PREFACE

Digests

The Summary Digest consists of a short summary of each law enacted, and of each constitutional amendment, concurrent or joint resolution adopted by the Legislature in 1998.

The text of the Summary Digest is arranged numerically by chapter number.

Superior numbers following the title refer to a Governor's Message affecting that law. These are printed after the digests in the "Digest Chapters Superior Numbers" section.

Cross Reference Tables

Cross reference tables are arranged numerically by bill or resolution number and indicate the chapter number of each.

New General Laws

Lists new general laws passed in the years 1989–1998 which do not specifically amend, add to, or repeal any existing code or general law.

Index

A subject matter index to all measures, including constitutional amendments and resolutions, is included.

Statutory Record

This edition of the Summary Digest includes a statutory record for 1989–1998. Superior numbers following the *Effect* refer to a special condition affecting that section.

Cumulative statutory records for 10-year periods, 1979–1988, 1969–1978, 1959–1968 and 1949–1958, and for the 16-year period, 1933–1948, are published in separate volumes, which supplement the original statutory record, 1850–1932, published in 1933.

EFFECTIVE DATES

Regular Session

The 1997–98 Regular Session reconvened on January 5, 1998, and adjourned *sine die* on November 30, 1998. Statutes enacted in 1998, other than those taking immediate effect, will become effective January 1, 1999. In absence of other considerations, the provisions of a statute become operative on the date it takes effect. Digests indicate statutes taking immediate effect.

An urgency statute, and a statute calling an election, providing for a tax levy, or making an appropriation for the usual current expenses of the state may take effect immediately. Such a statute becomes *effective* on the date it is filed with the Secretary of State.

However, any statute may, by its own terms, delay the *operation* of its provisions until the happening of some contingency, until a specified time, or until a vote of the electors at a statewide election. Also, a later statute or a general provision in a particular code may delay the operation of a statute to a time after its effective date.

The effective date of a joint or concurrent resolution is the date it is filed with the Secretary of State.

A constitutional amendment proposed by the Legislature and adopted by the people takes effect the day after the election unless the measure provides otherwise.

Extraordinary Sessions

An urgency statute enacted at a special session of the Legislature takes effect immediately, as outlined above, and the same rules apply with respect to a delayed *operative date*. A nonurgency statute takes effect on the 91st day after adjournment of the special session at which the bill was passed. The effective date of a concurrent resolution is the date it is filed with the Secretary of State.

The 1997–98 First Extraordinary Session reconvened on January 5, 1998, and adjourned *sine die* on September 1, 1998. Statutes enacted at an extraordinary session, other than those taking immediate effect, will become effective on the 91st day after adjournment. The 91st day after adjournment is December 1, 1998. Please refer to the preceding year's Statutes and Amendments to the Codes for statutes enacted prior to the reconvening date.

DIGESTS OF STATUTES
ENACTED IN 1998

1997–98 REGULAR SESSION

BILL CHAPTERS

Ch. 1 (AB 142) Brown. School districts.

(1) Existing law requires each county superintendent of schools to make specified calculations to determine a base revenue limit for each school district in the county. As part of that computation, existing law requires the Superintendent of Public Instruction to compute a revenue limit equalization adjustment for the 1996–97 fiscal year for each school district's base revenue limit pursuant to a provision under which the school district is classified in accordance with the size of its average daily attendance.

Notwithstanding these provisions, this bill would alter that formula with respect to any elementary, high, or unified school district that was funded in the 1996–97 school year as a large elementary, high, or unified school district by authorizing the use of the school district's actual revenue limit average daily attendance for the 1996–97 school year in the determination of the classification of the size of the school district under this provision.

(2) Under existing law, the creation of a district or the change in its boundaries is not effective for assessment or taxation purposes if a statement and map or plat is not filed by certain deadlines.

This bill would provide that notwithstanding those deadlines the boundary changes of the Rincon Valley Union Elementary School District and the City of Santa Rosa Elementary School District and the creation of the Eureka Unified School District are effective for assessment and taxation purposes for the 1998–99 fiscal year if the statement and map or plat are filed on or before January 31, 1998.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 2 (SB 71) Kelley. Natural hazards: disclosure.

Existing law requires certain information to be disclosed by the seller and the seller's agent to the prospective transferee when ownership of real property is proposed to be transferred. Existing law, operative March 1, 1998, requires, if one of 2 specified conditions are met, an additional disclosure by the seller or, in some cases, the seller's agent, to the prospective buyer with respect to real property located in an area subject to flooding or fire hazards, as specified, to be made either by the issuance of a specified natural hazard disclosure statement or in another specified disclosure statement. Existing law, operative March 1, 1998, also provides that a disclosure, with respect to earthquake fault zones and seismic hazards, need be given only if one of 2 specified conditions are met, and may be made in the natural hazard disclosure statement. Existing law, operative March 1, 1998, requires the counties to post a notice identifying the location of specified maps or lists containing information regarding areas of potential flooding and fire hazard severity, as specified.

This bill would provide that the above described provisions and other provisions of existing law regarding disclosure of natural hazards that become operative March 1, 1998, shall become operative June 1, 1998.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 3 (SB 10) Johnston. School facilities repayment waiver.

(1) Existing law permits the State Allocation Board to allocate funds from the School Facilities Bond Act of 1992 for the expenses of purchasing and installing air-conditioning equipment and insulation materials only for schools operated on a year-round multitrack schedule in a manner that increases school capacity and reduces or eliminates the school district's need for the construction of additional classroom space. Existing law requires a school district that has received an allocation of these funds for a school that was scheduled to begin operating year round in the second subsequent fiscal year but that did not begin operating year round in that fiscal year, to repay the amount allocated with interest to the State School Building Fund.

This bill would, upon finding that there is hardship, permit the State Allocation Board to waive the repayment requirement for funds allocated in the 1993–94 and 1994–95 school years to the Amador County Unified School District. The bill would be repealed on January 1, 2000.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 4 (SB 1184) M. Thompson. California Infrastructure and Economic Development Bank.

(1) Under the Bergeson-Peace Infrastructure and Economic Development Bank Act, the California Infrastructure and Economic Development Bank is established within state government with a board of directors having specified duties. The act authorizes the bank to make secured loans and undertake related activities for the purpose of financing projects, as defined, that relate to infrastructure improvements.

The bill would define “economic development facilities” and “public development facilities,” and revise the definition of “sponsor” and “project,” for the purposes of the act. This bill would specify that the bank is within the Trade and Commerce Agency.

This bill would revise the authority of the bank board of directors with regard to the duties it may perform or delegate to the executive director. This bill would also revise the authority of the bank to perform various functions, including, among other things, providing insurance or reinsurance of loans or their debt service, providing financing for public development facilities, as defined, and issuing revenue bonds. This bill would also require the legislative body of the sponsor applying for financing to make specified findings prior to submitting a project for bank consideration.

(2) Existing law establishes the California Economic Development and Financing Authority within the Trade and Commerce Agency to perform various activities in providing or arranging for the financing of specified economic development projects.

This bill would repeal the California Economic Development and Financing Authority, but would require the bank to assume and perform all the responsibilities of that authority.

Ch. 5 (SB 1311) Lockyer. Restitution Fund: loan.

Existing law, the Budget Act of 1997, authorizes \$26,000,000 to be transferred by the Controller from the Restitution Fund as a loan to the General Fund, to be repaid by June 30, 1999, as prescribed by the Director of Finance, without interest.

This bill would require the Director of Finance to authorize and direct the Controller to repay that loan in full, with specified interest, not later than April 1, 1998.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 6 (AB 382) Ducheny. Needy families: job training.

Existing law provides for the California Work Opportunity and Responsibility to Kids (CalWORKs) program, under which each county provides cash assistance and other benefits to qualified low-income families. Each county is required to pay a share of the cost of both aid grant and administrative costs for the CalWORKs program.

Existing law establishes various employment and training programs, including welfare-to-work programs for CalWORKs recipients.

Existing federal law provides for a program under which grant funds are provided to states for welfare-to-work programs.

This bill would enact provisions implementing this program in California, including requirements for the allocation of these federal funds by the department, as well as provisions governing their expenditure by grantees.

The bill would, commencing April 1, 1999, require the Employment Development Department to submit annual reports to the Legislature on this program.

The bill would appropriate, out of federal funds received for this purpose, \$161,855,000, to the department, for implementation of this program during the 1997–98 fiscal year.

Existing law requires each county to develop a plan that describes how the county intends to deliver the full range of activities and services necessary to move CalWORKs recipients from welfare to work, and specifies those elements that must be included in the plan.

This bill would revise the elements of that plan by requiring each county’s plan to describe how the county will coordinate welfare-to-work activities with the local private industry councils or alternate local administrative entities designated by the Governor to administer these programs, thus creating a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund

to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 7 (SB 519) Lockyer. Income and bank and corporation taxes: federal conformity and cleanup legislation.

The Personal Income Tax Law and the Bank and Corporation Tax Law allow a taxpayer to claim certain tax incentives for activities conducted within a targeted tax area, as defined, including a targeted tax area sales or use tax credit and a targeted tax area hiring credit.

This bill would, under both laws, allow both of those credits to reduce the tax below the tentative minimum tax, and allow a specified net operating loss deduction with respect to a taxpayer engaged in the conduct of a qualified business, as defined, within a targeted tax area.

The Personal Income Tax Law imposes, in specified conformity to federal income tax laws, a tax equal to the excess of the tentative minimum tax, as defined, over the regular tax.

This bill would change specified dollar exemption amounts, clarify certain terms pertaining to a qualified taxpayer, and provide that federal income tax provisions relating to the treatment of incentive stock options be modified, as provided.

The Personal Income Tax Law incorporates by reference various provisions of federal income tax laws, with specified exceptions and modifications.

This bill would provide additional conformity, with exceptions and modifications, to recently enacted federal income tax laws relating to, among other things, repeal of the mutual fund 30% rule, FASIT corrections, alternative minimum tax with respect to certain installment sales, appraisal for certain disaster losses, abatement of interest in presidentially declared disaster areas, rollover of gain on sale of qualified stock, termination of suspense accounts for family farm corporations, repeal of short-short rule for mutual funds and real estate investment trusts, taxation of earnings on funeral trusts, and survivor benefits for slain public safety officers.

Existing law pertaining to the administration of the Personal Income Tax Law and the Bank and Corporation Tax Law imposes specified filing requirements and penalties.

This bill would clarify that taxpayers whose only income for 1997 is from the excludable gain on the sale of a personal residence are subject to specified filing requirements. This bill would reinstate for 1997 the penalty for failure to file medical savings account reports. This bill would also make technical and clarifying changes to those administrative provisions.

This bill would, under the Personal Income Tax Law or the Bank and Corporation Tax Law, or both, delete duplicate sections, clarify certain operative dates, and make other technical and clarifying changes, as provided.

This bill would take effect immediately as a tax levy, but specified provisions would become operative as provided.

Ch. 8 (AB 255) H. Thomson. Prescription lenses: spectacles.

Existing law provides for the regulation of prescription lenses, including ophthalmic lenses. Under existing law, it is unlawful for any person to dispense, replace, or duplicate an ophthalmic lens or ophthalmic lenses without a prescription or order from a duly licensed physician and surgeon or optometrist. Existing law also provides for the licensure and regulation of registered dispensing opticians, including spectacle lens dispensers, and provides that a violation of these provisions is subject to criminal sanction.

This bill would require a spectacle lens prescription to include certain information, including the dioptric power of the lens or when the prescription has not changed, the statement "copy current prescription," and an expiration date. The bill would prohibit the expiration date of a spectacle lens prescription from being less than 2 to 4 years from the date of issuance, with certain exceptions. The bill would require the prescriber to inform the patient of the expiration date when the prescription is issued, and would

provide that the expiration date of a prescription may be extended by the prescriber and transmitted by telephone, electronic mail, or other means. It would also prohibit the filling of any spectacle lens prescription without this information, and would prohibit the filling of any spectacle lens prescription after the expiration date of the prescription unless certain conditions exist, including that the patient's spectacles are lost or unusable. The bill would provide that a violation of these prohibitions is not a crime, but shall be considered unprofessional conduct by the board that issued the dispenser's certificate to practice.

Ch. 9 (AB 168) Torlakson. Taxation: credit: low-income housing.

Existing insurance tax law and the existing Personal Income Tax Law and Bank and Corporation Tax Law allow taxpayers a credit against the taxes imposed by these laws for providing specified low-income housing, and require the California Tax Credit Allocation Committee to allocate the credit in accordance with specified criteria. Those laws provide that the maximum aggregate housing dollar amount that can be allocated or granted under those laws cannot exceed \$35,000,000 per year.

This bill would increase the maximum aggregate housing dollar amount that can be allocated or granted to \$50,000,000 for each of the calendar years 1998 and 1999.

This bill would take effect immediately as a tax levy, however its provisions would be operative as specified.

Ch. 10 (SB 103) Maddy. Horse racing: thoroughbred racing.

Under existing law, the organization representing the horsemen at a horse racing event receives distributions of funds for purses to be paid to or for the benefit of the horsemen at the racing meeting. Of the portion of the takeout to be paid as purses, the horsemen's organization representing the horsemen receives a percentage for administrative expenses and services rendered to the horsemen. Depending upon the type of racing meeting involved, the amount to be paid to the organization for administrative fees is specified by statute, by contract, or by the California Horse Racing Board.

This bill would require any association, including a fair, that conducts thoroughbred racing to pay to the owners' organization contracting with the association an additional percentage for a national marketing program, as specified, to promote thoroughbred racing unless the owners' organization chooses not to contribute to the program. The bill would require the owners' association annually to file a report with the board and the Legislature, as specified, accounting for the receipt and expenditures of these funds.

The bill would repeal that requirement as of January 1, 2004.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 11 (AB 759) McClintock. Real estate: subdivisions.

Existing law provides for the regulation of real estate transactions, including subdivided lands transactions.

This bill would delete obsolete references to a section that was repealed on January 1, 1997, relating to subdivided lands.

Ch. 12 (SB 44) Maddy. Horse racing.

Existing law requires that the total amount of stakes purse distributed to horsemen and horsewomen for California-bred stakes races from the purse account be not less than a certain percentage of the total amount distributed for all stakes races from the purse account at that race meeting.

This bill would provide that those provisions would apply only to thoroughbred and quarter horse racing.

Existing law provides that, notwithstanding any other provision of law and in addition to any amounts provided for in purse distributions, a specified owner premium shall be deducted from the total advertised purse for any open thoroughbred race, excluding a stakes race, to be paid to the owner of a certified California-bred thoroughbred that finishes first. Existing law distinguishes between, and provides different premiums for, certified California-bred thoroughbreds based on whether or not the horse in question was conceived by a certified California-bred thoroughbred stallion.

This bill would provide that an amount equal to 10% of the first money of each purse won by a registered California-bred horse at a harness racing meeting, other than a standardbred stakes race or late closing event, shall be paid by the licensee as a premium to the owner of that California-bred horse. The bill would provide that these funds shall be paid from the amount deducted from the parimutuel pool for purses, and that the premium shall be distributed by the association no later than 30 calendar days following the conclusion of the harness racing meeting.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 13 (AB 487) Leach. California Public Records Act: unlisted access numbers.

Under the California Public Records Act, certain public records are required to be made available for public inspection. Under existing law, a telephone corporation selling or licensing lists of residential subscribers is prohibited from including the telephone number of any subscriber assigned an unlisted or unpublished access number except for specified purposes, one of which is to a private for-profit agency operating under contract with, and at the direction of, one or more of various listed agencies, for the exclusive purpose of responding to a 911 call or communicating an imminent threat to life or property.

This bill would provide that these unlisted or unpublished access numbers shall not be subject to disclosure pursuant to the act.

Ch. 14 (AB 707) Ackerman. Real property: restrictions.

Under existing law, a covenant for the addition of some new thing to real property, or for the direct benefit of some part of the property not then in existence or annexed thereto, when contained in a grant of an estate in the property, and made by the covenantor expressly for the covenantor's assigns or to the assigns of the covenantee, runs with the land so far only as the assigns are concerned.

This bill would repeal this provision.

Under existing law, an action for mesne profits of real property is required to be commenced within 5 years.

This bill would provide that an action for violation of a restriction, defined to mean a limitation on, or provision affecting, the use of real property in a deed, declaration, or other instrument, whether in the form of a covenant, equitable servitude, condition subsequent, negative easement, or other form of restriction, shall be commenced within 5 years, as specified.

Ch. 15 (AB 1243) Granlund. Local sales and use taxes: allocation.

The Sales and Use Tax Law and the Bradley-Burns Uniform Local Sales and Use Tax Law impose a tax on the storage, use, or other consumption in this state of tangible personal property purchased from any retailer. Existing law authorizes the State Board of Equalization to issue use tax direct payment permits, under certain circumstances, so that any permitholders may pay the use tax liability directly to the board. Existing law also requires the board to allocate local use taxes not reported to a county, city, city and county, or redevelopment agency based on the distribution of those local use taxes in the prior quarter.

This bill would delete those provisions that require the board to allocate local use taxes not reported to a county, city, city and county, or redevelopment agency based on the distribution of those local use taxes in the prior quarter.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 16 (AB 1427) Pringle. Local agencies: shopping cart retrieval.

Existing law authorizes a city, county, or city and county to impound certain shopping carts, and requires as a condition of impound, among other things, that the cart not have been retrieved within 3 business days from the date the owner receives actual notice from the city, county, or city and county, of the shopping cart's discovery and location.

This bill would authorize a city, county, or city and county, to impound a shopping cart without complying with the 3-day notice subject to specified conditions. The bill would make related changes and specifically authorize local regulation except to the extent that it conflicts with state law.

Ch. 17 (AB 1514) Goldsmith. Fire protection districts.

Existing law authorizes fire protection districts to enter into mutual aid agreements with any federal or state agency, any city, county, city and county, or special district.

This bill would extend that authorization to authorize fire protection districts to enter into mutual aid agreements with any federally recognized Indian tribe.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 18 (SB 460) Kelley. Local health care districts.

Existing law, the Local Health Care District Law, provides for the formation of local health care districts and authorizes a district to transfer, at fair market value, any part of its assets to one or more nonprofit corporations to operate and maintain the assets, subject to certain requirements. Existing law also requires the approval of a majority of the voters of the district in the case of transfers of 50% or more of district assets to one or more nonprofit corporations.

This bill would, until January 1, 2001, amend these provisions to refer to transfers to corporations, instead of nonprofit corporations. The bill would make conforming changes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 19 (SB 536) Mountjoy. Sexually violent predators.

(1) Existing law, repealed by its own terms as of January 1, 1998, authorized the Board of Prison Terms to order that a person who is screened as a sexually violent predator and referred to the State Department of Mental Health for full evaluation remain in custody for no more than 45 days.

This bill would reenact this provision. The bill would provide that no person may be placed in a state hospital pursuant to these provisions until there has been a determination that there is probable cause to believe that the person named in the petition filed pursuant to these provisions is likely to engage in sexually violent predatory criminal behavior. The bill also would require the State Department of Mental Health to identify each person for whom a petition has been filed who has not had a probable cause hearing and to notify the court that the person has not had a hearing.

(2) Existing law, repealed by its own terms as of January 1, 1998, required a judge of the superior court to review any petition submitted by an agency requesting an urgency review in cases where an inmate's parole or temporary parole hold will expire before a probable cause hearing is conducted and to determine whether there is probable cause to believe that the individual named in the petition is likely to engage in sexually violent predatory criminal behavior upon his or her release.

This bill would reenact this provision.

(3) Existing law requires a person who is determined to be a sexually violent predator to be committed for 2 years to the custody of the State Department of Mental Health for appropriate treatment and confinement in a secure facility, as specified.

This bill would provide, until January 1, 1999, that the 2-year term of commitment as a sexually violent predator commences on the date upon which the court issues the initial order of commitment and shall not be reduced by any time spent in a secure facility prior to the order of commitment. The bill would specify that this provision does not constitute a change in, but is declaratory of, existing law.

(4) Existing law requires the State Department of Mental Health to notify local law enforcement officials 15 days prior to the scheduled release of a sexually violent predator.

This bill instead would require the department to notify local law enforcement officials 15 days prior to the submission to a court of its recommendation for community outpatient treatment for any person committed as a sexually violent predator or its recommendation not to pursue recommitment of the person.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 20 (SB 1255) Polanco. Health care: payment of claims.

Existing law provides for the licensure and regulation of the healing arts professions and, in this regard, authorizes health care providers, as defined, to grant discounts in health or medical claims submitted to 3rd-party payers when payment by the 3rd-party payer is made promptly within prescribed time limits.

This bill would revise this provision to delete the reference to 3rd-party payers, and instead authorize providers to grant discounts in health or medical claims when payment is made promptly within prescribed time limits. This bill would also expressly authorize a health care provider to grant discounts for health or medical care to any patient the provider has reasonable cause to believe is not eligible for, or entitled to, insurance reimbursement, or coverage under Medi-Cal or by a health care service plan for the health or medical care provided.

This bill would, in the case of a contract between a provider and a plan or a provider and an insurer issued, amended, or renewed on or after the effective date of this provision, that requires the provider to accept as payment from the plan or insurer the lowest payment rate charged by the provider to any patient, prohibit this contract provision from being deemed to apply to, or take into consideration, any cash payment made to the provider by individual patients who do not have any private or public form of health coverage for the services rendered by the provider and to whom a discount was granted under those provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 21 (SB 615) Burton. State employees.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of a memorandum of understanding entered into between the state employer and a specified employee organization, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

(2) Existing law generally requires state agencies to adopt regulations pursuant to procedures set forth in the Administrative Procedure Act, but exempts the Department of Personnel Administration from the Administrative Procedure Act with respect to regulations that apply exclusively to state employees in State Bargaining Unit 5. Existing law provides alternative procedures for the department to use in the adoption, amendment, or repeal of regulations that apply exclusively to state employees in State Bargaining Unit 5.

This bill would also exempt the Department of Personnel Administration from the Administrative Procedure Act with respect to regulations that would apply exclusively to state employees in State Bargaining Unit 6. This bill would make applicable to state employees in State Bargaining Unit 6 the same alternative procedures for the department to use in the adoption, amendment, or repeal of a regulation that apply to state employees in State Bargaining Unit 5, including, among other things, a public comment period, preparation of specified information relative to the proposed rule action, public notice, a public hearing, and publication in the California Code of Regulations.

(3) Existing law contains various provisions relating to civil service and employer-employee relations between the state and its employees, and contains comparable provisions that apply only to state employees in State Bargaining Unit 5.

This bill would enact comparable provisions, with respect to appointments from a general reemployment list, reinstatements, probationary periods, layoffs, demotions, nonmerit statutory appeal hearings, the use of broadband classifications, and demonstration projects on classification, compensation, and related projects that would apply to state employees in State Bargaining Unit 6.

(4) Existing law, with specified exceptions, provides that all contracts entered into by any state agency for the hiring or purchase of a variety of goods and services, including equipment, supplies, textbooks, and repair or maintenance, are void unless approved by the Department of General Services.

This bill would exempt contracts entered into by the Department of Personnel Administration for employee benefits, training services, or both, for state employees in

State Bargaining Unit 6 from this requirement of Department of General Services' approval.

(5) Existing law, the Public Employees' Retirement Law, establishes the Public Employees' Retirement System, and sets forth the provisions for its administration and the delivery of benefits to its members.

This bill would establish the State Peace Officers' and Firefighters' Defined Contribution Plan for state peace officer or firefighter members in State Bargaining Unit 6 to supplement the benefits provided under the Public Employees' Retirement System. This bill would establish the State Peace Officers' and Firefighters' Defined Contribution Plan Fund in the State Treasury for the plan and provide that all moneys in the fund are continuously appropriated for payments of the plan.

(6) Existing law, the Public Employees' Medical and Hospital Care Act, provides health benefits plan coverage to public employees and annuitants meeting the eligibility requirements prescribed by the Board of Administration of the Public Employees' Retirement System. A provision of that act prescribes eligibility requirements for permanent intermittent state employees.

This bill would provide that if the above provision is in conflict with the provisions of a memorandum of understanding reached pursuant to the Ralph C. Dills Act, the memorandum of understanding shall be controlling without further legislative action, except that if the provisions of the memorandum of understanding require the expenditure of funds, the provisions shall not become effective unless approved by the Legislature in the annual Budget Act.

(7) Existing law, the State Employees' Dental Care Act, provides dental care plan coverage to public employees and annuitants meeting the eligibility requirements prescribed by the Board of Administration of the Public Employees' Retirement System.

This bill would provide that notwithstanding particular provisions of the act, employees in State Bargaining Unit 6 who meet specified qualifications may receive a percentage of the employer's contribution payable for annuitants if the employees are credited with 10 or more years of state service and would provide that the amount of payment would be based upon the member's completed years of state service.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 22 (AB 12) Davis. Health care coverage: obstetricians and gynecologists: direct access.

Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, willful violation of any of these provisions is a crime. Existing law also provides for the regulation of policies of disability insurance by the Insurance Commissioner.

Existing law requires health care service plans, and disability insurers that cover hospital, medical, or surgical expenses, to include obstetrician-gynecologists as primary care physicians or providers, as defined.

This bill would, additionally, require every health care service plan contract or disability insurance policy that covers medical expenses, that is issued, amended, delivered, or renewed on or after January 1, 1999, to allow an enrollee or policyholder the option to seek obstetrical and gynecological physician services directly from an obstetrician and gynecologist or a family practice physician and surgeon, or a participating obstetrician and gynecologist or a participating family practice physician and surgeon in the case of a health care service plan contract, subject to certain procedures. The bill would authorize a plan or insurer to establish reasonable requirements for the participating physician to communicate certain information to the enrollee's or policyholder's primary care physician and surgeon. The bill would require the Department of Corporations and the Insurance Commissioner to report to the Legislature, on or before January 1, 2000, on the implementation of these provisions. By expanding the coverage responsibilities of health care service plans, this bill would expand the definition of the crime applicable to health care service plans, and thereby would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 23 (AB 607) Scott. Health care service plans.

Existing law provides for the licensure and regulation of health care service plans by the Department of Corporations. Existing law requires each plan's disclosure form to contain prescribed information regarding the coverage provided by the plan. Existing law provides that a willful violation of the provisions governing health care service plans is subject to criminal sanction.

This bill would require a plan's disclosure form to contain a notice providing enrollees and prospective enrollees with certain information, including the importance of reading the disclosure form and evidence of coverage, notice of the plan's telephone numbers, and other information. It would also require each plan to provide with the disclosure form for individual and small group plan contracts a uniform Health Plan Benefits and Coverage Matrix, that would include specified information in order to facilitate comparisons between plan contracts. The bill would provide that the provisions regarding the matrix do not apply to any coverage provided by a plan for the Medi-Cal or Medicare program.

By imposing this requirement on health care service plans, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 24 (SB 268) Knight. Necessary small schools: Sierra Sands Unified School District.

Existing law defines a necessary small school as an elementary school with an average daily attendance of less than 101, exclusive of pupils attending grades 7 and 8 of a junior high school, maintained by a school district that maintains 2 or more schools, that meets other criteria involving combinations of distance and average daily attendance. Existing law requires the county superintendent of schools to make computations for each elementary and secondary school district that has fewer than 2,501 units of second principal apportionment average daily attendance and maintains at least one school that meets the criteria for a necessary small school.

This bill would deem Rand Elementary School to be a necessary small school and make the Sierra Sands Unified School District eligible to receive apportionments for the school pursuant to its status as a necessary small school. This bill would provide that if the average daily attendance of the Rand Elementary School exceeds 100, then the school would no longer be eligible to receive apportionments as a necessary small school.

Ch. 25 (AB 1016) Hertzberg. Peace officers: personnel files.

Existing law requires each department or agency in this state that employs peace officers to establish a procedure to investigate citizens' complaints against the personnel of these departments or agencies, and to make a written description of the procedure available to the public. Existing law also requires that complaints shall be retained for a period of at least 5 years.

Existing law further provides that complaints by members of the public that are determined by the peace officer's employing agency to be frivolous shall not be maintained in that officer's general personnel file, but these complaints and any reports or findings relating to these complaints shall be retained in other, separate files that shall be deemed personnel records for purposes of the California Public Records Act and provisions relating to the discovery and disclosure of a peace officer's personnel records.

This bill would make complaints that are determined to be unfounded or exonerated subject to these provisions and accessible to management of the peace officer's employing agency pursuant to specified conditions. The bill would provide that all complaints retained under these provisions may be maintained either in the officer's general personnel file or in a separate file designated by the department or agency. The

bill would require that, prior to any official determination regarding promotion, transfer, or disciplinary action by an officer's employing department or agency, any complaints determined to be frivolous, as defined, unfounded, or exonerated shall be removed from the officer's general personnel file and placed in a separate file designated by the department or agency. The imposition of these additional requirements on local agencies would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 26 (AB 1203) Kuykendall. Real estate.

The Real Estate Law requires every real estate licensee who negotiates a loan secured by a trust deed on real property to cause that trust deed to be recorded, naming as beneficiary the lender or the lender's nominee, prior to the time that funds are disbursed on the loan, as specified. Existing law also requires a real estate licensee who sells, exchanges, or negotiates the sale or exchange of a real property sales contract or a promissory note secured by a trust deed on real property to cause a proper assignment of the contract or trust deed to be executed and recorded, naming as assignee the purchaser or the purchaser's nominee, as specified.

This bill would provide that a trust deed may be recorded in the name of the real estate broker negotiating the loan if the lenders or purchasers are certain governmental or financial institutions or other specified persons or entities, the trust deed is recorded with the county recorder of the county in which the property is located, and the real property securing the loan as described in the trust deed is not a dwelling or unimproved real property.

Ch. 27 (AB 834) Aroner. Special election: consolidation.

Existing law authorizes the Governor to issue a proclamation calling a special election to fill a vacancy in the office of a Member of the Legislature. Existing law establishes time periods within which that special election may be conducted.

This bill would provide that, notwithstanding those time periods, a special general election only to fill the vacancy in the 9th Senate District may be conducted more than 180 days following the proclamation of the Governor in order to consolidate the special general election with the November 3, 1998, statewide general election.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 28 (AB 986) Migden. Department of Corrections: disabled inmates.

Existing law authorizes the Department of Corrections to prepare plans for, and construct facilities and renovations included within, its master plan for prison construction and operation.

This bill would appropriate \$6,558,000 to the Department of Corrections from the General Fund to fund the statewide Disability Placement Program and facility modifications for the purpose of providing accessibility for disabled inmates.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 29 (SB 845) Haynes. State Bar of California: law students' examination.

The State Bar Act provides that, in order to be admitted to practice law, an applicant must meet certain requirements, including, in the case of persons who have been admitted to practice law in other jurisdictions for more than 4 years, passing the so-called "Attorneys' Examination." However, there are no express provisions allowing for the admission to practice law in the state of persons admitted in other jurisdictions for 4 years or less.

This bill would specify certain criteria for the admission to the State Bar of all individuals who are admitted to practice law in other jurisdictions, including those admitted for 4 years or less.

This bill would state that its provisions are declaratory of existing law.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 30 (SB 1019) Alpert. School employees: absences.

Existing law precludes the amount deducted from the salary of a school district employee employed in a position requiring certification qualifications due to absence on account of illness or accident for a period of 5 school months or less from exceeding the sum actually paid to a substitute employee employed to fill his or her position.

This bill would condition this prohibition on continued absence after the employee has exhausted all available sick leave. The bill would require that the 5-month period and the sick leave run consecutively and would limit an employee to one 5-month period per illness or accident.

This bill would require placement of the certificated employee, who has exhausted all available sick leave and continues to be absent on account of illness or accident and who is not medically able to resume his or her duties, on a reemployment list for a period of 24 months if the employee is on probationary status, or for a period of 39 months if the employee is on permanent status, unless the employee is placed in another position. The bill would require that during the 24 or 39 month period, the certificated employee be returned to employment in a position for which he or she is credentialed and qualified when the employee is medically able.

By requiring that school district to comply with these differential pay and reemployment provisions, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 31 (AB 1181) Escutia. Health care coverage.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Commissioner of Corporations and makes the willful violation of these provisions subject to criminal sanction.

This bill would require every health care service plan, except a specialized health care service plan, to establish and implement procedures by which an enrollee could receive a standing referral, as defined by the bill, to a specialist and by which an enrollee with a condition or disease that requires specialized medical care over a prolonged period of time and is life-threatening, degenerative, or disabling could receive a referral to a specialist who, or a specialty care center, as defined, that, has expertise in treating the condition or disease for the purpose of having the specialist, or the specialty care center, coordinate the enrollee's health care. Because the bill would change the definition of an existing crime, it would impose a state-mandated local program.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which benefits are provided to public assistance recipients and certain other low-income persons.

Existing law prohibits approval or renewal of a contract between the department and a prepaid health plan, unless the providers and the facilities of the prepaid health plan meet the Medi-Cal program standards for participation as established by the director, and the prepaid health plan meets certain standards under the Knox-Keene Health Care Service Plan Act of 1975, standards specifically required by federal law, and other prescribed requirements.

This bill would, similarly, prohibit approval or renewal of contracts between the department and a prepaid health plan that is contracting with, or that is governed,

owned, or operated by, a county board of supervisors, unless the standards set forth in this bill are met, and would require that the treatment plan developed pursuant to these provisions be consistent with federal and state medicaid requirements. The bill would provide that nothing in those provisions is intended to alter or abrogate any other requirements of federal or state law with regard to medicaid.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 32 (AB 546) Floyd. Horse racing: quarter horse breeders.

Existing law defines the term "eligible quarter horse sire" to require that a sire which left the state following a specified date in the year in which a qualifying race was run, must have returned and been present for a specified period of the following year in order for the term to apply.

This bill would instead provide that for the term to apply, the sire must be present in this state for both a specified period in the year of the qualifying race as well as a specified period in the year following that race.

Existing law provides for the division of a portion of moneys deducted from the handle to be deposited with the quarter horse registering agency for the benefit of, and to be paid to, quarter horse breeders, owners, and stallion awards. With regard to breeders, existing law provides that they shall be paid a sum based on a prorated share of first and 2nd place earnings from qualified races by California-bred quarter horses.

This bill would provide that this prorated rate paid to breeders be no less than 10% of the specified earnings, and that if the available pool of funds deposited with the registering agency is insufficient for this purpose, that moneys be taken from the owner and stallion award pools, pursuant to a specified ratio, to make up the difference. The bill would apply earning ceilings to calculations of this breeder premium, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 33 (AB 1058) Cardoza. Milk marketing.

Existing law, which is to be repealed on January 1, 1999, prohibits a dairy cow farm that was marketing market milk on August 1, 1996, from marketing manufacturing milk, but permits such a dairy to elect to market manufacturing milk for the 12-month period beginning January 1, 1997, or for the 12-month period beginning January 1, 1998, or for both of those time periods.

This bill would continue that existing law beyond January 1, 1999, by eliminating that repeal date. This bill would also permit a dairy cow farm subject to its provisions to elect annually on January 1 to market manufacturing milk for a 12-month period.

Ch. 34 (AB 544) Lempert. Charter schools.

Existing law, the Charter Schools Act of 1992, permits teachers, parents, pupils, and community members to petition a school district governing board to approve a charter school to operate independently from the existing school district structure as a method of accomplishing, among other things, improved pupil learning.

Existing law, with certain exceptions, establishes the maximum number of charter schools in California at 100 and the maximum number of 10 in any single school district.

This bill would delete this provision, and would instead, establish the statewide maximum at 250 charter schools for the 1998-99 school year with an additional 100 charter schools per school year thereafter.

The bill would require the Legislative Analyst to contract for an evaluation and to report to the Legislature and the Governor by July 1, 2003, regarding the effectiveness of the charter school approach.

This bill would preclude receipt of public funds by a charter school if the pupil also attends a private school that charges the family for tuition, and would authorize the State Board of Education to adopt implementing regulations.

This bill would provide that a charter school may elect to operate as a nonprofit public benefit corporation and would entitle the school district that grants the charter to have one representative on the board of directors of the nonprofit public benefit corporation.

Existing law permits a petitioner to submit for the approval of the governing board of a school district, a petition for the establishment of a charter school after the petition has been signed by at least 10% of the teachers currently employed in the district, or by at least 50% of the teachers currently employed at one school of the district and establishes a process for review of a denial of the petition, including, but not limited to, the convening of a review panel, and the granting of the charter by the county board of education.

This bill would delete these provisions and would, instead, authorize the submission of a petition after the petition has been signed by a number of parents or guardians of pupils equal to at least $\frac{1}{2}$ of the pupils that the charter school estimates it will enroll in its first year, or after the petition has been signed by a number of teachers equal to at least $\frac{1}{2}$ of the number of teachers that the charter school estimates will be employed at the charter school during its first year. In the case of petitions for establishment of a charter school by converting an existing public school, the bill would permit filing of the petition after the petition has been signed by at least 50% of the permanent status teachers currently employed at the public school to be converted.

This bill would authorize the State Board of Education to grant a charter for the establishment of a charter school. This bill would permit the petitioner to elect to file the petition with either the county board of education or directly with the State Board of Education, and in the case of a denial by the county board of education, the bill would permit petitioners to file with the State Board of Education. The bill would permit the State Board of Education to, by mutual agreement, designate a local educational agency to perform the State Board of Education's supervisorial and oversight responsibilities as a chartering agency, and would grant the local educational agency all related powers, excluding the power of revocation of the charter.

This bill would authorize the State Board of Education to take action, including, but not limited to, revocation of the charter if, based upon the recommendation of the Superintendent of Public Instruction the State Board of Education makes certain findings relating to, financial mismanagement, illegal or improper use of funds, or substantial and sustained departure from measurably successful practice.

This bill would require that teachers in charter schools be required to hold a Commission on Teacher Credentialing certificate, permit, or other document equivalent to that which a public school teacher would be required to hold.

Existing law requires a charter school to comply with its charter but generally exempts it from all laws governing school districts, with certain exceptions relating to the State Teachers' Retirement System and the Charter School Revolving Loan Fund.

This bill would add all laws establishing a minimum age for public school attendance to the provisions from which a charter school is not exempt.

Existing law requires the Superintendent of Public Instruction to make certain apportionments to each charter school for each fiscal year.

This bill would require that, only upon adoption of implementing regulations, charter school operational funding, as defined, be equal to the total funding that would be available to a similar school district, as defined, serving a similar pupil population, and would require the State Department of Education to propose, and the State Board of Education to adopt, implementing regulations. The bill would, with certain exceptions, permit a chartering agency to charge up to a 1% charge for actual costs of oversight, or up to 3% for these costs if the chartering agency provides substantially rent free facilities to the charter school, or if the agency is a designated local education agency in the case of charters granted by the State Board of Education.

This bill would require a charter school to admit all pupils, would provide for a selection by random drawing in cases where the demand exceeds the capacity and would require that certain preferences be given in the case of pupils currently in the charter school. The bill would preclude the generating of average daily attendance in a charter school by a pupil who is not a resident of California. The bill would require a pupil over 19 to be continuously enrolled in public school and make satisfactory progress towards a high school diploma in order to remain eligible for generating charter school

apportionments, and would require the State Board of Education to adopt implementing regulations by January 1, 2000.

By requiring local agencies to perform these additional duties relating to the formation, monitoring, and administration of charter school, this bill would impose a state-mandated local program.

The bill would declare that certain of its provisions are severable if held invalid, and would make conforming changes and other changes of a technical, nonsubstantive nature.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 35 (SB 147) Kopp. Local agency borrowing.

Under the Marks-Roos Local Bond Pooling Act of 1985, a joint exercise of powers authority may issue bonds to assist local agencies in financing public capital improvements, working capital, liability or other insurance needs, or projects whenever there are significant public benefits for taking that action.

This bill would provide that an authority, with certain exceptions, may not issue bonds to construct, acquire, or finance a public capital improvement unless (a) the authority reasonably expects on the date of issuance of the bonds that the public capital improvement is to be located within the geographic boundaries of one or more members of the authority that is not itself an authority; and (b) a member of the authority within whose boundaries the public capital improvement is to be located has approved the public capital improvement and has made a finding of significant public benefit after a public hearing.

Ch. 36 (SB 411) Peace. Residential care.

Existing law provides for the licensure and regulation of community care facilities and residential care facilities for the elderly by the State Department of Social Services . Existing law requires that, prior to employment, an administrator of an adult residential care facility or a residential care facility for the elderly successfully complete a department approved certification program in accordance with specific requirements for each type of facility.

Under existing law, an administrator of an adult residential care facility or residential care facility for the elderly is required to be recertified every 2 years, on the anniversary date of recertification.

This bill would require an administrator of either of these types of facilities who is initially certified on or after January 1, 1999, to irrevocably elect, at the time of initial certification, to have his or her recertification date, for any subsequent recertification, either on the date 2 years from the date of issuance of the certificate or on the individual's birthday during the 2nd calendar year following certification.

Ch. 37 (AB 1207) Committee on Labor and Employment. Wages of motion picture employees.

Under existing law, an employer who lays off a group of employees engaged in the production of motion pictures whose unusual or uncertain terms of employment require special computation in order to ascertain the amount due, is deemed to have made immediate payment of wages due if the employees are paid within the reasonable time necessary for computation or payment, not exceeding 24 hours.

This bill instead would provide that an employer who lays off one of those type of employees is deemed to have made immediate payment of wages if the wages of the employee are paid by the next regular payday following the layoff, as prescribed. The bill also would provide that if an employee is discharged, payment of wages is required to be made within 24 hours after discharge, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 38 (AB 1051) Bordonaro. Telecommunications devices: deaf or hearing impaired individuals.

Existing law requires the Public Utilities Commission to design and implement a program whereby each telephone corporation provides a telecommunications device capable of servicing the needs of individuals who are deaf or hearing impaired, together with a single party line, at no charge additional to the basic exchange rate, to any subscriber who is certified as an individual who is deaf or hearing impaired by a licensed physician and surgeon, audiologist, or a qualified state or federal agency, and to specified other subscribers. Existing law provides that a licensed hearing aid dispenser may recommend an individual to a licensed physician and surgeon or audiologist for purposes of participation in the program.

This bill would revise the latter provision to, instead, authorize a licensed hearing aid dispenser to certify the need of an individual to participate in the program if that individual has been previously fitted with an amplified device by the dispenser and the dispenser has the individual's hearing records on file prior to certification. The bill would declare the intent of the Legislature that its provisions shall not increase the surcharges to fund the program.

Ch. 39 (SB 258) Kopp. Redevelopment agencies: reporting requirements.

(1) Existing law requires the Controller to compile and annually publish, on or before April 1 of each year, reports of the financial transactions of each project area of each community redevelopment agency, as specified.

This bill would require the Controller to make the data used in the report available to the Legislature on or before April 1 of each year and would allow the Controller until May 1 of each year to publish the report.

(2) Existing law requires local agencies, including redevelopment agencies, to file certain financial reports with the Controller within enumerated time deadlines, and subjects officers of the agencies to specified monetary forfeitures for failure to comply.

This bill would increase the penalties for officers of a redevelopment agency for the failure or refusal to file the reports and would require the Controller to audit a redevelopment agency, at the agency's expense, that fails to file for 3 or more years.

(3) Existing law requires the Department of Housing and Community Development to compile and publish reports on or before April 1 of each year, on the activities of redevelopment agencies for the previous fiscal year, based on information reported by the redevelopment agencies. This law requires the department to provide each redevelopment agency for which information was provided under these provisions a copy of its report.

This bill would change the deadline for publishing the report to May 1 and require the Department of Housing and Community Development to send only executive summaries to those redevelopment agencies for which information was reported unless a copy of the report is requested.

(4) The existing Community Redevelopment Law requires the county auditor, upon the request of a redevelopment agency, to prepare a statement that provides the amount of disbursement made pursuant to specified provisions of law.

This bill would also require the county auditor to prepare a statement for each project area that provides the amount of disbursement made pursuant to specified provisions of law. This requirement would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 40 (SB 488) Kopp. Redevelopment: redevelopment agencies: annual report.

Under the Community Redevelopment Law, a redevelopment agency is required to file with the Controller and present to its legislative body an annual report within 6 months of the end of the agency's fiscal year. Existing law also requires the agency to have an independent financial audit report conducted in accordance with generally accepted auditing standards and the rules governing audit reports adopted by the State Board of Accounting and also include an opinion of the agency's compliance with laws, regulations, and administrative requirements governing the activities of the agency.

This bill would impose a state-mandated local program by requiring a redevelopment agency to also file the annual audit report with the Department of Housing and Community Development and to have the audit conducted by a licensed accountant in accordance with the Government Auditing Standards adopted by the Comptroller General of the United States. It would also require the audit report to meet, at a minimum, the audit guidelines of the Controller's office, and to include a report, rather than an opinion, on the agency's compliance with laws, regulations, and administrative requirements.

This bill would also revise and recast obsolete provisions to require the Controller to develop and periodically revise the guidelines for the content of the annual report and to appoint an advisory committee, as specified, to advise the Controller in the development of those guidelines.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 41 (SB 1289) Calderon. Public accountancy: commissions.

Existing law prohibits any person engaged in the practice of public accountancy from paying a commission to obtain a client, or from accepting a commission for a referral to a client of products or services of others. Existing law further provides that these provisions shall not prohibit payments for the purchase of an accounting practice or retirement payments to individuals presently or formerly engaged in the practice of public accounting or payments to their heirs or estates.

This bill would repeal the above provisions and instead would prohibit a person engaged in the practice of public accountancy from paying a fee or commission to obtain a client or from accepting a fee or commission for referring a client to the products or services of a 3rd party, subject to certain exceptions. This bill would also prohibit a person engaged in the practice of public accountancy from performing services for a client for a commission or from receiving a commission from a client when that person also performs specified services for that client.

The bill would also require a person engaged in the practice of public accountancy who is not prohibited from performing services for a commission, or from receiving a commission, and who is paid or expects to be paid a commission, to disclose that fact to any client or entity to whom that person recommends or refers a product or service to which the commission relates.

This bill would also provide that its provisions shall not prohibit payments for the purchase of any accounting practice or retirement payments to individuals presently or formerly engaged in the practice of public accountancy or payments to their heirs or estates. It would also provide for a definition of "fee" for purposes of these provisions and would require the State Board of Accountancy to adopt regulations to implement these provisions, as specified.

Ch. 42 (SB 1384) Burton. In-home supportive services.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the

county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program.

Under existing law, the City and County of San Francisco is permitted to increase the wages of all IHSS providers in the 1995–96, 1996–97, and 1997–98 fiscal years.

This bill would extend this authority indefinitely.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 43 (AB 1334) Knox. Insurance: Holocaust victims.

Existing law regulates the enforcement of insurance contracts issued by insurers doing business in this state, as specified.

This bill would provide that any Holocaust victim, or heir of a Holocaust victim, who resides in this state and has a claim arising out of an insurance policy or policies purchased in Europe between 1920 and 1945 from a specified insurer may bring a legal action to recover on that claim in any superior court of the state, which shall be vested with jurisdiction over that action until its completion or resolution; and any action brought by a Holocaust victim or the heir or beneficiary of a Holocaust victim, whether resident or nonresident of this state, seeking proceeds of the insurance policy or policies issued or in effect between 1920 and 1945 shall not be dismissed for failure to comply with the applicable statute of limitation provided the action is commenced on or before December 31, 2010. The bill would also state the intent of the Legislature in this regard.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 44 (SB 698) Rainey. Plastic trash bags.

Existing law, the California Integrated Waste Management Act of 1989, administered by the California Integrated Waste Management Board, establishes an integrated waste management program.

The act requires every manufacturer that manufactures plastic trash bags of 0.75 mil or greater thickness to ensure that at least 30% of the materials used in those plastic bags is recycled plastic postconsumer material.

This bill would state legislative intent regarding the diversion of polyethylene from landfills.

The bill would for each calendar year commencing January 1, 1998, require each manufacturer of plastic trash bags equal to or greater than 0.70 mil thickness to ensure either that its trash bags intended for sale in this state contain a quantity of recycled plastic postconsumer material equal to at least 10% of the weight of the regulated bags, or that at least 30% of the weight of the material used in all of its plastic products intended for sale in this state is recycled plastic postconsumer material.

The bill would make conforming changes and prescribe related matters.

The bill would, until January 1, 2001, require the board, for every pound of postconsumer material purchased from a source of postconsumer material for use in the manufacture of plastic trash bags, to credit the manufacturer so certifying with having used 1.2 pounds of recycled plastic postconsumer material toward compliance with the certification requirements.

The bill would repeal provisions authorizing any manufacturer of plastic trash bags that received an exemption pursuant to former provisions exempting bags that use adhesive, heat-affixed straps, as prescribed, to petition the board for a variance from the requirements of the bill for the manufacture of those bags. However, the bill would provide that any variance issued by the board on or before the effective date of the bill would remain in effect until December 31, 1998, and would exempt the variance holder from the requirements of the bill until that date.

The bill would require the board, by October 1, 2001, to survey manufacturers subject to the bill, as prescribed.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 45 (SB 1086) Schiff. Self-service storage facilities: containers.

The California Self-Service Storage Facility Act defines self-service storage facilities and regulates rental agreements and the imposition of liens on personal property located at a self-service storage facility.

This bill would revise the definition of self-service storage facility and provide that the owner or operator of a self-service storage facility or a household goods carrier may transport and store individual storage containers, as defined, subject to certain restrictions.

The bill would make a statement of legislative intent.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 46 (SB 1143) Sher. Wildlife: bear parts.

Existing law makes it unlawful to sell, purchase, or possess for sale, the meat, skin, hide, teeth, claws, or other parts of any bear in this state, except as provided. Under existing law, the maximum punishment for a violation of this provision, except as specified, is a fine of \$5,000, imprisonment in the state prison or the county jail for not more than one year, or by both that fine and imprisonment.

This bill would impose an additional fine of \$250 for each bear part, as defined.

By providing for the deposit of additional funds in the Fish and Game Preservation Fund, a continuously appropriated fund, the bill would make an appropriation.

Ch. 47 (SB 1191) Committee on Insurance. Health care: pilot program.

Existing law provides for the licensure and regulation of health care service plans and insurers that provide health care coverage. Existing law provides for the licensure and regulation of physicians and surgeons, as well as other healing arts professionals, and provides certain confidentiality protections for communications between a patient and his or her physician.

This bill would state the Legislature's recognition that the Pilot Health Care Consumers' Information and Assistance Program, a privately funded nonprofit program, has the potential to provide needed education and assistance to consumers about the health care system. The bill would provide certain immunities and confidentiality protections for representatives of the pilot program for their communications with subscribers or enrollees or agents of subscribers or enrollees, any recipient of health care services, or any individual assisting the recipient of health care services through the pilot program, and would also provide confidentiality protections to persons who use the services of the pilot program.

The bill would also provide that its provisions shall not be construed to limit the authority and ability of the Department of Aging, its contractors, or the direct service providers of the Health Insurance Counseling and Advocacy Program (HICAP), from accessing, monitoring, or reviewing case files and records developed by, or for, the HICAP component of the pilot program. The bill would prohibit construing its provisions as limiting the ability of a subscriber or enrollee or any other recipient of health care services to waive the privileges and protections provided by the bill's provisions in order to provide information to a regulatory agency.

The bill would provide for the repeal of these provisions on June 30, 2000, but would provide that the privileges, immunities, and protections provided to representatives and users of the pilot program would continue to apply to any communications or actions that take place on or before that date.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 48 (SB 1200) M. Thompson. Corporations: securities.

(1) Existing provisions of the General Corporation Law exempt from the definition of offer and sale of securities, any act, incident to a transaction or reorganization approved by a state or federal court in which securities are issued and exchanged for one or more outstanding securities, claims, or property interests, or partly in that exchange and partly for cash.

This bill would provide that those provisions shall not prohibit a court from applying certain statutory protections with respect to approving any transaction involving a rollup participant.

The bill would also contain legislative findings and declarations.

(2) The Corporate Securities Law of 1968 requires the qualification of a security before it may be offered or sold in an issuer or nonissuer transaction in this state. Certain

classes of securities are exempt from, or not subject to, the state qualification requirement, if certain other requirements are met.

This bill would modify certain of those requirements.

(3) The Corporate Securities Law of 1968 defines an investment adviser as a person who is compensated for advising other persons as to the value of securities or the advisability of investing, purchasing, or selling securities, or who publishes evaluations of securities, and provides that it is generally unlawful to conduct business as an investment adviser without obtaining a certificate from the Commissioner of Corporations, unless otherwise exempted. A person registered, licensed, or qualified as an investment adviser by another state, or exempt from registration, licensing, or qualification by that state, who has not previously had any certificate denied or revoked in this state, is exempt from the requirement to obtain a certificate if the person does not have a place of business in this state and had fewer than 6 clients during the preceding 12-month period who are California residents.

This bill would instead provide that an investment adviser, as defined, is exempt from the requirement of obtaining a certificate if the person does not have a place of business in this state and had fewer than 6 clients during the preceding 12-month period who are California residents.

(4) The bill would enact other related provisions.

Ch. 49 (AB 510) Ashburn. Personal income and bank and corporation taxes: partnerships.

The Personal Income Tax Law imposes taxes on partnerships, as provided.

This bill would, under the Personal Income Tax Law and the Bank and Corporation Tax Law, make technical, nonsubstantive changes to provisions relating to partnerships.

Ch. 50 (AB 1799) Migden. Unlawful dumping: increased fines.

Existing law proscribes unlawful dumping and imposes specified mandatory fines for first and subsequent convictions of the offense with increased fines for dumping in commercial quantities. Existing law also authorizes the court to require as a condition of probation that any person convicted of unlawful dumping pick up waste matter for not less than 8 hours.

This bill would increase those fines, as specified, and would increase the condition of probation to not less than 12 hours. The bill would provide that, except in unusual cases where the interests of justice would be best served by waiving or reducing a fine, the minimum fines provided by these provisions shall not be waived or reduced. The bill also would revise the definition of "commercial quantities" for purposes of these provisions.

Ch. 51 (AB 1858) Ackerman. Criminal proceedings: prosecutors: recusals.

Existing law provides a procedure for the court-ordered recusal of a district attorney from performing an authorized duty. Under this procedure, an order recusing the district attorney from any proceeding may be appealed by the district attorney or the Attorney General.

This bill would provide that an order recusing the district attorney may either be reviewed by extraordinary writ or may be appealed.

Ch. 52 (AB 1903) Bowler. Sacramento Regional Transit District.

Existing law relating to the Sacramento Regional Transit District requires that contracts for construction in excess of \$5,000 be awarded to the lowest responsible bidder after competitive bidding.

This bill would authorize the board of directors of the district to construct all or part of the Folsom Corridor Light Rail Extension and Double Tracking Project using a design and construct approach with a specified procedure involving advertising a request for qualifications and prequalifying bidders.

Ch. 53 (SB 837) Kopp. Transportation: funding.

(1) Existing law requires the Department of Transportation to submit to the California Transportation Commission, as specified, a 4-year estimate in annual increments of all federal and state funds reasonably expected to be available for

transportation capital improvement projects. Existing law requires the California Transportation Commission, as specified, to adopt a 4-year estimate in annual increments of all state and federal funds reasonably expected to be available for transportation capital improvement projects.

This bill would require that federal funds that are only available to local government for demonstration projects not be included in the revenue estimates, and that federal funds available to the state, or to the state and local governments, for demonstration projects be included in the revenue estimates.

(2) Existing law authorizes state highway projects which have been funded by state allocations to be additionally funded by federal funds appropriated by the Legislature or reimbursed, as determined by the California Transportation Commission.

This bill would repeal that authorization.

(3) Existing law requires the State Transportation Improvement Program (STIP) to include a listing of all capital improvement projects that are expected to receive an allocation of state transportation funds, including specifically the allocation and expenditure amount and year of certain components. Among the components, is the acquisition of rights-of-way.

This bill would specify that the acquisition of rights-of-way include, but is not limited to, support activities.

(4) Under existing law, guidelines developed by the Department of Transportation, in cooperation with specified state and local agencies, for the development of the STIP are required to be submitted to the California Transportation Commission by September 15, 1998, and adopted by the commission by December 31, 1998.

This bill would revise these dates to February 1, 1999, rather than September 15, 1998, and May 1, 1999, rather than December 31, 1998.

(5) Existing law requires certain public transit capital improvement funds to be appropriated to the Department of Transportation for allocation as directed by the California Transportation Commission to fund specified types of transit capital improvement projects. This provision may not be amended except by a $\frac{2}{3}$ vote of the Legislature.

This bill would require those funds to fund public transit capital improvement projects that maintain or improve public transit service.

(6) Existing law requires a 4-year regional transportation improvement program to be prepared, adopted, and submitted to the California Transportation Commission.

This bill would authorize that program to include a reserve of county shares for providing funds in order to match federal funds.

(7) Existing law requires the department to prepare a project studies report for each capacity-increasing state highway project that is listed on the submitted regional list under specified circumstances. Existing law requires the department to seek assistance from specified agencies for the preparation for these reports under specified conditions.

This bill would authorize, rather than require, the report, delete the application of the provision to each project, and would apply the report to those projects not included in the STIP, rather than those listed on the submitted regional list. This bill would delete the requirement that the department seek assistance under the specified circumstances.

(8) Existing law requires the department, in cooperation with local transportation officials, to develop, and submit to the commission for approval, guidelines to implement the Traffic Systems Management Program in the major urbanized areas of the state, as prescribed, including a list of projects to be eligible for funding under the program. Existing law authorizes the commission to allocate funds for projects on that list.

This bill would delete those provisions.

(9) The bill would make technical changes to provisions of existing law.

(10) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 54 (SB 1136) Kopp. Vehicles: automated enforcement systems.

Existing law authorizes, until January 1, 1999, the use of automated enforcement systems at official traffic control signals and provides a special written, mailed notice to appear procedure in connection with specified alleged violations recorded by those systems.

This bill would delete the January 1, 1999, repeal date, thereby continuing indefinitely the use of the automated enforcement systems and the related special procedure.

Ch. 55 (SB 351) Peace. Crimes: statutory rape.

(1) Existing law provides that any adult who has sexual intercourse with a minor person who is not that adult's spouse is guilty of a crime.

This bill would revise provisions relating to criteria for sex education classes, blood testing for persons convicted of sexual offenses, and sentence enhancements for sexual offenders who act with knowledge that they have AIDS or are HIV positive, to conform to this definition. Because this bill would revise the penalties of a crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would state the Legislature's intent that the bill solely update and correct cross-references to existing law relating to an adult having sexual intercourse with a minor who is not that adult's spouse.

(4) This bill would declare that it shall become operative on July 1, 1998.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 56 (SB 1372) Knight. Bear Valley Community Services District: mail service.

Existing law provides that certain community services districts may exercise specified powers within their jurisdiction by adopting a resolution.

This bill would authorize the Board of Directors of the Bear Valley Community Services District to contract with the United States Postal Service for mail delivery services, as described, to the district and its inhabitants, and would require the board to submit a ballot measure to the voters of the district if the board so contracts. It would also require the board to terminate the contract, if the voters reject the measure.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 57 (AB 1083) Committee on Governmental Organization. Horse racing.

Existing law provides that when both the Humboldt County Fair and the San Mateo County Fair conduct racing meetings, the San Mateo County Fair is the association authorized to distribute the signal and accept wagers on out-of-zone races. Existing law requires that association to comply with specified provisions, and provides for distribution of the out-of-zone handle to the 2 fairs. Existing law also provides that this authorization shall automatically expire on January 1, 1999, unless subsequent legislation extends or deletes this date.

This bill would delete the automatic expiration of this authority.

Existing law provides for the deduction of a portion of the proceeds of horse races as purses for the benefit of horsemen at the racing meeting, and provides for specific deductions from this portion for the benefit of owners' organizations, administrative expenses, and for other purposes as specified, depending on the type of horse race involved. In this connection, existing law provides that 1 $\frac{1}{2}$ % of this portion be deducted with reference to thoroughbred races held by any association other than a fair, with $\frac{2}{3}$ of that amount going to the owners' association for administrative expenses and the other $\frac{1}{3}$ going to the trainers' organization for administrative expenses. Existing law automatically repeals these provisions as of a specified date, however, and replaces these provisions with alternate language that is identical except that only 1%, rather than 1 $\frac{1}{2}$ %, shall be divided between the owners' and trainers' organizations in connection with thoroughbred races held by any association other than a fair.

This bill would delete the provision in existing law causing this automatic repeal, and would repeal the alternate section of law which would otherwise take effect on the specified date.

Existing law requires every association or fair that provides a live audiovisual signal of its program to a satellite wagering facility pursuant to a specified provision to cooperate with the operator of the satellite wagering facility with respect to arrangements with the

ontrack totalizator company for access to its ontrack totalizator system for purposes of combining parimutuel pools.

This bill would correct an obsolete cross-reference in that provision.

Ch. 58 (AB 2021) Poochigian. Maddy Emergency Medical Services Fund.

Existing law establishes the Emergency Medical Services Fund. Under existing law, money in the fund is available for reimbursement to physicians and surgeons who provide emergency medical services under specified circumstances.

This bill would change the name of the Emergency Medical Services Fund to the Maddy Emergency Medical Services Fund, would make related legislative findings and declarations, and would correct an obsolete cross-reference.

Ch. 59 (AB 969) Cardenas. Professional engineers.

(1) The Professional Engineers Act provides for the registration of persons practicing engineering in this state, either in a public or private capacity, with the State Board of Registration for Professional Engineers and Land Surveyors, in accordance with certain requirements.

This bill would instead provide for the licensure of persons practicing engineering in the state. It would change the name of the board to the "Board for Professional Engineers and Land Surveyors."

(2) The act also prohibits any person other than a professional engineer from using in any manner, including in connection with the stamping or sealing of plans, specifications, plats, reports, or other documents, the title "professional engineer" and certain other similar titles, including the branch titles "corrosion engineer," "quality engineer," and "safety engineer."

This bill would, with respect to that prohibition, add the title "licensed engineer" to the list of proscribed titles, and would delete the branch titles specified above, but would provide that persons registered in those branches or completing the examination process for those branches prior to January 1, 1999, may continue to use those branch titles. The bill would prohibit the board from administering any examinations for these branch titles on or after that date.

Ch. 60 (AB 1327) Wayne. Education: independent study.

Existing law prohibits the ratio of average daily attendance for independent study pupils 18 years of age or less to school district full-time equivalent certificated employees responsible for independent study from exceeding the equivalent ratio of pupils to full-time certificated employees for all other education programs operated by the school district.

This bill would authorize a unified school district participating in the class size reduction program to perform separately for kindergarten and grades 1 to 6, inclusive, and for grades 7 to 12, inclusive, the calculations required for the purpose of determining the ratio of average daily attendance for independent study pupils 18 years of age or less to school district full-time equivalent certificated employees responsible for independent study.

Ch. 61 (AB 1754) Havice. Criminal procedure: trial date: continuance of proceeding.

Existing law requires that in scheduling a trial date at an arraignment in superior court involving an alleged sexual assault offense, or an alleged child abuse offense, reasonable efforts be made to avoid setting that trial, as assigned to a particular prosecuting attorney, on the same day that another trial is set involving the same prosecuting attorney. Existing law likewise specifies the procedures by which a motion to continue any hearing in a criminal proceeding, including the trial, may be made. Continuances may be granted only upon a showing of good cause, which includes, but is not limited to, cases involving allegations of sexual assault or child abuse where the prosecuting attorney assigned to the case has another criminal proceeding in progress in that or another court.

This bill would add murder, as defined, to the offenses considered in scheduling a trial date and those cases constituting good cause for a continuance.

Ch. 62 (AB 185) Papan. Interpretation of contracts: European currency.

Existing law sets forth various specified rules governing the interpretation of contracts.

This bill would provide for the interpretation of contracts, securities, and similar instruments with relation to mediums of payment replaced by the euro.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 63 (AB 1647) Scott. Postsecondary education: dismissal of community college employees.

Existing law specifies the causes for dismissal of regular community college employees. Among these enumerated causes is incompetency. Existing law defines a community college academic employee as a person employed by a community college in a position for which academic qualifications have been prescribed by the Board of Governors of the California Community Colleges.

This bill would include academic employees within the scope of these provisions and eliminate incompetency as one of the enumerated causes. The bill would instead provide that a regular community college employee or community college academic employee may be terminated for unsatisfactory performance, and would make various conforming changes.

Ch. 64 (AB 1418) Ortiz. School-based before and after school child care programs.

Existing law requires the Superintendent of Public Instruction, subject to an appropriation in the annual Budget Act, to allocate funding for the establishment of school-based before and after school programs with a strong literacy component. Existing law authorizes a before and after school program, whether public, private, or school district operated, in collaboration with other local governmental agencies, to apply to the State Department of Education for funding for this purpose. Existing law requires priority for enrollment in the programs funded under this provision to be given in accordance with priorities established in existing law for schoolage community child care services. Existing law requires that priority for funding of these programs be given to schoolsites where a minimum of 70% of the children are eligible for, or are recipients of, welfare or free or reduced-cost meals through the federal school lunch program.

This bill would instead provide that, commencing with the 1997–98 fiscal year, schoolsites would be eligible for funding of these programs where a minimum of 70% of the children are recipients of free or reduced-cost meals through the school lunch program and that presumptive eligibility applies to individual families of pupils attending an eligible schoolsite. The bill would also prohibit parent fees from being assessed to parents or guardians whose children attend one of these programs.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 65 (AB 1195) Torlakson. Real estate: disclosures.

Existing law requires certain information to be disclosed by the seller and the seller's agent to the prospective transferee when ownership of real property is proposed to be transferred. Existing law permits, with respect to earthquake fault zones and seismic hazards, that disclosure to be provided by, among other things, a real estate contract and receipt for deposit.

This bill would require, if one of 2 specified conditions are met, an additional disclosure by the seller or, in some cases, the seller's agent, to the prospective buyer with respect to real property located in an area subject to flooding or fire hazards, as specified, to be made either by the issuance of a natural hazard disclosure statement that would be specified by the bill, except as provided, or a disclosure statement specified in existing law. The bill would also provide that the disclosure described above, with respect to earthquake fault zones and seismic hazards, need be given only if one of 2 specified conditions are met, and may be made in a natural hazard disclosure statement, rather than by the real estate contract and receipt for deposit. The bill would require the counties to post a notice identifying the location of specified maps or lists containing information regarding areas of potential flooding and fire hazard severity, as specified. By imposing additional duties on local government, the bill would create a state-mandated local program.

The bill would encourage the Secretary of the Resources Agency to provide coordination and leadership among state departments to provide compatible maps and information regarding natural hazards.

Existing law requires the Seismic Safety Commission to update, publish, and disseminate a homeowner's guide about earthquake safety, that is in the public domain and freely available to any vendor who wants to reproduce it at no charge.

This bill would delete the provision referring to the guide being in the public domain, and instead provide that the guide be made available to the public at cost, and to any vendor who wishes to reproduce and publish the guide at no cost provided the vendor submits his or her copy to the Seismic Safety Commission for approval prior to publication.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The bill would declare that its provisions are intended to supersede the provisions of Chapter 7 of the Statutes of 1997, First Extraordinary Session, and that the provisions of that chapter shall not become operative.

The bill would also declare that it is to take effect immediately as an urgency statute and that its provisions shall be operative on June 1, 1998, except as specified.

Ch. 66 (AB 1211) Committee on Public Safety. Peace officers.

Existing law requires any sheriff, undersheriff, or deputy sheriff of a county, any police officer of a city, and any police officer of a district authorized by statute to maintain a police department, who is first employed after January 1, 1975, to successfully complete a course of training prescribed by the Commission on Peace Officer Standards and Training before exercising the powers of a peace officer, except as specified. Existing law also requires any undersheriff or deputy sheriff of a county, any police officer of a city, and any police officer of a district authorized by statute to maintain a police department, who is first employed after January 1, 1974, and is responsible for the prevention and detection of crime and the general enforcement of the criminal laws of this state, to obtain the basic certificate issued by the Commission on Peace Officer Standards and Training within 18 months of his or her employment in order to continue to exercise the powers of a peace officer after the expiration of the 18-month period.

This bill additionally would require each police chief, or any other person in charge of a local law enforcement agency, appointed on or after January 1, 1999, as a condition of continued employment, to complete this course of training and obtain the basic certificate issued by the Commission on Peace Officer Standards and Training within 2 years of appointment. By imposing new training requirements on local officials, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 67 (SB 432) Lewis. Air quality: rideshare programs.

Existing law contains provisions pertaining to encouraging or establishing rideshare programs by governmental agencies, including the allocation of prescribed revenues to specified agencies. Existing law requires that Rule 2202 adopted by the South Coast Air Quality Management District be amended to raise the worksite employee threshold to 250, and requires the threshold to be reduced or raised, as specified, pursuant to a

determination to be made by the State Air Resources Board on or before June 1, 1998, relative to the effectiveness of voluntary rideshare and other emission reduction replacement measures.

This bill would delete those provisions requiring the reduction or raising of the worksite employee threshold on or before June 1, 1998, as specified, pursuant to a specified determination to be made by the State Air Resources Board, relative to the effectiveness of voluntary rideshare and other emission reduction replacement measures.

Existing law requires the south coast district to provide \$1,500,000 annually on or before January 15 of each year to the Regional Transportation Agencies Coalition or its successor agency subject to specified conditions, and requires the Regional Transportation Agencies Coalition to fully allocate those revenues to regional or county rideshare agencies for the purpose of providing marketing and client services to maximize voluntary ridesharing, as provided.

This bill would repeal those provisions relating to funding for voluntary ridesharing.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 68 (AB 974) Gallegos. Health care service plans: prescription drug benefits.

Under existing law, the Knox-Keene Health Care Service Plan Act of 1975, health care service plans are regulated by the Department of Corporations. Willful violation of the act is a crime.

Existing law requires health care service plans to furnish services in a manner providing continuity of care and to be able to demonstrate to the department that medical decisions are rendered by qualified medical providers, unhindered by fiscal and administrative management.

This bill would require, for health care service plan contracts covering prescription drug benefits issued, amended, or renewed on or after July 1, 1999, that benefits shall not limit or exclude coverage for a drug for an enrollee if the drug previously had been approved for coverage by the plan for a medical condition of the enrollee and the plan's prescribing provider continues to prescribe the drug for the medical condition, provided that it is appropriately prescribed, and is considered safe and effective for treatment. It would prohibit construing this provision as precluding the prescribing provider from prescribing another drug that is covered by the plan and is medically appropriate. It would also prohibit construing this provision to prohibit generic drug substitutions, pursuant to specified existing law.

Existing law prohibits any plan from being issued, amended, delivered, or renewed in this state if the plan limits or excludes coverage for a drug on the basis that the drug is prescribed for a use that is different from the use for which that drug has been approved for marketing by the federal Food and Drug Administration.

This bill would provide that coverage for those different-use drugs is subject to those provisions of existing law and not to this bill.

The bill would also require every health care service plan that covers prescription drug benefits to comply with certain requirements regarding providing notice to enrollees regarding whether the plan uses a formulary and providing certain information about drugs on the formulary to the public, upon request. The bill would require plans that use a formulary to provide an enrollee or member of the public, upon request, a list of all of the drugs contained in the plan's formulary, and would require the plan to provide information, by telephone, about whether specific drugs are on the plan's formulary.

By changing the definition of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 69 (SB 625) Rosenthal. Health care service plans: drugs.

Existing law provides for the licensure and regulation of health care service plans by the Department of Corporations, and provides that a willful violation of its provisions is

subject to criminal sanction. Existing law imposes various requirements and restrictions on health care service plans including, among other things, a prohibition on health care service plans that provide prescription drug benefits from excluding or limiting coverage for a drug on the basis that the drug is prescribed for a use that is different from the use for which the drug has been approved for marketing by the federal Food and Drug Administration.

This bill would require a health care service plan that provides prescription drug benefits and maintains one or more drug formularies to provide to members of the public, upon request, a copy of the most current list of prescription drugs on the formulary by major therapeutic category.

The bill would require every health care service plan that provides prescription drug benefits to maintain an expeditious process by which prescribing providers, as described, may obtain authorization for a medically necessary nonformulary prescription drug, according to certain procedures.

The bill would prohibit certain of its provisions from having any effect unless AB 974 takes effect on or before July 1, 1999, and adds a particular provision.

By imposing these requirements on health care service plans, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 70 (SB 2201) Monteith. Recreational water use: Modesto Reservoir.

Existing law prohibits, in San Diego County, with respect to a reservoir in which water is stored for domestic use, recreational uses from including recreation in which there is bodily contact with the water by any participant, unless certain conditions are satisfied relating to water treatment and the operation of the reservoir, and authorizes the recreational use to be subject to additional conditions and restrictions adopted by the entity operating the water supply reservoir.

This bill would apply similar restrictions to recreational water uses in the Modesto Reservoir until January 1, 2004, and would require the Modesto Irrigation District to file a report with the Legislature by January 1, 2002.

Ch. 71 (AB 2087) Gallegos. Medi-Cal: disproportionate share hospitals.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. The Medi-Cal program provides for a special methodology of reimbursement of disproportionate share hospitals for the provision of inpatient hospital services. Existing law generally defines a disproportionate share hospital as a hospital that has proportionately higher costs, volume, or services related to the provision of services to Medi-Cal or other low-income patients than the statewide average.

Under the Medi-Cal program, the department is required to make supplemental payments to certain disproportionate share hospitals based on specified criteria. Payments are made from defined intergovernmental transfers that are paid into the Medi-Cal Inpatient Payment Adjustment Fund, as required, with this fund being continuously appropriated for specified purposes.

This bill would, for the 1997–98 payment adjustment year, the 1998–99 payment adjustment year, and portions of the 1999–2000 payment adjustment year, revise the methodology of reimbursement of disproportionate share hospitals.

This bill would also provide that any amendment enacted during the 1998 calendar year to certain disproportionate share hospital provisions requiring federal approval for its implementation, would not be implemented unless federal approval is obtained.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 72 (AB 1681) Sweeney. Suspect identification system: digital image.

Existing law authorizes the board of supervisors of any county to establish in the county treasury an Automated Fingerprint Identification Fund, funded as specified, out of

which moneys are disbursed for specified costs relating to automated fingerprint equipment.

This bill would, in addition, authorize the board of supervisors of any county to establish similar funding for suspect booking identification facilities, including, but not limited to, digital photographic equipment used to identify persons who are booked as a result of having been arrested or charged with a crime.

Ch. 73 (SB 1549) Knight. Work release: weed and rubbish abatement.

Under existing law, the board of supervisors of any county may authorize the sheriff or other specified officer to offer a voluntary work release program under which any person committed to a county correctional facility may participate in a work release program consisting of specified work activities, including graffiti cleanup for local governmental entities, in which one day of participation is in lieu of one day of confinement.

This bill would authorize participation in a work release program consisting of the performance of weed and rubbish abatement on public and private property pursuant to specified provisions, as approved by the sheriff or other official in charge of the correctional facilities.

Ch. 74 (SB 1420) Rainey. Continuous electronic monitoring: parolees, probationers, and jail inmates.

Existing law provides for the establishment of a pilot project in the Counties of San Diego and San Mateo that uses continuous electronic monitoring to keep track of the whereabouts of probationers and persons released from jail, establishes procedures and requirements for the electronic monitoring system's implementation, and requires the electronic monitoring system to have the capacity to communicate with the computer systems of law enforcement agencies. Existing law requires the Boards of Supervisors of the Counties of San Diego and San Mateo to evaluate any pilot project conducted pursuant to these provisions and submit a report on the evaluation to the Legislature on or before January 1, 2000.

Existing law also provides for the repeal of these provisions on January 1, 2001, unless a later enacted statute, that is enacted before January 1, 2001, deletes or extends that date.

This bill would authorize the County of Contra Costa to participate in the pilot project, would require the boards of supervisors for those 3 counties instead to submit a preliminary report on the evaluation to the Legislature on or before January 1, 2000, and a final report no later than January 1, 2002, and would change the repeal date from January 1, 2001, to January 1, 2003.

Ch. 75 (SB 2091) Watson. Dependent children.

Existing law generally authorizes the juvenile court to order that reunification services be provided to a parent or guardian when a minor is removed from a parent's or guardian's custody. Existing law provides, however, that reunification services need not be provided to a parent or guardian when a court finds by clear and convincing evidence any one of certain enumerated circumstances.

This bill would expand the list of enumerated circumstances to include circumstances in which the parent or guardian has willfully abducted the child or the child's sibling or half-sibling from his or her placement and refused to disclose his or her whereabouts, refused to return physical custody of the child or the child's sibling or half-sibling to his or her placement, or refused to return physical custody of the child or the child's sibling or half-sibling to the social worker.

Ch. 76 (SB 1392) Alpert. Fishery management programs.

Existing law establishes, until January 1, 2003, the California Ocean Resources Enhancement and Hatchery Program for the purpose of basic and applied research on the artificial propagation, rearing, stocking, and distribution of adversely affected marine fish species that are important to sport and commercial fishing in the ocean waters off the coast of California south of a line extending due west from Point Arguello.

This bill would make a technical change to the language of that statute to, instead, specify that the program is established for the purpose of that research on adversely

affected marine fish species that are important to sport or commercial fishing in the ocean waters off the coast of California south of a line extending due west from Point Arguello.

Ch. 77 (SB 1841) Burton. Liability: breach of trust or duty.

Existing law provides that a joint debtor, other than a joint tortfeasor, entitled to compel contribution or repayment in a civil action, may apply for an order determining liability for contribution or repayment at any time before the judgment is satisfied in full or within 10 days thereafter.

This bill would extend that time to within 30 days after the judgment is satisfied in full.

Existing law imposes liability for a breach of trust by a trustee, or a breach of a fiduciary duty by a guardian or conservator or a personal representative. That liability is in the amount of the loss or depreciation to the estate, the loss of profit that would have accrued to the estate, or the profit to the person who breached the trust or duty. However, where that person acted reasonably and in good faith under the circumstances known to the person at the time, the court is authorized to excuse the person, in whole or in part, from liability. Existing law also makes that person liable for interest on the amount for which he or she is held liable.

This bill would authorize the court to excuse the persons described above from liability for the interest where those persons act reasonably and in good faith under the circumstances known to them at the time.

Existing law requires every person appointed as a personal representative to give a bond conditioned on the faithful execution of the duties of the office. Where 2 or more persons are appointed, the court may require either a separate bond from each or a joint and several bond.

This bill would provide that if a joint bond is furnished, the liability on the bond is joint and several.

Ch. 78 (SB 1865) Maddy. Contracts: statute of frauds.

Existing law provides that certain contracts are invalid unless the contract, or some note or memorandum of the contract, is in writing and subscribed by the party to be charged.

This bill would provide that an agreement or contract that is valid in other respects and is otherwise enforceable is not invalid for lack of a note, memorandum, or other writing and is enforceable by way of action or defense if the agreement or contract is a qualified financial contract, as defined, and there is sufficient evidence to indicate that a contract has been made or the parties agreed to be bound by the terms of the qualified financial contract, as specified. The bill would make related changes.

Ch. 79 (SB 2100) Polanco. Grand jury reports.

Existing law provides that every grand jury may investigate and report upon the needs of all county officers in the county, and shall cause a copy of the report to be transmitted to each member of the board of supervisors of the county.

Existing law also provides that any comment upon any person or official who has not been indicted by such grand jury in such a report shall not be deemed to be privileged.

This bill would provide, as to any matter not subject to privilege, with the approval of the presiding judge of the superior court or the judge appointed by the presiding judge to supervise the grand jury, that a grand jury may make available to the public part or all of the evidentiary material, findings, and other information relied upon by, or presented to, a grand jury for its final report in any civil grand jury investigation.

The bill would also provide, however, that the name of any person or facts that would lead to the identity of any person that provided information to the grand jury shall not be released. Further, this bill would authorize the judge to require redaction or masking of any part of the evidentiary material, findings, or other information prior to its public release, as specified.

Ch. 80 (AB 1694) Ackerman. Personal income taxes: partnership returns.

The Personal Income Tax Law requires partnerships and limited liability companies classified as partnerships for California tax purposes to file certain information returns.

The Bank and Corporation Tax Law provides for the suspension and revivor of specified taxpayers, including limited liability companies.

This bill would make technical changes in those provisions relating to the time for filing the information returns and suspension and revivor.

Ch. 81 (AB 1874) Honda. Local agencies: deposit of funds.

(1) Existing law prescribes the types of investments in which a local agency may generally invest its funds for deposit. Those investment instruments include negotiable certificates of deposit issued by a nationally or state-chartered bank, savings association, federal association, state or federal credit union, or state-licensed branch of a foreign bank. However, existing law prohibits use of those negotiable certificates of deposit of a credit union if a member of the legislative body of the local agency or an employee of designated offices of the local agency also serves on the board of directors or certain committees of the credit union.

This bill instead would make that prohibition applicable if a member of the legislative body of the local agency or any person with investment decisionmaking authority of those local agency offices also serves on the board of directors or the specified committees of the credit union.

(2) Existing law makes the same prohibition with respect to the deposit of the money of a local agency in a credit union.

This bill would conform that prohibition in the manner described in (1) above.

Ch. 82 (AB 1898) Honda. Local agencies: deposit of funds.

Existing law permits the treasurer or chief fiscal officer of a local agency to submit to the legislative body, chief executive officer, and auditor of the local agency, in lieu of a quarterly report, the most recent statement or statements from certain institutions in which local agency funds have been invested.

This bill would additionally permit the use of these statements with respect to local agency investments in National Credit Union Share Insurance Fund-insured accounts in a credit union and in accounts insured or guaranteed by the California Credit Union Guaranty Corporation or similarly insured or guaranteed.

Ch. 83 (AB 2240) House. Irrigation districts: regular meetings.

Under the Irrigation District Law, the board of directors of an irrigation district is required to hold a regular meeting on the first Tuesday of each month at the district office. All meetings of the board are required to be public and all special meetings are required to be held pursuant to the Ralph M. Brown Act. That act requires all meetings of the legislative bodies of local agencies, as defined, to be open and public, with specified exceptions, and imposes specified notice and agenda requirements.

This bill would permit the Board of Directors of the Tri-Dam Project, which is composed of the directors of the Oakdale Irrigation District and the South San Joaquin Irrigation District, to hold no more than 4 regular meetings annually at the Tri-Dam Project offices located in Strawberry, California. The bill would also require that these meetings comply with the Ralph M. Brown Act.

The bill would expressly require that all meetings of the board of directors of an irrigation district be conducted pursuant to the Ralph M. Brown Act.

Ch. 84 (AB 2038) Migden. Bay area toll bridges.

Existing law, until a specified date, imposes a seismic retrofit surcharge equal to \$1 per vehicle for passage on the bay area bridges, except as provided. Existing law also specifies that revenues generated from this surcharge shall not exceed \$907,000,000 unless, among other things, the authority requests funding for a bicycle or pedestrian access that is to be added to a new bridge, in which case the local share of the project costs are to be increased, as specified.

This bill would change this latter provision to specify that revenues generated from this surcharge shall not exceed \$907,000,000 unless, among other things, the authority requests funding for a bicycle or pedestrian access that is to be added to either the new east span of the San Francisco-Oakland Bay Bridge or the retrofitted west span of that bridge, or both, rather than to the new bridge.

Ch. 85 (AB 2318) Knox. Property taxation: airline property and possessory interests.

Existing property tax law provides that all property is subject to taxation at its full value, unless that property is otherwise exempted from taxation in whole or in part pursuant to either state or federal law.

This bill would specify that a certain, additional taxable possessory interest is conferred upon an operator of certificated aircraft at a publicly owned airport. This bill would also provide, for the 1998–99 fiscal year and each fiscal year thereafter, that all taxable real property rights of an operator of certificated aircraft at a publicly owned airport, except as specified, shall be presumed to be valued and assessed at full cash value only if the assessor follows the applicable, specified income approach in determining the assessed value of that property.

This bill would declare that it is to take effect immediately as an urgency statute, but would become operative only if AB 1807 takes effect on or before January 1, 1999.

Ch. 86 (AB 1807) Takasugi. Property taxation: airline property and possessory interests.

Existing property tax law provides that all property is subject to taxation at its full value, unless that property is otherwise exempted from taxation in whole or in part pursuant to either state or federal law.

This bill would, pursuant to legislative findings and declarations, require any of certain counties, if specified airlines execute a written settlement agreement or waiver, as provided, with that county, to issue specified total amounts of credits to those airlines against property taxes from the 1998–99 fiscal year to the 2002–03 fiscal year, inclusive. This bill would also provide, for fiscal years to the 1997–98 fiscal year, inclusive, for the 1998–99 fiscal year to the 2002–03 fiscal year, inclusive, and for the 2003–04 fiscal year, that the assessed value of certificated aircraft shall be deemed to be the amount entered on the tax roll with respect to those aircraft if certain assessment procedures are followed.

This bill would make legislative findings and declarations as to the necessity for a special statute.

This bill would declare that it is to take effect immediately as an urgency statute, but would become operative only if AB 2318 takes effect on or before January 1, 1999.

Ch. 87 (SB 30) Kopp. Property taxation: refunds: credit substitution.

Existing property tax law sets forth requirements and procedures for the payment of refunds pursuant to the timely filing by a taxpayer of a sufficient claim, as provided, or pursuant to a legal action filed by the taxpayer.

This bill would, as provided, authorize a taxpayer and a county or city and county to enter into a written agreement pursuant to which credits against the payment of future property tax liabilities would be substituted for the payment to the taxpayer of refunds of amounts of tax and any interest accrued thereon.

Ch. 88 (AB 528) Bordonaro. Public employees: state employees.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds or requires legislative action to permit its implementation, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions of a memorandum of understanding that require the expenditure of funds or legislative action to permit their implementation, entered into between the state employer and State Bargaining Unit 16, the Union of American Physicians and Dentists, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

(2) Existing law generally requires state agencies to adopt regulations pursuant to procedures set forth in the Administrative Procedure Act, but exempts the Department

of Personnel Administration from that act with respect to regulations that apply to state employees in State Bargaining Unit 5 or 6.

This bill would also exempt the Department of Personnel Administration from the Administrative Procedure Act with respect to regulations that would apply to state employees in State Bargaining Unit 16. This bill would make applicable to state employees in State Bargaining Unit 16 the same alternative procedures for the department to use in the adoption, amendment, or repeal of a regulation that apply to state employees in State Bargaining Unit 5 or 6, including, among other things, a public comment period, preparation of specified information relative to the proposed rule action, public notice, a public hearing, and publication in the California Code of Regulations.

(3) Existing law contains various provisions relating to civil service and employer-employee relations between the state and its employees, and contains comparable provisions that apply to state employees in State Bargaining Unit 5 or 6.

This bill would enact comparable provisions, with respect to appointments from a general reemployment list, reinstatements, probationary periods, layoffs, demotions, minor discipline, nonmerit statutory appeal hearings, performance appraisals, salary adjustments, holidays, the state safety category of membership in the Public Employees' Retirement System, the use of broadband classifications, and demonstration projects on classification, compensation, and related projects that would apply to state employees in State Bargaining Unit 16.

(4) Existing law, with specified exceptions, provides that all contracts entered into by any state agency for the hiring or purchase of a variety of goods and services, including equipment, supplies, textbooks, and repair or maintenance, are void unless approved by the Department of General Services. Existing law exempts contracts entered into by the Department of Personnel Administration for employee benefits, training services, or both, for state employees in State Bargaining Unit 6 from the requirement of Department of General Services approval.

This bill would exempt contracts entered into by the Department of Personnel Administration for employee benefits, occupational health and safety, training services, or any combination thereof, for state employees in State Bargaining Unit 16 from the requirement of Department of General Services approval. This bill would exempt these contracts and specified contracts entered into by the Department of Personnel Administration for state employees in State Bargaining Unit 6 from provisions of the Public Contract Code that relate to the state procurement of materials, supplies, equipment, and services.

(5) Existing law, the Public Employees' Retirement Law, establishes the Public Employees' Retirement System, and sets forth the provisions for its administration and the delivery of benefits to its members. The state's employer contributions to the Public Employees' Retirement Fund are continuously appropriated from the General Fund and other funds in the State Treasury.

This bill would prescribe a service retirement formula pursuant to which a state miscellaneous or industrial member may elect to be subject, as an alternative to second tier retirement membership, and would adjust the rate of contribution for those state miscellaneous or industrial members who have elected to be subject to this formula, thereby making an appropriation. The bill would also include officers and employees whose classifications or positions are found to meet specified state safety criteria within the classification of state safety officers, provided that the Department of Personnel Administration has agreed to their inclusion. Because the bill would enlarge the class of persons eligible for state safety membership, it would make an appropriation by increasing the state's contribution to the Public Employees' Retirement Fund.

(6) Existing law, the Public Employees' Medical and Hospital Care Act, provides health benefits plan coverage to public employees and annuitants meeting the eligibility requirements prescribed by the Board of Administration of the Public Employees' Retirement System.

This bill would revise the definition of "eligible employees" for the purposes of the act as it applies to state employees in State Bargaining Unit 16.

(7) Existing law, the State Employees' Dental Care Act, provides dental care plan coverage to public employees and annuitants meeting the eligibility requirements

prescribed by the Board of Administration of the Public Employees' Retirement System. Existing law provides that notwithstanding particular provisions of the act, state employees in State Bargaining Unit 6 may receive a percentage of the employer's contribution payable for annuitants if the employees are credited with 10 years of state service.

This bill would also provide that state employees in State Bargaining Unit 16 may receive a percentage of the employer's contribution payable for annuitants if the employees are credited with 10 or more years of state service.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 89 (AB 598) Davis. Special education.

(1) Existing law, the Poochigian and Davis Special Education Reform Act (the act), establishes a method for financing special education that is based on the pupil population in each special education local plan area (SELPA) and equalizes funding among SELPAs. Existing law requires, commencing in the 1998-99 fiscal year, and each fiscal year thereafter, allocation of funds to be made to SELPAs. The administrator of each SELPA is responsible for the fiscal administration of the annual budget allocation plan for special education programs and the allocation of state and federal funds to the school districts and county offices of education composing the SELPA in accordance with the local plan. Existing law requires each SELPA to submit a revised local plan on or before the time it is required to submit a local plan. Until the Superintendent of Public Instruction (superintendent) approves the revised local plan, the SELPA is required to continue to operate under the reporting and accounting requirements prescribed by the State Department of Education for the special education finance provisions repealed by the act.

This bill would, instead, require the administrator of each SELPA to be responsible for the administration of the annual budget plan and the annual allocation plan for multidistrict SELPAs. The bill would require the State Board of Education to approve the revised local plan and the superintendent to allocate the funds in accordance with the allocation plan. To the extent that this bill would place new requirements on SELPAs with respect to the governance of SELPAs and the distribution of funds, the bill would impose a state-mandated local program. The bill would also make substantive and technical changes to provisions of law relating to special education to conform those provisions with the provisions of the act.

(2) Existing law provides a method of determining revenue limits for school districts and a method of calculating average daily attendance in order to compute the revenue limits.

This bill would set forth a method of calculating the amount per unit of average daily attendance for pupils in special classes and centers that would be required apportioned to each county office of education.

(3) Existing law prohibits, upon the submittal or approval of a revised local plan, special education programs and services already in operation in school districts or county offices of education from being transferred to another school district or county office of education or from a county office of education to a school district unless the special education local plan area has developed a plan for the transfer that addresses certain minimum requirements.

This bill would make this provision applicable to special education programs commencing on July 1, 1998, whether or not a special education local plan area has a submitted or approved revised local plan.

(4) Existing law requires the superintendent to develop a funding formula for the distribution of federal funds under Title II of the Education of the Handicapped Act Amendments of 1986.

This bill would repeal this provision.

(5) Existing law requires the superintendent to adopt rules and regulations to ensure that apportionments, inclusive of federal funds, for all individuals with exceptional needs between the ages of 3 and 5 years, inclusive, are paid to the extent permitted by federal law for no more than 3% of the statewide population of children between the ages of 3 and 5 years, inclusive.

This bill would repeal this provision.

(6) Existing law provides that the former method of funding special education applies for the purpose of recertification of amounts funded under those provisions until June 30, 2001.

This bill would instead provide that the former method of funding special education applies for the purpose of submitting corrections to amounts funded under those provisions until June 30, 1999, and for the purpose of certifications until June 30, 2000.

(7) Existing law, that provides a new funding formula for funding special education, includes federal funds available to the state pursuant to the Individuals with Disabilities Education Act within the computation of general purpose special education funding for the 1998–99 fiscal year and each fiscal year thereafter.

This bill would prescribe which portion of that federal funding is available for those purposes.

(8) Existing law, the new funding formula for funding special education, requires computation of a special disabilities adjustment for the 1998–99 fiscal year.

This bill would prohibit the amount of funds that a SELPA receives for the special disabilities adjustment in the 1998–99 fiscal year from being used in the calculation of a base amount for the 1999–2000 fiscal year.

(9) Existing law, that provides a new funding formula for special education, includes the computation of the amounts available for making equalization adjustments to special education local plan areas.

This bill would revise that computation.

(10) Existing law requires the State Department of Education to administer an extraordinary cost pool to protect SELPAs from the extraordinary costs associated with single placements in nonpublic, nonsectarian schools. Existing law provides that SELPAs are eligible to submit claims for costs of any nonpublic, nonsectarian school placements exceeding a threshold amount.

This bill would exclude placements reimbursed for licensed children's institutions from the extraordinary cost pool. The bill would provide that SELPAs are eligible to submit claims only for costs of any new nonpublic, nonsectarian school placements in excess of those in existence in the 1997–98 fiscal year and exceeding the threshold amount.

(11) This bill would require a separate method of determining the amount of some of the funding to be allocated to the SELPA identified as the Los Angeles County Juvenile Court and Community School/Division of Alternative Education Special Education Local Plan Area.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(13) This bill would declare that it is to take effect immediately as an urgency statute and become operative on July 1, 1998.

Ch. 90 (AB 2810) Committee on Budget. Budget Act of 1997: contingencies or emergencies.

The Budget Act of 1997 appropriated \$5,000,000 from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies or emergencies upon written authorization from the Director of Finance. The Budget Act of 1997 also appropriated \$2,500,000 for loans to state agencies for contingencies and emergencies, upon terms to be prescribed by the Department of Finance, but which may not be made repayable from a future legislative appropriation.

This bill would appropriate \$268,163,000, as scheduled, in augmentation of these Budget Act appropriations. This bill would authorize the Director of Finance to withhold authorization for the expenditure of funds appropriated in the bill until preliminary estimates of potential deficiencies are verified. The bill would also require funds received

for the federal share of costs pertaining to the deficiencies for the implementation of the Healthy Families Program to be repaid to the General Fund.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 91 (SB 1501) Knight. Public employees: state employees.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds or requires legislative action to permit its implementation, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions of a memorandum of understanding that require the expenditure of funds or legislative action to permit their implementation, entered into between the state employer and State Bargaining Unit 19, the American Federation of State, County, and Municipal Employees, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

(2) Existing law generally requires state agencies to adopt regulations pursuant to procedures set forth in the Administrative Procedure Act, but exempts the Department of Personnel Administration from that act with respect to regulations that apply to state employees in State Bargaining Unit 5 or 6.

This bill would also exempt the Department of Personnel Administration from the Administrative Procedure Act with respect to regulations that would apply to state employees in State Bargaining Unit 19. This bill would make applicable to state employees in State Bargaining Unit 19 the same alternative procedures for the department to use in the adoption, amendment, or repeal of a regulation that apply to state employees in State Bargaining Unit 5 or 6, including, among other things, a public comment period, preparation of specified information relative to the proposed rule action, public notice, a public hearing, and publication in the California Code of Regulations.

(3) Existing law contains various provisions relating to civil service and employer-employee relations between the state and its employees, and contains comparable provisions that apply to state employees in State Bargaining Unit 5 or 6.

This bill would enact comparable provisions, with respect to appointments from a general reemployment list, reinstatements, probationary periods, layoffs, demotions, minor discipline, nonmerit statutory appeal hearings, performance appraisals, salary adjustments, holidays, the state safety category of membership in the Public Employees' Retirement System, the use of broadband classifications, and demonstration projects on classification, compensation, and related projects that would apply to state employees in State Bargaining Unit 19.

(4) Existing law, with specified exceptions, provides that all contracts entered into by any state agency for the hiring or purchase of a variety of goods and services, including equipment, supplies, textbooks, and repair or maintenance, are void unless approved by the Department of General Services. Existing law exempts contracts entered into by the Department of Personnel Administration for employee benefits, training services, or both, for state employees in State Bargaining Unit 6 from the requirement of Department of General Services approval.

This bill would exempt contracts entered into by the Department of Personnel Administration for employee benefits, occupational health and safety, training services, or any combination thereof, for state employees in State Bargaining Unit 19 from the requirement of Department of General Services approval. This bill would exempt these contracts from provisions of the Public Contract Code that relate to the state procurement of materials, supplies, equipment, and services.

(5) Existing law, the Public Employees' Retirement Law, establishes the Public Employees' Retirement System, and sets forth the provisions for its administration and the delivery of benefits to its members. The state's employer contributions to the Public

Employees' Retirement Fund are continuously appropriated from the General Fund and other funds in the State Treasury.

This bill would prescribe a service retirement formula pursuant to which a state miscellaneous or industrial member may elect to be subject, as an alternative to Second Tier retirement membership, and would adjust the rate of contribution for those state miscellaneous or industrial members who have elected to be subject to this formula, thereby making an appropriation. The bill would also include officers and employees whose classifications or positions are found to meet specified state safety criteria within the classification of state safety officers, provided that the Department of Personnel Administration has agreed to their inclusion. Because the bill would enlarge the class of persons eligible for state safety membership, it would make an appropriation by increasing the state's contribution to the Public Employees' Retirement Fund.

(6) Existing law, the Public Employees' Medical and Hospital Care Act, provides health benefits plan coverage to public employees and annuitants meeting the eligibility requirements prescribed by the Board of Administration of the Public Employees' Retirement System.

This bill would revise the definition of "eligible employees" for the purposes of the act as it applies to state employees in State Bargaining Unit 19.

(7) Existing law, the State Employees' Dental Care Act, provides dental care plan coverage to public employees and annuitants meeting the eligibility requirements prescribed by the Board of Administration of the Public Employees' Retirement System. Existing law provides that notwithstanding particular provisions of the act, state employees in State Bargaining Unit 6 may receive a percentage of the employer's contribution payable for annuitants if the employees are credited with 10 years of state service.

This bill would also provide that state employees in State Bargaining Unit 19 may receive a percentage of the employer's contribution payable for annuitants if the employees are credited with 10 or more years of state service.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 92 (SB 2185) Kelley. Air pollution: motor vehicle inspection and maintenance.

Existing law establishes a motor vehicle inspection and maintenance (smog check) program, administered by the Department of Consumer Affairs; requires inspection of motor vehicles upon initial registration, biennially upon renewal of registration, upon transfer of ownership, and in certain other circumstances; and requires all motor vehicles that are registered in designated areas of the state to biennially obtain a certificate of compliance or noncompliance with motor vehicle emission standards, except for certain exempted motor vehicles. Existing law provides that a certificate of compliance or noncompliance is valid for 90 days.

This bill would provide that a certificate of compliance or noncompliance that is issued to a licensed automobile dealer is valid for 180 days.

This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 93 (SB 1437) Kopp. Fire hydrants: color coding.

Existing law requires the State Fire Marshal to establish a statewide uniform color coding of fire hydrants that relates to flow testing. Each agency that maintains fire hydrants is required to comply with these requirements as part of its ongoing maintenance program.

This bill would provide, as an alternative, that an agency may comply with the requirements by installing a reflector button in a mid-street location directly adjacent to the fire hydrant in the appropriate color that would otherwise be required for the hydrant and a curb marking as near to the hydrant as practicable in that same color.

Ch. 94 (AB 2776) Committee on Budget. Claims against the state: appropriation.¹

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would appropriate up to \$338,534,511 from the General Fund to the Secretary of the State Board of Control to pay the Board of Administration of the Public Employees' Retirement System for back interest earnings claimed in the case of Board of Administration et al. v. Wilson, etc., Sacramento Superior Court, Case No. 377815.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 95 (AB 2164) Wayne. Administrative law judges: ethics.

(1) Under existing law, various requirements and prohibitions relating to conflicts of interest and ethics in government apply to designated state employees. Existing law also subjects state employees who are members of the State Bar to the Rules of Professional Conduct. Under the California Constitution, the Supreme Court is required to make rules for the conduct of judges of courts of record, referred to as the Code of Judicial Ethics.

This bill would specify that the Code of Judicial Ethics governs the conduct of an administrative law judge or other presiding officer, with the exception of certain specified sections of that code, and would refer to these rules as the "Administrative Adjudication Code of Ethics." The bill would provide that a violation of these rules or certain other provisions that otherwise govern the acceptance of honoraria, gifts, or travel by elected state officers shall subject the violator to disciplinary action under the State Civil Service Act.

(2) Under existing law, all workers' compensation referees and settlement conference referees are required to subscribe to the California Code of Judicial Conduct adopted by the Conference of California Judges.

This bill would provide that all workers' compensation referees are subject to the Code of Judicial Ethics adopted by the California Supreme Court.

Ch. 96 (AB 1646) Battin. Parole.

Existing law prohibits returning an inmate who is released on parole to a location within 35 miles of the actual residence of a victim of, or a witness to, any specified violent felony or a felony in which the defendant inflicts great bodily injury on any person other than an accomplice, if the victim or witness has requested additional distance in the placement of the inmate on parole, and if the Board of Prison Terms or the Department of Corrections finds that there is a need to protect the life, safety, or well-being of a victim or witness.

This bill would prohibit the placement of an inmate who is released on parole for a conviction of any lewd or lascivious act with a child under 14 years of age or continuous sexual abuse of a child within one-quarter mile of any school that includes any or all of grades kindergarten to 6, inclusive.

Ch. 97 (AB 126) Papan. Criminal procedure: testimony: witnesses.

Existing law authorizes the videotaping of the testimony at a preliminary hearing of a victim of specified sex crimes who is 15 years of age or less, or who is developmentally disabled, as defined, which testimony may be introduced in evidence at trial if the court finds that further testimony would cause the victim emotional trauma so that the victim is medically unavailable or otherwise unavailable within specified provisions of the Evidence Code. Existing law also authorizes the court in a criminal proceeding relating to these sex crimes to order that the testimony of a minor or a person with a disability, as defined, be taken by contemporaneous examination and cross-examination in another place and out of the presence of the judge, jury, defendant, and attorneys, and be communicated to the courtroom by means of closed-circuit television. Existing law also authorizes the court, in its discretion, to make accommodations to support the person with a disability.

This bill would authorize these procedures to be employed in these criminal proceedings in which other described serious crimes are involved.

The bill would also require the Judicial Council to report to the Legislature, no later than 2 years after the enactment of its provisions, on the frequency of the use and effectiveness of admitting the videotape of testimony by means of closed-circuit television.

Ch. 98 (SB 1558) McPherson. Criminal procedure: dismissal.

Existing law, added by initiative measure, requires the court in felony cases, to set the trial date within 60 days of the defendant's arraignment in superior court unless, upon a showing of good cause, the court lengthens the time. On the other hand, another provision of existing law requires the court to dismiss a criminal action when a defendant is not brought to trial in a superior court within 60 days after the finding of the indictment, filing of the information, or other specified events.

This bill would amend the later provision summarized above to bring it in conformity with the initiative measure, by requiring the court to dismiss a criminal action when a defendant is not brought to trial in a superior court within 60 days of the defendant's arraignment in superior court.

Ch. 99 (SB 654) Johnston. Discrimination.

Existing law prohibits discrimination in employment-related matters on the basis of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, or age, and provides for enforcement of these provisions by the Department of Fair Employment and Housing.

This bill would provide for that purpose that "medical condition" includes genetic characteristics, as defined.

Ch. 100 (SB 177) Kopp. Evidence: proof of the content of a writing.

Existing law sets forth the rules governing the proof of the content of a writing in a civil or criminal action or proceeding.

This bill would revise and recast the rules governing the proof of the content of a writing in a civil or criminal action or proceeding, as specified.

Ch. 101 (SB 1089) Lockyer. Controlled substances: public park or oceanfront beach.

Existing law makes it a felony, punishable by imprisonment in the state prison, to possess for sale or sell heroin, cocaine, cocaine base, methamphetamine, or phencyclidine (PCP).

This bill would provide that any person who is convicted of any of these offenses, in addition to the punishment imposed for that conviction, shall be imprisoned in the state prison for an additional one year if the violation occurred upon the grounds of a public park or oceanfront beach, including adjacent public parking lots and sidewalks, and if no other additional punishment is imposed pursuant to specified provisions of the Uniform Controlled Substances Act. However, the bill would provide that its provisions shall apply to a public park or oceanfront beach only if the city council or county board of supervisors having jurisdiction over the public park or oceanfront beach adopts an ordinance designating the public park or oceanfront beach as a "drug-free zone" and notice of the bill's provisions is posted at the public park or oceanfront beach. The bill would provide that its provisions shall remain in effect only until January 1, 2003, and as of that date are repealed. The bill would further provide that any city council or county board of supervisors that adopts an ordinance designating a public park or oceanfront beach as a "drug-free zone" shall report annually to the Legislature on the number of arrests, and the disposition of each arrest, made in each "drug-free zone." Because this bill would require a local government to make a report to the Legislature, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 102 (SB 1380) Committee on Local Government. Validations.

This bill would enact the First Validating Act of 1998, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 103 (SB 1487) Rainey. Guardians, conservators, and administrators: accounting and compensation.

Existing law requires guardians and conservators to periodically present to the court an account relating to the assets of the estate; however, the court may make an order waiving this obligation if, among other things, the value of the estate property is less than \$5,000 and the estate's income during the relevant period is less than \$750.

This bill would authorize the court to waive the account obligation if the value of the estate property is less than \$7,500 and the estate's income during the relevant period is less than \$1,000.

Existing law provides that public administrators are entitled to a minimum compensation of \$600.

This bill would increase the minimum compensation of public administrators to \$750.

Ch. 104 (SB 1512) Maddy. Finance lenders: delinquency fees.

Existing law, known as the California Finance Lenders Law, provides for the licensure and regulation of persons engaged in the business of making consumer loans or commercial loans, and governs the terms, including those relating to charges and fees, that may be included in those loans.

This bill would, with respect to loans of under \$5,000, except for precomputed loans, authorize a licensee to contract for and receive a delinquency fee, as specified, for defaults in loan payments, subject to certain limitations on the amount of the fees and the period of default.

Ch. 105 (SB 1693) Dills. Elections: canvass of municipal returns.

Existing law requires the governing body of a city to canvass election returns and install newly elected officers on the first Tuesday following a municipal election, unless the governing body, by resolution, provides for an earlier date.

This bill would instead require city governing bodies to canvass these election returns and install newly elected officers on the second Tuesday following the election, unless an earlier date is provided by resolution.

Ch. 106 (SB 1840) Costa. Local government: counties: registrar of voters.

Under existing law, the duties pertaining to elections are performed by the county elections official. However, in specified counties, the board of supervisors is authorized to appoint a registrar of voters to discharge all duties vested by law in the county elections official which relate to, and are part of, the election procedure.

This bill would extend this appointment authority to Kings County.

Ch. 107 (AB 112) Escutia. Health.

Existing law provides for the regulation of health care service plans by the Commissioner of Corporations and of disability insurers by the Insurance Commissioner.

This bill would revise various provisions relating to these health plans and insurers.

Existing law regulates plans and insurers that provide coverage to small employers to require coverage to small employers in certain instances.

This bill would revise those provisions. Among other things, it would provide for the repeal of provisions that authorize qualified associations to provide administrative services, effective January 1, 2003.

Existing law regulates preexisting condition provisions.

This bill would, among other things, specify that those regulations are applicable to individuals that lose coverage because of legal separation for health care service plans as well as individuals who lose coverage for other reasons, and would revise definitions.

Existing law provides for continuation coverage to certain persons under the California COBRA Program.

This bill would revise those provisions. Among other things, it would revise provisions relating to noncore coverage, such as dental or vision coverage. It would revise disclosure requirements. It would prohibit the imposition of additional fees by health care service plans and disability insurers for administering Cal-COBRA.

Existing law contains other continuation of benefits provisions that became operative January 1, 1997, and limits the premiums that may be charged for that coverage.

This bill would revise the maximum premium that may be charged, as specified, and would require certain disclosures.

The bill would make other related and technical changes.

Since a willful violation of various requirements imposed by the bill upon a health care service plan would be a crime, the bill would impose a state-mandated local program by imposing a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 108 (AB 1449) Brown. Licensed marriage, family and child counselors: name change.

Existing law provides for the licensing of marriage, family and child counselors.

This bill would provide, commencing July 1, 1999, that any reference in any statute or regulation to "licensed marriage, family and child counselor" or "marriage, family and child counselor" shall be deemed a reference to "licensed marriage and family therapist" or "marriage and family therapist."

Ch. 109 (AB 1766) Takasugi. County employee retirement systems: administration.

(1) The County Employee Retirement Law of 1937 provides that the board of supervisors may provide that board of investment members receive compensation for not more than 3 meetings per month.

This bill would authorize the board of supervisors to increase that to 5 meetings per month.

(2) Existing law provides that the necessary work of administration by retirement board members is part of their official duties and shall be performed without additional compensation.

This bill instead would provide that elected board members who are county or district employees shall have their retirement board duties included as part of their county or district employment and that their board duties shall normally take precedence over any other duties.

(3) Existing law requires the county auditor to annually audit the retirement system accounts.

The bill would authorize the retirement board to retain a certified public accountant to perform the annual audit, authorize the board to select the county auditor to perform the annual audit, and authorize the county auditor to audit the retirement system at the request of the board of supervisors.

(4) Existing law authorizes district governing bodies to withdraw district employees from county retirement systems and prescribes the disposition of funds.

This bill would provide for the determination of district liabilities upon termination of participation.

Ch. 110 (AB 1795) Runner. Concealed firearms: license to carry.

(1) Under the California Public Records Act, public records of state agencies are required to be available for inspection. The act exempts from disclosure certain records, including information contained in applications for licenses to carry firearms issued pursuant to a specified provision of law.

This bill would specify that this exemption applies to information contained in applications and licenses issued pursuant to this specified provision, including the home

address and telephone number of peace officers, judges, court commissioners, and magistrates.

(2) Existing law authorizes the sheriff of a county or the chief or other head of a municipal police department of any city or city and county, upon proof that the person applying is of good moral character, that good cause exists for the issuance, and that the person applying is a resident of the county, to issue to that person a license to carry concealed a pistol, revolver, or other firearm capable of being concealed upon the person, valid for up to one year, or 3 years in the case of a deputized or appointed reserve or auxiliary peace officer.

This bill would include in this 3-year license provision California judges, full-time California court commissioners, and federal judges and magistrates.

Ch. 111 (AB 2042) Goldsmith. Public works: stop notices.

Existing law specifies the issuance and enforcement of stop notices for public works. It is the duty of a public entity to withhold from the original contractor, or any person acting under his or her authority, money or bonds due or to become due to the contractor in an amount sufficient to answer the claim stated in the stop notice and to provide for the reasonable cost of litigation thereunder.

This bill would recast this duty to state that the amount withheld shall be sufficient to provide for the public entity's reasonable cost of litigation thereunder, rather than the cost of litigation thereunder. The bill would authorize the public entity to satisfy this duty by refusing to release money held in escrow, as specified.

Ch. 112 (AB 2293) Scott. Public safety officers.

Under existing law, the Public Safety Officers Procedural Bill of Rights Act, no public safety officer may be compelled to submit to a polygraph examination against his or her will.

This bill instead would provide that no public safety officer may be compelled to submit to a lie detector test, as defined, against his or her will.

Ch. 113 (AB 2307) McClintock. Community facilities districts.

Existing law provides for foreclosure procedures against parcels or lots for special taxes imposed by a community facilities district that are delinquent.

This bill would provide that the judgment of foreclosure and sale of a lot or parcel pursuant to those procedures shall not terminate or otherwise affect the rights of the holder of an easement in that lot or parcel. The bill would further provide that it shall not be interpreted as limiting existing contractual rights.

Ch. 114 (AB 2507) Committee on Health. Podiatric medicine.

Existing law sets forth the requirements for licensure as a doctor of podiatric medicine, including requirements for a curriculum providing for adequate instruction in certain specified subjects. Commencing January 1, 2000, the curriculum requirements will additionally include, among other things, psychiatry.

This bill would delete the inclusion of psychiatry within the curriculum requirements.

Ch. 115 (AB 2609) Lempert. Firearms: university or college campus.

Existing law prohibits any person from bringing or possessing a loaded or unloaded firearm upon the grounds of any university or college campus.

This bill would, notwithstanding a specified notice provision, require a university or college to post a prominent notice at primary entrances on noncontiguous property stating that firearms are prohibited on that property and make clarifying, nonsubstantive changes to these prohibitions.

Ch. 116 (AB 2763) Committee on Public Employees, Retirement and Social Security. County employee retirement systems: benefits.

(1) Existing law provides that in Alameda and Orange Counties members having credit for 30 years of service shall not have member contributions deducted from their salaries.

This bill would include Los Angeles County in that provision.

(2) The County Employees Retirement Law of 1937 provides for service credit in a county retirement system for service in the Public Employees' Retirement System upon cessation of city or state firefighting or law enforcement employment by virtue of the assumption of those functions by a county, fire authority, or district and employment thereby. This provision is applicable in Los Angeles and Orange Counties.

This bill would make these provisions also applicable to Kern County.

(3) Existing law provides that the average compensation during service as a member of the Public Employees' Retirement System can be utilized to determine county retirement system benefits if the period intervening between active membership in both systems does not exceed 90 days.

This bill would authorize the board of supervisors in any county of the 4th class to also apply that provision to members where the period intervening between the periods of credited active service does not exceed 90 days.

Ch. 117 (SB 1174) Vasconcellos. Education: voluntary desegregation programs.

Existing law authorizes school districts that maintain specified voluntary desegregation programs to present claims for reimbursement for the costs of these programs. Existing law provides that the Grant Union High School District, the Lynwood Unified School District, the Sausalito Elementary School District, an East San Jose group of school districts, the Allensworth-Richgrove Districts Collaborative, the Carlsbad Unified School District, and the San Dieguito Union High School District may be funded for a voluntary desegregation program for racially isolated minority schools if certain criteria are met.

This bill would provide that those school districts may also be funded for other specified voluntary desegregation programs.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 118 (SB 1186) Committee on Public Safety. Vehicles: driving while under the influence.

Existing law makes it a crime to drive a vehicle while under the influence of alcohol, any drug, or a combination of alcohol and any drug. It is also a crime to drive a vehicle with a blood-alcohol content equal to or greater than a specified percentage or to drive a vehicle when addicted to the use of any drug.

This bill, the provisions of which would become operative on July, 1, 1999, would reorganize specified provisions relating to the above described driving while under the influence offenses without making any substantive changes to those provisions.

Ch. 119 (AB 1693) Sweeney. Punishment: enhancements.

Existing law defines the offense for which a person was released on bail on his or her own recognizance as a "primary offense," and the offense committed while so released as a "secondary offense." Under existing law, any person arrested for a secondary offense that was alleged to have been committed while that person was released from custody on a primary offense is subject to a penalty enhancement of an additional 2 years in state prison that shall be served consecutive to any other term imposed by the court. Existing law also requires pleading and proof of the enhancement allegation in the information or indictment that alleges the secondary offense and specifies that the enhancement allegation need not be proved at the preliminary hearing.

This bill additionally would require that the allegation be pleaded in the information or indictment of the primary offense if a conviction has already occurred in the secondary offense and would specify that the allegation need not be proved at the grand jury hearing with respect to either offense. The bill also would require that the time a person is released from custody on bail include the period of time between the pronouncement of judgment and the time when the defendant actually surrenders or is otherwise returned to custody.

Ch. 120 (SB 1442) Rainey. Crime prevention: peace officer training.

Existing law requires each applicant for admission to a basic course of training certified by the Commission on Peace Officer Standards and Training who is not sponsored by a law enforcement agency or is not a peace officer employed by a state or local agency,

department, or district, to submit written certification from the Department of Justice that he or she has no criminal background that would disqualify him or her from owning, possessing, or controlling any firearm, pursuant to specified provisions of law.

This bill would make a technical, nonsubstantive change to this provision and specify that the training referred to in this provision includes the carrying and use of firearms.

Ch. 121 (SB 1511) Haynes. Civil procedure: sanctions.

Existing law requires every pleading, petition, written notice of motion, or other similar paper to be signed by the attorney of record, or if a party is unrepresented, by the party, thereby certifying to the best of the person's knowledge, information, and belief that it is not being presented for an improper purpose, as specified, and that the claims, defenses, legal, and factual contentions are warranted, as specified. Existing law provides that trial courts may impose sanctions upon attorneys, law firms, or parties that violate these provisions in a complaint, petition, or other paper filed after January 1, 1995, and also provides for the repeal of these provisions as of January 1, 1999.

This bill would extend the repeal date of these provisions to January 1, 2003.

Existing law, operative January 1, 1999, contingent upon the repeal of the first specified provision, provides that every trial court may order a party, the party's attorney, or both to pay reasonable expenses, including attorney's fees, incurred by another party as a result of a bad faith action or tactic that is frivolous or solely intended to cause unnecessary delay.

This bill would instead provide for this provision to become operative as of January 1, 2003, if the first described provision is repealed as of that date.

Ch. 122 (SB 1728) M. Thompson. Prisoners: testimony.

Existing law provides for the transfer of incarcerated prisoners for purposes of testifying as witnesses in legal proceedings. Existing law also provides procedures under which a court can, subsequent to making specified findings, order the testimony of certain witnesses be given via two-way closed circuit television.

This bill would provide that a court may, upon submission of a written request, order incarcerated witnesses to testify via two-way audiovisual communication in connection with specified legal proceedings. The bill would provide, however, that with reference to testimony at a criminal trial, this procedure would only be available with the consent of both parties and, in consultation with the defendant's counsel, upon the rescindable waiver of his or her 6th Amendment right to compel the physical presence of the witness. The bill would also prohibit the offering of inducements or the imposition of penalties in connection with a defendant's consent to the use of closed-circuit testimony.

Ch. 123 (SB 1939) Alpert. Commencement of actions: domestic violence.

Existing law provides that the time for commencement for an action for injury or death suffered as a result of domestic violence, as specified, is 3 years from the date of the last act of domestic violence by the defendant against the plaintiff that gave rise to the cause of action.

This bill would revise existing law by providing that commencement of an action for recovery of damages suffered as a result of domestic violence shall be either within 3 years from the date of the last act of domestic violence by the defendant against the plaintiff or within 3 years of the date the plaintiff discovers or reasonably should have discovered that an injury or illness resulted from an act of domestic violence, whichever occurs last.

Ch. 124 (AB 742) Washington. Health care service plans.

Under existing law, the Health Care Service Plan Act of 1975, health care service plans are regulated by the Department of Corporations. Willful violation of the act is a crime.

This bill would require an enrollee of a health care service plan who has Medicare coverage and is discharged from an acute care hospital to be allowed to return to a skilled nursing facility, as defined, that serves the needs of special populations in which the enrollee resided for at least 60 days prior to hospitalization, or the skilled nursing unit of a continuing care retirement community, as defined, or multilevel facility, as defined, in which the enrollee is a resident, if certain conditions are met. The bill would require

the health care service plan to reimburse the facility to which the patient returns at one of 2 prescribed rates. The bill would require its provisions to be applicable to health care service plan contracts issued, amended, or renewed on or after January 1, 1999.

By changing the definition of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 125 (AB 1757) Bowler. County community schools and juvenile court schools.

Existing law limits expenditures from the juvenile court and community school account maintained by a county superintendent of schools to certain expenditures and further limits costs charged for probation officers to not more than the number of full-time equivalent probation officers paid for by the county office of education during the 1988–89 fiscal year.

This bill would remove the limitation on costs charged for probation officers.

Ch. 126 (AB 1855) Oller. Real property transactions: licensees: inducements.

Existing law provides for the licensure and regulation of real estate brokers and agents. Existing law prohibits a licensed real estate broker or agent from advertising or offering to give to a prospective purchaser, borrower, or lender, any premium, gift, or other object of value as an inducement for making a loan, or purchasing a promissory note secured by a lien on real property or a real property sales contract.

This bill would make that prohibition applicable only with respect to prospective purchasers or lenders.

Ch. 127 (AB 1926) Wildman. Sex offenses: evidence.

(1) Existing law excludes the admission of evidence of opinion, reputation, and specific instances of the complaining witness' sexual conduct, in any prosecution of a specified sex offense, when that evidence is offered to prove consent by the complaining witness. However, that provision does not apply to evidence of the complaining witness' sexual conduct with the defendant.

This bill would make inadmissible evidence of the manner in which the complaining witness was dressed, with the exception of the condition of the clothing, at the time the offense was committed, when offered by either party on the issue of consent, unless the court finds the evidence relevant and admissible in the interests of justice. The bill would require the court to state on the record the reasons for admitting or excluding the evidence.

(2) The California Constitution provides that relevant evidence shall not be excluded in any criminal proceeding except as provided by statute enacted by a $\frac{2}{3}$ vote of the membership of each house of the Legislature. Because this bill would limit the admissibility of evidence in criminal proceedings, it would require a $\frac{2}{3}$ vote.

Ch. 128 (AB 2558) Mazzoni. Unemployment compensation disability insurance.

Existing law requires the Employment Development Department to pay unemployment compensation disability benefits to eligible claimants. Existing law requires a claimant, subject to certain exceptions, to establish medical eligibility by filing a first claim for benefits supported by the certificate of a treating physician or practitioner, as specified. It defines a practitioner for these purposes to include, with respect to a normal pregnancy or childbirth, a duly certified nurse midwife or a duly licensed nurse practitioner.

This bill would also include within that definition of a practitioner a duly licensed midwife.

Ch. 129 (SB 1789) Peace. County employee retirement systems: benefits.

The County Employees Retirement Law of 1937 requires contributions and benefits to be based upon compensation earnable, as defined.

This bill would exclude salary bonuses or other specified compensation incentive payments received by any members who are in positions identified as executive or unclassified management from all retirement benefit calculations.

Ch. 130 (SB 2053) C. Wright. Instructional materials.

Pursuant to existing law, the Legislature encourages teachers to use films or videotapes giving an historically accurate depiction of the internment in the United States of persons of Japanese origin and its impact on Japanese-American citizens and of the Armenian genocide, as a resource in teaching pupils about these 2 important historical events.

This bill would include within this recommendation the use of films and videotapes that give an historically accurate depiction of the World War II internment, relocation, and restriction of persons of Italian origin.

Ch. 131 (AB 1645) Torlakson. Children.

Existing law prohibits registered sex offenders and persons convicted of certain other offenses against minors, as specified, from being granted custody of, or unsupervised visitation with, a child, unless the court finds that there is no significant risk to the child.

This bill would require the court to state its reasons in writing or on the record when granting physical or legal custody or unsupervised visitation.

Ch. 132 (SB 2137) Karnette. County employee retirement systems: benefits.

The County Employees Retirement Law of 1937 authorizes service retirement allowances to be granted pending disability retirement determination.

This bill would provide that the type of service retirement elected at the time of retirement is not binding upon either the beneficiary or the member if the member subsequently receives a disability retirement.

Existing law provides that surviving spouses of members who die after retirement for disability may be eligible to receive the member's retirement allowance, or a portion thereof, if the spouse is designated as beneficiary.

This bill would authorize surviving spouses to receive those benefits whether or not they have been named as beneficiary. The bill would also make technical, nonsubstantive changes.

Ch. 133 (AB 786) Machado. State seal.

Existing law provides that any person who maliciously or for commercial purposes uses or allows to be used any reproduction or facsimile of the Great Seal of the State in any manner whatsoever is guilty of a misdemeanor.

This bill would authorize the California Sesquicentennial Commission to enter into an agreement to use the Great Seal of the State for officially sanctioned products of the California Sesquicentennial celebration.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 134 (AB 2683) Aroner. San Francisco Bay Area Rapid Transit District: contracts: bidding.

Existing law provides that, with respect to the San Francisco Bay Area Rapid Transit District, the purchase of all supplies, equipment, and materials when the expenditure required exceeds \$25,000, shall be by contract let to the lowest responsible bidder. Whenever the expected procurement required exceeds \$2,500 and, in the case of the purchase of supplies, equipment, or materials does not exceed \$25,000, the district is required to obtain a minimum of 3 quotations, either written or oral, that permit prices and terms to be compared.

This bill instead would provide that, with respect to the district, the purchase of all supplies, equipment, and materials when the expenditure required exceeds \$40,000 shall be by contract let to the lowest responsible bidder. It would require the district to obtain a minimum of 3 quotations, either written or oral, that permit prices and terms to be compared, whenever the expected procurement required exceeds \$2,500 and, in the case of the purchase of supplies, equipment, or materials, does not exceed \$40,000.

Ch. 135 (AB 1719) Figueroa. Transportation of poles: limitation exemption.

Existing law exempts from limitations as to length of vehicles and loads, the transportation of poles and tools and materials incidental to the work to be performed when transported on a single-axle pole or pipe dolly or otherwise lawful single-axle semitrailer used as a dolly under specified circumstances.

This bill would delete the requirement that the exempted dolly or semitrailer be a single-axle unit.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 136 (AB 2270) Oller. Automobile insurance: certain policies.

Existing law defines the term "policy," with respect to the cancellation or failure to renew certain contracts of automobile insurance, to mean an automobile liability, automobile physical damage, or automobile collision policy or any combination thereof for various specified types of vehicles, including any 4-wheel motor vehicle with a load capacity of 1,500 pounds or less.

This bill would authorize an insurer, notwithstanding that definition, to deliver or issue an automobile liability, automobile physical damage, or automobile collision policy in this state insuring a single individual or individuals residing in the same household, as named insured, and under which the insured vehicle is a motor vehicle with a load capacity exceeding 1,500 pounds.

Ch. 137 (AB 1905) Ashburn. Highways: separation-of-grade districts.

Under existing law, the California Transportation Commission is required to make allocations for grade-separation projects, as defined, including allocations to local agencies, as defined.

This bill would specifically include in the definition of "local agency," for the purposes of the above, a separation-of-grade district.

The bill would, before a separation-of-grade district may apply for an allocation from the California Transportation Commission, require the district to consult with and obtain, as specified, the written consent of the city or county in which the project is located.

Ch. 138 (AB 2360) Olberg. Business licenses: exemption: veterans' organizations.

Existing law authorizes, with specified exceptions, the governing bodies of incorporated cities and of counties to license any kind of business not prohibited by law that is transacted and carried on within the limits of their jurisdictions, and to fix the license fee and provide for its collection.

This bill would provide that, notwithstanding these provisions or any other provision of law, no city, including a charter city, and no county or city and county shall require a regulatory license or impose a regulatory license fee with respect to the solicitation of donations for the support of veterans by federally chartered veterans' organizations specified in federal law.

Ch. 139 (AB 2384) Aguiar. Property taxation: mobilehomes.

Existing property tax law requires the reassessment of real property upon a change in ownership and specifies which transfers of real property constitute a change in ownership. It excludes from a change in ownership, and hence from reassessment, subject to certain conditions, any transfer made, on or after January 1, 1985, and prior to January 1, 2000, of a mobilehome park to a nonprofit corporation, stock cooperative corporation, limited equity stock cooperative, or other entity formed by the tenants of the park for the purpose of purchasing the park and any transfer of rental spaces in a mobilehome park to individual tenants renting their spaces prior to the purchase.

This bill would extend the above-described exclusions to apply indefinitely to those transfers.

Ch. 140 (AB 1946) Papan. Local sales and use taxes: leased vehicles: point of use.

The Bradley-Burns Uniform Local Sales and Use Tax Law requires that (1) if the lessor of a motor vehicle is a new motor vehicle dealer, as specifically defined by statute in the

context of new and unregistered vehicles, the place of use for reporting and transmitting any use tax with respect to the leased vehicle is the city in which the lessor's place of business is located, (2) if the lessor of a motor vehicle is neither a dealer as so described or a dealer as defined by statute in the context of vehicles generally, but purchases the leased vehicle from a dealer within this latter definition, the place of use for reporting and transmitting any use tax with respect to the purchased vehicle is the city in which the selling dealer's place of business is located, and (3) if the lessor is not a motor vehicle dealer as defined by statute either in the specific or general context and purchases the leased vehicle from a source other than either of those types of dealer, any use tax is to be reported to, and distributed through, the countywide pool of the county in which the lessee resides.

This bill would, for purposes of the first of these reporting and transmittal requirements, clarify the statutory definition of a new motor vehicle dealer, and would additionally apply this first requirement to a leasing company, as defined. This bill would modify the second of these reporting and transmittal requirements to apply only in the case in which a lessor is not a dealer or leasing company as described in the first reporting and transmittal requirement, as modified by this bill, but purchases the leased vehicle from a dealer or leasing company who is described by that modified first requirement. This bill would modify the third of these provisions to apply its reporting and distribution requirements in the case in which the lessor is neither a dealer as defined by statute in the context of vehicles generally or a person purchasing a leased vehicle from a dealer as so generally defined. This bill would specify, with respect to the remaining reporting and transmittal requirements, as modified by this bill, that the requirements applicable to a new motor vehicle dealer apply to lease transactions entered into on or after January 1, 1996, and that those requirements, applicable to a used motor vehicle dealer or a leasing company with motor vehicle receipts of \$15,000,000 or more per location, apply to lease transactions entered into on or after January 1, 1999.

Ch. 141 (SB 1620) Haynes. Nuisance: shooting ranges.

Existing law provides that nothing done or maintained under the express authority of a statute can be deemed a nuisance, and exempts a person who operates or uses a sport shooting range, as defined, from civil liability, injunction, or criminal prosecution with respect to noise or noise pollution if the person complies with the laws in operation at the time the sport shooting range was approved for use, or if there were no such laws in effect at that time. Existing law, however, does not prohibit a local public entity from requiring that noise levels at the nearest residential property line to a range do not exceed 60 decibels for nighttime shooting.

This bill would clarify the intent of the Legislature to not prohibit local public entities from being able to regulate noise levels regarding nighttime shooting, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 142 (SB 1860) Costa. Local Agency Public Construction Act: competitive bidding: local agencies.

(1) The Local Agency Public Construction Act sets forth the requirements for competitive bidding on various types of contracts awarded by local agencies. Under existing provisions of that act, a public utility district, municipal water district, water storage district, levee district, community services district, sanitation district, sanitary district, the American River Flood Control District, the Orange County Water District, the Santa Clara Valley Water District, the Yolo County Flood Control and Water Conservation District, the Tehama County Flood Control and Water Conservation District, the San Gorgino Pass Water Agency, the Crestline-Lake Arrowhead Water Agency, the Monterey Peninsula Water Management District, the Antelope Valley-East Kern Water Agency, the Fresno Metropolitan Flood Control District, and the Kings River Conservation District, when letting various contracts over a specified dollar amount, are required to let the contracts to the lowest responsible bidder.

This bill would increase the threshold amounts for these purposes.

(2) Existing law requires the board of a public utility district to advertise annually for sealed bids for furnishing the district with supplies and advertisements.

This bill would authorize, but not require, the board of a public utility district to advertise annually for this purpose.

Ch. 143 (SB 1805) Kelley. Irrigation districts: compensation.

The Irrigation District Law provides that a director on the board of an irrigation district that is smaller than 500,000 acres and produces or distributes electric power, for sitting on the board or acting under its orders, shall receive either \$100 per day or a monthly salary not to exceed \$600 per month.

This bill would, in addition, provide that a director may receive annual compensation not to exceed \$15,000, and would require that annual compensation to be set by the adoption of an ordinance pursuant to specified provisions of existing law.

Ch. 144 (SB 2009) Greene. Municipal utility districts: procurement: electronic equipment.

Existing law sets forth the requirements for the letting of contracts by municipal utility districts generally, and requires certain contracts to be let to the lowest responsible bidder.

This bill would authorize until January 1, 2006, a municipal utility district that serves electricity to more than 250,000 customers to procure information technology equipment, telecommunications equipment, metering equipment, microwave equipment, and other related electronic equipment and software in accordance with value-effective acquisition rules and regulations adopted by the district that may include specified criteria.

Ch. 145 (AB 1658) Leach. Real estate.

Existing law imposes various requirements when a real estate broker places a loan. Among other things, existing law provides that a broker shall deliver conformed copies of any deed of trust to both the investor or lender and the borrower within a reasonable amount of time from the date of recording.

This bill would permit the real estate broker to cause these documents to be delivered.

Existing law requires real estate brokers to include their license number and the telephone number of the Department of Real Estate in all advertisements where there is a solicitation of borrowers or potential investors. Existing law also requires the real estate broker to additionally disclose both the license number and license information telephone number whenever a borrower or investor signs any documents related to a loan negotiated by the broker.

This bill would delete the additional requirement of disclosure upon signing documents, and would instead require certain disclosure statements to include the licensee's license number and the department's license information telephone number.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 146 (AB 1301) Ortiz. Trial court funding.

Existing law establishes a program of state funding for trial courts.

This bill would revise various provisions relating to that program by prohibiting court fees for services rendered to the state; providing for the deposit in the county general fund rather than the state Trial Court Trust Fund of a specified portion of certain county recorder fees; revising the schedule for payment of trial court funding installments by the Controller; adding provisions granting credit against amounts owed to the state for specified amounts transmitted by a county to the Controller; establishing penalties for delinquent payment of amounts owed to the state; revising the retention by a county of specified excess fee, fine, and forfeiture revenue; revising the respective duties of the state and the counties to transmit specified moneys relative to trial court funding; deleting the duty of the Department of Finance to notify various public entities of county remittance adjustments; authorizing a minimum subvention for trial court funding for Ventura County, as specified; revising the authority of the Judicial Council to allocate funds appropriated to the Trial Court Trust Fund, as specified; revising certain restrictions on expenditures from the Trial Court Improvement Fund; revising the duty of a board of supervisors to provide suitable court facilities; deleting the requirement for General Fund reimbursement for a specified differential for certain counties having

agreements that city fines and forfeitures accrue to the county in exchange for sales tax receipts; and revising the authorized deduction available to a county for conducting a delinquent fine and forfeiture program. The bill would also make technical, nonsubstantive changes. The bill would require the Controller, immediately upon the enactment of the bill, to transfer from the General Fund to the Trial Court Trust Fund, a sum as necessary to provide a separate amount of \$20,500,000 for disbursement to trial courts for uncompensated expenses of trial court operations incurred during fiscal year 1997-98, plus the sum of \$90,000,000. The \$90,000,000 would be in the form of a no interest loan to be repaid to the General Fund from the Trial Court Trust Fund by the Controller within 10 days of the enactment of the Budget Act of 1998.

The bill would appropriate all funds available in the Trial Court Trust Fund between July 1, 1998, and August 31, 1998, for apportionment by the Controller, according to allocation by the Judicial Council, to reimburse trial courts for uncompensated expenses of trial court operations incurred during fiscal year 1997-98 and to meet the payroll and compensation needs of the trial courts for fiscal year 1998-99, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 147 (SB 1505) Lewis. Presidential primary elections.

Existing law, as amended by Proposition 198 known as the Open Primary Act, provides that all properly registered voters may vote for their choice at any primary election for any candidate for each office, regardless of political affiliation, and, for that purpose, specifies that each voter at a primary election shall receive an official primary ballot containing the names of all candidates for both nonpartisan and partisan offices. Proposition 198, an initiative measure, provides that no provision of that measure may be changed except by a vote of the people.

This bill would enact the Save the Presidential Primary Act amending the above provisions of the Open Primary Act to revise balloting for direct presidential primary elections. The bill would require partisan ballots to be used for the selection of delegates to presidential nominating conventions of political parties, and the use of each partisan presidential primary ballot would be restricted to members of the particular political party.

This bill would call a special statewide election to be consolidated with the general election scheduled for November 3, 1998. It would provide for the submission to the voters of the provisions of this bill amending the Open Primary Act, as summarized above, at that election.

This bill would declare that it is to take effect immediately as an act calling an election.

Ch. 148 (AB 302) Runner. Mental health: disclosure of records: law enforcement.

Existing law prohibits the disclosure of all information and records obtained in the course of providing intake, assessment, and services to persons with developmental disabilities, or in the course of providing certain mental health services to either voluntary or involuntary recipients of services. However, existing law requires the disclosure of this information in certain specified circumstances.

This bill would require disclosure of information to a law enforcement officer who is attempting to locate a person and who personally lodges with any of certain types of health or mental health facilities a warrant of arrest or an abstract of such a warrant showing that the person sought is wanted for a violent or serious felony, as defined. The bill would limit this disclosure to whether the person is presently confined in a facility.

Ch. 149 (AB 322) Baca. Regional occupational centers and programs.

(1) Existing law authorizes a single school district meeting certain requirements and maintaining a regional occupational center or program (ROC/P) to have specified adjustments made to its revenue limits, and requires that the revenue limit to a county superintendent of schools be adjusted, as specified.

This bill would repeal that provision.

(2) Existing law prescribes a formula for the apportionment of funds for ROC/Ps. This formula requires the Superintendent of Public Instruction to calculate the ROC/P's pro rata share of the funded growth average daily attendance, as defined, based on the

percentage of average daily attendance funded in the prior year in relation to the total statewide average daily attendance in the prior year.

This bill would instead require that this calculation be made based on the prior year average daily attendance in grades 9 to 12, inclusive, for the school districts served by the ROC/P in relation to the total statewide prior year average daily attendance in grades 9 to 12, inclusive and would provide that, for purposes of this calculation, the superintendent is required to use the average daily attendance reported for the second principal apportionment of the prior year.

This bill would declare the intent of the Legislature that each ROC/P use its share of funded growth average daily attendance to serve pupils in grades 9 to 12, inclusive, unless a determination is made that the needs of pupils in grades 9 to 12, inclusive, have been met.

Ch. 150 (AB 1307) Bordonaro. Employment: wage orders.

Under existing law, the Industrial Welfare Commission is required to perform various functions, as specified, related to wages, hours, employment conditions, and the health, safety, and welfare of employees in this state. The commission also is required to consult with the Occupational Safety and Health Standards Board to determine those areas and subjects where their respective jurisdictions overlap.

This bill would specify that the consultation between the Industrial Welfare Commission and the Occupational Safety and Health Standards Board need not take the form of a joint meeting.

Existing law requires the Industrial Welfare Commission to include a statement as to the basis upon which each of its orders is predicated.

This bill would require the commission to publish a copy of that statement with the order in the California Regulatory Notice Register and to provide a copy of the statement to any interested party upon request. The bill also would require the commission to prepare a summary of the regulations contained in its orders, as specified.

Existing law requires the Industrial Welfare Commission to send by mail, so far as is practicable, to each employer in the occupation or industry in question and to each employer registering his or her name with the commission a copy of an order that is adopted or amended. Existing law provides that failure by the commission to mail the order or notice to any employer affected thereby does not relieve the employer from the duty of complying with the order.

This bill would make technical changes to that provision. The bill would require the commission to print a summary of its order on the first page of the document containing the full text of the order.

Existing law requires certain orders adopted or amended by the Industrial Welfare Commission to be published in at least one newspaper in specified cities in California. Existing law provides that a finding by the commission that there has been publication is conclusive.

This bill instead would provide that a finding by the commission that there has been publication of any action taken by the commission is conclusive as to the obligation of an employer to comply with the order.

Existing law requires an employer to post a copy of an order of the Industrial Welfare Commission in the building in which employees affected by the order are employed.

This bill instead would require every employer who is subject to an order of the commission to post the summary and keep it posted in a conspicuous location frequented by employees during the hours of the workday. The bill would make other related conforming changes.

Ch. 151 (AB 1817) Takasugi. Adult day health care.

Existing law, the California Adult Day Health Care Act, governs the provision of adult day health care.

Under existing law, certain administrative responsibilities under this act were transferred from the State Department of Health Services to the California Department of Aging.

This bill would specify that the authority, functions, and responsibility for the administration of the adult day health care program by the California Department of

Aging and the State Department of Health Services shall be defined in an interagency agreement between the two departments that specifies how the departments will work together.

Existing law requires the State Department of Health Services to conduct a grants-in-aid program to assist in the establishment of new adult day health care centers and the stabilization of existing centers that meet specified requirements.

Under existing law, the grant amount available for a single project is limited to \$50,000.

This bill would eliminate this limitation.

Existing law provides that any older person meeting specified requirements shall be eligible for adult day health care services.

This bill would, instead, provide that any adult meeting these eligibility requirements shall be eligible for these services.

Existing law requires adult day health care centers to have written procedures for dealing with emergency situations, which are required to include specified items.

This bill would, instead, require these written procedures to include either the use of a local 911 emergency response system or the other specified items.

Existing law provides that if an adult day health care center licensee also provides adult day care, adult day social care, or Alzheimer's day care resource center services, the license shall be the only license required to provide these additional services.

This bill would require the department to evaluate these additional services for quality of care and compliance with program requirements, concurrent with inspections of the adult day health care facility, using a single source survey. It would also change references to adult day social care services to adult day support center services.

The bill would also require the department and the California Department of Aging to jointly adopt regulations for the provision of different levels of care under the single adult day health care license.

Existing law requires that payment for adult day health care services to Medi-Cal recipients shall be made for services provided during the preceding month.

This bill would eliminate the requirement that payment be for services provided during the preceding month.

Existing law requires adult day health care centers receiving reimbursement for the provision of services to Medi-Cal recipients to submit annual cost reports to the State Department of Health Services no later than 3 months after the close of the facility's fiscal year.

This bill would, instead, require these reports to be submitted no later than 5 months after the close of the licensee's fiscal year.

Existing law requires that subcontracts between an adult day health care center and a subcontractor be kept on file with the department.

This bill would, instead, require these subcontracts to be kept on file and be available at the center.

The bill would declare that it is not the intent of the Legislature to create additional work for either the State Department of Health Services or the California Department of Aging, either in the surveying or development of regulations, that cannot be absorbed by existing resources in those departments.

This bill would make other technical and conforming changes.

Ch. 152 (AB 1852) Pacheco. Teacher credentialing: fees.

Existing law requires the Commission on Teacher Credentialing to levy and collect an additional fee of \$200 for the issuance of the 5-year preliminary credential for out-of-state teachers to be used to offset the costs of the out-of-state teacher credential program and to develop a tracking system to ensure compliance with the requirements of an out-of-state teacher recruitment program.

Existing law requires, as part of the annual budget review process, the Director of Finance to recommend to the Legislature a level for this fee so that the fee may generate sufficient revenues to meet the goals of the program.

This bill would, instead, provide that, commencing January 1, 1999, the fee would be up to \$200, as determined by the commission within its discretion. The bill would also require that the commission, as part of the annual budget review process, recommend a level for this fee. This bill would renumber these provisions and provisions relating to

credentialing of out-of-state teachers so as to include them with other provisions relating to credential types. The bill would require that, as part of the budget review process connected with the legislative deliberations on the Budget Act of 1999, the commission report to the Legislature on the level of revenue generated by the fee during the 1998–99 fiscal year.

Ch. 153 (AB 1891) Davis. Small business financial development corporations.

Existing law regulating small business provides for a Small Business Development Board, located within the Trade and Commerce Agency, which is charged with advising the Executive Director of the California Office of Small Business on issues and programs affecting California's small business community. Existing law also establishes nonprofit California small business financial development corporations, which are charged with the development and implementation of programs to provide assistance to small businesses, including the provision of loan guarantees which will maximize the probability of loan repayments.

This bill would require that the Executive Director of the California Office of Small Business meet with the board of directors of each small business financial development corporation at least once each fiscal year, commencing July 1, 1999.

Existing law permits the California Office of Small Business Development to authorize a small business financial development corporation to exceed the leverage ratio, as specified, for an individual corporation pending the annual reallocation of funds in a corporation's loan guarantee fund to another corporation determined to be most effectively using its guarantee funds.

This bill would specify that no small business financial development corporation shall be permitted to exceed an outstanding guarantee liability of more than 5 times its portion of funds on deposit in the expansion fund.

Ch. 154 (AB 2046) Goldsmith. False claims actions: plaintiffs.

Under the False Claims Act, if the state or a political subdivision elects not to proceed with a false claims action, a person as the *qui tam* plaintiff may proceed with a civil action for the person and either for the State of California in the name of the state, if any state funds are involved, or for the political subdivision in its name, if only political subdivision funds are involved. If the defendant in the *qui tam* action prevails, the court is authorized to award reasonable attorneys' fees and expenses against the *qui tam* plaintiff if it finds that the claim was clearly frivolous, clearly vexatious, or brought solely for purposes of harassment.

This bill would also authorize the court in a false claim action under the act to award reasonable attorneys' fees and expenses against the state or the political subdivision if either proceeds with the action and the same conditions are met.

Ch. 155 (AB 2326) House. Railroads: public grade crossings.

Under existing law, the Public Utilities Commission regulates the occupancy of a public grade crossing by a railroad. The regulations specify that, with certain exceptions, a stopped train, other than a passenger train, may not occupy a public grade crossing for longer than 10 minutes, and that the switching of train cars or locomotives over a public grade crossing may not take place for longer than 10 minutes, and prescribe related matters. The regulations establish a procedure pursuant to which a railroad or a public agency may request a variance from those requirements. Under the regulations, the district attorney or city attorney is required to prosecute noncompliance by a railroad by means of a misdemeanor complaint, as prescribed.

This bill would add provisions to include those regulations in the Public Utilities Code as a 3-year pilot project in Stanislaus County, and would specify that the railroad corporation would be guilty of a misdemeanor for each and every violation of those provisions, and be fined up to \$1,000 for each and every offense. The bill would provide that whenever a railroad corporation is chargeable for a violation of any of those provisions, no crew member of a train shall be arrested or cited for the violation.

Ch. 156 (AB 2460) Leach. Educational resources: inflation adjustments.

Existing law requires the Superintendent of Public Instruction to compute an inflation adjustment each fiscal year equal to the product of certain numbers. Part of that calculation requires the use of the statewide average base revenue limit per unit of average daily attendance for the prior fiscal year for districts of similar type.

This bill would require the Legislative Analyst's office to examine the revenue limits for the 1998–99 fiscal year, to develop several options regarding a sliding scale formula, based on the distribution of the 1998–99 fiscal year revenue limits, and to present these options and corresponding recommendations, in writing, to the Legislature, the Governor, the Director of Finance, and the Superintendent of Public Instruction by March 1, 1999.

Ch. 157 (SB 1365) Ayala. State employees: benefits.

Existing law establishes certain rights and benefits that accrue to state employees who are granted long-term, short-term, or emergency leave of military leave of absence.

This bill would additionally provide that a state employee who, as a member of the California National Guard or a United States military reserve organization, is ordered to active duty by Presidential determination that it is necessary to augment the active forces for any operational mission, or when in time of national emergency declared by the President or otherwise authorized by law, shall receive for the duration of the event for a period not to exceed 180 days as part of his or her compensation the difference between the amount of his or her military pay and the amount the person would have received as a state employee, and all benefits he or she would have received had he or she not served on active duty, as specified.

Ch. 158 (SB 1424) Maddy. Transactions and use tax: City of Clovis.

Existing law authorizes various local governmental entities, in accordance with certain limitations and approval requirements, to levy transactions and use taxes in accordance with the procedures and requirements set forth in the Transactions and Use Tax Law.

This bill would additionally authorize the City of Clovis, subject to the approval of two-thirds of the voters voting on the issue at an election, to levy a transactions and use tax pursuant to the Transactions and Use Tax Law at a rate not to exceed 0.3% for purposes of funding police or fire-related facilities, furnishings, and equipment.

This bill would make legislative findings and declarations as to the necessity for a special statute.

Ch. 159 (SB 1452) McPherson. Public safety: consolidated municipal agencies.

Existing law identifies persons who are peace officers and provides that these persons must meet requirements imposed by law, regulation, and Peace Officers Standards and Training guidelines in connection with appointment as a peace officer.

This bill would define the term "consolidated municipal public safety agency," and provide that the chief, director, or chief executive officer of such an agency is a peace officer, subject to the same requirements as, and possessing the same rights, responsibilities, and privileges of, a municipal chief of police.

This bill would make additional conforming changes.

Ch. 160 (SB 1862) Dills. Keeper fees.

Existing law sets keeper fees at not more than \$75 for every 8-hour period, not more than \$150 for any 24-hour period, and \$21 for preparing a not-found return.

This bill would raise those fees to \$100, \$175, and \$25, respectively, and also provide a \$10 per diem compensation for meals and mileage traveled.

Ch. 161 (SB 2007) Kelley. Horse racing.

Existing law provides that the intent of the Horse Racing Law is to allow parimutuel wagering on horse races, while also, among other things, generating public revenues.

This bill would instead provide that the intent of the Horse Racing Law is to allow parimutuel wagering, while also, among other things, supporting the network of California fairs. The bill would also make technical, nonsubstantive changes.

Ch. 162 (SB 2061) Rainey. Interpretation of criminal provisions.

Under existing law, with respect to the Penal Code, words and phrases must be construed according to the context and the approved usage of the language, except that technical words and phrases, and others that may have acquired a peculiar and appropriate meaning in law, must be construed according to that peculiar and appropriate meaning.

This bill would provide that whenever any offense is described in the Penal Code, the Uniform Controlled Substances Act, or the Welfare and Institutions Code, as criminal conduct and as a violation of a specified code section or a particular provision of a code section, in the case of any ambiguity or conflict in interpretation, the code section or particular provision of the code section shall take precedence over the descriptive language. The bill also would provide that descriptive language shall be deemed as being offered only for ease of reference unless it is otherwise clearly apparent from the context that the descriptive language is intended to narrow the application of the referenced code section or particular provision of the code section.

