rendered by a person is primarily agricultural.

This bill would delete those provisions on and after August 6, 1998.

(3) Existing law defines "service connection" for purposes of the California Safe Drinking Water Act and provides that if certain conditions apply, a connection to a system that delivers water by a constructed conveyance in other than a pipe is not a connection in determining if the system is a public water system.

This bill would prohibit certain water districts, as defined, from being considered to be a public water system if the State Department of Health Services makes a prescribed determination. For purposes of the above provisions under which determinations are made regarding whether a system or water district is a public water system, the bill would require the department to place certain requirements on affected water systems, utilize certain criteria in making determinations, and monitor and review certain conditions of a water system or water district periodically. The bill would authorize the department

to prescribe reasonable, feasible, and cost-effective actions to be taken by water systems, water districts, and users subject to these provisions.

(4) Existing law authorizes the department to issue a citation to, and assess civil penalties upon, a public water system that violates the California Safe Drinking Water Act. Under these provisions a failure to comply with any citation or order issued for failure of the primary drinking water standard for turbidity or for violation of a secondary drinking water standard that the director determines may have a direct or immediate relationship to the welfare of the users is subject to a civil penalty not to exceed \$250 for each day that the violation continues beyond the date specified for correction in the citation.

This bill would increase this civil penalty to not exceed \$1,000.

(5) Existing law prohibits laboratories, other than laboratories operated by the department, from performing certain tests for any public water system without first obtaining a prescribed certificate, except for laboratories previously issued certificates.

This bill would delete that exception.

(6) Existing law authorizes the department to exempt any public water system from any maximum contaminant level or treatment technique requirement if it makes certain findings.

This bill would revise the findings the department is required to make as a condition of exempting any public water system from the containment level and treatment technique requirements.

(7) Existing law prohibits a public water system, in existence on January 1, 1991, from being granted a permit by the department to operate a public water system unless the system demonstrates that the water supplier possesses adequate financial capability to deliver pure, wholesome, and potable drinking water.

This bill would instead make that provision applicable to a public water system in existence on January 1, 1998, and would require the demonstration that the water supplier also possesses adequate managerial and technical capability.

(8) Existing law requires the department to submit a final invoice to certain public water systems for regulatory costs incurred prior to September 1 following the fiscal year the costs were incurred.

This bill would change that date to October 1 following the fiscal year the costs were incurred.

(9) Existing law requires the department to submit an invoice to a water system with respect to a request for an exemption, variance, or waiver within 90 days of the department's final decision.

This bill would change that date to prior to October 1 of the fiscal years following the fiscal year in which the department's decision was rendered and would include plan reviews in the requirement.

(10) Existing law requires the prevailing party to be awarded litigation costs in any court action brought to enforce the California Safe Drinking Water Act.

This bill would instead make that requirement applicable to any civil court action brought to enforce the California Safe Drinking Water Act.

(11) This bill would enact the Safe Drinking Water State Revolving Fund Law of 1997 and would authorize the department to administer the Safe Drinking Water State Revolving Fund, which would be established in the State Treasury and continuously appropriated to the department to provide, from moneys available for this purpose, grants or revolving fund loans for the design and construction of projects, as defined, for public water systems, as defined, that will enable suppliers, as defined, to meet safe drinking water standards, as defined. The bill would authorize the department to enter into an agreement with the federal government for federal contributions into the fund if the state has obtained or appropriated any required state matching funds and the department is prepared to commit to expenditure of any federal minimum amount in the fund. The bill would require federal funds deposited in the special accounts to be continuously appropriated to the department. The bill would require the department to submit a report at least once every 2 years to the policy and budget committees of the Legislature on the implementation of this law and expenditures from the fund.

The bill would authorize the department to adopt emergency regulations. The bill would require the department to establish criteria for projects to be eligible for funding.

The bill would require the department to establish planning and preliminary engineering studies, project design, and construction costs eligible for funding. The bill would authorize the department to enter into contracts with applicants for grants for loans, under certain terms and conditions. The bill would govern use of moneys in the fund and would authorize the department to establish interest rates for loans from the fund. The bill would require the department, contingent upon receiving federal capitalization grant funds and in coordination with certain local, state, and federal agencies, to develop and implement a designated program to protect sources of drinking water. The bill would require the department to submit a report to the Legislature every 2 years on these activities.

(12) Existing law regulates the use and sale of solder containing more than certain amounts of lead and the use of lead pipe.

This bill would delete that provision. The bill would prohibit any person from using any pipe, pipe or plumbing fitting or fixture, solder, or flux that is not lead free, as defined, in the installation or repair of any public water system or any plumbing in a facility providing water for human consumption, except as prescribed. The bill would prohibit introduction into commerce of any pipe, pipe or plumbing fitting, or fixture that is not lead free, except as prescribed. The bill would prohibit any person engaged in the business of selling plumbing supplies, except manufacturers, from selling solder or flux that is not lead free. The bill would prohibit any person from introducing into commerce any solder or flux that is not lead free, except as prescribed. The bill would require the department to adopt building standards to implement those provisions.

(13) Under existing law, the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board and each California regional water quality control board, as defined, have primary responsibility for the coordination and control of water quality.

The bill would authorize the board to develop and implement a groundwater protection program as provided under the federal Safe Drinking Water Act and any federal acts that amend or supplement that act. The bill would also provide that these provisions are not intended to expand the authority of the board as authorized under the Porter-Cologne Water Quality Control Act.

(14) The bill would make other technical changes.

(15) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 735 (SB 1332) Vasconcellos. Disabled persons: funding.

Existing law authorizes the Department of Rehabilitation to establish orientation centers for the blind as may be deemed necessary to provide, on a statewide basis, services for vocational and personal rehabilitation, and specifies that, to the extent resources are available, the department may utilize funds by appropriation from Congress, by gifts, grants, or reimbursements from private or public sources or by state appropriations, or both, or by transfer of funds from other state departments subject to usual budgetary controls, for the purpose of establishing and operating rehabilitation programs, including an Orientation Center for the Blind, or of providing vocational rehabilitation or independent living services or cooperating with other private or public agencies for those purposes.

This bill would establish in the State Treasury the Orientation Center for the Blind Trust Fund, which would be continuously appropriated without regard to fiscal years, to the department for allocation to the Orientation Center for the Blind for specified purposes. It would require the director to create an Orientation Center for the Blind Trust Fund Committee.

Existing law provides for the provision of services to eligible individuals with disabilities through independent living centers.

This bill would specify that for the 1997-98 fiscal year, each independent living center, with certain exceptions, shall receive a minimum base grant, to the extent funds are appropriated for the purpose, and would make that allocation only if the appropriation in the Budget Act of 1997 exceeds the amount appropriated in the Budget Act of 1996 by a specified amount.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 736 (SB 187) Hughes. Comprehensive school safety plans.

Existing law declares the intent of the Legislature that all California public schools operated by school districts develop a comprehensive school safety plan, as specified. The comprehensive school safety plan may include, among other things, development of an action plan, in conjunction with local law enforcement agencies, for implementing appropriate safety strategies and programs and determining the fiscal impact of executing the strategies and programs. Existing law provides for grants to assist schools in implementing their comprehensive school safety plans.

This bill would make each school district and county office of education responsible for the overall development of comprehensive school safety plans for its schools. The bill would require schoolsite councils to write and develop a comprehensive school safety plan relevant to the needs and resources of that particular school, except with regard to small school districts, as defined, which would have the option of developing districtwide comprehensive school safety plans applicable to each schoolsite. The bill would authorize schoolsite councils to delegate this responsibility to a school safety planning committee, to be composed as specified. This bill would not limit or remove the authority of school boards as guaranteed in the Education Code.

This bill would require that the comprehensive school safety plan include, but not necessarily be limited to, among other things, assessing the current status of school crime committed on school campuses and at school-related functions and identifying appropriate strategies and programs that will provide or maintain a high level of school safety and address the school's procedures for complying with existing laws related to school safety, which shall include specified procedures and policies.

This bill would require that the comprehensive school safety plan be evaluated and amended, as needed, by the schoolsite council or the school safety planning committee no less than once a year. The bill would also require that an updated file of all safety-related plans and materials be readily available for inspection by the public. The bill would require the comprehensive school safety plan to be submitted for approval, as specified.

The bill would require that each school adopt its comprehensive school safety plan by September 1, 1998.

This bill would provide that, if the Superintendent of Public Instruction determines that there has been a willful failure to make any report required by these provisions, the Superintendent of Public Instruction would be required to make an assessment of not more than \$500 against that school district or county office of education, as specified.

This bill would require each school to forward its comprehensive school safety plan to the school district or county office of education for approval. Before adopting the comprehensive school safety plan, the schoolsite council or school safety planning committee would be required to hold a public hearing to allow the members of the public to express an opinion about the school safety plan. The bill would require each school district or county office of education to notify the State Department of Education by October 15, 1998, of any schools that have not complied with the requirement of developing a comprehensive school safety plan.

The bill would require a school, other than a school in a small school district, that submits a comprehensive school safety plan in existence on December 31, 1997, to be deemed to have satisfied the requirements of the law in this area on and after the effective date of this bill if the comprehensive school safety plan meets specified requirements in effect.

This bill would repeal these provisions on January 1, 2000, however, the comprehensive school safety plan would continue to be evaluated and amended by the schoolsite council.

This bill would make statements of legislative intent.

By imposing additional responsibilities on school districts, county offices of education, and schools, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 737 (AB 352) Scott. Teacher credentialing.

Existing law provides a finding and declaration by the Legislature that education paraprofessionals who serve pupils in the public schools provide valuable instructional services to pupils. The Legislature further declares that a program to enhance instructional competencies certification and to prepare school paraprofessionals to become teachers would result in improved services in terms of their role in the instructional program in the classroom. Existing law establishes a pilot program named the California School Paraprofessional Teacher Training Program (the program), as specified. The Commission on Teacher Credentialing (the commission), in consultation with the Chancellor of the California Community Colleges, the Chancellor of the California State University, and representatives of certificated and classified employee organizations, is required to select 12 or more school districts or county offices of education that have 300 or more classified employees to participate in the program and to recruit school paraprofessional employees. Existing law specifies what is required to be included in the criteria adopted by the commission for the selection of school districts and county offices of education to participate in the pilot program.

This bill would require the criteria adopted by the commission for the selection of school districts or county offices of education to participate in the program a requirement also to include the extent to which the applicant's plan for recruitment attempts to meet the demand for multiple subject credentialed teachers interested in teaching kindergarten or any of grades 1 to 3, inclusive, and would require each paraprofessional selected to participate to have completed at least 2 years of undergraduate college or university coursework and to have demonstrated an interest in obtaining a multiple subject teaching credential for teaching kindergarten or any of grades 1 to 3, inclusive.

This bill would incorporate the provisions of Section 44392 to be added to the Education Code by AB 353, to be operative only if AB 353 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

This bill would incorporate additional changes in Section 69619.1 of the Education Code, proposed by AB 353, to be operative only if AB 353 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

Ch. 738 (AB 1238) Granlund. Vehicles: schoolbus certificates.

(1) Existing law requires applicants for an original certificate to drive a schoolbus, school pupil activity bus, youth bus, or general public paratransit vehicle to be fingerprinted by the Department of the California Highway Patrol on a form provided and approved by the Department of Motor Vehicles for submission to the Department of Justice.

This bill would require applicant fingerprint forms to be processed and returned to the area office of the Department of the California Highway Patrol from which they originated not later than 15 working days from the date on which the fingerprint forms were received by the Department of Justice, except as specified. The bill would require the Department of Justice to provide the required information within 3 working days upon the implementation of a prescribed electronic fingerprinting program.

(2) Existing law requires the Department of Motor Vehicles to revoke a schoolbus, school pupil activity bus, youth bus, or general public paratransit driver certificate, and deny an application for that certificate, for any of specified causes.

This bill would require the department to revoke the specified certificate following an opportunity to challenge the validity of the test, for 3 years if the certificate holder has received a positive test result for a controlled substance, as specified in federal regulations and existing law, except where the certificate holder is in compliance with a prescribed rehabilitation or return to duty program that meets specified federal requirements.

The bill would require the department to deny an application for the specified certificate if the applicant has received a positive test result, as specified, following an

opportunity to challenge the validity of the test, for 3 years from the date of the confirmed positive test result.

The bill would require the carrier that requested the specified test to report the positive test result to the department not later than 5 days after receiving notification of the test result on a form approved by the department.

The bill would require the department to maintain a positive test result reported as specified above in the driving record of the applicant or certificate holder for 3 years from the date the department receives the report.

Ch. 739 (AB 1297) Morrow. Vehicles: schoolbuses.

(1) Existing law requires the State Board of Education to adopt reasonable regulations relating to the use of schoolbuses by school districts and others and requires the Department of the California Highway Patrol to adopt regulations relating to the safe operation of schoolbuses, as specified.

This bill would require the county superintendent of schools, the superintendent of a school district, or the owner or operator of a private school that provides transportation to or from a school or school activity to prepare a transportation safety plan containing procedures for school personnel to follow to ensure the safe transport of pupils, as prescribed. The bill would require a copy of that plan to be retained by each school subject to the plan and made available upon request to an officer of the department.

(2) Existing law requires the driver of a schoolbus to operate a flashing amber light warning system on the approach to a schoolbus stop where pupils are loading or unloading from the bus and must cross a highway or private road and to operate flashing red signal lights and a stop signal arm at all times when the schoolbus is stopped for the purpose of loading or unloading pupils who must cross a highway or private road upon which the schoolbus is stopped. Existing law authorizes a school district to designate selected schoolbus stops as stops that may require the activation of the flashing red signal lights even though there are no pupils crossing the roadway, as prescribed.

This bill would repeal that schoolbus stop designation authority of a school district, and, except as specified, require the driver of a schoolbus to operate the specified warning lights and signs on the approach to the above described schoolbus stop and at all times when the schoolbus is stopped for the purpose of loading or unloading pupils, regardless of whether the pupils must cross the highway or private road.

(3) The provisions of this bill would be known as the Thomas Edward Lanni Schoolbus Safety Act of 1997.

Ch. 740 (AB 51) Murray. Crimes: places of worship.

Existing law provides that any person who commits a felony or attempts to commit a felony against the property of a public agency or private institution, including specified places, because the property is identified or associated with a person or group of an identifiable race, color, religion, nationality, country of origin, ancestry, gender, disability, or sexual orientation, shall receive an additional term of 1, 2, or 3 years in the state prison, at the court's discretion.

This bill would add places of worship to the list of specified places included in the above provision.

Ch. 741 (AB 99) Runner. Body piercing.

Existing law makes it a misdemeanor to tattoo or offer to tattoo a person under the age of 18 years.

This bill would make it an infraction, until January 1, 2005, for any person to perform or offer to perform body piercing, as defined, upon a person under the age of 18 years, unless performed in the presence of, or as directed by a notarized writing by, that person's parent or guardian. By creating a new crime, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 19.8 of the Penal Code proposed by AB 1390, to be operative if AB 1390 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would become operative only if AB 186 is also enacted and becomes effective on or before January 1, 1998.

Ch. 742 (AB 186) Brown. Tattooing, body piercing, and permanent cosmetics.

Existing law provides that it is a crime to tattoo or offer to tattoo a person under the age of 18 years.

Existing law establishes the California Conference of Local Health Officers which consists of all legally appointed local health officers in the state. Expenses for no more than 2 meetings of the conference per year are a charge against the local governmental unit and expenses for attendance at special meetings of the committees of the conference called by the director are a charge against any state funds available for this purpose.

This bill would direct the California Conference of Local Health Officers to establish sterilization, sanitation, and safety standards for persons engaged in the business of tattooing, body piercing, or permanent cosmetics. The standards would be based, to the extent appropriate, on the Bloodborne Pathogen Standard of the Department of Industrial Relations, modified as necessary for the purpose of protecting consumers from transmission of contagious diseases through cross-contamination of instruments and supplies. The bill would require that the standards be submitted to the State Department of Health Services by July 1, 1998, and that the department distribute the standards in written form to all county health departments. The bill would authorize the California Conference of Local Health Officers to periodically review the adopted standards and amend them as necessary. Because the bill would increase the costs of local government by requiring the conference to develop certain standards, the bill would impose a state-mandated local program.

The bill would require practitioners of tattooing, body piercing, and permanent cosmetics to be registered with the county in which they practice, obtain a copy of the department's standards and commit to comply with the standards, provide the county health department with a business address and the address at which the regulated activities are conducted, and pay registration and inspection fees, as specified. The bill would also require county health departments to annually inspect the locations where tattooing, body piercing, and permanent cosmetics are practiced, thus imposing a state-mandated local program. Counties would be permitted to adopt any regulation that is not in conflict with, or is more comprehensive than, these provisions.

In addition, this bill would establish a task force to be chaired by the president of the California Conference of Local Health Officers, with participation by representatives of specified groups. The task force would be formed for the purpose of recommending legislation to regulate these areas, and would be required to report to the Legislature by January 1, 1999.

The bill would provide that these provisions shall not be interpreted to restrict the activities of a licensed physician and surgeon.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would provide that it would become operative only if AB 99 of the 1997-98 Regular Session of the Legislature is enacted and becomes effective on or before January 1, 1998.

Ch. 743 (AB 662) Hertzberg. Vehicles: fleeing or evading a peace officer; reckless driving; removal and impoundment.

(1) Existing law makes it a crime for any person, while operating a motor vehicle with the intent to evade, to willfully flee, or to otherwise attempt to evade, a pursuing peace officer's motor vehicle or bicycle if certain conditions exist. Existing law provides for enhanced penalties when additional circumstances exist. Existing law also makes it a crime to drive any vehicle upon a highway in willful or wanton disregard for the safety of persons or property.

This bill would require a magistrate to issue a warrant or order authorizing any peace officer to immediately seize and cause the removal of a vehicle, if presented with the affidavit of a peace officer establishing reasonable cause to believe that the vehicle, described by vehicle type and license number, was an instrumentality used in that officer's presence in violation of an offense described above. A vehicle so impounded would be subject to an impoundment period that is not to exceed 30 days.

The bill would prescribe procedures to be followed for the release of the vehicle prior to the end of the impoundment period, including a requirement that a legal owner who has obtained possession of the impounded vehicle not relinquish the vehicle to the registered owner until after the termination of the impoundment period and until after the registered owner has presented a valid driver's license or valid temporary driver's license to the legal owner. Because a violation of that requirement and certain other requirements and restrictions imposed by the bill would be an infraction, the bill would impose a state-mandated local program by creating a new crime.

The bill would require the magistrate ordering the storage of the impounded vehicle to provide the vehicle's registered and legal owners of record, or their agents, with the opportunity for a poststorage hearing to determine the validity of the storage. The bill would prescribe procedures for that hearing.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 744 (AB 1468) Runner. Concealed firearms: reserve or auxiliary peace officers.

Existing law authorizes the sheriff of a county or the chief or other head of a municipal police department of any city or city and county, upon proof that the person applying is of good moral character, that good cause exists for the issuance, and that the person applying is a resident of the county, to issue to that person a license to carry concealed a pistol, revolver, or other firearm capable of being concealed upon the person, valid for up to one year, or 3 years in the case of a deputized or appointed reserve or auxiliary peace officer. Existing law also exempts specified peace officers from certain prohibitions against carrying a concealed firearm.

This bill would authorize a sheriff or chief of police to issue a license to carry concealed a pistol, revolver, or other firearm capable of being concealed upon the person to a person who has been deputized or appointed a reserve or auxiliary peace officer by that sheriff or chief of police, and to waive fees for issuance of the license.

The bill would incorporate additional changes in Section 12050 of the Penal Code proposed by SB 146, to be operative if SB 146 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

Ch. 745 (SB 318) M. Thompson. Air pollution: rice straw burning.

(1) Existing law, the Connelly-Areias-Chandler Rice Straw Burning Reduction Act of 1991, limits the burning of rice straw in the Sacramento Valley Air Basin to prescribed percentages of the acres planted annually through 1999, and prescribes conditions and procedures for the issuance of conditional rice straw burning permits after 1999. A violation of the act is a misdemeanor.

This bill would instead specify the number of acres that may be burned in specified spring months and in specified fall months through 2000, and would revise the conditions and procedures that apply after 2000, as specified, thereby creating a state-mandated local program by changing the definition of a crime and by imposing new duties on local agencies with regard to implementing the bill. The bill would specify related matters.

(2) The act exempts from its provisions administrative burning, as defined, that is conducted as specified.

This bill would revise the definition of administrative burning to include the burning of vegetative materials on rice research facilities authorized by the county agricultural commissioner, not to exceed 2,000 acres.

(3) The bill would require the State Air Resources Board to administer a demonstration program for the development of new rice straw technologies through the awarding of grants.

(4) Existing law establishes the California Pollution Control Financing Authority, with specified powers and duties, and specifies which projects may be considered for financing.

This bill would include projects for the disposal of agricultural waste within that provision and would make related changes.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 746 (SB 347) M. Thompson. Vessels: boating safety.

(1) Under existing law, the use of any vessel, as defined, or the manipulation of water skis, an aquaplane, or a similar device, in a reckless or negligent manner so as to endanger the life, limb, or property of any person, is a misdemeanor.

This bill would make certain acts of operation of a personal watercraft, defined as a vessel less than 12 feet in length, propelled by machinery and designed to be operated by sitting, standing, or kneeling on, instead of inside, the vessel, an infraction. The acts would include operating a personal watercraft with a lanyard-type engine cutoff switch without the lanyard attached, altering a self-circling device or throttle to defeat a self-circling device, or operating in an unreasonable or imprudent manner, as described.

The bill would recast definitions relating to boating safety without substantive change and would add a definition of personal watercraft to those definitions. The bill would recast penalties for various boating offenses without substantive change and would add an infraction punishment for violations of the provisions of the bill relating to personal watercraft. Because the bill would create a new crime, the bill would impose a state-mandated local program.

This bill would incorporate additional changes to Section 668 of the Harbors and Navigation Code proposed by SB 545 and SB 810, to be operative only if all 3 bills, or a combination thereof, are enacted and become operative on or before January 1, 1998, and this bill is enacted last.

The bill would incorporate additional changes to Section 11837.3 of the Health and Safety Code proposed by AB 762, to be operative only if this bill and AB 762 are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 747 (SB 545) Rosenthal. Operation of vessels.

(1) Existing law makes a person who permits another person under 12 years of age to operate a motorboat, as defined, under certain circumstances guilty of an infraction and makes a person under 12 years of age who operates a motorboat under those circumstances guilty of an infraction with specified penalties upon conviction of a violation.

This bill, instead, would make a person under 16 years of age who operates a vessel powered by a motor of greater than 15 horsepower, with specified exceptions, guilty of an infraction, unless the vessel does not exceed 30 feet in length and is designed to use wind as its principal source of propulsion, or unless it is a dinghy used directly between

a moored vessel and the shoreline or between a moored vessel and another moored vessel.

The bill would further specify that a person 12, 13, 14, or 15 years of age who operates a vessel powered by a motor of greater than 15 horsepower, or a vessel that exceeds 30 feet in length and is designed to use wind as its principal source of propulsion, is guilty of an infraction, unless the vessel meets the qualifications stated above, or unless the person is accompanied in the vessel by a person who is at least 18 years of age and who is attentive and supervising the operation of the vessel.

The bill would specify that these provisions shall not apply to a person who operates a vessel as a performer in a professional exhibition; a person engaged in an organized regatta, vessel race, or water ski race; or a person engaged in a specified marine event.

The bill also would make a person who permits another person under 16 years of age to operate a vessel in violation of these provisions, with the specified exceptions, guilty of an infraction.

Because the bill would change the definition of, and create, new crimes, the bill would impose a state-mandated local program.

The bill, among other things, also would require the Department of Boating and Waterways, by October 1, 1998, to report to the Legislature on its recommendations for enhancement and expansion of boating safety and education, as specified.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 748 (SB 1217) Johnston. Workers' compensation: experience rating plans.

Existing law requires an insurer to report to its rating organization as corrections or revisions of losses, pursuant to the unit statistical plan and uniform experience rating plan approved by the Insurance Commissioner, if certain events have occurred. Among these events is that the claim has closed for 60% or less of its highest reported incurred value.

This bill would instead provide that whenever a claim or claims used in an experience rating are closed and reported pursuant to the unit statistical plan approved by the commissioner and are valued, in aggregate, at an amount that is less than 60% of the highest reported aggregate value of all of these claims, then the experience rating shall be revised pursuant to the uniform experience rating plan approved by the commissioner based on the most current reported values for all claims used in the experience rating. The bill would also make various technical, nonsubstantive changes.

Ch. 749 (AB 1320) Bordonaro. Developmentally disabled.

Existing law requires the State Department of Rehabilitation to implement a habilitation services program to provide work-activity program services for individuals with developmental disabilities.

This bill would revise the responsibilities and membership of habilitation teams in determining the appropriate services to be provided to recipients, revise eligibility requirements, and revise procedures for the sanction of providers under the program.

Existing law provides for the grant of awards to independent living centers during a fiscal year.

This bill would provide for the grant of the awards at the beginning of a fiscal year.

This bill would incorporate additional changes in Section 19356.6 of the Welfare and Institutions Code, proposed by AB 715, to be operative only if AB 715 and this bill are both chaptered and become effective January 1, 1998, and this bill is chaptered last.

Ch. 750 (SB 721) Lockyer. Sentencing: enhancements.

(1) Existing law provides for enhanced sentences under certain circumstances.

This bill would create a new definition of "specific enhancement."

(2) Existing law imposes a 5-year limit on the subordinate terms for consecutive sentences for offenses that are not violent felonies.

This bill would delete this 5-year limitation on subordinate consecutive terms for specified nonviolent offenses, including kidnapping, escape, felonies committed while

the defendant is confined in prison, subsequent convictions for making a credible threat against victims, witnesses, or their immediate families, or threatening or intimidating witnesses.

(3) Under existing law, when a consecutive term of imprisonment is imposed for 2 or more convictions for kidnapping involving separate victims or the same victim on separate occasions, the aggregate term includes a subordinate term of the middle term for the offense plus $\frac{1}{3}$ of any enhancements imposed.

This bill would include the full term of any specific enhancements imposed and would delete the reference to the same victim on separate occasions.

(4) Under existing law, when 2 or more enhancements relating to firearm use are imposed, only the greatest one applies. Existing law provides that the term of imprisonment shall not exceed twice the number of years imposed by the trial court as the base term, except under certain circumstances. Existing law authorizes the trial court to strike the additional punishment for specified enhancements if it determines that there are circumstances in mitigation.

Under existing law, if a person is sentenced to consecutive terms of imprisonment for making a credible threat to a victim or witness of a felony of which he or she was convicted, the total term of imprisonment is limited to 15 years, unless the person is confined in a state prison at the time of making the threat.

This bill would delete all of those provisions and would provide that all enhancements shall be alleged in the accusatory pleading and shall be admitted or proven. However, the bill would provide that when 2 or more enhancements may be imposed for being armed with or using a dangerous or deadly weapon or firearm in the commission of a single offense, only the greatest of those enhancements shall be imposed for that offense, and that when 2 or more enhancements may be imposed for the infliction of great bodily injury in the commission of a single offense, only the greatest of those enhancements shall be imposed for that offense.

(5) Existing law imposes a limit on the aggregate number of years of imprisonment for a person convicted of multiple residential burglaries, robberies, or arsons.

This bill would repeal that limit.

(6) This bill would incorporate additional changes in Section 1170 of the Penal Code proposed by AB 29, to be operative if AB 29 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

Ch. 751 (AB 29) Villaraigosa. Prisoners: medical release.

Existing law provides that a defendant sentenced to imprisonment in the state prison and committed to the custody of the Director of Corrections may have his or her sentence recalled and be resentenced.

This bill would establish a procedure whereby, if the Director of Corrections or the Board of Prison Terms or both recommend to the court that a prisoner's sentence be recalled, the court may recall the sentence if the court finds that the prisoner is terminally ill and the conditions under which the prisoner would be released or receive treatment do not pose a threat to public safety.

This bill would incorporate additional changes in Section 1170 of the Penal Code proposed by SB 721, to be operative if SB 721 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

Ch. 752 (SB 1014) Brulte. Dentistry: dental auxiliaries.

Existing law provides for the licensure and regulation of the practice of dentistry, and provides that certain acts constitute unprofessional conduct.

This bill would, with certain exceptions, provide that it constitutes unprofessional conduct for a dentist to perform or allow to be performed any treatment on a patient who is not a patient of record, as defined.

This bill would authorize a dentist, after conducting a preliminary oral examination, to require or permit a dental auxiliary to perform procedures necessary for diagnostic purposes provided that the procedures are permitted under the auxiliary's scope of practice.

The bill would also authorize a dentist to require or permit a dental auxiliary to perform prescribed duties prior to any examination of the patient by the dentist if these duties are authorized for the particular classification of dental auxiliary.

This bill would provide that it would become operative only if AB 560 is enacted and becomes effective on or before January 1, 1998.

Ch. 753 (AB 560) Perata. Dentistry: registered dental hygienist in alternative practice.

(1) Existing law provides procedures for the licensing of dental auxiliaries. These provisions define a dental auxiliary as a person who may perform dental supportive procedures authorized by law. Existing law authorizes the Board of Dental Examiners of California to impose various fees upon dental auxiliaries, subject to prescribed limits, for deposit in the State Dental Auxiliary Fund, a continuously appropriated fund.

This bill would establish a registered dental hygienist in alternative practice as a new category of dental auxiliary who may provide authorized services by prescription of a dentist or physician and surgeon licensed to practice in this state. The bill would prescribe registration and education requirements and delineate the practice of a registered dental hygienist in alternative practice. The bill would authorize the board to establish a fee not to exceed actual costs for registration as a registered dental hygienist in alternative practice. The bill would require the board to adopt regulations by January 1, 1999, relating to the content of coursework to be completed by registered dental hygienists in alternative practice and the functions that they may perform. By providing for the licensure of registered dental hygienists in alternative practice and thereby increasing the source of moneys in a continuously appropriated fund, this bill would make an appropriation. The bill would also modify the definition of a dental auxiliary.

This bill would also provide that those persons licensed as registered dental hygienists who completed prescribed classes through the Health Manpower Pilot Project and, who have established an independent practice, as described, are deemed to have satisfied the licensing requirements under these provisions so long as they follow the requirements for prescription and functions, and continue to personally practice and operate their business, or until such time that they sell their business to a licensed dentist. The bill would also provide that a particular health manpower pilot project shall cease to operate on the effective date of these provisions.

(2) Existing law defines a dental assistant as a person who may perform basic supportive dental procedures as authorized by law under the supervision of a licensed dentist. Existing law requires the board to adopt regulations relating to the functions which may be performed by dental assistants under direct or general supervision, and the settings within which dental assistants may work.

This bill would authorize a dental assistant to perform certain basic supportive procedures if under the supervision of a registered dental hygienist in alternative practice.

(3) Existing law makes it a misdemeanor for any person other than a licensee of the board to hold himself or herself out as one of the named categories of dental auxiliary or to use any other term indicating or implying he or she is licensed by the board in one of those categories.

This bill would add a registered dental hygienist in alternative practice to the above described categories. By changing this definition of a crime, this bill would impose a state-mandated local program.

(4) Under existing law, the Medi-Cal Act, the schedule of benefits available to recipients includes the application of fluoride, or other appropriate fluoride treatment, as defined, and other prophylaxis treatment for children 17 years of age and under.

This bill would provide that all dental hygiene services provided by a registered dental hygienist in alternative practice as authorized by this bill is covered as long as the services are within the scope of Denti-Cal benefits, and they are necessary services provided by a registered dental hygienist in alternative practice.

(5) The bill would provide that its provisions shall only become operative if SB 1014 is enacted and takes effect on or before January 1, 1998.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 754 (AB 833) Ortiz. Gynecological cancers.

Existing law establishes the Office of Women's Health within the State Department of Health Services. The functions of the office include, among others, to communicate and disseminate information and perform a liaison function within the department and to providers of health, social, educational, and support services to women.

This bill would direct the department to place priority on providing information to consumers, patients, and health care providers relating to women's gynecological cancers. The bill would authorize the department, in consultation with certain persons, to produce or contract with others to develop the materials required by this provision, as the office deems appropriate, or collect and distribute certain available publications, to be made available to the public free of charge. The bill would authorize the department to require, where appropriate, health care providers to provide or make available these materials to patients and would provide for the Medical Board of California, as well as other sources, to distribute these materials.

The bill would require every medical care provider primarily responsible for providing to a patient an annual gynecological examination to provide that patient during the annual examination a standardized summary in layperson's language and in a language understood by the patient containing a description of the symptoms and methods for diagnosing gynecological cancers.

Ch. 755 (AB 1554) Ortiz. Cancer: research.

Under existing law, the State Department of Health Services is responsible for the administration and oversight of various health care programs.

This bill would create the Cancer Research Fund in the State Treasury and would provide that the moneys in the fund be available for expenditure by the department. The bill would establish the Cancer Research Council to consist of 16 members, as specified, and would prescribe the terms and method of appointment of the members.

This bill would appropriate \$2 million from the General Fund to the Cancer Research Fund to be expended for purposes of cancer research, as defined in SB 273.

The bill would provide that its provisions would become operative only if SB 273 of the 1997-98 Regular Session is enacted and takes effect on or before January 1, 1998.

Ch. 756 (SB 273) Burton. Cancer: research.

Under existing law, the State Department of Health Services is responsible for the administration and oversight of various health care programs.

This bill would create the Cancer Research Fund in the State Treasury, provide that the moneys in the fund be expended for purposes of cancer research, as defined, and provide that the State Department of Health Services may contract with nonprofit organizations, foundations, or public entities to administer the Cancer Research Program. The bill would require the program to be administered in accordance with certain principles, including, but not limited to, the requirement that the department work closely with, and seek the advice of, the Cancer Research Council, which would be established by AB 1554.

The bill would provide that its provisions would become operative only if AB 1554 of the 1997-98 Regular Session is enacted and takes effect on or before January 1, 1998.

Ch. 757 (SB 1328) Brulte. Public works: prevailing wages.

Existing law requires, except for public works projects of \$1,000 or less, not less than the general prevailing rate of per diem wages to be paid to all workers employed on a public works project. Existing law imposes upon the contractor a penalty of \$50 for each calendar day, or portion thereof, for each worker paid less than that prevailing rate for work performed for the contractor under the public works contract or for work performed for any subcontractor under the contractor. Existing law also requires the

contractor to pay the difference in the amount of the prevailing wage rate that was due each employee of the contractor or a subcontractor and the amount that was actually paid to each employee.

This bill would make subcontractors that violate the above-described prevailing wage requirement liable for the applicable penalty and amounts due workers of the subcontractor who were paid wages less than, and in violation of, prevailing wage requirements. The bill would provide that, if a worker employed by a subcontractor on a public works project is not paid the prevailing wage by the subcontractor, the prime contractor of the project is not liable for any of those penalties or amounts otherwise due under that existing law unless the prime contractor had knowledge of that failure of the subcontractor or unless the prime contractor failed to perform certain duties specified in the bill.

The bill would require a contractor to withhold moneys due a subcontractor in an amount sufficient to pay the wages that are the subject of a claim filed with the Division of Labor Standards Enforcement, as directed by the division, if the body awarding the public works contract has not withheld sufficient moneys to pay the wage claims. The bill would require the contractor to pay those moneys to the subcontractor after receipt of notification that the claim has been resolved, or to pay those moneys to the awarding body, under certain circumstances. The bill would require unpaid wages determined owed to workers who cannot be located after a diligent search by the Labor Commissioner to be deposited in the Industrial Relations Unpaid Wage Fund.

Existing law authorizes the Division of Labor Standards Enforcement to maintain an action in any court of competent jurisdiction to recover from a contractor engaged in public works the penalties and other amounts determined by the Labor Commissioner to be due when the contractor has not paid the prevailing wage. Existing law requires the division to commence this action not later than 90 days after the filing of a valid notice of completion or not later than 90 days after acceptance of the public work, whichever last occurs.

This bill would increase the time period for commencing that action from 90 days to 180 days after either of those events, whichever last occurs.

Existing law imposes upon a contractor a penalty of \$25 for each worker employed in the execution of a public works contract by the contractor or by any subcontractor for each calendar day during which the worker is required or permitted to work more than 8 hours in any one calendar day and 40 hours in any one calendar week in violation of specified law.

This bill would make that penalty applicable to subcontractors violating those provisions. The bill would impose a state-mandated local program by requiring the body awarding a public works contract to report violations of these working-hours requirements to the division, rather than to the officer authorized to pay the contractor, as is provided by existing law.

The changes made by the bill to existing law would be repealed on January 1, 2003.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 758 (SB 1346) Committee on Business and Professions. Professions and vocations.

Existing law provides for the licensure, regulation, and discipline of various professions and vocations. These provisions are administered by boards and examining committees established within the Department of Consumer Affairs.

This bill would revise certain provisions relating to the denial of an application for a license for the various professions and vocations. The bill would revise provisions regarding the expiration of apprentice licenses, requirements of an applicant for admission to examination, administration and grading of examinations, grounds for

disciplinary action, and renewal of licenses, and repeal obsolete and duplicative provisions, relating to the regulation of barbers and cosmetologists. The bill would revise the grounds for discipline of geologists and geophysicists, revise the provisions relating to examination and licensure of podiatrists, and delete obsolete references in the psychology licensing law to the Division of Allied Health Professions of the Medical Board. This bill would also revise provisions relating to petitions for reinstatement of the license of a registered nurse after revocation.

Existing law provides for the licensure of speech-language pathologists and the licensure of audiologists and prohibits the practice of speech-language pathology without a license. For purposes of these provisions, existing law defines the practice of audiology to include, among other activities, the planning, directing, conducting, supervising, or participating in programs of identification of auditory disorders, hearing conservation, aural habilitation, and rehabilitation.

This bill would include planning, directing, conducting, supervising, or participating in programs of cerumen removal, as defined, within the definition of the practice of audiology. It would also require that cerumen removal performed pursuant to these provisions be performed by a licensed audiologist.

This bill would change the name of the Speech-Language Pathology and Audiology Examining Committee to the Speech-Language Pathology and Audiology Board, and would authorize that board to appoint an executive officer. The bill would eliminate a 30-day grace period for payment of renewal fees for speech-language pathologists and audiologists. This bill would also authorize that board, rather than the Medical Board of California, to administer the provisions relating to discipline of speech-language pathologists and audiologists.

This bill would require certain boards and committees to require applicants to submit fingerprints in order to conduct criminal history record checks and authorize those boards and committees to obtain criminal history information from the state and federal governments.

This bill would revise requirements for notice of meetings of the Hearing Aid Dispensers Examining Committee, change requirements for licensees to notify the committee of locations of places of business and mailing addresses, and change the grounds for discipline of licensed hearing aid dispensers.

This bill would make additional technical and conforming changes.

Ch. 759 (SB 827) Greene. Professional licensing: boards.

(1) Existing law provides for the licensing and regulation of various occupations and professions, each administered by a board, as defined. Under existing law, provisions establishing the Board of Registered Nursing, Board of Vocational Nurse and Psychiatric Technician Examiners of the State of California, Board of Pharmacy of the State of California, Veterinary Medical Board, and California Board of Architectural Examiners become inoperative on July 1, 1998, and are repealed on January 1, 1999.

This bill would extend these inoperative and repeal dates to July 1, 2004, and January 1, 2005, respectively. The bill would provide that the repeal of these boards pursuant to this provision shall render the boards subject to the review of the Joint Legislative Sunset Review Committee described in (12) below. The bill would make conforming changes.

(2) Existing law, by initiative measures, establishes the Board of Chiropractic Examiners that administers licensing and regulation provisions governing practitioners of chiropractic and the Osteopathic Medical Board that administers licensing and regulation provisions governing osteopathy.

This bill would provide that these boards shall be subject to the review of the Joint Legislative Sunset Review Committee.

(3) Existing law requires that the Board of Vocational Nurse and Psychiatric Technician Examiners consists of 11 members, including 3 licensed vocational nurse members and 5 public members.

This bill would instead provide for 2 licensed vocational nurse members and 6 public members. The bill would also change the name of this board to the Board of Vocational Nursing and Psychiatric Technicians and would make related changes, including the name of the Vocational Nurse and Psychiatric Technician Examiners Fund to the Vocational Nursing and Psychiatric Technicians Fund.

(4) Existing law requires the Board of Pharmacy to consist of 10 members, 3 who are public members and 7 who are pharmacists. It authorizes the board to employ inspectors of pharmacy. Existing law requires that these inspectors be pharmacists if their principal duties are the inspection of pharmacies, and premises operated or conducted by a wholesaler.

This bill would instead require board inspectors to be pharmacists if their principal duties include the inspection and investigation of pharmacies or pharmacists or the supervision of other board inspectors. This bill would add one public member to this board.

(5) Existing law provides for a Veterinary Medical Board in the Department of Consumer Affairs consisting of 6 members, including 2 public members, and provides that the board may appoint a person exempt from civil service as an executive officer. That provision will become inoperative on July 1, 1998, and will be repealed effective January 1, 1999.

This bill would instead provide for the board to consist of 7 members, including 3 public members and would extend that inoperative date until July 1, 2004, and the date of repeal until January 1, 2005.

(6) Existing law establishes the Registered Veterinary Technician Examining Committee within the Veterinary Medical Board and provides for certain requirements regarding membership of the committee. Existing law requires the committee to assist the board in the examination of applicants for veterinary technician registration. These provisions will become inoperative July 1, 1998, and will be repealed effective January 1, 1999. Existing law also requires all revenue received by the board to be deposited into the Registered Veterinary Technician Examining Committee Fund.

This bill would require the board to establish an advisory committee on issues pertaining to the practice of veterinary technicians, to be known as the Registered Veterinary Technician Committee. The bill would also authorize, rather than require, the committee to assist the board in applicant examination. These provisions would become operative July 1, 1998. This bill would also provide that the provisions requiring all revenue received by the board to be deposited into the Registered Veterinary Technician Examining Committee Fund become inoperative July 1, 1998, and repealed effective January 1, 1999, and would require commencing July 1, 1998, all unappropriated funds in that fund and all funds collected after that date to be deposited in the Veterinary Medical Board Contingent Fund, a continuously appropriated fund. By increasing the funds to be deposited in a continuously appropriated fund, this bill would make an appropriation.

(7) Existing law requires the examination for licensure to practice veterinary medicine to consist of a written and practical examination, with certain exceptions for out-of-state applicants. Existing law authorizes the board to waive the examination requirements and issue a license if the applicant meets certain requirements, including that the applicant has graduated from a veterinary college recognized by the board or possesses a certificate issued by the Educational Commission for Foreign Veterinary Graduates of the American Veterinary Medical Association which was issued as prescribed.

This bill would delete reference to the American Veterinary Medical Association for purposes of this provision and would delete the prescriptions related to the basis of issuance of the certificate.

(8) Existing law provides that the maximum fee that the board can establish for veterinarians to file an application for examination is \$325 for the national examination and \$250 for the California state board examination. However, if the provisions establishing the board are repealed under existing law, the maximum fee to file an application for the national examination is \$250.

This bill would revise these fee provisions. The bill would establish the maximum fee to file an application for examination at \$100. The bill would establish a maximum fee of \$325 for the licensing examination and a maximum fee of \$150 for the California state board examination.

By increasing the source of moneys in a continuously appropriated fund, this bill would make an appropriation.

(9) Existing law establishes the California Board of Architectural Examiners and provides that the board consist of 10 members.

This bill would add one member to the board.

(10) Existing law establishes a procedure for the issuance of a citation to a person if there is probable cause to believe the person violated provisions of the law regarding the practice of architecture. This procedure includes a review and hearing by the board and provides for the assessment of a civil penalty for each citation issued. Existing law generally authorizes the professional licensing boards to establish, by regulation, a system for the issuance to a licensee, or to an unlicensed person who is acting in the capacity of a licensee or registrant, of a citation that may contain an order of abatement or an order to pay an administrative fine assessed by the board.

This bill would make inoperative on July 1, 1998, the provisions that provide a procedure for the issuance of a citation for violations of the law regarding the practice of architecture and would repeal those provisions on January 1, 1999. The bill would require the Board of Architectural Examiners to establish, by regulation, a system for the issuance of citations.

(11) Existing law provides certain immunity from liability for architects and engineers who voluntarily, without compensation or expectation of compensation, provide structural inspection services at the scene of a declared national, state, or local emergency caused by a major earthquake at the request of a public official, public safety officer, or city or county building inspector acting in an official capacity.

This bill would extend this immunity from liability to the services of architects at the scene of a flood, riot, or fire that is a declared emergency under these circumstances.

(12) Existing law establishes the Structural Pest Control Board to administer licensing and regulation provisions related to the practice of pest control and its various branches. The provisions establishing the board become inoperative on July 1, 1998, and are repealed on January 1, 1999.

This bill would extend the inoperative and repeal dates of the provisions establishing the Structural Pest Control Board to July 1, 2001, and January 1, 2002, respectively. The bill would declare the intent of the Legislature that the primary mission of the board is consumer protection.

(13) Under existing law, the Director of Pesticide Regulation and the Structural Pest Control Board are required to enter into a contract regarding structural pest control operators.

This bill would require the Director of Pesticide Regulation and the Structural Pest Control Board to submit a report to the Legislature no later than February 1, 1998, concerning the terms of their interagency agreement.

(14) Existing law creates the Joint Legislative Sunset Review Committee, which is required to determine whether certain boards or regulatory programs have demonstrated a public need and to make recommendations.

This bill would require the Joint Legislative Sunset Review Committee to review the referral of cases to the Licensing and Health Quality Enforcement Sections of the Attorney General's office, the performance of those sections, and the reimbursement of the Attorney General's office for legal services, and to report its findings to the Legislature by March 1, 1998.

The bill would also authorize the chairpersons of the appropriate policy committees of the Legislature to refer to the Joint Legislative Sunset Review Committee any legislative issues or proposals to create new licensure categories or create a new licensing board if the issues or proposals are related to the review of a particular board under these provisions.

This bill would also require the Department of Consumer Affairs to submit to the Legislature, on or before October 1, 1998, a report that relates to board licensing examinations and, after conducting a survey of all boards, specifies the extent to which the boards are using cost recovery and cite and fine programs.

By increasing the source of funds for a continuously appropriated fund, the bill would make an appropriation.

This bill would incorporate additional changes in Section 101 of the Business and Professions Code proposed by SB 1346, to be operative only if SB 1346 and this bill are both chaptered and become effective January 1, 1998, and this bill is chaptered last.

This bill would incorporate additional changes in Sections 4001, 4003, and 4008 of the Business and Professions Code, proposed by SB 1349, to be operative only if SB 1349 and this bill are both chaptered and become effective January 1, 1998, and this bill is chaptered last.

Ch. 760 (SB 1329) Leslie. Vehicles: minors: provisional driver's license.

(1) Existing law requires that any driver's license issued to a person under 18 years of age be issued pursuant to a specified provisional licensing program. Among other things, the provisional licensing program requires (1) that the person hold a specified instruction permit for not less than 30 days prior to applying for a provisional driver's license, (2) that a 30-day restriction, as specified, be imposed when the person's record shows a violation point count, as specified, of 2 or more points in 12 months, and (3) that a 6-month suspension be imposed when the person's record shows a violation point count of 3 or more points in 12 months.

This bill would require the person to hold the specified instruction permit for not less than 6 months prior to applying for a provisional driver's license.

The bill would require the person to complete 50 hours of supervised driving practice prior to the issuance of a provisional license, with not less than 10 of those hours to include driving during darkness, as defined.

The bill would require that the provisional driver's license be subject to specified conditions, including that for the first 6 months after issuance of a provisional license the licensee not drive between the hours of 12:00 a.m. and 5:00 a.m. or transport passengers who are under 20 years of age, unless accompanied and supervised by a licensed driver who is the licensee's parent or guardian or a person older than 25 years of age and authorized by the parent or guardian to accompany and supervise the provisional licensee. During the second 6 months after issuance of a provisional license the licensee would be authorized to transport passengers under the age of 20 years between the hours of 5:00 a.m. and 12:00 a.m. without supervision. However, the restriction that the licensee not drive between the hours of 12:00 a.m. and 5:00 a.m. would continue to apply during this period.

The bill would provide exceptions to these restrictions based upon specified circumstances.

The bill would prohibit a law enforcement officer from stopping a vehicle for the sole purpose of determining whether the driver is in violation of the specified restrictions.

The provisions regarding the provisional driver's license program specified above would become operative on July 1, 1998.

The bill would delete obsolete provisions and would make other technical, nonsubstantive changes in existing law.

The bill would require a court to impose community service or specified fines upon a licensee violating certain of these provisions and would thereby impose a state-mandated local program by increasing the duties imposed upon local juvenile court officials and probation officers.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 761 (SB 1270) Johnston. State property.

(1) Existing law generally authorizes the Director of General Services to hire, lease, lease-purchase, or lease with the option to purchase any real or personal property for the use of any state agency if the director deems the hiring or leasing is in the best interest of the state.

Existing law also authorizes the director to lease the real property owned by the state within the core area of Sacramento, as specified, that is not under the jurisdiction of any other state agency, for purposes consistent with the Capitol Area Plan.

This bill would provide that, in furtherance of the Capitol Area Plan and other findings contained in specific legislation, the director may purchase, exchange, or otherwise acquire real property and construct facilities within the jurisdiction of the Capitol Area

Plan in Sacramento for use by the State Department of Education, the State Department of Health Services, and the Department of General Services as anchor tenants on specific blocks within the Capitol area. The State Public Works Board would be authorized to issue revenue bonds, negotiable notes, or negotiable bond anticipation notes to finance all costs associated with acquisition, design, and construction of the facilities. The bill would provide that if the Department of General Services proposes to acquire the facilities on a design-build basis, the department would be required to submit specified information prior to entering into an agreement. The bill would provide that the maximum authorized costs of the facilities for plans, drawings, construction, and other costs shall not exceed \$392,000,000.

(2) Pursuant to the general authority of existing law, the state parking facility located in Sacramento in the block bounded by 11th, 12th, O, and P Streets is under the management and control of the Department of General Services.