Ch. 163 (AB 333) Figueroa. Insurance: fiduciary funds.

Existing law requires that fiduciary funds received by licensed insurance agents be maintained in a trustee bank account or securities issued by or backed by the United States or in certificates of deposit of banks or savings and loan associations licensed by any state government or by the United States.

This bill would add certain state and local bonds and short-term notes that are rated by Moody's Investor Service, Inc., or Standard and Poor's Corporation, as specified, to the list of permissible repositories for fiduciary funds.

Ch. 164 (AB 609) Margett. Recycled water.

(1) The Water Recycling Act of 1991 provides that water producers and retail water suppliers may cooperate in joint studies to determine the feasibility of providing recycled water service, as prescribed.

This bill would provide that recycled water producers, retail water suppliers, and entities responsible for groundwater replenishment, as defined, may cooperate in joint studies to determine the feasibility of providing recycled water service and recycled water for groundwater replenishment, as specified.

(2) The act authorizes a retail water supplier that has identified a potential use or customer to apply to a recycled water producer or wholesaler for a recycled water supply. The act authorizes a recycled water producer or wholesaler that has identified a potential use or customer to request, in writing, a retail water supplier to enter into an agreement to provide recycled water to the potential customer.

This bill would authorize an entity responsible for groundwater replenishment that has identified the potential use of recycled water for groundwater replenishment purposes to request, in writing, a recycled water producer or wholesaler to enter into an agreement to provide recycled water for that purpose.

(3) The act provides that either party may request a formal mediation process if there is a failure to agree on terms for a recycled water supply agreement within 6 months after the receipt of an application for recycled water.

This bill would, instead, authorize any party to request the formal mediation process. The bill would amend related legislative findings and declarations.

Ch. 165 (AB 632) Cardenas. Employment Development Department: programs.

Existing law requires the Employment Development Department to develop and implement a taxpayer education and information program, which would include participation in small business seminars and similar programs organized by state and local agencies.

This bill would additionally authorize the inclusion of participation in seminars organized by private organizations.

Ch. 166 (AB 903) Miller. Crime: fraudulent solicitation.

Existing law makes it a misdemeanor to fraudulently solicit money or property for charitable or religious purposes, punishable by imprisonment in a county jail for not more than 6 months, by a fine not exceeding \$1,000, or by both that imprisonment and fine.

This bill would make this crime punishable by imprisonment in a county jail for not more than one year, by a fine not exceeding \$5,000, or by both that imprisonment and fine. This bill would also make technical, nonsubstantive changes. By increasing the penalty for an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 167 (AB 1199) Alby. Court proceedings: disqualification of judges.

Existing law provides that a party to a civil or criminal action or proceeding may move to disqualify a judge, commissioner, or referee for prejudice, as specified, including following reversal on appeal of a trial court decision if the trial judge in the prior proceeding is assigned to conduct a new trial on the matter. No party or attorney, however, may make more than one motion to disqualify in any one action or special proceeding, as specified.

This bill would also provide that a motion to disqualify may be made following reversal on appeal of a trial court's final judgment by the party or side that filed the appeal, and would create an exception allowing that party or side to make this motion without regard to whether that party or side has made a previous motion to disqualify for prejudice.

Ch. 168 (AB 1314) Leach. Cremated remains.

Existing law provides for the regulation of cemeteries by the Department of Consumer Affairs through its Cemetery Program. Related provisions regulate cremated remains disposers, and require persons who dispose of cremated remains to be registered, unless exempt, and to file annual reports specifying the number of cases handled and the area of scattering.

The bill would, instead, require the annual reports to include the names of the deceased persons whose cremated remains were disposed of, the dates of receipt of the cremated remains, the names and addresses of the persons who authorized disposal of those remains, the dates and locations of disposal of those remains, and the means and manner of disposition, and would require the cremated remains disposer to maintain updated copies of those reports. It would also delete obsolete references to the Cemetery Board. This bill would also require a cremated remains disposer to dispose of cremated remains within 60 days of the receipt of those remains, unless a written signed reason for a delay is presented to the person with the legal right to control the disposition of the remains, and to provide the Cemetery Program with the address and phone number of any storage facility being used by the cremated remains disposer to store cremated remains. The bill would require cremated remains to be stored in a place free from exposure to the elements, and to be responsibly maintained until disposal. It would require the Cemetery Program to conduct random inspections, as specified, and would authorize inspection of storage facilities.

The bill would provide that any cremated remains disposer who stores cremated remains in a reckless manner that results in the loss of all or part of the cremated remains or the inability to identify the cremated remains is guilty of a public offense punishable as a misdemeanor, as specified. Since the bill would create a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 169 (AB 1329) Papan. Vehicles: removal, impound, storage, or release of: administrative costs.

Existing law authorizes a city, county, or city and county, or a state agency to adopt a regulation, ordinance, or resolution establishing procedures for the release of properly impounded vehicles and for the imposition of a charge on the registered owner of a

vehicle equal to its administrative costs relating to the removal, impound, storage, or release of the vehicles.

This bill, in addition, would prohibit any charge for these administrative costs from being imposed for any hearing or appeal relating to the removal, impound, storage, or release of a vehicle unless that hearing or appeal was requested in writing by the registered or legal owner of the vehicle or an agent of that registered or legal owner. In addition, the bill would specify that the charge could be imposed only upon the person requesting that hearing or appeal.

Ch. 170 (AB 1775) Runner. Water districts: Castaic Lake Water Agency.

(1) The Castaic Lake Water Agency Law creates the Castaic Lake Water Agency and requires a board of directors of the agency to govern the agency, as prescribed, including requiring the board to choose one of its members to be president.

This bill would authorize the board, by majority vote, to appoint from its members one vice president and to define the duties of the vice president.

(2) The agency law prescribes matters relating to the adoption of the annual capital budget of the agency, as defined, and provides for the annual adoption of a facility capacity fee as a source of revenue for the annual capital budget.

This bill would authorize the board to adopt a multiyear capital budget for the agency, as prescribed. The bill would authorize the board to adopt a facility capacity fee as part of its annual capital budget or multiyear capital budget and would authorize the board to allow the fee to remain in effect until the board, subject to applicable notice and hearing requirements, changes or repeals the fee by resolution.

Ch. 171 (AB 1796) Mazzoni. Fines and forfeitures: alcohol and drug testing.

Existing law requires that in the County of Sonoma, among others, \$50 for each conviction of specified Vehicle Code violations are required to be deposited in a special account for exclusive allocation by the administrator of the county's alcoholism program, with the approval of the board of supervisors, for alcohol programs and services for the general population.

This bill would add provisions to authorize the County of Sonoma, with the approval of the board of supervisors, to deposit \$50 for each conviction of specified Vehicle Code violations in a special account to be used exclusively to pay the cost incurred by the county, or a city or special district within the county, for performing analysis of blood, breath, or urine for alcohol content or for the presence of drugs, or for services related to the testing.

The bill would provide that these provisions would not reduce the county's remittance to the state required under existing law.

Ch. 172 (AB 1819) Takasugi. Controlled substances: reporting requirements: physicians.

Under existing law, the physician prescribing, furnishing, or administering any narcotic or controlled substance in the treatment of an addict is required to make specified reports regarding this treatment to the Department of Justice within 5 days after the first treatment.

This bill would repeal this requirement.

Ch. 173 (AB 1826) McClintock. Housing: Community Land Chest Law.

Existing law, the Community Land Chest Law, authorizes the establishment of corporations known as land chest or community land chest corporations to provide rural and suburban low-income housing, and prescribes related powers and duties of the Commissioner of Corporations.

This bill would repeal that law. The bill would provide that the repeal shall not affect the status of any land chest corporation that was formed prior to the effective date of the repeal, and the Commissioner of Corporations may apply, as if operative, the provisions that were in effect immediately prior to the repeal, to any land chest corporation that was formed prior to the effective date of the repeal.

Ch. 174 (AB 1860) McClintock. Financial institutions: escrow agents.

Existing law, known as the Escrow Law, prohibits any person from engaging in business as an escrow agent within the state except through a corporation organized for that purpose and duly licensed by the Commissioner of Corporations. Existing law also prohibits the acquisition of any escrow agent license, either in whole or in part, through stock purchase, foreclosure pursuant to a pledge or hypothecation, or other devices without the consent of the commissioner, and requires that a new application for licensure be filed prior to the transfer of 10% or more of the shares of an escrow agent.

This bill would, in addition, prohibit the acquisition of any escrow agent license directly or indirectly through the methods listed above without the consent of the commissioner, and would require that the escrow agent file the new application for licensure prior to the transfer of 10% or more of the shares of the escrow agent unless the transfer will be made by an existing shareholder to another existing shareholder who also owns 10% or more of the shares of the escrow agent before the transfer.

Ch. 175 (AB 2120) Cedillo. Licensed acupuncturists: professional corporations.

Existing law regulating professional corporations provides that certain licensed persons may be shareholders, officers, directors, or professional employees of designated professional corporations, subject to certain limitations.

This bill would add licensed acupuncturists to the list of licensed persons who may be shareholders, officers, directors, or professional employees of certain of these designated professional corporations.

Ch. 176 (AB 2334) Baugh. Workers' compensation insurance: experience rating information.

Existing law governing workers' compensation insurance authorizes a licensed rating organization to make available experience rating information contained in its records to any insurer admitted to transact workers' compensation insurance in the state or to any insurance agent or broker that is licensed to transact workers' compensation insurance in the state, upon written request, as specified. Existing law defines "experience rating information" for these purposes to mean information released on microfiche by a licensed rating organization which identifies all experience-rated employers, and the experience ratings and classifications or experience modifications which apply or applied to those employers.

This bill would expand the definition of "experience rating information" to also include information of the type described above that is released in forms or media other than microfiche.

Ch. 177 (AB 2612) Migden. Retail food facilities.

Existing law, the California Uniform Retail Food Facilities Law, administered by the State Department of Health Services, establishes uniform health and sanitation standards for retail food facilities, as defined. The law requires the State Department of Health Services to adopt regulations to implement and administer those provisions, and delegates primary enforcement duties to local health agencies. Violation of the California Uniform Retail Food Facilities Law and regulations adopted pursuant thereto is a crime.

Existing law requires that all potentially hazardous food be held at or below or kept at or above certain temperatures at all times, with certain exceptions.

Existing law requires that all ready-to-eat foods prepared at the food facility from raw or incompletely cooked animal tissues be thoroughly cooked prior to serving, as prescribed, with certain exceptions for ready-to-eat foods made from or containing eggs, comminuted meat, or single pieces of meat, including fish and seafood, when the consumer specifically orders that these foods be individually prepared less than thoroughly cooked.

This bill would, in addition, provide that a ready-to-eat food containing a raw or less than thoroughly cooked egg as an ingredient, including, but not limited to, a salad dressing or sauce, may be served if the facility notifies the consumer, either orally or in writing, that the food contains that ingredient, and the consumer does not object to the preparation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 178 (AB 2694) Pacheco. Residential mortgage lending.

Existing law, the California Residential Mortgage Lending Act, regulates the making of residential mortgage loans by specified entities. The act requires the licensing of persons who make and service loans on residential real property. The Commissioner of Corporations is authorized to order a licensee that opens a branch office in this state or changes its business location or its locations from which activities are conducted, without first obtaining approval from the commissioner, to forfeit a specified amount, as specified.

This bill would make that provision applicable where the licensee has not first notified the commissioner of its action. It would also make technical nonsubstantive changes in that law.

Ch. 179 (SB 478) Haynes. Residential care facilities for the elderly.

Existing law, the California Residential Care Facilities for the Elderly Act, authorizes an adult who has control of the property, to continue operation of a residential care facility for the elderly after the death of the licensee if certain conditions are met, including, but not limited to, the department receives notification of the death during the next normal workday.

This bill would eliminate the requirement that the department receive notification of the death of a licensee as a condition of designating the person operating the facility as the responsible party to continue operation of the property, and, instead, would require the designee to notify the State Department of Social Services of the death of the licensee by the close of business on the following business day.

Ch. 180 (SB 1129) Sher. Health care service plans: disability insurers: terminated providers.

Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, willful violation of any of these provisions is a misdemeanor.

Existing law also provides for the regulation of policies of disability insurance administered by the Insurance Commissioner. Existing law requires that health care service plans and disability insurers provide coverage for certain benefits and services.

This bill would require every health care service plan and certain disability insurers, at the request of an enrollee or insured, to arrange for continuation of covered services rendered by a terminated provider to an enrollee or insured who is undergoing a course of treatment from a terminated provider for an acute condition or serious chronic condition, a high-risk pregnancy, or a pregnancy that has reached the second or third trimester, pursuant to prescribed requirements.

Since a willful violation of the provisions applicable to health care service plans is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate additional changes in Section 1363 of the Health and Safety Code, proposed by A.B. 607, to be operative only if A.B. 607 and this bill are both chaptered and become effective January 1, 1999, and this bill is chaptered last.

Ch. 181 (SB 1460) Maddy. State fairs.

Under existing law, the Department of Food and Agriculture is responsible for ensuring the integrity of the Fair and Exposition Fund, and is required to provide oversight over specified activities carried out by each California fair.

This bill would additionally require the department to provide oversight over the conduct of fiscal and performance audits of county fairs and citrus fruit fairs that are requested by the fair that is the subject of the audit, and that the department deems to be necessary.

Existing law requires that all revenue distributed to the state as license fees from satellite wagering facilities be deposited in a separate account in the fund, and

continuously appropriated to the department for specified purposes relating to the operation and support of state fairs. Existing law further requires the Legislature to annually appropriate to the department from the total revenue received by the California Horse Racing Board, except as specified, and in addition to specified revenues received by the board from satellite wagering fees that are paid into the State Treasury to the credit of the fund, such sums that it deems necessary for, among other things, auditing of all district agricultural association fairs.

This bill would additionally require the Legislature to annually appropriate to the department such sums as it deems necessary for the auditing of county fairs, and citrus fruit fairs.

Existing law provides the department with regulatory authority over district agricultural associations, and authorizes the department to delegate approval authority for such matters as the department may determine to the board of directors of the association. Existing law also authorizes the department to assume all rights, duties, and powers of the board of directors of a district agricultural association if the department determines there is insufficient oversight. Existing law requires the department to report annually to the Joint Fairs Committee with the names of any district agricultural associations to which it has delegated approval authority or of which it has taken control.

This bill would make clarifying and conforming changes, by instead referring to the Joint Committee on Fairs Allocation and Classification. This change is technical and nonsubstantive.

Ch. 182 (SB 1470) M. Thompson. Criminal procedure: warrantless arrest: domestic violence.

Existing law specifies circumstances under which a peace officer may make a warrantless arrest, including the circumstance when the officer is responding to a call alleging a violation of a domestic violence protective or restraining order issued under specified provisions of law or where the officer has reasonable cause to believe that the person to be arrested has committed a public offense in the officer's presence. Existing law also specifically authorizes a warrantless arrest if a person commits an assault or battery upon his or her spouse, upon a person with whom he or she is cohabiting, or upon the parent of his or her child and 2 additional circumstances apply.

This bill would include, for purposes of this latter provision, a number of additional persons among the class of persons upon whom an assault or battery is committed, including a current or former spouse or cohabitant, a person with whom the defendant is having or has had an engagement relationship, a person with whom the defendant parented a child, a child of the defendant, a child whose parentage by the defendant is the subject of a lawsuit, a child of a person in one of the above categories, or any other person related by consanguinity or affinity within the 2nd degree. The bill also would include, as a basis for warrantless arrest, alleged violations of a protective order that has been issued which specifically protects against such acts as stalking and sexual abuse.

This bill would also incorporate additional changes in Section 836 of the Penal Code proposed by AB 247 and AB 1767, to be operative only if one or more of those bills and this bill are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 183 (SB 1632) Johnson. Bench warrants.

Existing law requires the clerk, or in the absence of a clerk a judge or justice, to issue a bench warrant without application of the prosecuting attorney. Existing law also provides that the clerk, judge, or justice shall require the appropriate agency to enter a bench warrant issued on a private surety-bonded felony case into the national warrant system.

This bill would provide that if the appropriate agency fails to enter the bench warrant into the national warrant system, and the court finds that this failure prevented the surety or bail agent from surrendering the fugitive into custody, prevented the fugitive from being arrested or taken into custody or resulted in the fugitive's subsequent release from custody, the court having jurisdiction over the bail shall, upon petition, set aside the forfeiture of the bond and declare all liability on the bail bond to be exonerated.

Ch. 184 (SB 1706) Johnston. Insurance.

Existing law regulating individual life insurance provides that the policy shall provide that it is incontestable, except for nonpayment of premiums and as otherwise provided, after it has been in force, during the lifetime of the insured, for a period of not more than 2 years from its date of issue. Existing law regulating group life insurance provides that the policy shall provide that the validity of the policy shall not be contested, except for nonpayment of premiums, after it has been in force for 2 years from its date of issue, and that no statement made by any employee insured under the policy relating to his or her insurability shall be used in contesting the validity of the insurance with respect to which the statement was made after the insurance has been in force prior to the contest for a period of 2 years during the employee's lifetime nor unless it is contained in a written application signed by the employee.

This bill would provide that, notwithstanding the above provisions, if photographic identification is presented during the application or enrollment process, and if an impostor is substituted for a named insured in any part of the application or enrollment process, with or without the knowledge of the named insured, then no contract between the insurer and the named insured is formed, and any purported insurance contract is void from its inception.

Ch. 185 (SB 2184) McPherson. Commercial fishing: landing receipts.

Existing law requires every commercial fisherman who sells or delivers fish that he or she has taken to a person who does not hold a commercial fish business license or a specialty license, and every fish receiver, as specified, to make a legible record in the form of a landing receipt on a form furnished by the Department of Fish and Game. Existing law specifies the information to be included on the landing receipt.

This bill would make technical changes to those provisions. In addition, the bill would require the landing receipt to be completed at the time of the receipt, purchase, or transfer of the fish, whichever occurs first. The bill would also require the numbered landing receipt forms in each landing receipt book to be completed sequentially. The bill would provide that a voided fish landing receipt shall have the word "VOID" written on the face of the receipt, as specified, and shall be submitted to the department in the same manner that a completed fish landing receipt is submitted to the department. Under the bill, a fish receiver who is no longer conducting business as a licensed receiver would be required to forward all unused landing receipts and books to the department immediately upon terminating his or her business activity.

Ch. 186 (SB 2213) M. Thompson. Fisheries.

Existing law generally prohibits the transfer of a Dungeness crab vessel permit issued by the Department of Fish and Game, but permits the transfer in certain circumstance. These provisions of existing law will become inoperative on April 1, 1998, and will be repealed on January 1, 1999.

This bill would delay the inoperative date until April 1, 2001, and would delay the repeal until January 1, 2002.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 187 (AB 1531) Shelley. Domestic violence: CLETS.

(1) Existing law requires all counties to develop a system for the electronic transmission of specified data relating to civil and criminal domestic violence protective orders, restraining orders, and injunctions through the California Law Enforcement Telecommunications System (CLETS) of the Department of Justice. Under existing law, the data may be transmitted by court personnel or another appropriate agency only with the approval of the Department of Justice.

This bill would specifically require that a court or its designee transmit specified data within one business day upon issuance of any criminal court protective order, and would make conforming changes. The bill would impose a state-mandated local program by requiring a higher level of service under an existing program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates

Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 188 (AB 2418) Olberg. Volunteers: seniors.

Under existing law, all volunteers in state government are required to comply with applicable department and other state policies and regulations.

This bill would require any state or local agency that chooses to utilize volunteers to implement a policy whereby no person aged 60 years or older may be excluded from volunteer service if the person is physically, mentally, and professionally capable of performing the services involved.

Ch. 189 (SB 334) Lewis. Insurance fraud: sentencing.

Under existing law, it is unlawful to knowingly cause or participate in a vehicular collision, or any other vehicular accident, for the purpose of presenting any false or fraudulent claim. Existing law imposes a 2-year sentence enhancement for each prior felony conviction for any person who violates this provision and who has a prior felony conviction for any specified offense against insured property or insurers.

This bill would impose a 5-year sentence enhancement for any person who violates this provision and who has 2 prior felony convictions for violating this provision. The bill also would impose a 2-year sentence enhancement for each person other than an accomplice who suffers serious bodily injury resulting from the vehicular collision or accident in a violation of this provision. By creating new sentence enhancements, the bill would impose a state-mandated local program.

The bill would make related changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 190 (SB 1417) Knight. Peace officers.

(1) Existing law defines peace officer for purposes of the prohibition against every person drawing or exhibiting any firearm in a rude, angry, or threatening manner in the immediate presence of a peace officer.

This bill would revise this definition to include additional classifications of officers, including a reserve or auxiliary sheriff or city police officer, or a deputy sheriff, and accordingly make a conforming change by repealing the provision that specifically applies this definition to these officers for purposes of the above prohibition. By expanding the scope of a crime, the bill would impose a state-mandated local program.

(2) Under existing law, a level II reserve officer has the powers of a peace officer when he or she meets specified conditions that include, among other things, completion of the basic training course for deputy sheriffs and police officers prescribed by the Commission on Peace Officer Standards and Training. Existing law also describes the duties of a level III reserve officer who, among other things, is required to be proximately supervised by a peace officer, as defined by a specified provision of law.

This bill would additionally require level II reserve officers to satisfy the continuing professional training requirement prescribed by the commission. The bill also would revise the provision covering level III reserve officers to require that they instead be supervised in the accessible vicinity by, among others, a full-time, regular peace officer employed by a law enforcement agency authorized to have reserve officers and include report taking among the duties of level III reserve officers while authorizing these officers to transport prisoners without immediate supervision.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 191 (SB 1709) Haynes. Public Employees' Retirement System: benefits.

The Public Employees' Retirement Law provides for survivor continuance allowances to surviving spouses not to cease upon remarriage. The provisions are not applicable to contracting agencies unless elected.

This bill would make those benefits applicable to surviving spouses of deceased local safety members whose death after retirement was due to injuries which resulted in industrial disability retirement, if the remarriage occurs on or after January 1, 1998, and would allow persons who previously lost entitlement due to remarriage to resume benefits after January 1, 1999.

Ch. 192 (AB 135) Hertzberg. Trespass: illegal signs: evidence.

Under existing law, it is a misdemeanor to place any sign, picture, transparency, advertisement, or mechanical device which is used for the purpose of advertising or which advertises or brings to notice any person, article of merchandise, business or profession, or anything that is to be or has been sold, bartered, or given away, on either public or private property, without lawful permission.

This bill would permit information, such as the name, telephone number, address, or other identifying information of a person or entity, as specified, that appears on any sign, picture, transparency, advertisement, or mechanical device to be used as evidence to establish the fact, and to create an inference, that the person or entity identified is responsible for the posting of the sign, picture, transparency, advertisement, or mechanical device, for purposes of these provisions.

Ch. 193 (AB 583) Davis. Residential real property: trespass: rent skimming.

Existing law defines rent skimming as the use of revenue from the rental of a parcel of residential property during the first year after acquiring the property without first applying the revenue or an equal amount to payments due on all mortgages or deeds of trust encumbering the property.

This bill would further define "rent skimming" for purposes of this provision to include receiving rental income from the rental of residential real property without the consent of the property owner or his or her agent, as specified.

This bill would also provide that claiming ownership or claiming or taking possession of, or causing another to enter or remain in, a residential dwelling for the purpose of renting or leasing the dwelling to another without the consent of the owner or the owner's lawful agent is a misdemeanor punishable, as specified. Because this bill would create a new crime, it would establish a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 194 (AB 732) Granlund. Communicable diseases: pet birds.

Existing law prohibits the raising and selling, offering for sale, trade, or barter of any parakeets and budgerigars unless these birds are banded, as prescribed, and sets forth procedures regulating the issuance of bands for this purpose.

This bill would repeal these provisions.

Existing law requires the State Department of Health Services to adopt regulations it deems necessary for the public health that apply to all pet birds whenever the Director of Health Services finds that psittacosis, or any other diseases transmissible to man from pet birds, have become a public health hazard to the extent that control measures are necessary or desirable.

This bill would revise this provision to delete, in referring to the department, the obsolete reference to the board, the former State Board of Public Health.

Ch. 195 (AB 2702) Aroner. Civil rights: alteration of buildings: small claims actions.

Existing law prohibits, and provides civil remedies for, discrimination, boycotting, blacklisting, or the refusal to buy from or sell to a person by business establishments, and discrimination by franchisors, based on, among other things, a person's disability. This existing law provides that it shall not be construed to require any construction, alteration, repair, or modification of any new or existing structure.

This bill would instead provide that these provisions of existing law shall not be construed to impose any additional requirements, beyond the requirements imposed by other laws, to construct, alter, repair, or modify any new or existing structure.

Existing law limits the jurisdiction of the small claims court to 4 specified types of actions where the amount of the demand does not exceed \$5,000.

This bill would specify that the jurisdiction of the small claims court includes actions for damages, not to exceed \$5,000, for specified acts of discrimination, boycotting, or blacklisting, or the refusal to buy or sell to a person; for violence, threat of violence, or intimidation based on specified characteristics of a person; for denial or interference with the right of access of a disabled person to specified public accommodations; and related civil rights actions, as specified.

Ch. 196 (AB 2704) Alquist. Service contracts.

Existing law regulating the activities of service contractors, including service contract sellers, defines a service contract seller as a person who sells or offers to sell a service contract for the maintenance or repair of electronic sets or appliances, as defined. Existing law regulating consumer warranties provides for substantially the same definition of a "service contract seller" with respect to the maintenance or repair of consumer products, as defined. Under existing law, a "service contract" is defined to relate to the maintenance or repair of consumer products.

This bill would add to the definition of "service contract seller" or "seller," for purposes of both regulatory laws, a person who is the obligor, as defined, under a service contract sold by the seller, manufacturer, or repairer of the product covered by the service contract. The bill also would revise the definition of "service contract" to include the replacement of consumer products. The bill also would revise the definition of "home appliance" for the provisions relating to consumer warranties to include any kind of appliance product.

Ch. 197 (SB 1158) Johannessen. Veterans: farm and home purchase: life or disability insurance.

Existing law, the Veterans' Farm and Home Purchase Act of 1974, permits the Department of Veterans Affairs to enter into a master agreement with one or more insurance companies to provide life or disability insurance coverage for purchasers of farms or homes under the program.

Existing law permits the master agreement to provide for the maintenance of reserves as the department, after advising the California Veteran's Board and after consultation with the Insurance Commissioner, deems appropriate and prudent.

This bill would require the master agreement to provide for this maintenance of reserves.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 198 (SB 1532) Kelley. Airports: funding: repayment.

The State Aeronautics Act requires a public entity that owns and operates an airport for which payments have been made from the Aeronautics Account, if the airport ceases to be used as an airport open to the general public for more than a year, to pay to the state, for deposit in the account, an amount computed by the Department of Transportation, as prescribed. The act requires the department to pay for certain preapproved projects for eligible airports from individual airport subaccounts created in the account for that purpose.

This bill would exclude from that payment computation any payment that the department made from one of those subaccounts, if, upon the request of the public entity

that owns and operates the airport, the department determines that the airport is not necessary to the system of public airports in this state.

Ch. 199 (SB 1533) Committee on Elections and Reapportionment. Elections.

Existing law provides how words will be counted for purposes of the Elections Code.

This bill would provide that telephone numbers and Internet web site addresses would each be counted as one word.

Existing law defines the term “register” as used in the Elections Code.

This bill would repeal this provision.

Existing law provides when and how an affidavit of registration must be received, for specified purposes. An affidavit of registration may be received by the county elections official on or before the 29th day prior to the election, or may be received by mail by the county elections official no later than the 4th day after the 29th day prior to the election.

This bill would provide that, in addition, the affidavit of registration that is postmarked on or before the 29th day prior to the election may be received by the county elections official, for specified purposes.

This bill would impose a state-mandated local program on local elections officials by providing an additional method for the receipt of affidavits of registration.

Existing law requires that, on the completion of the canvass of returns for each election, the elections official compare the absent voters list with the roster of voters in each precinct to determine if any voter cast more than one ballot at that election.

This bill would repeal, renumber, and add those provisions without other changes to a different chapter of the Elections Code.

Existing law requires the elections official to deliver to each qualified applicant a ballot that is also the ballot for the party with which the voter is affiliated, or a nonpartisan ballot, as appropriate.

This bill would instead require that the ballot be accompanied by a ballot for the central committee of the party with which the voter is affiliated, if any.

Existing law requires county elections officials to keep, distribute, and post, as specified, lists of delegates pledged to presidential candidates, and uncommitted delegations.

This bill would repeal those requirements.

Existing law requires the Secretary of State to file and keep lists of members of state and county central committees and to make each list available for public inspection.

This bill would repeal this requirement.

Existing law, prior to the recodification of the Elections Code by Chapter 920 of the Statutes of 1994, required the Department of General Services to permit any Democratic county central committee to hold meetings in a state building within the county, and required that at least one committee meeting each month be free of charge.

This bill would reenact these provisions.

Existing law requires the county elections official, upon notification by the newly elected chairperson of a Democratic county central committee of his or her name, to mail a certificate to that effect to the Secretary of State.

This bill would repeal this requirement.

Existing law prescribes various duties to be performed by the Secretary of State with respect to the state convention, delegates, the state central committee, and the county central committee, of the American Independent Party.

This bill would amend and repeal certain provisions prescribing various duties of the Secretary of State in connection therewith.

Existing law prescribes various duties to be performed by the Secretary of State with respect to the state convention, delegates, the state central committee, and the county central committee, of the Peace and Freedom Party.

This bill would also amend and repeal certain provisions prescribing various duties of the Secretary of State in connection with the county central committees and the state central committee of the Peace and Freedom Party.

Existing law prescribes the procedures to be followed at a regularly scheduled municipal election and permits the city council to either appoint a person to office or hold the election if, by a certain date before the election, specified events occur. It provides that nothing in this provision shall prevent a city from enacting an ordinance,

pursuant to specified provisions of law, requiring that a special election be held or providing that the appointee shall hold office only until the date of the special election, or both.

This bill would make a technical change in this latter provision.

Existing law requires the board of supervisors, when authorized, to conduct a canvass of an election called by the legislative body of a city, district, or other political subdivision that is consolidated with an election held in the county or counties in which the city, district, or other political subdivision is situated.

This bill would make a technical change in this provision.

Existing law provides that consolidated elections may be held, notwithstanding that statutory requirements relating to absent voters apply to less than all of the elections consolidated. It permits absentee ballots for the consolidated election to be counted if received by the applicable longer period.

This bill would repeal these provisions.

Existing law provides that setting forth and filing, with the declaration of candidacy, the oath in Section 3 of Article XX of the Constitution, satisfies the provisions of Section 3 of Article XX.

This bill would repeal that provision.

Existing law requires the Governor to call a special election to fill a vacancy in the office of Representative in Congress, State Senator, or Member of the Assembly. It provides that if no candidate receives a majority of the votes cast, the name of the candidate of each party who receives the most votes cast for all candidates for that party shall be placed on the special election ballot as the candidate of that party.

This bill would prohibit the name of a write-in candidate from being placed on the special election ballot unless he or she also meets certain vote requirements pursuant to a specified provision of law.

Existing law requires that each member of a precinct board be a voter of the precinct for which the member is appointed, or a voter of a precinct situated in the same general area. However, county employees used as poll workers may reside outside of the precinct or the county.

This bill would instead require that a precinct board member be a voter of the county, and would provide that county employees used as poll workers may reside outside of the county.

Existing law requires the Secretary of State to keep a sufficient supply of tinted ballot paper and tinted punch cards, and to furnish them in the quantities ordered to a jurisdiction holding an election upon payment of the cost of the ballot paper or punch cards.

This bill would repeal this requirement.

Existing law provides that, so long as a vote count is not made until 8 p.m. on the day of the election, any county having the necessary computer capability may start to process absentee voter ballots on the seventh day prior to an election and that all other elections officials shall begin processing absent voter ballots at 5 p.m. on the day before the election. Existing law also provides that, notwithstanding these provisions, if the elections official uses voting machines or vote tabulating devices to count absentee voter ballots, the official may start to process the absentee ballots not earlier than noon on the day before the election but shall not count or enter the ballots into the voting machine until election day.

This bill would repeal the provisions which provide that elections officials who use voting machines or vote tabulating devices to count absentee voter ballots may start to process the absentee ballots not earlier than noon on the day before the election and shall not count or enter the ballots into the voting machine until election day.

Existing law requires the local elections official, within 35 days of an election, to send to the Secretary of State a complete copy of all returns as to specified offices, including Supreme Court Justice or Justice of the Court of Appeal.

This bill would impose a state-mandated local program by requiring the elections official to also provide a copy of returns as to judge of the superior court and judge of the municipal court. It would also require that returns for presidential electors be sent so that they are received by the Secretary of State not later than the first Monday in the month following the election.

Existing law provides that except for presidential electors, the Secretary of State shall compile returns for statewide office, statewide measures, the State Legislature and other nonlocal elections.

This bill would permit the Secretary of State to gather returns for local elections, including, but not limited to, candidates for county, city, school, and district office, city and county ballot measures, and school and district measures.

Existing law requires the elections official to post a notice, as specified, and notify certain persons, as specified, of the date and place of a recount, not less than one day prior to commencement of the recount. Existing law also requires that notification of the specified persons be in person or by telegram.

This bill would delete the telegram requirement, and instead, require the elections official to provide notification in person or by any federally regulated overnight mail service.

This bill would impose a state-mandated local program on local elections officials by requiring elections officials to use a federally regulated overnight mail service as a method of providing notice of the date and place of a recount to specified persons.

Existing law authorizes the legislative body of any county, city, or special district to resolve a tie vote between 2 or more candidates for an office by a special runoff election.

This bill would except from this provision a special district subject to the Uniform District Election Law.

Existing law requires that specified items of information on a voter registration card is confidential, and shall not be disclosed except pursuant to a specified provision of the Elections Code.

This bill would make a technical change in this provision.

The bill also would make other technical changes for purposes of clarification of existing provisions of law.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 200 (SB 1556) Kopp. Civil actions: nonsuits: reconsideration.

Existing law provides that after the plaintiff has completed his or her opening statement, or the presentation of his or her evidence in a trial by jury, the defendant may move for a judgment for nonsuit without waiving his or her right to offer evidence if the motion is not granted.

This bill would specify that a motion for nonsuit may not be made before completion of the plaintiff's opening statement, and specify the intent of the Legislature in this regard.

Existing law provides for an application to reconsider a court order based upon new or different facts, circumstances, or law, as specified.

This bill would specify that this provision applies to all applications for interim orders.

Ch. 201 (SB 1608) Ayala. Judgments: criminal restitution orders.

Under existing law, the court, in connection with granting probation, shall provide for restitution in proper cases. Existing law also provides that, upon a person being convicted of any crime in this state, the court shall order the defendant to pay restitution to any victim or victims that have suffered economic loss as a result of the defendant's conduct in an amount established by court order and that a restitution order may be enforced as if it were a civil judgment issued pursuant to certain provisions of law, as specified.

This bill would provide that a restitution order in favor of a victim shall be fully enforceable as a civil judgment, as specified, and would delete the reference to a certain provision of law governing restitution fines in regard to its enforcement.

Ch. 202 (SB 1640) Brulte. Home-to-school transportation.

Existing law makes a school district eligible to receive a supplemental apportionment for transportation if, among other things, the total cost per mile in the prior fiscal year for home-to-school transportation does not exceed the statewide average cost per mile, or 115% of the statewide average cost per mile if the Superintendent of Public Instruction determines that either weather-related or terrain-related conditions vary substantially from other school districts that the superintendent determines may also be classified as high-impact, high-efficiency school districts.

This bill would change the alternative requirement, that the total cost per mile in the prior fiscal year for home-to-school transportation costs not exceed 115% of the statewide average, to provide instead that if the total cost per mile for the prior fiscal year for home-to-school transportation exceeds the statewide average cost per mile, the school district is required to demonstrate to the satisfaction of the Superintendent of Public Instruction that the increased cost per mile is due to either weather-related or terrain-related conditions. The bill would require the Superintendent of Public Instruction to determine that the increased cost per mile is due to weather-related or terrain-related conditions if snow and ice create roadway and safety problems, 50% or more of publicly maintained roads in the school district are considered to be curves, or there are changes in elevation of 2,000 feet or more.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 203 (SB 1650) Kelley. Vehicles: lien sales.

Existing law provides one lien sale procedure for vehicles that have been determined to have a value of \$2,500 or less and a different lien sale procedure for vehicles that have been determined to have a value exceeding \$2,500.

This bill would increase the \$2,500 amount to \$4,000, thus making one of the existing lien sale procedures applicable to vehicles valued at \$4,000 or less, and the other existing lien sale procedure applicable to vehicles valued at over \$4,000.

Ch. 204 (SB 1710) Polanco. Alcoholic beverages: licenses.

The Alcoholic Beverage Control Act provides for the issuance of various categories of alcoholic beverage licenses, including the imposition of fees, conditions, and restrictions in connection with the issuance of those licenses. The act provides that an on-sale license authorizes the sale of the alcoholic beverage specified in the license for consumption on the premises where sold.

This bill would provide that any on-sale licensee authorized to sell wine may also sell soju, an imported Korean alcoholic beverage that contains not more than 24% of alcohol by volume and is derived from agricultural products.

Ch. 205 (SB 1834) Mountjoy. Marinas: electric service.

(1) Existing law permits the board of supervisors of a county to charge an annual device registration fee to recover the costs of inspecting or testing those devices by the county sealer. Existing law also provides that, for mobilehome parks, recreational vehicle parks, and apartment complexes, where the owner of the park or complex owns and is responsible for the utility meters, the annual fee shall not exceed \$60 per park or complex and a fee of up to \$2 per device per space or apartment. Existing law requires the mobilehome parks, recreational vehicle parks, and apartment complexes for which those fees are assessed to be inspected and tested as frequently as required by regulation.

This bill would apply those provisions to marinas.

(2) Existing law allows the operator of a privately or publicly owned marina or small craft harbor, or facilities in connection therewith, that furnishes electrical power to slips or berths for use aboard any vessel, to provide facilities for submetering to measure the electrical power actually used by or aboard each vessel and to base charges upon that use.

This bill would allow the operator to include within those charges the actual cost of inspection, testing, and registration of submeters that may be charged by any authority having jurisdiction over the marina or small craft harbor, or facilities in connection therewith.

Ch. 206 (SB 1838) Kopp. Public utilities: electric restructuring: BART.

Existing law requires the Public Utilities Commission to begin providing electric utility customers direct access to electric suppliers not later than January 1, 1998, and for direct access to be completed for all customers by January 1, 2002. Existing law requires any electric utility regulated by the commission that owns and operates transmission and distribution facilities that deliver electricity at one or more locations to the San Francisco Bay Area Rapid Transit District's (BART) system, to deliver to BART preference power purchased from a federal power marketing agency or its successor.

This bill would exempt the delivery of that preference power from statutes that provide for direct transactions and from commission regulations, orders, and tariffs, that implement direct transactions, and would make related changes. The bill would authorize BART to elect to obtain electric power from multiple sources, as specified. Because, under existing law, a violation of these provisions would be a crime, the bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 207 (SB 1844) M. Thompson. Crime prevention: peace officer training.

Existing law requires the Commission on Peace Officer Standards and Training to, among other things, adopt rules establishing minimum standards for the purpose of raising the level of competence of local law enforcement officers.

This bill would require the commission to implement on or before January 1, 1999, a course or courses of instruction for the training of law enforcement officers, as defined, in the handling of acts of civil disobedience and to adopt guidelines establishing standard procedures that may be followed by police agencies in responding to acts of civil disobedience.

Ch. 208 (SB 1850) Schiff. Criminal procedure: appeals by the people.

Under existing law, the people are authorized to appeal from a judgment or order of an inferior court with respect to felonies, misdemeanors, or infractions, only in certain limited cases.

This bill would revise certain of those provisions by making technical or clarifying changes.

Ch. 209 (SB 1884) Johannessen. Veterans: farm and loan purchases: insurance reports.

Existing law requires the Department of Veterans Affairs to make specified reports to the Legislature by July 1st of each year regarding insurance and insurance coverage that is required or purchased by the department to insure against risk of loss.

This bill would extend these annual reporting requirements from July 1st to September 1st of each year.

The bill also would make technical, nonsubstantive changes.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 210 (SB 2008) Kelley. Open meetings: closed sessions.

The Bagley-Keene Open Meeting Act generally requires that the meetings of state bodies, as defined, be conducted openly and that the state body disclose, in an open meeting, prior to holding any closed session, the general nature of the item or items to be discussed in the closed session. The act permits the Public Utilities Commission to hold closed sessions to deliberate on the institution of proceedings, or disciplinary actions against regulated utilities.

This bill instead would permit the commission to hold closed sessions to deliberate on the institution of proceedings, or disciplinary actions against any person or entity under the jurisdiction of the commission, and would require the commission to state the title of or specifically identify the proceeding or disciplinary action contemplated against a person or entity prior to holding a closed session, except under specified circumstances.

Ch. 211 (SB 2154) Schiff. Public officials: harassment; records.

Existing law prescribes the duties of the county recorder, the county clerk and the Secretary of State with respect to recording documents. Existing law requires the county recorder to accept for recordation any instrument, paper or notice authorized or required by law to be recorded if it meets various recording requirements.

This bill would prohibit a person from filing or recording a lawsuit, lien, or other encumbrance against a public officer or employee, knowing it is false, with the intent to harass the officer or employee or to influence or hinder the public officer or employee in discharging his or her official duties. It would specify that this provision would apply only to lawsuits, liens, or other encumbrances pertaining to actions that arise in the course and scope of the public officer's or employee's duties. The bill additionally would provide that a person who violates these provisions would be liable to the person subject to the lawsuit, or the owner of the property bound by the lien or other encumbrance for a civil penalty not to exceed \$5,000.

Ch. 212 (SB 2163) Hughes. Judges' retirement.

The Judges' Retirement Law and the Judges' Retirement System II Law provide for the reduction of the retirement allowance of a judge who does not retire subsequent to the term of office in which he or she attains age 70.

This bill would delete those reductions.

Existing law authorizes a judge with at least 5 years of service and prior to the end of the term of office during which he or she attains age 70 to retire and receive a specified allowance.

This bill would delete the requirement respecting retirement prior to the end of the term of office during which the judge attains age 70. The bill would also make a specified reduction inapplicable to judges who left office on or after July 21, 1997.

Ch. 213 (SB 267) Maddy. State government: support appropriations.

The Budget Act of 1997 appropriated funds for support of state government for the 1997-98 fiscal year.

This bill would appropriate \$18,959,000,000 from the General Fund and other funds and sources, as specified, to the Controller for allocation by the Director of Finance pursuant to an executive order issued by the Governor to pay the current expenses of the state government, excluding salaries and per diem of the Members of the Legislature, from July 1, 1998, to August 5, 1998, inclusive.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 214 (AB 540) Ducheny. County water authorities: board of directors.

The County Water Authority Act authorizes any meeting of the board of directors of a county water authority to be adjourned or recessed by vote of the director or directors present, regardless of the number of directors present or the number of votes represented at the meeting.

This bill would also authorize any meeting of the board of directors to be continued by such a vote.

Ch. 215 (AB 1377) Gallegos. Health care service plans.

Existing law requires the Commissioner of Corporations to conduct an examination of the fiscal and administrative affairs of a health care service plan and each person with whom the plan has made arrangements for administrative, management, or financial services, not less frequently than once every 5 years.

Existing law requires reports of all examinations to be open to public inspection, except that no examination may be made public unless the plan has had an opportunity to file a response within 30 days.

This bill would extend that period to 45 days and require the commissioner to issue a prescribed final report. The bill would require the commissioner to append the plan's response in a prescribed manner, if requested in writing by the plan.

Existing law prohibits deficiencies found in the examination from being made public if they are corrected in a prescribed time.

This bill would delete that provision.

Under existing law, every health care service plan is required to file with the Department of Corporations a written policy describing the manner in which it determines if a second medical opinion is medically necessary and appropriate. Under existing law, disability insurers and nonprofit hospital service plans are similarly required to file their written policies with the Department of Insurance, but the law provides that their written policies are not subject to approval or disapproval by the department.

This bill would amend this provision as applied to health care service plans to provide that the written policy filed with the department is not subject to approval or disapproval by the Department of Corporations. It would also delete the requirement that nonprofit hospital service plans file the written policy.

Ch. 216 (AB 1750) Pringle. Alcoholic beverages: tied-house restrictions.

Existing provisions of the Alcoholic Beverage Control Act, known as “tied-house” restrictions, generally prohibit manufacturers, winegrowers, bottlers, importers, wholesalers, and others from performing certain activities, with specified exceptions. Existing law allows any winegrower or beer manufacturer to serve food and alcoholic beverages to any person, including an alcoholic beverage licensee and his or her employees and representatives, who is attending a meeting held upon or who is visiting the premises of the winegrower or beer manufacturer.

This bill would allow any beer and wine wholesaler to provide these same services.

Ch. 217 (AB 2017) Takasugi. Unemployment insurance: benefits: contributions: disclosure of information.

(1) Existing law requires the Employment Development Department to pay unemployment compensation benefits to eligible claimants. Existing law requires the department to consider facts submitted by a claimant’s employer, and if benefits are claimed subsequent to the filing of the claim, to make a determination as to the claimant’s eligibility for benefits.

This bill would, instead require the department to consider the facts submitted by the employer and make a determination regarding eligibility for benefits.

(2) Existing law requires employers to make contributions, at specified rates, toward unemployment insurance and authorizes certain employers, subject to the approval of the department, to elect to make those contributions on an annual basis. Existing law also provides for certain penalties for failing to make those contributions, including a penalty for failing to remit payments by electronic funds transfer when required to do so.

This bill would change the effective date of an election to make contributions on an annual basis, and would make the penalty for failing to remit contributions by electronic funds transfer applicable only if an employer, without good cause, fails to remit payments by electronic funds transfer when required to do so.

(3) Existing law requires that information obtained by the Director of Employment Development in carrying out his or her duties remain confidential, subject to certain exceptions where disclosure by the director is permitted.

This bill would revise and recast certain of those provisions and would create a new crime for willfully accessing, using, or disclosing confidential information without authorization. By creating this new crime, this bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 218 (AB 2101) Bowler. Interference with the operation of aircraft.

Under existing law, any person who, with the intent to interfere with operation of a helicopter, willfully shines a light or other bright device, of an intensity capable of impairing the operation of a helicopter, at a helicopter, may be punished by a fine not exceeding \$1,000, or by imprisonment in a county jail not exceeding one year, or by both the fine and imprisonment.

This bill would make this provision applicable to any aircraft. By expanding the definition of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 219 (AB 2135) Frusetta. San Benito County Water District.

(1) The San Benito County Water District Act authorizes the San Benito County Water District to levy a groundwater charge, as prescribed, and includes provisions requiring the preparation of an investigation and report on the groundwater conditions of the district, to hold a public hearing on the report, and to determine whether or not a groundwater charge should be levied as specified, based on a water year from March 1st of a calendar year to the last day of February of the following calendar year.

This bill would require that investigation and report to reflect groundwater conditions for a period commencing October 1 of the preceding calendar year through September 30 of the current year, and would make related changes. The bill would require the district to also hold a public hearing to determine if a groundwater charge should be levied, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 220 (AB 2236) Morrissey. Department of the California Highway Patrol: out-of-state funerals.

Existing law permits state officers and employees to travel out of state when that travel assists the state officer or agency in the conduct of his or her work, provided that the travel, with limited exceptions, has been approved by the Department of Finance for out-of-state travel to a state that borders this state, or by the Department of Finance and the Governor for all other out-of-state travel.

This bill would authorize the Commissioner of the Department of the California Highway Patrol to approve the out-of-state travel within the United States of members of the California Highway Patrol, in numbers the commissioner deems appropriate, to attend out-of-state funerals of law enforcement officers or to attend out-of-state events related to the funerals of law enforcement officers, including the National Peace Officers Memorial. This bill would specify that reimbursement for actual and necessary traveling expenses of members of the California Highway Patrol shall be allowed for these purposes up to a maximum aggregate amount of \$40,000 in any fiscal year.

Ch. 221 (AB 2388) Leonard. State highways: redesignations.

(1) Existing law defines Route 30 in the state highway system as extending from Route 210 near San Dimas to Route 10 in Redlands via the vicinity of Highland.

This bill would repeal this route designation.

(2) Existing law defines portions of Route 57 as extending (a) from Route 5 near Santa Ana to Route 60 near Industry, and (b) from Route 60 near Industry to Route 210 near Route 10 and Pomona.

This bill instead would redefine these portions of Route 57 as extending from Route 5 near Santa Ana to Route 210 near San Dimas.

(3) Existing law defines Route 210 as extending from Route 5 near Tunnel Station to Route 10 near the east boundary of Los Angeles County via the vicinity of San Fernando.

This bill instead would redefine Route 210 as extending from (a) Route 5 near Tunnel Station to Route 57 near San Dimas via the vicinity of San Fernando, and (b) Route 57 near San Dimas to Route 10 in Redlands via the vicinity of Highland.

The bill would make a related change regarding the state scenic highway system.

Ch. 222 (AB 2622) Shelley. Respite care: statewide policy.

Existing law imposes various functions and duties on the Statewide Resources Consultant, a nonprofit community agency under contract with the Director of Mental Health, with respect to the oversight of the provision of respite care for caregivers and families of brain-impaired adults.

This bill would require the Statewide Resources Consultant to make recommendations, after consultation with appropriate state department representatives, to the Director of Mental Health and the Secretary of Health and Welfare for a comprehensive statewide policy to support and strengthen family caregivers, including the provision of respite and other support services, in order to implement more fully respite care provisions, and to coordinate its recommendations to assist the Health and Welfare Agency to prepare its report on long-term care programs. The bill would also require the Statewide Resources Consultant to conduct an inventory and submit an analysis of California's publicly funded programs serving family caregivers of older persons and functionally impaired adults.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 223 (AB 2083) Baugh. Criminal procedure: bail.

Under existing law, exonerated bail may be accomplished by the delivery of a certified copy of the undertaking of the bail, or a certified copy of the certificate of deposit where a deposit is made, to the officer to whose custody the defendant was initially committed, and who must then detain the defendant in custody, as specified.

This bill would authorize as an alternative to either of the above documents, the depositor to deliver an affidavit given by the bail licensee or surety company, as specified, to the custodial officer, to accomplish exonerated bail.

Under existing law, a court is required to declare forfeited the undertaking of bail or the money or property deposited as bail if, without sufficient excuse, a defendant fails to appear for prescribed proceedings.

This bill would require the court to make the declaration of forfeiture of bail in open court.

Ch. 224 (AB 247) Scott. Peace officers: warrantless arrests.

Existing law specifies circumstances under which a peace officer may make a warrantless arrest, including, among other things, whenever the officer has reasonable cause to believe that the person to be arrested has committed a public offense in his or her presence.

This bill would authorize a peace officer to make a warrantless arrest for the offense of carrying a concealed firearm whenever the officer has reasonable cause to believe that the person has committed the offense, the offense occurred within an airport in an area to which access is controlled by the inspection of persons and property, and the officer makes the arrest as soon as reasonable cause arises to believe that the person to be arrested has committed the offense.

This bill would also incorporate additional changes in Section 836 of the Penal Code proposed by AB 1767 and SB 1470, to be operative only if one or more of those bills and this bill are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 225 (AB 913) Runner. Marriage: dissolution.

Existing law requires county clerks to send copies of judgments of dissolution of marriage, legal separation of the parties, and nullity of marriage to the State Registrar monthly.

This bill would additionally require the clerk of the superior court in each county to report annually to the Judicial Council the number of each of those judgments entered in the county and, subject to a specified condition, the number of each of those judgments entered in the county that include child custody, visitation, or support orders, as specified; and would require the Judicial Council to compile that information and publish a report detailing the statewide statistics annually.

Because this bill would impose new duties on the clerk of the superior court in each county, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 226 (AB 1246) Olberg. Property taxation: mining and mineral property: base year value and appraisal.

The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975-76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. Existing property tax law also provides that the "full cash value," as so defined, of a real property is that real property's "base year value."

This bill would, pursuant to legislative findings and declarations, specify, with respect to property that is subject to valuation as a mining or mineral property, that the initial base year value of a leach pad, tailing facility, or settling pond on that property is the full cash value of that leach pad, tailing facility, or settling pond as of the first property tax lien date upon which that pad, facility, or pond is subject to assessment. This bill would also require that each leach pad, tailing facility, or settling pond be considered a separate appraisal unit for purposes of determining its taxable value on each subsequent lien date.

Ch. 227 (AB 1255) Davis. Continuing care contracts.

Under existing law, the State Department of Social Services is responsible for regulating activity relating to continuing care contracts. Existing law requires a continuing care retirement community to maintain an environment that enhances the residents' self-determination and independence and requires the provider to establish policies and procedures that promote the sharing of information, dialogue between residents and management, and access to the board of directors or general partners. Existing law requires that these policies and procedures be evaluated at least every 2 years by the continuing care retirement community administration.

The bill would require the governing body, or designated representative, of a provider of services under a continuing care contract to hold meetings with residents of the continuing care retirement community as provided by the bill, including a meeting at least 30 days prior to any increase in the monthly care fee. The bill would require that residents be provided notice of and an agenda for these meetings.

The bill would set forth differing requirements for the governing body of either a provider of services under a continuing care retirement community or a multifacility organization having more than one continuing care retirement community in the state for providing that there are residents of the continuing care retirement communities operated by the providers participating as nonvoting members of the governing body.

Existing law establishes the Continuing Care Contracts Committee of the State Department of Social Services as an advisory committee to the department on continuing care contracts.

This bill would require the committee to evaluate and report to the Legislature, on or before January 1, 2001, on the implementation of the bill.

Ch. 228 (AB 1721) Cunneen. Education: minimum level of education funding.

(1) Existing law, as set forth in Section 8 of Article XVI of the California Constitution (hereafter Section 8), requires the state to apply a minimum amount of funding for each fiscal year for the support of school districts, as defined, and community college districts. Existing law directs the amount of state funding appropriated in each fiscal year to comply with the state's minimum funding obligation under Section 8 to be distributed to school districts, as defined, to community college districts, and to state-operated schools according to a specified formula. Existing law also prescribes procedures through

which the Department of Finance computes the amount by which the amount required to be appropriated for the purpose of meeting the state's minimum funding obligation pursuant to Section 8 for the 1996-97 fiscal year exceeds the total amount actually appropriated for that purpose for the 1996-97 fiscal year and requires specified allocations to be made from that amount to school districts for the purpose of equalizing school district revenue limits.

This bill would declare that, in any fiscal year in which, in addition to any allocations made for the purpose of equalizing school district revenue limits, an appropriation is made to school districts pursuant to these provisions because these requirements were not sufficiently funded in a prior fiscal year, and the appropriation is allocated on the basis of equal payments for each unit of each school district's average daily attendance, it is the intent of the Legislature that average daily attendance shall include average daily attendance for regular education, adult education, and regional occupational programs and centers. The bill would express the intent of the Legislature not to interfere with, or change, the application of the provision relating to the allocations for the purpose of equalizing school district revenue limits that is referenced above. The bill would provide that these provisions should not be construed to limit the flexibility of the Legislature or Governor to propose budget appropriations apportioned on the basis of equal payments for each unit of each school district's average daily attendance that exclude funds for adult education programs or regional occupational programs and centers.

(2) Existing law prohibits, with certain exceptions, revenue derived from the average daily attendance of adult education programs from being expended for other than adult education purposes.

This bill would require a school district receiving funds pursuant to the provisions of the bill to use any funds allocated for average daily attendance of adult education programs or regional occupational centers or programs only for purposes of those programs, respectively.

Ch. 229 (AB 1837) Alquist. Children.

Existing law authorizes the court to require parents and minor children involved in custody or visitation disputes to participate in specified outpatient counseling if the dispute between the parents or between a parent and the child poses a substantial danger to the best interest of the child and the counseling is in the best interest of the child.

This bill would revise the above described provision to authorize the court to require the parents or any other party involved in such a dispute, and the minor child, to participate in counseling if the dispute between the parents, the parent and child, the parents and another party seeking custody or visitation, or between a party seeking custody and visitation rights and the child poses a substantial danger to the best interest of the child and counseling is in the child's best interest. It also would require a court, in determining if a dispute poses a substantial danger to a child, to consider, among other factors, any history of domestic violence, as specified, between the parents, the parent or parents and child, the parent or parents and a party seeking custody or visitation rights, or that party and the child.

Ch. 230 (AB 1907) Woods. Grand jury.

(1) Existing law authorizes the grand jury to transmit to the succeeding grand jury, any information or evidence acquired during the course of any investigation conducted by it, except any information that relates to a criminal investigation or that could form part or all of the basis for the issuance of an indictment.

This bill would clarify that the grand jury is authorized to provide the succeeding grand jury with any records, information, or evidence acquired by it during its term of service, except as stated above.

(2) Existing law requires a grand jury to submit a report of its findings and recommendations to the presiding judge of the superior court at the end of the fiscal or calendar year, and to file a copy of each report in the office of the county clerk.

This bill would require the grand jury also to file in the office of the county clerk, a copy of the responses to the final report. In addition, the bill would require the county clerk to forward a copy of the report and responses to the State Archivist to retain in

perpetuity. By increasing the duties of local officials, this bill would impose a state-mandated local program.

(3) Existing law authorizes the grand jury to seek advice from the court or judge of the court, or the district attorney or county counsel.

This bill would add the Attorney General to the list of persons from whom the grand jury may seek advice. The bill would also authorize the Attorney General to grant or deny a request for advice, but would require that if the Attorney General grants the request, he or she fulfill that request within existing financial and staffing resources.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 231 (AB 2099) Bowler. Public Employees' Retirement System: administration.

The Public Employees' Retirement Law requires all employer assets to be used in the determination of the employer contribution rate.

This bill would authorize contracting agencies to request the transfer of employer assets to member-accumulated contribution accounts.

Ch. 232 (SB 175) Kelley. Dairy products.

(1) Existing law prohibits lowfat fruit kefir from containing more than 1.2% milk fat.

This bill would also prohibit light (lite) fruit kefir from containing more than 1.2% milk fat.

(2) Existing law requires UHT flavored reduced-fat milk to contain not less than 2.1% milk fat.

This bill would require UHT flavored reduced-fat milk to contain not more than 2.1% milk fat.

(3) Because, under existing law, a violation of any provision of the Food and Agricultural Code is a misdemeanor, the bill would impose a state-mandated local program by creating new crimes.

(4) Existing law requires milk products plants to obtain nondairy frozen dessert mix from licensed manufacturers, as specified. Existing law contains a cross-reference to a nonexistent statute.

This bill would remove that cross-reference and make a corresponding change.

(5) Existing law specifies standards for various types of milk including reduced-fat milk, lowfat or light milk, nonfat milk, skim milk, and fat-free milk.

This bill would conform the headings of those provisions with the types of milk specified in those provisions.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 233 (SB 678) Leslie. Insurance: surplus lines.

Existing law provides that certain acts relative to nonadmitted insurers are misdemeanors, including the advertising in any manner of a nonadmitted insurer in this state. These prohibitions do not apply when the acts are performed by a surplus line broker.

This bill would authorize, until January 1, 2002, advertising by nonadmitted insurers under certain conditions.

Ch. 234 (SB 781) Maddy. Transactions and use tax: City of Placerville.

Existing law authorizes various local governmental entities, in accordance with certain limitations and approval requirements, to levy transactions and use taxes in accordance with the procedures and requirements set forth in the Transactions and Use Tax Law.

This bill would additionally authorize the City of Placerville, subject to the approval of $\frac{2}{3}$ of the voters voting on the issue at an election, to levy a transactions and use tax pursuant to the Transactions and Use Tax Law at a rate of either 0.125% or 0.25% for purposes of funding police services, as defined in a local ordinance or resolution proposing that tax.

This bill would make legislative findings and declarations as to the necessity of a special statute.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 235 (SB 1441) Kopp. Criminal procedure: indigent defendants: capital cases.

(1) Under existing law, a complaint, to which a plea of guilty has been made to a felony not punishable by death and which does not charge all prior felonies of which the defendant has been convicted, may be amended to charge the prior conviction or convictions. Following authorization, the amendments are required to be made upon order of the court. Existing law also requires that the defendant be arraigned before the court to which the complaint has been certified, and if the defendant answers that he or she has not suffered the prior conviction, the court is required to try the question of whether or not the defendant has suffered the prior conviction.

This bill instead would require, with a specified exception, that the question of whether or not a defendant has suffered the prior conviction be tried by a jury impaneled for that purpose, or by the court if a jury is waived. The bill also would require that the question of whether the defendant is the person who has suffered the prior conviction be tried by the court without a jury.

(2) Existing law provides that in the trial of a capital case an indigent defendant, through the defendant's counsel, may request the court for funds for the specific payment of investigators, experts, and others for the preparation or presentation of the defense. Existing law also requires confidentiality regarding the fact that an application has been made and as to the contents of the application.

This bill would require that this confidentiality not preclude any court from providing the Attorney General with access to statutorily protected documents when the defendant raises an issue on appeal or collateral review where the recorded portion of the record relates to the issue raised. The bill also would require that, when the defendant raises the issue, the funding records be provided to the Attorney General at the Attorney General's request and that the documents provided to the Attorney General remain under seal with their use limited solely to the pending proceeding.

The bill also would make a number of nonsubstantive, technical changes.

Ch. 236 (SB 1498) Karnette. Public cemetery districts: cremated remains: placement.

Existing law authorizes a public cemetery district to maintain a cemetery or cemeteries.

This bill would authorize a district to acquire, construct, improve, maintain, and repair a columbarium for the placement of cremated human remains. The bill would authorize a district to sell burial rights in niches of a columbarium, and would require the district to establish rates for the sale of those burial rights.

Ch. 237 (SB 2054) M. Thompson. Employment of minors: agricultural packing plants.

Existing law prescribes limits on the hours of employment of minors, but authorizes the Labor Commissioner to grant exemptions for employment of minors 16 and 17 years of age for up to 10 hours per nonschool day by agricultural packing plants during peak harvest season. Under existing law, which will be repealed on January 1, 1999, such an exemption may additionally authorize employment of a minor enrolled in a school in Lake County to be so employed for more than 48 but not more than 60 hours a week upon prior approval of the Lake County Board of Education.

This bill would extend until January 1, 2002, the above special provision authorizing that employment of Lake County minors for up to 60 hours per week where approved by the Lake County Board of Education and authorized by an exemption issued by the Labor Commissioner.

Ch. 238 (AB 521) Lempert. California Community Colleges: admissions.

Existing law requires the Board of Governors of the California Community Colleges to provide leadership and direction in the continuing development of the California Community Colleges as an integral and effective element in the structure of public higher education in the state. Existing law requires the governing board of a community college district to admit to the college any California resident, and may admit any nonresident, possessing a high school diploma or its equivalent.

This bill would require the Board of Governors of the California Community Colleges to adopt regulations that permit the governing board of a community college district to allow applications for admission and, upon adoption of a standard for encrypted digital signatures by the Secretary of State, student residency determination forms to be submitted electronically.

Existing law requires the per unit per semester fee charged to resident students at the California Community Colleges for the 1998–99 and 1999–2000 fiscal years to be reduced to \$12.

This bill would provide that this fee reduction commences in the academic year for the fall of 1998.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 239 (AB 744) Washington. Employment of minors: entertainment industry.

Existing law does not require that a medical certification be obtained for employment of an infant under the age of one month on a motion picture set.

This bill would preclude employment on a motion picture set of an infant under the age of one month unless a prescribed certification is made by a physician and surgeon who is board-certified in pediatrics.

The bill would make a violation of that provision a misdemeanor punishable by a fine of \$2,500 to \$5,000, by imprisonment in the county jail not exceeding 60 days, or by both.

Because the bill would add a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 240 (AB 771) Margett. Small claims court: jurisdiction.

Existing law specifies the jurisdiction of the small claims court to include various actions in which the demand does not exceed \$5,000, with specified exceptions. This jurisdiction also includes defendant guarantors who are required to respond based upon the default, actions, or omissions of another, if the demand does not exceed \$2,500.

This bill would increase the small claims court's jurisdiction over defendant guarantors to \$4,000, provided the action is filed on or after January 1, 2000, and the defendant guarantor charges a fee for their guarantor or surety services. The bill would require the court, on one occasion, to grant a postponement of the hearing date upon written request of the defendant guarantor, as specified. The bill would also make a statement of legislative intent and related changes.

Ch. 241 (AB 1634) Ortiz. Vehicles: paratransit vehicles.

(1) Existing law defines various terms for purposes of the Vehicle Code.

This bill would define a "paratransit vehicle" for those purposes as a passenger vehicle, other than a bus, schoolbus, school pupil activity bus, youth bus, general public paratransit vehicle, or taxicab that is operated for hire by a business, nonprofit organization, the state, or a political subdivision of the state and is regularly used to provide transportation services to handicapped persons, as defined, persons with a

developmental disability, as defined, individuals with disabilities who are determined to be eligible for complementary paratransit services under Title II of the Americans with Disabilities Act of 1990, and persons who are 55 years of age or older.

(2) Existing law prohibits any person from operating a schoolbus, school pupil activity bus, youth bus, general public paratransit vehicle, farm labor vehicle, or ambulance unless that person has in his or her immediate possession a driver's license, as specified, and a certificate to drive the vehicle.

This bill would prohibit a person who is employed as a driver of a paratransit vehicle from operating that vehicle unless the person (a) has in his or her immediate possession a valid driver's license of a class appropriate to the vehicle driven and (b) successfully completes, during each calendar year, 4 hours of training administered by, or at the direction of, the person's employer or the employer's agent on the safe operation of paratransit vehicles and 4 hours of training on the special transportation needs of persons he or she is employed to transport.

The bill would require all paratransit vehicles to be regularly inspected and maintained, as specified, and would require all owners or operators of those vehicles to document the inspection and maintenance, as specified.

The bill would require all drivers of paratransit vehicles, and the employers of those drivers, to comply with specified federal regulations and other provisions relating to controlled substances and alcohol use and testing. The bill would require the employers or operators of those drivers to participate in the pull notice system, as defined.

Because a violation of these provisions would be an infraction in some cases and a misdemeanor in other cases, the bill would impose a state-mandated local program by creating new crimes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 242 (AB 1683) Kuykendall. Uniform TOD Security Registration Act.

Existing law provides that investment securities may be transferred or redeemed by an endorsement, instruction, or entitlement order by an appropriate person, as defined.

This bill would specify that the beneficiary of a security registered in beneficiary form is an appropriate person for these purposes if the beneficiary has survived the death of the registered owner or owners; and would enact the Uniform TOD Security Registration Act providing for the transfer of ownership or proceeds of a security, as defined, upon the death of the owner without probate or estate administration, as specified.

Ch. 243 (AB 1703) Leach. Legal entities: partnerships and limited liability companies.

Existing provisions of the California Revised Limited Partnership Act govern limited partnerships.

Existing law permits an assignee of a partnership interest to become a limited partner if all partners consent.

This bill would permit an assignee of a partnership interest to become a limited partner if all general partners and a majority in interest of the limited partners consent.

Existing law provides that a limited partnership is dissolved when a general partner ceases to be a general partner under certain circumstances.

This bill would provide that, unless otherwise provided in the partnership agreement, a limited partnership is dissolved when a general partner ceases to be a general partner under certain revised circumstances, and would make related changes.

Existing law requires the articles of organization of limited liability companies to set forth the latest date on which the limited liability company is to dissolve.

This bill would permit, rather than require, the articles of organization to provide for the time at which the limited liability company is to dissolve. It would also eliminate certain other circumstances in which a limited liability company is required to dissolve and wind up its affairs.

Ch. 244 (AB 1739) Scott. Hazardous waste: recyclable materials: used oil.

Existing law subjects recyclable materials to the requirements of the hazardous waste control laws unless the Department of Toxic Substances Control issues a variance or unless the material meets specified requirements, including, if the material is oily waste, used oil, or spent nonhalogenated fuel that is managed according to specified requirements and, among other things, does not contain constituents other than those for which the material is being recycled that render the material hazardous.

This bill would exclude, from that prohibition on hazardous constituents, used oil removed from equipment, vehicles, or engines used primarily at the refinery where it is to be used to produce fuels or other refined petroleum products and managed in accordance with specified federal regulations.

Ch. 245 (AB 1797) Davis. Violence against witness or victim.

Existing law provides, with limited exceptions, that every person who willfully threatens to use force or violence upon a witness to, or a victim of, a crime or any other person, or to take, damage, or destroy any property of any witness, victim, or any other person because he or she has provided any assistance or information to a law enforcement officer, or to a public prosecutor in a criminal proceeding or juvenile court proceeding shall be punished by imprisonment in a county jail not exceeding one year, or by imprisonment in the state prison for 2, 3, or 4 years.

This bill would additionally apply this provision to every person who willfully uses force. This bill would prohibit a person who is punished under another provision of law from receiving an additional term of imprisonment under this provision. Because the bill would expand the scope of an existing crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 246 (AB 1825) Bowler. Vehicles: license plates: certificates of ownership: duplicates.

Existing law requires the registered owner of a vehicle who applies in person for a copy, duplication, or substitution of a certificate of ownership or license plate for the vehicle to present proof of ownership of the vehicle, acceptable to the Department of Motor Vehicles, and a driver's license or identification card issued by the department containing a picture of the licensee or cardholder. This provision does not apply if an application is delivered by mail or by any other courier or delivery service, if it is submitted by or through a dealer or dismantler, or if the applicant applies in person and is a business entity.

This bill, instead, would prohibit the department from issuing a copy, duplication, or substitution of a certificate of ownership or license plate if, after a search of the records of the department, as defined, the registered owner's address, as submitted with the application for that document, is different from that which appears in the records of the department, unless the registered owner applies for that document in person and presents the proof of ownership and a driver's license or identification card as specified above, or the registered owner's name and driver's license or identification card number submitted on the application matches the name and number contained in the department's record of registration of that vehicle. The bill would require the department to conduct a search of its records to verify the authenticity of the driver's license or identification card. If the application is for the purpose of replacing a certificate or license plate that was stolen, the bill would require submission of a copy of a police report identifying the document as stolen. If the application is for the purpose of replacing a certificate or license plate that was mutilated or destroyed, the bill would require submission of the remnants of the mutilated or destroyed document. If the department has a record of a prior issuance of a copy, duplication, or substitution of a certificate or license plate for the vehicle, the bill would require submission of a copy of

a report from the Department of the California Highway Patrol verifying the vehicle identification number of the vehicle.

The bill also would specify that these provisions do not apply if an application is submitted by or through a dealer, a dismantler, an insurer, an agent of the insurer, or a salvage pool.

Ch. 247 (AB 2230) B. Thompson. Fish and game.

(1) Existing law requires the Fish and Game Commission, in odd-numbered years, to hold meetings in the last 10 days of August and in the first 10 days of October, November, and December for the purpose of considering and adopting revisions to regulations relating to fish, amphibia, and reptiles, as specified.

This bill instead would require the commission to hold its August meeting during the first 10 days of that month.

(2) Under existing law, the Department of Fish and Game may authorize any person, except as provided, to be a license agent to issue punch cards, licenses, license stamps, and license tags. Under existing law, the department may provide the cards, licenses, stamps, and tags, to a license agent on consignment, as specified, or, alternatively, the department may collect, in cash or cashier's check, at the time the documents are provided, an amount equal to the fees for all of the cards, licenses, stamps, and tags provided.

This bill would eliminate the reference to payment by cash or cashier's check under the alternative payment arrangement.

(3) Existing law requires every person who takes any bird or mammal to first obtain a license issued by the department. In particular, existing law provides for the issuance of a hunting license to a nonresident of this state, valid only at an organizational field trial, as specified, upon the payment of a base fee of \$15, as adjusted.

This bill would eliminate that organizational field trial license.

(4) Existing law requires a person applying for a hunting license to produce evidence that he or she has previously been issued a hunting license, as specified, or has completed a hunter safety course, as specified. Existing law excepts from this requirement, nonresidents applying for a 2-day license to take specified game birds and mammals, and nonresidents applying for a one-day license to take domesticated game birds and pheasants, as specified.

This bill, instead, would require the nonresidents applying for the 2-day hunting license to meet the above evidence requirements.

(5) Existing law requires every person over the age of 16 years who takes any fish, reptile, or amphibia for any purpose other than for profit to first obtain a license issued by the department for that purpose. Existing law specifies the types of sportfishing licenses that may be obtained, and in particular, provides for the issuance of a license to a nonresident of California, as specified, for a 10-day consecutive period beginning on the date of purchase of the license.

This bill, instead, would provide for the 10-day consecutive period for that license to begin on the date specified on the license.

Existing law also provides for the issuance of a sportfishing license to a resident or nonresident, over the age of 16 years, for one designated day, upon the payment of a base fee of \$7, as adjusted.

This bill would, until January 1, 2002, make that license valid for 2 consecutive designated days, upon the payment of the base fee.

Ch. 248 (AB 2285) Brown. Alcoholic beverages: instruction: tastings.

The Alcoholic Beverage Control Act permits any person holding a manufacturer's, winegrower's, manufacturer's agent's, rectifier's, importer's, or wholesaler's license to give away samples of the alcoholic beverages that are authorized to be sold under that license. Existing law provides that a retail license does not authorize the furnishing or giving away of any free samples of alcoholic beverages. Existing law also authorizes distilled spirits manufacturers and winegrowers to conduct tastings of distilled spirits or wine at specified events.

The Alcoholic Beverage Control Act permits specified entities to instruct licensees and their employees in the subject of wine, beer, or distilled spirits, and to provide wine, beer, or distilled spirits in connection with that instruction.

This bill would permit an on-sale retail licensee authorized to sell wine or distilled spirits, a winegrower, or a distilled spirits manufacturer to instruct consumers at an on-sale retail licensed premises. That consumer instruction may include furnishing wine or distilled spirits, subject to limitation on the quantity that may be provided to each consumer.

Ch. 249 (AB 2498) Runner. Child support commissioners.

Existing law requires all applications filed by the district attorney or by another party, as provided, for an order to establish, modify, or enforce child or spousal support, including actions to establish paternity, to be referred for hearing to a child support commissioner and for each superior court to provide sufficient child support commissioners to hear these cases.

This bill would require the Judicial Council to conduct an evaluation of the child support commissioner system and to report the results of its evaluation and recommendations to the Legislature by February 1, 2000. The bill would require the Judicial Council to convene a workgroup, as specified, that would advise the Judicial Council in establishing criteria to evaluate the success and failures of the child support commissioner system and how to establish successful outcomes for that system.

Ch. 250 (AB 2523) Ackerman. County auditor.

Existing law establishes the qualifications of a county auditor.

This bill would authorize the Orange County Board of Supervisors to elect for a period of up to 2 years that any requirement that an audit be performed by the county auditor may also be performed by a county employee or officer who meets specified qualifications.

Ch. 251 (AB 2571) Pacheco. Regulated substances.

Under existing law, the program for the prevention of accidental releases of regulated substances adopted by the United States Environmental Protection Agency pursuant to the federal Clean Air Act is the accidental release prevention program for the state.

This bill would require the Office of Emergency Services to use any federal assistance received to implement the unified agency program to offset any fees or charges levied pursuant to the accidental release program.

Ch. 252 (SB 776) Johannessen. State property: design-build.

Existing law requires the Department of General Services to perform various functions and duties with respect to state property.

This bill would authorize the Director of General Services when authorized by the Legislature to use the design-build procurement process for a specific project, notwithstanding other provisions of law, to contract and procure state office facilities, other buildings, structures, and related facilities pursuant to these provisions. This bill would require the director, prior to contracting for the procurement of state office facilities and other state buildings and structures, to prepare a program setting forth the scope of the project and to establish a competitive prequalification process and recommend to the Legislature a selection process for design-build entities. This bill would require any design-build entity that is selected to design and build a project pursuant to these provisions to possess or obtain sufficient bonding consistent with applicable provisions of law, as specified.

This bill would require a bidder participating in the prequalification process to provide written declarations subject to misdemeanor penalties. By creating a new crime, this bill would impose a state-mandated local program.

This bill, with specified exceptions, would prohibit the expenditure of funds appropriated for a design-build capital outlay project until the Department of Finance and the State Public Works Board have approved performance criteria or performance criteria and concept drawings for the project to be financed from the appropriation for capital outlay. This bill would revert any appropriated amounts for the design-build

phase of a design-build project, where funds have been expended on the design-build phase by any state agency prior to this approval, to the fund from which the appropriation was made. The bill would also require the State Public Works Board to defer all augmentation in excess of 20% of the amount appropriated for each design-build capital outlay project until the Legislature makes additional funds available for the specific project. The bill would require the Department of Finance to certify in writing to specified members of the Legislature that the requested action is in accordance with the legislatively approved scope and cost.

This bill would specify that these provisions shall only remain operative until the completion of at least 5 design-build projects, each with a value of \$10,000,000 or more, or January 1, 2006, whichever occurs later.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 253 (SB 1360) Alpert. Human remains: disposition.

Existing law lists the person or persons who may, in a specified order of succession, control the disposition of the remains of a deceased person if other directions have not been given by the decedent.

This bill would provide that if the person to whom right of control has vested under those provisions has been charged with first or second degree murder or voluntary manslaughter in connection with the decedent's death, the right of control over the disposition of the remains of the deceased person is relinquished and passed on to the next of kin in accordance with those provisions. The bill would also add to and revise the list of persons who may control the disposition of the remains of a deceased person pursuant to these provisions.

Existing law requires a funeral director or cemetery authority in control of the decedent's remains to notify the public administrator if certain persons with the right to control the disposition of the remains cannot be found after reasonable inquiry or cannot be contacted by reasonable means.

This bill would delete the reference to the cemetery authority with regard to this notice requirement.

Ch. 254 (SB 2056) Brulte. Health: HIV exposure: first responders.

Existing law provides that the blood or other potentially infectious material of a person receiving health care services that has been the source of a significant exposure to an individual may be tested and the exposed individual may be informed of the HIV status of that patient if certain conditions are met. Existing law provides that if this source patient refuses to consent to an HIV test after a documented effort has been made to obtain consent, then any "available blood or patient sample," as defined, of the source patient may be tested.

This bill would provide that if the informed consent of the source patient cannot be obtained because the source patient is deceased, consent to perform an HIV test on any blood or patient sample of the source patient legally obtained in the course of providing health care services at the time of the exposure event shall be deemed granted.

Ch. 255 (AB 681) Machado. Environmental remediation: closure.

(1) Existing law, the Carpenter-Presley-Tanner Hazardous Substance Account Act, requires the Department of Toxic Substances Control or a California regional water quality control board to prepare or approve remedial action plans, which specify, among other things, removal and remedial actions selected for the cleanup of all hazardous substance release sites identified and categorized pursuant to a specified procedure. The department and the State Water Resources Control Board are required to concurrently establish consistent policies and procedures to be used by each agency in overseeing the investigation and taking of removal and remedial actions at hazardous substance release sites, in the case of the department, and in overseeing the investigation of, and cleaning

up or abating the effects of, discharges of a hazardous substance, in the case of the state board.

Under existing law, the state board is authorized to develop and implement a local oversight program for the abatement of, and oversight of the abatement of, unauthorized releases of hazardous substances from underground storage tanks by local agencies.

Existing law specifies procedures for the taking of corrective action to unauthorized releases of petroleum from underground storage tanks.

This bill would prohibit considering cleanup or site closure proposals from the primary or active responsible party or discharger, as the case may be, the issuance of a closure letter, or a determination that no further action is required by a local agency with respect to an unauthorized release of hazardous substances from an underground storage tank, a local agency, a regional board, or the state board with regard to an unauthorized release of petroleum from an underground storage tank, or the state board or a regional board with respect to a site subject to a cleanup or abatement order, unless all current record owners of fee title to the site of the proposed action have been notified of the proposed action by the local agency, state board, or regional board, as the case may be.

The bill would require the above described entities to take all reasonable steps necessary to accommodate responsible landowner participation in the cleanup or site closure process and to consider all input and recommendations from any responsible landowner wishing to participate.

The bill would prohibit the department, upon receiving a specified request, from overseeing the preparation of, or reviewing, a preliminary endangerment assessment for property if action may be necessary to address a release or threatened release of a hazardous substance and from issuing a letter stating that no further action is necessary with regard to property, unless the person requesting department action provides the department with specified information. The bill would prescribe related matters.

Since the bill would require local agencies to take specified actions with regard to unauthorized releases, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 256 (AB 1382) Olberg. Vehicles: crimes: penalties.

Existing law makes it a misdemeanor or a felony for any person to willfully flee or attempt to elude a pursuing peace officer and proximately cause serious bodily injury, as defined, or death to any person. A violation of this provision is punishable by specified terms of imprisonment in the county jail or in the state prison, by specified fines, or by both the fines and imprisonment.

This bill would increase the term of imprisonment in the state prison to 3, 4, or 5 years and would revise a cross-reference in those provisions.

Ch. 257 (AB 2759) Committee on Agriculture. Eggs.

(1) Under existing law, it is unlawful for an egg handler to sell, offer for sale, or expose for sale eggs (1) that are packed or graded for human consumption that are not accompanied with notice of refrigeration requirements using designated labeling on the consumer container or prescribed signs at the point of sale and (2) that are packed for human consumption that are not labeled with prescribed "sell-by" information on the container and subcontainer and the identification number of the plant of origin. Under existing law, a violation of any of the provisions relating to eggs is a misdemeanor.

This bill would exempt eggs that are packaged for export, including export to other states and territories of the United States, and foreign countries, and eggs that are packaged for military sales from those provisions requiring that eggs that are packed for human consumption be labeled with prescribed "sell-by" information on the container. The bill would require the eggs to also be labeled with the Julian pack date, as defined. The bill would also prohibit reprocessing eggs returned from grocery stores, warehouses, and institutions for retail shell egg sales, thereby imposing a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 258 (AB 531) Knox. Home detention: escape.

(1) Existing law prohibits any person who is booked for, charged with, or convicted of a misdemeanor or felony, and confined in a county or state correctional facility as specified, from escaping from that confinement, or failing to return to confinement subsequent to an authorized temporary release. Escape from confinement pursuant to a misdemeanor conviction is defined to include escape from a home detention program. Existing law punishes escape from confinement pursuant to a charge or conviction for a misdemeanor by imprisonment in the state prison for one year and one day, or in a county jail not exceeding one year, and imposes increased penalties if the escape or attempt to escape is by force or violence. A conviction for escape from confinement pursuant to a charge or conviction for a felony is punishable by imprisonment in the state prison for 16 months, 2 or 3 years, to be served consecutively, or in a county jail not to exceed one year, and increased penalties are imposed if the escape or attempt to escape is by force or violence.

This bill would make it a crime for any person convicted of a felony and placed in a home detention program, to escape from home detention. This bill would also clarify that the failure to return to confinement subsequent to an authorized temporary release is an escape, subject to the above penalties. By changing the definition and scope of an existing crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 259 (SB 1436) M. Thompson. Government: state and local.

(1) Existing law provides for a state agency known as the 25th District Agricultural Association, which, under existing law, is organized for the purpose of holding fairs, expositions, and exhibitions, and constructing, maintaining, and operating recreational and cultural facilities of general public interest.

This bill would permit a nonprofit organization to hold an annual fair in lieu of the annual fair held by the 25th District Agricultural Association, with the consent of the Secretary of Food and Agriculture. The bill would permit the Director of General Services, with the consent of, and on terms approved by, the secretary, to lease to the nonprofit organization, for less than market value, the premises known as the Napa Valley Expo for a period not to exceed 99 years. During the period that the lease is in effect, the nonprofit organization would be deemed to be an instrumentality of the state for certain limited purposes, and the bill would provide that the 25th District Agricultural Association is inactive during that period, and shall not have any powers or duties. The bill would permit employees of the 25th District Agricultural Association to make an election concerning employment. The bill would also provide that the nonprofit organization may elect to be a member of the network of California fairs on terms and conditions mutually agreed upon by the Department of Food and Agriculture and the corporation.

(2) Existing law requires any person who operates a public water system to provide a reliable and adequate supply of pure, wholesome, healthful, and potable water. Existing judicial law prohibits the Redwood Valley County Water District from connecting new residential water service because the district lacks an adequate legal source of water.

This bill would authorize the Redwood Valley County Water District to make not more than 135 new $\frac{3}{4}$ -inch equivalent domestic service connections if (a) the district has a contract, agreement, or independent water right to divert water from Lake Mendocino or another adequate source of water supply, (b) Redwood Valley is an allowed place of use under the contract, agreement, or independent water right, (c) the State

Department of Health Services has determined that the water source provides an adequate physical supply of water, and (d) the connection will relieve hardships.

(3) Existing law authorizes the Camp Meeker Recreation and Park District to exercise certain powers of a county water district.

This bill would broaden that authorization to allow the district to exercise the powers of a county water district with respect to sewer facilities.

(4) Existing law requires the Board of Directors of the Mendocino County Waterworks District #2 to be elected at a district election that is consolidated with the statewide direct primary election.

This bill would delete the requirement that the election be consolidated.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 260 (SB 139) Kopp. Open meetings: local agencies.

(1) The Ralph M. Brown Act authorizes a local agency to use teleconferencing in connection with a public meeting under specified conditions.

This bill would require, as an additional condition under which teleconferencing may be used, that during the teleconference, at least a quorum of the members of the legislative body shall participate from locations within the boundaries of the territory over which the local agency exercises jurisdiction.

(2) Under the act, each legislative body, except for advisory or standing committees, is required to provide, by ordinance, resolution, bylaw, or rule, the time and place for holding regular meetings.

This bill would specify that meetings of advisory or standing committees, for which an agenda must be posted at least 72 hours in advance, shall be considered regular meetings of the legislative body.

(3) Under the act, the meetings of the legislative body of a local agency are required to be conducted openly and publicly, with specified exceptions. Under the act, the legislative body of a local agency may hold closed sessions with the local agencies' designated representatives regarding specified negotiations and is also required to disclose specified information in an open and public session prior to holding a closed session with its real property or labor negotiator.

This bill would require the legislative body of a local agency to disclose its real property negotiators prior to holding a closed session to discuss the purchase, sale, exchange, or lease of real property by or for the local agency and to disclose its designated representatives prior to holding a closed session with its labor negotiators.

(4) The bill would also require the legislative body of a local agency to hold an open and public session in which it identifies its designated representatives prior to a closed session to discuss the salaries, salary schedules, or fringe benefits of its represented and unrepresented employees.

Ch. 261 (SB 1471) McPherson. Interior design.

Existing law regulating interior designers remains in effect only until January 1, 1999, and its continuation is subject to review by the Joint Legislative Sunset Review Committee.

This bill would extend the effective date of that law to January 1, 2002.

Ch. 262 (SB 1486) Rainey. State Teachers' Retirement System: benefits.

The State Teachers' Retirement Law authorizes members to change or revoke beneficiary designations other than option beneficiary designations.

This bill, under specified circumstances, would authorize a retired member to designate a spouse as his or her new option beneficiary.

Ch. 263 (SB 1662) Ayala. Public safety officers: Procedural Bill of Rights.

The Public Safety Officers Procedural Bill of Rights Act provides that no punitive action, nor denial of promotion on grounds other than merit, shall be undertaken by a public agency without providing the public safety officer with an opportunity for administrative appeal.

This bill would provide that the administrative appeal shall be conducted in conformance with rules and procedures adopted by the local public agency. To the

extent that these new requirements would apply to local government employers, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 264 (SB 1716) Calderon. California Earthquake Authority.

Existing law provides for creation of the California Earthquake Authority, to be administered under the authority of the Insurance Commissioner. The authority is authorized to sell policies of basic residential earthquake insurance. Existing law provides that residential property insurers shall either continue to offer and issue residential earthquake insurance policies, or otherwise elect to participate in the authority upon compliance with certain capital contribution requirements, in which case the participating insurers may transfer their earthquake risk to the authority. Existing law provides for the assessment of participating insurers based on the insurer's residential earthquake insurance market share, as defined, if the authority requires additional resources to pay claims.

This bill would prohibit the authority from assessing a participating insurer for selling additional insurance products that supplement or augment the basic residential earthquake insurance provided by the authority. The bill would also specify that the maximum permissible assessment of a participating insurer that begins renewing business into the authority less than 12 months prior to the assessment shall be based on the residential earthquake market share of business actually placed into the authority by the insurer as of the date of the assessment and would further provide that the maximum permissible insurer assessments for other participating insurers shall not be modified to reflect the addition of a new participating insurer until 12 months after that insurer has begun renewing business into the authority. The bill would also change certain dates relating to reporting by the authority and determining assessments of participating insurers.

The bill would make other related changes.

The bill would also take effect immediately as an urgency statute.

Ch. 265 (SB 1813) Kopp. Trial by declaration: Judicial Council.

Existing law requires the courts, by rule, to provide that a defendant may elect to have a trial by written declaration upon any alleged infraction involving a violation of the Vehicle Code or any local ordinance, except as specified.

This bill would, additionally, authorize the Judicial Council to adopt rules and forms governing trials by declaration. The bill would require that any rule or form adopted by the council supersede any local rule of a court.

Ch. 266 (SB 2150) Peace. Public Utilities: telecommunications.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities. Existing law also sets forth legislative findings and declarations regarding telecommunications policies for California.

This bill would set forth additional legislative findings and declarations regarding these telecommunications policies and would require the commission, not later than January 1, 2000, to commence a proceeding to consider whether to establish a new regulatory framework, as prescribed.

Ch. 267 (SB 2187) Schiff. Youthful offenders: continued treatment.

Existing law requires the court to order the Department of the Youth Authority to continue the treatment of a person who is otherwise eligible for discharge from the control of the department if the court, after the filing of a petition for further detention by the prosecuting attorney and a full hearing, is of the opinion that discharge of the

person would be physically dangerous to the public for specified reasons. Existing law provides that if, after the court hearing, the person is ordered to remain subject to the control of the department, the person is entitled to request a jury trial on the question of whether he or she is physically dangerous to the public because of his or her mental or physical deficiency, disorder, or abnormality.

This bill would instead provide that, upon review of the petition for further detention as specified, the court shall order a hearing to determine if probable cause exists to believe that discharge of the person would be dangerous to the public for specified reasons. If, following the hearing, probable cause is found, a jury trial or, if a jury is waived, a court trial would be required to be held to determine if the person is physically dangerous to the public. Because this bill would impose expanded duties on court personnel, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 268 (AB 1871) Baca. Firearms: centralized list of licensees.

Under existing law, no person shall sell, lease, or transfer firearms unless he or she has been issued a license, except as specified. Existing law also requires that, commencing March 1, 1994, the Department of Justice keep a centralized list of all persons licensed pursuant to these provisions and make information about an individual dealer available, upon request, for specified purposes.

This bill would include, among these purposes, the situation where information is requested by a person promoting, sponsoring, operating, or otherwise organizing a gun show or event to conduct transactions as a firearms dealer. The bill would require that this information be limited to information necessary to corroborate an individual's current license status.

This bill would incorporate additional changes in Section 12071 of the Penal Code proposed by SB 63, to be operative if SB 63 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 269 (AB 1975) Brewer. Surplus line insurance brokers.

(1) Existing law governing the business of insurance provides for the licensure of surplus line brokers and special lines' surplus line brokers, and authorizes surplus line brokers to solicit and place certain insurance with nonadmitted insurers in specified circumstances. Existing law requires nonadmitted insurers and surplus line brokers, in specified cases, to provide a disclosure notice to policyholders and applicants for insurance stating, among other things, that the insurer that has issued, or that is issuing, the policy of insurance is not licensed by the state.

This bill would, in addition, require that the disclosure notice state that California maintains a list of eligible surplus line insurers approved by the Insurance Commissioner and that policyholders and applicants for insurance should ask their agent or broker if an insurer is on that list.

(2) Existing law prohibits any surplus line broker from placing coverage with a nonadmitted insurer unless the insurer is domiciled in Mexico and coverage is only for specified purposes, or unless at the time of placement the insurer has established its financial stability, reputation, and integrity, as defined, and complies with certain capital, surplus, and other financial requirements, subject to certain exemptions. Existing law sets forth certain definitions in this regard, including a definition of "licensee," which includes both surplus line brokers and special lines' surplus line brokers licensed pursuant to specified provisions of law.

This bill would instead provide that the definition of "licensee" means a surplus line broker as defined in a new provision also added by this bill.

This bill would incorporate additional changes in Section 1765.1 of the Insurance Code, proposed by SB 237, to be operative only if SB 237 and this bill are both chaptered and become effective on or before January 1, 1999, and this bill is chaptered last.

Ch. 270 (AB 2153) Brewer. Insurer insolvency: California Insurance Guarantee Association.

Existing law governing the business of insurance establishes the California Insurance Guarantee Association to, among other things, settle the unpaid claims of insolvent member insurers. Existing law authorizes a court of competent jurisdiction, upon petition of the Insurance Commissioner or the association, to stay all proceedings in any court of law in the state to which an insolvent insurer is a party for a period of 60 days from the date a liquidator is appointed, to permit proper defense of all pending causes of action.

This bill would repeal that authorization and would instead require that all proceedings in which the insolvent insurer is a party, or is obligated to defend a party, in any court in the state be stayed for 60 days from the date that an order of liquidation or receivership with a finding of insolvency is entered and an additional time thereafter determined necessary by the court to permit proper defense or conduct of pending actions by the association or the commissioner. This bill would also, among other things, require the liquidator, receiver, or statutory successor of the insolvent insurer to permit the association reasonable access to the records of the insolvent insurer, as specified.

Ch. 271 (AB 2355) Olberg. Trespass: denial of access.

(1) Existing law prohibits the unlawful obstruction of access to public lands, and also provides for the granting of easements, covenants, licenses, and profits by which a person, subject to the law of real property and contractual agreement, can record an interest, including the right to enter, use, cross, or inspect, in the real property of another.

This bill would prohibit the willful and knowing obstruction of access to property where the entering party possesses a legal right to so enter based on a duly-recorded real property interest, as specified. The bill would not apply to persons who are engaged in lawful labor union activities or activities that are otherwise constitutionally protected. This bill would punish violations as infractions punishable by a fine not to exceed \$500. By creating a new crime, this bill would increase the costs of local prosecution and imprisonment, and would therefore impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 272 (AB 2397) Bowen. Environmental quality waste disposal facilities.

(1) Existing law, the California Environmental Quality Act, requires a public lead agency to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if it finds that the project will not have that effect, unless the project is exempt from the act. For purposes of the act, a "person" is defined to include any person, firm, association, organization, partnership, business, trust, corporation, limited liability company, company, district, county, city and county, city, town, the state, and any of the agencies or political subdivisions of those entities.

This bill would additionally include within that definition of "person" for purposes of the act, to the extent permitted by federal law, the United States, or any of its agencies or political subdivisions. The bill would impose a state-mandated local program by imposing new duties on local agencies with respect to determining whether specified projects would be covered by the act.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 273 (SB 452) Maddy. Alcoholic beverages: return to seller.

The Alcoholic Beverage Control Act, except as otherwise provided with respect to, among others, an annual licensee operating on a temporary basis, authorizes a seller of beer to accept the return of beer from a retailer only if the beer is returned in exchange for the identical quantity and brand of beer. It also specifies that an annual licensee is considered to be operating on a temporary basis if he or she operates at, among other venues, certain types of sporting or entertainment facilities.

This bill would substitute the term “wholesaler or manufacturer, or any successor thereto,” for the term “seller,” and would substitute the term “retail licensee” for the term “retailer.” It would also include convention centers among those types of sporting or entertainment facilities, the operation at which by an annual licensee may determine whether that licensee is operating on a temporary basis. It also would, subject to certain conditions, authorize a wholesaler or manufacturer of beer, or any successor thereto, to accept the return of quantities of discontinued or seasonal brands of beer from a retail licensee, provided that the returned beer is exchanged for a quantity of beer of a brand produced or sold by the same manufacturer with a value not greater than the original sales price to the retail licensee of the returned beer.

Ch. 274 (SB 661) O’Connell. Air monitoring plans: Lompoc.

Under existing law, there is in the California Environmental Protection Agency the Department of Pesticide Regulation, which is vested with specified duties, powers, purposes, and responsibilities related to the regulation of pesticides.

This bill would appropriate \$145,000 from the General Fund to the department for expenditure for purposes of implementing a two-stage air monitoring plan in the City of Lompoc as recommended by the Lompoc Interagency Work Group.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 275 (SB 1483) Ayala. In-home supportive services.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program.

The bill would require the county welfare department to provide IHSS applicants and recipients, upon determination and redetermination of eligibility, with information and referral services to community public and nonprofit entities that provide reading services to visually impaired persons, thus creating a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 276 (SB 1514) Solis. Garment manufacture: registration: penalties.

Existing law establishes that any person engaged in the business of garment manufacturing who is not registered with the Labor Commissioner is guilty of a misdemeanor.

This bill would exempt from that provision of law persons who do not employ any workers.

Existing law imposes civil penalties on persons, as defined, engaged in the garment manufacturing business, for specified violations relating to garment industry workers, registration, and records. Existing law imposes those civil penalties for each “affected

employee” in the amount of \$100 for each affected employee for the initial violation, and \$200 for each affected employee for subsequent violations.

This bill would establish a \$500 civil penalty for those violations if the person in violation does not employ any workers.

Ch. 277 (SB 1621) Rosenthal. Alcoholic beverages: beer tapping equipment.

Existing law permits a beer manufacturer to furnish to a beer wholesaler, and a beer wholesaler or manufacturer to furnish to a retailer, items of equipment as are permitted by Department of Alcoholic Beverage Control regulation.

This bill would instead permit a manufacturer to furnish to a licensed wholesaler, and a licensed wholesaler or manufacturer to furnish to an on-sale licensee, only specified items of alcoholic beverage tapping equipment. A violation of this provision would be a misdemeanor, thus, imposing a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 278 (SB 1407) Lockyer. Crimes: manslaughter.

Existing law defines vehicular manslaughter under 3 circumstances to include (a) driving a vehicle in the commission of an unlawful act, not amounting to a felony, and with gross negligence, or in the commission of a lawful act which might produce death, in an unlawful manner, and with gross negligence, (b) driving a vehicle in the commission of an unlawful act, not amounting to a felony, and without gross negligence, or in the commission of a lawful act which might produce death, in an unlawful manner, and without gross negligence, and (c) driving a vehicle as defined in (b) in violation of specified sections of the Vehicle Code. A violation under (a) or (c) above is punishable by imprisonment in a county jail for not more than one year or by imprisonment in the state prison for 16 months, 2, or 4 years, and a violation of (b) above is punishable by imprisonment in a county jail for not more than one year.

This bill would add an additional circumstance to the definition of vehicular manslaughter where any death proximately results from a vehicular collision or vehicular accident knowingly caused for financial gain, as defined. The bill would make that offense punishable by imprisonment in the state prison for 4, 6, or 10 years and would provide that this provision shall not be construed to prevent prosecution for the crime of murder. Because this bill would expand the scope of an existing crime, it would increase the costs of prosecution and therefore would impose a state-mandated local program.

This bill would also make a technical, nonsubstantive change.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 279 (SB 1390) Kopp. Peace officer uniform.

Existing law provides that it is a misdemeanor for any person other than one who by law is given the authority of a peace officer, to willfully wear, exhibit, or use the authorized badge, insignia, emblem, device, label, certificate, card, or writing of a peace officer with the intent of fraudulently impersonating a peace officer, or of fraudulently inducing the belief that he or she is a peace officer.

This bill would, in addition, make this prohibition applicable with respect to a peace officer uniform. This bill would also define a new enhancement by imposing an additional one-year term of imprisonment upon any person who violated the above provisions during the commission of a felony. By expanding the scope of an existing crime, and imposing a new enhancement, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 280 (SB 1780) Peace. Contest advertising: sweepstakes.

Existing law regulates advertising in the state and prohibits certain unfair advertising practices relating to the operation or conduct of contests.

This bill would prohibit solicitation materials containing sweepstakes entry materials from representing, taking into account the context in which those representations are made, that a person is a winner or has already won a prize unless that person has, in fact, won a prize. It would also require those solicitation materials to include a prominent statement indicating that no purchase is necessary to enter the promotional sweepstakes and to include a copy of the official rules for the sweepstakes. This bill would also prohibit sweepstakes entries not accompanied by an order for products or services from being subjected to any disability or disadvantage in the winner selection process, as compared to entries accompanied by an order for products or services.

Existing law makes it a crime to violate any of the provisions regulating advertising. By adding new requirements and prohibitions with regard to sweepstakes advertising, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 281 (SB 1924) McPherson. Hazardous waste: dry cell batteries.

Existing law requires operators and owners of hazardous waste facilities to obtain a hazardous waste facilities permit or grant of authorization from the Department of Toxic Substances Control. Existing law defines "non-RCRA hazardous waste" as meaning hazardous waste that is regulated by the state, other than hazardous waste subject to the federal Resource Conservation and Recovery Act of 1976. Existing law exempts any collection location or intermediate collection location that receives, or any person that transports, spent batteries from the requirements of the hazardous waste laws concerning the receipt, storage, and transportation of hazardous waste if specified requirements are met.

This bill would exclude from regulation as a hazardous waste and from the requirements concerning spent batteries, a spent dry cell battery containing zinc electrodes, as defined, if the spent dry cell battery is disposed of in a specified manner, or is accumulated for recycling, subject to specified requirements.

Ch. 282 (SB 2101) Peace. Workers' Compensation Managed Care Fund.

Existing law establishes the Workers' Compensation Managed Care Fund for the administration, by the Division of Workers' Compensation, of specified provisions of law providing for the certification of health care organizations to provide health care to injured workers. Existing law requires the Administrative Director of the Division of Workers' Compensation to establish a schedule of fees and revenues to be charged to certified health care organizations and applicants for certification to fully fund the administration of these specified provisions of law and to repay amounts received as a loan from the General Fund.

This bill would provide that, on and after July 1, 1998, no funds received as a loan from the General Fund shall be used to support the administration of these provisions. The bill would require the loan amount to be repaid to the General Fund by assessing a surcharge on the enrollment fee for each of the next 5 fiscal years, and if that is insufficient, by adjusting the surcharge to fully repay the loan over the following 3 fiscal years, as specified.

Ch. 283 (SB 2005) Kopp. Permit Streamlining Act.

(1) Under the Permit Streamlining Act, a state or local agency and a public agency that is the lead agency for a development project are required to act upon an application for a development project within specified time periods prescribed by the act and may not include a waiver of these time periods, as specified, as a condition of accepting or processing the application for a development project.

This bill would add the term "extension" to these provisions and would declare the Legislature's intent to clarify that the act does not provide for the application of the common law doctrine of waiver by either its purpose or statutory language.

(2) Existing law authorizes a lead agency to waive specified time limits where a combined environmental impact report-environmental impact statement is being prepared on a development project, and requires the lead agency to approve or disapprove the project within 60 days after the statement has been completed and adopted.

This bill would repeal the lead agency's authority to grant a waiver and would extend the period within which to approve or disapprove the project to 90 days.

(3) Existing law also authorizes a lead agency and a project applicant to mutually agree to waive these specified time periods and to agree to a one-time 90-day extension of certain time limits specified by law.

This bill instead would authorize the lead agency and the project applicant to extend these time limits once upon their mutual written agreement for a period not to exceed 90 days from the date of the extension, and would provide that no other extensions, continuances, or waivers may be granted, except as specified.

Ch. 284 (SB 1729) M. Thompson. School safety.

Under existing law, the governing board of each community college district, the Trustees of the California State University, the Board of Directors of the Hastings College of the Law, the Regents of the University of California, and the governing board of any postsecondary institution receiving public funds for student financial assistance, are required to compile records concerning all occurrences of certain criminal and noncriminal activity.

This bill would require these entities to enter into a written agreement with local law enforcement agencies relating to Part 1 violent crimes, as defined, that designates which law enforcement agency has operational responsibility for the investigation of Part 1 violent crimes and delineates the specific geographical boundaries of each agency's operational responsibility. The bill would require that these agreements be made available to the public and that copies of these agreements be transmitted to the Legislative Analyst.

By requiring community college districts and local law enforcement agencies to enter into these agreements, to make these agreements available to the public, and to transmit copies of these agreements to the Legislative Analyst, this bill would impose a state-mandated local program. The bill would state the Legislature's reaffirmation that campus law enforcement agencies have the primary authority for providing police or security services to their campuses.

This bill would provide that this provision shall be known and may be cited as the Kristin Smart Campus Safety Act of 1998. The bill would require the Legislative Analyst to report to the Legislature not later than March 1, 2000, regarding the implementation of this provision.

The provisions of this bill would not apply to the University of California except to the extent that the regents, by appropriate resolution, make the provisions applicable.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 285 (AB 471) Cardoza. Healthy Families Program.

(1) Existing law creates the Healthy Families Program, to be administered by the Managed Risk Medical Insurance Board, to arrange for the provision of health services, including dental and vision benefits, to children with a household income equal to or less than 200% of the federal poverty level. Existing law requires participating health plans to submit an annual report to the board on their provider network, including geographic access for subscribers, linguistic services, and the ethnic composition of providers.

This bill would require a similar annual report from participating dental plans, and would authorize the board to establish reasonable limits on dental plan administrative costs.

(2) Existing law provides for the board to appoint a 14-member advisory panel, as specified.

This bill would add a licensed, practicing dentist to the advisory panel, thereby expanding the panel to 15 members.

(3) Existing law creates the Healthy Families Fund in the State Treasury as a continuously appropriated fund, and authorizes the board to authorize expenditures from the fund.

This bill would authorize the board to authorize the State Department of Health Services to transfer funds appropriated to the department for the program to the fund, and to also deposit those funds in, and to disburse those funds from the fund.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 286 (AB 1709) Alquist. Cemetery and funeral fraud.

(1) Existing law requires that funeral directors, upon beginning discussion of prices or of the funeral goods and services offered, provide a detailed printed listing specifying the price for the professional services offered to their prospective customers.

This bill would additionally require that a funeral establishment or cemetery authority make available to any individual who, in person, inquires about funeral or cemetery purchases, a copy of a consumer guide for funeral and cemetery purchases, provided and approved by the Department of Consumer Affairs, in consultation with the funeral and cemetery industries and other interested parties. The department would be required to make the guide available both in printed form and electronically on the Internet.

This bill would also provide that it is unlawful for any person, other than a funeral director, to sell or to offer to sell, on a retail basis, a casket, alternative container, or outer burial container, unless the person complies with certain price and disclosure requirements.

The bill would expand the scope of activities that are to be undertaken by sellers of human remains containers and that are subject to existing misdemeanor provisions governing funeral practices, and, thus, this bill would impose a state-mandated local program by the creation of a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 287 (AB 2001) Kuehl. Employment agencies: child care providers.

Existing law generally regulates employment agencies, as defined. Existing law prohibits a babysitting, domestic, or other employment agency which procures babysitting or domestic employment for employers from referring babysitters or domestics without first personally interviewing the jobseeker and making a reasonable effort to verify the experience or training of the jobseeker. Under existing law, the violation of these provisions is a misdemeanor.

Existing law authorizes a child care provider, as defined, who possesses any one of 4 identification cards to initiate a background examination process by submitting one set of fingerprints and a completed trustline application to the Department of Justice.

Existing law prohibits an employment agency from placing a child care provider with parents or guardians who are not required to be licensed as a child day care facility, if the child care provider is not a trustline applicant or registered child care provider.

This bill would require every employment agency that refers a child care provider to an employer who is not required to be a licensed day care facility to provide specified information to these employers regarding the trustline registry. It would require written verification of receipt of that information by an employer. It also would provide that an employment agency that makes such a referral shall not make a placement of a provider who is not a trustline applicant or a registered child care provider. A violation of this latter prohibition would be a misdemeanor. Since this bill would establish new crimes, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 288 (AB 2045) Ashburn. Water districts.

(1) The California Water District Law requires the director of a California water district to be a holder of title to land within the district or the legal representative of the holder of title to land, as defined, and authorizes certain persons to serve as a director if a corporation holds title to land.

This bill would, instead, require a director to be a holder of title to land within the district, the legal representative of the holder of title to the land within the district, or a representative designated by the holder of title to land, as prescribed. The bill would revise the definition of "legal representative."

(2) The Drainage District Act of 1903 provides for the formation of drainage districts and specifies the powers and purposes of those districts. Under the act, a director of a drainage district is required to be a voter of the district, as prescribed.

This bill would, instead, require a director, if voting in the district is by landowner voting based on assessed value, to be a holder of title to land within the district, the legal representative of a holder of title to land within the district, or a designated representative of a holder of title to land within the district, as prescribed. The bill would additionally require a director, if voting in the district is by landowner voting based on assessed value and directors are elected by division, to also be a holder of title, a legal representative of a holder of title, or a designated representative of a holder of title, to land within the division from which the director is elected. The bill would require a director, if voting in the district is by resident registered voters, to be a voter residing within the district or within the division within the district from which the director is elected, as applicable. By imposing additional requirements on local officials, this bill would impose a state-mandated local program.

(3) Existing law provides for the formation of a flood control and water conservation district by filing a prescribed petition with the board of supervisors in the county where the proposed work is to be done whenever a condition exists in a county requiring the control of floods and conservation of flood waters. Existing law requires the districts formed pursuant to those provisions to be governed by a board of 5 trustees to be appointed by the board of supervisors from landowners residing in the district.

This bill would require a director to be a holder of title to land within the district and a resident of the district or a designated representative of a holder of title to land within the district, as specified. By imposing additional requirements on local officials, this bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 289 (AB 2218) Woods. California Walnut Commission.

(1) Existing law establishes the California Walnut Commission and authorizes the commission, among other things, to promote the sale of walnuts by advertising and other promotional means, to educate and instruct the wholesale and retail trade in foreign markets, to make market surveys and analyses, and to conduct marketing research.

This bill would expressly define "person" for purposes of the law governing the commission.

(2) Existing law requires the Secretary of Food and Agriculture to hold a hearing every 6 years, if requisite funds are available, to determine whether operation of the provisions governing the commission should be continued. If the secretary finds after the hearing that a substantial question exists among the producers assessed regarding whether operation of the provisions should be continued, existing law requires the secretary to submit the provisions for approval utilizing specified voting procedures. If the secretary finds that a favorable vote has been given, the provisions remain in operation. If the secretary finds that a favorable vote has not been given, the secretary is required to declare the operation of the provisions suspended upon expiration of the then current marketing year. Existing law requires the provisions governing the commission to remain in effect until July 1, 1991, or until the end of any marketing year thereafter when the commission determines that targeted export assistance funds provided by the federal government have been permanently terminated.

This bill, instead, would require these provisions to become inoperative at the end of any marketing year in which targeted export assistance funds provided by the federal government have been permanently terminated, unless a referendum vote conducted among producers pursuant to the procedures described above approves the continuation of the commission. The bill would also change the standards for determining whether a favorable vote has been given on the continuation of these provisions.

(3) Existing law requires, in determining whether the commission is approved by producers pursuant to specified provisions of existing law governing implementation and voting procedures of the commission, that the vote of any nonprofit agricultural cooperative marketing association be considered as being the approval or rejection by the producers that are members of, or stockholders in, the association.

This bill, in addition, would require the vote of the nonprofit agricultural cooperative marketing association to be considered the approval or rejection by the producers that are members of, or stockholders in, the association in determining whether the commission is approved by producers during a referendum pursuant to specified provisions of existing law governing continuation or suspension and termination of the commission.

Ch. 290 (AB 2724) Cardenas. Judgments: exemptions.

Existing law specifies exemptions from the enforcement of a money judgment, including an exemption for \$2,000, for one designated payee, or \$3,000, for specified joint payees, held in a deposit account consisting of directly deposited payments authorized by the Social Security Administration and an exemption, subject to a specified claim procedure, for excess funds in that account that also consist of such directly deposited payments.

This bill would, on and after January 1, 2000, extend this exemption for social security payments to public benefits payments, as defined, but set the amount of the exemption at \$1,000, and \$1,500 for specified joint payees of public benefits payments.

Ch. 291 (SB 2093) Watson. Medi-Cal: managed care.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. Under existing law, Medi-Cal services may be provided to a beneficiary or eligible applicant by an individual provider, or through a prepaid managed health care plan, pilot project, or fee-for-service case management provider. Under existing law, each beneficiary or eligible applicant shall be provided with information as to health care options, including certain provider information. Additionally, existing law permits an applicant who chooses to enroll in a managed care plan, pilot project, or fee-for-services case management provider to indicate his or her choice of a primary care provider.

This bill would revise the existing provisions relating to provider information, including specifying the format in which the information shall be organized. The bill would also authorize an applicant who chooses to enroll in a managed care plan, pilot project, or fee-for-services case management provider, to indicate a choice of clinic as well as of a primary care provider.

Ch. 292 (SB 2134) Burton. Cigarette tax: foreign sale cigarettes.

The Cigarette and Tobacco Products Tax Law requires that an appropriate stamp be affixed to, or that an appropriate meter impression be made upon, each package of cigarettes prior to distribution.

This bill would modify these requirements to prohibit any stamp or meter impression from being affixed to, or made upon, packages of cigarettes unless those packages comply with federal requirements for labels, warnings, or other information to be placed on packages of cigarettes to be sold within the United States, and would require the State Board of Equalization to revoke the license issued to a distributor that is determined to be in violation of these stamping or metering requirements. By creating a new crime in the form of a misdemeanor for a violation of these requirements, this bill would establish a state-mandated local program.

This bill would also state the intent of the Legislature to align state law with federal policy and regulations pertaining to the labeling of cigarettes manufactured in the United States and distributed in California.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 293 (AB 1984) Miller. Recreational vehicles: manufacture: standards.

(1) Under the existing Mobilehomes-Manufactured Housing Act of 1980, the Department of Housing and Community Development is required to enforce various laws pertaining, among other things, to recreational vehicles. Under these provisions, recreational vehicles, as defined, are required to be constructed in accordance with specified standards of the American National Standards Institute (ANSI), subject to modifications made to those standards by the department.

This bill would delete the authority of the department to modify or enforce standards with respect to recreational vehicles, except that the department would be authorized to exercise oversight in the inspection of recreational vehicles or park trailers at a factory, as specified, if it determines that there is a compelling reason to do so. The bill would prohibit the manufacture, offering for sale, sale, rental, or lease of any recreational vehicle manufactured on or after January 1, 1999, unless the vehicle is constructed in accordance with a specified ANSI standard. The bill would require those vehicles to bear a label or an insignia, and would require vehicles manufactured prior to January 1, 1999, to bear a label or an insignia of approval, indicating the manufacturer's compliance with applicable standards.

The existing Mobilehome Parks Act prohibits the rental or leasing of a recreational vehicle within a mobilehome park or special occupancy park unless the vehicle bears a specified insignia or label.

This bill would prohibit a recreational vehicle that does not bear a label, an insignia, or an insignia of approval from occupying any lot in a special occupancy park unless the vehicle owner provides reasonable proof of compliance with a specified ANSI standard, and would make conforming changes.

Because a violation of these provisions would be a crime under existing provisions of law, this bill would impose a state-mandated local program.

(2) This bill would incorporate additional changes in Section 18025 of the Health and Safety Code, proposed by SB 1988, to be operative only if SB 1988 and this bill are both chaptered and become effective on or before January 1, 1999, and this bill is chaptered last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 294 (AB 726) Baugh. Sexually oriented businesses: local regulation.

Under existing law, the legislative body of any county or city may regulate, pursuant to a content neutral zoning ordinance, the time, place, and manner of operation of sexually oriented businesses, as specified. Existing law separately provides that nothing in specified provisions shall invalidate an ordinance of, or be construed to prohibit the adoption of an ordinance by, a county or city, if the ordinance directly regulates the exposure of the genitals or buttocks of or the breasts of any person who acts as a waiter, waitress, or entertainer, as specified.

Existing law further provides that nothing in the Penal Code shall invalidate an ordinance of, or be construed to prohibit the adoption of an ordinance by, a city or county, if that ordinance relates to any live acts, demonstrations, or exhibitions occurring in public places, places open to the public, or places open to public view and involve the exposure of specified body parts and if the ordinance prohibits an act or acts that are not expressly authorized or prohibited by existing law. Existing law exempts from these provisions any theater, concert hall, or similar establishment which is primarily devoted to theatrical performances.

This bill would declare that its provisions shall not be interpreted to require the adoption of any ordinance, but is instead intended to be declaratory of existing law, and that it shall not be construed to preempt the legislative body of any city or county from regulating an adult or sexually oriented business, or similar establishment in the manner, and to the extent permitted by, the United States Constitution and the California Constitution. The bill also would specify that these provisions shall not be construed to apply to any adult or sexually oriented business that has been adjudicated by a court of competent jurisdiction to be, or by action of a local body allowing the business to operate on or before July 1, 1998, as, a theater, concert hall, or similar establishment primarily devoted to theatrical performances.

This bill would make findings and declarations relating to the regulation of sexually oriented businesses including that any city, county, or city and county may prohibit live nude performances in adult or sexually oriented businesses, consistent with the legislative body's authority to regulate these businesses to the extent permitted by the United States and California Constitutions.

Ch. 295 (AB 921) Wayne. Recycled water.

Existing law prohibits a person from operating a public water system unless he or she first submits an application to the State Department of Health Services and receives a permit issued by the department, as specified.

Existing law also prohibits a person who operates a public water system from modifying, adding to, or changing his or her source of supply or method of treatment, or from changing his or her distribution system as authorized by a valid existing permit issued to him or her by the department, unless the person first submits an application to the department and receives an amended permit authorizing the modification, addition, or change in the person's source of supply or method of treatment.

This bill, in addition, would prohibit the department from issuing a permit to a public water system or from amending a valid existing permit for the use of a reservoir as a source of supply that is directly augmented with recycled water, as specified, unless specified requirements imposed on the department are satisfied.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 296 (AB 1640) Migden. Public employees: retirement benefits.

The Public Employees' Retirement Law provides a \$600 lump-sum death benefit payment to the estate of a retired school member and a \$2,000 lump-sum death benefit payment to the estate of a retired state member.

This bill would authorize contracting agencies and school employers to elect to provide a \$2,000, \$3,000, \$4,000, or \$5,000 lump-sum death benefit for their retired employees and would make related changes in other provisions.

Ch. 297 (AB 1707) Wildman. Body armor.

Existing law allows any person in California to own, possess, and use body armor, without restriction.

This bill would make it a felony for a person convicted of a violent felony, as defined, to own, possess, or use body armor without first petitioning the chief of police or county sheriff with jurisdiction over the area in which the body armor is to be used for an official exception, to be granted on specified grounds. The bill would allow exceptions to be granted where a petitioner's employment, livelihood, or safety depends on the ability to possess and use body armor. Because this bill creates a new crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 298 (AB 1741) Scott. Mutual water companies.

Existing law, known as the General Corporation Law, provides that certain corporate actions, including actions taken by mutual water companies, may only be approved by the affirmative vote of a specified number of shares entitled to vote and that certain corporate actions, including actions taken by mutual water companies, may only be taken when a quorum, comprised of a specified number of the shares entitled to vote, is present at a meeting of the shareholders.

Existing law governing mutual water companies, in particular, requires that, under certain circumstances, the stock of a water company shall become appurtenant to real property within the service area of the mutual water company.

This bill would provide that, until July 1, 2001, certain shares of stock that were issued by a mutual water company formed on or before May 14, 1983, that have not been rendered appurtenant to land within the mutual water company's service area, that remain on the company's share registry, and whose owners cannot be located, shall be deemed canceled by operation of law if the mutual water company satisfies specified prior notification requirements and the holders of those shares fail to act to prevent that cancellation, as specified.

Ch. 299 (AB 2181) Firestone. Solid waste: tires.

(1) The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. Existing law imposes civil and criminal penalties for violation of specified provisions pertaining to waste tires.

This bill would impose additional criminal penalties for violations of those provisions, thereby imposing a state-mandated local program by creating new crimes. The bill would also modify the amount of the civil penalties that may be imposed for certain violations and would allow a city, county, or city and county, to request the board to be designated to exercise the board's enforcement authority under those provisions.

(2) This bill would incorporate additional changes in Sections 42825, 42835, and 42850 of the Public Resources Code, proposed by AB 228, to be operative only if AB 228 and this bill are both chaptered and become effective January 1, 1999, and this bill is chaptered last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 300 (AB 2193) Granlund. Outdoor advertising: definitions.

The Outdoor Advertising Act regulates the placement of advertising adjacent to and within specified distances of highways that are part of the national system of interstate and defense highways and federal-aid highways. The act excludes official notices issued by any court or public body or officer from the definitions of advertising structure and sign.

This bill, in addition, would revise the act to exclude from the definition of sign any sign erected near a city or county boundary that contains the name of that city or county and the names of, or any other information regarding, civic, fraternal, or religious organizations located within that city or county.

Ch. 301 (AB 2719) Gallegos. Medicine: accusations.

Under existing law regarding administrative adjudication, a hearing to determine whether a license granted to certain licensees, including physicians and surgeons, shall be revoked, suspended, limited, or conditioned is initiated by filing an accusation. An accusation is a written statement of charges that sets forth in ordinary and concise language the acts or omissions with which a licensee is charged. The Medical Board of California enforces actions involving physician and surgeon licensure.

This bill would require an accusation against a physician and surgeon to be filed with the board within 3 years after the board discovers the act or omission alleged as the ground for disciplinary action, or within 7 years after the act or omission alleged as the ground for disciplinary action occurs, whichever occurs first. This statute of limitation would not apply to an accusation based on the procurement of a license by fraud or misrepresentation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 302 (AB 2734) Pacheco. Criminal procedure: territorial jurisdiction.

Under existing law, territorial jurisdiction for an offense committed in part in one jurisdictional territory and in part in another jurisdictional territory is vested in any competent court within either jurisdictional territory.

This bill would vest territorial jurisdiction in cases involving multiple specified offenses that occur in more than one territorial jurisdiction, in any jurisdiction where at least one offense occurred, if the defendant and the victim are the same for all the offenses.

Ch. 303 (AB 2748) Mazzoni. Teaching credentials.

Existing law requires the Commission on Teacher Credentialing to establish professional standards, assessments, and examinations for entry and advancement in the education profession and to establish standards for the issuance and renewal of credentials, certificates, and permits. Under existing related regulations, a holder of an Early Childhood Special Education Certificate is authorized to provide educational services to children from birth to prekindergarten who are eligible for early intervention services.

Existing law authorizes the commission to issue credentials for teaching specialties, including special education, to applicants meeting certain standards. Existing law requires the commission to develop a reading instruction competency test to measure reading instruction capability.

This bill would require applicants for specialist teaching credentials in special education, except applicants for Early Childhood Special Education Certificates, to demonstrate passage of the reading competency test.

Ch. 304 (AB 2775) Committee on Budget. Claims against the state: appropriation.

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate \$802,980.35 from various funds and accounts of the state, according to a specified schedule, to the Secretary of the State Board of Control to pay claims accepted by the State Board of Control.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 305 (SB 1539) Solis. Controlled substances: iodine: red phosphorous.

Existing law imposes specified requirements upon any manufacturer, wholesaler, retailer, or other person in this state who sells to any person or buys any quantity of specified chemical substances, including iodine and red phosphorous. A violation of any of these requirements is a misdemeanor.

This bill would impose a new requirement, a violation of which is a misdemeanor, upon these persons by providing that, except as specified, no manufacturer, wholesaler, retailer, or other person shall sell to any person or buy more than 8 ounces of iodine or 4 ounces of red phosphorous in any 30-day period. The bill would exempt from this requirement any sale of red phosphorous to specified individuals or businesses. By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 306 (SB 1630) Rosenthal. Residential care facilities for the elderly.

Existing law, the California Residential Care Facilities for the Elderly Act, provides for the licensure and regulation of residential care facilities for the elderly by the State Department of Social Services. Under existing law, a violation of any of these provisions is punishable as a misdemeanor.

Existing law requires that every substantiated complaint or substantiated citation against a residential care facility for the elderly be posted by the facility in a conspicuous place within the facility for a period of 6 months.

This bill would instead require each residential care facility for the elderly to place in a conspicuous place copies of all licensing reports issued by the department within the preceding 12 months, and all licensing reports issued by the department resulting from the most recent annual visit of the department.

Existing law further requires a facility, during the admission process, to inform the designated responsible 3rd party in writing that substantiated complaints and substantiated citations against the facility are posted for 6 months and kept on file for public access and review, and that copies of results of department investigations and surveys of the facility are available from the appropriate district office of the department.

This bill would instead require a facility to inform the resident and the resident's responsible person, as defined, in writing that licensing reports are available for review at the facility, and that copies of licensing reports and other documents pertaining to the facility are available from the appropriate district office.

The bill would also require the department to develop and maintain at each district office a file for each facility in the district containing designated documents held by the department regarding that facility to be available immediately upon the request of any consumer.

Since the violation of the provisions applicable to residential care facilities for the elderly is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 307 (SB 1849) Alpert. California State University: capital outlay.

Existing law, the California State University Contract Law, authorizes the Trustees of the California State University to enter into an agreement with a contractor for both the design and construction of a project pursuant to that law.

This bill would, instead, permit the trustee to enter into an agreement to provide all or significant portions of the design services and construction of a project, and would require the contractor to design the project pursuant to the scope of services set forth in the request for proposals.

Existing law authorizes the trustees to award annual contracts that do not exceed \$1,000,000 for repair or other repetitive work to be done according to unit prices, as defined to exclude design and contract drawings.

This bill would delete this definition, and would also permit annual contracts for renovation or modification to be performed according to unit prices. The bill would authorize the trustees to award annual contracts that do not exceed \$3,000,000.

Existing law requires the contracts to be awarded to the lowest responsible bidder based on plans and specifications for typical work.

This bill would, instead, require that the contracts be awarded to the lowest responsible bidder based primarily on plans and specifications for typical work.

Existing law precludes annual contracts for new construction under this authority.

This bill would delete the prohibition against annual contracts for new construction under this authority, and would, instead, preclude annual contracts for capital outlay projects, pursuant to this authority where the cost of the project exceeds \$250,000 or the limit on minor capital outlay projects as determined in the annual Budget Act.

Ch. 308 (SB 1936) Johnston. Law enforcement: regional transit and public library services.

Existing law, with regard to a public transportation system, as defined, specifies prohibitions against, among other things, the evasion of the payment of fares. Existing law additionally authorizes a local or regional transit agency or joint powers agency operating a rail service pursuant to specified provisions in the Public Utilities Code to authorize by contract designated persons as conductors performing fare inspection duties who are employed by a railroad corporation that operates public rail commuter transit services for that agency to act as its agent in the enforcement of those laws specified above with regard to the evasion of the payment of fares if they complete specified training that shall be provided by the authorizing agency. Existing law also provides that the employees acting as agents pursuant to this provision are public officers, not peace officers, have no authority to carry firearms or any other weapons, and may not exercise the powers of arrest of a peace officer while performing the duties authorized in these provisions.

This bill would specify that the governing board of the Altamont Commuter Express Authority, a joint powers agency, may contract with designated persons to act as its agents in the enforcement of specified provisions of law relating to the operation of a public transportation system.

This bill would state findings and declaration of the Legislature that a special law is necessary and that a general law cannot be made applicable.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 309 (SB 2111) Costa. Non-RCRA hazardous waste: silver.

(1) Existing law defines the term "non-RCRA hazardous waste" as meaning hazardous waste that is regulated by the state, other than hazardous waste subject to the federal Resource Conservation and Recovery Act of 1976 (RCRA). Under existing law, the Department of Toxic Substances Control is required to develop and adopt by regulation criteria and guidelines for the identification of hazardous waste. A violation of the regulations governing hazardous waste is a crime.

Existing law exempts, from the requirement for obtaining a hazardous waste facilities permit, a generator whose hazardous waste treatment activities are limited to the treatment of effluent hazardous waste from the processing of silver halide-based imaging products if the effluent is a hazardous waste solely due to its silver content, and the generator complies with other specified requirements to qualify for that exemption. Existing law, the Wright-Polanco-Lempert Hazardous Waste Treatment Permit Reform Act of 1992, deems a generator who conducts specified treatment activities, including processing more than 500 gallons per month of effluent hazardous waste from silver halide-based imaging products, to be conditionally authorized to operate without obtaining a hazardous waste facilities permit or other grant of authorization, and also conditionally exempts from hazardous waste facilities permit requirements and corrective action requirements a generator who processes less than specified amounts of effluent hazardous waste from silver halide-based imaging products.

This bill would repeal the exemption for generators treating effluent from silver halide-based imaging products and would delete the processing of silver halide effluent from the conditional authorization and conditional exemption provisions. The bill would instead require wastes containing silver or silver compounds that are hazardous waste under RCRA solely due to the presence of silver in these wastes to be subject to regulation solely to the extent these wastes are regulated under the federal act, except as specified with regard to hazardous waste treatment of wastes that are not photoimaging solutions and wastewaters. The bill would exempt wastes containing silver or silver compounds from regulation under the hazardous waste control laws if these wastes are not subject to regulation as RCRA hazardous waste and the wastes would otherwise be subject to the hazardous waste control laws solely due to the presence of silver.

The bill would require the department to amend its regulations to conform to the bill's requirements and would provide that until the department amends these regulations, the applicable federal regulations pertaining to the regulation of wastes containing silver or silver compounds would be deemed to be the regulations of the department, except as specified. Since a violation of these regulations would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 310 (AB 2780) Gallegos. Health services: Budget Act implementation.

Existing law permits certain state agencies to make advance payments to community-based nonprofit agencies with which they have contracted, in accordance with certain limitations.

This bill would add to those agencies permitted to make these advance payments, the State Department of Developmental Services.

Existing law provides for the State Department of Developmental Services to serve as the lead agency responsible for administration and coordination of the statewide system of services for the enhancement of the development of children who have disabilities or who are at risk of having disabilities and to minimize the potential for delays in their development under the California Early Intervention Services Act.

This bill would revise the responsibilities of the State Department of Developmental Services under this program.

Existing law provides for the provision of services to persons with developmental disabilities by regional centers pursuant to contracts with the State Department of Developmental Services.

This bill would revise procedures for ensuring regional center compliance with contracts with the State Department of Developmental Services.

The bill would also revise regional center staffing requirements and procedures for screening those children.

Existing law requires the State Department of Developmental Services to contract for clients' rights advocacy services with contractors meeting specified requirements.

This bill would permit the State Department of Developmental Services to contract with the Organization of Area Boards for the purpose of providing clients' rights advocacy services for persons with developmental disabilities who reside in developmental centers and state hospitals.

Existing law requires the Director of Developmental Services, within 30 days after the end of each calendar quarter, to publish a report of the financial status of all regional centers and their operations.

This bill would, instead, require this report to be published by December 31 of each year, and would require the report to contain, at a minimum, specified information.

Existing law requires the State Department of Developmental Services to adopt reimbursement rates for residential services purchased by regional centers.

Existing law also provides, pursuant to an Alternative Residential Model (ARM), that the State Department of Developmental Services establish separate reimbursement

rates for residential services to persons with developmental disabilities residing in community care facilities, in accordance with specified requirements.

Existing law also requires the department to establish reimbursement rates, in accordance with specified requirements, for regional center services obtained from community-based day programs.

This bill would enact specified rate increase requirements for residential facility and community-based day program services.

The bill would enact competency training and testing requirements that must be met by direct care staff of these facilities.

Existing law permits regional centers to purchase in-home respite services in order to obtain specified services for a client living in his or her own home. The Director of Developmental Services is required to establish reimbursement rates for these services.

This bill would require, for the 1998-99 fiscal year, that reimbursement rates for these services be increased based on the amount appropriated for this purpose in the Budget Act of 1998, with the amount of this rate increase to be used for increased reimbursement to in-home respite care services workers.

This bill would establish procedures for fair hearings regarding services provided for individuals with developmental disabilities.

This bill would authorize the implementation of a mediation procedure as an alternative to the fair hearing process, and would authorize parties to the proceeding to accept any decision arrived at pursuant to the mediation procedure or to request a fair hearing, if the party is not satisfied with the decision reached through the mediation process.

The bill would authorize the Director of Health Services or his or her representative to make decisions through the mediation process with respect to services provided through the federal medicaid program.

Existing law requires that before a health care practitioner who has ultimate authority over the care or primary diagnosis of a patient may deliver health care via telemedicine, the practitioner shall obtain verbal and written informed consent from the patient or the patient's legal representative.

This bill would revise elements of the definition of telemedicine.

Existing law requires that the Health and Welfare Agency establish an interdepartmental Task Force on Rural Health, to coordinate rural health policy development and program operations and to develop a strategic plan for rural health. The task force is required to be composed, at a minimum, of specified state officials.

This bill would add the Executive Director of the Managed Risk Medical Insurance Board to those required to be on the task force.

Existing law requires, until July 1, 1998, the Rural Health Policy Council, through the Office of Statewide Health Planning and Development, to develop and administer a program of grants for projects located in rural areas.

This bill would extend this grant program until July 1, 1999, and would add the Managed Risk Medical Insurance Board to the list of entities eligible for grants under the program.

Existing law requires this council to promote a strong working relationship between designated entities and other offices of rural health and to develop health initiatives and maximize the use of existing resources without duplicating effort.

This bill would require the council to adopt an annual workplan to describe how the office shall meet specific, measurable performance objectives designed to improve access to and the quality of health care in rural areas. The bill would require the office to provide to the Legislature designated annual reports.

Existing law creates a health program under the jurisdiction of the State Department of Health Services for seasonal agricultural and migratory workers.

This bill would establish, in the department, the Seasonal Agricultural and Migratory Workers Advisory Committee, to be composed as specified, in order to advise the department on the level of resources, priorities, criteria, and guidelines necessary to implement this program.

Existing law provides for the licensure and regulation of health facilities, including acute care hospitals.

This bill would require that all general acute care hospitals subject to licensing shall maintain a medical records system that meets certain standards.

Existing law requires the State Department of Health Services, prior to the initial licensure or renewal of any person or persons to operate or manage an intermediate care facility/developmentally disabled habilitative, to secure from an appropriate law enforcement agency a criminal record to determine whether the applicant, facility administrator or manager, any direct care staff, or any other adult living in the same location, has ever been convicted of a crime other than a minor traffic violation.

This bill would also apply this requirement when a facility hires any direct care staff. It would also apply this requirement to an intermediate care facility/developmentally disabled nursing and an intermediate care facility/developmentally disabled, other than a state operated intermediate care facility/developmentally disabled.

Existing law also requires that if it is found that the applicant, facility administrator or manager, any direct care staff, or any other adult living in the same location, has been convicted of a crime, other than a minor traffic violation, the application or reapplication shall be denied, unless otherwise approved in accordance with existing law.

This bill would modify the grounds for licensure denial under these provisions.

Since violation of health facility licensure provisions is a crime, this bill would, by creating a new crime, constitute a state-mandated local program.

Existing law provides for various housing programs.

This bill would enact the California Statewide Supportive Housing Initiative Act, to be administered by the State Department of Mental Health, with the advice of the Supportive Housing Program Council which would be created by the bill. Under this program, the State Department of Mental Health would award grants to local public or private nonprofit agencies for housing and support services to low-income individuals with special needs.

Existing law sets forth procedures under which a local health department, as defined, may qualify for state financial assistance. Under these provisions, allocations, including a basic allotment, are made to administrative bodies of qualifying local health departments in a specified manner.

This bill would modify these provisions to refer to local health jurisdictions, as defined, rather than local health departments and would change the formula used to make basic allotments.

The bill would expand, commencing with the 1998–99 fiscal year, the purposes for which funds under these provisions may be appropriated to include supplementing existing levels of services related to communicable disease control activities and community and public health surveillance activities.

Existing law permits the State Department of Health Services and a county with a population of less than 40,000 to enter into a contract under which the department will operate a local public health service in the county.

This bill would increase the population of a county to which this authority would apply to a county with a population of less than 50,000.

Existing law, effective until January 1, 1999, permits any county that would have been eligible, as of January 1, 1988, to enter into a contract with the State Department of Health Services for the operation of a local public health service, to remain eligible to enter into such a contract notwithstanding an increase in population in excess of 40,000.

This bill would indefinitely extend this provision, and would apply this to an eligible county notwithstanding an increase in total population beyond the 50,000 limit.

Existing law, effective until January 1, 1999, requires that a fee, in addition to other fees, of up to \$2, be imposed on certified copies of birth or death records, marriage records, and marital dissolution records, for allocation to specified accounts for modernization and improvement of public record systems and collection of the data.

This bill would extend these provisions until January 1, 2002.

Existing law establishes the Comprehensive Perinatal Outreach Program, under which a county may contract with the State Department of Health Services to provide perinatal program coordination, patient advocacy, and expanded access services for, among others, low-income and postpartum women.

This bill would provide that funds appropriated for purposes of this program for a fiscal year shall be available for expenditure without regard to fiscal year.

Existing law requires the State Department of Health Services, pursuant to the California Children's Services Program to administer a system to screen infants at high risk for deafness and a system to provide followup and assessment services, where necessary.

This bill would require the department to establish the Newborn and Infant Hearing Screening, Tracking, and Intervention Act.

The bill would specify the duties of the department under this program and would make conforming changes to link this program with the California Children's Services Program.

Existing law requires the State Department of Health Services to establish a genetic disease unit to coordinate all programs of the department in the area of genetic disease and provides procedures for the adoption of regulations for these purposes deemed to be an emergency.

This bill would delete the provisions related to emergency regulations for purposes of those provisions.

Existing law establishes the Healthy Families Program, administered by the Managed Risk Medical Insurance Board, to arrange for the provision of health services to eligible children. Coverage is required to be affordable using a purchasing pool model, issuance of insurance purchasing credits, or other appropriate means, and to be provided by a broad range of health plans, including insurers, health care service plans, county organized health systems, health care authorities, and local initiatives, including medical, dental, and vision services.

Existing law provides for eligibility of persons older than 12 months, and less than 19 years of age, who meet other criteria, including having a gross annual household income equal to or less than 200% of the federal poverty level and meeting citizenship and immigration requirements under the Healthy Families Program.

Existing law continuously appropriates money from the Healthy Families Fund for the purposes of implementation of the Healthy Families Program.

Existing law requires the State Department of Health Services to make use of the federal option to provide for one month of Medi-Cal eligibility at no share of cost for any child under 19 years of age who is found to be ineligible to receive Medi-Cal benefits without a share of cost upon a redetermination of eligibility.

This bill would repeal the requirement that the State Department of Health Services provide for the extended eligibility of children who, upon redetermination of eligibility, have been determined not to be eligible for Medi-Cal benefits without a share of cost, and would establish the Healthy Families Bridge Benefits Program, to provide for a month of eligibility for children who, after having been eligible for Medi-Cal benefits at no share of cost has been redetermined to be eligible for Medi-Cal benefits subject to a share of cost requirement and whose family income does not exceed 200% of the federal poverty level and who meets other requirements, and would provide for the administration of the program by the Managed Risk Medical Insurance Board. The bill would require that the month of eligibility benefits shall only be made available through a Medi-Cal provider or under a Medi-Cal managed care arrangement or contract. The bill would specify that the program shall be funded by federal financial participation, and, by applying continuously appropriated money from the Healthy Families Fund for the purposes of the Healthy Families Bridge Benefits Program, this bill would result in an appropriation.

Existing law requires various reports in connection with the Healthy Families Program.

The bill would also require the Department of Alcohol and Drug Programs, in cooperation with the board, to review needs and collect data concerning adolescent alcohol and drug treatment and would require the board to collect and analyze related data.

Existing law requires the State Department of Health Services, in conjunction with the board, to conduct an outreach and education campaign relative to the Medi-Cal program and the Healthy Families Program.

This bill would require the plan to be submitted to the Legislature annually, and would require it to address certain issues. The bill would also authorize the department, in conjunction with the board, to conduct pilot outreach and education projects.

Existing law provides for the provision of mental health services to eligible individuals through state hospitals under the authority of the State Department of Mental Health.

This bill would require the State Department of Mental Health to develop policies and procedures at each state hospital to notify Members of the Legislature who represent the area in which the hospital is located, local law enforcement and designated local government entities in the event of a patient escape or walkaway.

Existing law provides that the State Department of Mental Health has jurisdiction over Metropolitan State Hospital, near the City of Norwalk in Los Angeles County.

This bill would require the Metropolitan State Hospital to, at a minimum, collect data on the use of medications, and restraint and seclusion, including the number and duration of restraint and seclusion incidents, in the youth program, and to provide the information to the Deputy Director of Long Term Care Services of the State Department of Mental Health and the appropriate policy committees and the fiscal committees of the Legislature, on a quarterly basis.

This bill would require that the Metropolitan State Hospital Youth Program's admission policy to require the referring agency to document all placement attempts prior to admission and to document all attempts to place a child during the discharge planning process.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law provides for the California Work Opportunity and Responsibility to Kids (CalWORKs) program, under which each county provides cash assistance and other benefits to qualified low-income families.

Under existing law, CalWORKs recipients are eligible for Medi-Cal benefits. In addition, certain CalWORKs recipients whose aid is discontinued are eligible to receive Medi-Cal benefits for a limited transitional period.

This bill would, effective October 1, 1998, provide for an additional 12-month period of eligibility for transitional Medi-Cal benefits.

This bill would require that whenever aid to an individual or family is discontinued under the CalWORKs program for any reason other than fraud, the State Department of Social Services shall include, in the notice of termination of aid, a brief summary of the requirements for obtaining this transitional Medi-Cal coverage, as well as a form that the individual or family may fill out and return to request transitional Medi-Cal benefits.

Existing law requires the State Department of Health Services to extend eligibility for health care services pursuant to the Medi-Cal program to all recipients of aid under the CalWORKs program, to the extent federal participation is available, and authorizes the department to adopt emergency regulations to implement these provisions.

This bill would recast these provisions to require, to the extent federal financial participation is available, that Medi-Cal benefits be provided to individuals eligible for services under designated federal law and that the department exercise its options under federal law to adopt less restrictive income and resource eligibility standards and methodologies to allow all recipients under the CalWORKs program to be eligible for Medi-Cal benefits. The bill would require the department to expand eligibility for Medi-Cal through specified activities and would apply this provision retroactively to January 1, 1998.

Existing law provides procedures under which a Medi-Cal beneficiary, as a condition of coverage for Medi-Cal benefits, obtains benefits by receiving a monthly Medi-Cal card, which may be used to obtain services from individual providers, or by enrolling in a prepaid managed care health plan, pilot program, or fee-for-service case management provider.

This bill would require that whenever a county welfare department notifies a public assistance recipient or Medi-Cal beneficiary that the recipient or beneficiary is losing Medi-Cal eligibility, the county shall include, in the notice to the recipient or beneficiary, notification that the loss of eligibility shall also result in the recipient's or beneficiary's disenrollment from Medi-Cal managed care health or dental plans, if enrolled. The bill would also require, operative 12 months after the effective date of this bill, that whenever the State Department of Health Services or the county welfare department processes a change in a public assistance recipient's or Medi-Cal beneficiary's residence or aid code

that will result in the recipient's or beneficiary's disenrollment from the managed care health or dental plan in which they are currently enrolled, a written notice shall be given to the recipient or beneficiary.

This bill would require the department, in any county in which certain conditions exist, to conduct a one-time survey aimed at determining why Medi-Cal beneficiaries fail to enroll in managed care plans. It would require the department to submit the survey results to the appropriate policy and budget committees of the Legislature, and to implement a plan of correction.

This bill would establish in the State Treasury the Local Initiative Traditional Provider Loan Assistance Account to be continuously appropriated to the department to establish a pilot project to provide collateral to guarantee loans to traditional providers who serve large numbers of Medi-Cal recipients and who are under contract with the L.A. Care Health Plan to serve Medi-Cal recipients.

Existing law requires any Medi-Cal provider of durable medical equipment or incontinence supplies to provide a bond of not less than \$25,000 to the State Department of Health Services.

This bill would revise that requirement to apply to providers of incontinence supplies and medical supplies, and would impose specific bond requirements for providers of durable medical equipment and providers of home health agency services as a condition of participation in the Medi-Cal program.

Existing law, until January 1, 1999, provides for the provision of drugs that are reimbursed through the Medi-Cal program without prior authorization when they are on an approved list of contract drugs.

This bill would extend until January 1, 2000 provisions for the use of a list of contract drugs for purposes of the Medi-Cal program.

Existing law, until January 1, 1999, authorizes the State Department of Health Services to enter into contracts with manufacturers of single-source and multiple-source drugs under the Medi-Cal program, and specifies procedures for the implementation of that authority.

This bill would extend that authority to January 1, 2000.

Existing law authorizes the Director of Health Services, as well as the Attorney General, and other specified officials, to bring an action to recover the reasonable value of benefits provided or that will be provided to a Medi-Cal recipient against a 3rd party, including an insurance carrier, because of any injury for which the 3rd party is liable.

Existing law contains procedures governing these actions, as well as provisions pertaining to the director's right to claim reimbursement when the claim against a 3rd party is brought by another person, including the recipient.

This bill would define the term reasonable value of benefits. It would also provide for the use of this term in provisions relating to the director's right to reimbursement in an action brought by the recipient.

Existing law authorizes local governmental agencies to participate in the Administrative Claiming process for the administration of claiming funds under the Medi-Cal program.

This bill would include local educational consortia, as defined, among those entities permitted to participate in the Administrative Claiming process, through which each local educational consortium would be required to contract with the State Department of Health Services to participate in the Administrative Claiming process as a condition of participation in the Medi-Cal program. A local educational consortium would be responsible for the local educational agencies in its service region. The bill would require each local educational consortium to perform administrative and training functions for local educational agencies.

Existing law requires that each local governmental agency participating in the Medi-Cal Administrative Claiming program or the Targeted Case Management program to contribute to the State Department of Health Services a portion of the local agency's local fund that has been made available due to those programs.

This bill would limit that requirement to claims approved for the 1994-95 to 1997-98 fiscal years, inclusive.

Existing law, until January 1, 2001, authorizes the provision of health care services under the Medi-Cal Program through telemedicine.

This bill would establish minimum standards for audio and visual telemedicine systems used for that purpose, and would require the department to report to the appropriate committees of the Legislature by January 1, 2000, on the application of telemedicine to provide various types of care.

Under existing law, the State Department of Health Services is required to implement a pilot program for the establishment of pilot project sites around the state, for the purpose of providing long-term care to elderly and disabled adults.

This bill would pursuant to specified findings and declarations, authorize the department, beginning with the 1998–99 fiscal year, contingent on appropriation of funds by the Budget Act, to contract with a nonprofit entity incorporated in California to serve as the center for long-term care integration, which would facilitate the development of community-based local organizing groups (LOGs), through a public-private partnership. The bill would specify the responsibilities of the department and the center in this regard. The bill would also require the department to administer grants to LOGs for purposes of implementing long-term care pilot projects, for the planning phase of the project, the development phase, or both, in accordance with specified criteria.

Under existing law, the Medi-Cal program provides for a special methodology of reimbursement of disproportionate share hospitals for the provision of inpatient hospital services. Existing law generally defines a disproportionate share hospital as a hospital that has proportionately higher costs, volume, or services related to the provision of services to Medi-Cal or other low-income patients than the statewide average.

Under the Medi-Cal program, the department is required to make supplemental payments to certain disproportionate share hospitals based on specified criteria. Payments are made from defined intergovernmental transfers that are paid into the Medi-Cal Inpatient Payment Adjustment Fund, as required, with this fund being continuously appropriated for specified purposes. Existing law authorizes moneys in the fund to be used for transfers to the Health Care Deposit Fund, a continuously appropriated fund, in the amount of \$154,757,690 for the 1997-98 fiscal year and each fiscal year thereafter.

This bill would authorize, instead, transfers to the Health Care Deposit Fund in the amount of \$114,757,690 for the 1998–99 fiscal year and each fiscal year thereafter. By changing the amount of moneys transferred for purposes of the continuously appropriated Health Care Deposit Fund from the continuously appropriated Inpatient Payment Adjustment Fund, the bill would result in an appropriation.

Existing law provides for the County Medical Services Program Governing Board and requires the board to carry out various duties relating to the provision of health services at the county level.

This bill would authorize the board to contract with the State Department of Health Services for interfund transfers and the joint or shared use of the fiscal intermediary to provide for the operation of the Healthy Families Program and the Children's Treatment Program. This authorization would expire on June 30, 1999.

Existing law permits local education agencies to obtain Medi-Cal reimbursement for certain health care services.

This bill would appropriate \$2,600,000 from the Proposition 98 Reversion Fund to a consortium of county offices of education, on a one-time basis, for 3-year grants, beginning with the 1998–99 fiscal year, for the purpose of supporting technical assistance and focused group training to teach school district personnel how to maximize reimbursements of federal funds for Medi-Cal services and case management. It would also create a technical advisory committee for this purpose.

This bill would authorize the State Department of Health Services to adopt emergency regulations to implement provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 311 (SB 933) M. Thompson. Foster care.

Existing law provides that each person between the ages of 6 and 18 years, not otherwise exempted, is subject to compulsory full-time education and shall attend the public full-time day school or continuation school for the full time designated as the length of the schoolday by the governing board of the school district in which the residency of either the parent or legal guardian is located. Existing law provides that a pupil shall be deemed to have complied with the residency requirements for school attendance in a school district if the pupil is placed within the boundaries of that school district in a regularly established licensed children's institution, or a licensed foster home, or a family home pursuant to a legal commitment or placement.

This bill would impose a state-mandated local program by requiring every county office of education to make available to agencies that place children in licensed children's institutions information on educational options for children residing in licensed children's institutions within its jurisdiction. The bill would require every agency that places a child in a licensed children's institution to notify the local educational agency at the time a pupil is placed. The bill would impose a state-mandated local program by requiring a local educational agency to invite at least one noneducational agency representative that has placement responsibility for a pupil residing in a licensed children's institution to collaborate with the local educational agency in the monitoring of a placement in a nonpublic, nonsectarian school or agency.

Existing law provides that whenever a pupil transfers from one school district to another or to a private school, or transfers from a private school to a school district within the state, the pupil's permanent record shall be transferred by the former district or private school upon a request from the district or private school where the pupil intends to enroll.

This bill would impose a state-mandated local program by requiring a local educational agency with which a pupil in foster care has been most recently enrolled that has been informed of the next educational placement of the pupil to cooperate with the county social service or probation department to, upon request, ensure that the pupil's educational record, and to ensure that educational background information for the pupil's health and educational record, is transferred to the receiving local educational agency and the foster children services program in a timely manner.

Existing law requires the offices of county superintendents of schools to undertake various duties with regard to countywide and local plans submitted to the Superintendent of Public Instruction.

This bill would also require every county office, for each special education local plan area located in its jurisdiction that has completed a revised local plan, to make available a copy of the annual service plan adopted at a public hearing held by the special education local plan area, thereby imposing a state-mandated local program.

Existing law requires that each local plan submitted by a special education local plan area to the Superintendent of Public Instruction contain certain information, including a description of services to be provided by each school district and county office of education.

This bill would require including in the local plan a description of the process being utilized to oversee and evaluate placements in nonpublic, nonsectarian schools or agencies and the method for ensuring that all requirements of each pupil's individualized education program are being met.

Existing law requires the development of a master contract for nonpublic, nonsectarian school or agency services.

This bill would require the master contract to include a description of the process being utilized by the school district, county office of education, or special education local plan area to oversee and evaluate placements in nonpublic, nonsectarian schools. The bill would require the State Department of Education, as part of its certification process and complaint investigation process for nonpublic, nonsectarian schools or agencies, to provide advance notice of certification reviews and complaint investigations to, include in the process of reviewing and investigating, and transmit final reports to, districts, special education local plan areas, and county offices that work with the nonpublic,

nonsectarian school or agency, and to provide advance notice of certification review to nonpublic, nonsectarian schools and agencies under review.

Existing law adopts the Interstate Compact for Children to cooperate in the interstate placement of children and enters California into the compact with all other jurisdictions joining the compact.

This bill would require the State Department of Social Services or its designee to investigate any threat to the health and safety of children placed by a California county social services agency or probation department pursuant to the compact. The bill would require the department to require certified out-of-state group homes to comply with California reporting requirements for all children. The bill would authorize the Compact Administrator to suspend temporarily new placements in out-of-state group homes pending completion of certain investigations.

Existing law imposes various requirements that are required to be met as a condition of licensing of community care facilities, including group homes, and provides for the licensure of those entities by the State Department of Social Services.

This bill would require group homes to operate with a provisional license during the first 12 months of operation, and would require the department to take certain actions during this period of operation. It would permit the department, under certain circumstances, to extend the provisional license for up to an additional 6 months.

This bill would impose the additional requirement that prior to becoming a member of a board of directors of a group home persons sign a statement that they understand their duties and obligations in that capacity, as a condition of licensing the group home. The bill would require a group home provider to schedule quarterly meetings and report the minutes of the meeting to the State Department of Social Services. The bill would require the board of directors to discuss licensing issues.

This bill would require the department to identify and distribute to all group home providers detailed information designed to educate members of the board of directors of the group homes on their roles and responsibilities and would specify that, as a condition to a group home receiving a payment rate, the board of directors of the group home shall sign a form indicating they have read and understood the requirements. The bill would require a board of directors of any group home, in order to receive a payment rate, to schedule and conduct meetings annually to review documents determined by the department, including, but not limited to, licensing information, and to adopt regulations requiring the board of directors of a group home to make timely submissions of the minutes of their meetings, to appropriate agencies.

The bill would require any corporation that applies for licensure as a community care facility to list the facilities that any member of the board of directors, executive director, or executive officer, of the corporation, or executive director, has been licensed to operate, been employed in, or served as a member of the board of directors, executive officer, or an officer, and would prohibit the department from issuing a license to any corporate applicant that has such a member who is not eligible to work at a community care facility, and would permit the department to revoke the license of any corporation with a director, executive officer, or officer, who is not eligible to work in a community care facility, subject to giving the applicant notice and an opportunity to remove that individual.

Existing law requires that before issuing a license or special permit to any person to operate or manage a community care facility the State Department of Social Services determine if any person or any director or officer of an applicant corporation has ever been convicted of certain crimes and requires the department to deny the application in the case of a conviction of one or more of those crimes.

This bill would require applicants to submit a second set of fingerprints for purposes of searching criminal records of the Federal Bureau of Investigation, and would authorize the issuance of a license when the fingerprints have been submitted and all licensing qualifications have been met, except for the receipt of criminal history information from the Federal Bureau of Investigation subject to revocation if the department determines the person has a criminal record. The bill would, in limited circumstances, authorize the Director of Social Services to grant an exemption from the denial of the licensure if the director determines that the person convicted of a crime is of such good character as to justify issuance of the license or special permit.

The bill would authorize the department to create substitute group home employee registries for persons working at more than one facility licensed by the department to submit fingerprint cards and child abuse index information for child care registries.

Existing law states the intent of the Legislature that the Department of Justice charge a fee to cover its services provided in determining if any applicant or director or officer of a corporate applicant has been convicted of certain crimes.

This bill would authorize the Department of Justice to charge the fee.

The bill would also specify procedures to be followed when the Department of Justice cannot ascertain information concerning an applicant's criminal record check within a specified period.

This bill would require that the State Department of Social Services implement regulations regarding the roles and duties of a group home facility manager in overseeing a group home's operation and the time each spends at the group home and the inclusion of that information in the facility's plan of operation.

The bill would prohibit any group home or foster family agency or employee or director thereof to offer gifts or other remuneration to any employee of the State Department of Social Services or placement agency or employee of the court that exceeds certain limits. The bill would also prohibit the employees of the department from accepting any gift of any type from any group home or foster family agency licensee, employee, or director, and would make violation of that prohibition a misdemeanor. By creating a new crime, this bill would result in a state-mandated local program.

The bill would require the Director of Social Services to establish a certification program to ensure that administrators of group home facilities have appropriate training and certification.

Existing law creates the Certification Fund from which moneys, upon appropriation by the Legislature, shall be expended by the State Department of Social Services for the purpose of administering the residential care facilities for the elderly certification program.

This bill would, for the 1998-99 fiscal year, appropriate the sum of not to exceed \$250,000 from the Certification Fund to the State Department of Social Services for administration of the group home facility certification program. It would require repayment of this appropriation upon receipt of fees received pursuant to that program.

The bill would also impose other duties upon group homes, including the duty to develop a daily schedule of activities, and requirements relating to the maintenance of reports and other documents pertaining to the facility.

Existing law requires the periodic inspection and evaluation for quality of care of every licensed community care facility.

This bill would authorize the State Department of Social Services to interview children who are clients of group homes at any public or private agency at which they may be found.

Existing law authorizes the department to revoke or suspend a license and to deny an application for a license for a community care facility on certain grounds.

This bill would also authorize the State Department of Social Services to take those actions on the grounds of engaging in acts of financial malfeasance or willful or negligent failure to provide services for the care of clients, with respect to the operation of a community care facility.

Existing law authorizes the State Department of Social Services to prohibit a licensed community care facility from employing or continuing to employ, or allowing contact with clients of a licensed facility, any person who has violated certain rules or regulations, engaged in certain conduct, or been denied an exemption to work or be present in a facility after having been convicted of certain crimes.

This bill would authorize the State Department of Social Services also to prohibit any person to whom those prohibitions apply from being a member of the board of directors, an executive director, or an officer of a community care facility, and would revise the procedures for implementation of the prohibition.

Existing law requires the Director of Social Services to ensure that licensing personnel at the department have appropriate training to carry out the requirements of law applicable to licensing community care facilities.

This bill would revise the scope of those areas of training required in the state development program to include providing group home and foster family agency licensing personnel with a minimum of 24 hours of training per year to increase their understanding of children in group homes, certified homes, and foster family homes.

Under existing law, the State Department of Social Services also licenses residential care facilities for persons with chronic, life-threatening illnesses, residential care facilities for the elderly, and child day care facilities.

The bill would set forth provisions applicable to these facilities similar to the foregoing provisions relating to fingerprint and criminal history requirements, financial malfeasance, and removal of directors and officers.

Since a violation of licensing provisions for those facilities covered by the bill is a crime, imposition of the foregoing requirements on these facilities would result in a state-mandated local program.

Existing law provides for the placement of children who are determined to be wards of the court in facilities outside of the state.

This bill would specify circumstances in which the minor placed in a facility outside of the state may be removed and returned to the court for a review of the suitability of continued placement out of the state.

Existing law requires counties to maintain a specified level of children's mental health services.

This bill would require counties that receive full system of care funding, as determined by the State Department of Mental Health, to provide to county social services and probation departments mental health screening, assessment, and participation in multidisciplinary and specialty mental health treatment services for children who are placed out of the home in group care, for those children who meet the definition of medical necessity, to the extent resources are available, and would require the State Department of Mental Health to develop an estimate of the extent to which assessment and treatment resources are available to meet the needs of children placed out of home in group care and who are at risk of that placement. The bill would require the State Department of Mental Health, the State Department of Social Services, and the Judicial Council to develop a procedure for review of treatment plans for children receiving prescribed psychiatric medication and who are placed in out-of-home care.

Existing law requires the State Department of Social Services to complete a comprehensive evaluation of the Independent Living Program, in consultation with county Independent Living Program administrators, and to develop and implement a transitional housing model for youth who are preparing for emancipation from foster care.

This bill would state the intent of the Legislature that the foster care state plan be amended to ensure that all eligible children up to the age of 21 years may be served by the Independent Living Program.

Existing law provides for the provision of various benefits under the CalWORKs program for children who have been placed in foster care.

Existing law requires the department to adopt regulations requiring the use of the standard form for program statements and the level of care assessment instrument and process to determine the appropriate placement in out-of-home care.

This bill would repeal that requirement, and would require the department to issue to all county placing agencies and the courts, current best practice guidelines for the assessment of a child and the child's family unit. The bill would require the department to conduct a pilot project to test the effectiveness of using best practice standards for the assessment of children and families receiving child welfare and foster care services.

The bill would also revise the procedures for the establishment of a rate classification level and for an existing group home requesting a rate classification level increase under the foster care program and under the intensive foster care program.

Existing law provides for the reimbursement of foster care providers through the CalWORKs program, using a combination of federal, state, and county funds.

This bill would provide for an increase in those provider rates. Since state funds are continuously appropriated for the reimbursement of those providers, this bill would increase the continuous appropriation, thereby resulting in an appropriation.

The bill would also require group home providers, as a condition of receiving a rate under the foster care payment provisions of the CalWORKs program, to ensure that all documents that verify the provision of services in certain areas of child care, social work, and mental health be contemporaneously signed by the individual providing the services and by the group home representative responsible for preparing the document.

The bill would require an annual financial audit of a foster family agency or group home, and would make submission of the audit by foster family agencies and group home programs a condition to receiving a rate under the foster care program, except for certain new programs.

The bill would require the State Department of Social Services to convene and preside over a community care facilities law enforcement task force to identify and recommend to the appropriate committees of the Legislature specific statutory and regulatory changes to permit efficient and effective criminal prosecution of, and to permit efficient and effective civil recovery of public funds from individuals associated with illegal activities surrounding public funds paid to providers for the care of, and delivery of services to, clients of community care facilities.

Existing law establishes procedures for the determination of the level of care required by children placed in foster care, requires that the level of care assessment instrument address the safety needs of the child, and requires the State Department of Social Services to develop a standard form for program statements for ratesetting, community care licensing, and county placement purposes for various types of foster care provider facilities. Existing law also requires the State Departments of Social Services and Mental Health to report to the Legislature on the level of care instrument by January 1, 1995.

This bill would repeal those requirements.

This bill would also require that foster children placed in out-of-state group homes by county welfare departments or county probation departments shall be visited at least once monthly by a county social worker or probation officer, and would require the state to pay 100% of the costs of those visits.

Existing law provides for various services for children and families.

This bill would require the Office of the State Foster Care Ombudsperson to be established in the State Department of Social Services with prescribed powers and duties.

This bill would authorize any county to enter into performance agreements with private, nonprofit agencies to encourage innovation in the delivery of children's services, to develop services not available in the community, and to promote change in the child welfare services system. It would permit the Director of Social Services to waive foster care regulations when necessary to implement these county programs.

The bill would authorize the State Department of Social Services to implement certain of its provisions through the adoption of emergency regulations.

This bill would also require the State Department of Social Services, under the direction of the Health and Welfare Agency and in collaboration with specified parties, to conduct a reexamination of the role of the foster care system and, if necessary, submit recommendations to the Legislature.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 312 (AB 2041) Bustamante. State Instructional Materials Fund.

Existing law establishes the State Instructional Materials Fund as a means of annually funding the acquisition of instructional materials as required by the California Constitution and continuously appropriates all money in that fund.

This bill would require that the State Department of Education apportion funds to school districts on the basis of an equal amount per pupil enrolled in public elementary schools and high schools for the purpose of purchasing instructional materials in the core curriculum that are aligned to academic content standards adopted by the State Board of Education for pupils in kindergarten and grades 1 to 12, inclusive, and that meet prescribed requirements. The bill would appropriate to the Superintendent of Public Instruction for allocation to school districts \$250,000,000 from the General Fund for the purchase of standards-based instructional materials in each of the fiscal years from 1999–2000 to 2001–02, inclusive. The bill would require that the appropriation be included in the amounts appropriated by the state in the 1999–2000, 2000–01, or 2001–02 fiscal year for the purpose of meeting the state's minimum funding obligation to school districts and community college districts under Section 8 of Article XVI of the California Constitution for that fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 313 (SB 1193) Peace. School finance: staff development.

(1) Existing law authorizes a school to include the provision of time during the regular school year to conduct staff development programs and receive full average daily attendance (ADA) reimbursement. Existing law generally authorizes school districts to offer up to 8 days of staff development during the school year.

Existing law, known as the Staff Development Buy-out Program, declares the intent of the Legislature to increase the number of schooldays in a school year by providing funding to school districts to conduct staff development on days other than instructional days. The Staff Development Buy-out Program requires the Superintendent of Public Instruction to provide each eligible school district with a staff development allowance of \$220 per day, to the extent funds are provided therefor in the Budget Act, for each certificated employee who participates in staff development that meets certain requirements, including being offered on days that are not counted as instructional days.

This bill would repeal the Staff Development Buy-Out Program and the authority to receive full ADA reimbursement for staff development programs and would instead establish the Instructional Time and Staff Development Reform Program. The bill would enact the Instructional Time and Staff Development Reform Program and would require the State Department of Education to submit draft regulations for the purpose of implementing this program to the State Board of Education for its review, approval, and adoption pursuant to the provisions that generally govern the adoption of administrative regulations.

The bill would require the Superintendent of Public Instruction to provide each eligible school district, charter school, and county office of education with an allowance of \$270 per day, for up to 3 days, for each certificated classroom teacher and \$140 per day, for up to one day, for each classified classroom instructional aide and certificated teaching assistant who participates in staff development on instructional methods and academic content in the core curriculum areas that are provided by the school district, charter school, or county office of education.

(2) This bill would reappropriate the unexpended balance, as of June 30, 1999, of the appropriation that is made for purposes of this act in the Budget Act of 1998 to the Superintendent of Public Instruction for the purpose of providing funding for up to 2 additional staff development days for classified classroom instructional aides and certificated teaching assistants.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 314 (SB 1628) Maddy. Regional Burn and Trauma Center: funding.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services, including hospital care.

This bill would establish, until June 30, 2003, the Regional Burn and Trauma Center Program, to fund a portion of the construction costs associated with replacing a burn and

trauma center that would serve a significant portion of Medi-Cal beneficiaries. The bill would require a hospital or its successor entity receiving funds pursuant to this provision to maintain burn and trauma services and continue to provide medical services to beneficiaries of Medi-Cal or a successor program through the year 2028. The bill would also create the Regional Burn and Trauma Center Fund in the State Treasury, under the administrative control of the State Department of Health Services, and would specify the potential sources and permissible uses of moneys in the fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 315 (AB 1331) Alquist. Mathematics education.

Existing law authorizes eligible teachers to apply for, and receive, grant funding for instructional improvement.

This bill would require the State Department of Education to administer a program of grants to school districts and county superintendents of schools for in-service training of teachers of mathematics who teach pupils enrolled in grades 4 to 12, inclusive. The bill would require the State Board of Education to develop a list of contract providers of in-service training in mathematics instruction that have been approved by the board. A school district and county superintendent of schools would be required to choose a provider from the list of providers in order to be eligible for funds under this program to purchase services of a contract provider.

This bill would appropriate \$150,000 from the General Fund to the State Department of Education, with \$75,000 of that sum for allocation to the State Board of Education for its costs in reviewing provider applications and \$75,000 of that sum for the purposes of providing staff support by the State Department of Education for the program established by this bill.

This bill would require that funds appropriated in the 1997–98 Regular Session of the Legislature for purposes of this program to be available for expenditure for 3 fiscal years thereby making an appropriation. The bill would make its operation contingent on the enactment and operation of AB 2442 of the 1997–98 Regular Session.

Ch. 316 (AB 2442) Mazzoni. Mathematics instruction: Standards-based Mathematics Staff Development Act of 1998.

Existing law includes mathematics among the prescribed courses of study for grades 1 to 6, inclusive, and for grades 7 to 12, inclusive.

This bill would enact the Standards-based Mathematics Staff Development Act of 1998. The bill would require the State Department of Education to administer a program of grants to school districts and county offices of education for fees and materials costs for mathematics teachers of pupils in grades 4 to 12, inclusive, to take mathematics courses at accredited institutions of higher education. The bill would prescribe the eligibility criteria for applicant school districts.

This bill would declare that any appropriations made for the purposes of this bill are to be included in the amount appropriated to meet the state's minimum funding obligation to school districts and community colleges under Section 8 of Article XVI of the California Constitution for the fiscal year in which the appropriation is made.

This bill would provide that it would become operative only if AB 1331 of the 1997–98 Regular Session is enacted and becomes operative.

Ch. 317 (AB 1756) Havice. School Community Policing Partnership Act of 1998.

Under the California Constitution, all students and staff of public primary, elementary, junior high, and senior high schools have the inalienable right to attend campuses that are safe, secure, and peaceful.

Under existing law, there is a School/Law Enforcement Partnership comprised of the Superintendent of Public Instruction and the Attorney General, with duties that include the development of programs and policies, the administration of interagency safe school programs, procedures, and activities, the formulation of recommendations to be submitted as part of an annual report to the Legislature, and cooperation with other states and state and federal agencies on matters relating to school safety.

This bill would establish the School Community Policing Partnership Act of 1998, to be administered by the State Department of Education School/Law Enforcement

Partnership. Under the program, grants would be awarded on a competitive basis to county offices of education, school districts and consortia of school districts and county offices of education that develop and implement plans that demonstrate a collaborative and integrated approach for implementing a system of providing safe and secure environments through community policing. The bill would require the School Community Policing Partnership to report biennially to the Legislature on the results of the program.

This bill would express the intent of the Legislature that funding for the program be provided through the annual Budget Act and that grants shall be for a period of 3 years.

Ch. 318 (AB 2284) Torlakson. After school programs.

(1) Existing law, the Child Care and Development Services Act, authorizes the governing board of any school district to establish a program of supervision for children before and after school for pupils in any grade level, up to and including junior high school. The Child Care and Development Services Act also provides for the establishment of extended day care programs for children in kindergarten and grades 1 to 9, inclusive.

The bill would establish the After School Learning and Safe Neighborhoods Partnerships Program to create incentives for establishing after school enrichment programs for pupils in kindergarten and grades 1 to 9, inclusive, at participating schoolsites. The bill would authorize a local education agency or a city, county, or nonprofit organization in partnership with a local education agency or agencies to apply to establish a program, and would require the State Department of Education to select participants from among the applicants. The bill would exempt the After School Learning and Safe Neighborhoods Partnerships Program from the other requirements of the Child Care and Development Services Act and related regulations. The bill would state the intent of the Legislature that a minimum of \$50,000,000 be appropriated for the program in the annual Budget Act, and would require program participants to ensure that no less than 85% of state funding received is allocated to schoolsites for direct services to pupils.

(2) Existing law provides for the establishment of a school-based schoolage before and after school program and requires priority for enrollment in the program to be given in a specified manner.

This bill would make the school-based schoolage before and after school program inoperative as of July 1, 1999. The bill would require any program operating under the school-based schoolage before and after school program, as of July 1, 1999, to elect to continue in operation under the remaining provisions governing schoolage community child care services or to operate under the After School Learning and Safe Neighborhoods Partnerships Program. The bill would delete the requirement that priority for enrollment in the program be given in the manner specified.

(3) The bill would require local assistance funding that is appropriated in the Budget Act of 1998 for programs established pursuant to the After School Learning and Safe Neighborhoods Partnerships Program to be available for transfer to and in augmentation of a budget item that provides funding to school districts, county offices of education, and other agencies for purposes of Proposition 98 educational programs relating to child development, thereby making an appropriation. The bill would also require that up to \$550,000 of this funding be allocated to local educational agencies for technical assistance and training.

(4) The bill would appropriate the amount of \$500,000 from the General Fund to the State Department of Education for state operations for the implementation of After School Learning and Safe Neighborhoods Partnerships Program. The bill would provide that this funding shall not be available for expenditure until the Department of Finance has first approved an expenditure and implementation plan.

(5) This bill would become operative only if both AB 1428 and SB 1756 of the 1997-98 Regular Session are chaptered.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 319 (AB 1428) Ortiz. After School Learning and Safe Neighborhoods Partnerships Program.²

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Existing law, the Child Care and Development Services Act, authorizes the governing board of any school district to establish a program of supervision for children before and after school for pupils in any grade level, up to and including junior high school. The Child Care and Development Services Act also provides for the establishment of extended day care programs for children in kindergarten and grades 1 to 9, inclusive.

The bill would establish the After School Learning and Safe Neighborhoods Partnerships Program to create incentives for establishing after school enrichment programs for pupils in kindergarten and grades 1 to 9, inclusive, at participating schoolsites. The bill would authorize a local education agency or a city, county, or nonprofit organization in partnership with a local education agency or agencies to apply to establish a program, and would require the State Department of Education to select participants from among the applicants. The bill would exempt the After School Learning and Safe Neighborhoods Partnerships Program from the other requirements of the Child Care and Development Services Act and related regulations. The bill would state the intent of the Legislature that a minimum of \$50,000,000 be appropriated for the program in the annual Budget Act, and would require program participants to ensure that no less than 85% of state funding received is allocated to schoolsites for direct services to pupils.

(2) Existing law provides for the establishment of a school-based schoolage before and after school program and requires priority for enrollment in the program to be given in a specified manner.

This bill would make the school-based schoolage before and after school program inoperative as of July 1, 1999. The bill would require any program operating under the school-based schoolage before and after school program, as of July 1, 1999, to elect to continue in operation under the remaining provisions governing schoolage community child care services or to operate under the After School Learning and Safe Neighborhoods Partnerships Program. The bill would delete the requirement that priority for enrollment in the program be given in the manner specified.

(3) The bill would require local assistance funding that is appropriated in the Budget Act of 1998 for programs established pursuant to the After School Learning and Safe Neighborhoods Partnerships Program to be available for transfer to and in augmentation of a budget item that provides funding to school districts, county offices of education, and other agencies for purposes of Proposition 98 educational programs relating to child development, thereby making an appropriation. The bill would also require that up to \$550,000 of this funding be allocated to local educational agencies for technical assistance and training.

(4) The bill would appropriate the amount of \$500,000 from the General Fund to the State Department of Education for state operations for the implementation of After School Learning and Safe Neighborhoods Partnerships Program. The bill would provide that this funding shall not be available for expenditure until the Department of Finance has first approved an expenditure and implementation plan.

(5) This bill would become operative only if both AB 2284 and SB 1756 of the 1997-98 Regular Session are chaptered.

(6) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 320 (SB 1756) Lockyer. After school programs.³

(1) Existing law, the Child Care and Development Services Act, authorizes the governing board of any school district to establish a program of supervision for children before and after school for pupils in any grade level, up to and including junior high school. The Child Care and Development Services Act also provides for the establishment of extended day care programs for children in kindergarten and grades 1 to 9, inclusive.

The bill would establish the After School Learning and Safe Neighborhoods Partnerships Program to create incentives for establishing after school enrichment programs for pupils in kindergarten and grades 1 to 9, inclusive, at participating schoolsites. The bill would authorize a local education agency or a city, county, or nonprofit organization in partnership with a local education agency or agencies to apply to establish a program, and would require the State Department of Education to select

NOTE: Superior numbers appear as a separate section at the end of the digests.

participants from among the applicants. The bill would exempt the After School Learning and Safe Neighborhoods Partnerships Program from the other requirements of the Child Care and Development Services Act and related regulations. The bill would state the intent of the Legislature that a minimum of \$50,000,000 be appropriated for the program in the annual Budget Act, and would require program participants to ensure that no less than 85% of state funding received is allocated to schoolsites for direct services to pupils.

(2) Existing law provides for the establishment of a school-based schoolage before and after school program and requires priority for enrollment in the program to be given in a specified manner.

This bill would make the school-based schoolage before and after school program inoperative as of July 1, 1999. The bill would require any program operating under the school-based schoolage before and after school program, as of July 1, 1999, to elect to continue in operation under the remaining provisions governing schoolage community child care services or to operate under the After School Learning and Safe Neighborhoods Partnerships Program. The bill would delete the requirement that priority for enrollment in the program be given in the manner specified.

(3) The bill would require local assistance funding that is appropriated in the Budget Act of 1998 for programs established pursuant to the After School Learning and Safe Neighborhoods Partnerships Program to be available for transfer to and in augmentation of a budget item that provides funding to school districts, county offices of education, and other agencies for purposes of Proposition 98 educational programs relating to child development, thereby making an appropriation. The bill would also require that up to \$550,000 of this funding be allocated to local educational agencies for technical assistance and training.

(4) The bill would appropriate the amount of \$500,000 from the General Fund to the State Department of Education for state operations for the implementation of After School Learning and Safe Neighborhoods Partnerships Program. The bill would provide that this funding shall not be available for expenditure until the Department of Finance has first approved an expenditure and implementation plan.

(5) This bill would become operative only if both AB 1428 and AB 2284 of the 1997-98 Regular Session are chaptered. This bill would change a school funding priority provision in the provisions added by AB 1428 and by AB 2284 to conform to the provisions of this bill.

(6) This would declare that it is to take effect immediately as an urgency statute.

Ch. 321 (SB 1584) Committee on Budget and Fiscal Review. Vehicle license fee revenues.

Existing law requires the Controller to distribute a specified percentage of vehicle license fees revenues collected by the state to each city, and city and county, in accordance with the proportion that the population of each city, and city and county bears to the total population of all cities, and cities and counties, in the state. For this purpose, existing law also requires the Controller, for a 10-year or 7-year period, as applicable, to determine the populations of certain cities that were incorporated on or after January 1, 1987, to be the greater of the number of registered voters in the city as of the date of incorporation multiplied by a factor of 3, or the population of that city as calculated pursuant to a specified statutory provision.

This bill would clarify the proper implementation of these revenue allocation requirements.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 322 (AB 2797) Cardoza. Taxes: fees.

The Personal Income Tax Law authorizes various credits against the taxes imposed by that law, including a refundable credit for qualified renters. If the credit allowed to a qualified renter exceeds the renter's tax liability under the Personal Income Tax Law, the excess is credited against other amounts due, if any, from the qualified renter and the balance is refunded to the qualified renter.

This bill would provide that the credit is nonrefundable and would limit the credit to persons whose taxable income is less than specified amounts that would be revised annually, based on an inflation adjustment factor.

The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws.

This bill would authorize a credit against those taxes for each taxable and income year beginning on or after January 1, 2001, and before January 1, 2006, in an amount equal to a specified percentage of the qualified wages, as defined, paid or incurred during the taxable or income year or in connection with an initial contract or subcontract to manufacture property for ultimate use in a Joint Strike Fighter, as specified. This bill would also authorize a credit against those taxes for each taxable and income year beginning on or after January 1, 2001, and before January 1, 2006, in an amount equal to 10% of the qualified cost, as provided, of property for use in the manufacture of a product for ultimate use in a Joint Strike Fighter, as specified, that is placed in service in this state.

The Personal Income Tax Law authorizes a credit of \$120 against those taxes for each taxable year beginning on or after January 1, 1998, and before January 1, 1999, and a credit of \$222 for each taxable year beginning on or after January 1, 1999, adjusted for inflation thereafter, as specified, for each dependent.

This bill would instead authorize a credit of \$253 against those taxes for each taxable year beginning on or after January 1, 1998, and before January 1, 1999, \$227 for taxable years beginning on or after January 1, 1999, and adjusted for inflation, as specified, for each dependent.

Under the Personal Income Tax Law and the Bank and Corporation Tax Law, various provisions of the federal Internal Revenue Code as enacted as of a specified date are referenced in various sections of the Revenue and Taxation Code. That law provides that for taxable years beginning on or after January 1, 1997, the specified date of those referenced Internal Revenue Code sections is January 1, 1997, unless otherwise specifically provided.

Existing law provides that for any introduced bill which proposes changes in any of those dates, the Franchise Tax Board shall prepare a complete analysis of the bill that describes all changes to state law that will automatically occur by reference to federal law as of the changed date. It further requires the Franchise Tax Board to immediately update and supplement that analysis upon any amendment to the bill, and requires that analysis to be made available to the public and to be submitted to the Legislature for publication in the daily journal of each house of the Legislature.

This bill would change the specified date of those referenced Internal Revenue Code sections to January 1, 1998, for taxable years beginning on or after January 1, 1998, and thereby would make numerous substantive changes to both the Personal Income Tax Law and the Bank and Corporation Tax Law with respect to those areas of preexisting conformity that are subject to changes under federal laws enacted after January 1, 1997, and that have not been or are not being excepted or modified.

This bill would make certain other changes in federal income tax laws applicable, with specified exceptions and modifications, and make specified supplemental, technical, or clarifying changes, for purposes of the Personal Income Tax Law or the Bank and Corporation Tax Law, or both, with respect to, among other things, the following subjects: controlled foreign partnerships; transfers of property to foreign partnerships; extension of statute of limitations for foreign transfers; basic standard deduction and minimum tax exemption amount for certain dependents; increase in estimated tax de minimus threshold; modifications to look-back method; qualified lessee construction allowances; electing large partnerships; maximum number of shareholders of REIT's; tenant services income; attribution rules applicable to stock ownership; earnings and profits of REIT's; treatment of foreclosure property; treatment under hedging instruments; excess noncash income; prohibited transaction safe harbor; shared appreciation mortgages; wholly owned subsidiaries; regulated investment companies; penalties; statute of limitations; awarding of administrative costs; certain revocable trusts treated as part of estate; distributions of an estate; separate share rules for estates; treatment of funeral trusts; survivor benefits for public safety officers killed in the line of duty; the Small Business Job Protection Act of 1996; tax treatment of hospitals; ACE adjustment for AMT; association of holders of timeshare interests; certain receivables

purchased by cooperative hospital service organizations; mark to market election; pooled debt obligations subject to acceleration; holding period for dividends received deduction; reporting of certain payments made to attorneys; returns of beneficiaries of estates and trusts; confidential corporate tax shelters; sale or exchange of partnership interest; termination of suspense accounts for certain family corporations; net operating loss carryovers; denial of deduction for certain amounts paid in connection with insurance; limitation on property for which an income forecast method may be used; waiver of estimated tax penalties; education credits; deduction for interest on education loans; penalty-free withdrawals from IRAs for higher education; qualified state tuition programs; education IRAs; deduction for corporate contributions of computer technology and equipment for elementary or secondary school purposes; treatment of cancellation of certain student loans; restoration of IRA deductions for certain taxpayers; establishment of nondeductible, tax-free IRAs; distributions from certain plans for use without penalty to purchase a first home; certain bullion not treated as collectibles; exemption from tax for gain on sale of a principal residence; rollover of gain from sale of qualified stock; repeal of separate depreciation lives for AMT purposes; AMT not to apply to farmers' installment sales; carryover basis for inherited property; treatment of livestock sold on account of weather-related conditions; expensing of environmental remediation costs; workers' compensation; UBTI exclusion for sponsorship payments; large corporate underpayments; and gain on certain sales of agricultural refiners and processors.

The Personal Income Tax Law, by reference to specified federal statutes, allows a deduction for 25% of the amount paid or incurred during the taxable year by a self-employed individual for insurance that constitutes medical care for the taxpayer and his or her spouse and dependents. Existing federal law incrementally increases that deduction to specified percentage rates. Under federal law, a 45% deduction is allowed for taxable years beginning in calendar year 1998; when fully increased, a 100% deduction is allowed for taxable years beginning in calendar year 2007 or thereafter.

This bill would increase the deduction allowed under the Personal Income Tax Law to 40% of the amount paid or incurred for each taxable year beginning on or after January 1, 1999.

This bill would also make specified changes relating to subchapter "S" elections, as provided.

The Gonsalves-Deukmejian-Petris Senior Citizens Property Tax Assistance Law provides for payment of assistance by the Franchise Tax Board to claimants, whether those claimants own or rent their residence, in accordance with schedules that reduce the amount of assistance provided as the amount of a claimant's household income increases along a specified scale of household income amounts. It prohibits the Franchise Tax Board from paying any assistance if the gross household income of a claimant, after certain allowances, exceeds \$24,000.

This bill would apply inflation adjustment factors, as provided, to the household income amounts that are set forth in the schedule that determines the amount of assistance in the case in which a claimant owns or rents his or her residence, and would apply similar inflation adjustments to the \$24,000 gross household income figure.

The Vehicle License Fee Law establishes, in lieu of any *ad valorem* property tax upon vehicles, an annual license fee for any vehicle subject to registration in this state in the amount of 2% of the market value of that vehicle, as specified. It generally requires that vehicle license fee revenues be deposited in the Motor Vehicle License Fee Account in the Transportation Tax Fund and appropriates those revenues for, among other things, allocation to the Local Revenue Fund, a continuously appropriated fund established by a specified statute, and for allocation on a monthly basis among cities and counties in accordance with certain formulas.

This bill would permanently offset the amount of the vehicle license fee for each subject vehicle by 25%, and would, subject to specified contingencies with respect to fiscal year projections of State General Fund revenues, provide for the implementation of similar, superseding offsets of 35%, 46.5%, 55%, and 67.5% to apply to specified future calendar years. This bill would also make a continuous appropriation by requiring the transfer from the General Fund to the Motor Vehicle License Fee Account and the Local Revenue Fund of those sums that would offset the vehicle license fee revenue reductions

resulting from this bill. This bill would, as provided, condition the amount of the reductions specified by this bill upon the availability of moneys for transfer from the General Fund to fully fund the offsets. This bill would also make other conforming changes.

This bill would make additional technical, nonsubstantive changes to various provisions.

This bill would take effect immediately as a tax levy.

Ch. 323 (AB 2798) Machado. Taxation.

The Enterprise Zone Act provides for the designation of enterprise zones by the Trade and Commerce Agency according to specified criteria pursuant to which certain entities may receive regulatory, tax, and other incentives for private investment and employment. It generally limits the period for which an area may be designated by that agency as an enterprise zone to 15 years, and prohibits an existing enterprise zone from being expanded in size by more than 15%.

This bill would allow an enterprise zone that was so designated prior to 1990 to retain that designation for 20 years, rather than 15 years, if that zone meets certain criteria, and would allow an enterprise zone that is no greater than 13 square miles on the original date of designation to expand by a maximum of 20%, rather than 15%. This bill would also authorize the Trade and Commerce Agency, in accordance with certain criteria, to audit an enterprise zone at any time during the period of designation, or at least every 5 years, as provided, to determine whether the program is superior, passing, or failing, and would provide, under certain circumstances, for the “dedesignation,” as defined, of an enterprise zone, whether by the agency or at the request of a local jurisdiction, and for the exclusion of a jurisdiction from an enterprise zone at that jurisdiction’s request.

The Personal Income Tax Law and the Bank and Corporation Tax Law allow a taxpayer to claim certain tax incentives for activities conducted in a targeted tax area, Manufacturing Enhancement Area (MEA), enterprise zone, the Los Angeles Revitalization Zone (LARZ), or in a local agency military base recovery area (LAMBRA), including: (1) a credit in an amount equal to the sales or use tax paid or incurred during the taxable or income year in connection with the taxpayer’s purchase of qualified property used in a targeted tax area, as specified; (2) a credit in an amount equal to the specified percentage of wages paid during the taxable or income year to a qualified employee, as defined, who is employed by the taxpayer during the taxable or income year in a targeted tax area; (3) a credit in an amount equal to the specified percentage of qualified wages, as defined, that are paid during the taxable or income year to a qualified disadvantaged individual, as defined, who is hired during the taxable or income year for employment in a MEA; (4) a credit in an amount equal to the sales or use tax paid or incurred during the taxable or income year in connection with the sales or use tax paid or incurred during the taxable or income year in connection with the taxpayer’s purchase of qualified property used in an enterprise zone; (5) a credit in an amount equal to the specified percentage of wages paid during the taxable or income year to a qualified employee, as defined, who is employed by the taxpayer during the taxable or income year in an enterprise zone; and (6) a deduction for net operating losses that are attributable to an enterprise zone, the LARZ, or a LAMBRA.

This bill would do all of the following: in connection with the calculation of all of these tax credit incentives, specify certain statutory apportionment procedures and the application or definition, or both, of property and payroll factors in income apportionment formulas and limit apportionment calculations to California-based income, rather than worldwide income; in connection with the calculation of these tax credit incentives that apply to an enterprise zone, preclude the application of a sales factor in income apportionment formulas; in connection with these tax credit incentives that apply to qualified property used in an enterprise zone, also expand the definition of qualified property to include specified data processing and communications equipment and specified motion picture manufacturing equipment that is used for production and postproduction; and, with respect to the tax credit that applies to wages paid to a qualified employee in a targeted tax area, clarify the definition of the term “qualified employee.” This bill would, with respect to a deduction for net operating losses attributable to an enterprise zone, do all of the following: specify the application of

property and payroll factors in loss apportionment formulas; specify certain statutory apportionment procedures and the application and definition of property and payroll factors in income apportionment formulas and limit apportionment calculations to California-based income, rather than worldwide income; and preclude the application of sales factor in both loss and income apportionment formulas. This bill would, with respect to a deduction for net operating losses that are attributable to a LAMBRA or targeted tax area, specify certain statutory apportionment procedures and the definition of property and payroll factors in income apportionment formulas, and limit apportionment calculations to California-based income, rather than worldwide income.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax, including an exemption for seeds and annual plants the products of which ordinarily constitute food for human consumption, or are to be sold in the regular course of business.

This bill would remove the limitation that the plants be annual, hence extending the exemption to additional plant products.

This bill would additionally exempt from sales and use tax tangible personal property purchased for use by a qualified person, as defined, to be used primarily in teleproduction or postproduction services, and tangible personal property used primarily to maintain, repair, measure, or test the property used primarily in those services, as provided.

This bill would also extend indefinitely the application of an existing sales and use tax exemption for qualified property, as defined, purchased for use in any space flight originating at Vandenberg Air Force Base, that currently applies only until January 1, 2004, and would remove the requirement that the flights originate at Vandenberg Air Force Base.

Existing law prohibits the imposition of any tax on or by reason of any transfer occurring by reason of death, but imposes a California estate tax equal to a certain portion of the maximum allowable amount of credit for state death taxes allowable under the applicable federal estate tax law. Existing law provides that the tax is due and payable at the date of the decedent's death and becomes delinquent at the expiration of 9 months. Liability for payment of the tax continues until the tax is paid and imposes interest at the rate of 12% from the date the tax is delinquent until it is paid. Existing federal law pertaining to the federal estate tax imposes interest at a rate determined under a certain formula, and permits payment of estate taxes in installments under certain circumstances over an extended period, as provided at a lower interest rate.

This bill would provide, for delinquent amounts unpaid on or after January 1, 1999, that the rate of interest for underpayment of tax would be determined under the federal statute. The bill would also, for decedents dying on or after January 1, 1999, permit payment of state estate taxes in installments under those same circumstances over an extended period at a lower interest rate, in conformity with federal law.

The Personal Income Tax Law and the Bank and Corporation Tax Law, by reference to a specified federal statute, allow a credit against taxes imposed by those laws for increasing research expenses, as defined. In general, the amount of the credit under both laws is equal to 11% of the excess of the qualified research expenses, as defined, for the taxable or income year over the base amount and, in addition, for purposes of the Bank and Corporation Tax Law, 24% of the basic research payments, as defined. The term base amount means the product of the average annual gross receipts of the taxpayer for each of the specified years preceding the taxable or income year and the fixed-base percentage, as defined, but in no event less than 50% of the qualified research expenses for the taxable or income year. Existing law permits, for taxable and income years beginning on or after January 1, 1998, a taxpayer to elect an alternative incremental credit, based on a specified formula.

This bill would revise that federal formula, thereby increasing the amount of the alternative incremental credit allowed under state law, as provided.

The Personal Income Tax Law and Bank and Corporation Tax Law provide for taxable or income years beginning on or after January 1, 1988, and before January 1, 1998, tax credits with respect to costs paid or incurred for the following: startup expenses for establishing child care programs or constructing a child care facility; contributions for

child care information and referral services; and contributions to a qualified care plan, as defined.

This bill would extend the operation of these credit provisions until January 1, 2003.

The Personal Income Tax Law and the Bank and Corporation Tax Law allow to qualified taxpayers, as defined, a credit against taxes imposed by those laws in an amount equal to 6% of the amount paid or incurred during the taxable or income year for qualified property, as defined, that is placed in service in this state.

This bill would expand the definition of “qualified taxpayer” and “qualified property” to include, respectively, taxpayers engaged in specified activities related to computer programming services or computer software design or development and property consisting of computers and computer peripheral equipment used to develop and manufacture prepackaged software or custom software, as provided.

The Personal Income Tax Law, by reference to specified federal statutes, allows a deduction for 25% of the amount paid or incurred during the taxable year by a self-employed individual for insurance that constitutes medical care for the taxpayer and his or her spouse and dependents. Existing federal law incrementally increases that deduction to specified percentage rates. Under federal law, a 45% deduction is allowed for taxable years beginning in calendar year 1998; when fully increased, a 100% deduction is allowed for taxable years beginning in calendar year 2007 or thereafter.

This bill would increase the deduction allowed under the Personal Income Tax Law to 40% of the amount paid or incurred for each taxable year beginning on or after January 1, 1999.

The Bank and Corporation Tax Law generally imposes a franchise tax on corporations doing business within the limits of this state, including a minimum franchise tax on specified banks and corporations, except as provided.

This bill would provide, for income years beginning on or after January 1, 1999, for a minimum franchise tax of \$500 for the 2nd taxable year for any corporation, except as specified, that has gross receipts, less returns and allowances reportable to this state, of less than \$1,000,000 for the income year. The reduced tax would apply to any corporation that is a qualified new corporation, as defined, incorporated on or after January 1, 1999.

The Bank and Corporation Tax Law provides that a corporation that incorporates under the laws of this state or qualifies to transact interstate business in this state shall prepay a specified minimum franchise tax of \$800, except as provided. Existing law also provides that, for income years commencing on or after January 1, 1997, the amount of the prepaid minimum franchise tax for a qualified new corporation, as defined, shall be \$600, unless its gross receipts, as specified, or its tax liability, exceeds specified amounts.

This bill would provide that, for income years commencing on or after January 1, 1999, the amount of the prepaid minimum franchise tax for a qualified new corporation shall be \$300.

This bill would make a statement of legislative intent regarding small businesses and the burden of the minimum tax on those small businesses.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would declare that it is to take effect immediately as an urgency statute, but would provide that the operative date of certain of its provisions depend upon the effective date of this act. This bill would further specify that all provisions of this bill are to be deemed to have become inoperative as of the bill’s effective date if a certain ballot measure is approved by the electorate at the November 3, 1998, general election.

Ch. 324 (AB 1656) Ducheny. 1998–99 Budget.⁴

This bill would make appropriations for support of state government for the 1998–99 fiscal year.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 325 (AB 2261) Aguiar. Local juvenile delinquency prevention.

Existing law establishes the Juvenile Crime Enforcement and Accountability Challenge Grant Program, which is administered by the Board of Corrections. Existing law specifies the standards for the award of grants on a competitive basis to counties that develop and implement comprehensive plans to respond to juvenile crime and demonstrate a collaborative approach for implementing a system of swift responses for at-risk youth and juvenile offenders.

Existing law authorizes the board to award up to \$2,000,000 statewide in individual grants not exceeding \$150,000 on a competitive basis to counties to assist in establishing a multiagency coordinating group or developing a local action plan.

This bill would provide that the grants are to be awarded on a competitive basis following request-for-proposal evaluation standards and guidelines developed by the board, as specified. This bill would require the board to develop an interim report and final analysis to be submitted to the Legislature, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 326 (AB 2784) Strom-Martin. Natural resources.⁵

(1) Existing law provides for the regulation of hazardous waste under the hazardous waste control laws by the Department of Toxic Substances Control and specified local agencies. Existing law requires the department to develop and adopt, by regulation, criteria and guidelines for the identification of hazardous waste. Under existing law, the department is authorized to exempt, until January 1, 2002, by regulation, a hazardous waste management activity from requirements of the hazardous waste control laws, subject to specified conditions. The department is required to prepare a specified evaluation of the activity and make a specified demonstration when adopting such a regulation to exempt a hazardous waste management activity.

Existing law requires the California Environmental Protection Agency, or a board, department, or office within the agency, to enter into an agreement with the National Academy of Sciences, the University of California, the California State University, or any similar institution of higher learning, or any combination of those entities, or with a scientist or group of scientists of comparable stature and qualifications that is recommended by the President of the University of California, to conduct an external scientific peer review of the scientific basis for any rule proposed by any board, department, or office within the agency.

Under existing law, a violation of the hazardous waste control laws, including a regulation adopted pursuant to those provisions, is a crime.

This bill would prohibit the department from publishing a notice of a proposal to adopt, amend, or repeal regulations pertaining to the criteria and guidelines for the identification of hazardous waste or the management standards for special wastes until the findings of that scientific peer review entity have been issued and the department has reviewed those findings. The bill would also prohibit the department from publishing any notice of a proposal to adopt such a regulation before January 1, 1999. The bill would require the regulations that would exempt a hazardous waste management activity from the hazardous waste control laws to be submitted for public comment on a specified date.

The bill would require the department to take specified actions before adopting the final version of regulations specifying criteria and guidelines for the identification of hazardous waste. The bill would authorize the department to utilize the CalTox model and the criteria and guidelines for the identification of hazardous waste to generate new values for soluble constituents. The bill would prohibit the department from amending or repealing the regulations adopted pursuant to the hazardous waste control laws with respect to the testing for solubility of regulatory thresholds until the scientific peer review entity makes specified findings. The bill would prohibit the department, in establishing total threshold limit concentrations in the regulations for the identification of hazardous waste, from basing the limit concentration on specified assumptions unless the scientific peer review entity makes specified findings.

The bill would prohibit any person, on and after January 1, 1999, from disposing of waste that contains specified concentrations of lead, copper, or nickel to land other than

NOTE: Superior numbers appear as a separate section at the end of the digests.

a Class I hazardous waste disposal facility, except as specified, until the appropriate California regional water quality control board amends the solid waste facility's waste discharge requirements and the appropriate local enforcement agency revises the solid waste facility's permit. With specified exceptions, the bill would also prohibit any person from disposing certain materials to land in any facility, other than a Class I hazardous waste disposal facility, if the material is regulated as a hazardous waste, until the department issues a variance, the appropriate California regional water quality control board amends the solid waste facility's waste discharge requirements, and the appropriate local enforcement agency revises the solid waste facility's permit. The bill would repeal those prohibitions on July 1, 2003. Since a violation of these requirements would be a crime, the bill would impose a state-mandated local program.

(2) The bill would appropriate \$617,000 from the Hazardous Waste Control Account in the General Fund to the department to implement, during the 1998-99 fiscal year, the Regulatory Structure Update project. The bill would make findings and declarations that final action, as specified, was taken in the Budget Act of 1998 to deny these funds to the department to carry out this initiative, and that this action is rescinded only if the department fully complies with the bill.

(3) Under existing law, with specified exceptions, revenue, money, and remittances received by the State Lands Commission are required to be applied to specified obligations in a prescribed order, including specified amounts to the Resources Trust Fund. Existing law establishes the Salmon and Steelhead Trout Restoration Account and the Natural Resources Infrastructure Fund within the Resources Trust Fund and provides for allocation of trust fund money between the account and the infrastructure fund, as prescribed. Existing law provides for these provisions to become inoperative on July 1, 2003, and to be repealed January 1, 2004.

This bill would additionally create the Marine Life and Marine Reserve Management Account within the trust fund and would allocate \$2,200,000 from the trust fund to the management account for expenditure by the Department of Fish and Game, upon appropriation, for marine life management, as provided. The bill would also create the State Parks System Deferred Maintenance Account within the trust fund and would allocate \$10,000,000 from the trust fund for expenditure by the Department of Parks and Recreation, upon appropriation, for deferred maintenance expenses. The bill would extend the inoperative date of these provisions to July 1, 2006, and the repeal date to January 1, 2007.

Existing law provides that as of July 1, 2003, with specified exceptions, all revenue money, and remittances received by the State Lands Commission are to be deposited in the General Fund.

This bill would change that date to July 1, 2006.

(4) Under existing law, fees for environmental license plates are required to be deposited in the Environmental License Plate Fund. Under former law, operative only until January 1, 1995, not more than 50¢ of the amount collected from each applicant for environmental license plates was required to be set aside for use, upon appropriation by the Legislature, by the Resources Agency for the purpose of increasing public awareness of the environmental license plate program through the mass media.

This bill would reenact that requirement of former law regarding the use of not more than 50¢ of the amount collected for environmental license plates as to money collected on and after January 1, 1999, except it would allow the money set aside to be used by the appropriate agency, rather than by the Resources Agency, and would delete the reference to the mass media.

(5) Existing law authorizes various flood control projects.

This bill would annually appropriate \$44,000,000 for each of the 1999-2000, 2000-2001, and 2001-2002 fiscal years for allocation by the Department of Water Resources for projects in specified counties in accordance with specified provisions of law.

This bill would also provide, except as specified, that in order to be eligible for any state funds, a flood control project, as defined, shall be authorized by the Legislature before it is authorized by Congress.

(6) Under the California Wildlife, Coastal, and Park Land Conservation Act, if certain of the proceeds derived from bonds issued under that act are not expended prior to July 1, 1998, the agency to which the funds were originally allocated is required to submit to

the Legislature a plan for the expenditure of the funds in accordance with the purposes of the bond act within a county in which the funds were originally authorized to be expended, and the Legislature may approve the plan by statute, passed in each house by a $\frac{2}{3}$ vote.

This bill, pursuant to those provisions, would adopt a specified plan of expenditure submitted by the Department of Parks and Recreation to the Legislature for the expenditure of those unexpended funds, specified plans of expenditure for certain funds allocated to the State Coastal Conservancy, and specified plans of expenditure for certain funds allocated to the Department of Fish and Game by this act. The bill would make these funds available for expenditure without regard to fiscal years.

(7) Prior Budget Acts have authorized the expenditure of funds for the operation and support of the California Conservation Corps and the Department of Parks and Recreation.

This bill would authorize the corps and the department to take specified actions, until June 30, 1999, that are necessary to implement provisions of the Budget Act of 1998 relative to the operation and support of those agencies.

(8) Existing law recognizes the existence of a certain loan agreement between the Department of Boating and Waterways and the County of Sonoma relating to the Spud Point Marina.

This bill would require the department to contract for the development of a business plan for the operation of the Spud Point Marina, as specified. The bill would authorize the department, with the consent of the Boating and Waterways Commission, and contingent upon the county's implementation of the recommendations contained in the final business plan, to renegotiate or forgive any or all portions of the outstanding debt owed by the county to the department under the existing loan agreement. The bill would require the department to suspend collection of all loan and interest payments and penalties under the existing loan agreement for a maximum of 3 years.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(10) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 327 (AB 2594) R. Wright. Repeat Offender Prevention Project.⁶

Existing law establishes a 3-year demonstration project, known as the "Repeat Offender Prevention Project," which is designed to provide a comprehensive intervention program in selected counties, administered by the Department of the Youth Authority, to reduce recidivism among juvenile offenders. Existing law establishes criteria for the selection of minors to participate in, and standards for the implementation, operation, and evaluation of, the program.

This bill would revise and recast those provisions. Among other things, the bill would provide that the Board of Corrections, rather than the Department of the Youth Authority, shall administer the program. The bill would specify the counties to which it applies, and also revise the selection criteria for the participation of minors.

The bill would also appropriate \$4,000,000 from the General Fund to the Department of the Youth Authority to fund the program.

Ch. 328 (SB 1589) Committee on Budget and Fiscal Review. State government administration.

(1) This bill would declare the intent of the Legislature to make the necessary statutory changes to implement the Budget Act of 1998 relative to state government administration.

(2) Existing law specifies that all money in the Alcohol Beverage Control Fund derived as payments for original on-sale licenses shall be transferred to the General Fund on the order of the Controller.

This bill would provide instead that all original license fees paid on or after July 1, 1998, shall remain in the Alcohol Beverage Control Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law authorizes the imposition of various fees in connection with securities-related actions by the Commissioner of Corporations.

This bill would, until July 1, 2000, provide for the suspension of certain specified notice filing fees. Commencing July 1, 2000, the bill would provide for levying the maximum amount of those notice filing fees, except in any fiscal year in which the commissioner sets the fees below the maximum.

(4) Existing law appropriates \$15,000,000 to the Department of Commerce for a loan to the San Diego National Sports Training Foundation to develop and build a California Olympic Training Center.

This bill would require the Secretary of Trade and Commerce to remove a lien placed in connection with the loan.

(5) Existing law authorizes public agencies to develop energy conservation, cogeneration, and alternate energy supply sources at facilities of those agencies. "Public agency" for that purpose means specified local entities and any other political subdivision or public corporation in the state, except the state, the California State University, and the University of California.

The bill would delete those exceptions and include the state as a public agency for that purpose.

Existing law requires those public agencies to hold a public hearing and make certain findings relative to entering into specified contracts and leases, and prescribes criteria for the evaluation of the proposals.

This bill would authorize state agency heads to make those findings without a public hearing, and would authorize public agencies to use certain qualified energy companies and procedures contained in other provisions of existing law relating to energy service contracts entered into by state agencies.

(6) The existing Performance and Results Act of 1993 requires the Department of Finance to develop a performance budgeting pilot project, in accordance with specified principles, involving 4 state departments, including the Department of General Services and the Department of Consumer Affairs. Existing law sets forth the conditions pursuant to which the Department of General Services, notwithstanding existing statutes and regulations, is required or authorized, among other things, to carry out specified functions relating to state personnel matters, to prepay vendors when it is cost-beneficial to the department, to accept gifts and donations of real property without approval by the Director of Finance, and to procure goods from the private sector even though the goods may be available through the Prison Industry Authority. Existing law, until the later of the effective date of the Budget Act of 1998, or June 30, 1998, sets forth the conditions pursuant to which the Department of Consumer Affairs is required or authorized to carry out specified functions relating to state personnel matters, the procurement of goods and services, including data processing and telecommunications goods and services, and the prepayment of vendors when it is cost-beneficial. Existing law also exempts state agencies from a requirement that all state printing be done in the Office of State Printing, as specified. These provisions of existing law remain in effect until the effective date of the Budget Act of 1998 or June 30, 1998, whichever occurs later.

This bill would reenact the provisions relating to the Department of General Services and the Department of Consumer Affairs described above, but would also authorize the Department of Consumer Affairs to prepay vendors when it is a best value to the department. This bill would specify that these provisions shall remain in effect only until the effective date of the Budget Act of 1999 or June 30, 1999, whichever occurs later.

(7) Existing law authorizes the Director of General Services to purchase, exchange, or otherwise acquire real property and construct facilities in the County of Sacramento for the purpose of acquiring approximately 1,000,000 square feet of office and warehouse space for use by the Franchise Tax Board and other state agencies. Existing law limits the costs of the facilities to \$218,000,000.

This bill would additionally authorize the Director of General Services to retrofit existing buildings, as specified, for the purpose of acquiring and constructing office and warehouse space for use by state agencies, generally. The bill would require the Department of General Services to determine which agencies will occupy the space. The bill would state the intent of the Legislature to appropriate funds from the General Fund

to repay loans made for the project if the bonds authorized for the project are not sold. The bill would limit the costs of the facilities to \$211,000,000.

(8) Existing law establishes the California Space and Technology Alliance to foster the development of activities in California related to space flight. The alliance is organized as a nonprofit corporation with a board of directors composed of members selected by the alliance. Residents of San Luis Obispo and Santa Barbara Counties are required to be selected to fill 50% plus one of the director positions, with residents of other counties being selected to fill the remaining positions.

This bill would require instead that one-third of the board of directors be residents of northern California, one-third residents of southern California, and one-third residents of central California.

(9) Existing law provides for the California Space Flight Competitive Grant Program administered by the California Space and Technology Alliance and the Highway to Space Competitive Grant Program administered by the Western Commercial Space Center. Applications for grants under each program are evaluated according to specified criteria by an impartial review panel established by the respective entity. Each review panel compiles a final, consolidated list of grant applications ranked by degree to which each meets the criteria of the respective program, and forwards the list to the Secretary of Trade and Commerce for awarding of grant funding.

This bill instead would provide that each review panel shall compile a preliminary list of grant applications for projects determined to be qualified under the criteria of the respective program, and submit the list to a coalition composed of the review panel, the alliance or the center, as appropriate, and the Trade and Commerce Agency, each of which would have one vote. It would provide that each coalition shall rank grant applications on the respective preliminary list by the degree to which each meets the criteria, and provide a final, consolidated list to the Secretary of Trade and Commerce for awarding of grant funding, to the extent funds are available, under the respective program.

(10) Existing law requires an electric corporation that sells, leases, assigns, mortgages, or otherwise disposes or encumbers the whole or any part of its electric plant, to first secure from the Public Utilities Commission an order authorizing it to do so.

This bill would require the commission to approve the closure or acquisition of bayside fossil fueled electric generation and associated transmission facilities that are closed pursuant to agreement with local governmental entities or acquired by those local governmental entities, using appropriated state funds in the Budget Act of 1998, as specified.

(11) Existing law appropriates, without regard to fiscal years, \$3,500,000 from the General Fund as a loan to the Secretary of State for the purposes of implementing and administering the statewide system to facilitate removal of duplicate or prior voter registrations, to facilitate the reporting of election results and voter and candidate information, and to otherwise administer and enhance election administration. Existing law requires this loan to be repaid not later than June 30, 1999, upon those terms and conditions deemed appropriate by the Director of Finance.

This bill would extend the time period for the repayment of the loan to December 31, 2000, and this extension would constitute an appropriation.

(12) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 329 (AB 2779) Aroner. Budget Act implementation: social services.

Existing law establishes the Department of Community Services and Development.

This bill would require that department to contract with, and allocate funds to, citizenship assistance providers to assist legal noncitizens with the naturalization process, and requires those citizenship assistance providers to provide that department with certain information periodically.

Existing law, known as the Child Care and Development Services Act, requires, among other things, that the Superintendent of Public Instruction establish a fee schedule for families utilizing prescribed child care and development services.

This bill would require that, for purposes of determining the amount of a family fee for these services, prescribed social security income benefits and state supplemental program benefits, not be included as income.

Under the existing Child Care and Development Services Act, "income eligible" means that a family's adjusted monthly income is at or below 75% of the state median income, adjusted for family size, and adjusted annually.

This bill would require that, for purposes of this definition, prescribed federal Supplemental Security Income/State Supplementary Program for the Aged, Blind, and Disabled (SSI/SSP) benefits not be included as income.

Under the existing Child Care and Development Services Act, eligibility requirements are established for participants in the CalWORKs program.

This bill would provide that current CalWORKs recipients are eligible to receive child care services under the Child Care and Development Services Act as long as they continue to receive aid under the CalWORKs program or any successor program.

Under the existing Child Care and Development Services Act, county welfare departments are responsible for the management of the 1st stage during which a family participating in the CalWORKs program receives a child care subsidy. County welfare departments are required to move recipients out of this 1st stage as soon as possible after the county determines that the need for child care is stable.

This bill would require that former CalWORKs recipients who cannot be transitioned out of the first stage of child care because no funded slot is available are eligible to receive this child care for up to a total of 24 months after they leave cash aid, or until they are otherwise ineligible, thereby imposing a state-mandated local program.

Under the existing Child Care and Development Services Act, the 2nd stage of child care begins when the county determines that the recipient's work or approved work activity is stable or when a recipient is transitioning off of aid and child care is available through a local 2nd stage program. Existing law prohibits any family from receiving 2nd stage child care beyond 2 years after the family is no longer eligible for aid.

This bill would require that former CalWORKs recipients be eligible to receive child care in the first stage and the 2nd stage for up to a total of no more than 24 months after they leave cash aid, or until they are otherwise ineligible within that 24-month period, thereby imposing a state-mandated local program.

Under the existing Child Care and Development Services Act, the 3rd stage of child care begins when a funded space is available for CalWORKs recipients and persons who received a lump-sum diversion payment and former CalWORKs recipients who are regularly employed at a wage that does not exceed 75% of the state median income.

This bill would instead provide that the 3rd stage of child care begins when a funded space is available and further provide that CalWORKs recipients are eligible for the 3rd stage of child care.

Existing law provides for the funding of providing job training of CalWORKs program benefits recipients by the State Department of Education and the State Department of Social Services.

This bill would require that child care provider job training provided to CalWORKs program benefits recipients funded by the State Department of Education or the State Department of Social Services include information on becoming a licensed child care provider.

Existing law provides for a grant program, administered by the State Department of Health Services, under which grants are made to adult day health care centers.

Existing law provides that a grant under this program shall not exceed \$50,000.

This bill would increase this amount to \$100,000 in certain circumstances.

Existing law provides that each child care provider licensed by the State Department of Social Services who is compensated with funds under provisions of federal law, with certain exceptions, shall be registered as a trustline provider, subject to criminal background records checks.

This bill would apply that requirement, instead, to child care providers who receive compensation under provisions of state law providing for child care for recipients of benefits under the CalWORKs program.

Existing law provides for the distribution of 85% of federal welfare-to-work funds by the Employment Development Department to private industry councils or alternative entities designated by the Governor and the remaining 15% to state and local projects that will assist in moving eligible participants into unsubsidized employment.

Existing law provides that the unit of general local government or the unit of local government that is a member of a consortium shall be liable to the department for all those federal welfare-to-work funds that are not expended in accordance with state and federal requirements.

This bill would limit that liability to the 85% of the funds distributed to private industry councils or alternative entities.

Existing law establishes the Employment Training Panel, requires it to administer certain provisions for the provision of employment training services, and authorizes it to allocate money in the Employment Training Fund for various purposes, and specifies that the panel's administrative costs for the 1997-98 fiscal year, with certain exceptions, shall not exceed 15% of the amount annually appropriated for expenditure by the panel.

This bill would extend that limitation to the 1998-99 fiscal year.

Existing law provides for the enforcement of child support obligations and for the collection of those obligations through state and local government entities.

This bill would require the Health and Welfare Agency and the State Department of Social Services to develop a linked statewide automated consortium-based data processing and information retrieval system for the purpose of child support enforcement, would provide for the implementation of specified data systems, and would provide for the participation of eligible county consortiums. By requiring counties to participate in the program, the bill would result in a state-mandated local program.

Existing law provides for the annual adjustment of benefits under the CalWORKs program, and excepts certain periods from those adjustments.

This bill would revise certain dates on which those adjustments shall be made effective, and would suspend the adjustments during specified fiscal years if there has been no increase in tax relief.

Existing law provides for the payment of providers of foster care for children under the CalWORKs AFDC-FC foster care program.

This bill would limit the payment of foster care benefit for children placed in the home of a relative.

Existing law provides for the development and implementation of a statewide electronic benefits transfer system and provides for the management and operation of the system by counties.

This bill would revise the program to specify that the state shall be responsible for procuring and contracting for a statewide electronic benefits transfer system, and would specify that the Health and Welfare Agency Data Center shall be the project manager of the system.

Existing law provides for the State Supplementary Program for the Aged, Blind and Disabled (SSP), which requires the State Department of Social Services to contract with the United States Secretary of Health and Human Services to make payments to SSP recipients to supplement Supplemental Security Income (SSI) payments made available pursuant to the federal Social Security Act.

This bill would require, commencing January 1, 1999, an increase in the schedule of payments provided under the SSP program. Since the SSP program is funded through a continuous appropriation, this bill, by increasing the amount continuously appropriated, would result in an appropriation.

This bill would, until July 1, 2000, also require the department to establish a program for any legal immigrants losing SSI/SSP eligibility due to Public Law 104-193 in order to provide them with the same level of cash assistance to which they would have been entitled under the SSI/SSP program.

Existing law provides for the county-administered In-Home Supportive Services (IHSS) program, under which qualified aged, blind, and disabled persons are provided with services in order to permit them to remain in their own homes and avoid institutionalization.

This bill would provide for the payment of a supplementary benefit under the IHSS program to any eligible aged, blind, or disabled person who is receiving Medi-Cal personal care services and who would otherwise be deemed a categorically needy recipient under the IHSS program.

Existing law provides that, for the 1997–98 fiscal year, if projected costs for outpatient drug services under the Medi-Cal program exceed \$45,000,000 of General Fund money, then the outpatient drug free services shall not be a Medi-Cal benefit.

This bill would extend that limitation to the 1998–99 fiscal year.

Existing law includes personal care services, when provided to a categorically needy person and to persons who would be eligible for Medi-Cal benefits but for the provisions of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, as a covered benefit under the Medi-Cal program.

This bill would exclude from coverage for those benefits persons who would be eligible for Medi-Cal benefits but for the provisions of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 and would include medically needy aged, blind, or disabled persons under the scope of the personal care services provided under the Medi-Cal program, subject to budgetary limitations.

Existing law provides that, on and after July 1, 1998, the State Department of Social Services shall establish a state incentive for child support collections, for counties that elect to participate.

Existing law requires the office of the Legislative Analyst, in consultation and collaboration with specified interested groups, to prepare a performance-based incentive program, using a flat rate, for the 1998–99 fiscal year and that, for subsequent fiscal years, shall mirror the federal incentive plan, or the most recent draft of the federal plan.

Under existing law, the department shall assess on at least an annual basis each county's compliance with federal and state child support laws and regulations in effect for the time period being reviewed, in accordance with specified eligibility requirements, in order for counties to receive state incentives for child support collections. Existing law provides for corrective action to be taken by a county in the event that disproportionate representation is found in the county's pool of noncompliant cases.

This bill would revise state child support collection incentive provisions, as well as the manner in which the department assesses county compliance, and would delete the provisions of existing law relating to the duties of the office of the Legislative Analyst with respect to the preparation of a performance-based incentive program. This bill would state the legislative intent that the state child support incentive for any county that elects to receive the incentive shall be between 4% and 13% of the county's child support collections. The bill would declare that in the event that the federal government imposes a penalty on California's child support program for its failure to implement an automated child support system within the time required by specified federal law, no part of the penalty shall be assessed against Los Angeles County, except as specified in the bill.

Existing law provides for a demonstration project for the provision of placement services for children who are exposed to alcohol or drugs or who are HIV positive.

This bill would establish a program for special training and services to facilitate the adoption of children who are HIV positive or who have a condition or symptoms resulting from controlled substance abuse by the mother and who are dependent children of the court or who have an adoption case plan and resides with a preadoptive or adoptive caregiver. The bill would specify that preadoptive parents trained by health care professionals may provide specialized in-home health care to children placed by the county pursuant to certain procedures, and would appropriate \$59,000 from the General Fund to the State Department of Social Services to fund the cost of state administration of the program.

Existing law requires each county to provide aid and health care benefits to its indigent residents not supported by other means. These county programs are referred to as county general assistance programs.

Existing law requires that each county provide a minimum standard of aid under its general assistance program in accordance with specified requirements, except that a county board of supervisors may reduce the county's standard of aid, as prescribed, if the Commission on State Mandates makes a finding that meeting the required minimum standard of aid would result in significant financial distress to the county.

This bill would permit a county board of supervisors to continue the reduced standard of aid adopted pursuant to these provisions beyond the time period allowed pursuant to existing law if the county meets specified requirements.

Existing law authorizes counties to provide services for at-risk youth.

Existing law, subject to the Budget Act, contains a schedule of the amount to be allocated to each county for this purpose.

This bill would revise this schedule.

Existing law provides for the local administration of the federal Food Stamp Program, through which eligible individuals are provided food stamps.

This bill would, effective September 1, 1998, also require that, to the extent allowable by federal law, income, resources, and deductible expenses of any household member who is rendered ineligible for food stamp benefits pursuant to specified provisions of federal law shall be excluded when calculating federal food stamp benefits.

Existing law requires that the department establish a food assistance program for legal immigrants who are 65 years of age or older or children losing eligibility for food stamp benefits due to Public Law 104-193. Existing law requires eligible applicants to have been legally present in the United States prior to August 22, 1996.

This bill would, effective September 1, 1998, make those provisions applicable to those persons regardless of age and would revise eligibility requirements for this program.

This bill would also require the State Department of Social Services to establish a county or county consortia administered program to provide cash assistance to aged, blind, and disabled immigrants who are not citizens and would establish eligibility requirements for the program.

Existing law provides for the allocation of funds appropriated for the Child Abuse, Intervention, and Treatment program.

This bill would revise the allocation of those funds to use a portion of those funds for oversight purposes, and, by reallocating appropriated funds, this bill would result in an appropriation.

Existing law with respect to human services provides for various social service programs with respect to specified classes of individuals.

This bill would enact the California Families and Children Home Visit Program pursuant to which counties that choose to participate would submit to the Office of Child Abuse Prevention a plan for implementing a home visit program, containing certain elements, to aid at-risk families. This bill would authorize the Office of Child Abuse Prevention to evaluate program implementation plans and to award program operation grants to applicants meeting specified requirements.

Existing law establishes the Emergency Food Assistance Program Advisory Board, to provide assistance to the State Department of Social Services in the operation of the Emergency Food Assistance Program.

This bill would extend the duties of the board, and would increase the membership of the board from 18 to 22.

Existing law contains various provisions relating to the Habilitation Services Program, administered by the Department of Rehabilitation, under which supported employment and other services are provided to persons with developmental disabilities.

Under existing law, provisions relating to the submission and approval of proposals for funding supported employment programs and components under the Habilitation Services Program would be repealed on January 1, 1999.

This bill would extend these provisions for one year. The bill would also make changes in Habilitation Services Program definitions and ratesetting provisions.

Existing law provides for the grant of awards to independent living centers. This bill would revise the method of calculating and allocating the awards.

Existing law provides for the appropriation of funds through the annual Budget Act for implementation of various state functions.

This bill would specify the method of allocation of, and limit the use and allocation of, funds appropriated by the Budget Act of 1998 for the expansion of community-based services, adult day health care programs, and Alzheimer's day care resource centers.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 330 (SB 1564) Schiff. Education Trailer Bill to the Budget Act of 1998.⁷

(1) Under the existing Child Care and Development Services Act, the Superintendent of Public Instruction is charged with the responsibility of developing standards for the implementation of child care and development programs.

This bill would require the State Department of Education to develop prekindergarten learning development guidelines on or before June 30, 1999.

(2) Existing law, known as the Child Care and Development Services Act, requires, among other things, that the Superintendent of Public Instruction establish a fee schedule for families utilizing prescribed child care and development services.

This bill would require that, for purposes of determining the amount of a family fee for these services, prescribed social security income benefits and state supplemental program benefits, not be included as income.

(3) Under the existing Child Care and Development Services Act, "income eligible" means that a family's adjusted monthly income is at or below 75% of the state median income, adjusted for family size, and adjusted annually.

This bill would require that, for purposes of this definition, prescribed social security income benefits and state supplemental program benefits, not be included as income.

(4) Under the existing Child Care and Development Services Act, eligibility requirements are established for participants in the CalWORKs program.

This bill would provide that current CalWORKs recipients are eligible to receive child care services under the Child Care and Development Services Act as long as they continue to receive aid under the CalWORKs program or any successor program.

(5) Under the existing Child Care and Development Services Act, county welfare departments are responsible for the management of the 1st stage during which a family participating in the CalWORKs program receives a child care subsidy. County welfare departments are required to move recipients out of this 1st stage as soon as possible after the county determines that the need for child care is stable.

This bill would require that former CalWORKs recipients who cannot be transitioned out of the 1st stage of child care because no funded slot is available are eligible to receive this child care for up to a total of 24 months after they leave cash aid, or until they are otherwise ineligible, thereby imposing a state-mandated local program.

(6) Under the existing Child Care and Development Services Act, the 2nd stage of child care begins when the county determines that the recipient's work or approved work activity is stable or when a recipient is transitioning off of aid and child care is available through a local 2nd stage program. Existing law prohibits any family from receiving 2nd stage child care beyond 2 years after the family is no longer eligible for aid.

This bill would require that former CalWORKs recipients be eligible to receive child care in the 1st stage and the 2nd stage for up to a total of no more than 24 months after they leave cash aid, or until they are otherwise ineligible within that 24-month period, thereby imposing a state-mandated local program.

(7) Under the existing Child Care and Development Services Act, the 3rd stage of child care begins when a funded space is available for CalWORKs recipients and persons who received a lump-sum diversion payment and former CalWORKs recipients who are regularly employed at a wage that does not exceed 75% of the state median income.

This bill would instead provide that the 3rd stage of child care begins when a funded space is available and further provides that CalWORKs recipients are eligible for the 3rd stage of child care.

(8) Existing law requires that any funds in the State School Site Utilization Fund, including interest, that are not subject to return to a school district pursuant to a prescribed provision shall revert to the Deferred Maintenance Fund.

This bill would amend this provision to make a technical correction in a statutory cross-reference.

(9) Existing law, as set forth in Section 8 of Article XVI of the California Constitution, requires the state to apply a minimum amount of funding for each fiscal year for the

NOTE: Superior numbers appear as a separate section at the end of the digests.

support of school districts, as defined, and community college districts (hereafter the state's minimum funding obligation under Section 8). Existing law directs that the amount of state funding appropriated in each fiscal year comply with the state's minimum funding obligation under Section 8, and be distributed to school districts, as defined, to community college districts, and to state-operated schools according to a prescribed formula.

This bill would specify that this provision does not apply to the 1998-99 fiscal year.

(10) Existing law provides incentive funding for school districts that participate in prescribed programs involving the adoption by these participating school districts of extended instructional days or extended instructional years.

This bill would provide that any school district that elected not to participate in either or both of these longer-day and longer-year incentive funding programs may, under certain circumstances, commence participation in, and begin receiving funding for, either or both of these programs in the 1998-99 and 1999-2000 fiscal years, on the same basis as if it had participated in the program or programs since July 1, 1984.

(11) Existing law establishes the Class Size Reduction Program to provide funding to school districts to reduce class size in kindergarten and in grades 1 to 3, inclusive, to not more than 20 pupils per certificated teacher. Existing law authorizes a school district applying to implement the Class Size Reduction Program in additional classes in the 1997-98 school year to request that a portion of the maximum operating funds for which the school district would be eligible if fully reducing class size in kindergarten and in grades 1 to 3, inclusive, be used for facilities-related costs necessary for new classes established under this program beyond those established in the 1996-97 school year.

This bill would extend this authority of a school district to use a portion of the maximum operating funds for facilities-related costs to the 1998-99 school year.

(12) Existing law, that provides a new funding formula for special education commencing in the 1998-99 fiscal year, requires computation of a special disabilities adjustment. Existing law requires the Office of the Legislative Analyst to conduct a study of the distribution of severe and costly disabilities and to submit a report of the findings to the appropriate policy and fiscal committees of the Legislature on or before June 1, 1998, to include a method to adjust the funding formula for special education in order to recognize the distribution of severe and costly disabilities among special education local plan areas.

This bill would delete the special disabilities adjustment, and instead, require the State Department of Education, in conjunction with the Office of the Legislative Analyst, to calculate an incidence multiplier for each special education local plan area by November 2, 1998, and require the Department of Finance to approve the final incidence multiplier for each special education local plan area by November 23, 1998. The bill would require the Superintendent of Public Instruction to calculate in the 1998-99 fiscal year and each fiscal year thereafter to and including the 2002-03 fiscal year, an adjusted entitlement for the incidence of disabilities for each special education local plan area using the incidence multiplier for each special education local plan area. The bill would provide that if insufficient funds are appropriated in the current fiscal year to fund the adjusted entitlement for the incidence of disabilities, the amount received by each special education local plan area shall be prorated.

(13) Existing law, that provides a new funding formula for funding special education commencing in the 1998-99 fiscal year, includes certain federal preschool funds available to the state within the computation of general purpose special education funding for the 1998-99 fiscal year and each fiscal year thereafter.

This bill would delete the inclusion of those federal preschool funds from the calculation.

(14) Existing law provides state funding for early education for individuals with exceptional needs.

This bill would require an adjustment to be made in the 1998-99 fiscal year of the instructional personnel service unit rates used to compute state funding for early education for individuals with exceptional needs. This bill would require that property taxes used to fund a program for individuals with exceptional needs younger than 3 years of age in the special education local plan area for the 1997-98 fiscal year be excluded from these calculations.

(15) Existing law requires the Superintendent of Public Instruction to calculate allocations to special education local plan areas based on the average daily attendance reported for the special education local plan area, as prescribed.

This bill would revise the growth adjustment made for special education local plan areas with increasing average daily attendance.

(16) Existing law sets forth prescribed calculations to be made by the Superintendent of Public Instruction in computing the apportionment for a special education local plan area.

This bill would delete a provision containing some of these calculations.

(17) This bill would require the State Department of Education to calculate an "incidence multiplier" for each special education local plan area using the definition, methodology, and data provided in a prescribed report.

This bill would make an appropriation by requiring the State Department of Education to transfer from a specified amount in the Budget Act of 1998 for special education instruction to a specified amount in the Budget Act of 1998 for early education programs for individuals with exceptional needs, the amount of funding the department determines was received by a special education local plan area from property taxes in the 1997-98 fiscal year for early education programs for individuals with exceptional needs.

(18) Existing law requires the Superintendent of Public Instruction to design and implement a statewide pupil assessment program, as prescribed. Existing law with respect to this program requires, among other things, the development of a contract with a publisher or publishers, after the approval of statewide rigorous content and performance standards by the State Board of Education.

This bill would delete the reference to performance standards in this context.

(19) Existing law requires the State Board of Education to adopt statewide academically rigorous content and performance standards in prescribed core curriculum areas, and requires the State Department of Education to perform prescribed functions with regard to the adoption of these standards by the board. Existing law requires the State Board of Education to adopt assessment instruments that are aligned with the statewide content and performance standards to be adopted by the board, and prohibits the board from awarding contracts for any core curriculum area until after adoption of statewide content and performance standards for that core curriculum area. Existing law also authorizes the State Board of Education to convene an advisory panel to assist the board in the preparation of a request for proposals to develop instruments for use as assessments of applied academic skills and in the review and rating of proposals that are submitted.

This bill would require the State Board of Education to adopt statewide performance standards, and to complete the development of pupil assessments, in core curriculum areas on or before prescribed deadlines. The bill would amend the provision that prohibits the State Board of Education from awarding contracts for any core curriculum area until after adoption of statewide content and performance standards for that core curriculum area to provide that the contracts would not be awarded until after adoption of statewide content standards.

(20) Existing law establishes the Standardized Testing and Reporting (STAR) Program, under which achievement tests are administered to pupils in grades 2 to 11, inclusive. Under the STAR Program, pupils of limited English proficiency may take a 2nd achievement test in their primary language.

This bill would require that primary language tests administered under this program be subject to prescribed provisions relating to the conditions under which individual results of these tests may be released or reported. The bill would also require that these primary language tests produce individual pupil scores that are valid and reliable.

(21) Existing law requires publishers, in order to be eligible for consideration of their tests for use under the STAR program to agree, in writing, to enter into a standard agreement with all school districts in the state that includes a payment schedule and conditions prescribed by the State Board of Education.

This bill would require agreement each year, and establishes additional procedures for partial payments under certain circumstances.

(22) Existing law requires the State Board of Education to adopt a nationally normed test and to consider prescribed criteria, including alignment with academically rigorous content and performance standards adopted by the State Board of Education.

This bill would delete a reference to performance standards in this context.

(23) Under existing law, during the month of March, April, or May, the governing board of each school district maintaining any of grades 5, 7, and 9 is required to administer to each pupil in those grades the physical performance test designated by the State Board of Education.

This bill would require the State Department of Education to compile the results of the annual physical performance test and, on or before December 31 of each year, to submit a report to the Legislature and the Governor that compares the performance of California's pupils to national norms.

(24) Existing law expresses findings of the Legislature to the effect that there is a growing shortage of high quality classroom teachers, that certain populations are particularly underrepresented in the teaching profession, and that the availability of financial aid and loan repayment assistance are often particularly important considerations for students from underrepresented postsecondary student populations.

This bill would amend these findings to delete the references to underrepresented postsecondary student populations.

(25) Existing law establishes an assumption program of loans for education under which any person enrolled in a participating institution of postsecondary education, or any person who agrees to participate in a teacher trainee or teacher internship program, is eligible to receive a conditional warrant for loan assumption, to be redeemed pursuant to a prescribed procedure upon becoming employed as a teacher. Existing law requires, as one of the conditions for eligibility in the loan assumption program, that the applicant agree to teach in a public school for at least 3 consecutive academic years after obtaining a teaching credential.

This bill would instead require that an applicant agree to teach in a public school for at least 4 consecutive academic years after obtaining a teaching credential.

(26) The existing assumption program of loans for education provides for the progressive assumption of the amount of the loans over 3 years of teaching service, up to a total loan assumption of \$8,000.

This bill would provide for the assumption of an additional \$3,000 of certain participant's outstanding liability after that program participant has completed 4 consecutive school years of teaching service, up to a total loan assumption of \$11,000.

(27) The existing assumption program of loans for education includes a provision expressing the intent of the Legislature that, commencing with the 1985-86 school year, all persons eligible to receive conditional warrants for loan assumptions under the program shall be persons who need to complete training or coursework in order to be fully credentialed to teach in a designated subject matter shortage area, or in schools serving a large population or students from low-income families. The program also includes a provision requiring the Student Aid Commission to distribute student applications and to enter into institutional agreements with participating postsecondary institutions.

This bill would provide that, notwithstanding these provisions, for the purposes of the recruitment of teachers from outside California, the Student Aid Commission shall annually distribute 500 warrants to school districts to be awarded to out-of-state teachers who meet certain requirements.

(28) The existing assumption program of loans for education includes various provisions requiring a certain amount of warrants to be awarded to applicants who agree to obtain teaching credentials in designated shortage areas.

This bill would provide that, within the number of warrants so awarded, the Student Aid Commission shall annually distribute a minimum of 2,000 awards to applicants who agree to obtain a teaching credential in mathematics or science. The bill would require the commission to adopt rules and regulations regarding the reallocation of these warrants in certain circumstances.

(29) The existing assumption program of loans for education provides that, in the event that a program participant fails to complete a minimum of 3 consecutive school years of classroom instruction as required under the program, the participant is required

to assume full liability for all remaining student loan obligations, except for a situation in which the program participant is unable to complete one of the 3 years of service due to serious illness, pregnancy, or other natural causes, in which case the participant receives a deferral of the resumption of full liability for a period not to exceed one calendar year.

This bill would amend this provision so that it refers to 4 years of teaching service instead of 3.

(30) The existing assumption program of loans for education requires participating postsecondary institutions to sign an institutional agreement with the Student Aid Commission, certifying its intent to administer the loan assumption program according to all applicable published rules, regulations, and guidelines, and to make special efforts to notify students regarding the availability of the program, particularly those students who are members of populations underrepresented in the teaching profession.

This bill would delete the language relating to the special efforts to notify students who are members of underrepresented populations regarding the availability of the program, and instead provide for special efforts to notify economically disadvantaged students.

(31) Under the existing assumption program of loans for education, beginning no later than the 1986–87 school year, and each school year thereafter, the Student Aid Commission is required to issue warrants for the assumption of up to 500 student loans for eligible program participants.

This bill would instead require that, beginning no later than the 1998–99 school year, and each school year thereafter, the Student Aid Commission issue warrants for the assumption of up to 4,500 student loans for eligible program participants.

(32) Existing law establishes an assumption program of loans for students planning to enter the teaching profession.

This bill would establish a Graduate Assumption Program of Loans for Education for the purpose of encouraging students to complete their graduate educations and serve as faculty at an accredited California college or university.

The bill would set forth eligibility criteria for participation in the program.

(33) Existing law establishes the State Graduate Fellowship Program with prescribed purposes and eligibility criteria.

This bill would delete this program.

(34) Existing law requires the Chancellor of the California Community Colleges to calculate the revenue level of each community college district in accordance with a prescribed procedure.

This bill would require that, notwithstanding any other provision of law, if local revenues, as defined, for community colleges exceed the estimates included in the annual Budget Act for these revenue sources, an equivalent amount of general purpose funds appropriated for local assistance to the Board of Governors of the California Community Colleges in a prescribed item of that budget act shall only be allocated to community college districts for one-time purposes.

(35) Under existing law, the California Community Colleges are administered by the Board of Governors of the California Community Colleges.

This bill would establish the Partnership for Excellence program for the purpose of achieving annual performance goals and improving student learning and success in the California Community Colleges. Under the program, the Board of Governors of the California Community Colleges would develop goals and outcome measures to improve student success. Under the program, the Chancellor of the California Community Colleges would allocate funding to participating districts pursuant to appropriations in the annual Budget Acts. The program would be repealed as of January 1, 2005.

(36) This bill would establish in the Neurology Department at the University of California, San Francisco, a research project on substance abuse, with the major goal of the research to identify new pharmaceutical agents to prevent or treat alcohol and drug addiction.

(37) Existing law requires the State Department of Education to allocate funds to county offices of education for implementation of the tobacco use prevention program. Existing law sets forth a schedule for the amount to be allocated to county offices of education based on the average daily attendance (ADA) credited to all elementary, high, and unified school districts in the county and the county superintendent of schools

under which a county with over 400,000 units of ADA receives 30¢ per unit of ADA and a county with more than 100,000 and less than 400,000 units of ADA receives 65¢ per unit of ADA.

This bill would increase the number of units of ADA from 400,000 to 555,000 as used in the schedule for the amount of allocation to be made for implementation of the tobacco use prevention program.

(38) Existing law establishes the Commission for Establishment of Academic Content and Performance Standards, consisting of 21 members. Under existing law, the provision establishing the commission becomes inoperative on July 1, 1999, and is repealed as of January 1, 2000.

This bill would instead repeal, as of January 1, 1999, the provision establishing the commission.

(39) Existing law appropriates \$500,000 from the General Fund to the County Office Fiscal Crisis and Management Assistance Team (FCMAT) for the purposes of conducting the assessments and completing the recovery plans relating to emergency loans that were made to the Compton Unified School District.

This bill would declare that this appropriation shall be deemed to count towards the state's minimum funding obligation under Section 8 for the 1997-98 fiscal year.

(40) This bill would provide that, notwithstanding any other provision of law, any and all funds appropriated in 11 prescribed items of the Budget Act of 1998, and an amount appropriated for purposes of revenue limit adjustments for school districts, are in lieu of the amounts that would otherwise be required to be appropriated pursuant to any other provision of law.

(41) Existing law establishes the State School Deferred Maintenance Fund as a continuously appropriated fund and requires the State Allocation Board to apportion funds to school districts from the State School Deferred Maintenance Fund on a matching basis up to a calculated maximum amount, to the extent funds are available.

This bill would transfer \$100,000,000 from the General Fund to the State School Deferred Maintenance Fund, thereby making an appropriation, for allocation by the State Allocation Board to school districts for high priority, critical needs projects, as defined by the board to mean projects that school districts were unable to complete with funds provided pursuant to the matching fund above, including, but not limited to, removal of underground storage tanks, roof, maintenance and replacement, and projects required to ensure the health and safety of pupils.

Section 8 of Article XVI of the California Constitution requires that the moneys applied by the state for the support of school districts and community colleges shall not be less than a specified percentage of General Fund revenues.

This bill would declare that this amount is to be applied toward the minimum funding requirements for the 1997-98 fiscal year for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(42) This bill would appropriate \$75,142,000 from the General Fund for transfer to Section B of the State School Fund for the purpose of providing one-time grants to community college districts for the 1998-99 fiscal year, as prescribed.

(43) This bill would appropriate \$266,000,000 from the General Fund, as follows:

(a) \$86,000,000 to the Superintendent of Public Instruction, without regard to fiscal year, exclusively for allocation for installation grants for the Digital High School Program.

(b) \$180,000,000 for transfer to Section A of the State School Fund, for allocation by the Superintendent of Public Instruction for the purpose of providing funds to each regular public school in the state for the 1998-99 fiscal year. This amount would be allocated on the basis of units of average daily attendance and used in accordance with proposals of schoolsite councils, schoolwide advisory groups, or school support groups, as approved by school district governing boards, as prescribed.

(44) Existing law provides that the fee to be levied by the Commission on Teacher Credentialing for the issuance and renewal of teaching and service credentials to be up to \$70.

This bill would provide that, notwithstanding this provision, the fee for the issuance and renewal of teaching credentials shall be \$60, and the fee for emergency substitute permits shall be \$55, for the 1998-99 fiscal year.

(45) Under the proposed 1998 Budget Bill, certain funds are appropriated to the State Department of Education from the Federal Trust Fund for the purpose of adult education.

This bill would appropriate \$12,500,000 from the General Fund, for transfer to Section A of the State School Fund, for allocation by the Superintendent of Public Instruction to local education agencies, on a one-time basis, for the purpose of providing services to CalWORKs-eligible recipients, in accordance with the bill. This appropriation would become operative only if a prescribed appropriation made for the same purpose in the Budget Act of 1998 does not become operative.

This bill would require that these funds be used only for educational activities for CalWORKs-eligible recipients and would set forth conditions under which these funds could be expended by local education agencies.

(46) Existing law establishes various adult education programs and establishes various regional occupational centers and programs throughout the state.

This bill would require the State Department of Education to develop a data and accountability system to obtain information on education and job training services provided through state-funded adult education programs and regional occupational centers and programs.

(47) The Education Trailer Bill to the Budget Act of 1996, among other things, appropriated \$387,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to each regular public school meeting prescribed requirements relating to the development of a proposal for the expenditure of the money by a schoolsite council or other school support groups.

This bill would provide that the Rio Dell Elementary School District and the Silver Fork Elementary School District are eligible to expend these funds if the schoolsite councils or schoolwide advisory groups of the respective school districts approve a proposal no later than January 1, 1999.

(48) The Education Trailer Bill to the Budget Act of 1996, among other things, appropriated \$2,000,000 from the General Fund for allocation to the Superintendent of Public Instruction to the Golden Gate Institute for Indigenous Cultures and to the California Indian Museum for the purpose of assisting in the retrofit and renovation of designated buildings at the Presidio in San Francisco.

This bill would provide that, notwithstanding this provision, these funds are available for expenditure for the costs of establishing the California Indian Museum.

(49) This bill would appropriate \$79,500,000 from the General Fund to the Superintendent of Public Instruction, for allocation as follows:

(a) \$71,500,000 for a program to provide funding for science laboratory materials and equipment.

(b) \$5,000,000 for a joint-use libraries program, in accordance with a prescribed schedule.

(c) \$3,000,000 for funding regional demonstration pilot programs of technical assistance to teach school districts with Healthy Start sites how to develop strategic plans and materials specifically designed to support corporate funding development.

(50) This bill would appropriate \$10,103,572 from the General Fund to the State Controller, for reimbursement of claims received from certain school districts for costs of court-ordered and voluntary desegregation programs.

Section 8 of Article XVI of the California Constitution requires that the moneys applied by the state for the support of school districts and community colleges shall not be less than a specified percentage of General Fund revenues.

This bill would declare that this amount is to be applied toward the minimum funding requirements for the 1997-98 fiscal year for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(51) This bill would require the Superintendent of Public Instruction to apply the same deficit factor to school district and county office of education revenue limits for the 1998-99 fiscal year as was used for those calculations in the 1997-98 fiscal year, as prescribed.

(52) This bill would reappropriate \$78,425,000 from the Proposition 98 Reversion Account, for allocation as follows:

(a) \$30,000,000 to the State Department of Education for allocation for school-based mathematics staff development.

(b) \$1,053,000 to fund testing for the presence of lead in drinking water in public elementary and secondary schools.

(c) \$4,152,000 for allocation to the Oxnard Union High School District for the purpose of extending the school year.

(d) \$5,000,000 for a program that provides financial incentives to teachers for achieving certification from the National Board for Professional Teaching Standards.

(e) \$6,000,000 for school districts for shortfalls in year-round incentive grants.

(f) \$5,500,000 to implement the model budget and accounting system.

(g) \$3,400,000 to the County Office Fiscal Crisis and Management Assistance Team for the purpose of implementing the California School Information Services program.

(h) \$10,000,000 for allocation to school districts and county offices of education that adopt a community policing program, as prescribed.

(i) \$4,130,000 for the costs associated with the settlement of the Long Beach Unified School District desegregation case.

(j) \$740,000 to the Moorpark Unified School District for transportation costs for the 1998–99 fiscal year.

(k) \$350,000 for allocation to the Napa Valley Unified School District for the Napa County Regional Occupational Center/Program.

{L1} \$2,600,000 for allocation to a consortium of county offices of education, on a one-time basis, for 3-year grants, beginning with the 1998–99 fiscal year, for the purpose of supporting technical assistance and focused group training to teach school districts how to maximize reimbursements of federal funds for Medi-Cal services and case management.

(m) \$5,500,000 for transfer to the Charter School Revolving Loan Fund.

(53) This bill would appropriate \$5,130,000 from the General Fund to the Superintendent of Public Instruction, for allocation as follows:

(a) \$110,000 to the Pasadena Unified School District for the purchase of textbooks for a tutoring program and for support of the Pasadena Youth Center, as prescribed.

(b) \$80,000 to the Santa Paula Unified School District for renovating a swimming pool.

(c) \$50,000 to the Montebello Unified School District for purchasing school security devices.

(d) \$180,000 to the San Luis Obispo County Office of Education for support of the Port San Luis Marine Center.

(e) \$180,000 to the Los Angeles County Office of Education for developing middle school civic education curricula.

(f) \$150,000 to the Temple City Unified School District for support of the Temple City Arts Academy.

(g) \$200,000 for allocation on a grant basis to local educational agencies for support of home economics careers programs, pursuant to legislation enacted in the 1997–98 Regular Session.

(h) \$20,000 to the Ventura Unified School District for modernizing the stadium at Buena High School.

(i) \$500,000 to the Rio School District for construction of the Rio Del Valle Gymnasium.

(j) \$500,000 to the Lucia Mar School District for constructing a performing arts center.

(k) \$300,000 to the Los Angeles Unified School District for support of the California Arts Initiative.

{L1} \$480,000 to the Santa Barbara High School District and its feeder elementary districts, the Sacramento City Unified School District, and the Western Placer Unified School District, for supporting community-wide school facilities planning pilot projects intended to result in the building of lower cost, higher quality schools.

(m) \$1,000,000 for allocation on a grant basis to local educational agencies for high school coaching training, pursuant to legislation enacted in the 1997–98 Regular Session.

(n) \$700,000 to the Los Alamitos Unified School District for support of the Los Alamitos High School for the Arts.

(o) \$100,000 to the San Diego City Unified School District for supporting the Home Instruction for Preschool Youngsters program.

(p) \$400,000 to the Santa Ana Unified School District for support of an arts and technology outreach program.

(54) This bill would reappropriate \$5,128,893 from the Proposition 98 Reversion Account to the Superintendent of Public Instruction, for allocation as follows:

(a) \$1,248,500, as divided among all single-school school districts in equal amounts, for purchase of laptop computers, as prescribed.

(b) \$30,000 to the San Bernardino County Office of Education for work in collaboration with the City of Rancho Cucamonga to support an after-school “at-risk youth” program.

(c) \$50,000 to the Santa Clara County Office of Education to support the development of educational networks among schools under the jurisdiction of the office.

(d) \$26,500 to the Alta-Dutch Flat Union School District to provide afternoon school busing service.

(e) \$350,000 to the Imperial County Office of Education to support a technology infrastructure project to link local schools through a local area network.

(f) \$375,000 to the Anaheim City School District to support the Anaheim Achieves community and school district collaborative program.

(g) \$650,000 to the Merced County Office of Education for establishing pilot programs linking education, employability skills, and job opportunities for at-risk youth in Merced County, as prescribed.

(h) \$50,000 to the Bellflower Unified School District to implement the Bellflower Against Gangs Program.

(i) \$75,000 to the ABC Unified School District to design and implement the Artesia Youth Academy to provide educational, leadership, and community services for pupils in grades 4, 5, and 6.

(j) \$473,893 to the Pasadena Unified School District for repayment of funds withheld as a result of an audit of average daily attendance for the school district’s kindergarten and prekindergarten programs in the 1995–96 fiscal year.

(k) \$500,000 to the County Office Fiscal Crisis and Management Team for implementing the recovery plan for the Compton Unified School District.

(L1) \$1,000,000 to the Glendale Unified School District to reimburse the school district for its costs incurred in modernizing facilities for public access to technology, including technology infrastructure projects, in connection with a joint-use Library Revitalization Project of the Edison School/Pacific Park Model Neighborhood Community.

(m) \$100,000, divided equally between the Burbank and Glendale unified school districts, to allow the school districts to participate in the Manufacturing Technologies Laboratory School to Work Program.

(n) \$200,000 to the Grossmont Union High School District for costs associated with an athletic facility at West Hills High School.

(55) This bill would appropriate \$70,000 from the General Fund to the Superintendent of Public Instruction, as follows:

(a) \$50,000 for providing scholarships to pupils participating in the California-Japan Scholars program.

(b) \$20,000 for coordination of community-wide facilities planning pilot projects.

(56) This bill would require the Superintendent of Public Instruction to certify to the Controller amounts that do not exceed the amounts needed to fund the revenue limits of school districts, as prescribed.

(57) The bill would specify 4 appropriations that would be available for expenditures for the purposes of prescribed statutes relating to the statewide pupil assessment program.

(58) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(59) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 331 (AB 858) Davis. Education: certification program of National Board for Professional Teaching Standards.

Existing law requires the governing board of a school district to employ for positions requiring certification qualifications, only persons who possess the qualifications for certification prescribed by law. Existing law sets forth the minimum requirements for the preliminary and professional multiple or single subject teaching credential.

This bill would establish the National Board for Professional Teaching Standards Certification Incentive Program to award grants to school districts for the purpose of providing one-time \$10,000 merit awards to teachers who are employed by school districts or charter schools, are assigned to teach in California public schools, and have attained certification from the National Board for Professional Teaching Standards. The State Department of Education would be required to administer the program and develop, in consultation with the Commission on Teacher Credentialing, certification and merit award information, criteria, procedures, and applications, all of which would be submitted to the State Board of Education for approval. Each school district would be required to make every effort to ensure that teachers employed by the district or by charter schools affiliated with the district are informed about the program and can acquire the necessary application and information materials. Applications would be submitted to school districts that would be required to certify that the applicant is employed by the district or a charter school operating under a charter granted by the school district and that the applicant has met all the program criteria. By requiring school districts to ensure teachers are informed about the program and to handle and act on applications, this bill would impose a state-mandated local program. The bill would require the State Department of Education to review and approve the applications.

This bill would require the issuance of a clear teaching credential to a teacher who is licensed to teach in a state other than California and who is certified by the National Board for Professional Teaching Standards.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 332 (AB 862) Ducheny. School libraries.

Existing law, the California Public School Library Protection Act, requires the State Department of Education to issue to qualifying school districts grants for the purpose of improving school libraries.

This bill would establish the California Public School Library Act of 1998, administered by the Superintendent of Public Instruction, which would provide for the transfer of certain funds appropriated in the annual Budget Act to the California Public School Library Protection Fund for apportionment to school districts for the support of a districtwide school library plan required by its provisions. The transferred funds would be appropriated for these purposes and for expenditure for library resources.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 333 (AB 1734) Mazzoni. Instructional strategies.

Existing law provides for the establishment and maintenance of subject matter projects by the Regents of the University of California, with the concurrence of the Trustees of the California State University, and the Superintendent of Public Instruction, to establish and maintain cooperative endeavors designed to strengthen the subject matter knowledge and enhance the instructional strategies in each subject area of teachers in the public schools. Existing law specifies priorities for funding subject matter projects and declares the intent of the Legislature that a project policy board be established within each subject matter project to assist in the administration of the

projects. Existing law declares the intent of the Legislature with respect to the criteria for approval of subject matter projects. Existing law makes those provisions inapplicable to any subject matter area that is specifically addressed by one or more subject matter projects already established in statute, but requires subject matter projects already established in statute to coordinate with programs and projects established by those provisions.

This bill would instead authorize the Regents of the University of California to establish and maintain cooperative endeavors designed to accomplish specified goals, with the approval of a 9-member Concurrence Committee, which the bill would establish. The bill would prescribe the duties of the Concurrence Committee regarding subject matter projects. The bill would require a 4-year independent evaluation of the effectiveness of the subject matter projects undertaken to be performed by a contractor selected pursuant to specified provisions to be reported to the State Board of Education, the Governor, and the Legislature by July 1, 2002, and would require an annual report of the preliminary results of this evaluation beginning July 1, 2000. The bill would prescribe the required components of the evaluation.

The bill would require that statewide subject matter projects accomplish specified goals. The bill would delete those provisions regarding the priority for funding subject matter projects, and would instead require that certain specified subject matter projects be funded. The bill would delete the statement of legislative intent regarding a project policy board, and would instead require, within each subject matter project, a project advisory board, composed as specified, to be established to perform specified duties. The bill would require the project advisory board of each statewide subject matter project to use specified criteria in recommending funding for local project sites.

This bill would make these provisions inoperative on June 30, 2002, and would repeal them as of January 1, 2003.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 334 (SB 12) O'Connell. Class size reduction.

Existing law, the Morgan-Hart Class Size Reduction Act of 1989, establishes the Program to Reduce Class Size in Grades 9 to 12, inclusive, requires the program to include only one grade level in the first fiscal year of implementation, and authorizes other grade levels to be phased in subsequent years. Existing law requires all courses that count toward completion of the graduation requirements and that are taught in any of the English, mathematics, social studies, or science departments in the grade level or levels that are included in the program to average no more than 20 pupils per certificated teacher, per class in the subject selected for state reimbursement. Existing law authorizes a school district to achieve that average with a 50% improvement toward that goal for the first fiscal year of funding for which a subject is chosen in a particular grade level.

This bill would establish a Program to Reduce Class Size in Two Courses in Grade 9. The bill would require certification that the course or the 2 courses in grade 9 included in the program count toward the completion of graduation requirements in English, mathematics, science, or social studies, provided that one of the courses is English. The bill would require certification of pupil enrollment in each grade 9 class included in the program, as determined pursuant to regulations. The bill would require any program that includes classes in grade 10, 11, or 12 and that was funded before June 30, 1998, to continue to be funded for those other classes, as specified, unless the school district elects to eliminate that program. The bill would eliminate the option of achieving an average of no more than 20 pupils per certificated teacher, per class in the subject selected for state reimbursement with a 50% improvement toward that goal for the first fiscal year of funding for which a subject is chosen in a particular grade level. The bill would require the Superintendent of Public Instruction to recommend, and the State Board of Education to adopt, regulations to implement this program by October 17, 1998. The bill would require the Controller to include instructions appropriate to the enforcement of these provisions in the audit guide. The bill would reduce from \$250 to \$135 the amount to be apportioned per unit of full-time equivalent enrollment in classes whose size is reduced to an average of 20 pupils and no more than 22 pupils in each participating class at each participating school.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 335 (SB 27) Maddy. Horse racing.

(1) Existing law, the Horse Racing Law, authorizes horse racing to be conducted in this state for the purpose of, among other things, generating public revenues. Under existing law, all revenues distributed to the state as license fees from horse racing are required to be deposited in the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes.

This bill would reduce these license fees.

The bill would also create a private statewide marketing organization for thoroughbred and fair racing, to be funded by specified deductions from the portion of takeout of satellite wagering facilities dedicated to purses and commissions. The bill would provide that the authority for this organization and its funding mechanism shall expire as of a specified date. The bill would provide for the transfer of any moneys remaining upon the expiration of this authority to a specified industry organization for purposes of existing law.

(2) Existing law authorizes horse racing associations and fairs in this state to conduct various forms of horse racing, and provides for participation of other associations and fairs, as well as satellite racing facilities, in the parimutuel pools of the racing association or fair hosting the race.

This bill would authorize associations and fairs in this state, as well as satellite wagering facilities, to participate, without regard to the amount of purse, in full-card simulcasting for out-of-zone, out-of-state, and out-of-country races and to act as the totalizer hub for out-of-state national wagers, as defined. The bill would also allow these entities to import a greater variety of races, and at different times, but would limit the maximum number of imported races to 1998 levels.

(3) Existing law provides that when both the Humboldt County Fair and the San Mateo County Fair conduct racing meetings, the San Mateo County Fair is the association authorized to distribute the signal of and accept wagers on out-of-zone races. Existing law provides that this authorization shall automatically expire on January 1, 1999.

This bill would expand this authority to include out-of-state and out-of-country races, delete the automatic expiration of this authority, and provide for a similar relationship between any thoroughbred association in the northern zone and the Fresno District Fair.

(4) Existing law provides that satellite wagering facilities and fairs may, on a contractual basis, be charged an impact fee by the host association under specified conditions.

This bill would provide that no impact fee shall be paid by the operator of any satellite wagering facility that was licensed in the prior year to conduct a live racing meeting in the northern zone, and that license fees applicable to wagers made in the inclosures of the host associations shall be reduced by 0.3%. The bill would also provide that no impact fee shall be paid by the operator of a satellite wagering facility that was licensed in the prior year to conduct a live thoroughbred or quarter horse racing meeting in the central or southern zones, and that license fees applicable to wagers made in the inclosures of these host associations shall be reduced by 0.15%. The bill would provide that these reductions in license fees shall be distributed solely to the host associations in the form of commissions.

(5) This bill would make additional technical, nonsubstantive changes.

Ch. 336 (SB 2064) O'Connell. Student financial aid: Cal Grant Program.

(1) Existing law establishes the Cal Grant Program and requires Cal Grant A awards to be used only for tuition and student fees in instructional programs of no less than 2 academic years and Cal Grant B awards to be used only for tuition, student fees, and subsistence costs in an instructional program of no less than one academic year. Existing law requires there to be a minimum of 17,400 new Cal Grant A awards each year and 12,250 new Cal Grant B awards each year.

This bill would delete the requirement that there be a minimum number of new Cal Grant A and B awards each year. The bill would require that the eligibility criteria for first-time Cal Grant award recipients who are community college students and transfer to a 4-year college or university be no more stringent than the eligibility criteria for other first-time Cal Grant award recipients attending a 4-year college or university. The bill

would create a new category of Cal Grant awards to be known as the Cal Grant T award to be used only for tuition and student fees for a maximum of one academic year of full-time attendance in a program of professional preparation that has been approved by the Commission on Teacher Credentialing. The bill would require there to be a minimum of 3,000 new Cal Grant T awards each year.

(2) Under existing law, the long-term policy governing the maximum award of Cal Grants for students attending nonpublic institutions is based on a formula that includes the average cost of instruction and academic support, as determined by the California State University nonresident tuition methodology.

This bill would instead include in that formula 75% of the average General Fund cost per student at the California State University.

(3) This bill would declare it is to take effect immediately as an urgency statute.

Ch. 337 (SB 2223) Committee on Health and Human Services. University of California: learning disabilities center.

Under existing law, the University of California is a public trust, administered by the Board of Regents.

This bill would request that the Regents of the University of California establish and administer a Center for the Medical Investigation of Neurodevelopmental Disorders (MINDD) at the University of California and establish and administer one or more clinics that are affiliated with MINDD to focus on individual or groups of neurodevelopmental disorders, as defined.

Ch. 338 (SB 295) Rainey. Corrections.

(1) Under existing law, money that has remained unclaimed in the hands of any state agency or for which the claimant cannot be found may be deposited in the Special Deposit Fund in trust and may be withdrawn in the same manner as other trust money.

(2) Existing law requires that in any case in which the amount of preimprisonment credit is equal to or exceeds any sentence imposed pursuant to specified determinate sentencing provisions, the entire sentence, including any period of parole, be deemed to have been served and prohibits the defendant from being delivered to the custody of the Director of Corrections.

This bill would delete any period of parole from this provision and instead require the court to advise the defendant that he or she shall serve a period of parole and order the defendant to report to the parole office closest to his or her last legal residence, unless the in-custody credits equal the total sentence, including both confinement time and the period of parole.

This bill additionally would require that unclaimed money of \$5 or less in an inmate's trust account after he or she has been paroled be forfeited by the inmate and deposited in the Inmate Welfare Fund of the Department of Corrections in the State Treasury.

(3) Existing law requires the Department of Corrections to report to the Governor on the conditions of the prisons, as specified, on or before the first day of December of each even-numbered year. Existing law also requires the printing, for use of the prisons, at least 500 copies of the biennial report of the department to be transmitted as specified.

This bill would repeal these provisions.

(4) Existing law provides, until January 1, 1999, that if a defendant serves time in a camp, work furlough facility, halfway house, rehabilitation facility, hospital, juvenile detention facility, similar residential facility, or home detention program in lieu of imprisonment in a county jail, and the statute under which the defendant is sentenced requires a mandatory minimum period of time in jail, the time spent in these facilities or programs qualifies as mandatory time in jail.

This bill would continue the operation of this provision.

(5) Under existing law certain persons are designated as peace officers whose authority extends to any place in the state while engaged in the performance of the duties of their respective employment and for the purpose of carrying out the primary function of their employment; and as required when an emergency has been declared, or in furtherance of certain mutual aid agreements. Pursuant to this provision these peace officers may carry firearms as authorized and under the terms and conditions specified by their employers.

This bill would include any employee of the Inspector General of the Youth and Correctional Agency or any internal affairs investigator under the authority of the Inspector General within these provisions.

(6) This bill also would require the Secretary of the Youth and Adult Correctional Agency to immediately enter into interagency agreements to transfer back to the Department of Corrections and the Department of the Youth Authority the necessary funds and positions made available to the Youth and Adult Correctional Agency in a specified item of the Budget Act of 1998 for the departmental internal affairs operations. The bill would require the Secretary of the Youth and Adult Correctional Agency, prior to this transfer of funds, to make certain allocations to the Inspector General of that agency for the purpose of conducting specified reviews of internal affairs investigations of the Department of Corrections, the Department of the Youth Authority, the Board of Corrections, and the Youthful Offender Parole Board.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 339 (AB 2793) Migden. Adult and juvenile offenders.

Under existing law, certain federal funds are allocated to the state for expenditure to support the state criminal justice system.

This bill would require that any funds that are awarded to the state pursuant to the federal Violent Offender/Truth-in Sentencing Grant Program through federal fiscal year 1999–2000 be allocated by the Board of Corrections to counties for construction and modification of local adult detention facilities and to build or expand local juvenile correctional facilities. The bill would provide that no more than 15% of the funds shall be available for adult facilities through competitive grants to counties.

The bill also would require the Board of Corrections to allocate any funds received by the state pursuant to the federal Violent Crime Control and Law Enforcement Act to fund competitive grants to counties to reduce the number of juvenile offenders. With respect to these programs, the bill would require the Board of Corrections to establish minimum standards, funding schedules, and procedures which take into consideration specified matters.

The bill would require that local entities match at least 25% of the grant under these programs, as specified.

Of the funds allocated to the state pursuant to these programs the bill would authorize the transfer of up to 3%, upon approval of the Department of Finance, to the Board of Corrections to support the administration, including technical assistance and oversight, of the implementation of grant awards.

Ch. 340 (AB 346) Cunneen. Intermodal roadability inspections and length of vehicles coupled together.

(1) Until January 1, 1998, provisions of the Vehicle Code authorized an ocean marine terminal that receives and dispatches intermodal chassis, as defined, to conduct an intermodal roadability inspection program, as described, in lieu of existing law which requires every operator of certain types of vehicles to cause the vehicle to be inspected at least every 90 days, or more often to ensure safe operation. These provisions also specified that it is a misdemeanor to operate an intermodal chassis on the highway other than to a place of repair, until all defects discovered during the inspection have been corrected.

This bill would reenact these provisions for an indefinite period of time. Thus, the bill would create a new crime, thereby imposing a state-mandated local program.

(2) Existing law generally prohibits any combination of vehicles coupled together, including any attachments, from exceeding a total length of 65 feet. A combination of vehicles designed and used to transport motor vehicles that consists of a motortruck and a stinger-steered semitrailer is exempt from that prohibition and is authorized a length of up to 70 feet, under certain conditions, and 75 feet under other conditions. A motortruck used in combination with semitrailer solely for transporting motor vehicles is exempt from that prohibition if the semitrailer does not exceed 48 feet or 53 feet in length, as specified, and the combination is operated on certain federal highways or on routes identified by the Department of Transportation or local authorities, as specified.

This bill would include within those exemptions a motortruck and semitrailer combination that meets the specified requirements and is used to transport boats.

(3) The bill also would make technical, nonsubstantive changes.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 341 (AB 1701) Alquist. Housing assistance: termination: notice.

(1) Existing law, known as Section 8 of the United States Housing Act of 1937, and other provisions of federal law, provide for housing assistance payments pursuant to contract to aid low-income families, and authorize loans, insurance, and interest reduction payments to assist in the provision of housing. Section 8 requires the owner of an assisted dwelling unit to notify the tenant not less than 90 days prior to the termination of the assistance contract. Existing law also generally prescribes the notice to be given by a landlord or tenant to terminate a tenancy. Existing law establishes the Department of Housing and Community Development with various powers and duties relating to housing.

This bill would require until January 1, 2002, at least 9 months' advance notice, as specified, to tenants, to the city or county and public housing authority, and to the Department of Housing and Community Development where the above-described forms of federal financial assistance are to be terminated or prepaid with respect to a multifamily rental housing development.

(2) Existing law, until December 31, 2000, requires an owner of assisted housing, as defined, who decides to sell or dispose of the housing to give one year's notice to designated organizations. Existing law required the Department of Housing and Community Development to publish by April 1, 1991, a summary of rights and obligations under that law and requires the department to mail copies of a list of those organizations to property owners proposing the termination or removal of government assistance, as specified.

This bill would reduce that notification period to 9 months, and would require instead the department to maintain that summary of rights and obligations under the law and to make available that list of organizations to those property owners.

Ch. 342 (AB 1933) Machado. Local taxes: special purpose parcel taxes: subject parcel: notice and limitations period.

Existing law sets forth a 3-year limitations period for the filing of various types of actions.

This bill would include among those actions an action challenging the validity of a special tax levied by a local agency on a per parcel basis.

Existing law with respect to special purpose parcel taxes imposed by local agencies sets forth certain conditions on the determination of a parcel that is subject to a special purpose parcel tax, and requires a parcel owner to notify a jurisdiction imposing a special purpose parcel tax within 30 days if the special tax bill for that parcel identifies a parcel that is not consistent with the identification of that property by assessor's parcel number.

This bill would increase this 30-day period to 90 days, and would require the first billing of a special purpose parcel tax to be made on the annual property tax bill from the county tax collector. By requiring an additional item to be included on the annual property tax bill sent by the county assessor, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 343 (AB 1987) Aroner. Community and residential care facilities: security window bars.

Existing law provides for the licensure and regulation of community care facilities, residential care facilities for persons with chronic life-threatening illness, and residential care facilities for the elderly. Under existing law, violation of any of these provisions is punishable as a misdemeanor.

This bill would prohibit security window bars from being installed or maintained on any of these facilities, on and after January 1, 1999, unless the security window bars meet current state and local requirements, as applicable, for security window bars and safety release devices. Since a violation of the provisions applicable to community and residential care facilities is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 344 (AB 2394) Margett. Parks and recreation: property acquisitions contracts.

Under existing law, all land and other real property to be acquired by any state agency, including the Department of Parks and Recreation, is required to be acquired by the State Public Works Board in accordance with the Property Acquisition Law. Existing law requires the board to acquire on behalf of, and for the department, in accordance with the Property Acquisition Law, land or other real property or interests in real property, including options to purchase, which have been appraised and selected by the department.

This bill would require the board to acquire any interests in real property, including options to purchase, which have been appraised, selected, and settled through purchase negotiations by the department, and would revise various requirements for the transfer of title of property to the department, as specified.

Existing law authorizes the expenditure of any appropriation for the acquisition of real property pursuant to the Property Acquisition Law, to be expended for the payment of all costs and expenses incurred in the examination, and the determination of the suitability of any real property to be acquired or under consideration for acquisition or, necessarily incurred in the course of acquisition of any such real property and requires that claims for those costs and expenses be presented by the Director of General Services and paid by the Controller.

This bill would require that any claims for those costs and expenses related to real property acquisitions by the department be presented by the Director of Parks and Recreation, and paid by the Controller.

Existing law requires the department to obtain jurisdiction subject to any existing lease or rental agreement concerning any real property transferred, as specified, and to make the real property accessible and usable by the general public at the earliest opportunity. Existing law requires the deposit of all rents and other returns received by the department from real property, in accordance with specified requirements, and requires the department to request from the Legislature in its annual budget funds sufficient to meet its costs of property management and its costs of operation and maintenance of specified real property.

This bill would delete those requirements and would, instead, require that specified real property or interest in real property acquired by the department be under the jurisdiction of the department, immediately upon transfer of title to the state. The bill would require the director, on behalf of the board, to file against any appropriation for specified expenditures relating to real property acquisitions, all claims covering expenditures incurred by the department in the acquisition of real property for the state park system pursuant to the act by which the appropriation is made, and would require the Controller to draw a warrant therefor.

Existing law authorizes the department to lease, for use, all or any portion of any parcel of real property acquired for the state park system, if the director makes specified findings, but prohibits the term of a lease from exceeding a period of 5 years.

This bill would increase to 10 years the maximum term for any such lease.

Existing law authorizes the department, with the consent of the Department of Finance, and subject to specified requirements, to acquire title to, or any interest in, real or personal property, which the department deems necessary or proper for the extension, improvement, or development of the state park system.

This bill would revise various requirements relating to the department's acquisition of title to, or any interest in, real property, including personal property incidental to the purchase of real property and options to purchase property, as prescribed.

Ch. 345 (AB 2573) Machado. State Water Resources Control Board: decisions and orders: judicial review.

Existing law authorizes any party aggrieved by any decision or order of the State Water Resources Control Board, not later than 30 days from the date of final action by the state board, to file a petition for a writ of mandate for review of the decision or order. Existing law provides that, if no aggrieved party petitions for a writ of mandate within the time provided, the decision or order of the state board is not subject to review by any court.

This bill would provide that the election by the United States not to be a party in any court case involving the review of a decision or order by the state board relating to a permit or license to appropriate water held by the state or the United States shall not, in and of itself, be the basis for dismissal of that case.

Ch. 346 (AB 2746) Aroner. Mental health services.

Existing law requires designated health facilities, mental health rehabilitation centers, and programs to provide a written aftercare plan prior to the discharge of a mental health patient from their facilities.

This bill would define mental health patient for purposes of these provisions.

Existing law requires each mental health plan to include a mechanism for monitoring the effectiveness of, and evaluating the accessibility and quality of, services available, and requires the plan to utilize, and be based upon, state-adopted performance outcome measures and include a beneficiary satisfaction component and a grievance system for beneficiaries and providers.

This bill would require the mental health plan also to include review of individual service plan procedures and practices.

Ch. 347 (SB 440) Maddy. Pharmacy: home health agencies: adjusting drug regimen.

Existing law permits a pharmacist to perform certain procedures or functions as part of the care provided by a health care facility, a licensed clinic, or a provider under contract with a health care service plan, in accordance with policies, procedures, or protocols of that facility, licensed clinic, or health care service plan.

This bill would permit a pharmacist to also perform the procedures and functions as part of the care of a home health agency, as defined, licensed by the State Department of Health Services. The bill would require that a pharmacist performing any of these procedures for a licensed home health agency perform the procedures in accordance with a written, patient-specific protocol approved by the treating or supervising physician, and that any change, adjustment, or modification of an approved preexisting treatment or drug therapy be provided in writing to the treating or supervising physician within 24 hours.

This bill would make additional conforming changes.

Ch. 348 (SB 1836) Johnston. Donated property.

Existing law generally regulates disclosures made by any individual, corporation, or other legal entity who for compensation solicits funds or other property in this state for charitable purposes. Existing law requires a commercial fundraiser for charitable purposes, as defined, to register with the Attorney General's Registry of Charitable Trusts.

This bill would require a nonprofit organization engaged in any solicitation or sales solicitation for charitable purposes or a commercial fundraiser to provide a donor of specified property with a receipt with prescribed information within 90 days from date of donation. The bill would require the receipt to describe the property, as specified, and if the property was sold prior to issuance of the receipt and an alteration subsequent to the donation affected the value of the property, whether the alteration increased or decreased the value of the property. The bill would require the nonprofit organization or commercial fundraiser to retain a copy of the receipt.

The bill would also require specified nonprofit organizations and commercial fundraisers that state the percentage of a donation that will be available or used for charitable purposes to calculate the percentage in a prescribed manner.

Ch. 349 (SB 2047) Lewis. State Teachers' Retirement System: benefits.

The State Teachers' Retirement Law authorizes members prior to retirement to elect various alternative joint and survivor options providing actuarially modified retirement allowances.

This bill would establish, on and after January 1, 2000, another option for retired members and option beneficiaries. The bill would also authorize retired members who retired for service under specified options prior to January 1, 1991, to change those options under specified circumstances.

Ch. 350 (SB 2231) Committee on Revenue and Taxation. Taxation: fuel taxes: hazardous waste.

Existing law requires the State Board of Equalization, upon the request of the Department of Toxic Substances Control, to adjust hazardous waste disposal fees to reflect changes in the cost of living during the prior calendar year.

This bill would instead require the State Board of Equalization to adjust the rates based on the cost of living for the prior fiscal year.

Existing law provides for refunds for overpayments of hazardous waste disposal fees.

This bill would revise the claims procedures for these overpayments by providing that any overpayment of the disposal fee by a person submitting hazardous waste for disposal to a facility operator will be credited or refunded by the State Board of Equalization to the person doing the submission and would permit the hazardous waste facility to receive the credit or refund if the facility has paid the amount to the board and meets specified conditions.

The Emergency Telephone Users Surcharge Act permits the State Board of Equalization, if it deems it necessary, to require returns and payments of tax under that act to be made for quarterly periods other than calendar quarters, or for multiples of quarterly periods.

This bill would permit the board to require the returns and payment of the amount of surcharges for a calendar quarter or calendar year period.

Under the Diesel Fuel Tax Law, persons who have paid a tax on diesel fuel that was used in a nontaxable manner may be entitled to a refund under specified conditions. Refunds under that law may also be claimed by an ultimate vendor who sold the diesel fuel without collecting tax to a farmer or exempt bus operator if the vendor receives an exemption certificate from the purchaser.

This bill would clarify the refund provisions for diesel fuel that is lost or sold under specified conditions, and would require the exemption certificate for farmers or bus operators to be in the form prescribed by the State Board of Equalization.

The bill would also make various technical changes.

Ch. 351 (AB 1614) Lempert. Sales and use tax: California Internet Tax Freedom Act.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law imposes the sales tax upon "retailers," as defined, and requires every person desiring to engage in or conduct business as a "seller," as defined, to obtain a sales tax permit. Existing law provides that every retailer engaged in business in this state and making sales of tangible personal property for storage, use, or other consumption in this

state, that engages in specified activity in this state shall, at the time of sale or at the time the storage, use, or other consumption becomes taxable, collect the tax from the purchaser. That law provides that "engaged in business in this state" does not include the taking of orders from customers in this state through a computer telecommunications network, as provided, and provides that these provisions shall become inoperative, as specified.

This bill would modify that inoperative date and make technical, clarifying changes to those provisions, as provided.

Existing law imposes various state income, franchise, property, and excise taxes and various user, regulatory, and franchise fees in connection with activity or property within the jurisdiction of this state. Existing law authorizes counties, cities, and other local agencies to impose various taxes and fees in connection with activity or property within those jurisdictions.

This bill would enact the "California Internet Tax Freedom Act" to prohibit, with specified exceptions, the imposition, assessment, or attempt to collect any of the following: a tax on Internet access, Online Computer Services, or the use of Internet access or any Online Computer Services; a bit or bandwidth tax; or any discriminatory tax on Online Computer Services or Internet access. The bill would make specified legislative findings and declarations in connection with that prohibition.

Ch. 352 (AB 1848) Davis. Warranties: motor vehicle manufacturers.

Under the existing Tanner Consumer Protection Act, it is presumed that a reasonable number of attempts have been made to conform a new motor vehicle to the applicable express warranties if within one year from delivery to the buyer or 12,000 miles on the odometer of the vehicle, whichever comes first, either (1) the same nonconformity, as defined, has been subject to repair 4 or more times by the manufacturer or its agents and the buyer has at least once provided a specified notice to the manufacturer or (2) the vehicle is out of service by reason of repair of nonconformities by the manufacturer or its agents for a prescribed period. Existing law defines a new motor vehicle for purposes of this provision and another specified provision of existing law regarding express warranty repair or service to mean a new motor vehicle that is used or bought for use primarily for personal, family, or household purposes.

This bill would revise that definition of a new motor vehicle to include a new motor vehicle bought or used for business and personal, family, or household purposes by a person, including a legal entity, to which no more than 5 motor vehicles are registered in this state.

Ch. 353 (SB 1182) Costa. Agricultural land: preservation programs: farmland security zones.

Existing law, known as the California Land Conservation Act of 1965, or the Williamson Act, authorizes a city or county, by contract, to limit the uses of land to agricultural uses or as an agricultural preserve in exchange for reduced property taxes. Under existing law, the initial term of one of these contracts shall be no less than 10 years.

This bill would make technical changes in provisions of law relating to subventions of state funds to replace reduced property taxes. The bill would authorize 2 or more landowners to petition a county board of supervisors to rescind a contract or contracts entered into pursuant to the act in order to place the land under a new contract designating the property as a farmland security zone, and would specify the type of land to which this designation would apply. The bill would provide that the initial term of a farmland security zone contract shall be no less than 20 years, and that each contract shall provide for yearly automatic extensions unless a notice of nonrenewal is given. The bill would provide that land within a farmland security zone shall be eligible for specified tax and other benefits, including exemption from any benefit assessment that does not directly benefit the land, exemption from annexation, as specified, exemption from potential location of public school facilities, and other exemptions. The bill also would make various conforming changes.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 354 (SB 1476) Costa. Sweepstakes solicitation.

Existing law regulating sweepstakes solicitations prohibits any person from soliciting or selling an information-access service that offers the person being solicited the opportunity to participate in a sweepstakes unless certain conditions are satisfied, including the provision of a free alternative method of participating, available to all persons who are solicited, that provides all participants with an equal chance of winning.

This bill would instead prohibit any person from soliciting or selling an information-access service in any manner related to a sweepstakes. It would also make technical, conforming changes. Because this bill would broaden the scope of criminal activity, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate additional changes in Section 17539.5 of the Business and Professions Code, proposed by SB 597, to be operative only if SB 597 and this bill are both chaptered and become effective on or before January 1, 1999, and this bill is chaptered last.

Ch. 355 (SB 1482) Rosenthal. Adoption: dependent children.

Existing law provides for the placement of children who have been adjudged dependent children of the juvenile court on the basis of abuse or neglect in long-term foster care. Existing law also authorizes a court to terminate parental rights with regard to a dependent child of the court and to order the child placed for adoption, under certain conditions.

Existing law requires that the status of a child be reviewed every 6 months when the child is in a placement other than the home of a legal guardian and the jurisdiction of the court over the child has not been dismissed. This review may be conducted by either the juvenile court or an appropriate local agency. However, under specified conditions, that review must be conducted by a court.

This bill would instead provide that this review shall be conducted at least every 6 months. The bill would generally permit the review of the status of a child to be conducted by either the court or an appropriate local agency with regard to the status of a child placed in long-term foster care. However, the bill would require that the review of the status of a child in long-term foster care be conducted by the court, under certain conditions. The bill would also require that the review of the status of a child be conducted by the court if the court has terminated parental rights and has ordered that the child be placed for adoption. In those cases, the bill would require that the county welfare department prepare and present to the court a report containing specified information concerning the child. By imposing additional duties on local employees, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 356 (AB 635) Oller. Testimony: closed-circuit television.

The United States and California Constitutions guarantee the right of a criminal defendant to be personally present with counsel and to be confronted with the witnesses against the defendant.

Existing statutory law authorizes various 3-year pilot projects involving video arraignment, as specified.

This bill would authorize the County of Placer to establish a 3-year pilot project permitting a court in that county to allow its peace officers to testify, upon application by a law enforcement agency, and to allow specified defendants to testify or appear for

arraignment, as specified, via closed-circuit television. This bill would require the presiding judge of the superior court of Placer County to evaluate the pilot project, as specified, and report to the Legislature and the Judicial Council.

The provisions of this bill would be repealed on January 1, 2002, unless a later enacted statute deletes or extends that date.

Ch. 357 (AB 983) Wayne. Hazardous waste: enforcement.

Existing law requires the Secretary for Environmental Protection to implement a unified hazardous waste and hazardous materials management regulatory program. A city or local agency which meets specified requirements is authorized to apply to the secretary to implement the unified program, and every county is required to apply to the secretary to be certified to implement the unified program. Existing law provides that if the unified program agency determines that any person has engaged in, is engaged in, or is about to engage in certain acts in violation of the hazardous waste control laws, the city attorney or district attorney of the respective city or county is authorized to apply to the superior court for an order enjoining those acts or practices or for an order directing compliance, as specified.

This bill would additionally authorize the Attorney General to apply to the superior court for such an order if the unified program agency makes such a determination.

Ch. 358 (AB 1731) Bowler. Ketamine: unauthorized possession.

Existing law penalizes the possession for sale or sale of ketamine, but does not penalize the unauthorized possession of ketamine.

This bill would make the unauthorized possession of ketamine a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 359 (AB 1844) B. Thompson. Arson.

(1) Existing law requires convicted arsonists to register with the chief of police or sheriff of the city or county where he or she resides and makes it a misdemeanor to fail to register.

This bill would require law enforcement agencies to make registration information available to the chief fire official of a legally organized fire department or fire protection district having local jurisdiction where the person resides, and would make a related change. By increasing the duties of local law enforcement agencies, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 360 (AB 1964) Aguiar. Bonds: validating proceedings.

Existing law provides that a local agency may bring an action to determine the validity of its bonds, warrants, contracts, obligations, or evidences of indebtedness pursuant to the provisions governing validating proceedings.

This bill would provide that any local public agency that pledges sales or retail transaction and use tax revenues for bond payments or payment of other security obligations, if it receives those revenues from another public agency which imposes the taxes, shall, in any validation action it files involving those bonds or other obligations, provide written notice thereof to the public agency imposing the taxes at the time it files the validation action.

The bill would impose a state-mandated local program by requiring new duties of local public agencies.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 361 (AB 1977) Campbell. Public utilities: telecommunications services: household goods carriers.

(1) Existing law prohibits telephone companies from providing telephone service to unlicensed household goods carriers. Existing law places the enforcement of this prohibition with the Public Utilities Commission. Existing law makes it a crime to fail to comply with a demand, as specified, by the commission.

This bill would require telephone companies and related entities, as specified, upon demand, and the order of a magistrate, to provide the commission, or an authorized official of the commission, access to the name and address of the subscriber to a telephone number being used by an unlicensed household goods carrier. This bill would expand the scope of an existing crime, thus creating a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 362 (AB 2097) Margett. Veterans farm and home purchases.

Existing law provides for farm and home purchase benefits for qualifying veterans under the Veterans' Farm and Home Purchase Act of 1974, and subsequent acts. Under these provisions, existing law establishes, among other things, the maximum purchase price of a home and the requirements relating to the purchaser's payment responsibilities, including the requirement that the purchaser pay a uniform rate of interest as determined by the Department of Veterans Affairs pursuant to a prescribed procedure.

This bill would require the department, notwithstanding that established procedure or any other provision of law, to report to the California Veterans Board and the Veterans' Finance Committee of 1943 regarding the recommended rate of interest payable upon the amount remaining unpaid under any veteran's purchase contract executed on or after January 1, 1999. The bill also would require the department, from time to time, to establish, and would authorize the department to modify, subject to the approval of the board and the committee, the actual interest rates to be paid, either fixed or variable, or the methodology and timing for determining or modifying the actual interest rates on purchase contracts executed on or after January 1, 1999.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 363 (AB 2090) Miller. Fireworks: sale.

(1) Existing law authorizes the sale of safe and sane fireworks from June 28 to July 6 annually pursuant to a license issued by the State Fire Marshal, unless otherwise prohibited or regulated by law or ordinance.

This bill would authorize the sale of certified safe and sane fireworks from 9 a.m. December 26, 1999, through January 1, 2000, pursuant to a license issued by the State Fire Marshal, if authorized by a city, county, or city and county ordinance or resolution that may also restrict the hours of use of those fireworks. Since a violation of this provision or other existing related provisions in connection with the sale of those fireworks would be a misdemeanor, the bill would impose a state-mandated local program by creating new crimes. These provisions would become inoperative on January 2, 2000, and would be repealed on January 1, 2001.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 364 (AB 2179) Committee on Assembly Legislative Ethics. State agencies: ethics orientation.

Existing law requires that the appropriate ethics committees of the Legislature conduct at least semiannually an orientation course for Members of the Legislature and designated legislative employees on laws governing official conduct, and another orientation course for registered lobbyists on issues and laws relating to lobbying. Members of the Legislature, designated legislative employees, and registered lobbyists are required to attend these courses every 2 years.

This bill would require each state agency to offer at least semiannually, and certain state officials and employees to attend once every 2 years, an orientation course on the relevant ethics statutes and regulations that govern the official conduct of state officials.

Ch. 365 (AB 2214) Aguiar. Community colleges: vocational and occupational training programs.

(1) Existing law requires the governing board of a community college district, prior to establishing a vocational or occupational training program, to conduct a job market study, as defined, of the labor market area, as defined, in which it proposes to establish the program.

This bill would require the governing board of the community college district to make these job market studies available to the public.

(2) Existing law requires that every vocational or occupational training program offered by a community college district be reviewed every 2 years by the governing board of the district to ensure that each program meets certain conditions.

This bill would impose a state-mandated local program by requiring that a written summary of the findings of each review be made available to the public.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 366 (AB 2244) Baldwin. Real estate appraisers.

The Real Estate Appraisers' Licensing and Certification Law authorizes the Director of the Office of Real Estate Appraisers to issue to a licensee, or course provider, as specified, a citation that may contain an order to pay an administrative fine assessed by the office if the appraiser or course provider is in violation of this law or any regulations adopted to carry out its purposes. Existing law provides that a failure to pay a fine or required installment payment on a fine within 30 days of the date ordered in the citation, unless it is being appealed, shall result in disciplinary action. Existing law also specifies certain interest and penalty amounts for failure to pay a fine or required installment within that time period.

This bill would instead provide that the failure to pay a fine or required installment would be cause for disciplinary action, in addition to existing interest and penalty fines.

The bill would also authorize the office to enter into settlements of any administrative allegation of violations, as specified, and make various technical and corrective changes.

Ch. 367 (AB 2578) Cardenas. Insurance: public insurance adjusters.

Existing law provides for the regulation of public insurance adjusters. Existing law prohibits any person from engaging in the business of public insurance adjusting, or from

acting as or representing himself or herself to be, a public insurance adjuster without a license.

This bill would provide for certain civil penalties for violating this prohibition. This bill would also provide that any contract for relevant services entered into by an insured with any unlicensed person may be voided at the option of the insured and would provide that the insured is not liable for payment of any past services rendered or future services to be rendered by that unlicensed person under that contract or otherwise.

This bill would also authorize the Insurance Commissioner to issue a cease and desist order to any person engaging in the business of public insurance adjusting, or acting as or representing himself or herself to be, a public insurance adjuster without a license. It would also provide for certain civil penalties for failure to comply with any such order and would authorize the commissioner to bring an action in a court of competent jurisdiction to enforce the collection of those penalties.

Ch. 368 (AB 2689) Miller. Insurers: insurance holding companies.

Existing law generally requires every insurer that is authorized to do business in this state and that is a member of an insurance holding company to register with the Insurance Commissioner and to file a registration statement containing certain information. The registration statement is required to report information concerning the insurer and any person controlling the insurer, including information concerning management agreements, service contracts, and cost-sharing agreements, except that subscription agreements or powers of attorney executed by subscribers of a reciprocal or interinsurance exchange need not be reported pursuant to these provisions if the form of the agreement was in use before 1940 and was not substantially amended after 1940, as specified.

Existing law provides that certain transactions involving a domestic insurer or commercially domiciled insurer and any person in its holding company system may be entered into only if the insurer notifies the commissioner and the commissioner does not disapprove the transaction within a certain period of time, and also provides that charges or fees for services performed must be reasonable. The transactions subject to these provisions include management agreements, service contracts, and cost-sharing agreements, except that subscription agreements and powers of attorney executed by subscribers of a reciprocal or interinsurance exchange need not be reported under these provisions if the form of the agreement was in use before 1940 and was not substantially amended after 1940, as specified.

This bill would instead provide that agreements of this type that were in use before 1943 and that were not substantially amended after 1943 need not be reported under either of these provisions, and would make other related changes.

Ch. 369 (AB 2747) Alquist. Seismic safety: health facilities.

Existing law provides generally for the design review and construction of health facilities, including provisions relating to seismic safety.

This bill would revise those provisions, including, among other things, deleting existing duties of the Office of Statewide Planning and Development with respect to the construction or expansion of specified health facilities, deleting an authorization for the operation by a city or county of a federally owned facility for providing services to persons with HIV according to federal seismic safety standards, and revising the definition of "personal knowledge" as it pertains to the duties of architects, registered engineers, and inspectors involved in the construction or expansion of hospital buildings. The bill would also revise the definition of hospital building.

Ch. 370 (SB 237) Johnson. Insurance: surplus lines.

Existing law provides that certain provisions limiting the insurance that may be placed with nonadmitted insurers and requiring the report of that placement do not apply to certain types of insurance, including spacecraft insurance.

This bill would define "spacecraft" for these purposes.

Existing law authorizes the Insurance Commissioner to request certain information and to issue certain orders with respect to surplus line brokers.

This bill would authorize the commissioner to direct special lines' surplus line brokers to not place further business with an insurer whose eligibility has been withdrawn.

Existing law provides that the placement of special lines' insurance by a surplus line broker is not subject to a requirement that the insurer establish its financial stability with the Insurance Commissioner and meet related requirements.

This bill would make certain technical conforming changes to these provisions.

This bill would incorporate additional changes in Section 1765.1 of the Insurance Code proposed by AB 1975, to be operative if AB 1975 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 371 (SB 302) Costa. Farmworker housing.

(1) The Personal Income Tax Law and the Bank and Corporation Tax Law authorize various credits against the taxes imposed by those laws, including for taxable or income years beginning on or after January 1, 1997, specified credits relating to qualified amounts paid or incurred by a taxpayer to construct or rehabilitate farmworker housing to meet the requirements of the Employee Housing Act. Existing law establishing a farmworker housing assistance program prescribes requirements for claiming those tax credits, including, if applicable, providing a copy of a current Employee Housing Act permit to operate, and requiring the claim to be based on expenditures for costs paid or incurred to bring the housing into compliance with the existing Employee Housing Act and other general improvements.

This bill would delete those provisions subjecting farmworker housing tax credits to compliance with the Employee Housing Act, and would require those tax credit claims to be based on eligible costs, which are defined as specified costs paid or incurred to construct or rehabilitate the housing, including costs to ensure compliance with laws relating to disability access and reducing utility expenses. The bill would revise the Personal Income Tax Law and the Bank and Corporation Tax Law by deleting references to qualified amounts and substituting provisions that base those tax credits on eligible costs.

(2) Existing law requires the owner of farmworker housing, in order to be eligible for tax credit assistance, to agree to provisions defining how affordable rents will be established and maintained.

This bill would require the agreement to define how rents will be established and maintained so that they are affordable to the intended population of farmworkers.

(3) Existing law prescribing criteria for applications for farmworker housing tax credits requires the California Tax Credit Allocation Committee to require that certain development fees and costs not exceed a percentage of the eligible basis of a farmworker housing project, as determined by the committee.

This bill would revise that provision so that it limits only development fees, to a percentage of the total project cost, as determined by the committee.

Ch. 372 (SB 490) Lewis. Absentee ballots: counting.

Existing law requires that an absent voter identification envelope contain specified information. Existing law also requires elections officials to compare the signature on the identification envelope with the signature on the affidavit of registration, and to reject the ballot if the signatures do not compare.

This bill would require that a warning be printed on the absent voter identification envelope informing the voter that the ballot will not be counted if the voter does not sign the envelope in his or her own handwriting.

By imposing additional duties regarding absentee ballots upon local elections officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 373 (SB 1331) Knight. Hemodialysis: technician training.

Existing law provides for the regulation and training of hemodialysis technicians. Certain of these provisions relating to certification and training will become inoperative on July 1, 1999.

This bill would extend the July 1, 1999, inoperative date contained in these provisions to July 1, 2000, and make related changes.

Existing law provides that a violation of the provisions relating to hemodialysis technician training is a crime punishable as a misdemeanor.

This bill, by extending the operation of certain of these provisions, would create a new crime and thus would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 374 (SB 1387) Karnette. Juvenile law.

Existing law provides for sentencing enhancements on the basis of prior felony convictions, which are defined to include certain offenses adjudicated before the juvenile court.

However, existing law generally provides for the confidentiality of juvenile records, reports, and related information. Those records may be sealed and eventually destroyed, as specified. Certain law enforcement personnel who are actively participating in criminal or juvenile proceedings involving a minor may inspect those records and reports concerning that minor, but those persons may not disseminate the records or reports, or related information, without the prior approval of the presiding judge of the juvenile court, except as specified.

This bill would prohibit the destruction of records of a juvenile who was 16 years of age or older at the time he or she committed one of various, specified offenses. The bill would also provide that in criminal cases involving specified enhancements the parties shall be entitled to inspect, copy, and introduce into evidence, for the purpose of proving the enhancement, any juvenile records of the person named in a criminal complaint or information where the person was found to have committed one of various, specified offenses when he or she was 16 years of age or older even if those records have been sealed. These records would otherwise remain confidential, except as specified.

Ch. 375 (SB 1422) Alpert. Juvenile facilities: maximum capacity.

Existing law generally limits the number of children that a juvenile home, ranch, camp, or forestry camp may receive or contain to 100; however, these facilities may receive or contain up to 125 children under certain conditions. The Board of Corrections is required to conduct a biennial inspection of each juvenile home, ranch, camp, or forestry camp, as specified.

This bill would permit juvenile ranches, camps, or forestry camps to receive or contain more than 125 children upon approval of the Board of Corrections. The bill would set forth the criteria for that approval and would require the board to conduct annual, rather than biennial, inspections of facilities approved to receive or contain more than 125 children.

Ch. 376 (SB 1440) Knight. Alarm companies: exemptions.

Existing law regulating alarm company operators and agents exempts from its restrictions persons employed exclusively and regularly by any employer who does not provide contract alarm services, an officer or employee of the United States of America, and patrol special police officers.

This bill would additionally exempt licensed private patrol operators and their employees, as defined, who are employed to respond to alarm systems.

Ch. 377 (SB 1443) Knight. Health care service plans: complaints.

Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, willful violation of any of these provisions is punishable as either a felony or a misdemeanor.

Existing law requires every health care service plan regulated by the department to prominently display in every plan contract, on enrollee and subscriber evidence of coverage forms, on complaint forms, and on all written responses to grievances and complaints, a notice of the right to submit unresolved grievances and complaints to the department for review.

This bill would repeal this requirement.

Existing law requires the commissioner to establish and maintain a toll-free telephone number for the purpose of receiving complaints regarding health care service plans regulated by the commissioner, and requires every health care service plan to publish the toll-free number on every new plan contract, on every evidence of coverage, on copies of plan grievance procedures, on plan complaint forms, and on all written notices to enrollees required under the grievance process of the plan.

This bill would require every health care service plan, commencing July 1, 1999, to publish the Internet address of the Department of Corporations and the plan's telephone number, as well as the California Relay Service's toll-free telephone numbers for the hearing and speech impaired, on every plan contract, on every evidence of coverage, on copies of plan grievance procedures, on plan complaint forms, and on all written notices to enrollees required under the grievance process of the plan.

The bill, in addition, would revise the statement containing information on the toll-free telephone number required to be published by a health care service plan regarding complaints to include the California Relay Service's toll-free telephone numbers for the hearing and speech impaired and the department's Internet address, among other things.

Since a willful violation of the provisions applicable to health care service plans is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 378 (SB 1475) M. Thompson. Fish.

(1) Existing law designates specified ocean waters as the California halibut trawl grounds and regulates the taking of halibut and other fish species in those waters with the use of trawl nets. Among other things, under existing law, not more than 500 pounds of fish other than California halibut may be possessed within the California halibut trawl grounds, except that any amount of sea cucumbers, sharks, skates, or rays may be taken or possessed.

This bill would specify that any amount of sea cucumbers may be possessed within the halibut trawl grounds by a person who holds a valid sea cucumber permit and who meets other specified conditions. The bill would also specify that any amount of sharks, skates, or rays for which the take or possession of that species is not otherwise prohibited, may be taken or possessed within the halibut trawl grounds. The bill would authorize single bags and cod-ends or double bags and cod-ends, of a specified size, to be used within the halibut trawl grounds while a vessel is in transit directly to the halibut trawl grounds or returning directly to port.

Because existing law makes a violation of the provisions in the bill a crime, the bill would impose a state-mandated local program.

(2) Existing law provides for the Salmon and Steelhead Trout Restoration Account and requires that a specified percentage of funds in the account be allocated as grants for projects that improve fish habitat in coastal waters utilized by salmon and anadromous trout species. Existing law provides for a citizen's advisory committee to be appointed, as specified, to give advice on the grant program and to recommend priorities for grant funds. Existing law specifies that not less than 65% of the money in the account shall be used for salmon habitat protection and restoration projects, as specified, and that

up to 35% of the money in the account shall be allocated for other specified uses, including watershed related projects.

This bill would provide that any grant funds allocated to a project which exceed the actual cost of completing the project shall be returned to the account. The bill would authorize the Director of Fish and Game to suspend the percentage requirements stated above in any fiscal year that the advisory committee makes a recommendation to allocate money from the account in a manner that is not consistent with those requirements. The bill would provide for members of the advisory committee to be reimbursed for travel and incidental expenses related to the performance of their duties, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 379 (SB 1479) Lewis. Life insurance: disclosures.

Existing law requires every insurer and life agent offering for sale individual life insurance policies or individual annuity contracts that are initially delivered or issued for delivery to senior citizens with the use of nonpreprinted illustrations or preprinted illustrations of nonguaranteed values to include a notice containing certain disclosures. Existing law requires preprinted policy illustrations to contain the notice printed on the illustration form itself.

This bill would permit the notice to be on an attached cover sheet, or in the form of a contrasting color sticker placed on the front of the illustration.

Existing law requires agents or insurers that make a presentation showing or comparing the cost of life insurance over a period of years which does not recognize the time value of money to present certain cost information, and to provide prospective insureds with a buyer's guide. Existing law exempts certain types of life insurance from those requirements.

This bill would revise those exemptions.

Ch. 380 (SB 1491) Kelley. Vehicles: commercial vehicles: safety: identification: rules and regulations.

(1) Existing law requires the Department of the California Highway Patrol to adopt reasonable rules and regulations that, in the judgment of the department, are designed to promote the safe operation of specified commercial vehicles, regarding, among other things, inspection and maintenance of vehicles.

This bill would authorize the department to adopt rules and regulations relating to commercial vehicle safety inspection and out-of-service criteria. The bill would authorize the commissioner, in adopting the rules and regulations, to consider the commercial vehicle safety inspection and out-of-service criteria adopted by organizations such as the Commercial Vehicle Safety Alliance, other intergovernmental safety group, or the United States Department of Transportation. The bill would authorize the Commissioner of the California Highway Patrol to provide departmental representatives to that alliance or other organization for the purpose of promoting the continued improvement and refinement of compatible nationwide commercial vehicle safety inspection and out-of-service criteria.