This bill would provide that prior to the construction on any other blocks, as authorized by this bill, a parking garage shall be constructed on a state-owned parcel of land on block 224 within the Capitol area in the City of Sacramento. This bill would require that upon the completion of this parking garage, a total of 85% of the existing parking capacity at the state parking garage situated on block 216, which is bounded by 11th, 12th, O, and P Streets in Sacramento, be made available to meet the parking needs of legislative employees to accommodate all legislative parking spaces projected to be displaced by the state office facilities authorized by this bill. This bill would declare the intent of the Legislature with regard to designating the parking spaces created through the construction of a parking garage on block 224 and other parking structures associated with the office building constructed pursuant to this bill for the purposes of accommodating specified state employees, as well as meeting the additional demands for parking created by the construction of authorized state office facilities.

Ch. 762 (AB 1159) Bowen. The Alternative Protest Pilot Project.

Existing law requires the acquisition of electronic data processing or telecommunications goods and services to be conducted through competitive means, except when the Director of General Services determines that the goods and services proposed for acquisition are the only goods and services that can meet the state's need, or the goods and services are needed in cases of emergency where immediate acquisition is necessary for the protection of the public health, welfare, or safety.

This bill would establish the Alternative Protest Pilot Project to be administered by the Department of General Services as an alternative to existing protest procedures. This bill would authorize any state department or agency to use these solicitation and alternative procedures, until December 31, 1999, or earlier, and if the contracting department agrees to participate and the Department of General Services indicates that a proposed solicitation shall be conducted as part of the pilot project.

This bill would require projects under this pilot project to meet the criteria of (1) the state agency or department stating its business needs and not the detailed specification in the solicitation, (2) the state agency or department has stated the criteria and weight to be given each criterion for the evaluation of contract proposals, and (3) the bids being awarded based on "value-effective acquisition," competitive negotiation, an alternative procurement, or performance based solicitations.

This bill would require the pilot project to continue until it has been applied to at least 25 contracts, or until December 31, 1999, whichever comes later.

This bill would require the Department of General Services to report to the Legislature regarding the pilot project, as specified. This bill would provide that the pilot project would be considered a success if there is at least a 10-percent reduction in the number of frivolous protests filed with the department, if the length of time to resolve protests is reduced, or there is a substantial reduction in protests filed, as specified.

Ch. 763 (AB 1363) Machado. Employment: minors.

Existing law prescribes certain restrictions on the employment of minors in various occupations and places of employment, including special restrictions on the hours of employment of minors.

This bill would authorize employment of minors 14 years of age and older to perform sports-attending services in professional baseball, as enumerated in specified federal regulations, subject to special limitations respecting hours of employment. The bill would prohibit employment of a minor 14 or 15 years of age to perform sports-attending services in professional baseball pursuant to the bill except with the prior written approval of the school district of the school in which the minor is enrolled or the county board of education of that school district.

Existing law provides that the school authority that issues a permit for a minor to work while school is in session may revoke that permit if evidence is shown, to the satisfaction of the school authority, that the schoolwork or the health of the minor is being impaired by the employment.

This bill would require the school authority to monitor the academic achievement of any minor 14 or 15 years of age who is issued a permit to perform sports-attending services in professional baseball to ensure that the educational progress of the minor is being maintained or improves during the period of employment.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 764 (SB 65) McPherson. Public beaches: contamination: warning signs.

Existing law requires a county public health officer, after determining that the failure of a public beach to meet bacteriological standards constitutes a public health hazard, to post the beach with conspicuous warning signs.

This bill would require a warning sign to be visible from each legal beach access point and any additional access points identified by the health officer. The bill would impose a state-mandated local program by requiring the county public health officer to perform additional duties.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 765 (AB 411) Wayne. Beach sanitation: posting.

Existing law requires the State Department of Health Services to adopt regulations establishing minimum standards for the sanitation of public beaches. Violation of these regulations adopted by the department is a crime.

This bill would require these regulations to require the testing of the waters adjacent to all public beaches, as defined, for microbiological contaminations, including, but not limited to, total coliform, fecal coliform, and enterococci bacteria, to establish protocols for determining the location of monitoring sites and monitoring frequency based on risks to public health, and for public notification of health hazards, including, but not limited to, the posting, closing, and reopening of public beaches, and to require that public beaches, with certain exceptions, be tested for microbiological contaminations, including, but not limited to, total coliform, fecal coliform, and enterococci bacteria on a weekly basis from April 1 to October 31, inclusive, of each year if certain conditions are met. By changing the definition of a crime, this bill would impose a state-mandated local program.

This bill would, subject to appropriation of sufficient funds, require local health officers to be responsible for testing waters adjacent to public beaches within their jurisdiction. This bill would require the local health officer to immediately test the waters adjacent to a public beach and to take related action in the event of a known untreated sewage release, and in the event of an untreated sewage release that is known to have reached recreational waters adjacent to a public beach, would require the local health officer to immediately close those waters until it has been determined by the local health officer that the waters are in compliance with the standards. By increasing the duties of local health officers, this bill would impose a state-mandated local program.

Existing law requires the health officer having jurisdiction of the area in which a public beach is created to close, or restrict the use of, the public beach if he or she finds any violation of the standards.

This bill would, instead, authorize the health officer to close, or restrict the use of, the public beach if he or she finds that a violation exists.

Existing law requires the department, upon investigation of a complaint, to close, or restrict the use of, any public beach if it finds that a violation exists.

This bill would, instead, authorize the department to close, or restrict the use of, a public beach if it finds that a violation exists.

Existing law requires the local health officer to post a beach with conspicuous warning signs whenever the beach fails to meet certain bacteriological standards, and it is determined that the cause of the elevated levels constitutes a public health hazard.

This bill would, in addition, require the local health officer to post a beach with conspicuous warning signs, as described, whenever the beach fails to meet the standards developed by the department established pursuant to this bill.

Existing law requires each local health officer to notify the Director of Parks and Recreation when a public beach is in violation of the sanitation standards.

This bill would, instead, require the local health officer to notify the agency responsible for the operation and maintenance of the public beach within 24 hours of any public beach posting, closure, or restriction, and would, subject to appropriation, require the agency responsible for the operation and maintenance of the public beach to establish a telephone hotline and update it as need to convey changes in public health risks, to inform the public of beach postings, closures, and restrictions. By increasing the duties of the local health officer, this bill would impose a state-mandated local program.

This bill would make any duty imposed upon a local public officer or agency pursuant to these provisions mandatory only during a fiscal year in which the Legislature has appropriated sufficient funds, as determined by the State Director of Health Services, in the annual Budget Act or otherwise for local agencies to cover the costs to those agencies associated with the performance of those duties, and would require the director to annually, within 15 days after enactment of the Budget Act, file a written statement with the Secretary of the Senate and with the Chief Clerk of the Assembly memorializing whether sufficient funds have been appropriated.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that for certain mandates, no reimbursement is required by this act for a specified reason. With regard to other mandates, this bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 766 (AB 11) Escutia. Water pollution.

(1) Existing law makes it a crime for a person, as defined, to deposit in, permit to pass into, or place where it can pass into the waters of this state any of specified substances, including any petroleum, acid, coal or oil tar, lampblack, aniline, asphalt, bitumen, or residuary product of petroleum, or carbonaceous material or substance.

Existing law excepts from the application of that prohibition a discharge or release that is expressly authorized pursuant to the terms of a permit issued by the State Water Resources Control Board or a regional water quality control board.

This bill would instead except from the application of that prohibition a discharge or release that is expressly authorized pursuant to and in compliance with the terms of a waste discharge requirement or a waiver, or that is expressly authorized pursuant to and in compliance with the terms and conditions of a federal permit for which the State Water Resources Control Board or a regional water quality control board has, after a public hearing, issued a water quality certification.

(2) Existing law makes the proof of specified additional circumstances an affirmative defense to a charge of violating the foregoing provisions.

This bill would prohibit a defendant from raising the affirmative defense if the defendant had on 2 prior occasions in the preceding 5 years, pleaded *nolo contendere* or been convicted of, or suffered a judgment for a violation of the prohibition. The bill would make that limitation on the affirmative defense applicable only to cases filed on or after January 1, 1997.

The bill would also prohibit the affirmative defense from being raised in any case in which the court finds, upon allegation by the district attorney, city attorney, or Attorney General, that the defendant acted willfully.

By imposing these requirements for findings on the courts, the bill would establish a state-mandated local program.

(3) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the Department of Fish and Game to pay expenses incurred in carrying out the Fish and Game Code and other laws for the protection and preservation of birds, mammals, reptiles, and fish.

Because this bill would impose new duties on the department relating to permits for discharges or releases of materials to waters, the bill would make an appropriation.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 767 (AB 52) Washington. Compton Unified School District.

(1) Existing law appropriated funds for 2 emergency loans to the Compton Unified School District, the acceptance of which constituted an agreement by the district to comply with certain conditions including the assumption, by the Superintendent of Public Instruction, of all the legal rights, duties, and powers of the district governing board and the appointment of an administrator who may act on the superintendent's behalf and exercise the superintendent's authority. Existing law specifies that the authority of the superintendent and administrator continue until the administrator and superintendent determine that it is probable that the school district will comply with various recovery plans approved by the superintendent, the administrator certifies that all necessary collective bargaining agreements have been negotiated and ratified and are consistent with the terms of the recovery plans, and the district has completed all reports that the superintendent requires.

This bill would express the intent of the Legislature that the governing board of the Compton Unified School District be returned its designated legal rights, duties, and powers only after the board and the school district demonstrate significant improvement in 5 areas, including pupil achievement, financial management, facilities management, personnel procedures, and community relations. The bill would require the County Office Fiscal Crisis and Management Assistance Team (FCMAT) and the state-approved administrator, in consultation with specified entities and persons, to conduct comprehensive assessments and complete, by December 31, 1998, specified recovery plans for the school district, including an instructional recovery plan, a financial recovery plan, a facilities recovery plan, a personnel recovery plan, and a community relations improvement plan, as specified. The bill would require FCMAT to determine if the school district has made substantial and sustained progress, as specified, and if there is substantial and sustained progress, FCMAT would be required to recommend to the Superintendent of Public Instruction the functional areas of school operation, as specified, that the superintendent should return to the governing board of the school district. The imposition of those duties would impose a state-mandated local program.

This bill would require the Superintendent of Public Instruction, beginning on January 1, 1998, to annually file a written report with the Legislature regarding the progress that the Compton Unified School District is making in meeting the conditions of specified recovery plans, the determinations and recommendations of FCMAT, as specified, the

action that the superintendent has taken on the FCMAT recommendations and, if the superintendent has not followed the FCMAT recommendations, the reasons for not following them. The bill would specify that the duty of the superintendent to report to the Legislature ceases when the governing board of the Compton Unified School District regains all of its legal rights, duties, and powers, as specified.

(2) This bill would appropriate \$500,000 from the General Fund to FCMAT for the purposes of conducting the assessments and completing the recovery plans specified in the bill. The bill would require FCMAT to provide the Controller with an accounting of expenditures made by it pursuant to the bill.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 768 (AB 156) Murray. Personal information: credit reporting agencies.

(1) The existing Consumer Credit Reporting Agencies Act provides for the regulation of consumer credit reporting agencies that regularly engage in whole or in part in the business of assembling or evaluating consumer credit information or other information on consumers for the purpose of furnishing consumer credit reports to 3rd parties. Existing law prohibits a consumer credit reporting agency from furnishing a consumer credit report to any person unless it has reasonable grounds to believe that the consumer credit report will be used by this person for expressly provided purposes.

This bill would additionally require a prospective user of the consumer credit report who is a retail seller to provide the consumer credit agency with at least 3 categories of information regarding the consumer that matches, as specified, information within a file assembled by the consumer credit reporting agency and to certify, in specified instances, that it requires its employees and agents to inspect a photo identification of a consumer for credit.

(2) The act specifies procedures for the consumer credit reporting agency to follow in case a consumer disputes the completeness or accuracy of any item of information contained in his or her file.

This bill would revise these procedures to, among other things, require the consumer credit reporting agency to promptly and permanently block the reporting of disputed information and so notify the furnisher of the information if the consumer submits a valid police report concerning the crime described in (4), as specified. However, the bill would specify certain conditions under which the information may be unblocked.

(3) The Consumer Credit Reporting Agencies Act prescribes civil remedies for the violation of the act and provides that the prevailing parties in any action commenced to obtain these remedies shall be entitled to recover court costs and reasonable attorney's fees. The act also prescribes a 2-year statute of limitations from the date liability arises under the act.

This bill would provide that the prevailing party shall be entitled to recover these costs and attorney's fees unless the plaintiff only seeks and obtains injunctive relief to compel compliance with the act. This bill would revise the statute of limitations, as specified.

(4) This bill would also provide that it is a misdemeanor for a person to willfully obtain personal identifying information, as defined, of another person and use another individual's personal identifying information and obtain, or attempt to obtain, credit, goods, or services in the name of the other person without the consent of that person. By creating a new crime, this bill would impose a state-mandated local program.

(5) The bill would provide that it will become operative on July 1, 1998, except for the provisions described in (4) above, which would become operative on January 1, 1998.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 769 (AB 219) Alby. Health care.

Under existing law, the Division of Licensing of the Medical Board of California has the authority to approve the application of an accreditation agency. An accreditation agency is an organization that is approved to issue certificates of accreditation to outpatient settings that meet certain standards. Existing law authorizes the division to grant a temporary certificate of approval to an accreditation agency operating on or before January 1, 1995, and meeting certain standards, without requiring the agency to complete the full application process.

This bill would additionally authorize the division to issue a temporary certificate of approval to the successor of an accreditation agency, or an accreditation agency thereafter operating as part of a joint program granted temporary certification as an accreditation agency by the division, whether operating as part of a joint program or independently.

This bill would provide that it is to take effect immediately as an emergency measure.

Ch. 770 (AB 459) Firestone. Sanitary control of shellfish.

Existing law requires the State Department of Health Services to adopt regulations regarding the cultivation and production of shellfish including classification and minimum requirements for growing and harvesting areas, for relaying and depuration procedures, and for aquaculture facilities.

This bill would, in addition, require the department, as a pilot program, to conduct sanitary surveys for enumerated areas containing naturally occurring populations of shellfish harvested by the public to assess water quality and shellfish quality, and would require the department to determine those areas that are unfit for recreational shellfish harvesting based upon prescribed standards. The bill would require the department to inform the public of those determinations and the reasons therefor, no less than twice per year. The bill would authorize the department to adopt regulations necessary to implement the pilot program but would provide that, except as needed for the pilot program, it shall not be construed to confer any new regulatory authority to develop control and management strategies.

This bill would be inoperative during any fiscal year in which the Legislature did not appropriate sufficient funding for this article to the department, and would require the director to file a written statement with the Legislature certifying the lack of funding within 10 days after the enactment of the Budget Act for that fiscal year.

This bill would require the department to report to the Legislature by July 1, 2002, and would repeal these provisions on January 1, 2004.

Ch. 771 (AB 739) Machado. Fish and game: penalties.

(1) Under existing law, the punishment for violations of the Fish and Game Code are specified, including maximum fines and imprisonment for the knowing unlawful taking of a mammal, bird, amphibian, reptile, fish, or any other species in violation of the code. Certain other violations of that code are subject to other enhanced maximum fines and imprisonment.

This bill would impose minimum and maximum punishments for the knowing and intentional taking of any mammal, bird, or fish, as specified. The bill would require the court to apply not less than the minimum punishment as provided in the bill, except in cases where the court determines that, as to the imprisonment sentence only, the interests of justice would best be served by granting probation or suspending the imposition or execution of the imprisonment sentence. Under the bill, if the court grants probation to a defendant, the court may impose as a condition of that probation that the defendant perform not more than 100 hours of community service, as specified. If community service is imposed, the bill would also require the defendant to attend a hunter safety course, as specified. Because the bill would change the penalty for a crime, the bill would impose a state-mandated local program.

The bill would also provide that any license or permit issued pursuant to the Fish and Game Code to a defendant who fails to appear at a court hearing or pay a fine imposed

for a violation of that code, except as specified, shall be immediately suspended and the license or permit shall not be reinstated or renewed, nor shall another license or permit be issued to the defendant until the court proceeding is completed or the fine is paid.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 772 (AB 939) Ortiz. Mediation.

(1) Under existing law, when a person consults a mediator or mediation service for the purpose of retaining mediation services, or when persons agree to conduct and participate in a mediation for the purpose of compromising, settling, or resolving a civil dispute, anything said in the course of a consultation for mediation services or in the course of the mediation is not admissible in evidence nor subject to discovery, and all communications, negotiations, and settlement discussions by and between participants or mediators are confidential, except as specified. If the testimony of a mediator is sought to be compelled in any civil action or proceeding regarding anything said in the course of a mediation, the court is required to award reasonable attorney's fees and costs to the mediator against the person seeking the testimony. Existing law provides that a mediator may not file, and a court may not consider, any declaration or finding of any kind by the mediator, except as specified.

This bill would, among other things, revise and recast these provisions, as specified, define the terms "mediation," "mediator," and "mediation consultation," specify when a mediation ends, and make corresponding changes.

(2) Existing law provides that if an insured party and an insurer reach an agreement proposed during mediation, the insured will have 3 business days to rescind the agreement.

This bill would provide that if such rescission occurs, the agreement may not be admitted or disclosed unless all the parties to the agreement agree to its disclosure.

(3) Existing law provides that records of the Department of Industrial Relations relating to labor disputes are confidential, except that any decision or award arising out of arbitration proceedings shall be a public record.

This bill would apply the provisions of this bill described in (1) above to a mediation conducted by the California State Mediation and Conciliation Service, and any person conducting the mediation. It would provide that all other records relating to labor disputes are confidential, except as specified.

Ch. 773 (AB 993) Perata. Sales and use taxes: exemptions: blood storage.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property and provides various exemptions from that tax. Existing law provides that human whole blood, plasma, blood products, and blood derivatives held in a bank for medical use are exempt from taxation for any purpose in this state.

This bill would additionally exempt from sales and use taxes, any container used to collect or store human whole blood, plasma, blood products, or blood derivatives, as specified.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 774 (AB 1082) Committee on Governmental Organization. Alcoholic beverages.

(1) The Alcoholic Beverage Control Act provides that certain licensees may, among other things, store and deliver distilled spirits from certain locations under specified conditions.

This bill would allow a retail off-sale licensee to sell wine at an auction and deliver that wine to any purchaser at the auction from the vendor's licensed premises or any other storage facility under specified conditions.

(2) The Alcoholic Beverage Control Act authorizes the issuance of a special temporary on-sale or off-sale wine license to certain nonprofit corporations having an agricultural purpose to sell wine, donated or sold to the nonprofit corporation by the member winegrowers, to consumers for the purpose of fundraising, as specified.

This bill would require that wine for sale under this special license bear the brand name of the producing winery. This bill would also require any advertising or solicitation for sale of wine under that license to disclose certain information concerning members of the nonprofit corporation.

(3) The Alcoholic Beverage Control Act prohibits a manufacturer, bottler, importer, or wholesaler of products of the brewing industry from furnishing, giving, renting, lending, or selling, directly or indirectly, any equipment, fixtures, or supplies, other than alcoholic beverages, to any person engaged in operating, owning, or maintaining any on-sale premises, as specified. Existing law provides, for purposes of that prohibition, that supplies do not include paper beverage coasters, as specified.

This bill would revise that provision to provide that notwithstanding any other provision of that act, a manufacturer, bottler, importer, or wholesaler of products of the brewing industry may furnish, give, rent, lend, or sell, directly or indirectly, those specified paper coasters or brand-identified acrylic table tent holders to any person engaged in operating, owning, or maintaining any on-sale premises where alcoholic beverages are sold for consumption on the premises.

(4) The Alcoholic Beverage Control Act prohibits a clerk from making an off sale of alcoholic beverages unless the clerk executes, under penalty of perjury, on the first day he or she makes that sale, an application and acknowledgment, on a form prepared by the department, that includes at a minimum a summary of certain requirements and prohibitions in the act, as specified.

This bill would additionally require inclusion of information as to sales of keg beer for consumption off licensed premises.

The Alcoholic Beverage Control Act provides that a violation of any of its provisions for which another penalty or punishment is not specifically provided is a misdemeanor. This bill would expand existing crimes by imposing additional duties on a licensee under the act, thus, the bill would impose a state-mandated local program.

This bill would repeal a substantially duplicative provision.

(5) The Alcoholic Beverage Control Act authorizes the Department of Alcoholic Beverage Control to pay witness fees and necessary expenses or mileage to a person who attends as a witness any criminal proceeding involving certain violations of the act, as specified.

This bill would authorize the department to pay certain expenses to a person subpoenaed by the department to appear as a witness at a hearing on a protest, accusation, or petition for a license, as specified.

(6) Existing law makes it a crime punishable as a misdemeanor to sell or expose for sale alcoholic beverages within $1\frac{1}{2}$ miles of any university grounds or campus except in specified instances.

This bill would exempt from that criminal provision the sale or exposing or offering for sale of beer or wine by any on-sale alcoholic beverage licensee where the premises are situated more than 1,200 feet from the boundaries of Whittier College.

(7) This bill would incorporate additional changes in Section 25658.4 of the Business and Professions Code, proposed by SB 805, to be operative only if SB 805 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 775 (AB 1186) Knox. General industrial or construction storm water permit fees: disposition.

Existing law requires each person for whom waste discharge requirements have been prescribed to submit an annual fee, for deposit in the Waste Discharge Permit Fund for expenditure by the State Water Resources Control Board, upon appropriation by the Legislature, for the purpose of carrying out Division 7 (commencing with Section 13000) of the Water Code.

This bill would require the fees collected from the storm water discharges that are subject to a general industrial or construction storm water permit under the national pollutant discharge elimination system (NPDES) to be accounted for separately in the fund. The bill would authorize not less than 50% of that money in the account to be used, upon appropriation by the Legislature, by the California regional water quality control board with jurisdiction over the permitted industry or construction site that generated the fee to carry out storm water programs in the region. The bill would require each regional board that receives money pursuant to those provisions to spend not less than 50% of that money solely on storm water inspection and regulatory compliance issues associated with industrial and construction storm water programs.

Ch. 776 (AB 1242) Granlund. Intermediate care facilities: administrator.

Existing law provides for the licensure and regulation of health facilities, as defined, including skilled nursing or intermediate care facilities, administered by the State Department of Health Services. Existing law requires that the administrator of an intermediate care facility/developmentally disabled-habilitative or an intermediate care facility developmentally disabled-nursing be either a licensed nursing home administrator or a qualified mental retardation professional. Violation of these provisions, or willful or repeated violations of related regulations constitutes a crime.

This bill would make this requirement applicable to an administrator of an intermediate care facility/developmentally disabled. By changing the definition of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 777 (AB 1302) Wayne. Highways: toll bridges.

(1) Under existing law, tolls for the San Diego-Coronado Bridge are set by the San Diego Association of Governments. Existing law sets forth the purposes for which the toll revenues may be used, requires the association to adopt an expenditure plan by June 30 of every even-numbered year, and to submit copies of those plans to specified legislative committees. The provisions of Chapter 327 of the Statutes of 1997 require the association to deposit \$33,000,000 in the Toll Bridge Seismic Retrofit Account in the State Transportation Fund and to submit to the Legislature and the Department of Transportation a prescribed financial plan on or before January 1, 1998. Those provisions also require the maintenance of the bridge to be funded by the state pursuant to a specified provisions of law.

This bill would, instead, require the association to include the expenditure plan in the regional transportation improvement program, as specified, and would delete the requirement that copies of the plan be submitted to the specified legislative committees. The bill would require not less than \$10,000,000 of the \$33,000,000 to be paid from local toll revenue reserve funds, and the balance to be paid from toll bridge revenue bonds, as prescribed.

The bill would authorize the San Diego Association of Governments to issue revenue bonds payable from the revenues derived from the tolls imposed on the bridge, as specified.

(2) The bill would set forth legislative findings and declarations regarding financing of state-owned toll bridges.

(3) To the extent that the bill would increase the level of service required by the association, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 778 (AB 1357) Baldwin. Unified program agencies.

Existing law requires hazardous waste facilities to operate under hazardous waste facilities permits issued by the Department of Toxic Substances Control.

Existing law requires the Secretary for Environmental Protection to implement a unified hazardous waste and hazardous materials management regulatory program. A city or local agency that meets specified requirements is authorized to apply to the secretary to implement the unified program and be certified as a certified unified program agency (CUPA), and every county is required to apply to the secretary to be certified to implement the unified program. A unified program agency is required to develop and implement a procedure for issuing a unified program facility permit. Existing law requires certain hazardous waste generators to submit a notice, under specified conditions, to the department and to the CUPA or authorized agency or officer.

Existing law, the Wright-Polanco-Lempert Hazardous Waste Treatment Permit Reform Act of 1992, deems a generator who conducts specified treatment activities to be conditionally authorized to operate without obtaining a hazardous waste facilities permit or other grant of authorization, and also conditionally exempts from hazardous waste facilities permit requirements a generator who treats not more than specified amounts of hazardous waste in any month, or generators conducting specified treatment processes, if specified requirements are met with regard to that hazardous waste.

A household hazardous waste facility is required to submit certain information to the department before commencing operations and the department is authorized to allow such a facility to accept hazardous waste from certain small quantity generators.

This bill would make various changes concerning the authority of CUPAs with regard to the hazardous waste element of the unified program. The bill would specify that persons subject to certain notification requirements are required to submit a notice to the CUPA or to the authorized officer or agency and also to the department until specified regulations are adopted and the statewide data system is in place. The bill would require the notification for household hazardous waste collection facilities to be submitted to the CUPA or a specified local officer or agency and also to the department, until those conditions are met. The bill would exclude from the unified program the requirements imposed upon persons operating transportable treatment units, except as specified, and would require the department to report on the actual costs of managing the transportable hazardous waste treatment units, as prescribed.

Ch. 779 (AB 1581) Keeley. Coastal and ocean resources management programs: funding.

Existing law requires the California Coastal Commission, the State Water Resources Control Board, and the Resources Agency to implement and administer various coastal and ocean resources management programs.

This bill would appropriate \$1,520,000 from the General Fund, \$685,000 of which would be appropriated to the California Coastal Commission for administration and support of the commission and for grants to local jurisdictions for the preparation of local coastal programs, as specified, \$420,000 of which would be appropriated to the State Water Resources Control Board for specified water quality monitoring activities pertaining to coastal resources, and \$415,000 of which would be appropriated to the Resources Agency

for commission networking equipment and to contract for services to upgrade the commission's computer system.

Ch. 780 (AB 1606) Committee on Public Employees, Retirement and Social Security. State employees.

Existing law entitles any state legislative, executive, or judicial branch officer or employee, including civil service employees, who, as a member of the California National Guard or a United States military reserve organization, is called up to active duty as a result of the Iraq-Kuwait crisis to receive, while on active duty, from the state, not to exceed 180 calendar days, as part of his or her compensation, the difference between the amount of his or her military pay and allowances and the amount the officer would have received as a state officer or employee, including any merit raises that would otherwise have been granted during the time the individual was on active duty. In the case of civil service employees, the determination of the amount to which the officer or employee would be entitled is made by the Department of Personnel Administration. Existing law also entitles an officer or employee covered by existing law to receive, for 180 calendar days, all benefits that he or she would have received had he or she not been called to active duty, unless the benefits are prohibited or limited by vendor contract.

This bill would entitle any state legislative, executive, or judicial branch officer or employee, including civil service employees, who, as a member of the California National Guard or a United States military reserve organization, is called up to active duty as a result of the Bosnia crisis on or after November 21, 1995, to receive similar compensation and benefits. This bill would provide that these benefits shall be reduced by the maximum allowable benefit under the federal Ready Reserve Mobilization Income Insurance Program or a successor federal program, for certain employees eligible to participate in that program, as specified.

This bill would specify that these provisions apply to active duty served as a result of the Bosnia crisis.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 781 (SB 62) McPherson. California State Mussel Watch Program.

Under existing law, the State Water Resources Control Board and the regional water quality control boards are the principal state agencies with primary responsibility for the coordination and control of water quality.

This bill would require the state board, in conjunction with the Department of Fish and Game, to continue to implement the coastal monitoring program known as the California State Mussel Watch Program to the extent funding is appropriated for this purpose.

The bill would appropriate \$145,000 from the General Fund to the state board to pay the costs of the program pursuant to the bill.

Ch. 782 (SB 72) McPherson. Coastal development permit fees: coastal access grants.

Existing law, the California Coastal Act of 1976, authorizes the California Coastal Commission to require a reasonable filing fee and the reimbursement of expenses for the processing by the commission of any application for a coastal development permit, as specified.

Existing law vests authority in the State Coastal Conservancy to provide for coastal access.

This bill would require that coastal development permit fees collected by the commission be deposited in the Coastal Access Account, which the bill would create in the State Coastal Conservancy Fund. The money in the account would be available, upon appropriation by the Legislature in the annual Budget Act, to the State Coastal Conservancy for grants to public agencies and private nonprofit entities or organizations for the development, maintenance, and operation of new or existing facilities that provide public access to the shoreline of the sea, as defined in the act. The bill would require any grant funds not expended for those purposes to revert to the account.

Ch. 783 (SB 105) Ayala. Water quality: notification.

(1) Existing law requires any person who causes or permits any hazardous substance or sewage to be discharged in the waters of the state to make a prescribed notification to the Office of Emergency Services and requires that office to notify the appropriate regional water quality control board of the discharge.

This bill would require the Office of Emergency Services to also notify the local health officer and administrator of environmental health of the discharge. The bill would require the local health officer and administrator of environmental health to notify the public of the discharge, as prescribed, if they determine that notification is required to safeguard public health and safety. By imposing notification requirements on local health officials, the bill would impose a state-mandated local program.

(2) This bill would incorporate additional changes in Section 13271 of the Water Code proposed by AB 541, to be operative only if this bill and AB 541 are enacted and become effective on or before January 1, 1998, each bill amends Section 13271 of the Water Code, and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 784 (SB 193) Mountjoy. State administration: real property and agencies.

(1) Under existing law, the Office of State Printing, within the Department of General Services, is required to do all state printing.

This bill would provide that the Office of State Printing may also be referred to as the Office of State Publishing.

(2) Existing law requires the Department of General Services to perform various functions and duties with respect to state property.

This bill would authorize the Director of General Services, with the approval of the State Public Works Board, to sell, exchange, lease, or transfer specified parcels of state property. The bill would also exempt a sale, exchange, lease, or transfer of these parcels from specified provisions of the California Environmental Quality Act, and would require the reservation of mineral rights, as specified.

This bill would authorize the Governor to direct the Department of General Services to transfer to the United States National Park Service property for inclusion within the San Francisco Maritime National Historic Park.

This bill would rescind the authorization of the Director of General Services to sell, exchange, or lease specified parcels of state property.

This bill would authorize the Director of Parks and Recreation, with the approval of the State Public Works Board and the Director of General Services, to sell or exchange specified parcels of state property and would provide that the net proceeds derived from these sales or exchanges are to be deposited in the State Parks and Recreation Fund.

Ch. 785 (SB 364) Sher. Commercial fishing: squid.

(1) Existing law authorizes the taking of squid for commercial purposes north of Point Conception subject to regulations adopted by the Fish and Game Commission specifying the days of the week and the times of the day when squid may be taken. Existing law also prohibits certain activities relating to taking of squid for commercial purposes in Fish and Game District 10.

This bill would, until April 1, 2001, authorize the taking of market squid north of Point Conception only between noon on Sunday and noon on Friday. The bill would prohibit a person from using a vessel, on or after April 1, 1998, to take or land market squid with dip, purse seine, or lampara nets for commercial purposes, unless the owner of the vessel holds a commercial market squid vessel permit that has been issued for that vessel to the vessel's record owner under conditions specified in the bill.

The bill would require applications for commercial market squid vessel permits for the 1998-99 permit year to be received by the department on or before April 30, 1998, or to

be postmarked by that date. Under the bill, permits may be renewed annually on or before April 30 of each year by applicants who were issued a commercial market squid vessel permit in the immediately preceding year. The bill would require the Department of Fish and Game to establish the fee for the commercial market squid vessel permit in an amount not to exceed the reasonable cost incurred by the department in administering the permit program, as specified, or \$2,500, whichever is less. Under the bill, applications that do not meet the April 30 deadline in any year, but that are received by May 31 of that year, are subject to an additional \$250 fee. The bill would prohibit the sale, trade, or transfer of the permit to another person.

The bill also would require the department to establish a fee for a commercial squid light boat owner's permit in an amount not to exceed the reasonable cost incurred by the department in administering that provision, as specified, or \$2,500, whichever is less. The bill would require applications for commercial squid light boat owner's permits for the 1998 permit year to be received by the department on or before April 30, 1998, or to be postmarked by that date. Under the bill, permits may be renewed on or before April 30 of each year by applicants who were issued a commercial squid light boat owner's permit in the immediately preceding year. Under the bill, applications that do not meet the April 30 deadline in any year, but that are received by May 31 of that year, are subject to an additional \$250 fee.

The bill would allow a commercial market squid vessel permit or a commercial squid light boat owner's permit to be transferred to another vessel owned by the permit holder if the permitted vessel was lost, destroyed, stolen, or suffered a major mechanical breakdown, and other conditions are met, as specified.

The bill would make it unlawful to attract squid by light displayed from a vessel, as specified, unless the vessel used for the activity has been issued a commercial market squid vessel permit or the person holds a commercial squid light boat owner's permit.

The bill would require the commission, on or after April 1, 1998, and annually thereafter, until April 1, 2001, to adopt regulations to protect the squid resource and manage the squid fishery at a sustainable level, upon recommendation of the Director of Fish and Game after a public hearing at which findings are adopted.

The bill would provide that the director shall be responsible for the development of research protocols and the development of recommendations for the management of the squid fishery, as specified, and for the conduct of public hearings to receive information on the resource and the fishery. The bill would authorize the director to establish a Squid Research Scientific Committee, as specified, to assist in the development of research protocols. The bill would also authorize the director to establish a Squid Fishery Advisory Committee, as specified. The bill would require the director, in consultation with the advisory committee, if established, and following public hearings, to submit to the Legislature, on or before April 1, 2001, a report on the status of the market squid fishery with recommendations for a market squid conservation and management plan, as specified.

Because other provisions of existing law would make a violation of the bill a crime, the bill would impose a state-mandated local program.

(2) Existing law requires a person who receives, transports, processes, or sells fish for commercial purposes to have a commercial fish business license of one of certain classes.

Until April 1, 2001, this bill would additionally prohibit a person from purchasing squid, except as specified, from a vessel unless that person holds a commercial fishing license, as specified, employs a certified weighmaster, and the facilities operated by the person are located on a permanent, fixed location.

(3) Under existing law, a person who receives fish from a fisherman for commercial purposes and a commercial fisherman who sells fish to other than a licensed fish receiver is required to pay a landing tax in certain amounts based on the type of fish sold.

This bill would, until April 1, 2001, authorize the landing taxes collected for squid to be used for purposes of the bill.

(4) Existing law requires fees and landing taxes collected by the department to be deposited in the Fish and Game Preservation Fund and continuously appropriates the fund to the department and the commission to carry out the Fish and Game Code.

Because the bill would add new fees to be deposited in the fund, would authorize new expenditures from landing taxes in the fund, and would impose new duties on the department and the commission, the bill would make an appropriation.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 786 (SB 431) Lee. Local libraries: property tax revenue.

Existing property tax law prohibits a county auditor, for the 1994–95 fiscal year and each fiscal year thereafter, from reducing the amount of ad valorem property tax revenue that is deemed allocated in the prior fiscal year to any of certain types of local library entities for purposes of increasing the amount of ad valorem property tax revenues allocated to a different jurisdiction.

This bill would clarify that this prohibition does not preclude a county auditor from allocating ad valorem property tax revenues to the county's Educational Revenue Augmentation Fund, rather than to a library entity as described in existing law, as a result of a reduction made pursuant to specified statutes in the 1992–93 and 1993–94 fiscal years in the amounts of property tax revenue deemed allocated to that entity in the fiscal years prior to those fiscal years. This bill would also prohibit the shift of property tax revenues from certain county free library systems to a county's Educational Revenue Augmentation Fund, and would clarify the status of certain county free library systems as special districts subject to revenue allocation and shift requirements. This bill would specify that these provisions do not constitute a change in, but are declaratory of, existing law.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 787 (SB 463) M. Thompson. Abalone.

(1) Under existing law, the taking of abalone for purposes other than for profit is regulated by the Fish and Game Commission.

This bill would require a person taking abalone from ocean waters to have an abalone stamp obtained from the Department of Fish and Game for a fee of \$12, affixed to his or her sport fishing license. The bill would require the fees received pursuant to the bill to be used only for the Recreational Abalone Management Program, as specified in the bill. Because a violation of the stamp requirement in the bill would be a misdemeanor under other provisions of existing law, the bill would impose a state-mandated local program by creating a new crime.

The bill would require the Director of Fish and Game to appoint a Recreational Abalone Advisory Committee of 9 members who possess specified qualifications.

(2) Existing law prohibits the taking of abalone for commercial purposes during specified months of the year and prohibits the taking of abalone at any time in certain fish and game districts. Existing law imposes size and number limitations on the taking of abalone and requires any person who takes abalone to have a valid abalone diving permit issued by the commission.

This bill would repeal those provisions and, instead, would make it unlawful to take abalone for commercial purposes in Fish and Game District 6, 7, 16, 17, or 19A, in District 10 north of Point Lobos, or in District 20 between Southeast Rock and the extreme westerly end of Santa Catalina Island. In addition, the bill would impose a moratorium on the taking, possessing, or landing of abalone for commercial or recreational purposes in ocean waters of the state south of a line drawn due west magnetic from the center of the mouth of San Francisco Bay, including all islands offshore the mainland of California.

The bill would require the department, on or before January 1, 2003, to submit to the commission, a comprehensive abalone recovery and management plan, as specified. Funding to prepare the plan would be derived from the abalone stamp fees.

Under the bill, once the plan is submitted, the department may apply to the commission to reopen sport or commercial fishing in all or any portion of the waters closed by the moratorium. The bill would authorize the commission to reopen the waters upon a finding that the abalone resource can support additional harvest activities. The

bill would also authorize the commission to close or establish no-take marine refuges in any waters opened to sport or commercial fishing if it makes a finding that this action is necessary to comply with the abalone management plan.

(3) Existing constitutional law requires money collected pursuant to any state law relating to the protection or propagation of fish and game to be used for activities relating thereto. Existing statutory law requires $\frac{1}{2}$ of the revenue from fines and forfeitures imposed or collected for violations of the Fish and Game Code to be deposited in the Fish and Game Preservation Fund and the other $\frac{1}{2}$ to be paid to the county in which the offense was committed. Existing law also declares the intent of the Legislature that the costs of commercial fishing programs be provided out of specified revenues relating to commercial fishing.

This bill would create the Abalone Restoration and Preservation Account and require the fees from the abalone stamps described in (1) to be deposited in this account and would continuously appropriate the moneys in that account to the department to be used only for the purposes described in (1).

This bill would require all fines and forfeitures imposed or collected for the taking of abalone for any purpose other than for profit in violation of the bill or any other provision of law to be deposited $\frac{1}{2}$ to the Abalone Restoration and Preservation Account and $\frac{1}{2}$ to the county treasury of the county in which the violation occurred.

(4) Existing law establishes maximum punishments for the illegal take of abalone. These punishments include a fine of \$5,000, imprisonment in the county jail for a period not to exceed one year, the revocation of certain licenses, or any combination of those penalties.

This bill would increase the maximum fine to 5 times the market value of the abalone taken or \$10,000, whichever is greater, and allow for revocation of all commercial and sport licenses issued by the department for up to 10 years. The bill would also require the department to permanently revoke the commercial fishing license and any commercial fishing permits of any person convicted of taking or possessing abalone out of season, taking or possessing illegally taken abalone from any area north of Point Sur, removing abalone from the shell or possessing abalone removed from the shell, as specified, or taking or possessing abalone that are less than the minimum size, as specified.

(5) Under existing law, a person who is required to pay a landing tax for abalone must pay an additional tax of \$0.195 for each pound, or fraction thereof, of abalone, to be deposited in the Fish and Game Preservation Fund and used for the Abalone Resources Restoration and Enhancement Program.

This bill would recast and renumber those provisions.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 788 (SB 675) Costa. Air pollution: odors.

Existing law prohibits the discharge of any air contaminant or other material that causes injury, detriment, nuisance, or annoyance to, or that endangers, a considerable number of persons or the public. Existing law, until October 16, 1997, exempts from that prohibition odors emanating directly from a facility or operations that produce, manufacture, or handle compost, as defined, and requires an air pollution control district or air quality management district that receives a complaint regarding such an odor to refer the complaint as soon as feasible to an enforcement agency for action pursuant to the California Integrated Waste Management Act of 1989.

This bill would extend that exemption until 4 years after the effective date of the bill, and require the districts to report those complaints to an enforcement agency within 24 hours or by the next working day. The bill would require the California Integrated Waste Management Board, on or before April 1, 1998, to convene a working group, as prescribed, to assist in the implementation of the exemption, require the board and the working group to take specified actions by April 1, 1999, and require the board to implement, by January 1, 2000, recommendations of the working group that the board determines to be appropriate.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 789 (SB 802) Costa. Independent study apportionments.

Existing law authorizes the governing board of a school district or county office of education to offer independent study to meet the educational needs of pupils and provides a cap on the number of units of average daily attendance for independent study to be funded that reflects a specified pupil-teacher ratio. Existing law requires each county superintendent of schools to provide for an audit of all funds under his or her jurisdiction, as specified. Not later than December 15 of each year, a report of each audit for the preceding fiscal year is required to be filed with the county superintendent of schools in which the school district is located, the State Department of Education, and the Controller. The Superintendent of Public Instruction is required to make any adjustments necessary in future apportionments of state funds to correct any audit exceptions contained in an audit of a school district under his or her jurisdiction and to take specified corrective action. The county superintendent of schools is required to identify by school district any attendance-related audit exceptions that had a fiscal impact on state funds, as specified.

This bill would require the Carruthers Union High School District, the Coalinga/Huron Joint Unified School District, the Dos Palos-Oro Loma Joint Unified School District, the Fowler Unified School District, the Kerman Unified School District, the Laton Joint Unified School District, the Mendota Unified School District, the Parlier Unified School District, the Reef-Sunset Unified School District, and the Selma Unified School District to pay specified fiscal assessments for audit exceptions with respect to independent study apportionments made to those school districts. This bill would provide for these school districts that the Fiscal Crisis and Management Team (FCMAT) shall audit the school district's reports of adult education average daily attendance when requested to do so by the governing board of the school district, and would appropriate \$200,000 without regard to fiscal year to FCMAT to do any requested audits. This bill would only apply to a school district that has assigned all of its rights to the State of California against all 3rd-party consultants who received any portion of the independent study apportionments made to that school district for each of the 1990-91, 1991-92, 1992-93, 1993-94, and 1994-95 fiscal years. The fiscal assessment would be repaid over a period of not less than 4 years nor more than 8 years to be determined for each school district subject to these provisions by the controller, in consultation with the State Department of Education and the Department of Finance. Commencing with the 1997-98 fiscal year, the fiscal assessment would be repaid with interest, as specified.

This bill would provide that the repayment of those fiscal assessments shall be deemed to settle all claims that may arise from audit exceptions for those school districts for the 1990-91, 1991-92, 1992-93, 1993-94, and 1994-95 fiscal years with respect to the use of state funds allocated to those school districts from those fiscal years for the purposes of independent study.

This bill would require the appropriation in this bill to be included in the amount appropriated by the state in the 1997-98 fiscal year for the purpose of meeting the state's minimum funding obligation to school districts and community college districts under Section 8 of Article XVI of the California Constitution for that fiscal year.

This bill would make a declaration of unique circumstances in that regard.

Ch. 790 (SB 1348) Committee on Business and Professions. Professions: sellers of travel: real estate appraisers: immigration consultants: yacht brokers.

(1) The Real Estate Appraisers' Licensing and Certification Law authorizes the Director of the Office of Real Estate Appraisers to issue to a licensee, applicant for licensure, or person who acts in a capacity that requires a license under the act a citation that may contain an order to pay an administrative fine assessed by the office if the appraiser is in violation of this law or any regulations adopted to carry out its purposes.

This bill would authorize the director to issue a citation that may contain an administrative fine assessment to a course provider, as defined, applicant for course provider accreditation, or a person who, or entity that, acts in a capacity that requires course provider accreditation for violation of this law or any regulations adopted to carry out its purposes. The bill would provide that, if appropriate, the citation may contain an

order to enroll in, and successfully complete, additional basic or continuing education courses, as specified, and would revise provisions relating to the payment of fines assessed by the director.

This bill would also authorize the director to assess a fine against a licensee, applicant for licensure, person who acts in a capacity that requires a license under the law, course provider, applicant for course provider accreditation, or a person who, or entity that, acts in a capacity that requires course provider accreditation for violation of the law or any regulations adopted to carry out its purposes. The bill, in addition, would require a licensee, applicant for licensure, course provider, or applicant for course provider accreditation to report to the office, in writing, the occurrence of certain events relating to any criminal convictions of a licensee, applicant for licensure, course provider, or applicant for course provider accreditation, or any disciplinary proceedings against a licensee or course provider, in accordance with prescribed procedures.

(2) Existing law requires the Office of Real Estate Appraisers to include in its regulations requirements for licensure and discipline of real estate appraisers that ensure protection of the public interest.

This bill would require the office to publish a summary of public disciplinary actions taken by the office, including resignations while under investigation and the violations upon which these actions are based.

(3) Existing law does not provide for the recovery of costs for investigation, enforcement, and prosecution by the Office of Real Estate Appraisers.

This bill would authorize any order issued in resolution of a disciplinary proceeding to direct a licensee, applicant for licensure, person who acts in a capacity that requires a license under the Real Estate Appraisers' Licensing and Certification Law, course provider, applicant for course provider accreditation, or a person who, or entity that, acts in a capacity that requires course provider accreditation found to have committed a violation or violations of statutes or regulations relating to the standards of professional appraiser practice to pay these costs.

(4) The Real Estate Appraisers' Licensing and Certification Law establishes the Real Estate Appraisers Regulation Fund in the State Treasury consisting of moneys raised by fees and assessments imposed pursuant to the act, and requires that interest be paid on all money transferred to the General Fund from the Real Estate Appraisers Regulation Fund, notwithstanding certain provisions.

This bill would require that the interest on this money be paid at the pooled money investment rate.

(5) Existing law provides that any person aggrieved, as defined, who suffers a loss may file a claim with the Travel Consumer Restitution Corporation, in accordance with specified procedures, provides that a claimant may request reconsideration of, and appeal, an adverse decision by the corporation, and entitles the claimant to receive attorney's fees and costs if he or she prevails on appeal. Existing law also requires the corporation to establish an operations fund for the payment of costs of operations and administration and requires all participants registering or applying for registration to pay to the corporation a one-time assessment of \$25 per location from which the participant does business in the state in order to provide additional funding for the operations of the corporation.

This bill would authorize a seller of travel to request reconsideration of, and appeal, an adverse decision of the corporation. It would also increase the above assessment fee from \$25 to \$35, and would allow the corporation to seek recovery from a seller of travel of amounts paid from the fund, interest, and associated collection expenses. The bill would make other related changes.

(6) Existing law provides that prior to engaging in the business or acting in the capacity of an immigration consultant on or before December 31, 1997, each person shall file with the Secretary of State a bond, or a deposit in lieu of a bond, of \$10,000, as specified.

This bill would require each person engaging in the business or acting in the capacity of an immigration consultant on and after January 1, 1998, to file with the Secretary of State a bond or deposit of \$25,000.

(7) Existing law, until January 1, 1998, authorizes a person who is awarded damages in an action or proceeding for injuries caused by the acts of a person engaged in the

business of, or acting in the capacity of, an immigration consultant, in the performance of his or her duties as an immigration consultant, to recover damages from the bond or deposit, and also provides that when any claim or claims against a bond or a deposit in lieu of a bond have been paid so as to reduce the principal amount of the bond or deposit remaining available to pay claims below the principal amount required, the immigration consultant shall cease to conduct any business unless and until that time as the bond has been reinstated or moneys have been deposited in the deposit account with the Secretary of State to bring the bond or deposit account balance available for the payment of claims up to the minimum amount required.

This bill would extend the operation of these provisions until January 1, 2002.

(8) Existing law, the Stop Tobacco Access to Kids Enforcement (STAKE) Act, authorizes the State Department of Health Services to assess civil penalties against any person, firm, or corporation that sells tobacco products or other controlled substances to persons who are under 18 years of age.

This bill would also provide for civil penalties to be assessed by the department against any person, firm, or corporation that advertises, or causes to be advertised, tobacco products on any outdoor billboard within 1,000 feet of any public or private school or public playground.

(9) The Yacht and Ship Brokers Act provides for the licensing of yacht and ship brokers by the Department of Boating and Waterways and establishes the qualifications necessary for a person to apply for a broker's license.

This bill would additionally provide that a person who has owned and operated a marine business selling new or used yachts for a minimum of 3 continuous years is qualified to submit an application for a broker's license.

Ch. 791 (SB 1243) Hughes. Dentistry.

Existing law provides for the licensure and regulation of the practice of dentistry by the Board of Dental Examiners of the State of California.

Existing law provides that a foreign trained dental applicant who fails to pass the restorative technique examination after 3 attempts shall not be eligible for further reexamination until the applicant has successfully completed a minimum of 2 academic years of education at an approved dental school and provides for the repeal of this provision on January 1, 1998.

This bill would instead apply this provision when a person has failed to pass the examination after 4 attempts, and would instead provide for its repeal on January 1, 1999. The provisions would not become operative if AB 1116 is enacted and also amends the provisions.

Existing law requires the board to prescribe certain licensure and regulation fees. Existing law requires the board to report to the appropriate fiscal committees of each house of the Legislature whenever the board increases any of these fees and to specify the rationale and justification for the increase. Existing law provides for the deposit of the fees in the State Dentistry Fund, a continuously appropriated fund.

This bill would delete the prescribed fee for an initial license and renewal of a license and would provide that the fee not exceed \$450. The bill would increase the maximum allowable amount for fees for application for examination, for examination and reexamination, for late registration of change of place of practice, and for issuance of a substitute certificate.

Since this bill would increase the amount of moneys in a continuously appropriated fund, it would make an appropriation.