(2) Existing law requires that every motor vehicle or combination of vehicles used to carry the property of others for hire or used to carry passengers for hire, and any truck or truck tractor having 3 or more axles or any truck tractor with a semitrailer, have displayed on both sides of each vehicle or on both sides of one of the vehicles in each combination of vehicles the name or trademark of the person under whose authority the vehicle or combination of vehicles is being operated or the name of the lessor or lessee thereof. A violation of this requirement is an infraction.

Existing law requires that the carrier identification number assigned to the motor carrier under whose operating authority or motor carrier permit a vehicle or combination of vehicles is being operated be displayed on both sides of each vehicle, or on both sides of at least one motor vehicle in each combination of certain vehicles, while engaged in intrastate commerce.

This bill would require the vehicles or combinations of vehicles specified above, if operated under a rental agreement with a term of not more than 30 calendar days, to (a) have displayed on both sides of each vehicle or on both sides of one of the vehicles in each combination of vehicles the name or trademark of the lessor, (b) have displayed on both sides of each vehicle or on both sides of one of the vehicles in each combination of vehicles the carrier identification number issued by the United States Department of Transportation, a valid operating authority number, or a valid motor carrier of property number, and (c) have in the vehicle or combination of vehicles a copy of the rental agreement entered into by the lessor and the vehicle operator.

The bill would require that the rental agreement be available for inspection immediately upon the request of any authorized employee of the department or any regularly employed and salaried police officer or deputy sheriff. If the rented vehicle or combination of vehicles is operated in conjunction with a commercial enterprise, the bill would require that the rental agreement include the operator's carrier identification number or motor carrier of property permit number.

Because a violation of these provisions would be a crime, the bill would impose a state-mandated local program by creating new crimes.

The bill would require that a vehicle or combination of vehicles that is in compliance with certain federal regulations be deemed to be in compliance with these provisions.

(3) Existing law exempts certain vehicles from a requirement that the vehicle display a carrier identification number if the gross vehicle weight rating of the towing vehicle is 11,500 pounds or less.

This bill would, instead, exempt those vehicles if the gross vehicle weight rating of the towing vehicle is 10,000 pounds or less. The bill would also exempt vehicles if the towing vehicle is a pickup truck, as defined. These exemptions would not apply to specified vehicle combinations.

The bill would also exempt pickup trucks and 2-axle daily rental trucks with gross vehicle weight ratings of less than 26,001 pounds from the requirement that the carrier identification number be displayed, if those vehicles are operated in noncommercial use.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 381 (SB 1493) Rosenthal. Corporate mergers.

Existing provisions of the General Corporation Law provide that upon a merger of two or more corporations the separate existence of the disappearing corporations ceases and the surviving corporation succeeds, without other transfer, to all the rights and property of each of the disappearing corporations and is subject to all the debts and liabilities of each in the same manner as if the surviving corporation had incurred them.

This bill would additionally provide for those purposes that the surviving corporation may succeed without the payment of any local agency, transfer fee to all licenses, permits, registrations, and other privileges granted by any local agency, provided the merger does not result in a change of ownership, as specified.

Ch. 382 (SB 1521) Alpert. Liability: lenders; fiduciaries.

Existing law exempts from liability a person who is acting in the capacity of a lender under any state or local statute, regulation, or ordinance, to the extent that the statute, regulation, or ordinance requires the taking of a removal and remedial action, or the payment of a penalty, and the liability arises from a release or threatened release of hazardous material at, from, or in connection with certain property, or to the extent the statute, regulation, or ordinance authorizes damages arising from a release or threatened release at certain property, except as specified. This exemption applies only if specified conditions exist, including if the lender maintains indicia of ownership in the property primarily to protect a security interest.

This bill would revise the definition of various terms for purposes of these immunity provisions.

Ch. 383 (SB 1542) Knight. Brown Bag Program.

Existing law establishes the Brown Bag Program, under which organizations contracting with the California Department of Aging distribute surplus food to low-income seniors. In order to qualify for services under the program, a person must be at least 60 years of age and have an income that does not exceed the maximum payment level provided to a blind applicant under the State Supplementary Program for the Aged, Blind, and Disabled.

This bill would, if surplus foodstuffs are determined to exist, permit services to be provided to otherwise eligible individuals whose income does not exceed 125% of the maximum income level for program eligibility.

Ch. 384 (SB 1639) O'Connell. Motor vehicles: lands: alcohol and drugs.

(1) Existing law prohibits engaging in specific activities involving alcoholic beverages while driving or while in a motor vehicle upon a highway.

This bill would expand these prohibitions to include engaging in those activities while on specified lands.

(2) Existing law prohibits the possession of marijuana while driving a motor vehicle upon a highway.

This bill would expand this prohibition to include possession of marijuana while driving a motor vehicle on specified lands.

(3) Existing law prohibits the keeping in a motor vehicle that is upon any highway any bottle, can, or other receptacle containing any alcoholic beverage that has been opened, or a seal broken, or the contents of which have been partially removed unless the container is kept in the trunk or, if there is no trunk, kept in some other area of the vehicle that is not normally occupied by the driver or passengers.

This bill would require, in cases where there is no trunk and the vehicle is an off-highway motor vehicle subject to identification, as defined, the keeping of the above described receptacle in a locked container, which the bill would define.

(4) Because all of the above provisions of the bill would expand the scope of existing crimes, the bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 385 (SB 1661) Haynes. Settlement offers: Riverside and San Bernardino Counties.

Under law effective until January 1, 1998, in the Counties of Riverside and San Bernardino, a party to a civil action was entitled, in the discretion of the court, to an award of attorney's fees, where the party had made a settlement offer, for services rendered after the offer was made if the offer was not accepted and the party to whom the offer was made failed to obtain a more favorable judgment, as specified.

This bill would reenact those provisions. They would remain in effect only until January 1, 2001. The bill would require the Judicial Council to report to the Legislature on the impact of these provisions on or before March 1, 2000, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 386 (SB 1718) Calderon. Life insurance.

Existing law provides that every life insurer that uses an agent shall, among other things, when a replacement of insurance is involved, provide a notice delivered with the policy that the applicant has a right to an unconditional refund of all premiums, which right may be exercised within 20 days of the date of delivery of the policy. Existing law contains other provisions applicable to variable annuity contracts, variable life insurance contracts, and modified guaranteed contracts, that authorize the return of the contract during the cancellation period.

This bill would add the latter provision to the previous provisions requiring the applicant to be given notice of a right to an unconditional refund, and would change the 20-day period for the exercise of the right to obtain a refund to a 30-day period.

Existing law permits certain insurers to issue funding agreements and provides that this authorization does not affect the priority of claims against insolvent insurers.

This bill would correct a cross-reference relating to this priority of claims.

Ch. 387 (SB 1851) Kelley. Riverside County Transportation Commission: members: voting.

(1) Existing law creates the Riverside County Transportation Commission, comprised of 8 members appointed by specified entities, as prescribed. Existing law authorizes the appointment of an alternate member to represent, on a temporary basis, a regular member of the commission, but only in those cases where the regular member cannot attend the meeting. Under existing law, a majority of the members of the commission constitutes a quorum for the transaction of business.

This bill would revise the membership of the commission to include 5 members of the Riverside County Board of Supervisors, one member from each incorporated city in Riverside County, to be either a mayor or city council member, and one nonvoting member appointed by the Governor. The bill would repeal those provisions relating to the appointment of alternate members and would, instead, authorize the board of supervisors to establish a procedure by which a member of the board of supervisors may appoint an alternate member of the board to represent him or her for a meeting. The bill would authorize each incorporated city in the county to appoint either the mayor or a city council member as the alternate member to represent the regular member of the commission that serves on behalf of the city, if the regular member is not in attendance at a meeting. By changing the composition of the commission, thereby adding to the duties of certain local government officers, the bill would impose a state-mandated local program.

The bill would authorize a member of the commission to call for a weighted vote on an item before the commission, to be weighted as prescribed.

The bill would require a quorum of the commission to be a majority of the total voting membership of the commission.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 388 (SB 1940) Peace. Workers' compensation: nurse practitioners and physician assistants.

Existing law requires the Administrative Director of the Division of Workers' Compensation to adopt an official medical fee schedule, which shall establish reasonable maximum fees paid for medical services provided under the workers' compensation laws. Existing law requires services provided by physical therapists to be included in the official fee schedule.

This bill would also require services provided by physician assistants and nurse practitioners to be included in that schedule.

Ch. 389 (SB 2015) C. Wright. Substance abuse.

Existing law provides for the Medi-Cal Drug Treatment Program, under which each county may contract with the State Department of Alcohol and Drug Programs to provide certain drug treatment services under the Medi-Cal program. If a county refuses to contract with the department for these services, the department is required to contract directly with certified providers in that county for the provision of these services.

This bill would require the department, in collaboration with the County Alcohol and Drug Program Administrators' Association of California, to submit a report to the Legislature, by July 1, 1999, that will identify the key policy, program, and financial issues involved in a decision as to whether to adopt the medicaid rehabilitation option under the Medi-Cal Drug Treatment Program.

The bill would require the department, in partnership with the association, to collaborate with providers, constituency groups, and other interested parties to develop and test a comprehensive client-centered system of care, until October 31, 2001. The bill would require the department in partnership with the association, to prepare findings and recommendations and report to the Legislature by July 1, 2001.

Ch. 390 (SB 2017) Schiff. Juvenile court dependents and wards: orders.

Under existing law, after a petition has been filed to declare a child a dependent child of the juvenile court, the court may issue ex parte orders enjoining any parent or other specified persons from molesting, attacking, sexually assaulting, or battering the child or another child in the household. Violation of any such order is a misdemeanor.

This bill would permit the court, after a petition has been filed to declare a child a ward of the court, to issue ex parte orders enjoining any parent or other specified persons from committing any of those specified acts against the child, excluding certain persons from the dwelling of the person who has care, custody, and control of the child, or enjoining the child from contacting, threatening, stalking, or disturbing the peace of another person, as specified. Violation of the order would be a misdemeanor. The bill would also add stalking to the list of acts that may be enjoined in dependency proceedings.

Existing law requires the county probation department and the county welfare department to make recommendations to the juvenile court regarding the status that would best serve the interests of a minor when it appears that the minor may come within the description of both a dependent and a ward of the court. These recommendations are to be presented to the court with the petition that is filed on the minor's behalf.

This bill would require the court to give notice of the presentation of the departmental recommendations to any other juvenile court having jurisdiction over the minor, as specified.

Existing law provides that, with respect to children who have been adjudged a ward or dependent child of the court, the court may issue orders limiting the control exercised over the ward or dependent child by any parent or guardian. Existing law also authorizes the court to issue any and all other reasonable orders for the care, supervision, custody, conduct, maintenance and support of a ward of the court.

This bill would provide that, when a child is declared a ward of the court and proceedings are pending for dissolution of marriage of the child's parents, or to establish custody or paternity of the child, the juvenile court may issue the above-described ex parte orders and may issue orders determining the parentage, custody of, or visitation with, the child, subject to specified procedures and criteria. The bill would also authorize the juvenile court to appoint a guardian of the person, and to modify or terminate a guardianship previously established in the probate court, for a child who is a dependent child or ward of the court. The bill would require the court to notify the superior court in which proceedings to determine the parentage, custody of, or visitation with, the minor are pending, or in which guardianship was previously established, of its decision to issue a protective order, or to appoint a guardian or modify or terminate guardianship, pursuant to these provisions. The bill would require the clerk of the superior court to file that notice, as specified, and mail a copy of the notice to all parties of record in the proceeding.

Because this bill would impose new duties on local officials and court personnel, and would expand the definition of a crime, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 391 (SB 2060) Kopp. Investment securities.

Existing law, known as the Corporate Securities Law of 1968, regulates the issuance of corporate securities in the state and provides for the regulation by the Commissioner of Corporations of agents, broker-dealers, investment advisers, and investment adviser representatives.

This bill would, among other things, authorize the commissioner to issue certain orders directing the discontinuance of certain unsafe or injurious practices by those persons, and to levy certain administrative penalties in connection therewith. This bill would also require the commissioner to send a notice demanding remedial action to the principal officers of any broker-dealer or investment adviser that appears to the commissioner to be in an insolvent condition, conducting business in an unsafe or unauthorized manner, or engaging in certain other prohibited activities, and would authorize the commissioner to take possession, or to appoint a conservator to take possession, of the property, business, and assets of the broker-dealer or investment adviser, if the broker-dealer or investment adviser fails to comply with the notice, or to otherwise effect a remedy acceptable to the commissioner.

This bill would make certain related changes to notice and hearing requirements and would add certain other provisions related to the commissioner's administrative authority over broker-dealers and investment advisers.

Existing law makes it a crime to willfully violate any provision of the Corporate Securities Law of 1968.

By adding new provisions that would require broker-dealers and investment advisors to comply with certain orders of the commissioner, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

Existing law prescribes certain certification and notice filing requirements for investment advisers and investment adviser representatives. Existing law authorizes the commissioner by order, after appropriate notice and opportunity for hearing, to censure, deny a certificate to, suspend for a specified period of time, or revoke the certificate of, an investment adviser for engaging in certain prohibited activities and for other specified reasons. Existing law prohibits any of these orders from being entered unless specified notice and hearing requirements are first satisfied.

Existing law also authorizes the commissioner, by order, after appropriate notice and opportunity for hearing, to censure, suspend for a specified period of time, or bar from any position of employment, management, or control of any investment adviser, broker-dealer, or commodity adviser, any officer, director, partner, or employee of, or any person performing similar functions for, an investment adviser, if that order is in the public interest and the person has violated certain specified provisions of law.

This bill would also prohibit any of these orders from being entered unless those specified notice and hearing requirements are first satisfied.

Existing law specifies instances in which the commissioner may summarily suspend or revoke the certificate of a broker-dealer or investment adviser.

This bill would additionally authorize that action in instances where the broker-dealer or investment adviser fails to maintain certain required capital to ensure its financial responsibility, or fails to maintain any book or records as required by the commissioner.

Existing law specifies certain qualification and filing requirements for the sale of securities, and specifies certain fraudulent and prohibited practices.

This bill would provide that every person who with knowledge directly or indirectly controls and induces any person to violate any provision of that law, or who knowingly provides substantial assistance to another person in violation of any provision of that law, is deemed to have committed a violation, as specified. The bill would also make it unlawful for any person directly or indirectly to do any act or thing which would be unlawful for that person to do under that law through or by any other person. In expanding the scope of persons subject to the criminal penalty provisions of the Corporate Securities Law of 1968, the bill would impose a state-mandated local program.

Existing law also provides that any person who violates any provision of the Corporate Securities Law of 1968, or who violates any rule or order under that law, shall be liable for a civil penalty in an amount not to exceed \$2,500 for each violation, as specified.

This bill would increase the amount of that civil penalty to an amount not to exceed \$25,000.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 392 (SB 2084) Costa. Fraternal fire insurers: religious organizations.

Existing law governing fraternal fire insurers, among other things, authorizes certain religious organizations to write fire insurance for its members and its churches. Existing law prohibits those religious organizations from writing fire insurance in excess of \$30,000 on any one risk and in excess of \$180,000 in any one city block within an incorporated city without reinsuring the excess over those amounts.

This bill would change the amounts not subject to reinsurance from \$30,000 to 10% of the organization's capital and surplus as shown in its last statement on file with the commissioner, on any one risk, and from \$180,000 to 20% of the organization's capital and surplus as shown in its last statement on file with the commissioner, in any one city block.

Ch. 393 (SB 1367) C. Wright. Camarillo State Hospital: transfer.

Existing law provides for the sale, lease, or transfer of surplus state property by the Department of General Services.

This bill would require the Director of General Services to transfer to the County of Ventura, no later than October 1, 1998, and upon approval of the county board of supervisors, the approximately 57 acre noncontiguous parcel of the Camarillo State Hospital property located on Lewis Road in Ventura County, subject to specified conditions. It would further require that the transfer be completed at no cost to the County of Ventura, other than reasonable costs incurred by the Department of General Services in performing the transfer.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 394 (SB 1738) Kelley. Renderers: transportation.

(1) Existing law requires various persons engaged in the pet food and horsemeat industry to be licensed by the Department of Food and Agriculture, including renderers and collection centers. The department is authorized to charge each licensed renderer and collection center an additional fee, not to exceed \$3,000 per year per each licensed rendering plant or collection center, to cover the costs of administering specified provisions relative to the pet food and horsemeat industry. These provisions will become inoperative on July 1, 2000, and will be repealed on January 1, 2001, unless a later enacted statute deletes or extends those dates. Existing law also permits the department to charge a fee, in addition to the registration fee for transporters of inedible kitchen grease, to cover the cost of administering the law relating to those persons and provides that the additional fee may not exceed \$300 per year per vehicle operated to transport inedible kitchen grease, or \$3,000 per year for each registered transporter. Existing law continuously appropriates those fees and the additional fees authorized to be collected from rendering plants and collection centers to the department to carry out the programs for which they are collected.

This bill would extend the repeal of the additional fee imposed upon licensed renderers and collection centers to make those provisions inoperative on July 1, 2005, and would repeal those provisions on January 1, 2006, thereby making an appropriation. The bill would delete the administration of provisions relating to pet food importers and dead haulers from the purposes to which the fees may be dedicated. The bill would also make the fee imposed upon the transporters of inedible kitchen grease inoperative on July 1, 2005, and would repeal that fee on January 1, 2006.

(2) Existing provisions of the Food and Agricultural Code require licensed renderers to record and keep certain information relating to receipt of kitchen grease that is not

intended for human food. Licensed renderers and registered transporters are required to exhibit those records on demand to any peace officer, among others. Failure to keep the specified records or refusal to exhibit the records upon demand of a peace officer is a misdemeanor.

Existing provisions of that code make it a misdemeanor or a felony, as specified, to (a) engage in the transportation of inedible kitchen grease without being registered with the Department of Food and Agriculture and without being in possession of a valid registration certificate issued by that department, (b) to transport inedible kitchen grease from any place within this state to any place outside the borders of this state without being a registered transporter or licensed renderer, (c) to steal, misappropriate, contaminate, or damage inedible kitchen grease, or containers thereof, or (d) to take possession of inedible kitchen grease from an unregistered transporter or knowingly take possession of stolen inedible kitchen grease.

This bill would add those provisions to the Vehicle Code.

(3) Existing law authorizes the Department of the California Highway Patrol to stop any vehicle transporting any timber products, livestock, poultry, farm produce, crude oil, or petroleum products and inspect certain documents to determine whether the driver is in legal possession of the load, and, upon reasonable belief that the driver of the vehicle is not in legal possession, to take custody of the vehicle and load, as prescribed, and imposes duties on the sheriff with respect to those products.

This bill would make those provisions applicable with regard to a vehicle that transports inedible kitchen grease.

Ch. 395 (SB 1794) Schiff. Sentencing.

Existing law specifies sentence enhancements of differing terms of imprisonment in the state prison to be applied for sentencing purposes upon conviction of certain criminal offenses under various circumstances.

This bill would add provisions, for reference purposes, listing and categorizing all sentence enhancements by schedules based on the length of the term of imprisonment imposed by each sentence enhancement.

Ch. 396 (SB 2099) O'Connell. Santa Maria Public Airport District: foreign trade zone.

Existing law permits a public entity to submit an application as provided for by federal law to the federal Foreign Trade Zones Board to establish, operate, and maintain a foreign trade zone.

This bill would authorize the Santa Maria Public Airport District to apply for, establish, operate, and maintain a foreign trade zone and subzones thereto, and to allow in the foreign trade zone and subzones thereto any properties and businesses that are located either within or outside the geographical boundaries of the district and that are located within either the County of Santa Barbara or the County of San Luis Obispo.

This bill would make legislative findings and declarations as to the necessity for a special statute.

Ch. 397 (AB 1881) B. Thompson. Economic development: federally recognized California Indian tribes.

Existing law provides for various programs and activities for the development of economic opportunities within the state.

This bill would encourage and authorize all state agencies to cooperate with federally recognized California Indian tribes on matters of economic development and improvement for the tribes. It would require the Department of Housing and Community Development to prepare and submit to the Legislature a report summarizing generally the steps taken, and results achieved, by state agencies in cooperating with the tribes on these matters.

Ch. 398 (AB 2188) Scott. Firearms: license to manufacture firearms.

(1) Existing law generally regulates the transfer and possession of firearms.

This bill would require the Department of Justice to accept applications for, and to grant state licenses permitting, the manufacture of firearms within this state. The bill

would make it a misdemeanor for any federally licensed firearm manufacturer to manufacture firearms in this state without a state license to manufacture firearms or to fail to forward specified records to the Federal Bureau of Alcohol, Tobacco, and Firearms within 3 days of the closure of business. By creating new crimes, the bill would impose a state-mandated local program.

The bill also would require firearm manufacturers to report to certain agencies within a specified timeframe whenever a firearm is discovered to be stolen or missing from the licensee's premises. The bill would require each employee of a firearm manufacturer to obtain at least annually a certificate of eligibility indicating that the employee is not a person who is prohibited from possessing firearms, and would prohibit any employee who the licensee knows or reasonably should know is within a prohibited class from coming into contact with any firearm. The bill would also require all manufactured firearms and barrels for firearms to be stored in a secure facility that satisfies specified requirements. Firearm manufacturers producing fewer than 500 firearms per year would be authorized to design their own security plan subject to approval by the Department of Justice or the Bureau of Alcohol, Tobacco, and Firearms. The bill would require each firearm manufacturer to record the type, model, caliber or gauge, and serial number of each firearm manufactured or acquired, and the date of the manufacture or acquisition within one business day of the manufacture or acquisition, and to permanently maintain and prepare monthly backups of these records.

The bill would require licensees to allow the Department of Justice to inspect any firearm manufacturing facility to ensure compliance with these provisions, and to allow designated persons to inspect facilities and records to ensure compliance with these requirements during business hours.

The bill would require the Department of Justice to maintain a centralized list of all persons licensed to manufacture firearms in this state, to provide the list annually to each police department and sheriff's office in this state, and to notify the Federal Bureau of Alcohol, Tobacco, and Firearms, as well as the local law enforcement agency having jurisdiction, upon the revocation of a license to manufacture firearms.

(2) Existing law makes it a felony to change, alter, remove, or obliterate the name of the maker, model, manufacturer's number, or other mark of identification, including any distinguishing number or mark assigned by the Department of Justice on any pistol, revolver, or any other firearm, except as specified. Existing law provides that possession of any pistol or revolver upon which the name of the maker, model, manufacturer's number or other mark of identification has been changed, altered, removed, or obliterated, shall be presumptive evidence that the possessor has changed, altered, removed, or obliterated the same.

This bill would require each firearm manufactured in this state to be identified with a unique serial number stamped onto the firearm utilizing the method of compression stamping within one business day of the time the receiver or frame is manufactured, except as specified.

The bill would authorize the Department of Justice to revoke the license of any licensee who violates this provision or the provision described in (1) above. The bill would require the revocation of any licensee who knowingly or with gross negligence violates these provisions or violates these provisions 3 times, and would make that person, firm, or corporation permanently ineligible to obtain a state license to manufacture firearms.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 399 (AB 2761) Committee on Agriculture. Marketing advisory and promotional councils and commissions, and advisory boards.

(1) Existing law requires the Secretary of Food and Agriculture to establish the Organic Food Advisory Board to advise the secretary with respect to his or her responsibilities relating to organic food. Existing law prescribes the membership of the advisory board.

This bill would provide for alternates for each member of the advisory board.

(2) Existing federal law requires the United States Secretary of Agriculture, upon the request of the duly constituted authorities of any state, to confer with and hold joint hearings with those duly constituted authorities in order to effectuate federal policy and in order to obtain uniformity in the formulation, administration, and enforcement of federal and state programs relating to the regulation of the handling of agricultural commodities or products. Existing federal law authorizes the United States Secretary of Agriculture to cooperate with those authorities, to accept and utilize state and local officers and employees as necessary, to avail himself or herself of the records and facilities of those authorities, to issue orders complementary to orders or other regulations issued by those authorities, and to make the records and facilities of the United States Department of Agriculture available to those authorities, as specified.

Existing state law establishes numerous marketing advisory and promotional councils and commissions to promote the state's agricultural and seafood products.

This bill would state that the Legislature finds and declares that the councils and commissions operating pursuant to provisions of existing law governing those marketing advisory and promotional councils and commissions are duly constituted authorities of this state for purposes of the federal law summarized above.

(3) Existing law specifies that the term of office of each member of the California Apple Commission, except ex officio members, is 3 years. Existing law limits the terms of office of each member to 2 consecutive terms.

This bill would change the term of office for each member, except ex officio members, to 4 years and would limit the terms of office of each member to 4 consecutive terms. The bill would authorize the commission to collect and disseminate handler F.O.B. market price information based on sales that have occurred, as specified.

(4) Existing law prescribes procedures pursuant to which the operations of the California Apple Commission may be continued, suspended, or terminated.

This bill would revise those procedures.

(5) Existing law defines "producer," for purposes of the law governing the California Cut Flower Commission, as any person in this state who grows flowers for market and who, upon request, provides proof of commodity sale. Existing law excepts from that definition any person who has grown less than a gross value of \$200,000 of flowers in the preceding marketing year.

This bill, instead, would except from that definition any person who has grown less than a gross value of \$250,000 of flowers in the preceding marketing year. The bill would authorize an increase in that amount by vote of $\frac{2}{3}$ of the membership of the commission and a decrease only if approved pursuant to specified procedures.

(6) Existing law creates the California Tomato Commission in state government, and prescribes the membership and functions and duties of the commission.

For the purposes of those provisions, existing law defines "tomatoes" to mean all tomatoes, except cherry tomatoes, which are produced for commercial purposes and are handled within the state in fresh form.

This bill would additionally exclude tomatoes grown in a greenhouse under either glass or plastic, and hydroponically grown tomatoes, as defined, from that definition.

This bill would also authorize the commission to administer any government program that is engaged in activities authorized by specified provisions of existing law governing the commission and that directly and exclusively affects the fresh tomato industry, upon the request of an authorized agent of the program.

Ch. 400 (SB 1251) Calderon. Education: prior year appropriations.

(1) Existing law appropriated \$500,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Los Angeles Unified School District in the 1997-98 fiscal year to enhance education programs at the California Museum of Latino History, Art, and Culture related to exhibits on Latino history and culture.

This bill would reappropriate the unencumbered balance of these funds to the Superintendent of Public Instruction for allocation to the Montebello Unified School District for the same purpose, thereby making an appropriation.

(2) Existing law appropriated \$1,646,000 from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the San

Joaquin County Office of Education for educational and operational costs for the Professional Development Center, technology training for teachers, pupils, and support staff, and reading and mathematics projects.

This bill would provide that the funds are also allocated for capital outlay and startup, thereby making an appropriation.

(3) To the extent that the funds appropriated by this bill are allocated to a school district or a community college district, those funds would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 401 (SB 1602) Peace. Public Utilities Commission.

(1) Existing law requires the Public Utilities Commission to regulate the rates of public utilities that provide natural gas.

This bill would permit the commission to investigate the restructuring of natural gas services, as specified, but would prohibit the commission, prior to January 1, 2000, from enacting any gas industry restructuring decisions and from enforcing any natural gas restructuring decisions for core customers as considered in Rulemaking 98-01-011 enacted prior to the effective date of this act, but after July 1, 1998.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 402 (AB 1951) Hertzberg. Local government organization: petitions.

(1) The Cortese-Knox Local Government Reorganization Act of 1985 sets forth the procedures to be followed in the change in organization or reorganization of local governments generally. The act requires that, in cities with a population of more than 100,000 residents located in a county with a population of over 4,000,000, no petition may be accepted for filing unless the signatures thereon have been secured within 90 days of the publication of the required notice and the petition is submitted to the executive officer for filing with 60 days after the last signature is affixed. If the petition is submitted for filing after 60 days after the last signature is affixed, the executive officer is required to file it as a public record without prejudice to the filing of a new petition.

This bill would provide that these provisions do not apply to a petition for a special reorganization, as defined, that the period for securing signatures for a petition for a special reorganization is 6 months, and that this provision is declaratory of existing law.

(2) Pursuant to the act, if the certificate of the executive officer shows the submitted petition for change of organization or reorganization to be insufficient, the executive officer is required to give notice immediately by certified mail of the insufficiency to the chief petitioners, if any, stating in what amount the petition is insufficient. A supplemental petition bearing additional signatures may be filed with the executive officer within 15 days of the notice of insufficiency.

This bill would permit the proponents of the petition, at their option, to collect signatures for an additional 15 days immediately following the statutory period allowed for collecting signatures without waiting for notice of insufficiency. It would specify that any proponent choosing to exercise this option may not file a supplemental petition as provided in existing law.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 403 (SB 1110) Leslie. Education.

(1) Existing law prohibits a pupil from attending AIDS prevention instruction, venereal disease instruction, or any class in which human reproductive organs and their functions and processes are described, illustrated, or discussed if a written request that the pupil not attend has been received by the school, as specified. Existing law requires, upon written request of a pupil's parent or guardian, that a pupil be excused from any part of the instruction in health, family life education, and sex education that conflicts with the religious training and beliefs of the parent or guardian of the pupil.

This bill would prohibit a pupil from receiving instruction on sexually transmitted diseases, AIDS, human sexuality, or family life delivered by outside organizations or guest speakers, unless the pupil's parent or guardian has been notified at the beginning of the school year or, with respect to a pupil who enrolls in a school after the beginning of the

school year, at the time of that pupil's enrollment. If the arrangements for this instruction are made after these occurrences, the bill would require notice to be provided 10 to 15 days before the instruction is delivered. The bill would require a pupil's parent or guardian to be notified of the date of the instruction, the name of the organization or affiliation of each guest speaker, and provided with information stating the parent's or guardian's right to request a copy of specified provisions of law relating to AIDS prevention instruction and sex education.

This bill would also prohibit a pupil from receiving instruction in an assembly delivered by a teacher or administrator employed by the school district if the instruction involves presentations on sexually transmitted diseases, AIDS, human sexuality, or family life unless the pupil's parent or guardian is notified about the instruction at the beginning of the school year or, with respect to a pupil who enrolls in a school after the beginning of the school year, at the time of that pupil's enrollment. If the arrangements for this instruction are made after these occurrences, the bill would require notice to be provided 10 to 15 days before the instruction is delivered.

This bill would prohibit a pupil from being subject to a disciplinary action, academic penalty, or other sanction if the pupil's parent or guardian declines to permit the pupil to receive instruction on sexually transmitted diseases, AIDS, human sexuality, or family life and the pupil does not receive that instruction. The bill would require an alternative educational activity to be made available, as specified, to a pupil whose parent or guardian has requested that the pupil not receive instruction on sexually transmitted diseases, AIDS, human sexuality, or family life.

(2) Existing law requires instruction on the methods to reduce the risk of contracting the human immunodeficiency virus to emphasize that sexual abstinence and abstinence from intravenous drug use are the most effective means for AIDS prevention. Existing law also requires instruction about the societal view of AIDS to emphasize compassion for persons suffering with AIDS.

This bill would include monogamy and the avoidance of multiple sexual partners in what should be emphasized as the most effective means for AIDS prevention. The bill would require an emphasis on compassion for persons suffering from debilitating handicaps and terminal diseases like AIDS instead of compassion for persons suffering with AIDS and would prohibit AIDS prevention instruction from being conducted in a manner that advocates drug use, a particular sexual practice, or sexual activities. The bill would require notification to be sent to the pupil's parent or legal guardian at the beginning of the school year or, with respect to a pupil who enrolls in a school after the beginning of the school year, at the time of that pupil's enrollment. If the arrangements for this instruction are made after these occurrences, the bill would require notice to be provided 10 to 15 days before an outside organization or guest speaker is scheduled to deliver AIDS prevention instruction and would require the notification to include the date of instruction, the name of the organization or affiliation of each guest speaker, and information stating the parent's or guardian's right to request a copy of specified provisions of law relating to sex education. The bill would also require the parents or guardians of each pupil in grades 7 to 12, inclusive, to be provided with information stating the parent's or guardian's right to request a copy of specified provisions of law relating to sex education.

(3) This bill would require that the parent or guardian of a pupil in kindergarten or any of grades 1 to 6, inclusive, be provided with written notification, as specified, before the pupil receives instruction on sexually transmitted diseases, AIDS, human sexuality, or family life.

(4) By imposing new duties upon local education entities, this bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 404 (SB 1410) Burton. Child support enforcement: incentive program.

Existing law provides that, on and after July 1, 1998, the State Department of Social Services shall establish a state incentive for child support collections, for counties that elect to participate. Existing law requires the office of the Legislative Analyst, in consultation and collaboration with specified interested groups, to prepare a performance-based incentive program, using a flat rate, for the 1998-99 fiscal year and that, for subsequent fiscal years, shall mirror the federal incentive plan, or the most recent draft of the federal plan.

Under existing law, the department shall assess on at least an annual basis each county's compliance with federal and state child support laws and regulations in effect for the time period being reviewed, in accordance with specified eligibility requirements, in order for counties to receive state incentives for child support collections. Existing law provides for corrective action to be taken by a county in the event that disproportionate representation is found in the county's pool of noncompliant cases.

This bill would revise state child support collection incentive provisions, as well as the manner in which the department assesses county compliance, and would delete the provisions of existing law relating to the duties of the office of the Legislative Analyst with respect to the preparation of a performance-based incentive program. This bill would require that the state child support incentive for any county that elects to receive the incentive shall be between 4% and 13% of the county's child support collections and would permit an increase in this percentage under specified circumstances. The bill would declare that in the event that the federal government imposes a penalty on California's child support program for its failure to implement an automated child support system within the time required by specified federal law, no part of the penalty shall be assessed against Los Angeles County, except as specified in the bill.

Ch. 405 (SB 1959) Schiff. Professions: licensing: military service.

Existing law provides that any person who has served on active duty in the medical corps of any of the armed forces, in which no less than an aggregate of 12 months was spent in rendering bedside patient care, and who has completed the basic course of instruction in nursing required by his or her particular branch of the armed forces, and whose service in the armed forces has been under honorable conditions, or whose general discharge has been under honorable conditions, shall be granted a vocational nursing license upon proof that he or she possesses certain necessary qualifications, as set forth in his or her service records, and upon his or her passing an examination.

This bill would make verified military training that is comparable a substitute for training requirements applicable to licensure, registration, or certification under provisions regulating barbers, security guards, private patrol operators, and smog check technicians, as specified.

Ch. 406 (AB 1590) Thomson. Trial court funding.

(1) Existing law authorizes a county to impose an additional fee on certain filings in civil actions and proceedings, as specified, to be used to defray the cost of automating the recordkeeping of the county clerk and municipal and superior courts and converting the county clerk and municipal and superior courts to a micrographics document storage system.

This bill would limit the use of these fees to trial court recordkeeping and document storage, eliminating the automating of the recordkeeping of the county clerk, and would make related changes.

(2) Existing law regulates the amounts of civil filing fees which a county must remit to the state for deposit in the Trial Court Trust Fund.

This bill would revise and recast those amounts, as specified.

(3) Existing law directs the Judicial Council to establish a request-for-proposal process to establish, maintain, or expand local court appointed special advocate programs. Existing law limits the maximum state grant per county program per year to \$20,000.

This bill would increase that amount to \$35,000 in counties in which the population is less than 700,000, and \$50,000 in other counties, as specified.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 407 (SB 50) Greene. Education: Leroy F. Greene School Facilities Act of 1998: Class Size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998: school facilities construction: developers fees.

(1) Existing law prohibits an election on a bond measure of a school district or community college district within 45 days of a statewide election unless conducted at the same time as the statewide election.

This bill would repeal this provision.

(2) Existing law requires the State Department of Education to establish a pool of duplicate plans for school buildings appropriate for school districts in rural areas. Existing law defines school building for this purpose to mean a one-story schoolhouse of not more than 9 classrooms.

This bill would, instead, require the State Allocation Board to obtain construction plans for school buildings appropriate for school districts in the various climates and geographical conditions of the state requiring school buildings of various sizes, would delete this definition of school building and would, instead, make the definition of school building set forth in the Field Act relating to seismic safety apply to these provisions, and would make other conforming and technical, nonsubstantive changes.

(3) Under existing law, known as the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (hereafter the "Greene Act"), the State Allocation Board (hereafter "the board") is authorized to apportion state funding to applicant school districts for designated school facilities construction purposes.

This bill would prohibit the board from approving any projects pursuant to the Greene Act on and after November 4, 1998. This provision would become inoperative on November 4, 1998, if the bond act described in (6) is not adopted.

This bill would enact the Leroy F. Greene School Facilities Act of 1998, which would establish a new state program in which the board would provide state per pupil funding for new school facilities construction and school facilities modernization. This program would become inoperative on November 4, 1998, if the bond act described in (6) is not adopted.

This bill would establish the 1998 State School Facilities Fund and provide for the continuous appropriation of funds deposited in that fund. The bill would establish a county school facilities fund for deposit of funding for approved projects. By requiring the establishment of this county fund, this bill would impose a state-mandated local program.

(4) Under existing law, the West Contra Costa Unified School District is ineligible for any state facilities funding for a period of 5 years from June 30, 1993, or until the date of the final payment of its entire debt to the state, whichever is later.

This bill would provide that, notwithstanding existing law, the West Contra Costa Unified School District shall be eligible for state school facilities funding on and after November 4, 1998.

(5) Existing law, the Field Act, requires a school district, prior to contracting for the construction or alteration of a school building, to obtain written approval of the construction plans by the Department of General Services pursuant to designated structural safety and other standards. Under an alternative plan review process, if the applicant so requests and the department is unable to commence review within 15 working days, the department is required to refer the review of the application to a qualified individual or firm under contract with the department.

This bill would permit certain local agency building officials to be qualified plan review firms for purposes of these provisions. The bill would permit an applicant to select a qualified plan review firm instead of having the department review the plans. The bill would require the department to contract with a sufficient number of qualified plan review firms. The bill would add similar provisions for review of community college district school building construction plans by the department under the Field Act.

(6) Under existing law, the Public Education Facilities Bond Act of 1996 provides for the issuance, pursuant to the State General Obligation Bond Law, of bonds in an amount not to exceed \$2,025,000,000 and the expenditure of the proceeds therefrom to provide aid to school districts, county superintendents of schools, and county boards of education in accordance with the Greene Act and related school facilities programs.

This bill would enact the Class Size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998, which, upon approval by the state electorate, would provide for the issuance of state general obligation bonds in an amount not to exceed \$9,200,000,000, exclusive of refunding bonds issued pursuant to that act.

The bill would provide that \$3,350,000,000 would be allocated beginning in the 1998-99 fiscal year for school district project funding related to the growth in enrollment of applicant school districts, prescribed reconstruction or modernization, and facilities-related costs for class size reduction. The bill would appropriate the funds for these purposes. The bill would provide that \$3,350,000,000 would be allocated in the 2000-01 fiscal year for similar purposes as described above and would appropriate the funds for these purposes. The bill would provide that \$2,500,000,000 would be deposited in the 1998 Higher Education Capital Outlay Fund, which would be established by the bill, with \$1,250,000,000 issued and sold after July 1, 2000, for higher education facility building construction and related expenditures when appropriated.

This bill would provide that notwithstanding any other provision of law, on the operative date of this bill, specified liens that have been recorded on school district property by the state would be released, and would prohibit the imposition of new liens on and after November 4, 1998.

This bill would declare that it is the policy of the state to exercise prudence in undertaking the sale of bonds otherwise authorized for sale by this bill or any other act, and would encourage undertaking the sale of bonds not to exceed a cumulative debt service to General Fund revenue ratio of 6% unless the sale is in the best fiscal interest of the state.

This bill would provide for the submission to the voters of the Class Size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998 at the November 3, 1998, statewide general election.

(7) Existing law sets forth the exclusive methods of mitigating environmental effects related to the adequacy of school facilities when considering the approval or establishment of conditions for the approval of a development project under the California Environmental Quality Act (CEQA).

This bill would, notwithstanding any other provision of law, instead, set forth exclusive methods of considering and mitigating impacts on school facilities which occur or might occur as a result of any legislative or adjudicative act by any state or local agency involving, but not limited to, the planning, use, or development of real property or any change of governmental organization or reorganization. The bill would also on or after any statewide election in 2006, if a school facilities general obligation bond measure submitted to the voters fails to be approved by the voters, set forth exclusive methods of mitigating environmental effects related to the adequacy of school facilities when considering the approval or the establishment of conditions for the approval of a development project under CEQA. These provisions applicable on or after 2006 would, when operative, make the provisions described in the first sentence of this paragraph inoperative.

This bill would establish a Homebuyer Down Payment Assistance Program and a Rental Assistance Program to provide assistance in the amount of the applicable school facility fee on affordable housing developments. This bill would establish the School Facilities Fee Assistance Fund in the State Treasury and would provide that the fund is continuously appropriated to the Department of General Services. The bill would appropriate \$160,000,000 to that fund for the purposes of these programs, and would require the Department of General Services to contract with the California Housing Finance Agency for the administration of these programs and for allocation of these funds.

(8) Existing law prohibits an officer or employee of the state, or of a public agency or public authority, or person, firm, or corporation acting or purporting to act on behalf of any officer or employee, from negotiating, making application for, obtaining, or procuring any surety bond or contract of insurance, except contracts of insurance for builder's risk or owner's protective liability, that can be obtained or procured by the bidder, contractor, or subcontractor. Certain projects are excluded from this prohibition.

This bill would exclude a construction project undertaken by a public school district.

(9) Existing law authorizes a public agency to utilize owner-controlled or wrap-up insurance programs on a public works project if the total cost of the project is over \$125,000,000 and other prescribed conditions are met.

This bill would include a public school project within that authority to utilize owner-controlled or wrap-up insurance programs.

(10) Existing law authorizes certain local agencies to impose limited fees or other charges against certain development projects to fund the construction or reconstruction of school facilities. Under existing law, a building permit may not be issued for any development absent certification by the appropriate school district of compliance by the development project with the fee, charge, dedication, or other requirement levied by the governing board of that school district. Under existing law, for residential development, the limit on fees is \$1.50 per square foot and for commercial development the limitation is 25¢ per square foot excluding permissible adjustment for inflation. Existing law prohibits the legislative body of a local agency from levying development fees or other requirements for the construction or reconstruction of schools, other than pursuant to designated statutory authority.

This bill would provide that the fees are \$1.93 for residential development and 31¢ for commercial development, and would provide for subsequent adjustments for inflation. The bill would prohibit fees or other requirements for the construction or reconstruction of schools from being levied or imposed in connection with, or made a condition of, any legislative or adjudicative act, or both, by any state or local agency involving, but not limited to, the planning, use, or development of real property, other than pursuant to designated authority. This bill would provide, in the case of residential construction, a governing board of a school district may increase the per square foot fee by an amount determined pursuant to a formula for the purpose of generating funds to match the state per pupil and site assistance grant for which the district is eligible to accommodate the projected number of new pupils attributable to the construction of new residential units as demonstrated by a school facility needs analysis. This bill would require the needs analysis to be adopted in accordance with specified notice and procedural requirements. This bill would, when state funds for new facility construction are not available, permit a governing board of a school district that may increase the per square foot fee, as described above, to impose a supplemental amount.

(11) Existing law provides for specific dates on which elections are required to be held, but exempts certain elections from those dates.

This bill would exempt elections held for school bonds from those dates.

(12) This bill would provide that certain of its provisions would not become operative before November 4, 1998, and on that date would only become operative if the Class Size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998 is approved by the voters at the November 3, 1998, statewide general election.

(13) Existing law provides that a bond measure submitted to the people by the Legislature is required to appear on the ballot of the first statewide election occurring at least 131 days after the adoption of the proposal by the Legislature. Existing law provides for ballot arguments, press releases, the form of the ballot, public examination, and for the mailing of state ballot pamphlets to the voters, within specified timeframes, for measures that are to be voted upon.

This bill would require, notwithstanding these provisions or any other provision of law, the Secretary of State to cause the Class Size Reduction Kindergarten-University Public Education Bond Act of 1998 to be placed on the ballot and submitted to the voters at the November 3, 1998, general election and to include in the ballot or supplemental ballot pamphlet information regarding the measure.

(14) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(15) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 408 (SB 520) Rainey. Elections.

Existing provisions of the California Constitution permit the Legislature to enact statutes calling elections, and make those statutes effective immediately upon enactment.

This bill would call an election to be consolidated with the November 3, 1998, statewide general election and require, notwithstanding certain provisions of existing law, the submission of ACA 10 to the voters at that election. The bill, in addition, would make various provisions necessary for the placement of that measure on the ballot for the November 3, 1998, statewide general election.

Because local elections officials would be required to undertake additional duties to submit ACA 10 on the ballot at the consolidated election, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

This bill would declare that it is to take effect immediately as an act calling an election.

Ch. 409 (SB 287) Burton. Tribal-state gaming compacts.

The California Constitution provides that, with the exception of the California State Lottery, the Legislature has no power to authorize lotteries and shall prohibit the sale of lottery tickets in the state. The California Constitution also specifies that the Legislature has no power to authorize, and shall prohibit, casinos of the type currently operating in Nevada and New Jersey. In addition, the California Constitution permits the Legislature, by statute, to authorize cities and counties to provide for bingo games, but only for charitable purposes. Existing law further prohibits various forms and means of illegal gambling and provides for the regulation of legal gaming pursuant to the Gambling Control Act. Existing law also provides that the Governor is the constitutional officer with exclusive authority to communicate on an official basis with the government of another state and the United States.

This bill would designate the Governor as the state officer responsible for negotiating and executing compacts between the state and federally recognized Indian tribes located in the state pursuant to the federal Indian Gaming Regulatory Act for the purpose of authorizing class III gaming, as defined in that federal statute, on Indian lands. This authority would include the authority to waive the state's immunity to suit in federal court, as specified.

The bill would state that a list of compacts entered into between the state and specified tribes are ratified. The bill would state that any other compact executed after that date that is submitted to the Legislature by the Governor and is certified by the Governor to be identical in all material respects to any of these compacts is also ratified unless rejected by $\frac{2}{3}$ of the membership of each house of the Legislature within 30 days of submission, except that when this 30-day period ends during a joint recess of the Legislature the period would be extended until the 15th day following the day on which the Legislature reconvenes. The bill would also state that the Legislature acknowledges the sovereign right of tribes to negotiate and enter into compacts that are materially different from any of the specific compacts ratified therein, and would provide for ratification of these materially different compacts upon approval of a majority of the membership of each house of the Legislature.

The bill would also provide that, in deference to tribal sovereignty the execution of, and compliance with the terms of, specified compacts shall not be construed as a project under the California Environmental Quality Act.

This bill would also provide that none of its provisions shall be interpreted to mean that the compacts ratified therein authorize the unilateral imposition of any statewide limit

on the number of lottery devices or any allocation system for lottery devices on any other tribe, and that each tribe may negotiate separately with the state over these matters.

Ch. 410 (SB 149) Rainey. Corrections.

Existing law exempts various persons from licensure and other regulatory provisions of the Barbering and Cosmetology Act.

This bill would additionally exempt from those provisions persons rendering barbering or cosmetology services in an institutional program during the course of and incidental to the incarceration or confinement of specified persons. However, it would require those persons to complete a barbering training course, developed by the Department of Corrections and approved by the Department of Consumer Affairs, in the proper care of instruments and the prevention of infectious diseases, and to successfully pass an examination, developed and administered by the Department of Corrections, covering those subjects. It would also subject all barbering facilities located in correctional facilities to all appropriate health and safety sanitation standards, as determined by the Department of Corrections.

Ch. 411 (SB 165) Solis. Unemployment compensation.

Under existing law, an individual is disqualified for unemployment compensation benefits if the Director of Employment Development finds that the individual left his or her most recent work voluntarily without good cause. Under existing law, there are circumstances under which an individual may be deemed to have left his or her most recent work with good cause, but the payment of benefits to that person will not be charged to the account of the employer.

This bill would provide that an individual may be deemed to have left his or her most recent work with good cause if he or she leaves employment to protect his or her children, or himself or herself, from domestic violence abuse. Unemployment compensation benefits paid to that individual would not be chargeable to the account of the employer, except as specified.

Ch. 412 (SB 529) Johnson. Property tax revenue allocation: state-assessed property.

Existing property tax law requires, with respect to property that is assessed by the State Board of Equalization, that property be taxed at certain rates and that the revenues derived from the application of those rates be allocated, in accordance with certain formulas and requirements, among "taxing jurisdictions."

This bill would, for purposes of these allocations in the County of Orange, specify that the term "taxing jurisdiction" includes, for the 1992-93 fiscal year and each fiscal year thereafter, a fund that has been designated by the county auditor as the "Unallocated Residual Public Utility Tax Fund." This bill would further require that those ad valorem property tax revenues derived from state-assessed property that are allocated to that fund be distributed among local entities in accordance with a specified schedule.

This bill would make legislative findings and declarations as to the necessity for a special statute.

Ch. 413 (SB 831) Karnette. Child care: state employees.

Existing law requires space for state employee child care facilities to be provided in the construction, renovation, or acquisition of buildings for state employees, and authorizes the Director of General Services to secure space for that purpose in offsite facilities if funds are available and the physical requirements controlling development of child care facilities in the office building cannot be utilized.

This bill would additionally authorize the director to secure offsite state employee child care facilities, if funds are available, when it is more cost-efficient to provide equivalent facilities within a reasonable distance of the place of employment, or when locating the facility offsite would provide an enhanced facility for the children or mitigate security concerns.

Existing law requires the director to make those facilities available at a rent based on the actual cost to the state or the statewide average cost of state-owned space, whichever is lower.

This bill would authorize the director to charge a lower rent to ensure the viability of a child care facility.

Ch. 414 (SB 1404) Johnston. Hate crimes.

Under existing law, any person who burns or desecrates a cross or other religious symbol, knowing it to be a religious symbol, on the private property of another without authorization for the purpose of terrorizing the owner or occupant of that private property or in reckless disregard of the risk of terrorizing the owner or occupant of that private property is guilty of a felony or a misdemeanor.

This bill would make it a felony or a misdemeanor for any person to burn, desecrate, or destroy a cross or other religious symbol, knowing it to be a religious symbol, on the property of a school, as specified, for the purpose of terrorizing any person who attends or works at the school or who is otherwise associated with the school. By creating a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 415 (SB 1413) Knight. Disability insurance claims: interest payments.

Existing law, governing life and disability insurance, provides, among other things, that the only measure of insurer liability and damage is the sum payable to the insured in the manner and at the times as provided in the policy.

This bill would, in addition, provide that if any insurer fails to pay any benefits under a policy of disability income insurance, as defined, within 30 calendar days after the insurer has received all information needed to determine liability and has determined that liability exists, any delayed payment shall bear interest, as specified. This bill would also provide that the 30-calendar-day period shall not include any time during which the insurer is awaiting a response for relevant medical information from a health care provider, awaiting a response from the claimant, or investigating fraud, as specified. This bill would also provide that if the insurer has not received all information needed to determine liability for a claim within 30 calendar days after receipt of the claim, the insurer shall notify the insured in writing and include a written list of all information it reasonably needs to determine liability for the claim, in which case, the 30-calendar-day period shall commence when the insured has provided to the insurer all information listed in that notification.

Ch. 416 (SB 1489) Johnson. Health services: production of blood and blood derivatives.

Existing law prohibits any person from engaging in the production of human whole blood or human whole blood derivatives unless the person is licensed under specified provisions of law, and unless the human whole blood or human whole blood derivative is collected, prepared, labeled, and stored in accordance with standards published by the American Association of Blood Banks and regulations adopted by the State Department of Health Services. Existing law authorizes the department to determine, under certain circumstances, that no portion of any amendments or later editions of the standards published by the American Association of Blood Banks shall become effective.

Under existing law, the violation of any of the provisions relating to human whole blood and human whole blood derivatives is a misdemeanor.

This bill would require that any standards established by the department be adopted only after consultation with representatives of the American Association of Blood Banks. The bill would provide that the standards published by the American Association of Blood Banks shall be the standards for all licensed blood banks and blood transfusion services in the state. Because the bill would create a new crime, it would impose a state-mandated local program.

Existing law provides that persons licensed by the Public Health Service, United States Department of Health and Human Services, are not required to comply with the above

described requirements for engaging in the production of human whole blood or human whole blood derivatives, or any regulations adopted thereunder.

This bill would repeal this exemption for persons licensed by the Public Health Service, United States Department of Health and Human Services. Because the bill would expand the scope of an existing crime by making criminal sanctions applicable to a broader category of persons, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 417 (SB 1741) Alpert. Limited Partnerships: dissolution.

The Personal Income Tax Law imposes a tax on limited partnerships, limited liability companies, and limited liability partnerships. Existing law imposes a specified minimum tax on limited partnerships.

This bill would require that if a taxpayer files a return that is designated its final return with the Franchise Tax Board, that board must notify the taxpayer that the minimum tax is due annually until a certificate of dissolution or a certificate of cancellation is filed with the Secretary of State, as provided.

Ch. 418 (SB 1790) Rosenthal. Health care coverage: small employer coverage.

Existing law imposes various requirements on health care service plans and insurers, with respect to small employer coverage. Among other things, plans and insurers that sell coverage to small employers are required to make available coverage to all small employers. For that purpose, small employers are employers that employ at least 2, but no more than 50, eligible employees with a normal workweek of at least 30 hours. Willful violation of the law regulating health care service plans is a crime.

This bill would deem permanent employees meeting certain criteria who work at least 20 hours but not more than 29 hours to be eligible employees. By changing the definition of a crime relative to health care service plans, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 419 (SB 1945) Karnette. State Teachers' Retirement System: benefits.

The State Teachers' Retirement Law authorizes a member home loan program.

The bill would delete the present home loan program, establish a new program including a 100% financing member home loan program, and require the Teachers' Retirement Board to adopt regulations governing the new program.

Ch. 420 (SB 2230) Committee on Revenue and Taxation. Excise taxes.

The Sales and Use Tax Law requires any person whose estimated tax liability averages \$20,000 or more per month to remit amounts due by electronic funds transfer, as provided. That law imposes specified penalties with respect to payment by electronic funds transfer. That law also imposes specified penalties with respect to nonpayment of taxes in general.

This bill would provide that with respect to payment by electronic funds transfer, only those penalties that specifically pertain to electronic funds transfer shall apply, as provided.

The Motor Vehicle Fuel License Tax Law, the Use Fuel Tax Law, the Cigarette and Tobacco Products Tax Law, the Alcoholic Beverage Tax Law, the Energy Resources Surcharge Law, the Emergency Telephone Users Surcharge Act, the Hazardous Substances Tax Law, the Integrated Waste Management Fee Law, the Oil Spill Response, Prevention, and Administration Fees Law, the Fee Collection Procedures Law, and the Diesel Fuel Tax Law provide specified procedures for taxpayers and fee payers to file a

claim for refund, and to request a deferral on their claims for refund, as provided. Those laws require the State Board of Equalization to either grant or deny credit interest for the entire period to which the deferral on the claim for refund relates.

This bill would authorize the board to require a taxpayer or feepayer to waive credit interest only during the period that the claim for refund is deferred, as provided.

The Cigarette and Tobacco Products Tax Law imposes taxes on the distribution of cigarette and tobacco products. That law defines distribution to include the use or consumption of untaxed cigarettes or tobacco products in this state, and defines use or consumption to include the exercise of any right or power over cigarettes or tobacco products incident to the ownership thereof, other than the specified sale for the purpose of sale.

This bill would provide that the exception for resale shall apply only to resales by a licensed distributor.

The Cigarette and Tobacco Products Tax Law defines a wholesaler to include specified persons.

This bill would clarify that a wholesaler includes any person, other than a licensed distributor, who engages in this state in making sales for resale, as specified.

This bill would result in a change in state taxes for the purpose of increasing state revenues within the meaning of Section 3 of Article XIII A of the California Constitution, and thus would require for passage the approval of $\frac{2}{3}$ of the membership of each house of the Legislature.

Ch. 421 (AB 2671) Migden. Insurance: conversion.

Existing law contains provisions for the conversion of mutual property-casualty insurers and mutual life and life and disability insurers to stock insurers. These provisions include provisions for the conversion of mutual life and life and disability insurers by means of the establishment of a mutual holding company.

This bill would authorize the conversion of medical malpractice mutual insurers to stock insurers by means of the establishment of a mutual holding company or by demutualization.

Existing law authorizes the establishment of reciprocal and interinsurance exchanges, and regulates insurance by those entities.

This bill would authorize the conversion of domestic reciprocal insurers organized after 1974 to provide medical malpractice insurance into incorporated stock insurers, would establish procedures applicable to the conversion, and would set forth provisions governing the rights of subscribers after conversion.

Ch. 422 (SB 1156) Costa. Housing: Relocation Assistance Act.

Existing law, known as the Relocation Assistance Act, requires a public entity to provide compensation and advisory services to any person, business, or farm operation that is displaced because of the acquisition of real property for public use. Existing law governs the provision of relocation assistance, including benefits for displaced persons, as defined, and procedural protections for persons required to move from their homes.

For purposes of the Relocation Assistance Act, a tenant in a multifamily rental project of 4 or more units who is temporarily displaced for not more than 180 days as part of a rehabilitation of that project is not deemed a "displaced person" if, among other conditions, other financial benefits and services are provided, including relocation to a comparable replacement unit, and the resident is offered the right to return to his or her original unit, with prescribed rent for the first 12 months subsequent to that return.

This bill would revise the provisions relating to persons temporarily displaced from multifamily housing projects to instead apply to persons displaced for not more than 1 year as part of a rehabilitation of a qualified affordable housing preservation project, as defined, having 2 or more units, if other prescribed criteria are met.

The bill would specify that it would apply prospectively only from January 1, 1999, and only to the extent that its provisions would not adversely affect existing rights of persons or households entitled to benefits under existing provisions on or before December 31, 1998.

Ch. 423 (AB 518) Brown. Gaming clubs.

Existing law, the Gambling Control Act, states various findings and declarations of the Legislature regarding the public policy of the state regarding gambling.

This bill would make technical, nonsubstantive changes to these findings and declarations.

Existing law prohibits the playing, operation, or conducting of several specified games, and banking or percentage games generally. Existing law defines the term “controlled game” as any game of chance, including a gambling device, that is played for currency, check, credit, or any other thing of value, that is not prohibited and made unlawful by statute or local ordinance. Existing law provides that it is unlawful for any person to collect any fee in connection with a controlled game unless the method of collection conforms with regulations adopted by the Division of Gambling Control of the Department of Justice of the California Gambling Control Commission. Existing law also provides that until these regulations become operative, an owner licensee may collect fees in the same manner as that establishment collected fees as of January 1, 1997, provided that this method was expressly permitted under existing local regulations, the method meets certain specified requirements, including that the fee is fixed in advance of the game, the fee is the same for all players and is not deducted from the amount wagered, and there is no minimum wager on any game, round, or hand, or the method is otherwise authorized by law.

This bill would prohibit any person from collecting fees in connection with controlled games except as authorized by regulations of the Division of Gambling Control or the Gambling Control Commission, but would authorize fees to be collected in the same manner as they were on a specified date, subject to certain conditions and only until these regulations are adopted. The bill would dispositively require that patrons be given ample notice regarding the collection of fees, that fees must be determined and collected prior to the start of play, that fees may not be calculated as a portion of wagers made or winnings earned exclusive of charges or fees for the use of space and facilities, and that fees may be assessed at up to 3 different rates per table. The bill would declare that the Legislature’s intent in enacting these provisions is to codify the holding in a specified case. By changing the definition of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 424 (AB 2415) Brown. Gambling.

Existing law prohibits the playing, operation, or conducting of several specified games, and banking or percentage games generally. Existing law defines the term “controlled game” as any game of chance, and provides that it is unlawful for any person to collect any fee in connection with a controlled game unless the method of collection conforms with regulations adopted by the Division of Gambling Control or the Department of Justice of the California Gambling Control Commission. Existing law also provides that until these regulations become operative, an owner licensee may collect fees in the same manner as that establishment collected fees as of January 1, 1997, provided that this method was expressly permitted under existing local regulations, the method meets certain specified requirements, including that the fee is fixed in advance of the game, the fee is the same for all players and is not deducted from the amount wagered, and there is no minimum wager on any game, round, or hand, or the method is otherwise authorized by law.

Assembly Bill 518 of the 1997–98 Regular Session of the Legislature would expand the definition of “controlled game” to include any game of chance, including a gambling device, that is played for currency, check, credit, or any other thing of value, and that is not prohibited and made unlawful by statute or local ordinance. AB 518 would prohibit any person from collecting fees in connection with controlled games except as authorized by regulations of the Division of Gambling Control or the Gambling Control Commission, but would authorize fees to be collected in the same manner as they were

on a specified date, subject to certain conditions and only until these regulations are adopted. AB 518 also would require that patrons be given ample notice regarding the collection of fees, that fees must be determined and collected prior to the start of play, that fees may not be calculated as a portion of wagers made or winnings earned exclusive of charges or fees for the use of space and facilities, and that fees may be assessed at up to 3 different rates per table. AB 518 also would declare that the Legislature's intent in enacting these provisions was to codify the holding in a specified case.

This bill would revise these provisions, as they would be amended by AB 518, to incorporate those changes, and additionally to delete the authority under existing law of owner licensees to collect fees in the manner previously collected, as specified by ordinance or subject to specified conditions.

This bill would provide that the changes in Section 337j of the Penal Code proposed by the bill shall become operative only if AB 518 is enacted and becomes effective on or before January 1, 1999.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 425 (AB 2369) Wayne. Controlled substances: penalties.

Existing law requires that persons convicted of the unlawful possession for sale, transportation, importation, sale, furnishing, manufacture of, or certain related offenses involving methamphetamine, amphetamine, or phencyclidine (PCP) receive additional terms of imprisonment depending on the weight or volume of the substances.

This bill would delete the manufacture of methamphetamine, amphetamine, or PCP from the offenses specified for purposes of this provision.

Existing law requires any manufacturer of a controlled substance who is convicted of disposing of any hazardous substance that is a controlled substance or a chemical used in the manufacture of a controlled substance in violation of any law regulating the disposal of hazardous substances or hazardous waste to pay a penalty equal to the amount of the actual cost of any gross evidence removal of hazardous substances or hazardous waste that is incurred by an agency as a result of the illegal disposal.

This bill additionally would require any person who is convicted of the manufacture, sale, possession for sale, possession, transportation, or disposal of any hazardous substance that is a controlled substance or a chemical used in, or is a byproduct of, the manufacture of a controlled substance in violation of any law to pay a penalty equal to the amount of the actual cost incurred by any state or local agency to remove and dispose of the hazardous substance and to take removal action with respect to any release of the hazardous substance or any items or materials contaminated by that release, if the state or local agency requests the prosecuting authority to seek recovery of that cost.

Existing law imposes enhancements upon persons convicted of the unlawful manufacture of large quantities of methamphetamine, amphetamine, or phencyclidine (PCP), as determined by the weight or volume of the substances involved.

This bill would amend certain of these provisions setting forth enhancements to be imposed upon persons convicted of the unlawful manufacture of large quantities of methamphetamine, amphetamine, or phencyclidine (PCP), as determined by the weight or volume of the substances involved.

This bill would add certain provisions that would become operative only if both this bill and SB 1691 are enacted and become effective on or before January 1, 1999, and SB 1691 amends a specified provision of the Health and Safety Code to provide criminal penalties for the sale of ephedrine.

Ch. 426 (AB 2697) Ducheny. Building standards.

(1) Existing law requires a notice of the proposed adoption, amendment, or repeal of a regulation by a state agency to include, among other things, a statement that the action would have a significant effect on housing costs, if that is determined to be the case, and requires an evaluation of the proposed action to be made available.

This bill would require the Trade and Commerce Agency, if requested by the California Building Standards Commission, to provide an economic review of the housing cost impact statement or related study submitted by a building standards code change proponent.

(2) Existing law requires all dry-niche light fixtures and all underwater wet-niche light fixtures operating at more than 15 volts in public swimming pools operated for the use of the general public with or without charge, or for the use of the members and guests of a private club, including any swimming pool located on the grounds of a hotel, motel, inn, apartment complex, or any residential setting other than a single-family home, and those public swimming pools owned or operated by the state or by local agencies, to be protected by a ground-fault circuit interrupter in the branch circuit and to have light fixtures that have encapsulated terminals. Any of these public swimming pools that do not meet these requirements as of January 1, 1998, are required to be retrofitted by July 1, 1998, and to be inspected by September 1, 1998.

Existing law also designates the State Department of Health Services as having supervision over these requirements, and requires every health officer, within his or her jurisdiction, to enforce building standards relating to swimming pools. Existing law makes violation of these requirements a misdemeanor.

This bill would revise and recast these requirements, as the Yasmin Paleso'o Memorial Swimming Pool Safety Law, to require that the design and installation of all underwater lighting systems, operating at more than 15 volts, supplied from a branch circuit either directly or by way of a transformer, be installed according to specified requirements so that there is no shock hazard with any likely combination of fault conditions during normal use. Any public swimming pool that does not meet these requirements would be required to be retrofitted by May 1, 1999. The bill would delete the exemption for public swimming pools owned or operated by the state or any local government from these provisions.

The bill would also require the owner or operator of a public swimming pool, on or before May 1, 1999, to obtain an inspection by a local health officer or a qualified contractor and to certify to the local health officer that the facility complies with these provisions. By changing the definition of a crime and increasing the inspection duties of local officers, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(4) This bill would take effect immediately as an urgency statute.

Ch. 427 (AB 1888) Honda. Mobilehome parks: termination of tenancy.

Existing law specifies the reasons for which the management of a mobilehome park may terminate a tenancy within the park, including nonpayment of rent, utility charges, or reasonable incidental service charges. Existing law requires the homeowner to be given a 3-day notice to pay the amount due or to vacate the tenancy, unless the homeowner has been given this notice on 3 or more occasions within the preceding 12-month period. In that event, existing law requires the homeowner to be given notice to remove the mobilehome from the park within a period of not less than 60 days, and requires a copy of this notice to be given to the legal owner, any junior lienholder, or the registered owner. Existing law provides that payment by the legal owner, any junior lienholder, or the registered owner within a specified time after receipt of a 3-day notice cures the default under those provisions of existing law.

This bill would provide that, if specified conditions exist, the legal owner, junior lienholder or registered owner, if other than the homeowner, may cure the default within a specified time after the mailing of the 60-day notice to remove the mobilehome, and thereby cause the 60-day notice to be rescinded.

Ch. 428 (AB 2428) Knox. Finance lenders.

Existing law, known as the California Finance Lenders Law, provides for the licensure of persons who make consumer loans and commercial loans, and governs the terms and conditions of those loans. Existing law exempts certain loans and certain persons from those provisions.

This bill would exempt from those provisions any public corporation or public entity other than the state, or any agency of those entities, when making any loan in compliance with federal and state laws and regulations.

Existing law with respect to consumer loans and commercial loans authorizes a finance lender, until January 1, 2000, to sell to institutional lenders or investors promissory notes evidencing an obligation to repay certain federally related mortgage loans (consumer loans) or the obligation to repay real estate secured business purpose loans (commercial loans), as specified.

This bill would extend this authorization indefinitely.

Ch. 429 (SB 1386) Leslie. State computer technology: information gathering.

(1) Existing law includes comprehensive provisions that govern information technology in state government, including provisions that establish the Department of Information Technology, prescribe the duties of that department, and prescribe the responsibilities of state agencies in the area of information technology.

This bill would require every state agency that utilizes any method, device, identifier, or other data base application on the Internet to electronically collect personal information about any user, to prominently display specified information at at least one anticipated initial point of communication with a potential user, as specified, including notice to the user that he or she has the option of having his or her personal information discarded without reuse or distribution.

The bill would also prohibit a state agency from distributing or selling any electronically collected personal information about users, without the user's permission, to any 3rd party, except as specified.

(2) The California Public Records Act sets forth specified procedures for the disclosure of certain types of information by state and local agencies.

This bill would prohibit any state or local agency from posting the home address or telephone number of any elected or appointed official on the Internet without first obtaining the written permission of that individual.

(3) Under existing law, the State Librarian administers the foundation program whereby state funds are made available to public libraries for the purpose of providing services to the public.

This bill would impose a state-mandated local program by requiring every public library that receives state funds pursuant to the foundation program and that provides public access to the Internet to adopt a policy by January 1, 2000, regarding access to the Internet by minors and to make the policy available to members of the public.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 430 (AB 871) Wayne. Redevelopment: hazardous substances cleanup: removal and remedial actions.

(1) Existing law requires the Department of Toxic Substances Control to notify the planning and building department of each city, county, or regional council of governments of certain land use restrictions imposed upon property designated as hazardous waste property or border zone property or sites listed for remedial or removal action, and requires the planning department of those local agencies to file those restrictions and take specified actions.

This bill would additionally include certain remedial action land use controls within those notification requirements, thereby creating a state-mandated local program by

imposing new duties upon local governments. The bill would require the department to maintain this list of land use restrictions in a specified manner. The bill would require the list to be made available electronically, as specified.

(2) Existing law, the Carpenter-Presley-Tanner Hazardous Substance Account Act, makes a statement of legislative intent, imposes liability for hazardous substance removal or remedial actions, and requires the department to adopt, by regulation, criteria for the selection and for the priority ranking of hazardous substance release sites for removal or remedial actions under the act. The act requires the department, or, if appropriate, the California regional water quality control board, to prepare or approve remedial action plans for each listed site. For purposes of the act, "hazardous substance" is defined as excluding petroleum.

This bill would allow any person to voluntarily enter into an enforceable agreement with the department that allows the department to conduct removal or remedial actions at a site with a release of petroleum to be conducted under the oversight of the department.

(3) Existing law authorizes a redevelopment agency, until January 1, 1999, to take any action that the agency determines is necessary, consistent with other state and federal laws, to remedy or remove a release of hazardous substances on, under, or from a project area subject to specified conditions relating to the identity of, notice to, and actions by, the party responsible for the release of hazardous substances. Existing law requires a redevelopment agency to request cleanup guidelines from the department and to provide the department and local health and building departments with notification of any cleanup activity pursuant to those provisions at least 30 days before the commencement of the activity. Existing law authorizes an agency to designate a local agency in lieu of the department or a regional board to oversee the remediation or removal of hazardous substances from a specific hazardous substance release site in accordance with prescribed procedures and requirements.

This bill would extend the January 1, 1999, repeal date specified above, to January 1, 2004, thereby extending the operation of those provisions, and would allow an agency taking action to remove or remedy a release of hazardous substances to do so whether the agency owns the property or not. The bill would require the department or regional board to provide cleanup guidelines within a reasonable period of time. The bill would require the agency to submit for approval a cleanup or remedial action plan to the department or the California regional water quality control board before taking action to remedy or remove a release.

(4) Existing law immunizes an agency that remedies or removes a hazardous substance release, pursuant to the above provisions, from liability under specified state laws.

This bill would additionally immunize an agency that causes another person to undertake and complete an action. The bill would specify related matters. The bill would require the department, regional board, or local agency to notify the redevelopment agency that this immunity is in effect within 60 days of the date that the remedial action is completed, thereby imposing a state-mandated local program by imposing new duties upon local agencies.

The bill would additionally immunize an agency that undertakes and completes a remedial action from liability based on its ownership of property after a release occurred, for any costs that a responsible party incurs, or to compensate others for the effect of that release, except as specified.

(5) Existing law, operative January 1, 1999, requires a redevelopment agency to obtain the written approval of the department or a California regional water quality control board before removing or remedying hazardous waste from property within a redevelopment project area.

The bill would provide that these removal and remedial action provisions will become operative January 1, 2004, and would make conforming changes.

(6) Under existing law, the legislative body of a local agency, at the time of the adoption of the resolution of intention to establish a community services district, where a removal or remedial action for the cleanup of any hazardous substance in the proposed district is proposed, is required to prepare, or cause to be prepared, a remedial action plan, based on prescribed factors.

This bill would add to those factors or determinations upon which the remedial action plan would be based, the alternative of conditioning financing the removal or remedial action upon the approval of the remedial action plan pursuant to specified provisions of law.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 431 (AB 1625) Richter. Fish and game: penalties.

(1) Existing law makes it a crime to place, plant, or cause to be placed or planted, in any of the waters of this state, any live fish, any fresh or salt water animal, or any aquatic plant, without first obtaining written permission from the Department of Fish and Game. Under existing law, punishment for that crime is a fine of not more than \$1,000, imprisonment in the county jail for not more than 6 months, or both the fine and imprisonment.

Existing law defines "aquatic nuisance species" to mean a nonindigenous species that threatens the viability or abundance of a native species, the ecological stability of waters inhabited by those species, or the viability of commercial, agricultural, aquacultural, or recreational activities that depend on those waters.

This bill would additionally make any person who violates the provision described in the first paragraph through the use of an aquatic nuisance species guilty of a misdemeanor, punishable as prescribed, including a fine of not more than \$50,000, and revocation of all of the defendant's licenses and permits issued under the Fish and Game Code. In addition, the bill would make the defendant liable for all resulting damages, as specified, that were caused by his or her unlawful activity. The bill would except from this provision, the placement of any live fish, any fresh or salt water animal, or any aquatic plant from the discharge or exchange of ballast water from any vessel, as defined.

The bill would also except from its provisions, the placement of an aquatic plant by a person who was unaware that he or she was in possession of the plant.

(2) Existing law authorizes the Director of Fish and Game to pay a reward from available funds, as specified, to any person who furnishes information leading to an arrest, a criminal conviction, or a specified punishment for any violation of the Fish and Game Code or any regulation adopted pursuant to that code.

This bill would specify that any person whom the department determines has provided evidence or information leading to the arrest and conviction of a person found guilty of committing the crime described in (1) through the use of an aquatic nuisance species, would be eligible to obtain an award of up to \$50,000.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 432 (AB 1944) Runner. Air resources.

(1) Existing law, which is to be repealed on January 1, 1999, provides for civil or administrative penalties up to a prescribed maximum, depending on the nature of the violation, for violation of prescribed statutes or any rule, regulation, permit, variance, or order of the State Air Resources Board pertaining to fuel requirements and standards. The recovery of those penalties preclude criminal prosecution, or the filing of a criminal complaint requires dismissal of any action or administrative proceeding seeking those civil penalties.

This bill would continue that existing law to January 1, 2003, by amending that repeal date.

(2) Existing law requires the state board to report to various legislative committees on or before June 30, 1998, all violations of fuel regulations, any settlements reached, and the rate of compliance with requirements of the provisions governing fuel.

This bill would require the state board to make that report on or before January 1, 2002.

Ch. 433 (AB 1972) Knox. Santa Monica Mountains Conservancy.

Existing law authorizes the Santa Monica Mountains Conservancy to award grants, in accordance with prescribed procedures, to specified nonprofit organizations to carry out improvements, maintenance, acquisitions, or educational interpretation programs directly related to a project which the conservancy is authorized to carry out under the Santa Monica Mountains Conservancy Act.

This bill would authorize the conservancy to award grants to private educational institutions, school districts, and other local agencies for any of the purposes for which it may award grants to nonprofit organizations.

Ch. 434 (AB 1998) Thomson. Agricultural chemical reduction pilot demonstration projects.

Existing law requests the University of California to establish a program of pilot demonstration projects designed to provide extension services, training, and financial incentives for participating farms to reduce their use of chemicals for agricultural production. If the program is established, existing law requires the university to prepare a biennial report concerning the pilot demonstration projects and requires that the report include an analysis of the monitoring activities, summary and assessment data on pesticide and fertilizer use on each pilot demonstration project, and an analysis of the success of each project in meeting the standards for integrated farming systems. Existing law also declares the intent of the Legislature that a program advisory review board be appointed by the President of the University of California to consult with the program director in implementing the program. Under existing law, these provisions do not apply to the University of California unless the Regents of the University of California, by resolution, make them applicable.

This bill would establish within the University of California a program of pilot demonstration projects designed to provide extension services, training, and financial incentives for participating farmers to implement biologically integrated farming systems. The bill would establish a program advisory review board to consult with the university to carry out the duties related to the program. The bill would provide for a contract for a pilot demonstration project for a period of up to 5 years and would prohibit the commencement of new pilot demonstration projects on or after December 31, 2005. These provisions would not apply to the University of California unless the Regents of the University of California, by resolution, make them applicable.

Ch. 435 (AB 2543) Torlakson. Special districts.

Under existing law, the boundaries of divisions of various special districts are specified in the statutes creating them.

This bill would provide that each district required by its authorizing act to adjust division boundaries pursuant to this bill, after each federal decennial census, and using that census as a basis, shall, by resolution, adjust the boundaries of any divisions so that the divisions are, as far as practicable, equal in population. The bill would specify other conditions of the adjustments. The bill would specify that districts are not required to adjust the boundaries of any division pursuant to these provisions until after the 2000 federal decennial census. This bill would revise laws relating to specific districts and specific types of districts to conform to this bill. The bill would impose a state-mandated local program by imposing additional duties on districts with respect to adjusting boundaries.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would make identical changes to the Elections Code alternative to those proposed by this bill that would become operative only if this bill and Senate Bill 1547 are both chaptered, in which case a specified provision of this bill would not become operative.

Ch. 436 (AB 2252) House. Plant quarantine and pest control.

(1) Existing law authorizes the Secretary of Food and Agriculture to investigate and certify to shippers or other financially interested parties the analysis, classification, grade, quality, or condition of any fruit, vegetable, or other agricultural product, as specified.

This bill, instead, would authorize the Department of Food and Agriculture to investigate and certify to other states and countries, as well as to shippers or other financially interested parties, the analysis, classification, grade, quality, or condition of any fruit, vegetable, or other agricultural product, as specified. The bill would authorize the department to accredit persons or business entities to perform those functions and to establish a schedule of charges to cover the department's costs of providing those services. The bill would continuously appropriate any revenue collected pursuant to these provisions to the department to carry out its duties under the bill.

The bill also would authorize the department to provide, upon request, nonregulatory accreditation, analytical certification, diagnostic, inspection, quality assurance, testing, and other nonregulatory services relating to nursery stock, plants, seed, or other plant pest and diseases on a charge-for-service basis, to accredit private persons or business entities to perform those services and to adopt regulations to establish accreditation criteria.

The bill would make it unlawful for any person or business entity that is not accredited by the department to make any representation regarding accreditation by the department. Because under existing law, any violation of these provisions would be a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 437 (SB 1852) Kelley. Water quality: disposal systems.

The Porter-Cologne Water Quality Control Act requires a California regional water quality control board to establish water quality objectives in water quality control plans to ensure the reasonable protection of beneficial uses and the prevention of nuisance, as prescribed. The act requires a regional board to consider all the relevant evidence, as prescribed, in connection with a determination to prohibit a waste discharge from a disposal system that utilizes subsurface disposal.

This bill would require a regional board, to the extent that resources are available for that purpose, to prohibit the discharge of water from existing or new individual disposal systems on parcels of less than $\frac{1}{2}$ acre that overlie the Mission Creek Aquifer or the Desert Hot Springs Aquifer in Riverside County, if a sewer system is available, as defined. The bill would, for parcels of $\frac{1}{2}$ acre or greater that overlie those aquifers, limit the maximum number of equivalent dwelling units, as defined, with individual disposal systems to 2 per acre. The bill would require the regional board to achieve compliance with those requirements on or before January 1, 2004, to the extent that resources are available for those purposes.

Ch. 438 (SB 1898) Polanco. Hazardous substances: remediation.

(1) Existing law authorizes a redevelopment agency, until January 1, 1999, to take any action that the agency determines is necessary, consistent with other state and federal laws, to remedy or remove a release of hazardous substances on, under, or from a project area subject to specified conditions relating to the identity of, notice to, and actions by, the party responsible for the release of hazardous substances. Existing law requires a redevelopment agency to request cleanup guidelines from the Department of Toxic Substances Control or the California regional water quality control board and to provide the department and local health and building departments with notification of any cleanup activity pursuant to those provisions at least 30 days before the commencement of the activity. Existing law authorizes an agency to designate a local agency in lieu of the department or a regional board to oversee the remediation or removal of hazardous substances from a specific hazardous substance release site in accordance with prescribed procedures and requirements.

This bill would provide that these provisions shall be known as the “Polanco Redevelopment Act.” The bill would also make a nonsubstantive revision to the definition of “responsible party” for purposes of these provisions.

The bill would extend the January 1, 1999, repeal date specified above, until January 1, 2004, thereby extending the operation of those provisions and would allow an agency taking action to remove or remedy a release to do so whether the agency owns that property or not. The bill would require the department or regional board to provide cleanup guidelines within a reasonable period of time. The bill would require the agency to submit for approval a cleanup or remedial action plan to the department or the California regional water quality control board before taking action to remedy or remove a release.

(2) Existing law immunizes an agency that remedies or removes a hazardous substance release, pursuant to the above provisions, from liability under specified state laws.

This bill would additionally immunize an agency that causes another person to undertake and complete such an action. The bill would provide that this immunity is conferred only upon certain circumstances, and would require the department, regional board, or local agency to notify the redevelopment agency that this immunity is in effect within 60 days of the date that the remedial action is completed, thereby imposing a state-mandated local program by imposing new duties upon local agencies. The bill would specify related matters.

The bill would additionally immunize an agency that undertakes and completes a remedial action from liability based on its ownership of property after a release occurred, for any costs that a responsible party incurs, or to compensate others for the effect of that release, except as specified.

(3) Existing law, operative January 1, 1999, requires a redevelopment agency to obtain the written approval of the department or a California regional water quality control board before removing or remedying hazardous waste from property within a redevelopment project area.

The bill would provide that these removal and remedial action provisions will become operative January 1, 2004, and would make conforming changes.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 439 (SB 1956) Hayden. Parks and recreation: Gabrielino/Tongva Springs: appropriation.

Existing law requires the Department of Parks and Recreation to operate and maintain the state park system.

This bill would appropriate \$50,000 from the Public Resources Account in the Cigarette and Tobacco Products Surtax Fund to the department to be expended for a local assistance grant to University High School to plan and implement elements of an action plan to achieve the preservation of the Gabrielino/Tongva Springs, and property adjacent thereto, in the City of Los Angeles in order to enhance environmental, cultural, and educational opportunities.

Ch. 440 (AB 204) Migden. Workers’ compensation: acupuncturists.

Existing workers’ compensation law requires employers to offer necessary medical treatment and services to injured employees.

This bill would add acupuncture to the list of available treatments and make conforming changes.

Existing law allows employees to choose a personal physician or personal chiropractor for treatment.

This bill would also allow employees to choose a personal acupuncturist for treatment.

Existing law requires health care service plans to provide injured employees with chiropractic services for work-related injuries, if they so choose.

This bill would also require health care service plans to provide injured employees with acupuncture services for work-related injuries, if they so choose.

Existing law requires an employer, upon the request of an employee, to tender the employee one change of physician or chiropractor within 5 working days.

This bill would permit an employee to alternatively request an acupuncturist as a part of the one change.

This bill would incorporate additional amendments to Section 4600 of the Labor Code proposed by AB 236, contingent on the prior enactment of that bill.

Ch. 441 (AB 1204) Keeley. Alcoholic beverages: minors.

(1) The Alcoholic Beverage Control Act makes it a misdemeanor for any person to sell, furnish, give, or cause to be sold, furnished, or given away, any alcoholic beverage to any person under the age of 21 years.

This bill would impose a state-mandated local program by making a violation of that provision a misdemeanor, punishable as specified, if, after the defendant purchases an alcoholic beverage for a minor, the minor consumes the alcohol, and thereby proximately causes great bodily injury or death to himself, herself, or any other person.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 442 (AB 1570) Bustamante. Employment applications.

Under existing law, no employer or agent or officer of an employer may compel or coerce an employee or applicant for employment to patronize the employer, or any other person, in the purchase of any thing of value.

This bill would provide that to compel or coerce the purchase of any thing of value includes, but is not limited to, requiring a fee or other consideration from an applicant for employment for (a) an individual to apply for employment, (b) an individual to receive, complete, or submit an application for employment, or (c) an employer to provide, accept, or process an application for employment.

Because violation of these provisions is a misdemeanor, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 443 (AB 1569) Committee on Labor and Employment. Public works: contractor eligibility.

Under existing law, whenever a contractor or subcontractor performing a public works project is found by the Labor Commissioner to be either in violation of certain provisions of law, with intent to defraud, or in willful violation of those provisions of law, the contractor or subcontractor or a firm, corporation, partnership, or association in which the contractor or subcontractor has a substantial interest is ineligible to bid on or to receive a public works contract for specified periods of time.

This bill would provide that the commissioner may also deny a contractor or subcontractor the ability to bid on or be awarded a contract for a public works contract, or to perform work as a subcontractor on a public works project, if he or she is found to be in violation of those laws under those same circumstances.

The bill also would require, not less than semiannually, the commissioner to publish and distribute to awarding bodies a list of contractors that are ineligible to bid on or be awarded a public works contract, or to perform work as a subcontractor on a public works project, as specified.

This bill would provide that any contract on a public works project entered into between a contractor and a debarred subcontractor is void.

This bill also would provide that a public entity may not permit a contractor or subcontractor who is ineligible to bid or work on, or be awarded, a public works project, as specified, to bid on, be awarded, or perform work as a subcontractor on, a public works project, and would require that every public works project contain a provision regarding this prohibition.

Ch. 444 (AB 1688) Torlakson. Community warning programs.

Existing law generally prescribes liability for tortious conduct and the extent of liability of public agencies and public employees.

This bill would provide that a donor organization, as defined, is immune from suit and claims of liability for any injury from activities relating to the operation and use of a community warning program or system, as defined, except as specified. The bill would limit the application of those definitions to those programs and systems in Contra Costa County. The bill would make related findings and declarations.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 445 (AB 1810) Davis. Charitable fundraising.

Under existing law, the Uniform Supervision of Trustees for Charitable Purposes Act governs charitable corporations and trustees who hold or solicit property for charitable purposes over which the Attorney General has enforcement and supervisory powers.

The act also requires a commercial fundraiser to register with the Attorney General's Registry of Charitable Trusts and with the sheriff of each county in which the fundraiser intends to solicit funds or the sheriff's designee prior to soliciting any funds or receiving or controlling any funds or assets for charitable purposes, and to file an annual financial report of funds solicited on behalf of each tax-exempt organization or for each charitable purpose.

Under the act, the Attorney General is also authorized to make any additional rules and regulations that may be necessary for the administration of the act.

The bill would rename the act, expand the definitions of solicitation for charitable purposes, sales solicitation for charitable purposes, and commercial fundraiser for charitable purposes, and apply the act's provisions to commercial fundraisers, fundraising counsels, and commercial coventurers. The bill would also require a commercial fundraiser to register with the Attorney General prior to soliciting, receiving, or controlling any assets or property, including salvageable personal property, for charitable purposes, in addition to funds, and to include these assets or property in its annual financial report.

The bill would authorize the Attorney General to assess an annual registration or renewal fee solely for the purpose of operating and maintaining the Attorney General's Registry of Charitable Trusts and to provide public access via the Internet to reports filed with the Attorney General.

Ch. 446 (AB 1872) Baca. Telephonic marketing.

Existing law requires persons who conduct specified types of telephonic sales to register with the Department of Justice within a specified period of time prior to doing business in this state and to provide specified information to prospective purchasers. Existing law also makes it unlawful for telephonic sellers to engage in certain proscribed activities, and provides for certain criminal sanctions for violations of those provisions.

This bill would also make it unlawful, punishable as a misdemeanor, to request or receive payment of any consideration from a person upon a representation to recover or otherwise assist in the return of money or other item of value paid for by, or promised to, that person in a previous telemarketing transaction, until 7 business days after that money or other item of value is delivered to that person. This bill would also make it unlawful, punishable as a misdemeanor, for any telephonic seller to procure the services of a 3rd-party delivery, courier, or other pickup service to obtain a purchaser's payment for goods, unless the goods are delivered prior to or at the same time as the payment is collected. By creating new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 447 (AB 2319) Knox. Victims of crime.

Existing law authorizes the State Board of Control to provide assistance to victims of crime and derivative victims of crime for the pecuniary losses they suffer as a direct result of criminal acts. Existing law requires that an application for assistance be filed within one year after the date of the crime or the victim attains the age of 18 years, whichever is later, and authorizes the board for good cause to grant an extension of this time period not to exceed 3 years.

This bill would additionally authorize the board to extend those time periods under prescribed circumstances.

Ch. 448 (SB 453) Solis. Workers' compensation.

Existing law provides for the conduct of workers' compensation proceedings by individuals referred to as workers' compensation judges or referees.

This bill would redesignate these individuals as workers' compensation administrative law judges and make related changes.

Ch. 449 (SB 1667) Burton. Privacy: electronic tracking device.

Existing law prohibits the invasion of privacy by electronic devices, as specified.

This bill would, in addition, make it a misdemeanor for any person or entity in this state to use an electronic tracking device, as defined, to determine the location or movement of a person. The bill would not apply when the registered owner, lessor, or lessee of a vehicle has consented to the use of an electronic tracking device with respect to that vehicle, or to the lawful use of an electronic tracking device by a law enforcement agency. By creating a new crime, this bill would impose a state-mandated local program.

The bill additionally would provide that a violation of these provisions by a person or entity required to be licensed by the state as a business or profession, as specified, would constitute grounds for revocation of the license issued to that person or entity.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 450 (SB 1991) O'Connell. Animal cruelty: probation.

Existing law punishes every person who mistreats, injures, or causes the death of any animal, as defined, in any of various specified ways, by imprisonment in the state prison, or by a fine, or by both the fine and imprisonment, or, alternatively, by imprisonment in a county jail, or by a fine, or by both that fine and imprisonment.

This bill would require the court to order a defendant who is convicted under the above provision and placed on probation, to pay for, and successfully complete, counseling, as determined by the court, designed to evaluate and treat behavior or conduct disorders unless the defendant is financially unable to pay for that counseling, in which case the court would be authorized to develop a sliding fee schedule based upon the defendant's ability to pay, as specified. County mental health departments or Medi-Cal would be responsible for the costs of counseling for those defendants who meet the medical necessity criteria designated for mental health managed care or the targeted population criteria specified for mental health account funds. This bill would state that this counseling requirement is in addition to, and not in lieu of, any other terms and conditions of probation, including any appropriate imprisonment or fines. Because this bill would increase the duties of the court and local officials, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures

for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 451 (SB 2021) Schiff. Victims of crime: restitution.

Existing law requires that, when the state has an interest, the State Board of Control shall be given notice and a reasonable opportunity to perfect and satisfy the lien, before a judgment, award, or settlement is satisfied in any action or claim by a victim of a crime to recover damages for injuries.

This bill would require this notice and opportunity to be given before a judgment, award, or settlement is satisfied in any action or claim by a victim of a crime.

Existing law also requires the board to be given, in a prescribed manner, notice of the institution of legal proceedings and settlement, and all other notices that are required by specified law to be given to a judgment debtor, if an action is brought or a claim asserted for damages against a person liable for an injury or death giving rise to an award by the board.

This bill would delete the requirement that the board be given those other notices that are required by specified law to be given to a judgment debtor, and would require the board to be given notice of all hearings, conferences, and proceedings.

Existing law requires the court to order a defendant, including a minor, to make restitution to any victim who has suffered economic loss as a result of the defendant's conduct in an amount established by court order.

This bill would establish a specified 4-year pilot program for the purpose of collaborating with judges to amend restitution orders imposed pursuant to those provisions of law. Under the program, the State Board of Control would be required to determine if the cost of holding a hearing on a restitution order is justified if a hearing has not been waived, and to prepare a preliminary report to the Legislature on the outcome of the pilot program by a specified date and a final report on the outcome of the pilot program by a specified date upon the conclusion of the pilot program.

Existing law provides for the imposition of a restitution fine upon a minor based on the minor's present ability to pay, sets the standard for determining whether a court should order a minor to pay full restitution to the victim, requires the minor to pay ordered restitution as a condition of probation, and rebuttably presumes that a custodial parent or guardian is jointly and severally liable for restitution, fines, and penalty assessments payable by a minor, subject to the parent or guardian's ability to pay.

This bill would specify that a minor's inability to pay shall not be considered a compelling or extraordinary reason not to impose a restitution fine or order and shall not be a consideration in determining the amount of the restitution order. The bill would provide the minor the right to a hearing to dispute the amount of the restitution order, authorize the court to modify the order on its own motion or on the motion of other specified parties, and require the victim to be given notice of the hearing on the motion. The bill would also provide that unsatisfied portions of restitution orders shall be enforceable after the minor is no longer on probation, specify that restitution orders are enforceable in the manner provided for other specified fines, and require that restitution payments made pursuant to a restitution order be paid to the Restitution Fund if the victim received assistance from that fund, thereby constituting an appropriation as the Restitution Fund is continuously appropriated.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 452 (AB 75) Alby. Crime prevention: fingerprints.

Under existing law, the Department of Justice is required to maintain state summary criminal history information or the master record of information compiled by the Attorney General pertaining to the identification and criminal history of any person, including, among other things, fingerprints.

This bill would establish procedures applicable to situations in which the department determines that the fingerprints submitted by a person, who is required to submit

fingerprints or a fingerprint card to the department for a criminal background investigation, are illegal, or the person, for specified reasons, is unable to submit fingerprints.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 453 (AB 218) Takasugi. Vehicles: salvage certificates.

Existing law requires the Department of Motor Vehicles to accept an endorsed salvage certificate for a total loss salvage vehicle, as defined, in lieu of the certificate of ownership or other evidence of ownership when accompanied by an application and other documents and fees.

This bill would require, effective on a date selected by the Director of Motor Vehicles, but not later than January 1, 2000, a salvage certificate, except as specified, to include a statement that the seller and any subsequent sellers are required to disclose to the purchaser at, or prior to, the time of sale that the vehicle has been declared a total loss salvage vehicle. A seller who fails to make the disclosure would be subject to a specified civil penalty.

Ch. 454 (AB 231) Honda. Counterfeit of a mark: punishment.

(1) Existing law prohibits, without the consent of the registrant, the willful manufacture, intentional sale, or knowing possession for sale at the point of sale of any counterfeit of a mark registered with the Secretary of State or registered on the Principle Register of the United States Patent and Trademark Office, and imposes specified fines and punishment based upon the number of counterfeit marks involved in the offense. Existing law also provides definitions for specified terms, including "counterfeit mark," "value," and "at the point of sale."

This bill would revise this provision to delete the element of consent from the offense and modify the element of knowing possession for sale by deleting reference to "at the point of sale." This bill also would revise the definitions included in this provision. By changing the definition of a crime, the bill would create a state-mandated local program.

(2) Existing law makes it a public offense to knowingly possess for sale, at a location other than the point of sale, any counterfeit mark.

This bill would repeal this provision.

(3) The bill would make conforming changes.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 455 (AB 1074) Papan. Public transit: San Francisco Bay Area Rapid Transit District: directors: compensation.

Existing law authorizes the board of directors of the San Francisco Bay Area Rapid Transit District (BART) to provide, by ordinance or resolution, for directors to be compensated at the rate of \$100 per meeting, but not to exceed \$500 in any month.

This bill would authorize the board of directors of BART to provide, by ordinance or resolution, that each director of the district shall be paid a sum that shall not exceed \$1,000 for each month served subject to attendance requirements. This bill would provide for reduced compensation of members who miss board meetings and committees, except as specified.

The bill would also authorize the board to allow each director to be compensated for necessary travel and personal expenses incurred solely as a result of the performance of his or her duties, in amounts authorized by the board.

Ch. 456 (AB 1115) Knox. Sexual assault: victim's support.

(1) Existing law requires a law enforcement officer, or his or her agency, to immediately notify the local rape victim counseling center whenever a victim of an alleged violation of specified sex offenses is transported to a hospital for any medical evidentiary or physical examination. Existing law also requires that the victim have the right to have a sexual assault victim counselor and at least one other support person of

the victim's choosing present at any medical evidentiary or physical examination, and that notice of this right be provided orally or in writing to the victim by the attending medical provider prior to the commencement of any initial medical evidentiary or physical examination arising out of a sexual assault.

This bill would require the notice of the examination to be furnished by the medical provider, whether or not attending, and would authorize the exclusion of a support person from a medical evidentiary or physical examination if the law enforcement officer or medical provider determines that the presence of that individual would be detrimental to the purpose of the examination.

(2) Existing law provides that a victim of specified sexual assault offenses or spousal rape has the right to have victim advocates and at least one other support person of the victim's choosing present at any interview by law enforcement authorities, district attorneys, or defense attorneys. However, existing law specifies that an initial investigation by law enforcement at the crime scene to determine whether a crime has been committed and the identity of the suspects shall not constitute a law enforcement interview. Existing law also requires that prior to the commencement of any initial law enforcement interview or district attorney contact, the victim be notified orally or in writing by the attending law enforcement authority or district attorney that the victim has the right to have victim advocates, as well as a support person of the victim's choosing, present at the interview or contact.

This bill would authorize the exclusion of the support person from an interview by law enforcement or the district attorney if the law enforcement authority or the district attorney determines that the presence of that individual would be detrimental to the purpose of the interview. The bill would require that notice of the victim's rights be given prior to the commencement of the initial interview by law enforcement authorities or the district attorney, and would also revise what forms of contact constitute a law enforcement interview. The bill would require, at the time this notice is given, the attending law enforcement authority or district attorney to also advise the victim of the right to have victim advocates and a support person present at any interview by the defense attorney or investigators or agents employed by the defense attorney.

By imposing increased duties on local criminal justice systems that are equivalent to those imposed by the establishment of a new crime, this bill would impose a state-mandated local program.

(3) The bill would make conforming changes with respect to the provisions in (1) and (2) above.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) The bill would also incorporate amendments to Section 264.2 of the Penal Code proposed by both this bill and AB 1201 to become operative if (1) both bills are enacted and become effective on or before January 1, 1999, (2) each bill amends Section 264.2 of the Penal Code, and (3) this bill is enacted after AB 1201.

Ch. 457 (AB 1225) Granlund. Health: sudden infant death syndrome and anatomical gifts.

(1) Existing law requires a coroner to inquire into and determine the circumstances, manner, and cause of all violent, sudden, or unusual deaths, including deaths where the suspected cause is sudden infant death syndrome.

Existing law permits a coroner, as part of this inquiry, to take possession of the body and make, or cause to be made, a postmortem examination or autopsy of the body to make findings pertinent to establishing the cause of death.

Existing law requires a coroner to perform an autopsy in any case where an infant has died suddenly and unexpectedly. Existing law provides that no consent is required prior to undertaking this autopsy. Existing law provides, however, that no autopsy is required if the physician of record certifies the cause of death is sudden infant death syndrome and the parents object to an autopsy on religious or ethical grounds.

This bill would revise this exception to provide, instead, that an autopsy may be performed at the discretion of the coroner if the attending physician desires to certify that the cause of death is sudden infant death syndrome.

(2) The Uniform Anatomical Gift Act sets forth the standards and procedures for making, revoking, and refusing anatomical gifts. Among other things, the act authorizes an individual who is at least 18 years of age to make an anatomical gift for certain purposes, limit an anatomical gift to one or more of those purposes, refuse to make an anatomical gift, or amend or revoke an anatomical gift. Existing law also specifies the manner that consent may be given to make an anatomical gift.

This bill would permit a person between 15 and 18 years of age to make an anatomical gift, to the same extent as a person who is at least 18 years of age, upon the written consent of the person's parent or guardian. This bill would also permit an anatomical gift to be made, amended, or revoked by an oral statement made by means of a tape recording in the donor's own voice.

(3) Existing law authorizes the Department of Motor Vehicles to indicate on a form carried with the driver's license or an identification card the licensee's or cardholder's desires with regard to making an anatomical gift.

This bill would exempt these provisions from the authority granted by this bill regarding anatomical gifts and would make conforming changes.

(4) Existing law authorizes a coroner, in the course of an autopsy, to remove and release, or authorize the removal and release of, corneal eye tissue from a body within the coroner's custody if certain conditions are met, including that the coroner has no knowledge of objection to the removal and release of the tissue by the decedent or any other person as specified by law.

This bill would in addition require the coroner or medical examiner to obtain the written consent or an audio tape, transcript, or other document, recording the telephonic consent of the donor, the decedent's next of kin, or any other person as specified by law.

(5) Existing law regulates the donation of human organs and tissues in a variety of contexts.

This bill would require the Controller to prepare, or cause to be prepared, an organ donor information brochure for insertion in all payroll warrants issued by the Controller for specified pay periods.

This bill would require the Licensing and Certification Division of the State Department of Health Services to audit, as a part of its ongoing audit and review process, the existence of organ and tissue procurement procedures for all inpatient hospital facilities. The bill would require the department to note and report any deficiencies in these procedures in a written audit or site review.

This bill would also set forth requirements, applicable to specified health care service plan contracts, regarding the establishment and maintenance of organ and tissue procurement procedures.

Ch. 458 (AB 1389) Perata. Vehicles: Department of Motor Vehicles: records: confidentiality.

(1) Existing law prohibits the disclosure of certain home addresses that appear in any records of the Department of Motor Vehicles, including, among others, the home addresses of certain law enforcement personnel and the spouses and children of these persons, except as specified.

Existing law requires the home addresses specified above to be withheld from public inspection for 3 years following termination of office or employment, except with respect to retired peace officers, whose home address is required to be withheld from public inspection permanently upon request of confidentiality at the time the information would otherwise be opened.

Existing law makes a violation of the prohibition specified above a felony if the disclosure is of the home address of specified peace officers, among others, or the spouses or children of these peace officers and the disclosure results in bodily injury to these persons.

This bill, in addition, would require the home address of the surviving spouse or child of a peace officer, as defined, if the peace officer died in the line of duty, to be withheld from public inspection for 3 years following the death of the peace officer.

By expanding the scope of an existing crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 459 (AB 1650) Richter. Gasoline.

Existing law makes it a misdemeanor to sell any motor fuel that does not have a prescribed sign or label relating to the ethanol or methanol content.

This bill would repeal those provisions.

Ch. 460 (AB 1695) Knox. Crimes: supervision of a prostitute.

Existing law makes it a misdemeanor for any person to solicit, agree to engage in, or engage in an act of prostitution, or to loiter in any public place with the intent to commit prostitution.

This bill would make it a misdemeanor for any person to direct, supervise, recruit, or otherwise aid another person in the commission of an act of prostitution, or to collect or receive all or part of the proceeds earned from an act or acts of prostitution committed by another person.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 461 (AB 1736) Torlakson. Independent study: restrictions.

Existing law authorizes the governing board of a school district or a county office of education to offer independent study to meet the educational needs of pupils. Existing law provides that not more than 10% of the pupils participating in an opportunity school or program or a continuation high school is eligible for apportionment credit for independent study.

This bill would prohibit a pupil who is pregnant or who is a parent who is the primary caregiver for one or more of his or her children from being counted within the 10% cap. The bill would require the State Department of Education to report to the Legislature on the impact of this prohibition and its effects on the number of pregnant and parenting teens enrolled in opportunity schools or programs or continuation schools if the necessary data is available.

This bill would incorporate additional changes to Section 51745 of the Education Code made by this bill and SB 1701 to take effect if both bills are enacted and this bill is enacted last.

Ch. 462 (AB 1886) B. Thompson. Public libraries: videos.

(1) Existing law declares that it is in the interest of the people of the State of California that there should be a general diffusion of information and knowledge through the combined operation of the public libraries.

This bill would require any public library that provides public access to motion picture videotapes to adopt a policy regarding access by minors to motion picture videotapes, by January 1, 2000, and to make that policy available to members of the public at every library branch. By requiring public libraries to adopt that policy and to make it available, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates

Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 463 (AB 1906) Brewer. Local agency procedures: recordable instruments.

Existing law, until January 1, 1999, authorizes the county recorders in the Counties of San Bernardino and Orange to accept for recording, in lieu of a written paper document, a digitized image of a recordable instrument if specified conditions are met.

This bill would revise and recast these provisions to require that the requester and the addressee for delivery of the recorded image meet specified criteria, and would make the authorization permanent for these counties. The bill would also limit until January 1, 2000, the authorization of requesters and addressees that are licensed title insurers or licensed title companies who may submit a digitized instrument or document for recording. The bill would also, effective January 1, 2000, expand the requesters and addressees that the counties may accept for delivery of a recorded image if certain conditions are met.

This bill would require the state Attorney General to appoint an Electronic Recordation Task Force to meet on a regular basis to address technical, legal, security, and economic issues associated with electronic recordation, recommend which persons and entities should be authorized to digitize and record documents electronically after January 1, 2000, and prepare and submit recommendations to the Governor and the Legislature by July 1, 1999.

The bill would also authorize the transmission, filing, recording, and indexing of notices of federal tax liens by electronic or magnetic means, using computerized data processing, telecommunications, and other similar information technologies available to the filing offices.

Ch. 464 (AB 1928) Morrow. Commercial fishing.

(1) Existing law requires any person who engages in any business for profit involving fish, except as specified, to obtain a commercial fish business license or a specialty license issued by the Department of Fish and Game.

This bill would additionally except from the above requirement a person who purchases, sells, takes, or receives live marine fish for use as live bait, which are not brought ashore, and who does not engage in the activities of a fish receiver, marine aquaria receiver, fish processor, fish wholesaler, or fish importer.

(2) Existing law requires specified persons, including commercial fishermen who sell fish to persons who are not licensed fish receivers, to pay landing taxes.

This bill would exempt from the landing tax requirement, a person who purchases, sells, takes, or receives live marine fish for use as live bait, that are not brought ashore, and who does not engage in the activities of a fish receiver, marine aquaria receiver, fish processor, fish wholesaler, or fish importer.

(3) Existing law makes it unlawful to use or operate, or to assist in using or operating, any bait net, as defined, to take fish, except as specified, and except in specified fish and game districts, as provided. In particular, existing law provides that, in District 19A, bait nets may be used to take specified fish for bait only.

This bill would provide that, in District 19A, bait nets may be used to take specified fish for live bait purposes only.

(4) Under existing law, a bait net may not have rings along the lead line or any method of pursuing the bottom of the net.

This bill would except from that prohibition, drum seines and other round haul nets authorized under a permit issued by the department.

(5) Existing law requires all permit fees collected by the department to be deposited in the Fish and Game Preservation Fund and continuously appropriates the money in the fund to the department to pay all necessary expenses incurred in carrying out the Fish and Game Code.

This bill would make an appropriation by providing new revenues to that fund and by imposing new duties on the department payable from that fund.

Ch. 465 (AB 1973) Campbell. Public Utilities Commission: telecommunications: deregulation.

Existing law requires the Public Utilities Commission to submit to the Governor, on or before the first day of December of each year, a report containing a complete account of its transactions and proceedings for the preceding fiscal year, together with any other facts, suggestions, and recommendations that the commission deems of value to the people of the state.

This bill would, until January 1, 2004, require the commission to submit to the Legislature, on or before October 31 of each year, a report on telecommunications, as specified.

Ch. 466 (AB 1980) Brewer. Local government record retention.

Under existing law, the county board of supervisors may authorize the destruction and disposition of certain records, papers, or documents that are more than 2 years old. Existing law also authorizes the head of a department of a city, county, or city and county, a public safety communications center, or a special district to destroy recordings of telephone and radio communications after 100 days.

This bill would provide that the board of supervisors, the governing board of any special district whose membership is the same as the membership of the board of supervisors, or the head of any county public safety communications center may authorize the destruction of recordings of routine video monitoring after one year and may authorize the destruction of recordings of telephone and radio communications after 100 days. The bill would require recordings that are evidence in any claim or pending litigation to be preserved until the claim or pending litigation is resolved.

Ch. 467 (AB 2002) Kuykendall. Regional occupational centers.

Under existing law, the governing board of each school district may establish a restricted fund to be known as the "district deferred maintenance fund" for various purposes, including the major repair or replacement of plumbing, heating, air-conditioning, electrical, roofing, and floor systems, the exterior and interior painting of school buildings, the inspection, sampling, and analysis of building materials to determine the presence of asbestos-containing materials, the encapsulation or removal of asbestos-containing materials, and any other items of maintenance approved by the State Allocation Board.

Existing law provides that funds deposited in the district deferred maintenance fund may be received from any source whatsoever, and shall be accounted for separately from all other funds and accounts and retained in the district deferred maintenance fund.

Under existing law, a school district is entitled to apportionments for deferred maintenance and may submit an application to the State Allocation Board for deferred maintenance funding.

Under existing law, for purposes of the containment or removal of asbestos, there is an Asbestos Abatement Fund, and all moneys deposited in this fund are continuously appropriated to be administered by the State Allocation Board for the purpose of making allocations to school districts and county offices of education.

This bill would provide that the Joint Powers Southern California Regional Occupational Center and the Joint Powers Central County Occupational Center are deemed to be school districts for purposes of these deferred maintenance provisions, thereby making an appropriation by making those centers eligible for continuously appropriated funds.

The bill would include a legislative finding and declaration of unique circumstances necessitating a special statute in this regard.

Ch. 468 (AB 2008) Woods. Financial crimes.

(1) Existing law prohibits the forging, counterfeiting, possession, receipt, passing off or use of any false check, bond, bank bill, money order warrant, promissory note, invoice, contract or other financial instrument with the intent to defraud. Existing law also prohibits the sale, transfer, conveyance, forgery, alteration, or use of any access card or access card information, as defined, with intent to defraud.

This bill would substantially recodify the above provisions, thereby making a technical change. This bill would provide that traveler's checks are a financial instrument for purposes of the crime of forgery, prohibit the passing of a fictitious financial instrument purporting to be the instrument of either a real or fictitious financial institution, and generally recast the knowledge and intent elements of several financial crimes to conform to a common scheme and each other. By changing the definition and expanding the scope of existing crimes, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 469 (AB 2039) Baugh. Finance lenders law.

Existing law, known as the California Finance Lenders Law, provides for the licensure of persons who make consumer loans or commercial loans, and governs the terms and conditions of those loans. Existing law exempts certain specified persons from that law.

This bill would exempt from those regulatory provisions nonprofit church extension funds, as defined.

Ch. 470 (AB 2052) Firestone. California Debt and Investment Advisory Commission.

Existing law establishes a 9-member California Debt and Investment Advisory Commission and prescribes the duties of that commission, including requiring the commission to collect, maintain, and provide information on state and local debt authorization, sold and outstanding.

This bill would require the commission to collect, maintain, and provide comprehensive information on all state and all local debt authorization, sold and outstanding, and would require that this information be readily available upon request by any public official or any member of the public. This bill would require the commission to prepare an annual report compiling and detailing the total amount of outstanding state and local public debt and examining recent trends in the composition of that debt.

This bill would require the issuer of any new debt issue of state or local government, not later than 45 days after the signing of the bond purchase contract or after the acceptance of a bid, to submit a report of final sale to the commission by mail, postage prepaid, or by any other method approved by the commission.

Existing law authorizes a county board of supervisors to enact an ordinance adopting continuing education requirements that must be satisfied biennially, applicable to persons elected after January 1, 1996, or in the case of appointed officials, appointed and serving on or after the year 2000, for the office of county treasurer, county tax collector, or county treasurer-tax collector.

This bill would provide that programs within the discipline of treasury management or public finance, offered by the California Debt and Investment Advisory Commission would count towards the units needed to satisfy the continuing education requirement.

Ch. 471 (AB 2062) Cardenas. Vehicles: safety belts: taxicabs.

(1) Existing law prohibits any person from operating a motor vehicle on a highway unless that person and all passengers 16 years of age or over are properly restrained by a safety belt. This prohibition does not apply to the operator of a taxicab, as defined, when the taxicab is driven on a city street.

This bill would, instead, exempt from the safety belt requirement the operator of a taxicab when the taxicab is driven on a city street and is engaged in the transportation of a fare-paying passenger.

Because failure to wear a safety belt as specified is an infraction, the bill, by narrowing the exemption for taxicab operators, would impose a state-mandated local program by expanding the scope of an existing crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 472 (AB 2066) Sweeney. Vehicles: peace officers: fleeing.

(1) Existing law makes it a misdemeanor, punishable by imprisonment in county jail for not more than 1 year, or a felony punishable by imprisonment in the state prison, or by a fine of not less than \$1,000 nor more than \$10,000, or by both that fine and imprisonment, for any person, while operating a motor vehicle and with the intent to evade, to willfully flee, or to otherwise attempt to evade a pursuing peace officer's motor vehicle or bicycle if certain conditions exist and the pursued vehicle is driven in a willful or wanton disregard for the safety of persons or property.

This bill would require a sentence of imprisonment in state prison or confinement in county jail for this offense of not less than 6 months nor more than one year. To the extent that the bill would require the imposition of a sentence of imprisonment in state prison or a specified minimum term of confinement in a county jail, the bill would impose a state-mandated local program.

(2) Existing law provides in the Business, Transportation and Housing Agency for a Department of the California Highway Patrol and specifies its duties and powers.

This bill would authorize the department to undertake a statewide publicity campaign to convey to the citizens of this state the seriousness of the offense of fleeing a peace officer and the penalties associated with a violation, if specified moneys are provided to fund the campaign.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 473 (AB 2134) Escutia. Telecommunications: telephone service and telephonic solicitation.

(1) Existing law provides that the proper county for trial of a lawsuit based on an action arising from a transaction consummated as a proximate result of an unsolicited telephone call made by a seller engaged in the business of consummating transactions of that kind is the county in which the buyer or lessee in fact signed the contract, the county in which the buyer or lessee resided at the time the contract was entered into, or the county in which the buyer or lessee resides at the commencement of the action.

This bill would provide the same venue when the lawsuit is based on an action arising from a transaction consummated as a proximate result of a telephone call or electronic transmission made by the buyer or lessee in response to a solicitation by the seller.

(2) Existing law prohibits a telephone corporation from making specified information available regarding a residential customer without first obtaining that customer's consent in writing.

This bill would require telephone corporations to provide their residential customers on an annual basis one or more specified items of information that would provide the customers with information regarding state and federal laws that protect the privacy rights of telephone customers with respect to telephone solicitations.

Ch. 474 (AB 2141) Hertzberg. Long-term health care facilities: bankruptcy: controlling interest.

Existing law provides for the licensure and regulation of health facilities, including long-term health care facilities, administered by the State Department of Health Services. Existing law provides that willful or repeated violations of the requirements governing long-term health care facilities is a crime.

This bill would require the licensee of a long-term health care facility to provide written notification to the department of the filing of a bankruptcy petition and the location of the court in which the petition was filed within 24 hours of the filing of the petition by any person or entity holding a controlling interest in the facility. By changing the definition of a crime, this bill would impose a state-mandated local program.

The bill would require the long-term health care facility to provide written notification to the department of the appointment of a trustee by the bankruptcy court and would require the department to provide written notification to the trustee of the requirements of operating a long-term health care facility. The bill would set forth certain requirements of the trustee in a bankruptcy proceeding subject to these provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 475 (AB 2268) Leach. Yacht and ship brokers: boat dealers.

(1) Under the Yacht and Ship Brokers Act, the Department of Boating and Waterways licenses the activities of brokers and salespersons engaged in the buying and selling of yachts and ships, as specified. Under existing law, the department may not deny, suspend, or revoke a license granted under the act without a hearing, except that the department may suspend a license without a hearing for failure of a broker to maintain a bond, as specified.

This bill would additionally authorize the department to suspend a license without a hearing for failure of a broker to make available specified records to the department, as provided. The bill would allow the broker to appeal the suspension to an administrative law judge.

The bill would also authorize the department in any order issued in a disciplinary proceeding under the act to request the administrative law judge to direct a licensee found to have committed a violation of the act to pay the reasonable cost of the investigation, prosecution, and enforcement of the case, as provided in the bill. The bill would prescribe related conditions for issuance of an order.

(2) Existing law provides for the payment of unemployment insurance and disability compensation to certain employees who become unemployed or disabled. For that purpose, existing law defines employee, but excludes certain persons from that definition.

This bill would also exclude licensed yacht brokers and salesmen from the definition of "employee" if certain conditions are met.

Ch. 476 (AB 2320) Bordonaro. Vehicles: window coverings.

(1) Existing law prohibits any person from driving any motor vehicle with any object or material placed, displayed, installed, affixed, or applied upon the windshield or side or rear windows, with certain limited exceptions.

This bill would exempt from the above prohibition specified clear, colorless, and transparent material that is installed, affixed, or applied to the front side windows, located to the immediate left and right of the front seat. The bill would require the removal or replacement of this material if it is torn or bubbled or otherwise worn. Because a failure to remove or replace the material, as required by the bill, would be a crime under the existing Vehicle Code, this bill would create a state-mandated local program by expanding the scope of an existing crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 477 (AB 2353) Olberg. Surety insurers.

The existing Bond and Undertaking Law requires an admitted surety insurer to submit prescribed documents to a court or officer if an objection is made to the sufficiency of the insurer on a bond or if the bond is required to be approved. If the insurer submits the documents, and if other specified requirements are met, the insurer is deemed to be sufficient and is required to be accepted or approved as surety on the bond. Existing law

prohibits a state or local agency from imposing further requirements on an admitted surety insurer.

This bill would provide that, notwithstanding the above described provisions, specified state agencies may impose a prescribed requirement upon the insurer in order for the state agency to comply with federal law before the insurer is deemed sufficient.

Ch. 478 (AB 2372) Committee on Public Safety. Explosives.

(1) Existing law regulates the sale, use, transportation, and related conduct with respect to explosives, which are defined to include division A or B explosives as classified by the United States Department of Transportation.

This bill would revise those definitions and related exemptions to apply to explosives in division 1.1, 1.2, 1.3, 1.4, 1.5, or 1.6 as defined by that department, and explosives as defined in specified provisions of federal law. By expanding the definitions of existing crimes, the bill would create a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) Furthermore, this bill would incorporate amendments to Section 34631.5 of the Vehicle Code proposed by both this bill and AB 2132 which shall only become operative if (1) both bills are enacted and become effective on or before January 1, 1999, (2) each bill amends Section 34631.5 of the Vehicle Code, and (3) this bill is enacted after AB 2132.

Ch. 479 (AB 2401) Shelley. In-home supportive services: providers.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program.

This bill would authorize the City and County of San Francisco to implement a pilot project for at least 3 years to implement the provision of pooled services under the IHSS program through a modified delivery system in no more than 5 HUD-subsidized senior housing facilities owned by nonprofit organizations.

Ch. 480 (AB 2509) Napolitano. Vehicles: funeral processions.

(1) Existing law permits local authorities to adopt rules and regulations by ordinance to authorize any person to direct traffic at locations that require traffic direction for orderly traffic flow.

This bill would revise these provisions, until January 1, 2002, to require a local authority in the County of Los Angeles, whenever it authorizes the regulation of traffic by any person for a funeral procession, to issue each funeral escort an identification card and an official insignia in the form of a patch or badge indicating that the funeral escort is authorized to direct traffic in accordance with the movement of the funeral procession. The authority would be required to charge a fee for the issuance of the identification card and official insignia, equal to the cost incurred by the authority in issuing that card and insignia. For these purposes, the bill would define "funeral escort" and "funeral procession." The bill would require those local authorities to regulate the formal training of funeral escorts relating to traffic control and traffic safety procedures, as specified. Because a violation of these provisions would be a crime and because the bill would increase the responsibilities of local authorities, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 481 (AB 2519) Poochigian. Instructional materials: adoption: criteria.

Existing law requires the State Board of Education to adopt basic instructional materials for use in kindergarten and grades 1 to 8, inclusive, in language arts, mathematics, science, social science, and bilingual or bicultural subjects. Existing law requires the State Board of Education, in reviewing and adopting or recommending for adoption, submitted basic instructional materials, to ensure that those instructional materials are consistent with the criteria and standards of quality prescribed in the curriculum frameworks, comply with the requirements of certain provisions of the Education Code and the board's guidelines for social content, are factually accurate and incorporate principles of instruction reflective of current and confirmed research, adequately cover the subject area for the grade level or levels for which they are submitted and meet other criteria as are established by the board provided the State Board of Education approves this criteria at least 30 months before the instructional materials are to be approved for adoption.

This bill would, until April 1, 2002, make the requirement that 30 months elapse between the board's approval of other criteria and the adoption of instructional material inapplicable if certain conditions are met.

This bill would appropriate \$250,000 from the General Fund to the Superintendent of Public Instruction to provide administrative support to the State Board of Education related to the adoption of basic instructional materials.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 482 (AB 2581) Cardoza. Commercial vehicle fees exemption: disabled veterans and Congressional Medal of Honor recipients.

Under existing law, any disabled veteran or Congressional Medal of Honor recipient is exempt from the payment of fees specified in the Vehicle Code, with certain exceptions, for any commercial motor vehicle of less than 6,001 pounds unladen weight.

This bill instead would, on and after July 1, 1999, exempt those persons from the payment of those fees for any commercial motor vehicle of less than 8,001 pounds unladen weight.

Ch. 483 (AB 2583) Shelley. California Program of All-Inclusive Care for the Elderly: demonstration projects.

Existing law authorizes the Director of Health Services to establish the California Program of All-Inclusive Care for the Elderly, to promote the development of community-based risk-based capitated, long-term care programs. Existing law further authorizes the director to contract with up to 5 demonstration projects to develop risk-based long-term care pilot programs modeled upon On Lok Senior Health Services in San Francisco.

This bill would increase from 5 to 10 the number of demonstration projects with which the director may contract to develop risk-based long-term care pilot programs, and would make a technical, nonsubstantive change to these provisions.

Ch. 484 (AB 2650) Cardenas. Gangs: schools: San Fernando.

Existing law provides for the rehabilitation and punishment of minors who have violated any law or ordinance. Existing law, the California Street Terrorism and Enforcement Act also prohibits participation in criminal street gangs, as specified.

This bill would acknowledge the effectiveness of the Communities in Schools of San Fernando program in establishing a truce with the gangs in that community and would request the California State University to conduct a study of the overall effectiveness of the program in reducing gang-related crime in the community, as specified. The bill would appropriate \$100,000 for this purpose, as specified.

Ch. 485 (AB 2803) Committee on Judiciary. Maintenance of the codes.

Existing law directs the Legislative Counsel to advise the Legislature from time to time as to legislation necessary to maintain the codes.

This bill would restate existing provisions of law to effectuate the recommendations made by the Legislative Counsel to the Legislature for consideration during 1998, and would not make any substantive change in the law.

Ch. 486 (SB 459) Kelley. Transportation: Coachella Valley Intermodal Transportation Authority.

(1) Existing law provides procedures for the creation of local transportation authorities.

This bill would create the Coachella Valley Intermodal Transportation Authority and would prescribe the powers and duties of the authority.

The bill would require 11 districts, which may be local public entities, within the authority, as specified, to perform specified duties.

Because the bill would impose additional duties upon certain entities of local government, it would create a state-mandated program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 487 (SB 1176) Johnson. Vehicles: driving under the influence: reckless driving: alcohol and drug education programs.

(1) Existing law requires that, when the prosecution agrees to a plea of guilty or nolo contendere to a charge of a violation of a specified provision prohibiting reckless driving, and the plea is in satisfaction of, or as a substitute for, an original charge of a violation of a specified provision prohibiting driving under the influence of alcohol, drugs, or both alcohol and drugs, the prosecution state, for the record, a factual basis for the satisfaction or substitution, including whether or not there had been consumption of any alcoholic beverage or ingestion or administration of any drug, or both, by the defendant in connection with the offense. If the court accepts the defendant's plea of guilty or nolo contendere, as specified, the resulting conviction is required to be treated as a prior offense for the purposes of specified provisions relating to punishment for violating the driving-under-the-influence provision.

This bill would require the court, for each of the convictions specified above, to order the defendant to enroll in an alcohol and drug education program licensed under specified provisions of existing law and complete, at a minimum, the educational component of that program, if the court has placed the defendant on probation for that conviction. The bill would allow the court to exclude the educational component from the order if compelling circumstances exist that mitigate against including that component and the court states those circumstances and makes an affirmative finding to that effect, both of which would be required to be stated on the record. The bill would thereby impose a state-mandated local program by creating new duties for the courts. The bill would require the Department of Motor Vehicles to include an evaluation of the effectiveness of treating persons convicted of the described offense in the department's annual report to the Legislature required under existing provisions of law. The bill would make conforming changes.

(2) This bill would incorporate changes in Section 11836 of the Health and Safety Code and Section 23103.5 of the Vehicle Code proposed by this bill and SB 1186 to become operative if both bills are enacted and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 488 (SB 1374) Leslie. Personal information.

Existing law provides that it is a misdemeanor for a person to willfully obtain personal identifying information, as defined, of another person and use that individual's personal identifying information to obtain, or attempt to obtain, credit, goods, or services in the name of the other person without the consent of that person.

This bill would make it a misdemeanor or a felony, punishable as specified, for a person to willfully obtain and use this personal identifying information to obtain or attempt to obtain credit, goods, services, or medical information in the name of another person without the consent of that person.

This bill would also provide that when a person willfully obtains personal identifying information and uses that information to commit a crime in addition to the above defined crime, and he or she is convicted of the further crime, court records would be required to reflect that the person whose identity was falsely used did not commit the crime.

By expanding the scope of, and increasing the penalty for, a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 489 (SB 1427) Rainey. Pupil expulsion.

Existing law requires that an expulsion hearing be held within 30 schooldays of the date it is determined the pupil committed the act giving rise to the suspension or expulsion and imposes other time requirements if a hearing is postponed. Existing law authorizes the county superintendent of schools or the superintendent's designee to extend the time period during which an expulsion hearing is required to be conducted for an additional 5 schooldays if it is impractical for the governing board to comply with these time requirements.

This bill would provide that this extension is available if compliance is impractical during the regular school year. The bill would provide that due to a summer recess of governing board meetings of more than 2 weeks, the days during the recess period do not count as schooldays in meeting the time requirements except that the extension cannot exceed 20 schooldays and the expulsion hearing shall be held no later than 20 calendar days prior to the first day of school for the school year.

Ch. 490 (SB 1692) McPherson. California Specialized Training Institute.

Existing law establishes the California Specialized Training Institute in the Office of Emergency Services to assist the Governor in providing training to state agencies, cities, and counties in their planning and preparation for disasters.

This bill would appropriate \$140,000 from the General Fund to the Office of Emergency Services for allocation to the California Specialized Training Institute to implement a pilot program for "distance learning" to offer certification, recertification, or renewal classes over the Internet as an alternative to traditional onsite courses. The bill would require the office to recover these funds and any other moneys that may be expended to develop and implement this program by charging a fee for participating in the program and to report by June 30, 2000, to the appropriate policy committees of the Legislature concerning the pilot program.

Ch. 491 (SB 1764) Karnette. Ballot pamphlets.

Existing law requires the Secretary of State to prepare and cause the printing of state ballot pamphlets.

This bill would require the Secretary of State to disseminate the complete state ballot pamphlet over the Internet.

Ch. 492 (SB 1792) Mountjoy. Contractors: arbitration of disputes.

The Contractors' State License Law provides that the Registrar of Contractors may refer specified complaints regarding contractors to arbitration if certain conditions are met, including the existence of evidence that the complainant has suffered or is likely

to suffer damages greater than \$5,000 and less than \$25,000, and the concurrence of both parties to the referral.

This bill would authorize the registrar to refer a complaint to arbitration if the damages are less than \$50,000, if the complaint otherwise meets the specified conditions. It would require that the parties to an arbitration be advised that an arbitration award rendered against a principal alone is not an award against the surety.

Existing law provides for arbitration of disputes arising out of cases filed with or by the Contractors' State License Board and specifies the manner by which arbitrators are appointed by the board.

This bill would require the board to adopt regulations setting minimum arbitrator qualification standards, and would state legislative intent, as specified.

Ch. 493 (SB 1964) Costa. Vehicles: jamming devices.

(1) Existing law prohibits vehicles from being equipped with certain equipment, including, among other things, theft alarm systems that emit the sound of a siren, studded tires, and certain prohibited lighting systems.

This bill would prohibit any vehicle from being equipped with any device that is designed for, or is capable of, jamming, scrambling, neutralizing, disabling, or otherwise interfering with radar, laser, or any other electronic device used by a law enforcement agency to measure the speed of moving objects.

The bill would also prohibit any person from using, buying, possessing, manufacturing, selling, or otherwise distributing any device that is designed for jamming, scrambling, neutralizing, disabling, or otherwise interfering with radar, laser, or any other electronic device used by a law enforcement agency to measure the speed of moving objects.

The bill would make a violation of the above provisions an infraction, and a misdemeanor when a person possess 4 or more of the devices. Thus, the bill would impose a state-mandated local program by creating a new crime.

The bill would authorize a person who has a valid federal license for operating the specified devices to transport one or more of those devices if the license is carried in the vehicle transporting the device at all times when the device is being transported.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 494 (SB 2024) Rainey. Collectibles.

Existing law defines the term "collectible" as any autographed sports item sold or offered for sale by a dealer for \$25 or more and the term "promoter" as a person who arranges, holds, organizes, or presents a trade show featuring collectibles. Existing law regulates the advertisement and sale of collectibles by, among other things, requiring specific disclosures about the merchandise, specifying the contents of certificates of authenticity, and providing consumers with the right to recover 10 times actual damages for injuries caused by a false or missing certificate. Existing law requires certificates of authenticity to include specified warranties, information, and disclosures.

This bill would provide, instead, that the term "collectible" applies to any autographed sports item sold or offered for sale to a consumer for \$5 or more and the term "promoter" applies to a person who arranges, holds, organizes, or presents a trade show featuring collectibles, autograph signings, or both. This bill would expand the enumerated requirements of a certificate of authenticity, by requiring the inclusion of the date of sale, any identifying serial number, and information relating to an autograph signing, as specified. The bill would also authorize a court to award additional damages based on the egregiousness of the dealer's conduct where a consumer has been injured by the failure of a dealer to provide a valid certificate of authority.

Ch. 495 (SB 2051) Costa. Insurers: investments.

Existing law provides that an insurer shall not be admitted within 3 years of the time it commences business as an insurer or it is incorporated, unless certain assets are maintained in cash or in certain restricted investments.

This bill would also allow the assets for certain of these insurers to be maintained in any investments generally authorized for insurers, if, with the prior approval of the Insurance Commissioner, the solvency of the insurer is guaranteed by another insurer, as specified, and the commissioner determines that the proposed investment is sound in relation to the insurer's business plan and operations.

Ch. 496 (SB 2081) Schiff. Youthful offenders.

Existing law provides for various state and local agencies to maintain custody of specified minors coming within the jurisdiction of the juvenile court.

This bill would provide that the parents or guardians of any minor within the custody of the state or the county, if they can reasonably be located, shall be notified within 24 hours by the public officer responsible for the well-being of the minor, of any defined serious injury or serious offense committed against the minor, upon reasonable substantiation that a serious injury or offense has occurred, except as specified. The bill would impose a state-mandated local program by imposing new duties on county officials.

Existing law provides that whenever any person under the jurisdiction of the Youth Authority is in need of medical or dental care, the Youth Authority may authorize that care, upon the recommendation of the attending physician.

This bill would expand that provision to apply to the Department of Corrections with respect to minors under the jurisdiction of the Department of Corrections, and to applicable recommendations by an attending dentist.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 497 (SB 2233) Committee on Revenue and Taxation. Tax administration.

Existing law requires a local agency or legislative body responsible for certain foreclosure actions to take certain actions with respect to delinquent installments.

This bill would make corrective changes by changing certain references to "county auditor" in lieu of "tax collector."

Existing property tax law provides for specified procedures and actions by the Controller in connection with the sale of tax-defaulted property.

This bill would revise, delete, or make technical and clarifying changes to those provisions, including provisions relating to notices, certain required statements, reports, recordation, rescission, and specified documents, as provided.

Existing property tax law provides for the redemption of tax-defaulted property.

This bill would allow certain fees to become a part of the redemption amount.

Existing property tax law requires a county official to provide certain information with respect to tax-defaulted property.

This bill would delete the requirement that the information also include the street address of the property.

Existing property tax law sets forth certain amounts to be included in the sales price of tax-defaulted property.

This bill would authorize the tax collector to establish a minimum price for the property, as provided.

Existing property tax law requires a county tax collector to record a specified document in connection with an invalid tax lien on real property.

This bill would specify signature requirements with respect to a document that is so recorded.

Existing property tax law authorizes a county to accept a credit card charge of property taxes and requires a county to impose a fee, as provided, on those persons using a credit card in payment of property taxes.

This bill would instead allow, but not require, a county to impose a fee for the use of a credit card to pay property taxes.

The Controller may extend the time fixed for performance of any act by a county tax collector. A county tax collector is required to schedule tax sales within a specified timeframe.

This bill would require a county tax collector to notify the Controller of any proposed tax sale or postponement of any tax sale, thereby imposing a state-mandated local program.

Existing property tax law provides that certain legal procedures shall not prevent or enjoin the collection of property taxes sought to be collected.

This bill would, in the case of a collection of taxes pursuant to a bankruptcy proceeding, authorize a county to request a reasonable amount of attorney's fees.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 498 (AB 743) Washington. Probation: 12th grade education.

Existing law sets forth various terms of probation for persons convicted of a crime, including any reasonable conditions that are deemed fitting and proper.

This bill would establish a 5-year pilot program to authorize the court to require any adult who has been convicted of a nonviolent or nonserious offense to participate in a program designed to assist the person in obtaining the equivalent of a 12th grade education as a condition of probation. The bill also would authorize the court to require a probationer to participate in a literary or General Education Development program. The bill would state that the pilot program would be deemed successful if at least 10% of the persons participating in the pilot projects obtain the equivalent of a 12th grade education within 3 years.

The program would be operable in Los Angeles as a pilot project upon approval by the County of Los Angeles Board of Supervisors and would be operable in any other county upon approval of a county's board of supervisors.

Ch. 499 (AB 2796) Wright. Corrections: juvenile correctional and youth center facilities.

Existing law directs the Department of the Youth Authority to administer the moneys intended for juvenile facilities in the County Correctional Facility Capital Expenditure and Youth Facility Bond Act of 1988.

This bill would authorize the Board of Corrections to expend funds, upon appropriation by the Legislature, for the purpose of awarding grants on a competitive basis to counties for the renovation, reconstruction, construction, and replacement of county juvenile facilities and the performance of deferred maintenance on county juvenile facilities. The bill would authorize up to 1½% of these funds to be used by the board for administration of the County Juvenile Correctional Facilities Act, established by this bill. The bill would make grants under these provisions dependent upon the grantee's contributing resources, as specified, for purposes of the grant program in an amount that is at least 25% of the amount of the grant.

The bill also would appropriate \$100,000,000 from the General Fund for the purposes of these provisions.

This bill would enact the Juvenile and Gang Violence Prevention, Detention, and Public Protection Act of 1998 that would appropriate \$25,000,000 for allocation by the Department of the Youth Authority to nonprofit organizations for acquiring, renovating, or constructing defined youth centers.

The bill would also appropriate \$25,000,000 from the General Fund for the purpose of funding that act.

This bill would declare that it would take effect immediately as an urgency statute.

Ch. 500 (SB 491) Brulte. State property: Department of Corrections.

(1) Under existing law, the Director of the Department of General Services, with the consent of the Department of Corrections, is authorized to lease, without any monetary consideration, 140 acres of state property to the City of Chino, subject to specified conditions, to serve as a peripheral buffer area or zone between real property upon which is located the California Institution for Men and adjacent real property for the development and maintenance of a public park and recreational improvements and facilities, including commercial enterprises that are incidental or consistent with these uses. The City of Chino is also authorized to sublease a portion or all of this property for these purposes and up to an additional 30 acres to expand the public park.

This bill would authorize the Director of General Services, with the consent of the Department of Corrections, to exchange, sell, or lease up to 290 acres of state property to the City of Chino for the development and maintenance of a public park, public recreational uses, and open-space uses, including the development of a golf course. The bill would also require that any lease executed pursuant to these provisions be for a term not to exceed 55 years and meet specified conditions.

The bill would require that the Department of General Services with the Department of Corrections, not later than August 1, 1999, complete the initial phase of the Master Land Use Plan (MLUP) authorized in the Budget Act of 1998 and consult with the City of Chino on all aspects of the completion of the MLUP as it relates to the development of the California Institution for Men property for specified uses.

(2) Existing law authorizes the Department of Corrections to develop and operate work programs that enable inmates to acquire and improve work habits and occupational skills, in order to assist them upon parole or discharge. In addition, the Director of Corrections is authorized to contract for the establishment and operation of separate community correctional reentry centers that prepare the inmates for reintegration into society by providing counseling for drug and alcohol abuse, stress employment skills, and victim awareness.

This bill would require the Department of Corrections to establish 3 pilot programs to provide intensive training and counseling services, as specified, for female parolees in order to enable their successful reintegration into the community upon release or discharge. The bill would require the programs to include case management to assess the needs of the participating parolees and would authorize ancillary services, including child care, to permit full participation by female offenders in the programs. The bill would authorize the department, subject to appropriation of funds, to enter into contracts for community residential treatment services for the offenders and the minors in their custody. The bill would also require the department to complete a report to the Governor and the Chairperson of the Joint Legislative Budget Committee and the chairpersons of the fiscal committees of both houses by January 1, 2002, evaluating the cost-effectiveness of the pilot programs as specified.

(3) Under existing law, the Department of Corrections is authorized to administer and operate the state prison system.

This bill would authorize the department to study, design, and construct 10 semiautonomous administrative segregation buildings at existing prisons for a total of 1,000 cells. The bill also would authorize the department to contract for 2,000 community correctional facility beds under specified conditions.

(4) This bill would provide that it shall become operative only if AB 2321 and SB 2108 are enacted and become effective on or before January 1, 1999.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 501 (SB 1485) Rosenthal. Mentally ill offender crime reduction grants.

Under existing law, it is the duty of the Board of Corrections to make a study of the entire subject of crime, with particular reference to conditions in the State of California, including causes of crime, possible methods of prevention of crime, methods of detection of crime, and apprehension of criminals, methods of prosecution of persons accused of crime, and the entire subject of penology, including standards and training for correctional personnel, and to report its findings, its conclusions and recommendations to the Governor and the Legislature as required.

This bill would require, until January 1, 2005, the Board of Corrections to administer and award mentally ill offender crime reduction grants on a competitive basis to counties that expand or establish a continuum of swift, certain, and graduated responses to reduce crime and criminal justice costs related to mentally ill offenders. The bill would require the board, in consultation with the State Department of Mental Health and the State Department of Alcohol and Drug Programs, to create an evaluation design for the grant program that will assess the effectiveness of the program in reducing crime, the number of early releases due to jail overcrowding, and local criminal justice costs, and would require the board to submit annual reports to the Legislature based on the evaluation design. The bill would require funding for the program to be provided, upon appropriation by the Legislature, in the annual Budget Act.

Ch. 502 (SB 2108) Vasconcellos. Department of Corrections: Pre-Release Program Correctional facilities.

(1) Under existing law, the Department of Corrections is authorized to administer and operate the state prison system.

This bill would appropriate, by adding items to the Budget Act of 1998, \$71,520,000 to the department for capital outlay, and \$2,589,000 for support staff for planning, design, construction, and activation of 10 semiautonomous administrative segregation buildings, as specified. Of the first of these amounts, the bill would provide that \$760,000 may be made available for mitigation costs of local governments, and a maximum of \$760,000 for mitigation costs of school districts.

The bill also would appropriate, by adding items to the Budget Act of 1998, \$23,500,000 to the department of which \$10,000,000 would be available until December 31, 1999, only for an additional 2,000 community correctional facility beds under specified conditions. In addition, the bill would make available from this budget item all of the following: (a) \$5,500,000 to expand casework services for parolees; (b) \$1,000,000 to expand existing programs to provide inmates and parolees with comprehensive support services; (c) \$1,000,000 to enhance prerelease programs for inmates; and (d) \$6,000,000 for 3 pilot programs to assist drug-addicted female offenders, as specified.

This bill would add items to the Budget Act of 1998 to separately appropriate \$50,000,000 and \$27,000,000, for local assistance to the Board of Corrections.

(2) This bill would state that it would become operative only if AB 2321 and SB 491 are enacted and become effective on or before January 1, 1999.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 503 (SB 2082) Johnston. Education: San Ysidro School District: San Joaquin County Office of Education: Montebello Unified School District.

(1) Pursuant to existing law, the Legislature is required to provide for a system of common schools. Existing law appropriates certain amounts to the Superintendent of Public Instruction for prescribed purposes in the 1997-98 fiscal year, including, but not limited to, \$25,000 to the South Bay Union School District for the purpose of the after school youth violence prevention.

This bill would delete that appropriation and would, instead, appropriate \$25,000 to the San Ysidro School District for the purpose of the after school youth violence prevention.

(2) Under existing law, the Legislature is required to provide for a system of common schools. Chapter 299 of the Statutes of 1997, which supplements the Budget Act of 1997, appropriated \$500,000 from the General Fund to the Superintendent of Public Instruction for allocation to the Los Angeles Unified School District in the 1997-98 fiscal year to enhance education programs at the California Museum of Latino History, Art, and Culture related to exhibits on Latino history and culture.

This bill would provide that the unencumbered balance of these funds is appropriated to the Superintendent of Public Instruction for allocation to the Montebello Unified School District for the same purpose, thereby making an appropriation.

(3) Under existing law, the sum of \$1,646,000 is appropriated from the General Fund to the Superintendent of Public Instruction for allocation in the 1997-98 fiscal year to the San Joaquin County Office of Education for educational and operational costs for the

Professional Development Center, technology training for teachers, pupils, and support staff, and reading and mathematics projects.

This bill would provide that the funds are also allocated for capital outlay and startup, thereby making an appropriation.

(4) The funds appropriated by this bill would be applied toward the minimum funding requirement for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 504 (AB 469) Cardoza. Limited liability partnerships: architecture.

Existing law provides for the formation of various types of legal entities, including corporations, limited liability companies, partnerships, limited partnerships, limited liability partnerships, and foreign limited liability partnerships. Under existing law, registered limited liability partnerships may only be formed for the practice of accountancy and the practice of law.

This bill would also authorize, until January 1, 2002, registered limited liability partnerships and foreign limited liability partnerships to be formed for the practice of architecture.

Ch. 505 (AB 745) B. Thompson. Outpatient settings: general anesthesia.

Existing law provides for the licensure and regulation of the practice of dentistry by the Board of Dental Examiners of California. Existing law prohibits a dentist from administering or supervising the administration of general anesthesia to patients on an outpatient basis unless the dentist has a permit issued by the board authorizing the use of general anesthesia.

Existing law provides for the licensure and regulation of physicians and surgeons by the Medical Board of California.

This bill would permit a physician and surgeon to administer general anesthesia in the office of a licensed dentist, for dental patients, whether or not the dentist has been certified to perform general anesthesia, if the licensed physician and surgeon holds a valid general anesthesia permit issued by the Board of Dental Examiners of California. The bill would require payment of a fee for issuance of the permit, would require onsite inspection and evaluation, and would require automatic suspension of the permit for a physician and surgeon who has failed an onsite inspection and evaluation, except as prescribed. By increasing the amount of moneys deposited in a continuously appropriated fund, this bill would make an appropriation.

This bill would require the Medical Board of California to inform the Board of Dental Examiners of California whether the applicant is a licensed physician and surgeon and to verify and inform the Board of Dental Examiners of California whether the applicant has successfully completed a postgraduate residency training program in anesthesiology recognized by the American Council on Graduate Medicine.

Existing law declares that a violation by the dentist of related provisions constitutes unprofessional conduct and authorizes the Board of Dental Examiners of California to take prescribed actions.

This bill would provide that a violation of those provisions and of provisions relating to general anesthesia by a physician and surgeon may constitute unprofessional conduct under the Medical Practice Act, and is grounds for suspension or revocation of the general anesthesia permit issued by the Board of Dental Examiners of California. The bill would require the Board of Dental Examiners of California to refer the matter to the Medical Board of California for its consideration as unprofessional conduct and for further action under the Medical Practice Act. It would also provide that a suspension or revocation of a physician and surgeon's permit by the Board of Dental Examiners shall not constitute a disciplinary proceeding or action except to permit the initiation of an investigation or disciplinary action by the Medical Board of California.

The bill would repeal its provisions on January 1, 2000.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 506 (AB 966) Ackerman. Laboratory hazardous waste: treatment: residues.

(1) Existing law requires hazardous waste facilities, including, but not limited to, treatment facilities, to operate under hazardous waste facilities permits issued by the Department of Toxic Substances Control or other grant of authorization from the department, except as specified. Existing law, the Wright-Polanco-Lempert Hazardous Waste Treatment Permit Reform Act of 1992, deems a generator who conducts specified treatment activities, upon notifying the department, to be conditionally authorized to operate without obtaining a hazardous waste facilities permit or other grant of authorization, and also conditionally exempts, from hazardous waste facilities permit requirements, a generator who treats not more than specified amounts of hazardous waste in any month, or generators conducting specified treatment processes, if specified requirements are met with regard to that hazardous waste. Existing law authorizes the department to adopt regulations, until January 1, 2002, that exempt a hazardous waste management activity from one or more of the requirements of the hazardous waste control laws, under specified conditions. A violation of the provisions regulating hazardous waste, including a regulation adopted pursuant to those laws, is a crime.

This bill would revise the definition of "treatment" for purposes of the hazardous waste control laws to exempt certain activities that are conducted onsite in accordance with the conditions specified in a permit issued by the department for the storage of hazardous waste. The bill would prohibit the department from adopting regulations to exclude a hazardous waste management activity from that definition of treatment.

The bill would define the terms "laboratory," "laboratory hazardous waste," and "laboratory accumulation area" and would allow the accumulation of up to a specified amount of laboratory hazardous waste in a laboratory accumulation area if the waste is accumulated in a specified manner. The bill would exempt from hazardous waste facilities permit or authorization requirements the treatment of laboratory hazardous waste generated onsite, if certain requirements are met. The bill would authorize the department to adopt regulations imposing additional requirements for the accumulation of laboratory hazardous waste. Since a violation of the bill's requirements would be a crime, the bill would impose a state-mandated local program. The bill would require the department to submit a report to the Legislature by January 1, 2002, that evaluates the effect of this exemption on laboratory hazardous waste management activities.

The bill would provide that residues that are removed from equipment for the purpose of cleaning the equipment for continued use are subject to regulation under the hazardous waste control laws only after the residues have been removed from the equipment and that the removal of these residues from equipment for that purpose constitutes generation, and not treatment, of a hazardous waste.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 507 (AB 1770) Kuykendall. Real estate licensure: continuing education: prohibited acts: fees.

(1) The Real Estate Law requires all real estate licensees to comply with certain continuing education requirements as a prerequisite to the first and to subsequent renewals of their real estate licenses, subject to certain exceptions for real estate salespersons and for real estate licensees who have been licensees for 30 continuous years in the state and who are 70 years of age or older.

This bill would delete the exception for real estate salespersons with respect to subsequent renewals of their real estate licenses.

(2) The Real Estate Law specifies the grounds for denial of, or suspension or revocation of, a real estate license by the Real Estate Commissioner. Existing law provides that these grounds apply to a corporation if an officer, director, or person owning or controlling 10% or more of the corporation's stock has done specified prohibited acts, except that a real estate license held by a corporation shall not be denied or suspended by the commissioner if an offending officer, director or shareholder has been completely disassociated from any affiliation or ownership in the corporation.

This bill would instead provide that the commissioner may not deny, suspend, or revoke a real estate license held by a corporation if the corporation or persons acting on behalf of the corporation have not done specified prohibited acts, provided that any offending officer, director, or shareholder, who has done any of those acts individually and not on behalf of the corporation, has been completely disassociated from any affiliation or ownership in the corporation.

(3) The Real Estate Law prescribes certain maximum licensing fees and authorizes the commissioner to prescribe fees lower than those maximums whenever he or she determines that those lower fees are sufficient to cover costs incurred in the administration of the Real Estate Law.

This bill would delete from that authorization a reference to certain fees prescribed outside of the Real Estate Law, relating to the filing of public reports in connection with real estate subdivision interests.

Ch. 508 (AB 1785) Murray. The Preservation of Jazz Institute.

Existing law, which became inoperative on July 1, 1998, and is to be repealed on January 1, 1999, authorizes the Trustees of the California State University to establish the institute for Preservation of Jazz at California State University, Long Beach.

This bill would make the authorization inoperative on July 1, 2002, and would repeal the authorization on January 1, 2003.

Ch. 509 (AB 1801) Davis. Children's services.

Existing law permits local entities to establish integrated children's services programs, as defined, to provide children's services.

Existing law authorizes children's multidisciplinary services teams to disclose to one another information and view records pertaining to a child and his or her family necessary to formulate an integrated services plan or to deliver services to children and their families.

This bill would also define an integrated children's services program as a coordinated children's service system, operating as a program that is part of a State Department of Social Services or State Department of Mental Health initiative, that offers a full range of behavioral, social, health, and medical services to seriously emotionally disturbed and special needs children.

The bill would also enact various provisions governing the provision of services under, and the sharing and use of information and records by, an integrated children's services program.

Ch. 510 (AB 1869) Cardoza. Property insurance: emergencies.

Existing law provides for the regulation of insurers by the Department of Insurance and the Insurance Commissioner.

Existing law establishes the Office of Emergency Services and other agencies to deal with state and local emergencies.

This bill would require the commissioner to establish insurance disaster assessment teams consisting of representatives of property insurers for the purpose of assessing the extent, type, and degree of insured damage involved in the emergency. The bill would require law enforcement officials to permit an insurance disaster assessment team to have access to any disaster area as soon as it is determined to be safe and practical.