Existing law requires the Board of Dental Examiners to collect specified data on the international dental candidates who are admitted to, and take, the restorative examination and to submit a report, containing specified information about these candidates, to the Legislature during 1997.

This bill would instead require the report to be submitted during 1998.

Ch. 792 (AB 1116) Keeley. Dentistry: foreign dental school graduates.

Existing law provides for the licensure and regulation of the practice of dentistry and requires an applicant for licensure to have graduated from a dental college approved by the Board of Dental Examiners of California. Existing law provides that a person who has

been issued a degree of doctor of dental medicine or doctor of dental surgery by a foreign dental school shall be eligible for the licensure examination if he or she has completed certain requirements.

This bill would, commencing January 1, 2003, revise the requirements for licensure of applicants who are graduates of foreign dental schools. The bill would require the board to be responsible for the approval of foreign dental schools based on prescribed standards, and would establish procedures regarding this approval process. It would require a school to pay a registration fee, not to exceed \$1,000, at the time of application for approval to pay all reasonable costs and expenses of the board related to the approval survey and process, and a fee not to exceed \$500 for renewal of the approval every 7 years. By providing for a new source of revenue to be deposited in the continuously appropriated State Dentistry Fund this bill would make an appropriation.

Existing law provides that an applicant who fails to pass the licensure examination after 3 attempts shall not be eligible for further reexamination until he or she has successfully completed at least 2 academic years of education at an approved dental school.

This bill would instead apply this requirement to any applicant who fails the licensure examination after 4 attempts, and would provide for the repeal of this provision on January 1, 2003. It would state that the Legislature urges all dental schools in California to provide in their curriculum a 2-year course of study that may be utilized by graduates of foreign dental schools to attain the prerequisites for licensure in California.

Existing law makes it a misdemeanor for any person, company, or association to assume the degree of "doctor of dental surgery," "doctor of dental science," or "doctor of dental medicine" or to append the letters "D.D.S.," "D.D.Sc.," or "D.M.D." to his or her name without having had the right to assume the title conferred on him or her by diploma from a recognized dental college or school authorized to do so.

This bill would notwithstanding this provision and would authorize any person who holds a valid, unrevoked, and unsuspended certificate as a dentist in California to append the letters "D.D.S." to his or her name, regardless of the degree conferred upon him or her by the dental college from which the licensee graduated.

Ch. 793 (AB 1544) Committee on Human Services. Dependent children and foster youth.

(1) Existing law authorizes the juvenile court, in considering the disposition of a case of a child who is removed from the physical custody of his or her parents, to give preferential consideration to a request for placement of the child with a relative.

This bill would declare the intent of the Legislature to, among other things, remove barriers to adoption by relatives of children currently in, or at risk of entering, the dependency system. The bill would authorize a relative of a minor to file a petition for adoption, would authorize the relative, the birth relatives of a minor, including the parents of the minor, and the minor to enter into a kinship adoption agreement, as specified, and would establish procedures for the enforcement, modification, and termination of the agreements. It would require that if the minor has been found to come within the dependency jurisdiction of the juvenile court or is the subject of a petition for dependency jurisdiction he or she shall be represented by an attorney for purposes of consent to a kinship adoption agreement.

The bill also would make various changes in the law relating to dependency proceedings, including specifying additional circumstances in which reunification services need not be provided and revising the factors a court must consider when determining the appropriateness of the placement of a minor who is taken from the custody of his or her parents with a relative. It would specifically provide that these services may be provided to a statutorily presumed or biological father, as specified. It also would require the juvenile court, at the detention hearing of a minor alleged to come within the dependency jurisdiction of the court or as soon thereafter as practicable, to conduct an inquiry, as specified, of the identity and address of all presumed or alleged fathers. If one or more men are identified as an alleged father, the bill would require that they be provided notice alleging that they are or may be the father of the child, as specified. The bill would provide that while a dependency action for a child is pending, the dependency court would have exclusive jurisdiction to hear an action to determine a father and child relationship in that case.

The bill would also provide that at a jurisdictional hearing to determine whether a minor may be a dependent child of the court, objections which could have been made to evidence shall be deemed to have been made by any parent or guardian present at the hearing and unrepresented by counsel, except as specified. The bill would make a similar provision with respect to any unrepresented child.

Because the bill would impose new or increased duties on local officials, it would create a state-mandated local program.

(2) Existing law defines a foster family home as a residential facility providing 24-hour care for 6 or fewer foster children, as specified. Existing law regulates these facilities.

This bill would permit a foster family home to include more than 6 children for the purpose of placing sibling or half siblings together in foster care, under specified conditions, for purposes of those provisions.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 794 (AB 1193) Shelley. Kinship support services.

Existing law requires the State Department of Social Services to implement a program of family preservation and support services that meets federal requirements, and establishes specified procedures for the allocation of funding for family preservation and support programs. Existing law authorizes counties to participate in the program.

This bill would require the department to conduct a Kinship Support Services Program that is a grants-in-aid program providing start-up and expansion funds for local kinship support services programs that provide community-based family support services to kinship (relative) caregivers and the children placed in their homes by the juvenile court or who are at risk of dependency or delinquency. This bill would appropriate specified sums from the General Fund to the department to fund this program, specified technical assistance provisions of the bill, and the costs of state administration of the program.

Ch. 795 (SB 163) Solis. Children: wrap-around services.

Existing law creates the Aid to Families with Dependent Children-Foster Care program, under which a combination of federal, state, and county funds are used to provide reimbursement to families and facilities providing foster care to eligible children.

Existing law also requires each county to provide child welfare services.

Existing law also provides, until July 1, 2001, for the establishment in Santa Clara County, at the county's option, of a pilot project to continue the provision of intensive wrap-around services, as defined, to eligible children in foster care or at imminent risk of this placement. These provisions would be repealed on January 1, 2002.

This bill would, instead, permit each county to participate in this pilot project, if approval for the county's participation is given by the State Department of Social Services, and would make various other changes in these pilot project provisions.

The bill would also extend the operative date of these provisions until October 1, 2003, and the date of their repeal until April 1, 2004.

Ch. 796 (SB 1305) Sher. Public utilities.

Existing law, the Public Utilities Act, provides for the furnishing of utility services, including furnishing electricity, by privately owned public utilities subject to the jurisdiction and control of the Public Utilities Commission and similar services by publicly owned public utilities.

The bill would establish a program under which entities offering electric services disclose accurate, reliable, and simple to understand information on the generation attributes of the electricity they propose to sell.

The bill would also require the Energy Resources Conservation and Development Commission, in conjunction with the California Air Resources Board and affected air districts, to issue a report to the Legislature by June 1, 1999, assessing the air emission effects of electric utility restructuring.

Since existing law makes any public utility, as defined, and any person or entity other than a public utility, that violates the Public Utilities Act guilty of a misdemeanor, and the provisions of the bill would be within the act, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 797 (AB 456) Ducheny. Real property: reverse mortgages.

Existing law provides for the regulation of various real estate loans such as conventional mortgages and shared appreciation loans for seniors.

This bill would provide for the regulation of defined reverse mortgages, executed on or after January 1, 1998. It would require all reverse mortgages to comply with its provisions. In addition to other changes, the bill would also require the loan applicant to receive a prescribed statement before entering into a reverse mortgage loan. The bill would specify that reverse mortgage loan payments shall not be considered income for purposes of determining eligibility and benefits under means-tested programs of aid to individuals, except as specified.

Ch. 798 (AB 1553) Committee on Insurance. Insurance: late fees: disclosures.

(1) Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations and for the regulation of policies of disability insurance administered by the Insurance Commissioner. Under existing law, a willful violation of any of the provisions governing health care service plans is punishable as either a felony or a misdemeanor. Existing law also requires health care service plans and certain disability insurance policies that provide maternity coverage to provide specified minimum levels of coverage for postdelivery inpatient hospital care and to provide notice thereof in the plan's or the insurer's evidence of coverage for evidence of coverage issued on or after January 1, 1998, and to provide additional written notice of this coverage during the course of an enrollee's or insured's prenatal care.

This bill would require health care service plans that issue contracts that provide for coverage of the type commonly referred to as "preferred provider organizations," and certain disability insurers, to provide additional written notice of this postdelivery inpatient hospital care coverage to all females between the ages of 10 and 50 who are covered by these contracts and policies.

Because a willful violation of the provisions applicable to health care service plans is a crime, this bill would impose a state-mandated local program.

(2) Existing law provides that whenever a policy of insurance, a policy of life insurance, a policy of disability insurance, or a certificate of coverage, as specified, is first issued to or delivered to a new insured or a new policyholder in this state, the insurer shall include a written disclosure printed in large, boldface type containing certain information.

This bill would require an insurer to also include in the written disclosure, at the insurer's discretion, either the address and the telephone number of the insurer or the address and telephone number of the agent or broker of record, or both of those addresses and telephone numbers. The bill would also provide that if the policy or certificate was issued or delivered by an agent or broker, the disclosure shall specifically advise the insured to contact his or her agent or broker for assistance.

(3) Existing law sets forth various fees that may be charged by the Department of Insurance relative to the performance of various services by the department.

This bill would provide that certain uncontested departmental billings for authorized services or assessments that are not paid to the department within 45 days of the invoice date shall be subject to a late charge. The bill would provide a procedure for an insurer

to contest a billing under which late charges for the portion of the billing that is contested would be tolled.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) This bill would declare that it is to take effect immediately as an urgency statute, and would provide for delayed operation of certain provisions of the bill, as specified.

Ch. 799 (SB 1130) M. Thompson. Funding of medical education.

Under existing law, the State Department of Health Services and the California Medical Assistance Commission administer various health programs. Under existing law, the University of California provides medical education.

This bill, among other things, would state the intent of the Legislature that the University of California initiate discussions with the State Department of Health Services and the California Medical Assistance Commission relating to the future funding of graduate medical education and other health professions' training programs, and that the parties consider specified criteria in developing a set of specific objectives and parameters for any proposal developed under these provisions.

Ch. 800 (SB 1291) Calderon. Motor vehicle leases.

(1) Existing law requires a creditor, as defined, who obtains the signature of more than one person on a consumer credit contract, as defined, to deliver a prescribed notice to each person who does not in fact receive any of the money, property, or services which are the subject matter of the contract, except as specified.

This bill would revise the definition of a consumer credit contract to include a lease contract for a motor vehicle, as specified, and would require a creditor who is a lessor under such a lease contract to provide a prescribed notice, in lieu of the above described notice, in English and in Spanish to each person who does not in fact receive the vehicle, prior to that person becoming liable on the lease contract, unless the persons are married to each other.

(2) Existing law provides that if any solicitation to enter into a lease contract for a motor vehicle includes a statement of the amount of payment, the number of payments, or that any capitalized cost reduction, any or no downpayment, or other payment is required at the inception of the lease, the solicitation shall also include a specified statement.

This bill would delete this provision and require a solicitation to enter a lease contract for a motor vehicle that includes a statement as to the amount of any payment or a statement of any capitalized cost reduction or other payment required, or that no capitalized cost reduction or other payment is required, to state prescribed items.

(3) Existing law specifies requirements for contracts for leases of motor vehicles, including the requirement that the contract contain prescribed information regarding the motor vehicle and the terms of the lease.

This bill would revise and recast these provisions to, among other things, authorize the contract operative January 1, 1998, and require the contract operative March 1, 1998, to contain all disclosures prescribed by specified federal regulations. The bill also would provide that a lessee has the right to terminate a lease at any time prior to the scheduled expiration date and sets forth methods for calculating the lessee's liability in the event of an early lease termination, as specified. It also would make related changes.

(4) Existing law relating to paragraphs (2) and (3) provides that it is a misdemeanor for a person to knowingly and willfully violate those provisions. By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 801 (SB 42) Kopp. Air pollution: vehicles: inspection and maintenance.

Existing law exempts any motor vehicle manufactured prior to the 1966 model-year from provisions requiring vehicles powered by internal combustion engines in certain areas of the state to obtain a smog check certificate of compliance or noncompliance biennially, upon transfer of ownership, or upon registration of a vehicle previously registered outside the state.

This bill would, instead, exempt from those requirements any motor vehicle manufactured prior to the 1974 model-year or, beginning January 1, 2003, that is 30 or more model-years old.

Ch. 802 (AB 208) Migden. Vehicles: inspection and maintenance: high polluter repair or removal.

(1) Existing law establishes a High Polluter Repair or Removal Program administered by the Department of Consumer Affairs and the State Air Resources Board for the repair or removal of high-polluting motor vehicles. Existing law establishes the High Polluter Repair or Removal Account in the Vehicle Inspection and Repair Fund, and requires money deposited in the account, including donations, grants, and payments that exempt a vehicle upon the 2nd renewal of the registration from the requirement for a biennial smog check, to be available for purposes of the program. Existing law requires the department and the state board to seek federal funds and explore other funding sources for deposit in the account.

Existing law imposes a \$300 smog impact fee on certain vehicles previously registered outside the state and requires those revenues to be deposited in the General Fund.

This bill would revise the specification of vehicles that are subject to that fee, require those smog impact fee revenues, on and after July 1, 1998, to be instead deposited in the High Polluter Repair or Removal Account, and specify the purposes for which money in the account may be used. The bill would declare the intent of the Legislature to identify new funding sources for the program.

The bill would subject vehicles that would be exempt from the biennial smog check certificate requirement because they are 4 or less model years old to an annual smog abatement fee of \$4 and increase that fee to \$6 for a specified period if the state is unable to impose or collect the smog impact fee, as specified. The bill would specify the disposition of those fee revenues.

The bill would authorize the department to conduct a pilot program to exempt certain vehicles from the biennial certificate requirement, and to establish that program permanently, as specified, and would impose related duties on the department, the state board, and a specified review committee which the bill would designate as the Inspection and Maintenance Review Committee.

(2) Existing law requires the state board to adopt, by regulation, by June 30, 1997, a statewide program, to commence in 1998, to provide for emission reduction credits for retiring light-duty vehicles.

This bill would extend those dates to December 31, 1998, and 1999, respectively.

(3) The bill would become operative only if both AB 57 and AB 1492 are enacted and take effect on or before January 1, 1998.

Ch. 803 (AB 1492) Baugh. Air pollution: motor vehicle inspection and maintenance.

(1) Existing law establishes a motor vehicle inspection and maintenance (smog check) program, administered by the Department of Consumer Affairs and the State Air Resources Board. The smog check program is required to provide for inspection of motor vehicles upon registration, biennially upon renewal of registration, upon transfer of ownership, and in certain other circumstances.

This bill would require the smog check program to provide for the inspection, in those instances, only of specified motor vehicles, as determined by the department, except as otherwise provided in the smog check law.

(2) Existing law, a part of the smog check program, requires all motor vehicles that are registered in designated areas of the state to biennially obtain a certificate of compliance or noncompliance with motor vehicle emission standards, except for certain exempted motor vehicles. Existing law requires the cost limit for repairs under the smog

check program to be a minimum of \$450, except as specified. Existing law requires the issuance of an emission cost waiver for a motor vehicle that has been properly tested but does not meet the applicable emission standards, if no adjustment or repair will reduce emissions from the vehicle without exceeding the \$450 cost limit. The department is required to develop and implement either a repair subsidy program or a program that would provide for a 12-month economic hardship extension for motor vehicles from the biennial certificate of compliance requirement under specified circumstances, as prescribed.

A violation of any provision relating to those requirements is a misdemeanor.

This bill would authorize the department, after fulfilling specified requirements, to conduct a pilot program to exempt certain motor vehicles from the biennial certification requirement and, with the approval of the Environmental Protection Agency, to establish permanent exemptions. The bill would exempt from the biennial certification requirement any motor vehicle or class of motor vehicles 4 years old or less, except as specified.

The bill would repeal certain provisions regarding the economic hardship extension program. The bill would change references to "emission cost waiver" to "repair cost waiver," and would require that such a waiver be issued only upon request. The bill would prohibit the issuance of a repair cost waiver until all appropriate emissions-related partial repairs up to the amount of the repair cost limit have been performed.

The bill would lower the \$450 repair cost limit to \$200, or \$250, as specified, for motor vehicle owners that qualify as low-income. The bill would subject any person who obtains or attempts to obtain a repair cost waiver by falsifying information to a civil penalty of not less than \$150 and not more than \$1,000, and would prohibit them from receiving any repair assistance pursuant to specified existing law. The bill would create a state-mandated local program by creating new crimes or changing the definition of existing crimes.

(3) Existing law requires the testing and repair portion of the smog check program to be conducted by licensed smog check stations, and authorizes a station to be licensed as a smog check test-only station. Existing law requires the department, in enhanced program areas, to contract with test-only stations to provide referee services to the extent necessary to provide appropriate access to referee functions.

This bill would authorize the department to authorize the placement of referees in qualified test-only stations to provide referee services, as prescribed, regulations the qualification of referees and the provision of referee services.

(4) The bill would require the state board and the Bureau of Automotive Repair, on or before January 1, 2003, to design a new proposed program to replace the existing motor vehicle inspection and maintenance program and submit to the Legislature a report on that new program. The bill would require a specified review committee to review the proposed program by July 1, 2003, and submit a proposed plan to the Legislature. The bill would make a related statement of legislative intent.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) The bill would incorporate additional changes in Section 44011 of the Health and Safety Code proposed by SB 42, to be operative only if this bill and SB 42 are both enacted and become effective on or before January 1, 1998, each bill amends Section 44011 of the Health and Safety Code, and this bill is enacted last.

(7) The bill would become operative only if both AB 57 and AB 208 are enacted and take effect on or before January 1, 1998.

Ch. 804 (AB 57) Escutia. Air pollution: vehicles: repair.

(1) Existing law establishes a motor vehicle inspection and maintenance (smog check) program, administered by the Department of Consumer Affairs; requires inspection of motor vehicles upon initial registration, biennially upon renewal of registration, upon transfer of ownership, and in certain other circumstances; and requires all motor vehicles that are registered in designated areas of the state to

biennially obtain a certificate of compliance or noncompliance with motor vehicle emission standards, except for certain exempted motor vehicles. Existing law provides that the cost limit for repairs under the smog check program shall be a minimum of \$450, except as specified. Existing law requires the issuance of an emission cost waiver for a motor vehicle that has been properly tested but does not meet the applicable emission standards, if no adjustment or repair will reduce emissions from the vehicle without exceeding the \$450 cost limit. The department is required to develop and implement either a repair subsidy program or a program that would provide for a 12-month economic hardship extension for motor vehicles from the biennial certificate of compliance requirement under specified circumstances, as prescribed.

A violation of any provision relating to those requirements is a misdemeanor.

This bill would change references from "emission cost waiver" to "repair cost waiver," and would require that such a waiver be issued only upon request of the vehicle owner. The bill would prohibit the issuance of a repair cost waiver until all appropriate emissions-related partial repairs up to the amount of the repair cost limit have been performed. The bill would modify the \$450 repair cost limit to provide that a motor vehicle owner shall qualify for a repair cost waiver only after expenditure of \$450 for repairs, including parts and labor.

The bill would lower the \$450 repair cost limit to \$250, or not more than \$200, as determined by the department, for motor vehicle owners that qualify as low income. The bill would require a qualified low-income motor vehicle owner whose repair cost exceeds the applicable limit to be informed of all options for compliance with the program. The bill would provide for the issuance of an economic hardship extension to a low-income vehicle owner, as specified, and would delete the provisions for the provisions for those extensions as to other vehicle owners.

The bill would subject any person who obtains or attempts to obtain a repair cost waiver or hardship extension by falsifying information to a civil penalty of not less than \$150 and not more than \$1,000, and would prohibit them from receiving any repair assistance pursuant to specified existing law. The bill would create a state-mandated local program by creating new crimes or changing the definition of existing crimes.

(2) Existing law requires the testing and repair portion of the smog check program to be conducted by licensed smog check stations, and authorizes a station to be licensed as a smog check test-only station.

This bill would require the department to provide for low-income repair assistance through entities authorized to perform referee functions, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would become operative only if both AB 208 and AB 1492 are enacted and take effect on or before January 1, 1998. The bill would state the intent of the Legislature that this bill be chaptered after AB 208 and AB 1492.

Ch. 805 (AB 915) Baugh. Liability: recreational activities.

Existing law provides that neither a public entity nor a public employee is liable to any person who participates in a hazardous recreational activity, as specified. Existing law lists various activities as coming within the definition of hazardous recreational activities.

This bill would provide that in-line skating by an adult shall be deemed a hazardous recreational activity for purposes of those provisions, under specified conditions.

The bill would require the Judicial Council, to collect information on lawsuits filed by persons injured while in-line skating on public property, and other related information, as specified. The bill also would require the Judicial Council to collect related information and to issue a report containing this information to the Legislature, on or before March 31, 2000.

The bill would provide for the repeal of these provisions on January 1, 2001.

Ch. 806 (AB 1043) Committee on Revenue and Taxation. Taxation.

(1) The Sales and Use Tax Law provides, subject to certain exceptions, that it is unlawful for the State Board of Equalization, or certain persons having an administrative duty under that law or access to information with respect to sales or transactions and use taxes collected by that board, to make known or allow the disclosure or examination of certain information or documents.

This bill would, as provided, make it unlawful for any local jurisdiction imposing a utility tax, or certain persons with duties on behalf of that jurisdiction who obtain access to information with respect to that tax, to disclose or allow the examination of certain tax-related information or documents. This bill would specify that a violation of these provisions is a misdemeanor. By creating a new crime, this bill would establish a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 807 (AB 1245) Martinez. Hearing aid dispensers.

(1) Existing law provides procedures for the licensing of hearing aid dispensers by the Hearing Aid Dispensers Examining Committee. Existing law provides that these provisions regulating hearing aid dispensers neither license nor prohibit the testing of hearing. However, existing law provides that these provisions apply when testing is conducted by licensed hearing aid dispensers in connection with the fitting and selling of hearing aids.

This bill would delete the above language that provides that the provisions regulating hearing aid dispensers neither license nor prohibit the testing of hearing. The bill would make a conforming change.

(2) Existing law defines the "practice of fitting or selling hearing aids." Existing law makes it a misdemeanor to violate the provisions governing the licensing of hearing aid dispensers.

This bill would permit the conduct of specific hearing tests for purposes of those provisions and would prohibit a hearing aid dispenser from conducting diagnostic hearing tests when conducting tests in connection with the fitting or selling of hearing aids. Because this bill would create a new crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 808 (AB 1491) Cunneen. Hazardous substances: petroleum underground storage tanks.

(1) Under existing law, with specified exceptions, no person may own or operate an underground storage tank containing hazardous substances unless a permit for its operation has been issued by the local agency to the owner or operator of the tank, or a unified program facility permit has been issued by the local agency to the owner or operator of the unified program facility on which the tank is located. Existing law requires an underground storage tank permit to require compliance with certain design and construction requirements and allows a permit to include a schedule of compliance, when necessary, to allow a reasonable opportunity to comply with certain applicable requirements or regulations.

This bill would delete the provision allowing the permit to include a schedule of compliance and would instead require a permit issued for a petroleum underground storage tank system that meets specified requirements to include an upgrade compliance certificate, as prescribed, that documents that the petroleum underground storage tank system meets those requirements. The bill would require the owner to place the certificate in a conspicuous location that can be readily viewed by any person depositing petroleum into the underground storage tank system.

The bill would require the State Water Resources Control Board, by December 22, 1998, to notify all persons that may deliver petroleum to an underground storage tank of where they can obtain a list of underground storage tank facilities that have been issued an upgrade compliance certificate.

The bill would prohibit any person on or after January 1, 1999, from depositing petroleum into an underground storage tank system unless the underground storage tank system meets those described requirements. The bill would require a person depositing petroleum into such an underground storage tank system to verify that the system meets those requirements by taking one of specified actions.

(2) Under existing law, the Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, every owner of an underground storage tank for which a permit is required is required to pay a specified storage fee for each gallon of petroleum placed in the tank. The fees are required to be deposited in the Underground Storage Tank Cleanup Fund. The money in the fund may be expended by the board, upon appropriation by the Legislature, for various purposes, including the costs of implementing the act, payment of a California regional water quality control board's or local agency's corrective action costs, and the payment of claims to aid owners and operators of petroleum underground storage tanks who take corrective action to clean up unauthorized releases from those tanks. The board is required to provide a letter of credit authorizing the payment of corrective action costs from the fund to a claimant whose cost estimate for corrective action has been approved by the board.

This bill would allow the board to reallocate to other corrective action claims any funds appropriated in the annual Budget Act for the payment of a corrective action claim that is encumbered pursuant to a letter of credit but is not expended. The bill would require the board to make a report at least once every 3 months to specified committees of the Legislature and to the Director of Finance on the implementation of those provisions.

Ch. 809 (SB 94) Ayala. Athlete agents: disclosure.

(1) Existing law, the Miller-Ayala Athlete Agents Act, provides for the regulation of the activities of athlete agents, as specified.

This bill would, in addition, do all of the following:

(a) Expand certain regulatory exemptions from provisions of the act to include an individual acting solely as an agent for a foster child or ward.

(b) Require athlete agents, prior to engaging in or carrying on the business of an athlete agent, to file specified disclosures with the Secretary of State concerning the athlete agent and each individual acting as an athlete agent within a firm, company, or partnership, and make related changes, as specified.

(c) Require the payment of filing fees, as specified, to be paid into the State Treasury to the credit of the Business Fees Fund of the Secretary of State.

A violation of specified provisions of the Miller-Ayala Athlete Agents Act would subject an athlete agent to civil and criminal penalties. By expanding the scope of conduct subject to existing criminal penalties, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 810 (SB 132) Solis. Unemployment insurance.

Under existing law, the information obtained in the administration of the Unemployment Insurance Code is for the exclusive use and information of the Director of Employment Development in the discharge of his or her duties and is not open to the public. However, existing law permits the use of the information for specified purposes.

This bill would provide that the disclosure of the name and address of an individual or business entity that was issued an assessment that included penalties under specified provision of law is not prohibited if the assessment is final. It would authorize the disclosure to also include the total amount of the assessment, the amount of the penalty imposed, and the facts that resulted in the charging of the penalty, as specified.

Existing law, in connection with provisions regulating assessments to the Unemployment Insurance Fund, authorizes the imposition of a jeopardy assessment if the collection of any assessments will be jeopardized by delay and if certain conditions are met.

This bill would add to the conditions that permit the imposition of a jeopardy assessment the fact that the assessment includes a penalty.

This bill would incorporate additional changes to Section 1095 of the Unemployment Insurance Code proposed by AB 604 and AB 71, to be operative only if all 3 bills, or a combination thereof, are enacted and become operative on or before January 1, 1998, and this bill is enacted last.

Ch. 811 (SB 316) Hayden. Student Academic Partnership Program.

Under existing law, higher education in this state is provided by the University of California, the California State University, the California Community Colleges, and private and independent colleges and universities. Existing law requires the mission of the public segments of higher education to include a broad responsibility to the public interest. Existing law encourages independent segments of higher education to assume a broad responsibility to the public interest. Existing law encourages the public and independent segments, as part of this responsibility, to support programs of public service and to involve faculty and students in these programs.

This bill, which would only become operative if an appropriation is made for its purposes in the Budget Act of 1997 or another statute enacted during the 1997 portion of the 1997-98 Regular Session, would establish the Student Academic Partnership Program to enable school districts to provide preservice training to prospective teachers and to secure tutoring assistance for pupils in kindergarten and grades 1 to 6, inclusive.

The bill would require schoolsites at which tutoring services are provided to be identified and funded through a competitive process administered by the State Department of Education in consultation with interested school districts and tutor providers.

The bill would encourage collaboration among colleges and universities, as defined, and schools maintaining kindergarten and any of grades 1 to 6, inclusive, to determine community needs, discuss program goals, and coordinate efforts.

The bill would require the State Department of Education to create an evaluation design for the program, would require school districts that receive grants under the program to use this evaluation design to assess the effectiveness of their programs, and would require these school districts to transmit their assessments to the department. The bill would require the department to develop a report to be submitted to the Legislature on or before March 1, 1999.

The bill would make these provisions inoperative on June 30, 2003, and would repeal them as of January 1, 2004.

Ch. 812 (SB 857) Polanco. Contractors.

(1) The Contractors' State License Law defines a general building contractor as a contractor whose principal contracting business is in connection with any structure built, being built, or to be built, for the support, shelter and enclosure of persons, animals, chattels or movable property of any kind, requiring in its construction the use of more than 2 unrelated building trades or crafts, or to do or superintend the whole or any part thereof, with specified exception.

This bill would revise this definition to instead refer to the use of at least 2 unrelated building trades or crafts. It would also allow a general building contractor to take a prime contract or a subcontract for a framing or carpentry project, but would provide that a general building contractor may not take a prime contract involving other trades unless the prime contract requires at least 2 unrelated trades or crafts other than framing or carpentry or unless the general building contractor holds the appropriate specialty license or subcontracts, as specified. The bill would enact related provisions applicable to a general building contractor taking a subcontract, and would also specify the legislative intent with respect to the enactment of these provisions.

(2) Existing law provides for the creation of the Contractors' State License Board in the Department of Consumer Affairs. The board is charged with administering the

provisions that govern persons licensed under the Contractors' State License Law. The board is also required to appoint a registrar of contractors with specified duties. The provisions authorizing the existence of the board and the appointment of the registrar will become inoperative on July 1, 1998, and will be repealed on January 1, 1999.

This bill would extend the inoperative dates to July 1, 2000, and the repeal dates to January 1, 2001.

(3) Existing law requires the Joint Legislative Sunset Review Committee to perform various functions and duties in evaluating and determining whether a board or regulatory program has demonstrated a public need for the board's or program's continued existence, and to report its findings and recommendations to the Department of Consumer Affairs for review.

This bill, until July 1, 2000, would provide that the review of the Contractors' State License Board by the department shall be limited to only those unresolved issues identified by the Joint Legislative Sunset Review Committee.

(4) Existing law provides that if funding is made available for that purpose, the Contractors' State License Board may contract with licensed professionals, as appropriate, for the site investigation of consumer complaints.

On and after July 1, 1998, this bill would require the board to furnish a copy of any opinion prepared by the licensed professional, including any contractor, retained pursuant to the above provision, to the complainant, to the licensee against whom the complaint has been made, and, upon request, to other specified persons. The bill would also require the opinion to include prescribed information. The bill would include related findings and declarations. These provisions would remain operative until July 1, 2000, and would be repealed on January 1, 2001.

The bill would require the board, before January 1, 1999, to consult with specified persons concerning potential administrative regulations to implement a similar program.

(5) The bill would require the board to identify those "C" license classifications that present a risk and to report to the Legislature and the Department of Consumer Affairs by October 1, 1998, as to which specialty licensing classification may be appropriate for consolidation, redefinition, or elimination. The board would be required, not later than July 1, 1999, to take regulatory action to implement the recommendations of the report, as specified.

(6) The bill would require the board to report to the Legislature and the Department of Consumer Affairs on whether revising specialty licensing contractor classifications is appropriate, and to report on whether a separate classification or certification of home improvement contractors is appropriate.

(7) The bill would also make technical and clarifying changes.

Ch. 813 (SB 825) Greene. Contractors' State License Board: sunset date.

(1) The Contractors' State License Law provides for the creation of the Contractors' State License Board in the Department of Consumer Affairs. The board is charged with administering the provisions that govern persons licensed under the Contractors' State License Law. The board is also required to appoint a registrar of contractors with specified duties. The provisions authorizing the existence of the board and the appointment of the registrar will become inoperative on July 1, 1998, and will be repealed on January 1, 1999.

This bill would extend the inoperative dates to July 1, 2000, and the repeal dates to January 1, 2001.

(2) Existing law requires the Joint Legislative Sunset Review Committee to perform various functions and duties in evaluating and determining whether a board or regulatory program has demonstrated a public need for the board's or program's continued existence, and to report its findings and recommendations to the Department of Consumer Affairs for review.

This bill, until July 1, 2000, would provide that the review of the Contractors' State License Board by the department shall be limited to only those unresolved issues identified by the Joint Legislative Sunset Review Committee.

(3) The bill would require the board to report to the Legislature and the Department of Consumer Affairs on whether revising specialty licensing contractor classifications is appropriate.

(4) The bill would also make technical and clarifying changes.

(5) The bill would provide that it shall not become operative unless SB 857 of the 1997-98 Regular Session is also enacted and becomes operative.

Ch. 814 (AB 592) Kuehl. Drinking water: wells: oxygenates: storage tanks and pipelines: MTBE.

(1) Under existing law, the Elder California Pipeline Safety Act of 1981, the State Fire Marshal administers provisions regulating the inspection of intrastate pipelines that transport hazardous liquids. The act establishes the Pipeline Safety Advisory Committee.

This bill would require the State Fire Marshal to develop a comprehensive data base of pipeline information, as specified, that can be utilized for emergency response and program operational purposes. The bill would appropriate \$469,000 from the California Hazardous Liquid Pipeline Safety Fund to the State Fire Marshal for that purpose.

The bill would require the State Fire Marshal, utilizing GIS-based location information furnished by the State Department of Health Services and the State Water Resources Control Board, at least once every 2 years, to determine the identity of each pipeline or pipeline segment that transports petroleum product when that pipeline is located within 1,000 feet of a public drinking water well. The State Fire Marshal would be required to give a specified notification to operators of identified pipelines and those operators, unless exempted as prescribed, would be required to prepare a pipeline wellhead protection plan for the State Fire Marshal's approval, as specified. The bill would specify related matters.

The bill would require the State Fire Marshal, with advice from the Pipeline Safety Advisory Committee, the board, and local water purveyors, to adopt regulations for wellhead protection plans that provide guidelines to be used by the pipeline operator to protect the public drinking water well from contamination should a pipeline rupture or leak pose a significant threat to a public drinking water well, taking into account the nature of the fuel and its ability to migrate to a public drinking water well.

(2) Under existing law, the board has responsibility for the protection of water quality and responsibilities pertaining to underground storage tanks containing petroleum. Existing law requires the board to develop, implement, and maintain a system that is accessible to government agencies and the public for storing and retrieving data from cases involving discharges of petroleum from underground storage tanks.

This bill would require the board to upgrade the data base established under those provisions. The bill would require the board to establish for this and other designated purposes, a GIS Mapping and Data Management Advisory Committee. The bill would require the board, with the advice of the committee, to establish 2 pilot projects, the Santa Monica Groundwater Pilot Project and the Santa Clara Valley Groundwater Pilot Project, to study appropriate modification to public water systems and response times which would terminate July 1, 1999, and to report to the Legislature and the Governor on or before July 1, 1999, on the feasibility and appropriateness of establishing a statewide GIS mapping system. The bill would define a GIS mapping system as a geographic information system that collects, stores, retrieves, analyzes, and displays environmental geographic data in a data base that is accessible to the public. The bill would require the upgrade of the data base to include the establishment of a statewide GIS mapping system, only upon appropriation by the Legislature.

(3) Existing law, the Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, requires every owner of a petroleum underground storage tank who is required to obtain a permit to own or operate a tank to pay a specified storage fee, for deposit in the Underground Storage Tank Cleanup Fund.

This bill would authorize the board to expend up to \$400,000 from the fund for corrective action purposes, to fund GIS mapping system projects.

The bill would also authorize the board to annually expend up to \$5,000,000 from the fund to pay public water systems for the cost of treatment of the water supply or of providing alternate drinking water supplies if a public water system requests funds for that purpose and demonstrates that a public drinking water well has been contaminated

by an oxygenate and there is substantial evidence that the release occurred from an underground storage tank. The bill would prohibit the board from expending more than \$1,000,000 of that amount per affected drinking water supply source. The bill would require the board to report annually to the Governor and the Legislature on any money provided to a public water system pursuant to those provisions. The bill would require the board to be reimbursed by the public water system to the extent that the public water system receives payment from any source to cover its costs, and, with certain exceptions, would require the public water system to pursue cost recovery from responsible parties.

(4) Existing law requires the state department to administer provisions pertaining to the regulation of drinking water and public water systems, as defined, so as to protect public health, including, but not limited to, the conduct of research, studies, and demonstration programs pertaining to the provision of a dependable, safe supply of drinking water, and the adoption of primary drinking water standards for contaminants in drinking water.

This bill would enact the Local Drinking Water Protection Act to require the state department, as of January 1, 1998, to commence the process of adopting a primary drinking water standard for MTBE pursuant to prescribed provisions of existing law and to adopt a secondary drinking water standard, on or before July 1, 1998, that does not exceed a consumer acceptance level for MTBE. The bill would require that the state department establish the primary drinking water standard for MTBE on or before July 1, 1999, and would authorize the state department to set primary drinking water standards for other oxygenates.

The bill would require, on or before January 1, 1999, that the California Drinking Water and Toxic Enforcement Act Scientific Advisory Panel make a recommendation to the Office of Environmental Health Hazard Assessment as to whether MTBE should be listed as a carcinogenic or reproductive toxin.

(5) Existing law prescribes notification requirements, with certain exceptions, for any person who causes or permits any oil or petroleum product to be discharged in or on any waters of the state.

This bill would require each California regional water quality control board to publish and distribute, on a quarterly basis, to all public water system operators within the region of the regional board a list of discharges of MTBE that occurred during the quarter and a list of locations where MTBE was detected in the groundwater within the region of the regional board.

(6) Under existing law, any person who, without regard to intent or negligence, causes or permits any hazardous substance or sewage to be discharged in or on any waters of the state, or discharged or deposited where it is, or probably will be, discharged in or on any waters of the state, is required to give notice as prescribed.

This bill would also require the appropriate regional board to notify any public water system operator that may potentially be affected by a discharge within 48 hours.

(7) The bill would vest in any public water system regulated by the state department the same legal rights and remedies against a responsible party, as defined, when the water supply used by the public water system is contaminated, as those of a private landowner whose groundwater has been contaminated.

(8) The bill would prescribe related matters.

(9) The bill would provide that it would become operative only if SB 1189 of the 1997-98 Regular Session is enacted and becomes effective on or before January 1, 1998.

Ch. 815 (SB 1189) Hayden. Drinking water: groundwater wells: MTBE contamination.

Under existing law, the Elder California Pipeline Safety Act of 1981, the operator of a pipeline used to transport or containing hazardous liquid substances or highly volatile substances, is required, except as specified, to immediately report every rupture, explosion, or fire involving the pipeline to the fire department having fire suppression responsibilities and to the Office of Emergency Services and, within 30 days of the rupture, explosion, or fire, to file a report with the State Fire Marshal.

Under existing law, the State Water Resources Control Board has responsibility for the protection of water quality and responsibilities pertaining to underground storage tanks containing petroleum. Existing law requires the board to develop, implement, and

maintain a system that is accessible to government agencies and the public for storing and retrieving data from cases involving discharges of petroleum from underground storage tanks.

This bill would require the board to upgrade the data base established under those provisions. The bill would require the board to establish for this and other designated purposes, a GIS Mapping and Data Management Advisory Committee. The bill would require the board, with the advise of the committee, to establish 2 pilot projects, the Santa Monica Groundwater Pilot Project and Santa Clara Valley Groundwater Pilot Project, and to report to the Legislature and the Governor on or before July 1, 1999, on the feasibility and appropriateness of establishing a statewide GIS mapping system. The bill would define a GIS mapping system as a geographic information system that collects, stores, retrieves, analyzes, and displays environmental geographic data in a data base that is accessible to the public. The bill would require the upgrade of the data bases to include the establishment of a statewide GIS mapping system, only upon appropriation by the Legislature.

Existing law, the Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, requires every owner of a petroleum underground storage tank who is required to obtain a permit to own or operate a tank to pay a specified storage fee, for deposit in the Underground Storage Tank Cleanup Fund.

The bill would authorize the board to expend up to \$400,000 from the fund to fund the GIS mapping system projects proposed by the bill.

This bill would also authorize the State Water Board to annually expend up to \$5,000,000 from the fund to pay public water systems if there is a situation that requires prompt action to protect human health or the environment related to drinking water supply sources that have been contaminated by an oxygenate where a public water system requests funds and demonstrates that the water well has been contaminated by an oxygenate and that there is substantial evidence that the release occurred from an underground storage tank. The bill would require the board to report annually to the Governor and the Legislature on any money provided to a public water system, and would limit total payment for water treatment and for providing alternative water supplies under these provisions to an amount not to exceed \$1,000,000 per affected drinking water supply source. The bill would require the board to be reimbursed by the public water system to the extent that the public water system receives payment from any source, and with certain exceptions, would require the public water system to pursue cost recovery from responsible parties.

Existing law requires the State Department of Health Services to administer provisions relating to the regulation of drinking water and public water systems, as defined, so as to protect public health, including, but not limited to, the conduct of research, studies, and demonstration programs relating to the provision of a dependable, safe supply of drinking water, and the adoption of primary drinking water standards for contaminants in drinking water.

This bill would enact the Local Drinking Water Protection Act to require the State Department of Health Services to require the department on January 1, 1998, to commence the process of adopting a primary drinking water standard for methyl tertiary-butyl ether (MTBE) pursuant to prescribed provisions of existing law and a secondary quality drinking water standard, on or before July 1, 1998.

The bill would require that the department establish a primary drinking water standard for MTBE on or before July 1, 1999, and would authorize the department to, at its discretion, set primary drinking water standards for other oxygenates.

This bill would require that on or before January 1, 1999, the California Drinking Water and Toxic Enforcement Act Scientific Advisory Panel make recommendations to the Office of Environmental Health Hazard Assessment as to whether MTBE should be listed as a carcinogenic or reproductive toxin.

Existing law prescribes notification requirements, with certain exceptions, for any person who causes or permits any oil or petroleum product to be discharged in or on any waters of the state and makes it a misdemeanor to violate this notification provision.

This bill would require each regional board to publish and distribute on a quarterly basis to all public water system operators within the region of the regional board a list

of discharges of MTBE that occurred during the quarter and a list of locations where MTBE was detected in the groundwater within the region of the regional board.

This bill would provide that it would become operative only if AB 592 of the 1997-98 Regular Session of the Legislature is enacted and becomes effective on or before January 1, 1998.

Ch. 816 (SB 521) Mountjoy. Gasoline: MTBE.

(1) Existing regulations adopted by the State Department of Health Services pursuant to the California Safe Drinking Water Act require monitoring to collect data on the frequency and levels of occurrence of methyl tertiary-butyl ether (MTBE) in drinking water.

This bill would enact the MTBE Public Health and Environmental Protection Act of 1997. The bill would appropriate \$500,000 from the Motor Vehicle Fuel Account in the Transportation Tax Fund to the University of California for a specified study and assessment of the human health and environmental risks and benefits, if any, of MTBE, to be submitted to the Governor by January 1, 1999. The bill would require the Governor to take prescribed actions, including certifying whether there is a risk to human health or the environment of using MTBE in gasoline, and taking appropriate action to protect public health and the environment if there is such a risk.

(2) Existing law provides for the issuance of a specified closure letter relative to the completion of an investigation and remedial action for an underground storage tank.

This bill would prohibit the issuance of such a closure letter unless the soil or groundwater, or both, where applicable, have been tested for MTBE, as specified.

(3) The bill would require the cleanup of MTBE discharges to water, as specified, and would provide that no public water system, or its customers, shall be responsible for remediation or treatment costs of water contained by MTBE or a product containing MTBE, as specified.

Ch. 817 (AB 59) Brown. Crimes: kidnapping.

(1) Existing law provides that any person who kidnaps another with the intent to commit rape, oral copulation, sodomy, or rape by instrument, shall be punished by imprisonment in the state prison for 5, 8, or 11 years.

This bill would delete this provision and would provide instead that under specified circumstances any person who kidnaps or carries away any individual with the intent to commit robbery, rape, spousal rape, sodomy, oral copulation, or rape by instrument shall be punished by imprisonment in the state prison for life with the possibility of parole. By expanding the scope of existing crimes, the bill would impose a state-mandated local program. The bill also would make additional conforming changes.

(2) Existing law defines a habitual sexual offender as a person who previously has been convicted of one or more specified sexual offenses and who is convicted in the present proceeding of one of those offenses.

This bill would add kidnapping with the intent to commit rape, spousal rape, oral copulation, sodomy, lewd or lascivious acts, and rape by instrument to the list of sexual offenses specified for the purpose of the definition of a habitual sexual offender.

(3) Existing law provides that any person who is convicted of any specified felony sexual offense, and who, for the purpose of committing that sexual offense, kidnapped the victim, as specified, shall be punished by an additional 9-year term.

Existing law also provides that any person who is convicted of any specified felony sexual offense, and who, for the purpose of committing that sexual offense, kidnapped the victim, who was under the age of 14 years at the time, as specified, shall be punished by an additional 15-year term.

This bill would specify other types of kidnapping to which these provisions shall apply.

(4) Existing law provides that every person who is convicted of any specified felony, and who previously has been convicted 2 or more times, on charges separately brought and tried, and who previously has served 2 or more separate prior prison terms of any of those felonies, shall be ineligible to earn credit on his or her term of imprisonment.

This bill would add specified types of kidnapping to the list of felonies for which credit cannot be earned.

(5) Existing law requires specified sexual offenders to register with local law enforcement agencies and makes it a felony to willfully fail to register.

This bill would add specified types of kidnapping to the list of offenses that subject a person to these provisions. By expanding the scope of a crime and by imposing additional registration duties on local law enforcement agencies, the bill would impose a state-mandated local program.

(6) Existing law generally provides that when 2 or more specified enhancements may be imposed for any single offense, only the greatest enhancement shall apply. Existing law provides, however, that in specified cases the court may impose both one enhancement for weapons and one enhancement for great bodily injury.

This bill would provide that the court may also impose both one enhancement for weapons and one enhancement for great bodily injury in cases of kidnapping to commit robbery or kidnapping during, and in order to facilitate, the commission of a carjacking.

(7) This bill would also incorporate additional changes in Section 290 of the Penal Code enacted by AB 213 (Ch. 80, Stats. 1997).

(8) This bill would also incorporate additional changes in Section 290.4 of the Penal Code proposed by AB 290, SB 314, and SB 1078, to be operative only if one or more of those bills and this bill are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 818 (AB 1303) Miller. Sex offenders: registration.

(1) Existing law requires persons convicted of specified sex offenses to register with local law enforcement agencies upon their discharge, parole, or release from confinement and to update that registration annually. Failure to register or update the registration is a crime.

This bill would include among these specified offenses pimping or pandering involving a minor, aggravated sexual assault of a child, and solicitation to commit sexual assault. The bill would also require every person who is a sexually violent predator to verify his or her address every 90 days in a manner established by the Department of Justice, and would require the person to be notified of this increased registration requirement. Failure to comply with the 90-day registration requirement would be a felony or a misdemeanor. This bill also would require the Department of Justice to report to the Legislature on the implementation and effectiveness of the 90-day registration requirement for sexually violent predators. By expanding the scope of existing crimes, this bill would impose a state-mandated local program.

(2) Existing law requires the State Department of Mental Health, a state hospital, or any other public or private mental health facility approved by the county mental health director to forward immediately without prior request to the Department of Justice movement and identification information and records regarding a patient who is committed to any of these facilities for observation or for an indeterminate period as a mentally disordered sex offender, or regarding a patient who is committed to any of these facilities pursuant to a plea of insanity or a finding of mental incompetence or for receiving treatment as an imminently dangerous person.

This bill would make this provision applicable to movement and identification information and records regarding a person who is civilly committed as a sexually violent predator.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 819 (SB 314) Ayala. Sex offenders: registration.

(1) Existing law requires any person who is convicted of specified sex offenses to register with local law enforcement officials upon release from confinement. Juveniles who are placed in the California Youth Authority for adjudication of specified sex offenses are also required to register pursuant to this provision. Failure to register is a crime.

This bill would make juveniles subject to registration for specified additional offenses that subject adult offenders to registration. By expanding the scope of an existing crime, the bill would impose a state-mandated local program.

(2) This bill would incorporate some of the additional changes in Section 290 of the Penal Code proposed by AB 59, AB 213, AB 290, AB 1303, SB 882, and SB 1254, to be operative if this bill and all of the other bills are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(3) This bill would incorporate additional changes in Section 290.4 of the Penal Code proposed by AB 59, AB 290, and SB 1078, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 820 (SB 882) Schiff. Sex offenders: registration.

(1) Existing law requires persons convicted of specified sex offenses to register with local law enforcement officials upon their discharge, parole, or release from confinement and to update that registration annually and within 5 working days of changing his or her residence address. The willful failure to register is a crime.

This bill would require persons who are required to register, who are located in California, but have no residence address, to comply with the above 5 working days registration requirement, and additionally to update their registration at least once every 90 days. The bill would provide that persons who have no residence address, who willfully fail to register pursuant to that requirement, shall be punished by not exceeding 6 months in a county jail. By creating a new crime and imposing increased duties on local criminal justice systems that are equivalent to those imposed by the establishment of a new crime, this bill would impose a state-mandated local program.

(2) This bill would incorporate some of the additional changes in Section 290 of the Penal Code proposed by AB 59, AB 213, AB 290, AB 1303, and SB 314, to be operative if this bill and all of the other bills are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 821 (AB 290) Alby. Sex offenders: registration: release of information.

(1) Existing law requires persons convicted of specified sex offenses to register with local law enforcement agencies upon their discharge, parole, or release from confinement and to update that registration annually or upon a change of residence address.

This bill would apply this registration requirement to persons found guilty in the guilt phase of a trial for an offense subject to registration but who is found not guilty by reason

of insanity. The bill would delete the crime of loitering around a public toilet for purposes of engaging in or soliciting lewd or lascivious acts from those offenses that trigger the registration requirement. The bill would exempt a person who was convicted of sodomy or oral copulation between consenting adults prior to January 1, 1976, from registering, under specified conditions, and would require the Department of Justice to remove that person from the Sex Offender Registry. The bill would also prohibit any entity from charging a person a fee to register or update a registration pursuant to this provision.

(2) Existing law provides that before discharge, parole, or release from confinement, a person required to register under the above provision shall be informed of his or her duty to register and to read and sign a form explaining that duty. The official in charge of the place of confinement is required to obtain the person's expected address and report it to the Department of Justice. When a person is convicted of an offense that requires registration and he or she is to be released on probation, the court is required to inform the person of the requirement to register.

This bill would, on or after January 1, 1998, require the person to preregister upon incarceration, placement, commitment, or prior to release on probation and would prohibit the person's release until he or she has signed the form and provided the address information required to be obtained and reported. Where the person is to be released on probation, the bill would require the probation officer to inform the person of the requirement to register. This bill would provide that a person required to preregister, shall only be preregistered once. By imposing increased duties on local criminal justice systems that are equivalent to those imposed by the creation of a new crime, this bill would impose a state-mandated local program.

(3) Existing law requires the Department of Justice to continually compile personal information regarding persons required to register as sex offenders for any conviction of specified sex offenses.

This bill would add to those specified sex offenses a felony conviction for an act of sodomy upon a person under 18 years of age and a felony conviction for an act of oral copulation upon a person under 18 years of age.

(4) This bill would incorporate some of the additional changes in Section 290 of the Penal Code proposed by AB 59, AB 213, AB 1303, SB 314, and SB 882, to be operative if this bill and all of the other bills are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(5) This bill would incorporate additional changes in Section 290.4 of the Penal Code, proposed by AB 59, SB 314, and SB 1078, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 822 (SB 1078) Lockyer. Sex offenders: release of information.

(1) Existing law requires the Department of Justice to compile, organize, and make available through a "900" telephone number, specified information concerning persons required to register as sex offenders. Any person who uses this information to commit a crime is subject to a sentence enhancement. The "900" telephone number program will become inoperative on January 1, 1998.

This bill would extend the operation of the "900" telephone number to January 1, 2001. By extending the operation of an existing sentence enhancement, the bill would impose a state-mandated local program.

The bill would also require the Department of Justice, not later than January 1, 1998, to prepare an informational pamphlet for mailing to any person who makes an inquiry using the "900" telephone number and who provides an address.

(2) Existing law requires the department to develop and distribute to local law enforcement agencies a CD-ROM or other electronic medium containing specified

information concerning persons required to register as sex offenders. Unauthorized use of this information is a misdemeanor. This program will be repealed on January 1, 1999.

This bill would extend the repeal date to January 1, 2001. By extending the operation of an existing crime, this bill would impose a state-mandated local program.

(3) This bill would incorporate additional changes in Section 290.4 of the Penal Code, proposed by AB 59, AB 290, and SB 314, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 823 (SB 558) Leslie. Low-Income Home Energy Assistance Program.

Under existing law, the Department of Community Services and Development is required to receive and administer the federal Low-Income Home Energy Assistance Program Block Grant, and allocate the funds from that grant in a specified manner. The allocations under existing law include an allocation of between 15% and 25% for weatherization services.

This bill would require the department to apply to the federal government for all necessary waivers in order to ensure that the amount of the weatherization allocation will be 25%.

Existing law permits 5% of the total federal allocation to be used by the department for purposes of administration, and permits an additional 2.5% to be set aside for administrative purposes.

This bill would specify the use of the state's total federal allocation for Low-Income Home Energy Assistance Program funds for fiscal years 1998, 1999, and 2000, including allocations to local service providers for planning and administration. The bill would revise the amounts available to eligible individuals and households for weatherization services and energy crisis intervention.

The bill would require the department to afford local service providers maximum flexibility and control in the planning, administration, and delivery of Low-Income Home Energy Assistance Program Block Grant services. The bill would delete a reference to Aid to Families with Dependent Children, and would instead provide that direct assistance payments, as specified, shall be available to households receiving Temporary Assistance for Needy Families, under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996. The bill would also specify the percentage of funds available for planning and administration purposes, as well as for outreach and related services. It would require the department to establish a local providers committee to assist in the development of the annual Low-Income Home Energy Assistance Program state plan, and would specify the membership of the committee.

This bill would specify which households are eligible for energy assistance services, based on receipt of certain forms of state and federal assistance. It would revise the manner in which funds for the Energy Crisis Intervention Program are allocated and paid.

The bill would require the department to submit, by June 30, 1998, a plan to the state Health and Welfare Agency to reduce state administrative costs, as specified. The bill would further require the department to provide quarterly status updates to the Health and Welfare Agency and the local service providers committee regarding the department's implementation of specified plans, objectives, and milestones. It would require the department to appear before the Legislature annually, from 1999 to 2001, to provide a status report on the department's efforts to achieve increased administrative efficiency.

Ch. 824 (SB 912) Calderon. Automobile insurance: contracts.

Existing law provides that automobile insurance includes insurance of automobile owners, users, dealers, or others having insurable interests therein, against hazards incident to ownership, maintenance, operation, and use of automobiles, other than loss

resulting from accident or physical injury, fatal or nonfatal, to, or death of, any natural person.

Existing law provides that the making of a contract covering only defects in material and workmanship, which may include towing and substitute transportation, in exchange for a separately stated charge where it is merely incidental to the business of selling or leasing automobiles, shall not be deemed insurance, provided, that the maker of the contract has an insurance policy with an admitted automobile insurer providing coverage for the making of those contracts.

This bill would also provide that a contract covering only defects in material and workmanship in exchange for a separately stated charge, where the contract is sold by an automobile dealer incidental to the automobile dealer's business of selling or leasing automobiles and the legal obligor is other than the automobile dealer, shall not be deemed insurance if the legal obligor maintains a policy of insurance, possesses a fire and casualty broker agent license, and meets certain requirements as to financial security.

Ch. 825 (AB 287) Honda. Education.⁵

(1) Existing law establishes the Child Care Facilities Revolving Fund in the State Treasury to provide funding for the purchase of new child care facilities for lease to child care and development contracting agencies. Existing law authorizes the Superintendent of Public Instruction to transfer state funds appropriated for child care facilities into this fund for allocation for child care and development contractors for the purchase, transportation, and installation of facilities for replacement and expansion of capacity, and continuously appropriates moneys in this fund to the Superintendent of Public Instruction without regard to fiscal year, as specified.

This bill would amend this provision in a technical, nonsubstantive manner by renumbering it within the Education Code.

(2) Existing law prohibits contractors who provide schoolage community child care services programs administered by the Superintendent of Public Instruction from being reimbursed more than the maximum reimbursable amount stated in the contract with the State Department of Education. Existing law requires the maximum reimbursable amount to be reduced, as specified, if an extended day care program contractor fails to operate at 98% of the minimum days of operation required in its contract or ceases operating before the end of the contract term.

This bill would delete the provision prohibiting contractors who provide schoolage community child care services programs administered by the Superintendent of Public Instruction from being reimbursed more than the maximum reimbursable amount stated in the contract with the State Department of Education, as specified.

(3) Existing law establishes the Teenage Pregnancy Prevention Grant Program. Existing law requires the Superintendent of Public Instruction to the extent possible in awarding grants to give consideration to program applicants that meet specified criteria, including being located in counties with the highest teenage birthrate. Existing law requires a grant application for the program to have a plan that includes long-term tracking that includes the reporting of any reduction in low-birth weights.

This bill would include geographical areas defined by ZIP Codes in which there are high teenage birthrates in the criteria for consideration in awarding grants. This bill would repeal the requirement of tracking birth weights.

(4) Existing law provides for reimbursing members of the State Board of Education for their actual and necessary traveling expenses and an allowance while on official business.

This bill would make a technical cross-reference change with respect to the daily allowance. Effective January 1, 1997, this bill would authorize the board, when a board member is employed by a public school and, while the board member is acting in his or her official capacity as a member of the board, and his or her employer is required to hire a substitute teacher to replace that board member, to reimburse that public school, from funds appropriated for support of the board's activities, for the daily cost of hiring the substitute teacher during the board member's absence from his or her employment. This provision would thereby make an appropriation by reappropriating funds for a new purpose.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) Existing law authorizes the governing board of a school district or a county board of education to request the State Board of Education to waive all or part of any section of the Education Code or any regulation adopted by the State Board of Education that implements the Education Code, except certain listed provisions, including that the State Board of Education may not waive the Class Size Reduction Program in kindergarten and grades 1 to 3, inclusive.

This bill would exclude the provisions of Chapter 2 (commencing with Section 44200) of Part 25, relating to teacher credentialing, from the category of provisions that may be waived.

(6) Existing law permits the State Department of Education to sell documents related to its scope and duty.

This bill would limit the sale of documents to educational materials and directories related to the department's scope and duty.

(7) Existing law requires the State Allocation Board to apportion funds to school districts from the State School Deferred Maintenance Fund based as a specified percentage of a school district's total expenditures of specified funds for capital outlay.

This bill would base the apportionment as a specified percentage of a school district's total expenditures and ending fund balances of specified funds for capital outlay.

(8) Existing law requires the governing board of each school district to report to the Superintendent of Public Instruction during each fiscal year the average daily attendance of the district for all full school months during specified periods. Existing law also provides that the average daily attendance shall be computed in a specified manner.

This bill would include the days of attendance in special day classes in computing the average daily attendance.

(9) Existing law establishes programs to provide each certificated teacher of pupils enrolled in kindergarten and grades 1 to 3, inclusive, and in grades 4 to 8, inclusive, with the knowledge and skills necessary to effectively teach pupils to read. Pursuant to these programs, the Superintendent of Public Instruction administers a grant application process under which the minimum grant awarded is \$1,000 and the maximum grant awarded to a school district does not exceed twice the total amount of funding provided for the purposes of this program in any fiscal year divided by the number of pupils enrolled statewide in kindergarten and grades 1 to 3, inclusive, and in grades 4 to 8, inclusive, in the prior fiscal year, multiplied by the number of pupils enrolled in the school district in those grades.

This bill would make a technical, nonsubstantive change by repealing 2 provisions relating to this program that have been superseded by later enacted provisions. The bill would also change how the maximum amount of a grant is required to be determined and how enrollment is required to be determined for this purpose.

(10) Existing law provides for community day schools. Existing law also provides for the assignment by a school district of credentialed teachers with their consent to specified home teaching and special classes positions.

This bill would include permitting the assignment of credentialed teachers with their consent to a school district's community day schools.

(11) Existing law provides that a certain number of minutes of attendance of individuals with exceptional needs, as specified, shall constitute a day of attendance. Existing law also provides that the average daily attendance of all individuals with exceptional needs shall be computed in a specified manner.

This bill would delete the formula for computing the average daily attendance for individuals with exceptional needs.

(12) Existing law prohibits the siting of a community day school serving grades 7 to 12, inclusive, on the same site as an elementary, middle, junior high, comprehensive senior high, opportunity, or continuation school, except as specified.

This bill would permit a governing board of a school district, as specified, to site a community day school serving grades 7 to 9, inclusive, on the same site as an elementary, middle, junior high, comprehensive senior high, opportunity, or continuation school.

(13) Existing law permits the governing board of a school district to provide, without charge or at a reduced price, meals for needy pupils, and defines "needy."

This bill would redefine who is a "needy" pupil.

(14) Existing law permits the State Department of Education, as specified, to establish demonstration projects which examine alternative methods of assuring that minimum nutritional requirements of needy pupils are met by using fortified food supplements.

This bill would repeal this provision.

(15) Existing law provides meals for needy pupils in kindergarten and grades 1 to 12, inclusive. Existing law recognizes that the 1991-92 fiscal year budget reductions may result in more children coming to school hungry and establishes the School Breakfast Program. Existing law permits grants of up to \$10,000, limited to a total of \$500,000, under the School Breakfast Program, subject to budget appropriation, through the 1995-96 fiscal year. The grants can be awarded on a competitive bidding basis to school districts and county superintendents of schools.

This bill would permit grants to be awarded to entities approved by the State Department of Education, and would permit grants each fiscal year subject to budget appropriations.

(16) Existing law permits any child nutrition entity to apply to the State Department of Education for all available federal and state funds so that a nutritionally adequate breakfast or lunch, or both, may be provided to pupils, as specified.

This bill would make changes in the definitions of a nutritionally adequate breakfast and nutritionally adequate lunch, as specified.

(17) Existing law provides in 2 separate provisions of law for the contracting for the preparation, delivery, and service of school meals, as specified.

This bill would repeal the redundant provision.

(18) Existing law provides the reimbursement rate for any school food authority that participates in a federal child nutrition program that is reimbursed pursuant to specified authority.

This bill would delete the reimbursement rate and specify that the reimbursement shall be at the current rate as determined by the State Department of Education, as specified.

(19) Existing law provides that as a part of the course in American government and civics required for high school graduation, all pupils shall read specified documents, including the Federalist Papers.

This bill would require that pupils read substantive selections from the Federalist Papers, instead of the entire document.

(20) Existing law requires the independent study of each student to be coordinated, evaluated, and supervised by an employee of the school district or county office of education who possesses a valid certification document, as specified.

This bill would also permit an employee with an emergency credential to perform the specified duties.

(21) Existing law requires the treasurer or chief fiscal officer of a local agency, except in specified circumstances, to render a quarterly report to the chief executive officer, the internal auditor, and the legislative body of the local agency containing detailed information, including the amount invested on all securities, investments, and moneys held by the local agency.

This bill would provide that the treasurer or chief fiscal officer of a local agency shall not be required to render a quarterly report to a legislative body or any oversight committee of a school district or county office of education for securities, investments, and moneys held by the district or county office of education in individual accounts that are less than \$25,000.

(22) Existing law authorizes the State Allocation Board to approve requests from school districts for the waiver of Field Act provisions requiring approval of plans and relating to the structural safety of school buildings for specified owned and leased relocatable buildings, and specifies that any waiver granted on or before September 30, 1996, is extended until September 30, 1997. Those provisions are repealed as of September 30, 1997, at which point other provisions become operative that do not provide for that waiver of the Field Act.

This bill would, notwithstanding any other provision of law, specify that any waiver granted by the State Allocation Board to a school district, that is in effect on September 29, 1997, is extended until September 30, 2000.

(23) The existing Private Postsecondary and Vocational Education Reform Act of 1989 establishes, until January 1, 1998, various requirements and standards for the approval of private postsecondary educational institutions to operate in California and to award degrees and diplomas. The existing act establishes, until January 1, 1998, the Council for Private Postsecondary and Vocational Education with specified duties and responsibilities.

Chapter 78 of the Statutes of 1997 (Chapter 78), which will become effective on January 1, 1998, repealed and reenacted provisions governing the Council for Private Postsecondary and Vocational Education, and, in so doing, made numerous substantive changes, including creating a Bureau for Private Postsecondary and Vocational Education in the Department of Consumer Affairs to administer and enforce the act.

Existing law authorizes the State Department of Education to enter into agreements with the Veterans Administration, or any other agency of the federal government, for the education of veterans in any of the schools of the public school system, except the California State University, and to provide for the payment to the schools of the maximum amount permitted by acts of Congress under which the agreements are entered into by the Veterans Administration, or any other agency of the federal government.

This bill, in addition, would authorize the bureau to design and administer a process for the approval of courses offered to veterans, and for the approval and supervision of institutions offering courses to veterans, pursuant to any applicable act of Congress and the regulations adopted pursuant to such an act. The bill also would authorize the bureau to adopt regulations providing for the approval of courses offered to veterans, and for the approval and supervision of institutions offering courses to veterans, pursuant to federal law.

(24) This bill would reappropriate the unencumbered balance of the funds appropriated in a specified item of the Budget Act of 1995 to the Superintendent of Public Instruction in accordance with a specified schedule.

(25) Existing law provides that a charter school that serves at-risk pupils and operates under a charter approved before June 1, 1997, by the Board of Education for the County of Los Angeles, may continue to operate until June 30, 1999.

This bill would require that, notwithstanding the provisions of a specified statute, the attendance of pupils in a charter school to which this provision applies be funded at the same rates for the same categories of pupils as community schools in the same county, as specified. The bill would also specify the method for the determination and reporting of the average daily attendance of such a charter school.

(26) Existing law reappropriates \$350,000 to the State Department of Education from a specified item of the Budget Act of 1997 for the purpose of administering the High-Risk Youth Education and Public Safety Program, and specifies that no more than \$200,000 of that amount is available for contracting with an independent evaluator to assess the overall success of the program, as specified.

This bill would instead transfer \$350,000 from this specified item to another specified item of the Budget Act of 1997 for expenditure for this purpose.

(27) As enacted by the Legislature, the 1997 Budget Bill included, in a specified item, an appropriation of \$53,086,000 from the General Fund to the State Department of Education for instructional support, and of \$9,603,000 for executive management and special services. The Governor exercised the power of item veto to reduce those items of appropriation to \$49,789,000 and \$7,603,000, respectively.

This bill would augment these appropriations by \$900,000 and \$2,000,000, respectively.

(28) Existing law, the Budget Act of 1997 appropriates funds to provide inservice training in reading instruction to teachers who teach reading in kindergarten or grades 1 to 8, inclusive, paraprofessionals and schoolsite administrators pursuant to designated statutory provisions.

This bill would designate an additional chapter of the Education Code, for purposes of funds referenced above, thereby making an appropriation.

(29) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 826 (AB 1346) Olberg. Education: home-to-school transportation.

Existing law provides that each school district or county office of education shall receive a home-to-school transportation allowance in the amount received in the prior fiscal year, but in no event in excess of the prior year's approved home-to-school transportation costs, increased by the amount provided in the annual Budget Act. Existing law also prescribes criteria for determining the eligibility of school districts for supplemental home-to-school funds.

This bill would require the Superintendent of Public Instruction, for the 1997-98 fiscal year, to allocate any funds that would have been available for the purpose of home-to-school transportation pursuant to a specified provision so that these funds would instead be available partly for that purpose and partly for the purpose of other specified home-to-school transportation apportionments, as specified.

The bill would reappropriate, for allocation by the Superintendent of Public Instruction in the 1997-98 fiscal year in accordance with a specified schedule, the unallocated balance of the funds appropriated in the 1996-97 fiscal year pursuant to a specified provision of law relating to home-to-school transportation allocations.

Ch. 827 (AB 670) Mazzoni. School facilities.

(1) Existing law requires a school district that does not qualify for new construction funding under specified law to, among other things, identify by grade level all available teaching stations in schools in the school district that serve kindergarten or any of grades 1 to 8, inclusive, in order to qualify for funding pursuant to the Class Size Reduction Facilities Funding Program.

This bill would, in the 1997-98 fiscal year only, require the identification by grade level of all available teaching stations in schools in the school district that serve kindergarten or any of grades 1 to 6, inclusive.

This bill would also provide that, in the 1997-98 fiscal year, for the purposes only of determining eligibility for funding under a specified provision of the Class Size Reduction Facilities Funding Program, a school district is not required to count the number of teaching stations at schoolsites leased to outside agencies prior to July 1, 1996.

(2) Existing law prescribes criteria for determining the eligibility of school districts for supplemental home-to-school transportation funds, if funds are specifically appropriated therefor. Existing law also requires the superintendent to apportion funds, when appropriated, to reimburse eligible school districts, as specified, for the unreimbursed costs of home-to-school transportation per unit of average daily attendance, as specified. Under these provisions, among other things, the total cost per mile for the prior fiscal year for home-to-school transportation shall not exceed the statewide average cost per mile.

This bill, additionally, would provide that the total cost per mile for the prior fiscal year for home-to-school transportation shall not exceed 115% of the statewide average cost per mile if the Superintendent of Public Instruction makes specified determinations regarding the weather- and terrain-related conditions of the school district.

(3) Existing law establishes programs to provide each certificated teacher of pupils enrolled in kindergarten and grades 1 to 3, inclusive, and in grades 4 to 8, inclusive, with the knowledge and skills necessary to effectively teach pupils to read. Pursuant to these programs, the Superintendent of Public Instruction administers a grant application process under which the minimum grant awarded is \$1,000 and the maximum grant awarded to a school district does not exceed twice the total amount of funding provided for the purposes of this program in any fiscal year divided by the number of pupils enrolled statewide in kindergarten and grades 1 to 3, inclusive, and in grades 4 to 8, inclusive, in the prior fiscal year, multiplied by the number of pupils enrolled in the school district in those grades.

This bill would change how the maximum amount of a grant is required to be determined and how enrollment is required to be determined for these purposes. The bill also would repeal these provisions, as specified.

(4) The bill also would specify that for the 1997-98 fiscal year only, the per pupil amounts to be determined pursuant to provisions specified in (3) above, shall be the amount provided in a specified provision of the Budget Act of 1997 for in-service training in reading instruction divided by the statewide enrollment in kindergarten and grades 1 to 8, inclusive, in the 1996-97 fiscal year.

Ch. 828 (SB 376) Alpert. Education: academic assessment and performance standards.

(1) Existing law authorizes the State Board of Education, upon the request of a governing board of a school district or a county board of education, to waive all or a part of any provision of the Education Code or any regulation adopted by the State Board of Education that implements a provision of the Education Code, except as specified.

This bill would prohibit the State Board of Education from approving a waiver relating to the requirements of the Standardized Testing and Reporting (STAR) Program established by the bill.

(2) Existing law, known as the Leroy Greene California Assessment of Academic Achievement Act (Assessment Act), among other things, requires the State Board of Education to adopt statewide academically rigorous content and performance standards, in all core curriculum areas, pursuant to the recommendations of the Commission for the Establishment of Academic Content and Performance Standards, no later than January 1, 1998, to serve as the basis for assessing academic achievement. The Assessment Act provides, among other things, that, commencing with the 1995-96 fiscal year, under the pupil testing incentive program of the Assessment Act, each school district that certifies to the Superintendent of Public Instruction that they will administer tests to all of their pupils in grades 2 to 10, inclusive, or in as many of those grades as are served by the school district, are apportioned a specified amount per pupil tested.

This bill would specify that the State Board of Education shall adopt statewide academically rigorous content and performance standards in the core curriculum areas of reading, writing, and mathematics no later than January 1, 1998, and in the core curriculum areas of history/social science and science no later than November 1, 1998.

This bill, in effect, would amend the Assessment Act to repeal the pupil testing incentive program and instead would establish the STAR Program in grades 2 to 11, inclusive, as specified. The bill would specify the provisions with which school districts would be required to comply in the administration of achievement tests under the STAR Program. The bill would provide for the reporting of the achievement test results, as specified. Because the bill would impose new responsibilities on school districts, it would constitute a state-mandated local program.

This bill would make other, related changes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 829 (AB 58) Escutia. Special education: extension of sunset date.

(1) Under existing law, the provisions governing special education become inoperative on June 30, 1998.

This bill would extend the date on which those provisions would become inoperative until June 30, 2000. Because the state special education program imposes certain duties upon school districts and county offices of education, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 830 (AB 177) Goldsmith. Board of Corrections: composition.

Under existing law, the Board of Corrections is composed of 11 members, 3 of whom are ex officio members and 8 of whom are appointed by the Governor. The 8 appointed members are required to include persons from specified backgrounds.

This bill would expand the board to 13 members by including among the appointed members a rank and file representative of a local corrections facility at the level of the first line supervisor or below with a minimum of 5 years' experience and a chief probation officer from a county with a population under 200,000, thereby increasing the number of appointed members to 10.

Ch. 831 (AB 353) Wildman. California School Paraprofessional Teacher Training Program.

Existing law establishes the California School Paraprofessional Teacher Training Program (the program) for the purpose of recruiting paraprofessionals to participate in a program designed to encourage them to enroll in teacher training programs and to provide instructional services as teachers in public schools. The Commission on Teacher Credentialing (the commission), in consultation with the Chancellor of the California Community Colleges, the Chancellor of the California State University, and representatives of certificated and classified employee organizations, is required to select 12 or more school districts or county offices of education that have 300 or more classified employees to participate in the program and to recruit school paraprofessional employees. The commission is required to ensure that a total of 600 school paraprofessionals are recruited from among the 12 participating school districts and county offices of education. Participating school districts and county offices of education are required to recruit and organize groups, or "cohorts," of school paraprofessionals of no more than 30, and no less than 10, paraprofessionals in each cohort.

This bill would expand that program and name the expanded program the Wildman-Keeley-Solis Exemplary Teacher Training Act of 1997. The bill would require the commission to consult also with the President of the University of California and the chancellors of private institutions of higher education having approved teacher training programs and would permit those universities to participate in the program.

This bill would require the commission to select 24 or more school districts or county offices of education representing rural, urban, and suburban areas to participate in the program and would eliminate the requirement that the selected school districts or county offices of education have 300 or more classified employees. The bill would also require that at a minimum total of 600 school paraprofessionals be recruited from the 24 participating school districts or county offices of education. The bill would require the participating school districts or county offices of education to organize cohorts of not less than 10 paraprofessionals in each cohort.

This bill would eliminate the requirement that at least 40% of the school paraprofessionals employed by a participating school district or county office of education be members of racial and ethnic minorities, as specified and would make related changes.

This bill would express the intent of the Legislature that funding for the program be allocated to the Commission on Teacher Credentialing for grants to school districts, as specified. This bill would provide that grants to any school district shall not exceed the equivalent of \$3,000 annually per paraprofessional in the program.

This bill would provide that funding for grants to school districts, for the purposes of the bill, is contingent upon an appropriation in the annual Budget Act.

This bill would incorporate the provisions of Section 44392 to be added to the Education Code by AB 352, to be operative only if AB 352 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

This bill would incorporate additional changes in Section 69619.1 of the Education Code, proposed by AB 352, to be operative only if AB 352 and this bill are both chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

Ch. 832 (AB 355) Morrissey. County employee retirement.

The Public Employees' Retirement Law and the County Employees Retirement Law of 1937 provide for the transfer of retirement programs of specified persons from city to county firefighting or law enforcement employment in Los Angeles County.

This bill would make a technical, nonsubstantive change in those provisions and would make them applicable to Orange County.

Ch. 833 (AB 541) Ducheny. Recycled water.

(1) Existing law, with a certain exception, requires any person who permits any sewage to be discharged in state waters to make a prescribed notification to the Office of Emergency Services and defines the term "sewage" for purposes of that provision.

This bill would exclude from that definition recycled water, as defined.

(2) Existing law regulates the use of recycled water.

This bill would require any person who, without regard to intent or negligence, causes or permits an unauthorized discharge, as defined, of 50,000 gallons or more of recycled water, as defined, or 1,000 gallons or more of recycled water, as defined, in any waters of the state, or who causes or permits such unauthorized discharge to be discharged where it is, or probably will be, discharged in or on any waters of the state, as soon as that person has knowledge of the discharge, notification is possible, and notification can be provided without substantially impeding cleanup or other emergency measures, to immediately notify the appropriate California regional water quality board. The bill would subject a person who fails to make the notification required pursuant to these provisions or waste discharge requirements requiring notification of unauthorized releases of recycled water, as defined, to administrative civil liability, as prescribed. The bill would make related legislative findings and declarations.

(3) This bill would incorporate additional changes in Section 13271 of the Water Code proposed by SB 105, to be operative only if this bill and SB 105 are both enacted and become effective on or before January 1, 1998, each bill amends Section 13271 of the Water Code, and this bill is enacted last.

Ch. 834 (AB 730) Keeley. Meals for needy pupils: records.

Existing law provides that all applications and records concerning any individual made or kept by any public officer or agency in connection with the administration of any provision of the Education Code relating to free or reduced price meal eligibility shall be confidential, and shall not be open to examination for any purpose not directly connected with the administration of any free or reduced price meal program, or any investigation, prosecution, or criminal or civil proceeding conducted in connection with the administration of any free or reduced price meal program.

This bill would authorize a public officer or agency to allow the use by school district employees, who are authorized by the governing board of the school district, of individual records pertaining to pupil participation in any free or reduced price meal program solely for the purpose of disaggregation of academic achievement data if the public agency ensures that it has adopted a policy which allows for the use of individual records for these purposes, no individual indicators of participation in any free or reduced price meal program are maintained in a pupil's permanent record if not otherwise allowed by law, no public release of information regarding individual pupil participation is permitted, and all other confidentiality provisions required by law are met.

Ch. 835 (AB 922) Battin. Property tax revenue allocations: TEA formula: district merger.

Existing property tax law requires the auditor of each county with qualifying cities, as defined, to make certain property tax revenue allocations to those cities in accordance with a specified Tax Equity Allocation (TEA) formula and to make corresponding reductions in the amount of property tax revenue that is allocated to the county. Existing law requires that the amount of a qualifying city's TEA formula allocation be reduced by, among other things, the amount of property tax revenue that is no longer collected by a qualifying city in the first fiscal year following that city's reduction in the rate or base of a local tax that was first imposed prior to January 1, 1988.

This bill would, except in the County of Santa Clara, prohibit this particular reduction from being made in the case in which a local tax is reduced or eliminated as a result of either a court decision or the approval or rejection of a ballot measure by the voters.

Existing law also requires that the amount of a qualifying city's TEA formula allocation be reduced by the amount of property tax revenues received by special districts, governed by the city council of that qualifying city, in excess of the amount received by those districts in the 1986-87 fiscal year.

This bill would, for purposes of TEA formula allocations to the City of Rancho Mirage in the County of Riverside, also require that the amount allocated to that city be reduced by any amount of property tax revenue that has been exchanged pursuant to a specified statute between that city and a community services district, the formation of which is initiated pursuant to specified statutory provisions on or after March 6, 1997. This bill would also make technical, nonsubstantive changes. By requiring the modification of property tax revenue allocations for the 1997-98 fiscal year, this bill would impose a state-mandated local program.

The bill would also permit, under certain conditions, the redevelopment agency of the City of Rancho Mirage to enter into an agreement with a community services district to make payments for library services from tax increment revenues, where a specified preexisting agreement had been entered between the County of Riverside and the redevelopment agency regarding division of those revenues.

This bill would make legislative findings and declarations as to the necessity of a special statute.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 836 (AB 1277) Thomson. Disabled drivers: refueling services: notice.

(1) Existing law requires every operator of a gasoline service station or other facility that offers motor vehicle fuel for sale to the public, with certain exemptions, to provide, upon request, refueling service, as defined, to a disabled driver of a vehicle that displays a special plate or placard, issued by the Department of Motor Vehicles, at a price no greater than that which the facility would charge the public to purchase motor vehicle fuel without any refueling service, and to post a single conspicuous notice to this effect. Any person who, as a responsible managing individual setting service policy, acts in violation of this provision is guilty of an infraction punishable by a fine of \$25.

This bill would repeal these provisions and enact similar provisions with modified exemptions from the above requirement and would increase the fine amount for violations from \$25 to \$100 for the first offense, \$200 for the second offense, and \$500 for each subsequent offense. The bill would also provide for changes to the content of the notices that must be posted and would require, if applicable, the posting of a notice specifying that the particular service station is exempt from the above service requirement. By creating a new crime, this bill would impose a state-mandated local program.

(2) Existing law requires that the provisions set forth in (1) be enforced by the Director of Rehabilitation, and authorizes the director, upon his or her own motion, and requires the director, upon the verified complaint of any person or public agency, to investigate the actions of any person, firm, partnership, association, trustee, or corporation alleged to have violated these provisions. Existing law further provides that if the director determines that there may have been a violation, he or she shall file a verified complaint alleging violation of these provisions with the district attorney, the city attorney, or the Attorney General.

This bill would require the county sealer, during the sealer's normal petroleum product inspection of a service station, to verify that signs have been posted as set forth in (1) and to issue citations, and would enact other related provisions. The bill would also authorize any person or public agency to file a verified complaint alleging violation of these provisions with the district attorney, the city attorney, or the Attorney General for investigation and prosecution of the matter if a violation is found to have occurred.

(3) Existing law requires that a notice setting forth the provisions in (1) be provided by the Board of Equalization in its quarterly newsletter to every person, firm,

partnership, association, trustee, or corporation that operates a gasoline service station or other facility, as specified.

This bill, instead, would require the board to provide notice of the new provisions at least annually.

(4) Existing law requires that a notice setting forth the provisions in (1) be provided by the Department of Motor Vehicles to every disabled person or veteran who is issued a special plate or placard.

This bill would require that a notice setting forth the new provisions be printed on each disabled person's or disabled veteran's placard issued by the Department of Motor Vehicles on and after January 1, 1999, and that a notice be provided to each person issued a disabled person's or disabled veteran's plate on and after January 1, 1998.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 837 (AB 1527) Brown. Subdivision Map Act: Napa County.

The existing Subdivision Map Act generally regulates the division of land for purposes of sale, lease, and finance. That act prohibits the sale, lease, or financing of any parcel, the commencement of construction of any building for sale, lease, or financing, except for model homes, or the occupancy of any parcel or building for which a final or parcel map is required under the act, until the map has been filed for record in the county in which the subdivision is located.

The Subdivision Map Act additionally regulates the merger of parcels for purposes of the act. The act authorizes a local agency to provide by ordinance for these mergers, as specified. Existing law permits a local agency to provide for the merger of a parcel or unit with a contiguous parcel or unit held by the same owner, under specified circumstances, if any one of the contiguous parcels or units held by the same owner does not conform to standards for minimum parcel size, under the zoning ordinance of the local agency applicable to the parcels or units of land. Also, under the act, a person owning real property, or a vendee of that person, as specified, may request, and the local agency with jurisdiction is required to determine, whether the real property complies with the provisions of the act and any local ordinances enacted pursuant to it, and to subsequently issue a certificate of compliance or a conditional certificate of compliance reflecting that determination.

This bill would permit the County of Napa to adopt ordinances to require, as a condition of the issuance of any permit or the grant of any approval necessary to develop any real property which includes an undeveloped standard parcel, as defined, that the undeveloped standard parcel be merged into any other parcel or parcels that are contiguous to it and were held in common ownership on or after the effective date of the enactment of these provisions, with specified exemptions. The bill would require the legislative body of the County of Napa to conduct at least one public meeting with public testimony relating to any proposed ordinance pursuant to the bill prior to the noticed public hearing at which the legislative body proposes to enact the ordinance.

The bill would provide that its provisions shall not be construed as affecting the right of the County of Napa, pursuant to its authority under the existing Subdivision Map Act relating to merger and unmerger of parcels, to merge any parcels of land in the unincorporated area of that county, including, but not limited to, those parcels eligible for exemption from an ordinance adopted under the provisions of this bill.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique circumstances within the County of Napa that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

Ch. 838 (SB 227) Solis. Community colleges: officers and employees.

Existing law permits members of the Public Employees' Retirement System and the State Teachers' Retirement System who are subsequently employed in a position requiring membership in the other system to, upon an election made within 60 days in writing, remain in their initial retirement system.

This bill would permit certain State Teachers' Retirement System and Public Employees' Retirement System members subsequently employed by specified state agencies in positions that would require the individual to become a member of a different retirement system, to elect coverage in either system within 60 days, in writing. The bill would require the Public Employees' Retirement System to transfer assets to the State Teachers' Retirement System when a member elects to become a member of the State Teachers' Retirement System.

Ch. 839 (SB 402) Greene. Health: opiate drugs.

Existing law, the Intractable Pain Treatment Act, authorizes a physician and surgeon to prescribe or administer controlled substances to a person in the course of treating that person for a diagnosed condition called intractable pain, and prohibits the Medical Board of California from disciplining a physician and surgeon for this action.

This bill would establish the Pain Patient's Bill of Rights and would state legislative findings and declarations regarding the value of opiate drugs to persons suffering from severe chronic intractable pain. It would, among other things, authorize a physician to refuse to prescribe opiate medication for a patient who requests the treatment for severe chronic intractable pain, require the physician to inform the patient that there are physicians who specialize in the treatment of severe chronic intractable pain with methods that include the use of opiates, and authorize a physician who prescribes opiates to prescribe a dosage deemed medically necessary.

Ch. 840 (SB 624) Costa. Community colleges: collaborative facilities projects.

Existing law includes various provisions governing capital construction projects.

This bill would require the Board of Governors of the California Community Colleges to develop a process for the approval and funding of new collaborative facilities projects proposed by community college districts.

The bill would require the board of governors to report on the development of this process to the Joint Legislative Budget Committee and the California Postsecondary Education Commission no later than September 15, 1998, and to include in that report any proposed legislation necessary to implement these provisions.

Ch. 841 (AB 388) Runner. Water districts: Castaic Lake Water Agency.

(1) Existing law, relating to transactions between electricity suppliers and end-use customers, authorizes specified entities, including special districts such as water districts, to aggregate electrical loads, and defines an "aggregator" as one of those specified entities that provides specified power supply services, including combining the loads of multiple end-use customers and facilitating the sale and purchase of electrical energy, transmission, and other services on behalf of the end-use customers.

This bill would specifically provide that a water district, as defined, may serve as an aggregator to facilitate direct transactions within the boundaries of that district in accordance with specified provisions of the Public Utilities Code and charge a fee that is equal to the district's costs for providing that service.

(2) The Castaic Lake Water Agency Law creates the Castaic Lake Water Agency and authorizes the agency to undertake specified activities. That law requires the board of directors to fix water rates to generate revenue to pay for prescribed costs.

This bill would also specifically provide that the agency may serve as an aggregator to facilitate direct transactions within the boundaries of the agency in accordance with those specified provisions of the Public Utilities Code and charge a fee that is equal to the agency's costs for that service. The bill would authorize the board of directors of the agency to increase water rates only if the board determines, as prescribed, that the additional revenue generated by the rate increase will not be used to subsidize losses resulting from the exercise of the agency's authority to serve as an aggregator, thereby imposing a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 842 (SB 644) Polanco. Child abuse.

(1) Existing law requires the Department of Justice to maintain an index of child abuse reports submitted by child protective agencies of every case investigated by the agencies of known or suspected child abuse that is determined not to be unfounded. Under existing law, unauthorized release of certain child abuse reports is a misdemeanor.

This bill would require the Department of Justice and child protective agencies to retain certain reports for specified time periods. This bill would also require that at the time a child protective agency forwards a report of suspected child abuse to the Department of Justice, the child protective agency shall give written notice to the known or suspected child abuser that he or she has been reported to the Child Abuse Central Index. This bill would also expand the list of persons and agencies to whom reports of suspected child abuse and information contained in those reports may be disclosed, to include a known or suspected child abuser who has verified with the Department of Justice that he or she is listed in the Child Abuse Central Index, out-of-state law enforcement agencies investigating known or suspected child abuse, and each county child death review team's chairperson, or the chairperson's designee. The bill would authorize local child death review teams to share information with other child death review teams. The bill would also require the department to make available specified information to child protective agencies or court investigators responsible for placing children or assessing the possible placement of children, and require the agencies or investigators to notify, in writing, a person listed in the Child Abuse Central Index that he or she is in the index, as specified. This bill would provide that a person listed in the Child Abuse Central Index as a victim of child abuse, who is 18 years or older, may, upon written request, have his or her name removed from the index. The bill would make other related changes regarding the emergency placement of children.

By changing the definition of a crime, this bill would impose a state-mandated local program.

(2) Existing law provides for the coordination and integration of state and local efforts to address fatal child abuse and neglect, and to create a body of information to prevent child deaths and provides that the Department of Justice is authorized to carry out these purposes with the cooperation of specified entities.

This bill would provide that these entities working cooperatively together for these purposes shall be known as the California State Child Death Review Council, to be administered by the Department of Justice. The bill would establish as the duty of the council to oversee the statewide coordination and integration of state and local efforts to address fatal child abuse and neglect, and to create a body of information to prevent child deaths. The bill would state the intent of the Legislature that the California State Child Death Review Council, the Department of Justice, the State Department of Social Services, the State Department of Health Services, and state and local child death review teams shall share data and other information necessary to reconcile and integrate the Department of Justice Child Abuse Central Index and Supplemental Homicide File and the State Department of Health Services Vital Statistics as those documents relate to child fatality cases.

(3) This bill would incorporate additional changes in Section 11167.5 of the Penal Code enacted by AB 1536 (Ch. 24, Stats. 1997).

(4) This bill would incorporate additional changes in Section 11167.5 of the Penal Code proposed by AB 1065, to be operative if AB 1065 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(5) This bill would incorporate additional changes in Section 11170 of the Penal Code proposed by AB 753 and AB 1065, to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 843 (AB 753) Escutia. Child care: trustline registration system.

Existing law authorizes in provisions of the Education Code a child care provider, as defined, who possesses any one of 4 identification cards to initiate a background examination process by submitting one set of fingerprints and a completed trustline application to the Department of Justice. These provisions require the department to use the fingerprints submitted by a trustline registry system applicant to search the California Criminal History System and the California Child Abuse Central Index. Existing law requires the department to establish a trustline registry and, upon submission of the trustline application and fingerprints, to enter into the trustline registry the provider's name, identification card number, and an indicator that the provider has submitted an application and fingerprints, which would be known as a "trustline applicant." These provisions also prescribe procedures by which a child care provider may become known as a "registered trustline child care provider."

This bill would, as of July 1, 1998, repeal these provisions in the Education Code and recast them in the Health and Safety Code. The bill would exempt a person, who is a current licensee or employee in a facility licensed by the department who is initiating a background examination to be a trustline provider, from the requirement to submit fingerprints to the department and allow them to instead transfer a current criminal records clearance, from one facility to another if the clearance has been processed through a state licensing district office and is being transferred to another state licensing district office.

The bill would further revise the trustline registry provisions as follows:

(1) Revise the criminal record background check procedures for a trustline provider applicant, including adding a requirement that the applicant sign a declaration verifying his or her identity, and making a willful false declaration a misdemeanor.

(2) Prescribe circumstances under which the department is authorized to revoke a provider's trustline registration and under which a provider's registration is considered forfeited.

(3) Add the actual costs incurred by the Department of Justice for a Federal Bureau of Investigation criminal record check and to process the automated child abuse system checks under the trustline provisions to the costs to which a trustline provider applicant fee may apply.

(4) Require a trustline provider applicant and registered trustline provider to inform the department of any new mailing address in writing within 10 days of the change in address.

(5) Delete provisions that require the Department of Education to evaluate the trustline and to select a private consultant to evaluate the trustline.

(6) Revise provisions related to the previous exemption from trustline registration for certain child care providers operating under special programs and authorized to receive compensation from funds provided pursuant to federal law.

(7) Make its provisions operative on July 1, 1998, and authorize the department to adopt regulations.

(8) Upon the effective date of this bill, require the Department of Justice to transfer all trustline application and registration materials to the State Department of Social Services. Because the moneys previously collected by, and continuously appropriated to, the Department of Justice would instead be continuously appropriated to the department, the bill would make an appropriation.

The moneys collected by the Department of Justice to implement these provisions are continuously appropriated. Because this bill would increase the moneys in a continuously appropriated fund, it would make an appropriation.

Existing law, the Child Abuse and Neglect Reporting Act, requires the Department of Justice to maintain an index of all reports of child abuse, authorizes the department to charge the person or entity making the request a fee whenever information contained

in these files is furnished to the State Department of Social Services as the result of certain applications for employment or licensing, and requires that all moneys received for this purpose be deposited in the Department of Justice Sexual Habitual Offender Fund, for expenditure to offset various costs.

This bill would require that all moneys received under this provision to process trustline applications for purposes of this bill be deposited in a special account in the General Fund created by this bill, named the Department of Justice Child Abuse Fund. The moneys in this fund would be available, upon appropriation by the Legislature, for expenditure by the department to offset the costs incurred to process trustline applications pursuant to this bill.

This bill would incorporate additional changes in Section 11170 of the Penal Code, proposed by AB 1065 or SB 644, or both, to become operative only if AB 1065 or SB 644, or both, and this bill are chaptered and become effective on or before January 1, 1998, and this bill is chaptered last.

By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 844 (AB 1065) Goldsmith. Child abuse reports: dependent children.

(1) Existing law, the Child Abuse and Neglect Reporting Act, requires the Department of Justice to maintain an index of all reports of child abuse, and requires the department to notify a child protective agency that submits a report of known or suspected child abuse of any information maintained in the index that is relevant to that report of abuse. Under existing law, the reports of child abuse and the information contained in them are confidential, and unauthorized disclosure is a misdemeanor.

This bill would expand the list of agencies and persons to whom reports of suspected child abuse and information contained in them may be disclosed. This bill would include in that list child protective agencies responsible for making placements and persons who have been identified by the Department of Justice as listed in the Child Abuse Central Index, pursuant to a request by a child protective agency responsible for making placements.

This bill would also require the department to make available to any child protective agency responsible for placing dependent children, upon request, relevant information concerning child abuse reports contained in the index, as specified. This bill would also require that upon receipt of this information, the child protective agency shall provide written notice to the person identified by the department, by notifying that person of the fact that he or she is in the index. By imposing new duties on child protective agencies and expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(2) The Child Abuse and Neglect Reporting Act also authorizes the department to charge the person or entity making the request a fee whenever information contained in these files is furnished to the State Department of Social Services as the result of certain applications for employment or licensing, and requires that all moneys received for this purpose be deposited in the Department of Justice Sexual Habitual Offender Fund, for expenditure to offset various costs.

This bill would require that all moneys received under this provision to process trustline applications for purposes of provisions contained in AB 753 relating to child care provider registration be deposited in a special account in the General Fund created by this bill, named the Department of Justice Child Abuse Fund. The moneys in this fund would be available, upon appropriation by the Legislature, for expenditure by the department to offset the costs incurred to process trustline applications.

(3) This bill would incorporate additional changes in Sections 11167.5 and 11170 of the Penal Code proposed by SB 644, to become operative if SB 644 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish

procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 845 (AB 588) Figueroa. Insurance.

Existing law provides that no disability insurer covering hospital, medical, or surgical expenses may deny, refuse to insure, refuse to renew, cancel, restrict, or otherwise terminate, exclude, or limit coverage, on the basis that the applicant or insured person is, has been, or may be a victim of domestic violence.

This bill would provide that insurers issuing policies of insurance against certain residential, liability, and commercial risks may not deny or refuse to accept an application for insurance, refuse to issue or renew a policy, cancel, restrict, or otherwise terminate a policy, or charge a different rate for the same coverage because the applicant for insurance or any person who is or would be insured is, has been, or may be, a victim of domestic violence, except as specified. This bill would also provide that information that indicates that a person is, has been, or may be a victim of domestic violence is personal information for purposes of the Insurance Information and Privacy Protection Act. The bill would also restrict these insurers, and persons employed by them, from requesting certain information with respect to claimants, insureds, applicants, and claims that involve domestic violence, except as specifically provided.

Ch. 846 (AB 807) Scott. Sexual assault: victim's support.

(1) Existing law requires a law enforcement officer, or his or her agency, to immediately notify the local rape victim counseling center whenever a victim of an alleged violation of specified sex offenses is transported to a hospital for examination, and the victim approves of that notification.

This bill instead would require the law enforcement officer, or his or her agency, to immediately notify the local rape victim counseling center whenever a victim of an alleged violation of specified sex offenses is transported to a hospital for any medical evidentiary or physical examination. The bill would also provide that the victim shall have the right to have a sexual assault victim counselor and at least one other support person of the victim's choosing present at any medical evidentiary or physical examination, and that notice of this right shall be provided orally or in writing to the victim by the attending medical provider prior to the commencement of any initial medical evidentiary or physical examination arising out of a sexual assault.

(2) Existing law provides that a victim of sexual assault or spousal rape has the right to have a sexual assault victim counselor and at least one additional support person chosen by the victim present at any evidentiary, medical, or physical examination or interview by law enforcement authorities or defense attorneys.

This bill would revise the above provision to provide that the victim has a right to have victim advocates present at any interview by law enforcement authorities, district attorneys, or defense attorneys. However, this bill would specify that an initial investigation by law enforcement at the crime scene to determine whether a crime has been committed and the identity of the suspects shall not constitute a law enforcement interview. The bill would also provide that prior to the commencement of any initial law enforcement interview or district attorney contact, the victim shall be notified orally or in writing by the attending law enforcement authority or district attorney that the victim has the right to have victim advocates, as well as a support person of the victim's choosing, present at the interview or contact. This bill would further provide that this notification requirement shall also apply to investigators and agents employed or retained by law enforcement or the district attorney. By imposing increased duties on local criminal justice systems that are equivalent to those imposed by the establishment of a new crime, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 847 (AB 45) Murray. Domestic violence: punishment.

(1) Existing law requires a court to consider issuing various restraining orders on its own motion, in any case where the defendant is charged with a crime of domestic violence.

This bill would require the court to provide a copy of those orders to all interested parties. By imposing new duties on court personnel, the bill would impose a state-mandated local program.

(2) Existing law authorizes a magistrate or commissioner to set bail in an amount that he or she deems sufficient to assure that a defendant who has been arrested without a warrant for a bailable felony offense will appear in court.

This bill would additionally authorize a magistrate or commissioner to set bail in an amount that he or she deems sufficient to assure the protection of a victim, or family member of a victim, of domestic violence, for a person who has been arrested for the misdemeanor offense of violating a domestic violence restraining order.

(3) This bill would incorporate the additional changes in Section 136.2 of the Penal Code proposed by AB 340, to be operative if AB 340 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 848 (AB 102) Cunneen. Sentencing: aggravation: minors and pregnant women.

(1) Existing law requires the court to consider circumstances in aggravation and circumstances in mitigation when determining whether to impose the lower or upper prison term of a specified triad of prison terms. The Rules of Court set forth specified circumstances in aggravation and mitigation that the court may consider.

This bill would require that in specified cases of domestic violence where the defendant is or has been a member of the household of a victim or the minor, or has some other specified relationship to the victim or minor, and the offense occurred in the presence of or was witnessed by the minor, the court shall consider this fact as a circumstance in aggravation of the crime.

(2) Existing law authorizes the imposition of the high term of imprisonment in the state prison where specified circumstances in aggravation of a crime exist.

This bill would recommend that the Judicial Council revise a specified court rule to add to the circumstances in aggravation of a crime that a temporary restraining order protecting the victim of the crime from the defendant was in effect, and that the victim was pregnant at the time of the offense and the defendant knew or reasonably should have known of the victim's condition.

Ch. 849 (AB 200) Kuehl. Child custody.

Existing law provides that it is the policy of this state to assure children frequent and continuing contact with both parents after the parents have separated or dissolved their marriage, and to encourage those parents to share the rights and responsibilities of child rearing, except where contact would not be in the best interest of the child. Existing law also specifies factors that the court shall consider in determining the best interest of the child in proceedings relating to custody or visitation.

This bill would declare that it is also the policy of this state that the health, safety, and welfare of children shall be the court's primary concern in determining the best interest of children when making orders regarding custody or visitation, that perpetration of child abuse or domestic violence in a household where a child resides is detrimental to the child, and that where this policy and the existing policy are in conflict an order for custody or visitation shall be made in a manner that ensures the health, safety, and welfare of the child and the safety of all family members. The bill would require that decisions by a court or mediator regarding custody, visitation or other continuing contact by the child with both parents shall be consistent with these policies and the best interest of the child. The bill would also require that, if custody is granted to a parent who is alleged to have a history of committing child or domestic abuse or habitually or continually using alcohol or illegal drugs, as specified, the court's order shall specify the court's reasons and any order regarding custody or visitation shall be specific as to the time, day, place, and manner of transfer of the child, as specified, except where the parties stipulate to custody or visitation.