The bill would require the commissioner, in consultation with the Office of Emergency Services and other emergency service agencies, to establish a method for identification of representatives of insurers, and to provide for the issuance of identification badges to insurer representatives. The bill would enact related provisions.

The bill would require the commissioner, in cooperation with insurers, the Office of Emergency Services, and other emergency service agencies, to establish procedures for the coordination of insurer efforts with those of emergency response agencies, and to permit the presence of insurer representatives at emergency operations centers.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 511 (AB 1900) Cardenas. Domestic violence: confidentiality of identifying information.

Existing law authorizes the court, in any proceeding under the Uniform Interstate Family Support Act, to issue an order, that may be ex parte, prohibiting the disclosure of identifying information regarding a party or child in any pleadings or other documents, if the court finds disclosure would put the party or child at unreasonable risk for specified harm.

This bill would specify procedures and requirements relating to the issuance of those orders and would, among other things, specify that an order would be issuable only upon an application, as specified, made under penalty of perjury by the party, child, parent, guardian, or state support enforcement agency. The bill would also require a support enforcement agency providing services to a party to provide specified information regarding nondisclosure orders and to seek a nondisclosure order in specified circumstances, and would specify that these orders are not subject to other provisions of law relating to ex parte temporary restraining orders. Because this bill would expand the duties of local agencies and expand the crime of perjury, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 512 (AB 1922) Firestone. Obstruction of justice: judicial officials.

Under existing law, a juror, or person summoned as a juror, or chosen arbitrator or umpire, or appointed referee, who either makes a promise or agreement to give a verdict or decision for or against any party, or willfully and corruptly permits any communication to be made to him or her, or receives any book, paper, instrument, or information relating to any cause or matter pending before him or her, except according to the regular course of proceedings, is punishable by a specified fine or imprisonment.

This bill would add provisions that would make it a misdemeanor with specified criminal penalties for a judicial officer, court commissioner, or referee to commit an act that he or she knows or should have known perverts or obstructs justice or the due administration of the laws. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 513 (AB 2006) Keeley. Dentistry: oral conscious sedation.

Existing law regulating dentistry prohibits any dentist from administering or supervising the administration of conscious sedation on an outpatient basis for dental patients unless they hold a valid general anesthesia permit or a permit issued by the Board of Dental Examiners authorizing the dentist to administer conscious sedation, or a permit.

This bill would prohibit any dentist from administering or supervising the administration of oral conscious sedation on a patient under 13 years of age unless the dentist holds a valid general anesthesia permit, a permit issued by the Board of Dental Examiners authorizing the dentist to administer conscious sedation, or obtains a certification in oral conscious sedation. This bill would also establish educational requirements, qualifications, and a fee for this certification. The bill would impose requirements for the administration of oral conscious sedation requiring the presence

of the dentist and the use of drugs and techniques with a wide margin of safety, as specified.

Ch. 514 (AB 2292) Ackerman. Legal entities: organization and operation.

Existing law authorizes a listed corporation, as defined, to amend its articles or bylaws to divide its board of directors into 2 or 3 classes to serve for terms of 2 or 3 years, respectively, or to eliminate cumulative voting, or to do both of those things. Existing law also authorizes a corporation that is not a listed corporation, after the issuance of shares, to amend its articles or bylaws, to be effective when the corporation becomes a listed corporation, to divide its board of directors into 2 or 3 classes to serve for terms of 2 or 3 years, respectively, or to eliminate cumulative voting, or to do both of those things.

This bill would, among other things, provide for the elimination of those classes of directors, as specified, when the listed corporation ceases to be a listed corporation. It would also authorize shareholders of a corporation that ceases to be a listed corporation to cumulate their votes at any election of directors occurring while that corporation is not a listed corporation, notwithstanding any provision to the contrary in the corporation's articles or bylaws. This bill would also specify certain related effective dates governing when a listed corporation ceases to be a listed corporation and when a corporation that is not a listed corporation becomes a listed corporation. It would also make a change to the definition of "listed corporation."

Existing law provides that it is the intent of the Legislature that existing business entities, such as partnerships and corporations, be permitted to convert into or transfer real property to, limited liability companies without incurring a documentary transfer tax provided that the direct or indirect proportionate interests in the property remain the same.

This bill would amend that provision to provide that existing business entities, such as partnerships and corporations, shall be permitted to convert into or transfer real property to, limited liability companies without incurring a documentary transfer tax, provided that the direct or indirect proportionate interests in the property remain the same.

Existing law requires a foreign corporation, as defined, to comply with various enumerated requirements and specify the times these requirements will apply, and cease to apply, to a foreign corporation.

This bill would revise those time periods.

Ch. 515 (AB 2303) Runner. Employment surveillance: notice.

Existing law prohibits an employer from demanding or requiring any applicant for employment or prospective employment or any employee to submit to or take a polygraph, lie detector, or similar test or examination as a condition of employment or continued employment.

This bill, in addition, would prohibit an employer from causing an audio or video recording to be made of an employee in a restroom, locker room, or room designated by an employer for changing clothes, unless authorized by court order. The bill would prohibit a recording made in violation of its provisions from being used by an employer for any purpose. The bill would make its provisions applicable to a private or public employer, except the federal government.

Because a violation of the provisions of the bill would constitute an infraction, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 516 (SB 28) Maddy. Horse racing: stabling and vanning.

Existing law requires that with respect to racing meetings conducted in the central or southern zones, all costs associated with the maintenance of the usable stalls for the racing meeting are to be borne by the association or fair conducting the meeting, and, with respect to usable stalls at an offsite location, the association or fair may be required,

pursuant to the supervision of the California Horse Racing Board, to bear the costs of vanning from the offsite location to the racing meeting. Existing law also requires an amount not to exceed 1.25% of the total amount handled on thoroughbred races at all satellite wagering facilities in these zones to be used for reimbursement for any costs of offsite stabling and vanning.

This bill would remove the requirement that the offsite stabling facility be at auxiliary facilities of licensed racing associations. This bill would also make technical, nonsubstantive changes.

Ch. 517 (SB 559) Wright. Vehicles: dealers.

Existing law regulates various activities of motor vehicle dealers, including prohibiting the delivery of a vehicle, following its sale, when the vehicle is to be operated on California highways, if the vehicle does not meet all of the equipment requirements provided by statute.

This bill would exclude the sale of a leased vehicle to the lessee from the prohibition if the lessee is in possession of the vehicle immediately prior to the time of the sale and the vehicle is registered in this state.

Ch. 518 (SB 663) Rosenthal. Insurance: receivership.

Under existing law, California has enacted and entered into the Interstate Life and Health Insurance Receivership Compact.

This bill would repeal the provisions enacting that compact.

Ch. 519 (SB 1385) Alpert. AIDS: testing: exposure notification.

(1) Existing law generally authorizes an exposed individual, as defined, who experiences a significant exposure to the blood or other potentially infectious materials, as defined, of a source patient, as defined, to be informed of the HIV status of that patient. Existing law authorizes an HIV test to be performed on any available blood or patient sample of the source patient (a) if the source patient or his or her legal authorized representative gives informed consent, (b) if the source patient or the authorized legal representative of the source patient refuses to consent after a documented effort has been made to obtain consent, or (c) if an attending physician of the source patient, as defined, is unable to contact the source patient or legal representative of the source patient after making a prescribed good faith effort. Existing law does not authorize an HIV test to be performed on any available blood or patient sample of a source patient, or on the source patient, if the source patient is incapacitated and therefore unable to provide informed consent and has no authorized legal representative. Existing law sets forth confidentiality and disclosure requirements.

Existing law provides that any health care provider or first responder, or any exposed individual, who willfully performs or permits the performance of an HIV test on a source patient, that results in harm, without adhering to prescribed procedures, is guilty of a misdemeanor.

This bill would authorize an HIV test to be performed on any available blood or patient sample of a source patient if the source patient is unable to provide informed consent under specified conditions. By changing the definition of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(2) Existing law provides that the blood or other potentially infectious material of a person receiving health care services that has been the source of a significant exposure to an individual may be tested and the exposed individual may be informed of the HIV status of that patient if certain conditions are met. Existing law provides that if this source patient refuses to consent to an HIV test after a documented effort has been made to obtain consent, then any "available blood or patient sample," as defined, of the source patient may be tested.

This bill would provide that if the informed consent of the source patient cannot be obtained because the source patient is deceased, consent to perform an HIV test on any blood or patient sample of the source patient legally obtained in the course of providing health care services at the time of the exposure event shall be deemed granted.

Ch. 520 (SB 1480) Kopp. Criminal procedure.

(1) Existing law permits the clerk, whether a court is sitting or not, to issue a bench warrant to one or more counties at any time after the order for a bench warrant is made. Existing law also provides that the clerk, judge, or justice shall require the appropriate agency to enter a bench warrant issued on a private surety-bonded felony case into the national warrant system.

This bill would provide that if the appropriate agency fails to enter the bench warrant into the national warrant system, and the court finds that this failure prevented the surety or bail agent from surrendering the fugitive into custody, prevented the fugitive from being arrested or taken into custody, or resulted in the fugitive's subsequent release from custody, the court having jurisdiction over the bail shall, upon petition, set aside the forfeiture of the bond and declare all liability on the bail bond to be exonerated.

(2) Existing law provides that the defendant shall not be released from custody on his or her own recognizance until the defendant files with the clerk of the court a signed release agreement that includes specified promises, agreements, and acknowledgments. Existing law also prohibits the release of any person on his or her own recognizance who is (A) arrested for a violent felony, until a hearing is held in open court before the magistrate or judge, and the prosecuting attorney is given notice and a reasonable opportunity to be heard on the matter; or (B) charged with a violent felony where it appears, by clear and convincing evidence, that he or she previously has been charged with a felony offense and has willfully and without excuse from the court failed to appear in court as required while that charge was pending.

This bill would, in addition, prohibit the release of any person on his or her own recognizance who is arrested for a new offense until a hearing is held in open court before the magistrate or judge, if the person (A) is currently on felony probation or felony parole, or (B) has failed to appear in court as ordered, resulting in a warrant being issued, 3 or more times over the 3 years preceding the current arrest, and is arrested for any felony offense or other specified crimes. By increasing the duties of court personnel, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 521 (SB 1654) Johnston. Health insurance: genetic information.

(1) Existing law prohibits health care service plans, multiple employer welfare arrangements, self-insured welfare benefit plans, and certain life and disability insurers from seeking information about a person's genetic characteristics, as defined, for any nontherapeutic purpose. These provisions are to be repealed no later than January 1, 2002.

This bill would extend the operation of these provisions indefinitely, except that the provision relating to multiple employer welfare arrangements would be repealed on January 1, 2001, at the same time as other provisions relating to these arrangements. The bill would also revise the definition of "genetic characteristics" for all of these purposes.

Because a violation of the provision governing health care service plans is a crime, this bill would impose a state-mandated local program by extending the operation of this provision.

(2) Existing law prohibits an insurer from requiring a test for the presence of a genetic characteristic for the purpose of determining insurability other than in accordance with certain informed consent and privacy protection provisions, as specified.

This bill would altogether prohibit an insurer from requiring a test for the presence of a genetic characteristic for the purpose of determining insurability except with respect to those policies that are contingent on review or testing for other diseases or medical conditions and only then if testing is in accordance with the informed consent and privacy protection provisions.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 522 (SB 1679) Kopp. Crimes.

(1) Existing law, operative until January 1, 1999, establishes a bad check diversion program that may be created within the office of the district attorney in a county that adopts the program. Existing law authorizes the district attorney to collect a fee of up to \$35, in addition to the actual amount of any bank charges incurred by the victim, if his or her office collects and processes a bad check. Under existing law, when a criminal complaint is filed in a bad check case after conviction if the maker of the check fails to comply with the terms of the bad check diversion program, the court is authorized to impose a fee for the collection and processing of a bad check by the district attorney of not more than \$25 in addition to the actual amount of any bank charges incurred by the victim, not to exceed \$1,000. Existing law also requires the Judicial Council to prepare and submit a report on the effect of this provision, as specified.

This bill would delete the operative date and repeal the provision that restores existing law.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 523 (SB 1951) Brulte. Health coverage: providers: advertising.

Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, willful violation of any of these provisions is a crime. Existing law also provides for the regulation of policies of disability insurance administered by the Insurance Commissioner.

This bill would make it unlawful for a contract between a health care provider and a health care service plan, a disability insurer, or any person or entity, including any group of physicians and surgeons, any medical group, any independent practice association (IPA), or any preferred provider organization (PPO) to contain provisions that prohibit, restrict, or limit the health care provider from advertising. Since the willful violation of the provisions relating to health care service plans is a crime, this bill would impose a state-mandated local program. The bill would also state that its provisions shall not be construed to prohibit reasonable guidelines in connection with specified regulated activities, or to impair or impede existing authority to regulate advertising, disclosure, or solicitation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 524 (SB 1965) Peace. Vocational rehabilitation services.

Existing law generally allows the parties in interest relative to a claim for workers' compensation to agree to a compromise settlement concerning any liability that is claimed to exist on account of injury or death, and allows the Workers' Compensation Appeals Board to commute the compensation payable to a worker to a lump sum under certain conditions. However, settlement or commutation is not permitted with respect to vocational rehabilitation services, except upon a finding by a workers' compensation referee that there are good faith issues that, if resolved against the employee, would defeat the employee's right to compensation.

This bill would also allow a settlement or commutation with respect to benefits for vocational rehabilitation services, other than prospective vocational rehabilitation services.

This bill would state that its provisions are declaratory of existing law.

Ch. 525 (SB 2028) McPherson. Fishing.

(1) Existing law requires any person who takes fish or amphibia for commercial purposes, as specified, to first obtain a commercial fishing license, permit, or other entitlement, issued by the Department of Fish and Game. Existing law imposes various conditions on the use of those licenses, permits, and entitlements.

This bill would make technical, nonsubstantive changes to those conditions. In addition, the bill would require a person who holds a commercial fishing vessel permit or other entitlement authorizing the use of a vessel for commercial fishing, to also hold a valid commercial boat registration for that vessel, as specified.

(2) Existing law requires a person to obtain a valid lobster permit prior to taking lobsters for commercial purposes. Existing law requires a lobster permit to contain all applicable regulations and requires the permit applicant to sign a statement that he or she has read, understands, and agrees to be bound by all of the terms of the permit.

This bill would delete both of those requirements.

(3) Existing law provides that, with respect to a limited entry fishery, an appeal of a denial of a late renewal application for a commercial permit to take, or of a waiver of any landing requirements, shall be reviewed and decided by the Director of Fish and Game. Under existing law, the director's decision may be appealed to the Fish and Game Commission.

This bill, instead, would provide that, with respect to a limited entry fishery, the appeal of a denial of a renewal application for a commercial permit, except for a permit to take herring, or the appeal of a denial for a waiver of any landing requirements, shall be reviewed and decided by the department. The bill would require the appeal to be received by the department or, if mailed, postmarked on or before March 31 following the permit year in which the applicant last held a valid permit for that fishery. The bill would allow the department's decision to be appealed to the commission.

Existing law also provides that a person whose application for a commercial salmon fishing vessel permit, a sea cucumber permit, or a finfish trap permit is denied, may appeal that denial to the commission within the time period specified for that permit.

This bill would delete those provisions.

(4) Existing law requires a person to obtain a valid drift gill net shark and swordfish permit prior to taking shark or swordfish for commercial purposes. Existing law provides for that permit to be issued to any prior permittee who possesses a valid drift gill net shark and swordfish permit or who possess an experimental swordfish permit, as specified, and who meets certain conditions. Under existing law, a drift gill net shark and swordfish permit may be transferred, as provided, only to a person who holds both a commercial fishing license and a general gill net permit.

This bill would make minor changes to the application process for a drift gill net shark and swordfish permit and would eliminate the ability of a person to obtain that permit based on his or her prior possession of an experimental swordfish permit. The bill would also eliminate the requirement that a permit transferee hold a commercial fishing license.

(5) Existing law requires a person to obtain a general trap permit prior to taking finfish, mollusks, or crustaceans with traps for commercial purposes. Existing law also requires a person to obtain a finfish trap permit prior to taking finfish in specified waters.

This bill would provide that a person who holds a finfish trap permit is not required to obtain or possess a valid general trap permit when taking finfish with traps.

(6) Under existing law, until April 1, 2002, Korean traps, as defined, and bucket traps, as specified, may only be used to take hagfish.

This bill would provide that, until April 1, 2002, not more than 500 Korean traps or 200 bucket traps may be possessed on board a vessel and in the water to take hagfish. The bill would also prohibit a person who holds a general trap permit from possessing both Korean traps and other types of traps aboard a vessel at the same time.

Because existing law would make a violation of the bill a crime, the bill would impose a state-mandated local program.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 526 (AB 2321) Knox. Preventing Parolee Crime Program.

Existing law authorizes the Department of Corrections to establish and maintain classes for inmates that provide academic education and industrial education, and trade and vocational training. The department is also authorized to develop and operate work programs to enable inmates to acquire and improve work habits and occupational skills, to assist inmates who have been paroled or discharged in securing employment, to establish a medical facility to provide care and treatment for male inmates who are addicted to controlled substances, and to establish community correctional centers to provide care and treatment for inmates who are addicted to drugs or alcohol.

This bill would require the Department of Corrections to operate the Preventing Parolee Crime Program, including residential and nonresidential multiservice centers, literacy labs, drug treatment networks, and job placement assistance for parolees. The bill would also authorize the parole authority to assign a conditionally released or paroled prisoner to the Preventing Parolee Crime Program in lieu of the revocation of parole. The bill would require the Department of Corrections, in consultation with the Legislative Analyst's office, to contract with an independent consultant, contingent upon funding, to conduct an evaluation regarding the impact of an expansion of the Preventing Parolee Crime Program to additional parole units on public safety, parolee recidivism, and prison and parole costs, and report the results to the Legislature on or before January 1, 2004.

The bill would require the Department of Corrections to develop and report, utilizing existing resources, to the Legislature by December 31, 2000, a plan, as specified, that would ensure by January 1, 2005, that all prisoners and parolees who are substance abusers receive appropriate treatment.

This bill would appropriate \$3,050,000 from the General Fund to the Department of Corrections for the purposes of expanding and evaluating the Preventing Parolee Crime Program, as specified.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 527 (AB 17) Cardoza. Pupil discipline.

Existing law provides for a maximum number of schooldays for which a pupil may be suspended from school in any school year.

This bill would provide that a school district may count suspensions that occur in any school district toward the maximum number of days for which a pupil may be suspended from school in any school year.

Ch. 528 (AB 1782) Strom-Martin. Property taxation: revenue allocations.

Existing property tax law reduces the amounts of ad valorem property tax revenue that are annually allocated in each county to the county, cities, and special districts by requiring, for purposes of determining property tax revenue allocations in each county for the 1992-93 and 1993-94 fiscal years, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance with certain formulas. It requires that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund in that county for allocation to school districts, community college districts, and the county office of education. Existing law modifies these reductions and transfer provisions by, among other means, decreasing a county's reduction and transfer amount, attributable in that county's designated fiscal year to the reduction and transfer amount determined for that county in the 1993-94 fiscal year, by the amount of increased allocations made in that designated fiscal year to certain educational entities as a result of the county having first adopted for that fiscal

year a specified alternative method for the distribution of ad valorem property tax revenues.

This bill would provide that if a decrease described above is not applied to the relevant county's benefit in that county's designated fiscal year, it may not be so applied in a subsequent fiscal year.

Existing property tax law authorizes a county to adopt a specified alternative procedure, for the distribution of ad valorem property tax levies made on the secured property tax roll, by means of a resolution of the board of supervisors of that county that is adopted no later than July 15 of the fiscal year for which that alternative procedure is to first apply. Existing property tax law declares the intent of the Legislature to provide this alternative procedure, and that the object of this alternative procedure is to simplify the levying and apportionment process and to increase local flexibility in the use of available cash.

This bill would, for purposes of this alternative procedure only, provide that the term "secured roll" may include the supplemental tax roll as set forth in specified statutory provisions. This bill would also make technical, nonsubstantive changes to legislative declarations with respect to this alternative procedure.

Ch. 529 (AB 2049) Firestone. Validating proceedings.

Existing law permits a public agency, or, where the public agency fails to act, any interested person, to bring an action in the superior court to determine the validity of certain government actions or obligations. Jurisdiction in these matters is established by publication of a summons in a newspaper of general circulation designated by the court, in the county where the action is pending, within the boundaries of the public agency, and in other counties as ordered by the court.

Existing law sets forth the contents of the summons and requires that the summons contain a notice to all persons interested in the matter to appear and answer the complaint not later than the date specified in the summons.

This bill would revise the notice contained in the summons to inform persons interested in the matter that they may contest the legality or validity of the matter by appearing and filing a written answer to the complaint, as specified. This bill would also require the summons to contain a detailed summary of the matter the public agency or other person seeks to validate, and would require the summons to state that persons who contest the legality or validity of the matter will not be subject to punitive action.

Ch. 530 (AB 2096) Margett. Veterans: Cal-Vet loans.

(1) Existing law provides for farm and home purchase benefits for qualifying veterans under the Veterans' Farm and Home Purchase Act of 1974, and subsequent acts. For these purposes, existing law requires the purchaser to make an initial payment of at least 5% of the selling price of the property and, where the purchase price is equal to or less than \$60,000, existing law requires the purchaser to make an initial payment of at least 3% of the selling price of the property.

This bill instead would require the purchaser of the property to make an initial payment of at least 2% of the selling price of the property.

(2) Existing law authorizes the Department of Veterans Affairs to waive the initial payment in any case where the value of the property, as determined by the department appraisal, equals the amount to be paid by the department plus at least 5% where the purchase price is greater than \$60,000. In addition, existing law authorizes the department, in the case of homes where the purchase price is equal to or less than \$60,000, to waive the initial payment where the appraised value of the property equals the amount to be paid by the department plus at least 3%.

This bill instead would authorize the department to waive the initial payment in any case where the value of the property, as determined by the department from an appraisal, equals the amount to be paid by the department plus at least 5%. In addition, the bill would require the purchaser, in the case of a purchase requiring a loan guaranty by the United States Department of Veterans Affairs, to pay the loan guaranty fee, which may be added to the loan amount. The bill also would authorize the department to require the purchaser to pay a loan origination fee, not to exceed 1% of the loan amount, which also may be added to the loan amount.

The bill would also require the department, when a purchaser makes an initial payment of less than 20% of the selling price of the property, to take prudent measures to minimize losses from loan defaults and loan delinquencies and to charge fees to cover the costs, as determined by the department, of any loan guaranty, primary mortgage insurance, or other similar arrangement. The bill would authorize the fees to be included in the amount of the loan, collected in advance, or collected as part of the monthly payment.

(3) Existing law requires the department to fix the selling price of a property, when selling the property to a veteran, by adding to the purchase price of the property all expenses incurred and estimated to be incurred by the department in relation to the property.

This bill would authorize, instead of require, the department to add those costs to the selling price.

(4) Existing law makes the department the sole judge of certain matters relating to the department's sale of property to veterans, including the legality or validity of taxes, assessments, charges, or encumbrances, and the amount necessary to be paid in satisfaction or discharge thereof.

This bill would make the department the sole judge of the legality or validity of insurance premiums and guaranty fees, and the amount necessary to be paid in satisfaction or discharge thereof. The bill would also make the department the sole judge of the amount of loan insurance or guaranty to be placed upon the veteran's liability for repayment of the veteran's real estate contract and the amount necessary to be paid by the veteran or the department for the premiums or fees for that insurance or guaranty.

(5) Existing law requires the department, relating to specified debentures, to establish, fix, and collect interest, at a rate sufficient to pay and provide for, among other things, an additional aggregate sum as may be provided in any resolution of issuance, as specified.

This bill would authorize those rates to be either fixed or variable interest rates. In addition, the bill would delete the provision specified above that requires the department to establish, fix, and collect interest, at a rate sufficient to pay and provide for an additional aggregate sum as may be provided in any resolution of issuance, as specified.

(6) Existing law authorizes the department to issue refunding debentures in a principal amount sufficient to pay other, outstanding debentures and any expenses incidental to the calling, retiring, or paying of the outstanding debentures.

This bill, additionally, would authorize the department to issue refunding debentures to pay outstanding obligations issued by the state to finance programs of the department.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 531 (AB 2440) Oller. Wildlife: game animals.

(1) Under existing law, it is unlawful to possess birds, mammals, fish, reptiles, or amphibia except during the open season where taken and for 10 days thereafter, except as specified. Existing law prescribes the maximum bag and possession limit of birds, mammals, fish, and amphibia that may be lawfully taken and possessed by an individual during a specified time period. Existing law provides that not more than one daily bag limit may be possessed during the period after the close of the open season.

This bill, instead, would provide that for fish, reptiles, and amphibia, not more than the possession limit may be possessed during the period after the close of the open season. The bill would make it unlawful to possess game birds or mammals except during the open season, or except as provided in the bill. Under the bill, the possession limit of any game bird or mammal may be possessed after the open season if the person possessing the meat holds a hunting license and a validated license tag or tags, as specified, or the person was given the meat by a person who holds a hunting license and a validated license tag or tags, and the meat recipient has documentation to that effect, as specified.

By changing the definition of a crime, the bill would create a state-mandated local program.

(2) Existing law makes it unlawful to possess deer, elk, bear, or antelope meat 15 days after the open season, unless the poultry or meat is tagged or marked pursuant to

regulations adopted by the Fish and Game Commission or the poultry or meat is held pursuant to a storage permit issued by the Department of Fish and Game.

This bill would repeal those provisions.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 532 (AB 2487) Oller. Hazardous waste treatment: used fuel filters.

Existing law defines the term "treatment," for purposes of the hazardous waste control laws, as meaning any method, technique, or process that is designed to change the physical, chemical, or biological character or composition of any hazardous waste or that removes or reduces its harmful properties.

This bill would provide that the draining of used fuel filters is not treatment for purposes of the hazardous waste control laws, notwithstanding the hazardous waste control laws and regulations, if specified requirements are met regarding the management of the drained fuel, the housing for the filter, and the drained filter medium.

Ch. 533 (AB 2647) Pacheco. School district employees: notice of intent to remain in service.

Existing law deems a probationary or permanent employee of a school district to have declined employment and permits his or her services to be terminated on June 30 of any year in which the employee fails, without good cause, to notify the governing board of the district prior to July 1 of his or her intention to remain or not to remain in the service of the district, if the district requested that notice, as prescribed, by May 30 of that year.

This bill would, for employees of a year-round school in positions requiring certification qualifications, permit termination if the employee does not notify the district prior to June 1 if the district requested this notice by April 30 of that year.

Ch. 534 (AB 2716) Martinez. Telecommunications: area codes.

(1) Existing law requires a telephone corporation that proposes to establish a new area code to provide specified notices. Existing federal law provides for a coordinator for California area code relief.

This bill would provide for a process for the coordinator and providers, as specified, to develop an area code relief plan, and would require providers to give specified notices.

(2) Existing law requires a telephone corporation that establishes a new area code to provide a transitional dialing period of at least 6 months during which a number in a new area code may be reached by dialing either the old area code or the new area code.

This bill would delete the 6-month transitional dialing period, and would instead require a provider that opens a new area code to provide a transitional dialing period with no time limit specified. The bill would require a provider, if prefix codes are available, subsequent to a transitional dialing period, to permit a caller, without charge, to reach a recorded announcement that would inform the caller of the new area code when the existing area code is dialed. The bill would make the law requiring a transitional dialing period, and the recorded announcement subsequent to the transitional dialing period if prefix codes are available, inoperative if an authorized federal or state agency orders mandatory 10-digit dialing. The bill would permit the commission to order a transitional dialing period or recorded announcement when a new area code plan requires 10-digit dialing.

Because, under existing law, a violation of those provisions would be a crime, the bill would impose a state-mandated local program by creating a new crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 535 (AB 2756) Committee on Agriculture. Purchasing delegation program: district agricultural associations.

Existing law requires the Department of General Services to prepare annually a purchasing delegation program for district agricultural associations, to be administered by the Department of Food and Agriculture and the Department of General Services. Existing law prohibits purchases made pursuant to the program from exceeding \$15,000.

This bill would eliminate the restriction on the dollar amount of purchases made pursuant to the program and would also require the Division of Fairs and Expositions in the Department of Food and Agriculture, as part of its annual expenditure review and approval process, to provide information on the program to the Joint Committee on Fairs Allocation and Classification, as prescribed.

Ch. 536 (SB 86) Monteith. Education: home-to-school transportation.

Existing law requires each school district or any county office of education to receive a home-to-school transportation allowance equal to the transportation allowance received in the prior fiscal year, as specified. Existing law entitles each county unified school district that is governed by the county board of education that meets 3 specific requirements to receive an additional apportionment of \$350,000 for the 1993-94 and 1994-95 fiscal years, and each fiscal year thereafter, for home-to-school transportation. Existing law requires each educational entity that receives that additional apportionment to report by September 1, 1995, to the Legislature and the Legislative Analyst, as specified.

Existing law provides that if, in any fiscal year, a county unified school district operates a necessary small school that it did not operate in the 1994-95 fiscal year, that district would not be eligible to receive those funds in that fiscal year or in any subsequent fiscal year. Existing law also causes the provision authorizing that additional apportionment to become inoperative if a later enacted act increases the limit on the number of units of average daily attendance that a county unified school district may have to be designated as a small school for specified apportionments.

Existing law requires each educational entity that receives the additional apportionment to report by September 1 of each year to the Legislature and the Legislative Analyst, as specified.

Existing law provides that the provisions described above become inoperative July 1, 1999, and are repealed as of January 1, 2000.

This bill would delete the reference to specified requirements of the report due under these provisions on September 1, 1995.

This bill would delete the requirement that these provisions become inoperative on July 1, 1999, and be repealed on January 1, 2000, therefore extending indefinitely the operation of these provisions.

Ch. 537 (SB 120) Committee on Local Government. Validations.

This bill would enact the Third Validating Act of 1998, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

Ch. 538 (SB 1381) Committee on Local Government. Validations.

This bill would enact the Second Validating Act of 1998, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 539 (SB 1439) Brulte. Financial institutions: credit unions.

Existing law provides for the regulation of credit unions by the Commissioner of Financial Institutions. Existing law, among other things, prescribes certain requirements with respect to financial examinations of credit unions, charges and assessments imposed on credit unions to defray certain administrative costs, and the operation and management of credit unions. Existing law also establishes the California Credit Union Share Guaranty Corporation to, among other things, guaranty payment of all shares issued by participating credit unions, subject to certain limitations.

This bill would revise and recast certain of those requirements and would repeal the California Credit Union Share Guaranty Corporation.

Ch. 540 (SB 1707) Rainey. Safekeeping of property.

Existing law requires the delivery of lost or unclaimed property having a value of \$100 or more to the police or sheriff's department, which is required to restore the property to the owner if he or she claims the property within 90 days.

Existing law requires, when property is taken from an arrested defendant, the officer taking it to, at that time, give duplicate receipts therefor, one for the defendant and one for the clerk of the court to which the depositions and statement are to be sent.

This bill would require, when a public agency obtains possession of personal property from a person for temporary safekeeping, the public agency to take responsibility for the storage, documentation, and disposition of the property and provide the person from whom the property was taken with a receipt and instructions for the retrieval of the property, as specified. The bill would also require the public agency to make reasonable efforts to contact the owner if the public agency has knowledge that the person from whom the property was taken is not the owner, and, if the owner is identified, to send to the owner, by first-class mail, a receipt and instructions for retrieval of the property. The bill would provide that the receipt and instructions are to notify the person that the property must be claimed within 60 days after the public agency obtains possession or the property will be disposed of, as specified, unless the person notifies the public agency in writing that he or she is in custody and unable to retrieve the property within 60 days, or have an authorized person retrieve the property, resulting in the public agency holding the property for not longer than 10 additional months.

This bill would impose a state-mandated local program by requiring new duties of local public agencies.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 541 (SB 1817) Johnston. Workers' compensation: work experience education.

Existing law considers any school district, county superintendent of schools, or school administered by the State Department of Education, that supervises a setting including work experience education, cooperative vocational education, community classroom, job shadowing experience, registered student apprenticeship, as defined, to be the employer of persons receiving the training for the purpose of workers' compensation law unless the person is being paid a cash wage or salary by a private employer.

Existing law, however, makes this requirement applicable in the case of a registered student apprentice when the educational agency elects to provide workers' compensation insurance.

This bill would provide that the educational agency may elect to provide workers' compensation coverage in the case of students being paid a cash wage or salary by a private employer in supervised work experience education or cooperative vocational education, for a transitional period not to exceed 3 months, or in the case of a registered student apprentice.

Ch. 542 (SB 2095) Polanco. Mobilehome parks.

(1) Existing law prohibits management from terminating or refusing to renew a tenancy, except for specified reasons and upon the giving of a prescribed written notice.

This bill would require the resident of a mobilehome that remains in the mobilehome park after service of this notice to continue to be subject to the Mobilehome Residency Law and the rules and regulations of the park. It would also provide that no lawful act

by the management to enforce the law or rules and regulations may be deemed or construed to waive or otherwise affect the notice to remove the mobilehome.

(2) Under existing law, legal owners and holders of junior liens against mobilehomes in mobilehome parks may sell the mobilehome within the park to a third party and keep the mobilehome on the site within the park until it is sold only if specified requirements are met. Existing law provides that, if these requirements are not met and the management of the park either removes the mobilehome from the premises and places it in storage or stores it on its site, the management shall have a warehouseman's lien against the mobilehome for specified costs.

This bill would similarly provide that if a registered owner of a mobilehome that is not encumbered by a lien, either held by a legal owner or a junior lienholder, fails to comply with a notice of termination and is either legally evicted or vacates the premises, the management may either remove the mobilehome from the premises and place it in storage, or store it on its site, in which case the management has a warehouseman's lien. It also would provide that a warehouseman's lien established pursuant to these provisions may be enforced after the date of judgment in an unlawful detainer action or after the date the mobilehome is vacated, whichever occurs earlier.

This bill would also require, upon completion of any sale to enforce this lien, the management to provide the purchaser at the sale with evidence of the sale, as specified by the Department of Housing and Community Development. This bill would require the department, upon request of the purchaser of the mobilehome, to register title to the mobilehome to the purchaser.

(3) Existing law provides that a manufactured home or mobilehome may be installed on a foundation system as either a fixture or improvement to the real property or installed on a foundation system as a chattel. Existing law requires a dealer of a new or used manufactured home to execute each sale in writing with the buyer's signature, provide a statement of fact, as specified, and establish an escrow account with an escrow agent. Existing law requires the escrow instructions for a sale by a dealer of a new manufactured home or mobilehome to provide specified information. Existing law requires the escrow instructions for a sale by a dealer of a new or used manufactured home or mobilehome that is subject to a specified inspection and for which the issuance of a document certifying or approving occupancy is conditioned upon a specified payment to provide that the payment be made to the appropriate school district upon the close of escrow.

This bill would limit the applicability of these sale requirements to a manufactured home or mobilehome installed on a foundation system as a fixture or improvement to the real property.

Ch. 543 (SB 2141) O'Connell. Radiation: nuclear powerplants.

(1) Under existing law, the Office of Emergency Services is required to coordinate the activities of all state agencies relating to preparation and implementation of the state nuclear powerplant emergency response plan and perform other related duties, and the State Department of Health Services is required to have the lead technical role in the ingestion pathway and recovery and emergency phases of a nuclear powerplant emergency. The department is required to maintain a radiation emergency screening team, which is required to be available for immediate response, and to maintain guidelines for the designation of medical facilities that are required to have specified capabilities.

Existing law requires local governments and nuclear facility operators to develop and maintain radiological emergency response and preparedness plans and to take other specified actions, and requires entities providing utilities to take specified actions, including sharing responsibility for nuclear powerplant emergency response with appropriate state and local jurisdictions.

This bill would extensively revise and recast those provisions and would revise the duties of the agencies and governments specified above. Specifically, the bill would require the office, if there is a nuclear powerplant accident, to coordinate information and resources to support local governments in a joint state and local government decisionmaking process, and would require the office, in consultation with the department, to review protective action recommendations developed by the utilities

and local government representatives. The bill would require the department to have the lead technical role during the ingestion pathway and recovery phases, to define and maintain a radiological advisory team, and to maintain a list of medical facilities that meet statewide guidelines.

The bill would require local governments to develop and maintain radiological emergency preparedness and response plans to safeguard the public in the emergency planning zone around a nuclear powerplant and to take specified actions within that zone. The bill would require utilities to take specified actions, including developing and maintaining radiological emergency preparedness and response plans in coordination with state and local governments and to coordinate with state and local governments in maintaining nuclear powerplant education information.

The bill would create a state-mandated local program by imposing new duties upon local governments.

(2) Existing law requires the Public Utilities Commission to develop an equitable method of assessing utilities operating nuclear powerplants for their reasonable pro rata share of state agency costs. Existing law requires utilities to pay the actual or anticipated state and local agency costs to the Controller. Existing law authorizes the expenditure of these funds in the Nuclear Planning Assessment Special Account, upon appropriation by the Legislature, for purposes of the Radiation Protection Act of 1993, as specified. Under existing law, the amounts available for reimbursement of state and local costs are cumulated biennially, as specified.

This bill would instead require the annual disbursement for state costs to not exceed the lesser of the actual costs or the maximum funding levels established by the previous law. The bill would specify the amounts to be disbursed to the office and the department and would require any unexpended funds from a year when the state and local government exercises are not evaluated by the Federal Emergency Management Agency to be carried over to the year when the exercises are evaluated. The bill would authorize advance allocations for certain anticipated local expenses, as specified.

The bill would make this funding provision inoperative on July 1, 2009, and, would repeal the provision on January 1, 2010.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions. The bill would also require that the amount of any such reimbursement be repaid to the State Mandates Claims Fund from the Nuclear Planning Assessment Special Account, as specified.

Ch. 544 (AB 2730) Mazzoni. Teacher credentialing.

Existing law establishes the Commission on Teacher Credentialing (commission) to, among other things, establish standards for the issuance and renewal of credentials. Existing law establishes the Committee on Accreditation (committee) to, among other things, make decisions about the accreditation of educator preparation.

This bill would require the commission, together with the committee, to establish a 3-year accreditation pilot project to improve accreditation review of nontraditional teacher preparation programs. The bill would require the commission and the committee to report to the Legislature on the results of the pilot project and to assess and report upon any instance where an institution of higher education participating in the pilot project terminates or closes a teacher preparation program or location that the institution initiated.

This bill would appropriate \$300,000 to the commission from the Teacher Credential Fund, for purposes of operating the accreditation pilot project.

This bill would make its provisions inoperative on June 15, 2002, and would repeal them on January 1, 2003.

Ch. 545 (AB 496) Lempert. California Mathematics Initiative for Teaching.

(1) Existing law requires the Commission on Teacher Credentialing to establish professional standards, assessments, and examinations for entry and advancement in the education profession. Existing law authorizes the governing board of any school district to establish a staff development project to improve teachers' instructional skills, as specified. Existing law also authorizes school districts to develop school development plans that include staff development activities directly related to annual school improvement objectives, as specified, and, among other things, to assist personnel to improve instructional practices in each subject and strengthen knowledge of subject matter. Existing law, the Classroom Teacher Instructional Improvement Program, authorizes the governing board of a school district to apply to the Superintendent of Public Instruction for funds to provide grants to teachers or groups of teachers to improve the quality of instruction in those areas with the greatest need. Existing law, the Teacher Reading Instruction Development Program, requires a school district, in order to be eligible for funds under the program, to certify to the State Department of Education that not less than 90% of its certificated employees who provide direct instructional services to pupils enrolled in kindergarten or any of grades 1 to 3, inclusive, have received in-service training in reading instruction that addresses specified issues.

This bill would establish the California Mathematics Initiative for Teaching for the purpose of increasing the number of teachers who are competent and certificated to teach mathematics in schools. The Commission on Teacher Credentialing would administer the California Mathematics Initiative for Teaching and award grants to school districts and county superintendents of schools. The bill would require the Commission on Teacher Credentialing to establish standards for supplementary authorizations in mathematics and to develop criteria under which school districts and county superintendents of schools would distribute financial assistance to teachers and prospective teachers to assist them to meet teaching credential standards. Participating teachers would be required to teach mathematics for 1 year in a public school for each \$2,500 of financial assistance received.

(2) The existing Assumption Program of Loans for Education authorizes the Student Aid Commission to issue up to 500 conditional warrants for loan assumption to applicants who, among other things, agree to teach in a public school in the state for at least 3 consecutive academic years after obtaining a teaching credential. The program includes various provisions setting forth the qualifications for eligibility for participation in the program.

This bill would provide that, notwithstanding this provision, the Student Aid Commission shall annually distribute a minimum of 2,000 awards to applicants who agree to obtain a teaching credential in mathematics or science.

(3) Under the existing Assumption Program of Loans for Education, beginning no later than the 1986-87 school year, and each school year thereafter, the Student Aid Commission is required to issue warrants for the assumption of up to 500 student loans for eligible program participants.

This bill would instead require that, beginning no later than the 1998-99 school year, and each school year thereafter, the Student Aid Commission issue warrants for the assumption of up to 4,500 student loans for eligible program participants.

(4) The bill would appropriate \$1,580,000 from the General Fund to the Commission on Teacher Credentialing for purposes of awarding grants pursuant to the California Mathematics Initiative for Teaching and administering that program. To the extent that the funds appropriated by this bill are allocated to a school district or a community college district, those funds would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution. The bill would state the intent of the Legislature to continue to fund the California Mathematics Initiative for Teaching through the 2003-04 fiscal year.

Ch. 546 (AB 2528) Ducheny. California State Work-Study Program: job placement.

Existing law establishes the California Work-Study Program, administered by the Student Aid Commission, to provide eligible college and university students with the opportunity to earn money to help defray their educational costs, while gaining

experience in educationally beneficial or career-related employment. Existing law requires various priorities to be followed at the time of job referral and placement, including, among other things, the inclusion in the program of work-study positions with school districts to provide tutorial and other educational services for pupils, except for those participating institutions in which this type of placement would be geographically unfeasible.

The bill would establish the Teaching Intern Program within the California Work-Study Program whereby work-study funding would be available, subject to funds being appropriated for that purpose, to offer tutorial instruction to pupils, and would require priority to be given to work-study positions for this purpose.

The bill would provide that the program would not become operative unless an appropriation is made for its purposes in the Budget Act of 1998.

Ch. 547 (AB 1620) Scott. Education: teacher credentialing.

(1) Under existing law, the Commission on Teacher Credentialing (commission) is required to establish standards for the profession and to issue teaching credentials. Under existing law, the commission may issue a teaching credential to a person who possesses a baccalaureate or higher degree in professional education from an approved institution in another state if the person meets certain criteria.

This bill would delete this provision. This bill would establish alternative standards and procedures for the issuance of teaching credentials to applicants from other states, depending on their levels of experience and education.

This bill would require the commission to conduct periodic reviews, beginning in 1998, to determine whether any state has established teacher preparation standards that are at least comparable and equivalent to teacher preparation standards in California, and to initiate negotiations to provide reciprocity in teacher credentialing if this determination is made. The bill would require the commission to issue an equivalent teaching credential, permit, or certificate to an applicant holding or qualifying for a teaching credential, permit, or certificate awarded by a state that has entered into a reciprocity agreement with the commission. The bill would also require the commission to grant an appropriate credential to any applicant from another state who has completed teacher preparation that is at least comparable and equivalent to preparation that meets teacher preparation standards in California if a reciprocity agreement with the other state is pending completion, or if the other state has declined to enter into a reciprocity agreement with California and the applicant has met the requirements of California for teacher fitness.

(2) Existing law requires out-of-state applicants for a clear multiple or single subject teaching credential to meet certain requirements, including a 5th year of study. Under existing law, the minimum requirements for a professional multiple or single subject teaching credential include completion of an approved 5th-year program.

This bill would provide, notwithstanding these or other provisions of law, that an applicant who holds a valid teaching credential from a state other than California, and who has met, at a minimum, every requirement for a California professional multiple or single subject credential except the requirement of completion of a 5th year of study, may be issued an appropriate credential if certain conditions are met. The bill would require the commission to issue a 5-year preliminary specialist instruction credential authorizing instruction of pupils with disabilities to an applicant who holds a valid credential from another state and fulfills other criteria, and to issue a professional clear instruction credential to any applicant who fulfills the requirements for a professional clear Level II Education Specialist Instruction Credential.

(3) Existing law prohibits a school district governing board from initially hiring a certificated person unless that person has demonstrated basic skills or is exempted from the requirement. Under existing law, a school district may hire a teacher credentialed in another state who has not taken the state basic skills test if the school district governing board certifies that no qualified person is available. Existing law requires the board to include certain information in the certification and to submit the certification to the commission, and requires the commission to issue an emergency credential when the certification is received.

This bill would delete these provisions.

(4) The bill would appropriate \$90,000 from the Teacher Credentials Fund for the 1998–99 fiscal year for expenditure by the commission for the purpose of conducting the initial review to determine whether any state has established teacher preparation standards that meet or exceed teacher preparation standards in California.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 548 (SB 2042) Alpert. Teacher credentialing.

(1) Existing law prescribes the minimum requirements for the preliminary multiple or single subject teaching credential, including completion of a program of not more than one year of professional preparation that has been approved or accredited.

This bill would require the Commission on Teacher Credentialing to encourage accredited institutions to offer undergraduate minors in education and special education. The bill would require satisfactory completion of a program of professional preparation that has been accredited by the committee on accreditation on the basis of standards of program quality and effectiveness that have been adopted by the Commission on Teacher Credentialing. Subject to the availability of funds in the annual Budget Act for this purpose, the bill would require each program to include a teaching performance assessment which is aligned with the California Standards for the Teaching Profession. The bill would require the Commission on Teacher Credentialing to ensure that each candidate recommended for a credential or certificate has demonstrated satisfactory ability to assist pupils to meet or exceed state content and performance standards for pupils. The bill would provide that programs that meet the requirement for professional preparation shall include integrated programs of subject matter preparation and professional preparation, postbaccalaureate programs of professional preparation, and internship programs of professional preparation.

(2) Existing law requires completion of designated studies for the professional multiple or single subject teaching credential.

This bill would require possession of a valid preliminary teaching credential, possession of a valid equivalent credential or certificate, or completion of equivalent requirements, and subject to the availability of funding in the annual Budget Act, completion of a program of beginning teacher induction for the professional clear multiple or single subject teaching credential.

The bill would require the Commission on Teacher Credentialing to grant teaching credentials based on the requirements for those credentials that were in effect on December 31, 1998, to candidates who were in the process of meeting those requirements for teaching credentials before the effective date of the commission's implementation of this provision.

(3) Existing law requires the Commission on Teacher Credentialing to review the requirements for earning and renewing multiple and single subject teaching credentials with special references to the findings, conclusions, and recommendations of the report on alternative routes to teacher certification and of the pilot study of alternative methods of new teacher support and assessment.

This bill would repeal this provision.

(4) Existing law, known as the Beginning Teacher Support and Assessment System, has as its purpose the provision of an effective transition into a teaching career for 1st-year and 2nd-year teachers in California through, among other things, the provision of intensive individualized support and assistance to each beginning teacher and the establishment of performance assessments.

This bill would redesignate that system as the Marian Bergeson Beginning Teacher Support and Assessment System.

(5) Existing law sets forth the minimum requirements for maintaining the validity of the clear multiple or single subject teaching credential, including, among other things, successful service as a classroom teacher and completion of an individual program of professional growth, and completion of an approved fifth-year program after completion of a baccalaureate degree at an accredited institution. Existing law requires an individual program of professional growth to consist of a minimum of 150 clock hours of participation in activities, as specified.

This bill would additionally require the participation in activities that are aligned with the California Standards for the Teaching Profession and the standards of pupil

performance. The bill would require the Commission on Teacher Credentialing to eliminate the requirement of completing an approved fifth-year program for any candidate who has completed an induction program that has been approved for the professional clear credential pursuant to specified provisions.

Ch. 549 (SB 469) Rainey. Murder: jurisdiction: special circumstance.

Under existing law, the jurisdiction of a criminal action for murder or manslaughter is in the county where the fatal injury was inflicted, in the county in which the injured party died, or in the county in which his or her body was found. Existing law also provides that an accusatory pleading may charge two or more different offenses connected together in their commission.

This bill would require that where a person is charged with a special circumstance involving multiple murders, the jurisdiction for any charged murder, and any crimes joinable with that murder, shall be in any county that has jurisdiction under existing law for one or more of the murders charged in a single complaint or indictment, as long as the charged murders are "connected together in their commission," as that phrase is used under the provision of existing law described above. The bill would also require that if the charged murders are not joined or consolidated, the charged murder that is being heard outside of the county that has jurisdiction be returned to that county pursuant to existing law.

Ch. 550 (AB 2799) Olberg. Sex offenders.

Existing law requires the Department of Justice to provide a CD-ROM or other electronic medium containing specified information regarding persons required to register as sex offenders, and to distribute the CD-ROM or other electronic medium to certain law enforcement agencies on a quarterly basis.

This bill would require the department to update and distribute the CD-ROM on a monthly basis.

Existing law prohibits returning an inmate who is released on parole to a location within 35 miles of the actual residence of a victim of, or a witness to, any specified violent felony or a felony in which the defendant inflicts great bodily injury on any person other than an accomplice, if the victim or witness has requested additional distance in the placement of the inmate on parole, and if the Board of Prison Terms or the Department of Corrections finds that there is a need to protect the life, safety, or well-being of a victim or witness.

This bill would prohibit any person released on parole after having served a term of imprisonment in state prison for an offense requiring registration as a sex offender, from living in a single family dwelling, as defined, with any other person also required to register as a sex offender during the period of parole, unless those persons are related by blood, marriage, or adoption.

Ch. 551 (AB 2649) Figueroa. Corrections: detainees: prohibited employment.

Under existing law, persons detained in local jails, juvenile detention centers, and state prison facilities may be ordered or assigned to perform certain kinds of employment.

This bill would prohibit these persons from performing functions that provide access to personal information including, but not limited to, social security numbers, addresses, driver's license numbers, credit card numbers, or telephone numbers of private individuals, if that person has been convicted of, or adjudicated to have committed, certain offenses. The bill also would require any person confined in a county jail, industrial farm, road camp, or city jail, or who is a prison inmate or ward of the juvenile court or the Department of the Youth Authority, and who has access to any personal information, to disclose that fact before taking any personal information from anyone. The bill would require that any program involving the taking of personal information over the telephone by a ward of the court or the Department of the Youth Authority, be subject to random monitoring of those telephone calls, and provide supervision of the wards' activities. The bill would also exempt from its provisions, inmates and wards in employment programs or public service facilities where incidental contact with personal information may occur.

Ch. 552 (AB 2055) Gallegos. Land use: sexually oriented businesses.

Existing law authorizes the legislative body of any city or county to adopt ordinances to regulate the use of land within its jurisdiction and includes a specific authorization to regulate, pursuant to a content neutral zoning ordinance, the time, place, and manner of operation of sexually oriented businesses, as defined. Existing law authorizes the legislative body of a city or county to rely on the experiences of other counties and cities and on the findings of court cases in establishing the reasonableness of the ordinance and its relevance to the specific problems it addresses, including the harmful secondary effects the business may have on the community and its proximity to churches, schools, residences, establishments dispensing alcohol, and other sexually oriented businesses.

This bill would provide that the legislative body of a city or county regulating adult or sexually oriented businesses or similar businesses may consider any harmful secondary effects such a business may have on adjacent cities and counties and its proximity to churches, schools, residents, and other businesses located in adjacent cities or counties.

Ch. 553 (AB 123) Wildman. Respiratory care practitioners.

(1) Existing law, known as the Respiratory Care Practice Act, provides that, subject to certain disclosure limitations, members of the examining committee of the Respiratory Care Board, or respiratory practitioners or investigators working on their behalf, may inspect or require reports from hospitals and other facilities providing respiratory care, and from the respiratory care staff therein, concerning the care, treatment, services, and facilities provided therein, and may inspect patient records with respect to respiratory care.

This bill would provide that the board, or practitioners, investigators, or enforcement staff appointed by the board, may make those inspections and may additionally inspect or require reports concerning the employment of staff providing respiratory care, treatment, or services. The bill would authorize these persons to inspect employment records relevant to an official investigation upon submission of a written request specifying the portion of the records to be inspected. This bill would also remove certain restrictions against disclosure, as specified.

(2) Existing law requires the board to develop and implement rules and regulations for continuing education of respiratory care licensees, not to exceed 15 hours of continuing education every 2 years.

This bill would instead provide for continuing education not to exceed 30 hours every 2 years, and would require licensees, upon renewal of a license, to submit proof of completion of continuing education requirements to the board, as specified.

(3) Existing law authorizes the board to order the suspension or revocation of, or the imposition of probationary conditions upon, a licensee for any of certain specified causes.

This bill would specify as additional causes, incompetence in the licensee's practice, and a pattern of substandard care.

(4) Existing law authorizes the Respiratory Care Board to take disciplinary action against licensed practitioners.

This bill would require employers of respiratory care practitioners to report the suspension or termination of practitioners for cause, as defined. This bill would subject an employer who fails to submit this information to an administrative fine, as specified. Since the moneys derived from the assessment of the fine would be deposited into the Respiratory Care Fund, which is continuously appropriated, the bill would make an appropriation.

This bill would require licensees with knowledge that another person has violated any law or regulations administered by the board to report this information to the board in writing and to cooperate with the board by providing further information or assistance as may be required. This bill would also provide for civil immunity under a specified provision of law in connection with the making of any report required under these provisions.

This bill would require employers to report to the board the name and other information concerning the supervisor of a licensee suspended or terminated for cause, and would require the board, if the supervisor is also a licensee under these provisions, to investigate whether due care was exercised by the supervisor. It would require the employer to report this information about the supervisor to the appropriate licensing

board if the supervisor is, instead, a health professional licensed by another licensing board. By adding these new requirements to the Respiratory Care Practice Act for employers of respiratory care practitioners, this bill would expand the scope of an existing crime applicable to the violation of any provision of the Respiratory Care Practice Act, thereby imposing a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 554 (SB 7) Kopp. Elections: voting.

Under existing law, any voter using an absentee ballot may, prior to the close of the polls on election day, vote the ballot at the office of the elections official.

This bill would, for these purposes, permit the office of an elections official to include satellite locations. The bill would specify notice requirements regarding the location and hours of operation of the satellite locations. This bill would also permit absentee ballots to be voted at a satellite location.

Existing law makes it a misdemeanor for any person on election day to perform specified actions within 100 feet of a polling place.

This bill would impose a state-mandated local program by making it a misdemeanor for any person to take those actions on election day, or at any time that a voter may be casting a ballot, within 100 feet of a polling place or an elections official's office.

Existing law provides that, after the close of the period for requesting absent voter ballots by mail, any voter who is unable to go to the polls because of illness, disability, or physical handicap, as specified, may request in a written statement, signed under penalty of perjury, that a ballot be delivered to him or her.

This bill would provide that the above written statement may not be required if the absent voter ballot is completed in the office of the elections official at the time of the request.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 555 (SB 1734) Johnston. High-tech crimes.

(1) Existing law provides for the forfeiture of certain electronic equipment upon a judicial finding that this equipment was used in the commission of specified crimes.

This bill would clarify that these provisions also apply to "illegal telecommunications equipment" by correcting an erroneous cross-reference.

(2) Existing law states the intent of the Legislature to provide local law enforcement with the tools necessary to interdict high technology crimes. In this connection, existing law defines an enumerated list of offenses as high technology crimes. Funds from a specified program within the Office of Criminal Justice Planning are to be expended for the interdiction of these crimes.

This bill would recast these provisions by providing that the executive director may define additional high technology crimes, and by revising the enumerated list to include crimes involving the theft of access or trade secrets.

(3) Existing law authorizes the Executive Director of the Office of Criminal Justice Planning, in consultation with the High Technology Steering Committee, to allocate and award funds to counties with high technology theft crime units upon application by local district attorneys and sheriffs and upon approval by the board of supervisors of the county.

This bill would instead provide that the executive director shall award these funds to regional high technology theft crime programs. The bill would also allow chiefs of police to apply for this assistance, upon approval by the board of supervisors of the participating county.

(4) Existing law provides that, upon appropriation by the Legislature, 10% of the funds deposited into the High Technology Theft Apprehension and Prosecution Program Trust Fund shall be used for developing and maintaining a statewide data base on high technology crime for use in developing and distributing intelligence information to participating law enforcement agencies.

This bill would instead provide that up to 10% of moneys appropriated into this fund may be used for that purpose.

(5) Existing law establishes the High Technology Steering Committee, the membership of which is comprised of 4 industry representatives, and one representative of local law enforcement from each area in which a regional task force will be situated.

This bill would rename this committee as the High Technology Crime Advisory Committee, expand its membership to 15 individuals designated by specified law enforcement and industry associations, provide that the chair of the committee is to be designated by the Executive Director of the Office of Criminal Justice Planning, impose certain attendance and notice requirements, and provide for the creation of subcommittees. This bill would require the committee to prepare a comprehensive written strategy to accomplish specified goals, and to annually review the effectiveness of the regional task forces and provide its findings in a report to the Legislature and the Governor.

(6) This bill would declare it is to take effect immediately as an urgency statute.

Ch. 556 (SB 1948) Sher. Insurance Commissioner: duties.

Existing law requires the Insurance Commissioner to establish a program to investigate and respond to certain complaints and inquiries from members of the public. Existing law requires the program to include guidelines to disseminate complaint and enforcement information on individual insurers to the public, as specified.

This bill would require the commissioner, on or before July 1, 1999, to prepare a written report, to be made available by mail by the Department of Insurance to interested individuals upon written request, and through the department's consumer toll-free telephone number and through the Internet website and transmitted via electronic mail if the individual has the ability to obtain the report in this manner, that details complaint and enforcement information on individual insurers in accordance with those guidelines. This bill would require that no complaint information shall be included in this report that has not first been provided to the insurer, as specified.

Ch. 557 (SB 2202) Haynes. Victims of crime: emergency awards: funeral and burial expenses.

Existing law authorizes the State Board of Control to make emergency awards to victims and derivative victims of certain crimes if the victim incurs loss of income or the derivative victim incurs loss of support, or if the victim requires emergency medical treatment, and sets forth the procedures to be followed in that regard. These awards are made from the Restitution Fund, which is continuously appropriated to the board to indemnify victims of crime.

This bill would additionally authorize the board to make an emergency award of up to \$5,000 if the victim dies as a result of the crime and any individual, without anticipation of personal gain, incurs the funeral and burial expense. The bill would make conforming changes in the procedures to be followed in regard to the emergency award and would require the submission of additional qualifying reports and statements in connection with the new category of emergency awards. By providing for a new use for a continuously appropriated fund, this bill would make an appropriation.

Ch. 558 (AB 164) Knox. Incitement to riot: correctional facilities.

Existing law provides that every person who is found guilty of the offense of incitement to riot is punishable by a fine not exceeding \$1,000 or by imprisonment in a county jail not exceeding one year, or by both that fine and imprisonment.

This bill would provide that every person who incites any riot in the state prison or a county jail that results in serious bodily injury, shall be punished by either imprisonment in a county jail for not more than one year, or imprisonment in the state prison. By

increasing the penalty for an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 559 (AB 1865) Wildman. Governmental tort liability: peace officers.

Existing law sets forth the liability of public employees, including peace officers, for conduct in the scope of employment. Existing law also provides that certain causes of action against a defendant survive the death of the defendant.

This bill would provide that neither the widow, widower, nor the heirs of a peace officer, as defined, shall be liable individually for any injury or death that may result from an act or omission of a peace officer that occurs in his or her line of duty, including an act or omission not directly related to the officer's death, if the officer was slain while in the line of duty. This bill would not, however, preclude any action from being brought against the estate of a peace officer.

Ch. 560 (AB 1851) Wayne. Vehicles: length limitation: bus or trolley exceptions: transit buses.

(1) Under existing law, one of the exceptions to the general 40-foot limitation imposed on the length of vehicles operated on the highways is for articulated buses or trolley coaches that do not exceed a length of 60 feet.

This bill would authorize those articulated buses or trolley coaches to be equipped with a folding device attached to the front of the bus or trolley coach if the device is designed and used exclusively for transporting bicycles, as specified, and does not extend more than 30 inches from the front of the bus or trolley coach.

This bill would require any transit bus that is equipped with a folding device installed on or after January 1, 1999, for transporting bicycles to be additionally equipped with a specified indicator light, any other device or mechanism that provides notice to the driver that the folding device is in an extended position, or a mechanism that causes the folding device to retract automatically from an extended position. Because a violation of this requirement would be a crime, the bill would impose a state-mandated local program.

The bill would also prohibit any person from improperly or unsafely mounting a bicycle on a folding device. The bill would make a passenger who improperly or unsafely loads a bicycle onto a transit bus, and not the transit busdriver, liable for any violation of the Vehicle Code that is attributed to the improper or unsafe loading of the bicycle. Because a violation of these provisions regarding improper or unsafe mounting or loading of a bicycle on a folding device would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 561 (AB 1880) Papan. Department of Transportation: property transfer: City of Pacifica.

Existing law vests full responsibility and all control of all state highways and all property and rights in property for state highway purposes in the Department of Transportation.

This bill would require the department to transfer certain described state-owned property to the City of Pacifica, at no cost, provided the property is used for a described flood control project and certain other conditions are met.

Ch. 562 (SB 218) Knight. Property taxation: college exemption.

The California Constitution exempts from property taxation those buildings, land, equipment, and securities used exclusively for educational purposes by a nonprofit institution of higher education. Existing statutory provisions that specifically implement this exemption describe a qualifying institution as, among other things, an institution that confers upon its graduates at least one academic or professional degree, based on a course of at least 2 years in liberal arts and sciences, or on a course of at least 3 years in professional studies, as provided.

This bill would, for purposes of this exemption, additionally describe an academic or professional degree conferred by a qualifying institution as a degree based on a course of at least one year in flight test technology or flight test science, for which the master's degree program has been approved by the California Council for Private Postsecondary and Vocational Education or the Bureau for Private Postsecondary and Vocational Education.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

This bill would take effect immediately as a tax levy.

Ch. 563 (SB 1462) Mountjoy. Prisoner-of-war license plates.

(1) Existing law exempts a vehicle owned by a disabled veteran and a vehicle owned by a veteran who is a Congressional Medal of Honor recipient from the vehicle license fee requirements where the vehicle is a passenger vehicle, a motorcycle, or a commercial vehicle of less than 6,001 pounds of unladen weight.

This bill would exempt those persons from the payment of those fees for any commercial vehicle of less than 8,001 pounds of unladen weight. In addition, the bill would extend this exemption to the same type of vehicles owned by former American prisoners of war. The bill would make conforming changes with regard to special license plates issued to former American prisoners of war.

(2) Existing law authorizes a person to apply for special prisoner-of-war license plates, as specified, if the person is eligible to apply for vehicle license plates and is a former prisoner of war. Those plates are required to have inscribed on them the letters "POW" and 4 numbers that are $2\frac{3}{4}$ inches in height.

This bill, instead, would require the plates to contain a replica design of the American Prisoner of War Medal followed by the letters "POW" and 4 numbers of the applicant's choice. The bill additionally would require the special license plates to contain the words "Ex-Prisoner of War." The bill would require the department to recall all former prisoner-of-war license plates and to issue to the holders of those plates, without charge, the revised plates.

(3) The bill would provide that its provisions become operative on July 1, 1999.

Ch. 564 (SB 1510) Polanco. Elections: proposed charters.

Existing law sets forth the procedures for the election of a charter commission that may propose a charter or amendments to a charter for the government of a city or city and county. The proposed charter is required to be submitted to the voters either at a special election or on an established election date, as specified.

This bill would provide that after the charter prepared by the charter commission has been filed in the office of the clerk of the governing body of the city or city and county, the proposed charter shall be submitted to the voters at either a special election called within 14 days for that purpose or at the next established election date, as specified.

Ch. 565 (SB 1696) Alpert. Alcoholic beverages.

The Alcoholic Beverage Control Act prohibits the sale of alcoholic beverages to, or the purchase of alcoholic beverages by, persons under the age of 21 years, and imposes penalties in that regard, but permits minors to be used as decoys in the enforcement of these provisions.

This bill would require that, after the completion of each minor decoy program, the law enforcement agency using the decoy notify licensees of the results of the program.

Existing law permits a licensee, or the licensee's agent or employee, to refuse to serve alcoholic beverages to any person who is unable to produce adequate written evidence that he or she is over the age of 21 years.

This bill would permit a licensee, or the licensee's agent or employee to seize any identification that shows the person to be under the age of 21 years or that is false, if certain conditions are met.

The bill would incorporate changes to Section 25658 of the Business and Professions Code proposed by AB 1204 that would become operative if both bills are enacted and this bill is chaptered last.

Ch. 566 (SB 2222) Watson. Immunizations: disclosure of information.

Existing law governing communicable disease prevention and immunization authorizes local health officers to operate immunization information systems. Existing law provides that certain health care providers, as defined, local health departments operating countywide immunization information and reminder systems, and the State Department of Health Services may disclose or share certain prescribed immunization-related information concerning individual patients, unless the patient refuses to consent to the sharing of this information. Existing law authorizes disclosure of patient information under specific circumstances, and also requires the health care provider administering the immunization to provide the patient with designated notice.

This bill would expand the definition of health care provider for purposes of these provisions. The bill would authorize local health departments and the State Department of Health Services to disclose certain immunization information to schools, child care facilities, and family child care homes, service providers, as defined, and health care plans. The bill would provide that health care providers, local health departments, the department, and certain persons or entities authorized to receive the immunization information are subject to existing civil action and criminal penalties for the wrongful disclosure of the information. The bill would also revise the notice and disclosure requirements under these provisions.

Ch. 567 (AB 623) Machado. California Rice Commission.

(1) Existing law provides for various agricultural councils and commissions to provide for the promotion of various agricultural commodities.

This bill would create the California Rice Commission with a prescribed membership and would specify the powers, duties, and responsibilities of the commission. The bill would authorize the commission, among other things, to promote the sale of rice, educate and instruct the wholesale and retail trade with respect to proper methods of handling and selling rice, and conduct scientific research. The bill would require the commission to levy an assessment, not to exceed specified amounts, for the marketing season not later than September 1 of each year and would authorize the expenditure of those funds for purposes of carrying out the bill, thereby making an appropriation.

The bill, except as necessary to conduct an election, would not become operative until the handlers and producers, by referendum, vote in favor of establishing the commission, as prescribed. The bill would define various terms.

Under existing law, a violation of any provision of the Food and Agricultural Code is a misdemeanor unless a different penalty is expressly provided. Because this bill would declare certain acts to be violations of state law, the bill would make those acts crimes, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 568 (AB 898) Napolitano. Tourism: commemoration of Japanese American fishing community.

Under existing law, a state historical landmark or point of historical interest may be designated pursuant to procedures and criteria established by the State Historical Resources Commission. The existing Tourism Policy Act includes among its purposes encouragement of the preservation and use of California historic and scenic environments to enhance California's appeal as a destination for domestic and international tourism.

This bill would make findings and declarations relating to the fishing community known as Fish Harbor, which was occupied by Japanese American fishermen prior to the bombing of Pearl Harbor, at which time its residents were removed to internment camps.

This bill would appropriate \$148,000 from the General Fund to the Controller for allocation to the Port of Los Angeles for the creation of a Japanese American Fishing Village Memorial to be located at Terminal Island.

Ch. 569 (AB 1838) Kuykendall. Prisoner-of-War/Missing-in-Action Flag: public buildings and grounds.

Existing law requires the Governor to annually proclaim the 3rd Friday of September to be known as Prisoner-of-War/Missing-in-Action (POW/MIA) Recognition Day and requires the flag of the National League of POW/MIA Families to be flown over certain prescribed state buildings.

This bill, in addition, would require the flag to be flown over public buildings and grounds, as specified.

Ch. 570 (AB 1915) Honda. WWII internment of Japanese Americans: California Civil Liberties Public Education Act.

Existing law declares legislative intent to provide accurate instructional materials to schools on the internment in the United States of persons of Japanese origin and its impact on Japanese-American citizens and the Armenian genocide. Existing law provides legislative findings and declarations that there are few films or videotapes available on the subject for teachers to use when teaching pupils about these 2 devastating events, and that films or videotapes giving the historically accurate depiction of these events should be made in order that pupils will recognize these events for the horror they represented. Existing law encourages teachers to use these films or videotapes as a resource in teaching pupils about these 2 important historical events that are commonly overlooked in today's school curriculum.

This bill would enact the California Civil Liberties Public Education Act. This bill would require the State Librarian to establish a program for the provision of grants for the purpose of educating, or developing educational materials, or both, about the exclusion, forced removal, and internment of Japanese-Americans and permanent-resident aliens of Japanese ancestry during WWII.

The bill would reappropriate \$1,000,000 appropriated to the Department of Education by the Budget Act of 1998 to the California State Library for purposes of this act.

Ch. 571 (AB 2301) R. Wright. Contracts.

Existing law generally regulates defined home improvement contracts and defined consumer credit contracts.

This bill would require any contract for the sale of home improvement goods or services offered by door-to-door sale that is secured by a lien on real property to include a prescribed notice regarding the use of a home as security. It would provide that a security interest created in any contract or agreement, except as specified that does not include the notice is void and unenforceable, except as specified.

The bill would provide that no home improvement goods or services contract of a value of \$5,000 or less shall provide for a security interest in real property, except as specified. It would also require, when the proceeds of a loan secured by a mortgage on real property are used to fund goods or services pursuant to a home improvement goods or services contract of more than \$5,000, that the person making the loan must pay the contractor by specified methods.

Ch. 572 (AB 2310) R. Wright. Juveniles: placement determination: adoption.

(1) Existing law authorizes the juvenile court to conduct a hearing on the issue of whether to permanently terminate parental rights with regard to certain children who have been declared dependents of the juvenile court. Existing law authorizes several alternative dispositions that may be made by the court, including permanently terminating parental rights and placing the minor for adoption, and identifying adoption as the permanent placement goal without terminating parental rights.

This bill would revise and recast provisions regarding those alternative dispositions to set forth an order of preference for those dispositions. The bill would permit the court to identify adoption as the permanent goal without terminating parental rights only where the court finds that termination of parental rights would not be detrimental to the child and that it is probable that the child will be adopted but is difficult to place.

(2) Existing law requires the court, at the hearing described in (1), to terminate parental rights only if it determines by clear and convincing evidence that it is likely that the minor will be adopted.

This bill would revise that provision to direct the court to terminate parental rights and order the child placed for adoption, if it determines, based on a specified assessment and any other relevant evidence, by a clear and convincing standard, that it is likely the child will be adopted, as specified.

Ch. 573 (AB 2341) Committee on Agriculture. Agriculture: California Seed Law.

(1) Existing law, the California Seed Law, requires the Secretary of Food and Agriculture to pay specified sums to counties as a subvention for costs incurred in enforcing that law. Under existing law, the secretary is required to pay a total annual subvention to counties of 30% of the total assessment received by the secretary or \$65,000, whichever amount is greater, not to exceed \$120,000. Under existing law, the fees collected pursuant to the California Seed Law are continuously appropriated to the Department of Food and Agriculture to carry out these provisions.

This bill would instead require the secretary to pay a total annual subvention to counties of 30% of the total assessment received by the secretary up to \$120,000. The bill would prohibit an individual county from receiving less than \$100 annually. These provisions would constitute an appropriation.

Existing law establishes a Seed Advisory Board to make recommendations to the secretary on all matters pertaining to the seed law. Under existing law, a county agricultural commissioner who chooses to participate in the subvention program is required to enter into a cooperative agreement with the secretary in which the commissioner agrees to maintain a statewide compliance level on all seed within the county.

This bill would authorize the secretary, upon recommendation of the board or upon the secretary's own initiative, to withhold a portion of the funds designated to that county for subvention if that county fails to meet the performance standards established by the secretary and set forth in the cooperative agreement for that county. The bill would require the secretary to provide a written justification to the board for any action by the secretary that does not fully implement a recommendation by the board pursuant to that provision.

(2) Existing law provides for the above provisions to become inoperative on July 1, 1999, and to be repealed as of January 1, 2000.

This bill would extend the inoperative date of those provisions to July 1, 2004, and the repeal date to January 1, 2005. The bill would make an appropriation by continuing in effect the subventions until July 1, 2004.

(3) Under existing law, the board consists of 7 members and 7 alternates, appointed by the secretary, as specified.

This bill would increase the number of board members to 11 and would eliminate the alternate positions.

(4) Existing law requires the secretary to promote and protect the potato industry and to establish and enforce regulations for the examination and certification of seed potatoes, as specified. Existing law sets forth an application process for prospective growers of certified seed potatoes, as provided. Under existing law, it is unlawful for any person to sell potatoes which are grown in the state as certified seed potatoes, unless those

potatoes have been inspected and certified by the secretary. Existing law also makes it unlawful to misrepresent or interfere with the grade or quality of certified seed potatoes or to change the certificates, as specified.

This bill would repeal those provisions and, instead, would authorize the secretary, as provided, to designate as a seed potato certification agency, any person or agency that the secretary finds is qualified to certify seed potatoes, as specified.

Ch. 574 (AB 2493) Bustamante. Foreign marketing.

(1) Existing law, the N. Waters-Nielsen-Vuich-Berryhill Foreign Market Development Export Incentive Program for California Agriculture Act, authorizes contracts between the Department of Food and Agriculture and a cooperator, as defined, in order to address constraints and encourage the marketing of agricultural commodities in foreign countries. Existing law authorizes the use of state funds, as defined, to pay costs that are essential to, and clearly identifiable with, carrying out activities specified in a cooperator's marketing plan approved by the Secretary of Food and Agriculture pursuant to the act.

This bill would require the department to direct a portion of any additional funding, in excess of the original appropriation for purposes of the act, to be used for conducting foreign market research, conducting personnel training, and performing other existing duties of the department under the act.

(2) The bill would appropriate \$135,000 from the General Fund to the department for those purposes.

Ch. 575 (AB 2760) Committee on Agriculture. California Sheep Commission.

(1) Existing law establishes the California Sheep Commission and prescribes the powers and duties of the commission, which include regulating and promoting the sheep industry in California. Existing law requires the Secretary of Food and Agriculture, not later than April 1, 1986, or as soon thereafter as possible, to establish a list of producers eligible to vote on the implementation of those provisions. In addition, under existing law, the commission is required to conduct a referendum, as specified, from July 1, 1990, to June 30, 1991, and every 5th year thereafter, among producers to determine whether those provisions shall be continued in effect.

This bill, instead, would require the secretary to establish the list of eligible producers not later than April 1, 1999, or as soon thereafter as possible, and would require the secretary, rather than the commission, commencing with the 2004-05 marketing year, and every 5 years thereafter, to hold a hearing to determine whether the provisions shall be continued in effect. Under the bill, if the secretary determines, following the hearing, that a substantial question exists as to whether the provisions should be continued in effect, the secretary would be required to conduct a referendum among producers, as specified.

Existing law also authorizes the secretary, after a public hearing to review a petition filed with the secretary that requests a suspension of the commission's operations, as specified, to hold a referendum among producers, as specified.

This bill would require that hearing to be held pursuant to specified provisions.

(2) Existing law requires the commission, not later than June 1 of each year, to establish the assessment on wool marketed by producers. Existing law defines "marketing season," for purposes of the law governing the commission, as the period beginning July 1 of any year and extending through the last day of June of the next year. Existing law prohibits the assessment for the marketing season beginning on July 1, 1986, and ending on June 30, 1987, from exceeding 1.5¢ per pound on all wool marketed by producers and prohibits the assessment for the marketing season beginning on July 1, 1987, and thereafter, from exceeding 4¢ per pound.

This bill, instead, would require the commission, not later than January 1 of each year, or as soon thereafter as possible, to establish the assessment on wool marketed by producers, and would define "marketing year" as the period beginning on the date the secretary certifies the favorable vote of producers pursuant to specified provisions of existing law and ending the day immediately preceding that date the following year. The bill would make conforming changes.

In addition, the bill would require the assessment for the first marketing year to be 6¢ per pound on all wool marketed by producers. The bill would prohibit the assessment for the next marketing year, and each marketing year thereafter, from exceeding 8¢ per pound, unless approved by producers. The bill would prohibit the assessment rate from being increased by more than $\frac{1}{2}$ of 1¢ each marketing year. The bill also would prohibit a fee greater than 12¢ per pound from being charged unless that fee is approved by the Legislature by statute.

(3) Existing law defines “producer” and “wool” for purposes of the above provisions. In particular, “producer” is defined as to not include any person who markets 500 pounds or less of wool in the preceding marketing season. “Wool” is defined as the shorn or pulled fleece or fiber of sheep in the grease basis.

This bill would revise the definition of “producer” to exclude any person who markets 100 pounds or less of wool in the preceding marketing year. The bill would define “wool” as the shorn fiber of live sheep in the grease basis.

Ch. 576 (AB 2769) Committee on Agriculture. Special assessments: fruit trees.

Existing law provides for an annual assessment of 1% on the gross sales of all deciduous pome and stone fruit trees, nut trees, and grapevines produced and sold within the state or produced within and shipped from the state by any licensed nursery dealer, as specified. Under existing law, the funds from the assessment are continuously appropriated to the Department of Food and Agriculture to carry out certain programs of the department and the University of California concerning these trees and grapevines. Under existing law, these provisions become inoperative on April 10, 1998, and as of January 1, 1999, are repealed unless a later enacted statute that becomes effective on or before January 1, 1999, deletes or extends the dates on which they become inoperative and are repealed.

This bill would extend the dates on which these provisions become inoperative and are repealed by providing that they shall remain in effect until January 1, 2004, and as of that date are repealed, unless a later enacted statute that is enacted on or before January 1, 2004, deletes or extends that date. Thus, the bill would make an appropriation by continuing the above-mentioned continuous appropriation for a specified length of time.

The bill also would make technical, nonsubstantive changes, by referring to the secretary, rather than to the director, of the Department of Food and Agriculture.

Ch. 577 (AB 1187) Knox. Small business: Business Incubation Program.

The New Business Incubator Enterprise Program Act establishes the New Business Incubator Enterprise Program, pursuant to which the Office of Small Business within the Trade and Commerce Agency is required to award one or more grants to California nonprofit corporations or public agencies for the provision of funding to California incubators, or businesses located within California incubators. “Incubator” is defined for these purposes as a facility that allows new small businesses to increase their probability of success through sharing of needed equipment, services, and facilities, including at least 6 of specified types of equipment, services, and facilities. The office is required to issue applications for grants under the program no later than June 30, 1997.

This bill would rename the act the Business Incubation Program Act and rename the program the Business Incubation Program. It would define “incubator” for these purposes as an entity that facilitates the formation and growth of new small businesses to increase their probability of success through the provision or sharing of needed equipment, services, and facilities, including at least 5 of specified types of equipment, services, and facilities. It would revise the types of equipment, services, and facilities required to be provided or shared. It would delete references to the award of a single grant, thus requiring the award of more than one grant by the agency, and would revise the deadline for issuing grants by requiring grant funds to be encumbered no later than one year from the date they become available to the agency for that purpose. It would additionally require the Office of Small Business to evaluate the program, based on specified factors, and to report its findings to the Legislature on a biennial basis, commencing January 1, 2000.

Ch. 578 (AB 1338) Alquist. Residential care facilities for the elderly: advance directives.

Existing law provides for the licensure and regulation of residential care facilities for the elderly. Violation of the law regulating residential care facilities for the elderly is a crime.

This bill would require a residential care facility for the elderly to comply with various provisions relating to advance directives. The bill would define advance directive as instructions relating to the provision of health care when individuals are unable to communicate their wishes regarding medical treatment. By changing the definition of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 579 (AB 1635) Migden. Performing animals.

(1) Existing law proscribes the abandonment, neglect, or abuse of animals and imposes specified duties upon animal control officers.

This bill would require a traveling circus or carnival that performs in California, to notify each entity that provides animal control services for a city, county, or city and county in which the traveling circus or carnival intends to perform, of its intent to perform within that jurisdiction, as specified, and to provide that entity with a schedule of its performances in this state. The bill would make it a misdemeanor to violate either of these provisions, punishable by a fine of not less than \$500 and not more than \$2,000 for a first violation, and for a 2nd or subsequent violation, by a fine of not less than \$1,500 and not more than \$5,000. By creating a new crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 580 (AB 2063) Cardenas. Dental hygienists.

Existing law requires registered dental hygienists to complete a board-approved education program and to satisfactorily perform on a board-approved examination.

This bill would require that the education program be accredited by the Commission on Dental Accreditation, and that candidates satisfactorily complete a national written dental hygiene examination approved by the board.

Ch. 581 (AB 2801) Committee on Judiciary. Civil proceedings: dissolution of marriage: harassment: conservatorships and probate.

(1) Existing law prescribes the procedures for dissolution of marriage or legal separation of the parties. Among other things, these provisions specify the contents of a petition for dissolution of marriage or legal separation of the parties, and require each party to serve on the other party declarations of disclosure regarding their income and property. In the case of a default judgment, a petitioner is authorized to waive requirements with respect to the final declaration of disclosure, as specified.

This bill would specify that in the case of a default judgment, a petitioner shall not be required to serve or receive a final declaration of disclosure. The bill would revise the contents of a petition for dissolution of marriage or legal separation of the parties, require the parties to file with the court proof of service for each declaration of disclosure served, and define an income and expense declaration to include forms approved by the Judicial Council and other forms, as specified. The bill would make other related changes.

(2) Existing law specifies the method for calculating child support. That formula is based, in part, on the percentage of time the high earner has or will have primary physical responsibility for the children compared to the other parent. In any proceeding for child support where a party fails to appear, and in certain default proceedings,

existing law deems that percentage to be in favor of the custodial parent, regardless of which party is the defaulting party, where there is no evidence presented demonstrating the percentage of time that the noncustodial parent has primary physical responsibility for the children.

This bill would provide that in any proceeding for child support where a party fails to appear, and in certain default proceedings, the percentage described above with respect to the calculation of child support shall not apply if the custodial parent is the defaulting party, as specified.

(3) Existing law, known as the Domestic Violence Prevention Act, defines “abuse” to mean, among other things, intentionally or recklessly causing bodily injury, or sexual assault.

This bill would add to that definition any act that has been or could be enjoined by ex parte order as specified in the act.

(4) Under existing law, a judicial determination that a person lacks legal capacity to perform specified acts must be based on evidence of a mental function deficit rather than on a diagnosis of a mental or physical disorder.

This bill would (a) declare that there is a rebuttable presumption affecting the burden of proof that all persons have legal capacity to make decisions and be responsible for their acts and (b) require that a judicial determination of lack of capacity be supported by evidence of a correlation between the person’s mental function deficit and the decisions or acts in question.

(5) Existing law defines the duties of court investigators in conservatorship proceedings and includes in those duties the obligation to review the petition and specified information provided by the petitioner to determine why a conservator is required.

This bill would additionally require the investigator, in making that determination, to consider, if practicable, whether the proposed conservatee suffers from a mental function deficit. The bill would also allow the court to order that an investigation is not necessary, or may be limited, if an investigation has been performed within the past 6 months. Because this bill would impose new duties on court investigators, it would create a state-mandated local program.

(6) Under existing law, the child of a wife cohabiting with her husband who is not impotent or sterile is presumed to be a child of the marriage, except where the court finds, based on blood tests, that the husband is not the father of the child. This exception is not applicable in cases where the child was conceived, with the consent of the husband, by artificial insemination or a surgical procedure.

This bill would additionally specify that blood tests may not be used to challenge paternity in those cases.

(7) Existing law prescribes the procedures for the issuance and service of a summons in a will contest or a proceeding for revocation of probate.

This bill would specify that the summons and objection in a will contest shall be issued and served in the same manner as a summons and complaint in civil actions and would require that the summons in a proceeding for revocation of probate be served with a copy of the petition.

(8) Existing law allows any person who has suffered harassment to seek a temporary restraining order and injunction, as specified, and defines “harassment” as a knowing and willful course of conduct, as defined, directed at a specific person that seriously alarms, annoys, or harasses the person and that serves no legitimate purpose. Existing law requires that the defendant be served with a copy of the petition for an injunction within the earlier of 5 days after the temporary restraining order is issued or 2 days before the hearing, or a shorter time if ordered by the court for good cause. Violation of such an order is a misdemeanor. Existing law requires counties to transmit specified data to the Department of Justice when certain orders, including temporary restraining orders or injunctions relating to domestic violence, are issued.

This bill would expand the definition of “harassment” to include unlawful violence, as defined, and a credible threat of violence, as defined, and would add specific examples to the definition of “course of conduct.” The bill would give the court discretion, upon good cause shown, to include in the temporary restraining order other named persons residing with the petitioner and require that the defendant be served with a copy of the

petition for an injunction at least 5 days before the hearing or a shorter time if ordered by the court for good cause. The bill would also add temporary restraining orders and injunctions relating to harassment to the list of orders subject to the Department of Justice data reporting requirement.

(9) Existing law also allows any employer, whose employee has suffered unlawful violence, as defined, or a credible threat thereof, as defined, to seek a temporary restraining order or injunction on behalf of the employee as specified.

This bill would modify the definition of "credible threat of violence"; give the court discretion, upon good cause shown, to include in the temporary restraining order other named persons residing with the employee; and require that the defendant be served with a copy of the petition for an injunction at least 5 days before the hearing, or a shorter time if ordered by the court for good cause.

(10) The bill would make related changes.

(11) This bill would create state-mandated local programs by imposing new duties on local officers and expanding the scope of a crime.

(12) This bill would incorporate additional changes to Section 6380 of the Family Code made by AB 1531, AB 2177, and SB 1682, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 582 (SB 117) Kelley. Collateral recovery.

(1) The Collateral Recovery Act, which governs persons engaged in repossession of collateral, requires licensing of persons or entities engaged in repossession, and certification of persons who are in active control of businesses engaged in repossession. Existing law defines "assignment" for these purposes.

This bill would require an assignment to be in writing, and would provide that a photocopy, facsimile copy, or electronic copy shall have the same force and effect as an original written assignment.

(2) Existing law defines "charges" for the purpose of provisions regulating consumer loans, and provides that actual fees not exceeding \$300 paid in connection with the repossession of a motor vehicle to licensed repossession agencies are not included within the definition of that term.

This bill would instead provide that actual and necessary fees not exceeding \$500 paid in connection with the repossession of a motor vehicle to licensed repossession agencies are not included within the definition of that term.

(3) Existing law governing consumer loans provides to any person liable on a consumer loan secured by a lien on a motor vehicle, the right to reinstate the loan in the event of a default by the borrower, subject to certain conditions and exceptions. Existing law governing the method of this reinstatement requires the borrower or any other person liable on the loan to "cure" events of default that were grounds for repossession of the motor vehicle or that occurred subsequent to repossession, including reimbursing the lender for actual fees paid in connection with the repossession of the motor vehicle to a licensed repossession agency.

This bill would instead require, in this regard, that the borrower or any other person liable on the loan reimburse the lender for actual and necessary fees paid in connection with the repossession of the motor vehicle to a licensed repossession agency.

(4) Existing law provides for the impoundment and sale of motor vehicles by law enforcement agencies under certain circumstances. A legal owner who in the regular

course of business conducts sales of repossessed or surrendered motor vehicles may generally take possession and conduct the sale of the vehicle upon notifying the law enforcement agency and distributing the proceeds as required.

This bill would delete the requirement that the legal owner regularly conduct sales of repossessed or surrendered motor vehicles in order to take possession and conduct the sale of the vehicle, and would instead allow any legal owner who is a licensed financial institution legally operating in this state or the agent of that legal owner of a motor vehicle that is subject to be sold by a law enforcement agency under these provisions to take possession and conduct the sale. The bill would provide that the notice to the law enforcement agency may be in person, by certified mail, by facsimile transmission, or by electronic mail.

(5) The bill would also make related and conforming changes.

Ch. 583 (SB 1103) Alpert. Property taxes: document retention.

Under existing law, county assessors and the State Board of Equalization are responsible for collecting property taxes. The assessors and the board may destroy any documents containing information obtained from taxpayers 7 years after the lien date for the taxes for which the information was obtained. The assessors may destroy documents 3 years after the lien date if the documents have been microfilmed.

This bill would reduce the time for destruction of documents from 7 years to 6 years after the lien date. In addition, the bill would permit destruction of documents 3 years after the lien date if the documents have been microfiched, imaged, or otherwise preserved. The bill would conform the provisions governing document destruction by the board to those governing the assessors.

The bill would also make technical and conforming changes.

Ch. 584 (SB 1075) Johnston. Delta Protection Commission.

(1) Existing law, the Johnston-Baker-Andal-Boatwright Delta Protection Act of 1992, creates the Delta Protection Commission and requires the commission to prepare and adopt a comprehensive long-term resource management plan for specified lands within the Sacramento-San Joaquin Delta.

Existing law provides that the commission would be abolished on January 1, 1999.

This bill would make various clarifying and technical changes in the act, would extend to January 1, 2010, the date on which the commission would be abolished, and would authorize the commission to act as the facilitating agency for the implementation of any joint habitat restoration or enhancement programs located within the primary zone of the delta.

The bill would impose a state-mandated local program since it would extend the existence of the commission and the existing act requires, within 180 days of the adoption of any amendment to the regional plan by the commission, that all local governments, as specified, submit to the commission proposed amendments that will cause their general plans to be consistent with specified criteria.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 585 (SB 1555) Rosenthal. Credit insurance.

Existing law provides that an individual policy or group certificate of credit life insurance or of credit disability insurance or combination thereof shall allow a debtor to rescind the insurance within 10 days of receipt of the policy or certificate or the notice of proposed insurance issued and receive a full refund, or credit, of any premium that has been paid. Existing law requires that right to be disclosed in 10-point type.

This bill would provide that an individual policy or group certificate of credit life insurance or of credit disability insurance or a combination thereof, or a notice of proposed insurance, shall allow an insured to rescind the insurance within 30 days and receive a refund or credit, as specified, and would require the right to rescind to be

disclosed on the face of the policy or certificate or notice of proposed insurance in at least 14-point type and to include additional information.

Ch. 586 (SB 1615) Lockyer. Redevelopment: military base: environmental impact report.

(1) Existing law applicable to military base conversion redevelopment agencies provides that if a redevelopment agency finds that the application of the California Environmental Quality Act (CEQA) to the redevelopment plan is required to be delayed, the redevelopment agency shall certify an environmental impact report for the redevelopment plan within 18 months after the effective date of the ordinance adopting the redevelopment plan and that if, as a result of the environmental document prepared, it is necessary to amend the redevelopment plan to mitigate any impacts, the agency shall amend the redevelopment plan, as specified. Existing law also provides that if the environmental document has not been certified, all projects that implement the redevelopment plan are subject to CEQA.

This bill instead would require the City Council of the City of San Diego, as the redevelopment agency, to certify an environmental impact report for the Naval Training Center Redevelopment Plan within 30 months after the effective date of the ordinance adopting the plan. The bill would also prescribe requirements for the approval of projects during that period.

This bill would also declare the Legislature's finding that a special statute is necessary to carry out the purposes of this act.

(2) The existing Community Redevelopment Law authorizes the adoption of a redevelopment plan for territory within the Alameda Naval Air Station and the Fleet Industrial Supply Center pursuant to prescribed provisions of law, and authorizes a redevelopment agency to determine that the application of the California Environmental Quality Act to a military base conversion redevelopment plan should be delayed for up to 18 months after the effective date of the ordinance adopting the plan.

This bill would require the agency or the community, as defined, to certify an environmental impact report for the Alameda Naval Air Station and the Fleet Industrial Supply Center Redevelopment Project within 30 months after the effective date of the ordinance adopting the plan. The bill would prescribe requirements for the approval of projects during that period.

The bill would impose similar requirements regarding the certification of an environmental impact report for the Hunter's Point Shipyard Redevelopment Plan by agencies of the City and County of San Francisco.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 587 (SB 1768) Kopp. Criminal restitution: disclosure of financial information.

(1) Under existing law, a person convicted of a crime is required to make restitution to any victim in the amount of the economic losses suffered by a victim as a result of the criminal conduct. Under existing law, the victim may enforce the restitution order as a civil money judgment, and may obtain access to the criminal defendant's financial records and information regarding his or her assets. Additionally, costs incurred under this existing procedure by the victim in attempting to collect under the restitution order are recoverable from the criminal defendant.

This bill would require the defendant, in any case in which a restitution order may be entered, to prepare and file a disclosure identifying all assets owned or controlled by the defendant as of the date on which the defendant was arrested, as well as other information relating to the defendant's financial resources. This financial disclosure would be available to the victim. The bill also would authorize the victim to access confidential financial information filed by the defendant for purposes of determining his or her ability to employ defense counsel, when the defendant fails to file the financial disclosure required by these provisions.

The bill would authorize the court to consider the defendant's unreasonable failure to make the disclosure as a circumstance in aggravation of the crime for purposes of imposing the sentence, and a factor indicating that the interests of justice would not be served by admitting the defendant to probation, conditionally sentencing the defendant,

or imposing less than the maximum fine and sentence fixed by law. The bill would also make it a misdemeanor for any defendant to willfully state, on the required financial disclosure form, any material matter that he or she knows to be false, unless this conduct is punishable as perjury or another provision of law provides for a greater penalty. The bill would provide that these provisions shall become operative on January 1, 2000, unless an extension is granted by the Judicial Council, as specified. By creating a new crime, this bill would impose a state-mandated local program.

The bill also would require the Judicial Council to develop and approve form interrogatories for the use of the victim in seeking to collect under the criminal restitution order and a form for the financial statement and the information required to be disclosed on it pursuant to these provisions. The bill would provide that these provisions shall become operative on January 1, 2000.

(2) Existing law requires the Director of Corrections, in any case in which a prisoner owes a restitution order or a restitution fine, to deduct specified amounts from the wages and trust account deposits of the prisoner, and to transfer those amounts to the State Board of Control for direct payment to the victim or deposit in the Restitution Fund. Existing law also authorizes the Director of Corrections to collect from a parolee any moneys owing on a restitution order or a restitution fine, and requires the director to transfer those amounts to the State Board of Control for direct payment to the victim or deposit in the Restitution Fund.

This bill would require amounts transferred to the State Board of Control for payment of direct orders of restitution to be paid to the victim within 60 days from the date the restitution revenues are received by the State Board of Control, except as specified. The bill would require restitution revenues received by the State Board of Control on behalf of a victim to be held in trust in the Restitution Fund in any case in which a victim cannot be located, and would provide for those moneys to revert to the Restitution Fund after a specified period of time. The bill would establish a procedure for a victim to subsequently reclaim those moneys.

(3) Existing law prohibits an inmate from being released on parole to reside in any receiving state if the parolee is subject to an unsatisfied order of restitution to a victim within the sending state with certain exceptions.

This bill would make technical changes to these provisions for purposes of clarification and would state that those provisions may not be construed to allow the reduction or waiver of a restitution order or fine.

(4) The bill would declare that its provisions are severable.

(5) This bill would incorporate additional changes in Section 1202.4 of the Penal Code proposed by SB 1608, to be operative if SB 1608 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(6) This bill would incorporate additional changes in Section 1214 of the Penal Code proposed by SB 2139, to be operative if SB 2139 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 588 (SB 1793) Greene. Local agency investments.

(1) Existing law prescribes the types of investments in which a local agency may generally invest its funds for deposit.

This bill would provide that where there is a percentage limitation for a particular category of investment, that percentage is applicable only at the date of purchase.

(2) Existing law requires that the market value of securities that underlay an investment by a local agency in a repurchase agreement be valued at 102% or greater of the funds borrowed against those securities.

This bill would provide that investments in repurchase agreements shall be in compliance if the value of the underlying securities is brought back up to 102% no later than the next business day.

Ch. 589 (SB 1983) Greene. Healing arts: boards.

Existing law establishes the Board of Psychology, consisting of 8 members, and authorizes it to employ all personnel necessary to carry out its duties of administering and enforcing the law regulating the practice of psychology. The board's existence terminates on July 1, 1999.

This bill would extend the board's existence until July 1, 2005, and would provide for an additional public member on the board.

Existing law requires the Board of Psychology, by rule or regulation, to establish standards of ethical conduct relating to the practice of psychology.

This bill would instead require the board to adopt a Code of Ethics adopted and published by the American Psychological Association, as specified.

Existing law requires the board to examine applicants for a psychologist's license by written or oral examination, or both, and specifies a passing grade of 75%.

This bill would, instead, require the board to establish by regulation those passing grades. It would specifically prohibit registered sex offenders from being eligible for licensure or registration by the board, and would provide for license suspension based upon felony conviction, as specified.

Existing law establishes the Board of Behavioral Sciences and requires it to administer and enforce the law regulating the practice of marriage, family and child counseling and clinical social work. The board's existence terminates on July 1, 1999.

This bill would extend the board's existence until July 1, 2005, and make conforming changes.

Existing law provides that an applicant for a clinical social workers license is subject to examination by the Board of Behavioral Sciences.

This bill would revise and recast certain experience credit provisions, as specified.

The bill would require the Board of Behavioral Sciences to report to the Legislature on or before October 1, 1999, concerning efforts to identify educational issues relating to licensure.

Ch. 590 (SB 2227) Monteith. Local agency formation.

(1) Existing law, the Cortese-Knox Local Government Reorganization Act of 1985, provides that territory may not be annexed to a city unless it is located in the same county, and unless otherwise provided by the act, territory may not be annexed to a city unless it is contiguous to the city at the time the proposal is initiated.

This bill would provide, notwithstanding the above provisions, that upon approval of the local agency formation commission, the City of Coalinga may annex noncontiguous territory of not more than 640 acres in area, which territory is located in the County of Fresno and constitutes a correctional facility.

(2) Under the California Land Conservation Act of 1965, also known as the Williamson Act, a landowner may enter into a contract with a city or county whereby the amount of the assessed property taxes is reduced in return for keeping the land as an agricultural preserve for a minimum of 10 years. Under that act, upon the annexation by a city of any land subject to a contract with a county, the city succeeds to all rights, duties, and powers of the county under the contract unless the land being annexed was within one mile of the city at the time the contract was initially executed. If the contract was executed prior to January 1, 1991, it is conclusively presumed that no protest was filed by the city unless there is a record of the filing of the protest. With respect to such a contract, if the protest was filed and approved by the local agency formation commission, the city may choose not to exercise its option to succeed to the contract which then becomes null and void as to the land actually annexed.

Existing law, the Cortese-Knox Local Government Reorganization Act of 1985, specifies the procedures for changes of organization of local government entities including the annexation of territory to a city.

This bill would require that when a proposal for a change of organization or a reorganization would result in the annexation to a city of land subject to such a contract the petition or resolution of application for the proposal shall state whether the city intends to succeed to the contract or not. The bill would require the executive officer of the local agency formation commission within 10 days after receiving such a proposal to notify the Director of Conservation of the proposal, and to provide mailed notice to

the director of any hearing on the proposal. The bill would require the commission to determine, with respect to such a proposal, whether the city shall succeed to the contract or may exercise its option not to succeed to the contract. The bill would require the conducting authority to include in its resolution ordering annexation a finding regarding whether the city intends not to succeed to the contract. The bill would provide that if the city succeeds to the contract succession is effective on and after the effective date of annexation and would require the city if it does not succeed to the contract to record a certificate of contract termination.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would provide that it shall become operative only if SB 1835 becomes effective on or before January 1, 1999.

Ch. 591 (SB 2237) Committee on Revenue and Taxation. Taxation: property: timber.

Existing law requires the Director of Forestry and Fire Protection to transmit copies of specified notices of exemption or emergency relating to timber to the State Board of Equalization.

This bill would require that those notices include an estimate of the timber owner as to whether or not the subject timber will be subject to timber yield tax, as provided.

Existing property tax law provides that the purchase or transfer of ownership interests in legal entities shall not be deemed to constitute a transfer of the real property of the entity.

This bill would make a technical, nonsubstantive change to those provisions.

Existing property tax law specifies that exemptions shall be applied to the amount of the supplemental assessment, as defined, provided, among other things, that claims for exemption are filed.

This bill would reduce the number of times a claim is required to be filed, and provide that personal property leased to a church and used as provided shall be deemed to be used exclusively for religious purposes.

Existing property tax law requires the State Board of Equalization to prescribe the content of property statements, and notify assessors of the same.

This bill would change the time period to notify assessors of the contents of the property statements, as provided.

The Mobilehome Property Tax Law provides for the taxation of mobilehomes.

This bill would make a technical, nonsubstantive change to that law relating to base year value, as defined.

The Timber Yield Tax Law imposes a tax on timber owners with respect to the harvesting of timber or felled or downed timber at specified rates.

This bill would exempt from the tax, timber whose immediate harvest value is low, as specified.

Ch. 592 (AB 417) Davis. Newspapers: unauthorized insertions.

(1) Existing law prohibits as a misdemeanor the stamping, printing, placement, or insertion of any writing, as defined, in or on any container containing a consumer product offered for sale, except with the consent of the owner or manager of the premises where the product is sold, or with the consent of the manufacturer, authorized distributor, or retailer of the product. Existing law also prohibits as a misdemeanor the possession or use of any cask, cover, label, or other thing in any way connected with the trade name of another, for the purpose of disposing of any article or other thing than that which it originally contained, with the intent to deceive or defraud.

This bill would prohibit as a misdemeanor, the attachment or insertion of any unauthorized advertisement, as defined, into, and the actual or intended redistribution of, a newspaper that is offered for retail sale or distribution without charge, except with the consent of the publisher or authorized distributor. This bill would also prohibit as a misdemeanor acting in concert with another to distribute newspapers with

unauthorized advertisements, in violation of this provision. By creating a new crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 593 (AB 570) Battin. Corrections: prison construction.

Existing law provides that the Department of Corrections shall prepare plans for, and construct facilities and renovations included within, its master plan for prison construction and operations, which funds have been appropriated by the Legislature. Existing law also provides that the Department of Corrections shall include as part of the master plan mitigation for costs incurred by any local education agency, or any city, county, or city and county as a result of the construction of new prison facilities, expansions of existing prison facilities, increases in the number of inmates housed in existing prison facilities resulting in increased inmate housing capacity, or any combination thereof.

This bill would delete those responsibilities related to the master plan and would specify that mitigation funding would be distributed to local agencies related to costs incurred as a result of new permanent prison housing facilities, the activation of temporary beds as part of the Emergency Bed Program authorized by the Budget Acts of 1995 and 1996, as well as other expansion projects of the department.

The bill also would make conforming changes relating to funds appropriated for the mitigation of local expenses required to be divided among any city, county, or city and county impacted by the prison construction or expansion.

Ch. 594 (AB 1392) Scott. School employees.

Existing law prohibits a person, firm, association, partnership, or corporation offering or conducting private school instruction on the elementary or high school level from employing a person who has been convicted of a violent or serious felony, as defined. Existing law requires the Commission on Teacher Credentialing to deny an application for the issuance of a credential made by an applicant who has been convicted of a violent or serious felony, as defined, a sex offense, as defined, and a controlled substance offense, as defined.

This bill would additionally prohibit a person, firm, association, partnership, or corporation offering or conducting private school instruction on the elementary or high school level from employing a person who would be prohibited from employment by a public school district by the provisions of the Education Code because of his or her conviction for any crime. The bill would prohibit a person who would be prohibited from employment by a public school district, because of his or her conviction for any crime, from owning or operating a private school that offers elementary or high school instruction on or after July 1, 1999. The bill would exempt a parent or legal guardian working exclusively with his or her child or children.

This bill would incorporate changes in Section 44237 of the Education Code proposed by AB 2102, to be operative only if AB 2102 and this bill are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 595 (AB 1830) Davis. Seller assisted marketing plans.

(1) Existing law governing seller assisted marketing plans requires a seller to provide, prior to the execution of the plan contract or the receipt of any consideration, a prospective purchaser of this plan with prescribed information. A seller must give information regarding the criminal background and civil liability of the seller's officers, directors, trustees, and general or limited partners and individuals who have management responsibilities in connection with the seller's business activities. The seller must also give information regarding currently effective injunctions or restrictive orders relating to business activity as a result of an action brought by a public agency or department. Existing law provides that it is a crime for a person to willfully violate these provisions.

This bill would require this disclosure to include information regarding the criminal background and civil liability of the seller's owners. This bill would also require disclosure of information regarding currently effective agreements relating to business activity as a result of an investigation brought by a public agency or department. By changing the definition of a crime, this bill would impose a state-mandated local program.

(2) Existing law requires the seller to annually file with the Attorney General a copy of the above-described disclosure statements and requires the first filing to be made at least 30 days prior to placing any advertisement or making any other representation to prospective purchasers.

This bill would provide that the seller may not make any advertisement or representation to prospective purchasers until a notice of filing has been issued by the Attorney General.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 596 (AB 2035) Cardenas. Transportation: funding.

(1) Existing law requires the Department of Transportation to submit to the California Transportation Commission, as specified, a 4-year estimate in annual increments of all federal and state funds reasonably expected to be available for transportation capital improvement projects. Existing law requires the commission, as specified, to adopt a 4-year estimate in annual increments of all state and federal funds reasonably expected to be available for transportation capital improvement projects.

This bill would prohibit federal funds available for demonstration projects that are not subject to federal obligational authority, or are accompanied with their own dedicated obligational authority, from being considered funds that would otherwise be available to the state and included in the fund estimate.

The bill would define "federal funds," for purposes of preparing the fund estimates, as any obligational authority to be provided under annual federal transportation appropriations acts.

(2) The bill would make other, technical changes in existing law relating to transportation.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 597 (AB 2459) Campbell. Property: state leases and acquisitions.

(1) Existing law authorizes any state department, board, or commission to lease any real property for the use of the state agency for storage, warehouse, or office purposes provided that the lease term does not exceed 3 years and the annual rental does not exceed \$24,000.

This bill would increase this maximum annual rental amount to \$50,000.

(2) Existing law authorizes the Director of General Services to exempt from his or her approval or from the approval of the Department of General Services any transaction involving not more than \$50,000 for which the approval is required by statute whenever, in the director's judgment, the exemption is appropriate and in the best interests of the state.

This bill would authorize the director, notwithstanding the above provision, to exempt from his or her approval, or from the approval of the department, any state real estate acquisition or conveyance involving not more than \$150,000 for which approval is required by statute whenever, in his or her judgment, the state agency delegated that authority has the necessary real estate expertise and experience to complete the transaction competently and professionally while protecting the best interests of the state. The bill would require that written notice of the exemptions be given to the Controller.

(3) Existing law authorizes the Director of General Services to lease, lease-purchase, or lease with the option to purchase any real or personal property for the use of any state agency, but prohibits the director from entering into a lease-purchase agreement, or a

lease with an option to purchase with an initial option purchase price over \$2,000,000, either of which involves office space, unless specifically authorized by the Legislature.

This bill would delete the requirement that the director receive specific legislative authorization to enter into a lease with an option to purchase that involves office space with an initial option price over \$2,000,000. This bill would require the director to prepare and submit a report to the Legislature listing all leases entered into in the prior calendar year with an option to purchase with another public or private entity that involve office space.

Ch. 598 (SB 272) Brulte. Insurance Commissioner.

Existing law authorizes the Governor, upon nomination by the Insurance Commissioner, to appoint one Chief Deputy, and one Deputy Director of the Department of Insurance to serve at the pleasure of the Insurance Commissioner.

This bill would provide that absent an affirmative appointment by the Governor, the nominee or nominees submitted by the commissioner shall be deemed appointed by the Governor 30 days following the nomination by the commissioner.

Ch. 599 (SB 597) Peace. Internet use.

(1) Existing law makes it a crime to engage in various unlawful advertising practices conducted by specified means of dissemination or publication. This bill would expand certain of those unlawful advertising practices to include dissemination or publication over the Internet. It would also declare legislative intent in this regard.

Because this bill would expand the scope of existing crimes, it would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate additional changes in Section 17539.5 of the Business and Professions Code, proposed by SB 1476, to be operative only if SB 1476 and this bill are both chaptered and become effective on or before January 1, 1999, and this bill is chaptered last.

Ch. 600 (SB 619) Peace. Vehicles: fees and penalties.

Existing law requires a vehicle dealer or lessor-retailer, when selling a used vehicle, to use numbered report-of-sale forms issued by the Department of Motor Vehicles and, among other things, to submit to the department an application accompanied by all fees and penalties due for registration or transfer of registration of the vehicle within 30 days from the date of sale.

Existing law also specifies that when renewal fee penalties have not accrued with respect to a vehicle and the vehicle is transferred, the transferee has 20 days from the date of the transfer to pay the registration fees that become due without payment of penalties that would otherwise be required.

This bill would specify that the above described 30-day period, and not the 20-day period, applies with respect to a vehicle dealer or lessor-retailer when submitting fees and any penalties due for registration or transfer of registration of a used vehicle.

The bill would incorporate additional changes in Section 9553 of the Vehicle Code proposed by SB 2067, to become operative only if both bills are enacted and become operative on or before January 1, 1999, and this bill is enacted last.

Ch. 601 (SB 1250) Kopp. Vehicles.

(1) Under existing law, there is a year-round registration system for vehicles which commenced in 1976. Under these provisions, existing law defines "1976 registration year."

This bill would delete this obsolete definition and make related and other technical, nonsubstantive changes.

(2) Existing law requires the Department of Transportation, in cooperation with the Golden Gate Bridge, Highway and Transportation District and all known entities

planning to implement a toll facility in this state, to develop and adopt functional specifications and standards for an automatic vehicle identification system, in compliance with specified objectives.

This bill, in addition, would require this automated vehicle identification to be capable of identifying various types of vehicles, including, but not limited to, commercial vehicles.

(3) Existing law requires the driver of every motor vehicle who is in an accident originating from the operation of a motor vehicle on any street or highway or any reportable off-highway accident, as specified, that has resulted in damage to the property of any one person in excess of \$500, or in bodily injury, or in the death of any person, to report the accident, within 10 days after the accident, to the Department of Motor Vehicles, as specified. Existing law specifies that any person who violates these provisions is guilty of an infraction. Existing law also specifies that a report is not required pursuant to these provisions if the motor vehicle involved in the accident was owned or leased by, or under the direction of, the United States, this state, another state, or a local agency.

This bill, as an exception to this latter provision, would require the driver of a motor vehicle that is owned or operated by a publicly owned or operated transit system, or that is operated under contract with a publicly owned or operated transit system, and used to provide regularly scheduled transportation to the general public or for other official business of the system, to report within 10 days of the occurrence of the accident to the transit system any accident as specified above. In addition, the bill would require the transit system to maintain records of any report filed by one of its drivers pursuant to these provisions. Thus, the bill would increase the duties and responsibilities of local entities, thereby imposing a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 602 (SB 1416) Brulte. State employees: deferred compensation.

Existing law authorizes the Department of Personnel Administration to establish deferred compensation plans and tax-deferred savings plans for state officers and employees.

This bill would require the department to permit officers and employees participating in a deferred compensation plan or tax-deferred savings plan to invest in a range of investment options, including, but not limited to, stocks and bonds listed with and traded on specified securities markets, annuities, and shares or units of open-ended registered investment companies, subject to specified limits. The bill would exempt a fiduciary of a plan from liability except for malfeasance or misfeasance, and would exempt the Deferred Compensation Plan Fund from provisions relating to administrative costs. The bill would require the director to prepare and submit to the Legislature on or before April 15, 1999, a report on the department's plan to implement these provisions. The bill would entitle these provisions the Freedom of Financial Choice Act.

Ch. 603 (SB 1469) Knight. Gambling.

(1) Existing law, the Gambling Control Act, makes various findings and declarations regarding the effects of gambling, the policy of the state, and the purposes of the act.

This bill would make technical, nonsubstantive changes to these provisions.

(2) Existing law authorizes the Division of Gambling Control to, subject to specified conditions, adopt certain implementing regulations related to the Gambling Control Act within 90 days of the effective date of that act. Existing law also provides that, except as expressly provided, these implementing regulations cease to be valid after September 1, 1998, unless readopted.

This bill would authorize the division to amend or repeal, or both amend and repeal, specific categories of previously adopted implementing regulations until January 31, 1999.

(3) Existing law requires the Division of Gambling Control, or its successor, the Gambling Control Commission, to issue regulations concerning a wide range of subjects relating to the operation and licensing of gambling establishments, including provisions governing the extension of credit and the cashing of checks and other negotiable instruments.

This bill would require gambling establishments to forward copies of all dishonored or uncollectible checks to the division or commission on a quarterly basis.

(4) Existing law requires the division to deny a gambling license with respect to any gambling establishment that is located in a local jurisdiction lacking an ordinance governing specified matters, including the hours, location, betting limits, and maximum number of tables. Existing law generally requires that any change to an existing ordinance which would result in the expansion of gambling be approved in a local election, but provides an exception for the amendment of existing ordinances to govern these specified matters. Upon the enactment of a statute appropriating funds, or on January 1, 1999, however, the Gambling Control Commission would assume licensing authority and this exception would be deleted. Existing law also provides that no local ordinance that was in effect on January 1, 1996, that authorizes legal gaming may be amended to expand gaming in that jurisdiction until January 1, 2001. Existing law also requires, as a general matter, that licensed gambling establishments be open to the public.

This bill would allow local jurisdictions to, if a local election is required, add provisions concerning these specified matters to a local gambling ordinance until January 1, 2002. This bill would also provide that a gambling establishment that met all applicable state and local gaming registration requirements, and operated as a private club on December 31, 1997, under a local ordinance which only authorized private clubs, may be licensed by the division to operate as a private club until July 1, 2000, or until the ownership or operation of the club changes after a specified date, provided it operates less than 5 tables, retains videotape records, and is open only to members and their spouses meeting specified membership criteria. This bill would provide that after this date, the gambling establishment may continue to operate on a public basis, but only if the local jurisdiction in which it is located has adopted, pursuant to specified provisions of law, an ordinance authorizing gambling establishments open to the public. The bill would require the commission to adopt regulations implementing these provisions.

(5) Under existing law, if the Division of Gambling Control denies a license to an individual owner of any security issued by a corporation that applies for or holds an owner license, the owner of the security is required to offer the security to the issuing corporation which is required to purchase the security for an amount not greater than fair market value, within 30 calendar days after the date of the offer.

This bill would add the requirement that the security offered be purchased for book value in cash as provided for in the corporation's articles of incorporation or bylaws, but in no event in an amount greater than fair market value within that period of time. Additionally, the bill would require that, if the fair market value, or book value as provided for in the articles of incorporation or bylaws exceeds \$1,000,000, the division may allow a period of time not to exceed 90 days for the purchase.

Ch. 604 (SB 1660) Lewis. Local agencies: subdivisions.

Under existing law, the Subdivision Map Act requires the legislative body of a local agency that receives a map at a meeting or at the next regular meeting after the meeting at which it receives the map, to approve or disapprove the map if it conforms or does not conform to specified requirements.

This bill would authorize the legislative body to provide by ordinance for approval or disapproval of final maps by the city or county engineer, surveyor, or other designated official, who may also accept, accept subject to improvement, or reject dedications and offers of dedications that are made by a statement on the map. The bill would also require the designated official to notify the legislative body at its next regular meeting after the official receives the map that he or she is reviewing the map for final approval, subject

the official's action to appeal to the legislative body, and would require periodic review by the legislative body of the delegation of authority to the designated official.

The bill would also require that notice to the general public of any pending approval or disapproval of any final subdivision map be posted with the legislative body's regular agenda and mailed to interested parties who request notice. The bill would require that the designated official approve or disapprove the final map within 10 days following the meeting of the legislative body that was preceded by the posted notice.

This bill would also authorize the delegation to a designated official of the authority to enter into an agreement with the subdivider for the provision of public improvements as a condition precedent to the approval of a final map, provide for the appeal of those actions, and require the periodic review of that delegation of authority.

Ch. 605 (SB 1767) Burton. Vessels.

(1) Existing law requires the Board of Pilot Commissioners for the Bays of San Francisco, San Pablo, and Suisun to establish an incident review committee to review all reports of misconduct or navigational incidents involving pilots, as specified. Existing law also provides that whenever suspected safety standard violations concerning pilot hoists, pilot ladders, or the proper rigging of pilot hoists or pilot ladders are reported, a commission investigator shall be assigned to personally inspect the equipment for compliance with the relevant safety standards. Under existing law, the commission investigator is required to report preliminary conclusions to the executive director of the board and to submit a written report to the board, as specified.

This bill, instead, would require the commission investigator to submit a written report to the incident review committee and would require the incident review committee to report its findings to the board, as provided. The bill would specify that the above provisions apply to the "pilotage grounds" and would define that phrase to mean all waters extending eastward from the precautionary area surrounding buoy SF to, and including, the Bays of San Francisco, San Pablo, and Suisun.

(2) Existing law requires the board to file its own findings and recommendations with the Coast Guard after considering the investigator's report and other specified information.

This bill would delete that requirement.

Ch. 606 (SB 1880) Committee on Public Safety. Various criminal law provisions.

(1) The Governor's Reorganization Plan No. 1 of 1995 abolished the California State Police Division in the Department of General Services and transferred the functions of the division and the duties and responsibilities assigned to that division to the Department of the California Highway Patrol. The changes made by that plan were codified in 1996.

This bill would make nonsubstantive, technical changes to the law to correct obsolete cross-references that resulted from the changes in the code that effected the reorganization of those law enforcement agencies.

(2) Existing law defines a custodial officer as a public officer, not a peace officer, employed by a law enforcement agency of specified counties. The duties of this custodial officer may include the serving of warrants, court orders, writs, and subpoenas in a detention facility or under circumstances arising directly out of maintaining custody of prisoners and related tasks.

This bill additionally would authorize the sheriff in counties having a population of 100,000 or less to assign a custodial officer as a court bailiff on an interim basis, and, when under the direction of the sheriff, a custodial officer assigned as a court bailiff may carry or possess firearms. The bill also would provide that during a state of emergency, a custodial officer may be assigned limited law enforcement responsibilities under the supervision of a peace officer, including the powers of arrest. The bill would provide for the repeal of these provisions relating to custodial officers on January 1, 2003.

(3) Existing law provides that upon receipt of a duly certified abstract of the record of any court showing that a person has been convicted of committing assault with a deadly weapon or an instrument other than a firearm and that a vehicle was found by the court to constitute the deadly weapon or instrument used to commit that offense, the Department of Motor Vehicles immediately shall revoke the privilege of that person to

drive a motor vehicle and shall not reinstate that privilege revoked under any circumstances.

This bill would instead provide that the Department of Motor Vehicles shall revoke the privilege of that person to drive a motor vehicle where the person has been convicted of felony assault and shall rescind any revocation order issued on or after January 1, 1995, where the person has been convicted of misdemeanor assault.

(4) The bill would make technical and nonsubstantive or clarifying changes to other penal provisions.

Ch. 607 (SB 2004) Kelley. Local agency joint powers agreements: hospitals.

Existing law, the Joint Exercise of Powers Act, permits 2 or more public agencies to enter into an agreement to exercise jointly any power common to the contracting parties. Existing law authorizes a private, nonprofit hospital in a county of the 9th, 21st, or 33rd class and a nonprofit hospital in a county of the 3rd class to enter into joint powers agreements with a public agency.

This bill would provide that, notwithstanding the law relating to the joint exercise of powers, a nonprofit corporation which provides health care services may participate in a joint powers agreement for the purposes of pooling self-insurance claims or losses only after the public agency members or public agency representatives on the governing body of the joint powers entity make a specified finding about the agreement at a public meeting. This bill would require any public agency or private entity entering into a joint powers agreement under these provisions to establish or maintain a reserve fund to be used to pay losses incurred under the agreement.

The bill would specify that these provisions shall not be construed either (1) to grant any power to any private, nonprofit hospital that participates in an agreement to levy any tax or assessment, or to permit any entity, other than a private, nonprofit hospital corporation or a public agency, to participate as a party to an agreement authorized under these provisions, or (2) to permit an agency or entity created pursuant to a joint powers agreement entered into pursuant to these provisions to act in a manner inconsistent with the laws that apply to public agencies. This bill would also require a public agency to hold a public meeting prior to the dissolution or termination of any enterprise authorized pursuant to the bill.

Ch. 608 (SB 2039) Lockyer. Gambling Control Act.

Under the existing Gambling Control Act, a 2-phased system is established under which, during the 1st phase, the Gambling Control Board and the Division of Gambling Control are given authority to regulate gambling in California and the issuance of gambling licenses. During the 2nd phase, the board is abolished and the Gambling Control Commission is established with jurisdiction over the operation of, and supervision over, gambling operations in this state and the division and the division is left with investigatory and monitoring functions. The Gambling Control Act provides that any power or authority of the division may be exercised by the Attorney General or his or her delegate. These provisions, by their own terms, remain in effect only until January 1, 1999, or until the enactment of a statute appropriating funding for the division and the Gambling Control Commission, whichever occurs earlier.

This bill would delete the provision that limits the effect of these provisions. The bill also would make various clarifying revisions to other provisions of the Gambling Control Act.

Ch. 609 (SB 2232) Committee on Revenue and Taxation. Taxation.

The Motor Vehicle Fuel License Tax Law imposes a tax on distributors for the privilege of distributing motor vehicle fuel at a specified amount per gallon distributed, and also imposes the tax on the volume of redistributed fuel. These taxes are collected by the State Board of Equalization.

This bill would clarify the board's authority to collect the tax on the actual number of gallons distributed or redistributed and would define "redistribution" and "tax-paid fuel" and revise the definitions of "broker" and "gallon" for these purposes.

The bill would also revise the definition of "service station" to include that portion of a bulk plant that is a cardlock, keylock, or other unattended mechanism, and would revise

the definition of "bulk plant" to be a place where fuel is stored for purposes of distribution of fuel in bulk, excluding a storage facility that only supplies fuel to a service station.

The Motor Vehicle Fuel License Tax Law imposes taxes on fuel that are administered by the State Board of Equalization. The Uniform Partnership Act of 1994 provides, among other things, that a judgment against a partnership is not by itself a judgment against a partner and that a judgment against a partnership may not be satisfied from a partner's assets unless there is also a judgment against the partner. The act also provides that a judgment creditor of a partner may not levy execution against the assets of a partner to satisfy a judgment, as specified, unless certain conditions are met.

This bill would provide under the Motor Vehicle Fuel License Tax Law that the board shall not be subject to those requirements under the Uniform Partnership Act of 1994 unless, at the time of application for or issuance of a permit, license, or registration number, the applicant furnishes to the board a written partnership agreement that provides that all business assets shall be held in the name of the partnership.

Under the existing Use Fuel Tax Law and the Diesel Fuel Tax Law, the State Board of Equalization is authorized to issue a California fuel trip permit to interstate users and to holders of trip permits issued by the Department of Motor Vehicles. The board is also authorized to deny the issuance of more than one fuel trip permit for an interstate user who brings a qualified motor vehicle into the state on a regular ongoing basis.

This bill would permit the board to issue the fuel trip permit without regard to whether the permit is issued by the Department of Motor Vehicles, and would permit an interstate user to purchase as many fuel trip permits as are needed by the user.

Existing law authorizes the State Board of Equalization to furnish to any state or federal agency investigating violations of or enforcing any state or federal law related to motor fuels specified information in the possession of the board.

This bill would also authorize the board to furnish certain information obtained by the board pursuant to the Use Fuel Tax Law and the Diesel Fuel Tax Law to any state or federal agency for use by that agency in the enforcement of interstate user or vehicle registration or licensing laws.

The Vehicle Fuel License Tax Law, the Use Fuel Tax Law, the Cigarette and Tobacco Products Tax Law, the Alcoholic Beverage Tax Law, the Energy Resources Surcharge Law, the Emergency Telephone Users Surcharge Act, the Hazardous Substances Tax Law, the Integrated Waste Management Fee Law, the Oil Spill Response, Prevention, and Administration Fees Law, the Underground Storage Tank Maintenance Fee Law, the Fee Collection Procedures Law, and the Diesel Fuel Tax Law impose, or otherwise provide for, the levy of taxes or fees, as provided.

This bill would amend all of those laws to uniformly provide that a levy has the same effect as a levy pursuant to writ of execution, with designated exceptions, and to exempt certain earnings and deposit accounts from continuous levy, as specified.

The Motor Vehicle Fuel License Tax Law, Use Fuel Tax Law, Cigarette and Tobacco Products Tax Law, Alcoholic Beverage Tax Law, and other laws with respect to various state levies, provide for the recovery of an erroneously granted refund or credit, or any part thereof, by means of a legal action filed by the Controller and prosecuted by the Attorney General in the County of Sacramento.

This bill would, as an alternative to these recovery actions, authorize the State Board of Equalization to recover an erroneous refund or credit, or any part thereof, by means of a deficiency determination that is made by the board, as provided, within 3 years of the date of the erroneous refund or credit. This bill would modify the Energy Resources Surcharge Law and the Emergency Telephone Users Surcharge Act to also authorize the recovery of an erroneously granted credit or refund, or any part thereof, by means of either a legal action filed by the board or a deficiency determination made by the board, as provided. This bill would also make technical, nonsubstantive changes to those provisions regarding the venue, prosecution, and rules governing a legal action filed by the Controller to recover an erroneously granted refund or credit.

Ch. 610 (AB 425) Baldwin. Community college facilities: building standards.

Existing law requires the Department of General Services to supervise the design and construction of certain school buildings to ensure that plans and specifications comply

with structural safety standards and to ensure that the work of construction has been performed in accordance with the approved plans and specifications.

The bill would authorize a community college district to purchase, for use as a school building, any offsite building constructed prior to January 1, 1998, that meets certain requirements. The bill would also authorize a community college district to lease, for use as a community college building, an offsite commercial building that meets certain requirements.

Ch. 611 (AB 508) Takasugi. Accountancy: volunteer services.

Existing law establishes the State Board of Accountancy to regulate the profession of public accountancy.

This bill would authorize the board, until January 1, 2004, to enter into a contract with a nonprofit organization controlled by licensees of the board to provide volunteer accounting services, as specified, within the state.

This bill would require the board to solicit bids from proposed contractors for those services, and would require the contractor to report program results to the board quarterly and to the Legislature annually. The bill would authorize the board to use funds in the Accountancy Fund to pay the costs of the contract upon appropriation in the Budget Act, and would require annual audits of the contract, as specified.

Ch. 612 (AB 821) Takasugi. Taxpayer bill of rights.

The Katz-Harris Taxpayers' Bill of Rights Act, among other things, governs the assessment, audit, and collection of various state taxes administered by the State Board of Equalization.

This bill would expand, modify, or supplement that taxpayer's act with respect to provisions relating to, among other things, relief of interest, installment payment agreements, interest on erroneous refunds, education and information programs, reimbursement of certain fees and expenses, return of levied property, release of lien to facilitate collection or in the best interest of the state and taxpayer, and private delivery systems, as provided.

Ch. 613 (AB 1384) Havice. Controlled substances: abatement.

Under existing law, the conduct of certain unlawful activities relating to controlled substances in any building constitutes a nuisance, which may be abated in an action brought by a city attorney or district attorney. Existing law also defines unlawful detainer by a tenant or subtenant to include the commission of a nuisance upon the premises or use of the premises for an unlawful purpose. The sale of a controlled substance on the premises or the use of the premises in furtherance of that activity is deemed to be such a nuisance relating to unlawful detainer. The law relating to unlawful detainer sets forth a summary procedure by which a landlord may demand possession of the premises and evict the tenant or subtenant.

This bill would authorize a city attorney or city prosecutor to file an action for unlawful detainer against any person who is guilty of unlawful detainer by engaging in the above specified activities relating to controlled substances, subject to the procedural requirements contained in those provisions as well as additional procedural requirements prescribed in this bill wherein the court is authorized to issue a partial eviction, as specified. The bill would make this provision applicable only to specified court jurisdictions in Los Angeles County and repeal it as of January 1, 2002, unless a later enacted statute deletes or extends that date.

The bill also would require the city attorney and city prosecutor to maintain specified records of all actions filed pursuant to these provisions and, commencing January 1, 2000, to annually file copies thereof with the Judicial Council by January 30 of each year. The bill additionally would require the court, after judgment is entered in any proceeding brought under these provisions, to submit to the Judicial Council, on a form provided by the Judicial Council, information on the case. The bill would require the Judicial Council thereafter to submit a brief report to the Senate and Assembly Judiciary Committees on or before January 1, 2001, summarizing the information collected thereby, and evaluating the merits of the pilot program established by these provisions.

This bill would contain legislative findings as to the necessity of a special statute.

Ch. 614 (AB 1705) Torlakson. Cremated remains.

Existing law imposes various requirements upon funeral directors with respect to entering into a contract for furnishing services or property in connection with the burial or other disposal of a dead human body.

This bill would require a funeral director to obtain from a person with the right to control the disposition, or from a person prearranging for the cremation and disposition of his or her own remains, a signed declaration designating, among other things, specific instructions with respect to the disposition of cremated remains. The funeral director, when entering into a contract to furnish cremation services, would also be required to provide a written or printed notice to the potential purchaser of cremation services as to obtaining additional information on cremation matters, removal of cremated remains, and cremated remains containers.

Existing law prohibits any person from disposing of or offering to dispose of any cremated human remains unless registered as a cremated remains disposer. Existing law specifies certain information to be included on the registration form.

This bill would additionally require every registered cremated remains disposer to post a copy of his or her current pilot's license or boating license, if cremated human remains will be scattered by air or boat, and the address of the cremated remains storage area. The bill would require the Department of Consumer Affairs to prepare and deliver to every registered cremated remains disposer a booklet, as specified. It would also permit cremated remains to be scattered or placed in areas where no local prohibition exists, would require a permit for disposition to contain the address or description of the place where remains are to be buried or scattered, and would authorize a state or local agency to adopt an ordinance, regulation, or policy authorizing or prohibiting the scattering of cremated human remains, as specified. The bill would provide that the placement or scattering of the cremated remains of more than one person in one location pursuant to this section shall not create a cemetery pursuant to specified existing law, or any other provision of law. The bill would also require a cremated remains disposer to dispose of cremated remains within 60 days of the receipt of those remains, unless a written signed reason for a delay is presented to the person with the legal right to control the disposition of the remains, and to provide the Cemetery Program with certain names and addresses, as specified.

Existing law authorizes the burial of cremated human remains at sea.

This bill would replace references to burial at sea of cremated remains, and refer instead to scattering at sea, and include inland navigable waters, exclusive of lakes and streams, within the scope of that authorization but would exclude from that authorization the scattering of cremated human remains within 500 yards of the shoreline. The bill would provide that these provisions shall not be construed to allow the scattering of cremated human remains from a bridge or pier.

The bill would provide that certain provisions shall not become operative if AB 1314 of the 1997-98 Regular Session is chaptered and adds Section 9744.5 to the Business and Professions Code.

Ch. 615 (AB 1986) Migden. Headwaters Forest, Owl Creek, and Grizzly Creek: appropriation.⁸

Existing law recognizes the importance of protecting and preserving forest resources.

This bill would appropriate \$130,000,000 from the General Fund to the Controller for allocation to the Wildlife Conservation Board, until July 1, 1999, to acquire specified lands known as the Headwaters Forest Preserve, the Elk Head Forest, and the Elk River Property, which are located in the County of Humboldt, in accordance with specified requirements. The bill would prohibit any funds appropriated under the bill from being encumbered until specified conditions have occurred.

The bill would also appropriate \$80,000,000 from the General Fund to the Controller for allocation to the board, until July 1, 2001, to purchase a specified tract of land identified as "Owl Creek", as specified.

The bill would also appropriate from the General Fund to the Controller, \$15,000,000 for allocation to the County of Humboldt for economic assistance, up to \$20,000,000 for allocation to the board for the purchase of the Grizzly Creek Marbled Murrelet

NOTE: Superior numbers appear as a separate section at the end of the digests.

Conservation Area, and \$500,000 for allocation to the board for administrative expenses and costs related to the acquisition of those properties.

The bill would declare that it is to take effect immediately as any urgency statute.

Ch. 616 (AB 2145) Pacheco. Electronic learning resources.

Under existing law, it is the policy of the State of California that all students enrolled in the state's public elementary and secondary schools have equitable access to educational programs designed to strengthen technological skills, including, but not limited to, computer education programs.

This bill would require the State Board of Education, after consultation with the Superintendent of Public Instruction, the State Department of Education, and any other interested parties, to report to the Legislature no later than March 1, 1999, specific recommendations for legislative action on how the current instructional materials adoption process can be improved or supplemented to enable the timely adoption of electronic learning resources.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 617 (AB 2173) Pacheco. Firefighters: workers' compensation.

Under existing law, a person injured in the course of employment is generally entitled to workers' compensation. Under existing law, whenever any firefighter is injured, dies, or is disabled by reason of his or her proceeding to or engaging in a fire suppression or rescue operation, or the protection or preservation of life or property, anywhere in this state, the firefighter is entitled to the same benefits under provisions relating to workers' compensation that he or she would have received had that firefighter been acting under the immediate direction of his or her employer.

This bill would provide that the above provisions also apply to firefighters employed by a private entity.

Under existing law, the provision requiring the provision of benefits to local public agency firefighters does not require any benefits to be provided if the local public entity prohibits the activity giving rise to the injury, death or disability.

This bill would provide that this provision does not relieve a private or local public agency employer from liability for benefits for any injury, disability, or death of a firefighter when the firefighter is acting pursuant to a specified provision regulating emergency services.

Ch. 618 (SB 19) Lockyer. Mediation.

Existing law authorizes the submission to mediation of all at-issue civil actions in which arbitration is otherwise required, as specified, in the courts of the County of Los Angeles, and in other counties that elect to proceed pursuant to these provisions. Existing law provides for the repeal of these provisions on January 1, 1999.

This bill would make these provisions effective indefinitely.

Ch. 619 (SB 29) Maddy. Horse racing.

Existing law authorizes fairs, as defined, to conduct horse racing meetings and accept parimutuel wagering on horse races. Existing law provides that fairs conducting horse racing meetings in the northern zone may jointly develop a horse stabling and training facilities program.

This bill would allow fairs that conduct live horse racing meetings in the northern zone to allow a joint powers authority to administer and distribute purses and to achieve the purposes of increasing purses at racing events at those fairs.

Existing law, with certain exceptions, prohibits a person licensed to conduct a racing meeting from paying or distributing to, or on behalf of, any horse owner, any agent, or person or organization representing any horse owner or owners, purses, or any other type of consideration to, or for, the benefit of horsemen, other than that expressly provided in the Horse Racing Law.

This bill would add an exception to that prohibition for a payment by a fair in connection with promotional contests or sponsorship contributions.

Ch. 620 (SB 143) Kopp. Records.

(1) Existing provisions of the California Public Records Act require each state and local agency, as defined, to make its records open to public inspection at all times during office hours, except as specifically exempted from disclosure by law. The act also defines the terms "writing," "person," and "member of the public."

This bill would revise the definitions of local agency and "writing" and would define "public agency." The bill would also provide for public inspection of public records and copying in all forms, as specified. The bill would further require public agencies to ensure that systems used to collect and hold public records be designed to ensure ease of public access.

This bill would expressly state that notwithstanding the definition of "member of the public," an elected member or officer of any state or local agency is entitled to access to public records of that agency on the same basis as any other person and would state that it is declaratory of existing law.

This bill would incorporate changes made to the California Public Records Act by the Governor's Reorganization Plan of 1991, including adding the Department of Toxic Substances Control and the Office of Environmental Health Hazard Assessment to the list of state and local bodies that are required to establish written guidelines for accessibility of records.

(2) Existing law provides that the California Public Records Act shall not be construed to require disclosure of records, the disclosure of which is exempted or prohibited by provisions of federal or state law.

This bill would list specific provisions of law coming within that exemption.

By requiring a higher level of service of local agencies in administering the California Public Records Act, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates which do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that this bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to those statutory procedures and, if the statewide cost does not exceed \$1,000,000, shall be made from the State Mandates Claims Fund.

Ch. 621 (SB 155) Kelley. Veterinary medicine: license renewal: continuing education.

Existing law requires persons licensed by the Veterinary Medical Board to biennially apply for renewal of their licenses or registrations.

This bill would, commencing January 1, 2002, require the board to issue renewed licenses only to applicants that have completed a minimum of 36 hours of approved continuing education in the preceding 2 years, as specified. The bill would require persons renewing their licenses or applying for relicensure or reinstatement to submit proof of compliance to the board subject to a penalty of perjury provision, and would specifically provide that false statements submitted in that regard would be subject to existing misdemeanor provisions punishable by a fine or imprisonment, or both.

A violation of the penalty provisions of the bill would expand the scope of the existing misdemeanor provision, and would thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 622 (SB 266) Rosenthal. Earthquake Insurance.

Existing law provides for creation of the California Earthquake Authority, which is authorized to transact insurance for the purpose of selling policies of basic residential earthquake insurance, as specified.

Existing law provides that policyholders who have retrofitted their homes to withstand earthquake shake damage according to specified standards shall enjoy a premium

discount or credit of not less than 5% on the authority-issued policy of residential earthquake coverage, as long as the discount or credit is determined actuarially sound by the authority.

This bill would provide that those policyholders shall enjoy a premium discount or credit of 5%, as specified, and would authorize the authority's governing board to approve a larger credit or discount if it is actuarially sound.

Existing law establishes an earthquake mediation program, and provides that those provisions would become inoperative on July 1, 1998.

This bill would permit the program to remain operative until January 1, 2000.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 623 (SB 1383) Leslie. Personal income taxes: bank and corporation taxes: sales and use taxes: withholding taxes: administration.

Existing provisions relating to the administration of the personal income and bank and corporation tax laws provide that the information furnished pursuant to those laws shall be used solely for the purpose of administering the tax laws or other laws administered by the person or agency obtaining the information. Existing law makes any unwarranted disclosure or use of that information by the person or agency, or the employees and officers thereof, a misdemeanor. Existing law prohibits the disclosure of any information concerning any taxpayer by the State Board of Equalization, except as specifically authorized by statute.

This bill would also make any willful unauthorized inspection or unwarranted disclosure or use of that information by those persons or agencies a misdemeanor.

This bill would also establish a similar offense respecting the administration of the sales and use tax law and the unemployment insurance law relating to withholding taxes on wages. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 624 (SB 1430) Solis. Workers' compensation: privacy.

Existing law provides that a person not a party to a workers' compensation claim may not obtain individually identifiable information maintained by the Division of Workers' Compensation, except as specified. However, this provision does not exempt a record from disclosure if it is a public record under the Public Records Act, once an application for adjudication has been filed.

This bill would provide, however, with regard to those types of public records, that individually identifiable information shall not be provided to any person or public or private entity who is not a party to the claim unless the requester provides identification and states the reason for making the request. The bill would authorize the Administrative Director of the Division of Workers' Compensation to require the requester to verify the validity and correctness of the name and address of the requester. It would require a notice if the information is for preemployment screening.

The bill would provide that any residence address is confidential and shall not be disclosed, except as specified. The bill would provide, however, that these provisions shall not prohibit the use of individually identifiable information for purposes of identifying bona fide lien claimants.

This bill would state legislative intent in this regard, and would provide that its provisions are severable.

Ch. 625 (SB 1663) O'Connell. Child day care facilities: administering inhaled medication.

Existing law, the Respiratory Care Practice Act, regulates the practice of respiratory care and is administered by the Respiratory Care Board of California within the jurisdiction of the Medical Board. Existing law provides that these provisions do not prohibit certain acts related to respiratory care.

This bill would provide that these regulatory provisions do not prohibit licensees and staff of child day care facilities from administering to a child inhaled medication as defined by this bill.

Existing law sets forth provisions for the licensure and regulation of child day care facilities administered by the State Department of Social Services contained in the Health and Safety Code.

This bill would provide that licensees and staff of child day care facilities may administer inhaled medication, as described, to a child if certain requirements are met, including designated training.

Existing law requires that a day care center director ensure that at least one staff member that has a current certificate in pediatric first aid and pediatric cardiopulmonary resuscitation issued by a training program that has been approved by the Emergency Medical Services Authority be available at all times when children are present at the facility or when children are offsite of the facility for facility activities. Existing law requires the authority to establish minimum standards for the training requirements under this provision.

This bill would require the authority to establish minimum standards for a component of pediatric first aid training that satisfies the designated training requirements of the bill with regard to the administration of inhaled medication.

Existing law establishes the Child Care and Development Services Act, whereby the Superintendent of Public Instruction administers child care and development services programs, including state preschool, general child care and development programs, and early primary programs.

The bill would also provide that nothing in these provisions shall be interpreted to require a certificated teacher who provides day care pursuant to the Child Care and Development Services Act in a public school setting to administer inhaled medication.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 626 (SB 1666) Solis. Student Opportunity and Access Program.

Existing law establishes the Student Opportunity and Access Program administered by the Student Aid Commission and requires the commission to apportion funds for the support of projects designed to increase the accessibility of postsecondary educational opportunities to low-income and ethnic minority elementary and secondary school students. Pursuant to existing law, these provisions become inoperative on June 30, 1999, and are repealed on January 1, 2000.

This bill would repeal the inoperative date and the repeal date, and would, instead, authorize the Student Aid Commission to apportion funds on a progress payment schedule for the support of projects designed to increase the accessibility of postsecondary educational opportunities for prescribed elementary and secondary students, including, but not limited to, students from schools that have low eligibility and college participation rates.

Existing law provides for appointment of 2 of the student members of the project grant advisory committee of the Student Aid Commission by the student advisory committee of the California Postsecondary Education Commission.

This bill would, instead, provide for appointment of the 2 student members by the California Postsecondary Education Commission.

Existing law requires projects to be proposed and operated through a consortium of various educational entities, including, but not limited to, the California Maritime Academy, the University of California, the California State University, and independent colleges or universities or eligible private vocational or technical schools.

This bill would delete the reference to these entities, and would instead require the consortium to include at least one 4-year college or university. The bill would make other technical, nonsubstantive and conforming changes.

Ch. 627 (SB 1752) Hughes. Disclosure of grade point average adjustment methodology.

Existing law expresses the intent of the Legislature that the University of California and the California State University develop processes that strive to be fair and are easily

understandable in determining the standards and criteria for undergraduate and graduate admissions.

This bill would request the Regents of the University of California, and would require the Trustees of the California State University, to disclose, upon the request of an applicant for admission, information regarding the methodology used to adjust an applicant's grade point average.

Ch. 628 (SB 1781) Peace. Public utilities: city-owned electric utilities.

Existing law requires a city-owned electric utility to report at least annually on ratepayers' electric bills the amount expected to be transferred to the general fund of the city.

This bill would require that report to also specify the amount to be transferred from the utility to any special funds of the city.

Ch. 629 (SB 1878) Kopp. Murder: special circumstances.

(1) Existing law, as amended by initiative statute, provides that the penalty for a defendant found guilty of murder in the first degree shall be death, or confinement in the state prison for a term of life without the possibility of parole, where one or more special circumstances have been charged and found to be true. In this connection, existing law provides that a first degree murder committed while lying in wait, and a murder committed in the commission of specified felonies, including kidnapping and arson, are special circumstances for sentencing purposes.

This bill would redefine lying in wait to instead provide that a defendant who intentionally kills a victim by means of lying in wait is subject to these provisions. The bill would also provide that a defendant who is shown to have committed the elements of kidnapping or arson in connection with a murder, is subject to these provisions if there is specific intent to kill, notwithstanding the fact that the kidnapping or arson was committed primarily or solely for the purpose of facilitating the murder.

(2) The bill would state that the Legislature's intent in enacting these provisions is to create a statutory exception to the "independent purpose" doctrine, as established by specified cases.

(3) The bill would provide that it shall become effective only when submitted to, and approved by, the voters of California.

Ch. 630 (SB 1927) Schiff. Criminal procedure: discovery.

Existing law, added by initiative statute, requires the prosecuting attorney and the attorney for the defendant to disclose to each other specified materials and information in his or her possession, or known to be in the possession of investigators, including, among other things, names and addresses of witnesses the attorneys intend to call, as well as their statements and statements of the defendant. The initiative measure provides that any amendment of its statutory provisions by the Legislature requires a $\frac{2}{3}$ vote of each house.

This bill would prohibit the prosecuting attorney, attorney for the defendant, or investigator for either the prosecution or the defendant from interviewing, questioning, or speaking to a victim or witness whose name has been disclosed by the defendant pursuant to existing law without first clearly identifying himself or herself and identifying the full name of the agency by whom he or she is employed, and identifying whether he or she represents, or has been retained by, the prosecution or the defendant. Under the bill, if an interview takes place in person, the party would be required also to show the victim or witness a business card, official badge, or other form of official identification before commencing the interview or questioning. The bill would authorize the court to issue a discovery order, as specified, upon a showing that a person has failed to comply with these provisions. By adding procedures required in criminal discovery that are subject to the courts' enforcement, this bill would amend the initiative measure and thereby require a $\frac{2}{3}$ vote.

Ch. 631 (SB 2034) Lockyer. Criminal street gangs: nuisance.

Existing law provides that every building or place used by members of a criminal street gang for the purpose of committing specified offenses is a nuisance and requires that the nuisance be enjoined subject to specified conditions.

This bill would authorize the Attorney General, after an injunction has been issued pursuant to the above provision, to maintain an action for money damages on behalf of the community or neighborhood injured by the nuisance. Any money damages awarded would be paid by or collected from assets derived from the criminal activity abated or enjoined and belonged to the criminal street gang or members of that gang who knew or should have known of the unlawful acts. The bill would authorize the Attorney General to utilize expert witnesses for this purpose. The bill would require that any damages recovered be deposited into a fund for payment to the local jurisdiction where the nuisance occurred, to be used solely for the benefit of the injured community or neighborhood.

Ch. 632 (SB 2055) Costa. Department of the Youth Authority: county payment rates.

Existing law requires each county to pay the state either \$150 per month or, in specified instances, an alternative rate for each person committed to the Department of the Youth Authority by a juvenile court in that county. Calculation of the alternative rates paid by the county is based upon specified percentages of the per capita institutional cost of the department.

This bill would define "per capita institutional cost," not to exceed a specified maximum, and require the Department of the Youth Authority to provide counties with monthly statements of the department's per capita institutional cost.

Ch. 633 (SB 2217) O'Connell. Contractors: small operations.

Existing provisions of the Contractors' State License Law regulate the licensure and discipline of contractors, but exempt from those provisions work for which the aggregate contract price is less than \$300. Existing law authorizes the Registrar of Contractors to issue citations containing orders of abatement and civil penalties against persons acting as contractors without a license.

This bill would increase the maximum contract price applicable to this exemption to less than \$500. It would require unlicensed persons performing work with a maximum contract price costing less than \$500 to disclose to the purchaser, pursuant to a written notification, as specified, that he or she is not licensed by the Contractors' State License Board. It would also make certain conforming changes, including authorizing the Registrar of Contractors to issue citations against persons failing to maintain this written notification.

Ch. 634 (SB 1138) Johannessen. Veterans farm and home purchase program: disasters indemnity fund.

Existing law relating to the veterans farm and home purchase program requires the Department of Veterans Affairs to maintain an indemnity fund for indemnifying purchasers for the cost of repairing structural damage in excess of \$500 caused by prescribed floodwaters, and for the cost of repairing structural damage in excess of 5% of the total covered loss or \$500, whichever is greater, caused by earthquake, volcanic eruption, landslide, or mudslide, and requires purchasers electing to participate in the Indemnity Fund to pay a fee in addition to the regular monthly installment. Existing law appropriates this money for the purpose of the fund.

This bill would require that all purchasers participate in the Indemnity Fund. By increasing amounts to be deposited into a continuously appropriated fund, this bill would make an appropriation.

Ch. 635 (AB 1342) Napolitano. Redevelopment plans.

Existing law, effective January 1, 1994, known as the Community Redevelopment Law Reform Act of 1993, enacted numerous revisions in the Community Redevelopment Law, including imposing specified time limitations on redevelopment plans, prohibiting an agency from paying indebtedness or receiving property taxes after 10 years from the

termination of the plan, and authorizing the extension of those time limits in certain instances if prescribed procedures are followed.

This bill would authorize a legislative body to amend a redevelopment plan adopted prior to January 1, 1994, that has a shorter limitation, to extend the limitation, not to exceed those specified time limitations, by adoption of an ordinance on or after January 1, 1999, but on or before December 31, 1999, without complying with those prescribed procedures.

Ch. 636 (AB 1789) Mazzoni. Historical property contracts: cancellation fee.

(1) Existing law requires the owner of property in a historical zone for which the owner has contracted to restrict its uses to pay a cancellation fee of 12¹/₂% of the full value of the property if the legislative body of the city or county cancels the contract for prescribed reasons. The fees are paid to the Controller and deposited in the General Fund.

This bill would change that fee to 12¹/₂% of the current fair market value of the property, and require the fees to be paid to the county auditor and allocated to local jurisdictions in the same tax rate area in the same manner as the annual tax increment is allocated. The bill would impose a state-mandated local program by imposing new duties on the county auditor.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 637 (AB 1953) Baca. Public holidays: Native American Day.

(1) Existing law requires the Governor to proclaim annually the fourth Friday in September to be "California American Indian Day."

This bill would rename that day to be "Native American Day."

(2) Existing law prescribes the holidays in this state for state agencies, public schools and community colleges.

This bill would provide that the 4th Friday in September shall be a holiday in this state to be referred to as "Native American Day." The bill would authorize public school and community college governing boards pursuant to memoranda of understanding to provide that the 4th Friday in September shall be a holiday known as "Native American Day," and would authorize exercises, funded through existing resources, to be conducted in all schools respecting that day. This bill would authorize the State Board of Education to adopt a model curriculum guide related to "Native American Day."

Existing law variously provides that state employees are entitled to certain paid holidays, one personal holiday per fiscal year, and vacation, annual leave, or compensating time off, as the case may be, unless a collective bargaining agreement provides otherwise.

This bill would permit a state employee to elect to receive 8 hours of holiday credit for the 4th Friday in September, to be known as "Native American Day," in lieu of receiving 8 hours of personal holiday credit, or to elect to use 8 hours of vacation, annual leave, or compensating time off for the 4th Friday in September, depending on the bargaining unit under which the employee is represented.

Ch. 638 (AB 2061) Granlund. Child care and development services: public recreation programs.

Existing law requires the Superintendent of Public Instruction to administer child care and development programs. Under existing law, the superintendent may enter into and execute local contractual agreements with any public or private entity or agency for the delivery of child care and development services.

Existing law establishes 3 stages of child care services through which a recipient of aid under specified provisions of law, or any successor program, will pass.

This bill would require the Superintendent of Public Instruction to allocate stage two funds appropriated for the 1998–99 fiscal year, in San Bernardino County where parties were unable to agree on a single implementation plan for stage two child care funds, to the contractor currently serving families from that county that demonstrates the greatest ability to coordinate services with the entity responsible for delivery of stage one child care services.

Existing law exempts certain facilities from the requirements of the California Child Day Care Act and the Day Care Centers Act (the acts).

This bill would also exempt from the acts any public recreation program in Riverside County that meets certain criteria. The bill would make those provisions inoperative on September 1, 2001, and would repeal them as of January 1, 2002.

This bill would declare that, due to the unique circumstances within San Bernardino County, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 639 (AB 2416) Committee on Governmental Organization. Alcoholic beverages.

(1) Existing law requires an out-of-state beer manufacturer to have an out-of-state beer manufacturer's certificate in order to ship beer manufactured outside the state to licensed importers in the state. Annual fees for the certificate are required to be determined by the Department of Alcoholic Beverage Control and approximate the cost of investigation of the applicant and issuance of the certificate.

This bill would remove the requirement that these fees include the cost of investigation of the applicant.

(2) Existing law makes it unlawful for any person other than a licensee of the Department of Alcoholic Beverage Control to sell, manufacture, or import alcoholic beverages in this state. Existing law provides that no license or permit shall be required for the serving of alcoholic beverages in a limousine by any person operating a limousine service regulated by the Public Utilities Commission, provided there is no extra charge or fee for the alcoholic beverages.

This bill would provide that no license or permit is required for the serving of alcoholic beverages as part of a hot air balloon ride service, provided there is no extra charge or fee for the alcoholic beverages.

(3) Existing law provides for the issuance of an on-sale general alcoholic beverage license to a person who does not operate a bona fide eating place or other public premises and who meets specified conditions, including, among other things, operating a catering business for not less than 5 years, catering over 500 events annually, operating or owning, for not less than 4 years, a bona fide eating place that had an on-sale license, and serving alcoholic beverages at no more than 25% of the events catered.

This bill would revise one of these conditions by requiring that the licensee own or operate a bona fide eating place that had an on-sale license for not less than one year rather than 4 years.

(4) The Alcoholic Beverage Control Act permits licensees to hold stock in various corporate licensees under specified conditions, among which is that the stock be listed on the New York or American Stock Exchanges.

This bill would also permit the stock ownership if the stock is listed on NASDAQ.

(5) Existing law provides that the possession, consumption, sale, gift, or delivery of an alcoholic beverage in or on any public schoolhouse or its grounds constitutes a misdemeanor. Under existing law, this provision does not make it unlawful to acquire, possess, or use an alcoholic beverage if the alcohol is acquired, possessed, or used during events at a stadium with a capacity of more than 18,900 people, located in a county of the 14th class, that is owned or operated by a college.

This bill would delete the provisions requiring that a college-owned or college-operated facility be a stadium, have a capacity of more than 18,900 people, and be located in a county of the 14th class in order for the acquisition, possession, or consumption of alcoholic beverages not to be unlawful.

The bill would also provide that it is not unlawful if the alcoholic beverages are possessed, consumed, or sold, for an event during the weekend or at other times when pupils are not on the grounds of an overnight retreat facility owned and operated by a county office of education in a county of the 18th class.

(6) The bill would also make various changes to provisions affecting licensure of corporations, limited partnerships, and limited liability companies under the Alcoholic Beverage Control Act.

Ch. 640 (AB 2473) Strom-Martin. Highways: signs: services available.

Existing law, until January 1, 1999, requires the Department of Transportation to administer a program, as prescribed, for the placement of generic, tourist-oriented directional signs along highways in rural areas, except as specified, to guide motorists to facilities and attractions that are eligible for signs under specified criteria.

This bill would extend the provisions of that law until January 1, 2004.

Ch. 641 (SB 1554) Kopp. Real estate brokers.

(1) Existing law provides for the licensure and regulation of real estate brokers. Existing law requires a real estate broker who is performing certain specified acts in negotiating a loan to be secured by a lien on real property or on a business opportunity, or performing certain specified acts in negotiating the sale of a real property sales contract or promissory note secured directly or collaterally by a lien on real property, to provide the prospective lender or the prospective purchaser, as the case may be, with a disclosure statement, as specified. Existing law requires that the disclosure statement include the estimated fair market value of the securing property, and, if that estimate is based upon an appraisal, certain information regarding the appraisal and the appraiser.

This bill would instead require that the disclosure statement include the estimated fair market value of the securing property as determined by an appraisal, as specified, and would require the real estate broker to provide a copy of that appraisal to the lender or purchaser. It would, however, authorize lenders or purchasers to waive this requirement, in which case the real estate broker would be required to provide the broker's written estimated fair market value of the securing property, including the objective data upon which the broker's estimate is based. This bill would also require the broker to provide to the prospective lender or purchaser the option to apply to purchase a title insurance policy or an endorsement to an existing title insurance policy covering the real property, and to provide a copy of a written loan application and a credit report, as applicable.

(2) Existing law requires any real estate licensee who undertakes to service a promissory note secured directly or collaterally by a lien on real property or a real property sales contract to have a written authorization from the borrower or lender or holder of the contract.

This bill would instead require the real estate licensee, in this regard, to (1) have a written authorization from the borrower, the lender, or the owner of the note or contract that is included within the terms of a written servicing agreement satisfying specified requirements, (2) provide the lender or the owner of the note or contract with specified accountings of the note or contract, and (3) provide to the lender or the owner of the note or contract written notification of the recording of a notice of default, the recording of a notice of trustee's sale, the receipt of any payment constituting an amount greater than or equal to 5 monthly payments, together with a request for partial or total reconveyance of the real property, or the delinquency of any installment or other obligation over 30 days.

This bill would also authorize the commissioner to conduct certain audits of brokers, and would make certain changes regarding when the broker must pay for the costs of those and similar audits. It would also increase certain reporting requirements of brokers and would make certain other changes to the disclosure requirements of brokers.

(3) Existing law prescribes certain requirements, known as "multilender" requirements, on real estate brokers with respect to the sale of or offer to sell a series of notes secured directly by an interest in the same real property, or the sale of undivided interests in a note secured directly by real property that is equivalent to a series

transaction. These requirements include certain maximum "loan to value" percentages by property type.

This bill would make certain changes regarding the calculation and applicability of these "loan to value" percentages, and would increase the maximum "loan to value" percentages for certain single-family residentially zoned lots or parcels.

(4) Existing law establishes in the Real Estate Fund the Recovery Account, which is continuously appropriated for purposes of funding the Real Estate Recovery Program. The account is funded by crediting a specified percentage of any real estate license fee collected unless the balance in the Recovery Account is at least \$3,000,000. Existing law provides that when an aggrieved person obtains a final judgment in a court of competent jurisdiction or an arbitration award against a defendant based upon the defendant's fraud, misrepresentation, or deceit, made with intent to defraud, or the defendant's conversion of trust funds arising directly out of any transaction in which the defendant, a real estate licensee, performed acts for which his or her license was required, the aggrieved person may file an application with the Department of Real Estate for payment from the Recovery Account of the amount unpaid in the judgment which represents an actual and direct loss to the claimant in the transaction.

This bill would provide for the crediting of fees to the Recovery Account unless the balance is at least \$3,500,000, operative July 1, 2000. It would authorize payments from the Recovery Account with respect to any such transaction in which the defendant real estate licensee performed acts for which a real estate license was required. It would permit recovery based upon a judgment against a salesperson only in specified instances.

By expanding the scope of eligible claims that can be made against the Recovery Account, this bill would make an appropriation.

(5) Existing law makes it a crime to willfully violate any of the provisions governing real estate, including those governing real estate brokers.

By adding these new requirements for real estate brokers, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

(6) Existing law, known as the Escrow Law, provides for the licensure and regulation of escrow agents, and provides for the exemption of certain persons from that law, including any person licensed to practice law in the state who is not actively engaged in conducting an escrow agency.

This bill would instead exempt from the Escrow Law, any person licensed to practice law in the state who has a bona fide client relationship with a principal in a real estate transaction and who is not actively engaged in conducting an escrow agency.

(7) Existing law establishes the Fidelity Corporation for the purpose of indemnifying escrow agent members against loss, subject to specified limitations.

This bill would also specify that the Fidelity Corporation shall not be liable to pay a member's claim brought after the expiration of 2 years from the time when the act or default complained of occurs.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 642 (SB 1648) C. Wright. Health and welfare: funding.

Existing law creates the continuously appropriated Local Revenue Fund, which is divided into various accounts and subaccounts, in order to provide revenue to local jurisdictions for specified local health and social services programs.

Existing law provides for allocations from accounts in the Local Revenue Fund to the County Medical Services Subaccount and the Special Equity Subaccount in the Sales Tax Growth Account.

This bill would permit, under certain circumstances, allocations to be made to these subaccounts from the Vehicle License Fee Growth Account in the Local Revenue Fund, thus constituting an appropriation.

This bill would also make technical nonsubstantive changes in these provisions.

Ch. 643 (SB 1664) Sher. Surface mining operations: lead agencies: financial assurances.

Under existing law, the Surface Mining and Reclamation Act of 1975, a person is generally prohibited from conducting a surface mining operation without a permit from, and a reclamation plan and financial assurances approved by, the lead agency for the operation. The act requires lead agencies to require financial assurances of each surface mining operation to ensure reclamation is performed in accordance with the surface mining operation's approved reclamation plan, as specified, and allows that financial assurances may take the form of, among other things, surety bonds that the lead agency reasonably determines are adequate to perform reclamation in accordance with the surface mining operation's approved reclamation plan. The act further requires that financial assurances be made payable to the lead agency and the Department of Conservation, as specified.

This bill would require that financial assurances in the form of a surety bond be executed by an admitted surety insurer, as defined.

The act authorizes the State Mining and Geology Board to adopt regulations specifying financial assurance mechanisms other than surety bonds, irrevocable letters of credit, and trust funds, which the board determines are reasonably available and adequate to ensure reclamation pursuant to the act, but prohibits those mechanisms from including financial tests.

This bill would additionally prohibit those financial assurance mechanisms from including surety bonds executed by one or more personal sureties.

This bill would authorize the use of a surety bond executed by any personal surety that was approved by the lead agency prior to February 13, 1998, to ensure that reclamation is performed in accordance with a reclamation plan approved by a lead agency prior to that date, and to satisfy the requirements of the act requiring financial assurances for surface mining operations, if the amount of the financial assurance required to perform the approved reclamation plan, as amended or updated, does not change from the amount approved prior to February 13, 1998.

Ch. 644 (SB 1760) Haynes. Development: fees and charges.

(1) Existing law provides that fees and charges imposed for water and sewer connections shall not exceed the estimated reasonable cost of providing the service for which the fee or charge is imposed, unless a question regarding the amount of the fee or charge imposed in excess of this cost is submitted to and approved by $\frac{2}{3}$ of the electors voting on the issue.

This bill would provide that fees and charges collected on or after January 1, 1999, by a local agency for water and sewer connections, as specified, are subject to certain requirements. The bill would also require the local agency to make available to the public, within 180 days after the last day of each fiscal year, information about capacity charges, as specified, and would exclude certain moneys and other specified charges from these provisions.

By expanding the duties of a local agency with respect to the expenditure and refund of fees and charges for water and sewer connections, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 645 (SB 1989) Polanco. Real property disclosure: registered sex offenders.

Existing law requires the seller or lessor of residential real property, or the agents thereof, to make certain disclosures about the property.

This bill would require written leases and rental agreements for residential real property and contracts for sale of residential real property entered into on or after July 1, 1999, to contain a specified notice regarding the data base maintained by law enforcement authorities, as specified, with the locations of registered sex offenders. This bill would provide that, upon delivery of the notice, the lessor, seller, or broker is not

required to provide additional information regarding the proximity of registered sex offenders, and that a registered sex offender may not bring any cause of action against the disclosing party.

Ch. 646 (AB 80) Ducheny. Local government: substandard housing.

The Personal Income Tax Law and the Bank and Corporation Tax Law generally prohibit, in computing the income that is subject to the taxes imposed by those laws, the deduction by any taxpayer who derives rental income from substandard housing, as defined, of any interest, taxes, depreciation, or amortization paid during a taxable or income year with respect to the substandard housing.

This bill would extend this prohibition, with a specified exception for certain lenders, by expanding the definition of substandard housing to include dwellings that are unoccupied or abandoned for at least 90 days that have been cited for a condition that has been found to be a serious violation of certain state laws or local codes and that is a threat to public health and safety.

This bill would result in a change in state taxes for the purpose of increasing state revenues within the meaning of Section 3 of Article XIII A of the California Constitution by further limiting a deduction, and thus would require a $\frac{2}{3}$ vote for passage.

This bill would take effect immediately as a tax levy.

Ch. 647 (AB 162) Alby. Medicine: regulation.

Under existing law, the Medical Board of California enforces and administers the Medical Practice Act, the Department of Corporations regulates health care service plans under the Knox-Keene Health Care Service Plan Act of 1975, and the State Department of Health Services regulates and administers various health programs and facilities, including the Medi-Cal Act.

This bill would state the intent of the Legislature to streamline the regulatory process and reduce redundant reviews of the offices of physicians by coordinating, to the extent feasible, as many of those regulatory functions as possible.

This bill would require the Department of Corporations and the State Department of Health Services to coordinate, to the extent feasible, any physician office auditing required by the managed care program under the Medi-Cal Act or any physician office auditing or surveying required by the Knox-Keene Health Care Service Plan Act of 1975.

Ch. 648 (AB 734) Brown. Tobacco: STAKE Act.

Existing law, known as the STAKE Act, requires the State Department of Health Services to establish and administer a program to reduce the availability of tobacco products to minors. The STAKE Act prescribes certain civil penalties for violations of its provisions and provides that penalties collected each fiscal year through the 1998–99 fiscal year, up to a maximum of \$300,000 annually, shall be deposited in the Sale of Tobacco to Minors Control Account in the State Treasury, and after that fiscal year, shall be deposited in the General Fund.

This bill would instead provide that all civil penalties collected, regardless of fiscal year, up to a maximum of \$300,000 annually, shall be deposited in the Sale of Tobacco to Minors Control Account.

The STAKE Act provides that specified sums in specified fiscal years, through the 1998–99 fiscal year, shall be transferred annually from the portion of the federal Substance Abuse Prevention and Treatment block grant moneys allocated to the State Department of Alcohol and Drug Programs for administrative purposes related to substance abuse programs, to the Sale of Tobacco to Minors Control Account.

This bill would delete references in that provision to specified fiscal years and would delete an obsolete reference to a specified prior year transfer.

Ch. 649 (AB 911) Knox. Electric utility and telephone service suppliers: surcharges: security.

The Energy Resources Surcharge Law and the Emergency Telephone Users Surcharge Law require an electric utility or telephone service supplier to collect a state tax, known as a surcharge, from each consumer of electrical energy or telephone service

user. The electric utility or telephone service supplier must make quarterly payments of the collected surcharges to the State Board of Equalization, accompanied by a return.

This bill would authorize the State Board of Equalization to require any person subject to the Energy Resources Surcharge Law or the Emergency Telephone Users Surcharge Law, except as provided, to place security for the collected surcharges with the board. The board may determine the amount of the security, not to exceed twice the estimated average quarterly liability for that industry, or, for the telephone industry, three times the estimated average monthly liability. The security must be returned after a 3-year period of timely surcharge payments and returns filed.

Ch. 650 (AB 1133) Gallegos. Long-term health care facilities.

(1) Existing law, the Long-Term Care, Health, Safety, and Security Act of 1973, establishes an inspection and citations system for the imposition of civil sanctions against long-term health care facilities that are in violation of laws and regulations relating to patient care.

This bill would require the State Department of Health Services to promote quality in long-term health care facility services through certain services.

(2) Existing law requires the State Director of Health Services, if upon inspection or investigation the director determines a facility is in violation of the law, to issue a notice to correct the violation and of intent to issue a citation to the licensee, except with respect to violations determined to have only a minimal relationship to safety or health.

This bill would delete that exception. The bill would require the department to hold an exit conference with the licensee before completing the investigation and making the determination whether to issue a citation.

(3) Existing law sets forth procedures under which the State Director of Health Services is authorized to waive the penalty for a class "B" violation if the violation is corrected within the time specified in the citation.

This bill would eliminate this authority of the director to waive the penalty for a class "B" violation.

(4) Existing law provides for civil penalties in an amount not to exceed \$10,000 for a willful material falsification, as defined, or willful material omission, as defined, in the health record of a patient of a long-term health care facility. Existing law provides that in no case shall the civil penalty be trebled.

This bill would delete the latter restriction.

(5) Existing law requires a licensee, if the licensee intends to appeal a citation that has been upheld in a citation review conference, to appeal the decision through an administrative law judge. Existing law authorizes a licensee to elect to submit the matter to binding arbitration if the licensee is dissatisfied with the decision of the administrative law judge.

This bill would also authorize the licensee to elect to submit the matter to binding arbitration before submitting the matter to an administrative law judge and would set forth additional requirements relating to the binding arbitration.

(6) Existing law provides that where the department issues a citation as a result of a complaint or regular inspection visit, and a resident or residents are specifically identified in a citation by name as being specifically affected by the violation, certain persons may attend the citation review conference, including a personal attorney, if the long-term health care facility has an attorney present.

This bill would delete the requirement that the long-term health care facility have an attorney present for a personal attorney to attend the citation review conference.

(7) Existing law requires the department to notify the complainant, affected resident, or their designated representatives of the citation review conference and their right to participate.

This bill would require the department to notify the complainant, affected resident, and their designated representatives of this right.

(8) Existing law authorizes a licensee, in lieu of contesting a citation, to transmit to the department the minimum amount assessed for each violation within 15 business days after the issuance of the citation. Existing law provides that if the licensee requests a citation review conference that results in the citation being sustained for the same class of violation for which the citation was issued but the penalty assessed is reduced to at least

30% less than the amount originally assessed, the licensee is authorized to pay the minimum amount specified by law, or 50% of the amount determined by the citation review conference, whichever is greater, for each violation within 15 business days after notice of the citation review conference determination.

This bill would revise these provisions to authorize the licensee, in lieu of contesting a citation, to transmit to the department the minimum amount specified by law, or 65% of the amount specified in the citation, whichever is greater, for each violation within 15 business days after the issuance of the citation. The bill would delete the provision that permits the licensee, if the penalty has been reduced by at least 30%, to pay the minimum amount specified by law, or 50% of the amount determined by the citation review conference, whichever is greater.

Ch. 651 (AB 1134) Machado. Structural pest control.

(1) Existing law requires each person who pays a pesticide use report filing fee to pay, in addition, a fee of \$2 for each pesticide use stamp purchased from the Structural Pest Control Board.

This bill would require each person who pays a license fee pursuant to specified provisions of existing law to pay, in addition, until January 1, 2002, a fee of 25¢ for each "Inspection Report" stamp and "Notice of Work Completed" stamp purchased from the board. The bill would require the revenue derived from these fees to be deposited into the Structural Pest Control Device Fund, which would be created by the bill as a special fund in the State Treasury. The bill would require that 5% of the amount collected and deposited in the fund be available to the board for administrative costs upon appropriation in the annual Budget Act. The bill would continuously appropriate the balance in the fund to the Department of Pesticide Regulation for its costs incurred pursuant to specified provisions added by the bill.

(2) Existing law requires each structural pest control licensee to make all existing records pertaining to pesticide use available to the Director of Pesticide Regulation or county agricultural commissioner, as specified.

This bill would require each registered structural pest control company to make all existing records pertaining to pesticide use and structural pest control device use available to the director, the Structural Pest Control Board, or commissioner, as specified.

(3) Existing law provides for the licensing and regulation of structural pest control operators but does not require the registration of structural pest control devices. Under existing law, a violation of the provisions relating to structural pest control is a crime.

This bill would require the director to regulate structural pest control devices, as defined.

The bill would make it unlawful, on and after July 1, 2001, for any person directly, or through another, to manufacture for sale, advertise, deliver or otherwise provide, offer for sale or lease, sell, lease, possess, or use any structural pest control device in this state that is not registered pursuant to this bill, or for which the registration has been suspended or canceled, except as specified. The bill would authorize the director, in certain circumstances, to grant reasonable extensions of time for the submission or review, or both the submission and review, of data in support of an application for registration for devices in use in this state prior to January 1, 2001.

The bill would authorize the director to establish performance standards and tests of structural pest control devices and would authorize the director to refuse to register or to cancel a registration under specified circumstances. The bill also would authorize the director to issue a device research permit for the scientific evaluation of new devices for a limited period of time.

The bill would prescribe requirements relating to labeling and limitations of warranty with respect to the use of the device.

The bill would provide for seizure or quarantine of structural pest control devices by the director under certain conditions.

The bill would provide for the imposition of civil penalties for violation of its provisions.

The bill would authorize the director to establish an ad hoc committee to advise the department regarding the structural pest control device registration program.

(4) Because, under existing law, a violation of any provision of the bill would be a misdemeanor, this bill would impose a state-mandated local program by creating a new crime.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 652 (AB 1397) Gallegos. Public health: Medi-Cal: maternity benefits and services: county patients.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. Existing law also authorizes the board of supervisors in each county to establish and maintain a county hospital, and to enter into various contracts for the provision of medical services.

This bill would prohibit a county, or contractor or subcontractor thereof, including a health plan that provides or contracts to provide Medi-Cal services, from interfering with the medical judgment of a health care professional acting within the scope of his or her practice, but would not prohibit a county, contractor, subcontractor, or health plan from adopting protocols or guidelines consistent with accepted medical practice, provided that the guidelines do not supersede the judgment of a health care provider when treating a particular patient.

This bill would provide that benefits under the Medi-Cal program shall not be restricted for inpatient hospital care to a time period less than 48 hours following a normal vaginal delivery and less than 96 hours following delivery by caesarean section, except where certain conditions are met.

This bill would, in accordance with specified findings and declarations, prohibit a general acute care hospital from promulgating policies determining differing standards of obstetrical care based upon a patient's source of payment or ability to pay for medical services. It would declare that to deny or threaten to withhold pain management services from a woman in active labor, based on the patient's source of payment or ability to pay, shall constitute unprofessional conduct.

Existing law makes it a crime to intentionally violate provisions regulating the licensing of certain health care providers.

This bill would revise the definition of a crime by revising the duties of licensed providers, thereby resulting in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 653 (AB 1624) Figueroa. Highways: high-occupancy vehicle lanes.

(1) Existing law authorizes the Department of Transportation and local authorities, with respect to highways under their respective jurisdictions, to authorize or permit exclusive or preferential use of highway lanes for high-occupancy vehicles. Existing law also prohibits the department, pursuant to a specified federal law that has been repealed, from restricting or requiring the restriction of any lane on any federal-aid highway in the unincorporated areas of Alameda County to high-occupancy vehicles, except for approaches to controlled access highways, toll roads, or bridges.

This bill would delete that prohibition and other unrelated obsolete provisions.

The bill also would require the Metropolitan Transportation Commission, if the Department of Transportation restricts or requires the restriction of the use of any lane on any federal-aid highway in the unincorporated areas of Alameda County to high-occupancy vehicles, to review the use patterns of those lanes and to determine if congestion relief is being efficiently achieved by the creation of the high-occupancy

vehicle lanes. The bill also would require the commission to report its findings and recommendations in its HOV Master Plan Update for the San Francisco Bay area, as specified. Thus, because the bill would increase the duties and responsibilities of a local area planning agency, it would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 654 (AB 1733) Machado. Personal income taxes: contributions: D.A.R.E. California (Drug Abuse Resistance Education) Fund.

The Personal Income Tax Law allows taxpayers, until January 1, 1999, to contribute amounts in excess of their liability for the support of the D.A.R.E. California (Drug Abuse Resistance Education) Fund. Existing law provides that if these provisions are to continue indefinitely they, nevertheless, would be inoperative in any calendar year in which the Franchise Tax Board estimates that the minimum contribution amount will be less than a prescribed amount as annually adjusted.

This bill would extend the operation of those provisions to January 1, 2004. This bill would also, for taxable years beginning in 1999, make those contribution provisions inoperative in any calendar year in which the Franchise Tax Board estimates that the minimum contribution amount will be less than the prescribed amount as annually adjusted.

This bill would also provide that annually the balance of all money transferred to the fund, after reimbursement of costs of the Franchise Tax Board and the Controller, shall be transferred by the Controller to D.A.R.E. California.

This bill would appropriate \$313,850.21 from the D.A.R.E. California (Drug Abuse Resistance Education) Fund to the Controller for allocation to D.A.R.E. California for the support of that program.

Ch. 655 (AB 1857) Escutia. Child care and development services.

(1) Existing law establishes the Child Care and Development Services Act, which requires the Superintendent of Public Instruction to establish criteria and procedures for the allocation of certain child care and development appropriations in accordance with priorities that include the implementation of extended schoolday activity grant programs.

This bill instead would provide for one-time expenditures to benefit children in subsidized child care, as prescribed. The bill would require these expenditures to be approved, as prescribed, in the annual Budget Act.

(2) The act requires the department to disburse augmentations to the base allocation for the expansion of child care and development services to promote equal access to child development services. The act provides for the development of a formula to promote equal access, using indirect indicators of the need for child care, and establishes related requirements for the department.

This bill would delete the requirements related to the development of a formula and would instead require the Superintendent of Public Instruction to develop and be guided by a formula, based on direct impact indicators, as described, of need for child care and development services, for the disbursement of augmentations that gives priority to underserved areas, as defined.

(3) Under existing law, local child care and development planning councils are required to identify and submit to the Department of Education local priorities for child care. Existing law requires the Department of Education to allocate funding within each county in accordance with these priorities, and to develop guidelines for use by the local planning councils to assist them in conducting needs assessments that are reliable and accurate.

The bill would require the Superintendent of Public Instruction to include in the guidelines provided to the local councils guidance on identifying underserved areas and populations that refers to direct impact indicators of need for child care and development services.

Ch. 656 (AB 1916) Torlakson. Driving offenses: alcohol and drug assessment program.

(1) Existing law authorizes a court, as a condition to granting probation to a person who is convicted of a first offense of driving a vehicle while under the influence of an alcoholic beverage, any drug, or both, driving with an excessive blood-alcohol concentration, or driving when addicted to any drug (DUI), to order the person to participate in 6, 9, or 12 months of alcohol and drug treatment program activities.

This bill would instead require these persons to participate in at least a 3-month program or longer as to those persons whose concentration of alcohol in his or her blood was less than 0.20%, by weight, and at least a 6-month program or longer as to those persons with higher concentrations of alcohol in his or her blood or persons who refused to take a chemical test, with an additional requirement that this latter category of persons participate in at least 45 hours of program activities. The bill would require the court clerk to indicate the duration of the court-ordered program in the abstract that is forwarded to the Department of Motor Vehicles, thereby imposing a state-mandated local program by increasing the level of service imposed on court personnel. The bill would require repeat offenders who once fail the program to participate in a county alcohol and drug problem assessment program. The bill would allow the courts to order any person convicted of a DUI offense to attend the program. Because the bill would thereby require a higher level of service from certain county governmental entities, it would impose a state-mandated local program.

(2) Existing law requires the Department of Motor Vehicles to submit an annual report of certain DUI program evaluations to the Legislature.

This bill would require those department evaluations to include an evaluation of the efficacy of the increased level of intervention resulting from this bill.

(3) Existing law requires the levy of an assessment of not more than \$75 upon every fine, forfeiture, or penalty imposed and collected for a DUI violation in which a judicial district participates in a county alcohol and drug problem assessment program.

This bill would increase the maximum assessment to \$100 from \$75.

(4) Existing law authorizes counties to develop, implement, operate, and administer alcohol and drug problem assessment programs, and allows judicial districts in those counties to elect not to participate in those programs. These provisions are to be repealed on January 1, 2000.

This bill would delete the repeal date of these provisions and would require all counties to develop, implement, operate, and administer these programs with respect to persons who have twice failed alcohol and drug treatment programs, as described above.

The bill also would require each county, on January 1, 2000, to prepare, or contract to be prepared, an alcohol and drug assessment report on each person ordered by the court to participate in an alcohol and drug problem assessment program. The bill would require the assessment report to be submitted to the court and would require the court to order the person to complete the recommendations set forth in that report. In addition, the bill would require the State Department of Alcohol and Drug Programs, not later than September 30, 1999, to establish minimum specifications for alcohol and other drug problem assessments and reports.

Because the bill would impose increased duties on local criminal justice systems that are equivalent to those imposed by the establishment of a new crime, the bill would create a state-mandated local program.

(5) This bill would incorporate changes in Section 11837 of the Health and Safety Code proposed by AB 762 to become operative only if both bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates

Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 657 (AB 1921) Scott. Community colleges: real property of community college districts.

(1) Existing law authorizes the establishment of community college districts and their operation of community college campuses. Existing law prescribes procedures with regard to the sale, lease, use, gift, and exchange of real property by community college districts.

This bill would authorize the governing board of a community college district to request the Board of Governors of the California Community Colleges to waive, insofar as necessary to accomplish the purpose of the waiver request, all or a portion of the procedures regulating the sale, lease, use, gift, or exchange of community college district real property, other than any provision of the bill. The bill would require that this waiver could be requested only after a noticed public hearing, and only if the waiver request demonstrates that the district has provided the required written notice, that the district was unable to reach agreement with any public agency that sought to acquire the property, that the waiver will not substantially increase state costs or decrease state revenues, and that the waiver will further the ability of the district to meet the educational needs of the community. The bill would provide that the Board of Governors of the California Community Colleges may approve a request for a waiver upon finding that the waiver would promote efficiency and further the public benefit. The bill would require the Chancellor of the California Community Colleges to annually report to the Governor and the Legislature on the number, types, and disposition of waiver requests submitted under the bill.

(2) Existing law requires the governing board of any community college district to let any contracts involving an expenditure of more than \$50,000 for the purchase of equipment, materials, or supplies to be furnished, sold, or leased to the district; for services, except construction services; or repairs, including maintenance as defined, that are not a public project, as defined. Existing law also requires the governing board of a community college district to let any contract for a public project, as defined, involving an expenditure of \$15,000 or more to the lowest responsible bidder who gives security as the board requires, or else to reject all bids.

This bill would authorize a governing board of any community college district to require that each prospective bidder for a contract complete and submit to the district a standardized questionnaire and financial statement in a form specified by the district. This bill would impose a state-mandated local program by requiring that a governing board of a community college district furnish prospective bidders for contracts subject to the bill with a standardized proposal form.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 658 (AB 1959) Gallegos. Health care service plans: providers: audits.

Existing law requires the Department of Corporations to conduct periodically an onsite medical survey of the health delivery system of a health care service plan, not less frequently than once every 3 years. Willful violation of the law regulating health care service plans is a crime.

This bill would require the department, as the lead agency, and the State Department of Health Services, to convene a working group for the purpose of developing standards for quality audits of providers that provide services to enrollees pursuant to contracts governed by the law regulating health care service plans.

The bill would prescribe the goals of the working group and would require the department to report its findings and recommendations to the Governor, the Department of Corporations, the State Department of Health Services, and the appropriate committees of the Legislature.

Ch. 659 (AB 2023) Gallegos. Flood control and water conservation: liability.

Existing law provides that, except as specified, neither an irrigation district nor an employee thereof nor the state nor a state employee is liable for an injury caused by the condition of canals, conduits or drains used for the distribution of water if at the time of the injury the person injured was using the property for any purpose other than that for which the district or state intended it to be used.

This bill would provide that, until January 1, 2002, neither a public agency that operates flood control and water conservation activities, as specified, nor its employees shall be liable for an injury caused by the condition or use of unlined flood control channels or adjacent groundwater recharge spreading grounds under prescribed conditions.

This bill would also require, until January 1, 2002, the Los Angeles County Department of Public Works to maintain a record of all known or reported injuries incurred by the public in these channels or recharge spreading grounds during specified times and a record of all claims, paid and not paid, arising from those incidents, that were filed against the county. It would also require, until January 1, 2002, copies of these records to be filed annually with the Judicial Council, as specified, and would require the Judicial Council to submit a report to the Legislature on or before January 31, 2001.

Because this bill would create additional duties for local officials, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 660 (AB 2155) Keeley. Residential care facilities for the elderly: home health care: resident participation in decisionmaking.

Existing law provides for the licensure and regulation of residential care facilities for the elderly, administered by the State Department of Social Services. Existing law also provides for the licensure and regulation of home health agencies. Existing law defines a "home health agency" as an organization that provides or arranges for the provision of skilled nursing services to persons in their temporary or permanent place of residence. Violation of the provisions regulating residential care facilities for the elderly, or willful or repeated violation of any related rule or regulation is a misdemeanor.

This bill would require, prior to, or within 2 weeks after a resident's admission to a residential care facility for the elderly, that the resident and the resident's representative, if any, meet with an appropriate member or members of the facility's staff, if the resident is receiving home health services in the facility, a representative of the home health agency involved, and any other appropriate parties, to prepare a written record of the care the resident will receive in the facility, and the resident's preferences regarding the services provided at the facility. The bill would also require the written record of care to be reviewed, and revised, if necessary, at least every 12 months. The bill would provide that it shall not preclude a residential care facility for the elderly or home health agency from satisfying other state or federal obligations at a meeting required by the bill. Because the bill would change the definition of a crime, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 661 (AB 2674) Cardenas. Driving under the influence: penalties.

Existing law provides that if the court grants probation to any person convicted of a 2nd violation of the law prohibiting driving while under the influence of any alcoholic beverage or drug, or both, the court may impose as a condition of probation, among other things, that the person be confined in the county jail for at least 48 hours.

This bill would increase that minimum county jail time to at least 96 hours, to be served as specified. By increasing the penalty for an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 662 (AB 2707) Perata. Vehicles: New Motor Vehicle Board: franchises.

(1) Existing law defines the terms "franchise" and "franchisee" for purposes of the Vehicle Code.

This bill would revise those definitions.

(2) Under existing law, motor vehicle dealer franchisors are prohibited from terminating, or refusing to continue, any existing franchise unless specified requirements are met, including the requirement that a written notice be sent to franchise motor vehicle dealers concerning their rights to file certain protests with the New Motor Vehicle Board, as specified.

This bill would require additional information to be included in that notification.

(3) Under existing law, if a franchisor seeks to enter into a franchise establishing an additional motor vehicle dealership within a relevant market area where the same line-make of vehicle is then represented, or seeks to relocate an existing motor vehicle dealership, the franchisor is required to notify, in writing, the board and each franchisee in that line-make in the relevant market area of the franchisor's intention to establish an additional dealership or to relocate an existing dealership within or into that market area.

This bill would require that written notification to each franchisee contain specified information concerning the franchisee's right to protest the action to the board.

(4) Existing law makes it a crime for licensed automotive manufacturers, manufacturer branches, distributors, or distributor branches to engage in certain conduct.

This bill would include in that listing of prohibited conduct the following: (a) the exercise of a right of first refusal or certain other similar rights unless specified conditions are met, (b) the unfair discrimination in favor of any dealership owned or controlled, by the above described entities, (c) the failure of a transferring franchisee to provide a specified notice to a manufacturer or distributor regarding the franchisee's desire to sell, transfer, or assign a franchise, and (d) the failure of the manufacturer or distributor to provide a specified notice to the franchisee.

The bill would specify that in any action in which the manufacturer's or distributor's withholding of consent is an issue, whether that withholding of consent was unreasonable is a question of fact, requiring consideration of all the existing circumstances.

(5) Because a violation of the above provisions would be a crime, the bill would impose a state-mandated local program.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 663 (SB 405) Peace. Public utilities: telephones.

Under existing law, the Public Utilities Commission has the authority to regulate public utilities, including telephone corporations. Existing law prohibits a telephone

corporation from authorizing a different telephone corporation to make any change in a provider of a telephone subscriber's telephone service for which competition has been authorized unless specified requirements have been met, among which are requiring the telephone corporation to specifically establish whether the subscriber intends to make any change in his or her telephone service provider, and to explain any charges associated with that change.

This bill, except as specified, would require a telephone corporation that is exiting the business of providing interexchange services to customers to provide a written notice, as specified, to its customers prior to the proposed transfer of those customers to another telephone corporation. The bill also would specify that any transfer of customer services shall be effectuated without charge.

Ch. 664 (SB 567) Schiff. Transportation Finance Bank.

Under existing law, the California Infrastructure and Economic Development Bank is established within state government with a board of directors having specified duties.

Under federal law (Sec. 350, P.L. 104-59, as amended by Sec. 1511, P.L. 105-178), the United States Secretary of Transportation is authorized to enter into cooperative agreements with specified states, including California, for the establishment of state infrastructure banks and multistate infrastructure banks for making loans and providing other assistance to public and private entities carrying out, or proposing to carry out, projects eligible for assistance under that public law.

This bill would require the California Transportation Commission to allocate funds from the State Highway Account in the State Transportation Fund and other available funds under the jurisdiction of the commission to the Department of Transportation to be used to meet capital and interest obligations created by the Transportation Finance Bank, created as specified, and would specify the manner in which those allocations are to be construed. By requiring the allocation of these funds for a new purpose, the bill would make an appropriation. The bill would authorize the commission to allocate federal and state transportation funds to the department for an enforceable commitment to the California Economic Development Financing Authority for implementing the purposes of the Transportation Finance Bank, consistent with applicable state and federal laws governing the use of those funds. The bill would impose various restrictions and limitations on the funding of these projects.

Ch. 665 (SB 1389) Craven. Public school libraries: income taxes: designations.

Under the existing Personal Income Tax Law, taxpayers are allowed to contribute amounts in excess of their tax liability for the support of specified funds, including, until January 1, 1999, and subject to required minimum contribution amounts being received, the California Public School Library Protection Fund. Moneys in that fund, upon appropriation by the Legislature, are allocated to the State Department of Education to purchase books and library media technology through grants awarded to schools that meet specified criteria.

This bill would extend the operation of these provisions until January 1, 2004, subject to the required minimum contributions being received and would make other conforming changes.

Ch. 666 (SB 1524) Alpert. Child care centers: training.

Existing law requires that at least one director or teacher at each day care center and each family day care home licensee have a minimum number of hours of training in preventive health practices. The training requirements can be satisfied through courses offered by an institution approved by the Emergency Medical Services Authority, or by obtaining a pediatric first aid card issued by the American Red Cross.

This bill would recast these provisions to require a minimum number of hours of health and safety training that would include, components of pediatric first aid, pediatric CPR, and a preventive health practices course or courses as described by the bill. The bill would provide that training in preventive health practices would be a one-time-only requirement while pediatric first aid and CPR training would be required to be current at all times.

This bill would provide that certain training requirements would be satisfied by obtaining a pediatric first aid and pediatric CPR card issued by the American Red Cross or the American Heart Association. The bill would permit courses by an accredited college or university to satisfy the above training requirements.

The bill would require the Emergency Medical Services Authority to establish minimum standards for the required training courses and would authorize the director of the authority to deny, suspend, or revoke approval for a training program on the occurrence of certain events that pose an imminent threat to the public health and safety.

Existing law provides for the Emergency Medical Services Training Program Approval Fund that is continuously appropriated to the authority for the authority's training program review and approval activities.

This bill would authorize the authority to charge additional designated fees to training programs authorized under the bill to be deposited in the Emergency Medical Services Training Program Approval Fund. By increasing the source of moneys in a continuously appropriated fund, this bill would make an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 667 (SB 1987) Craven. Mobilehome parks: responsible persons: emergency plans.

(1) Existing law, the Mobilehome Parks Act, requires every mobilehome park to have a person who is responsible for the operation and maintenance of the park, and requires that person, in every park with 50 or more units, to reside in the park and to have a knowledge of emergency procedures relative to the park's utility systems and common facilities. A willful violation of the Mobilehome Parks Act is punishable as a misdemeanor.

This bill would require the responsible person in every mobilehome park to be available by telephonic or like means or in person and to reasonably respond in a timely manner to any emergencies, and would authorize park management to adopt an emergency preparedness plan, as specified. By expanding the scope of an existing crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 668 (SB 2189) Vasconcellos. Small business venture funds.

Existing law establishes certain programs, including those contained in the Small Business Development Corporation Law, to promote the economic development of small businesses in the state.

This bill would, in addition, enact the Capital Access Company Law, which would provide for the licensure and regulation by the Commissioner of Corporations, of capital access companies, to enable those entities to provide risk capital and management assistance to small businesses in the state, exempt from the requirements of the federal Investment Company Act of 1940.

This bill would prescribe certain fees to be paid by applicants for licensure under these provisions and for other related matters, and would require that those fees be deposited into the State Corporations Fund.

This bill would also impose civil penalties for violations, and criminal penalties for willful violations, of these provisions. By the creation of new crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 669 (AB 1077) Cardoza. Crime victims: criminal procedure.

(1) Existing law authorizes the court in any criminal proceeding to order that the testimony of a minor 10 years of age or younger be taken by contemporaneous examination and cross-examination in another place and out of the presence of the judge, jury, defendant, and attorneys, and communicated to the courtroom by means of closed-circuit television, if the court makes certain findings, including that the minor's testimony will involve a recitation of the facts of an alleged sexual offense committed on or with the minor.

This bill additionally would authorize, until January 1, 2001, the use of closed-circuit television when the minor's testimony will involve a recitation of the facts of the minor being the victim of a violent felony. The bill would require the Judicial Council to prepare and submit to the Legislature, on or before December 31, 2000, a report on the frequency of use and effectiveness of closed-circuit testimony.

(2) This bill would incorporate additional changes in Section 1347 of the Penal Code proposed by AB 1692, to be operative if AB 1692 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 670 (AB 1692) Bowen. Criminal procedure: closed-circuit testimony.

(1) Under existing law, in any criminal proceeding, as specified, the court may order that the testimony of a minor child 10 years of age or younger, or of a disabled adult victim, be taken by contemporaneous examination and cross-examination in another place and out of the presence of the judge, jury, defendant or defendants, and attorneys, and communicated to the courtroom by means of 2-way or one-way closed-circuit television if the court makes certain findings including an individualized finding that but for use of such special procedure, the witness would be unavailable to testify.

This bill would make these procedures applicable to the testimony of a minor child 13 years of age or younger.

(2) This bill would incorporate additional changes in Section 1347 of the Penal Code proposed by AB 1077, to be operative if AB 1077 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 671 (AB 1096) Martinez. Telephone services.

Existing law prohibits a telephone corporation, or any person, firm or corporation representing a telephone corporation, from changing a subscriber's telephone service without specified verification. Existing law provides that any telephone corporation that violates the verification procedures is liable to the telephone corporation previously selected by the subscriber in an amount equal to all charges paid by the subscriber after the violation.

This bill would additionally make a telephone corporation that violates the verification procedures on or after January 1, 1999, liable to the subscriber for an overcharge penalty in an amount equal to 10% of all charges billed the subscriber after the violation, and would require that amount to be credited to the subscriber's telephone bill.

Ch. 672 (AB 284) Baca. Telephone services.

Existing law prohibits a telephone corporation, or any person, firm or corporation representing a telephone corporation, from changing a subscriber's telephone service without specified verification. Existing law provides that any telephone corporation that violates the verification procedures as specified is liable to the telephone corporation previously selected by the subscriber in an amount equal to all charges paid by the subscriber after the violation.

This bill for residential telephone subscribers would require a telephone corporation, in addition to existing verification provisions, to mail to a subscriber by United States Postal Service notice that the subscriber's telephone service provider has been changed, as prescribed.

The bill would require any telephone corporation that violates those verification provisions to credit to a subscriber any charges paid by the subscriber in excess of the amount that the subscriber would have been obligated to pay had the subscriber's telephone service not been changed. The Public Utilities Commission would be required to adopt regulations to govern those credits.

Ch. 673 (AB 2417) Mazzone. Charter schools.

Existing law, the Charter Schools Act of 1992, permits teachers, parents, pupils, and community members to petition a school district governing board to approve a charter school to operate independently from the existing school district structure as a method of accomplishing, among other things, improved pupil learning. Under existing law the total number of charter schools operating in the state in any school year cannot exceed 100, with no more than 10 charter schools in any single school district. AB 544 (Ch. 34 of the Statutes of 1998), which would take effect on January 1, 1999, would establish the statewide maximum at 250 charter schools for the 1998–99 school year with an additional 100 charter schools per school year thereafter and would delete the requirement that the State Board of Education, for purposes of implementing those provisions, assign a number to each charter notice it receives, based on the chronological order in which the notice is received. Existing law authorizes a petition for the establishment of a charter school within any school district to be circulated by any one or more persons seeking to establish the charter school. Under existing law, if the governing board of the school district denies a charter, the county superintendent of schools, at the request of the petitioner or petitioners, is required to select and convene a review panel to review the action of the governing board. AB 544 (Chapter 34 of the Statutes of 1998), which would take effect on January 1, 1999, would instead authorize a petitioner whose petition has been denied to submit the petition to either the county board of education or directly to the State Board of Education, and would make other changes related to the petition process.

This bill would incorporate the changes made by AB 544 regarding the statewide maximum number of charter schools and the petition process, and would reenact the requirement regarding the assignment of a number to each charter notice received by the State Department of Education. The bill would also require the petitioner or petitioners for the formation of a charter school, upon the approval of a petition by the county board of education, to provide written notice of that approval, including a copy of the petition, to the State Board of Education.

Existing law requires that, with respect to a pupil of a charter school located within a basic aid district of choice who attended a public school in a district other than a basic aid school district, as defined, immediately before transferring to the charter school, the Superintendent of Public Instruction commencing the 1996–97 fiscal year provide that school an apportionment of 70% of the district revenue limit for average daily attendance that would have been apportioned to the school district of residence. AB 544 (Chapter 34 of the Statutes of 1998), which would take effect on January 1, 1999, would require the full apportionment received by the basic aid district to be provided to the charter school.

This bill would incorporate the changes made by AB 544 regarding the requirement that the full apportionment received by the basic aid district be provided to the charter school, but with respect to a pupil of a charter school located within a basic aid district who resides in a public school in a district other than a basic aid district, would instead require the Superintendent of Public Instruction commencing the 1997–98 fiscal year to provide that school with an apportionment of 70% of the district revenue limit for average daily attendance that would have been apportioned to the school district of residence.

Existing law requires the State Department of Education to review the educational effectiveness of the charter school approach and, not later than January 1, 1999, to report to the Legislature accordingly with recommendations to modify, expand, or terminate that approach.

This bill would repeal those provisions.

Existing law requires the Legislative Analyst to contract for an evaluation of the effectiveness of the charter school approach, on or before November 1, 1997, and to report to the Governor accordingly with recommendations to modify, expand, or terminate that approach. AB 544 (Chapter 34 of the Statutes of 1998), which would take effect on January 1, 1999, would require the Legislative Analyst to contract with a neutral evaluator for an evaluation of the effectiveness of the charter school approach, and to make that report to the Governor and the Legislature on or before July 1, 2003.

This bill would incorporate the changes made to those provisions by AB 544, but would instead require the neutral evaluator to make that report directly to the Legislature, and would make other clarifying changes.

Ch. 674 (AB 2758) Committee on Agriculture. Onion and garlic standards: inspectors.

(1) Under existing law, the provisions in the Food and Agricultural Code relating to quality standards for dehydrating garlic and onions, and establishing the Garlic and Onion Dehydrator Advisory Committee remain in effect until January 1, 1999, and on that date are repealed.

This bill would continue that law in effect beyond January 1, 1999, by deleting that repeal date, but would prohibit the secretary from enforcing certain of these provisions during the period that any marketing order covering the same subject is in effect. Since a violation of these provisions is a misdemeanor, this bill would impose a state-mandated local program by continuing in existence a crime that would otherwise be repealed. This bill would also conform the name of the civil executive officer who is in charge of the Department of Food and Agriculture to existing law in those provisions.

(2) Existing law continuously appropriates money collected pursuant to the program described in (1).

This bill would continue that existing law in effect, thereby making an appropriation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 675 (SB 1824) Calderon. Used oil: recycling.

(1) Existing law defines the term "recycled oil," for purposes of the provisions regulating used oil, as meaning any oil, produced from used oil, that has been prepared for reuse, and that achieves minimum standards of purity, as established by the Department of Toxic Substances Control. A violation of the provisions regulating used oil is a crime.

This bill would revise that definition of recycled oil to include any oil that meets specified requirements as to the manner the recycled oil is produced from used oil and would additionally define the term "contaminated petroleum product."

(2) Existing law prohibits any person who generates, stores, or transfers used oil, from intentionally contaminating used oil with other hazardous waste, except with minimal amounts of vehicle fuel.

This bill would allow a used oil recycling facility to mix used oil with a contaminated petroleum product or with an oily waste, other than wastes listed as hazardous under specified federal law, under specified conditions. The bill would allow a generator or transporter to mix used oil with contaminated petroleum products under specified conditions, thereby imposing a state-mandated local program by creating a new crime.

The bill would also correct erroneous references.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 676 (SB 2172) Sher. Hazardous waste: management activities: exemption.

Existing law provides for the regulation of hazardous waste under the hazardous waste control laws by the Department of Toxic Substances Control and specified local agencies. Under existing law, the department is authorized to exempt, until January 1, 2002, by regulation, a hazardous waste management activity from requirements of the hazardous waste control laws, subject to specified conditions. The department is required to prepare a specified evaluation of the activity and make a specified demonstration when adopting such a regulation to exempt a hazardous waste management activity.

This bill would require the department to prepare the analysis in a specified manner, including making a preliminary analysis available to the public, and would provide for related matters concerning notice of the proposal to adopt such a regulation.

Ch. 677 (AB 972) Torlakson. Government records.

Under existing law, the public records of a state agency may be microfilmed, electronically data imaged, or otherwise photographically reproduced in compliance with the minimum standards or guidelines that are recommended by the American National Standards Institute or the Association for Information and Image Management.

Under existing law, the county recorder may utilize any of various techniques that do not permit additions, deletions, or changes to an original document as a photographic reproduction process to record some or all documents required by law or permitted to be recorded or filed. All reproductions are required to be made in compliance with the minimum standards or guidelines recommended by the American National Standards Institute or the Association for Information and Image Management.

This bill would delete various references to these minimum standards and guidelines, request that the California County Information Services Directors Association and the County Recorders Association of California develop standards for recording in electronic media for approval and adoption by the Secretary of State as regulations, and authorize state and local government recording pursuant to these regulations.

Ch. 678 (AB 1166) House. Public employees: retirement.

(1) The State Teachers' Retirement Law defines "full time" for purposes of calculating benefits.

This bill would prescribe standards for purposes of determining full time for specified adult education and community college positions.

(2) The Public Employees' Retirement Law under various circumstances requires opinions or rulings to be obtained from federal agencies respecting compliance with federal law.

This bill would require any public agency applying to participate in the Public Employees' Retirement System on and after January 1, 1999, to submit a specified opinion from the United States Department of Labor.

(3) The Public Employees' Retirement Law establishes a loan program to assist in the purchase of homes in this state.

This bill would authorize home loans throughout the United States.

(4) The Public Employees' Retirement Law excludes specified local elected or appointed officers from membership in the system.

This bill would clarify the operative date of that exclusion.

(5) The Public Employees' Retirement Law prescribes state peace officer/firefighter and state safety membership based upon employment classifications.

This bill would clarify the membership category of specified positions.

(6) The Public Employees' Retirement Law prescribes terms and conditions for terminating agency contracts for participation in the retirement system.

This bill would clarify certain termination provisions.

(7) The Public Employees' Retirement Law requires benefit adjustments as a result of specified federal limitations.

This bill would revise those provisions to reflect changes in the federal limitations.

(8) The bill would incorporate additional changes to Section 22013.7 of the Government Code to take effect if both bills are enacted and this bill is enacted last.

Ch. 679 (AB 1859) Ackerman. Public works: insurance and surety requirements.

Existing law prohibits, with respect to competitively bid public agency building or construction contracts, certain practices relating to insurance or surety requirements, but exempts certain agencies and projects from those proscriptions. Existing law permits a public agency to utilize owner-controlled or wrap-up insurance programs if specified conditions are met.

This bill would authorize a state agency to utilize owner-controlled or wrap-up insurance programs if specified conditions are met and would provide that safety

requirements for a public works project subject to owner-controlled or wrap-up insurance programs may be developed jointly between a state agency and the prime contractor.

Ch. 680 (AB 1879) Prenter. Animals.

(1) Existing law requires a hide and brand inspector to seize any bovine animal, horse, mule, or burro, or the hide of any of those animals, that is found in the possession of a person that cannot prove ownership.

This bill would require the hide and brand inspector to seize those animals, or the hide or carcass of any of those animals, that are found in the possession of a person who does not also have in his or her possession proof of ownership. The bill also would require the hide and brand inspector to seize estrays.

The bill would impose requirements pertaining to the disposal of any animal, hide, or carcass seized pursuant to specified provisions of existing law.

(2) Existing law, the California Meat and Poultry Supplemental Inspection Act, authorizes the secretary to refuse to issue a license or renew a license and to revoke or suspend any license issued under that act for any violation of, or failure to comply with, any provision of that act, as specified. The act requires the Secretary of Food and Agriculture, after notice and hearing, to refuse to issue a license to any person for the purpose of engaging in the business of slaughtering animals for pet food or horses for human food, or in the business of processing, packing, or preparing fresh or frozen horsemeat or any other meat product for use as pet food, or in the business of rendering, unless he or she finds, among other things, that the applicant demonstrates character, responsibility, and good faith suitable for carrying on the business to be licensed.

This bill would delete the provisions relating to an applicant's character and suitability for carrying on the business to be licensed.

(3) Existing law authorizes the secretary to revoke a license that is issued to a person that is engaging in the business of selling cattle at public salesyards or that operates those public salesyards for the sale of livestock, for any willful violation of any provision of the law governing cattle protection.

This bill would repeal that provision and would make related changes.

(4) Existing law defines "licensed livestock meat inspector" as a person who is licensed by the secretary to perform inspection functions under the California Meat and Poultry Supplemental Inspection Act.

This bill, instead, would define that term to mean a person who is licensed by the Department of Food and Agriculture to perform inspection functions under that act in custom livestock slaughterhouses. The bill would define "licensed processing inspector" as a person who is licensed by the department to perform inspection functions under the act in licensed meat processing establishments, would provide for the licensing of those persons, and would make related changes.

Ch. 681 (AB 1963) Aguiar. State-mandated local costs: reimbursement.

(1) Existing law requires the Commission on State Mandates to adopt procedures for receiving claims for reimbursement for state-mandated local costs. The procedures are required to ensure that a statewide cost estimate is adopted within 18 months after receipt of a test claim or 6 months after an undisputed test claim, with limited exceptions.

This bill would require the procedures to ensure that a statewide cost estimate is adopted within 12 months after receipt of a test claim, subject to an extension of up to 6 months upon the request of either the claimant or the commission. This bill would authorize a claimant to amend the test claim at any time prior to a commission hearing as long as the amendment substantially relates to the original test claim and would specify the date by which a local agency or school district is required to submit a test claim or is authorized to file an estimated reimbursement claim and an annual reimbursement claim.

(2) Existing law provides that no local agency is required to implement or give effect in any fiscal year to any statute or executive order that has been determined by the Legislature, the Commission on State Mandates, or any court to mandate a new program or higher level of service requiring reimbursement of local agencies pursuant to the California Constitution, if the statute or executive order has been specifically identified

by the Legislature in the Budget Act for the fiscal year as being one for which reimbursement is not provided for that fiscal year.

This bill would extend this exception to any period immediately following any fiscal year for which the Budget Act has not been enacted for the subsequent fiscal year.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 682 (AB 2069) Kaloogian. Estates and trusts: protective proceedings.

(1) Existing law establishes procedures for the establishment of a conservatorship over a person and the administration of an estate of a decedent.

This bill would authorize the appointment, by the superior court, of a practice administrator with specified powers to take control of the practice or deceased or disabled member of the State Bar of California, as specified.

(2) Existing law prescribes the disposition of community and quasi-community property upon the death of a married person.

This bill would provide that, notwithstanding these provisions, a husband and wife may agree in writing to divide community or quasi-community property on the basis of a non pro rata division of the aggregate value of the property on the basis of a division of each individual item or asset of the property, or partly on each basis. This bill would make various conforming changes.

(3) Existing law defines the phrase "terms of the trust" for purposes of laws regarding the duty of a trustee to keep the beneficiaries of a trust reasonably informed of the trust and its administration to include the written trust instrument of an irrevocable trust or provisions of a written trust instrument that describe or affect an irrevocable portion of a trust, as specified. Existing law requires the trustee to provide, upon reasonable request, the beneficiary with the terms of the trust that describe or affect the beneficiary's interest.

This bill would exclude from the phrase "terms of the trust" documents which were intended to affect administration or disposition of the trust only while the trust was revocable. It would also require the trustee to provide, upon reasonable request, the beneficiary with the terms of the trust. This bill would also revise various trustee notification requirements, as specified.

(4) Existing law provides that, if the settlor retains the power to revoke the trust in whole or in part, the trust property is subject to the claims of creditors of the settlor to the extent of the power of revocation during the lifetime of the settlor.

This bill would provide that the trust property subject to the claims of creditors pursuant to the above described provision of existing law shall be entitled to specified exemptions.

Ch. 683 (AB 2347) House. Department of Motor Vehicles: personal service.

(1) Under existing law, all records of the Department of Motor Vehicles are open to public inspection during office hours, except as provided.

This bill would specifically require certain records of notices regarding the suspension or revocation of a person's driving privileges to be provided, as specified and upon request, to defined peace officers while acting within the scope of their employment and to the courts of this state.

(2) Existing law requires the department to attempt to provide personal service by using a process server for service of certain persons whose driving privilege is suspended or revoked when certified mail is not delivered.

This bill would delete that requirement, but would allow the department to utilize alternative methods to determine the whereabouts of a person whose driving privilege has been suspended or revoked.

This bill would also make a technical change by deleting a duplicate provision.

Ch. 684 (AB 2453) Campbell. California Small Business Development Center Program.

Existing law establishes the California Small Business Development Center within the Office of Small Business in the Trade and Commerce Agency, with specified goals and the responsibility to administer a statewide plan developed by the agency. The plan is required to include specified components and describe specified services to be offered

by local small business development centers and funded by grants from the agency. The director of the program is appointed by the Governor upon recommendation of the Secretary of Trade and Commerce, and holds office at the pleasure of the Governor. Funds for purposes of the program are appropriated in the annual Budget Act to the California Small Business Development Center Fund.

This bill would revise various aspects of the California Small Business Development Center Program, including the goals of the program and the activities to be performed by the local small business development centers. It would require the first plan to be completed no later than July 1, 1999, and updated biennially. It would provide that the activities are to be performed pursuant to a contract between the agency and the small business development center, and would provide that the director would be appointed by the Secretary of Trade and Commerce.

This bill would provide that the California Small Business Development Center Fund is established in the State Treasury and would set forth the sources from which the fund may receive money and the manner in which its moneys may be invested.

Ch. 685 (AB 2580) Baca. Regional Technology Alliances.

(1) The California Defense Conversion and Military Base Reuse Act establishes the California Defense Conversion Council in the Trade and Commerce Agency with prescribed powers and duties, including the establishment of criteria for designation, and the designation, of regional technology alliances upon application. The act will be repealed on January 1, 1999. Existing law requires the initial 3 alliances to be established as nonprofit corporations in the San Francisco Bay Area, Los Angeles, and San Diego, and sets forth various activities to be performed by the alliances.

This bill would authorize the Trade and Commerce Agency to designate new regional technology alliances, upon application, to carry out those activities. It would authorize the agency to establish criteria for designation that includes, but need not be limited to, criteria previously established by the Defense Conversion Council.

The bill would make additional conforming changes.

Ch. 686 (AB 2682) Thomson. Mental health services.

(1) Existing law provides for the provision of local mental health services for persons with mental disorders pursuant to standards developed by the State Department of Mental Health. Existing law, until January 1, 1999, authorizes Placer County and up to 6 other counties to establish a pilot project for up to 4 years to develop a shared mental health rehabilitation center for the provision of community care and treatment for persons with mental disorders who are placed in a state hospital or another health facility because no community placements are available to meet the needs of these patients. Existing law requires the department, in conjunction with the county mental health directors, to report to the Legislature within 3 years of the commencement of the operation of any pilot project.

This bill would extend the operation of those provisions until January 1, 2001, and would allow those counties to establish pilot projects for up to 6 years. The bill would require the department to report to the Legislature within 5, instead of 3 years, from the commencement of the operation of the pilot project and would also require an interim report within 3 years, as specified.

(2) Existing law authorizes the State Department of Mental Health to permit new programs for mental health services to be developed and implemented without complying with licensure requirements for up to 4 years, subject to certain conditions. Existing law requires the department to evaluate and report to the Legislature on all pilot projects implemented within 3 years of the commencement of the operation of any pilot project.

This bill would extend the time during which a new program for mental health services may be developed and implemented without licensure to up to 6 years and would require the department to report to the Legislature within 5 years of the commencement of the operation of any pilot project.

(3) Existing law establishes the California Mental Health Planning Council, whose duties include advocating for effective, quality mental health programs, and reviewing,

assessing, and making recommendations regarding all components of California's mental health system. Existing law repeals those provisions on January 1, 1999.

This bill would delete the repeal of those provisions.

Ch. 687 (SB 281) Thompson. Conflicts of interest: public contracts.

(1) Existing law prohibits certain public officials and employees from being financially interested in any contract made by them in their official capacity, or by any board of which they are members. An officer is not deemed to be interested in a contract entered into by a body or board of which the officer is a member if the officer has only a remote interest in the contract and other requirements are met. A remote interest is required to be publicly disclosed, and thereafter the public body may authorize, approve, or ratify the contract in question, but the officer or employee with the remote interest is disqualified from voting. A remote interest is defined to include, among others, that of an employee or agent of the contracting party, if the contracting party has 10 or more other employees and if the officer was an employee or agent of that contracting party for at least 3 years prior to the officer initially accepting his or her office.

This bill would further condition the application of this exception by requiring that in order for the exception to apply, the officer shall own less than 3% of the shares of the stock of the contracting party, and the employee or agent of the contracting party is not an officer or director of the contracting party and did not directly participate in formulating the bid of the contracting party.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 688 (SB 858) Lewis. California FAIR Plan.

Under existing law, the California FAIR Plan Association is a joint reinsurance association formed by state insurers licensed to write and engaged in writing basic property insurance within this state to assist persons in securing basic property insurance and to formulate and administer a program for the equitable apportionment among insurers of basic property insurance. Existing law requires each insurer to participate in the writings, expenses, profits, and losses of the association, based on premiums written, as specified, but requires the plan to provide for a method whereby insurers who voluntarily write certain insurance on risks in brush hazard or inner-city areas are proportionately relieved of the liability to participate in the plan.

This bill, for the purposes of determining each insurer's participation in the association, would provide that premiums written on a policy of basic residential earthquake insurance issued by the California Earthquake Authority are attributable to the insurer that writes the underlying policy of residential property insurance.

The bill would also make a technical change and declare that the change is declaratory of existing law.

Ch. 689 (SB 1362) Committee on Housing and Land Use. Housing and Land Use Omnibus Act of 1998.

(1) Existing law generally regulates land use, housing, and redevelopment.

This bill would enact the Housing and Land Use Omnibus Act of 1998 and would state legislative intent to combine several minor statutory changes relating to housing, land use, and related topics into a single measure, and would make related findings and declarations.

(2) Existing law, known as the Relocation Assistance Act, requires a public entity to provide compensation and advisory services to any person, business, or farm operation that is displaced because of the acquisition of real property for public use. Existing law governs the provision of relocation assistance, including benefits for displaced persons, as defined. For purposes of that definition and for purposes of the act, a tenant in a multifamily rental project of 4 or more units who is temporarily displaced for not more than 180 days as part of a rehabilitation of that project is not deemed a "displaced person" if, among other conditions, other financial benefits and services are provided, including relocation to a comparable replacement unit, and the resident is offered the right to return to his or her original unit, with prescribed rent for the first 12 months subsequent to that return.

This bill would, if SB 1156 is chaptered and becomes effective on or before January 1, 1999, delete those provisions from that definition of “displaced person.”

(3) Existing law authorizes the Governor to appoint the Director of Planning and Research at a salary not to exceed \$27,500 annually, and authorizes the Governor to appoint and fix the salaries of necessary assistants and other personnel at annual amounts that generally may not exceed \$85,402.

This bill would require the salary of the director to be fixed pursuant to those provisions authorizing the Governor to appoint and fix the salaries of necessary assistants and other personnel.

(4) Existing law provides that certain mortgage revenue bond programs or local approval of a housing-related project prior to May 1, 1983, shall not be invalidated because a city and county failed to comply with specified requirements.

This bill would repeal that provision.

(5) Existing law requires that an action or proceeding to enforce compliance with a requirement that a zoning ordinance be consistent with a general plan be taken within 90 days of the enactment or amendment of the ordinance.

This bill would require the action or proceeding to be commenced and service made on the legislative body within 90 days.

(6) Under the Subdivision Map Act, when any area in a subdivision or proposed subdivision, as to which a tentative map or vesting tentative map has been filed but a final map has not been finally approved, is annexed to a city, all procedures and regulations required by the act or by local ordinance of the annexing city are deemed to commence as of the effective date of the annexation and requires that the map comply with the requirements of any applicable ordinance of the city to which the area is annexed.

This bill would require approval of the final map by a newly incorporated city when an area in a subdivision or proposed subdivision as to which a tentative map or vesting tentative map, as specified, has been approved by a board of supervisors and is incorporated in the newly incorporated city, if certain conditions are met, and would also authorize the newly incorporated city to condition or deny a permit, approval, extension, or entitlement as to the map if it makes specified findings. The bill also would provide that these rights conferred by the act expire if the final map application is not timely filed prior to the expiration of the tentative or vesting tentative map and, prior to the approval of the final map, these rights are subject to specified time periods. A newly incorporated city would not be limited from imposing reasonable conditions on an approved tentative or vesting tentative map for subsequent required approvals or permits necessary for development, as specified.

(7) Existing law authorizes the legislative body of a city or county to require the dedication of land or impose fees for park or recreational purposes as a condition to the approval of a tentative or parcel subdivision map.

This bill would designate those provisions as the Quimby Act.

(8) Existing law authorizes a city or county to permit windows in dwellings to open into areas designed and built as passive solar energy collectors. This provision will be repealed when state building code regulations are modified to conform to this requirement.

This bill would require the Department of Housing and Community Development to prepare, adopt, and submit by September 1, 1999, building standards for approval as part of the California Building Standards Code to implement that requirement. The bill would make this provision inoperative on September 1, 1999, and repeal it on January 1, 2000.

(9) Existing law makes it unlawful for a dealer in manufactured homes, mobilehomes, or commercial coaches to permit the dealer’s license, supplies, or books to be used to operate a branch or secondary location, except as specified.

This bill would delete that reference to branches.

(10) Existing law, known as the Mobilehome Parks Act, defines “building” for purposes of the act.

This bill would delete that definition.

(11) Existing law, with specified exceptions, requires the landlord or landlord’s agent of a building intended for human habitation to install and maintain certain door and window locks or security devices.

This bill would authorize the Department of Housing and Community Development to delay until December 31, 2000, the installation of window and door locks on 4 specified centers of the Office of Migrant Services.

(12) The bill would make other technical, nonsubstantive changes to existing law relating to housing and land use for organizational reasons or to conform obsolete references to current law.

(13) This bill would also provide that specified provisions of the bill relating to zoning ordinances shall not become operative if AB 2055 is chaptered and becomes effective on or before January 1, 1999.

Ch. 690 (SB 1835) Johnston. Land use: Williamson Act contracts.

(1) Under the Williamson Act, upon the annexation by a city of any land subject to a contract with a county that enforceably restricts the land to agricultural use within an agricultural preserve, the city succeeds to all rights, duties, and powers of the county under the contract unless the land being annexed was within one mile of the city boundary when the contract was executed, the contract was executed prior to January 1, 1991, and the city filed a protest of record that identifies the affected contract and the subject parcel or parcels.

Under the Cortese-Knox Local Government Reorganization Act of 1985, a local agency formation commission is authorized to conduct proceedings on a proposal for a change of organization or a reorganization initiated by the filing of a petition or a resolution of application by a local agency.

This bill, in addition, would require the local agency formation commission pursuant to any proposal by a city that would result in the annexation to a city of any land subject to a Williamson Act contract, to determine whether the city is required to succeed to the rights, duties, and powers of the county under the contract or whether the city may exercise an option to not succeed to the rights, duties, and powers of the county. The bill would also require a city to record a certificate of contract termination with the county recorder if the city exercises its option to not succeed to the contract and would authorize the commission to request, and the Department of Conservation to provide, advice and assistance in interpreting these provisions.

By increasing the duties of local agency formation commissions, the bill would impose a state-mandated local program.

(2) The Williamson Act also authorizes a city or county to contract with a landowner of agricultural land within an agricultural preserve to restrict the use of the land to agricultural use, recreational use, or open-space use for an initial term of not less than 10 years. The act authorizes the parties to mutually agree to rescind the contract in order to enter into an open-space easement agreement pursuant to the Open-Space Easement Act of 1974 to restrict the same property for an initial term of not less than 10 years.

This bill would (a) require that the easement be consistent with the Williamson Act for the duration of the original contract, (b) exclude from its provisions agreements entered into on or before August 12, 1998, and (c) exempt any agreement entered into under this act from the termination provisions under the Open-Space Easement Act of 1974 for the duration of the original Williamson Act contract. The bill would also require that the land subject to the contract be assessed pursuant to specified provisions of the Revenue and Taxation Code.

(3) Existing provisions of the Williamson Act provide that in order to facilitate a lot line adjustment, as specified, the parties to a contract that enforceably restricts the use of land within an agricultural preserve may rescind the contract by mutual agreement, and simultaneously enter into a new contract under the act, provided that the board of supervisors or city council involved makes specified findings. Existing law also requires that only one new contract with regard to a given parcel may be entered into pursuant to these provisions prior to January 1, 2000.

This bill would extend this date to January 1, 2003, and would also make related technical, nonsubstantive changes to these provisions.

(4) Existing provisions of the Williamson Act also require the state to avoid, whenever practicable, the location of any public improvement by a state or local public agency, and the acquisition of the land therefor, in agricultural preserves.

This bill would also apply these provisions to any department or agency of the United States, and would redefine "public improvement" for these purposes. The bill would also make related technical, nonsubstantive changes to these provisions.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) This bill would become operative only if SB 2227 becomes effective on or before January 1, 1999.

Ch. 691 (SB 1686) Solis. Special education.

Existing law requires school districts, county offices of education, and special education local plan areas to comply with state laws that conform to the federal Individuals with Disabilities Education Act, in order that the state may qualify for federal funds available for the education of individuals with exceptional needs. Existing law provides for the State Advisory Commission on Special Education.

This bill would change terminology and code section references in the Education Code to conform those provisions of the Education Code with the amended Individuals with Disabilities Education Act. The bill would change the composition and duties of the Advisory Commission on Special Education to conform with the Individuals with Disabilities Education Act. The bill would further repeal provisions of the Education Code that are no longer relevant. The bill would codify existing state regulations relating to pupil records and the implementation of a pupil's individualized education program. The bill would also make technical, nonsubstantive changes.

The bill would impose a state-mandated local program by imposing new duties on local education agencies in conformance with the provisions of the amended federal Individuals with Disabilities Education Act in regard to the identification, location, and assessment of individuals with exceptional needs, in regard to the transfer of parent's rights when an individual with exceptional needs reaches the age of 18, in regard to services provided to individuals with exceptional needs attending charter schools, in regard to private school children with disabilities, and in regard to the individualized education program for individuals with exceptional needs. The bill would provide for the method of allocating to the state federal appropriations pursuant to Part B of the Individuals with Disabilities Education Act in conformance with that act.

Existing law requires each special education local plan area to submit a local plan to the Superintendent of Public Instruction.

This bill would impose a state-mandated local program by requiring each special education local plan area submitting a local plan to demonstrate that it has in effect policies, procedures, and programs that are consistent with state laws, regulations, and policies governing, among other things, a free appropriate public education and a comprehensive system of personnel development.

Existing law requires the superintendent to review the appropriateness of new public and nonpublic school special education placements of individuals with exceptional needs if the cost of the placement exceeds \$20,000.

This bill would repeal this provision.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 692 (SB 1970) Schiff. Arrest warrants: electronic mail.

Existing law requires that a declaration in support of the warrant of probable cause for arrest be a sworn statement made in writing. Existing law also authorizes the magistrate to take an oral statement under oath under specified conditions that provide for the use of facsimile transmission equipment to transmit the proposed warrant, and all supporting declarations and attachments to the magistrate.

This bill would authorize the magistrate to take a written declaration in support of the warrant of probable cause for an arrest via electronic mail under specified conditions.

Existing law authorizes a magistrate, before issuing a warrant, to examine under oath, the person seeking the warrant and any witness that person may produce, and is required to take the affidavit or affidavits of the witness or witnesses in writing. The magistrate is authorized to take the oral statement, using a telephone and facsimile transmission equipment under specified conditions, in lieu of the written affidavit.

This bill would authorize the magistrate under the above provision, to take the oral statement of the person seeking the warrant or any witness that he or she produces, by using the telephone and electronic mail as specified.

Ch. 693 (SB 1988) Craven. Disclosures: mobilehomes.

Existing law makes provisions for the disclosure of specified information upon the transfer of residential real property applicable to the resale, on or after January 1, 1999, of a manufactured home or mobilehome, which is classified as personal property.

This bill would instead make these disclosure requirements applicable to a resale transaction entered into on or after January 1, 2000, for a manufactured home or mobilehome which is classified as personal property intended for use as a residence.

Ch. 694 (SB 2147) Brulte. Juveniles: detention.

(1) Existing law regulates the detentions of minors in adult facilities, as specified, and authorizes the Board of Corrections to place limits on, or refuse to grant extensions to, exemptions from compliance with this regulation given to certain counties. Existing law defines a jail for these purposes.

This bill would eliminate the above authorization, revise the definition of a jail for these purposes. The bill would also prohibit any building or complex that contains a jail from being converted or used as a secure facility for minors unless specified criteria are met.

(2) Existing law requires both the judge of the juvenile court and the Board of Corrections to conduct periodic inspections of facilities used for the confinement of minors for more than a 24-hour period, and requires either one to give notice of findings that the facility is not being operated and maintained as a suitable place for the confinement of minors or in conformance with specified standards, as applicable.

This bill would require the judge or the Board of Corrections to promptly give notice to the operator of a facility of the specific points of noncompliance if a facility is not in compliance with specified minimum standards. It would provide that if a facility that is in noncompliance fails to file a specified approved corrective action plan with the board within 60 days, or fails to comply with the plan, the board would be required to make a specified determination of suitability. In the case of a juvenile hall, if the court finds the hall is out of compliance that arises from overpopulation, the facility would be unsuitable for the confinement of minors if the court or the board makes specified findings.

(3) Existing law authorizes the custodians of specified juvenile facilities to make reports requested by the Board of Corrections or the juvenile court.

This bill would impose a state-mandated local program by requiring these reports to be made.

(4) Existing law requires a juvenile hall to be conducted in all respects as nearly like a home as possible, and makes various references to juvenile homes.

This bill would require a juvenile hall to provide a safe and supportive homelike environment and would delete all references to juvenile homes.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 695 (SB 2235) Committee on Revenue and Taxation. Taxation: property and private railroad cars.

Existing property tax law, in accordance with the California Constitution, provides an exemption, known as the "welfare exemption," for property used exclusively for religious, hospital, or charitable purposes if certain conditions are met.

This bill would clarify that certain housing projects for the disabled qualify for the exemption.

Existing property tax law prescribes filing dates for claims for the welfare exemption and the veterans' organization exemption, and for affidavits in connection with certain documented vessels.

This bill would correct an erroneous reference in those provisions.

Existing property tax law requires the clerk of the county board of equalization to send a notice to the applicant for the reduction of an assessment of the time and date of the hearing on the matter.

This bill would, under certain circumstances, permit the clerk to electronically transmit that notice to an electronic address designated by the taxpayer or the assessor, as the case may be.

Existing property tax law requires the assessor to inform each assessee of real property, as specified, of the assessed value of that property, as provided.

This bill would correct an erroneous reference in those provisions.

The Private Railroad Car Tax Law imposes a tax on private railroad cars operated upon railroads into, out of, or through this state. That law requires the Attorney General to proceed by appropriate legal action to collect all delinquent sums due under that law.

This bill would impose a specified statute of limitations for the State Board of Equalization to bring an action in the courts to collect the delinquent amounts, as provided. It would require the Attorney General to prosecute the action and would specify provisions of civil procedure law and civil law that would apply.

Ch. 696 (AB 1332) Murray. DNA and Forensic Identification Data Base and Data Bank Act of 1998.

Existing law requires any person who is required to register as a felony sex offender, or who is convicted of murder, or who is convicted of a felony offense of assault or battery, as specified, and who is committed to the state prison, a county jail, or any Youth Authority institution, or is granted probation, or is released from a state hospital where he or she was committed as a mentally disordered sex offender, to provide blood specimens and a saliva sample for analysis of deoxyribonucleic acid (DNA) and other genetic typing analysis at the Department of Justice's DNA laboratory, and to provide a right thumbprint and a full palm print impression of each hand.

This bill would repeal this provision and provide instead that any person who is required to register as a sex offender for committing any specified felony offense, or who is convicted of, or pleads guilty or no contest to, specified offenses, including, but not limited to, certain felony sex offenses, murder or attempted murder, voluntary manslaughter, felony spousal abuse, a felony offense of assault or battery, or kidnapping, or is found not guilty by reason of insanity of any of these crimes, or is convicted of murder or felony assault or battery, shall provide 2 specimens of blood, a saliva sample, a right thumbprint, and a full palm print impression of each hand for law enforcement identification analysis by the Department of Justice. Because the bill would impose increased duties on local criminal justice systems that are equivalent to those imposed by the establishment of a new crime, the bill would create a state-mandated local program.

The bill would require all laboratories, including the Department of Justice DNA laboratories, contributing DNA profiles for inclusion in California's DNA Data Bank to be accredited by the American Society of Crime Laboratory Directors Laboratory Accreditation Board (ASCLD/LAB). Additionally, the bill would require each laboratory to submit to the Department of Justice for review the annual report required by the ASCLD/LAB which documents the laboratory's adherence to ASCLD/LAB standards.

The bill would require the Department of Justice to provide the supplies and materials for collection of specimens, samples, and print impressions, and would provide that counties shall be reimbursed for the costs of obtaining these specimens, samples, and print impressions, as specified. The bill would provide that any person who refuses to give

any or all of the following, blood specimens, saliva samples, or thumb or palm print impressions, once he or she has received written notice that he or she is required to provide specimens, samples, and print impressions, is guilty of a misdemeanor. The bill also would provide that any person who knowingly discloses DNA or other forensic identification information to an unauthorized individual or agency, or for other than identification purposes or purposes of parole or probation supervision, is guilty of a misdemeanor. By creating new crimes, the bill would impose a state-mandated local program.

The bill would require the Department of Justice to catalog all requests for statistical or research information obtained from the DNA data bank. Commencing January 1, 2000, the bill would require the department to submit an annual letter to the Legislature including specified information with respect to each request for information obtained from the DNA data bank.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 697 (AB 535) Brown. Victims of crime.

(1) Existing law authorizes the State Board of Control to provide assistance to victims of crime and derivative victims of crime for the pecuniary losses they suffer as a direct result of criminal acts. This assistance is paid from the Restitution Fund, a continuously appropriated fund. Existing law requires that an application for assistance be filed within one year after the date of the crime or the victim attaining the age of 18 years, whichever is later, with the board being authorized for good cause to grant an extension of this time period not to exceed 3 years.

This bill would revise the definition of crime for the purposes of limitations imposed by these provisions and would revise the definition of derivative victim for the purposes of these provisions. This bill would authorize the board for good cause to grant an additional extension beyond 3 years when the claim is filed under specified circumstances. By enlarging the class of persons eligible for assistance that is payable from a continuously appropriated fund, this bill would make an appropriation.

(2) Existing law provides circumstances under which a claim of a victim or derivative victim for assistance under these provisions based on domestic violence shall not be denied.

This bill would require the board to adopt guidelines that allow the board to consider and approve applications for assistance based on domestic violence, taking into account specified factors.

(3) Existing law authorizes the board to reimburse a derivative victim for the expense of his or her outpatient mental health counseling when that mental health counseling is necessary as a direct result of the crime.

This bill would specify the derivative victims who are the primary caretaker of a minor victim of sexual or physical abuse who are eligible for reimbursement of these expenses.

(4) This bill would incorporate additional changes in Section 13960 of the Government Code proposed by AB 645 and AB 1803, to be operative only if this bill and one or both of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

This bill also would incorporate additional changes in Sections 13964 and 13965 of the Government Code proposed by AB 645, to be operative if AB 645 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(5) The provisions of the bill would remain in effect only until January 1, 2003, and as of that date would be repealed, unless a later enacted statute, that is enacted before January 1, 2003, deletes or extends that date.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 698 (AB 1201) Murray. Domestic violence.

(1) Existing law requires law enforcement officers to provide sexual assault victims with a "Victims of Domestic Violence" card bearing specified information.

This bill would expand the group of victims entitled to receive the domestic violence card to include victims of an alleged battery or corporal injury on a domestic partner.

(2) Existing law requires every law enforcement agency in this state to develop, adopt, and implement written policies and standards governing officer responses to domestic violence calls. Pursuant to this mandate, those policies must require that written notice of specified information be furnished to victims at the scene. The information includes a "Victims of Domestic Violence" card that must provide specified information including a statement that sexual assault by a person who is known to the victim, including sexual assault by a person who is the spouse of the victim, is a crime.

This bill would expand the list of victims that must be furnished the domestic violence card to include victims of battery or corporal injury on a spouse or domestic partner. The bill would also require that the card include the additional statement that battery and corporal injury on a spouse or domestic partner is a crime.

By expanding the duties of local law enforcement officials, this bill would create a state-mandated local program.

(3) This bill would incorporate additional changes in Section 264.2 of the Penal Code proposed by AB 1115, to be operative if AB 1115 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(4) This bill also would incorporate additional changes in Section 13701 of the Penal Code proposed by AB 2172 and AB 2177, to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 699 (AB 1767) Havice. Domestic violence.

(1) Under existing law, a battery is punishable by a fine not exceeding \$2,000, by imprisonment in a county jail not exceeding 6 months, or by both the fine and imprisonment. When the battery is committed against a spouse, a person with whom the defendant is cohabiting, a person who is the parent of the defendant's child, noncohabiting former spouse, fiancé, or fiancée, or a person with whom the defendant currently has, or has previously had, a dating relationship, the battery is punishable by a fine not exceeding \$2,000, by imprisonment in a county jail for a period of not more than one year, or by both that fine and imprisonment.

This bill additionally would provide that when the battery is committed against a person who is the former spouse whether or not cohabiting, or a person with whom the defendant currently has, or has previously had, an engagement relationship, the battery is punishable by a fine not exceeding \$2,000, by imprisonment in a county jail for a period of not more than one year, or by both that fine and imprisonment. By increasing local incarceration costs, the bill would impose a state-mandated local program.

(2) Under existing law, if a person commits an assault or battery upon his or her spouse, a person with whom he or she is cohabiting, or the parent of his or her child, a peace officer may arrest the person without a warrant under specified circumstances.

This bill additionally would authorize a peace officer to arrest the person without a warrant when the assault or battery is committed against the person's former spouse,

fiancé, fiancée, or a person with whom he or she currently has, or has previously had, an engagement relationship.

(3) This bill would incorporate additional changes in Section 836 of the Penal Code proposed by AB 247 and SB 1470, to be operative only if one or more of those bills and this bill are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 700 (AB 1803) Lempert. Crime victims: restitution.

Under existing law, crime victims, as defined, may obtain restitution for injury sustained as a direct result of a crime. Injury is defined for purposes of these provisions as including emotional injury if that injury is incurred by a victim who also sustains physical injury or threat of physical injury. Under this law, a victim of specified crimes, who sustains emotional injury, is presumed to have sustained physical injury. Reimbursement under these provisions is made from the Restitution Fund, which is continuously appropriated to the State Board of Control for paying restitution to victims of crimes.

This bill would apply this presumption additionally to a child who is a victim of a violation of the crime of deprivation of lawful child custody. The bill also would provide that this presumption may be applied by the board to a child who has witnessed a crime of domestic violence.

By enlarging the class of persons eligible for restitution that is payable from a continuously appropriated fund, this bill would make an appropriation.

This bill would incorporate additional changes in Section 13960 of the Government Code proposed by AB 535 and AB 645, to be operative only if this bill and one or both of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

The provisions enacted by the bill would remain in effect only until January 1, 2003, and as of that date would be repealed, unless a later enacted statute, that is enacted before January 1, 2003, deletes or extends that date.

Ch. 701 (AB 2172) Sweeney. Domestic violence: officer response.

Existing law requires the Commission on Peace Officer Training to implement a training course for law enforcement officers in the handling of domestic violence complaints and to develop guidelines for officer response to domestic violence. The course must include instruction on specified procedures and techniques.

This bill would require the above described training course to include the techniques for recognizing the signs of domestic violence.

Existing law requires every law enforcement agency in this state to develop, adopt, and implement written policies and standards for officers' responses to domestic violence calls. The policies are required to include standards for specified responses, including emergency assistance to victims, such as medical care, transportation to a shelter and police standbys for removing personal property, and notice to victims of specified information.

This bill would add to the list of responses required to be included in the above-summarized policies (1) transportation of domestic violence victims and children to a hospital for treatment when necessary and (2) police standbys for assisting a domestic violence victim with the removal of personal property and safe passage out of their residences. By increasing the duties of local officials, this bill would impose a state-mandated local program.

The bill would incorporate additional changes to Section 13701 of the Penal Code made by AB 1201 and AB 2177 to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures

for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 702 (AB 2177) Kuehl. Domestic violence: protective orders.

Under existing law, the Judicial Council is required to assist local courts that are responsible for issuing protective orders by developing informational packets describing the general procedures for obtaining a domestic violence restraining order.

This bill would require the informational packet to contain a statement that the protective order is enforceable in any state, territory, or reservation, and provide general information about agencies to contact regarding enforcement in those jurisdictions of an order issued by a court of this state. This bill would also require the Judicial Council to adopt rules of court that set forth the process whereby a person in possession of a valid foreign protective order may voluntarily register the order with a court for entry into the Domestic Violence Protective Order Registry, and require the sealing of foreign protective orders with access only provided to specified persons under certain conditions.

Existing law requires that a valid out-of-state protective or restraining order resulting from domestic violence or family violence be given full faith and credit by the courts of this state, and, after entry into the Domestic Violence Protective Order Registry, be enforced as if issued in this state.

This bill would delete the provision requiring that a valid out-of-state protective or restraining order be entered into the Domestic Violence Protective Order Registry prior to being enforced as if issued in this state, and would instead require that the out-of-state protective or restraining order be registered with a court of this state and entered into the Domestic Violence Protective Registry upon the request of the person in possession of the foreign protective order.

Existing law requires law enforcement agencies to develop, adopt, and implement written policies that encourage the arrest of domestic violence offenders where there is probable cause that an offense has been committed, and require the arrest of the offender if there is probable cause that a protective order has been violated.

This bill would specify that protective orders issued in any other state, tribe, or territory are among the orders subject to these policies.

Existing law requires the clerk of the superior court, whenever a protective order with respect to domestic violence is applied for or issued, to distribute to the protected person a pamphlet with certain information, as specified.

This bill would require that the pamphlet contain notice that a protective order is enforceable in any state, territory, or reservation, and also include general information about agencies to contact regarding enforcement in those jurisdictions of an order issued in this state.

Because this bill would impose additional duties on law enforcement officers and county employees, it would establish a state-mandated local program.

This bill would incorporate additional changes in Section 6380 of the Family Code proposed by AB 1531, AB 2801, and SB 1682, to be operative if this bill and one or more of the other bills are enacted and become effective before January 1, 1999, and this bill is enacted last.

This bill would incorporate some additional changes in Section 13701 of the Penal Code proposed by AB 1201 and AB 2172, to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 703 (AB 2700) Kuehl. Domestic violence courts.

Existing law establishes procedures for the prevention of domestic violence and provides both civil and criminal sanctions for acts of domestic violence, as specified.

This bill would require the Judicial Council to conduct a descriptive study, as specified, of various domestic violence courts, as defined, in California and other states, and to report its findings to the Legislature on or before March 1, 2000.

Ch. 704 (AB 2745) Cardoza. Children: incarcerated parents.

Existing law prohibits, in specified proceedings, the granting of custody of, or unsupervised visitation with, a child to a parent who has been convicted of specified offenses, except as specified. With respect to a dependent child of the juvenile court, existing law requires that an order placing the child in foster care, and ordering reunification services, shall provide for visitation between the child and the parent or guardian.

This bill would additionally prohibit the granting of custody or unsupervised visitation rights in those specified proceedings to a parent convicted of murdering the child's other parent, unless the court finds, in writing or on the record, that there is no risk to the child's health, safety, or welfare, and would specify factors the court may consider in making that finding. The bill would also prohibit any person from taking a child to visit or remain in the custody of the convicted parent without a custody or visitation order or the consent of the child's custodian or guardian. The bill's prohibitions would also apply to visitation between a parent and a dependent child placed in foster care, as specified.

This bill would be operative only if AB 2386 is also enacted, as specified.

This bill would incorporate additional changes in Section 3030 of the Family Code proposed by AB 1645, that would become operative only if AB 1645 and this bill are both chaptered and become effective January 1, 1999, and this bill is chaptered last.

Ch. 705 (AB 2386) Bordonaro. Children: incarcerated parents.

Existing law prohibits, in specified proceedings, the granting of custody of, or unsupervised visitation with, a child to a parent who has been convicted of specified offenses, except as specified. With respect to a dependent child of the juvenile court, existing law requires that an order placing the child in foster care, and ordering reunification services, shall provide for visitation between the child and the parent or guardian.

This bill would additionally prohibit the granting of custody or unsupervised visitation rights in those specified proceedings to a parent convicted of murdering the child's other parent, unless the court finds, in writing or on the record, that there is no risk to the child's health, safety, or welfare, and would specify factors the court may consider in making that finding. The bill would also prohibit any person from taking a child to visit or remain in the custody of the convicted parent without a custody or visitation order or the consent of the child's custodian or guardian. The bill's prohibitions would also apply to visitation between a parent and a dependent child placed in foster care, as specified.

This bill would be operative only if AB 2745 is also enacted, as specified.

This bill would incorporate additional changes in Section 3030 of the Family Code proposed by AB 1645, that would become operative only if AB 1645 and this bill are both chaptered and become effective January 1, 1999, and this bill is chaptered last.

Ch. 706 (SB 326) Leslie. Minors: protective orders.

Existing law authorizes a person who has been a victim of harassment, unlawful violence or threat of violence in the workplace, or domestic violence to obtain a restraining or protective order against the offending party and also authorizes the issuance of specified protective orders during proceedings under the Uniform Parentage Act. The rules of court provide that a minor, accompanied by a guardian, may appear

in court without counsel to obtain or oppose any of these orders. Existing law also provides that a minor, 12 years of age or older, may appear in court without a guardian, counsel, or guardian ad litem to obtain a protective order under the Domestic Violence Prevention Act against a person with whom the minor has or had a dating relationship; however, the court may, upon motion or in its discretion, appoint a guardian ad litem to assist the minor in obtaining the order.

This bill would (1) codify the above-described rule of court, with respect to minors under the age of 12; (2) provide that any minor, 12 years of age or older, may appear in court without a guardian, counsel, or guardian ad litem to obtain or oppose any of the above-described restraining or protective orders; (3) require the court to make a specified determination when appointing a particular guardian ad litem to assist the minor; and (4) specify the proper court to hear requests for those orders involving minors. The bill would also require the Judicial Council to adopt forms by a specified date to facilitate the appointment of a guardian ad litem in this context.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 707 (SB 1682) Solis. Domestic violence.

(1) Under existing law, in a criminal action in which the defendant is accused of an offense involving domestic violence, as defined, evidence of the defendant's commission of other domestic violence is not inadmissible under the rule governing the admissibility of character evidence, except as specified. Existing law also requires the people to disclose this evidence to the defendant, including statements of witnesses or a summary of the substance of any testimony that is expected to be offered, at least 30 days before the scheduled date of trial or at a later time as the court may allow for good cause.

This bill instead would require statements of witnesses or a summary of the substance of any testimony that is expected to be offered to be disclosed in compliance with specified penal provisions relating to the disclosure of information as a part of the discovery process.

(2) Existing law requires each county to develop a procedure to electronically transmit certain data relating to domestic violence protective orders, including the issuance of certain restraining and protective orders relating to prevention of abuse of children under the jurisdiction of the juvenile court, to the Department of Justice. Existing law also requires that the department be notified of the contents of the order and specified information, including the names of the protected persons and the date of the issuance of the order.

This bill would include in this information the terms and conditions of any restrictions on the ownership or possession of firearms.

(3) Existing law provides that if a person is convicted of any of specified domestic violence offenses and probation is granted, among the terms of probation imposed is the requirement that the defendant pay a minimum of a \$200 payment to be disbursed pursuant to a prescribed formula wherein a portion is transferred to the Controller for deposit in the Domestic Violence Fund from which $\frac{1}{2}$ is to be distributed to the counties, based on the number of restraining orders issued and registered in the domestic violence restraining order registry maintained by the Department of Justice, and $\frac{1}{2}$ to support the development of a statewide training and education program.

This bill instead would require that the portion of the payment transferred to the Controller be deposited in the Domestic Violence Restraining Order Reimbursement Fund and in the Domestic Violence Training and Education Fund, which would be created by this bill. The bill would also require that the allocation to the Domestic Violence Restraining Order Reimbursement Fund be distributed to local law enforcement agencies for state-mandated local costs resulting from specified notification requirements and the allocation to the Domestic Violence Training and Education Fund support the statewide training and education program.

(4) This bill would incorporate additional changes to Section 6380 of the Family Code made by AB 1531, AB 2177, and AB 2801, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 708 (AB 1875) Prenter. Agriculture.

(1) Existing law establishes a program to control the beet leafhopper and imposes assessments on producers and producer-handlers of crops susceptible to curly top virus, as determined by the Secretary of Food and Agriculture. Existing law requires the secretary to appoint a Curly Top Virus Control Board, which is advisory to the secretary and is authorized to make recommendations on all matters pertaining to beet leafhopper control, including the annual budget, the adoption, modification, and repeal of regulations and procedures, the use of funds for research, and necessary assessments. Existing law requires any money that is received by the secretary pursuant to these provisions governing beet leafhopper control, and any moneys from other sources received by the secretary for this program, to be deposited in the Department of Food and Agriculture Fund to be used for the administration, enforcement, and purposes of these provisions, as specified. Under existing law, these provisions are repealed on January 1, 2000, unless a later enacted statute that is enacted before January 1, 2000, deletes or extends that date.

This bill would continue that existing law indefinitely by repealing the repeal date.

(2) The bill would authorize nonapproved varieties of cotton to be grown in the district, subject to regulations proposed by the board and adopted by the department. The bill would require the department to adopt regulations which ensure that the growing of nonapproved varieties of cotton do not adversely affect the quality of Acala and Pima cotton approved to be grown in the district. The bill also would authorize the secretary to increase a specified assessment in the amount necessary to enforce the regulations adopted by the department for nonapproved varieties of cotton grown in the district, in order to ensure the quality of Acala and Pima cotton grown in the district.

Ch. 709 (AB 1910) Ashburn. Vaccine development: valley fever.

Existing law provides generally for immunization programs throughout the state.

This bill, in accordance with specified legislative intent, would require that funds appropriated in the annual Budget Act to the State Department of Health Services for the purpose of valley fever vaccine research shall be used to continue and expand the current research effort being conducted by the Valley Fever Vaccine Project. The bill would specify the duties of the contractor for the existing research contract, including establishing an advisory group to approve grants, and providing the department with periodic status reports on the researchers' progress. This bill would require the contract to provide that funding is provided on the condition that the state shall be reimbursed for the cost of grants made under the provisions of the bill, if a valley fever vaccine is developed and successfully marketed. The bill would also authorize the department to spend up to \$50,000 of the funds appropriated in the Budget Act of 1998 for valley fever vaccine research for related administrative costs.

Ch. 710 (AB 2390) House. Theft: vehicles: receipt of stolen property.

(1) Existing law provides that every person who buys or receives any property that has been stolen or that has been obtained in any manner constituting theft or extortion, knowing the property to be so stolen or obtained, or who conceals, sells, withholds, or aids in concealing, selling, or withholding any property from the owner, knowing the property to be so stolen or obtained, shall be punished by imprisonment in the state prison, or in a county jail for not more than one year.

This bill would specifically provide that every person who buys or receives any motor vehicle, trailer, special construction equipment, or any vessel under the circumstances described above shall be punished by the same terms of imprisonment plus a fine not exceeding \$10,000 where the state prison term is imposed or \$1,000 where a county jail term is imposed or by both the fine and imprisonment. The bill would provide that the terms "special construction equipment" and "vessel" are limited to motorized vehicles and vessels. By creating a new crime, this bill would impose a state-mandated local program.

(2) Existing law makes it a felony punishable by imprisonment in the state prison for 2, 3, or 4 years if a defendant previously convicted of felony vehicle theft or felony grand theft involving an automobile is subsequently convicted of any of those offenses regardless of whether he or she actually served a prior prison term for those offenses.

This bill would specifically include felony grand theft of a motor vehicle, any trailer, any special construction equipment, or any vessel among the offenses covered by this prohibition. The bill would provide that the terms "special construction equipment" and "vessel" are limited to motorized vehicles and vessels. Because the bill would expand the scope of an existing crime, it would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 711 (AB 2426) Strom-Martin. Combination vehicles: access limits: exception.

Existing law authorizes the establishment of limited highway access to terminals or services by the Department of Transportation and cities and counties.

This bill would exempt from established limitations of access, licensed carriers of livestock when engaged in certain activities under specified conditions and on specified portions of State Highway Route 101 that are necessary and incidental to the shipment of livestock. This exemption would be repealed on January 1, 2001.

The bill would require the Department of the California Highway Patrol, in consultation with the Department of Transportation, to report to the Legislature on or before July 1, 2000, concerning the findings of a study regarding the effect of the described exemption on public safety.

Ch. 712 (AB 2633) Murray. Optical discs.

Existing law does not regulate the manufacture of optical discs in California.

This bill would require every person who manufactures an optical disc for commercial purposes to permanently mark each manufactured optical disc with an identification mark that identifies the name of the manufacturer and the state in which the optical disc was manufactured. It would be a misdemeanor for a manufacturer to violate this requirement, and a misdemeanor for a person to buy or sell, receive, transfer, or possess for purposes of sale or rental, an optical disc knowing that the identification mark required by this chapter has been removed, defaced, covered, altered, or destroyed. Certain related activities would also be crimes. The bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 713 (SB 1712) McPherson. Forest resources: pitch canker control.

Prior budget acts have appropriated funds to be expended for specified purposes relating to forest improvement and conservation.

This bill would provide for the allocation of any funds appropriated to the Department of Forestry and Fire Protection pursuant to the Budget Act of 1998 to develop and implement specified measures designed to control the fungus known as "pitch canker," and to perform control work on state and private lands within zones of infestation, as designated by the State Board of Forestry.

Ch. 714 (SB 1947) Lockyer. Courts: requirements.

Existing law sets forth the statutory duties of the Judicial Council, as specified.

This bill would require the Judicial Council to adopt a rule of court requiring every trial court to adopt by January 2000, a one trial or one day jury service requirement, as specified, except in those counties which can demonstrate good cause why such a requirement is impractical.

Ch. 715 (AB 466) Campbell. Highway demonstration programs: courtesy signs.

Existing law authorizes the Department of Transportation to enter into an agreement to accept funds, materials, equipment, or services from any person for maintenance or roadside enhancement of a section of a state highway. The Director of Transportation is authorized to recognize the sponsoring person with the erection of a courtesy sign on the highway. The director is authorized to conduct a demonstration program in the County of Los Angeles to recognize the sponsoring person by authorizing the placement of recognition on the sponsored materials, other than safety equipment, or authorizing the planting and maintenance by the sponsor of organizational logos created from live plant materials, instead of the courtesy sign.

This bill would extend the demonstration program to Orange County and would make the program inoperative on July 1, 2002.

The bill would require the department to provide a report to the Legislature regarding the utilization of this authority.

Ch. 716 (AB 789) Cardenas. Health care personnel: criminal record clearances.

Existing law requires a criminal record clearance to be conducted for all nurse assistants and home health aides by the submission of fingerprint cards to the State Department of Health Services for processing at the Department of Justice.

This bill would require the State Department of Health Services to notify the licensee and applicant of any criminal convictions within 5 working days of receipt of the criminal record or information from the Department of Justice.

The bill would authorize the State Department of Health Services to request and maintain employment information for nurse assistants, direct care staff of certain care facilities, and home health aides. The bill would require the State Department of Health Services to conduct a study to assess the additional technology requirements necessary to include previous and current employment information on its registry and would appropriate \$49,000 from the General Fund to the department for those purposes.

Ch. 717 (AB 947) Gallegos. Health facilities: staff privileges: clinical psychologists.

Existing law provides for the licensure and regulation of health facilities and provides that a violation of those provisions is subject to criminal sanction.

Existing law requires, until January 1, 2002, each health facility owned and operated by the state offering care or services within the scope of practice of a psychologist to establish rules, regulations, and procedures for consideration of an application for medical staff membership and clinical privileges submitted by a clinical psychologist. Existing law requires various departments to report to the Legislature no later than January 1, 2001, on the impact of medical staff membership and privileges for clinical psychologists on quality of care and cost effectiveness issues. Existing law provides for related alternative provisions to become operative on January 1, 2002.

This bill would amend the provisions that would be repealed on January 1, 2002, by requiring, instead, that each health facility owned and operated by the state offering care or services within the scope of practice of a psychologist include provisions for medical staff membership and clinical privileges for clinical psychologists within the scope of their licensure subject to the rules and medical staff bylaws governing the use of privileges as the facility shall establish. The bill would require, among other things, that the rules and medical staff bylaws of the health facility not discriminate on the basis of whether the staff member holds an M.D., D.O., D.D.S., D.P.M., or doctoral degree in psychology, within the scope of the member's respective licensure.

This bill would also amend these provisions by requiring that the State Department of Mental Health, the State Department of Developmental Services, and the Department of Corrections to report to the Legislature on quality of care and on cost effectiveness issues no later than January 1, 2006.

This bill would extend the duration of these provisions until January 1, 2007, and would delay the operative date of the alternative provisions until January 1, 2007.

By changing the definition of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 718 (AB 1233) Leach. Elections: campaign material.

Existing provisions of the California Constitution require the Legislature to prohibit improper practices that affect elections. Existing law prohibits a candidate or committee on his or her behalf from representing, in connection with an election campaign, either orally or in campaign material, that the candidate has the support of a committee or organization that includes, as part of its name, the name or any variation upon the name of a qualified political party with which the candidate is not affiliated, as specified, that might tend to mislead the voters into believing that the candidate has the support of that party's county or state central committee, when that is not the case.

This bill would prohibit, except as specified, a person, firm, association, corporation, campaign committee, or organization from, with actual malice, producing, distributing, publishing, or broadcasting campaign material that contains (1) a picture or photograph of a person or persons into which the image of a candidate for public office is superimposed or (2) a picture or photograph of a candidate for public office into which the image of another person or persons is superimposed. The bill would permit that campaign material to be produced, distributed, published, or broadcast if each picture or photograph in the campaign material includes a specified disclaimer, as specified. The bill would define campaign material to include, but not be limited to, any printed matter, advertisement in a newspaper or other periodical, television commercial, or computer image.

This bill would permit any registered voter to seek a temporary restraining order and an injunction prohibiting the publication, distribution, or broadcasting of any campaign material prohibited by the bill. The bill would also permit a candidate for public office whose likeness appears in a picture or photograph prohibited by this bill to bring a civil action against any person, firm, association, corporation, campaign committee, or organization that produced, distributed, published, or broadcast the picture or photograph prohibited by this bill, and the court may award an amount equal to the cost of producing, distributing, publishing, or broadcasting the campaign material that violated this bill, in addition to reasonable attorney's fees and costs.

The bill would declare that it would not apply to a holder of a license granted pursuant to the federal Communications Act of 1934 in the performance of the functions for which the license is granted, or to the publisher or an employee of a newspaper, magazine, or other periodical, as defined.

Ch. 719 (AB 1892) Wayne. Public Employees' Retirement System: benefits.

The Public Employees' Retirement Law provides for survivor continuance allowances on special death benefits to surviving spouses not to cease upon remarriage.

The bill would restore allowances to surviving spouses of deceased patrol, state safety, or state peace officer/firefighter members which had been discontinued upon their remarriage.

Ch. 720 (AB 1978) Campbell. Retail food facilities.

Existing law, the California Uniform Retail Food Facilities Law, provides for the regulation of retail food facilities, including health and safety standards. Under existing law, a violation of any of these provisions is punishable as a misdemeanor.

Existing law requires employees of food facilities to comply with specified procedures with respect to the preparation, serving, and handling of food or utensils, and requires all new and replacement food-related and utensil-related equipment to meet approved applicable sanitation standards.

This bill would revise procedures with respect to the serving of ready-to-eat foods and sanitation standards for food-related and utensil-related equipment.

The bill, among other things, would also require specified food facilities, on or before January 1, 2000, to have an owner or employee who has successfully passed an approved

and accredited food safety certification examination, and would specify the elements of knowledge required for such an examination.

This bill would require enforcement agencies to notify all permitted food facilities, on or before March 1, 1999, of the new legal requirements imposed by this bill. The imposition of this new requirement on local enforcement agencies would create a state-mandated local program. It would also repeal and recast sanitation provisions governing temporary food facilities, and would, among other things, require that a person or organization that is in control of any community event, as defined, in which one or more temporary food facilities operates, obtain a permit for that event.

The bill would establish separate sanitation provisions for nonprofit charitable temporary food facilities, as defined, and would require each local enforcement agency to annually report to the State Department of Health Services regarding the adequacy of the standards applied by these provisions to any nonprofit charitable temporary food facilities operating within its jurisdiction, and would require the department to review these reports and confer with the California Conference of Directors of Environmental Health and with affected industry groups. The imposition of this new requirement on local enforcement agencies would create a state-mandated local program.

The bill, in addition, would require the State Department of Health Services, in consultation with various organizations and interested parties, to develop regulations regarding food safety certification examinations, and would appropriate \$100,000 from the General Fund to the department for this purpose.

Since a violation of the provisions applicable to retail food facilities is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 721 (AB 2207) Escutia. Family law information centers.

Existing law provides for the appointment of counsel in specified family law matters where the parent is unable to afford counsel.

This bill would create a pilot project to establish family law information centers, to be administered by the Judicial Council, in 3 pilot project courts that apply to participate and are selected by the Judicial Council, to provide legal resources to low-income family law litigants, as defined. The bill would require, in courts that have a family law facilitator, the pilot project to coordinate its services with the services of the family law facilitator, and that in at least one pilot project court, the family law facilitator shall staff and provide the services of the family law information center. The bill would also require the Judicial Council to conduct a specified evaluation of the success of the project and report to the Legislature by a specified date. These provisions would be repealed on January 1, 2003.

Ch. 722 (AB 2465) Scott. Child care.

Under existing law, the Child Care and Development Services Act, the Superintendent of Public Instruction is required to adopt rules and regulations for child care and development services, including providing guidelines for the selection of agencies that contract for child care services. Existing law requires the Superintendent of Public Instruction to set priorities for expansion of child care and development services as funding is made available to ensure that all child care and development programs are adequately expanded according to the priorities set forth in the Child Care Commission Report of 1978.

This bill would require the Superintendent of Public Instruction to take steps necessary to increase the capacity of the child care system according to specified priorities, including, but not limited to, (1) encouraging contractors to develop and maintain child care spaces during nontraditional times, (2) encouraging child care providers to expand the capacity for infant care, and (3) encouraging child care providers to expand capacity, particularly in geographic areas with high need and limited resources. The bill would require the State Department of Education to coordinate with the State Department of Social Services to prepare and present an interim report by March 31, 1999, and a final report by December 31, 1999, to the Joint Legislative Budget Committee and Department of Finance. The bill would prescribe the required components of the report, and would require the report to include recommended best practices for future capacity building activities specific to the types of care in the shortest supply, such as infant and toddler care, schoolage care, care in underserved areas, and nontraditional hours care. The bill would also require the report to include the results of current pilot studies involving training CalWORKs recipients as licensed family child care providers or licensed-exempt providers.

The bill would declare the intent of the Legislature that any research activities undertaken by the State Department of Education pursuant to specified provisions of the bill be funded by any federal funds appropriated to the State Department of Education for child care capacity-building efforts pursuant to a specified item of the Budget Act of 1998.

The bill would authorize the Superintendent of Public Instruction to provide outreach services and technical assistance to new child care providers and to those providing care during nontraditional times, in underserved localities, and for children with special child care needs.

The bill would require the Superintendent of Public Instruction to publish the methodology and data used, including county-specific data if such data is used, for the allocation of all child care funds. The bill would also require the superintendent to make available to the public, within 90 days of an allocation, the accounting information for that allocation.

Ch. 723 (AB 2569) Kuehl. Controlled substances: public libraries.

Existing law makes it a felony, punishable by imprisonment in the state prison, to possess for sale or sell heroin, cocaine, cocaine base, methamphetamine, or phencyclidine (PCP). Existing law also provides that any person who is convicted of any of these offenses, in addition to the punishment imposed for that conviction, shall be imprisoned in the state prison for an additional one year if the violation occurred upon the grounds of a public park or ocean-front beach, including adjacent public parking lots and sidewalks, and if no other additional punishment is imposed pursuant to specified provisions of the Uniform Controlled Substances Act. Under existing law these provisions are applicable to a public park or ocean-front beach only if the city council or county board of supervisors having jurisdiction over the public park or ocean-front beach adopts an ordinance designating the public park or ocean-front beach as a "drug-free zone" and notice thereof is posted at the public park or ocean-front beach. These provisions are repealed as of January 1, 2003.

This bill would add public libraries, as defined, to those locations that may be designated as a drug-free zone. Under the bill, the term "public park" in these provisions would include a public swimming pool and a public youth center.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 724 (AB 2699) Pringle. Local government finance.

(1) Existing law authorizes the board of supervisors of the County of Orange to elect by resolution, to guarantee payment under a financing agreement, or to guarantee payment under an agreement to finance the lease or lease-purchase of property through the issuance of certificates of participation or lease revenue bonds pursuant to specified procedures, including notice to the Controller and a schedule for transfer of moneys to a trustee for payments under the agreement. Existing law requires that taxes collected by the State Board of Equalization that are derived from taxes imposed by the County of Orange, as specified, be pledged to all certificates of participation or lease revenue

bonds issued during the years 1996 and 1997, not to exceed the amount to be paid in those fiscal years on those certificates of participation or lease revenue bonds.

This bill would enact another similar authorization for the Orange County Board of Supervisors to become operative when a court of appellate jurisdiction invalidates the prior authorization.

(2) Existing law requires the Orange County Development Agency to transfer \$4,000,000 to the General Fund of the County of Orange in equal installments twice a year for a period of 20 years.

This bill would authorize the Orange County Board of Supervisors to provide by resolution for the repayment by the county's redevelopment agency of its debt to the county for benefits previously provided by the county to redevelopment projects. The resolution or resolutions may provide for the transfer of \$4,000,000 per year to assure full repayment of the debt as necessary. These provisions would become operative when a court action invalidates or suspends the prior transfer requirement and would be repealed on January 1, 2017.

(3) Existing law modifies the otherwise required allocations of ad valorem property tax revenues in Orange County to reduce the property tax allocation to a flood control district and a harbors, beaches, and parks fund by \$4,000,000 each, and to require allocation of an amount of revenues equivalent to that reduction to the county for each of 20 fiscal years.

This bill would enact a similar, alternative provision to become operative for fiscal years after the date on which a court of appellate jurisdiction invalidates the above reallocation of property tax revenues.

(4) Existing law provides under specified conditions that a monthly apportionment of funds from the Highway Users Tax Account in the Transportation Fund for county road projects that would have been paid to the County of Orange shall be paid to the Orange County Transportation Authority from July 1997 to June 2013, thus constituting an appropriation.

This bill would enact a similar provision to be operative until June 30, 2013, if a court of appellate jurisdiction invalidates provisions of law discussed in (1) above, thus constituting an appropriation.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 725 (AB 2732) Miller. Insurance: bail licensees: records: data advisory committees.

(1) Existing law provides for the licensure of persons engaged in the business of executing, delivering, or furnishing bail bonds or undertakings of bail, and requires those licensees to satisfy, among other things, certain continuing education requirements.

This bill would exempt from these continuing education requirements a person who has been a licensee in good standing for 30 continuous years in the state and is 70 years of age or older.

(2) Existing law requires every insurer, rating organization, or advisory organization, and every group, association, or other organization of insurers which engage in joint underwriting or joint reinsurance to maintain certain specified records and information relevant to their operations and the operations of their members. Existing law requires that these records and information be made available to the Insurance Commissioner at all reasonable times for specified purposes.

This bill would delete rating organizations from the scope of those requirements and would establish data advisory committees to assist the commissioner in making special calls for one or more lines or types of commercial insurance, as defined, and to make available records required to be maintained by insurers or advisory organizations. The data advisory committees would be comprised of certain specified members and would be required to review all proposed industrywide requests for records and information by the commissioner, and, within 10 business days after receipt of each proposal, authorized to advise the commissioner as to certain specified factors relating to the cost

effectiveness and feasibility of the proposal. This bill would authorize individual members to provide their own advice if the data advisory committee is unable to reach unanimous agreement in this regard.

This bill would also authorize an insurer to fulfill its recordkeeping and reporting requirements under these provisions by reporting required records to an advisory organization, as specified, but would prohibit the recipient advisory organization from providing an individual insurer's information to another insurer, person, or organization, subject to certain exceptions.

(3) Existing law governing rates and rating and other organizations makes it a crime to willfully violate any of its provisions.

By adding a new prohibition within these provisions with regard to the provision of individual insurer's information by advisory organizations, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 726 (SB 55) Kopp. Bail.

Under existing law, in setting, reducing, or denying bail, the judge or magistrate is required to take into consideration the protection of the public, the seriousness of the offense charged, the previous criminal record of the defendant, and the probability of his or her appearing at trial or hearing of the case. Also under existing law, no bail may be accepted unless the judge or magistrate is convinced that no portion of the consideration, pledge, security, deposit, or indemnification paid, given, made, or promised for its execution was feloniously obtained. Additionally, under existing law, before reducing the bail of a person charged with a serious felony below the amount established by the bail schedule approved for the county, the court is required to make a finding of unusual circumstances and set forth those facts on the record.

This bill would authorize a judge or magistrate to place a hold on the release of a defendant from custody on the basis that the consideration, pledge, security, deposit, or indemnification paid, given, made, or promised for its execution was feloniously obtained only if a peace officer or a prosecutor files a declaration executed under penalty of perjury setting forth probable cause, or the magistrate or judge has probable cause, and would set forth a procedure for making the determination. By expanding the crime of perjury, the bill would impose a state-mandated local program.

The bill also would make technical, conforming changes to existing provisions of law.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 727 (SB 270) Peace. Vehicles: foreign commercial vehicles: safety regulation.

(1) Existing law requires the Department of the California Highway Patrol to adopt reasonable rules and regulations designed to promote the safe operation of specified commercial vehicles.

Existing law prohibits any person from operating a commercial motor vehicle from another country outside the boundaries of a designated commercial zone, as defined, unless federal operating authority, as specified, has first been obtained. A violation of this provision is an infraction punishable by a fine of \$1,000. A peace officer is authorized to impound a vehicle that is in violation of this provision.

This bill would require the department to adopt reasonable rules and regulations to ensure that all foreign commercial vehicles entering into, and operating within, this state meet those standards already in effect for other commercial vehicles and address, but not be limited to, vehicle maintenance, maximum hours of service for drivers, insurance, and enforcement of criminal, civil, and administrative actions, including, but not limited

to, impoundment of vehicles for second or subsequent violations of the specified rules and regulations.

Because violations of the rules and regulations adopted by the department would be infractions or misdemeanors, the bill would impose a state-mandated local program by creating new crimes.

The bill would also require the department and the State Air Resources Board to conduct vehicle safety and emissions inspections at the California-Mexican border crossings, as specified.

The bill would provide that specified provisions of the bill shall become operative only if funds are appropriated in the Budget Act of 1998 to carry out those provisions.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 728 (SB 1073) Vasconcellos. Health facilities.

Existing law provides for the licensure and regulation of adult day health care services. Existing law provides that an adult day health care license for purposes of a licensed health facility is a special permit, as defined, empowering the health facility to provide adult day health care services as a separate program in a distinct part of the facility. Existing law requires any operator of a health facility, clinic, or community care facility licensed to provide adult day health care under these provisions to provide that adult day health care as an independent program located in a separate, freestanding facility or in a distinct portion of the health facility, clinic, or community care facility.

This bill would provide, instead, that any operator of a health facility licensed to provide adult day health care under these provisions shall provide that adult day health care as a separate program as determined by the department and any operator of a clinic or community care facility licensed to provide adult day health care under these provisions shall provide that adult day health care as an independent program that is located in a separate, freestanding facility or in a distinct part of the clinic or community care facility.

This bill would incorporate additional changes in Section 1585.2 of the Health and Safety Code, proposed by AB 1817.

Ch. 729 (SB 1361) Alpert. Adult day care centers.

Existing law provides for the care of individuals with Alzheimer's disease. Existing law provides for the licensure and regulation of adult day health care centers by the State Department of Health Services and the licensure and regulation of adult day care centers and adult day support centers by the State Department of Social Services.

This bill would authorize any of these centers that provide care and supervision for adults with Alzheimer's disease and other dementias to install designated security devices for the safety and security of those individuals if the facilities meet prescribed requirements.

Ch. 730 (SB 1405) Polanco. Security bars: fire safety: regulations.

Existing law known as the State Housing Law generally regulates the construction, maintenance, occupancy, and use of buildings used for human habitation, including regulation of fire safety by the State Fire Marshal. Existing law also generally requires the State Fire Marshal to prepare, adopt, and submit for approval building standards pursuant to the California Building Standards Code, and other regulations relating to fire and panic safety establishing minimum requirements for the installation and maintenance of security bars that present a fire or panic hazard.

Existing law also prohibits the sale of security bars, referred to as "burglar bars," in California at wholesale or retail unless the burglar bars are either labeled or their packaging contains warning information pursuant to regulations adopted by the State Fire Marshal. Existing law also prohibits any person from installing for profit unopenable burglar bars on a residential dwelling where openable burglar bars are required for emergency escape or rescue, or on mobilehomes or manufactured housing unless at least

one window or door to the exterior in each bedroom is openable for emergency escape or rescue.

This bill would delete the element in the latter prohibition that requires the installation to be done for profit. It would require the State Fire Marshal to distribute public education materials about the dangers of illegal burglar bars, to the extent that resources are available. It would also require the State Fire Marshal to adopt on or before September 1, 1999, regulations and standards to control the quality and installation of burglar bars and safety release mechanisms installed, marketed, distributed, offered for sale, or sold in California.

The bill would also prohibit any person, on or after October 1, 1999, from installing, marketing, distributing, offering for sale, or selling burglar bars and safety release mechanisms that have not been approved by a testing laboratory recognized by the State Fire Marshal, and would also prohibit on or after January 1, 1999, the installation or maintenance of burglar bars on any residential dwelling that is owned or leased by a public agency, unless the burglar bars meet current state and local requirements, as applicable, for burglar bars and safety release mechanisms.

A violation of provisions of the State Housing Law and provisions relating to the State Fire Marshal constitutes a misdemeanor. Because this bill would make changes to those provisions and thereby create new crimes, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 731 (SB 1645) Mountjoy. Director of General Services: surplus state property.

(1) Existing law requires the Department of General Services to perform various functions and duties with respect to state property.

This bill would provide that the processes, procedures, or policies maintained, developed, or prescribed by the department in connection with the administration of its duties under specified provisions of the Public Contract Code or the State Contract Act shall be exempt from the Administrative Procedure Act, including actions taken by the department with respect to the State Administrative Manual and the State Contracting Manual.

This bill would authorize the Director of General Services, upon the written request and consent of the state agency with control or jurisdiction over the property concerned, to sell, convey, or exchange properties that are not needed by any state agency at fair market value following a 30-day notice to the Joint Legislative Budget Committee and the applicable Members of the Senate and Assembly who represent the district in which the properties are located, under specified circumstances.

This bill would further authorize the Director of General Services to sell, exchange, lease, or transfer, as the case may be, specified parcels of state property. The bill would also exempt a sale, exchange, lease, or transfer of certain of these parcels from specified provisions of the California Environmental Quality Act, and would require the reservation of mineral rights, as specified. The bill would also rescind the existing authority of the director to sell, exchange, or lease other specified parcels of state property.

(2) Existing law authorizes the Director of General Services, with the consent of the state agency concerned, to sell or exchange any personal property that belongs to the state, if the director deems the sale or exchange to be in the best interests of the state.

This bill would require the Department of General Services, if feasible and consistent with existing law, to offer appropriate state surplus personal property to school districts prior to offering that property to the public, except for property more appropriately suited for public safety uses. The bill would authorize the department to offer school districts state surplus personal property at less than fair market value, if it is determined by the director to be in the best interests of the state. The bill would require the department to develop policies and procedures for the implementation of this provision.

Ch. 732 (SB 1683) Rosenthal. Title insurance.

Under existing law, title insurance is defined as insuring, guaranteeing, or indemnifying an owner of real or personal property or the holder of liens or encumbrances or other interests against loss due to liens, encumbrances, or defects in the title to the insured property, defects in liens or encumbrances, or defects in title searches. Under existing law, the Insurance Commissioner regulates the business of title insurance, including the making and use of rates and the enforcement of prohibitions against paying or making certain types of commissions and rebates.

This bill would require the commissioner to develop and provide a brochure for consumers who are required to buy title insurance, as specified, and to display the brochure on the Internet.

This bill would provide that it shall become operative only if AB 2492 is also enacted and becomes operative.

Ch. 733 (SB 1823) Kelley. Public social services: foster care and adoption.

Existing law limits the amount the state compensates private adoption agencies for costs for the placement of certain children to \$3,500 per child adopted.

This bill would, until July 1, 2001, notwithstanding those limitations, authorize the state, upon request of Sacramento County, to make supplemental payments to private adoption agencies that serve older children or children with special and significant needs whose adoption is unlikely without services from those adoption agencies. The bill would require the requesting county to bear the cost of the supplemental payments.

Existing law provides for the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which payments are made to foster care providers on behalf of eligible low-income children.

Under existing law, a procedure is provided for collection of overpayments by foster group homes.

This bill would require each county to collect AFDC-FC overpayments to foster family homes and the homes of the approved homes of relatives or nonrelative legal guardians. By increasing the duties of counties, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 734 (SB 1896) Peace. Public postsecondary education: student fees.

Existing law provides for a public postsecondary educational system in this state, which consists of the University of California, the California State University, and the California Community Colleges.

Existing law also requires systemwide fees charged to resident undergraduate students at the University of California and the California State University to be reduced for the 1998–99 fiscal year by 5% below the level charged during the 1997–98 fiscal year, and, for the 1999–2000 fiscal year, to be at the same level as for the 1998–99 fiscal year.

This bill would require systemwide education and registration fees charged to resident graduate students at the University of California and the California State University for the 1999–2000 fiscal year to be reduced by 5% below the level charged for those resident students for the 1997–98 fiscal year.

The bill would provide that this provision is not required to apply to the University of California except to the extent that the Regents of the University of California, by appropriate resolution, make it applicable.

This bill would provide that resident undergraduate student and resident graduate student fee reductions shall take effect only if the Legislature appropriates sufficient funds for this purpose to fully reimburse the University of California, the California State University, and the California Community Colleges for any reductions in fee revenues.

Ch. 735 (SB 1973) Maddy. Health data.

(1) Existing law requires the Office of Statewide Health Planning and Development to charge a health facility a fee of not more than 0.035% of the gross operating cost of the health facility for the previous fiscal year, for deposit into the California Health Data and Planning Fund.

This bill would repeal those provisions on January 1, 2002, and enact similar provisions, on and after January 1, 2002, requiring the office to charge fees for health facilities and freestanding ambulatory surgery clinics for deposit into the fund.

(2) Existing law, the Health Data and Advisory Council Consolidation Act, until January 1, 1999, requires the office to be the single state agency designated to collect certain health facility or clinic data for use by all state agencies. Existing law establishes the California Health Policy and Data Advisory Commission to be composed of 11 members, with prescribed powers and duties.

This bill would require the office to conduct, under contract with a consulting firm, a comprehensive review of the financial and utilization reports that hospitals are required to file, and other similar reports.

The bill would increase the membership of the commission to 13 members and impose term limits on the membership. The bill would require the office to present a work plan to the commission and would authorize the commission to monitor the office in achieving the goals of the work plan.

The bill would require the office, based upon review and recommendations of the commission and its appropriate committees, to allow and provide for additions or deletions to certain patient level data required to be reported.

The bill would require, after January 1, 2002, a hospital to file an Emergency Care Data Record for each patient encounter in a hospital emergency department, and a hospital and freestanding ambulatory surgery clinic to file an Ambulatory Surgery Data Record for each patient encounter during which at least one ambulatory surgery procedure is performed.

The bill would establish the time and manner in which those records are required to be filed with the office. The bill would revise the time and manner in which health facilities are required to file Hospital Discharge Abstract Data Records with the office.

The bill would revise the manner in which the office makes available copies of reports and publications.

The bill would require the office to provide prescribed financial and technical assistance to small and rural hospitals in meeting reporting requirements.

The bill would require the office to submit to the Legislature a plan to achieve the goal of data interchange among health facilities, health care service plans, insurers, providers, emergency medical services providers and local emergency medical services agencies, and other state agencies by June 30, 2001. The bill would require the office to engage an outside consulting organization to evaluate progress made by the office and make recommendations to the Legislature by June 30, 2003.

The bill would extend operation of the Health Data and Advisory Council Consolidation Act until June 30, 2004, and would extend repeal of the act until January 1, 2005.

The bill would appropriate \$1,240,500 from the California Health Planning and Data Fund to the office with \$250,000 to be allocated for the purpose of conducting a comprehensive review of hospital reporting requirements and \$990,500 to be allocated for systems development costs associated with the timeliness of the patient discharge data program and the collection of ambulatory surgery and emergency department records.

Ch. 736 (SB 1981) Greene. Medical boards: sunset review.

(1) Existing law regulating the practice of the healing arts establishes the Medical Board of California, the California Board of Podiatric Medicine, and the Physician Assistant Examining Committee. The existence of these boards and committee will be terminated July 1, 1999.

This bill would extend the existence of the boards and the committee until July 1, 2003, and make conforming changes.

(2) The Medical Practice Act contains various requirements governing foreign medical graduates participating in clinical service programs or seeking licensure in this

state as a physician and surgeon. The act also contains various requirements governing the issuance of a license as a physician and surgeon to a diplomate of the National Board of Medical Examiners.

This bill would modify these and other related requirements.

(3) Existing law requires physicians and surgeons, podiatrists, and health care facilities to comply with a request for the medical records of a patient that is accompanied by the patient's written authorization, as specified. Existing law imposes various civil penalties for failure to comply.

This bill would make failure to comply with a court order, issued in the enforcement of a subpoena, mandating the release of records to the Medical Board of California, a misdemeanor, thereby imposing a state-mandated local program by creating a new crime. It would enact related provisions.

(4) The Medical Practice Act provides for creation of the California Board of Podiatric Medicine within the Medical Board of California, with various powers and duties relating to the regulation of podiatric medicine.

This bill would modify the membership of the board, repeal provisions granting a limited license to certain practitioners and requiring a special certificate for a podiatrist to perform surgical treatment of the ankle, authorize a podiatrist certified by the board on and after January 1, 1984, to perform surgical treatment of the ankle, and revise requirements for continuing education and examination. The bill would also permit a licensed podiatrist to include a statement in advertising that he or she is certified or eligible or qualified for certification by a private or public board or association, under certain conditions, and would require the Joint Legislative Sunset Review Committee to review the expenditure of funds for the support of educational and related programs in the field of podiatry. The bill would also repeal a requirement that the board establish and administer a diversion program for podiatrists impaired due to abuse of drugs and alcohol, among other things.

(5) The Medical Practice Act provides for the Medical Board of California to renew existing licenses of persons holding a drugless practitioner's certificate, which authorizes the holder to treat diseases, injuries, and other conditions without the use of drugs, as regulated by the board. Existing law provides that the classification of drugless practitioner is otherwise abolished.

This bill would repeal the provisions regulating drugless practitioners.

(6) The Physician Assistant Practice Act provides for creation of the Physician Assistant Examining Committee, which has various powers and duties relative to making recommendations to the Medical Board of California concerning the regulation of physician assistants.

This bill would rename the committee as the Physician Assistant Committee and would modify its membership. The bill would also delete provisions requiring the board to approve applications of physicians who supervise physician assistants effective July 1, 2000, provide that a licensed physician assistant shall not be liable for civil damages for rendering emergency care in certain cases, and provide for the committee to recognize training programs for physician assistants approved by a national accrediting organization rather than approving those programs itself. The bill would also authorize physicians and surgeons licensed by the Osteopathic Medical Board of California to use or employ physician assistants under certain conditions, and would make violations of these provisions a misdemeanor, thereby imposing a state-mandated local program by creating a new crime.

(7) The bill would enact other related provisions.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 737 (SB 2014) Schiff. Hazardous waste generator fees: recycled materials.

Existing law requires every generator of hazardous waste to pay an annual generator fee to the State Board of Equalization but exempts, from those fees, hazardous materials that are recycled and used onsite, and certain aqueous wastes. Existing law also imposes

a fee upon the operators of certain hazardous waste facilities. The revenues from those fees are required to be deposited in the Hazardous Waste Control Account in the General Fund and the money in that account is available, upon appropriation by the Legislature, for expenditure by the Department of Toxic Substances Control for hazardous waste management.

This bill would provide that a generator who pays a hazardous waste generator inspection fee to a certified unified program agency, which fee is imposed pursuant to the CUPA single fee system, is eligible for a refund of the generator fee, under specified conditions, and would provide that a generator who transfers hazardous materials to an offsite facility for recycling at that offsite facility or another offsite facility is eligible for a refund of the generator fee, under specified conditions. The bill would require the department to determine, on or before June 30 of each year, if there are surplus funds in the Hazardous Waste Control Account and to allocate those surplus funds, upon appropriation by the Legislature, to pay refunds to these generators, in a specified order of priority. The bill would require the board to issue refunds, in the manner directed by the department to eligible hazardous waste generators, if funds for these refunds are available.

Ch. 738 (SB 2098) C. Wright. Mental health: Lanterman-Petris-Short Act: reporting requirements.

Existing law permits a person to bring an action for damages for violation of various provisions of the Lanterman-Petris-Short Act regarding the willful and knowing release of confidential information for the greater of \$500 or triple the actual damages sustained.

This bill would increase that limit to the greater of \$10,000 or triple the actual damages sustained. The bill would also authorize an action for the negligent release of confidential information for both \$1,000, in which case actual damages are not a prerequisite, and the actual damages sustained.

Under the Lanterman-Petris-Short Act, each county mental health system is required to comply with specified reporting requirements developed by the State Department of Mental Health.

This bill would impose a state-mandated local program by permitting the State Department of Mental Health to require the county to report the names and other personal identifiers of clients, which would be required to be treated as confidential information.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 739 (SB 2166) Costa. Public utilities: services to tenant.

(1) Existing law provides for the furnishing of utility services, including residential electrical, gas, heat, and water services, by privately owned public utilities subject to the jurisdiction and control of the Public Utilities Commission and similar services by publicly owned public utilities, including municipal corporations subject to their governing bodies and municipal utility districts and public utility districts subject to their boards of directors. Existing law requires the decision to require a new residential applicant to deposit a sum of money, prior to establishing an account and furnishing service, to be based solely upon the creditworthiness of the applicant as determined by the entity. Existing law prohibits municipally owned utilities and municipal utility districts from requiring that service to tenants subsequent to a tenant for which there are unpaid charges or penalties be furnished on the account of the landlord or property owner unless the property owner consents through a written agreement.

This bill would delete the requirement that the owner's consent be in writing. The bill also would prohibit municipally owned utilities and municipal utility districts from refusing to furnish services to a tenant in the tenant's name based upon the nonpayment of charges by a previous tenant. The bill would make related technical changes.

Because this bill would create new duties for municipally owned utilities and municipal utility districts, the bill would impose a state-mandated local program.

(2) Existing law provides that accounts of a municipal utility district that are delinquent become a lien on the property to which services were rendered, with the force, effect, and priority of a judgment lien, when a certificate to this effect is filed for recordation with the county recorder, but exempts from that provision delinquent fees or charges for the furnishing of water service to residential property.

This bill would also exempt delinquent fees or charges for the furnishing of sewer service to residential property, and would make related technical changes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 740 (SB 1890) Hurtt. Vehicles: vessels: aircraft: driving or operating while under the influence.

Existing law makes it unlawful for any person to drive a vehicle or operate a water-related vessel or device or an aircraft while under the influence of an alcoholic beverage, any drug, or both, or the person has 0.08% or more, by weight, of alcohol in his or her blood or when addicted to any drug. Existing law also directs the administration of a chemical test that is used to analyze an individual's breath, blood, or urine for evidence of drug or alcohol use under these specified circumstances.

The bill would delete the requirement that a person who is lawfully arrested for driving a vehicle, or operating a water-related vessel or device or aircraft while under the influence of an alcoholic beverage be offered the choice to submit to a urine test. The bill would require an arrested person to submit to either the blood or breath test and to submit to the remaining test if the person is incapable of completing the chosen test. The bill would require the urine test to be administered if the blood or breath test, or both, are unavailable or if the person is arrested for driving or operating a vehicle, water-related vessel or device, or aircraft while under the influence of a combination of drugs and alcohol or drugs only and is incapable of completing a blood test.

Ch. 741 (AB 89) Pringle. California School Finance Authority Act: California Educational Facilities Authority Act.

Existing law, known as the California School Finance Authority Act, establishes the California School Finance Authority and authorizes it to administer the continuously appropriated California School Finance Authority Fund. The act limits to \$400,000,000 the total amount of revenue bonds that may be issued under a provision of the act, which is to be repealed on January 1, 2006, that permits a participating school district or county office of education to obtain state assistance from the authority to guarantee or provide for payment of bonds issued under the act in connection with securing financing or refinancing of projects, except for working capital.

This bill would delete the \$400,000,000 limitation on the issuance of bonds under this bond guarantee or payment provision and delete the January 1, 2006, repeal date, thereby extending its duration indefinitely. This bill would make an appropriation by deleting the limitation on issuance of revenue bonds for, and extending the duration of, the bond guarantee or payment provisions, for which continuously appropriated funds could be expended.

Under existing law, the total amount of bonds authorized to be outstanding at any one time under the California Educational Facilities Authority Act, with respect to dormitory or educational facility projects, is \$2,600,000,000 and the total amount of bonds authorized to be outstanding at any one time under the act, with respect to student loan projects, is \$300,000,000.

This bill would make an appropriation by repealing these limitations.

Ch. 742 (AB 1626) Wayne. Pupil promotion and retention.

(1) Existing law requires the governing board of each school district and each county superintendent of schools to adopt policies regarding pupil promotion and retention, and requires a pupil to be promoted or retained only as provided according to those policies.

This bill would, in addition to the policies adopted pursuant to those provisions, require the governing board of each school district and each county board of education to approve a policy regarding the promotion and retention of pupils between specified grades, and would require that policy to provide for the identification of pupils who should be retained or who are at risk of being retained in their current grade level on the basis of specified factors. The bill would require the policy to be based on various other considerations. By imposing new duties on school districts regarding the adoption of this policy, the bill would impose a state-mandated local program.

(2) Existing law, known as the Leroy Greene California Assessment of Academic Achievement Act, requires the Superintendent of Public Instruction to design and implement a statewide pupil assessment program that includes, among other things, a plan for producing individual pupil scores based on both the achievement test that is part of the Standardized Testing and Reporting (STAR) Program and the statewide assessment of pupil performance in the core curriculum areas.

This bill would require the Superintendent of Public Instruction to recommend, and the State Board of Education to adopt, levels of pupil performance for the achievement tests administered under the STAR Program in reading, English language arts, and mathematics for each grade level, and would require that those performance levels identify and establish the level of performance that is deemed to be the minimum level required for satisfactory performance in the next grade.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 743 (AB 1639) Sweeney. Schools: mandatory summer school: required intensive instructional programs.

(1) Existing law requires the governing board of each school district maintaining any or all of grades 7 to 12, inclusive, to offer summer school instructional programs for pupils enrolled in grades 7 to 12, inclusive, who were assessed as not meeting the school district's adopted standards of proficiency in basic skills.

This bill would require the governing board of each school district maintaining any or all of grades 2 to 9, inclusive, to offer programs of direct, systematic, and intensive supplemental instruction to pupils enrolled in grades 2 to 9, inclusive, who have been retained pursuant to specified provisions of law. The bill would authorize a school district to require a pupil who has been retained to participate in that supplemental instructional program. The bill would require the school district to provide a mechanism whereby a parent or guardian may decline to enroll his or her child in the program. The bill would also authorize the governing board of each school district maintaining any or all of grades 2 to 6, inclusive, to offer programs of direct, systematic, and intensive supplemental instruction to pupils with low mathematics, reading, or written expression scores to allow those pupils to achieve proficiency in standards adopted by the State Board of Education. The bill would prescribe the priority for offering those instructional services to pupils and would prescribe criteria for funding these programs. By imposing new duties on school districts regarding the provision of supplemental instruction programs, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 744 (AB 2741) Miller. 1998 California High School Coaching Education and Training Program.

Existing law authorizes governing boards of school districts to have general control of all aspects of interscholastic athletic policies, programs, and activities in their districts.

This bill would express legislative findings and declarations regarding the need for education and training for interscholastic athletic coaches. The bill would express the intent of the Legislature to establish a California High School Coaching Education and Training Program, to be administered by local school districts.

Existing law provides that the California Interscholastic Federation (federation) is a voluntary organization consisting of school and school related personnel with responsibility, generally, for administering interscholastic activities in secondary schools.

This bill would encourage, subject to funds being appropriated for this purpose, the federation to establish a statewide panel to develop an application and grant distribution process whereby public secondary schools could submit applications for matching grants to offset the costs of education and training of athletic coaches in an education and training program.

The bill would require the State Department of Education, if the federation establishes the statewide panel, to provide a representative to the panel, review grant applications, determine which applicants should receive grants, and determine the amount of the grants.

Ch. 745 (SB 1626) Hughes. Peace officers: school security officers: training.

Existing law requires every school peace officer, including a school police reserve officer, to complete a course of training approved by the Commission on Peace Officer Standards and Training relating directly to the role of school peace officers. Existing law requires any person employed as a school peace officer prior to the date that the Commission on Peace Officer Standards and Training approves the course of training to complete the course of instruction by January 1, 1996.

This bill would revise and recast these provisions to delete references to peace officers and certain obsolete provisions. The bill also would impose specified criminal records check requirements for security guards in a K-12 school district or California community college district, and require, after July 1, 2000, every security guard who works more than 20 hours a week as a security guard in a K-12 school district or California community college district to complete a course of training developed, as specified, no later than July 1, 1999, by the Bureau of Security and Investigative Services of the Department of Consumer Affairs.

The bill also would make a conforming and technical change.

Ch. 746 (SB 1627) Hughes. Peace officers: school police officer.

(1) Under existing law, members of a California Community College police department and persons employed as members of a police department of a school district are designated as peace officers, if their primary duty is the enforcement of the law, as specified.

This bill would also designate these officers as peace officers, if they have completed prescribed training.

(2) Existing law requires any sheriff, undersheriff, or deputy sheriff of a county, who is first employed after January 1, 1975, to successfully complete a course of training prescribed by the Commission on Peace Officer Standards and Training before exercising the powers of a peace officer, except as specified.

This bill, in addition, would require any school police officer first employed by a K-12 school district or California Community College district after July 1, 2002, to successfully complete a prescribed course of training before exercising the powers of a peace officer, except as specified. The bill also would require the Commission on Peace Officer Standards and Training to prepare a specialized course of training for school police

officers and would require school police officers to successfully complete the specialized course of training.

This bill would also provide that every school peace officer employed by a K-12 public school district, and every member of a California Community College police department, first employed before July 1, 1999, shall, in order to retain his or her employment, (a) submit one copy of his or her fingerprints on forms prescribed by the Department of Justice, which copy shall be forwarded to the United States Federal Bureau of Investigation, and (b) be determined to be a person who is not prohibited from being an employee and, if the employee is required to carry a firearm, to be a person who is not prohibited from possessing a firearm. To the extent this bill would impose new duties on local school districts, this bill would impose a state-mandated local program.

(3) This bill would also include all changes made to Section 832.3 of the Penal Code by AB 1211 (Ch. 66, Stats. 1998).

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

Ch. 747 (AB 1856) Vincent. Dogs and cats: overpopulation: spaying and neutering.

(1) Existing law prohibits each public pound, society for the prevention of cruelty to animals shelter, and humane shelter from selling or giving away any dog or cat that has not been spayed or neutered, unless a \$40 deposit for spaying or neutering the dog or a \$30 deposit for neutering the cat has been tendered, as prescribed.

This bill would, with regard to counties whose population exceeds 100,000 persons, and cities within those counties, revise the provisions governing the payment of a deposit to require a person who adopts or purchases a dog or cat that is too sick or injured to be spayed or neutered to pay a deposit to the appropriate entity, which would be refunded if the dog or cat is spayed or neutered when it is healthy. The bill would require that the funds from unclaimed deposits be expended only for spaying or neutering programs.

The bill would require the owner of a nonspayed or unneutered dog or cat that is impounded by a public animal control agency or shelter, society for the prevention of cruelty to animals shelter, humane society shelter, or rescue group to be fined, as prescribed, for the first, 2nd, 3rd, and subsequent occurrences, thereby imposing a state-mandated local program by imposing new duties on local agencies. The bill would immunize cities and counties, societies for the prevention of cruelty to animals, and humane societies from an action by the owner of a dog or cat for spaying or neutering the dog or cat in accordance with the bill. The bill would make any person who commits specified violations subject to a civil penalty of not less than \$50 on a first violation and a civil penalty of not less than \$100 on any 2nd or subsequent violation.

The bill, with respect to counties with a population of less than 100,000, on January 1, 2000, would prohibit a public animal control agency or shelter, society for the prevention of cruelty to animals shelter, humane society shelter, or rescue group from selling or giving away any cat or dog that has not been spayed or neutered, in accordance with prescribed requirements.

The bill would make related changes. The bill would become operative on January 1, 2000, and would remain in effect only until January 1, 2006, and on that date would be repealed unless a later enacted statute deletes or extends that date.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 748 (AB 2154) Pacheco. Crimes against public officials.

Existing law provides that every person who commits any assault or murder of specified public officials in retaliation for or to prevent the performance of the victim's official duties shall be punished by imprisonment in the county jail not exceeding one year or by imprisonment in the state prison.

This bill would expand the list of public officials to which those provisions would be applicable. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 749 (AB 2456) Sweeney. Taxation: disaster relief: storms and floods.

Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the board's approval. With respect to certain counties that have adopted reassessment ordinances and have been declared by the Governor to be in a state of disaster as a result of certain events, existing law provides for state allocations of the estimated amounts of the reductions in property tax revenues resulting in certain fiscal years from reassessments under those ordinances. Existing law also continuously appropriates, without regard to fiscal years, moneys in the Special Fund for Economic Uncertainties for purposes of funding these state allocations.

This bill would provide for similar state allocations with respect to property tax revenue reductions, resulting from a reassessment ordinance, incurred by a county that was declared by the Governor to be in a state of disaster as a result of a storm or flood occurring in California in February 1998. By requiring moneys continuously appropriated from the Special Fund for Economic Uncertainties to be allocated for the new purpose of reimbursing these counties for these property tax revenue reductions, this bill would make an appropriation.

The Personal Income Tax Law and the Bank and Corporation Tax Law provide for the carryover to specified taxable or income years of specified losses sustained as a result of various disasters occurring in California in an area determined by the President of the United States to warrant specified federal assistance, or proclaimed by the Governor to be in a state of disaster.

This bill would extend these provisions to losses sustained as a result of storm, flood, or any other related casualty that occurred in California in February 1998. This bill would also authorize a taxpayer to make an election to claim a deduction for those losses on the tax return for the preceding year.

This bill would contain legislative findings and declarations as to the statewide public purpose of this bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 750 (AB 2687) Gallegos. Healing arts: dispensing drugs.

Existing law authorizes the California State Board of Pharmacy to take action against all persons guilty of violating the Pharmacy Law. That law prohibits the sale of specified drugs without a prescription by a licensed practitioner and dispensed by a person licensed to dispense prescription drugs.

This bill would authorize a local health officer who determines that a person within his or her jurisdiction is unlawfully dispensing or furnishing specified drugs requiring a prescription, or a dangerous drug or device, or a controlled drug, to take a specified action, including receiving and investigating complaints from the public, other licensees, or health care facilities, issuing an order to the person to immediately cease and desist from the unlawful activity, and ordering the closure of the business operated, managed, or owned by that person. The bill would also authorize a local health officer to order the immediate closure of a business upon reasonable suspicion that the business poses an immediate threat to public health, welfare, or safety, as defined. The bill would require

that any person whose business is closed as a result of local health officer action under this act be given notice and a hearing to show cause why closure is unwarranted.

Existing law makes it a misdemeanor for any unlicensed person to knowingly dispense dangerous drugs or dangerous devices, as defined, punishable by a fine of not less than \$200 and not more than \$2,000 or by imprisonment of not less than 30 days and not exceeding 6 months, or by both that fine and imprisonment.

This bill would make it a misdemeanor for any unlicensed person to knowingly dispense or furnish a dangerous drug or dangerous device, or to knowingly own, manage, or operate a business that dispenses or furnishes a dangerous drug or dangerous device, when that business is not licensed to dispense or furnish such products. Upon conviction, each violation would be punishable by imprisonment in a county jail not to exceed one year, or by a fine not to exceed \$5,000, or by both that fine and imprisonment. Upon a 2nd or subsequent conviction, each violation would be punishable by imprisonment in a county jail not to exceed one year, or by a fine not to exceed \$10,000, or by both that fine and imprisonment. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 751 (SB 1659) Kopp. Animal euthanasia.

Existing law regulating animal euthanasia prohibits the use of carbon monoxide gas to kill any dog or cat unless certain conditions are met. Existing law prohibits the killing of any dog or cat by the use of any high-altitude decompression chamber or nitrogen gas. A violation of these prohibitions is a crime punishable as a misdemeanor.

This bill would repeal the limited prohibition against the use of carbon monoxide to kill any dog or cat operative January 1, 2000, and, instead, would prohibit, on and after January 1, 2000, without limitation, the use of carbon monoxide gas to kill any animal. This bill would make additional conforming changes.

Because this bill would make any use of carbon monoxide gas to kill animals a crime, it would create a state-mandated local program by expanding the scope of an existing crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 752 (SB 1785) Hayden. Stray animals: duties of pounds and shelters.

Existing law specifies the rights and duties of persons who find lost property of another or who, either voluntarily or involuntarily, are the depositaries of the property of another. Existing law provides that involuntary depositaries are entitled to no reward for the thing deposited; however, finders are entitled to reasonable compensation for saving and taking care of the property.

This bill would set forth the findings of the Legislature with respect to animal shelters, humane organizations, lost or stray animals, and neuter programs, declare the policy of the state with respect to adoptable and treatable animals, as specified, and set forth the intent of the bill. The bill would (1) provide that (a) a person or public or private entity that holds a stray, live animal shall be deemed an involuntary depositary; and (b) all depositaries of live animals have a duty to provide them with necessary and prompt veterinary care, nutrition, and shelter, and to treat them humanely and failure to do so may subject the depositary to liability for civil damages; (2) authorize involuntary depositaries of live animals to accept rewards, as specified; and (3) require a public depositary of a stray live animal to take charge of it, as specified.