Ch. 850 (AB 233) Escutia. Trial courts: funding.

(1) Existing law establishes various fees for civil cases.

This bill would revise those fees.

(2) Existing law establishes a system of state funding for trial courts.

This bill would set forth the findings, declarations, and intent of the Legislature with regard to trial court funding and revise the system of state funding for trial courts, as specified. The bill would establish the Task Force on Trial Court Employees and the Task Force on Court Facilities, and specify the powers and duties thereof. The bill would also expand the powers and duties of the Judicial Council with respect to trial court funding, as specified. The bill would also revise provisions governing the Trial Court Trust Fund and the Trial Court Improvement Fund, as specified.

(3) Existing law establishes the duties of a county with respect to the trial courts in the county.

This bill would revise the duties of a county with respect to the provision of necessary resources for the trial courts, as specified.

(4) Existing law authorizes the Judicial Council to adopt rules of court as specified by statute.

This bill would authorize rules of court providing for racial, ethnic, and gender bias, and sexual harassment training for judges, commissioners, and referees. The bill would also revise the duties of the Judicial Council with respect to the collection of court data and reporting thereon.

(5) Existing law establishes the Trial Court Trust Fund for the purpose of funding trial court operations.

This bill would, until July 1, 2001, authorize any unexpended funds, not to exceed \$5,000,000, in the Trial Court Trust Fund for the 1997-98 fiscal year or any other available funds to be allocated by the Judicial Council for trial court facilities renovation, repair, and maintenance projects, as specified, pursuant to appropriation by the Legislature. The bill would also provide that if the county retained share of any specified fines and forfeitures exceeds the amount of the fines and forfeitures collected in that county during the 1994-95 fiscal year, that excess shall be deposited into the Trial Court Trust Fund, up to the amount of any allocation to the county made pursuant to the bill.

The bill would authorize the Administrative Office of the Courts to establish budget procedures and an annual schedule of budget developmental management, as specified, and set forth the criteria for the Judicial Council's trial court budget request.

(6) Under existing law, a judge or justice is deemed to serve or sit under assignment on each day during which it is necessary for him or her on account of the assignment to serve on the court to which assigned, to travel to or from such court, or to be absent from his or her residence.

This bill would, until January 1, 1999, delete reference to justices in this provision, revise the provision to apply to service in a substantial way on that court, and add provisions specifying when a judge of a municipal court is deemed to have served under assignment in the superior court, and requiring the Judicial Council to adopt

implementing rules, including criteria for approval of judicial and administrative court coordination plans.

(7) Existing law specifies the authority of the Trial Court Budget Commission.

This bill would provide that the Trial Court Budget Commission shall exercise its authority under the direction of, and with the approval of, the Judicial Council.

(8) Existing law authorizes each county to establish a courthouse construction fund, to be financed by surcharges on fines, forfeitures, and penalties and used for courthouse construction, as specified, and to continue through and including the 20th year after the initial year for the surcharge, or the 20th year after any borrowings are made for such construction.

This bill would extend those time limits with respect to Merced County from 20 to 25 years.

(9) Existing law requires counties to fund the costs of automating court recordkeeping.

This bill would revise those requirements, as specified.

(10) Existing law requires a biennial audit of trial court accounts, as specified.

This bill would repeal that provision.

(11) Existing law specifies the disposition of fines and forfeitures, and traffic violator fees, collected by the courts for crimes other than parking violations.

This bill would revise those provisions, as specified.

(12) This bill would establish a Civil Delay Reduction Team, which provisions would remain in effect until July 1, 1999. The bill would also establish a Judicial Administration Efficiency and Modernization Fund in the State Treasury for expenditure by the Judicial Council, as specified.

(13) The bill would impose state-mandated local costs by revising the duties of local officials, but would specify that the bill shall not be deemed to impose a state-mandated local program because of the state's assumption of increased funding support for the trial courts.

Ch. 851 (AB 530) Assembly Committee on Higher Education and Senate Committee on Education. Golden State Scholarshare Trust Act.

Existing law provides various programs of student financial assistance in the form of grant and loan programs.

This bill would establish the Golden State Scholarshare Trust Act, pursuant to which, under regulations adopted by the Student Aid Commission, participants would invest money in the Golden State Scholarshare Trust for the benefit of a specific beneficiary for the advance savings for the beneficiary's higher education expenses, as defined, at certain postsecondary educational institutions.

The bill would prescribe the powers and duties of the commission to implement these provisions. The bill would specify the circumstances under which a participation agreement may be canceled and the consequences of the cancellation.

The bill would require the commission to submit an annual audited financial report on the operations of the trust to the Governor, the Controller, the State Auditor, and the Legislature.

The bill would create the Scholarshare Investment Board, which would consist of the Treasurer, the Director of Finance, and the chief executive officer of the commission. The bill would require the board to prepare and adopt a written statement of investment policy annually and to consider the statement of investment policy and any changes in the investment policy at a public hearing. The bill would require reports concerning investments and deposits in financial institutions to be placed on file for public inspection, as specified. The bill also would require the investment manager to report specified information to the board.

The bill would require moneys received by the Scholarshare trust to be segregated into 2 funds, the program fund and the administrative fund. The bill would continuously appropriate the program fund to the commission for the purposes of the Golden State Scholarshare Trust Act and would make the funds in the administrative fund available for expenditure upon appropriation.

The bill would provide that distributions or earnings under a Scholarshare trust participation agreement and contributions to the Scholarshare trust on behalf of a

beneficiary would not be includable as gross income of a beneficiary or a participant, as specified.

The bill would make related changes in provisions governing the personal income tax law and the bank and corporation tax law.

The bill would provide that funding necessary for the startup and first-year administrative costs of the trust be paid from the General Fund in the annual Budget Act and that administrative costs of the trust in future years be paid out of the administrative fund of the trust.

Ch. 852 (AB 1191) Shelley. Vehicles: traffic rules and regulations: violations.

(1) Under existing law, it is an infraction punishable by a base fine of not exceeding \$100 for any person to fail to stop at a steady or flashing red signal light. Existing law provides for increased fines for subsequent convictions of infractions occurring within a one-year period.

This bill would change the base fine for a violation of the above described red signal light infraction to a fine of \$100.

(2) Under existing law, all fines and forfeitures imposed and collected for crimes, other than parking offenses, resulting from a filing in a court are required to be deposited with the county treasurer and distributed in accordance with a specified formula each month to the state, counties, and cities.

This bill would require, notwithstanding the specified distribution for fines, forfeitures, and assessments, that, for each conviction, as designated from fines, forfeitures, and assessments collected, of a violation of specified Vehicle Code provisions concerning red lights, 30% be allocated by the county treasurer to the general fund of the city or county in which the offenses occurred, with the balance to be deposited by the county treasurer in accordance with the formula specified above. The bill would make a similar allocation of revenues derived from fees collected from persons required or permitted to attend traffic violator schools because of violations of the same red light offenses. By imposing additional administrative duties on counties, this bill would impose a state-mandated local program.

(3) The bill would set forth certain legislative findings and declarations.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 853 (AB 1318) Ducheny. Public postsecondary education: student fees.

Existing law provides for a public postsecondary educational system in this state, which consists of the University of California, the California State University, and the California Community Colleges.

This bill would require systemwide fees charged to resident undergraduate students at the University of California and the California State University to be reduced for the 1998–99 fiscal year by 5% below the level charged during the 1997–98 fiscal year, and, for the 1999–2000 fiscal year, to be at the same level as for the 1998–99 fiscal year. The bill would require the per unit per semester fee charged to resident students at the California Community Colleges for the 1998–99 and 1999–2000 fiscal years to be reduced to \$12. The bill would require systemwide fees charged to resident graduate students and resident students pursuing a course of study leading to a professional degree at the University of California and the California State University for each of the 1998–99 and 1999–2000 fiscal years to be established at the same level established for those resident students for the 1997–98 fiscal year.

The bill would specify that this provision shall not apply to the University of California except to the extent that the Regents of the University of California, by appropriate resolution, make it applicable.

The bill would declare the Legislature's intent to appropriate sufficient funds to the University of California, the California State University, and the California Community Colleges in the Budget Acts of 1998 and 1999 and any subsequent Budget Acts to cover any reduction in funds caused by the enactment of the above provisions.

In addition, the bill would appropriate \$22,500,000, or so much thereof as is necessary, to the University of California and \$19,400,000, or so much thereof as is necessary, to the California State University, from the General Fund, for the 1998-99 fiscal year for the purpose of fully reimbursing those systems for fiscal losses resulting from the fee reductions in the bill. The appropriation to the University of California would be contingent upon the University of California implementing the fee reduction for the 1998-99 fiscal year.

Ch. 854 (AB 602) Davis. Poochigian and Davis Special Education Reform Act.

Existing law sets forth a method for determining apportionments for the purposes of special education programs operated by school districts, county superintendents of schools, and special education local plan areas (SELPAs). That method is based in part on amounts based on personnel costs that are computed pursuant to statutory formulas, amounts based on support services costs that are computed pursuant to statutory formulas, and amounts specifically computed for early education for individuals with exceptional needs younger than 3 years of age, nonpublic, nonsectarian schools and agencies, individuals having low-incidence disabilities, and licensed children's institutions. The number of instructional personnel services units that may be claimed are computed for teachers for special day classes and centers, instructional aides, and resource specialists, on the basis of the ratio of those positions to a specified number of pupils.

This bill would enact the Poochigian and Davis Special Education Reform Act and would make legislative findings and declarations with respect to the problems arising from the existing method of financing special education and related services. The bill would declare the intent of the Legislature to establish a new method for financing special education that is based on the pupil population in each SELPA. The bill would further declare the intent of the Legislature that the new funding method, among other things, ensures greater equity in funding among SELPAs, avoids unnecessary complexity, requires fiscal and program accountability, and avoids financial incentives to inappropriately place pupils in special education. The bill would also contain a legislative finding and declaration that an areawide approach to special education services delivery through administration by SELPAs best serves differing population densities and provides local flexibility, as specified. The bill would also declare the intent of the Legislature to equalize funding among SELPAs.

This bill, to accomplish the intent of the Legislature, would do the following:

(1) This bill would repeal the existing method of computing special education apportionments and make numerous conforming changes to other provisions of law, including the repeal and amendment of supporting statutes relating to the funding of special education programs. The bill would set forth a new method for making apportionments, as follows:

(a) A method for computing one-time equalization adjustments to special education apportionments to school districts and county offices of education that is based upon computed amounts per each type of special education services unit would be established. The bill would require the Superintendent of Public Instruction (superintendent) to compute special education services unit rates (unit rates) for that purpose for teachers of special day classes and centers for pupils who are severely disabled, unit rates for instructional aides for pupils who are severely disabled, unit rates for teachers of special day classes and centers for pupils with exceptional needs who are not severely disabled, unit rates for instructional aides for pupils with exceptional needs who are not severely disabled, unit rates for resource specialists, and unit rates for designated instruction and services. Those unit rates would be based on amounts computed by the superintendent for the 1995-96 fiscal year. Those unit rates would be averaged for services to pupils who are not severely disabled, except with respect to the unit rates for instructional aides. The superintendent would be required to compute statewide average unit rates for the purposes of equalization adjustments. Based upon those computations, the

superintendent would be required, for the 1997–98 fiscal year only, to make computations to determine the amount of equalization adjustments, if any, to be made to the special education funding. These equalization adjustments computed for the 1997–98 fiscal year would only be funded to the extent funds are appropriated for that purpose and would not create any future entitlements for equalization.

(b) Commencing in the 1998–99 fiscal year and each fiscal year thereafter, allocations of funds would be made to SELPAs and the administrator of each SELPA would be responsible for the fiscal administration of the annual budget allocation plan for special education programs and the allocation of state and federal funds to the school districts and county offices of education composing the SELPA in accordance with the local plan.

(c) For the 1998–99 fiscal year, each SELPA would be entitled to, at a minimum, an amount equal to the amount received per unit of average daily attendance in the 1997–98 fiscal year from specified state, local, and federal revenues for the purpose of special education for preschool pupils (ages 3 to 5 years), special education for pupils enrolled in kindergarten and grades 1 to 12, inclusive, and the amounts received for equalization, as described in subdivision (a), as adjusted for inflation, and equalization to the statewide target amount, changes in enrollment, and for the incidence of special disabilities, if applicable.

(d) Commencing with the 1999–2000 fiscal year and each fiscal year thereafter, the amount of funding computed for each SELPA would be subject to adjustment for changes in enrollment, equalization to the statewide target amount, inflation, and for the incidence of special disabilities, as specified. For purposes of equalization, each SELPA that would receive an amount per unit of average daily attendance for a fiscal year, as defined, that is below the statewide target amount per unit of average daily attendance for SELPAs, as computed, would be entitled to an equalization adjustment for that fiscal year. Adjustments for equalization would continue through and including the fiscal year in which all SELPAs are funded, at a minimum, at the statewide target amount, as adjusted for inflation. The superintendent would be required to make various computations to determine the amounts available for the purposes of equalization and the amount of the equalization adjustment for each SELPA.

(e) Funding for licensed children's institutions would continue to be computed as required by existing law.

(f) The method of funding for nonpublic, nonsectarian school contracts would be revised. The State Department of Education would be required to administer an extraordinary cost pool to protect SELPAs from the extraordinary costs associated with single placements in nonpublic, nonsectarian schools. The Office of the Legislative Analyst, the Department of Finance, and the State Department of Education would be required to conduct a study, as specified, of nonpublic school and nonpublic agency costs with a final report to the appropriate policy and fiscal committees of the Legislature on or before May 1, 1998.

(g) Low-incidence funding would continue to be computed as required by existing law.

(h) The method of allocating funds for regionalized operations and services and the direct instructional support of program specialists would be revised.

(2) This bill would require each SELPA to submit a revised local plan on or before the time it is required to submit a local plan as specified. Until the superintendent approves the revised local plan, the SELPA would be required to continue to operate under the reporting and accounting requirements prescribed by the State Department of Education for the special education finance provisions repealed by this bill. The department would be required to issue transition guidelines on the accounting requirements that SELPAs would be required to follow, including, but not necessarily limited to, guidelines pertaining to accounting for instructional personnel service units and caseloads. The bill would prohibit the State Board of Education from approving any proposal to divide a SELPA into 2 or more units unless either equalization among SELPAs has been achieved or the division has no net impact on state costs for special education, provided, however, that a proposal may be approved if it was initially submitted prior to January 1, 1997.

(3) This bill would require each SELPA to administer the revised local plans described in (2) and the allocation of funds. The bill would require SELPAs that do not

have approved revised local plans to continue to distribute funds under the methods set forth in existing law, as specified.

(4) This bill would revise the requirements for a SELPA that requests a designation as a necessary small SELPA.

(5) This bill would repeal provisions requiring the termination of the state's participation in special education programs for individuals with exceptional needs between the ages of 3 and 5 years if certain conditions occur.

(6) This bill would make some of the numerous necessary conforming substantive and technical changes to provisions of law relating to special education.

(7) To the extent that this bill would place new requirements on SELPAs, school districts, and county offices of education with respect to governance of SELPAs and the distribution of funds to SELPAs, this bill would impose a state-mandated local program.

(8) The bill would make legislative findings and declarations that the federal Individuals with Disabilities Education Act, as amended by the Individuals with Disabilities Education Act Amendments of 1997, contains specified provisions and that state and local education agencies are required to abide by federal laws.

(9) This bill would require the Office of the Legislative Analyst, in conjunction with the Department of Finance and the State Department of Education, to conduct a study of the distribution of severe and costly disabilities and the Office of the Legislative Analyst, the Department of Finance, and the State Department of Education to submit a report of their findings to the appropriate policy and fiscal committees of the Legislature on or before June 1, 1998.

(10) This bill would require the State Department of Education to convene a working group to develop recommendations for improving the compliance of state and local education agencies with state and federal special education laws and regulations and to submit a report of the recommendations to the appropriate policy and fiscal committees of the Legislature on or before September 1, 1998.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(12) This bill would provide that funding for this bill is contingent upon the enactment of an appropriation in the annual Budget Act, but would appropriate \$100,000 from specified federal funds for the purpose of the Office of the Legislative Analyst, the Department of Finance, and the State Department of Education conducting the study of nonpublic school and nonpublic agency costs and \$200,000 from specified federal funds for the purpose of the Office of the Legislative Analyst contracting for the request for proposal and study of the distribution of severe and costly disabilities.

Ch. 855 (SB 727) Rosenthal. School finance: days of attendance.

(1) Existing law requires the Superintendent of Public Instruction, at the request of a county superintendent of schools or a school district, and with the approval of the Director of Finance, to calculate the days of attendance in schools or classes maintained by the county superintendent of schools or school district in a specified alternative manner for the 1993-94 or 1994-95 fiscal year, as specified, or any later fiscal year, and the succeeding fiscal years, and to verify certain percentages to be calculated.

This bill would delete the provisions above regarding the alternative manner for calculating days of attendance and would instead, effective July 1, 1998, make one-time adjustments to the revenue limits per unit of average daily attendance, as specified.

(2) Existing law provides that in a county office of education or school district that requests to calculate its days of attendance in the alternative manner specified above, certain absences of a pupil from school or class are not deemed absences.

This bill would repeal this provision.

(3) Existing law requires county superintendents of schools and governing boards of school districts to report specified attendance information for purpose of apportionment.

This bill would require additional information, as specified.

(4) This bill would declare that specified sections of this act shall become operative July 1, 1998.

Ch. 856 (SB 1253) Mountjoy. Income taxation: designations: California Military Museum.

Existing law relating to the administration of personal income tax laws allowed individual taxpayers, until January 1, 1996, to contribute amounts in excess of their tax liability to the California Military Museum Fund.

This bill would reinstate those contribution provisions on January 1, 1998, and would continue their operation until January 1, 2002.

This bill would, for taxable years beginning in 1998, make those contribution provisions inoperative in any calendar year in which the Franchise Tax Board estimates that the minimum contribution amount will be less than the prescribed amount, as annually adjusted commencing with taxable years beginning in 1999.

Ch. 857 (AB 1438) Escutia. Trial court funding.

Existing law authorizes the Judicial Council to adopt rules of court as specified by statute.

This bill would recognize specified rules of court adopted by the Judicial Council creating a mechanism for the negotiation of the conditions of employment between a trial court and its representatives and trial court personnel, as specified.

Ch. 858 (AB 420) Baca. Judges.

Existing law specifies the number of court judges in various counties in the state.

This bill would provide that there are 40 additional judges of the superior and municipal courts, to be allocated to the courts of the counties in accordance with a report on judgeship needs to be submitted to the Legislature by the Judicial Council, thereby imposing a state-mandated local program.

The bill would provide that, upon submission of the report and appropriation of funds during the 1997-98 Regular Session to pay for a judicial position for the 1998-99 fiscal year, the Governor may appoint a judge to each of the positions for which funds have been appropriated.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 859 (AB 1574) Escutia. Trial Court Funding.

Existing law, as set forth in the Budget Act of 1997, makes certain appropriations for trial court funding.

This bill would transfer the additional amount of \$157,500,000 to an existing item of appropriation for trial court funding for the 1997-98 fiscal year.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 860 (SB 377) Greene. Education: voluntary desegregation programs.

Existing law authorizes school districts that maintain specified voluntary desegregation programs to present claims for reimbursement for the costs of these programs.

This bill would provide that the Grant Union High School District, the Lynwood Unified School District, or the Sausalito Elementary School District may be funded for a specified voluntary desegregation program if the Department of Finance has reviewed and approved an estimated claim and a specified report submitted by any and all of the districts. The bill would authorize the Allensworth-Richgrove Districts Collaborative, the Carlsbad Unified School District, and the San Dieguito Union High School District to be funded for a specified voluntary desegregation program. The bill would specify that these provisions would only become operative if appropriations are made for their purposes in the annual Budget Act or in another measure.

Ch. 861 (SB 1051) Vasconcellos. Education: voluntary desegregation programs: East San Jose group of school districts in collaboration.

Existing law authorizes school districts that maintain specified voluntary desegregation programs to present claims for reimbursement for the costs of these programs.

This bill would authorize a group of school districts in collaboration to present these claims for reimbursement.

The bill would provide that, if the East San Jose group of school districts in collaboration, as defined to include 6 specified school districts, meets certain criteria, that group may be funded for a specified voluntary desegregation program through the annual Budget Act if the program is approved by the Controller and if the Department of Finance has approved an estimated claim and a specified report submitted by the collaboration.

The bill would specify that this provision would only be implemented for those fiscal years for which the Director of Finance certifies, in writing, to the Secretary of State that sufficient funding has been appropriated for its purposes in the annual Budget Act or in another measure.

This bill would provide that it shall not be construed to permit the East San Jose group of school districts in collaboration to receive additional reimbursement for the costs of voluntary desegregation programs for any fiscal year prior to the 1996–97 fiscal year.

This bill would make legislative findings and declarations with respect to funding voluntary desegregation programs. The bill would require that the Eastside Union High School District operate under the voluntary desegregation program operated by the East San Jose group of school districts, of which the Eastside Union High School District is a part, and would require the base fiscal year for computing reimbursements to be the first full year of operation of the program following the 1995–96 fiscal year.

This bill would include a legislative finding and declaration of unique circumstances necessitating a special statute in this regard.

Ch. 862 (SB 1163) Greene. School facilities: voluntary desegregation plans.

Existing law requires that, prior to reimbursement for certain costs incurred by school districts for voluntary desegregation, the governing board of a school district submit to the Superintendent of Public Instruction and the Controller a copy of the district's desegregation plan, which the governing board has certified is the latest adopted plan. Existing law sets forth a formula for computing the amount that a school district may be reimbursed for the costs of its voluntary desegregation program that uses the 1984–85 fiscal year as a base year, or for school districts initiating a program after that fiscal year that uses the first full year of operation of the program as the base year.

This bill would specify that the "Administrative Recommendations and Action Plans for Implementing a Voluntary Desegregation Plan in the Sacramento City Unified School District," adopted February 29, 1988, and as subsequently amended, is the latest adopted plan for the Sacramento City Unified School District. The bill would also provide that commencing with the 1998–99 fiscal year and each fiscal year thereafter, the amount that the Sacramento City Unified School District may be reimbursed for the costs of its voluntary desegregation program shall not exceed the amount in excess of $\frac{1}{5}$ of the audited desegregation cost approved by the Controller and actually incurred in the 1990–91 fiscal year, reduced by the federal desegregation reimbursement of \$3,096,989 received in the 1990–91 fiscal year, as adjusted for inflation and changes in enrollment, as specified. The bill would include in the 1990–91 base year expenditures by the school district for its federal magnet program, as specified.

This bill would declare that it shall not become operative unless and until funding is provided for its purposes in the annual Budget Act.

This bill would make a legislative finding and declaration of unique circumstances in this regard.

Ch. 863 (SB 712) Haynes. Local government reorganization.

Existing law, the Cortese-Knox Local Government Reorganization Act of 1985, requires the local agency formation commission of a county to authorize the conducting authority to order the consolidation of districts, dissolution, merger or establishment of

a subsidiary district, or reorganization including any of these changes of organization without an election, except as otherwise specified.

This bill would revise that provision to require an election in each affected city or district when there are written protests, as specified, and would make the provision inapplicable to any proposal for a change of organization or reorganization submitted to the commission before January 1, 2003, where the Goleta Sanitary District or the Goleta West Sanitary District is an affected district. The bill would also state the findings and declaration of the Legislature concerning the necessity of a special law.

The act also provides that in any reorganization where the component changes of organization would not individually require a confirmation election, no confirmation election shall be required to approve the reorganization.

This bill would require the conducting authority to order and approve a change of organization or reorganization subject to voter confirmation by the voters in each affected district for any proposal for the dissolution of one or more districts and the annexation of all or substantially all of their territory to another district when the conducting authority finds that petitions meeting certain requirements request submission of the proposal to voter confirmation. The bill would also make conforming changes.

Ch. 864 (SB 824) Greene. California Center on Teaching Careers.

Existing law establishes various programs for the recruitment of teachers.

This bill would establish the California Center on Teaching Careers for the purposes of recruiting qualified and capable individuals into the teaching profession. From funds appropriated for that purpose, the California State University would be required to establish and administer the center, in concurrence, as defined, with representatives of the Commission on Teacher Credentialing, the State Department of Education, the University of California, and independent institutions of higher education, as defined. The California Center on Teaching Careers would be required to perform specified duties, including, among others, creating or expanding a referral data base for qualified teachers seeking employment in the public schools.

This bill would require the Commission on Teacher Credentialing, in consultation with the Legislative Analyst, to conduct an evaluation of the program on or before March 1, 2002, and would authorize the inclusion of that evaluation in the analysis of the 2002–03 Budget Bill prepared by the Legislative Analyst.

This bill would repeal those provisions as of January 1, 2008.

This bill would appropriate \$500,000 from the unappropriated balance of federal funds received by the state pursuant to the federal Goals 2000: Educate America Act to the California State University, without regard to fiscal year, for the support of the California Center on Teaching Careers.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 865 (SB 1155) Leslie. Education: Plumas Unified School District: necessary small schools: necessary small high schools.

Existing law defines a necessary small school as an elementary school with an average daily attendance of less than 101, exclusive of pupils attending grades 7 and 8 of a junior high school, maintained by a school district that maintains 2 or more schools, that comes within any of several specified criteria involving combinations of distance and average daily attendance. Existing law requires the county superintendent of schools to make specified computations for each elementary and secondary school district that has fewer than 2,501 units of second principal apportionment average daily attendance and maintains at least one school that meets the criteria for a necessary small school, as defined.

Existing law defines a necessary small high school as a high school with an average daily attendance of less than 301, or a junior high school with an average daily attendance of less than 75 in grade 9, excluding continuation schools, that comes within any of several specified criteria involving combinations of distance and average daily attendance. Existing law requires the county superintendent of schools to make specified computations for each school district with fewer than 2,501 units of average daily attendance with regard to necessary small high schools.

This bill would express legislative findings and declarations relating to the fiscal circumstances of the Plumas Unified School District. The bill would express the intent of the Legislature to provide a method through which the Plumas Unified School District, and any other similarly situated school district, would be eligible to receive apportionments pursuant to the schedules for a necessary small school and a necessary small high school set forth in existing law.

The bill would require that, notwithstanding any other provision of law, a unified school district that is the only school district in a county, that received specified amounts of federal Forest Reserve funds and that has fewer than 4,501 units of average daily attendance, be eligible to receive apportionments for necessary small schools and necessary small high schools, except as specified. The bill would state that these provisions shall become inoperative on July 1, 1999, and as of January 1, 2000, would be repealed.

Ch. 866 (SB 49) Karnette. Political Reform Act of 1974: online disclosure.

Existing provisions of the Political Reform Act of 1974 require specified candidates for public office and committees supporting or opposing candidates or ballot measures to periodically file reports with the Secretary of State and certain local officials setting forth information concerning contributions they received and expenditures they made during the specified reporting period. Existing provisions of the act also require lobbyists, lobbying firms, and lobbyist employers to periodically file specified reports and statements with the Secretary of State.

This bill would require the Secretary of State to develop a process whereby reports and statements that are required under the act to be filed with the Secretary of State could be filed electronically and viewed by the public at no cost and an online disclosure system by way of the largest nonproprietary, cooperative public computer network.

This bill would establish timeframes within which the Secretary of State would be required to implement this process and within which controlled committees of elected state officers that receive contributions, and any other committees, lobbyists, lobbying firms, and lobbyist employers that file these reports and statements, must begin to file them electronically. The bill would require that the Secretary of State implement its provisions statewide in connection with the state primary election in the year 2000.

This bill would permit committees that are not required to file electronically to do so.

This bill would require the Secretary of State to define a standardized record format or formats for transmission of data required to be filed by this bill, accept test files from vendors to ensure compliance and compatibility with these formats, and publish a list of the certified vendors to be made available to the public.

This bill would require that persons who are subject to these electronic filing requirements must continue to file paper copies of these reports and statements as currently required under the act until the Secretary of State is satisfied with the performance of the electronic filing system. The bill would require that all persons and committees required to file reports in connection with a statewide elective office or ballot measure appearing on the November 1998 ballot submit, in addition to a filing on paper, a computer disk in an approved format, unless they file electronically.

This bill would not require local officials who also receive filings of these reports and statements to maintain a similar electronic filing system, but would impose a state-mandated local program by requiring county elections officials to receive this information from the Secretary of State.

The bill would provide, pursuant to a specified provision of existing law, that no employee or official of a state or local government agency shall utilize, for political or campaign purposes, public facilities or resources to retrieve or maintain any of the data produced pursuant to the bill.

This bill would appropriate the sum of \$1,100,000 to the Secretary of State for the purposes of developing the electronic reporting system and reimbursing local agencies for any costs they incur in the development of the system.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these penalties on certain persons who violate the provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, except as provided in this act, no reimbursement is required by this act for specified reasons.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 867 (SB 8) Lockyer. Gambling.

(1) Existing law, the Gaming Registration Act, among other things, prohibits the ownership or operation of a gaming club, as defined, without first obtaining a valid registration from the Attorney General. Existing law subjects any person operating a gaming club without a license to punishment in the state prison or in a county jail for not more than one year.

This bill would repeal the Gaming Registration Act. The bill would recast these provisions, as specified, and would enact the Gambling Control Act.

(2) Existing law provides that the Department of Justice, under the direction and control of the Attorney General, is composed of the office of the Attorney General and the Division of Law Enforcement.

This bill would create the Division of Gambling Control within the Department of Justice. The bill would authorize the division to regulate legal gambling in this state, as specified. This bill would also create the California Gambling Control Board and delegate specified duties to the board. Upon the occurrence of certain events, the California Gambling Control Commission, which this bill would also create, would succeed to all of the powers of the California Gambling Control Board, which would be abolished.

(3) Under existing law, the California Horse Racing Board is the state entity responsible for negotiating with the Indian tribes for the purpose of entering into a tribal-state compact governing the conduct of horseracing activities on Indian lands of the tribe.

This bill would repeal that provision.

(4) Existing law prohibits certain conduct with regard to gambling, as specified.

This bill, among other things, would provide that a violation of the Gambling Control Act, unless otherwise indicated in the act, is a misdemeanor, thereby imposing a state-mandated local program by creating a new crime. The bill would also prohibit specified persons from engaging in certain activities related to any controlled game, as defined, without having first procured a state license. A violation of this provision would be a misdemeanor, thereby imposing a state-mandated local program by creating a new crime.

(5) This bill would create within the State Treasury the Gambling Control Fund, and would provide that, upon appropriation by the Legislature, \$5,400,000 of that fund each fiscal year shall be available to the Department of Justice exclusively for the support of the Division of Gambling Control and the California Gambling Control Board.

(6) The Milton Marks Postgovernment Employment Restrictions Act of 1990, a part of the Political Reform Act of 1974, generally prohibits officers and employees of a state administrative agency, as defined, from making an appearance or communication for a period of 12 months after he or she leaves office before or to that agency for the purpose of influencing administrative action or other proceedings of the agency.

This bill would prohibit certain officials and employees of the division and the board from making an appearance or communication for a period of 3 years from termination of employment or leaving of the office before or to the division or the board for the purpose of influencing the division or the board.

(7) Existing law provides that any person who conducts or attempts to conduct a money laundering transaction, as described, shall be punished by imprisonment in a county jail for not more than one year or in the state prison, by a specified fine, or both.

This bill would include any person or business engaged in controlled gambling, as specified, within the definition of "financial institution" for purposes of those money laundering provisions. Thus, by expanding the scope of an existing crime, the bill would impose a state-mandated local program. This bill would also make additional changes in these provisions, to be operative only if AB 195 is also chaptered, and this bill is chaptered last.

(8) This bill would also impose a state-mandated local program by increasing the reporting and specified administrative duties of local law enforcement and licensing entities.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that for certain costs no reimbursement is required by this act for a specified reason.

However, the bill would provide that, if the Commission on State Mandates determines that this bill contains other costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed \$1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 868 (AB 1378) Prenter. Prison construction: mitigation costs.

Existing law provides that the Department of Corrections shall prepare plans for, and construct facilities and renovations included within, its master plan for prison construction and operations, which funds have been appropriated by the Legislature.

This bill would provide that the Department of Corrections shall include as part of the master plan mitigation for costs incurred by any local education agency, or any city, county, or city and county as a result of the construction of new prison facilities, expansions of existing prison facilities, increases in the number of inmates housed in existing prison facilities resulting in increased inmate housing capacity, or any combination thereof.

The bill would provide that funds appropriated for the mitigation of local expenses shall be divided equally, with $\frac{1}{2}$ for allocation among any impacted local education agency and $\frac{1}{2}$ for allocation among any city, county, or city and county impacted by the prison construction or expansion.

The bill would also specify how funds appropriated in the Budget Act of 1997 for mitigation payments for the Emergency Bed Project and prison expansion shall be allocated.

Ch. 869 (SB 513) Lockyer. Appellate Representation: State Public Defender: California Habeas Resource Center.

Existing law establishes the Office of the State Public Defender, as specified, and specifies the powers and duties of that office. It also authorizes the Supreme Court to appoint and employ specified personnel, including phonographic reporters, assistants, secretaries, librarians, and bailiffs.

This bill would revise the existing authorization for representation by the State Public Defender to authorize the State Public Defender to represent any person financially unable to employ appellate counsel in capital cases, and in specified noncapital appeals; and to hire additional counsel and support staff, as specified. The bill would also create the California Habeas Resource Center in the judicial branch of state government, specify its powers and duties, and provide for an executive director and board of directors, appointed as specified. The bill would also require the Judicial Council and the Supreme Court to adopt rules of court setting competency standards for appointed counsel in death penalty appeals and habeas corpus proceedings; and authorize the Supreme Court to compensate appointed counsel in death penalty appeals and postconviction proceedings at a rate of at least \$125 per hour, as specified, and to raise the limit on investigative and other expenses for such counsel, as specified, to \$25,000 without an order to show cause.

Ch. 870 (SB 660) Sher. Hazardous waste management: hazardous substance response actions: fees.

(1) Under existing law, the Department of Toxic Substances Control regulates RCRA hazardous waste, which is defined as hazardous waste subject to the federal Resource Conservation and Recovery Act of 1976, and non-RCRA hazardous waste, which is defined as including all other hazardous waste regulated in the state. Existing law provides that the revenues from specified fees and charges imposed upon the management of hazardous waste are deposited in the Hazardous Waste Control Account in the General Fund and the money in that account is available, upon appropriation by the Legislature, to the department for, among other things, hazardous waste management and the implementation of hazardous substance response actions and for state operational costs with respect to the oversight of removal and remedial actions to hazardous substance releases. A violation of the hazardous waste control laws, including the provisions imposing fees, is a crime.

Existing law requires corporations which use, generate, store, or conduct activities in this state related to hazardous materials to pay an annual charge based on the number of employees employed in the state during the previous calendar year. Existing law also requires every generator of hazardous waste to pay an annual generator fee to the State Board of Equalization. Existing law requires the board to assess a fee for hazardous waste facilities applications, variance applications, and permit modifications. Existing law also imposes a fee upon persons requesting the classification of a hazardous waste, upon persons applying for a determination as to whether land should be designated as hazardous waste property or border zone property, and upon the disposal of hazardous waste to land. Existing law establishes a base rate of \$110 per ton for the disposal of hazardous waste in this state, adjusted as specified, and provides a procedure for determining the hazardous waste disposal fee as a percentage of that base rate. The revenues from these charges are deposited in the account.

Existing law imposes a generator fee surcharge, the revenues from which may be expended for specified purposes related to hazardous waste source reduction and a manifest fee for each manifest form used by a person, as specified.

Existing law requires the board to assess a specified fee for the costs incurred by the department for its oversight of a preliminary endangerment assessment at a hazardous substance release site. Existing law requires registered hazardous waste transporters to pay a registration fee to the department.

This bill would enact the Environmental Cleanup and Fee Reform Act of 1997.

The bill would create the Toxic Substances Control Account in the General Fund and would require specified funds be deposited in that account, including the charge imposed on corporations handling hazardous materials, which would be administered by the Director of Toxic Substances Control. The bill would authorize the funds deposited in the Toxic Substances Control Account to be appropriated to the department for specified purposes, including, among other things, the administration and implementation of the provisions governing hazardous substance response actions, railroad safety and emergency planning and response, unreimbursed removal and remedial action costs, for allocation to the Office of Environmental Health Hazard Assessment, pursuant to interagency agreements, for the state share required under the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), for the purchase by the state, or by any local agency with the prior approval of the director, of hazardous substance response equipment and other preparations for response to a release of hazardous substances, for the costs of health effects studies, and for the payment of the principal of, and interest on, bonds sold pursuant to the Johnston-Filante Hazardous Substance Cleanup Bond Act of 1984. The bill would make a statement of legislative intent concerning the appropriation of funds deposited in the Toxic Substances Control Account.

The bill would revise the fee revenues required to be deposited in the Hazardous Waste Control Account and would delete the use of the funds in that account for purposes related to hazardous substance response actions.

The bill would delete the base rate for the fee imposed upon the disposal of hazardous waste, until January 1, 2001, and would establish new rates for the disposal of hazardous waste, based upon, among other things, the level of treatment of the hazardous waste, which would be operative until January 1, 2001. The bill would reinstate, on January 1, 2001, the existing law with regard to the base rate and categories of hazardous waste

disposal fees, modified as specified. The bill would revise the base rates for the fee imposed on operators of hazardous waste facilities and hazardous waste generators.

The bill would delete the registration fee for hazardous waste transporters. The bill would limit the existing manifest fee to manifests used before June 30, 1998, and would require the department to impose a specified manifest fee system after June 30, 1998, that would exclude certain wastes that are recycled. The bill would require the department to expend \$1,000,000, from the manifest fees deposited in the Hazardous Waste Control Account, upon appropriation by the Legislature, in the annual Budget Act, to implement changes in the hazardous waste manifest tracking system and would require the department to annually expend \$800,000, commencing with the 1999–2000 fiscal year, upon appropriation by the Legislature, from the manifest fees deposited in that account, to encourage pollution prevention measures. The bill would revise the fee imposed for variance applications and permit modifications. The bill would repeal the generator surcharge.

The bill would increase the amount of the charge paid by certain corporations for hazardous materials management, as specified, thereby imposing a state tax for purposes of Article XIII A of the California Constitution. Since a failure to pay these charges would be a crime, the bill would impose a state-mandated local program by creating new crimes.

The bill would require the revenues from the charges imposed upon corporations to be deposited in the Toxic Substances Control Account and would declare that the fee rates are intended to provide sufficient revenues to fund the purposes of that account. The bill would require the department to make a specified determination regarding the state's obligations under CERCLA and to report that determination. The bill would require the Legislature to specify in the annual Budget Act those pro rata changes to the fee rates that will increase revenues, as specified. The bill would prohibit the Legislature from specifying fee rates in the annual Budget Act that would increase revenues in an amount greater than a specified amount.

The bill would require any person who applies for, or requests, a new hazardous waste facilities permit, including a standardized permit, a hazardous waste facilities permit for postclosure, a class 2 or class 3 permit modification, a permit renewal, a variance, or a waste classification determination, to enter into a written agreement with the department, pursuant to which that person would be required to reimburse the department for the costs incurred by the department in processing the application or responding to the request, except as specified.

The bill would require the department to comply with specified procedures when recovering costs for processing applications, responding to requests, or providing other services, for which the applicant or requester is required to reimburse the department for its direct and indirect costs.

The bill would also make other related changes in the fees and charges levied for hazardous waste management.

(2) Existing law requires the department to establish a program to delegate the authority to enforce the hazardous waste control laws administratively in San Diego County.

This bill would repeal that requirement to establish the program.

(3) Under existing law, the Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65), as approved by the voters at the November 4, 1986, general election, 50% of the penalties collected pursuant to the hazardous waste control laws and to that act are required to be deposited in the Hazardous Substance Account and 25% are required to be used to fund the activities of local health officers.

This bill would instead require 25% of those penalties be paid to the certified unified program agency, the local health officer, or authorized public officer or agency. The bill would declare the intent of the Legislature that these changes further the intent of that act.

(4) Existing law, the Presley-Carpenter-Tanner Hazardous Substance Account Act, requires certain funds to be deposited in the Hazardous Substance Account, including any money transferred, upon appropriation by the Legislature, from the Hazardous Waste Control Account. Under existing law, the funds in the Hazardous Substance Clearing Account are required to be expended to pay the bonds sold pursuant to the

Johnston-Filante Hazardous Substance Cleanup Bond Act of 1984. Existing law annually appropriates \$5,000,000 from the Hazardous Waste Control Account to the Hazardous Substance Clearing Account to pay those bonds under a specified circumstance.

The bill would revise the sources of the funds to be deposited in the Hazardous Substance Account, including money transferred from the Toxic Substances Control Account. The bill would instead annually transfer \$5,000,000 from the Hazardous Substance Account to the Hazardous Substance Clearing Account for the payment of the principal and interest for those bonds, under the specified circumstance, thereby making an appropriation.

The bill would require any potentially responsible party at a site, or any person who has notified the department of their intent to undertake removal or remediation at a site, to reimburse the department for the costs incurred by the department for its oversight of any preliminary endangerment assessment at that site, except as specified.

(5) Existing law, the Carpenter-Presley-Tanner Hazardous Substance Account Act, generally provides that the act shall remain in effect only until July 1, 1998, and as of that date is repealed, unless a later enacted statute, which is enacted before July 1, 1998, deletes or extends that date. However, certain provisions of the act, including the Johnston-Filante Hazardous Substance Cleanup Bond Act of 1984 and related provisions, are not repealed until the date when the bonds issued and sold pursuant to the bond act have been paid and the General Fund reimbursed.

Among other things, in addition to the annual appropriation of \$5,000,000 from the Hazardous Substance Clearing Account to pay the principal of, and interest on, bonds issued and sold pursuant to the bond act, as specified above, the act also continuously appropriates \$1,000,000 from the Hazardous Waste Control Account to the department as a reserve account for emergencies, as specified.

The act authorizes a person to apply to the State Board of Control for compensation of a loss caused by the release of a hazardous substance, and provides that any person who knowingly gives, or causes to be given, any false information as a part of a claim for compensation is guilty of a misdemeanor.

This bill would extend the effective date of the act, except for the provisions that continue until the bonds are paid and the General Fund reimbursed, to January 1, 1999. By extending the duration of provisions of the act, the bill would also extend those continuous appropriations that are subject to the general repeal date, thereby making appropriations. By extending the duration of those provisions of the act, the bill would also extend that misdemeanor provision, thereby imposing a state-mandated program by creating a new crime.

(6) The bill would make conforming changes in the provisions authorizing the collection of the fees imposed upon hazardous waste. The bill would require the board to issue refunds for hazardous waste generator fees paid for hazardous waste generated in 1997, if directed to do so by the department, as specified.

(7) The bill would make a statement of legislative intent concerning the June 2, 1992, transfer of \$20,000,000 from the Superfund Bond Trust Fund to the General Fund pursuant to a specified budget item of the Budget Act of 1991. The bill would transfer from the General Fund to the Superfund Bond Trust Fund, for payment of the principal of, and interest on, the bonds issued and sold pursuant to the bond act, \$3,500,000 on or before August 1, 2000, \$3,300,000 on or before August 1, 2001, \$3,100,000, on or before August 1, 2002, \$2,900,000 on or before August 1, 2003, and the amount needed to repay the remainder of the funds transferred pursuant to that budget item, plus all interest accrued since the date that the transfer took place, on or before August 1, 2004.

(8) The bill would provide that the changes made by the bill would become operative July 1, 1998, except that the changes made by the bill in the provisions imposing the disposal fee, facility fee, generator fee, conditional authorization or exemption and permit-by-rule fee, and the manifest fee, and the repeal of the generator surcharge fee, would be operative January 1, 1998, or, for certain disposal fees, January 1, 2001. The bill would specify the application of these changes on the fees due and payable for 1998, 1999, or 2000, as specified.

(9) The bill would incorporate changes to Section 25143 of the Health and Safety Code proposed by both this bill and AB 1157, which would become operative only if both bills are enacted and this bill is enacted last.

(10) The bill would also incorporate changes to Section 25404.5 of the Health and Safety Code proposed by both this bill and AB 1357, which would become operative only if both bills are enacted and this bill is enacted last.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 871 (SB 1040) Maddy. Building standards: fire safety.

Existing law requires the State Fire Marshal with the advice of the State Board of Fire Services, to adopt building standards and other regulations establishing minimum requirements for the prevention of fire and for the protection of life and property against fire and panic in any building or structure used or intended for use as an asylum, jail, mental hospital, hospital, home for the elderly, children's nursery, children's home or nonexempted institution, school, or any similar occupancy of any capacity, and in any assembly occupancy where 50 or more persons may gather together in a building, room, or structure for the purpose of amusement, entertainment, instruction, deliberation, worship, drinking or dining, awaiting transportation, or education.

Existing law also requires the State Fire Marshal to adopt building standards applicable to all newly constructed buildings or structures subject to these provisions for which a building permit is issued, or construction commenced where no building permit is issued, on or after January 1, 1989, that establish minimum requirements for the placement of distinctive devices, signs, or other means that identify exits and can be felt or seen near the floor. This bill would require that exit sign technologies be permitted if they are permitted by the model building code upon which the California Building Standards Code is based.

This bill would require that standards adopted by the State Fire Marshal with respect to the minimum requirements for the placement of distinctive devices, signs, or other means that identify exits and can be felt or seen near the floor, apply to the above-referenced buildings or structures, and that the building standards be adopted before July 1, 1998. Because the standards required to be adopted pursuant to these provisions would add to and change the definition of a crime, the violation of which would be a misdemeanor, this bill would constitute a state-mandated local program.

Existing law requires the State Fire Marshal to establish similar requirements specifically applicable to hotels, motels, or apartment houses.

This bill would make nonsubstantive, technical amendments to these provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 872 (SB 1068) M. Thompson. Board of Reclamation.

Existing law requires the Reclamation Board to establish and enforce standards for the maintenance and operation of flood control works of an authorized project or an adopted plan, including standards for encroachment construction, vegetation, and erosion control measures. Existing law requires the board to approve works that include the construction or alteration of any levee, embankment, canal, or other excavation in the bed, or along the banks, of the Sacramento River or the San Joaquin River, or on any adjacent land, as prescribed. Existing law provides for the issuance of an encroachment permit by the board for prescribed activities.

This bill would provide that fences that are designed to give way during high water events shall not be allowed on the water side of a levee, as defined. The bill would require the permittee to remove segments of fences, as described, during times of high water events. The bill would require the board, before taking action to remove or modify encroachments on levees, channels, and other flood control works, to make a prescribed determination. The bill would make a statement of legislative intent.

Ch. 873 (SB 1081) Calderon. Hazardous materials: mediation-arbitration.

Existing law requires any person who knows, or has probable cause to believe, that a significant disposal of hazardous waste has occurred on, under, or into the land which he or she owns or leases, or that the land is within a specified distance of a significant disposal of hazardous waste, and intends to allow specified construction on that land, to apply to the Department of Toxic Substances Control prior to construction for a determination as to whether the land should be designated a hazardous waste property or a border zone property. Existing law allows any person who knows or believes that land which he or she owns or leases is hazardous waste property or border zone property to apply to the department for such a determination.

This bill would establish the Environmental Responsibility Acceptance Act. The bill would, among other things, require the owner of a defined site who has actual awareness of a release of a hazardous material or hazardous materials that exceeds a notification threshold to take all reasonable steps to expeditiously identify the potentially responsible parties and, after obtaining actual awareness of the potentially responsible parties, send a notice of potential liability to the parties and the agency that the owner believes is the appropriate oversight agency, as specified. The bill would require a potentially responsible party who has actual awareness of a release that is likely to exceed the notification threshold to provide the owner with a release report, as specified, and either a commitment statement or a negative response. It would require, if the owner rejects the commitment statement, the owner and notice recipient to participate in a mediation process prior to the commencement of any litigation, except as specified. The bill would provide that the commitment statement, upon taking effect, is to have specified results and that, at any time after the commitment statement is accepted, either the owner or the notice recipient may file an action for material breach of rights and obligations associated with the statement.

The bill would further provide that neither the failure to issue a commitment statement nor its issuance is to be construed as an admission of liability under any federal, state, or local law, for the release that the party agrees to investigate or remediate.

Ch. 874 (SB 1082) Kelley. Water conveyance facilities: joint use of capacity.

(1) Existing law prohibits the state and any regional or local public agency from denying a bona fide transferor of water the use of a water conveyance facility under prescribed circumstances, and requires the state, regional, or local public agency that owns the facility to determine in a timely manner the amount and availability of unused capacity and the terms and conditions of use, as specified.

This bill, until January 1, 1999, would require the Director of Water Resources to assist the Colorado River Board and the 6 California water agencies that derive water from the Colorado River in developing a plan to ensure that California can live within its entitlement of 4.4 million acre-feet of water annually and to ensure that the southern California coastal plain's needs for Colorado River water are met. The bill would require the director, with regard to a proposed transfer of conserved water from the Imperial Irrigation District to the San Diego County Water Authority, using the Metropolitan Water District of Southern California's water conveyance facilities, including the Colorado River Aqueduct, if the authority and the Metropolitan Water District of Southern California have not reached an agreement in principle on the terms and conditions of the transfer on or before August 15, 1997, to issue, within 30 days from that date, a formal recommendation with regard to the appropriate terms and conditions of that transfer, as specified. The bill would provide for a formal mediation process if the director's recommendations are unacceptable to either the authority or the Metropolitan Water District of Southern California.

The bill would make legislative findings and declarations as to the extraordinary nature of the measure and the necessity for a special statute.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 875 (SB 1330) Lockyer. Solid waste: farm and ranch cleanup and abatement: grant program.

Existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, establishes an integrated waste management program.