Existing law provides that no dog or cat impounded by a public pound or specified shelter shall be killed before 72 hours have elapsed from the time of impounding.

This bill would, effective July 1, 1999, expand this minimum impound time to 4 or 6 business days, as specified, and would require that the animal be released to a nonprofit animal rescue or adoption organization in certain circumstances, subject to specified exceptions. The bill would also provide impounding time periods, and care, redemption, and adoption requirements applicable to other specified animals.

Existing law requires public pounds and specified shelters to provide owners and finders of lost animals with specified services to restore the lost animals to their owners. Existing law specifies that these requirements are not mandatory duties and do not create a cause of action against public entities or employees.

This bill would declare that the duty to provide these services is a mandatory duty for public entities and their contractors. The bill would also require pounds and shelters to keep specified records regarding impounded animals for 3 years after the animal's impoundment ends.

Because this bill would impose new duties on local officials, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 753 (SB 2103) Haynes. Recycled water.

(1) Existing law regulates the use of recycled water.

This bill would establish procedures for a customer to request recycled water service, for establishing the rate for that recycled water service, for resolving disputes between the customer and his or her retail water supplier, relating to the supply of that recycled water service, and for enforcing those procedures. The bill would prescribe related matters.

(2) Existing law authorizes a retail water supplier that has identified a potential use or customer to apply to a recycled water producer or wholesaler for a recycled water supply and authorizes a recycled water producer or wholesaler that has identified a potential use or customer to request, in writing, a retail water supplier to enter into an agreement to provide recycled water to the potential customer.

This bill would authorize an entity responsible for groundwater replenishment, as defined, that is a customer of a retail water supplier and that has identified the potential use of recycled water for groundwater replenishment purposes to request, in writing, that retail water supplier to enter into an agreement to provide recycled water for that purpose. The bill would prohibit that entity from obtaining recycled water for that purpose from a recycled water producer, a recycled water wholesaler, or another retail water supplier without the agreement of the entity's retail water supplier. The bill would authorize an entity responsible for groundwater replenishment that is not the customer of a retail water supply and that has identified the potential use of recycled water for groundwater replenishment purposes to request, in writing, a retail water supplier, a recycled water producer, or a recycled water wholesaler to enter into an agreement to provide recycled water for that purpose.

Ch. 754 (AB 357) Havice. Serious felonies.

(1) Existing law, amended by initiative statute, prohibits plea bargaining in any case in which the indictment or information charges any serious felony, including assault with intent to commit rape or robbery, exploding a destructive device or explosive causing great bodily injury or mayhem, and burglary of an inhabited dwelling house, trailer coach, or inhabited portion of any other building, except in specified circumstances. The initiative statute provides that any amendment of its provisions by the Legislature shall require a $\frac{2}{3}$ vote of the membership of each house.

This bill would revise these 3 offenses to include additional elements and add the following offenses for purposes of this prohibition: assault with caustic chemicals or

flammable substances; assault with a deadly weapon or instrument on a firefighter; rape by foreign object; use of a firearm in the commission of any of specified felonies.

Because it would amend an initiative statute, the bill would require a $\frac{2}{3}$ vote.

By including these crimes in the definition of a "serious felony," the bill would increase the costs of prosecuting those crimes and thereby impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) Furthermore, this bill would incorporate amendments to Section 1192.7 of the Penal Code proposed by both this bill and Senate Bill No. 2168 which shall only become operative if (1) both bills are enacted and become effective on or before January 1, 1999, (2) each bill amends Section 1192.7 of the Penal Code, and (3) this bill is enacted after SB 2168.

Ch. 755 (AB 377) Baugh. Grand juries.

Under existing law, no person is permitted to be present during the criminal sessions of the grand jury except the members and witnesses actually under examination, and certain other specified persons, including, among others, the district attorney, an interpreter, and the officer having custody of a prisoner witness while the prisoner is testifying.

This bill would authorize any prosecution witness before the grand jury in a proceeding involving specified offenses who is a minor, at the discretion of the prosecution, to select a person of his or her choice to attend the testimony of the prosecution witness for the purpose of providing support.

Ch. 756 (AB 762) Torlakson. Vehicles: ignition interlock devices: driver's license restriction.

(1) Under existing law, if a person is referred to an 18-month or 30-month licensed alcohol and other drug education and counseling service program, the Department of Motor Vehicles is required to revoke or suspend the privilege of the person to operate a motor vehicle if the person has failed to comply with the rules and policies of the program. The department is required to notify the person and the court and to inform the person of the opportunity to be reinstated in the program and to avoid suspension of the driving privilege in accordance with a specified procedure.

Existing law also provides for termination in the participation in the described alcohol and drug program of persons who refuse to consent to a chemical test.

This bill would require the department to suspend, rather than suspend or revoke, the privilege, would delete the requirement that the department inform the court, would delete the program reinstatement and opportunity to avoid the suspension procedure, and would delete procedures regarding failure to consent to a chemical testing. The bill would make technical, conforming changes.

(2) Under existing law, a person, who is convicted of driving a vehicle while under the influence of an alcoholic beverage, any drug, or both, driving with an excessive blood-alcohol concentration, or driving when addicted to any drug, (DUI), is required to be punished by specified imprisonment and fines. The punishment is enhanced if a person is convicted of a second violation by, among other things, providing that the court prohibit the person from operating a motor vehicle unless a functioning, certified ignition interlock device is installed and that the privilege to operate a motor vehicle is required to be suspended by the Department of Motor Vehicles for 18 months.

This bill would require that suspension to be for 2 years. However, the bill would allow the person to apply to the department after the completion of 12 months of the suspension period for a restricted license subject to specified conditions, including the person's continued enrollment and participation in described treatment programs and if the person agrees to install and maintain a certified, functioning ignition interlock device. The bill would require persons who are convicted of driving with a suspended or revoked license where that suspension or revocation was based on prior convictions

of the DUI offenses described above, to install the described devices. The bill would make a conforming change with respect to a person who is granted probation upon a second offense.

(3) Existing law authorizes a court to prohibit any person who is convicted of a first offense of the DUI offenses described above from operating a motor vehicle unless that vehicle is equipped with a functioning, certified ignition interlock device. Existing law imposes administering and monitoring duties upon the courts, administrative offices of the courts, the Judicial Council, and county probation officers with regard to the ignition interlock device program. Other duties and responsibilities are imposed upon the Department of Motor Vehicles.

This bill would substantially recast the ignition interlock device program by authorizing the court to require the department to prohibit any person who is first convicted of the above-described DUI offense from operating a motor vehicle unless the vehicle is equipped with a functioning certified ignition interlock device. The bill would require the court to require any person convicted of driving a vehicle with a suspended or revoked license based on a prior DUI conviction to install an ignition interlock device for a period not to exceed 3 years or until the person's driving privilege is reinstated by the department. The bill would allow a person who is convicted of a DUI offense when the offense occurred within 7 years of one or more separate violations that resulted in a conviction to apply to the department for a restricted driver's license prohibiting, among other things, the person from operating a motor vehicle unless that vehicle is equipped with a functioning ignition interlock device. The bill would apply these provisions to out-of-state residents who otherwise would qualify for an ignition interlock restricted license in this state. The bill would require the department and the courts to undertake certain duties, as revised, regarding administering and monitoring the ignition interlock device program currently undertaken by the courts, administrative offices of the courts, the Judicial Council, and probation officers. To the extent that the court would be required to order and monitor the installation and maintenance of these devices for specified offenders, including certain additional offenders, the bill would impose a state-mandated local program.

The bill would require the department to report to the Legislature on or before January 1, 2002, regarding certain aspects of the ignition interlock device program.

(4) Existing law requires the department to restrict the driver's license of any person convicted of violating the DUI provisions specified above, if (a) a court has certified to the department that the court has granted probation to the person under conditions that include participation in a specified drug and alcohol treatment program, described in (1), (b) the court has restricted the person's privilege to operate a motor vehicle, and (c) the person gives proof of financial responsibility, as defined. If a person who has been granted probation, as specified, fails at any time to participate successfully in the specified treatment program, the court is required to revoke or terminate the probation and order the department to suspend the person's driver's license, as specified.

This bill, instead, would require the department to issue a restricted driver's license, as specified, if the person (a) submits proof of enrollment in, or completion of, a specified drug and alcohol treatment program, as described, (b) submits proof of financial responsibility as described, and (c) pays all applicable reinstatement or reissue fees and any restriction fee required by the department. The restriction would become effective when the department receives all of the specified documents and fees and would remain effective for a specified period.

The bill would require the department to suspend, instead of restrict, the person's driver's license upon receipt of notification from the treatment program that the person has failed to comply with the program requirements. The license would remain suspended until the person presents evidence to the department that the person has completed the treatment program and proof of financial responsibility.

(5) Existing law requires the department to suspend for one year and, thereafter, restrict for an additional 2 years the driver's license of a person convicted of violating a specified provision prohibiting driving under the influence and causing bodily injury to another person, if the court has granted probation under conditions similar to those specified above and the person gives proof of financial responsibility, as specified.

This bill, instead, would require the department to revoke the person's driver's license as one of the conditions of probation.

(6) Existing law requires the Department of Motor Vehicles to immediately suspend the privilege to operate a motor vehicle of any person who attempts to bypass or tamper with an installed ignition interlock device, as specified, and requires the installer to notify the department.

This bill would include attempts to remove the interlock device within the above provisions. Because a violation of this provision under existing provisions of law would be a crime, this bill would expand the scope of that crime, thereby imposing a state-mandated local program.

(7) Existing law does not provide a specific procedure and authorization with regard to the removal of an ignition interlock device from a vehicle that has been impounded.

This bill would provide that procedure and authorization by authorizing the manufacturer or installer of an ignition interlock device to remove the device from a vehicle that has been impounded for any reason during the normal business hours.

(8) This bill would repeal the ignition interlock device program as of January 1, 2005, unless a later enacted statute deletes or extends that date.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(10) The bill would incorporate additional changes in Section 23166 of the Vehicle Code proposed by AB 2674, to become operative only if both bills are enacted and become operative on or before January 1, 1999, and this bill is enacted last.

(11) This bill would incorporate changes in Section 11837 of the Health and Safety Code proposed by AB 1916 to become operative only if both bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(12) This bill would provide that its provisions shall become operative on July 1, 1999.

Ch. 757 (AB 976) Papan. Financial crimes: records.

(1) The California Right to Financial Privacy Act generally provides for the confidentiality of customer information in connection with financial institutions except as specified. The act also contains procedures with respect to the acquisition by a state or local agency of financial records pursuant to a judicial subpoena duces tecum. A knowing violation of the act is a misdemeanor.

This bill would except from the confidentiality provisions of the act the dissemination of financial information and records pursuant to an order by a judge upon a written ex parte application by a peace officer showing specific and articulable facts that there are reasonable grounds to believe that the records or information sought are those of the subject of, and are relevant and material to, an ongoing felony money laundering, fraud, or embezzlement investigation, and would revise the procedures that a state or local agency must follow in order to obtain a judicial subpoena duces tecum. Orders requiring the disclosure of those records would subsequently be open to the public as judicial records unless ordered sealed by the court, for a period of 60 days. The imposition of new requirements on a local entity would create a state-mandated local program. By revising provisions of the act, this bill would change the definition of certain crimes, thereby imposing a state-mandated local program.

(2) Existing law contains provisions relating to the conduct of investigations in grand jury proceedings. In accordance with these provisions, the grand jury is prohibited from receiving any evidence except that which would be admissible over objection at the trial of a criminal action, but the fact that the evidence that would have been excluded at trial was received by the grand jury does not render the indictment void where sufficient competent evidence to support the indictment was received by the grand jury.

This bill would provide that, notwithstanding the hearsay rule, the evidence to support the indictment may be based in whole or in part upon the sworn testimony of a law

enforcement officer relating the statement of a declarant made out of court and offered for the truth of the matter asserted, provided that the law enforcement officer has either 5 years of law enforcement experience or has completed a training course certified by the Commission on Peace Officer Standards and Training that includes training in the investigation and reporting of cases and testifying at preliminary hearings. The bill would also establish procedures for the issuance to a peace officer of an order for the production of utility records and escrow and title company records upon a written ex parte application and would affirm the right of holders of these records to voluntarily disclose them to law enforcement for the purpose of criminal investigations and prosecutions.

(3) This bill would incorporate additional changes in Section 7480 of the Government Code proposed by AB 2452, to become operative only if both this bill and AB 2452 are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 758 (AB 1788) R. Wright. Prostitution: vehicles: impoundment: suspended driver's license.

(1) Existing law authorizes a judge to suspend the driving privilege of a person who is convicted of prostitution, for not to exceed 30 days, for any violation committed within 1,000 feet of a private residence and with the use of a vehicle, in addition to any other punishment imposed.

This bill would allow a judge to similarly suspend the driving privilege, for a period not to exceed 30 days, of a person convicted of engaging in lewd conduct where a peace officer witnesses the violator pick up a person who is engaging in loitering with the intent to commit prostitution and the violator subsequently engages with that person in a lewd act within 1,000 feet of a private residence and with the use of a vehicle. The bill would allow the court to restrict, rather than suspend, a person's driving privilege upon a conviction of either of the offenses described above, thereby allowing the person to travel to and from the person's place of employment or education and in the course of his or her employment during the suspension period.

(2) Existing law, until January 1, 1999, authorizes specified counties and cities to establish a pilot program that implements procedures to declare any motor vehicle a public nuisance when the vehicle is used in the commission of specified crimes relating to prostitution. The cities or counties are authorized to implement procedures within the program to order the defendant not to use the vehicle again for purposes of the specified crimes and to impound the vehicle of a defendant who violates that order.

This bill would extend the authorization for the establishment of that pilot program to any city, county, or city and county, and would delete the January 1, 1999, sunset provision.

(3) This bill would incorporate additional changes in Section 647 of the Penal Code proposed by SB 121, to be operative if SB 121 and this bill are both enacted and become effective on or before January 1, 1998, and this bill is enacted last.

Ch. 759 (SB 1600) Rainey. Public safety officers: evidence.

(1) Existing law makes it a felony or misdemeanor, as specified, to steal, remove, secrete, destroy, mutilate, deface, alter, or falsify public records; makes it a felony to offer forged or altered evidence or to prepare false evidence; and makes it a misdemeanor to destroy or conceal evidence. Also, under the existing Public Safety Officers Procedural Bill of Rights, it is unlawful for any public safety department to deny or refuse to any public safety officer the rights and protections guaranteed by the act, and the superior

court may render appropriate injunctive or other extraordinary relief to remedy the violation and prevent future violations, including, but not limited to, the granting of a temporary restraining order or preliminary or permanent injunction prohibiting the public safety department from taking punitive action against the public safety officer.

This bill would make it a misdemeanor for any person to knowingly alter, tamper with, conceal, or destroy relevant evidence in any disciplinary proceeding against a public safety officer, for the purpose of harming that public safety officer.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 760 (SB 1690) Rainey. Peace officers.

Existing law makes it a felony or a misdemeanor for any person who reports to any of certain specified peace officers that a bomb or other explosive has been or will be placed or secreted in any public or private place, knowing that the report is false.

Existing law makes it a misdemeanor for any person who reports to any of certain specified peace officers that a felony or misdemeanor has been committed, knowing the report to be false.

Existing law makes it a misdemeanor for any person who falsely represents or identifies himself or herself as another person or as a fictitious person to any of certain specified peace officers, upon a lawful detention or arrest of the person, either to evade the process of the court, or to evade the proper identification of the person by the investigating officer.

Under existing law, every able-bodied adult who neglects or refuses to join the posse comitatus or power of the county, as specified, being thereto lawfully required by any uniformed peace officer, or by any of certain specified peace officers who identifies himself or herself with a badge or identification card issued by the officer's employing agency, or by any judge, is punishable by a fine of not less than \$50 nor more than \$1,000.

Existing law, amended by initiative statute, prescribes an increased term of imprisonment for any person guilty of murder in the 2nd degree if the victim was any of certain specified peace officers, who was killed while engaged in the performance of his or her duties, and the defendant knew, or reasonably should have known, that the victim was a peace officer engaged in the performance of his or her duties.

Existing law exempts specified peace officers and retired peace officers from general prohibitions against carrying a concealed or loaded firearm.

This bill would make these provisions applicable to members of the San Francisco Bay Area Rapid Transit District Police Department, the University of California Police Department, and the California State University Police Departments. By expanding the scope of existing crimes with respect to these peace officers, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate additional amendments to Section 190 of the Penal Code proposed by Chapter 413 of the Statutes of 1997 but not yet approved by the voters, to be operative if that chapter is approved by the voters at a statewide general election held in 1998.

The bill would provide that its provisions amending Section 190 of the Penal Code shall become effective only when submitted to, and approved by, the voters.

Ch. 761 (SB 2074) Schiff. Juvenile law: principles: victim's rights.

Existing law sets forth the purposes of the juvenile court law. These purposes include providing care, treatment, and guidance to the juvenile offender, as specified. Guidance, for these purposes, includes punishment. These provisions define punishment for purposes of juvenile court law.

This bill would, among other changes, revise those purposes to reflect the goal that the guidance the minor receives should enable him or her to be a law-abiding and productive member of his or her family and the community when the minor is no longer a ward of the juvenile court.

Existing law requires a probation officer, upon the request of an alleged victim of a crime, to inform that person by letter of the final disposition of a case in which a petition to declare a minor a ward of the juvenile court on the basis of criminal behavior has been filed. The information provided includes the amount, terms, and conditions of any restitution to be made to the victim of the crime.

This bill would additionally require the probation officer to inform the victim of any victim-offender conferencing program or victim impact class available in the county, and of his or her right to be informed of the final disposition of the case pursuant to the provisions described above. By imposing additional duties on local employees, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 762 (AB 271) Villaraigosa. Correctional peace officers standards and training.

(1) Existing law requires the Inspector General to conduct a management review audit of each warden and each superintendent who has held that position for more than 5 years. The audit reports are required to be submitted to the Secretary of the Youth and Correctional Agency and the Director of Corrections or the Director of the Youth Authority, as appropriate. Existing law also requires the Inspector General to conduct investigations and audits upon request of the Secretary of the Youth and Correctional Agency or a Member of the Legislature.

This bill would require a management review audit of each warden or superintendent who has held that position for more than 4 years. The bill would require the audit to include issues relating to personnel, training, investigations, and financial matters. The bill would authorize any legislator to request and receive a copy of any audit report.

(2) Existing law vests the Director of Corrections with the supervision, management, and control of the state prisons. Under this authority, the Department of Corrections conducts investigations into its own internal affairs based upon complaints alleging misconduct by a departmental peace officer.

This bill would declare that investigations of the department and the Department of the Youth Authority conducted by their respective offices of internal affairs require appropriately trained personnel, operating with honesty, credibility, and without conflicts of interest. To this end, the bill would require the department, prior to training an officer as an internal affairs investigator, to conduct a background check as specified, to provide training prior to employment as an investigator, and would specify the format and contents of an investigative report, including the investigator's signature certifying that the investigator has complied with these provisions. The bill would make the certification as true of any material matter that the investigator knows to be false punishable as a misdemeanor. By creating a new crime, the bill would impose a state-mandated local program.

(3) Existing law establishes a Commission on Correctional Peace Officers' Standards and Training (CPOST) within the Youth and Adult Correctional Agency. Existing law requires the CPOST to develop, approve, and monitor standards for the selection and training of state correctional peace officers. Existing law designates a certain training academy for the training of new peace officers, and establishes standards for advanced officer and supervisory training.

This bill would require the CPOST to appoint a director and staff as provided in the annual Budget Act commencing with the 1999-2000 fiscal year.

The bill would require the State Personnel Board to ensure that each applicant who is otherwise qualified in all physical and other testing requirements to be a peace officer in either a youth or adult correctional facility, is determined to be free from emotional or mental conditions that might adversely affect the exercise of his or her duties and powers as a peace officer. Each correctional peace officer apprentice would be required to serve a specified period of probation and to work under and with competent journeymen instructors.

The bill would provide that the CPOST may approve a course in the carrying and use of firearms for correctional peace officers, as specified.

This bill would also require CPOST to establish and implement procedures for reviewing and issuing decisions concerning complaints or recommendations from interested parties regarding CPOST rules, regulations, standards, or decisions.

(4) Existing law requires the Department of Corrections and the Department of the Youth Authority to jointly use the training academy at Galt.

This bill instead would require the Department of Corrections to use the training academy at Galt and the Department of the Youth Authority to use the training academy at Stockton.

This bill would require each new cadet who attends an academy after July 1, 2000, to complete a specified course of training before he or she may be assigned to a post or job as a peace officer, and would require newly appointed supervisory trainees to complete training pursuant to standards approved by CPOST. The bill would also require that CPOST report to the Governor and the Legislature on specified aspects of these training programs by September 1, 1999.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 763 (AB 1792) Havice. Personal information: minors.

Existing law prohibits any person who owns, controls, operates, or manages a cable television corporation, or who leases channels on a cable system from providing any person with any individually identifiable information regarding any of its subscribers, including, but not limited to, the subscriber's television viewing habits, shopping choices, interests, opinions, energy uses, medical information, banking data or information, or any other personal or private information, without the subscriber's express written consent.

This bill would make it a misdemeanor for any person who, in the course of business, provides lists of specified personal information, to fail to obtain specified information from a first-time buyer or to knowingly provide access to personal information about children to any person who he or she knows is registered or required to register as a sex offender. The bill would also make it a misdemeanor for any person who uses personal information about a child that was obtained for commercial purposes, to directly contact the child or the child's parent to offer a commercial product or service to the child and to knowingly fail to comply with the parent's request to take steps to limit access to the child's personal information to authorized persons only. The bill would also make it a misdemeanor for any person to knowingly distribute or receive any personal information about a child with knowledge that the information will be used to abuse or physically harm the child. The bill would also require list brokers, upon written request from a parent that specifically identifies the child, to provide the parent with the procedures to be followed in order to withdraw consent to the use of personal information relating to his or her child. Failure of the list broker to discontinue disclosure of the above mentioned personal information within 20 days after a written request is made by the child's parent, would be punishable as a misdemeanor. The bill would also require any person who markets or sells products or services through the mail, directed at children, to maintain a list of all individuals who have requested that person to discontinue sending marketing and sales material to them through the mail. Failure to comply with these requirements would be punishable as a misdemeanor. The bill would also exempt the sale of information to specified governmental agencies, educational organizations and institutions, nonprofit organizations, and the National Center for Missing and Exploited

Children from these provisions. By creating new crimes, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 764 (AB 92) Cardoza. Courts: security services.

(1) Existing law requires the sheriff in certain counties to provide security services to the trial courts.

This bill would require the trial courts in such a county, commencing July 1, 1999, and thereafter, to enter into an agreement with the sheriff's department that was providing court security services as of July 1, 1998, regarding the provision of court security services, thereby imposing a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 765 (AB 576) Baldwin. Veterans Registry Fund.

Until January 1, 1998, the law provided for a Veterans Memorial Commission which was authorized to design and construct a memorial to California's veterans on the grounds of the State Capitol. For these purposes, the law, until January 1, 1998, provided for the Veterans Memorial Account in the General Fund.

This bill would create the California Veterans Memorial Registry Fund, as a continuously appropriated fund to be used for specified purposes, for the deposit of financial contributions made for the support of the Veterans Registry, which is part of the California Veterans Memorial. Thus, because the bill would create a continuously appropriated fund, the bill would make an appropriation.

The bill also would specify that in order to be eligible for inclusion in the Veterans Registry, a person must have served in the active military of the United States, received a discharge under honorable conditions, and resided in California at some time before, during, or after his or her military service. The bill also would specify that failure to meet this eligibility requirement constitutes good cause for removal of the person's name from the Veterans Registry.

The bill would make technical, nonsubstantive changes.

Ch. 766 (AB 604) Kuykendall. Employment Development Department.

Existing law provides that information obtained by the department in the administration of the Unemployment Insurance Code is for the exclusive use of the director in the discharge of his or her duties, and is not open to the public except as may be specifically provided.

This bill would provide that an employee or his or her representative may receive his or her wage information upon request.

The bill would, until July 1, 2002, authorize the disclosure of wage information to private entities for the purpose of verifying information provided by an individual in connection with a specific credit transaction if certain conditions are met. It would provide for civil penalties and civil actions for violations.

This bill would incorporate additional amendments to Section 1094 of the Unemployment Insurance Code proposed by AB 2017, if both bills are enacted and this bill is enacted after AB 2017.

Ch. 767 (AB 1655) R. Wright. Corrections: prisoner detention.

(1) Existing law provides that if the judgment is for imprisonment in the state prison, the sheriff of the county shall, upon receipt of a certified abstract or minute order thereof, take and deliver the defendant to the warden of the state prison. The sheriff also is required to deliver to the warden the certified abstract of the judgment or minute order, and take from the warden a receipt for the defendant. Existing law also requires a Criminal Investigation and Identification (CII) number to be furnished under these circumstances.

This bill additionally would require the county sheriff to deliver to the warden a Confidential Medical/Mental Health Information Transfer Form indicating that the defendant is medically capable of being transported.

(2) Existing law requires the Department of Corrections to reimburse counties for county jail detention costs resulting from the detention of state prisoners or parolees and from parole revocation proceedings when the detention meets any of specified conditions, including when the detention results from a violation of the conditions of parole or the rules of the Director of Corrections.

This bill also would require reimbursement for costs incurred where persons are sentenced or referred to the state prison and where the detention results from a new commitment, or a referral for diagnosis and examination pursuant to existing provisions, once the abstract of judgment has been completed and the department's intake unit has been notified by the county that the prisoner is ready to be transported, as specified, and the department is unable to receive the prisoner. The bill would require that the reimbursement be provided for each day following 5 working days after the date of notification by the county, if the prisoner remains ready to be delivered and the department is unable to receive the prisoner. The bill also would provide guidelines regarding delivery of a person pursuant to these provisions and the notification and verification requirements of these provisions. The bill additionally would require the department to reimburse a county for costs incurred pursuant to certain of these provisions from specified items of the Budget Act of 1998.

Ch. 768 (AB 2056) Floyd. Clinical laboratory tests.

(1) Existing law provides generally for the regulation of clinical laboratories and of persons performing clinical laboratory tests or examinations. Existing law also provides that those provisions shall not restrict, limit, or prevent programs of nondiagnostic general health assessment that meet certain specified conditions.

This bill would make compliance with the requirements of the federal Clinical Laboratory Improvements Amendments of 1988 (CLIA), and with the requirements of a specified section of the Business and Professions Code, additional conditions that programs of nondiagnostic general health assessment would be required to meet in this regard.

(2) Existing law provides for the establishment of municipal and county laboratories for specified local public health purposes, and requires those laboratories to use only equipment, quality assurance programs, and technical personnel that meet with the approval of the State Department of Health Services.

This bill would, instead, require that those municipal and county laboratories be approved by the department, and that they comply with the requirements of CLIA. By subjecting municipal and county laboratories to these new operational requirements, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 769 (AB 2251) Honda. Broker-dealer agents: registration.

Existing law provides for the licensing of security broker-dealers and the regulation of agents by the Commissioner of Corporations.

This bill would require the commissioner to review the disciplinary histories of securities sales agents upon the filing of certain notices, as specified. The bill would also make certain technical changes.

Ch. 770 (AB 2342) Cunneen. Public employees: benefits.

Under existing law, persons injured in the course of employment are generally entitled to workers' compensation which, in the case of the death of an employee, includes a death benefit. Existing law provides, however, no benefits, except reasonable expenses of burial not exceeding \$1,000, shall be awarded under the workers' compensation laws on account of the death of an employee who is an active member of the Public Employees' Retirement System unless it is determined that certain benefits under the Public Employees' Retirement Law will not be paid. However, under existing law, this limitation does not apply to local safety members of the Public Employees' Retirement System.

This bill would also provide that the limitation does not apply to patrol members, as defined.

Ch. 771 (AB 2452) Leach. Financial privacy.

Existing law on financial privacy requires a bank, credit union, or savings association to furnish to a police or sheriff's department or district attorney, under prescribed circumstances, customer account information relating to dishonored items, overdrafts, deposits, and debits, and a copy of the signature and addresses appearing on a customer's signature card.

This bill would require, under those circumstances, that a copy of the signature card, including the signature and addresses, be furnished. The bill would provide that the furnishing of copies of one or more complete account statements prepared in the regular course of business would constitute compliance with the requirement to furnish that information relating to dishonored items, overdrafts, deposits, and debits. The bill would also require a financial institution to provide information requested by an administrative subpoena issued in connection with child support enforcement pursuant to federal law.

This bill would incorporate additional changes in Section 7480 of the Government Code proposed by AB 976, to become operative only if both this bill and AB 976 are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 772 (AB 2597) Murray. Vehicles: drivers.

Existing federal regulations require the implementation of certain controlled-substances and alcohol-use testing with regard to prescribed employers of drivers of certain motor vehicles.

Existing state law requires motor carriers and drivers, except as specified, to comply with the described federal regulations and expressly requires every motor carrier to make specified records available to authorized employees of the Department of the California Highway Patrol.

This bill would create the California Drug-Free Commercial Truck and Bus Driver Task Force, consisting of representatives from specified agencies, groups, and associations, the Secretary of the Business, Transportation and Housing Agency, who would act as chair of the task force, and a nonvoting, ex officio member, as specified. The task force would be required to study and recommend means, including legislation and regulations, for California to close the identified loopholes in drug and alcohol testing of commercial truck and bus drivers in furtherance of the state's "zero tolerance" policy for drugs and alcohol use.

The bill would require the task force to complete its study and recommendations and produce a printed report to the Legislature on or before January 31, 2000. The bill would specify that its provisions would be inoperative on February 1, 2000, and as of January 1, 2001, would be repealed.

Ch. 773 (SB 485) Craven. Mobilehome parks: inspections.

(1) Existing law, known as the Mobilehome Parks Act, contains various provisions with respect to the inspection of mobilehomes, including provisions requiring certain local enforcement agencies to enter and inspect all mobilehome parks once every 7 years, as specified, and to submit a report to the Department of Housing and Community Development on the status of the mobilehome park inspection program prior to January 1, 1994. Existing law requires that report to include specified information, including the number of parks and spaces that are scheduled for inspection. Existing law further requires the department to submit a similar report on the inspection program containing the same categories of information, to the Senate Committee on Local Government, the Senate Select Committee on Mobilehomes, and the Assembly Committee on Housing and Community Development, by January 1, 1995. Existing law provides that these provisions shall remain in effect only until January 1, 1999, unless a later enacted statute, enacted before January 1, 1999, deletes or extends that date.

This bill instead would require the local enforcement agencies to enter and inspect all mobilehome parks once every 8 years and to submit the required report to the Department of Housing and Community Development after completion of the program's first 7-year cycle and prior to March 1, 1999, thereby imposing a state-mandated local program, and would delete the requirement that the report include information about the number of parks and spaces that are scheduled for inspection. The bill would require the department to submit its status report to the Senate Committee on Local Government, the Senate Select Committee on Mobile and Manufactured Homes, and the Assembly Committee on Housing and Community Development, by May 1, 1999. The bill would delete the requirement that the report of the department include information about the number of parks and spaces that are scheduled for inspection and would delete a requirement that the report of the department discuss program deviations that exist between the local enforcement agency and the department and obstacles encountered while implementing the program.

The bill also would extend the last date these provisions are effective to January 1, 2000, unless a later enacted statute, enacted before January 1, 2000, deletes or extends that date.

(2) The Mobilehome Parks Act sets specified fees relating to annual operating permits with regard to incidental camping areas of mobilehome parks. These fees are paid to the Department of Housing and Community Development and deposited in the continuously appropriated Mobilehome Parks Revolving Fund. A provision of the act, operative until January 1, 1999, sets an annual fee of \$4 per lot and requires the revenues derived from this fee to be used exclusively for the inspection of mobilehome parks and mobilehomes to determine compliance with the act.

This bill would extend the operation of the provision requiring payment of the annual fee of \$4 per lot until January 1, 2000. Because the bill would, by extending the period during which payment of this fee would be required, cause additional fees to be paid into the continuously appropriated Mobilehome Parks Revolving Fund, the bill would make an appropriation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 774 (SB 913) Kelley. Underground storage tanks: upgrade compliance.

(1) Under existing law, with specified exceptions, no person may own or operate an underground storage tank containing hazardous substances unless a permit for its operation has been issued by the local agency to the owner or operator of the tank, or a unified program facility permit has been issued by the local agency to the owner or operator of the unified program facility on which the tank is located. Existing law requires an underground storage tank permit to require compliance with certain design and construction requirements and requires a permit issued for a petroleum

underground storage tank system that meets specified requirements to include an upgrade compliance certificate, as prescribed, that documents that the petroleum underground storage tank system meets those requirements. Under existing law, as of January 1, 1999, no person may deposit petroleum into an underground storage tank system unless the underground storage tank system meets those described requirements and a person depositing petroleum into an underground storage tank system is required to verify that the system meets those requirements by taking certain actions, including viewing the upgrade compliance certificate.

This bill would allow a local agency to petition the board, before December 1, 1998, for a 90-day extension for the upgrade compliance certification requirements and would allow an owner or operator of such an underground storage tank located in the jurisdiction of the local agency that receives such an extension to certify that the tank has met those requirements, if the tank meets specified design and construction requirements. The bill would provide that the self-certification is valid for a period not to exceed 90 days from the date of the extension or until the local agency has inspected that tank and issues or denies an upgrade compliance certificate, and would require an owner or operator certifying compliance to sign that self-certification statement under penalty of perjury, thereby imposing a state-mandated local program by creating a new crime. The bill would impose a civil penalty upon an owner or operator who posts such a statement on a tank that does not meet those requirements. The bill would include, as a verification method for persons depositing petroleum into a tank system, the viewing of such a statement placed on the tank system.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 775 (SB 998) Burton. Health care.

Existing law establishes certain educational and examination requirements for persons who hold themselves out as perfusionists.

Existing law provides for the regulation of health facilities. Among other things, existing law authorizes health facilities to engage in cardiac surgery.

This bill would provide that during cardiovascular surgery, a perfusionist, as defined by the above-mentioned provisions, shall operate the extracorporeal equipment under the immediate supervision of the cardiovascular surgeon or anesthesiologist. It would provide that the determination of the qualifications and competence of a perfusionist, and the awarding of appropriate privileges, shall be the responsibility of the general acute care hospital or its medical staff.

Since a violation of the provisions regulating health facilities is a crime, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 776 (SB 1535) Kopp. Public officers and employees: rationing.

(1) Existing law contains provisions relative to the effect of taking oaths supporting a foreign government on eligibility to hold public office or employment.

This bill would make clarifying changes to these provisions and would delete an obsolete provision relative to oaths taken during the war between the Allied Powers and Germany-Austria, 1914-1918, inclusive, in connection with service in the military forces of any sovereignty allied with the United States in that war.

(2) Under existing law, it is a misdemeanor or a felony to steal, alter, forge, or counterfeit any coupon, stamp, token, certificate, or other ration evidence or document issued by the United States government or any agency thereof, or to forge or alter any ration check. It is also a misdemeanor or a felony to sell, give, or otherwise transfer to

another, or to buy or otherwise knowingly and unlawfully acquire any altered, forged, or counterfeited coupon, stamp, token, certificate, ration check, or other ration evidence or document knowing the same to be altered, forged, or counterfeited. Existing law provides that any person who knowingly either buys, or sells, or otherwise unlawfully acquires or transfers for a valuable consideration any coupon, stamp, token, certificate, ration check, or other ration evidence or document issued by the United States government or any agency thereof or any altered, forged, or counterfeited coupon, stamp, token, certificate, ration check, or other ration evidence or document is guilty of a misdemeanor or a felony.

This bill would delete these provisions.

Ch. 777 (SB 1546) Johnson. Upper Newport Bay Ecological Reserve Maintenance and Preservation Fund: appropriation.

Existing law provides for the establishment of ecological reserves, where land or land and water areas are preserved in a natural condition, or are provided some level of protection, as specified, for the benefit of the general public to observe native flora and fauna and for scientific study or research. Existing law authorizes the Department of Fish and Game to maintain and administer these reserves.

This bill would create the Upper Newport Bay Ecological Reserve Maintenance and Preservation Fund in the State Treasury. The bill would appropriate \$200,000 from the General Fund to the Upper Newport Bay Ecological Reserve Maintenance and Preserve Fund for expenditure by the department for purposes relating to the maintenance and preservation of the Upper Newport Bay Ecological Reserve.

Ch. 778 (SB 1606) Lewis. Pharmacy: automated drug delivery systems.

Existing law, the Pharmacy Law, provides for the licensing and regulation of the practice of pharmacy, under the jurisdiction of the California State Board of Pharmacy. It prescribes requirements for the dispensing of drugs, as specified.

Existing law provides for the licensing and regulation of health facilities, including skilled nursing facilities and intermediate care facilities, administered by the State Department of Health Services.

Existing law limits the number of oral dosage form or suppository form drugs provided by a pharmacy to a skilled nursing facility or intermediate care facility for storage in a secured emergency supplies container to 24 and authorizes the department to provide for other specified limitations.

This bill would provide, commencing July 1, 1999, that limitations imposed pursuant to these provisions on the number or quantity of oral or suppository form drugs provided by a pharmacy to a skilled nursing or intermediate care facility shall not apply to an automated drug delivery system, as defined by the bill, when a pharmacist controls access to the drugs.

The bill would also provide, commencing July 1, 1999, that access to an automated drug delivery system shall be limited to personnel authorized by law to administer drugs and who have an access code to these systems, would set forth requirements of a health facility and pharmacy with regard to the installation, operation, and review of an automated drug delivery system, and would exempt an automated drug delivery system from certain drug labeling requirements.

Ch. 779 (SB 1759) Ayala. Liens and encumbrances.

(1) Existing law sets forth the procedures applicable to an action to quiet title to real or personal property, as specified.

SB 2154 of the 1997-98 Regular Session, enacted as Chapter 211 of the Statutes of 1998, prohibits a person from filing a lawsuit or recording or filing a lien or other encumbrance, against a public officer or employee, knowing it is false, with the intent to harass the officer or employee or influence or hinder the public officer or employee in discharging his or her official duties.

This bill would make a clarifying change in the latter provision to specify that an encumbrance includes, but is not limited to, a notice of lis pendens.

The bill also would prohibit a consumer credit reporting agency from reporting a document which acts as a lien or other encumbrance but which has together with it a

court order striking or releasing the lien or other encumbrance on the basis that it is an above-described lien or encumbrance. The bill would also specify that it does not apply to a lien or other encumbrance filed by a financial institution or a public entity, as defined. The bill would also create an expedited action, filed pursuant to a complaint form established by the Judicial Council, requesting the striking or release of such a lien or other encumbrance, and provide for a civil penalty of \$5,000 for knowingly filing or directing another to file such a lien or other encumbrance.

(2) Existing law requires the county recorder to accept a document for recordation as authorized or required by law to be recorded.

This bill would specify that the document be authorized or required to be recorded by statute or court order rather than authorized or required by law.

Ch. 780 (SB 1855) M. Thompson. Payment of claims: deficiencies.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Existing law establishes procedures for making that reimbursement.

Existing law establishes a procedure to govern the Director of Finance in authorizing payment of deficiencies in any appropriation authorized by law.

Existing law establishes the Tax Relief and Refund Account in the General Fund and appropriates moneys in that account to the Franchise Tax Board to make payments to taxpayers.

This bill would appropriate \$86,286,381.03 from the General Fund to the Controller. From these funds, \$23,462,000 would be allocated for the payment of claims by local agencies and school districts for reimbursement for state-mandated local costs, \$62,823,000 would be allocated to pay for deficiencies, and \$1,381.03 would be allocated from the Tax Relief and Refund Account for payment of a specified claim, in accordance with a specified schedule.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 781 (SB 1885) Ayala. Metropolitan water districts.

Under the Metropolitan Water District Act, the board of a metropolitan water district is required to consist of at least one representative from each member public agency, as prescribed. The act authorizes each member public agency to appoint additional representatives not exceeding one additional representative for each 3% of the assessed valuation of property taxable for district purposes within the entire district that is within the boundaries of that member public agency.

This bill would repeal on January 1, 2001, the above provision regarding additional representatives, and instead would authorize each member public agency to appoint additional representatives not exceeding one additional representative for each 5% of the assessed valuation of property taxable for district purposes within the entire district that is within the boundaries of that member public agency.

Ch. 782 (SB 1934) Johnston. Department of General Services: director: leases.

Existing law generally authorizes the Director of General Services to hire, lease, lease-purchase, or lease with the option to purchase any real or personal property for the use of any state agency, if the director deems the hiring or leasing is in the best interest of the state.

This bill would authorize the director to purchase, exchange, or otherwise acquire real property and construct facilities within the County of Sacramento or the City of West Sacramento for use by the Department of Corrections and other state agencies. The State Public Works Board would be authorized to issue revenue bonds, negotiable notes, or negotiable bond anticipation notes to finance all costs associated with acquisition, design, and construction of the facilities. The bill would provide that if the Department of General Services proposes to acquire the facilities on a design-build basis or pursuant to a lease-purchase agreement or a lease with an option to purchase, the department shall submit to the Legislature specified information prior to entering into an agreement.

Ch. 783 (SB 1997) Johnson. Property taxation: purchase price.

Existing property tax law establishes a rebuttable presumption that the “full cash value” or “fair market value” of real property is the purchase price of that property, and defines the term “purchase price” for purposes of this presumption.

This bill would additionally establish a rebuttable presumption, which may be overcome by a preponderance of the evidence, as provided, that the value of improvements financed by the proceeds of an assessment resulting in a lien imposed on the property by a public entity is reflected in the total consideration, as provided, involved in the transaction. This bill would also make technical, nonsubstantive changes.

This bill would take effect immediately as a tax levy.

Ch. 784 (SB 2023) Alpert. School finance: general reserves.

Existing law requires the Superintendent of Public Instruction, the Controller, and the Director of Finance to develop, before March 1, 1989, standards and criteria to be reviewed and adopted by the State Board of Education, and to be used by local educational agencies in the development of annual budgets and the management of subsequent expenditures from that budget. Existing law requires the standards and criteria to include comparisons and reviews of reserves and fund balances.

This bill would, until July 1, 2003, prohibit the State Board of Education from adopting standards and criteria for a budget reserve for economic uncertainties in excess of 1% of a school district’s total expenditures, transfers out, and other uses, as defined, for a school district that has an average daily attendance greater than 125,000 and where the school district has, by an affirmative vote of its governing board, agreed to a budget reserve of 1%.

Ch. 785 (SB 2030) Costa. Child welfare services: funding; study.

Existing law provides for the administration of various child welfare services pursuant to regulations and procedures adopted by the State Department of Social Services.

This bill would require the department to contract with an appropriate and qualified entity to conduct an evaluation of the adequacy of current child welfare services budgeting methodology, and would require the department to report to the appropriate committees of the Legislature by January 30, 2000.

Ch. 786 (SB 2215) Lockyer. Public safety officers: procedural bill of rights.

The Public Safety Officers Procedural Bill of Rights Act prohibits any punitive action, or denial of promotion on grounds other than merit of a public safety officer, as defined, without providing the public safety officer with an opportunity for administrative appeal.

This bill also would prohibit a punitive action or denial of probation on grounds other than merit with respect to a public safety officer who has successfully completed probation without providing the public safety officer with an opportunity for administrative appeal. The bill additionally would prohibit a public agency or appointing authority from removing a chief of police without providing that official with written notice and the reason or reasons therefor and an opportunity for administrative appeal. The bill would provide that for purposes of these provisions, the removal of a chief of police by a public agency or appointing authority, for the purpose of implementing the goals or policies, or both, of the public agency or appointing authority, for reasons including incompatibility of management styles, or as a result of a change in administration, would be sufficient to constitute “reason or reasons.” These additional requirements on local government would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 787 (AB 7) Brown. Health coverage: breast cancer.

Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, willful violation of any of these provisions is a crime. Existing law also provides for the regulation of policies of disability insurance administered by the Insurance Commissioner.

Existing law requires that health care service plans and disability insurers provide coverage for certain benefits and services.

This bill would require every health care service plan contract and every policy of disability insurance that is issued, amended, renewed, or delivered on and after January 1, 1999, that provides coverage for mastectomies and lymph node dissections, to allow the length of a hospital stay associated with these procedures to be determined by the attending physician and surgeon in consultation with the patient and consistent with sound clinical principles and processes, to cover prosthetic devices or reconstructive surgery, and to cover all complications from a mastectomy. The bill would enact other related provisions. Since a willful violation of the provisions applicable to health care service plans is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 788 (AB 1621) Figueroa. Health care coverage: reconstructive surgery.

Under existing law, health care service plans are subject to licensure and regulation by the Commissioner of Corporations. Under existing law, disability insurers are subject to licensure and regulation by the Insurance Commissioner. Existing law establishes the Medi-Cal program to provide health care benefits to low-income individuals. Willful violation of the law regulating health care service plans is a crime.

This bill would require certain health care service plan contracts, and certain policies of disability insurance, issued, amended, renewed, or delivered on or after July 1, 1999, to cover reconstructive surgery, as defined, but would exclude coverage for cosmetic surgery, as defined. The bill would authorize health care service plans, certain disability insurers, and the Medi-Cal program to utilize prior authorization and utilization review that may include denial of proposed surgery under specified circumstances. It would also require reconstructive surgery to be covered under the Medi-Cal program on and after July 1, 1999.

By changing the definition of a crime relative to health care service plans, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 789 (AB 2693) Migden. Controlled substances: prescriptions.

Existing law requires each prescription for a controlled substance classified in Schedules II, III, IV, and V to comply with specified conditions, and requires each prescription for a Schedule II controlled substance to be prepared in triplicate and one of the copies of the prescription to be sent to the Department of Justice. A violation of these requirements is a crime.

This bill would provide that a prescription for a Schedule II controlled substance, for use by a patient who has a terminal illness, as defined, shall be exempt from the above specified conditions, but shall comply with the requirements set forth in the bill. By changing the definition of existing crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 790 (AB 2003) Strom-Martin. Health coverage: dental treatments: anesthesia.

(1) Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, willful violation of any of these provisions is a crime.

This bill would provide that specified health care service contracts are deemed, commencing January 1, 2000, to cover general anesthesia and associated facility charges for dental procedures for enrollees under 7 years of age, or who are developmentally disabled, or for whom general anesthesia is medically necessary, if rendered in a hospital or surgery center setting, when the clinical status or underlying medical condition of the patient requires dental procedures that ordinarily would not require general anesthesia to be rendered in a hospital or surgery center setting. The bill would authorize the health care service plan to require prior authorization of general anesthesia and associated charges required for dental care procedures in the same manner that prior authorization is required for other covered diseases or conditions. Since the willful violation of the provisions relating to health care service plans is a crime, this bill would impose a state-mandated local program.

(2) Existing law also provides for the regulation of policies of disability insurance administered by the Insurance Commissioner.

This bill would apply provisions similar to those in (1) above to disability insurers.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 791 (SB 1140) Committee on Health and Human Services. Medicine: pain management.

Existing law requires the Division of Licensing of the Medical Board of California to establish continuing education requirements for physicians and surgeons, and requires the board to periodically develop and disseminate information and educational material to licensees and general acute care hospitals on certain prescribed medical care issues. It also requires the board to notify all licensees, through its regular mailing, of the existence of pain management guidelines published by the Agency for Health Care Policy and Research of the Public Health Service, and to provide them to licensees upon request.

This bill would require the division to give its highest priority to considering a course in pain management among its continuing education requirements for licensees, and would require the board to periodically develop and disseminate information and educational material on pain management techniques and procedures to licensees and general acute care hospitals.

Existing law also requires the Board of Registered Nursing to establish, by regulation, standards for continuing education for various licensed categories of nursing.

This bill would require the board to consider, in establishing standards for continuing education for these nursing categories, a course on the special needs of individuals and families facing end-of-life issues, as specified. It would authorize the board, in establishing standards for continuing education, to include a course on pain management.

Ch. 792 (AB 1613) Scott. Personal income taxes: education.

The Personal Income Tax Law incorporates by reference various provisions of the federal Internal Revenue Code as enacted as of a specified date.

This bill would enact the Higher Education Affordability Act which would make certain recent changes in federal income tax laws applicable, with specified exceptions and modifications, for purposes of the Personal Income Tax Law with respect to qualified state tuition programs and the deduction for interest paid on education loans.

This bill would take effect immediately as a tax levy.

Ch. 793 (AB 2216) Escutia. Pupils: advanced placement.⁹

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes a school district receiving economic impact aid funds to expend any portion of those funds to pay for all or part of the costs of one or more advanced placement examinations that are charged to economically disadvantaged pupils who are defined as either coming from a family that receives Aid to Families with Dependent Children or having limited English proficiency. Existing law requires the Superintendent of Public Instruction to have submitted a report to the Legislature on the effectiveness of the funding expended for that purpose in increasing the number of economically disadvantaged pupils passing the advanced placement examination.

This bill would establish a 5-year pilot grant program, administered by the State Department of Education, for the purpose of awarding grants to cover the costs of advanced placement examination fees. The bill would authorize any school district to apply to the department for grant funding based on the number of economically disadvantaged pupils in the district who would take the next offered advanced placement examinations. The bill would authorize any economically disadvantaged pupil enrolled in an advanced placement course to apply to designated school district staff for a grant. Pupils receiving grants would be required to pay \$5 of the examination fee. The bill would revise the definition of economically disadvantaged pupil.

This bill would require the Superintendent of Public Instruction to submit, no later than January 1, 2004, a report to the Legislature on the effectiveness of the pilot program.

This bill would appropriate \$2,500,000 from the General Fund to the State Department of Education for purposes of awarding the grants to cover the costs of advanced placement examination fees. The funds appropriated by this bill would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

Ch. 794 (AB 2363) Honda. Education: International Baccalaureate Diploma Programs.

Existing law provides programs for an advanced placement, gifted and talented pupils, and language arts enrichment programs.

This bill would authorize a system of incentives to encourage high schools to offer the intensive, rigorous course of instruction leading to an International Baccalaureate Diploma and to encourage pupils in these schools to enroll in, attempt, and pass the rigorous International Baccalaureate Diploma course of study and examinations leading to the International Baccalaureate Diploma.

The bill would provide that school districts that operate an International Baccalaureate Diploma Program shall submit specified information to the State Department of Education by October 1 of each school year.

The bill would provide that, from funds appropriated for this purpose, the Superintendent of Public Instruction shall annually allocate to school districts, on behalf of each public high school within the district that offers an International Baccalaureate Diploma Program, up to \$25,000 to cover the ongoing costs of professional development required by the program. The bill would appropriate \$1,050,000 from the General Fund to the Superintendent of Public Instruction for allocation to school districts for the purposes set forth in the bill. The bill would require that appropriation to be included in the amounts appropriated by the state for the 1998-99 fiscal year for the purpose of meeting the state's minimum funding obligation to school districts, as defined, and community college districts pursuant to Section 8 of Article XVI of the California Constitution for that fiscal year.

Ch. 795 (SB 1697) Hayden. Preparatory courses for college admissions tests: College Preparation Partnership Program.

Existing law establishes the public school system of the state and vests the State Department of Education, under the executive leadership of the Superintendent of Public Instruction, with various statewide administrative responsibilities with respect to the public schools.

This bill would establish the College Preparation Partnership Program as a grant program under which program matching funds would be directed to school districts through a grant program administered by the State Department of Education. The matching funds, on the basis of \$2 of program funds to \$1 of funds raised by the schoolsite

or school district, would be allocated to public high school sites to contract with providers for the provision of preparation courses for college admissions tests for eligible high school pupils. A schoolsite would be allowed to assess students who participate in the College Preparation Partnership Program a fee not to exceed \$5 and would be permitted to use the funds collected for purposes of the matching funds requirement. The content of the preparation courses would be determined by the school district of the schoolsite at which the instruction occurs.

The bill would prescribe procedures for the selection of schoolsites for participation in the program and for the evaluation of the performance of participants in the program. The bill would require the State Department of Education to submit a report to the Legislature about the program on or before January 1, 2004.

The bill would provide for the repeal of the provisions establishing the program as of January 1, 2005.

This bill would appropriate \$10,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to school districts for the purposes of college preparation and examination programs pursuant to this bill. The bill would deem this appropriation to be "General Fund revenues appropriated for school districts," and be deemed to be included within the "total allocations to school districts and community college districts from General Fund proceeds of taxes appropriated pursuant to Article XIII B," for the purposes of making computations required by Section 8 of Article XVI of the California Constitution, for the 1998-99 fiscal year.

Ch. 796 (AB 438) Torlakson. Housing elements: adequate housing sites and regional housing needs.

(1) Existing law requires each city, county, and city and county to adopt for its jurisdiction, according to specified deadlines, a general plan that includes certain mandatory elements, including a housing element. Under existing law, the housing element identifies and analyzes existing and projected housing needs as well as a statement of goals, policies, quantified objectives, and scheduled programs for the preservation, improvement, and development of housing. Further, under existing law the Legislature has declared that the availability of housing is a matter of vital statewide importance and the early attainment of decent housing and a suitable living environment for every California family is a priority of the highest order.

This bill would state the intent of the Legislature to amend the Planning and Zoning Law relating to the housing element of a community's general plan to assist local governmental entities, builders, housing developers, sponsors, and planners in producing the greatest number of safe, sanitary, decent, and affordable housing units by the most cost-effective means possible.

(2) Existing law requires that each planning agency provide an annual report to the legislative body on progress in meeting regional housing needs, as specified, and requires that the report be provided, using forms and definitions adopted by the Department of Housing and Community Development pursuant to the Administrative Procedure Act, to the legislative body on or before July 1 of each year.

This bill would require that the annual report also be provided to the Office of Planning and Research and the Department of Housing and Community Development. This requirement would impose a state-mandated local program.

(3) Existing law requires the Department of Housing and Community Development to evaluate each housing element for consistency with state law including, among other things, a requirement for a program setting forth a 5-year schedule of actions the local government is undertaking or intends to undertake to achieve the goals of the housing element that includes the identification of sites to be made available to encourage the development of a variety of types of housing for all income levels. It permits the department to allow a local government to identify adequate sites for this purpose by a variety of methods, as specified.

This bill would authorize the department to allow a city or county to substitute the provision of units for up to 25% of its site identification obligation if it includes in its housing element a program to provide units within the city or county in any income category that will be made available to low- and very low income households through the provision of committed assistance, as defined, subject to specified criteria.

(4) Existing law prescribes criteria for the department to determine the distribution of regional housing needs based on data provided by the Department of Finance, in consultation with each council of governments.

This bill would require that determination to be based on specified population projections and forecasts.

(5) Existing law requires the appropriate council of governments to determine the regional housing need and city and county shares.

This bill would require the council of governments to provide a subregion with its share of the regional housing need, and to delegate responsibility for providing allocations to cities and counties, upon request of those entities, to a subregional entity according to a prescribed agreement.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new program or higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

Ch. 797 (AB 1182) Keeley. Public Utilities Commission: California-American Water Company.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities, including water companies.

This bill would require the commission, in consultation with the California-American Water Company, the Department of Water Resources and other affected interests, to prepare a prescribed long-term contingency plan that company would pursue if a specified dam project does not go forward.

The bill would make related changes, and related legislative findings and declarations.

Ch. 798 (AB 1374) Hertzberg. State Bar.

Existing law requires the Board of Governors of the State Bar to establish and maintain a system for arbitration of fee disputes between attorneys and their clients, and provides that the parties may agree in writing to be bound by the award of the arbitrators at any time after the dispute has arisen.

This bill would make a clarifying change to that provision regarding the arbitrators appointed to conduct the arbitration.

Ch. 799 (AB 1424) Martinez. Telecommunications: telephone cards.

Under existing law, the Public Utilities Commission is vested with regulatory authority over public utilities and other specified entities. The Public Utilities Act generally requires a telephone or telegraph corporation constructing or extending facilities to obtain from the commission a certificate of public convenience and necessity, but authorizes the commission to exempt certain telecommunications services offered by telephone and telegraph corporations, and to, instead, subject those companies to registration, as prescribed.

This bill would amend that act to require entities offering the services of telephone prepaid debit cards that are not certificated by the commission to provide telephone service to register with the commission, as specified.

Because, under this act, failure of these entities to register with the commission would be a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 800 (AB 1453) Cardenas. California State Lottery: Cardenas Textbook Act of 2000.

(1) The California State Lottery Act of 1984 specifies that of the total annual revenues from the sale of state lottery tickets or shares, 50% shall be returned to the public in the form of prizes, as specified, at least 34% shall be allocated to the benefit of public education, as specified, and no more than 16% shall be allocated for the payment of expenses of the lottery as described in the lottery act.

This bill would require that for the 1998–99 fiscal year and each fiscal year thereafter, 50% of any increase in the share of these moneys calculated to the benefit of public education from the amount calculated in the 1997–98 fiscal year be allocated to school districts and community college districts for the purchase of instructional materials on the basis of an equal amount per unit of average daily attendance.

(2) The bill would provide that the changes to the lottery act specified in (1), would take effect only when submitted to and approved by the voters. The bill would require that its provisions be submitted to the electors at the next statewide election occurring 131 days after this act is adopted.

Ch. 801 (AB 1761) Sweeney. Education technology.

Existing law establishes the Digital High School Education Technology Grant Program of 1997, consisting of one-time installation grants and ongoing technology support and staff training grants, to provide all high school pupils with basic computer skills, to improve pupil achievement, and to increase collaboration among high schools, private industry, postsecondary education institutions, and community organizations. Matching resources are required to be provided at high schools receiving grants. Existing law requires that each high school that receives a technology installation grant also receive an annual technology support and staff training grant commencing in the second fiscal year following the year in which it receives the installation grant.

This bill would require the State Department of Education to establish the California Technology Assistance Project, to be composed of regional consortia, that would administer, with 3-year grant funding awarded by the State Board of Education, a regionalized network of technical assistance to schools and school districts on the implementation of education technology and work collaboratively with school districts and county offices of education in order to meet locally defined technology-based needs. The bill would also require the department to provide statewide coordination and evaluation of technology programs and resources and advance the use of technology in the curriculum and in the administration of elementary and secondary schools.

The bill would require the State Board of Education to award grants to fund a school district or county office of education in each region of the California Technology Assistance Project to act as the lead agency to administer the service of that region. Grant funding would be provided through the annual Budget Act.

The bill would authorize school districts, county offices of education, and state special schools to apply to the State Board of Education to participate in grant programs related to education technology. The provisions of the bill would be repealed on January 1, 2004.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 802 (AB 1994) Bowen. Advertising: prepaid calling cards and services.

Existing law provides for the regulation of advertising in the state.

This bill, the provisions of which would become operative on July 1, 1999, would prescribe certain standards and requirements for consumer disclosure and services with respect to the advertising and sale of prepaid calling cards and prepaid calling services, as defined.

Existing law makes it a crime to violate any of the provisions regulating advertising. By adding these new standards and requirements with respect to the advertising of prepaid calling cards and prepaid calling services, this bill would expand the scope of an existing crime, thereby creating a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 803 (AB 1292) Migden. Academic achievement partnerships.¹⁰

Existing law provides for various partnerships to enhance educational goals, including, but not limited to, the establishment and expansion of regional science resource centers in partnership with nonprofit agencies; regional social tolerance resource centers in partnership with nonprofit agencies; regional Latino heritage resource centers in partnership with nonprofit agencies; and the California Academic Partnership Program.

This bill would enact the Academic Improvement and Achievement Act which would authorize local educational agencies to submit proposals to the Superintendent of Public Instruction to fund activities that will increase the percentage of pupils at qualifying high schools that meet the requirements for admission to the California State University and the University of California.

This bill would require the Superintendent of Public Instruction to develop an application inviting local educational agencies to apply to receive funds for qualifying schools, subject to an appropriation for the purposes of the bill. The bill would require funds to be equitably distributed throughout the state in a manner consistent with the purposes of the bill and that qualifying schools in rural, urban, and suburban areas have access to funds.

This bill would require the superintendent to recommend, and the State Board of Education to approve, a plan for the comprehensive evaluation of the program by July 1, 2003, and would require the State Board of Education to report to the Legislature regarding the program by December 31, 2003.

This bill would provide that it is the intent of the Legislature that these regional partnerships be funded by an appropriation in the annual Budget Act.

This bill would make these provisions inoperative on July 1, 2004, and would repeal them as of January 1, 2005.

This bill would appropriate \$20,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to local education agencies for the purposes of, and in accordance with, this bill. The bill would appropriate \$300,000 from the General Fund to the Superintendent of Public Instruction to administer the grants under this bill and under SB 1697, AB 2216, and AB 2363, of the 1997-98 Regular Session if those bills are enacted and take effect on or before January 1, 1999.

To the extent the funds appropriated by this bill are allocated to a school district, as defined by existing law for purposes of Section 8 of Article XVI of the California Constitution, those funds may be applied toward the minimum funding requirements required by Section 8 of Article XVI of the California Constitution.

Ch. 804 (AB 2088) Floyd. Pawnbrokers.

Existing law provides a comprehensive scheme for the regulation of pawnbrokers, including property in the possession of a pawnbroker.

Existing law requires a pawnbroker, if a pledged article is not redeemed during the specified 4-month loan period, to notify the borrower in writing of the termination of the loan period and extending the right of redemption for a period of 10 days from the date of mailing of that notice.

This bill would provide that the 10-day redemption period is extended to the next business day if the pawnshop is closed on the 10th day.

This bill would also require a pawnbroker, upon redemption of a loan contract, to present the borrower with a receipt stating in detail the fees, charges, and compensation paid by the borrower to the pawnbroker.

A violation of the provisions regulating pawnbrokers is a crime. By adding new requirements with respect to the duties of pawnbrokers to borrowers, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would also provide that the proposed changes to Section 21201 of the Financial Code shall not become operative if SB 1685 is also enacted and becomes operative, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 805 (AB 2536) Poochigian. California State Summer School for Mathematics and Science.

Under existing law, the governing board of a school district is authorized to provide pupil instruction through the operation of summer school programs. Existing law provides for a California State Summer School for the Arts governed by a 15-member board of trustees.

This bill would establish the California State Summer School for Mathematics and Science, as a multidisciplinary mathematics and science training program that would enable pupils who have demonstrated excellence in mathematics and science to receive intensive training in these subjects. The program would be administered by the State Board of Education. The bill would prescribe requirements for the operation of the program, including, but not necessarily limited to, the period of instruction, selection of faculty, site determination, costs, and tuition. The bill would require the State Department of Education to assist the board by providing specified services relating to school district notification and registration and fee waivers and to evaluate the program.

The bill would appropriate \$1,000,000, in augmentation of a prescribed item of the Budget Act of 1998. Of this amount, \$400,000 would be for support of the State Board of Education for the administrative planning and startup costs of the California State Summer School for Mathematics and Science, and \$600,000 would be for the initial costs of operating the summer school program.

Ch. 806 (AB 2611) Kuehl. Geologic hazard abatement districts: changes of organization.

Under existing law, geologic hazard abatement districts may be formed in accordance with prescribed procedures for the prevention, mitigation, abatement, or control of a geologic hazard or structural hazards that are partly or wholly caused by geologic hazards.

This bill would prescribe procedures for the dissolution of an existing geologic hazard abatement district.

Ch. 807 (AB 2637) Mazzone. Teachers.

Existing law requires the Commission on Teacher Credentialing to establish professional standards, assessments, and examinations for entry and advancement in the education profession and to establish standards for the issuance and renewal of credentials, certificates, and permits. Existing law sets forth the minimum requirements for the preliminary and professional multiple subject teaching credential.

This bill would require the commission to review the minimum requirements for the preliminary and professional multiple subject teaching credential and to recommend their revision as necessary, during the normal revision cycles, to ensure that teachers of the elementary grades receive training related to and have knowledge of developmentally appropriate teaching methods for pupils in kindergarten and grades 1 to 3, inclusive, who may be of the same grade level but of vastly different developmental levels.

Ch. 808 (AB 2737) Aroner. Supportive housing.

Existing law contains various provisions relating to emergency and transitional housing for homeless and mentally disabled persons.

AB 2780, if enacted, would establish the Supportive Housing Program Council to assist the State Department of Mental Health in implementing the Statewide Supportive Housing Initiative to encourage the integration of housing and services, by awarding grants for services to the target population, as defined. AB 2780 would require the department to complete and submit to the Legislature an evaluation of the program.

This bill, if AB 2780 is enacted, would provide that the implementation of that program is contingent upon the appropriation of funds in the annual Budget Act for that purpose, and would repeal that program on January 1, 2004.

Ch. 809 (AB 2755) Alquist. Schoolsite advisory bodies.

Existing law provides for the establishment of schoolsite advisory bodies in connection with various programs, including school improvement plans, American Indian early

childhood education, bilingual education, school-based program coordination, compensatory education, migrant education, and school-based pupil motivation and maintenance.

This bill would require the Superintendent of Public Instruction to develop information, and submit this information to the State Board of Education for its approval. This information would be for distribution to school districts and for posting on the State Department of Education Internet website, to strengthen and promote the opportunity for quality involvement by parents and guardians in schoolsite councils. The bill would require that the information be provided to each school district and county office of education and would authorize that it be made available to parents and guardians who are members of schoolsite councils that includes, among other things, the operation of schoolsite advisory bodies, including bylaws, group responsibilities, and roles, public meeting notice requirements, information about the total budget of a school district and how funds are distributed to schoolsite advisory bodies, and instruction on how to interpret data from the pupil performance measures selected by the district.

Ch. 810 (SB 1832) Kelley. Home economics careers and technology vocational education.

(1) Existing law requires the Superintendent of Public Instruction to establish and convene the Home Economics Careers and Technology Advisory Committee to develop recommendations for state programs in home economics careers and technology education. Existing law requires the recommendations to be made available on or before January 1, 1998, and provides that the advisory committee shall cease to exist on January 1, 1998.

This bill would delete the provision that requires the recommendations to be made available on or before January 1, 1998, and would provide that the advisory committee would cease to exist on January 1, 2000.

(2) Existing law establishes within the State Department of Education a Home Economics Careers and Technology Vocational Education Unit to assist school districts in the establishment and maintenance of home economics careers and technology education programs, and requires a staffing level of an appropriate number of full-time employees.

This bill would establish a grant program for the purpose of improving, expanding, and establishing instructional programs in home economics careers and technology vocational education. The bill would require the program to be implemented to the extent funds are appropriated for these purposes in the annual Budget Act. The bill would, except as specified, require a school district to contribute district funds in an amount equal to the amount of its grant. The bill would require the Superintendent of Public Instruction to administer the grant program. The provisions of the bill would be repealed as of January 1, 2003.

Ch. 811 (SB 2241) Brulte. Solid waste: handling services.

The existing California Integrated Waste Management Act of 1989 provides that if a local agency has authorized a solid waste enterprise, by franchise, contract, license, or permit, to provide services and those services have been provided for more than 3 previous years, the solid waste enterprise may continue to provide those services up to 5 years after mailed notification to the solid waste enterprise by the local agency having jurisdiction that exclusive solid waste handling services are to be provided or authorized, unless the solid waste enterprise has an exclusive franchise or contract. The act subjects a solid waste enterprise providing solid waste handling services to specified requirements regulating the handling of solid waste under specified conditions.

This bill would require that those solid waste handling services have been lawfully provided for more than 3 previous years. The bill would define the terms "lawfully provided" and "license" for purposes of the act.

The bill would provide that if the local agency has established rates for solid waste handling services, the local agency may require the solid waste enterprise to adhere to rates that are comparable to those established by the local agency.

The act authorizes any local agency or solid waste handling enterprise to contract, upon mutually satisfactory terms, for the termination of all or any part of the business of the solid waste enterprise before the expiration of a specified period.

This bill would prohibit a solid waste enterprise from waiving the right to continue to provide solid waste handling services.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 812 (SB 133) Kelley. County water authorities: indebtedness: letters of credit.

The County Water Authority Act authorizes the board of directors of a county water authority to arrange for a line of credit as an additional source of repayment for certain indebtedness or to borrow money for specified purposes.

This bill would additionally authorize a board of directors to arrange for a letter of credit for those purposes.

Ch. 813 (SB 1765) Peace. Colorado River Management Program.

Existing law requires the Colorado River Board of California to investigate past, present, and potential uses of water of the Colorado River System within and without the state.

This bill would appropriate \$235,000,000 from the General Fund for the purpose of implementing the "California Plan" developed by the Colorado River Board of California, as specified, and \$300,000 from the General Fund to the Salton Sea Authority to conduct a study relating to the All American Canal, as specified.

Ch. 814 (AB 1957) Knox. Cal-OSHA targeted inspection and consultation programs.

Existing law authorizes the levy and collection of assessments from employers to fund the Cal-OSHA targeted inspection and consultation programs. This authorization will be repealed on January 1, 1999, unless extended by statute.

This bill would extend the above authorization for employer assessments until January 1, 2000, and would delete obsolete provisions and make other technical changes.

Ch. 815 (AB 2075) Granlund. Taxes: cigarette and tobacco products.

The Tobacco Tax and Health Protection Act of 1988 (Proposition 99), which was adopted by the voters at the general election held on November 8, 1988, imposed a tax on the distribution of cigarettes in addition to the tax imposed pursuant to the Cigarette Tax Law as of the effective date of the adoption of Proposition 99, and imposed a tax on the distribution of certain tobacco products pursuant to a specified formula.

Existing law revised provisions of the Cigarette Tax Law to conform to the adoption of the Tobacco Tax and Health Protection Act of 1988 (Proposition 99), by renaming that law the Cigarette and Tobacco Products Tax Law and by providing that reporting and tax collection requirements applicable to distributors of cigarettes shall also apply to distributors of tobacco products.

This bill would require the State Board of Equalization to provide the same refunds or credits to distributors of tobacco products for tax paid on tobacco products that have become unfit for use, unsalable, or have been destroyed, as are given to distributors of cigarettes.

The Tobacco Tax and Health Protection Act of 1988, an initiative measure, requires that amendments to the act must be consistent with the act's purposes, and requires a $\frac{4}{5}$ vote of both houses of the Legislature.

This bill, which would declare that it is consistent with the purposes of the act, would therefore require a $\frac{4}{5}$ vote.

The bill would take effect immediately as a tax levy.

Ch. 816 (AB 2273) Woods. Electric utility rates: cost-shifting: reports, and gas producers' cooperative associations: facilities.

(1) The Public Utility Act requires the Secretary of the California Environmental Protection Agency, in consultation with interested stakeholders, including relevant state and federal agencies, boards, and commissions, to evaluate and recommend to the

Legislature public policy strategies that address the feasibility of shifting costs from electric utility ratepayers, in whole or in part, to other classes of beneficiaries, as prescribed. The act requires the secretary to submit a final report to the Legislature, using existing agency resources, prior to March 31, 1997.

This bill would require the secretary, in consultation with relevant state and federal agencies, boards, and commissions, and with representatives of the solid-fuel biomass industry, to prepare and submit to the Legislature an annual report, in accordance with a prescribed schedule, on the existence, status, and progress of any public policy measures for cost-shifting developed as a result of the recommendations made pursuant to those provisions.

(2) Existing law permits a gas producers' cooperative association to use or employ any of its facilities for any purpose if the proceeds from the activity go to reduce the cost of operation for its members, but limits the value, as specified, of the services, machinery, equipment, or supplies or facilities, that can be furnished to nonmembers.

This bill would repeal that provision.

Ch. 817 (AB 2352) Woods. Human services.

Existing law provides for the Health and Welfare Agency, which includes various state departments charged with the administration of health, social, and other human services. This agency is headed by the Secretary of the Health and Welfare Agency.

This bill would change the name of this agency to the California Health and Human Services Agency, and the title of the head of that agency to the Secretary of the California Health and Human Services Agency.

Existing law requires the State Job Training Coordinating Council to be responsible for developing an education and job training report card program to assess the accomplishments of California's work force preparation system.

Existing law requires, by January 1, 2001, a subcommittee of that council, or an entity contracting with that subcommittee, to operate a performance-based accountability system that matches social security numbers of former participants in state education and training programs with information in files of state and federal agencies that maintain employment and educational records and that identifies the occupations of those participants.

This bill would add to the list of programs required to be included in this performance-based accountability system, programs in receipt of funds from basic rehabilitation services, as defined under the federal Vocational Rehabilitation Act of 1973, as amended.

Ch. 818 (AB 2366) Cedillo. Taxpayer contributions: California Mexican American Veterans' Memorial: Emergency Food Assistance Program Fund.

Provisions relating to the administration of personal income taxes allow individual taxpayers to contribute amounts in excess of their tax liability for the support of specified funds or accounts.

Under existing law, taxpayers are allowed to contribute amounts in excess of their tax liability for the support of the California Mexican American Veterans' Memorial Beautification and Enhancement Account in the General Fund, upon notification to the Franchise Tax Board that the veterans' memorial has been completed.

This bill would permit the designation to appear on the tax return after the Franchise Tax Board has been notified in writing that construction of the veterans' memorial has commenced.

This bill would additionally allow taxpayers, for taxable years beginning on or after January 1, 1999, and before January 1, 2004, to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the Emergency Food Assistance Program Fund, which would be created by this bill. This bill would provide that all money contributed to the fund pursuant to these provisions would be subject to appropriation by the Legislature, as specified.

Ch. 819 (SB 256) Costa. Local planning: housing elements.

(1) Existing law requires every city, county, and city and county to revise the housing element of its general plan as frequently as is appropriate, but not less than every 5 years,

to reflect the results of the periodic review of the housing element. Existing law also provides that specified councils of governments must complete the 3rd and 4th revisions of the housing elements of their general plans by specified dates.

This bill would extend the deadlines by which specified councils of governments and all other local governments must complete the 3rd and 4th revisions of the housing elements of their general plans.

Ch. 820 (AB 2472) Leonard. State employees: memoranda of understanding.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions of a specified memorandum of understanding entered into between the state employer and a specified employee organization, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act. The bill would exempt the memorandum of understanding with State Bargaining Unit 6 from certain conflicting statutory provisions and would prescribe alternative probationer rejection procedures for state employees in that bargaining unit.

This bill would require the Department of Personnel Administration to endeavor to maintain appropriate compensation, benefits, and personnel policies under its statutory jurisdiction for supervisory peace officers by considering specified factors.

(2) The Public Employees' Retirement Law, contains the State Peace Officers' and Firefighters' Defined Contribution Plan for state peace officer or firefighter members in State Bargaining Unit 6 to supplement the benefits provided under the Public Employees' Retirement System.

This bill would delete the provisions of the existing plan, would instead establish the State Peace Officers' and Firefighters' Defined Contribution Plan as a separate supplemental retirement program, and would establish the State Peace Officers' and Firefighters' Defined Contribution Plan Fund in the State Treasury for the plan and provide that all moneys in the fund are continuously appropriated for payments of the plan. The bill would increase the service allowance limitation from 80% to 85% for members of State Bargaining Unit 6 who retire on and after January 1, 1999, and would establish a new retirement option consisting of a partial distribution of the present value of the actuarial amount of retirement allowances for those members.

(3) The Public Employees' Medical and Hospital Care Act provides health benefits plans for eligible public employees.

This bill would authorize permanent intermittent employees who are represented by State Bargaining Unit 6 to enroll for health benefits within specified periods.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 821 (AB 2505) Olberg. State contracts.

The Small Business Procurement and Contract Act requires the Director of General Services and the directors of other state agencies to perform various activities to assist small businesses to participate in state contracts. "Small business" is defined for these purposes as a business in which the principal office is located in California and the officers of the business are domiciled in California, which is independently owned and operated, and which is not dominant in its field of operation. The director is authorized to use various criteria in making a detailed definition under these provisions.

This bill would additionally specify that a "small business," within this definition, has 100 or fewer employees, and average annual gross receipts of \$10,000,000 or less over the previous three years or is a manufacturer, as defined, with 100 or fewer employees. It would require that standards adopted by the director preclude the qualification of businesses that are dominant in their industry. It would revise the criteria to be used by the director in defining the term "small business," and require that standards applied in the definition be adopted by regulation.

Ch. 822 (SB 983) Polanco. Psychology.

Existing law provides for the licensure and regulation of the practice of psychology by the Board of Psychology, and the practice of pharmacy by the California State Board of Pharmacy. Existing law prohibits the practice of psychology from including prescribing drugs, and the pharmacy law prohibits any person other than a physician, dentist, podiatrist, or veterinarian from prescribing or writing a prescription.

The bill would require the Board of Psychology to encourage licensed psychologists to take continuing education courses in psychopharmacology and the biological basis of behavior. The bill would require the board to encourage institutions offering doctorate degree programs in psychology to include education and training in psychopharmacology and related topics. The bill would require the board to develop education and training guidelines for psychologists whose practice includes patients who may require psychopharmacological treatment.

Ch. 823 (SB 1522) Rainey. Child care and development facilities funding.

Existing law establishes the Child Care and Development Facilities Loan Guarantee Fund and the Child Care and Development Facilities Direct Loan Fund to guarantee private sector loans or make subordinated direct loans for the purchase, development, construction, expansion, or improvement of licensed child care and development facilities. Under existing law, the funds are administered by the Department of Housing and Community Development.

This bill would continuously appropriate all amounts in these funds to the department to carry out the purposes of the Child Care and Development Facilities Loan Guarantee Fund and the Child Care and Development Facilities Direct Loan Fund, respectively. The bill would authorize the department to administer the funds directly, through interagency agreements through contracts with public or private entities, or through any combination thereof, and to delegate the authority to review and approve loans made pursuant to the funds to a public or private entity. The bill would authorize the department to enter into an interagency agreement with the Trade and Commerce Agency to carry out those agreements and contracts. This bill would make an appropriation by authorizing the department to transfer funds from the above-described funds to the continuously appropriated California Economic Development Grant and Loan Fund and the Small Business Expansion Fund, respectively, for purposes of this interagency agreement with the Trade and Commerce Agency.

The bill would require the department to adopt regulations for serving family day care homes efficiently.

The bill would also authorize the department to adopt emergency regulations to implement the award and administration of loans from the funds.

Existing law limits costs associated with administration of the funds.

This bill would change this limit and permit it to be exceeded if an appropriation is made in the annual Budget Act in excess of the limit.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 824 (AB 2595) Baugh. Insurance.

Under existing law, the Insurance Commissioner is authorized to employ actuarial employees as he or she may need to discharge duties.

This bill would authorize the commissioner to contract for the services of actuarial professionals as the commissioner deems necessary. It would provide that these contracts shall not be subject to otherwise applicable provisions of the Government Code or the Public Contract Code that regulate contracting for services.

This provision would remain operative only until July 1, 1999.

Ch. 825 (SB 1796) Leslie. Stalking: cyberstalking.

(1) Existing law provides that a person is liable for the tort of stalking when the defendant engaged in a pattern of conduct intended to follow, alarm, or harass, resulting in the plaintiff reasonably fearing for his or her safety or the safety of an immediate family member, where the defendant has either made a credible threat or violated a restraining order.

This bill would expand the definition of “credible threat” to include threats made by means of an electronic communication device, and would incorporate the definition of “electronic communication” used in a specified provision of federal law.

(2) Existing law prohibits the willful issuance of a threat to commit a crime which will result in the death or great bodily injury of another, with the specific intent that the statement be taken as a threat even if there is no actual intent of carrying out the crime, where the threat is so unequivocal, immediate, and specific so as to cause the recipient to reasonably be in sustained fear for his or her own safety or the safety of his or her immediate family.

This bill would clarify that this provision applies to threatening statements made verbally, in writing, or by means of an electronic communication device, and would incorporate the definition of “electronic communication” used in a specified provision of federal law. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(3) Existing law prohibits stalking, which is defined as the willful, malicious, and repeated following or harassing of another, where a credible threat, as defined, has been communicated to the victim with the intent of placing the victim in reasonable fear for his or her safety.

This bill would expand the definition of “credible threat” to include threats communicated through the use of an electronic communication device, including telephones, cellular phones, computers, video recorders, fax machines, and pagers. This bill would also incorporate the definition of “electronic communication” used in a specified provision of federal law. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(4) Existing law prohibits, regardless of the good faith of the caller, the making of telephone calls to others with the intent to annoy, where the caller either uses obscene language or makes threats to the other parties person or property. Existing law also prohibits the repeated telephoning of another at the recipient’s residence or, under certain circumstances, place of work, with the intent to annoy, except where the repeated telephoning is conducted in good faith. Existing law also provides that an offense under these provisions committed by use of a telephone may be deemed to have been committed at either the place of origin or receipt of the telephone call or calls.

This bill would expand these provisions to include contacts by means of an electronic communications device, including telephones, cellular phones, computers, video recorders, fax machines, and pagers. This bill would also create a good-faith exception for obscene or threatening telephone calls or electronic contacts made with the intent to annoy. This bill would also provide that an offense committed by means of an electronic communication device medium, including the Internet, may be deemed to have been committed where the electronic communication or communications were originally sent or first viewed by the recipient. This bill would incorporate the definition of “electronic communication” used in a specified provision of federal law. By expanding the scope of an existing crime, this bill would increase local prosecution and incarceration costs, and therefore would impose a state-mandated local program.

(5) This bill would provide that it shall only become operative if AB 2351 is also enacted and becomes operative on or before January 1, 1999.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 826 (AB 2351) Hertzberg. Computer crime.

(1) Existing law provides that a person who willfully, maliciously, and repeatedly follows or harasses another person and makes a credible threat with the intent to place that person in reasonable fear for his or her safety, or the safety of his or her immediate family, is guilty of the crime of stalking.

This bill would expand the definition of the term “credible threat” to include threats which are communicated through the use of an electronic communications device, including telephones, cellular phones, computers, video recorders, fax machines, and

paggers. This bill would also incorporate the definition of "electronic communication" used in a specified provision of federal law. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(2) Existing law prohibits the making of telephone calls to others with the intent to annoy, where the caller either uses obscene language or makes threats to the other party's person or property. Existing law also prohibits the repeated telephoning of another at the recipient's residence or, under certain circumstances, place of work, with the intent to annoy, except where the repeated telephoning is conducted in good faith. Existing law also provides that an offense under these provisions committed by use of a telephone may be deemed to have been committed at either the place of origin or receipt of the telephone call or calls.

This bill would expand these provisions to include contacts by means of an electronic communications device, including telephones, cellular phones, computers, video recorders, fax machines, and paggers. This bill would also create an exception to the offense of making obscene or threatening telephone calls or electronic contacts with the intent to annoy for telephone calls or electronic contacts made in good faith. This bill would provide that an offense committed by means of an electronic communication device medium, including the Internet, may be deemed to have been committed where the electronic communication or communications were originally sent or were first viewed by the recipient. This bill would incorporate the definition of "electronic communication" used in a specified provision of federal law. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(3) Existing law requires specified categories of law enforcement officers to meet training standards pursuant to courses of training certified by the Peace Officer Standards and Training (POST) program.

This bill would require every city police officer or deputy sheriff at a supervisory level to complete a high technology crimes and computer seizure training course certified by POST. The bill would require that this training be offered to all city police officers and deputy sheriffs as part of continuing professional training. By imposing additional duties on local agencies, it would impose a state-mandated local program.

(4) Existing law requires the Office of Criminal Justice Planning, among other things, to develop the comprehensive statewide plan for the improvement of criminal justice and delinquency prevention activity throughout the state, and to develop comprehensive, unified, and orderly procedures to ensure that all local plans and all state and local projects are in accord with the comprehensive state plan, and that all applications for grants are processed efficiently.

This bill would require the office to conduct a feasibility study with respect to a state-operated center on computer forensics for the purpose of collecting, compiling, and analyzing information, including evidence seized in connection with criminal proceedings, in computer formats to provide assistance to state and local law enforcement agencies in the investigation and prosecution of crimes involving computer technology, and to report its findings and conclusions to the Legislature on or before June 30, 2000. The bill would appropriate \$230,000 from the General Fund to the Office of Criminal Justice Planning for purposes of the performance of this study.

(5) This bill would provide that it shall only become operative if SB 1796 is also enacted and becomes operative on or before January 1, 1999.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 827 (SB 1624) Lewis. Industrial loan companies.

Existing law provides for the regulation of industrial loan companies by the Department of Financial Institutions.

This bill would revise provisions relating to the powers, duties, operations, and management of industrial loan companies. It would, among other things, authorize an industrial loan company, in certain circumstances, to acquire in a single transaction all of the outstanding shares of another depository corporation, to borrow funds from, among other sources, the Federal Deposit Insurance Corporation or a Federal Reserve Bank, and to issue credit cards and to acquire or hold obligations resulting from the use of credit cards.

Ch. 828 (SB 1637) Committee on Transportation. Transportation.

(1) The Passenger Charter-Party Carriers Act requires a charter-party carrier of passengers, as defined, to operate on a prearranged basis, as defined, at airports within this state.

This bill would amend the act to require charter-party carriers of passengers to operate on a prearranged basis, as defined, within this state, rather than at airports within this state. The bill would make other related changes.

(2) Existing law provides for the High-Speed Rail Authority in state government, prescribes the membership of the authority, and specifies that the authority shall be terminated on December 31, 2000, unless a financial plan for the implementation of a high-speed rail system has been approved by the Legislature by the enactment of a statute or by the voters, as specified.

This bill would change the above-specified termination date from December 31, 2000, to June 30, 2001, and make a related change.

The bill would specify certain components of the plan and would provide that the authorization and responsibility for planning, construction, and operation of high-speed passenger train services at speeds exceeding 100 miles per hour in this state is exclusively granted to the authority.

(3) The State Aeronautics Act defines the phrase "airport and aviation purposes" to include expenditures for certain activities of an airport land use commission. The act provides that funds in the Aeronautics Account in the State Transportation Fund, that are generally continuously appropriated for prescribed purposes, may be used to provide a portion of the local match for federal Airport Improvement Program grants, as prescribed, and declares that matching may only be provided for, among other things, grants that are for airport and aviation purposes at general aviation airports.

This bill would delete the requirement that matching be provided only for grants that are for airport and aviation purposes. By broadening the uses for which the funds in the account may be used, the bill would make an appropriation.

(4) Existing law authorizes the Department of Transportation to enter into contracts for the leasing or renting of tools or equipment for state highway purposes. The department is authorized, in cases of emergency work, to rent tools or equipment for not more than 20 days without competitive bidding.

This bill would authorize the department to rent tools for not more than 60 days without competitive bidding in cases of emergency work.

(5) Existing law describes various routes and includes certain portions of prescribed routes within the California freeway and expressway system.

This bill would revise that portion of Route 299 that is included within the California freeway and expressway system.

(6) Existing law authorizes specified law enforcement officers to obtain information from the Department of Motor Vehicles relating to convictions of specified provisions prohibiting reckless driving or driving under the influence of alcohol, drugs, or both alcohol and drugs.

This bill would delete certain obsolete references in that provision of existing law.

(7) Under existing law, certain records of the Department of Motor Vehicles concerning, among other things, the physical or mental condition of a person are confidential and are not open to public inspection.

This bill would exclude from that confidentiality provision a physician's certificate submitted to the department as part of an application for a disabled person's parking privilege.

(8) Existing law authorizes the Department of Motor Vehicles to stamp a receipt or validation upon the registration card last issued for a vehicle, in lieu of issuing a new registration card.

This bill would repeal that authorization.

(9) Existing law requires a dealer or lessor-retailer transferring ownership of a vehicle to enter on a form provided by the department and on the vehicle ownership certificate the actual mileage of the vehicle as indicated by the vehicle's odometer at the time of the transfer.

This bill would correct an obsolete reference to federal law in that provision of existing law.

(10) Existing law requires the Department of Motor Vehicles to study the feasibility of a voluntary common registration renewal date for multiple vehicles owned by a single owner and to make certain reports to the Legislature and authorizes the department to take certain action with respect thereto. These provisions required the department to submit a final report on or before July 1, 1984.

This bill would repeal those provisions.

(11) Existing law requires any applicant for a driver's license to submit to an examination appropriate to the type of motor vehicle or combination of vehicles for which the applicant desires a license to drive, and creates specified vehicle classifications. Existing law includes in class C, among other vehicles, any vehicle or combination of vehicles with a gross combination weight rating or a gross vehicle weight rating, as defined, of 26,000 pounds or less, if, among other conditions, the vehicle is operated by a farmer or an employee of a farmer.

This bill would also include in class C such a vehicle or combination of vehicles operated by an instructor credentialed in agriculture as part of an instructional program in agriculture at the high school, community college, or university level.

(12) Existing law authorizes the department to allow an employer to administer the driving test portion of a written and driving test for the operation of a commercial motor vehicle, as prescribed.

This bill would, instead, authorize the department to allow a third-party tester to administer the driving test portion and would make related changes.

(13) Existing law allows a governmental agency in cooperation with a law enforcement agency, to operate an automated enforcement system, as defined.

This bill would require a city council or county board of supervisors to conduct a public hearing prior to executing a contract for the use of those systems and would specify that the authorization does not allow the use of photo radar.

(14) Existing law requires a vehicle, if the load on, or an integral part of, the vehicle extends to the rear 4 feet or more beyond the bed or body of the vehicle, to display on the extreme end of the load or projecting part of the vehicle prescribed lights during darkness and, at all other times, a red flag or cloth not less than 16 inches square.

This bill would require that flag or cloth to be a solid red or fluorescent orange flag or cloth not less than 12 inches square.

(15) Existing law prohibits the operation on the highway of any vehicle or equipment that exceeds certain width limitations without a specified permit. Any vehicle or equipment that requires that permit for its operation is required to display a red flag or cloth not less than 16 inches square at the extreme left front or left rear of the vehicle or equipment, if the vehicle or equipment is being operated other than during darkness.

Existing law requires that all vehicles not otherwise required to be equipped with headlights, rear lights, or reflectors under certain provisions of the Vehicle Code to be equipped with a lamp with a red light visible from a distance of 500 feet to the rear of the vehicle. If the vehicle or the load thereon has a total outside width in excess of 100 inches, it is required to display a red flag or cloth not less than 16 inches square at the left outer extremity at all times other than during darkness.

This bill would require the specified vehicles to display a solid red or fluorescent orange flag or cloth not less than 12 inches square, instead of the specified red flag or cloth.

(16) Existing law authorizes the Department of Transportation or local authorities, as applicable, to issue a special permit authorizing the applicant to operate or move vehicles with specified loads.

This bill would repeal that provision.

(17) Existing law sets forth the Multistate Highway Transportation Agreement.

This bill would repeal provisions relating to that agreement.

(18) Existing law authorizes the magistrate or clerk of the court to give notice of a person's failure to appear to the department based on a violation of the Vehicle Code.

This bill would include a violation of a written notice to appear based on a violation recorded by an automated enforcement system.

(19) Under existing law, a written notice to appear for a violation of specified provisions of the Vehicle Code relating to train and traffic signals that is issued to the driver of a motor vehicle is required to contain specified information.

The bill would also require the notice to appear to contain, or be accompanied by, an affidavit of nonliability and information as to what constitutes nonliability, information as to the effect of executing the affidavit, and instructions for returning the affidavit to the issuing agency.

The bill would further require the issuing agency to cancel the notice to appear for a registered owner of a vehicle that is a car rental or leasing company, upon the timely return of the affidavit and other information by that registered owner, as prescribed, and would require the issuance of a notice to appear to be sent to the renter or lessee of that vehicle.

To the extent that the above-described requirements would increase the level of service required by local issuing agencies, the bill would impose a state-mandated local program.

(20) The bill would incorporate additional changes in Sections 12804.9 and 40509.5 of the Vehicle Code proposed by AB 2132, to be operative only if this bill and AB 2132 are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(21) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 829 (SB 1652) Kopp. Secretary of State: document filing.

(1) Existing law requires that various documents be filed with, or be maintained by, the Secretary of State.

This bill would delete the requirement that certain documents be filed or maintained by the Secretary of State and would require instead that these documents be filed with, or maintained by, a designated state agency, state officer, county clerk, county board of supervisors, or other local officer, as appropriate. To the extent that this bill would require local agencies to provide a higher level of service, this bill would impose a state-mandated local program.

(2) Existing law requires specified business establishments to maintain a bond issued by a surety company and to file a copy of the bond with the Secretary of State or, in the alternative, to deposit funds with the Secretary of State.

This bill would provide that the alternative of depositing funds in lieu of maintaining and filing a bond may not be utilized after January 1, 1999, and that persons who have deposited funds prior to that date may continue to utilize the alternative, but the deposit may not be renewed.

(3) Existing law requires the Secretary of State to develop and maintain a registry of distinguished women and minorities who are available to serve on corporate boards of directors. Existing law authorizes the Secretary of State to charge fees for purposes of the registry program and requires that these fees be deposited into the Secretary of State's Business Fees Fund.

This bill would authorize the Secretary of State to transfer information contained in the registry to a campus of the California State University or the University of California that is interested in maintaining the registry. This bill would require the Secretary of State to transfer funds deposited in the Secretary of State's Business Fees Fund to the university selected to maintain the registry, thereby constituting an appropriation.

(4) Existing law authorizes the Controller to designate and appoint, or terminate the appointment of deputy controllers and provides that the appointments and terminations are effective when filed by the Controller in the office of the Secretary of State.

This bill would provide that appointments and termination of appointments are effective when signed by the Controller.

(5) Existing law authorizes the Santa Paula Union High School Public Library District, by resolution of the Santa Paula Union High School District board of trustees, to be governed by a separate 5-member board of trustees who hold office for a term of 4 years. Existing law requires the first board of trustees to classify themselves by lot with regard to the expiration of their terms.

This bill would specify that persons elected to the board of trustees in 1997 shall hold office for a term of 5 years and would change the year that the term expires for each member of the first board of trustees.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 830 (SB 2044) Rainey. Private patrol operators.

Existing law, known as the Private Security Services Act, provides, among other things, for the licensure and regulation of private patrol operators by the Bureau of Security and Investigative Services, and requires employees of those licensees who perform the function of a security guard or security patrolperson to apply for registration with, and submit 2 classifiable fingerprint cards and the appropriate registration fee to, the bureau within 3 working days after they are first compensated, as specified. Existing law provides that an employee of a licensee may, subject to specified exceptions, be assigned to work with a temporary registration card, generally valid for no more than 120 days, until the bureau issues a registration card or denies the application for registration.

This bill would require that employees of licensees, upon accepting employment by a private patrol operator, submit a completed registration application and the fingerprint cards, along with the appropriate registration fee, to the bureau within 3 business days. It would authorize the bureau to permit applicants to submit their fingerprints into an electronic fingerprinting system administered by the Department of Justice. It would provide that a private patrol operator is not precluded from withholding the amount of the registration fee from an applicant's compensation if the operator pays that fee.

The bill would require an employee to display the registration card or temporary registration card, as specified. This bill would also require a private patrol operator to notify his or her clients in writing, that security guards possessing temporary registration cards have not completed a full criminal history investigation through the Department of Justice. The bill would require that the temporary registration card have printed on its face in bold letters, in a form determined by the Director of the Bureau of Security and Investigative Services, a disclosure statement that the holder of the card has not completed a full criminal history investigation and that his or her criminal history is unknown. This bill would state legislative findings and declarations.

Existing law makes it a crime to violate any of the provisions of the Private Security Services Act. By adding new requirements within that act with respect to the registration of security guards and security patrol persons, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 831 (SB 2194) C. Wright. Residential care facilities: home health care.

Existing law provides for the licensure and regulation of community care facilities, residential care facilities for persons with chronic, life-threatening illness, and residential care facilities for the elderly, administered by the State Department of Social Services.

Existing law also provides for the licensure and regulation of home health agencies.

Existing law authorizes the State Department of Social Services to prohibit a residential care facility for the elderly licensee from employing, or continuing the employment of, or allowing the engagement in other specified acts by, an employee or prospective employee who has committed or engaged in certain prohibited acts, including those persons providing assistance in dressing, grooming, bathing, or personal hygiene.

Existing law requires home health aides and nurse assistants to submit fingerprint cards to the State Department of Health Services in order to obtain criminal records clearances.

This bill would provide that any nurse assistant or home health aide meeting the criminal record clearance requirements for employment in facilities licensed by the State Department of Health Services would be deemed to meet these existing criminal record clearance requirements of community care facilities, residential care facilities for persons with chronic, life-threatening illness, and residential care facilities for the elderly.

Existing law authorizes a residential care facility for the elderly to provide incidental medical care through a home health agency, as defined, when certain conditions are met.

This bill would refer, instead, to providing incidental medical "services." The bill also would authorize an adult community care facility to permit incidental medical services to be provided through a home health agency in the manner prescribed by the bill.

Existing law, the Confidentiality of Medical Information Act, provides procedures governing the acquisition and use of an authorization for the disclosure of medical information by a health care provider.

This bill would permit the sharing of client or resident information between a home health agency and an adult community care facility or a residential care facility relative to the patient's condition and the care and treatment provided to the patient including medical information, as defined by the Confidentiality of Medical Information Act.

Since a violation of residential care for the elderly licensure provisions is a crime, the bill would, by creating a new crime, impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 832 (SB 2224) Alpert. State Teachers' Retirement System: benefits.

The State Teachers' Retirement Law requires specified member and employer contributions to be made monthly to the Teachers' Retirement Fund.

This bill would require any member who retired under specified adjusted retirement allowance options prior to January 1, 1991, whose beneficiary had died prior to a specified date, to receive the retirement allowance without modification for the option if certain conditions are met. This bill would also require the transfer of a one-time gain accrued from the difference between those contributions in the 1997-98 fiscal year minus the normal cost as displayed in the June 30, 1997, actuarial valuation, for the purposes of paying the cost of adjusting these retirement allowances, thereby appropriating the funds for that purpose.

Ch. 833 (AB 2816) Baugh. Minors: informants.

Existing law authorizes a finding of probable cause to make an arrest without a warrant or to grant an arrest warrant or a search warrant, based upon information provided by an informant under certain circumstances.

This bill would prohibit any peace officer or agent of a peace officer from using a person 12 years of age or younger as a minor informant, and from using a person under the age of 18 years as a minor informant, except as authorized pursuant to the Stop Tobacco Access to Kids Enforcement Act, unless the peace officer or agent of a peace officer has obtained an order from the court authorizing the minor's cooperation. The bill would require the court, prior to issuing such an order, and after specified conditions are satisfied, to make a finding that the agreement to act as a minor informant is voluntary and is being entered into knowingly and intelligently.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 834 (AB 2729) Alquist. Medi-Cal: managed care provider payment rates.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law authorizes the department to contract with various types of health care providers and entities in order to obtain Medi-Cal services through managed care arrangements. Existing law requires that various of those contracts are subject to the approval of the Department of Finance.

This bill would require that the department determine preliminary per capita payment rates for managed care plans and provide to them preliminary contract rates and source documents at least 60 days prior to the effective date of each new rate period.

The bill would require, on or before June 1, 1999, the department to enter into a memorandum of understanding with the managed care plans subject to these provisions regarding the development of capitation rates to ensure that capitation rates become effective in a timely manner and remain stable throughout the rate year. The bill would delete the requirement of approval by the Department of Finance of specified types of contracts.

Ch. 835 (SB 750) Rosenthal. Health care coverage.

Existing law provides for the licensure and regulation of health care service plans by the Department of Corporations, and provides that a willful violation of these provisions is subject to criminal sanction. Existing law requires every health care service plan that will affect the choice of physician, hospital, or other health care providers to clearly inform prospective enrollees of this restriction of choice, as prescribed.

This bill would require every health care service plan, medical group, independent practice association, or participating health care provider that uses or receives financial bonuses or any other incentives to provide a written summary to any person who requests it that includes a general description of the bonus or incentive arrangements used in its compensation agreements and how bonus or incentive arrangements may relate to a provider's use of referral services.

By imposing this requirement on health care service plans, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 836 (SB 955) Rosenthal. Health care coverage.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Commissioner of Corporations.

Existing law sets forth procedures under which the commissioner may suspend or revoke any license issued under the act or assess civil penalties.

This bill would authorize the commissioner to, by order, suspend or revoke a license or assess penalties under these provisions only after appropriate notice and opportunity

for hearing. The bill would authorize the assessment of administrative penalties rather than civil penalties.

Existing law sets forth the acts or omissions of a plan that constitute grounds for disciplinary action by the commissioner.

This bill would add to the acts that constitute grounds for disciplinary action by the commissioner.

Existing law provides for various sanctions, including the assessment of civil penalties, against a solicitor or solicitor firm engaging in presenting or advertising information regarding a plan for certain acts or omissions constituting grounds for disciplinary action.

This bill would authorize the assessment of administrative penalties rather than civil penalties and would revise the grounds for disciplinary action.

Existing law authorizes the commissioner to issue an order directing a plan, solicitor firm, or any representative thereof, or a solicitor to cease and desist from engaging in violations of the act.

This bill would expand the authority to issue a cease and desist order pursuant to this provision to apply to violations of any rule adopted under the act or any order issued by the commissioner and would authorize the commissioner to issue a cease and desist order directed to any other person engaging in these violations or violations of the act.

Existing law sets forth provisions that authorize the commissioner to institute a proceeding to obtain injunctive or other equitable relief in the case of any violation of the act.

This bill would, instead, specifically authorize the commissioner to bring an action in superior court to enjoin any act or practice constituting a violation of the act or to enforce any rule adopted or order issued pursuant to the act. The bill would further revise these provisions with regard to the conduct of the proceedings, the relief that may be claimed and granted, and the appointment of persons by the superior court to exercise the powers of a defendant in the action.

Existing law requires the superior court in the county in which the principal office of a health care service plan is located to issue an order vesting title to all of the assets of the plan in the commissioner when the commissioner files a verified application showing conditions for disciplinary action exist.

Existing law also authorizes the commissioner, without notice and before applying to the court for any order, to take possession of various assets and property of the plan if irreparable loss and injury to the property and business of the plan has occurred or may occur unless the commissioner acts immediately.

This bill would, in addition, authorize the commissioner, without notice and before applying to the court for any order, to take possession of various assets and property of the plan if irreparable loss and injury to the plan's enrollees has occurred or may occur unless the commissioner acts immediately. The bill would specify procedures under which a plan may enjoin the acts of the commissioner and procedures that authorize the commissioner to appoint a conservator over the plan if the commissioner is entitled to possession of the property, business, and assets of the plan under these provisions. The bill would require the commissioner to apply to the superior court for an order confirming the commissioner's appointment of the conservator.

Existing law provides that any person having possession of and refusing to deliver books, records, or assets of a plan against which a seizure order has been issued by the commissioner under the above provisions is guilty of a misdemeanor and punishable by, among other things, a fine not exceeding \$1,000.

This bill would increase the maximum fine from \$1,000 to \$10,000.

Ch. 837 (SB 956) Rosenthal. Insurance fraud.

(1) Existing law provides for the regulation of health care service plans by the Department of Corporations. A willful violation of these provisions by a health care service plan is a crime.

This bill would require every health care service plan to establish an antifraud plan, as specified, which would be required to be submitted to the department no later than July 1, 1999. It would also require the plan to make an annual report on its efforts to deter, detect, and investigate fraud, as specified, and to report cases of fraud to a law enforcement agency.

Because a willful violation of these provisions by a health care service plan would be a crime, this bill would impose a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 838 (SB 1702) Rosenthal. Health care service plans: arbitration.

Existing law sets forth provisions of law regulating the use of binding arbitration by a health care service plan to settle disputes.

This bill would require that, if a health care service plan uses arbitration to settle disputes with enrollees or subscribers, it shall require that an arbitration award be accompanied by a written decision to the parties that contains specified information. It would also require that copies of modified written decisions be provided to the department. The bill would provide that it shall not be construed to preclude the department, or any plan or person, from disclosing information contained in an arbitration decision if the disclosure is otherwise permitted by law.

Ch. 839 (SB 2020) Karnette. Health care coverage: prostate screening.

Under existing law, health care service plans are regulated by the Commissioner of Corporations and disability insurers are regulated by the Insurance Commissioner.

This bill would require every individual or group health care service plan contract, except a specialized health care service plan contract, and certain policies of disability insurance, issued, amended, or renewed on or after January 1, 1999, to be deemed to provide coverage for the screening and diagnosis of prostate cancer, including, but not limited to, prostate-specific antigen testing and digital rectal examinations, when medically necessary and consistent with good professional practice.

A willful violation of any of the provisions governing health care service plans is a crime. By creating this new requirement with respect to health care service plans, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 840 (AB 2102) Alby. School employees.

(1) Existing law requires every person, firm, association, partnership, or corporation offering or conducting private school instruction on the elementary or high school level to require each applicant for employment in a position requiring contact with minor pupils who does not possess a valid California state teaching credential, or is not currently licensed by another state agency that requires a criminal record summary, to submit 2 sets of fingerprints to the Department of Justice for the purpose of obtaining a criminal record summary from the Department of Justice and the Federal Bureau of Investigation.

This bill would extend this requirement to each applicant for employment in a position requiring contact with minor pupils, who does not possess a valid services credential issued by the Commission on Teacher Credentialing. The bill would make those provisions inapplicable to a secondary school pupil working at the school he or she attends. The bill would require the Department of Justice to review the criminal record summary it obtains from the Federal Bureau of Investigation to ascertain whether the applicant has a conviction, or arrest pending final adjudication, for a sex offense, controlled substance offense, crime of violence, or serious or violent felony and to notify the private school employer only as to whether the applicant has any convictions, or arrests pending final adjudication, for those crimes. The bill would require a private school employer to request subsequent arrest service from the Department of Justice.

(2) Existing law requires a county or city and county board of education to obtain a criminal record summary about an applicant before issuing the applicant a temporary certificate or temporary certificate of clearance and prohibits those entities from issuing either certificate if the applicant has been convicted of a violent or serious felony.

This bill would authorize a county or city and county board of education to issue those temporary certificates without obtaining a criminal record summary for current employees in certain circumstances.

(3) Existing law prohibits school districts, as defined also to include county offices of education and the state special schools, from employing any individual in a certificated position who has been convicted of a violent or serious felony, as defined. Existing law applies this prohibition also to charter schools. Existing law requires the Department of Justice, when the department ascertains an individual who is an applicant for employment by a school district and has been convicted of a violent or serious felony, to notify the school district of that information for purposes of implementing the prohibition against hiring certificated employees who have been convicted of those crimes. Existing law authorizes the Department of Justice, at the request of a school district, to forward an applicant's fingerprints to the Federal Bureau of Investigation.

This bill would exempt a person from the employment prohibition if the person's conviction is reversed and the person is acquitted of the offense in a new trial or the charges are dismissed. The bill would provide that a plea of *nolo contendere* to a serious or violent felony constitutes a conviction. The bill would require the Department of Justice, for purposes of a school district's implementation of a prohibition against hiring certificated employees who have been convicted of certain sex offenses and controlled substance offenses, to also notify a school district of criminal information pertaining to an applicant who has been convicted of those offenses. The bill would delete the Department of Justice's authority to forward to the Federal Bureau of Investigation the fingerprints of an applicant for employment in a certificated position. The bill would require a school district to request subsequent arrest service from the Department of Justice, thereby imposing a state-mandated local program.

(4) Existing law exempts a person from the prohibition against hiring certificated employees who have been convicted of certain sex offenses and controlled substance offenses if the conviction is reversed and the person is acquitted of the offense in a new trial or the charges against the person are dismissed.

This bill would provide that the above exemption does not apply to a person who has been convicted of a sex offense if the charges were dismissed pursuant to specified provisions and the victim of the sex offense was a minor.

(5) Existing law requires the governing board of a school district to require each person to be employed in a position not requiring certification to transmit fingerprint cards to the Department of Justice and requires the department to ascertain whether the applicant or employee has been arrested or convicted of a crime and to furnish that information to the school board. Existing law authorizes the Department of Justice, at the request of a school district, to forward to the Federal Bureau of Investigation the fingerprints of an applicant for employment in a position not requiring certification qualifications. Under existing law, the governing board of a school district is prohibited from employing a person in a position not requiring certification until the Department of Justice performs the required background check.

This bill would make the prohibition against a governing board employing a person in a position not requiring certification until the Department of Justice performs a background check inapplicable when a school district determines that an emergency or exceptional situation exists and that a delay would endanger pupil health or safety. The bill would require a school district to request the Department of Justice to forward to the Federal Bureau of Investigation the fingerprints of an applicant in the case of certain applicants and to request subsequent arrest service from the Department of Justice, thereby imposing a state-mandated local program.

(6) This bill would authorize a county superintendent or school district, in situations involving multiple school districts, to agree among themselves to designate a single district or the county superintendent to act on behalf of the participating districts within the county to submit fingerprints to the Department of Justice, receive and review

criminal history information, and maintain common lists of persons eligible for employment.

(7) Existing law requires, except as provided, that the employees of any entity that has a contract with a school district, as defined, to provide janitorial, administrative, landscape, transportation, food-related, or similar services who may have any contact with pupils to submit or have submitted their fingerprints in a manner authorized by the Department of Justice.

This bill would, instead, make those provisions applicable to any entity that has a contract with a school district, or a person, firm, association, partnership, or corporation offering or conducting private school instruction on the elementary or high school level or a charter school, to provide school and classroom janitorial, schoolsite administrative, schoolsite grounds and landscape maintenance, pupil transportation, or schoolsite food-related services. The bill would require an entity providing services related to the construction of school facilities to ensure the safety of pupils by certain means and would exempt an entity providing these services from the fingerprinting requirements, if these means are utilized.

(8) This bill would also make various changes to the procedures required when submitting, processing, and receiving fingerprint information under the law affected by the bill, including provisions concerning related fees and confidentiality of the records.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(10) This bill would incorporate changes in Section 44237 of the Education Code proposed by AB 1392, to be operative only if AB 1392 and this bill are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(11) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 841 (AB 2506) Battin. Law enforcement: criminal records and correctional officers.

Existing law declares the Legislature's intent that the recording, reporting, storage, analysis, and dissemination of criminal offender record information in this state be made more uniform and efficient, and better controlled and coordinated.

This bill would require the Attorney General to appoint an advisory committee, with a specified membership, to the California-Criminal Index and Identification (Cal-CII) system, to assist in the ongoing management of the system regarding the operating policies, criminal records content, and records retention. The committee would serve at the pleasure of the Attorney General and would be required to meet twice annually. By increasing the duties of local officials required to serve on the advisory committee, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 842 (SB 1700) Hayden. Crime prevention: the California Gang, Crime, and Violence Prevention Partnership Program: tattoo removal program.

(1) Existing law requires the Department of Justice to administer the California Gang, Crime, and Violence Prevention Partnership Program, pursuant to which the department is required to disburse any appropriated funds to community organizations and nonprofit agencies for prevention and intervention activities for at-risk youth.

This bill would specify that all state and local juvenile detention facilities, including, but not limited to, facilities, juvenile halls, youth ranches, and youth camps of the Department of the Youth Authority, shall be considered eligible to receive services through the community-based organizations or agencies operating programs under the California Gang, Crime, and Violence Prevention Partnership Program, and would exempt providers of programs in these facilities from specified requirements.

(2) Existing law provides funding for the California Gang, Crime, and Violence Prevention Partnership Program, and specifies that up to 2% of the appropriated amounts shall be transferred each year for expenditure for the Department of Justice to administer and evaluate the program, and up to 3% of the appropriated amounts shall be transferred each year for expenditure for the department to provide technical assistance to community-based organizations and nonprofit agencies providing services under this program.

This bill would specify that the appropriated amounts transferred each year for expenditure for the department under the above provision would instead be 2% and 3%, respectively, rather than up to 2% and 3%.

(3) The existing Youth Authority Act provides for the detention and confinement of youthful offenders by the Department of the Youth Authority and requires the department to purchase 2 medical devices that utilize a laser to remove a tattoo from a person's skin and to place one in Los Angeles County and one within any of specified San Francisco Bay area counties, selected as specified in consultation with the Office of Criminal Justice Planning (OCJP) and the Peace Process Task Force.

This bill would delete the requirement that the selection of sites for the laser devices be made in consultation with the Office of Criminal Justice Planning and the Peace Process Task Force, and instead be made through a competitive bidding process. The bill would also provide criteria for the selection of community groups by OCJP and appropriate \$480,000 from the General Fund to be allocated as specified for the purchase or lease of 4 tattoo devices and maintenance agreements, for the department to contract with health care providers, and to the department for the administrative costs of the tattoo removal program.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 843 (SB 1827) Monteith. Prisoners: medical testing.

Under existing law, if there is probable cause to believe that an inmate has committed a battery upon the person of any officer or employee of the state prison by gassing, as defined, the chief medical officer of the state prison may, when he or she deems it medically necessary to protect the health of an officer or employee who may have been subject to a battery by gassing, order the inmate to receive an examination or test for hepatitis and tuberculosis immediately after the event, and periodically thereafter as determined to be necessary by the medical officer. The results of any examination or test are required to be provided to the officer or employee who was the target of the aggravated battery.

This bill would instead provide that the chief medical officer of the state prison may order the inmate to receive an examination or test for hepatitis or tuberculosis or both hepatitis and tuberculosis. The bill also would require that any person performing tests, transmitting test results, or disclosing information pursuant to this section be immune from civil liability.

Existing law authorizes medical testing of prisoners for acquired immune deficiency syndrome (AIDS) and human immunodeficiency virus (HIV), according to specified procedures and conditions. Existing law also requires reporting and notification by any custodial or law enforcement personnel who has reason to believe he or she has come into contact with an inmate in a manner that could result in infection from these diseases. These provisions are operative until July 1, 1999, and as of January 1, 2000, are repealed.

This bill would instead provide that these provisions are operative until January 1, 2005, and as of that date are repealed, thereby authorizing the continuation of the above testing, reporting, and notification provisions until January 1, 2005. By continuing to impose increased duties on local officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 844 (AB 1339) Knox. Teachers: Education Technology Staff Development Program.

Existing law authorizes the governing board of any school district to establish a staff development project to improve teachers' instructional skills, as specified. Existing law also authorizes school districts to develop school development plans that include staff development activities directly related to the annual school improvement objectives and, among other things, to assist personnel to improve instructional practices in each subject and strengthen knowledge of subject matter.

Existing law establishes various programs for the introduction of education technology into the classroom, including, among other programs, the Morgan-Farr-Quackenbush Educational Technology Act of 1992, which has as its primary mission ensuring that the procurement and use of technology is clearly guided by the needs of pupils, and the Education Technology Grant Program of 1996.

This bill would require the Superintendent of Public Instruction to allocate to school districts funds appropriated for the purposes of funding the Education Technology Staff Development Program in an equal amount per pupil based upon enrollment in grades 4 to 8, inclusive, in eligible schools. The bill would require the State Department of Education to monitor the program to ensure that an equitable share of the funding serves low-income disadvantaged pupils.

The bill would require a school district to make certain certifications to the State Department of Education as a condition to each applicant school being eligible to receive the funding, including that the funds will be spent by the eligible schools for the purpose of providing in-service training to their schoolsite administrators, appropriate instructional classified employees, and certificated employees who provide direct instructional services to pupils in grades 4 to 8, inclusive, in the use of education technology to support the daily instruction of pupils and the recordkeeping necessary to support that instruction.

The bill would reappropriate certain funds from a specified item of the Budget Act of 1998 to the Superintendent of Public Instruction for allocation to school districts to fund the Education Technology Staff Development Program, thereby making an appropriation.

Ch. 845 (AB 1763) Mazzoni. Statewide achievement test.

Existing law requires school districts, charter schools, and county offices of education to administer to each of its pupils in grades 2 to 11, inclusive, a statewide achievement test.

Existing law requires the test publisher whose achievement test is adopted for statewide use to provide aggregate scores to teachers, administrators, governing boards of school districts, county boards of education, and the State Department of Education in certain forms and formats and to provide disaggregated scores, based on limited-English-proficient status.

This bill would also require the publisher to provide disaggregated scores based on non-limited-English-proficient status, as defined, pupil gender, and based on whether pupils are economically disadvantaged or not. These disaggregated scores would be required to be provided in the same form and formats as aggregate scores provided to teachers, administrators, governing boards of school districts, county boards of education, and the State Department of Education.

The bill would incorporate additional changes in Section 60643 of the Education Code, proposed by both this bill and Senate Bill No. 1564, to be operative only if SB 1564 and

this bill are both chaptered and become effective on or before January 1, 1999, and this bill is chaptered last.

Ch. 846 (SB 1468) Rosenthal. School revenue limits: reporting: average daily attendance.

(1) Under existing law, each county superintendent of schools is required, as a condition of apportionment, to report certain information regarding excused absences to the Superintendent of Public Instruction by September 1, 1997.

This bill would extend the deadline for each county superintendent of schools to report this information to May 1, 1998, and September 1, 1998.

(2) Existing law authorizes each member of a governing board of a school district who actually attends all meetings to receive prescribed compensation, determined on the basis of the average daily attendance of the school district for the prior school year, for his or her services.

This bill would provide that the determination of the average daily attendance for purposes of this provision shall be increased by a school district's percentage of excused absences for the 1996-97 fiscal year.

(3) Existing law, which will become operative on July 1, 1998, changes the funding basis for school districts and county offices of education from actual attendance plus excused absences to actual attendance, without altering the funding amount received by school districts and county offices of education. Existing law bases this adjustment in funding on attendance levels and revenue limits in the 1996-97 fiscal year.

This bill would revise the provisions that establish the 1996-97 fiscal year as a base year, establish formulas whereby funding amounts received by school districts and county offices of education would be reduced to factors, and provide for the calculation of funding based on the formulas.

(4) Existing law requires a county superintendent of schools to make specified computations for each elementary and secondary school district that has fewer than 2,501 units of average daily attendance in the 1990-91 fiscal year.

This bill would impose a state-mandated local program by requiring a county superintendent of schools to make prescribed computations for the 1998-99 fiscal year relating to excused absences under this provision.

(5) Existing law provides for the establishment of community day schools, and provides for funds to be apportioned, as prescribed, for the operation of these schools.

This bill would provide for a prescribed one-time adjustment to be made for the 1998-99 fiscal year in the calculation of the apportionment for community day schools.

(6) This bill would impose a state-mandated local program by requiring each school district to include in its annual notification to parents and guardians that no pupil shall have his or her grade reduced or lose academic credit for any absence when missed assignments and tests are satisfactorily completed within a reasonable period of time along with the full text of the applicable law.

(7) Existing law requires the Superintendent of Public Instruction to make prescribed computations for the calculation of apportionments for the purposes of special education programs.

This bill would require the Superintendent of Public Instruction to exclude units of average daily attendance for absences excused pursuant to a prescribed provision from these computations.

(8) Existing law, known as the California State Lottery Act of 1984, establishes a state lottery for the purpose of providing additional moneys to benefit public education. As an initiative measure, the California State Lottery Act of 1984 requires that none of its provisions may be changed except to further its purposes by a $\frac{2}{3}$ vote of each house of the Legislature.

This bill would adjust the apportionment of moneys under the California State Lottery Act of 1984 by adjusting the computations made to calculate that apportionment to compensate for excused absences. The bill would declare that this provision furthers the purposes of the California State Lottery Act of 1984.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates

Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(10) This bill would incorporate additional changes in Sections 56836.08 and 56836.15 of the Education Code, proposed by SB 1564, to be operative only if SB 1564 and this bill are both chaptered and become operative effective on or before January 1, 1999, and this bill is chaptered last.

(11) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 847 (AB 1845) Honda. Community day schools.

(1) Existing law authorizes the governing board of a school district to establish one or more community day schools and requires that a community day school not be situated on the same site as an elementary, middle, junior high, comprehensive senior high, opportunity, or continuation school, except as specified.

This bill would impose a state-mandated local program by requiring each school district operating a community day school to annually report the direct instructional costs and documented support costs of its community day schools to the Superintendent of Public Instruction, who would be required to make prescribed calculations, relating to apportionments for those school districts, with the amounts thereby reported.

(2) Existing law requires that the minimum schoolday for pupils enrolled in community day schools is 360 minutes of classroom instruction provided by a certificated employee of the school district.

This bill would specify that the 360 minutes of classroom instruction be provided by a certificated employee of the school district reporting the attendance of the pupils for apportionment funding. The bill would also require a community day school's academic programs to be comparable to those available to other pupils of a similar age in the school district.

(3) Existing law requires the Superintendent of Public Instruction to apportion to each school district that operates a community day school \$1,500 per year, for each unit of average daily attendance reported for pupil attendance at community day schools. Existing law requires the Superintendent of Public Instruction to apportion to each school district that operates a community day school an amount equal to \$1.40 multiplied by the total number of hours each schoolday, up to a maximum of 2 hours, that each community day school pupil remains under the supervision of a school district employee after 6 hours.

This bill would change those apportionments to \$4,000 and \$4, respectively. The bill would also require the Superintendent of Public Instruction to apportion to each county office of education that operates a community day school \$3,000 per year, for each unit of average daily attendance reported for pupil attendance at community day schools.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) This bill would incorporate amendments to a prescribed provision made by both this bill and SB 1468. These amendments would become operative if both bills are enacted and become effective on or before January 1, 1999, each bill amends Section 48664 of the Education Code, and this bill is enacted after SB 1468, in which case a prescribed provision of this bill would not become operative.

Ch. 848 (AB 2696) Cardoza. School facilities: portable classrooms.

Existing law, the State Relocatable Classroom Law of 1979, authorizes a school district or county superintendent of schools to purchase any portable classroom that is leased from the State Allocation Board by a school district or county superintendent of schools

on July 1, 1991, for an amount equal to the purchase price paid by the board, including certain purchase costs, less the amount of any rent already paid to the board by the district or county superintendent of schools for that classroom.

This bill would apply these provisions to portable classroom leases on or prior to December 1, 1991, rather than on July 1, 1991.

Ch. 849 (SB 1466) Polanco. Public construction: school districts.

Existing law prohibits, with respect to competitively bid public agency building or construction contracts, certain practices relating to insurance surety requirements, but exempts certain agencies and projects from those prohibitions. Existing law permits a public agency to utilize owner-controlled or wrap-up insurance programs if specified conditions are met.

This bill would exempt a school district from this prohibition for a construction or renovation project and would authorize the district to use owner-controlled or wrap-up insurance if the district determines that the prospective bidders meet minimum occupational safety and health qualifications and the use of this insurance will maximize the expenditure of public funds in conjunction with the exercise of appropriate risk management.

Ch. 850 (AB 1450) Shelley. Civil rights: vandalism.

Existing law makes it a misdemeanor to knowingly deface, damage, or destroy the real or personal property of any other person for the purpose of intimidating or interfering with the free exercise or enjoyment of any right or privilege secured to the other person by law, because of the other person's race, color, religion, ancestry, national origin, disability, gender, or sexual orientation, or because he or she perceives that the other person has one or more of those characteristics.

This bill would make this offense punishable as a misdemeanor or a felony. By increasing the penalty for an existing crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 851 (AB 1897) Alquist. Vandalism.

(1) Existing law provides that every person who maliciously defaces with graffiti or other inscribed material, damages, or destroys any real or personal property not his or her own is guilty of vandalism. Existing law also authorizes the court to order, upon the conviction of a person for any of these offenses, or as a condition of probation, the person, and his or her parents or guardians if the defendant is a minor, to keep the damaged property or another property free of graffiti for a specified period of time.

This bill additionally would provide until January 1, 2002, that a city, county, or city and county may enact an ordinance that authorizes the court to order, upon the conviction of a person pursuant to these provisions for certain specified acts of vandalism, the defendant to pay all or part of the costs not to exceed \$250 incurred by a law enforcement agency in identifying and apprehending the defendant, provided that the court determines that the defendant has the ability to pay any law enforcement costs not exceeding \$250. The bill would provide that these costs are in addition to any punishment imposed by the court and require the law enforcement agency that incurs these costs to provide evidence of, and bear the burden of establishing, the reasonable costs that it incurred in apprehending and identifying the defendant. The bill also would provide that any costs recovered by a law enforcement agency pursuant to this provision are in addition to any other costs that may be recovered and does not affect any other right, remedy, or action otherwise available to the law enforcement agency.

The bill would also provide that no amount paid by a defendant in satisfaction of a criminal matter shall be applied in satisfaction of the law enforcement costs that may be imposed pursuant to these provisions until all outstanding base fines, state and local penalty assessments, restitution orders, and restitution fines have been paid.

(2) This bill would incorporate additional changes in Section 594 of the Penal Code proposed by AB 1386 and SB 1229, which are identical in these 2 bills, to be operative if this bill and either one of the other bills are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

Ch. 852 (SB 1229) Schiff. Vandalism.

(1) Under existing law, vandalism is defined to include any act that defaces personal or real property with graffiti or other inscribed material. Whether the act is punishable as a felony or a misdemeanor depends upon the monetary amount of the defacement. If the amount of defacement, damage, or destruction is less than \$400, vandalism is punishable by imprisonment in a county jail for not more than 6 months, or by a fine of not more than \$1,000 or by both.

This bill would increase the penalty if the amount of defacement, damage, or destruction is less than \$400 and the defendant has been previously convicted of vandalism or affixing inscribed material, as specified. In that case the crime of vandalism would be punishable by imprisonment in a county jail for not more than one year, or by a fine of not more than \$5,000, or by both. By increasing the penalty for an existing crime, this bill would impose a state-mandated local program.

Existing law authorizes the court to impose community service, as specified, as a condition of probation upon a person who has been previously convicted of vandalism or other similar specified offense or offenses on 2 separate occasions, having been incarcerated for at least one of those convictions, who is subsequently convicted of vandalism. The order to perform community service may not exceed 300 hours over a specified period of time.

This bill would delete the above requirement of a prior conviction and incarceration, and authorize the court to impose community service under the above provision as a condition of probation upon a person who has been convicted of vandalism or other specified offense. This bill would also make conforming changes.

(2) This bill would incorporate additional changes in Section 594 of the Penal Code proposed by AB 1386, which is identical to this bill, and AB 1897, to be operative if this bill and AB 1897 are enacted and become effective on or before January 1, 1998, and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 853 (AB 1386) Goldsmith. Punishment: vandalism.

(1) Under existing law, vandalism is defined to include any act that defaces personal or real property with graffiti or other inscribed material. Whether the act is punishable as a felony or a misdemeanor depends upon the monetary amount of the defacement. If the amount of defacement, damage, or destruction is less than \$400, vandalism is punishable by imprisonment in a county jail for not more than 6 months, or by a fine of not more than \$1,000 or by both.

This bill would increase the penalty if the amount of defacement, damage, or destruction is less than \$400 and the defendant has been previously convicted of vandalism or affixing inscribed material, as specified. In that case the crime of vandalism would be punishable by imprisonment in a county jail for not more than one year, or by a fine of not more than \$5,000, or by both. By increasing the penalty for an existing crime, this bill would impose a state-mandated local program.

(2) Existing law authorizes the court to impose community service, as specified, as a condition of probation, upon a person who has been previously convicted of vandalism or other similar specified offense or offenses on 2 separate occasions, having been incarcerated for at least one of those convictions, who is subsequently convicted of vandalism. The order to perform community service may not exceed 300 hours over a specified period of time.

This bill would delete the above requirement of a prior conviction and incarceration, and authorize the court to impose community service under the above provision as a

condition of probation, upon a person who has been convicted of vandalism or other specified offense. This bill would also make conforming changes.

(3) This bill would incorporate additional changes in Section 594 of the Penal Code proposed by AB 1897, to become operative if AB 1897 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 854 (AB 960) R. Wright. Support orders.

Existing law provides that, when a court enters a support order, it shall include an earnings assignment order directing the obligor's employer to pay the obligee a portion of the obligor's earnings, as specified, and provides that the employer is liable to the obligee for support the employer willfully fails to withhold or forward to the obligee.

This bill would provide that the obligor shall not be held in contempt or subject to criminal prosecution for nonpayment of support that is withheld by the employer but not received by the obligee, require the district attorney to take action to collect the withheld sums from the employer, and specify that the employer who willfully fails to withhold or forward support is also liable for interest thereon.

Existing law allows the court to make an order modifying or terminating an order for child, family, or spousal support retroactive to the date of filing of the motion or order to show cause.

This bill would require the court, when making an order modifying or terminating a support order due to the unemployment of either party, to make the order retroactive to the later of the date of service of the motion or order to show cause or the date of unemployment, unless good cause for nonretroactivity is found and stated on the record. The bill would also provide that, notwithstanding the retroactivity of the order, the support obligor shall not be entitled to repayment of any excess sums paid pursuant to the prior order.

Existing law authorizes, and in specified circumstances requires, the district attorney to enforce support orders.

This bill would require that any notice from the district attorney requesting a meeting with a support obligor shall advise the support obligor of his or her right to have an attorney present at the meeting.

Because this bill would impose new duties on district attorneys, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 855 (AB 1755) Keeley. Solar and wind turbine energy systems: net energy metering.

(1) Existing law requires every electric utility in the state, including a privately owned or publicly owned public utility, municipally owned utility, and electrical cooperative that offers residential service, whether or not the entity is subject to the jurisdiction of the Public Utilities Commission, to develop a standard contract or tariff providing for net energy metering to be available to eligible customer-generators, in accordance with specified restrictions. Existing law defines "net energy metering" to mean using a single, nondemand, non-time-differentiated meter to measure the difference between the electricity supplied by a utility and the electricity generated by an eligible customer-generator. Existing law defines "eligible customer-generator" to mean a residential customer of an electric utility, including specified entities, who owns and

operates a solar electrical generating facility with a capacity of not more than 10 kilowatts that is located on the customer's premises, operates in parallel with the utility's transmission and distribution facilities, and is intended primarily to offset part or all of the customer's own electrical requirements.

This bill would require every electric service provider, as defined, to develop a standard contract and make the contract available to customer-generators, as prescribed. The bill would modify the definitions of net energy metering and eligible customer-generator, and would define ratemaking authority, as specified. The bill would require net energy metering to be accomplished, as specified.

(2) Former statutory property tax law, enacted pursuant to the authority granted to the Legislature pursuant to paragraph (1) of subdivision (c) of Section 2 of Article XIII A of the California Constitution, generally provided that the term "newly constructed" as used in the California Constitution does not include the construction or addition of any active solar energy system, as defined. The former statutory provisions specified related matters pertaining to active solar energy systems subject to the exclusion. The former provisions applied only to the lien dates for fiscal years 1981-82 to 1993-94, inclusive, and were repealed as of January 1, 1995.

This bill would, until January 1, 2006, reinstate those exclusion provisions for an active solar energy system, as defined, to apply to property tax lien dates for the 1999-2000 to 2004-05 fiscal years, inclusive. The bill would, as part of a statement of legislative intent, define the term "parts" with respect to the definition of the term "active solar energy system". By requiring local taxing authorities to perform duties with regard to the reenactment of the active solar energy system exclusion, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 856 (AB 1950) Torlakson. Liability: construction defects: insurance defense.

Existing law provides that if parties to pending litigation stipulate for settlement of the case, or part thereof, as specified, the court may enter judgment pursuant to the settlement and, if requested, may retain jurisdiction over the parties to enforce the settlement until its full performance.

This bill would authorize the court to also enter this judgment pursuant to the settlement of a pending construction defect action, as defined, if, where a party's contribution is paid on its behalf pursuant to a policy for insurance, the parties stipulate through their respective counsel.

Existing law makes it a misdemeanor for any person to attempt or purport to exercise the powers, rights, and privileges of a corporation that has been suspended.

This bill would exempt from this provision any insurer or counsel retained by an insurer on behalf of the suspended corporation who provides a defense for the suspended corporation in a civil action based upon a claim for personal injury, property damage, or economic losses and prosecutes subrogation, contribution, or indemnity rights in the name of the suspended corporation.

Ch. 857 (AB 2084) Miller. Public works contracts.

(1) Existing law requires a contractor in a public works contract to file a payment bond with the public entity in specified amounts depending on the value of the contract.

This bill would revise the amounts of the bond.

(2) Existing law governs the distribution of retention proceeds in a public works contract and requires an original contractor to pay subcontractors from whom a retention has been withheld within 10 days of receipt from the public agency of retention proceeds.

This bill would reduce that period to 7 days.

(3) Existing law sets forth the requirements respecting disbursement of retention proceeds withheld from any payment by a public entity to the original contractor for a

work of improvement, or withheld from any payment by the original contractor to a subcontractor.

This bill would additionally specify that, with respect to a contract for the construction of any public work of improvement entered into on or after January 1, 1999, in a contract between the original contractor and a subcontractor, and in a contract between a subcontractor and any subcontractor thereunder, the percentage of the retention proceeds withheld may not exceed the percentage specified in the contract between the public entity and the original contractor, except as specified. It would also prohibit any party from requiring any other party to waive any of these provisions.

(4) The State Contract Act requires that the director of the respective state agency approve project plans, specifications, and estimates of cost.

This bill would delete that requirement.

(5) The act provides for arbitration of claims arising under project contracts.

This bill would shorten the time in which a claimant may initiate arbitration.

(6) The bill would make other changes with regard to the substitution of securities for any moneys withheld by a public agency to ensure performance under a contract, and would also require a contractor who elects to receive interest on moneys withheld in retention by a public agency to offer that option to subcontractors.

The bill would provide that its provisions shall apply only with respect to contracts entered into on or after January 1, 1999.

Ch. 858 (AB 2169) Kuehl. Human services.

(1) Under existing law, the State Office of Vital Records and the State Registrar have a variety of responsibilities relating to the establishment of voluntary paternity.

This bill would replace references to the State Office of Vital Records and the State Registrar, with references to the State Department of Social Services, in connection with the above responsibilities, and would make additional revisions to these provisions.

(2) Existing law exempts a district attorney from a requirement to pay fees in any action or proceeding brought for the establishment of a child support obligation or the enforcement of a child or spousal support obligation, except that a district attorney may reimburse a county for those direct costs related to those actions or proceedings that have been agreed to pursuant to a plan of cooperation.

This bill would delete this exception.

(3) Existing unemployment insurance law requires each employer, effective July 1, 1998, to file with the Employment Development Department specified information on new employees.

This bill would include a labor union hiring hall as an employer for purposes of this provision.

(4) The bill would also revise provisions relating to the collection of certain performance-based data regarding child support, the release of information under a protective order regarding the whereabouts of parties involved in child and spousal support enforcement programs, the time period for notification to the recipient of the establishment or modification of a support order, and would make other clarifying and technical changes.

(5) Existing law provides procedures for the collection and distribution of child support owed or paid to custodial parents. Existing law requires the Judicial Council to develop forms to implement designated procedures related to judgments for paternity or child support orders, and to make those forms available no later than July 1, 1998.

This bill would, instead, require that the forms be developed so as not to delay implementation, and be available no later than 30 days prior to implementation, of the Statewide Child Support Registry.

(6) Existing law requires the development of an implementation plan for a Statewide Child Support Registry that includes the storage and data retrieval of various data elements for all California child support orders. Existing law requires the State Department of Social Services to contract with the Judicial Council to prepare and adopt, by January 31, 1998, a child support order and data form and an order of child support arrears form.

This bill would repeal these provisions and require, instead, that the Judicial Council develop, in the manner prescribed by the bill, any forms that may be necessary to

implement the Statewide Child Support Registry. The bill would make related changes. The bill would also require that the information transmitted from the clerks of the court to the Statewide Child Support Registry include any information required by federal law and any other information the department and the Judicial Council find appropriate thereby imposing a state-mandated local program by increasing the duties of court clerks.

(7) This bill would incorporate additional changes in Section 11478.1 of the Welfare and Institutions Code, proposed by AB 2773, to be operative only if AB 2773 and this bill are both chaptered and become effective January 1, 1999, and this bill is chaptered last. It would also incorporate additional changes in Section 11478.2 of the Welfare and Institutions Code, proposed by AB 1961, to be operative only if AB 1961 and this bill are both chaptered and become effective January 1, 1999, and this bill is chaptered last.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 859 (AB 2494) Aguiar. Developmentally disabled persons: developmental centers: client appeals.

Existing law requires every service agency, including regional centers and developmental centers, providing services to persons with developmental disabilities to have an agency fair hearing procedure for resolving conflicts between the service agency and recipients of, and applicants for, service.

Existing law provides for a state fair hearing procedure process for persons with developmental disabilities appealing service agency actions. Existing law requires the responsible state agency director, upon the receipt of a request for a fair hearing, to immediately provide notification concerning certain matters to the parties and certain other persons.

This bill would, in addition, require this notification to include the procedural rights and responsibilities governing these state agency fair hearings.

The bill also revises the procedures governing these fair hearings.

The bill would also require regional centers and developmental centers to submit specified data to the State Department of Developmental Services concerning each appeal filed against it, with the department to make this information available to the public upon request.

This bill would incorporate changes to Section 4712 of the Welfare and Institutions Code made by SB 1038, which would become operative only if both this bill and SB 1038 are chaptered and this bill is chaptered last.

Ch. 860 (SB 1173) Vasconcellos. Liability: disclosure of Year 2000 information.

Existing law provides that an obligation arises either from a contract or from the operation of law. An obligation arising from operation of law may be enforced in the manner provided by law or by a civil action. Existing law provides governmental entities with limited immunity from liability for injuries, however, that immunity does not extend to liability based on contract or to obtain relief other than money damages.

This bill would provide immunity from liability for tort damages to any person or entity, including governmental entities, for injury resulting from the gratuitous disclosure of information relating to the Year 2000 Problem, as defined, affecting computer systems and programs, as specified. The bill would not, however, limit liability for those persons or entities that provide Year 2000 solutions for profit, as specified; nor would it affect any other remedy available at law.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 861 (SB 1923) O'Connell. California State University, Channel Islands Site Development Act of 1998.

(1) Existing law requires the Department of General Services to transfer specified land and improvements comprising Camarillo State Hospital, in the County of Ventura, to the Trustees of the California State University upon their approval, and declares the intent of the Legislature that the site be developed and improved as a campus of the California State University.

This bill would enact the California State University, Channel Islands Site Authority Act, pursuant to which the California State University, Channel Islands Site Authority would be created to facilitate and provide for the financing and support of the transition of the site for use as a campus of the California State University. It would provide for the appointment of a board composed of representatives of the Trustees of the California State University and of the County of Ventura, and would set forth the authority and duties of the board and the authority in developing the site. It would establish the California State University, Channel Islands Site Authority Fund in the State Treasury, and continuously appropriate the moneys in the fund to the authority for purposes of development of the site, according to specified criteria.

(2) The Community Redevelopment Law generally sets forth the authority and duties of redevelopment agencies in the state.

This bill would provide that the California State University, Channel Islands Site Authority shall have various powers and duties under the Community Redevelopment Law in respect to the use of specified tax revenues, and would create the Low and Moderate Income Housing Fund in the State Treasury for that purpose, but would otherwise exempt the authority from the provisions of that law except as provided.

(3) By requiring the County of Ventura to perform specified activities in connection with the establishment and administration of the authority, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would become operative only if the Trustees of the California State University accept the site as provided by existing law.

Ch. 862 (SB 1676) Kopp. Weights and measures: county sealers: parking meters.

Existing law imposes various requirements on county sealers relating to the calibration, testing, weighing, and certification of accuracy of noncommercial weights and measures and weighing and measuring devices, instruments, tools, and accessories connected therewith.

This bill would authorize a county sealer to test and certify the accuracy of all parking meters located in the county in which the sealer has jurisdiction, including, but not limited to, parking meters owned or operated by a city, county, or a city and county.

The bill would require the county sealer, if he or she determines that a specific parking meter is inaccurate, to notify the owner or operator of the parking meter. The bill would authorize the county sealer, if the owner or operator of the parking meter fails to replace or repair the meter within 30 days from the date of notification of the meter's inaccuracy, to close the meter and permit any person to park a vehicle free of charge in the parking space to which the inaccurate meter corresponds, until such time that the owner or operator replaces or repairs the inaccurate parking meter. By imposing new duties on local governments with respect to determining the accuracy of parking meters within the local governments' jurisdiction, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 863 (AB 1629) Miller. Advertising: telephonic sellers: electronic mail.

(1) Existing law provides for the regulation of telephonic sellers, as defined. It exempts from the definition of telephonic sellers certain specified persons.

This bill would add to those persons exempt from the definition of telephonic sellers certain nonprofit corporations that have been exempt from taxation under a specified provision of the Revenue and Taxation Code for a minimum of 10 years, that have maintained their principal purpose for a minimum of 10 years, and that have been incorporated in the state for a minimum of 25 years.

(2) Existing law prohibits a person conducting business in this state from faxing unsolicited advertising material, unless certain conditions are satisfied.

This bill would also prohibit a registered user of an electronic mail service provider, as defined, from using or causing to be used the provider's equipment located in this state in violation of the provider's policy prohibiting or restricting the use of its equipment for the initiation of unsolicited electronic mail advertisements. It would also prohibit any individual, corporation, or other entity from using or causing to be used, by initiating an unsolicited electronic mail advertisement, an electronic mail service provider's equipment located in this state in violation of the provider's policy prohibiting or restricting the use of its equipment to deliver unsolicited electronic mail advertisements to its registered users. It would authorize any electronic mail service provider whose policy is violated as provided in these provisions to bring, in addition to any other action available under law, a civil action to recover damages, as specified, and would authorize the court to award reasonable attorney's fees to a prevailing party in that action.

(3) Existing law makes it a crime to knowingly and without permission tamper with, interfere with, damage, or gain unlawful access to certain computers, computer systems, and computer data.

This bill would, in addition, make it a crime to knowingly and without permission use the Internet domain name, as defined, of another individual, corporation, or entity in connection with the sending of one or more electronic mail messages, and thereby damage or cause damage to a computer, computer system, or computer network. By creating a new crime, this bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 864 (AB 1665) Torlakson. Education: parental involvement.

(1) Existing law requires each school that establishes a school development plan and that receives funds for that purpose, or that chooses to use certain provisions of law, to have a single plan to strengthen subject matter and instruction, as specified. As a part of the plan, schools may provide time for professional development activities, for a total of not more than 8 days per year.

Existing law requires the plan to include professional development programs for personnel employed at the school and requires the professional development programs to include certain elements.

This bill would require the plan to describe opportunities for parents and guardians of pupils to participate in professional development programs.

(2) Existing law requires the governing board of each school district, at the beginning of the first semester or quarter of the regular school term, to notify parents or guardians of specified rights or responsibilities of the parents or guardians.

This bill would provide that parents or guardians of pupils enrolled in public schools have specified rights and should have specified opportunities with regard to the education of their children.

This bill would also provide that the parents and guardians of pupils have the responsibility to work together in a mutually supportive and respectful partnership with schools, and would require the governing board of a school district to adopt a policy developed jointly with parents and guardians that outlines that working relationship. The policy would be required to include certain elements.

(3) Existing law places various responsibilities on the State Department of Education and the State Board of Education, including, among other duties, the development and distribution of various guidelines pertaining to school programs.

This bill would, upon approval by the State Board of Education, require the State Department of Education to make materials that describe a comprehensive partnership at schools that involves parents and guardians of pupils in the public schools of California on or before December 31, 1999. The materials would be required to include the responsibilities of each parent or guardian, and of each teacher, principal, and other school personnel in fostering and participating in parent involvement activities and programs. The materials would be required to include a statement that parent participation in activities and programs shall only apply to the extent that the participation does not conflict with a valid restraining order, protective order, or order for custody or visitation issued by a court of competent jurisdiction.

(4) Existing law provides that, if a school district and school participate in school-based program coordination, any schoolsite advisory committee may elect to designate the schoolsite council to function as that advisory committee for all purposes.

This bill would require that, if the governing board of a school district adopts a policy establishing a schoolwide decisionmaking body at each school to promote continuous improvement through a single planning process that coordinates federal and state programs and services, then that body may be designated as the single decisionmaking or coordinating body, if the composition of the body meets specified requirements.

(5) This bill, by placing new duties on school districts relating to parental involvement in the education process, would thereby impose a state-mandated local program.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 865 (AB 1676) Bowen. Advertising: electronic mail.

Existing law prohibits a person conducting business in this state from faxing unsolicited advertising material, unless certain conditions are satisfied.

This bill would expand that prohibition to include the transmission of unsolicited advertising by electronic mail (e-mail), and would make several related changes.

This bill would become inoperative if federal law on this subject is enacted.

Existing law provides for the regulation of advertising and provides that a violation of those provisions is a crime. This bill, by creating additional prohibitions with regard to advertising, would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 866 (AB 1784) Baca. Alcohol and drug treatment for adolescents.

Existing law imposes various functions and duties on the State Department of Alcohol and Drug Programs with respect to the administration of programs for the treatment of substance abuse.

This bill would enact the Adolescent Alcohol and Drug Treatment and Recovery Program Act of 1998, which would require the department, in collaboration with counties and providers of alcohol and drug services, to establish community-based nonresidential and residential recovery programs to intervene and treat the problems of alcohol and drugs among youth, to establish criteria for participation, programmatic requirements, and terms and conditions for funding, and to report to the Legislature during budget hearings regarding the status of the implementation of these provisions.

This bill would further specify that funding for these provisions has been made to the department by the Budget Act of 1998.

Ch. 867 (SB 694) Polanco. Hepatitis C.

Existing law contains various provisions relating to communicable disease prevention and control programs, including those conducted by the State Department of Health Services.

This bill would make various legislative findings with respect to hepatitis C and would declare the intent of the Legislature to study the adequacy of the health care delivery system as it pertains to hepatitis C.

This bill would require the State Department of Health Services to make available protocols and guidelines developed by the National Institutes of Health and California legislative advisory committees on hepatitis C for educating physicians and health professionals and training community service providers, as specified. The bill would provide that nothing in the bill shall be construed to require the department to develop or produce any protocol, guideline, or proposal.

Ch. 868 (SB 1681) Karnette. Palos Verdes Peninsula Unified School District.

Existing law requires each person subject to compulsory full-time education to attend the school in which the residency of either the parent or legal guardian is located, subject to specified exceptions.

This bill would, commencing with the 1999–2000 school year, make the area of Eastview in Los Angeles County, which is currently part of the Los Angeles Unified School District, an optional attendance area by authorizing parents and legal guardians who reside in that area to make an election for each pupil when the pupil enters elementary school and middle school as to whether that pupil will attend schools in the Palos Verdes Peninsula Unified School District or the Los Angeles Unified School District. The bill would make a declaration of special circumstances in that regard. The new duties imposed on the affected school districts by this bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 869 (AB 2297) Vincent. Gambling.

(1) Existing law sets forth the dangers of gambling and declares that the public policy of this state disfavors gambling and prohibits gambling as specified. Existing law also declares that no person in this state has a right to operate a gambling enterprise except as expressly permitted by law, and that gambling activities that are not expressly prohibited or regulated by state law may be prohibited or regulated by local government. Existing law further declares that no new cardroom may be opened in a city, county, or city and county in which a cardroom was not operating on and before January 1, 1984, except upon the approval of the electors of that city or county, or city and county.

This bill would further declare that the State of California has permitted the operation of gambling establishments for more than 100 years, that those establishments currently employ more than 20,000 people in this state, contribute more than \$100,000,000 in taxes and fees to California's government, and that gambling establishments are lawful enterprises entitled to full protection of the laws. The bill would also change the above provision prohibiting the opening of a new cardroom as specified, to apply instead to a gambling establishment.

(2) Existing law authorizes a publicly traded racing association or a qualified racing association to operate only one gaming club, and requires that the gaming club be located on the same premises as the entity's racetrack.

This bill would make the above provision applicable to a gaming establishment rather than a gaming club.

(3) Under existing law, if the Division of Gambling Control denies a license to an individual owner of any security issued by a corporation that applies for or holds an owner license, the owner of the security is required to offer the security to the issuing corporation which is required to purchase the security for an amount not greater than fair market value, within 30 calendar days after the date of the offer.

This bill would add the requirement that the security offered be purchased for book value in cash as provided for in the corporation's articles of incorporation or bylaws, or the fair market value, whichever is less, within that period of time. Additionally, the bill would require that, if the fair market value, or book value as provided for in the articles of incorporation or bylaws exceeds \$1,000,000, the division may allow a period of time not to exceed 90 days for the purchase.

(4) Existing law provides that the Division of Gambling Control, or upon the satisfaction of stated conditions its successor the Gambling Control Commission, shall consider denying a gambling license based on several specified grounds, including the applicant's failure to conduct an economic feasibility study.

This bill would provide that all papers, studies, projections, pro formas, and other materials filed with the division or commission pursuant to an economic feasibility study are public records and shall be disclosed to all interested parties.

(5) Existing law provides that neither the governing body nor the electors of a county, city, or city and county that had not authorized legal gaming within that jurisdiction prior to January 1, 1996, shall authorize legal gaming in that jurisdiction, and that no ordinance in effect on that date shall be amended to expand gaming in that jurisdiction. Existing law provides that these restrictions are repealed on January 1, 2001.

This bill would extend the operation of these restrictions until January 1, 2003, with respect to Alameda, Contra Costa, Los Angeles, San Mateo, and Santa Clara Counties and would provide for their repeal on that date.

Ch. 870 (AB 2283) Committee on Agriculture. Pest control.

(1) Existing law authorizes the Secretary of Food and Agriculture or the Director of Pesticide Regulation to allocate annually to each county an amount not to exceed $\frac{1}{3}$ of the amount expended by the county during the previous fiscal year for programs of joint responsibility under the jurisdiction of the secretary or the director.