This bill would require the board to establish, on or before January 1, 1999, a grant program for cities and counties for purposes of cleaning up and abating the effects of solid waste that is illegally disposed of on farm or ranch property. The bill would create the Farm and Ranch Solid Waste Cleanup and Abatement Account in the General Fund. The money in the account would include money appropriated from specified revenue sources, including specified tire recycling and used oil recycling fees. The use of those fees for purposes of the grant program would convert the fees to taxes, thereby imposing a state tax for purposes of Article XIII A of the California Constitution. The board would be authorized to expend the money in the account for the grant program upon appropriation by the Legislature in the annual Budget Act.

The bill would specify related matters.

Ch. 876 (AB 1485) Scott. Earthquake protection: reservoirs.

(1) Under existing law, the Alquist-Priolo Earthquake Fault Zoning Act, the State Geologist is required to delineate appropriately wide earthquake fault zones, as prescribed.

Existing law provides for the regulation and supervision of dams and reservoirs by the state, and imposes prescribed requirements relating to the construction of new dams and reservoirs.

This bill would make a legislative finding and declaration that the San Marino High School in Los Angeles County is located near a specified fault and would prohibit the San Gabriel County Water District from enlarging or constructing any water storage facility system that is uphill of, and within 1,000 feet of, the school unless the Division of the Safety of Dams of the Department of Water Resources certifies in writing that the facility complies with those provisions relating to the regulation and supervision of dams and reservoirs, including the construction of new dams and reservoirs.

The bill would require, in the event that the division approves an application for approval of the water storage facility without requiring substantive changes in the design of the facility, the City of San Marino and the San Marino Unified School District to jointly reimburse the water district for the full amount of the application filing fee. By imposing that new duty on the city and school district, the bill would impose a state-mandated local program.

The bill would state that its provisions are applicable to the enlargement or construction of any water storage facility system, including any enlargement or construction that commenced prior to January 1, 1998. The bill would specify that any decision or certification made by the Division of Safety of Dams pursuant to those provisions shall be final and not subject to judicial review, unless it is determined by clear and convincing evidence that the decision or certification was arbitrary and capricious.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 877 (AB 524) Cunneen. Education: Life Sciences and Conservation Education Project of 1998.

(1) Existing law expresses a legislative finding and declaration that, throughout the state and nation, there is a growing public awareness of serious environmental and resource use problems facing mankind, and that the citizens of the State of California expect the educational institutions of this state to equip students with the knowledge and attitudes necessary to develop solutions to these problems.

This bill would revise that legislative finding and declaration so that it would state that there is a growing public awareness of the benefits derived from a healthy environment and a healthy economy and that the citizens of the State of California expect the educational institutions of this state to provide students with educational materials that are balanced and objective in their coverage of the current scientific and economic

research on environmental and ecological issues to enable students to better address and assess environmental issues as we enter the 21st century.

(2) The Endangered Species Education Act of 1989, which, by its own provisions, became inoperative on June 30, 1995, and was repealed on January 1, 1996, consisted of a statewide competition in which each public elementary and junior high school in the state was encouraged to adopt an endangered species from its locale, to design projects to educate the community about threats to the endangered species, and to develop a plan for local community action to preserve the species' habitat. The act required the Superintendent of Public Instruction to administer the project, as specified.

This bill would establish the Life Sciences and Conservation Education Project of 1998, which would consist of a statewide competition similar to that established in the Endangered Species Education Act of 1989, in which each public elementary school and junior high school or middle school in the state attended by pupils in grade 6, 7, or 8 would be encouraged to begin a classroom project to educate fellow pupils and the community about the various benefits that specific local wildlife species, rivers, creeks, wetlands, or other natural resources provide the local community, and to develop a plan for cooperative action to resolve the identified impacts in order to conserve the natural resource. The Superintendent of Public Instruction would be required to administer this project, as specified.

These provisions would become inoperative on June 30, 2001, and as of January 1, 2002, would be repealed, unless a later enacted statute, which becomes effective on or before January 1, 2002, deletes or extends the dates on which it becomes inoperative and is repealed. These provisions would not become operative unless and until the Superintendent of Public Instruction certifies, in writing, to the Secretary of State that sufficient funds for its implementation have been appropriated in the annual Budget Act or other legislation.

Ch. 878 (AB 595) Brown. Metropolitan Transportation Commission: tax: motor vehicle fuel.

(1) Under existing law, the Metropolitan Transportation Commission is created to provide comprehensive regional transportation planning for the 9-county region comprising the commission's jurisdiction. Generally, the commission is responsible for planning, approving, and carrying out various transportation-related activities within the region, including functions pertaining to highways, toll bridges, ferries, and transit systems, and the allocation of state funds and toll bridge revenues to local agencies and transit operators within the region.

This bill would, in addition, authorize the commission to impose a tax on the privilege of selling within the region motor vehicle fuel, as defined, excluding motor vehicle fuel used to power aircraft. The bill would require the commission to adopt a regional transportation expenditure plan for the revenues derived from the tax, if it is imposed. The tax would be levied at a rate established by the commission, but not exceeding 10¢ per gallon.

The bill would impose a state-mandated local program by requiring, upon the request of the commission, the board of supervisors of each county and city and county within the region to submit to the voters at a local election consolidated with a statewide primary or general election specified by the commission a measure, adopted by the commission, authorizing the commission to impose the tax commencing on January 1 of the year following the election approving the tax, for a 20-year period. The bill would require the commission to reimburse each county and city and county in the region for the cost of submitting the measure to the voters. The bill would provide that these costs shall be reimbursed from revenues derived from the tax if the measure is approved by the voters and from any available funds of the commission if the measure is not approved.

This bill would provide that the board of supervisors may elect not to submit the measure to the voters if it submits an alternative countywide transportation funding measure to the voters at the same election.

The commission would be authorized to impose the tax upon approval of the measure by the voters within the region at the election.

The bill would require the commission to contract with the State Board of Equalization to administer the tax.

The bill would also authorize the commission, upon voter approval, to issue limited obligation bonds.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new program or higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

Ch. 879 (AB 776) Baca. Pupil attendance.

Existing law subjects each person between the ages of 6 and 18 years who is not otherwise exempt, to compulsory full-time education. Existing law excuses pupils from school for justifiable personal reasons, including, among others, appearance in court, attendance at a funeral service, and observance of a holiday or ceremony of the pupil's religion. Existing law also provides that the governing board of a school district, that has children holding work permits to work temporarily in the entertainment or allied industries and therefore are exempt from attending public full-time day school, or a county superintendent of schools, may contract with any person, firm, or corporation responsible for the education of those children, to provide eligibility lists and placement services for qualified teaching and other necessary personnel for tutoring of those children while they are employed.

This bill would require a pupil who holds a work permit to work for a period of not more than 5 consecutive days in the entertainment or allied industries to be excused from school during the period that the pupil is working in the entertainment or allied industry for a maximum of up to 5 absences per school year. The bill would also require a pupil to be excused from school in order to participate with a not-for-profit performing arts organization in a performance for a public school pupil audience, as specified. The bill would require a school district to permit those pupils to complete all assignments and tests missed during the absence that can be reasonably provided and, upon satisfactory completion, to give full credit therefor, as specified. The bill would require that a pupil who is excused from school while working in the entertainment or allied industry receive instruction during the period of the absence from a studio teacher certified, as specified, during specified hours of the day, and would authorize a pupil to be enrolled in a work experience program, as specified.

By imposing new duties or a higher level of service upon school districts and school employees, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 880 (SB 517) Haynes. Nuisance: shooting ranges.

Existing law provides that nothing done or maintained under the express authority of a statute can be deemed a nuisance.

This bill would exempt a person who operates or uses a sport shooting range, as defined, from civil liability, injunction, or criminal prosecution with respect to noise or noise pollution if the person complies with the laws in operation at the time the sport shooting range was approved for use, or if there were no such laws in effect at that time, except as specified.

Ch. 881 (AB 10) Ducheny. Housing: Farmworker Housing Grant Fund.

Under existing law, the Department of Housing and Community Development administers the Farmworker Housing Grant Program. Existing law establishes the Farmworker Housing Grant Fund and continuously appropriates this fund to the

department to make specified grants for farmworker housing and to defray the department's costs in administering the program. These grants may be made to local public entities and nonprofit corporations for the construction or rehabilitation of housing for agricultural employees, as defined, and their families and of related support facilities, among other purposes.

This bill would provide that a household deemed eligible by the United States Department of Agriculture, under a specified federal rural housing loan program, on the basis of the household's ratio of housing costs to household income shall be deemed eligible for a grant pursuant to the Farmworker Housing Grant Program notwithstanding the Department of Housing and Community Development's calculation of the ratio of housing costs to income utilizing different and additional housing cost factors.

This bill would allocate \$3,000,000 appropriated by the Budget Act of 1997, to the Department of Housing and Community Development from the General Fund to the Farmworker Housing Grant Fund for the purposes set forth in the Farmworker Housing Grant Program, thus making an appropriation, and would place a limit of \$270,000 per fiscal year on the use of the appropriated funds to pay for administrative costs related thereto.

The bill also would allocate \$1,000,000 appropriated by the Budget Act of 1997, to the Department of Housing and Community Development from the General Fund to the Farmworker Housing Grant Fund, thus making an appropriation, for the establishment of two demonstration programs, as specified, that finance the acquisition, construction, or rehabilitation of housing that provides farmworkers with affordable, durable, low-maintenance housing options. The bill would require the Department of Housing and Community Development to submit a specified report on or before January 1, 1999, and each January thereafter, on the administration and implementation of the program.

The bill would authorize the Department of Housing and Community Development to waive specified requirements contained in existing provisions of the program and regulations adopted thereunder that are inconsistent with prompt and effective implementation of the demonstration programs.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique circumstances relating to unemployment within the cities in the above-named counties that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

Ch. 882 (AB 381) Takasugi. Hepatitis B: schools: immunizations.

Existing law requires that children be immunized against certain diseases prior to admission to certain educational and other institutions, including, but not limited to, immunization against hepatitis B for all children entering these institutions at the kindergarten level or below on or after August 1, 1997.

This bill would, in addition, require immunization against hepatitis B for all students unconditionally entering, or unconditionally advancing to, the 7th grade level at these institutions on or after July 1, 1999. By expanding the duties of county health officers and other local governmental entities, including schools, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 883 (AB 549) Wildman. Postsecondary education institutions: health services.

(1) Existing law specifies that certain services that are provided by a "local educational agency," which is defined as the governing body of any school district, the county office of education, or a state special school, are covered Medi-Cal benefits.

This bill would specifically authorize a community college district, a California State University campus, or a University of California campus to bill for services provided to any student, regardless of age, who is a Medi-Cal recipient.

(2) This bill would incorporate additional changes in Section 14132.06 of the Welfare and Institutions Code proposed by AB 1294 to be operative only if both bills are enacted and become operative on or before January 1, 1998, and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 884 (AB 847) Wayne. Discarded major appliances: materials requiring special handling; hazardous waste.

(1) Under existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, materials that require special handling, as defined, are required to be removed from major appliances, as defined, and from vehicles in which they are contained prior to crushing for transport or transferring to a baler or shredder for recycling.

Existing law prohibits the management of hazardous waste, except in accordance with hazardous waste laws. A violation of the hazardous waste control laws is a crime.

This bill would revise the definition of materials that require special handling, and provide that any person who removes from a major appliance any material that requires special handling that is a hazardous waste is a hazardous waste generator. The bill would require such a person to comply with the provisions regulating hazardous waste generators and require those materials to be managed in accordance with the hazardous waste control laws, thereby imposing a state-mandated local program by creating a new crime.

The bill would require the Department of Toxic Substances Control, or the local health officer or public officer authorized to enforce the hazardous waste control laws, including when applicable, a certified unified program agency, to incorporate the regulation of materials that require special handling that are hazardous wastes into existing inspection and enforcement activities to ensure compliance with the bill's requirements, thereby imposing a state-mandated local program by imposing new duties upon local agencies.

The bill would require the department to transmit a copy of the Appliance Recycling Guide, published by the board, and any other materials determined by the department to be necessary to ensure compliance with the bill, to specified persons and agencies.

The bill would make related legislative findings and declarations and prescribe related matters.

The bill would require any hazardous material that becomes a hazardous waste when released or removed from a major appliance to be managed pursuant to requirements that would be imposed by this bill.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 885 (AB 963) Keeley. Youth: crimes: violence.

Existing law requires the Office of Criminal Justice Planning to provide local agencies and community organizations financial and technical assistance for activities related to suppression of gang violence. Existing law requires the Board of Corrections to award

grants, as specified, to counties pursuant to the Juvenile Crime Enforcement and Accountability Challenge Grant Program.

This bill would require the Department of Justice to administer the California Gang, Crime, and Violence Prevention Partnership Program, as specified. The bill would require the department to disburse any appropriated funds to community organizations and nonprofit agencies for prevention and intervention activities for at-risk youth, as specified.

The bill would appropriate \$3,000,000 from the General Fund to the Department of Justice to implement the program.

Ch. 886 (AB 1188) Lempert. Budget Act of 1997: augmentations.⁶

Existing law, as set forth in the Budget Act of 1997, makes various appropriations for support of state government for the 1997–98 fiscal year.

This bill would make certain appropriations for that purpose, in augmentation of the Budget Act of 1997. The appropriations made by this bill would include \$178,973,000 to fund designated public elementary and secondary education programs, \$10,600,000 to fund designated community college purposes, \$3,429,000 to fund designated resources projects, \$200,000 to the California Science Center to fund a study on Exposition Park, and \$3,000,000 to fund stationary source air pollution control activities.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 887 (AB 1198) Hertzberg. “311” Nonemergency Telephone System Pilot Project.

(1) Existing law, the Warren-911-Emergency Assistance Act, establishes the number “911” as the primary emergency telephone number for use in the state and imposes a surcharge on intrastate telephone communication service to pay for the administration of the “911” emergency telephone number system and related costs.

This bill would make legislative findings and declarations relating to the abuse and misuse of the number “911” for nonemergency calls, and the need to implement procedures to limit the use of the “911” system to true emergencies, and to provide citizens with an alternative phone system for nonemergencies. The bill would state the purpose of the pilot program, and would require the Division of Telecommunications of the Department of General Services to conduct a pilot program including the use of a “311” telephone number as a means of reaching public safety agencies for nonemergency assistance and improved marketing of the use of and access to existing nonemergency telephone numbers for nonemergency assistance, to be implemented as soon as practicable, but in no event later than July 1, 1998. The bill would authorize the division to select one or more appropriate locations for the pilot program, in consultation with the local government entities affected. It would further require the division to assess the effectiveness of the pilot program based on specified factors and would require the division to submit a report to the Governor and the Legislature on the results of the pilot program by July 1, 1999.

(2) Existing law establishes the State Emergency Telephone Number Account in the General Fund, pursuant to which funds derived from a surcharge imposed on amounts paid by every person in the state for intrastate telephone communication service may be appropriated by the Legislature for specified purposes.

This bill would authorize payment of costs associated with the pilot program from the State Emergency Telephone Number Account, and would appropriate the sum of \$200,000 from the account to the Division of Telecommunications of the Department of General Services for implementation of the pilot program.

(3) The bill would declare that the provisions relating to the establishment of the pilot program shall remain in effect until January 1, 2000.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 888 (AB 1213) Miller. Contractors’ State License Board: home improvement contractors.

The Contractors’ State License Law defines a home improvement contractor as a licensed contractor who is engaged in the business of home improvement either full time or part time.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the Contractors' State License Board, on or before January 1, 1999, to establish a certification program for home improvement contractors, as specified, and would prohibit a contractor, on and after July 1, 2000, from engaging in the business of home improvement or provide home improvement goods or services unless the contractor is certified as a home improvement contractor. The bill would repeal these provisions on January 1, 2004.

Ch. 889 (AB 1587) Committee on Budget. Education finance. ⁷

(1) Under existing law, the Legislature is required to provide for a system of common schools.

This bill would appropriate \$10,224,000, as follows:

(a) The sum of \$750,000 from the General Fund to the Superintendent of Public Instruction for allocation to the California Museum Foundation in the 1997-98 fiscal year for educational purposes, as specified.

(b) The sum of \$500,000 from the General Fund to the Superintendent of Public Instruction for allocation, as specified, in the 1997-98 fiscal year, for the purpose of the after-school youth violence prevention, as specified, for the San Diego Unified School District, the Sweetwater Union School District, the Vista Unified School District, and the South Bay Unified School District.

(c) The sum of \$50,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Lodi School District in the 1997-98 fiscal year for a central coordinator to recruit and train mentors in the establishment of a "Job Shadowing" program, as specified.

(d) The sum of \$250,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the Napa Valley Unified School District for the Napa County Regional Occupational Center program, as specified.

(e) The sum of \$10,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the Los Angeles Unified School District for extended learning programs as specified, at the Telfair Elementary School.

(f) The sum of \$1,500,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Indian Education Centers Program in the 1997-98 fiscal year, as specified.

(g) The sum of \$1,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to school districts in the 1997-98 fiscal year to ensure children's safety on school playgrounds and reduce playground injuries by upgrading, refurbishing, or replacing school playgrounds and playground facilities.

(h) The sum of \$800,000 from the General Fund to the Superintendent of Public Instruction in the 1997-98 fiscal year for allocation to a local education agency for the development of an English language development exam, as specified.

(i) The sum of \$2,273,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to school districts for school libraries, as specified.

(j) The sum of \$1,646,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the San Joaquin County Office of Education for educational and operational costs for the Professional Development Center; technology training for teachers, pupils, and support staff; and reading and mathematics projects.

(k) The sum of \$100,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the St. Helena Unified School district for costs associated with the establishment of an agricultural center at St. Helena High School.

(L1) The sum of \$395,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the Lompoc Unified School District for the Cabrillo High School Aquarium expansion project.

(m) The sum of \$450,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the Burbank Unified School District for technology modernization at John Muir Middle School.

(n) The sum of \$500,000 from the General Fund to the Los Angeles Unified School District for planning and site preparation for the New California Center for Culture, Education, and Economic Development.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 890 (SB 413) Peace. Health: nonprofit hospitals.

Existing law provides for the licensure of health facilities, including general acute care hospitals, by the State Department of Health Services, and makes the violation of its provisions subject to criminal sanction.

Existing law requires any nonprofit corporation that is subject to the public benefit corporation law and is a health facility, as defined, to obtain the written consent of the Attorney General prior to entering into certain agreements or transactions involving the health facility's assets.

This bill would prohibit any board member of a nonprofit corporation, that is subject to the requirement of obtaining the Attorney General's consent, who negotiates the terms and conditions of a sale or transfer of assets to a for-profit corporation or entity or a mutual benefit corporation from receiving any salary, compensation, payment, or other form of financial remuneration from the for-profit corporation or entity or the mutual benefit corporation. The bill would exempt from this prohibition any reimbursement or payment made to a member of the board of directors, who is a physician or other health care provider, for the provision of direct patient care services to patients, provided that prescribed conditions are satisfied. By creating a new requirement in the provisions governing health facilities, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The bill would authorize, after 2 years following the close of the sale or other transfer of assets, a person who was a member of the board of directors of the nonprofit corporation who is prohibited from receiving any remuneration from the for-profit corporation or entity or mutual benefit corporation to enter into usual and customary business transactions with that for-profit corporation or entity or mutual benefit corporation if prescribed conditions are met. The bill would also authorize any person who is a member of management of the nonprofit corporation and who presents information or opinions to the board regarding the sale or transfer of assets that are relied upon, or considered by, any of the board members in making decisions regarding the sale or transfer, to make a written affirmative declaration that he or she will not work for or receive any form of remuneration from the for-profit corporation or entity or the mutual benefit corporation in the future. In making any decision regarding the sale or transfer of assets it would prohibit the board from substantially relying on any information presented by any person who does not make this written affirmative declaration.

The bill would exempt from this prohibition any person whose only role in the transfer or sale is to provide exclusively factual data, as described, to the nonprofit corporation.

The bill would also authorize the board of directors to contract with certain independent professionals to review and evaluate information and advice presented by an employee regarding a proposed sale or transfer, and would require that any director who substantially relies on any information and advice provided by such an independent professional be deemed to have not violated the provision prohibiting the board from relying on any information presented by any person who is authorized to make a written affirmative declaration that he or she will not work for the for-profit corporation or the mutual benefit corporation in the future and has not made this declaration.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 891 (SB 1325) Mountjoy. Vehicles.

Existing law requires specified conditional sale contracts for the sale of motor vehicles to contain specified disclosures and limits the amount of the disclosed finance charges. However, existing law provides that the limits do not apply to contracts in which the

finance charge or a portion thereof is determined by the simple-interest basis and the amount financed, as specified, is more than \$1,650.

This bill would increase the exempted amount from more than \$1,650 to more than \$2,500.

Ch. 892 (SB 73) Kopp. Civil procedure: cross-examination of experts: settlement offers: financing statements.

(1) Existing law provides that if a settlement offer made by a defendant is not accepted and the plaintiff fails to obtain a more favorable judgment, the plaintiff shall not recover his or her costs and shall pay the defendant's costs from the time of the offer. Furthermore, costs incurred by the defendant are required to be deducted from any damages awarded the plaintiff; and if those costs exceed the damages awarded the plaintiff, a judgment for the net amount shall be awarded to the defendant; and, for these purposes, a plaintiff in a cause of action not based on tort is not deemed to have obtained a more favorable judgment unless the judgment obtained by the plaintiff, exclusive of attorney's fees and costs, exceeds the settlement offer made by the defendant.

This bill would, among other things, eliminate the latter provision described above relating to causes of action not based on tort and would exclude postoffer costs from the calculation of whether a plaintiff obtains a more favorable judgment. This bill would also make these provisions applicable to settlement offers made in disputes to be resolved by arbitration, except as specified.

(2) Existing law specifies that the proper place to file a financing statement in order to perfect a security interest is the office of the Secretary of State, with certain exceptions.

This bill would make various changes to provisions relating to the effect of the filing of security interests and financing statements.

(3) Existing provisions of the Commercial Code govern letters of credit. Chapter 176 of the Statutes of 1996 repealed and replaced those provisions.

This bill would make additional conforming changes, and would repeal an obsolete provision relating to letters of credit.

(4) Existing law does not permit cross-examination of an expert witness on the contents of texts, treatises, journals, or similar publications unless the witness has referred to, considered, or relied upon the publication in forming his or her opinion, or the publication has already been admitted in evidence.

This bill would permit cross-examination of expert witnesses on the contents of a publication if it has been established as a reliable authority.

(5) Existing law prohibits trial court delay reduction rules from requiring shorter deadlines than those specified and permits exceptions for longer periods of time, as specified.

This bill would revise the provision requiring that longer periods of time be granted for service of the complaint in specified circumstances.

(6) Existing law, the Uniform Supervision of Trustees for Charitable Purposes Act, applies to all charitable corporations and trustees holding property for charitable purposes over which the state or the Attorney General has enforcement or supervisory powers, but does not apply to the United States, any state, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or to any of their agencies or governmental subdivisions, to any religious corporation or officer, director, or trustee of a religious organization that holds property for religious purposes, to a cemetery corporation, to a committee, as defined, or to a charitable corporation organized and operated primarily as a religious organization, educational institution, hospital, or a health care service plan.

This bill would provide that the filing, registration, and reporting provisions of the Uniform Supervision of Trustees for Charitable Purposes Act do not apply to the entities specified above.

This bill would incorporate additional changes in Section 68616 of the Government Code proposed by SB 19, to be operative if SB 19 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

Ch. 893 (SB 161) Greene. Schools.

(1) Existing law makes it a crime to enter a schoolbus or school pupil activity bus without prior authorization of the driver or other school official with intent to commit any crime and then refusing to disembark after being ordered to do so by the driver or other school official. Existing law will be repealed on January 1, 1998, as part of a technical Education Code reorganization statute.

Existing law operative January 1, 1998, reorganizes portions of the Education Code by repealing various parts of the Education Code and reenacting them in new parts, chapters, and articles.

This bill would reenact the existing law with no changes and renumber it consistent with the technical Education Code reorganization statute. This bill would also repeal and add various sections of the Education Code with no substantive changes to complete the reorganization of the Education Code that is operative on January 1, 1998.

(2) This bill would provide that it is to be construed as a restatement and not as a new enactment.

Ch. 894 (SB 512) Committee on Insurance. Department of Insurance: audits.

Existing law imposes a tax, as specified, upon the gross premiums of insurers and provides for the processing and auditing of tax returns by the Department of Insurance.

This bill would appropriate \$907,595 from the General Fund to the Department of Insurance for the purpose of funding, for the 1997-98 fiscal year, the tax return processing and tax audit duties of the Department of Insurance.

The bill would also declare that it would take effect immediately as an urgency statute.

Ch. 895 (AB 460) House. Veterinary medicine: licensure: commercial poultry industry.

Existing law provides that it is generally unlawful for any person to practice veterinary medicine or any branch thereof in this state unless at the time of so doing, the person holds a valid, unexpired, and unrevoked license issued by the Veterinary Medical Board. Existing law sets forth various licensing requirements to practice veterinary medicine, including the passage of a California licensing examination, unless an applicant meets certain criteria. These licensing provisions require applicants to pay examination and licensing fees that are collected by the board and credited to the Veterinary Medical Board Contingent Fund, a continuously appropriated fund. Violation of the law relative to veterinary medicine is subject to criminal sanction.

This bill would permit the board to issue a license for the practice of veterinary medicine related to the commercial poultry industry to any applicant who fulfills requirements prescribed by the bill and would require the board to show cause when it denies an application for such a license. The bill would not require an applicant for a license for the practice of veterinary medicine in the commercial poultry industry who fulfills the prescribed requirements to pass a California licensing examination. The bill would also provide that if, after receiving a license pursuant to these provisions, a licensee's full-time employment is discontinued by either the licensee or his or her employer, the licensee's employer and the licensee would be required to notify the board of the change in the licensee's employment status. Violation of this requirement would be a crime, thereby imposing a state-mandated local program. Additionally, the bill would require the board to terminate the license if the licensee practices veterinary medicine outside the employer's interest. Since the bill would authorize an increase in the amount of moneys in the Veterinary Medical Board Contingent Fund, it would, thereby, make an appropriation.

The bill would require the board to report to the Legislature by July 1, 1999, on all licenses granted pursuant to its provisions and would repeal its provisions on January 1, 2000.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 896 (SB 1048) Sher. Coastal conservancy: San Francisco Bay Area Conservancy Program.

Existing law establishes the State Coastal Conservancy and requires the conservancy to implement and administer various programs intended to preserve, protect, and restore the state's coast.

This bill would establish the San Francisco Bay Area Conservancy Program, administered by the conservancy, for the purpose of addressing specified resource and recreational goals for the San Francisco Bay area in a coordinated, comprehensive, and effective way. The bill would authorize the conservancy to undertake projects and award grants to achieve those goals. The bill would specify criteria for giving projects priority. The bill would require the conservancy to cooperate with cities, counties, and districts, the San Francisco Bay Conservation and Development Commission, other regional governmental bodies, nonprofit land trusts, and other interested parties in identifying and adopting long-term resources and outdoor recreational goals for the San Francisco Bay area. The bill would require any acquisition of real property by the conservancy pursuant to those provisions to be from willing sellers. The bill would require the conservancy, at least biennially, to report to the Legislature on its progress in addressing goals, priority areas, and concerns under the program. The bill would create the San Francisco Bay Area Conservancy Program Account in the State Coastal Conservancy Fund, for the purpose of depositing and disbursing funds for the administration and implementation of the program, as specified. The bill would require the money in the account to be segregated into 2 subaccounts, as prescribed.

The bill would prescribe related matters.

Ch. 897 (SB 673) Karnette. Water quality: contaminated sediment.

Existing law prohibits the State Water Resources Control Board and the California regional water quality control boards from granting approval for a dredging project that involves the removal or disturbance of sediment that contains pollutants at or above certain sediment quality objectives unless certain requirements are met. Existing law establishes the California Coastal Commission and grants to that commission specified duties relating to coastal protection.

This bill would require the commission and the Los Angeles Regional Water Quality Control Board to jointly establish and participate in the multiagency Los Angeles Basin Contaminated Sediments Task Force, as specified, and to develop, based on the recommendations of the task force, a long-term management plan for the dredging and disposal of contaminated sediments in coastal waters adjacent to the County of Los Angeles, as prescribed. The bill would require the commission and that regional board to seek to enter into an agreement with specified federal agencies to participate in the preparation of the long-term management plan, and would require the commission and the regional board, on or before January 1, 1999, to prepare and submit to the Legislature a report indicating the status of that agreement.

The bill would appropriate, from the General Fund, \$100,000 to the commission and \$100,000 to the state board, for allocation to the regional board, for each of 5 fiscal years, commencing with the 1997-98 fiscal year, for the preparation of the plan.

Ch. 898 (AB 699) Migden. Redevelopment: Treasure Island Conversion Act of 1997.

Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities in order to address the effects of blight, as defined, in those communities. Under existing law, in any community in which a military base is located and the federal Base Closure Commission has voted to close that military base, and the action of the commission has been sustained by the President and Congress of the United States, a project area may be adopted by a city or county pursuant to the Community Redevelopment Law if the project area is located entirely within the boundaries of a city, or entirely within the unincorporated area of a county, respectively.

This bill would state that these provisions also would be applicable to a local government that is a city and county where the military base, closed pursuant to those provisions, is located entirely within the boundaries of a city and county.

This bill also would establish the Treasure Island Conversion Act of 1997, which would authorize the City and County of San Francisco by resolution, to designate the Treasure Island Development Authority and any successor entity thereof as the redevelopment agency with all of the rights, powers, privileges, immunities, authorities, and duties granted to a redevelopment agency pursuant to the Community Redevelopment Law for the purpose of acquiring, using, operating, maintaining, converting, and redeveloping Naval Station Treasure Island, as described, and to be considered a redevelopment agency for all purposes under state law.

The bill would grant the Treasure Island Development Authority the complete power, among other things, to administer and control the trust property, as defined, in conformance with the public trust for commerce, navigation, and fisheries over all affected former and existing tide and submerged lands, subject to specified restrictions and subject to specified duties and responsibilities of the State Lands Commission in connection therewith. The bill additionally would state the intent of the Legislature that, among other things, its provisions provide a means for mitigating the serious economic effects of the closure of the Naval Station Treasure Island on the City and County of San Francisco, its surrounding communities, and the State of California by vesting a single entity with redevelopment authority over that property and, with respect to that portion of the affected property subject to the public trust for commerce, navigation, and fisheries, the power to administer the trust as specified in its provisions.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique circumstances within the City and County of San Francisco relating to the closure of Naval Station Treasure Island, that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

Ch. 899 (AB 1429) Shelley. Water quality.

Existing law establishes the State Water Resources Control Board in the California Environmental Protection Agency for the orderly and efficient administration of the water resources of the state.

This bill would require the state board, to the extent that funds are available for that purpose, to prepare, and complete on or before January 1, 2000, an inventory of existing water quality monitoring activities within state coastal watersheds, streams, bays, estuaries, and coastal waters, as prescribed.

The bill would require the state board, to the extent that funds are available for that purpose, and not later than July 1, 2001, to prepare and submit to the Legislature a report that proposes the implementation of a comprehensive program to monitor the quality of state coastal watersheds, streams, bays, estuaries, and coastal waters and their marine resources for pollutants, as prescribed.

The bill would prescribe related matters. The bill would make related legislative findings and declarations and statements of legislative intent.

Ch. 900 (AB 584) Villaraigosa. Transportation: Los Angeles County Metropolitan Transportation Authority: inspector general: code of conduct.

(1) Existing law requires the Los Angeles County Metropolitan Transportation Authority to appoint an inspector general.

This bill would require the authority to appoint the inspector general to a term of office of 4 years, subject to removal from that office only under specified circumstances.

(2) Existing law requires the Los Angeles County Metropolitan Transportation Authority to adopt and implement an ordinance for the regulation of lobbying, to include specified minimum provisions.

This bill would prescribe a code of conduct for the board of the authority and would create a state-mandated local program by imposing additional duties on a local governmental entity.

(3) Existing law authorizes the appointment of alternate members to the Los Angeles County Metropolitan Transportation Authority.

This bill would delete that authorization and would make related changes in existing law.

(4) This bill would provide that certain provisions of the bill restricting the receipt of contributions by authority board members would not become operative if SB 89 is enacted and becomes operative on or before January 1, 1998.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 901 (AB 130) Battin. Vehicles: driving under the influence: penalties.

(1) Existing law requires that any person convicted of a violation of specified provisions prohibiting driving under the influence of alcohol or drugs, or both alcohol and drugs, driving with an excessive blood-alcohol concentration, or driving when addicted to any drug be punished by imprisonment in the state prison, or by a specified term in the county jail, and by specified fines.

This bill would provide that a person is guilty of a felony or misdemeanor if the described offense of driving-under-the-influence occurred within 10 years of specified prior offenses that were punished as felonies, as specified.

The bill would make conforming changes in related provisions of law.

Because the bill would create a new crime, it would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 902 (AB 152) Morrow. Victim's rights: notification.

(1) Existing law, as amended by initiative statute, provides that the victim of any crime, or his or her parents or guardians if the victim is a minor, or the next of kin if the victim has died, has the right to attend all sentencing proceedings and shall be given adequate notice by the probation officer of all sentencing proceedings concerning the defendant. This existing law also provides that the victim, or up to 2 of the victim's parents or guardians if the victim is a minor, or the next of kin of the victim if the victim has died, has the right to appear, personally or by counsel, at the sentencing proceeding and to reasonably express his or her views, as specified. The initiative statute provides that any amendment of its provisions by the Legislature shall require a $\frac{2}{3}$ vote of the membership of each house.

This bill additionally would provide that, where the defendant is subject to an indeterminate sentence, the victim or other persons to whom these provisions apply may have their statements simultaneously recorded and preserved by means of videotape, videodisc, or any other means of preserving the statement. Because it would amend the initiative measure, the bill would require a $\frac{2}{3}$ vote.

(2) Existing law requires that the Board of Prison Terms give at least 30 days' notice of any hearing to set, postpone, or rescind a parole release date of a prisoner under a life sentence to the prosecutor of the county from which the prisoner was committed.

Existing law, amended by initiative statute, sets forth certain enumerated rights of victims of crimes, including the right of members of the victim's immediate family to appear at any parole eligibility hearing subject to the discretion of the board in a specified order of preference. The initiative statute provides that any amendment of its provisions by the Legislature shall require a $\frac{2}{3}$ vote of the membership of each house.

This bill would require the board to consider statements from members of the victim's immediate family in deciding whether to release the prisoner on parole. This bill also would provide to the prosecutor, victim, and other persons covered by these provisions

the right to appear before the board by means of videoconferencing, as defined, if videoconferencing is available at the hearing site. Because it would amend the initiative measure, this bill would require a $\frac{2}{3}$ vote.

Ch. 903 (AB 761) McClintock. Youths: juvenile court proceedings.

Existing law authorizes the issuance of subpoenas to require witnesses to attend wardship hearings of a juvenile court.

This bill would require the court to use whatever means are appropriate, including the issuance of subpoenas, to require the parents of a minor, as specified, who is a subject of a detention, jurisdictional, or disposition hearing to attend those proceedings, as specified.

Ch. 904 (AB 1223) Strom-Martin. Public park and recreational facilities: employees and volunteers: criminal record requests: fees.

Existing law prohibits a city, county, city and county, or special district from hiring a person for employment, or hiring a volunteer to perform services, at specified park and recreational facilities, in a position having supervisory or disciplinary authority over any minor, if the person has been convicted of certain criminal offenses. Existing law authorizes the local agency to screen a prospective employee or volunteer for their criminal background by requesting from the Department of Justice records of all convictions and of any arrests pending adjudication involving those specified offenses. Existing law authorizes the department to charge a fee for the actual cost of processing such a request, excepting nonprofit organizations.

This bill would require any local agency request for department records to be on a form approved by the department and would prohibit the department from charging any fee to the local agency for requesting the records of a prospective volunteer pursuant to those provisions.

The bill would require that, if SB 720 is enacted and becomes effective on January 1, 1998, any fees that are charged a local agency for requesting the records of a prospective volunteer who will perform services at a county or city or city and county or special district operated park, playground, recreational center, or beach used for recreational purposes in a position having supervisory or disciplinary authority over any minor, pursuant to specified provisions of that bill that would fund local programs that enhance the ability of local law enforcement to provide fingerprint identification, to be waived.

Ch. 905 (SB 90) Sher. Energy resources: renewable energy resources: funding.

(1) Existing law requires that specified revenues collected by electrical corporations, from a nonbypassable charge for the creation and operation of an Independent Power Exchange, be transferred to a subaccount of the Energy Resources Program Account administered by the State Energy Resources Conservation and Development Commission, to be held until further action of the Legislature, to be used for purposes relating to the creation and development of specified renewable resource electricity generation technologies.

This bill would require those revenues collected by electrical corporations for renewable resource technologies to be deposited instead in the Renewable Resource Trust Fund, which the bill would create, and into accounts in the trust fund, which the bill would create. The bill would continuously appropriate that money to the commission and prescribe the purposes for which it may be expended, subject to a determination by the commission of the eligibility of awards, and to certification by the commission. The bill would prescribe related matters.

The bill would require that funds transferred to the commission for purposes of public interest research, development, and demonstration be transferred to the Public Interest Research, Development, and Demonstration Fund, which the bill would create, as specified.

The bill would establish the Public Interest Energy Research, Demonstration, and Development Program for the purpose of making awards for public interest energy research, development, and demonstration projects or programs that are not provided for by competitive and regulated markets. The bill would prescribe procedures for the development, implementation, and administration of the program, as specified. The bill

would require the commission, not later than January 1, 1999, to designate a panel of independent experts with special expertise in public interest research, development, and demonstration programs to conduct a comprehensive evaluation of the program, as provided, and would require the panel to submit specified reports to the Governor and to the Legislature on implementation of the program. The bill would impose various requirements pertaining to legislative oversight and legislative committee approval of implementation of the program.

(2) Existing law specifies that, in recognition of statutory authority and past investments existing as of December 20, 1995, and subject to a specified fire wall, the obligation to pay the uneconomic costs of specified energy generation-related assets and obligations shall not apply to specified irrigation districts, water districts, water storage districts, municipal utility districts, and other water agencies, as provided.

This bill would authorize the Lower Tule River Irrigation District to request an allocation from the commission pursuant to a specified provision that exempts certain irrigation districts from the obligation to pay specified uneconomic costs of an electrical corporation's generation-related assets and obligations, if the district complies with specified requirements.

(3) Existing law authorizes the imposition of specified standby charges for standby electricity generation, transmission, and distribution facilities to private energy producers that employ other than a conventional power source for the generation of electricity.

This bill would, to recognize the potential for microgeneration facilities to enhance reliability, power quality, and to provide other demonstrable benefits to the electric transmission or distribution system, require an electrical corporation, as defined, until June 30, 2000, to waive the otherwise applicable standby charge for each eligible customer, as defined, in accordance with specified requirements.

Ch. 906 (SB 438) Johnston. High Technology Theft Apprehension and Prosecution Program: asset forfeiture: telecommunications devices.

(1) Existing law provides for the forfeiture of a defendant's assets, including computers, computer systems, computer networks, or software, if those assets were used in the commission of specified computer crimes. Existing law also makes it a misdemeanor to unlawfully use a telecommunications device intending to avoid the payment of any lawful charge for service to the device.

This bill would include telecommunication devices within the list of defendant's assets subject to forfeiture and would include the offense of unlawfully using a telecommunications device intending to avoid the payment of any lawful charge for service to the device within the list of offenses for which forfeiture of assets may be sought. By increasing the penalties which may be imposed for an existing crime, this bill would impose a state-mandated local program.

(2) This bill would create the High Technology Theft Apprehension and Prosecution Program, effective until January 1, 2000, to provide financial and technical assistance to law enforcement and district attorneys' offices in order to combat high technology crime.

The bill would establish the High Technology Theft Apprehension and Prosecution Program Trust Fund to fund programs to enhance the capacity of local law enforcement and prosecutors to deter, investigate, and prosecute high technology-related crimes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 907 (SB 526) Hayden. Youth Authority: tattoo removal.

The existing Youth Authority Act provides for the detention and confinement of youthful offenders by the Department of the Youth Authority.

This bill would require the Department of the Youth Authority to purchase 2 medical devices that utilize a laser to remove a tattoo from a person's skin and to place one in Los Angeles County and one within any of specified San Francisco Bay area counties, selected as specified in conjunction with the Office of Criminal Justice Planning and if

SB 980 of the 1997–98 Regular Session is enacted, the Peace Process Task Force. This bill would appropriate \$250,000 from the General Fund for purposes of the purchase and would require the department to report to the Legislature on this program by March 1, 2000.

Ch. 908 (SB 853) Schiff. Firearms.

Existing law provides for various crime prevention programs, including a statewide domestic violence program and a gang violence suppression program.

This bill would establish a 4-year pilot project to implement a local law enforcement program in the County of Fresno and the County of Los Angeles to confiscate illegal firearms. The bill would require the Department of Justice, in consultation with the appropriate law enforcement agency in the participating county, to prepare and submit to the Governor and the Legislature by January 1, 2002, a report evaluating the success of the pilot project.

The bill would appropriate \$198,000 from the General Fund to the Department of Justice for the 1997–98 fiscal year to implement the pilot project.

Ch. 909 (SB 1050) Alpert. Youth.

Existing law authorizes the juvenile court to adjudge a person who is under 18 years of age a ward of the court when the person is habitually disobedient or truant or when the person has violated any law defining a crime.

This bill would authorize the board of supervisors of any county to establish an At-Risk Youth Early Intervention Program designed to assess and serve families with children who have chronic behavioral problems, as specified. The bill would authorize the referral of a minor who is at least 10 years of age to a Youth Referral Center, as specified, for implementation of a written service plan. The bill would also specify the jurisdiction of the juvenile court in these cases.

The bill would appropriate \$2,000,000 to the County of San Diego for support of an At-Risk Youth Early Intervention Program, as specified.

Ch. 910 (SB 1195) Schiff. Minors: hearings.

(1) Existing law requires the probation officer, in any case in which a minor is alleged to have committed an act that would have been a felony if committed by an adult, to obtain a statement from the victim or specified persons and to include it in his or her report to the court for the disposition hearing. The probation officer is required to advise the victim or those persons as to the time and place of the disposition hearing. The victim or those persons may attend the disposition hearing and express their views.

This bill would require the probation officer to inform the victim, as defined, of the right to submit a victim impact statement and to include that statement in the officer's report for the disposition hearing and any fitness hearing. The bill would authorize the victim to attend fitness hearings. The bill would require the arresting agency and the district attorney to provide the victim with specified information and notice regarding the victim's rights to attend certain hearings and to obtain copies of court materials, subject to limitations relating to disclosure of those materials to unauthorized persons, as specified, in cases where minors have committed an act subject to a fitness hearing. The bill would make it a misdemeanor, punishable by a fine of up to \$500, to unlawfully disseminate materials provided by the court pursuant to this provision.

(2) Existing law requires the probation officer to investigate and submit a report on the behavioral patterns and social history of a minor being considered for a determination of unfitness.

This bill would require the probation officer to include in his or her report any written statement submitted by a victim and would require the court to consider the statement to the extent relevant to the determination of fitness.

(3) This bill would impose a state-mandated local program by creating a new crime and imposing new or increased duties on probation officers and district attorneys.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates

Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 911 (AB 62) McClintock. Local government organization.

Under the Cortese-Knox Local Government Reorganization Act of 1985, if the proposed change of organization is a city detachment, the conducting authority, not more than 30 days after its hearing on the matter, may by resolution terminate detachment proceedings. If a proposed reorganization includes the detachment of territory from any city, the conducting authority, not more than 30 days after the hearing, is required to terminate the proceeding if a resolution or written protest against the reorganization is filed prior to the conclusion of the hearing by any city from which territory would be detached or removed.

The bill would provide that the above provisions shall not apply to a special reorganization, as defined. It would specify the election requirements for a special reorganization, as well as the duties of the conducting authority with respect to a special reorganization.

This bill would establish the Special Commission on City Boundaries, known as the "special commission" for purposes of the act, and would set forth the membership and duties of the commission.

This bill would additionally provide that in the case of a special reorganization, all public employees subject to specified provisions of existing law relating to employee organizations shall continue to be deemed public employees of the original local agency, or the newly incorporated local agency for purposes of that existing law, and that existing retiree benefits shall not be diminished. The bill would also extend the exclusive representation status of an employee organization that has been recognized as the exclusive representative of local agency public employees affected by a special reorganization, with respect to the unit employees of the original local agency, or the newly incorporated local agency.

Ch. 912 (AB 572) Caldera. School Accountability Report Card.

(1) Under the Classroom Instructional Improvement and Accountability Act (Proposition 98), in order to promote a model statewide standard of instructional accountability and conditions for teaching and learning, the Superintendent of Public Instruction is required by March 1, 1989, to develop and present to the State Board of Education for adoption a statewide model school accountability report card that includes an assessment of specified school conditions. The Superintendent of Public Instruction is required to consult with a Task Force on Instructional Improvement in developing the statewide model school accountability report card. Under the act, the governing board of each school district is required to implement a school accountability report card for each school in the district that includes the conditions covered in the statewide model report card.

This bill would eliminate the obsolete requirement that the Superintendent of Public Instruction develop by March 1, 1989, in consultation with a Task Force on Instructional Improvement, a statewide model school accountability report card. The bill would provide that the school accountability report card shall provide data by which parents can make meaningful comparisons between public schools.

The bill would require that the school accountability report card also include, but not be limited to, the results by grade level from the assessment tool used by the school district and after it is developed, the statewide assessment, average verbal and math Scholastic Assessment Test scores, the one-year dropout rate, the percentage of pupils in kindergarten and grades 1 to 3, inclusive, participating in the Class Size Reduction Program, the total number of the school's credentialed teachers, the annual number of schooldays dedicated to staff development, and the suspension and expulsion rates for the most recent 3-year period. The bill, by adding conditions to the school accountability

report card, would require school districts to modify their school accountability report cards, thereby imposing a state-mandated local program. The bill would also express the Legislature's intent that schools make a concerted effort to ensure that parents receive a copy of the accountability report card, that the accountability report cards are easy to read and understandable, and that administrators and teachers are available to answer any questions regarding the report card.

(2) The Classroom Instructional Improvement and Accountability Act, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house.

This bill would declare that it furthers the purposes of the act.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 913 (SB 873) Vasconcellos. Pool safety.

Existing law requires public swimming pools to meet certain safety and sanitation requirements, including, but not limited to, the requirement that every person operating or maintaining a public swimming pool must do so in a sanitary, healthful, and safe manner. Existing law designates the State Department of Health Services as having supervision over these requirements, and requires every health officer, within his or her jurisdiction, to enforce building standards relating to swimming pools. Existing law makes violation of these requirements a misdemeanor.

Existing law requires all dry-niche light fixtures and all underwater wet-niche light fixtures operating at more than 15 volts in public swimming pools owned or operated by the state or by local agencies to be protected by a ground-fault circuit interrupter in the branch circuit, requires light fixtures to have encapsulated terminals, and requires any of these public swimming pools that do not meet these requirements as of January 1, 1997, to be retrofitted by July 1, 1998.

This bill would apply similar requirements relating to electrical lighting to public swimming pools operated for the use of the general public with or without charge, or for the use of the members and guests of a private club, including any swimming pool located on the grounds of a hotel, motel, inn, apartment complex, or any residential setting other than a single-family home. The bill would require public swimming pools that do not meet these requirements by January 1, 1998, to be retrofitted to comply by July 1, 1998, and would require inspections by September 1, 1998.

Existing law, the Swimming Pool Safety Act, establishes certain safety requirements for swimming pools, as defined, including nonportable wading pools, regarding pool enclosures and related safety equipment.

This bill would, commencing January 1, 1998, require that whenever a construction permit is issued for construction or alteration, as defined, of a public wading pool, as defined, the pool be constructed or retrofitted to have at least 2 circulation drains per pump at least 3 feet apart and comply with other safety requirements to prevent physical entrapment or suction injury. This bill would require all pools to comply with these standards by January 1, 2000. This bill would authorize the State Department of Health Services to adopt regulations regarding safety requirements for public wading pools to include, but not be limited to, standards permitting the use of alternative devices or safeguards, or incorporating new technologies. The bill would require the department to forward the regulations to the California Building Standards Commission for approval, and would require the commission to approve the regulations and publish them in the California Building Standards Code by November 1, 1999. By changing the definition of a crime, this bill would impose a state-mandated local program. By increasing the inspection duties of local officers, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 914 (SB 623) O'Connell. California State University.

Existing law designates the campuses of the California State University.

This bill would express the intent of the Legislature that the land and improvements comprising Camarillo State Hospital be transferred to the Trustees of the California State University to be developed and improved as a campus of the California State University in order to make public postsecondary education more available to qualified persons in the Ventura County area as well as throughout the state.

The bill would require the Department of General Services to transfer the land and improvements to the trustees, upon approval of the trustees. The bill would appropriate an amount not to exceed \$5,000 from the General Fund to the Department of General Services to reimburse the department for its administrative costs incurred in connection with the transfer. The bill would authorize the trustees to sell and lease interests in real property included within the land comprising Camarillo State Hospital that are not needed for campus purposes, except as specified. The bill would require the proceeds from the sale or lease to be deposited in local trust accounts. The bill would require that those funds be continuously appropriated without regard to fiscal year for the purpose of building, maintaining, and funding a campus of the California State University in Ventura County at the site of Camarillo State Hospital. The bill would require the trustees to report to the Governor and the Legislature by September 1 of each year on the revenues obtained from sales and leases made pursuant to these provisions and the expenditures made based upon those revenues during the prior fiscal year.

The bill would require these provisions to be liberally construed to accomplish the intent of the Legislature.

The bill would appropriate \$607,000 from the Higher Education Capital Outlay Bond Fund of 1996 to the California State University, in augmentation of a specified item of the Budget Act of 1997 relating to the California State University, Channel Islands.

Ch. 915 (SB 394) Johnston. School-to-career opportunities: job training funds.

(1) Existing law provides for allocation of certain federal Job Training Partnership Act funds to the Superintendent of Public Instruction for distribution to school districts, county offices of education, community college districts, and other entities for adult education, regional occupational programs, and other related programs serving welfare recipients, as specified.

This bill would require the Superintendent of Public Instruction to use 30% of certain funds available under the federal Job Training Partnership Act to support the work-based learning component of a school-to-career program, as specified.

The bill would provide for a specified privacy notice to be issued by local education agencies to participants in various work force preparation programs with regard to collection of social security numbers in order to enable the measurement of the performance of those programs, thereby creating a state-mandated local program.

The bill would express legislative intent that the Governor request a waiver from the United States Department of Labor regarding certain federal restrictions that limit work experience under the summer youth employment and training program provided pursuant to the federal Job Training Partnership Act.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 916 (AB 690) Morrow. Child day care facilities: school extended day exemption.

Existing law, the California Child Day Care Facilities Act, provides a comprehensive system for licensing and regulating child day care facilities. Existing law exempts from the act certain day care arrangements, including, but not limited to, extended day care programs operated by public or private schools.

This bill would, in addition, as a 3-year pilot project in Orange County, authorize a public school or school district in Orange County to elect to have operated exempt from these licensing provisions, certain extended day care programs operated pursuant to a contract between the public school or a school district and the extended day care provider if the contracting school district ensures that certain requirements are met, and would require that the exempt extended day care programs comply with the fingerprint requirements applicable to school district noncertificated employees.

This bill would require that participating school districts ensure that an annual independent evaluation of the program is made and reported to the department and the Legislature by December 31. The provisions of the bill would be repealed on January 1, 2001.

Ch. 917 (AB 326) Ortiz. School-based before and after school child care programs.

Existing law requires the Superintendent of Public Instruction, subject to an appropriation in the annual Budget Act, to allocate funding for the establishment of school-based before and after school programs with a strong literacy component. Existing law authorizes a before and after school program, whether public, private, or school district operated, in collaboration with other local governmental agencies, to apply to the State Department of Education for funding for this purpose. In addition to meeting other program criteria, funded programs are required to demonstrate experience in implementing quality before or after school child development programs, inclusion of a strong literacy component, and a working collaboration with specified entities. Preference is required to be given to programs that currently employ recipients of CalWORKs who are parents of children enrolled in the applicant programs or that have a demonstrated commitment to providing employment opportunities for those recipients of CalWORKs. Funding is renewable and contingent on, among other things, a favorable evaluation.

This bill would specify the evaluation outcomes and measures of those outcomes. The bill would require the Superintendent of Public Instruction to allocate specified funds appropriated in the Budget Act of 1997 to before and after school programs for the purpose of initiating school-based before and after school programs with a strong literacy component.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 918 (AB 568) Lempert. Education: School Accountability Report Card.

(1) Existing law requires the governing board of each school district to develop and cause to be implemented for each school in the school district a School Accountability Report Card.

This bill would require each school district that is connected to the Internet to make the information contained in the School Accountability Report Card accessible on the Internet on or before July 1, 1998, and to update the report card information annually. The bill would make a related legislative finding and declaration and a statement of legislative intent.

By imposing additional duties on public schools, this bill would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 919 (AB 633) Cardenas. Small business financial development corporations.

The Small Business Financial Development Corporation Law provides for the establishment, under the supervision of the Trade and Commerce Agency, of small business financial development corporations to promote the economic development of small businesses by making available capital, general management assistance, and other resources.

This bill would require the Trade and Commerce Agency to contract with an entity to conduct an independent statewide assessment of capital needs in California, as they pertain to the program established under the Small Business Financial Development Corporation Law, and to establish minimum standards for the siting of new corporations, and determine and rank regions and subregions most underserved by the corporations, no later than June 30, 1998.

This bill would appropriate \$100,000 from the General Fund for transfer to the Small Business Expansion Fund to be used by the Office of Small Business for the purpose of this bill.

Ch. 920 (AB 874) Takasugi. Government finance.

(1) The Marks-Roos Local Bond Pooling Act of 1985 permits a joint exercise of powers authority to issue bonds to assist local agencies in financing public capital improvements, working capital, liability, or other insurance needs, or projects whenever there are significant public benefits for taking that action.

This bill would provide that no member of the governing body of the authority shall be personally liable on the bonds or subject to personal liability or accountability by reason of the issuance of bonds.

(2) Existing law specifies a procedure for school districts to provide funding to meet energy service contract obligations out of annual state apportionments to those districts. The procedure requires the Superintendent of Public Instruction to certify the amounts of districts' shares of the obligation, by district, to the Controller.

This bill would require the certification of amounts on a county basis and would change a reference to Section B of the State School Fund in that procedure to refer instead to Section A of the fund.

(3) Existing law authorizes the State Public Works Board to issue notes, including commercial paper notes and other forms of short-term indebtedness, and bond anticipation notes to finance energy conservation in state buildings.

This bill would provide that the proceeds of commercial paper notes are continuously appropriated to pay specified costs associated with commercial paper notes.

(4) Existing law authorizes the use of revenue bonds and negotiable notes or negotiable bond anticipation notes to finance the construction of the Equine Drug Testing Laboratory capital outlay project on the campus of the University of California at Davis, subject to specified conditions.

This bill would additionally specify that as an alternative to the issuance of bonds, notes, or other indebtedness by the Public Works Board, the Regents of the University of California may issue bonds, notes, or other indebtedness in order to finance the construction of the Equine Drug Testing Laboratory, provided that no moneys appropriated from the General Fund shall be used to secure or repay any of the indebtedness of the regents.

(5) Existing law requires the Controller to cancel a warrant if it is unpaid for 4 years after it becomes payable.

This bill would reduce that time period to one year and specify that the one-year time period applies to warrants issued after January 1, 1998.

(6) Existing law provides that a duplicate warrant is void if not presented to the Treasurer for payment within the same time limit provided by law for the original warrant.

This bill would instead provide that an agency that submits a claim schedule to the Controller's office that results in a warrant that is canceled because it is unpaid may submit a claim schedule against the fund to which the original warrant reverted for 2 years following cancellation of the original warrant, and would delete a reference to duplicate warrants.

(7) Existing law authorizes the Treasurer to revoke a payment or credit given to a presenting bank if the warrant or check involved is found to bear a forged, erroneous, or unauthorized endorsement or contain a material defect or alteration if the item is within a 4-year period of legal negotiability. Upon notification from the Treasurer that the state warrant has been charged back to the presenting bank, the Controller may issue a replacement warrant.

This bill would instead authorize the Treasurer to revoke a payment or credit under these conditions if no more than 3 years has elapsed since the time that the instrument was presented to the financial institution. This bill would provide that upon notification from the Treasurer that the warrant has been charged back to the presenting financial institution, the Controller may process a claim schedule directing payment to the original payee.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 921 (AB 989) Perata. Public accountancy.

(1) Existing law provides for the licensure and certification of public accountants. Existing law also provides that permits issued in accordance with provisions relating to accountancy expire at 12 p.m. on December 31, 1978, and thereafter shall expire at 12 midnight on the last day of the month of the legal birthday of the licensee during the 2nd year of a 2-year term if not renewed, and requires the State Board of Accountancy to establish by regulation procedures for the administration of the birth date renewal program.

This bill would eliminate the December 31, 1978, expiration date for these permits and would repeal the requirement that the board establish procedures for the administration of the birth date renewal program.

This bill, notwithstanding any other provision relating to public accountancy, would also authorize any firm lawfully engaged in the practice of public accountancy in this state to have owners who are not licensed as certified public accountants or public accountants if certain conditions are met. The bill would also require the Board of Public Accountancy to adopt regulations to implement, interpret, or make specific these provisions.

(2) Existing law requires that all moneys received by the board under the accountancy provisions from any source and for any purpose be accounted for and reported monthly by the board to the Controller and at the same time be transmitted to the State Treasury to the credit of the Accountancy Fund.

This bill would require the secretary-treasurer of the board, from time to time, but not less than once each fiscal year, to prepare, or have prepared on his or her behalf, a financial report of the Accountancy Fund that contains information that the board determines is necessary for the purposes for which the board was established.

This bill would also require the financial report of the Accountancy Fund to be published by the board, as specified, and to include the revenues and the related costs from examination, initial licensing, license renewal, citation and fine authority, and cost recovery from enforcement actions and case settlements.

Ch. 922 (AB 896) Napolitano. California Office of Export Development: Overseas Procurement Opportunities Program.

Existing law establishes the California Office of Export Development within the California State World Trade Commission for the purpose of strengthening the state's activities in marketing its agricultural, manufacturing, and service industries overseas, and sets forth the duties of the office in that regard.

This bill would additionally specify that a purpose of the office is to help ensure that California's small and medium-sized companies have better access to foreign market opportunities.

This bill would establish the Overseas Procurement Opportunities Program within the office, for the purpose of enhancing overseas procurement opportunities for California-based businesses, to include specified activities in that regard.

This bill would appropriate the sum of \$100,000 from the General Fund to the office, for the purposes of the bill.

Ch. 923 (AB 1219) Bustamante. Economic development.

Under existing law, the Trade and Commerce Agency is authorized to perform various activities related to the financing of public infrastructure projects and private economic development projects.

This bill would, until January 1, 2001, require the agency to solicit bids from entities to evaluate the feasibility of creating a secondary market for community and economic development lenders in this state to identify outstanding loans that purchased and serve as collateral for the issuance of bonds.

The bill would appropriate \$200,000 to the agency to carry out the bill.

Ch. 924 (AB 1230) R. Wright. Health: health care provider loans: Medi-Cal managed care.

Existing law establishes the Small Business Development Corporation Law which, among other things, authorizes loans to be made to small businesses.

This would require that consideration in the making of loans be given to applications from traditional and safety-net providers of Medi-Cal services that promote access to medical care for individuals enrolled in managed health care networks contracting with or owned or operated by counties. The bill would state related findings and declarations of the Legislature.

Existing law creates in the State Treasury the California Small Business Expansion Fund and the California Office of Small Business Development which may pay out moneys with the approval of the Department of Finance to lending institutions or financial companies to be used to pay for defaulted loan guarantees issued, as specified, and for administrative costs of corporations. Existing law also provides that the amount of loan guarantees outstanding at any one time shall not exceed 4 times the amount of funds on deposit, be secured by a reserve of at least 25% to be determined by the Executive Director of the California Office of Small Business, and that corporations secure loans with a minimum loan loss reserve of 25%.

Existing law also authorizes the Office of Small Business to reallocate funds held within a corporation's small business development loan guarantee fund if certain conditions are met and also requires that reallocation not occur more frequently than annually commencing January 1, 1997.

This bill would permit the office to authorize a higher leverage ratio, as described, for an individual corporation and would also provide that the reallocation shall occur no more frequently than once per fiscal year. Since the expansion fund is continuously appropriated, this would result in an appropriation.

This bill would declare that it shall take effect immediately as an urgency statute.

Ch. 925 (AB 1601) Shelley. Health care.

Under existing law the University of California is subject to the California Public Records Act and the meetings of the Regents of the University of California are subject to specified open meeting requirements.

This bill would state findings and declarations of the Legislature with regard to making information available to the public and conducting deliberations openly. The bill would provide that if any state agency, including a constitutional corporation, transfers to a private corporation assets for the operation of a hospital by that corporation and the value of the assets is not less than \$50,000,000 the corporation is subject to specified open meeting requirements and records of the corporation are to be available to the public for inspection, as specified. This bill would provide enforcement mechanisms to ensure compliance with these provisions. This bill would not apply to any corporation in a county of the 2nd class.

This bill would also make legislative findings and declarations that the directors, officers, and employees that are subject to these provisions would not be confronted with the type of conflicts of interest comprehended by the Political Reform Act of 1974, would have no opportunity to participate in the making of any governmental decisions, and would be pursuing the common interests of the members of the corporation, and as such, are not subject to regulation under the Political Reform Act of 1974 under the analysis of *In re Sherwood*, 2 FPPC Ops. 168 (12/15/76).

Ch. 926 (SB 936) Burton. Child support enforcement.

Existing law requires the State Department of Social Services to establish a performance-based incentive program that has 2 levels of incentives, Tier I and Tier II, and is operative until June 30, 1998, to provide federal and state incentive funds to county child support enforcement programs.

This bill would, instead, provide for a child support state incentive payment program, that would be applicable to counties meeting data reporting requirements. The bill would, as of July 1, 1998, require the department to assess each county's compliance with federal and state child support laws and regulations.

Existing law requires the department to compile prescribed information annually on each county child support enforcement program, to be provided to specified officials and governmental agencies.

This bill would require the department to compile other prescribed information, for the 1998–99 fiscal year and each fiscal year thereafter, on each county child support enforcement program for counties that are participating in the state incentive program. The bill would require the department, in consultation with specified entities and persons, to develop regulations regarding the reporting of data. These provisions would be operative for as long as participating counties are required to report data to the department, as provided in the bill.

Existing law requires the Office of the Legislative Analyst to conduct a study of the effectiveness, efficiency, and integrity of this performance-based incentive program, the department's regulations, and the operation of these processes at the state and county level, and to report its findings and recommendations for improvement, as appropriate, to the Legislature by March 1, 1997.

This bill would repeal this provision regarding the Legislative Analyst's report.

The bill would require the Office of Legislative Analyst, in conjunction with other entities, to prepare a performance-based incentive program for the 1998–99 fiscal year and subsequent fiscal years. The bill would require the Office of the Legislative Analyst to issue a report to the Legislature by March 1, 1998.

The bill would also provide that, to the extent funds are appropriated in the Budget Act, funds be allocated by the Judicial Council for the payment of certain costs including those related to child support commissioners and family law facilitators.

Ch. 927 (SB 1350) Burton. Health care.

Under existing law the University of California is subject to the California Public Records Act and the meetings of the Regents of the University of California are subject to specified open meeting requirements.

This bill would state findings and declarations of the Legislature with regard to making information available to the public and conducting deliberations openly. The bill would provide that if any state agency, including a constitutional corporation, transfers to a private corporation assets for the operation of a hospital by that corporation and the value of the assets is not less than \$50,000,000, the corporation is subject to specified open meeting requirements and records of the corporation are to be available to the public for inspection, as specified. This bill would provide enforcement mechanisms to ensure compliance with these provisions. This bill would not apply to any corporation in a county of the 2nd class.

This bill would also make legislative findings and declarations that the directors, officers, and employees that are subject to these provisions would not be confronted with the type of conflicts of interest comprehended by the Political Reform Act of 1974, would have no opportunity to participate in the making of any governmental decisions, and would be pursuing the common interests of the members of the corporation, and as such, are not subject to regulation under the Political Reform Act of 1974 under the analysis of *In re Sherwood*, 2 FPPC Ops. 168 (12/15/76).

Ch. 928 (AB 1571) Ducheny. Budget Act of 1997: augmentations.⁸

Existing law, as set forth in the Budget Act of 1997, makes various appropriations for support of state government for the 1997–98 fiscal year.

In augmentation of the Budget Act of 1997, this bill would appropriate \$662,488,000 for trial court funding, subject to the enactment of legislation that substantially restructures

NOTE: Superior numbers appear as a separate section at the end of the digests.

trial court funding, as specified. The bill would also revert the appropriations made by that act for trial court funding.

In addition, this bill would appropriate \$92,285,000 for purposes including trial court funding, commercial space development, public resources, flood prevention, citizenship education, social services, public elementary and secondary education, public postsecondary education, and workers' compensation information.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 929 (SB 85) Peace. School districts: staff development.

(1) Existing law authorizes school districts to conduct various staff development programs. Existing law authorizes school districts to make school development plans, and to include in those plans staff development activities directly related to the annual school improvement objectives, as specified. Existing law authorizes school districts to offer up to 8 days of staff development during the school year under specified circumstances.

Existing law, known as the Staff Development Buy-out Program, declares the intent of the Legislature to increase the number of schooldays in a school year by providing funding to school districts to conduct staff development activities, as specified. Existing law requires the Superintendent of Public Instruction to provide each eligible school district with a staff development allowance of \$220 per day for each certificated employee of the school district who participates in staff development, as provided by the school district in academic content and instructional methods in the core curricular areas. To be eligible to receive funding, the staff development program provided by the school district is required to meet, among other specified requirements, local educational priorities, to be consistent with program guidelines developed by the Superintendent of Public Instruction, to be offered on days that are not counted as instructional time or days, and to be conducted only upon entering or exiting a regularly scheduled break. This provision is operative in any fiscal year only to the extent funds are provided therefor in the Budget Act. With regard to the 1997-98 fiscal year, the bill would specify that the amount available for this purpose not exceed the amount appropriated in a specified item of the Budget Act of 1997.

This bill would require that the provision requiring that staff development days be conducted only upon entering or exiting a regularly scheduled break be effective commencing on July 1, 1998.

(2) Under the Staff Development Buy-out Program, each fiscal year, any school district that does not offer 180 days of instruction to pupils in the fiscal year prior to the first fiscal year in which grant funds were received by that school district under the program, is required to increase the number of days of instruction by one day for each noninstructional day on which the school district conducts staff development programs under the program until a total of 180 days of instruction to pupils are being offered by that school district, as specified.

This bill would make this provision applicable to schoolsites, operating on multitrack, year-round calendars, that did not offer the equivalent, as defined, of 180 days of instruction to pupils.

(3) Existing law requires school districts to notify parents or guardians of pupils of the schedule of minimum days, as specified.

This bill would impose a state-mandated local program by also requiring school districts to notify parents or guardians of pupils of the schedule of pupil-free staff development days. The bill would also require a school district to provide the parents or guardians of pupils with a copy of the written policy of the school district regarding access by pupils to Internet and on-line sites, as specified.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 930 (SB 172) Rainey. Vessels: wrecks and wrecked property.⁹

(1) Under existing law relating generally to vessels, if wrecked property is in a perishable state, the county sheriff is required to apply to the judge of the superior court for an order authorizing the sheriff to sell the property. Existing law requires the proceeds to be paid to the county treasurer, and if it remains in the treasurer's hands more than one year, to the State Treasury.

This bill would require the proceeds to be transmitted to the Treasurer for deposit in the General Fund.

(2) Existing law provides that if any person claims wrecked property within one year after it is found, the judge is required to make an order directing the officer in whose possession the property or its proceeds may be, to deliver it to the claimant, as specified.

This bill would reduce that period to 90 days.

(3) Existing law requires the sale of wrecked property if, within one year after saving the wrecked property, no claimant appears, or in other specified circumstances. Under existing law, the proceeds of the sale, after deducting court-approved salvage and expenses, are required to be paid into the State Treasury.

This bill would reduce that period to 90 days. The bill would also require the deduction of storage, property tax liens, other liens, and other expenses from the proceeds of the sale and would require the proceeds of the sale to be transmitted to the Treasurer for deposit in the General Fund.

(4) Existing law authorizes the sale of any hulk, derelict, wreck, or parts of any ship, vessel, or other watercraft sunk, beached, or allowed to remain in an unseaworthy or dilapidated condition upon publicly owned submerged lands, salt marsh, or tidelands within corporate limits of any municipal corporation or other public corporation or entity having jurisdiction or control over those lands, for a period longer than 30 days without a watchman or other person in charge of the property. Existing law specifies that the proceeds of the sale are the property of the municipal corporation or other public corporation or entity.

This bill, instead, would require the proceeds to be transmitted to the Treasurer for deposit in the General Fund.

(5) Existing law authorizes specified peace officers and other persons to remove vessels from public waterways and private property under certain circumstances.

This bill also would authorize the storage of vessels removed under prescribed circumstances, including when it poses a threat to adjacent wetlands, levies, sensitive habitat, any protected wildlife species, or water quality.

The bill would authorize the sale or other disposal of property of less than \$300 value by the public agency that removed it under specified conditions, and would require the proceeds to be deposited into the Abandoned Watercraft Abatement Fund, which would be created by the bill, for grants to local agencies, as specified.

(6) Existing law prohibits any person from abandoning a vessel upon a public waterway or public or private property without the express or implied consent of the owner or person in lawful possession or control of the property. Under existing law, a violation of this prohibition is an infraction and is punishable by a fine of not less than \$50.

This bill would increase that fine to not less than \$500 nor more than \$1,500. The bill would prescribe a formula for the allocation of fines imposed and collected pursuant to this provision. The bill would prescribe the purposes for which moneys in the Abandoned Watercraft Abatement Fund may be used upon appropriation.

(7) The requirements imposed upon judges and peace officers by the bill would impose a state-mandated local program.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(9) The bill would require the Controller to transfer \$500,000 from the Harbors and Watercraft Revolving Fund to the Abandoned Watercraft Abatement Fund and would appropriate that amount to the Department of Boating and Waterways for prescribed purposes. In addition, the bill would appropriate \$500,000 from the Harbors and Watercraft Revolving Fund to the City of Redwood City for cleanup of abandoned, wrecked, and dismantled vessels, as specified.

The bill would also declare the intent of the Legislature to appropriate not more than \$1,000,000 annually from the Harbors and Watercraft Revolving Fund and that grants from the fund be matched by not less than a 10% contribution from local agency grantees.

Ch. 931 (AB 920) Davis. California Forensic Science Laboratory Enhancement Program.¹⁰

Existing law requires the Office of Criminal Justice Planning, among other things, to develop the comprehensive statewide plan for the improvement of criminal justice and delinquency prevention activity throughout the state, and to develop comprehensive, unified, and orderly procedures to ensure that all local plans and all state and local projects are in accord with the comprehensive state plan, and that all applications for grants are processed efficiently.

Existing law provides for the establishment of the California Criminalistics Institute within the Bureau of Forensic Services of the Department of Justice for the purpose of, among other things, the facilitation of a comprehensive and coordinated approach to meet the high technology forensic science needs of crime laboratories operated by the department and local law enforcement agencies.

This bill would require the State Auditor to conduct a specified assessment of the needs of existing forensic science laboratories and submit a report to the Legislature on the needs assessment by January 1, 1999. The bill would also appropriate \$275,000 to the State Auditor to conduct the needs assessment required by this act.

Ch. 932 (SB 820) Polanco. Industry Internship and Apprenticeship Program.

Existing law requires the California Community Colleges, as a primary mission, to offer academic and vocational instruction at the lower division level for both younger and older students, including those persons returning to school.

This bill would authorize the Board of Governors of the California Community Colleges, to the extent that funds are available, to establish internship training programs and to actively support apprenticeship training programs in collaboration with the State Department of Education and the Division of Apprenticeship Standards of the Department of Industrial Relations. The bill would limit the authority to establish internship training programs to the establishment of internship training programs for only those occupations not covered by an approved apprenticeship training program prior to January 1, 1998.

In addition, the bill would require the Division of Apprenticeship Standards, in partnership with the State Department of Education and the California Community Colleges, and to the extent federal funds and other resources are available, to develop and implement innovative apprenticeship training demonstration projects in high-growth industries in emerging and transitioning occupations that meet local labor market needs and that are validated by current labor market data and to submit a report not later than December 31, 1998, to the Governor and the Legislature containing a summary of educational and vocational outcomes resulting from these projects, as specified.

Ch. 933 (AB 301) Cunneen. Community colleges: part-time faculty: student access.

Under existing law, the Board of Governors of the California Community Colleges is required to establish regulations that establish minimum standards regarding the percentage of hours of credit instruction required to be taught by full-time instructors. Existing law permits the governing board of a community college district to establish regulations that allow academic employees to reduce their workload from full-time to

NOTE: Superior numbers appear as a separate section at the end of the digests.

part-time duties. Existing law does not establish a program providing for part-time faculty office hours.

This bill would establish the California Community Colleges Part-Time Faculty Office Hours Program to provide students equal access to academic advice and assistance without regard to whether a course at a community college is taught by a full-time or a part-time faculty member.

The bill would authorize community college districts to provide compensation to be paid to part-time faculty at an amount equal to one paid office hour for every two classes or more taught per week by the part-time faculty member or 40% of a full-time load as defined by the local community college district. The bill would create the Part-Time Faculty Office Hours Program Fund in the State Treasury to provide funding for up to 50% of the costs to community college districts for the program as verified by the district, as specified. The bill would require each participating community college district to send verification to the Chancellor of the California Community Colleges setting forth the total costs of the compensation paid for office hours of part-time faculty participating in the program. The bill would declare that it is the intent of the Legislature that funding for the purposes of this program be included in the annual Budget Act.

Ch. 934 (AB 351) Scott. Teacher credentialing.

Existing law authorizes the Commission on Teacher Credentialing (commission) to issue or renew emergency teaching or specialist permits provided certain conditions are met. Existing law requires a person holding an emergency teaching or specialist permit to attend an orientation to the curriculum and to techniques of instruction and classroom management, and to teach only with the assistance and guidance of a certificated employee of the district who has completed at least 3 years of full-time teaching experience or the equivalent thereof. Existing law requires the commission to issue district intern certificates authorizing persons employed by any school district that maintains kindergarten and grades 1 to 12, inclusive, or that maintains classes in bilingual education to provide classroom instruction to pupils in those grades and classes. Existing law, the Teacher Education Internship Act of 1967, authorizes a school district, in cooperation with an approved college or university to establish a teacher education internship program.

This bill would establish the Pre-Internship Teaching Program, and authorize the commission as resources, as specified, are available to school districts, to issue a pre-intern teaching certificate instead of an emergency multiple subjects permit to an individual who meets the minimum requirements set by the commission. The bill would authorize the commission, when resources remain after funding pre-interns pursuing a multiple subject emergency credential, to issue a pre-intern teaching certificate instead of an emergency single subject permit to an individual who is employed by a school district approved by the commission and meets the minimum requirements set by the commission. A pre-intern teaching certificate would be valid for one year and would be renewable, as specified. The minimum requirements for the pre-intern teaching certificate would be required to include a baccalaureate or higher degree, as specified, passage of the basic skills proficiency test, and a specified number of units in the subject to be taught.

This bill would require the commission to establish criteria for the approval of pre-internship teaching programs, as specified. This bill would require the commission to evaluate the Pre-Internship Teaching Program, as specified, and report its findings to the Legislature and the Legislative Analyst by October 1, 2001.

This bill would provide that funding for administering the Pre-Internship Teaching Program by the commission is contingent upon an appropriation in the annual Budget Act or other act. The bill would state the intent of the Legislature that specified federal funding provided to the State Department of Education and the Commission on Teacher Credentialing be adjusted to provide direct funding for the Commission on Teacher Credentialing for the purposes of the Pre-Internship Teaching Program and the California Paraprofessional Teacher Training Program. The bill would declare that the State Department of Education shall be held harmless for any fiscal penalty exacted by the federal government for the expenditures made by local education agencies or for state operations if funds are provided for this program from the federal Goals 2000:

Educate America Act (P.L. 103-227) and the program does not meet the requirements of that federal act.

Ch. 935 (AB 367) Havice. Education: Community Policing and Mentoring for School Safety Pilot Program.

Existing law establishes various programs with respect to the safety of pupils attending the public schools.

This bill would express various findings and declarations of the Legislature relating to community policing, as defined. The bill would establish the Community Policing and Mentoring for School Safety Pilot Program, to be administered by the State Department of Education. Under the program, the Superintendent of Public Instruction would award 2-year grants to the ABC Unified School District and the Downey Unified School District, implementing plans providing for a continuum of responses to school safety needs by the employees of the school districts and by local law enforcement agencies and demonstrating a collaborative and innovative approach for implementing a system of providing safe and secure school environments between the school districts and local law enforcement agencies through community policing, as specified. The bill would require the State Department of Education to create an evaluation design. The school districts receiving grants under the bill would use the evaluation design to assess the effectiveness of their programs. These school districts would transmit their assessments to the department, and the department would submit an interim report and a final analysis of the program to the Legislature on or before March 1, 2000, and March 1, 2002, respectively.

The bill would express the intent of the Legislature that the pilot program be funded by a combination of funds from the state and from the school districts and law enforcement agencies, as specified. The bill would provide that the operation of the program would be contingent upon the enactment of an appropriation therefor in the annual Budget Act, or through an appropriation contained in another measure enacted during the 1997-98 Regular Session.

Ch. 936 (AB 748) Escutia. Bilingual education: assessment of language skills.

Existing law establishes the Bilingual-Bicultural Education Act of 1976 (act), which became inoperative on June 30, 1987. Existing law specifies that if the Legislature does not enact legislation to continue that act, among other acts, the funding for the bilingual-bicultural program shall continue for the general purposes of the program but all relevant statutes and regulations regarding the use of the funds are not operative except those regarding the establishment of a schoolsite council and its functions and responsibilities. The act specifies that its purposes are to require school districts to offer bilingual learning opportunities to each pupil of limited English proficiency enrolled in the public schools and to provide adequate supplemental financial support to achieve that goal.

This bill would require the Superintendent of Public Instruction to review existing tests that assess the English language development, as specified, of pupils whose primary language is a language other than English and to determine if those tests, among other things, have sufficient range to assess, as specified, the English language development of pupils in kindergarten and grades 1 to 12, inclusive, provide sufficient information about pupils at each grade level to determine levels of proficiency, have psychometric properties of reliability and validity deemed adequate by technical experts, are capable of administration to pupils with any primary language other than English are capable of administration by classroom teachers, and yield scores that allow comparison of a pupil's growth over time, can be tied to readiness for various instructional options, and can be aggregated for use in the evaluation of program effectiveness. If any existing test or series of tests meets these criteria, the bill would require the superintendent, with approval of the State Board of Education, to report to the Legislature on its findings and recommendations. If no suitable tests exist, the bill would require the superintendent to explore the option of a collaborative effort with other states to develop a test or series of tests and would authorize the superintendent, with approval the State Board of Education, to contract with a local education agency to develop a test or series of tests or to contract to modify an existing test or series of tests. The bill would require the

superintendent to identify or develop the test or series of tests by January 1, 1999, and to report, as specified, to the Legislature on the progress being made in that regard.

This bill would require the State Board of Education to approve standards, as specified, for English language development for pupils whose primary language is a language other than English.

This bill would provide that funding for the purposes of this measure is contingent on an appropriation in the annual Budget Act.

Ch. 937 (AB 1266) Mazzoni. Teachers: beginning teacher support.

Existing law makes various findings and declarations relating to the need for support during the beginning years of a teacher's career. Existing law establishes the California Beginning Teacher Support and Assessment Program to be administered jointly by the Commission on Teacher Credentialing (commission) and the Superintendent of Public Instruction (superintendent). Existing law provides that among the purposes of the program are providing an effective transition into the teaching career for 1st-year and 2nd-year teachers in California and improving the educational performance of pupils by providing improved training, information, and assistance for beginning teachers.

This bill would redesignate that program as the Beginning Teacher Support and Assessment System. The bill would expand the program to, among other things, require that it provide intensive individualized support and assistance to each beginning teacher, to require that it establish performance assessments that are based on the California Standards for the Teaching Profession adopted by the commission in January 1997, to require an individual induction plan for each beginning teacher, and to ensure continuous program improvement, as specified.

The bill would require the superintendent and the commission to jointly administer the Beginning Teacher Support and Assessment System and to, among other things, establish requirements for reviewing and approving local induction plans, developing and administering a system for ensuring program quality and effectiveness, improving and refining the assessment system, and improving and refining professional development materials and strategies for all personnel involved in implementing teacher induction programs.

The bill would require the superintendent and the commission to establish requirements for teacher induction programs operated by school districts or consortiums of school districts. School districts and consortiums of school districts would be eligible to receive \$3,000, as adjusted for inflation, in state aid for each participating beginning teacher, provided certain requirements are met, including that the school district or consortium of school districts provide not less than \$2,000 from amounts received for the Mentor Teacher Program or other local, state, or federal resources for each participating beginning teacher. By authorizing school districts to expend amounts received for the purposes of the Mentor Teacher Program for these new purposes, this bill would make an appropriation.

The bill would require the superintendent and the commission to award supplemental grants on a competitive basis to Beginning Teacher Support and Assessment System teacher induction programs that are identified as having expertise according to criteria established by the superintendent and the commission. The teacher induction programs would be required to expend those funds to assist clusters of teacher induction programs operated by school districts or consortiums of school districts. All school districts and consortiums of school districts participating in the Beginning Teacher Support and Assessment System would be required to be designated as belonging to clusters according to the criteria established by the superintendent and the commission based upon, but not necessarily be limited to, geographic proximity, program size, the number of beginning teachers served, the similarity of teacher characteristics, and pupil populations in each school district. Teacher induction programs awarded supplemental grants would be required to identify a program consultant to assist the school district or consortiums of school districts identified in a cluster. The superintendent and the commission would be required to identify the purpose and functions of each consultant, as specified. The superintendent and the commission would be required to ensure that each grant awarded supports the salary and benefits and other related costs for a consultant to assist each cluster, as specified.

The bill would limit state funding for participation in the Beginning Teacher Support and Assessment Program by specified credentialed teachers to 2 years, or until the teacher has met state expectations for successful completion of teacher induction, whichever occurs first, and to one year by interns who are participating in a specified credentialing program, either during or after completion of the internship, or until the intern has successfully met state expectations for successful completion of teacher induction, whichever occurs first.

The bill would make various declarations of legislative intent with respect to funding of the Beginning Teacher Support and Assessment System, including that the system be funded in the annual Budget Act, as specified.

Ch. 938 (AB 1475) Bordonaro. Space industry.

Existing law designates the Western Commercial Space Center, a nonprofit corporation, as the California Spaceport Authority to foster the development of support and other unique services required for the development of commercial launch, manufacturing, and academic and research operations related to space flight, and sets forth the various duties of the authority in that regard.

This bill would repeal these provisions and would instead provide that the California Space and Technology Alliance shall exist to foster the development of specified activities in California related to space flight, would specify that the alliance shall also function as the California Spaceport Authority, and would set forth the duties of the alliance in that regard. It would provide for the California Space Flight Competitive Grant Program, to provide funding, upon appropriation by the Legislature, for the development of activities in California related to general space flight. It would require the alliance to establish an impartial review panel comprised of technical and scientific experts to review grant applications, as specified, and would set forth the duties of that review panel.

This bill would authorize the alliance to establish an advisory committee to provide input, evaluation, program funding recommendations, and other recommendations on the grant program, and would specify the committee membership.

This bill would establish the Highway to Space Program. It would specify that the Western Commercial Space Center, a nonprofit corporation, shall be charged with promotion and coordination of entities choosing to participate in the program, and set forth the duties of the center in that regard. It would establish the Highway to Space Competitive Grant Program, to provide funding, upon appropriation by the Legislature, for the development of Highway to Space Program activities. It would require the center to establish an impartial review panel comprised of technical and scientific experts to review grant applications, as specified, and would set forth the duties of that review panel.

This bill would authorize the center to establish an advisory committee to provide input, evaluation, program funding recommendations, and other recommendations on the grant program, and would specify the committee membership.

Ch. 939 (SB 1026) Schiff. Teachers' retirement benefits.

The State Teachers' Retirement Law requires the annual transfer to the Supplemental Benefit Maintenance Account from the General Fund of 2.5% of the total of prior year salaries upon which member contributions to the retirement system are based for funding supplemental benefits. Existing law expresses legislative intent in establishing the Supplemental Benefit Maintenance Program, to manifest a contractually enforceable promise to fully repay the Teachers' Retirement Fund, with interest, for all the advances made therefrom and for any appropriation made in Item 1920-111-835 of the Budget Act of 1989 and otherwise reserves the right of the Legislature to reduce or terminate the state's contributions and supplemental benefit distributions.

This bill would require General Fund transfers for the 1998-99 fiscal year to be reduced by specified state interest in school lands from the sale of the Elk Hills Naval Petroleum Reserve and would make technical, nonsubstantive changes in that provision.

Existing law requires revenues from school lands at Elk Hills Naval Petroleum Reserve to be deposited in the School Land Bank Fund and interest earnings to be transmitted

to the Teachers' Retirement Fund for distribution by the Supplemental Benefit Maintenance Account.

This bill would require those revenues to be deposited in the Supplemental Benefit Maintenance Account.

Existing law provides that the proceeds of the Supplemental Benefit Maintenance Account shall be distributed annually in quarterly supplemental payments to retired members, disabled members, and beneficiaries to restore purchasing power up to 68.2% of the purchasing power of their initial monthly allowances and requires the Teachers' Retirement Board to make annual transfers from the Teachers' Retirement Fund to the Supplemental Benefit Maintenance Account to fund that benefit.

This bill would increase that percentage to 75% of purchasing power, would authorize the board to make retirement fund transfers that are necessary to fund the increased percentage, would authorize the board to increase employer contributions, and would provide that the board reserves the right to reduce distributions to a level below 75% or to terminate distributions, depending upon availability of funds.

Ch. 940 (SB 1105) Committee on Revenue and Taxation. Taxation.

Existing law authorizes school districts and community college districts to form school facilities improvement districts that are coterminous with school district or community college district boundaries, except to the extent that any portion of the school district or community college district is located within a community facilities district formed pursuant to a specified statutory authorization. It also establishes procedures and requirements with respect to the issuance of bonds by any improvement district that is so established, and provides, as specified, for the levying of a tax upon properties within the improvement district for the funding of those bonds.

This bill would require the governing body of a school district or community college district that forms a school facilities improvement district to comply with the filing requirements established by a specified statute with respect to local agency jurisdiction boundary changes, and would require certain of those filings to indicate which properties located within the school district or community college district are located outside the improvement district.

Existing law requires the levying authority of a city or district, as provided, the levies of which are carried on county tax rolls, to file with the relevant county auditors and the State Board of Equalization a statement, and a map or plat, with respect to the creation of, or any change in, that city or district's boundaries. It requires the State Board of Equalization to establish a schedule of fees for filing and processing the filed documents, and prohibits the fee schedule from containing any fee that exceeds the lesser of the board's reasonably anticipated costs or an amount equal to 25% of the "total anticipated tax revenue" to be collected by the city or district during the first fiscal year in which the new boundaries are effective.

This bill would define the term "total anticipated tax revenue" for purposes of this prohibition.

Existing law with respect to the collection of ad valorem property tax revenues attributable to redevelopment agencies specifies that the agency share of ad valorem tax revenues derived from a redevelopment project is not allocable and payable for the first time until the tax year that begins after the January 1 next following the transmittal of documents as required by certain statutes.

This bill would change this date reference from January 1 to December 1.

Existing property tax law provides, for assessment years commencing after January 1985, for an inflation factor to be applied to the base year value of real property, and requires that inflation factor to be determined with reference to the change in the California Consumer Price Index from December of the prior fiscal year to December of the current fiscal year.

This bill would instead require, with respect to assessment years commencing on or after January 1, 1998, that the inflation factor be determined with reference to the change in the California Consumer Price Index from October of the prior fiscal year to October of the current fiscal year.

Existing property tax law allows persons who are either over 55 years of age or are severely and permanently disabled, as provided, to transfer the property tax base year

value of their home to a "replacement dwelling" of equal or lesser value that is located within the same county, and also authorizes, until January 1, 1999, a similar transfer of property tax base year value to a "replacement dwelling" located in any other county that has provided for these intercounty transfers. Existing law defines land constituting part of a "replacement dwelling" to include an "area of reasonable size that is used as a site for a residence," and defines this latter term to itself include all land if no portion of the property is used for commercial purposes, which do not include activities that are merely incidental to a residential use.

This bill would clarify the meaning of the term "area of reasonable size that is used as a site for a residence" to instead include all land if any nonresidential uses of the property are only incidental to residential use. This bill would also make other technical, nonsubstantive changes.

Existing property tax law with respect to supplemental assessments requires the assessor, commencing with the 1983-84 assessment year, to appraise property at its full cash value whenever a change in ownership occurs or actual physical new construction on the site of the property is completed. Existing law also requires, in the case in which "actual physical new construction" consists of the removal of a structure, that the new base year value of the remaining property be determined as provided in a specified statutory provision.

This bill would correct an error in the reference to that statutory provision.

Existing property tax law requires the assessor, upon request of the tax collector, to provide to the tax collector that information used to prepare that portion of the unsecured tax roll for which taxes are delinquent. Existing law requires a tax collector requesting this information to certify to the assessor that he or she needs this information for the enforcement of the "assessor's tax lien."

This bill would update this lien reference by deleting the word "assessor's."

Existing property tax law requires the State Board of Equalization to annually determine the value per acre of timberlands zoned under certain statutes by March 1 in accordance with a specified schedule, and requires the board to certify those values to county assessors by January 10 of each year.

This bill would instead annually require the State Board of Equalization to determine the value per acre of these timberlands by January 1, and to certify those values to county assessors by November 30.

Existing property tax law annually requires the assessor, upon or prior to the completion of the local tax roll, to either inform each assessee on certain tax rolls of the assessed value of subject property, or to inform each assessee of real property on the secured tax roll, the full value of which has increased from the prior year, of the assessed value of that property. It also requires the information provided under either of these options to include the full value of the subject property.

This bill would, commencing on January 1, 1999, eliminate the requirement that the information provided by the assessor, under either option, include the full value of the property, and would instead require that the information include the adjusted base year value of the property, compounded annually from the base year to the current year by the appropriate inflation factors, in the case in which a property's full value increases in accordance with that property's factored base year value over the market-based full value determined for the previous year. This bill would also make technical, clarifying changes. By imposing new duties upon county assessors in providing assessment information, this bill would impose a state-mandated local program.

Existing law requires that county assessors elected or appointed after January 1, 1997, hold a valid appraiser's certificate issued by the State Board of Equalization, and allows a newly elected or appointed assessor to exercise the powers and duties of the office if he or she acquires a temporary appraiser's certificate within 30 days of election or appointment.

This bill would conform existing property tax statutes with respect to the certification of appraisers to existing requirements with respect to assessors, and would make other technical, nonsubstantive changes.

Existing property tax law generally requires an application for reduction in assessment to be filed no later than September 15.

This bill would provide that an application for reduction in assessment that is mailed and postmarked on the next business day following September 15 shall be deemed timely filed in the case in which September 15 is a Saturday, Sunday, or a legal holiday, as defined.

Existing property tax law authorizes the board of supervisors of a county in which assessment appeals boards have been created to prescribe the period for the equalization of assessments made outside the regular assessment period. It also specifies assessments made pursuant to certain statutes as being among those assessments made outside the regular period.

This bill would delete an erroneous statutory reference from these specifications.

The Timber Yield Tax Law requires, subject to certain exceptions, that all revenues derived pursuant to that law be deposited in the Timber Tax Fund. It appropriates the money in that fund for, among other things, the reimbursement of the General Fund for moneys advanced for costs incurred by the State Board of Equalization in administering the Timber Yield Tax Law, including amounts identified and approved in subsequent fiscal years as approved in the annual Budget Act. It requires that $\frac{1}{2}$ of these amounts be reimbursed to the General Fund on November 30, and that the remaining $\frac{1}{2}$ be reimbursed to the General Fund on May 31.

This bill would instead require that $\frac{1}{2}$ of these amounts be reimbursed to the General Fund between November 1 and November 10, and that the remaining $\frac{1}{2}$ of these amounts be reimbursed to the General Fund between May 1 and May 10.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 941 (SB 542) Alpert. Property taxation.

The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975-76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. The California Constitution also excludes from the terms "purchased" and "change in ownership" the purchase or transfer of the principal residence of the transferor, or the purchase or transfer of the first \$1,000,000 of all other real property, in the case of a purchase or transfer between parents and their children, as defined by the Legislature.

Statutory law that implements this constitutional exclusion requires an application for the exclusion to be filed within certain specified time periods.

This bill would, except in the case in which the subject real property has been transferred to a 3rd party, allow the filing of an application for the exclusion after the conclusion of the filing periods currently specified by law. It would, in that case, apply any resulting exclusion commencing in the year in which the application is filed, and would require that the taxable value of the subject real property be set at the adjusted base year value of the subject real property in the year of purchase or transfer, adjusted for inflation and the value of any subsequent new construction. By imposing new duties upon local assessors in the processing of exclusion claims, this bill would impose a state-mandated local program.

Existing law permits persons over 55 years of age and persons who are severely and permanently disabled, as specified, to transfer the base year value of their home to a replacement home in the same county, and until January 1, 1999, authorizes the transfer of the base year value of a person's home in another county in certain circumstances.

This bill would additionally authorize the transfer of the base year value of a person's home in another county under those circumstances on and after January 1, 1999, as provided.

Existing property tax law establishes an annual tax lien date of January 1, rather than the former lien date of March 1, commencing with January 1, 1997, and establishes an annual deadline of March 15 for the filing of any affidavits required for certain property tax exemptions, except for affidavits for the church exemption, the veteran's exemption, the homeowners' exemption, the religious exemption, the aircraft of historical significance exemption, and for the classification of vessels as documented vessels eligible for valuation pursuant to a specified statute.

This bill would eliminate all special affidavit filing deadlines, except for the special filing deadline for the homeowners' exemption. This bill would conform the general deadline for the filing of property tax exemption affidavits to the new January 1 property tax lien date by changing that deadline from March 15 to February 15, and would similarly conform the filing deadline for the homeowners' exemption by changing that deadline from April 15 to February 15. This bill would also make other related conforming changes in dates specified in other exemption provisions, and would also conform to the January 1 lien date certain other dates specified in other property tax provisions.

Existing property tax law requires a county assessor to determine the assessed value of assessable intercounty pipeline rights-of-way in the county on the basis of a single, countywide parcel per taxpayer, as provided.

This bill would require an assessor to similarly determine the assessed value of pipelines and related rights-of-way that are located wholly within the county.

Existing property tax law requires that any reduction in an assessment entered on the local roll be made pursuant to an application for reduction in assessment, and generally requires that an application for reduction in assessment be filed during the period from July 2 to September 15, inclusive.

This bill would authorize a county board of supervisors, upon the recommendation of the county assessor and the clerk of the county board of equalization, to adopt a resolution providing, where certain conditions are met, that an application for reduction in assessment may also be filed within 60 days of the mailing of a notice of the assessor's response to a request for assessment pursuant to a specified statutory provision. This bill would also require that the applicant's signature on each application for reduction in an assessment be certified or be made under penalty of perjury. By creating a new crime of perjury, this bill would create a state-mandated local program.

Existing property tax law generally requires an application for reduction in assessment to be filed no later than September 15.

This bill would provide that an application for reduction in assessment that is mailed and postmarked on the next business day following September 15 shall be deemed timely filed in the case in which September 15 is a Saturday, Sunday, or a legal holiday, as defined.

Existing property tax law allows a person who has paid an amount of property tax, or certain representatives of that person or his or her estate, to bring an action in superior court to recover that amount of tax in the case in which a claim for the refund of that amount has been denied.

This bill would, in the case in which a claim has been denied for the refund of the first installment of taxes paid under an installment plan entered into pursuant to a specified statute, also authorize the owner of property, subject to certain limitations and conditions, to bring a refund action in superior court for the recovery of that first installment.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 942 (SB 283) Leslie. Prisons: crimes.

(1) Existing law requires the Department of Corrections to design core alcohol and drug treatment programs with specific requirements and standards for pregnant and parenting women inmates. In order to receive funds for a program, each agency service provider is required to prepare a program proposal that includes, among other things, a requirement of at least one year participation in the program and one year of transition services for women and their children. The one-year outpatient transition services program is designated a separate program from the treatment program and the program facility is required to be licensed by the State Department of Alcohol and Drug Programs as an alcohol and drug treatment program.

This bill instead would require the program facility to be designated pursuant to specified provisions governing community treatment programs or the Pregnant and Parenting Women's Alternative Sentencing Program.

(2) Existing law requires each state prison to have a citizens' advisory committee, but provides an exception for one committee to serve every prison located in the same city or county.

This bill instead would authorize one citizens' advisory committee to serve every prison located in the same city or community.

(3) Existing law provides that a statute amending a section of a repealed statute is void.

This bill would provide that, notwithstanding the provision of existing law specified above or any other provision of law, the provisions of Chapter 5 of the Statutes of 1997 became effective and operative as sections added to the Vehicle Code on the date of enactment of that chapter.

The bill would declare that its provisions do not constitute a change in, but are declaratory of, existing law.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 943 (AB 1484) Hertzberg. Local government reorganization.

Under the Cortese-Knox Local Government Reorganization Act of 1985, a local agency formation commission is established in each county for the review and approval of changes in boundaries of local agencies. Under that act, 2 or more changes of organization of local governmental entities constitute a reorganization.

This bill would create the Commission on Local Governance for the 21st Century, consisting of 15 members appointed by the Governor, the Assembly Committee on Rules, and the Senate Committee on Rules, as specified. The bill would require the commission to report to the Legislature and the Governor on specified topics relating to reorganization. The bill would authorize the commission to appoint employees, as specified, and to contract with any other public or private agency for necessary goods and services.

This bill would state that the commission shall remain in existence until January 1, 2000, and as of that date, would repeal the provisions relating to the commission, unless a later enacted statute, enacted before January 1, 2000, deletes or extends the commission's existence.

This bill would appropriate \$250,000 from the General Fund, for the 1997-98 fiscal year, to the commission to carry out its duties and responsibilities.

Ch. 944 (AB 1391) Goldsmith. Foster care: provider reimbursement.

Existing law provides for the reimbursement of foster care providers under the state's AFDC program, including payment for children placed in a licensed or approved family home with a capacity of 6 or less or in an approved home of a relative or nonrelative legal guardian and provides for the adjustment of these reimbursement rates. Existing law requires the State Department of Social Services to report to the Legislature by December 31, 1990, on the department's specialized care ratesetting system regarding its effectiveness in meeting the special needs of children in foster care.

This bill would revise the adjustments to be made to the reimbursement rates for these foster care providers, and would require the rates to be increased by 6%. The bill would also delete the requirement that the department report to the Legislature regarding the specialized care ratesetting system.

Ch. 945 (AB 1561) Committee on Transportation. Transportation.

(1) Existing law requires the Department of Toxic Substances Control to adopt and enforce those regulations that are necessary and appropriate to achieve consistency with the findings made by the Federal Highway Administration and the federal Department of Transportation pursuant to specified provisions of federal law regarding a uniform program for hazardous waste transportation.

This bill would make technical, clarifying changes to existing law.

(2) Existing law requires that for each alleged violation of a specified provision prohibiting driving without proof of financial responsibility a specified amount of each fine be deposited by the county treasurer in a special account and allocated to defray costs of municipal and justice courts incurred in administering specified provisions relating to driving without proof of financial responsibility. The money is required to be deposited as specified regardless of whether the charge is dismissed pursuant to a specified provision.

This bill would, instead, require that the specified amount be deposited as specified above only for each conviction of a violation of the specified provision.

(3) Existing law requires the Santa Barbara Metropolitan Transit District and the Santa Cruz Metropolitan Transit District to purchase all supplies, equipment, and materials by contract let to the lowest responsible bidder when the expenditure required exceeds \$10,000.

This bill would, instead, require those districts to purchase those items by contract let to the lowest responsible bidder when the expenditure required exceeds \$25,000.

(4) Existing law authorizes the California Transportation Commission to relinquish to a city or county any portion of a state highway within the city or county that the Legislature has deleted from the state highway system. Existing law designates and describes State Highway Routes, including Route 91.

This bill would revise the description of State Highway Route 91 and authorize the relinquishment of a designated portion of Route 91 to the City of Gardena, as described.

The bill would also authorize the commission, upon terms and conditions approved by it, to relinquish a portion of State Highway Route 91 to the City of Torrance in which the highway is located and which has agreed to accept it. The relinquishment would take effect on the day immediately following the commission's approval of the terms and conditions.

(5) Existing law requires the minimum age for appointment to the position of state traffic officer of the California Highway Patrol to be 18 years.

This bill would require the minimum age for that appointment to be 21 years and would make a technical, clarifying change in existing law.

(6) Existing federal regulations require farm labor contractors, agricultural employers, or agricultural associations that use any vehicle to transport a migrant or seasonal agricultural worker to ensure that the vehicle conforms to specified federal vehicle safety standards. Prima facie evidence that safety standards have been met may be shown by the presence of a current state vehicle inspection sticker.

This bill would authorize the Department of the California Highway Patrol to enter into a contract to conduct an inspection of vehicles that are subject to the federal regulations specified above and issue the specified vehicle inspection sticker to qualified vehicles. The bill would require the contract to provide that the amount to be paid to the department shall be equal to the costs incurred by the department for services provided under the contract.

(7) Existing law requires motor vehicle dealers to use numbered report-of-sale forms issued by the Department of Motor Vehicles when selling a vehicle. A vehicle displaying a copy of the specified form may be operated without license plates or registration card until the license plates and registration card are received by the purchaser of the vehicle.

This bill would authorize the vehicle to operate with the specified form until the license plates and registration card are received by the purchaser of the vehicle or until a 6-month period, commencing with the date of sale of the vehicle, has expired, whichever occurs first.

(8) Existing law provides that, if, after one calendar year following the receipt of the first application for the special interest license plate under the Gene Chappie Heritage Network Act of 1992, 5,000 applications for those plates have not been received, the

Department of Parks and Recreation shall refund to all applicants any fees or deposits that have been collected.

This bill would delete this provision of existing law.

(9) Existing law requires tabs to indicate the year and month of the expiration of the registration of a vehicle and that the tabs be attached to the license plate assigned to the vehicle, as specified.

This bill would specify that the tabs shall indicate the current month and year and that a violation of this provision occurs where a vehicle fails to display current month and year tabs or displays expired tabs.

(10) Existing law imposes specified requirements on a licensed automobile dismantler who acquires a vehicle subject to registration under the Vehicle Code for the purpose of dismantling that vehicle.

This bill would make certain of those requirements inapplicable if the person from whom the vehicle was acquired has notified and cleared the vehicle for dismantling with the Department of Motor Vehicles and a bill of sale has been executed to the dismantler that properly identifies the vehicle and contains evidence of clearance by the department.

(11) Existing law requires the driver of any motor vehicle that is in any manner involved in a traffic accident, as specified, to furnish written evidence of financial responsibility for the vehicle upon the request of a peace officer summoned to the accident scene.

This bill would authorize a traffic collision investigator, as specified, to cause a notice to appear to be issued for a violation of the provision specified above, upon review of that citation by a peace officer.

(12) Existing law prohibits any person from stopping, parking, or leaving standing any vehicle upon a freeway that has full control of access and no crossings at grade, except as specified.

This bill would make a conviction of a violation of the provision specified above a conviction involving the safe operation of a motor vehicle upon the highway if a notice to appear for the violation was issued by a specified peace officer.

(13) Existing law makes it unlawful for any person to park or leave standing any vehicle, including a vehicle displaying a special identification license plate or a distinguishing placard issued to disabled persons and disabled veterans for purposes of special parking privileges, in any area of the pavement within a parking lot or parking facility that is marked by crosshatched lines and is thereby designated for the loading and unloading of vehicles pursuant to any local ordinance, among other places.

This bill would, instead, specify that it is unlawful to park in any area of the pavement adjacent to a parking stall or space designated for disabled persons or disabled veterans that is marked by crosshatched lines and is thereby designated, pursuant to any local ordinance, for the loading and unloading of vehicles parked in the stall or space.

(14) Existing law authorizes any peace officer, as defined, upon the complaint of any person, to remove a vehicle parked within a prescribed distance of an occupied building of a school, community college, or university or within a residence or business district from a highway or from public or private property if an alarm device has been activated within the vehicle, the peace officer is unable to locate the owner of the vehicle within 45 minutes from the time of arrival at the vehicle's location, and the alarm device has not been silenced prior to removal.

This bill would include any regularly employed and salaried employee who is engaged in directing traffic or enforcing parking laws or ordinances within the scope of persons who can cause the removal. The bill would also make certain clarifying changes and would reduce the 45-minute period described above to a 20-minute period.

(15) Existing law authorizes a peace officer to remove a motor vehicle for purpose of inspection if the officer has reasonable cause to believe that the motor vehicle, under specified circumstances, has been involved in a hit-and-run accident, and the operator of the vehicle has failed to stop and comply with certain statutes.

This bill would also authorize a regularly employed and salaried employee who is engaged in directing traffic or enforcing parking statutes and regulations to remove a vehicle under those specified circumstances.

(16) Existing law authorizes any vehicle to be equipped with supplemental rear turn signal lamps that are mounted on, or are an integral portion of, the outside rearview mirrors, in addition to any required or authorized turn signal lamps, if those lamps meet certain requirements, including that the light emitted from the lamps is projected only to the rear of the vehicle and is not visible to the driver under normal operating conditions.

This bill would exempt from the requirement specified above a visual indicator designed to allow monitoring of lamp operation.

(17) Existing law permits the use of flashing lights on vehicles under certain circumstances.

This bill would authorize the use of flashing lights on vehicles that are approaching, stopped at, or departing from, a railroad grade crossing, as prescribed.

(18) Existing law authorizes emergency vehicles used by specified peace officers in the performance of their duties to display a steady or flashing blue warning light visible from the front, sides, or rear of the vehicle.

This bill would authorize an emergency vehicle used by a housing authority patrol officer, as specified, to display the steady or flashing blue warning light specified above, and correct a cross-reference in those provisions.

(19) Existing law authorizes specified emergency vehicles to display not more than 2 flashing white warning lights to the front mounted above the roofline of the vehicle.

This bill would, additionally, authorize those vehicles to display not more than 2 flashing white warning lights to the front mounted below the roofline of the vehicle. The bill would authorize the flashing warning lights to be in addition to flashing headlamps permitted under a specified provision of law.

(20) Existing law prohibits the use upon a vehicle of any device that is intended to modify the original design or performance of any lighting equipment, safety glazing material, or other device, unless the modifying device meets certain requirements, except as specified.

This bill would exempt from that prohibition lamps installed on authorized emergency vehicles.

(21) Existing law requires every motor vehicle operated on the highway to be equipped with a horn in good working order and capable of emitting sound audible under normal conditions from a distance of not less than 200 feet but that does not emit an unreasonably loud or harsh sound. Existing law authorizes an authorized emergency vehicle that is used in fire calls to be equipped with an air horn that does not comply with the specified requirement.

This bill would, instead, authorize all authorized emergency vehicles, as defined, to be equipped with air horns that do not meet the requirement specified above.

(22) Existing law defines the term "commercial motor vehicle" for purposes of specified provisions relating to a commercial motor vehicle safety program.

This bill would apply that term to specified provisions relating to motor vehicle safety regulations.

(23) Existing law excludes household goods carriers, as defined, from the Motor Carriers of Property Permit Act.

This bill would exclude the transportation of office, store, or institution furniture and fixtures by a household goods carrier from specified provisions of the act relating to motor carrier permits.

(24) Existing law makes a violation of a specified provision relating to preventing the escape of materials from vehicles a misdemeanor.

This bill would, instead, make a second or subsequent violation of the specified provision a misdemeanor, if the violation occurs within 2 years of a prior violation of that provision. A first violation, in combination with another provision of existing law, would be an infraction.

(25) This bill would incorporate additional changes in Section 16028 of the Vehicle Code proposed by AB 651, to be operative only if AB 651 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

Ch. 946 (AB 1224) Thomson. Local government bonds.

Existing law, the Mello-Roos Community Facilities Act of 1982, authorizes the formation of community facilities districts, and the issuance of bonds and levying of special taxes thereunder, to finance designated public and utility facilities and services. That act provides among other things that the special tax levied shall be collected in the same manner as ordinary ad valorem property taxes are collected and shall be subject to the same penalties and procedure, sale, and lien priority in case of delinquency as for ad valorem taxes.

This bill would permit the legislative body of a district to waive delinquency penalties and redemption penalties, to declare a special tax penalties amnesty program, as specified, and to accept the tender of bonds or debt for special taxes and interest that are due or delinquent.

The Mello-Roos Community Facilities Act of 1982 and the Improvement Bond Act of 1915 provide for the issuance of bonds secured by assessment liens and special tax liens and the judicial foreclosure of those liens in the event of payment delinquency.

This bill would make various revisions in those foreclosure procedures.

Ch. 947 (AB 1520) Vincent. Income and bank and corporation taxes: credit: qualified deposits.

The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws.

This bill would, under both laws, allow a credit for specified taxable and income years in an amount equal to 20% of a qualified deposit, as defined, made into a community development financial institution, as defined.

This bill would take effect immediately as a tax levy.

Ch. 948 (AB 1106) Knox. Middle college high schools.

(1) Existing law sets forth various duties and responsibilities governing secondary education.

This bill would require the California Community Colleges and the State Department of Education to collaborate with each other and with their respective local community colleges and local school districts to ensure the continued success of existing middle college high schools and to promote the establishment of new middle college high schools. The imposition of this requirement on community colleges and school districts would impose a state-mandated local program.

The bill would provide that the goal of the middle college high school is to select at-risk high school students who are performing below their academic potential and place them in an alternative high school located on a community college campus in order to reduce the likelihood that they will drop out of school before graduation.

The bill would require each middle college high school to be structured as a broad-based, comprehensive instructional program focusing on college preparatory and school-to-work curricula, career education, work experience, community service, and support and motivational activities. The bill would authorize the specific design of a middle college high school to vary depending on the circumstances of the community college or school district, but would prescribe basic elements of the middle college high school.

The bill would delineate the responsibilities of the California Community Colleges and the State Department of Education in this regard.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 949 (SB 95) Ayala. Open meetings.

The Bagley-Keene Open Meeting Act generally requires that the meetings of state bodies, as defined, be conducted openly.

This bill would require any person appointed or elected to serve as a member of a state body who has not yet assumed the duties of office to conform his or her conduct to the act.

This bill would provide that a hearing that the State Board of Control conducts relating to a crime against a minor or a crime of sexual assault, and that the applicant or applicant's representative has not requested to be open, is not subject to certain of these provisions.

Under the act, any person attending an open and public meeting has the right to record the proceedings with a tape recorder.

This bill would authorize any person to record those meetings with an audio or video tape recorder, as specified, would provide that any tape or film record of an open and public meeting by or at the direction of a state body is a public record, as specified, and would prohibit a state body from prohibiting or restricting the broadcast of its open and public meetings, as specified.

Existing law requires the state body to provide specified notice of its meetings, including an agenda.

This bill would require the agenda to include a description of the items of business to be transacted or discussed, including those items to be transacted or discussed in closed sessions.

Existing law specifies that agendas of public meetings and certain other writings distributed at those meetings are public records to be made available for public inspection.

This bill would revise provisions specifying when these writings become public records and are required to be made available for public inspection.

Existing law requires the state body to provide an opportunity for members of the public to directly address the state body on each agenda item before or during the state body's discussion or consideration of the item.

This bill would additionally provide that every notice for a special meeting at which action is proposed to be taken on an item shall provide an opportunity for members of the public to directly address the state body on that item prior to action on the item. The bill would also provide that the state body shall not prohibit public criticism of the policies, programs, services, acts, or omissions of the state body.

Existing law provides that in the case of an emergency situation, as defined, a state body may hold an emergency meeting without complying with the 10-day notice requirement.

This bill would revise the definition of emergency situation and would provide for special meetings under certain circumstances if the state body provides at least a 48-hour notice, as specified.

Existing law provides that no closed session may be held by any state body except as expressly authorized by the Bagley-Keene Open Meeting Act and existing law provides a number of express exceptions.

This bill would provide that the act shall not be construed to prevent a state body from holding a closed session to consider the evaluation of performance of a public employee. This bill would also provide that the act shall not be construed to require the Franchise Tax Board to notice or disclose any confidential tax information considered in closed sessions, as specified, nor to require the State Board of Equalization to disclose any action taken in closed session or documents executed in connection with that action when public disclosure is prohibited by specified laws.

Existing law requires a state body, prior to holding any closed session, to cite the authority for the closed session.

This bill would additionally require that after any closed session the state body shall reconvene in open session prior to adjournment to make specified disclosures of actions taken in closed session.

Existing law provides that any hearing being held, or noticed, or ordered to be held by a state body at any meeting may by order or notice of continuance be continued or recontinued to any subsequent meeting of the state body that is noticed pursuant to a specified provision of existing law.

This bill would provide that these hearings may be continued or recontinued to any subsequent meeting of the state body in the same manner and to the same extent set forth for the adjournment of meetings. This bill would authorize a state body to adjourn any

regular, adjourned regular, special or adjourned special meeting to a time and place specified in the order of adjournment.

Existing law permits any interested person to commence an action for the purpose of stopping or preventing violations or threatened violations of the act or to determine the applicability of the act to actions or threatened future actions by members of a state body.

This bill would also permit the Attorney General or the district attorney to commence an action for these purposes and additionally permit those actions to determine the validity of rules or actions by a state body to penalize or otherwise discourage the expression of its members or to compel the state body to tape record its closed sessions.

Existing law makes it a misdemeanor for a member of a state body to attend a meeting of the body in violation of the act with knowledge of the fact that the meeting is in violation of the act.

This bill would instead provide that it is a misdemeanor for a member of a state body to attend a meeting of that body in violation of the act where the member intends to deprive the public of information to which the member knows or has reason to know the public is entitled to under the act. By changing the definition of a crime this bill would impose a state-mandated local program.

Existing law provides that no state agency, as defined, shall conduct any meeting, conference, or other function in any facility that prohibits the admittance of any person or persons on the basis of race, religious creed, color, national origin, ancestry, or sex.

This bill would additionally prohibit the conduct of those functions in any facility that is inaccessible to disabled persons or where members of the public may not be present without making a payment or purchase. This bill would further provide that no notice, agenda, announcement, or report required under the act need identify any victim or alleged victim of tortious sexual conduct or child abuse unless the identity of the person has been publicly disclosed.

This bill would incorporate changes in Section 11126 of the Government Code proposed by SB 989 to be operative only if SB 989 and this bill are both chaptered and this bill becomes effective on or before January 1, 1998, and this bill is chaptered last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 950 (AB 437) Aroner. Education: West Contra Costa Unified School District.

Existing law sets forth a consolidated loan obligation for the West Contra Costa Unified School District with a loan payment schedule.

This bill would express findings and declarations of the Legislature relating to the fiscal circumstances of the West Contra Costa Unified School District. To effectuate legislative intent expressed by the bill, the bill would amend the loan payment schedule to provide that, following the payment to be made by the district in 1998, the remaining debt is to be repaid as a straightline loan amortized over a 20-year term, plus interest calculated as specified.

The bill would make a finding of unique circumstances necessitating the enactment of a special statute.

Ch. 951 (AB 1595) Committee on Public Employees, Retirement and Social Security. Public employees retirement.

(1) The Public Employees' Retirement Law was reorganized and renumbered by Chapter 379 of the Statutes of 1995 and Chapter 906 of the Statutes of 1996.

This bill would make technical, nonsubstantive, related changes by renumbering, deleting, and revising various provisions.

(2) Existing law requires the board to limit the number of beneficiaries for receipt of specified death benefits and to determine the recipients on the basis of the order in which claims are made.

This bill would authorize the board to establish the total benefit value for purposes of the application of those limitations.

(3) Existing law provides that any allowance may be paid directly to a trust.

This bill would permit death benefits to be paid directly to a trust.

(4) Existing law requires the board to annually submit financial and operations reports to the Governor and the Legislature.

This bill would revise the content of those reports and authorize electronic transmission.

(5) Existing law requires the board to adjust actuarial equivalents for optional retirement allowance settlement purposes every 10 years.

(6) This bill would authorize the board to make those adjustments for the intervals and upon the effective dates it determines.

(7) Existing law authorizes contracting agencies to encourage retirements by adding up to 2 years of service credit to members who retire during designated periods. The provision would be repealed on January 1, 1998.

This bill would change that termination date to January 1, 1999, and would require a specified report to be made to the Governor and the Legislature on or before June 30, 1998.

(8) Existing law excludes certain part-time employees from membership.

This bill would authorize the establishment of a plan and a plan fund for part-time classified school employees who are excluded from membership. The plan fund would be continuously appropriated for the purposes of the plan.

(9) The Public Employees' Medical and Hospital Care Act authorizes the Calaveras County Water District and its employees' exclusive representative to enter into specified agreements respecting employees' health benefit contributions for postretirement coverage.

This bill would authorize the Alameda County Water District, the City of Fontana, and the City of Lincoln to enter into those agreements.

DIGESTS OF STATUTES
ENACTED IN 1997

1997–98 FIRST EXTRAORDINARY SESSION

BILL CHAPTERS

Ch. 1 (SB 4) Costa. Department of Water Resources: flood control.

(1) Under existing law, the Department of Water Resources participates in various flood control and prevention projects.

This bill would appropriate \$3,525,000 from the General Fund to the department for prescribed projects specified in a report prepared by the Flood Emergency Action Team dated May 10, 1997.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 2 (SB 11) Maddy. Department of Water Resources: appropriation: flood damage repair work.

Under existing law, the Department of Water Resources participates in various flood control and prevention projects. Existing law continuously appropriates money in the Special Fund for Economic Uncertainties, without regard to fiscal years, for specified purposes.

This bill would appropriate \$10,400,000 from the General Fund, and would authorize the Director of Finance to allocate up to \$3,000,000 from the Special Fund for Economic Uncertainties, to the department for the purpose of repairing damage from the January 1997 floods to state or federally constructed or owned flood, sediment, and erosion control projects. The bill would require prescribed federal or local funds received by the department in connection with the repair work undertaken pursuant to these provisions to be deposited in the General Fund. The bill would require the department on or before January 1, 1999, to submit to the Joint Committee on Legislative Budget a report summarizing the expenditure of any allocated funds. The bill would specify related matters.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 3 (AB 1) Cardoza. Taxation: disaster relief: storms and floods.

Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the board's approval. With respect to certain counties that have adopted reassessment ordinances and have been declared by the Governor to be in a state of disaster as a result of certain events, existing law provides for state allocations of the estimated amounts of the reductions in property tax revenues resulting in certain fiscal years from reassessments under those ordinances. Existing law also continuously appropriates, without regard to fiscal years, moneys in the Special Fund for Economic Uncertainties for purposes of funding these state allocations.

This bill would provide for similar state allocations with respect to property tax revenue reductions, resulting from a reassessment ordinance, incurred by a county that was declared by the Governor to be in a state of disaster as a result of a storm or flood occurring in California in December 1996 or January 1997. By requiring moneys continuously appropriated from the Special Fund for Economic Uncertainties to be allocated for the new purpose of reimbursing these counties for these property tax revenue reductions, this bill would make an appropriation.

The Personal Income Tax Law and Bank and Corporation Tax Law provide for the carryover to specified taxable or income years of specified losses sustained as a result of various disasters occurring in California in an area determined by the President of the United States to warrant specified federal assistance, or proclaimed by the Governor to be in a state of disaster.

This bill would extend these provisions to losses sustained as a result of storm, flood, or any other related casualty that occurred in California in December 1996 and January 1997. This bill would also authorize a taxpayer to make an election to claim a deduction for those losses on the tax return for the preceding year.

This bill would contain legislative findings and declarations as to the statewide public purpose of this bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 4 (AB 2) Strom-Martin. Disaster relief.

(1) Under the Natural Disaster Assistance Act, the state share for any eligible project is limited to no more than 75% of total state eligible costs except for certain occurrences for which the state share may be 100% of total state eligible costs.

This bill would add to those occurrences for which the state share may be 100% of total state eligible costs, the storms that occurred in California in December of 1996 and early January of 1997.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 5 (AB 11) Poochigian. Department of Water Resources: appropriation: flood damage repair work.

Under existing law, the Department of Water Resources participates in various flood control and prevention projects.

This bill would appropriate \$4,705,000 from the General Fund to the department for certain capital outlay projects specified in a report prepared by the Flood Emergency Action Team, dated May 10, 1997.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 6 (SB 6) Ayala. Veterans' farm and home purchases: disaster indemnity fund.

Existing law provides for farm and home purchase benefits for qualifying veterans under the Veterans' Farm and Home Purchase Act of 1974. Existing law requires the Department of Veterans Affairs to maintain the Indemnity Fund for the purpose of indemnifying eligible purchasers for the cost of repairing damage in excess of \$250 caused by flood, earthquake, or other perils not otherwise covered in the home insurance required of purchasers under the act.

This bill would, instead, provide that the fund indemnify for costs of repairing structural damage in excess of \$500 caused by prescribed floodwaters, and for costs of repairing structural damage in excess of 5% of the total covered loss or \$500, whichever is greater, caused by earthquake, volcanic eruption, landslide, or mudslide. This bill would delete the requirement that the loss not otherwise be covered by insurance and would delete coverage for other perils. By changing the purpose of this continuously appropriated fund, this bill would make an appropriation.

Ch. 7 (AB 6) Torlakson. Real estate: disclosures.

Existing law requires certain information to be disclosed by the seller and the seller's agent to the prospective transferee when ownership of real property is proposed to be transferred. Existing law permits, with respect to earthquake fault zones and seismic hazards, that disclosure to be provided by, among other things, a real estate contract and receipt for deposit.

This bill would require, if one of 2 specified conditions are met, an additional disclosure by the seller or, in some cases, the seller's agent, to the prospective buyer with respect to real property located in an area subject to flooding or fire hazards, as specified, to be made either by the issuance of a natural hazard disclosure statement that would be specified by the bill or in a disclosure statement specified in existing law. The bill would also provide that the disclosure described above, with respect to earthquake fault zones and seismic hazards, need be given only if one of 2 specified conditions are met, and may be made in a natural hazard disclosure statement, rather than by the real estate contract and receipt for deposit. The bill would require the counties to post a notice identifying the location of specified maps or lists containing information regarding areas of potential flooding and fire hazard severity, as specified. By imposing additional duties on local government, the bill would create a state-mandated local program.

The bill would encourage the Secretary of the Resources Agency to provide coordination and leadership among state departments to provide compatible maps and information regarding natural hazards.

Existing law requires the Seismic Safety Commission to update, publish, and disseminate a homeowner's guide about earthquake safety, which is in the public domain and freely available to any vendor who wants to reproduce it at no charge.

This bill would delete the provision referring to the guide being in the public domain, and instead provide that the guide be made available to the public at cost, and to any vendor who wishes to reproduce and publish the guide at no cost provided the vendor submit his or her copy to the Seismic Safety Commission for approval prior to publication.

The bill provides that certain of its provisions shall be operative on March 1, 1998.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 8 (AB 10) Machado. Disaster assistance.

Existing law establishes in the Reserve for Economic Uncertainties a Disaster Response-Emergency Operations Account to be used for specified purposes, including response or recovery activities, as defined.

This bill would specifically authorize the use of funds from this account for acquisitions, relocations, and environmental mitigations related to response or recovery activities that are a direct consequence of the declared emergency, directly related to the January 1997 floods or any flood-related emergency that is declared by the Governor on or before January 1, 1999, where failure to undertake the project may interrupt essential state services or jeopardize public health or safety.

This bill would declare that it is to take effect immediately as an urgency statute.

DIGESTS OF RESOLUTIONS
ADOPTED IN 1997

1997–98 REGULAR SESSION

RESOLUTION CHAPTERS

Res. Ch. 1 (ACR 7) Cunneen. Random Acts of Kindness Week.

This measure would designate the week of February 10 through February 16, 1997, as "Random Acts of Kindness Week," pursuant to specified findings, and would urge the public to observe this week with appropriate activities.

Res. Ch. 2 (ACR 11) Honda. Vietnamese Community in Santa Clara County Week.

This measure would proclaim the week of February 2 to February 9, 1997, as "Vietnamese Community in Santa Clara County Week" to honor the contributions and achievements of the state's Vietnamese population.

Res. Ch. 3 (SCR 6) Lockyer. California State Parent Teacher Association.

This measure would designate February 1997 as Parent Teacher Association Month in California in recognition of the 100th anniversary of the founding of the California State Parent Teacher Association.

Res. Ch. 4 (ACR 8) Honda and Takasugi. Day of Remembrance.

This measure would declare February 19, 1997, as a Day of Remembrance in order to increase public awareness of the events surrounding the internment of Japanese Americans during World War II.

Res. Ch. 5 (ACR 13) Alby. American Heart Month.

This measure would designate the month of February 1997 as American Heart Month.

Res. Ch. 6 (ACR 6) Torlakson. Parent-Teacher Involvement and Responsibility Week.

This measure would proclaim March 3 through March 10, 1997, as Parent-Teacher Involvement and Responsibility Week, commemorating the 100 year anniversary of the California State Parent Teacher Association.

Res. Ch. 7 (ACR 9) Murray. Black History Month.

This measure would proclaim February of each year as Black History Month.

Res. Ch. 8 (SCR 5) Lockyer. Week of the School Administrator.

Existing law designates the week of March 4 through March 8, 1996, as Week of the School Administrator.

This bill would designate the week of March 2 through March 8, 1997, as the Week of the School Administrator, and would commend the administrators of California's public schools for their support of, and contributions to, the quality of public education in this state.

Res. Ch. 9 (ACR 10) Floyd. Veterans Memorials: The Wall That Heals.

This measure would encourage all Californians to take part in ceremonies concerning The Wall That Heals, and that all measures be taken to inform Californians of related ceremonies so that they are given an opportunity to remember and honor the service, efforts, and sacrifices of veterans.

Res. Ch. 10 (SCR 21) M. Thompson. Adult education.

This measure would designate the week of March 17 through March 21, 1997, as California Adult Education Week, and would commend the students, classified staffs, teachers and administrators of California's adult schools for their support of, and contributions to, the quality of public education in this state.

Res. Ch. 11 (ACR 18) Wildman. Irish American Heritage Month.

This measure would designate the month of March as Irish American Heritage Month, in honor of the outstanding contributions of Irish Americans throughout the history of the United States.

Res. Ch. 12 (SCR 29) O'Connell. Absolutely Incredible Kids Day.

This measure would declare March 20, 1997, as Absolutely Incredible Kids Day.

Res. Ch. 13 (ACR 16) R. Wright. Absolutely Incredible Kid Day.

This measure would declare March 20, 1997, as Absolutely Incredible Kid Day.

Res. Ch. 14 (SCR 4) Burton. Medi-Cal: smoking-related diseases.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

This measure would request the Attorney General to bring suit against all tobacco companies for reimbursement for costs incurred by the Medi-Cal program due to smoking-related diseases.

Res. Ch. 15 (SCR 16) Polanco. Joint Legislative Committee on Prison Construction and Operations.

This measure would reestablish until June 30, 1998, the Joint Legislative Committee on Prison Construction and Operations, to have primary responsibility for providing legislative scrutiny over prison construction and operations.

Res. Ch. 16 (SCR 12) Solis. Women's History Month and International Women's Day.

This measure would designate the month of March 1997 as Women's History Month and would urge all Californians to join in the celebration of International Women's Day on March 8, 1997.

Res. Ch. 17 (ACR 15) Havice. Red Ribbon Week.

This measure would proclaim October 23 through October 31, 1997, as Red Ribbon Week and would encourage all Californians to help build drug-free communities.

Res. Ch. 18 (ACR 34) Mazzoni. NetDay.

This measure would commend the organizers, sponsors, coordinators, and volunteers of NetDay, and would express the intent of the Legislature that NetDay should be used as a positive model in communities throughout the nation and that NetDay should continue to assist students, parents, and schools across the nation, as specified.

Res. Ch. 19 (ACR 30) Goldsmith. Mediation Week.

This resolution designates the week of March 16 to March 22, 1997, inclusive, as Mediation Week.

Res. Ch. 20 (ACR 39) Bustamante. Conference committee on welfare reform.

This measure would provide for a conference committee on welfare reform, to be appointed as specified, which would report on any bill relating to welfare reform that is referred to the committee. This measure would provide that the rule establishing the conference committee shall be operative during the 1997 portion of the 1997-98 Regular Session.

Res. Ch. 21 (SCR 35) Johannessen. California Historical and Special Interest Automobile Recognition Week.

This measure would proclaim the week of April 13 through April 20, 1997, as California Historical and Special Interest Automobile Recognition Week.

Res. Ch. 22 (SCR 30) Johnston. Flood Emergency Worker Recognition Day.

This measure would designate April 17, 1997, as Flood Emergency Worker Recognition Day, with special observances to be scheduled in the State Capitol on that date, and would encourage the people of the state to give thanks on that day for public workers, employees of nonprofit agencies, and volunteers who aided their fellow Californians during the major winter storms commencing on December 26, 1996.

Res. Ch. 23 (ACR 23) Morrissey. Senior Citizens' Week.

This measure would proclaim the week of May 4, 1997, to May 10, 1997, inclusive, as Senior Citizens' Week.

Res. Ch. 24 (ACR 29) Migden. California Nonprofits Week.

This measure would designate the week of April 20 to April 26, 1997, inclusive, as California Nonprofits Week.

Res. Ch. 25 (ACR 50) Pacheco. University of California Riverside.

This measure would pay tribute to the achievements of Tomas and Concha Rivera and salute the University of California, Riverside for its sponsorship of the 10th Annual Tomas Rivera Conference.

Res. Ch. 26 (AJR 5) Havice. Gulf War Syndrome.

This measure would memorialize the President and Congress of the United States to continue efforts to ensure that veterans of the Gulf War are appropriately cared for, to do everything possible to understand and explain Gulf War illnesses, to put into place those military doctrines, personnel, and medical policies, procedures, and equipment that will minimize any future problems from exposure to biological or chemical agents or other environmental hazards, and to use all means necessary to ensure that Gulf War veterans who placed themselves in harm's way on behalf of all Americans, are provided the assistance, support, and care they deserve.

Res. Ch. 27 (SJR 12) M. Thompson. Closure of the flight-service center at the Arcata-Eureka Airport in McKinleyville, Humboldt County.

This measure would memorialize Congress to oppose the closure of the air flight-service center at the Arcata-Eureka Airport, in Humboldt County, California, and to direct the Federal Aviation Administration to act accordingly.

Res. Ch. 28 (ACR 38) Davis. California Holocaust Memorial Week.

This measure would designate the week of May 4 through May 10, 1997, as California Holocaust Memorial Week, and would urge Californians to observe these days of remembrance for the victims of the Holocaust in an appropriate manner.

Res. Ch. 29 (SCR 8) M. Thompson. Alberta, Canada: sister state status.

This measure would extend an invitation to the people of Alberta, Canada to join California as a sister state, in order to encourage and facilitate mutually beneficial educational, economic, ecological, recreational, and cultural exchanges, and to lead to an indelible and lasting relationship between the citizens of California and Alberta.

Res. Ch. 30 (SCR 32) M. Thompson. Autism Treatment Awareness Week.

This measure would proclaim the week of April 27 through May 3, 1997, as Autism Treatment Awareness Week, and acknowledge the contributions made in the area of autism by experts in the field and the families involved.

Res. Ch. 31 (ACR 33) Murray. Child Passenger Safety Week.

This measure would declare the week from April 27, 1997, to May 3, 1997, Child Passenger Safety Week.

Res. Ch. 32 (ACR 36) Mazzone. Sexual Assault Awareness Month.

This measure would proclaim that, henceforth, the month of April shall be designated as Sexual Assault Awareness Month.

Res. Ch. 33 (ACR 37) Washington. School Psychology Week.

This measure would proclaim April 13, 1997, through April 19, 1997, as School Psychology Week.

Res. Ch. 34 (ACR 17) Bustamante. Public works projects: prevailing wage rate formula.

Existing law requires payment of the general prevailing rate of per diem wages, as specified, for work performed by employees of contractors on defined public works projects.

This measure would declare that the Legislature has relied upon established definitions of the general prevailing rate of per diem wages in amending and extending the law, and would declare that changing those definitions administratively would be contrary to the Legislature's intent for the reason that the existing definitions are now implicit in the statutory provisions.

Res. Ch. 35 (ACR 41) Olberg. National day of prayer.

This measure would declare that the Legislature recognizes May 1, 1997, as "National Day of Prayer" and calls upon the people of California, each according to his or her own faith, to gather together that day in homes and places of worship to pray for unity of the hearts of all mankind.

Res. Ch. 36 (ACR 51) Kaloogian. Armenian Genocide: Day of Remembrance.

This measure would designate April 24, 1997, as "California Day of Remembrance for the Armenian Genocide of 1915-1923, and for the Victims of the Sumgait Pogroms of 1988 and Baku Riots of 1990." It would call upon the people of California to use vigilance to ensure the peaceful settlement of the Nagorno Karabagh conflict while protecting the security of the Armenians in the Republic of Nagorno Karabagh.

Res. Ch. 37 (ACR 49) Alby. Law Enforcement Appreciation Week.

This measure would proclaim May 11 through May 17, 1997, as Law Enforcement Appreciation Week in California and would encourage all Californians to join in this observance to commend our law enforcement officers for their professionalism and commitment to the citizens of California.

Res. Ch. 38 (SJR 11) Kelley. Tandem skydiving equipment and instruction.

Under existing law, the Federal Aviation Administration (FAA) has regulatory authority over equipment and instruction regarding the use of parachutes for skydiving.

This measure would urge the Congress of the United States, the FAA, and the skydiving industry to immediately conclude and make permanent a rule change to a specified regulation of the FAA to legalize and legitimize tandem skydiving equipment and the methods of training that have been successfully employed for tandem skydiving.

Res. Ch. 39 (SCR 7) Greene. Joint Committee on School Facilities.

This measure would extend the authority for the Joint Committee on School Facilities, with specified duties. The measure would authorize the Senate Committee on Rules to make money available from the Senate Operating Fund as necessary for the expenses of the committee, as specified. The committee would be required to present its budget to the Senate Committee on Rules for review and comment, as specified.

The measure would require the committee to report to the Legislature at the end of each legislative session on its activities and recommendations for improvements in the school facilities system. The measure would authorize the committee to act until June 30, 1998, at which time the committee's existence would terminate.

Res. Ch. 40 (ACR 28) Havice. Crime Victims' Rights Week.

This measure would proclaim April 12 through April 18, 1998, as Crime Victims' Rights Week in California and would encourage all Californians to join in this observance by wearing victim awareness ribbons.

Res. Ch. 41 (SCR 1) Burton. Joint Rules.

This measure adopts the Joint Rules of the Senate and Assembly for the 1997-98 Regular Session.

Res. Ch. 42 (ACR 52) Mazzone. California Bike Commute Week.

This measure would proclaim the week of May 19 to May 23, 1997, California Bike Commute Week throughout the state and would encourage all state agencies to participate through the use of existing transportation coordinators and programs.

Res. Ch. 43 (SCR 28) Peace. Joint Committee on Workers' Compensation.

This measure would establish the Joint Committee on Workers' Compensation, with specified duties. The measure would authorize the Senate Committee on Rules to make money available from the Senate operating fund as necessary for the expenses of the committee, as specified.

The measure would require the committee to report to the Legislature at the end of each legislative session on its findings and recommendations. The measure would authorize the committee to act until June 30, 1998, at which time the committee's existence would terminate.

Res. Ch. 44 (AJR 12) Mazzoni. Bolinas Lagoon.

This measure would memorialize the President and the Congress to appropriate federal funds to be used to preserve and protect the Bolinas Lagoon.

Res. Ch. 45 (ACR 42) Olberg. Motorcycle Awareness Month.

This measure would designate the month of May 1997, as "Motorcycle Awareness Month."

Res. Ch. 46 (ACR 44) Machado. Mosquito and Vector Control Awareness Week.

This measure would declare June 22 through 28, 1997, Mosquito and Vector Control Awareness Week.

Res. Ch. 47 (SCR 45) Brulte. Emergency Medical Services Week.

This measure would designate the week of May 18 through May 24, 1997, as Emergency Medical Services Week pursuant to specified findings and recognize that programs will be held throughout the state to encourage Californians to increase their awareness of accident prevention techniques and how to access emergency services.

Res. Ch. 48 (SCR 10) Hughes. School conduct and safety.

Existing law and the California Constitution set forth various provisions relating to school safety.

This measure would recognize that democratic citizenship and productive adulthood begin with high standards of conduct and safety in public schools as well as high standards for academic achievement in the public schools. The measure would also declare that pupils and school employees in public schools are entitled to certain rights relating to standards of conduct, school safety, and academic achievement.

Res. Ch. 49 (ACR 31) Morrissey. Grandchildren's Week.

This measure would proclaim the week of June 22, 1997 to June 28, 1997, inclusive, as Grandchildren's Week in California.

Res. Ch. 50 (ACR 56) Honda. Asian and Pacific Islander American Heritage Month.

This measure would commend Asian and Pacific Islander Americans for their accomplishments and service to the State of California, and would declare the month of May 1997 Asian and Pacific Islander American Heritage Month.

Res. Ch. 51 (SCR 41) Rainey. Mentoring Awareness Month.

This measure would declare the month of May 1997 as Mentoring Awareness Month.

Res. Ch. 52 (SCR 19) Brulte. New South Wales: sister state status.

This measure would extend an invitation to the people of the State of New South Wales, Australia, to join California as a sister state, and would encourage the fostering of social, economic, educational, scientific, and cultural exchanges, in order to strengthen mutual economic ties, and improve international understanding and good will.

Res. Ch. 53 (AJR 24) Murray. Black Music Month.

This measure would recognize the significance of African-American and other black music to global culture, and the positive impact of this art form on global commerce, would designate the month of June as Black Music Month throughout the State of

California, and would call upon the people of the state to study, reflect on, and celebrate the majesty, vitality, and importance of African-American and other black music.

Res. Ch. 54 (ACR 55) Wildman. Sober Graduation.

This measure would encourage parents, school teachers and administrators, law enforcement agencies, and community leaders to continue their efforts to provide Sober Graduation activities to the maximum number of high school graduates, their friends, and school associates.

Res. Ch. 55 (SCR 31) Alpert. San Diego State University.

This measure would commend San Diego State University on the occasion of its celebration of 100 years of accomplishments.

Res. Ch. 56 (SCR 36) Alpert. Girl Scouts of the United States of America: 85th anniversary.

This measure would recognize the celebration of the 85th anniversary of the Girl Scouts of the United States of America, and would encourage the people of California to participate in activities and celebrations appropriate to this occasion.

Res. Ch. 57 (SJR 1) Haynes. Auxiliary parachutes.

This measure would memorialize the Congress, the Federal Aviation Administration, and the United States Parachute Association to work together to extend the period for packing auxiliary parachutes composed of nylon, rayon, or other similar synthetic materials from 120 days to 180 days.

Res. Ch. 58 (ACR 5) Richter. Official State Fife and Drum Corps.

This measure would designate the California Consolidated Drum Band as the official State Fife and Drum Corps of California.

Res. Ch. 59 (SJR 20) Polanco. Indian gaming.

This measure would memorialize the President of the United States to issue an executive order permitting the California Indian tribes to continue to operate and regulate their respective gaming operations until appropriate legislation is enacted and compact remedies have been exhausted.

Res. Ch. 60 (AJR 19) Baca. The Southwest Defense Complex.

This measure would memorialize the President and Congress of the United States to endorse and support the Southwest Defense Complex, and the efforts of the Southwest Defense Alliance in furtherance of the Southwest Defense Complex.

Res. Ch. 61 (SCR 2) Johannessen. Earl Sholes and Dan Heryford Memorial Bridges.

This measure would designate a specified new bridge on Interstate Highway Route 5, in Shasta County, the Earl Sholes Memorial Bridge, and would designate its twin bridge the Dan Heryford Memorial Bridge. The measure would also request the Department of Transportation to determine the cost for appropriate signs showing those special designations and, upon receiving donations from nonstate sources covering that cost, to erect those signs.

Res. Ch. 62 (SCR 9) Kelley. Avocado Highway.

This measure would designate the section of Interstate Highway Route 15 between the junction of State Highway Route 78 in the City of Escondido and the City of Temecula the Avocado Highway.

The measure would also request the Department of Transportation to determine the cost of appropriate plaques and markers showing these designations and, upon receiving donations from nonstate sources covering that cost, to erect appropriate plaques and markers.

Res. Ch. 63 (SCR 18) Sher. Joint Committee on Headwaters Forest and Ecosystem Management Planning.

This measure would establish, until June 30, 1998, the Joint Committee on Headwaters Forest and Ecosystem Management Planning and authorize the joint committee to carry out specified tasks with regard to the September 28, 1996, agreement between the federal government, this state, and MAXXAM, Inc. to exchange government assets for Headwaters Forest and surrounding forestlands.

Res. Ch. 64 (ACR 1) Machado. Neighborhood Watch Month.

This measure would designate the month of August 1997 as Neighborhood Watch Month.

Res. Ch. 65 (SCR 22) McPherson. State Highway Route 156 Hollister Bypass Project: designation.

This measure would designate the State Highway Route 156 Hollister Bypass Bridge crossing the San Benito River the Ed Hanna Memorial Bridge and would designate the bypass itself the Veterans Memorial Highway. The Department of Transportation would be requested to determine the cost of appropriate plaques and markers showing these special designations and, upon receiving donations from nonstate sources sufficient to cover that cost, to erect appropriate plaques and markers.

Res. Ch. 66 (ACR 22) Napolitano. Relative to driver education.

This measure would recommend the inclusion in driver education courses of material that encourages the use of transit and alternative modes of travel.

Res. Ch. 67 (AJR 8) Honda. Vehicles: truck size and weight standards.

This measure would memorialize the President and the Congress to maintain the current standards relating to truck size and weight set forth in the federal Intermodal Surface Transportation Efficiency Act of 1991.

Res. Ch. 68 (AJR 11) Granlund. Meals for elderly.

This measure would memorialize the President and the Congress to maintain funding and index cost-of-living increases of funding for Congregate Nutrition Services and Home Delivered Nutrition Services.

Res. Ch. 69 (AJR 29) Baca. Military base closures.

This measure would memorialize the President and Congress of the United States to adopt specified guidelines and policies with respect to Base Realignment and Closure legislation.

Res. Ch. 70 (SJR 2) M. Thompson. The Gulf War Syndrome.

This measure would memorialize the President and Congress of the United States to take immediate action to ensure that all of the health care and family support needs of all Persian Gulf War veterans suffering from illnesses related to the Gulf War Syndrome are met prior to the conclusion of any further studies, that all possible causes of the Gulf War Syndrome be expeditiously and exhaustively researched, and that the actions of the Pentagon and the Department of Defense regarding release of information regarding the Gulf War Syndrome be fully investigated.

Res. Ch. 71 (SCR 34) M. Thompson. Robert H. "Bob" Weatherwax Memorial Bridge.

This measure would redesignate the St. Helena Bridge in Lake County the Robert H. "Bob" Weatherwax Memorial Bridge. The measure would also request the Department of Transportation to determine the cost of appropriate plaques and markers showing that special designation and, upon receiving donations from nonstate sources covering that cost, to erect those plaques and markers.

Res. Ch. 72 (AJR 30) Baca. McClellan Air Force Base.

This measure would memorialize the President and the Congress of the United States to protect the jobs of the hard-working men and women who serve our country at McClellan Air Force Base, by bringing in private firms to perform repair work at the facility.

Res. Ch. 73 (SJR 5) Haynes. March Air Force Base.

This measure would memorialize the President and Congress of the United States to recognize the importance of the Riverside County training center to the citizens of the county, and enact legislation that would add public safety projects to the list of programs that may be considered for federal surplus property.

Res. Ch. 74 (SJR 18) Karnette. Freight transportation.

This measure would memorialize the President and the Congress to make the intensity of use, as specified, a factor in the distribution of funds in the reauthorization of the federal Intermodal Surface Transportation Efficiency Act.

Res. Ch. 75 (AJR 16) Baca. Equal housing: disabled persons.

This measure would memorialize the President and Congress of the United States to study the impact of the Fair Housing Amendments Act on local governments, and evaluate how well the act is assisting individuals with disabilities.

Res. Ch. 76 (ACR 59) Woods. Big Bar and Big Flat Historical Monument.

This measure would request the Department of Transportation to grant, without charge, an encroachment permit authorizing an appropriate historical monument and plaque dedicated to the communities of Big Bar and Big Flat to be placed within the right-of-way of State Highway Route 299, in Trinity County, at a site that is approximately 1,050 feet east of post mile marker number 30.5.

Res. Ch. 77 (SCR 33) Haynes. Religious freedom in the People's Republic of China.

This measure would condemn all acts of religious intolerance and persecution worldwide. It would condemn human rights abuses and denials of religious liberty to Evangelical Protestants, Roman Catholics, Muslims, Buddhists, Jews, and other religious believers in the People's Republic of China, and call upon the People's Republic of China to end this persecution. This measure would call upon the President and Congress of the United States to continue to make the cessation of persecution of these religious believers in the People's Republic of China a priority objective of the United States' foreign policy. It would also call upon the State Department to use diplomatic means to effect the release of, and encourage the People's Republic of China to immediately release, religious prisoners from imprisonment.

Res. Ch. 78 (AJR 21) Migden. Spent nuclear fuel.

This measure would memorialize the President and Congress of the United States to call upon the United States Department of Energy to halt indefinitely the 5 planned shipments of spent nuclear fuel rods through the San Francisco Bay to the Concord Naval Weapons Station for land transport to Idaho and would memorialize the Department of Energy to prevent these shipments until specified actions are taken with regard to notice, safety and environmental impacts, and compensation.

Res. Ch. 79 (AJR 22) Kaloogian. Aircraft carrier Midway.

This measure would request the President, the Congress, and the Department of Defense to support the efforts of the citizens of the State of California and the County of San Diego to acquire the United States Navy aircraft carrier Midway for a regional museum and an educational and entertainment complex.

Res. Ch. 80 (AJR 28) Ducheny. Filipino war veterans.

This measure would memorialize and urge the President and Congress of the United States to enact House Resolution 836, to provide full benefits from the Department of Veterans Affairs to veterans who served in the Philippine Commonwealth Army and the Special Philippine Scouts during World War II.

Res. Ch. 81 (SCR 51) Costa. Nisei baseball: hall of fame.

This measure would request that the Nisei Baseball Leagues be honored with a permanent exhibit at the National Baseball Hall of Fame in Cooperstown, New York.

Res. Ch. 82 (AJR 7) Machado. Friant Dam.

This measure would memorialize Congress and the President of the United States to authorize and fund a prompt evaluation of the physical potential for, and economic feasibility of, raising Friant Dam and making use of the increased capacity to help meet flood protection and water supply needs for the citizens of this state, without impairing the existing rights of, and benefits to, and without altering the costs to, the current users of the waters of the San Joaquin River.

Res. Ch. 83 (ACR 65) Goldsmith. Truck Driver Appreciation Week.

This measure would declare the week of August 17 to August 23, 1997, to be Truck Driver Appreciation Week.

Res. Ch. 84 (AJR 25) Baca. Breast cancer research.

This measure would urge Congress and the President to enact the Breast-Cancer Research Stamp Act of 1997 to create a new first-class postage stamp which would be offered to patrons on a voluntary basis at 1¢ above the rate that would otherwise apply from the sale of each stamp to be expended for breast cancer research.

Res. Ch. 85 (SCR 25) Costa. Highways.

This measure would designate the newly constructed portion of State Highway Route 99 in and around the City of Livingston the Kenneth L. Maddy Freeway.

The measure would designate specified portions of State Highway Route 41 the Yosemite Freeway.

The measure would designate a specified portion of State Highway Route 168 the Sierra Freeway.

The measure would designate a specified portion of State Highway Route 180 the Sequoia-Kings Canyon Freeway.

The measure would designate the State Highway Route 41 and State Highway Route 180 interchange in the City of Fresno the Rose Ann Vuich Interchange.

The measure would also request the Department of Transportation to determine the cost of appropriate plaques and markers showing those special designations and, upon receiving donations from nonstate sources covering those costs, to erect those plaques and markers.

Res. Ch. 86 (AJR 17) Murray. Mexican and other foreign trucks in California.

This measure would memorialize the President and the Congress to maintain the existing restrictions on trucks from Mexico and other foreign nations entering California and continue efforts to assure full compliance by the owners and drivers of those trucks with all highway safety, environmental, and drug enforcement laws.

Res. Ch. 87 (SCR 13) Kopp. Professional basketball players: pensions.

This measure would express the view of the Legislature that certain surviving post-World War II, pre-1965 professional basketball players are entitled to both pensions and proper compensation for their intellectual property rights.

Res. Ch. 88 (SCR 40) Watson. Hepatitis A prevention.

This measure would request the State Department of Health Services to develop a plan to vaccinate food handlers in high-risk areas against hepatitis A virus infection, to encourage all food handlers in California to be vaccinated against hepatitis A, and to immediately begin a hepatitis A vaccination program in all Los Angeles schools.

Res. Ch. 89 (SCR 56) Lockyer. Legislative calendar.

This measure would change, from August 18 to August 25, the date upon which the Legislature concludes its summer recess in the first year of the 1997-98 Regular Session.

Res. Ch. 90 (ACR 43) Murray. State investments.

This measure would encourage the Board of Administration of the Public Employees' Retirement System, the State Treasurer, and the executive management of any state agency that is authorized to invest or transact financial businesses with private financial institutions that do business with Swiss banking interests to call upon the management