This bill would require that the development of work plans for allocation of the funding appropriated in a specified item of the Budget Act of 1998 be the responsibility of the Department of Food and Agriculture. The bill would require the department to establish criteria for the development of the work plans and for allocating the funds, as specified. The bill would require \$5,000,000 of the amount appropriated in a specified item of the Budget Act of 1998 to be utilized solely for high-risk pest exclusion activities. The bill would require the work plans to be developed by the department with the county agricultural commissioners and in consultation with affected industry representatives. The imposition of this requirement upon the commissioners would constitute a state-mandated local program. The bill would prohibit funds allocated for high-risk pest exclusion pursuant to the bill from being expended for any purpose other than the exclusion of high-risk pests, as prescribed. The bill would prohibit funds allocated by each county from being reallocated to other specified programs until the county work plan is approved by the department consistent with the funding approved in the Budget Act of 1998 for this purpose. The bill also would require each county, in order to remain eligible for funding under the bill, to maintain support of ongoing operational costs of specified county agricultural commissioner programs at 1997-98 levels.

(2) Existing law provides for the appointment of a county agricultural commissioner in each county who, among other things, is responsible for the enforcement of pest control laws and regulations within that county.

This bill would authorize the commissioner, upon determining that it is necessary to more effectively or more efficiently carry out a pest control program, as specified, to enter into a mutual aid agreement with other counties for the purpose of sharing staff, equipment, expertise, information, and other resources necessary to meet the needs of the program.

(3) Existing law requires each county agricultural commissioner to make an annual report to the Secretary of Food and Agriculture on the condition of agriculture in his or her county and on what is being done to eradicate, control, or manage pests, and actions relating to the exclusion of pests or quarantine against pests.

This bill would authorize, rather than require, each county agricultural commissioner to prepare the annual report and would require each county agricultural commissioner to submit, on a form approved by the secretary, a monthly report to the secretary concerning the commissioner's activities in specified joint programs. This requirement would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made from funds appropriated in a specified item of the Budget Act of 1998.

(5) The changes proposed by this bill would be repealed July 1, 1999.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 871 (AB 2572) Firestone. Youth Authority facilities: major capital outlay projects: ward labor.

Existing law permits the director of the Department of the Youth Authority to require wards to provide labor to construct, renovate, or maintain facilities of the Youth Authority, so long as, among other things, the cost of the project does not exceed \$200,000.

This bill would increase the project cost limit in this provision to the amount specified in a designated provision of the Public Contract Code.

Ch. 872 (AB 2771) Committee on Consumer Protection, Governmental Efficiency and Economic Development. Accountancy: education: examination: claims against the state.

Existing law provides that an applicant for admission to the examination for a certified public accountant certificate shall comply with certain educational and experience requirements.

This bill would authorize the applicant, as a part of complying with the educational requirement, to possess a degree or degrees from an educational institution located outside of the United States that is equivalent to a baccalaureate degree from an accredited institution in the United States. It would require the Board of Accountancy to adopt regulations specifying the criteria and procedures for approval of credential evaluation services, as specified.

Existing law requires the board to grant a one-year credit toward fulfillment of a public accounting experience requirement to a graduate of a college who has completed a 4-year course with 30 or more semester hours in the study of specific subjects, of which 20 semester hours are in the study of accounting.

This bill would revise the experience requirement by increasing the requirement relating to education to 45 or more semester units in the study of specific subjects, of which 20 semester units are in the study of accounting.

Existing law provides that a Canadian Chartered Accountant in good standing shall be deemed to have met certain examination requirements, as specified.

This bill would additionally set forth, with respect to any foreign applicant, certain requirements by which a certified public accountant may be deemed by the board to have met the examination requirements.

Existing law, with respect to claims against the state, authorizes the State Board of Control to permit a state agency to settle and pay certain claims, but prohibits the State Board of Control from authorizing an employee to allow, compromise, or settle a claim.

This bill would delete that prohibition.

Ch. 873 (AB 2774) Committee on Human Services. Community care facilities: transitional housing placement programs.

Existing law, the California Community Care Facilities Act, provides for the licensure and regulation of community care facilities by the State Department of Social Services.

Existing law requires the department to license community care facilities participating in transitional housing placement programs in 3 counties to provide supervised apartment living services for certain 17 and 18 year old persons who are in out-of-home placement under the supervision of the county department of social services or the county probation department and who are participating in an independent living program.

This bill would extend the department's implementation of transitional housing placement programs for community care facilities to every county. The bill would require the department to adopt regulations to govern transitional housing placement facilities, require a transitional housing placement program to be certified by the county department of social services or county probation department, and define "transitional housing placement facility" for purposes of the California Community Care Facilities Act.

Existing law also requires the department to implement programs for licensed private, nonprofit, or county operated facilities to provide transitional housing placement program services to certain 17 and 18 year old persons who are in out-of-home placement under the supervision of the county department of social services or the county probation department.

This bill would revise these provisions to, instead, require the department to adopt regulations to govern county transitional housing placement programs that provide transitional housing services, in any county, to certain 17 and 18 year old persons who are in out-of-home placement under the supervision of the county department of social services or the county probation department. The bill would require a transitional housing placement program to be certified by the county department of social services or county probation department.

The bill would define "transitional housing placement program" for purposes of provisions governing AFDC-FC.

Existing law requires the department to develop a ratesetting system for licensed community care facilities participating in these programs. These provisions are repealed as of January 1, 2000.

This bill would delete the repeal of these provisions, thereby extending the operation of these provisions indefinitely.

Ch. 874 (SB 1559) Johnston. Job training.

Existing law establishes the State Job Training Coordinating Council to promote integration of employment and training programs. Among other things, the council is responsible for developing an education and job training report card program to assess the accomplishments of California's work force preparation system. The system is required to measure the performance of various programs, including state and federally funded education and training programs.

This bill would require the system to measure the performance of basic vocational rehabilitation services.

Existing law requires job training and education providers to request social security numbers from each participant, and requires local educational agencies to issue a privacy notice to all participants.

This bill would require, to the extent permitted by federal law, a request of a social security number for participants 18 years of age and over who are not enrolled in high school.

The bill would revise the privacy notice.

Existing law provides for the provision of employment and postemployment services for recipients of aid under the CalWORKS program.

This bill would make a technical change to provisions relating to the provision of ancillary services provided under the postemployment services.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 875 (SB 2145) Maddy. Depositions.

Existing law prescribes the procedure for conducting depositions in civil actions. Existing law requires the parties to serve notice of a deposition. The deposition notice must state, among other things, any intention to record the testimony by stenographic method.

Existing law also specifies the duties of a deposition officer. During the deposition, the deposition officer must suspend the taking of testimony on demand of any party, or the deponent, to enable that party or deponent to move for a protective order, as specified. In addition, the deposition officer must certify that the transcript or recording of the deposition is a true record not only of the testimony given, but also of any changes made by the deponent.

This bill would require the deposition notice to state any intention to record the deposition by stenographic method through the instant visual display of the testimony. The bill would revise the provision requiring the deposition officer to suspend the taking of testimony on demand of any party, or the deponent. The bill would instead prohibit the deposition officer from suspending the taking of testimony without stipulation of the party conducting the deposition and the deponent unless any party attending the deposition or the deponent demands that the taking of testimony be suspended in order to move for a protective order, as specified. In addition, the bill would delete the requirement that the deposition officer certify that the transcript or recording of the deposition is a true record of any changes made by the deponent.

Ch. 876 (SB 1649) Committee on Local Government. Local Government Omnibus Act of 1998.

(1) Existing law permits the use of a master official bond or other bond to provide coverage on more than one officer, employee, or agent of a state agency, a local public agency, or a county, and provides that the bond inures to the benefit of the state agency, the local public agency, or the county.

This bill would provide that if the master bond provides coverage on a public guardian or public administrator, the master bond shall be for the joint benefit of the guardianship or administratorship estates and the county.

(2) Existing law authorizes local governmental agencies to utilize private sector investment capital to design, construct, maintain, rebuild, repair, or operate fee-producing infrastructure facilities.

This bill would state that “fee-producing infrastructure project” or “fee-producing infrastructure facility” means that the operation of the infrastructure project or facility will be paid for by the persons or entities benefited by or utilizing the project or facility.

(3) Existing law requires that a report of an audit of a joint powers agency be filed with the county auditor of each county in which a contracting party is located.

This bill would require the report to be filed with the county auditor of the county where the home office of the agency is located and sent to any other agency or person that submits a written request to the agency, thereby imposing a state-mandated local program by imposing new duties on local agencies.

(4) Existing law authorizes the Director of General Services, with the consent of the State Department of Mental Health, under terms and conditions that are subject to approval of the State Public Works Board, to enter into a long-term lease with Napa County for designated property within the boundaries of Napa State Hospital for purposes of a community care facility pilot program.

This bill instead would authorize that lease for establishment of an independent living facility for persons who are mentally ill, who are handicapped, or who have low income, and would delete the provision for approval by the board.

(5) Existing law relating to state reimbursement of local agencies and school districts for costs incurred in carrying out state-mandated programs provides that no bill, except a bill containing an urgency clause, that mandates a new program or higher level of service requiring reimbursement of local agencies or school districts pursuant to the California Constitution shall become operative until July 1 following the date on which the bill takes effect unless the bill specifically makes the requirement inapplicable or contains an appropriation for the reimbursement or a prescribed reimbursement specification.

This bill would repeal that provision.

(6) Existing law requires each county officer authorized to receive fees to record the fees at once and in detail, total the fees on the first day of each month, and on the expiration of the officer's term, to deliver the record to the county auditor.

This bill instead would require each officer to keep a monthly record of those fees in accordance with the Controller's guidelines.

(7) Existing law relating to the government of counties authorizes the Boards of Supervisors of Butte, Los Angeles, Merced, Orange, Riverside, San Bernardino, Santa Clara, and Ventura Counties to contract with private enterprise to provide services that require special experience, education, and training that the county possesses, and to charge a fee for those services.

This bill would extend this authority to the Board of Supervisors of Kings County.

(8) Under existing law, a county board of supervisors may lease county-owned property by alternative bidding procedures that require that the board of supervisors either accept the highest proposal submitted in response to a posted and published call for bids or reject all bids. Existing law permits the board of supervisors, by resolution, to authorize appropriate county officers to execute these leases.

This bill would make these procedures applicable to the granting of licenses for the use of county property and would require the officer authorized to execute the licenses to provide notice in a specified manner prior to executing the license.

(9) Existing law, in a county that has adopted the procedure by resolution, makes it the responsibility of the county auditor to review the format of the tabulation constituting the proposed budget for compatibility with designated laws and, if compatible, to concur with its use.

This bill instead would make it the responsibility of the official designated by the board of supervisors to format that tabulation pursuant to the requirements of those designated laws, when the resolution has been adopted.

(10) Existing law defines various terms for purposes of certain constitutional and statutory provisions relating to increases in taxes, fees, and charges, including the term "vector control."

This bill would revise that definition.

(11) Existing law concerning the conduct of open meetings of legislative bodies of local agencies requires that the agenda for a meeting specify the reasons for a closed session. With respect to a closed session that is a conference with real property negotiators or labor negotiators, the agenda is required to provide specified information.

This bill would provide that if circumstances necessitate the absence of a specified negotiator, an agent or designee may participate in the closed session instead if the name of the agent or designee is announced at an open session prior to the closed session.

This bill would incorporate the additional changes in Section 54954.5 of the Government Code enacted by SB 139 (Ch. 260, Stats. 1998).

(12) Existing law authorizes a community services district to exercise specified powers within its jurisdiction.

This bill would authorize the Bear Valley Community Services District to provide for the abatement, control, and removal of weeds.

(13) Existing law provides for the Antelope Valley Air Pollution Control District. Existing law also provides for a county air pollution control district in every county that is not included in its entirety in certain specified districts, and provides that if only a part of a county is included in one of those districts, there is a county district for that part of the county not included.

With respect to the Antelope Valley Air Pollution Control District, this bill would provide that unless an entire county is included in that district there is a county air pollution control district in that county, and if the entire county is not included in that district, there is a county district in that part of the county not included in the Antelope Valley district.

(14) Existing law prescribes the membership of the board of election of a river port district. Existing law requires the auditor of a river port district to hold office during the pleasure of the board of election at a salary fixed by the board of election and to file a bond for the faithful performance of his or her duties.

This bill would repeal these provisions.

(15) Existing law provides that a river port district is governed by a 5-member port commission, appointed as specified, and defines the term "board" as the port commission.

This bill would provide that a person shall not be ineligible for appointment to the board because he or she is an elected official of an appointing authority to the board. This bill would specify that the appointment of a person to the office of the board shall not be deemed incompatible with being an elected official of an appointing authority to the board.

(16) Existing law authorizes state agencies to enter into and make payment on contracts by way of electronic transmission.

This bill would extend this authority to counties and a city and county.

(17) Existing law sets forth the bidding procedures pursuant to which the San Bernardino County Flood Control District may contract for any improvement or unit of work. Under these provisions, the board of supervisors may authorize the flood control engineer to execute contractual changes up to \$25,000, as specified.

This bill would permit the board of supervisors acting as the board of that district to authorize the flood control engineer or other county officer to order changes or additions up to \$150,000 in work being performed under a construction contract, as specified.

(18) Existing law limits real property exchanges by park and open-space districts to 10 acres annually.

This bill would authorize the East Bay Regional Park District to exchange up to 40 acres annually for property adjacent to other district-owned property.

(19) Existing law requires the State Lands Commission to deposit in the General Fund all revenue, money, and remittances received by the commission, except as to revenue from school lands and other specified sources.

This bill would require that this money deposited in the General Fund be used for specified purposes, including refunds, commission expenses, and payments to cities and counties.

(20) Existing law authorizes eligible counties to participate in the State-County Property Tax Administration Program.

This bill would authorize counties having a new assessor elected in 1998 to participate in that program.

(21) Existing law establishes procedures for the vacation of public streets, highways, and service easements.

This bill would revise certain of those procedures with respect to the initiation and notice of hearing requirements.

(22) Existing law permits local authorities, with respect to highways under their jurisdictions, to adopt rules and regulations by ordinance or resolution on designated matters. These matters include the temporary closing of a portion of any street when, in the opinion of local authorities having jurisdiction, the closing is necessary for the safety and protection of the persons who are to use that portion of the street during that time.

This bill would also permit a local authority to temporarily close a portion of any street when so necessary in the opinion of a public officer or employee that the local authority designates by resolution.

(23) Existing law designates the boundaries of Reclamation District No. 800.

This bill would revise those boundaries and would thus impose additional duties on the district, thereby imposing a state-mandated local program.

(24) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 877 (AB 2132) Committee on Transportation. Transportation.

(1) The State Aeronautics Act governs the creation and operation of airports in this state. The act defines the term "clear zones" by reference to regulations of the Federal Aviation Administration. The act defines "intercounty airport" to mean any airport bisected by a county line through its runways, runway protection zones, inner safety

zones, inner turning zones, outer safety zones, or sideline safety zones, as defined by an existing airport land use commission in a specified comprehensive land use plan. The act defines "airport and aviation purposes" to include the original installation or erection of specified airport and aviation equipment and facilities.

This bill would change references to "clear zones" to "airport protection zones," defined by reference to a specified advisory circular of the Federal Aviation Administration. The bill would, for the purpose of defining "intercounty airport," modify the definition of runways and those specified zones to mean runways and zones as defined in the Department of Transportation's Airport Land Use Plan handbook. The bill would modify the definition of "airport and aviation purposes" to include any installation of specified equipment or facilities.

(2) Existing law requires that there be close coordination between local transit providers and county welfare departments in order to ensure that transportation moneys available for purposes of assisting recipients of aid under specified provisions of law are expended efficiently for the benefit of that population.

This bill would require local transit providers to give priority in the use of those funds to the enhancement of public transportation services for welfare-to-work purposes, as specified.

(3) Existing law requires a transportation planning agency to ensure the establishment and implementation of a citizen participation process, including provisions for at least one public hearing.

This bill would require those hearings to be scheduled to ensure broad community participation and, if possible, the location of the hearings would be required to be rotated, as specified. The bill would require the transportation planning agencies to consider other methods of obtaining public feedback on public transportation needs.

(4) Existing law, except as specified, requires all moneys deposited to the credit of the Motor Vehicle Fuel Account attributable to the distribution of motor vehicle fuel for use or used in propelling an aircraft in the state, to be transferred to the Aeronautics Account in the State Transportation Fund, for allocation as prescribed.

This bill would make certain clarifying changes in that provision.

(5) Existing law designates and describes state highway routes.

This bill would make changes in the descriptions of certain state highway routes and would delete certain descriptions.

(6) Existing law authorizes the California Transportation Commission to relinquish to a city or county any portion of a state highway within the city or county that the Legislature has deleted from the state highway system.

This bill would authorize the portion of Route 19 that is between Del Amo Boulevard in the City of Long Beach and Route 1 in that city to be relinquished to that city, as specified. The bill would authorize the commission, upon terms and conditions approved by it, to relinquish a portion of State Highway Route 107 to the City of Lawndale in which the highway is located and which has agreed to accept it. That relinquishment would take effect on the date immediately following the commission's approval of the terms and conditions.

(7) Existing law establishes the Bicycle Lane Account in the State Transportation Fund and continuously appropriates the money in the account to the Department of Transportation for expenditure by the department and for transfer to the counties and cities for specified purposes relating to bicycle transportation.

This bill would rename the account the Bicycle Transportation Account.

(8) Existing law establishes the Department of Motor Vehicles in the Business, Transportation and Housing Agency, and prescribes the duties and responsibilities of the department.

This bill would delete certain obsolete provisions relating to the department. The bill would make technical changes in other provisions of existing law regarding vehicles.

(9) Existing law authorizes the establishment of a service authority for freeway emergencies in any county where the county board of supervisors and the majority of the city councils adopt resolutions providing for the establishment of the authority. The Sacramento Area Council of Governments is authorized to function as the service authority in the Counties of Sacramento, Yolo, Yuba, Sutter, and San Joaquin upon the adoption of the specified resolutions by the counties and cities.

This bill would, additionally, authorize the council to act as the service authority for any county that is not already a member of the council, if the resolution is adopted by that county and the cities within that county. The bill would make conforming changes in existing law.

(10) Existing law prescribes a state-local partnership program for funding highway and exclusive public mass transit guideway improvement projects. Under that law, construction contracts for a project on the eligibility list are required to be let by June 30 of the fiscal year for which funds for the state's share of funding for the project are appropriated, except in certain limited cases.

This bill would extend that deadline for Santa Barbara County and the City of Santa Maria to June 30, 1999, rather than June 30, 1998.

(11) Existing law authorizes the Department of Motor Vehicles to refuse to issue or to suspend or revoke an occupational license when enumerated findings and determinations are made.

This bill would add to these enumerations instances where an applicant was previously the holder of an occupation license issued by another state, authorizing the same or similar activities of a license issued under this state, and that license was revoked or suspended for cause and was never reissued, or was suspended for cause, and the terms of suspension have not been fulfilled. The bill would also revise the provisions regarding the suspension, expiration, or cancellation of a vehicle verifier's permit and a registration service license.

(12) Existing law requires every bicycle operated upon a highway during darkness to be equipped with a lamp emitting a white light that illuminates the highway from a distance of 300 feet.

This bill would authorize a bicycle or motorized bicycle used by a peace officer, as defined, in the performance of the peace officer's duties, to display a steady or flashing blue warning light that is visible from the front, sides, or rear of the bicycle or motorized bicycle. The bill would prohibit any person from using a flashing blue warning light on a bicycle or motorized bicycle except under those authorized circumstances. Because a violation of this prohibition would be an infraction under other provisions of existing law, the bill would impose a state-mandated local program by creating a new crime.

(13) Existing law authorizes the Department of Motor Vehicles to waive the driving part of a motor vehicle driver's license examination if the applicant holds a valid license issued by another state, territory, possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico.

This bill would delete the word "valid" and would require the department to verify through an acknowledged national driver record data source, a specified matter before the waiver may occur.

(14) Existing law requires the suspension of a person's driving privilege when the Department of Motor Vehicles is notified by a bank or financial institution that a check has been dishonored.

This bill would require a specified notice to be restored to a person's driving record if a personal check is offered in payment of fines and is returned for any reason.

(15) Existing law prohibits any person from, among other things, stopping, parking, or leaving a vehicle on a sidewalk, except electric carts when authorized by a local ordinance, as specified. Any person who violates this provision is subject to a civil penalty.

This bill would also prohibit a person from stopping, parking, or leaving a vehicle extending over a sidewalk, except electric carts when authorized by a local ordinance, as specified. Thus, because the bill would increase the enforcement responsibilities of local entities, it would impose a state-mandated local program.

(16) Existing law prohibits any person from operating a motor vehicle, as defined, unless that person and all passengers 16 years of age or over are properly restrained by a safety belt, except as specified.

This bill would exempt from that prohibition a driver engaged in the collection of solid waste or recyclable materials if the driver is restrained by a safety belt prior to commencing and subsequent to completing the collection route.

(17) Existing law requires every motor carrier of property to provide and to maintain specified, increased protection against liability.

This bill would specify that the operation of a for-hire tow truck who is in compliance with this provision may perform emergency moves at the direction of a peace officer irrespective of the load carried aboard the vehicle being moved.

(18) Under existing law, if a person, for a period of 15 days or more, has failed to appeal in the court designated in a written promise to appear, the court clerk is authorized to give notice of that fact to the Department of Motor Vehicles.

This bill would delete that time period and would make conforming changes to that deletion.

(19) (a) This bill would incorporate additional changes in Section 163 of the Streets and Highways Code proposed by AB 2035, to become operative only if both bills are enacted and become operative on or before January 1, 1999, and this bill is enacted last.

(b) This bill would incorporate additional changes in Section 253.1 of the Streets and Highways Code proposed by AB 2388, to become operative only if both bills are enacted and become operative on or before January 1, 1999, and this bill is enacted last.

(c) This bill would incorporate additional changes in Section 12804.9 of the Vehicle Code proposed by SB 1637, to become operative only if both bills are enacted and become operative on or before January 1, 1999, and this bill is enacted last.

(d) This bill would incorporate additional changes in Section 13370 of the Vehicle Code proposed by AB 2102, to become operative only if both bills are enacted and become operative on or before January 1, 1999, and this bill is enacted last.

(e) This bill would incorporate additional changes in Section 21101 of the Vehicle Code proposed by SB 1649, to become operative only if both bills are enacted and become operative on or before January 1, 1999, and this bill is enacted last.

(f) This bill would incorporate additional changes in Section 27315 of the Vehicle Code proposed by AB 2062, to become operative only if both bills are enacted and become operative on or before January 1, 1999, and this bill is enacted last.

(g) This bill would incorporate additional changes in Section 34631.5 of the Vehicle Code proposed by AB 2372, to become operative only if both bills are enacted and become operative on or before January 1, 1999, and this bill is enacted last.

(h) This bill would incorporate additional changes in Section 40509.5 of the Vehicle Code proposed by SB 1637, to become operative only if both bills are enacted and become operative on or before January 1, 1999, and this bill is enacted last.

(20) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 878 (SB 2239) Committee on Business and Professions. Professions and vocations.

(1) Existing law provides for an examining committee of the Board of Dental Examiners, to consist of 100 members.

This bill would instead provide for the board to appoint an unspecified number of members.

(2) Existing law regulating dentistry prohibits the practice of dentistry unless a person has a valid, unexpired license or special permit from the Board of Dental Examiners of California. Licensure requires passage of an examination administered by the board, which requires demonstration of an applicant's skill in dentistry, prosthetic dentistry, diagnosis and treatment of periodontics, and judgment in diagnosis-treatment planning.

This bill would require that each applicant give a clinical demonstration of the required skills, and give a written demonstration of his or her judgment in dental diagnosis and treatment planning, prosthetic dentistry, and endodontics.

(3) Existing law permits the Board of Dental Examiners to require each applicant for examination to successfully complete the National Board of Dental Examiners' written examination.

This bill would require that each applicant for examination successfully complete the National Board of Dental Examiners' written examination and provides that successful passage of this examination may satisfy the board's requirement for a written demonstration of judgment in dental diagnosis and treatment planning.

(4) Existing law requires any dentist who employs licensed dental auxiliaries, as specified, to satisfy requirements of continuing education in management and utilization of auxiliaries.

This bill would delete that requirement.

(5) Existing law regulating physician licensure permits an applicant for a physician's and surgeon's certificate who is found by the Division of Licensing of the Medical Board of California to be deficient in required education and clinical instruction to engage in the practice of medicine in this state in any setting approved by the division for the period of time prescribed by the division.

This bill would include in those provisions applicants for a physician's and surgeon's certificate who are required to complete additional medical instruction due to the failure to pass the oral or any part of the written examination after 2 attempts.

(6) Existing law provides that a licensee of the Medical Board of California or a health care facility that fails or refuses to comply with a request for medical records when the request is accompanied by the patient's written authorization is liable for a civil penalty.

This bill would provide that the failure or refusal to comply with a court order issued in the enforcement of a subpoena, mandating the release of medical records, is also a misdemeanor, punishable as specified, and, with respect to a licensee, constitutes unprofessional conduct punishable by license suspension or revocation. This bill would thereby impose a state-mandated local program by creating a new crime. It would enact other related provisions.

(7) Existing law provides for a diversion program for physicians and surgeons with impairment due to abuse of drugs or alcohol or mental or physical illness. Existing law provides that records of a physician and surgeon who has completed the program shall be purged and provides that all records pertaining to the treatment of a physician and surgeon in a program shall be confidential, as specified.

This bill would require each physician and surgeon to sign an agreement that diversion records may be used in disciplinary or criminal proceedings in certain circumstances, would permit the retention of records if specified by regulation, and would make related changes.

(8) Existing law requires the California State Board of Pharmacy to take action against any holder of a license to practice pharmacy who is guilty of unprofessional conduct or whose license has been procured by fraud or misrepresentation or issued by mistake.

This bill would provide that unprofessional conduct includes the cash compromise of certain controlled substances violations, as specified. It would specify that the record of compromise is conclusive evidence of unprofessional conduct.

This bill would provide that if a pharmacist possesses a license or is otherwise authorized to practice in another state or by an agency of the federal government, and the license is suspended or revoked, as specified, the pharmacist's license in this state shall automatically be suspended for the duration of the suspension or revocation, as specified.

The bill would also permit a pharmacy technician student, defined as a person enrolled in a pharmacy technician training program operated by a California public education institution or by a private postsecondary vocational institution approved by the Bureau for Private Postsecondary and Vocational Education, to be placed as a pharmacy technician trainee for the purpose of completing an externship required as a condition of registration by the California State Board of Pharmacy. The bill would permit a pharmacy technician trainee participating in an externship to perform packaging, manipulation, repetitive, or other nondiscretionary tasks only while under the direct supervision and control of a pharmacist, and would establish other requirements and conditions for participation in an externship.

(9) Existing law provides that any person who attempts to secure or secures licensure as a pharmacist by making or causing to be made false representations, or who fraudulently represents himself or herself to be registered, is guilty of a misdemeanor, and upon conviction is punishable by a fine not exceeding \$400, or by imprisonment not exceeding 50 days, or by both the fine and imprisonment.

This bill would increase the maximum amount of the fine to \$5,000.

(10) Existing law requires that any person who has received from the State Board of Accountancy a certificate of certified public accountant or a certificate of public accountant and holds a valid permit to practice be styled and known as a "certified public accountant" or "public accountant," respectively. Existing law prohibits any other person, except a partnership of registered certified public accountants or a partnership of public accountants to assume or use that title, designation, or abbreviation or any other title, designation, sign, card, or device tending to indicate that the person using it is a certified public accountant or public accountant, respectively.

This bill would except a registered accountancy corporation from the above prohibition. The bill would also prohibit a person or firm from using any title or designation in connection with the designation "certified public accountant" or "public accountant" that is false or misleading or that is likely to lead to public confusion concerning either the source of the title or designation or the training, education, or experience required to earn, obtain, or use the title or designation. The bill would also make various revisions regarding the use of names in an accountancy firm or accountancy corporation and the registration requirements for accountancy partnerships.

Violation of certain provisions relating to accountancy constitute a crime. Because a violation of the above provisions pertaining to the use of the designation "certified public accountant" or "public accountant" would create a new crime, this bill would impose a state-mandated local program.

(11) Existing law provides that an expired permit to practice public accountancy may be renewed at any time within 5 years after its expiration on filing of an application for renewal on a form prescribed by the State Board of Accountancy, payment of all accrued and unpaid renewal fees, and giving evidence to the board of compliance with the continuing education provisions. Existing law further provides that if the permit is renewed more than 30 days after its expiration, its holder, as a condition precedent to renewal, shall also pay a prescribed delinquency fee.

This bill would delete the 30-day grace period for the renewal of a permit.

(12) Existing law, operative until July 1, 1997, provides for a State Board of Barbering and Cosmetology in the Department of Consumer Affairs to regulate and license barbers and cosmetologists pursuant to the Barbering and Cosmetology Act.

This bill would provide that the board's functions are to be performed by the department and would provide that the Barbering and Cosmetology Act will become inoperative July 1, 2005, and will be repealed effective January 1, 2006, as specified. It would also make certain technical changes.

(13) Existing law requires the funeral directors and embalmers program to adopt regulations requiring continuing education for funeral directors and embalmers.

This bill would require funeral directors and embalmers to certify completion on or before December 31, 2000, and December 31 of each even-numbered year thereafter as a condition of license renewal.

(14) Existing law regulating surveyors permits the State Board of Registration for Professional Engineers and Land Surveyors to prescribe certain examination requirements by regulation, as specified, and requires that candidates for the 2nd division of the examination for licensure as a land surveyor have graduated from a 4-year postsecondary curriculum, as specified, and completed at least 2 years of actual experience in land surveying, including one year of responsible field training and one year of responsible office training, or completed actual experience in land surveying for at least 6 years, including one year of responsible field training and one year of responsible office training, or registered as a civil engineer with 2 years of actual experience in land surveying.

This bill would require that for all 3 methods of complying with these requirements, the actual experience required be broad based and progressive, and would specify that all experience and training be satisfactory to the board.

Existing law allows the board at its discretion to give candidates up to 2 years of credit for experience in land surveying if they have successfully passed the first division of the examination.

This bill would delete that provision.

(15) Existing law provides for the submission of surveying records known as corner records, and requires every corner record submitted to the county surveyor or engineer to be examined or endorsed. Existing law provides that if the matters appearing on the corner record cannot be agreed upon by the licensed land surveyor or the registered civil engineer and the county surveyor, an explanation of the differences shall be noted on the corner record and it shall be submitted to and filed by the county surveyor.

This bill would provide that when the county surveyor places an explanatory note on a corner record, the county surveyor shall transmit a copy of the filed corner record within 10 working days of the filing to the licensed land surveyor or registered civil engineer who submitted the corner record. By imposing new requirements on the county surveyor, the bill would impose a state-mandated local program.

(16) Existing law establishes a Medical Quality Hearing Panel within the Office of Administrative Hearings. Under existing law, those provisions will be repealed on January 1, 1999.

This bill would delay the repeal until January 1, 2003.

(17) Existing law regulating the adjudication of disputes brought against licentiates of the Medical Board of California permits an administrative judge to issue an interim order suspending a license, or imposing other license restrictions, if the affidavits in support of the petition show that the licensee engaged in, or is about to engage in, certain acts or omissions.

This bill would additionally permit an administrative judge to issue an interim order suspending a license, or imposing other license restrictions, if the affidavits in support of the petition show that a licensee is unable to practice safely due to a mental or physical condition.

(18) Existing law also provides that if a licensee requests a hearing on an accusation relating to licentiate discipline, the board is required to provide a licensee with a hearing within 30 days and to reach a decision within 15 days of the date that matter is submitted to an administrative law judge.

This bill would require that the board reach a decision within 15 days of the date that the decision is received from the administrative law judge.

This bill would make additional conforming changes.

(19) Existing law provides that no person shall fill a prescription for a controlled substance classified in Schedule II which is tendered to him or her after the 7th day following the date of issue.

This bill would instead provide that those prescriptions shall not be filled 14 or more days after the date written on the prescription by the prescriber.

(20) Existing law provides that in the event of an epidemic, accident, or calamity, any controlled substance classified in Schedule II may be dispensed upon an oral or electronically transmitted prescription if failure to issue a prescription might result in loss of life or intense suffering, as specified.

This bill would provide that notwithstanding the general prohibition of another provision, in an emergency where failure to issue a prescription may result in loss of life or intense suffering, an order for a Schedule II controlled substance may be dispensed on an oral, written, or electronic data transmission order, subject to specified conditions.

(21) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 879 (SB 2238) Committee on Business and Professions. Consumer affairs.

Existing law provides for the creation of various regulatory boards and commissions within the jurisdiction of the Department of Consumer Affairs.

This bill would require those entities to initiate a process of adopting regulations on or before June 30, 1999, to require licentiates to provide notice to clients and customers that the practitioner is licensed in this state. It would require each of those regulatory entities to submit to the Director of Consumer Affairs on or before December 31, 1999, its method for ensuring periodic evaluation of every licensing examination that it administers.

Existing law permits various clinical licensees to perform clinical laboratory tests or examinations classified as waived or of moderate complexity.

This bill would provide that an oral and maxillofacial pathologist is also authorized to perform these clinical laboratory tests or examinations.

Existing law provides that, for purposes of registration or licensure as a psychologist, unprofessional conduct is defined to include any act of sexual abuse, sexual relations with a patient, or sexual misconduct which is substantially related to the qualifications, functions, or duties of a psychologist or psychological assistant.

This bill would, until January 1, 2001, instead include any act of sexual abuse or sexual relations with a former patient within 2 years following termination of therapy, or sexual misconduct which is substantially related to the qualifications, functions, or duties of a registered psychologist. It would make related changes. It would require the Board of Psychology to study and report to the Legislature concerning the efficacy of the prohibition.

Existing law provides for the licensure and regulation of speech-language pathologists and audiologists, marriage, family and child counselors, clinical social workers, and educational psychologists.

This bill would require those licensees to display their license in a conspicuous place in the licensee's primary place of practice. The bill would revise and recast various provisions applicable to certain of these licensees which would, among other things, do the following:

(1) Require as a condition of licensure, instruction in spousal or partner abuse assessment, detection, and intervention.

(2) Authorize a licensee to apply to the Board of Behavioral Sciences to have his or her license placed on inactive status, as specified.

(3) Define unprofessional conduct to include denial of licensure, revocation, suspension, restriction, or any other disciplinary action imposed by another state or territory or possession of the United States, or by any other governmental agency, as specified.

(4) Provide that revocation, suspension, or restriction by the board of a license, certificate, or registration to practice as an educational psychologist, a clinical social worker, or a marriage, family and child counselor constitutes grounds for disciplinary action for unprofessional conduct against the licensee or registrant.

(5) Provide for the forfeiture of examination fees paid by applicants for licensure who fail to appear for examination.

Existing law, the Automotive Repair Act, generally requires persons engaged in automotive repair to register with the Director of Consumer Affairs, unless exempt from the requirement. The act makes various references to the term "mechanic," and defines the term to include the performance of various automotive repair functions.

This bill would instead change the term "mechanic" to "automobile technician." It would define the term to additionally include the performance of diagnostics. The bill would delete provisions of the expired Better Auto Repair Program.

This bill would also make certain technical, and conforming changes. The bill would revise and recast various licensing provisions relating to the Speech-Pathology and Audiology Examining Committee, hearing aid dispensers, the Board of Behavioral

Sciences, landscape architects, and notaries public, and make related changes, as specified.

Existing law sets forth a schedule of fees relating to landscape architect licensure and examination, and payable into the California Board of Architectural Examiners-Landscape Architects Fund, a special fund which is continuously appropriated. This bill would impose a new application fee for reviewing an applicant's eligibility to take any section of the examination.

By increasing the amount of moneys payable into the fund, the bill would make an appropriation.

Existing law provides for the regulation of immigration consultants, defined as a person who provides nonlegal assistance or advice on an immigration matter. Existing law authorizes a person claiming to be aggrieved by a violation of provisions regulating immigration consultants to bring a civil action for injunctive relief or damages, or both, but does not set a time limit within which that action must be commenced.

This bill would provide that any action to enforce a cause of action under those regulatory provisions shall be commenced within 4 years after the cause of action has accrued.

Existing law requires that operators of service stations provide specified notices regarding their provision or lack of provision, as applicable, of refueling services to disabled persons.

This bill would revise the contents of these notices.

Existing law regulating private investigators provides that no person shall act as a qualified manager of a licensee until he or she has complied with specified conditions.

This bill would provide that no person shall act as a qualified manager of more licensees than that person can effectively manage and that qualified managers shall share equally with the managed licensee the responsibility of and any liability for the conduct of the business of the licensee. This bill would also require qualified managers to hold and display a qualification certificate issued by the Bureau of Security and Investigative Services.

Existing law prohibits a professional boxer from sparring for training purposes with any person not licensed as a professional boxer or who does not have a sparring permit.

This bill would authorize the State Athletic Commission to permit a professional boxer to spar with someone not licensed, under special circumstances, if a commission representative is present.

Existing law provides that provisions establishing a structural fumigation enforcement program, as specified, shall be repealed effective January 1, 1999.

This bill would extend that date of repeal until January 1, 2000.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 880 (AB 2067) Cunneen. Hazardous waste: state agency procurement.

(1) Existing law defines "recyclable material" and "recycled material" for purposes of the hazardous waste control laws. Existing law requires any person generating hazardous waste that is transported, or submitted for transportation, for offsite handling, treatment, storage, disposal, or any combination thereof, to complete a manifest prior to the time the waste is transported or offered for transportation and to submit the manifest to the Department of Toxic Substances Control. Existing law requires the department to impose a fee for each manifest used by a generator but exempts from the fee imposed after June 30, 1998, manifests used solely for hazardous wastes that are recycled.

This bill would define "recycling" for purposes of the hazardous waste control laws, except the bill would define the term "recycling" for purposes of certain fees, taxes, and charges imposed to additionally include specified activities. The bill would allow a generator of hazardous waste and any facility operator who receives hazardous waste to submit an electronic report to the department in lieu of the manifest copy. The bill would impose a fee of \$3.50 upon each manifest form used for hazardous wastes derived from

air compliance solvents, as defined. The bill would require the department to implement a system, after January 1, 1999, that distinguishes among recycling manifests, air compliance solvent manifests, and general manifests.

The bill would allow a hazardous waste facility that meets specified conditions to conduct bulk, packaged, or containerized unloading and loading operations, as defined, pursuant to specified criteria.

(2) The existing Hazardous Waste Treatment Act of 1995 prohibits any hazardous waste from being land disposed if that hazardous waste is restricted from land disposal pursuant to the federal Resource Conservation and Recovery Act of 1976 (RCRA), except as specified. Existing law provides that the treatment standards adopted pursuant to the federal act are the minimum treatment standards for that waste and become effective upon its effective federal date.

This bill would instead provide that any land disposal restriction, including any treatment standard, notification requirement, or recordkeeping requirement that is adopted pursuant to RCRA will become effective on that date specified above and would provide that the federal land disposal restriction supersedes the corresponding land disposal restriction in the department's regulations, except as specified.

(3) Existing law requires every generator of hazardous waste to pay an annual generator fee to the State Board of Equalization but exempts, from those fees, hazardous materials that are recycled and used onsite, and certain aqueous wastes. Existing law also imposes a fee upon the operators of certain hazardous waste facilities. The revenues from those fees are required to be deposited in the Hazardous Waste Control Account in the General Fund and the money in that account is available, upon appropriation by the Legislature, for expenditure by the department for hazardous waste management. Existing law also authorizes Certified Unified Program Agencies (CUPA) to adopt a single fee system to implement the unified program.

This bill would require the Bureau of State Audits to submit a report to the Legislature, by June 30, 1999, making recommendations for changes in the structure of those fees.

(4) Existing law defines "used oil" for purposes of the provisions regulating the handling of used oil and provides specified standards of purity for recycled oil, including a specified amount of total halogens. Existing law prohibits any person who generates, stores, or transfers used oil from intentionally contaminating used oil with other hazardous waste, except as specified. A violation of the laws regulating used oil is a crime.

This bill would revise the definition of "used oil" to include any oil that meets specified requirements as to the manner in which the recycled oil is produced from used oil. The bill would also define the term "contaminated petroleum product" for purposes of these provisions.

This bill would allow a used oil recycling facility to mix used oil with a contaminated petroleum product or with an oily waste, other than wastes listed as hazardous under specified federal law, under certain conditions. The bill would allow a generator or transporter to mix used oil with contaminated petroleum products, only as specified, thereby imposing a state-mandated local program by creating a new crime.

The bill would also correct erroneous references.

(5) Existing law declares that it is state policy to conserve and protect resources using recycled resources.

This bill would require all state agencies to purchase rerefined automotive lubricant, recycled antifreeze, recycled solvent, and recycled paint, as defined. The purchase of the listed materials would be required only when they are available, of a fitness and quality equal to their nonrecycled counterparts, as defined, and at the same or lower cost of the nonrecycled products. The bill would repeal these provisions January 1, 2001.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 881 (SB 1916) Sher. Hazardous waste source reduction: toxic chemical releases.

(1) Existing law, the Environmental Cleanup and Fee Reform Act of 1997, creates the Toxic Substances Control Account in the General Fund, as of July 1, 1998, and requires specified funds to be deposited in that account. The funds deposited in the account are appropriated to the Department of Toxic Substances Control for specified purposes, including, among other things, the unified hazardous waste and hazardous materials management program. Existing law makes a statement of legislative intent concerning the appropriation of funds from the account by the annual Budget Act, including a statement that it is the intent of the Legislature to appropriate not more than \$1,200,000 for the purpose of implementing the unified program. Existing law, the Environmental Cleanup and Fee Reform Act of 1997, creates the Toxic Substances Control Account in the General Fund, as of July 1, 1998, and requires that specified funds be deposited in that account, including the charge imposed on corporations handling hazardous materials. The funds deposited in the Toxic Substances Control Account are appropriated to the department for specified purposes, including, among other things, the unified hazardous waste and hazardous materials management program.

This bill would allow the funds in the Toxic Substances Control Account to be appropriated for the unified hazardous waste and hazardous materials management program only until June 30, 1999.

The bill would revise the statement of legislative intent to delete the statement regarding the appropriation of funds in the account for the unified hazardous waste and hazardous materials management program and would additionally state that it is the intent of the Legislature to appropriate not less than \$1,050,000, in the annual Budget Act, commencing with the 1999–2000 fiscal year, to establish and implement a specified program to encourage hazardous waste generators to implement pollution prevention measures.

(2) Existing law requires a specified fee to be paid for each manifest form used before June 30, 1998, except as specified, and requires the department to impose a specified manifest fee system after June 30, 1998, that excludes certain wastes that are recycled. A failure to pay these fees is a crime, pursuant to other provisions of law. Existing law requires the department to annually expend \$1,050,000, commencing with the 1999–2000 fiscal year, upon appropriation by the Legislature, from the manifest fees deposited in the Hazardous Waste Control Account, to encourage hazardous waste generators to implement pollution prevention measures.

This bill would replace the requirement that funds be expended from the manifest fees deposited in the Hazardous Waste Control Account for pollution prevention measures.

This bill would revise the payment requirements for the manifest fee system and would instead require the department to implement a system by July 1, 2000, that distinguishes between manifests used solely for transporting hazardous wastes that are recycled and manifests used for transporting waste for any other purpose. Since a failure to pay these charges would be a crime, the bill would impose a state-mandated local program by creating new crimes.

(3) Existing law, the Hazardous Waste Source Reduction and Management Review Act of 1989, requires specified generators of hazardous waste to maintain certain plans and reports, and summaries with regard to hazardous waste reduction practices. The Director of Toxic Substances Control is required to submit a biennial report of the department's implementation of the act.

This bill would create the California Source Reduction Advisory Committee, with a specified membership, and would provide for the duties of the committee, including evaluating the progress of the department's source reduction program. The bill would provide for the operation of the advisory committee until April 15, 2002, and after that date only if the department makes a specified determination. The bill would require the department to establish a technical assistance and outreach program to promote implementation of model source reduction measures in priority industry categories, as specified, and to expand the department's source reduction program to provide source reduction training and resources to certified unified program agencies, small business development corporations, business environmental assistance centers, and other regional and local government environmental assistance programs to provide technical assistance to generators in identifying and applying methods of source reduction.

This bill would delete the requirement for the biennial report and would instead require the department, by May 1, 2000, and on or before January 15, every other year thereafter, to prepare a draft work plan, in consultation with the advisory committee to implement the act and to finalize that work plan by June 15, 2000, and by April 1 every other year thereafter. The bill would provide for the information required to be included in the work plan, including an outline of the department's operations and activities proposed for the next 2-year period. The bill would require the department, on or before October 1, 2000, in consultation with the advisory committee, to conduct an inventory and analysis of existing low-cost voluntary programs, as specified, to reduce hazardous waste generation and other environmental releases of toxic chemicals. The bill would also require the department, in consultation with the advisory committee, large businesses, and the public, to develop a low-cost voluntary program to further reduce the generation of hazardous waste by large businesses in California, as specified. The bill would provide, however, that, if on the basis of the inventory and analysis, the department finds that it is not possible to design and implement, at relatively low cost, a voluntary program to promote cooperative relationships between California business and the department, while creating a significant environmental benefit, and the advisory committee concurs, the department would not be required to implement the program.

(4) This bill would incorporate changes to Section 25205.15 of the Health and Safety Code proposed by both this bill and AB 2067 that would only become operative if both bills are enacted and become effective on or before January 1, 1999, each bill amends that section, and this bill is chaptered last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 882 (SB 2240) Committee on Environmental Quality. Hazardous waste and substances: fees.

(1) Existing law provides that the revenues from specified fees and charges imposed upon the management of hazardous waste and money received from the federal government pursuant to the Resource Conservation and Recovery Act of 1976 (RCRA) are deposited in the Hazardous Waste Control Account in the General Fund and the money in that account is available, upon appropriation by the Legislature, to the Department of Toxic Substances Control for, among other things, hazardous waste management. Under existing law, the Environmental Cleanup and Fee Reform Act of 1997 creates the Toxic Substances Control Account in the General Fund, as of July 1, 1998, and requires that specified funds be deposited in that account, including the charge imposed on corporations handling hazardous materials. The funds deposited in the Toxic Substances Control Account are appropriated to the department for specified purposes, including, among other things, the unified hazardous waste and hazardous materials management program.

Existing law makes a statement of legislative intent concerning the appropriation of funds from the Toxic Substances Control Account by the annual Budget Act. Existing law establishes the Federal Receipts Account as a subaccount in the Hazardous Waste Control Account.

Existing law requires the department, at the time of the release of the annual Governor's Budget, to make available the budgetary amounts and allocations of staff resources of the department, as proposed for specified activities.

This bill would authorize the funds in the Toxic Substances Control Account to be appropriated for the unified hazardous waste and hazardous material program only until June 30, 1999, and would instead authorize the funds in the Hazardous Waste Control Account to be appropriated to the department, on and after July 1, 1999, for these purposes.

The bill would revise the statement of legislative intent concerning the appropriation of funds from the Toxic Substances Control Account.

The bill would revise the information the department is required to provide at the time of the release of the annual Governor's Budget and would make the Federal Receipt

Account inoperative on June 30, 1999, and would repeal that account on January 1, 2000. The bill would provide for the transfer of the assets, liabilities, and surplus in that account to the Hazardous Waste Control Account and provide for the continuous availability of those funds for the same purposes for which these funds were appropriated.

(2) Existing law authorizes the department to enter into oral contracts of up to \$2,000 when immediate corrective action is necessary with regard to a release of hazardous waste from a hazardous waste facility.

This bill would increase the amount for which the department may enter into oral contracts for immediate corrective action to these hazardous waste releases to \$10,000.

(3) Existing law requires corporations that use, generate, store, or conduct activities in this state related to hazardous materials to pay an annual charge, based upon a schedule of standard Industrial Classification Codes provided by the department to the State Board of Equalization. A violation of the hazardous waste control laws, including the provisions imposing fees, is a crime.

Existing law requires the department to assess a fee equal to the department's costs in reviewing and overseeing specified corrective action programs. Existing law requires a person who applies for, or requests, a new hazardous waste facilities permit or modification, a permit renewal, a variance, or a waste classification determination, to enter into a written agreement with the department, pursuant to which that person is required to reimburse the department for the costs incurred by the department in processing the application or responding to the request, but also allows a person to instead elect to pay a specified fee.

This bill would revise the schedule of codes that the department is required to provide the board, with regard to the charges imposed upon corporations that handle hazardous materials.

This bill would require the department to recover all of the department's costs in reviewing and overseeing specified corrective action programs, and would provide that the fee amounts for permit applications are in addition to amounts required to be recovered by the department for corrective action review and oversight.

(4) Existing law requires a specified fee be paid for each manifest form used before June 30, 1998, except as specified, and requires the department to impose a specified manifest fee system after June 30, 1998, that excludes certain wastes that are recycled. Existing law requires the department to annually expend \$1,050,000, commencing with the 1999-2000 fiscal year, upon appropriation by the Legislature, from the manifest fees deposited in the Hazardous Waste Control Account, to encourage pollution prevention measures.

This bill would revise the payment requirements for the manifest fee system and would instead require the department to implement a system by July 1, 2000, that distinguishes between manifests used solely for transporting hazardous wastes that are recycled and manifests used for transporting waste for any other purpose. Since a failure to pay these charges would be a crime, the bill would impose a state-mandated local program by creating new crimes. The bill would repeal the requirement that funds be expended from the Hazardous Waste Control Account for pollution prevention measures.

The bill would also make other related changes in the fees and charges levied for hazardous waste management.

(5) Existing law continuously appropriates \$1,000,000 annually to the department from the Toxic Substances Control Account for taking immediate corrective action with regard to hazardous substance releases. The department is authorized to enter into oral contracts of up to \$5,000 when immediate corrective action is necessary.

This bill would increase the amount for which the department may enter into oral contracts for immediate corrective action for these hazardous substance releases to \$10,000.

(6) Existing law, as of July 1, 1998, requires the department to take removal actions with respect to a hazardous substance that is an illegal controlled substance, a precursor of a controlled substance, or a material intended to be used in the unlawful manufacture of controlled substances, and the department is authorized to expend funds appropriated from the Illegal Drug Lab Cleanup Account in the General Fund for this purpose.

This bill would revise that requirement to require the department to report the location and time of such a removal action to the local environmental health officer, as specified, and to include, in the removal action, waste material from the unlawful manufacture of a controlled substance. The bill would allow the department to enter into oral contracts of not more than \$10,000 in obligation, when in the judgment of the department, immediate corrective action is necessary to remedy or prevent an emergency regarding such a hazardous substance.

(7) The bill would make conforming changes in the provisions authorizing the collection of the fees imposed upon hazardous waste.

(8) Existing law, the Johnston-Filante Hazardous Substance Cleanup Bond Act of 1984, establishes the Superfund Bond Trust Fund in the State Treasury as a sinking fund to ensure the payment of the principal of, and interest upon, the bonds sold pursuant to that act. Existing law provides for the transfer, from the General Fund to the Superfund Bond Trust Fund, for payment of the principal of, and interest on, the bonds issued and sold pursuant to the bond act, \$3,500,000 on or before August 1, 2000, \$3,300,000 on or before August 1, 2001, \$3,100,000 on or before August 1, 2002, \$2,900,000 on or before August 1, 2003, and the amount needed to repay the remainder of the funds transferred pursuant to Budget Item 4260-016-826 of the Budget Act of 1991, plus all interest accrued since the date that the transfer took place, on or before August 1, 2004.

This bill would revise those dates to instead transfer, from the General Fund to the Superfund Bond Trust Fund, for payment of the principal of, and interest on, those bonds, \$3,300,000 on or before August 1, 1999, \$3,100,000 on or before August 1, 2000, and the amount needed to repay the remainder of the funds transferred pursuant to that budget item, plus all interest accrued since the date that the transfer took place, on or before August 1, 2001.

(9) The bill would incorporate changes to Section 25173.7 of the Health and Safety Code proposed by both this bill and SB 1916 that would only become operative if both bills are enacted and become effective on or before January 1, 1999, each bill amends that section, and this bill is chaptered last.

The bill would also incorporate changes to Section 25205.15 of the Health and Safety Code proposed by both this bill and AB 2067 that would only become operative if both bills are enacted and become effective on or before January 1, 1999, each bill amends that section, and this bill is chaptered last.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 883 (AB 194) Thomson. Health care: primary care: grants in aid.

Existing law requires the State Department of Health Services to select certain primary care clinics to be reimbursed for delivering medical services, including preventative health care, and smoking prevention and cessation health education to program beneficiaries, based upon specified criteria.

This bill would, among other things, modify priority selection criteria, modify primary care application criteria, require the department to develop a formula for the allocation and reallocation of funds, limit eligibility for funding of clinics that provide dental services only, and revise payments for certain outpatient visits. The bill would make related and technical changes.

Ch. 884 (AB 1021) Cedillo. Korean American Museum.

This bill would provide that state funding for the Korean American Museum is contingent upon funding provided in the Budget Act of 1998.

Ch. 885 (AB 1730) R. Wright. Vehicles: residence addresses: confidentiality: penalties.

(1) Under existing law, the residence address in any record of the Department of Motor Vehicles is confidential, with specified exceptions.

This bill would add to those exceptions an independent institution of higher education that operates pursuant to a memorandum of understanding that permits a security officer of that institution to have arrest powers, as described in a specified provision of the Penal Code, if the institution requests the address for the purpose of enforcing parking restrictions.

In addition, the bill, until January 1, 2002, would require the department to implement a pilot program to provide residence address information to independent institutions of higher education that operate pursuant to that memorandum of understanding, if the institutions request the address solely for the purpose of enforcing parking restrictions. For these purposes, the bill, among other things, would require a participating institution to enter into a contractual agreement with the department that, at a minimum, requires the institution to establish and maintain procedures for persons to contest parking violation notices issued by the institution and to remit a fee, as determined by the department, to cover the department's costs of providing each address to the institution. The bill would require the department to submit a report to the Legislature containing its evaluation of the pilot program on or before January 1, 2001.

(2) Under existing law, a processing agency is required to mail, within 15 calendar days of the issuance of a parking violation, a copy of the notice of parking violation to the registered owner.

This bill would allow for the transmission of an electronic facsimile of the notice as an alternative to the mailing.

(3) Existing law provides that the civil penalty for each equipment violation is the amount established for that violation in the Uniform Bail and Penalty Schedule except upon proof of correction, the penalty shall be reduced to \$10.

This bill would specify that an equipment violation includes failure to properly display a license plate and would allow for the \$10 reduced penalty upon proof of correction under specified conditions.

(4) The bill also would make technical changes to existing law, including the correction of an obsolete cross-reference.

Ch. 886 (SB 779) Calderon. Public Utilities Commission: Administrative Procedure Act: judicial review.

(1) Existing law exempts the Public Utilities Commission from provisions of the Administrative Procedure Act relating to the adoption of regulations, the review of regulations by the Office of Administrative Law, and the judicial review of regulations.

This bill would require decisions, as defined and except as specified, of the commission to be served on parties and subject to at least a 30-day public review and comment period prior to being voted on by the commission, except as specified. The bill would require amendments, revisions, or modifications by the commission of only its Rules of Practice and Procedure after January 1, 1999, to be submitted to the Office of Administrative Law for review in accordance with certain provisions of the Administrative Procedure Act.

(2) Existing law requires that, prior to commencement of any meeting at which commissioners vote on items on the public agenda, the commission make available to the public copies of the agenda, and upon request, any agenda item documents that are proposed to be considered.

This bill would additionally require the commission to publish the agenda, agenda item documents, and adopted decisions in a manner that makes copies of them easily available to the public, including, commencing not later than July 1, 1999, publishing those documents on the commission's Internet site. The bill would also, commencing July 1, 1999, require the commission to additionally publish other specified matters on its Internet site.

(3) Existing law authorizes the commission to determine whether a proceeding requires a hearing, authorizes the commission to assign one or more commissioners and administrative law judges to oversee cases, and prescribes separate procedures for proceedings that the commission determines are either quasi-legislative, adjudication, or ratesetting cases. These authorizations are to be repealed on January 1, 2002.

This bill would delete the repeal date, thereby continuing the above described authorizations indefinitely, and would make related changes.

(4) Existing law generally authorizes judicial review of Public Utilities Commission adjudicatory proceedings to take place in either the Supreme Court or court of appeal, and for all other decisions to only be reviewed by the Supreme Court.

This bill would revise these procedures to authorize a writ of review in the court of appeal to issue in certain ratemaking and licensing cases, and to specify the extent of review by either the Supreme Court or the court of appeal. The bill would preclude specified orders or decisions relating to the merger or acquisition of 2 specified telecommunications-related corporations from being reviewed in the court of appeal. The bill would delete existing authority of the Supreme Court or the court of appeal to issue a conditional stay of any order or decision by the commission denying a rate increase.

This bill would also retain existing procedures for review of quasi-legislative decisions affecting water corporations until January 1, 2001.

The bill in general would apply the changes relating to judicial review to commission orders and decisions the effective date of which are on or after January 1, 1999.

This bill would express the intent of the Legislature to conform the standard of judicial review of decisions of the commission to that of other state agencies, as specified, and to expressly overrule the holding of *Camp Meeker Water System v. Public Utilities Commission, Inc.* 51 Cal.3d 845, as specified.

The bill would provide, in the case of water corporations, until January 1, 2001, that the review shall not be extended further than to determine whether the commission has regularly pursued its authority, including a determination whether the order or decision under review violates any right of the petitioner under the Constitution of the United States or of this state.

(5) Existing law prohibits, on or before January 1, 2002, an order or decision arising out of the Public Utilities Commission's Rulemaking No. 94-04-031, the Order Instituting Rulemaking on the Commission's Proposed Policies Governing Restructuring Regulation, or any specific implementation matters, decisions, or proceedings required, or instituted as a result of that rulemaking, from being deemed to be an adjudication proceeding reviewable in the court of appeal.

This bill would repeal that prohibition.

(6) This bill would appropriate \$814,000 from the Public Utilities Commission Utilities Reimbursement Account to the Public Utilities Commission to implement the commission's internet site requirements, as described under (2) above.

Ch. 887 (SB 1403) Polanco. Anatomical gifts: human remains: driver's license: identification card.

(1) Existing law authorizes the coroner or medical examiner, in the course of an autopsy, to remove and release corneal eye tissue from a body within the coroner's custody if certain conditions are met, including that the coroner has no knowledge of objection to the removal and release of the tissue by the decedent or any other person as specified by law.

This bill would in addition require the coroner or medical examiner to obtain the written consent or an audio tape, transcript, or other document, recording the telephonic consent of the donor or any other person as specified under existing law.

(2) Existing law provides that any person, who for himself or herself or another person, inter, incinerates, or permits the same to be done to a human body, or removes any human remains, other than cremated remains, from the primary registration district in which the death occurred without the authority of a burial or removal permit issued by the local registrar is guilty of a misdemeanor.

This bill would exempt from this provision an officer of a duly accredited medical college engaged in official duties with respect to the body of a decedent who has willfully donated his or her body to the medical college.

(3) Existing law also authorizes the coroner, a medical examiner, a hospital, or a public health official to release and permit the removal of corneal material from a body within the official's or hospital's custody for transplantation, therapy, or reconditioning when certain requirements are met, including, among other things, that a search for persons authorized to consent has been underway for at least 12 hours.

This bill would require that an official obtain the written consent or an audio tape, transcript, or other document that records the telephonic consent of the donor, or any other person, as specified under existing law, prior to the release and removal of a decedent's corneal material.

The bill also would require that the requesting entity and the official agency keep a copy of the consent on file for at least 3 years and would immunize from civil and criminal liability certain persons who authorize the removal of, and certain persons and entities that perform the removal of, a body part or tissue.

(4) Existing law requires the Department of Motor Vehicles to provide a form that may be carried with a driver's license or identification card by which the licensee or cardholder may indicate his or her willingness and intent to make an anatomical gift or his or her refusal to make an anatomical gift under the Anatomical Gift Act, as specified.

This bill would require the form to be designed to obtain information sufficient to identify the nature of the anatomical gift, to include spaces for specified purposes, and to contain certain information relating to that gift.

The bill would require the department to design the driver's licenses and identification cards in order that a specified sticker may be affixed to the license or card, indicating a person's willingness to make an anatomical gift.

The bill would require the Director of Motor Vehicles to determine the date when the department's inventory of driver's license and identification card forms, as that inventory exists in accordance with the law on December 31, 1998, has been depleted. The bill would require the director to make written notification of that date to the Secretary of State, the Chair of the Senate Committee on Transportation, and the Chair of the Assembly Committee on Transportation. The written notice would state that it is being submitted in accordance with this provision.

The bill would repeal certain provisions of existing law relating to driver's licenses and identification cards on the date specified, as described above, by the director. The provisions of the bill relating to the design of the anatomical gift form, driver's license, and identification card would become operative on that date.

Ch. 888 (SB 1782) M. Thompson. Taxation: vehicle license fees: low-emission vehicles.

The Vehicle License Fee Law provides that the annual amount of the license fee for any vehicle is 2% of the market value of the vehicle, as specified. It provides for the determination of the market value of any vehicle, for reclassification to increase the market value of a vehicle, and for the exemption of certain vehicles from the imposition of the license fee.

This bill would, until January 1, 2003, for purposes of determining the vehicle license fee, exempt from the determination of market value, the incremental costs, as defined, that are incurred with respect to a new light-duty motor vehicle propelled by an alternative fuel that is certified by the State Air Resources Board as producing emissions that meet, or are lower than, the emission standards and other specifications for ultra-low-emission vehicles, as defined by the board.

This bill would make certain legislative findings and declarations regarding vehicle emissions.

This bill would take effect immediately as a tax levy.

Ch. 889 (SB 1907) Burton. Airports.

(1) Existing law authorizes a local agency to perform various activities, including the exaction of charges, fees, and tolls, in connection with the erection or maintenance of airports and facilities that it may operate.

This bill would additionally authorize a local agency to perform those activities in connection with the improvement or expansion of those airports or facilities.

The bill would also provide that an airport operated by a city and county may require a rental car company to collect a fee from its customers on behalf of the airport for the use of an airport-mandated common use busing system or light rail transit system operated for the movement of passengers between the terminal and a consolidated on-airport rental car facility.

(2) Existing law, the San Diego Unified Port District Act, provides for the establishment of the San Diego Unified Port District and specifies its authority and powers.

This bill would specify certain conditions that would apply to a fee that the district requires any transportation vendor conducting business on district tidelands, including the airport, to collect from its customers to finance a district parking structure and would specify further conditions if the vendor is a rental car agency.

Ch. 890 (AB 836) Sweeney. Transactions and use taxes: administrative cost recovery.

The Transactions and Use Tax Law sets forth various limitations, requirements, and procedures with respect to the levy of a local transactions and use tax by a "district," as defined, and requires that any tax that is so levied be administered by the State Board of Equalization pursuant to a contract between the board and the levying district. It also provides for the board's recovery each fiscal year of its costs incurred in administering a local transactions and use tax.

This bill would limit the amount that may be charged by the board to a district for the administration of a local transactions and use tax for any fiscal year to the lesser of the percentage the board would have charged if this bill were not enacted or a specified percentage of the total amount of revenue collected by the board pursuant to that transactions and use tax for that fiscal year.

This bill would require the board to report on March 1, 1998, and January 1, 1999, to the budget committees of each house of the Legislature on the actions the board will take to adjust its costs commensurate with the reduced reimbursements provided by this bill.

Ch. 891 (AB 1534) Davis. Medically fragile children: demonstration project.

Existing law provides for various health care programs for children under the jurisdiction of the State Department of Health Services. Existing law establishes a children's services program for children who have certain disabilities.

This bill would establish the Assistance To Children At Home Demonstration Project in order to assist medically fragile children.

The bill would require the department to award funding to a children's hospital meeting certain requirements, and would require the hospital to submit a report to the department that evaluates the project. This bill would also appropriate \$100,000 from the General Fund to the department for the implementation of this project.

Ch. 892 (AB 2387) Baugh. Medi-Cal reimbursement: disciplined licensees.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. Existing law also specifies that participation in the Medi-Cal program by a provider of service is subject to suspension in order to protect the health of service recipients and those funds appropriated to support the program.

This bill would prohibit the State Department of Health Services, until July 1, 2003, upon receipt of written notice from any of certain specified regulatory boards of an order of probation with respect to the license of a health care provider, from reimbursing any Medi-Cal claim for the type of service or procedure that gave rise to the probation that was performed by the disciplined provider on or after the effective date of probation and until termination of all probationary terms and conditions or until the probationary period has ended, whichever occurs first, except in the case of a regulatory board determination of compelling circumstances.

Ch. 893 (SB 984) Rosenthal. Health care service plans: economic profiles.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for licensure and regulation of health care service plans by the Department of Corporations, and prohibits any contract between a plan and a health care practitioner from containing any incentive plan that includes specific payment made directly to a health care practitioner as an inducement to deny, reduce, limit, or delay specific medically necessary and appropriate services. Existing law provides for the licensure and

regulation of certain disability insurers by the Department of Insurance. Willful violation of provisions relating to the regulation of health care service plans is a crime.

This bill would require every plan, on or before July 1, 1999, to file with the department a description of policies and procedures related to economic profiling utilized by the plan and its medical groups and individual practice associations and would require the commissioner to make the filings available to the public upon request with certain exceptions. The bill would also establish procedures under which a plan, and in some cases its medical groups and individual practice associations, would be required, upon request, to share certain economic profiling information. The bill would define "economic profiling" for this purpose to mean an evaluation of a particular physician, provider, medical group, or individual practice association, based in whole or in part on the economic costs or utilization of services associated with the medical care provided or authorized by the physician, provider, medical group, or individual practice association.

The bill would impose similar requirements on certain disability insurers.

By changing the definition of an existing crime relative to health care service plans, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 894 (SB 1194) Rosenthal. Medi-Cal: contracts for services and case management.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing law contains various requirements governing reimbursement for Medi-Cal services provided by federally qualified health centers subcontracting with local initiatives or commercial plans.

Existing law requires that the State Department of Health Services require, as a condition of obtaining a contract with the department, that any local initiative offer a subcontract with a federally qualified health center providing defined services in the service area covered by the local initiative's contract with the department.

This bill would apply that requirement to any county organized health plan and any health plan participating in any geographic managed care program.

Existing law requires that any subcontract offered by a local initiative to a federally qualified health center shall be on the same terms and conditions offered to other subcontractors providing a similar scope of service.

This bill would limit that requirement and would apply it to local initiatives, county organized health systems, and geographic managed care program health plans.

Existing law requires the department to provide incentives in the competitive application process to encourage potential commercial plans to offer subcontracts to federally qualified health centers.

This bill would require the department to also provide those incentives to rural health clinics.

Existing law requires that reimbursement for services provided pursuant to a subcontract with a local initiative or commercial plan shall either be paid on the basis of the federally qualified health center's reasonable costs or, at the election of the center or clinic, reimbursement shall be based on terms negotiated between the center and the individual local initiative or commercial plan.

This bill would require that reimbursement to federally qualified health centers and rural health clinics for those defined services be paid in a manner that is not less than the level and amount of payment that the plan would make for the same scope of services if the services were furnished by a provider that is not a federally qualified health center or rural health clinic, and would apply that requirement to reimbursement for services provided pursuant to a subcontract with a local initiative, a commercial plan, a geographic managed care program health plan, or a county organized health system.

Existing law requires the department to annually perform a reconciliation to determine the federally qualified health center's reasonable cost and pay to or recover from the center the difference between the reimbursement paid by a local initiative or commercial plan pursuant to subcontracts and the entity's reasonable cost in relation to the number of visits to the entity by plan members, and to make another reconciliation and make payments to or obtain a recovery from the federally qualified health center within 6 months of the end of the fiscal year.

This bill would revise those requirements to require the department to administer a program to ensure that total payments to federally qualified health centers and rural health clinics operating as managed care subcontractors comply with applicable federal law regarding reasonable cost reimbursement for services provided by these entities. It would further require federally qualified health centers and rural health clinics subcontracting with local initiatives, commercial plans, county organized health systems, and geographic managed care program health plans to seek supplemental reimbursement from the department through a per visit fee-for-service billing system, and would specify the method of calculating the per visit payment system.

This bill, in addition, would authorize a federally qualified health center or rural health clinic to voluntarily agree to enter into a capitation or at-risk contract, would require a health center or clinic that entered into such a contract to waive its right to supplemental reimbursement and reconciliation to reasonable cost, and would require the department to approve all contracts between health centers or clinics and any local initiative, commercial plan, geographic managed care program health plan, or county organized health system in order to ensure compliance with the above provisions.

Ch. 895 (AB 645) Escutia. Victims of crime: unlawful sexual intercourse: reimbursement from Restitution Fund.

(1) Existing law establishes the Restitution Fund in the State Treasury and continuously appropriates the proceeds in the fund to the State Board of Control for the purpose of indemnifying victims of crime, and certain members of their families and households who are California residents and are defined as "derivative victims." A "crime" is defined for these purposes, to mean a misdemeanor or a felony if committed in California, except that an act involving the operation of a motor vehicle, aircraft, or water vehicle that results in death or injury, is excluded from the definition of a crime, except as specified. A "victim of crime" is defined for these purposes as, among other things, a person who sustains physical injury as a result of a crime, or who sustains emotional injury as well as physical injury or threat of physical injury as a direct result of a crime. A victim of specified crimes who sustains emotional injury is presumed to have sustained physical injury for purposes of qualifying for assistance. A minor child victim of a parent's willful omission, without lawful excuse, to furnish necessary clothing, food, shelter, or medical attendance, as a result of conduct other than failure to pay child support, who sustains emotional injury is presumed to have sustained physical injury if criminal charges were filed or a prosecuting attorney expresses the opinion that the child is a victim of that conduct. Existing law defines the crime of unlawful sexual intercourse as an act of sexual intercourse accomplished with a person who is not the spouse of the perpetrator, if the person is under the age of 18 years.

This bill would include those family and household members who are residents of another state as "derivative victims."

This bill would add vehicular manslaughter, as specified, to the list of offenses that constitute an exception to the exemption for acts involving the operation of motor vehicles and water vehicles, thereby making these 2 offenses crimes for purposes of restitution.

This bill also would delete the provision that conditions the presumption of sustaining physical injury on the opinion of a prosecuting attorney and provide that a minor under 16 years of age who sustains emotional injury as the result of unlawful sexual intercourse with any person over the age of 21 years is presumed to have sustained physical injury if felony charges were filed. The bill also would provide that a person who sustains emotional injury as a direct result of unlawful sexual intercourse is presumed to have sustained physical injury for purposes of qualifying for assistance from the Restitution Fund as a victim of crime.

This bill would make an appropriation by expanding the purposes for which funds may be expended from the Restitution Fund.

This bill additionally would include a psychology intern among the individuals who provide counseling services to the victim of a crime, as defined, for mental health counseling related expenses that are authorized to be reimbursed.

(2) Existing law authorizes the State Board of Control to deny an application for assistance from the Restitution Fund, in whole or in part, because of the nature of the victim's or other applicant's involvement in the events leading to the crime or the involvement of the persons whose injury give rise to the application. A person whom the board finds knowingly or willingly participated in the commission of the crime is prohibited from receiving assistance from the fund.

This bill would require the board, in the case of a minor, to consider the minor's age, physical condition, and psychological state as well as any compelling health and safety concerns in determining whether the minor's application should be denied pursuant to this provision.

(3) Under existing law, if the application described in (2) above is approved, the board is required to determine what type of state assistance will best aid the victim or derivative victim and authorized to take a number of specified actions in making that determination. Included among these actions is a cash payment for loss of wages and a cash payment for loss of support for not more than 2 years following the date of the crime with options for a one-year extension.

This bill instead would require that loss of wages and loss of support be paid for not more than 3 years and delete the provisions granting a one-year extension. The bill also would include reimbursement of a minor under 16 years of age who is the victim of unlawful sexual intercourse with any person over the age of 21 years among the actions authorized to be taken by the board and limit the reimbursement to a total of \$3,000. The bill also would specify that a derivative victim of this crime is not eligible for reimbursement of mental health counseling expenses.

(4) This bill would incorporate additional changes in Section 13960 of the Government Code proposed by AB 535 and AB 1803, to be operative only if this bill and one or both of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

The bill also would incorporate additional changes in Sections 13964 and 13965 of the Government Code proposed by AB 535, to be operative if AB 535 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(5) The provisions enacted by the bill would remain in effect only until January 1, 2003, and as of that date would be repealed, unless a later enacted statute, that is enacted before January 1, 2003, deletes or extends that date.

Ch. 896 (AB 668) Aroner. In-home supportive services: personal care services funding.

Existing law provides for the In-Home Supportive Services (IHSS) program, under which, either through employment by the recipient, or by or through contract by the county, qualified aged, blind, and disabled persons receive services enabling them to remain in their own homes. Counties are responsible for the administration of the IHSS program.

Existing law authorizes the provision of personal care services under the IHSS program and specifies that those personal care services provided to a recipient who is eligible for those same services under the Medi-Cal program shall receive those services under the Medi-Cal program.

This bill would, subject to the receipt of any necessary federal waivers and the execution of any necessary amendments to the state medicaid plan, require the provision of waiver personal care services, as defined, under the Medi-Cal program to persons meeting specified requirements.

The bill would appropriate \$250,000 from the General Fund to make changes to the case management, information, and payrolling system that are necessary for the implementation of the bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 897 (SB 1800) Johnston. Hereditary disorders: genetic counselors.

Existing law requires the Director of Health Services to establish any regulations and standards for hereditary disorders programs as the director deems necessary to promote and protect the public health and safety in accordance with certain principles.

This bill would require the State Department of Health Services to recommend appropriate criteria and standards for licensing genetic counselors, and would require the department to consult with a group of medical experts representing medical professional organizations during the process of developing and recommending the criteria and standards. It would further require the department to report its recommendations to the Legislature by January 1, 2000.

Ch. 898 (AB 1068) Campbell. Health and community care facilities.

Existing law requires the State Department of Health Services to secure a criminal record prior to the initial licensure or renewal of a license of any person or persons to operate or manage an intermediate care facility/developmentally disabled-habilitative to determine whether the applicant, facility administrator or manager, any direct care staff, or any other adult living in the same location has ever been convicted of a crime other than a minor traffic violation.

This bill would apply this criminal record check requirement to an intermediate care facility/developmentally disabled-nursing and an intermediate care facility/developmentally disabled, other than an intermediate care facility/developmentally disabled operated by the state that secures criminal record clearances for its employees through another method, and upon hiring any direct care staff.

The bill would require the department to develop procedures to ensure that any licensee, direct care staff, or certificate holder for whom a criminal record clearance has been obtained pursuant to these provisions or provisions governing criminal record clearances for nurse assistants and home health aides shall not be required to obtain multiple criminal record clearances.

Existing law requires that the application or reapplication be denied if a conviction for a crime other than a minor traffic violation is found, unless otherwise approved pursuant to the licensing provisions.

This bill would, instead, require the denial of the application for licensure or renewal if the criminal record check indicates convictions of specified offenses, unless certain conditions exist. The bill would authorize the denial of the application for licensure or renewal if the criminal record check indicates conviction of offenses other than those specified, and other than minor traffic violations. The bill would require the department to consider designated factors as evidence of good character and rehabilitation in determining whether or not to deny an application for licensure or renewal under these provisions.

Existing law provides that these provisions do not require a criminal record check of persons employed as consultants.

This bill would, instead, require that persons employed as consultants and acting as direct care staff be subject to the same requirements for criminal record clearance as other direct care staff. The bill would provide that the employing facility shall not be required to pay any costs associated with the criminal record clearance of these consultants.

Existing law requires the submission of a fingerprint card to the department within 20 days after employment for purposes of obtaining the criminal record check.

This bill would, instead, impose this requirement, upon employment and prior to any contact with clients or residents.

Existing law generally requires the administrator of an intermediate care facility/developmentally disabled-habilitative or an intermediate care facility/developmentally disabled-nursing to be either a licensed nursing home administrator or a qualified mental retardation professional. Violation of these provisions, or willful or repeated violations of related regulations constitutes a crime.

This bill would extend this provision to apply to the administrator of an intermediate care facility/developmentally disabled. The bill would require a qualified mental retardation professional, as defined, to complete at least 6 months of administrative

training or demonstrate 6 months of experience in an administrative capacity in a licensed health facility, as defined, to qualify as an administrator of an intermediate care facility for the developmentally disabled under these provisions. By changing the definition of an existing crime, this bill would impose a state-mandated local program.

Existing law requires the department to deny an application for, or initiate an action to suspend or revoke, a nurse assistant certificate, or deny a training and examination application for a nurse assistant if the applicant or certificate holder has been convicted of specified offenses. However, if certain conditions exist the department is not required to act pursuant to this provision.

This bill would provide, until August 1, 2001, that the department is not required to act pursuant to this provision with regard to a person who has been convicted of a misdemeanor petty theft or receiving stolen property, is requesting a renewal of their certificate, and has had no subsequent convictions in the last 5 years.

Existing law also authorizes the department to deny an application for, or deny, suspend, or revoke, a nurse assistant certificate for unprofessional conduct and various crimes.

This bill would require the department to consider designated factors as evidence of good character and rehabilitation in determining whether or not to deny an application for or deny, suspend, or revoke a nurse assistant certificate under these provisions.

Existing law sets forth procedures under which a nurse assistant applicant or certificate holder may request an administrative hearing when the department has determined that an application is to be denied or a certificate is to be denied, suspended, or revoked.

This bill would require that the hearing be conducted within 60 days of the receipt of a written request from the applicant or certificate holder submitted pursuant to existing procedures unless the applicant or certificate holder agrees to an extension.

Existing law requires that the criminal record clearance provisions for nursing assistant applicants be implemented, commencing July 1, 1998, and phased in, for all renewals of nurse assistant certificates, by June 30, 2000.

This bill would delete these implementation and phase in requirements.

Existing law requires that nurse assistant certificates be renewed every 2 years and provides that these certificates expire on the certificate holder's birthday.

This bill would authorize, until August 1, 2001, the department to extend the expiration of the certified nursing assistant's certification for 60 days under certain circumstances.

Existing law, the California Community Care Facilities Act, provides for the licensure and regulation of community care facilities, including social rehabilitation facilities, by the State Department of Social Services.

Existing law requires the department to secure a criminal record of designated staff members of a community care facility before issuing a license or special permit to operate the facility, except certain staff members of social rehabilitation facilities are exempt from the requirement to be fingerprinted for this purpose.

This bill would delete the exemption of certain staff members of social rehabilitation facilities from the criminal record check requirement. The bill would also specifically provide that any nurse assistant or home health aide meeting the criminal record clearance requirements for employment in facilities licensed by the State Department of Health Services would be deemed to meet existing criminal record clearance requirements for community care facilities.

Existing law authorizes the State Department of Social Services to deny an application for or deny, suspend, or revoke a home health aide certificate for unprofessional conduct and various crimes.

This bill would require the department to consider designated factors as evidence of good character and rehabilitation in determining whether or not to deny an application for or deny, suspend, or revoke a home health aide certificate under these provisions.

Existing law requires the State Department of Social Services to conduct a criminal record clearance for all home health aides.

This bill would require the department to develop procedures to ensure that any licensee, direct care staff, or certificate holder for whom a criminal record clearance has been obtained pursuant to these provisions or provisions governing criminal record clearances for an intermediate care facility developmentally disabled-habilitative, intermediate care facility/developmentally disabled-nursing, or intermediate care

facility/developmentally disabled or a nurse assistant shall not be required to obtain multiple criminal record clearances.

Under existing law, a home health aide license expires 12 months from the date of its issuance and existing law requires that the license be renewed annually.

This bill would authorize, until August 1, 2001, the department to extend the expiration of the certified home health aide's certification under certain circumstances.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 899 (AB 1396) Alquist. Child support: state agencies: contracts.

Existing law prescribes requirements for contracts between private parties and public entities, as defined. Existing law also provides that, when a support order is entered, the court shall enter an earnings assignment order that orders the employer of the support obligor to pay to the obligee a portion of the obligor's earnings.

This bill would require all written contracts with state agencies in excess of \$100,000 to contain (1) an acknowledgment by the contractor of the policy of the state regarding the importance of child and family support obligations, and (2) an acknowledgement by the contractor that it is complying with all earnings assignment orders and is providing the names of all new employees to the New Hire Registry maintained by the Employment Development Department.

The bill contains related legislative findings and declarations and states that the act shall be known as the Child Support Compliance Act of 1998.

Ch. 900 (AB 2316) Knox. Child abuse: reports.

(1) Under existing law, when a child protective agency receives certain information regarding child abuse alleged to have occurred in a facility licensed to care for children, the agency is required to notify the licensing office with jurisdiction over the facility.

This bill would require any employee of a child protective agency who has knowledge of, or observes in his or her professional capacity or within the scope of his or her employment, a child in protective custody whom he or she knows or reasonably suspects has been the victim of child abuse, within 36 hours, to send or have sent to the attorney who represents the child in dependency court, a copy of the suspected child abuse and neglect report prepared for the court pursuant to specified provisions of law. The bill would require the child protective agency to maintain a copy of that report.

(2) Under existing law, the attorney appointed to represent a dependent child is required to be given access to all records relevant to the case that are maintained by state or local public agencies.

This bill would require all information requested from a child protective agency regarding a child who is in protective custody or from a child's guardian ad litem, to be provided to the child's counsel within 30 days of the request. Because the bill would impose additional duties on child protective agencies, the bill would create a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 901 (SB 2196) Vasconcellos. Needy families: job training.

Existing law establishes various employment and training programs.

Existing law creates the continuously appropriated Job Creation Investment Fund, to be administered by the Trade and Commerce Agency, for the purpose of allocating funds

to be used for job creation activities that will provide employment for recipients of aid under the CalWORKs program. Existing law requires that all moneys in the fund that have not been disbursed to recipients by June 30, 2002, shall revert to the General Fund.

This bill would revise the schedule of activities for which a recipient may use money received from the Job Creation Investment Fund, and would require that only moneys in the fund that were appropriated in annual Budget Acts prior to the 1998–99 annual Budget Act and that have not been disbursed to recipients by June 30, 2002, shall revert to the General Fund. It would also provide that all moneys in the fund that are appropriated in the 1998–99 annual Budget Act and in subsequent annual Budget Acts shall not be subject to this statutory reversion to the General Fund, but shall be subject to all applicable administrative and fiscal provisions relating to budget appropriations and therefore shall not be considered as continuously appropriated unless expressly authorized in a subsequently enacted statute.

The bill would also provide specified purposes for which funds appropriated to the Job Creation Investment Fund in the annual Budget Act for the 1998–99 fiscal year would be required to be used.

The bill would also exempt from specified provisions of the Public Contract Code contracts entered into pursuant to funding provided by the annual Budget Act for the 1998–99 fiscal year, for purposes of the California Economic Strategy Panel.

Ch. 902 (AB 2772) Committee on Human Services. CalWORKs: welfare-to-work activities.

Existing federal law provides for allocation of federal funds through the federal Temporary Assistance for Needy Families (TANF) block grant program to eligible states. Existing law provides for the CalWORKs program for the allocation of federal funds received through the TANF program, under which each county provides cash assistance and other benefits to qualified low-income families. Prior to the enactment of the CalWORKs program, former existing law provided for the allocation of federal, state, and local funds for needy children, under the Aid to Families with Dependent Children (AFDC) program.

This bill would revise various statutory references to the AFDC program to conform to the CalWORKs program. The bill would revise methods of implementing the program of aid to needy families to reflect the change from the AFDC program to the CalWORKs program. The bill would also require that for purposes of determining eligibility for aid, families shall be grouped into assistance units, and would combine 2 or more assistance units into one assistance unit if they live in the same home under certain circumstances. By revising the method of determining aid, this bill would increase the responsibilities of counties, thereby resulting in a state-mandated local program.

Existing law requires that child care be provided in various stages to recipients of benefits under the CalWORKs program, and provides for various methods of providing the care at different stages.

This bill would require that the child care shall be provided according to certain stages when certain circumstances exist that prohibit the family from proceeding to the following stage of child care. It would also require that a family leaving cash aid under the CalWORKs program receive up to 2 years of child care, if otherwise eligible, as needed to continue the family's employment. Since each county is required to administer the provision of child care services, the bill would impose a state-mandated local program.

The bill would also require that county welfare departments share information necessary for the administration of the child care program and the CalWORKs program, thus imposing a state-mandated local program.

Existing law, until July 1, 1998, permits a county to reimburse the cost of child care services through a direct payment to a CalWORKs recipient, rather than to the child care provider.

This bill would also apply this provision to an alternative payment agency contracting with the State Department of Education. The bill would authorize payment to be made to the parent as the employer if care is provided in the home of the recipient.

Existing law creates grievance procedures for CalWORKs recipients involved in welfare-to-work activities.

This bill would make various changes in these grievance procedures.

Existing law requires that each county receive 75% of the state share of savings, including federal funds, resulting from specified outcomes relating to moving CalWORKs recipients to employment.

Existing law also requires that the remaining 25% of these savings be allocated to counties that have not realized savings due to the outcomes referred to above, but have performed in a manner worthy of recognition based upon standards developed by the department.

This bill would eliminate the requirement that a county must, in order to receive an allocation of these savings, not have realized savings due to the outcomes referred to above.

Existing law requires recipients of aid under the CalWORKs program who are under 19 years of age who are pregnant or custodial parents to participate in educational programs.

This bill would specify that eligible individuals who are under 19 years of age who are pregnant or custodial parents shall be required to participate in the Cal-Learn Program in lieu of the welfare-to-work activities generally required of recipients who are not otherwise exempted from participation, and would exempt teen parents from participation in the Cal-Learn Program if the recipient has an illness, injury, or incapacity that substantially deprives the teen parent from successfully earning a high school diploma or its equivalent and an alternative education cannot be arranged. By revising the responsibilities of counties in determining the eligibility of a recipient, this bill would result in a state-mandated local program.

Existing law requires counties to arrange for the provision of education and supportive services needed by teenage parents to successfully participate in the Cal-Learn Program.

This bill would also modify the services that counties must provide to Cal-Learn Program recipients.

Existing law requires that applicants for, and recipients of, CalWORKs program benefits cooperate with the county welfare department and district attorney in establishing paternity of a child born out of wedlock.

This bill would specify that granting of aid shall not be delayed or denied if the otherwise eligible applicant completes the necessary forms and agrees to cooperate with the district attorney in securing support and determining paternity, thereby increasing the responsibilities of counties and resulting in a state-mandated local program.

Existing law specifies that recipients of CalWORKs program benefits may not receive benefits for more than 18 months unless there is no job available and the recipient participates in community activities, unless he or she is participating in welfare-to-work activities or other approved programs.

This bill would specify that limitation shall not apply to any month the recipient lived in Indian country or an Alaskan native village and 50% of the adults therein are not employed.

Existing law specifies that to the extent permitted by federal law, no child or family may receive CalWORKs program benefits if the total gross income exceeds 185% of the minimum basic standards of adequate care applicable to that child or family.

This bill would repeal that limitation, thereby increasing county responsibilities, thereby resulting in a state-mandated local program.

Existing law exempts certain income from consideration in determining CalWORKs eligibility.

This bill would also exempt earnings from college work-study programs provided for under specified provisions of federal and state law, thereby increasing county responsibilities and thus resulting in a state-mandated local program.

Existing law provides that a gift or any other transfer of assets for less than fair market value by a CalWORKs recipient shall result in a period of ineligibility for CalWORKs benefits determined in accordance with specified requirements.

This bill would specify that this provision applies only to transfers of income or resources that would otherwise affect a recipient's eligibility for benefits or the amount of benefits to which he or she would be entitled.

Existing law provides that, for purposes of determining CalWORKs eligibility, a child shall be considered to be deprived of parental support or care due to the unemployment

of his or her parent or parents when the parent has worked not more than 100 hours in the preceding 4 weeks and meets specified requirements.

This bill would, instead, provide that this requirement would be met when the parent has worked less than 100 hours in the preceding 4 weeks and the other requirements have been met, thereby increasing county responsibilities and thus resulting in a state-mandated local program.

Existing law appropriates funds to pay for a share of the county costs of aid grants under the CalWORKs program.

By making various changes in CalWORKs eligibility provisions that increase program eligibility, the bill would constitute an appropriation.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Under existing law, day care habilitative services are a covered Medi-Cal benefit only when provided to alcohol and drug exposed pregnant women and women in the postpartum period, or as required by federal law, with the exception that outpatient methadone maintenance and Naltrexone remain Medi-Cal benefits.

This bill would revise that provision to include narcotic replacement therapy and Naltrexone as Medi-Cal benefits as an exception to the limitation on day care habilitative services, and would revise the method of calculating costs of those benefits for purposes of the limitation on funding outpatient drug abuse services.

Existing law continuously appropriates money from the General Fund to each county for the support and maintenance of needy children, based on a specified percentage of the amount calculated under the CalWORKs program.

This bill would revise the percentage basis of the continuing appropriation, thereby resulting in an increase in the continuously appropriated funds, and resulting in an appropriation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 903 (AB 131) Ortiz. Food stamps: fraud: penalties.

Existing law provides for the federal Food Stamp Program, under which each county distributes food stamps provided by the federal government to eligible households. Existing law establishes criminal penalties for violation of certain provisions relating to the fraudulent appropriation of food stamps and the unauthorized use, transfer, sale, purchase, or possession of food stamps.

This bill would provide that if a violation of provisions relating to food stamps is committed by means of an electronic transfer of benefits, then, depending on the amount of the benefits involved, a court shall impose additional terms in state prison only if the defendant has not been punished by an additional term of imprisonment under another provision of law for a violation of these provisions. The bill would also prohibit probation from being granted to any person who violates certain provisions relating to food stamps when the violation has been committed by means of an electronic transfer of food stamp benefits and the amount of the benefits exceeds \$100,000. By changing the penalty for certain crimes, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 10980 of the Welfare and Institutions Code proposed by AB 2772, to be operative if AB 2772 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 904 (SB 1665) Brulte. Postsecondary education: creation of new community college districts.

Existing law requires that a proposal for the reorganization of community college districts that would require changes in district governing boards, having been given the approval of the Board of Governors of the California Community Colleges, be submitted to voter approval at an election held in the territory of districts defined in the approved proposal.

This bill would provide that, notwithstanding that requirement, a proposal to form a new community college district from that portion of an existing community college district that contains an existing community college campus, which is located in a county other than the county in which the headquarters of the existing community college district is located, which is 50 or more miles from any other campus in the existing community college district, and which has a number of full-time equivalent students within a prescribed range, and the service area of that campus, shall become final upon the approval of the board of governors, without the approval of the voters at an election. The bill would further provide, however, that the formation of that new community college district would be subject to voter ratification at an election to be called by the county superintendent of schools, and that, in the event the voters fail to ratify that formation, the new community college district would be deemed to be thereupon annexed by the community college district from which it was formed.

The bill would provide for the election of the first governing board of the new community college district, and would further provide that the governing board of the school district in which the existing campus of the proposed new community college district is located constitutes the governing board of the new community college district until the members of the new governing board take office. The bill would also exempt this formation action from the condition of existing law that requires that community college district formations not result in increased state costs.

Because the bill would impose new duties on county superintendents of schools by requiring that specified elections be called and conducted, the bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The bill would become operative on July 1, 1999.

Ch. 905 (SB 2132) Monteith. School finance: newly organized school districts: base revenue limits per unit of average daily attendance.

Existing law provides for the calculation of the base revenue limit for newly organized school districts in accordance with a prescribed procedure. Under this procedure, the base revenue limit per unit of average daily attendance of an affected school district is equal to the total of the amount of blended revenue limit per unit of average daily attendance of the affected school districts, an amount based on salaries and benefits of classified employees of school districts for which the employment of 25% or more of those employees is attributable to average daily attendance that will be included in the newly organized school districts, an amount based on salaries and benefits of certificated employees of school districts for which the employment of 25% or more of those employees is attributable to average daily attendance that will be included in the newly organized school districts, and the amount of the inflation adjustment calculated in accordance with a prescribed formula. Existing law provides that if a newly organized school district is unable to provide the school facilities necessary to provide instructional services by employees of the district to all of its pupils who are residents of the district during the fiscal year in which the reorganization becomes effective, an adjustment shall be made to the base revenue limit per unit of average daily attendance of the district each fiscal year subsequent to the fiscal year in which the reorganization becomes

effective until the fiscal year in which the district provides the facilities necessary to provide those services to all of its pupils.

This bill would provide that a school district that was reorganized in the 1998–99 fiscal year, had an enrollment of fewer than 2,000 pupils in the 2nd fiscal year prior to the fiscal year of reorganization, was wholly located within a county of the 20th class, as defined, and for which the criteria relating to employment of 25% or more of the classified full-time equivalent employees and the certificated full-time equivalent employees would have been met had pupils on interdistrict transfers in the 2nd year prior to the fiscal year of reorganization attended their district of residence, may include the calculations based on the salaries and benefits of its classified and certificated employees in the calculation of its base revenue limit per unit of average daily attendance.

The bill would provide that the adjustment related to inadequate school facilities shall apply to a school district that meets these requirements to the extent that a district does not have adequate school facilities necessary to provide instructional services by employees of the district to all of its pupils.

Ch. 906 (AB 2328) Machado. School district reorganization.

(1) Existing law authorizes the reorganization of school districts and provides for the disposition of the assets and obligations of reorganized school districts. Under existing law, an action to reorganize one or more school districts may be initiated upon the filing, with the county superintendent of schools, of a petition to reorganize the school districts. Existing law requires that this petition be signed by at least 25% of the registered voters residing in the territory proposed to be organized or, in a single school district with over 200,000 pupils in average daily attendance that is proposed to be reorganized into 2 or more school districts, by a number of registered voters residing in the territory proposed to be organized equal to at least 8% of all the votes cast for all candidates for Governor at the last gubernatorial election in the territory proposed to be reorganized.

This bill would require petitions filed under this provision to reasonably identify the territory to be reorganized, which identification may include references to streets or prominent geographic features. The bill would provide that the inclusion of legal descriptions or plat maps, or both, shall not be a prerequisite for the filing of a valid petition.

(2) Existing law provides for the calculation by the county superintendent of schools of the base revenue limit for newly organized school districts in accordance with a prescribed procedure. Under existing law, the calculation of the base revenue limit includes calculations that are required of each affected school district for which the employment of 25% or more of either the classified or certificated employees is attributable to average daily attendance that the county superintendent of schools determines will be included in the newly organized school districts.

This bill would provide instead that these calculations would be required to be made for all affected school districts and that the calculations would be made with respect to full-time equivalent employees. To the extent that the bill would thereby require the county superintendent of schools to make additional calculations, it would constitute a state-mandated local program.

(3) Existing law provides that, if a newly organized school district is unable to provide the school facilities necessary to provide instructional services by employees of the district to all of the pupils who are residents of that district during the fiscal year in which the reorganization becomes effective for all purposes, the base revenue limit per unit of average daily attendance of the newly organized district shall be the blended revenue limit arrived at pursuant to a provision of the statute under which the calculation of the base revenue is made.

This bill would make a technical revision in this provision.

(4) Existing law provides that, if at any time during the fiscal year the county superintendent of schools determines that a school district may be unable to meet its financial obligations for the current or 2 subsequent fiscal years, or if a school district has a qualified certification relating to its ability to meet its financial obligations, he or she shall notify the governing board of the school district and the Superintendent of Public Instruction in writing of that determination and the basis for the determination. Existing law requires that this notification include the assumptions used in making the

determination and be made available to the public. Existing law prescribes the actions that the county superintendent of schools may take to ensure that the school district meets its financial obligations.

This bill would provide that, effective upon the certification of the election results for a newly organized school district, the county superintendent of schools may exercise any of the powers and duties of this provision regarding the reorganized school district and the other affected school districts until the reorganized school district becomes effective for all purposes.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 907 (AB 1885) Papan. School finance: school district reorganization.

Existing law provides for the reorganization of school districts, to be approved by the State Board of Education.

Existing law provides for the computation of fiscal year average daily attendance, for purposes of the determination of revenue limits for school districts in a certain manner, which may apply the second principal apportionment regular average daily attendance for either the prior or current fiscal year, whichever is greater. Existing law requires prior fiscal year average daily attendance to be adjusted for any loss or gain of average daily attendance due to a reorganization or transfer of territory.

This bill would, notwithstanding the requirement in existing law that prior fiscal year average daily attendance be adjusted for any loss or gain of average daily attendance due to a reorganization or transfer of territory, authorize the Jefferson Union High School District and Laguna Salada Union School District, if either of those districts experience a decline in ADA due to a reorganization in either the 1999–2000 or 2000–01 fiscal year, to compute their fiscal year average daily attendance by applying the second principal apportionment regular average daily attendance for either the prior or current fiscal year, whichever is greater.

The bill would declare that, due to certain unique circumstances applicable to Jefferson Union High School District and Laguna Salada Union School District, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

Ch. 908 (SB 63) Peace. Firearms: pistol-revolver delivery record.

(1) Existing law prohibits the sale, lease, or transfer of firearms without a license, with certain exceptions, including the sale, lease, or transfer of any firearm by a person acting pursuant to “operation of law,” as defined.

This bill would add to the definition of “operation of law” the transfer of a firearm by a law enforcement agency to a person who found the firearm where the delivery is to the person as the finder of the firearm pursuant to specified provisions of existing law.

(2) Under existing law, a license to sell firearms is subject to forfeiture for a breach of any of specified prohibitions and requirements. Existing law likewise, with respect to the delivery of a firearm, imposes prohibitions, including a 10-day waiting period. Existing law also requires specified procedures for processing the purchase of a firearm.

This bill would require a firearms dealer to forward specified information relating to any concealable firearm that is not delivered within a specified period.

(3) Existing law requires that a transaction involving the sale, loan, or transfer of a firearm be completed by a licensed dealer or a law enforcement agency if neither party to the transaction holds a dealer’s license. This requirement does not apply to a person who takes title or possession of firearms by operation of law if specified conditions are met, including the condition that a person not fall within the class of persons prohibited from owning or possessing a firearm.

This bill would revise and recast this exemption to include separate exemptions for a firearm that is not capable of being concealed upon the person and a firearm that is capable of being concealed upon the person. The former exemption would apply if the person seeking the exemption is not part of the prohibited class described above. The latter exemption would apply if the person seeking the exemption is not part of the prohibited class and met the conditions specified in existing law that would be revised to include all of the following requirements:

(a) If the person taking title or possession of the firearm is not, among others, a person receiving firearms as a member of the family of a specified police officer or deputy sheriff nor a person who is delivered a firearm as the finder of the firearm by a law enforcement agency, that person, within 30 days of taking possession, shall submit to the Department of Justice a report containing information concerning the individual taking possession of the firearm, how title or possession was obtained and from whom, and a description of the firearm.

(b) If the person taking title or possession is receiving the firearm pursuant to a transmutation of property between spouses, that person shall, among other things, submit the report described in (a) above.

(c) Where the person receiving title or possession of the firearm is a member of the family of a specified police officer or deputy sheriff, on the date that the person is delivered the firearm the information described in (a) above shall be entered into the Automated Firearms System (AFS) via the California Law Enforcement Telecommunications System (CLETS) by the law enforcement agency that transferred or delivered the firearm.

(d) Where the person receiving title or possession of the firearm is a person who is delivered the firearm as the finder of the firearm by a law enforcement agency, on the date that the person is delivered the firearm the information described in (a) above shall be entered into the AFS via the CLETS by the law enforcement agency that transferred or delivered the firearm except that the agency shall not deliver the firearm unless the person presents proof to the agency that he or she is the holder of a basic firearms safety certificate or is exempt from obtaining that certificate.

By imposing new duties on local law enforcement agencies with respect to the transfer of firearms, this bill would impose a state-mandated local program.

(4) The bill would provide that its provisions are severable.

(5) This bill also would make conforming and nonsubstantive changes.

(6) This bill would incorporate additional changes in Section 12071 of the Penal Code proposed by AB 1871, to be operative if AB 1871 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(7) This bill would incorporate additional changes in Sections 12070, 12072, and 12078 of the Penal Code proposed by AB 2011, to be operative if AB 2011 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 909 (AB 48) R. Wright. Firearms: SKS rifles.¹¹

Existing law prohibits any person from manufacturing, distributing, transporting, importing, possessing or offering for sale, giving, lending, or possessing, any assault weapon as defined, and requires any person who lawfully possesses an assault weapon to register the firearm within a specified period and under specified conditions. Assault weapons are defined as coming within a specified list of semiautomatic firearms or by declaration of the superior court that the weapon is an assault weapon. An "SKS with detachable magazine" is one of the designated weapons on the specified list of semiautomatic firearms.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would grant immunity from criminal prosecution to any person, firm, company, or corporation that is subject to prosecution under the above assault weapons law for conduct related to an SKS rifle, as defined, committed during a specified period in which there were conflicting administrative designations of that weapon, and would also provide that the designated SKS rifles are not subject to seizure by law enforcement for violation of the above assault weapons provisions prior to January 1, 2000. This bill would make the immunity provisions fully retroactive to any person, firm, company, or corporation subject to prosecution for, or prosecuted and convicted of, violating the above provisions.

The bill would require the department to notify all district attorneys of the provisions of this bill, on or before January 31, 1999, and would make it a misdemeanor or a felony for any person, firm, company, or corporation in possession of an existing SKS rifle to fail to relinquish or dispose of the rifle on or before January 1, 2000. The bill would also require the department to purchase any SKS rifle relinquished pursuant to these provisions from funds appropriated for this purpose by future legislation, and to adopt regulations, including emergency regulations, for the purchase program. By creating a new offense, this bill would impose a state-mandated local program.

This bill would appropriate \$1,300,000 from the General Fund to the Department of Justice for the purpose of purchasing firearms, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 910 (AB 2022) R. Wright. Firearms.

(1) Existing law authorizes the sheriff of a county or the chief or other head of a municipal police department of any city or city and county to issue a license to carry a concealed firearm upon proof of specified criteria, including that the person applying is either a resident of the county or a city within the county when application is made to the sheriff, or a resident of the city when application is made to a police chief.

This bill alternatively would authorize the issuance of a license upon proof that the person applying is a resident of, or spends a substantial period of time in the applicant's principal place of employment or business in the county or a city within the county, when application is made to the sheriff. The bill would provide that a license issued to a person based on his or her place of employment or business is valid only in the county where it was originally issued and is not valid for more than 90 days, and an application to renew or extend that license may be granted upon the concurrence of the licensing authority that originally issued it and the licensing authority with jurisdiction over the licensee's residence. The bill also would require all applicants, including applicants for license renewal, to complete a specified course of training. The bill would provide that a city, city and county, or county may be considered an applicant's "principal place of employment or business" only if the applicant is physically present in that jurisdiction during a substantial part of his or her working hours for purposes of that employment or business.

Additionally, this bill would require each licensing authority to publish and make available a written policy summarizing these provisions. The bill would require the licensing authority to give written notice to the applicant indicating if the application is approved or denied within 90 days of the initial application for a new license or a license renewal or 30 days after receipt of the applicant's criminal background check from the Department of Justice, whichever is later.

The bill would require the Attorney General to convene a committee to develop a standard application form for licenses. The bill would require the Attorney General to adopt and implement this standard application form for licenses on or before July 1, 1999. The bill would provide that an applicant shall not be required to complete any additional application or form for a license, or to provide any information other than that necessary to complete the standard application form.

Commencing on or before January 1, 2000, and annually thereafter, the bill would require each licensing authority to submit to the Attorney General the total number of

licenses issued to reserve peace officers and judges. The bill would require the Attorney General to collect and record the information submitted by each licensing authority.

By increasing the duties of local law enforcement entities, the bill would impose a state-mandated local program.

(2) Under existing law, a license to carry a concealed firearm issued pursuant to the provisions described in (1) above is valid for any period of time not to exceed one year from the date of the license.

This bill would extend the validity of a license issued pursuant to the provisions described in (1) above to any period of time not to exceed 2 years. The bill would provide that any license issued pursuant to these provisions shall expire 90 days after the licensee moves from the county of issuance if the licensee's place of residence was the basis for issuance of the license. Additionally, the bill would specify that if the licensee's place of employment or business was the basis for issuance of the license pursuant to these provisions, the license is valid for any period of time not to exceed 90 days, and would impose additional restrictions and requirements upon such a license. The bill would also provide that if the applicant is a peace officer, the validity of the license issued pursuant to these provisions shall be any period of time not to exceed 4 years, subject to specified conditions.

(3) Existing law authorizes the licensing authority to charge a fee not to exceed \$3 for processing an application for a new license or a license renewal or processing an amended license.

This bill instead would authorize the licensing authority to charge a fee in an amount equal to the actual costs for processing an application for a new license or license renewal, excluding fingerprint and training costs, but in no case to exceed \$100, and a fee not to exceed \$10 for processing an amended license. The bill would also authorize the licensing authority to charge an additional fee not to exceed \$25, for processing license renewal applications. The bill would provide that these local fees may be increased at a rate not to exceed the California Consumer Price Index, as specified, and shall be transmitted to the treasury of the city, city and county, or county of the licensing authority. The bill would provide that no other requirement, charge, assessment, fee, or condition that requires the payment of any additional funds by the applicant may be imposed by any licensing authority as a condition of the application for a license, and would restrict the collection of the fee for processing an application for a new license or license renewal, as specified.

The bill also would provide that if psychological testing on the initial application is required by the licensing authority, the license applicant shall be referred to a licensed psychologist used by the licensing authority for the psychological testing of its own employees; would authorize the licensing authority to charge the applicant for the actual cost of the testing in an amount not to exceed \$150; would provide that additional psychological testing of an applicant seeking license renewal, shall be required only if there is compelling evidence to indicate that a test is necessary, and would provide that the cost to the applicant for this additional testing shall not exceed \$150.

(4) This bill would incorporate additional changes in Section 12050 of the Penal Code enacted by AB 1795 (Ch. 110, Stats. 1998).

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 911 (AB 2011) Hertzberg. Firearms: punishment.

(1) Existing law prohibits a person from carrying concealed within any vehicle which is under his or her control or direction any pistol, revolver, or other firearm capable of being concealed upon the person. Existing law also prohibits a person from carrying a loaded firearm on his or her person or in a vehicle while in any public place or on any

public street. These offenses are generally punishable as misdemeanors, but under specified circumstances they are punishable as felonies.

This bill also would make the former provision inapplicable to the transportation of a firearm by a person for the purpose of having the Department of Justice assign a distinguishing number or mark of identification to that firearm.

(2) Under existing law, the delivery of an unloaded pistol, revolver, or other firearm capable of being concealed upon the person that is a curio or relic, as defined, by a person licensed as a collector under federal law with a state certificate of eligibility issued to a dealer is exempt from the prohibition against the sale, lease, or transfer of firearms without a license.

This bill would revise this exemption to make it applicable to an unloaded firearm that is a curio or relic, as defined. This bill would also exempt transactions involving a firearm that is a curio or relic from the requirement of being completed through a licensed dealer or law enforcement agency, where neither party to the transaction holds a dealer's license. The bill would make conforming changes.

(3) Under existing law, any person who knowingly buys, receives, disposes of, sells, offers for sale, or has in his or her possession any pistol, revolver, or other firearm which has had the name of the maker, model, or the manufacturer's number or other mark of identification, including any distinguishing number or mark assigned by the Department of Justice, changed, altered, removed, or obliterated is guilty of a misdemeanor.

This bill would make it a misdemeanor for any person to sell or otherwise transfer his or her ownership in a concealable firearm unless the firearm bears either the name of the manufacturer, the manufacturer's make or model, and a manufacturer's serial number, or the identification number or mark assigned to the firearm by the Department of Justice. The bill also would make a conforming change.

By creating a new crime, the bill would impose a state-mandated local program.

(4) Existing law requires firearm dealers to enter specified information concerning firearm transfers into either a register of sales or record of electronic or telephonic transfer.

This bill would require this information to include, with respect to concealable firearms, any identification number or mark assigned to the firearm and, with respect to other than concealable firearms, the curio and relic waiting period exemption, as specified. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

(5) Existing law makes it a misdemeanor for any person with knowledge of any change, alteration, or obliteration to buy, receive, dispose of, sell, or possess any pistol, revolver, or other firearm with changed, altered, or obliterated identification marks.

This bill would require local law enforcement agencies to develop a Serial Number Restoration Plan, as specified and would make a specified appropriation for this purpose, under the supervision of the Department of Justice. The bill would require the department to submit a report on, among other things, the effectiveness of these plans and suggestions for further legislative or programmatic changes, to the Legislature by January 1, 2002.

(6) Existing law requires local law enforcement officials to submit descriptions of serialized property, including firearms, that have been reported stolen, lost, found, recovered, or observed, into a Department of Justice automated property system, as specified.

This bill would provide that whenever local law enforcement recovers a firearm that is illegally possessed, has been used in a crime, or is suspected of having been used in a crime, it shall report the firearm to the Department of Justice, in a manner determined by the Attorney General in consultation with the Bureau of Alcohol, Tobacco, and Firearms, all available information necessary to identify and trace the history of that firearm. This bill would also require the department to implement, by January 1, 2002, an electronic system to receive and forward information submitted under these provisions to the Bureau of Alcohol, Tobacco, and Firearms, and would authorize the Attorney General to issue regulations and to contract with independent agencies in implementing these provisions.

(7) This bill would take effect as an urgency measure, and become operative on November 30, 1998.

(8) This bill would incorporate additional changes in Sections 12070, 12072, and 12078 of the Penal Code proposed by SB 63, to be operative if SB 63 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 912 (AB 1525) Ashburn. Marketing orders: butter and cheese.

Existing law permits the Secretary of Food and Agriculture to prepare, issue, administer, and enforce plans for promoting the sale of any commodity subject to a marketing order, but requires that any such plan be directed toward increasing the sale of the commodity without reference to any private brand or trade name.

This bill would permit, upon approval by producers in a referendum, any marketing order for fluid milk to contain in its advertising and sales promotion plan provisions to allocate funds for promotions of cheese or butter products made with California milk, including promotions in which brand or trade names are used, but only if the use is incidental to the promotion of the California milk product and not in direct promotion of the brand or trade name, and if the allocation of funds is made available on a nondiscriminatory basis to all retailers and manufacturers of butter or cheese utilizing milk produced in California.

This bill would require the Department of Food and Agriculture, if the foregoing provisions are approved, to issue a report to the Governor and specified Senate and Assembly committees, not later than December 31, 2001, regarding the effectiveness of the promotion plan and whether the promotion was made available to all manufacturers on a nondiscriminatory basis, and to recommend whether the program should be continued, expanded, or eliminated.

The provisions of the bill would be repealed as of January 1, 2003.

Ch. 913 (SB 1999) Costa. Presidential primaries.

Existing law provides that the statewide direct primary election is to be held on the 1st Tuesday after the 1st Monday in June of each even-numbered year. Existing law also requires that the presidential primary, held in any year which is evenly divisible by the number 4, be consolidated with the direct primary.

This bill instead would require that the statewide direct primary election be held on the first Tuesday in March in each even-numbered year and that it be consolidated with the presidential primary held that year.

The bill would make various changes in deadlines for duties to be performed by candidates, county clerks, and the Secretary of State, necessitated by the change in those dates.

Ch. 914 (AB 499) Kuehl. Education: diversity in education: Sex Equity in Education Act.

Under existing law, numerous provisions of the Education Code relate to the prohibition of discrimination in the provision of educational services by elementary, secondary, and postsecondary institutions.

Under existing law, the governing board of a school district has primary responsibility for ensuring that school district programs and activities are free from discrimination based on ethnic group identification, religion, age, sex, color, or physical or mental disability. Existing law contains comparable provisions for the community colleges, the California State University system, and the University of California system. Existing law provides that a party to a written complaint of prohibited discrimination may appeal the action to specified bodies. Existing law also requires that persons who have filed a complaint of prohibited discrimination be advised by the educational institution that civil law remedies may also be available to the complainant.

This bill would revise and recast numerous provisions of the Education Code relating to the prohibition of discrimination. The bill would organize these provisions into 2 legislative schemes, one of which would be applicable to elementary and secondary

schools, and one of which would be applicable to postsecondary educational institutions, as defined.

The bill would specify that the provisions on discrimination may be enforced through a civil action.

Ch. 915 (AB 2086) Keeley. Arbitration: attorneys.

Existing law requires any person rendering legal services in this state to be admitted to the State Bar of California. Existing law provides that a party to an arbitration has the right to be represented by an attorney.

This bill would enact provisions, effective only until January 1, 2001, to permit persons admitted to the bar of any other state to represent a party in an arbitration proceeding in this state, or to render legal services in this state in connection with an arbitration proceeding in another state. These provisions would require those attorneys to serve upon the arbitrator, the State Bar of California, the parties, and counsel a certificate containing specified information prior to the first scheduled hearing in the arbitration.

These provisions would also permit any party to an arbitration arising under certain collective bargaining agreements to be represented by any person. The bill would include a statement of legislative intent.

Ch. 916 (AB 2275) Kuykendall. State contracts: claims against the state.

Existing law provides that a state agency that fails to make any payment for goods and services to certain entities pursuant to a contract shall be subject to an interest penalty fee, according to specified criteria.

This bill would recast these provisions and specify that these provisions may not be waived, altered, or limited by the state agency with respect to a contract entered into on or after January 1, 1999, or by the person or business contracting on or after that date with the state agency.

This bill would require that in order to avoid late payment penalties, state agencies shall pay promptly submitted, undisputed invoices within 45 days, and would specify procedures and exclusions relating to that requirement.

Ch. 917 (AB 2405) Leach. Small business contracts.

Existing law provides for various programs for the development of small business opportunities in the state, and sets forth the duties of the Department of General Services, and the small business advocate within the department, in promoting small business participation in state contracts.

This bill would require the small business advocate in the Department of General Services to provide specified services in assisting small businesses, and would require each state agency, with specified exceptions, to designate a small business advocate as a liaison to small business suppliers by performing specified duties. It would require state agencies to conduct solicitation and acquisition activities according to certain criteria and authorize state agencies to apply certain considerations to business awards.

Ch. 918 (AB 2406) Wayne. Court employees: San Diego.

Existing law specifies the classification and compensation of court employees in the County of San Diego.

The County Employees' Retirement Law prescribes retirement benefits for persons included in the safety membership category.

This bill would provide that court service officers in the County of San Diego shall be safety members for purposes of determining retirement benefits. The bill would also revise the classification for purposes of compensation of court service officers in San Diego County, thus establishing a state-mandated local program. The bill would also specify that all costs associated with court employee salaries and benefits provided by the bill shall be paid solely from specified funds available to the courts.

The bill would incorporate additional changes to Sections 74368 and 74370 of the Government Code, made by this bill and SB 1825 to take effect if both bills are enacted and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 919 (AB 2492) Pringle. Title insurance.

Existing law governing title insurance authorizes the Insurance Commissioner to prescribe by rule and regulation a statistical plan reasonably adapted to each of the title insurance rating systems in use in the state. Existing law provides that the plan shall be used by each title insurer in the reporting of data required by the plan in order that the experience of all title insurance may be made available on an annual basis. It also provides that no title insurer shall be required to record or report data on a system basis that is inconsistent with the rating system in use by it, and requires the commissioner to designate one or more advisory organizations to, among other things, assist in the development of the plan.

This bill would provide that the plan shall be used by title insurers in reporting data required by the plan so that experience of all title insurers is available to the commissioner on an annual basis. It would require the commissioner, through regulations, to prescribe the form and detail of the financial data to be submitted and the time period the data shall cover, and would require every licensed title insurer in the state to record and report data directly to the commissioner, regardless of whether required to do so on a system basis that is inconsistent with the rating system in use by it. This bill would authorize the commissioner to use analytical input from an industry advisory organization to generate statistical information for use in reviewing and evaluating individual rate filings by title insurers, as specified.

Existing law governing title insurance provides that a willful violation of any of those provisions is a crime.

By adding new requirements with respect to reporting by title insurers under the statistical plan, this bill would expand the scope of an existing crime, thereby creating a state-mandated local program.

Existing law makes it unlawful for a title insurer, controlled escrow company, or underwritten title company to pay certain commissions or make certain rebates in connection with the business of title insurance. It also subjects any violator to a penalty of 5 times the amount of the unlawful commission or rebate, to be recovered by the commissioner, as specified, in addition to any other penalty imposed by law.

This bill would delete from that penalty provision reference to the recovery of additional penalties imposed by law. It would also authorize the commissioner, in addition to or in lieu of any other applicable penalties, to issue an order, after a hearing, to restrict or suspend the certificate of authority of any title insurer or controlled escrow company or the license of any underwritten title company, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would provide that its provisions shall become operative only if SB 1683 is enacted and becomes effective on or before January 1, 1999.

Ch. 920 (AB 2645) Kuehl. Teenage Pregnancy Prevention Grant Program.

Existing law requires the Superintendent of Public Instruction to give the highest priority to awarding new and continuing funds for programs serving pregnant and parenting teens to those school districts, consortiums of school districts, or county superintendents that satisfy specified criteria and standards established by the State Department of Education.

Existing law establishes a grant program, until July 1, 2000, for teenage pregnancy prevention, targeted at pupils in elementary and secondary schools. Under this grant program, the superintendent is required to award grants for a period not to exceed 5

years, based on recommendations by the Healthy State Support Services for Children Program Council, to local educational agencies based on specified elements. Existing law requires each local educational agency that receives a grant to submit a report to the superintendent, not later than July 1, 1999, that includes specified elements. Existing law also requires the superintendent to contract for an independent evaluation and to report the results of the evaluation and a summary of the reports by local educational agencies to the Governor and the Legislature by January 1, 2000.

This bill would extend the repeal date of that grant program to July 1, 2001. The bill would provide that grants awarded pursuant to the program may be awarded for a period not to exceed 5 years of program operation. The bill would change the date by which each local educational agency that receives a grant must report to the superintendent from July 1, 1999, to October 1, 2001 and would change the date by which the superintendent is to report, as prescribed, to the Governor and the Legislature from January 1, 2000, to April 1, 2002. The bill would extend the repeal date of the provisions requiring these reports to January 1, 2003.

Ch. 921 (AB 2790) Ortiz. Local vehicle fee: Department of Motor Vehicles.

Existing law imposes, upon the adoption of a specified resolution by a county board of supervisors, with certain exceptions, an additional fee of \$1 collected by the Department of Motor Vehicles at the time of vehicle registration, renewal, or supplemental application. Existing law continuously appropriates the money generated by that fee collection to fund local programs that enhance local law enforcement to provide fingerprint identification. This provision is to be repealed on January 1, 2003.

This bill would delete the repeal date and would instead provide that this additional fee shall remain in effect only for a period of 5 years from the date the actual collection commences.

Ch. 922 (SB 591) Johnson. Firearms dealers.

Existing law authorizes the Department of Justice to charge a firearms dealer a fee not to exceed \$14, upon the purchase of a firearm from the dealer, to cover the costs of collecting and processing purchaser information, except that the fee may be increased at a specified rate.

This bill instead would authorize the department to require the dealer to charge the firearm purchaser that fee.

Ch. 923 (SB 1753) Schiff. Public retirement system governing boards: conflicts of interest.

(1) The Public Employees' Retirement Law and the State Teachers' Retirement Law prohibit specified conflicts of interest by the members of the retirement boards and their officers and employees.

This bill would prohibit any matter involving any vendor or contractor from being considered during a closed session on any transaction involving the retirement system unless, prior to the closed session, a written disclosure has been submitted of any campaign contributions aggregating \$250 or more and any gifts aggregating \$50 that the vendor or contractor has made during the preceding calendar year to any board member or officer or employee of the system. Failure to disclose would be a basis for disqualification of the contractor or the vendor.

(2) Existing law authorizes state boards that invest retirement funds to hold closed sessions when considering investment decisions.

This bill would require the governing boards of the State Teachers' Retirement System and the Public Employees' Retirement System to make those decisions by rollcall vote entered into the minutes of those closed meetings. The bill would require investments to be disclosed and reported at public meetings within 12 months of the close of an investment transaction or the transfer of system assets, whichever occurs first.

(3) The Public Employees' Retirement Law provides for the election of 6 members to the board of administration at elections conducted by the board.

This bill would require elected members and candidates for those offices to file specified campaign statements on forms prescribed by the Fair Political Practices Commission. The statements would be filed with the Secretary of State and a copy would

be retained by the executive officer and would be public records. The statements would have to be signed and verified by the filer and any violation of these requirements would be subject to civil or administrative action by the Fair Political Practices Commission.

(4) The Public Employees' Retirement Law prohibits specified board member communications during the request for proposal or selection process with any vendor or contractor of investment products.

This bill would, instead, prescribe procedures and prohibitions applicable to communications during any award of contract and a separate set of procedures and prohibitions applicable to prospective investment transaction evaluations. The procedures and prohibitions would not apply to specified incidental, social, and unrelated communications. The bill would also impose those procedures and prohibitions on the State Teachers' Retirement System.

(5) Existing provisions of the Political Reform Act of 1974 (act) define the terms "elective office" and "state elective office."

This bill would, for specified purposes of the act, include within those definitions the Board of Administration of the Public Employees' Retirement System.

(6) Existing provisions of the Political Reform Act of 1974 regulate, among other things, the disclosure of contributions received and expenditures made by candidates and committees engaged in elections, conflicts of interest of public officials, and the conduct of lobbyists, lobbying firms, and lobbyist employers, and provides for audits of those disclosures by the Fair Political Practices Commission.

This bill would require the commission to promulgate regulations regarding audits of disclosures filed by candidates for the Board of Administration of the Public Employees' Retirement System, and would require the Public Employees' Retirement System to reimburse the commission for reasonable expenses thus incurred.

(7) Existing provisions of the Political Reform Act of 1974 make a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing those penalties on certain persons who are required to make certain disclosures under the act pursuant to this bill.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(9) The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $\frac{2}{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $\frac{2}{3}$ vote.

Ch. 924 (SB 2175) Alpert. Sellers of travel: travel consumer restitution plan.

Existing law provides a comprehensive scheme for the regulation of sellers of travel, which would be terminated as of January 1, 1999. Existing law provides that, upon that termination date, certain provisions governing travel promoters shall take effect.

This bill would extend the date of that termination to January 1, 2006, and would make a corresponding change to the effective date of the provisions governing travel promoters. The bill would revise and recast various of those regulatory provisions, as specified, and also various related provisions dealing with the Travel Consumer Restitution Corporation.

Among other things, the bill would increase the amount of initial assessments for operations and impose a one-time additional funding assessment for the Restitution Fund on participants making their initial payment to the Travel Consumer Restitution Corporation. The bill would reduce and revise the amount of an authorized annual emergency assessment, provide for an emergency operations fund assessment, make an appropriation of \$395,000 from the Travel Seller Fund to the Department of Justice for purposes of the Sellers of Travel Program, and make related changes. It would also require the Attorney General to report to the Legislature on or before January 1, 2005,

regarding, among other things, the sellers of travel registration program, the Travel Consumer Restitution Corporation, and the Travel Consumer Restitution Fund.

Since any violation of the provisions regulating sellers of travel would be a crime punishable as a misdemeanor or, in some instances, a felony, this bill would impose a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 925 (AB 1290) Havice. Kidnapping.

(1) Existing law, as interpreted by the California Court of Appeal, provides that subdivision (b) of Section 208 of the Penal Code, imposing increased punishment for kidnapping a child under the age of 14 years, is a distinct crime rather than a penalty enhancement.

This bill would declare the Legislature's intent that the above provision establishes a penalty enhancement for the crime of simple kidnapping, not a separate offense, and would make conforming changes. Because this bill would expand the definition of an existing crime, it would create a state-mandated local program.

(2) Existing law prohibits and prescribes punishments for unlawful sexual intercourse with a minor.

This bill would make technical, nonsubstantive amendments to these provisions.

(3) Existing law makes it a crime for a person to commit specified lewd or lascivious acts with a specified sexual intent, if the victim is a child of 14 or 15 years of age, and the person is at least 10 years older than the child.

This bill would require that in determining whether the person is at least 10 years older than the child, the difference in age be measured from the birth date of the person to the birth date of the child.

(4) Existing law requires that a habitual sex offender, as defined, be imprisoned in the state prison for 25 years to life. A habitual sex offender is defined to mean a person who has been previously convicted of one or more specified offenses and who is convicted in the present proceeding of one of those offenses.

This bill would add to the list of specified offenses defining a habitual sex offender, the crime of continuous sexual abuse of a child.

(5) Existing law requires imposition of an enhanced term of imprisonment on any person who is convicted of a specified felony and who, in the commission of that felony, personally used a firearm, intentionally and personally discharged a firearm, or intentionally and personally discharged a firearm and proximately caused great bodily injury as defined.

This bill, by cross-reference, would make applicable, where this enhancement has been imposed, provisions of existing law that do the following: require admission of the public to a juvenile court hearing; require consideration of certain information in the juvenile court's determination of whether a minor is a fit and proper subject to be dealt with under the juvenile court law; and prescribe a sentence enhancement or increased punishment of a person who is convicted of any specified offense.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) This bill also would do the following:

(A) Incorporate amendments to Section 1170.1 of the Penal Code proposed by both this bill and SB 1900 which shall only become operative if (1) both bills are enacted and become effective on or before January 1, 1999, (2) each bill amends Section 1170.1 of the Penal Code, and (3) this bill is enacted after SB 1900.

(B) Incorporate amendments to Section 12022.53 of the Penal Code proposed by both this bill and SB 2168, as well as statements of legislative intent, relating to the amendments to Section 12022.53 proposed by SB 2168, which shall only become operative

if (1) both bills are enacted and become effective on or before January 1, 1999, (2) each bill amends Section 12022.53 of the Penal Code, and (3) this bill is enacted after SB 2168.

(C) Incorporate amendments to Section 676 of the Welfare and Institutions Code proposed by both this bill and SB 2168 which shall only become operative if (1) both bills are enacted and become effective on or before January 1, 1999, (2) each bill amends Section 676 of the Welfare and Institutions Code, and (3) this bill is enacted after SB 2168.

(D) Incorporate amendments to Section 707 of the Welfare and Institutions Code proposed by both this bill and SB 2168 which shall only become operative if (1) both bills are enacted and become effective on or before January 1, 1999, (2) each bill amends Section 707 of the Welfare and Institutions Code, and (3) this bill is enacted after SB 2168.

Ch. 926 (SB 1900) Schiff. Sentencing.

(1) Existing law limits the total of subordinate terms for offenses that are not violent felonies, including the offenses described in (2) below, to 5 years, except as otherwise provided by law.

This bill would delete that limitation and make additional conforming changes.

(2) Under existing law, if a person is convicted of a felony, and is also convicted of intimidation of a witness or victim, influencing testimony or information given to a law enforcement official, or a felony violation of soliciting the commission of certain offenses, that was committed with respect to the first felony, the subordinate term for each of these consecutive offenses shall consist of the full middle term of imprisonment for the felony for which a consecutive term of imprisonment is imposed, and shall include the full term prescribed for any enhancements imposed pursuant to specified provisions for being armed with or using a deadly or dangerous weapon, or for inflicting great bodily injury.

This bill would include, for purposes of this provision, the full term prescribed for any enhancements imposed pursuant to any provision for being armed with or using a deadly or dangerous weapon, or for inflicting great bodily injury.

(3) This bill would incorporate additional changes in Section 1170 of the Penal Code proposed by SB 295, to be operative if SB 295 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(4) This bill would incorporate additional changes in Section 1170.1 of the Penal Code proposed by AB 1290, to be operative if AB 1290 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 927 (AB 796) Havice. Sex offenders: notification.

Existing law authorizes a law enforcement agency to provide specified information concerning specified sex offenders to educational institutions and day care establishments, among others, upon reasonable suspicion that a child or other member of the public may be at risk from the sex offenders. Also under existing law, the Department of Justice is required to identify, on the basis of its records, high-risk sex offenders and to provide to each chief of police and sheriff in the state, and to any other designated law enforcement entity upon request, specified information regarding each identified high-risk sexual offender.

This bill would provide that any child care custodian, as defined, or any employee of a private or public educational institution or day care facility who receives information from a designated law enforcement entity may disclose that information in the manner and to the extent authorized by the law enforcement entity. Additionally, the bill would immunize from civil liability any public or private educational institution, day care facility, any employee thereof, or any child care custodian who in good faith so disseminates that information.

Ch. 928 (AB 1927) Morrow. Sex offenders: probation: notification requirements.

(1) Existing law requires persons convicted of specified sex offenses to register with local law enforcement agencies upon their discharge, parole, or release from confinement and to update that registration annually or upon a change of residence address. These persons are required to provide information required by the Department

of Justice, as well as fingerprints, a photograph, and the license plate number of any vehicle owned by or registered in the name of that person.

This bill would require, in addition, that the person required to register as a sex offender provide copies of adequate proof of residence, limited to, among other things, a California driver's license, a California identification card, or recent rent or utility receipt. The bill also would require that the person be allowed to register upon proof of residence to the registering official or a signed statement that the person has no residence. The bill would further require that a person be allowed to register if the person claims that he or she has a residence but does not have any proof of residence, provided that the person furnish proof of residence within 30 days of the day he or she is allowed to register. If a registrant fails to furnish proof of residence within this 30-day period, he or she would be guilty of a misdemeanor.

Because the bill would create a new crime, it would impose a state-mandated local program.

(2) Existing law provides that the victim of any crime, or his or her parents or guardians if the victim is a minor, or the next of kin if the victim has died, has the right to attend all sentencing proceedings and to be notified, by among others, the district attorney's office where the case involves a specified violent felony.

This bill additionally would include the right to be notified by the district attorney's office of the right to request, upon a form provided by the district attorney's office, and receive a notice if the defendant is convicted of any of a number of specified sexual offenses. The bill also would provide that when a victim has requested notification pursuant to this provision, the sheriff shall inform the victim that the person who was convicted of the offense has been ordered to be placed on probation, and give the victim notice of the proposed date upon which the person will be released from the custody of the sheriff.

(3) Existing law authorizes the court, or judge thereof, in the order granting probation, to suspend the imposition or the execution of the sentence and to direct that the suspension may continue for a period of time not exceeding the maximum possible term of the sentence, except as specified, and upon those terms and conditions as it shall determine.

This bill would authorize the court to order as a condition of probation, upon conviction of any sex offense subjecting the defendant to registration as a sex offender, and at the request of the victim or in the court's discretion, that the defendant stay away from the victim and the victim's residence or place of employment, and that the defendant have no contact with the victim in person, by telephone or electronic means, or by mail.

This bill would incorporate additional changes in Section 1203.1 of the Penal Code proposed by SB 1608, to be operative if SB 1608 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 929 (AB 1745) Alby. Sex offenders.

(1) Existing law requires any person who is convicted of any specified sex offense to register with local law enforcement officials, and the chief of police of a campus of the University of California, the California State University, or a community college if he or she is residing or is located upon the campus, upon their discharge, parole, or release from confinement and to update that registration annually and within 5 working days of

coming into a city, county, or city and county in which the offender temporarily resides or is located. The willful failure to register is a crime.

This bill would require the person to also register when changing his or her residence or location within the city, county, or city and county. The bill would also require an agency registering persons pursuant to these provisions to submit registrations, including annual updates or changes of address, directly into the Department of Justice Violent Crime Information Network (VCIN). By imposing new duties on local law enforcement agencies, the bill would impose a state-mandated local program.

(2) Existing law requires any person who is required to register pursuant to the provisions described in (1) above, if he or she changes his or her residence address, to inform the law enforcement agency or agencies with which he or she last registered of the new address.

This bill would require the person to inform the law enforcement agency of a change of residence address or location, whether within the jurisdiction in which he or she is currently registered or to a new jurisdiction inside or outside the state. Furthermore, the bill would, if the person's new address or location is in a Department of the Youth Authority facility or a state prison or state mental institution, require an official of the place of incarceration, placement, or commitment to forward the registrant's change of address information, as specified, to the Department of Justice, and require the department to forward the change of address information to the agency with which the person last registered. These requirements would apply to persons received in a Department of the Youth Authority facility or a state prison or state mental institution on or after January 1, 1999.

(3) Existing law authorizes a law enforcement agency, when a peace officer reasonably suspects that a child or other person may be at risk from a sex offender convicted of any specified offense, to provide certain information about that registered sex offender that the agency deems relevant and necessary to protect the public, to specified persons, agencies, or organizations the offender is likely to encounter. Under existing law, law enforcement agencies and employees of law enforcement agencies are immune from liability for good faith conduct under these provisions.

This bill would, for purposes of these provisions, include within the definition of "law enforcement agency" every local agency expressly authorized by statute to investigate or prosecute law violators.

(4) Existing law requires the Department of Justice to provide a CD-ROM or other electronic medium containing specified information regarding persons required to register as sex offenders to certain law enforcement agencies. These law enforcement agencies are required to make the CD-ROM or other electronic medium available for public viewing. Under existing law, law enforcement agencies and employees of law enforcement agencies are immune from liability for good faith conduct under these provisions.

This bill would, for purposes of these provisions, include within the definition of "law enforcement agency," every local agency expressly authorized by statute to investigate or prosecute law violators.

(5) This bill would incorporate additional changes in Section 290 of the Penal Code proposed by AB 796, AB 1078, AB 1927, SB 2116, and SB 2168, to be operative if this bill and all of the other bills, or certain of the bills, are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(6) This bill would incorporate additional changes in Section 290.4 of the Penal Code proposed by AB 2799, to be operative if AB 2799 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 930 (AB 1078) Cardoza. Sex offenders: registration.

(1) Existing law authorizes a law enforcement agency, when a peace officer reasonably suspects that a child or other person may be at risk from a sex offender convicted of any specified offense, to provide certain information about that registered sex offender that the agency deems relevant and necessary to protect the public, to specified persons, agencies, or organizations the offender is likely to encounter. Under existing law, law enforcement agencies and employees of law enforcement agencies are immune from liability for good faith conduct under these provisions.

This bill would provide that (a) a law enforcement agency may authorize persons and entities who receive the information to disclose the information to additional persons only if the agency determines that specified conditions have been satisfied regarding disclosure to the additional persons and identifies the appropriate scope of further disclosure; (b) persons notified may disclose the information provided by the law enforcement agency in the manner and to the extent authorized by the law enforcement agency; and (c) any public or private educational institution, day care facility, or any child care custodian or any employee of a public or private educational institution or day care facility which in good faith disseminates information as authorized that is provided by a law enforcement agency or an employee of a law enforcement agency shall be immune from civil liability. To the extent this bill would increase the duties of local law enforcement with respect to the disclosure of information regarding registered sex offenders, this bill would impose a state-mandated local program.

(2) This bill would incorporate additional changes in Section 290 of the Penal Code proposed by AB 796, AB 1745, AB 1927, SB 2116, and SB 2168, to be operative if this bill and all of the other bills, or certain of the bills, are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 931 (SB 2139) Lockyer. Courts: unification.

The California Constitution provides for the establishment of superior and municipal courts, as specified, in each county. SCA 4 of the 1995–96 Regular Session, as approved by the voters on June 2, 1998, provides for the abolition of municipal courts within a county, and for the establishment of a unified superior court for that county, upon a majority vote of superior court judges and a majority vote of municipal court judges within the county; provides for the qualification and election of the judges; and revises the number of jurors required in certain civil actions.

This bill would make various statutory changes to implement and conform to the unification of trial courts pursuant to the constitutional amendment. The bill would also make changes to various provisions of the Code of Civil Procedure, Financial Code, Government Code, Penal Code, and Vehicle Code to conform to changes proposed by AB 310, AB 1094, AB 1211, AB 1590, AB 1754, AB 1858, AB 1927, AB 2070, AB 2134, AB 2551, SB 117, SB 752, SB 1452, SB 1558, SB 1608, SB 1638, SB 1768, SB 1850, and SB 2168, respectively, contingent upon their prior enactment.

Existing law provides that, until January 1, 1999, a judge of a municipal court is deemed to have served under assignment in the superior court, under specified circumstances, for purposes of his or her compensation.

This bill would extend those provisions until January 1, 2000.

The bill would state that it is to take effect immediately as an urgency statute.

Ch. 932 (AB 1094) Committee on Judiciary. Civil actions.

Existing law makes provision for the membership of the board of law library trustees in San Diego County, one of whom is designated as an attorney who is a member of the "San Diego Bar Association."

This bill would change that reference to the San Diego County Bar Association.

Existing law provides for the creation of a Court Reporters Board of California in the Department of Consumer Affairs and establishes a Transcript Reimbursement Fund, administered by the board, to be funded by a transfer of moneys from the Court Reporter Fund for the purpose of reimbursing the costs of shorthand reporting services provided to indigent and low-income civil litigants. The fund is continuously appropriated for that purpose. These funding and reimbursement provisions are set to become inoperative on July 1, 1999, and repealed effective January 1, 2000.

This bill would extend those termination dates to July 1, 2001, and January 1, 2002, respectively. Because of the extension of the existence of the Transcript Reimbursement Fund and its purposes, the bill would make an appropriation.

Existing law exempts specified persons from the requirement to register as a process server.

This bill would also exempt a registered professional photocopier from registering as a process server, if his or her service of process is limited to subpoenas for the production of records, which subpoenas specify that the records be copied by that registered professional photocopier.

Existing law governs the procedure for a trustee's sale of real property.

This bill would require the proceeds of a trustee's sale of real property to be paid within 30 days after the conclusion of the period for notice to creditors if there is no dispute as to the priority of written claims submitted to the trustee, and would specify the action required of a trustee, if he or she fails to determine the priority of written claims within 90 days following the 30-day notice period.

Existing law provides for the appellate department of the superior court, as specified.

This bill would provide that the Chief Justice may designate any municipal court judge as a member of the appellate department of the superior court in specified circumstances.

Under existing law, when authorized by local superior court rules, a municipal court district pursuant to duly adopted court rules may use the same juror pool as that summoned for use in the superior court, with the exception of Alameda County. In Los Angeles County, the municipal courts are required to use the same jury pool as that summoned for use in the superior court.

This bill would delete the exception regarding Alameda County.

Existing law provides that a party to a civil action may move for summary adjudication as to one or more civil causes of action upon various grounds, including that there is no merit to a claim for damages, as specified in the section governing exemplary damages.

This bill would delete reference to the section governing exemplary damages, extending the authorization to any claim for damages.

Existing law provides for a claim of exemption from attachment to be filed and served on the plaintiff not less than 5 days before the hearing on the application for attachment.

This bill would change that time requirement to 5 court days.

Existing law authorizes the investment for interest of funds in the hands of a receiver only upon order of the court with the consent of all the parties.

This bill would instead authorize the investment of funds in the hands of a receiver in interest bearing accounts with specified financial institutions without an order of the court or the consent of the parties.

Existing law provides for the times for serving all moving and supporting papers prior to a civil hearing.

This bill would require the moving and supporting papers to be a copy of the papers filed with the court.

Existing law revises the rights and remedies of the parties under a security agreement operative January 1, 1999.

This bill would change the operative date to January 1, 2002.

Existing law requires a candidate for the office of judge of the superior or municipal court to file a declaration of intention to become a candidate. Existing law requires all candidates for a judicial office to file a declaration of candidacy.

This bill would provide that no candidate for a judicial office shall be required to state his or her residential address on a declaration of intention to become a candidate or a declaration of candidacy.

Existing law requires notice of a motion to produce personal records of a consumer who is a party to a civil action to be given to the witness and deposition officer prior to production.

This bill would require that notice to be given at least 5 days prior to production.

Existing law prohibits a witness from being required to produce employment records, as specified, except upon court order or agreement of the parties, witnesses, and employees affected.

This bill would extend this provision to the production of employment records by a deposition officer, and make related changes.

Existing law specifies certain time limits governing discovery in civil actions and proceedings.

This bill would provide that when the last day to perform or complete any act governed by those time limits falls on a Saturday, Sunday, or holiday, as specified, the time limit is extended until the next day not a Saturday, Sunday, or holiday.

Under existing law, the party to whom an inspection demand is directed shall serve the response upon the other parties within 20 days after service of the inspection demand, except as specified.

This bill would extend the time limit for service of the response from 20 to 30 days.

Existing law provides that where a corporation is a party in a municipal court, it may appear through a director, officer, or employee, whether or not the person is an attorney.

This bill would repeal that provision.

Under existing law, all actions filed by the district attorney or by any other party for an order to establish, modify, or enforce child or spousal support, including actions to establish paternity, are referred to a child support commissioner in the superior court.

This bill would delete the reference to actions filed by any party, other than the district attorney, for an order to establish, modify, or enforce child support, or to establish paternity, and would provide that all actions or proceedings filed by a party other than the district attorney to modify or enforce a support order established by the district attorney be referred to a child support commissioner, as specified.

Under existing law, upon legal separation or dissolution of a marriage, the court shall make whatever orders are necessary or appropriate to ensure that each party receives his or her full community property share in any retirement plan, pursuant to provisions of the Family Code.

This bill would revise the cross-reference to the Family Code, as specified.

Existing law specifies the time when various court records may be destroyed.

This bill would revise time for the destruction of applications in forma pauperis, as specified.

Existing law provides a framework for the expenditure of moneys from the Robbins Courthouse Construction Fund or borrowed against the fund for courtroom construction in Los Angeles County, and requires that construction be within specified statistical areas, judicial districts and communities, before further construction may begin.

This bill would make technical, nonsubstantive changes.

Existing law requires the Judicial Council to collect information from the courts regarding injuries from in-line skating on public property.

This bill would create a state-mandated local program by requiring the appropriate local public agency to maintain a record of injuries from in-line skating on public property, all claims, all lawsuits, and the results thereof, and to file specified records with the Judicial Council, which shall submit a report thereon to the Legislature, as specified.

Under existing law, an inmate sentenced to imprisonment in a state prison or confined in a county jail who files a civil action or notice of appeal of a civil action in forma pauperis shall, in addition to the form required for filing in forma pauperis, also file a statement of account for any sums due to the inmate for the 6-month period immediately preceding the civil action or notice of appeal, and this copy shall be certified by the appropriate official of the Department of Corrections.

This bill would additionally provide that a county jail could certify the inmate's statement of account.

Existing law provides for the rights of nonmembers in retirement plans upon legal separation or dissolution of marriage, as specified.

This bill would revise the cross-reference to the Family Code, as specified.

Existing law provides that a judge, during the pendency of an action and prior to judgment, may address the issue of a defendant's mental competence by stating any doubt in the record and inquiring of the attorney for the defendant, as specified. Existing law also provides that if the attorney for the defendant informs the court that he or she believes the defendant is or may be mentally incompetent, the court shall order a competency hearing, as specified, and if found to be mentally incompetent, the jury shall be discharged.

This bill would make technical, nonsubstantive changes.

Existing law, to the Child Abuse and Neglect Reporting Act, imposes upon health practitioners the responsibility to report observed or suspected child abuse to a child protective agency. "Health practitioner" for purposes of that act means a physician or surgeon, psychiatrist, psychologist, licensed nurse, or any other person currently licensed pursuant to provisions of law regulating healing arts.

This bill would add to that definition, a clinical social worker.

This bill would incorporate additional changes to Sections 77 and 200 of the Code of Civil Procedure, Section 400 of the Family Code, and Section 68152 of the Government Code made by SB 2139, to be operative if both this bill and SB 2139 are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

This bill would also incorporate additional changes to Section 2025 of the Code of Civil Procedure made by SB 2145 and AB 2150, to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 933 (AB 1999) Kuehl. Hate crimes: gender.

(1) Existing law punishes as a misdemeanor, a person who uses force or threat of force to willfully injure, intimidate, interfere with, oppress, or threaten any person in the free exercise or enjoyment of a right or privilege because of that person's race, color, religion, ancestry, national origin, disability, gender, or sexual orientation. Similarly, existing law imposes an enhanced penalty on a person who, while acting in concert with another person, commits or attempts to commit a felony because of the victim's membership in one or more of the above specified groups. An enhanced penalty is also imposed on any person who commits or attempts to commit a felony against the property of a public agency or private institution because the property is identified or associated with a person who is a member of, or a group that is included within, one of the groups specified above. Additionally, existing law imposes enhanced penalties on a person who commits or attempts to commit a felony because of the victim's race, color, religion, nationality, country of origin, ancestry, disability, or sexual orientation, and on a person for each prior felony conviction committed because of the victim's membership in any of the groups just specified.

This bill would amend the last 2 provisions summarized above, and an intent section of an act relating to the prevention of street terrorism, by adding gender to the list of groups in which the victim's membership entitles the victim to protection under those statutes. This bill would also define "gender" for purposes of the provisions summarized in this digest and other specified provisions, to mean the victim's actual sex or the defendant's perception of the victim's sex, and includes the defendant's perception of the victim's identity or appearance, whether or not that identity or appearance is different from that traditionally associated with the victim's sex at birth. By expanding the definition of an enhancement, this bill would impose a state-mandated local program. The bill would state that this definition section does not constitute a change in, but is declaratory of, existing law.

(2) Existing law expresses the Legislature's intent that every person regardless of race, color, creed, religion, or national origin, has the right to be secure and protected from fear, intimidation, and physical harm caused by the activities of violent groups and individuals.

This bill would add a person's gender to the above list of characteristics that are protected by law.

(3) Existing law requires the Attorney General to direct local law enforcement agencies to report to the Department of Justice, information regarding physical injury, emotional suffering, or property damage where there is a reasonable cause to believe that the crime was motivated, in whole or in part, by the victim's race, ethnicity, religion, sexual orientation, or physical or mental disability.

This bill would add gender to the list of victim characteristics in the above reporting provision. By increasing the reporting duties of local officials, this bill would impose a state-mandated local program.

(4) Existing law requires the Commission on Peace Officer Standards and Training to develop guidelines and a course of instruction and training addressing hate crimes for law enforcement officers who are, or who are being trained to become, employed as peace officers. Hate crimes are defined to include certain acts against any person or family, or their property, that is motivated in whole or in part by hostility to that person's membership or status in specified protected groups.

This bill would change the definition of a hate crime for purposes of the instruction and training of peace officers by adding gender to the list of specified groups protected by the hate crime statute.

(5) This bill would incorporate additional changes in Section 422.75 of the Penal Code proposed by SB 2168, to be operative if SB 2168 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(6) This bill would incorporate a cross reference to Section 190.03 of the Penal Code that would be added by AB 2324, to be operative only if both this bill and AB 2324 are enacted and become operative on or before January 1, 1999, and AB 2324 adds Section 190.03 to the Penal Code.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 934 (AB 880) Hertzberg. Elder abuse.

Under existing law, any caretaker of an elder or a dependent adult who violates any provision of law proscribing theft or embezzlement with respect to the property of that elder or dependent adult, is required to be punished by imprisonment in the county jail, or in the state prison for 2, 3, or 4 years when the money, labor, or real or personal property taken is of a value exceeding \$400, and by a fine not exceeding \$1,000 or by imprisonment in the county jail, or both, when the money, labor, or real or personal property taken is of a value not exceeding \$400.

This bill would impose the same punishment on any person who is not a caretaker who commits theft or embezzlement with respect to the property of an elder or dependent adult, if the person knows or reasonably should know that the victim is an elder or dependent adult. Because this bill would expand the scope of an existing crime by making the crime applicable to a broader category of persons, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 935 (SB 1715) Calderon. Elder and dependent adult abuse.

(1) Under existing law, the offense of false imprisonment is punishable by a fine not exceeding \$1,000, or by imprisonment in a county jail for not more than one year, or by both that fine and imprisonment.

This bill would make false imprisonment punishable by imprisonment in the state prison for 2, 3, or 4 years, where that offense is committed upon an elder or dependent adult by the use of force, menace, fraud, or deceit. By increasing the punishment of a crime, this bill would impose a state-mandated local program.

(2) Existing law provides for the distribution of an estate upon the death of a person owning real or personal property, or both, where the deceased has been the victim of a homicide.

This bill would deem a person to predecease an elder or dependent adult who was victimized by that person, barring that person from receiving any property, damages, or costs from the estate of the deceased elder or dependent adult, under specified conditions. Those conditions require that the person was either convicted of any of specified acts of abuse against an elder or dependent adult, as specified, or found liable for having (a) abused the elder or dependent adult, as specified, (b) acted in bad faith, and (c) been reckless, oppressive, fraudulent, or malicious in the commission of the abusive acts. In addition, the bill would require that the decedent be found to have been substantially unable to manage his or her financial resources or to resist fraud or undue influence. This provision would not apply to a dependent who, at any time following the prohibited act or acts, was substantially able to manage his or her financial resources and to resist fraud or undue influence as defined.

(3) Existing law authorizes judicial proceedings under which a conservator may be appointed to manage the property and financial affairs of a person. The court is required to consider the relevant circumstances in determining whether to authorize a proposed action in connection with the conservatee's property, including circumstances enumerated in existing law.

This bill would add as a specific circumstance for the court's consideration in this context whether there are allegations that a beneficiary of the conservatee has committed physical abuse, neglect, false imprisonment, or fiduciary abuse against the conservatee under certain conditions.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) This bill would incorporate additional changes in Section 368 of the Penal Code proposed by SB 2168, AB 880, and AB 1955, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

Ch. 936 (AB 105) Wayne. Crimes.

(1) Under existing law, "fireman" or "firefighter," as used in specified provisions involving prohibited acts of assault or battery, includes any person who is an officer, employee, or member of a fire department or fire protection or firefighting agency of specified governmental entities while he or she is actually engaged in firefighting, fire supervision, fire suppression, fire prevention, or fire investigation.

This bill would make these prohibitions against acts of assault or battery applicable irrespective of whether the person is actually engaged in the functions described above. By expanding the scope of existing crimes, this bill would impose a state-mandated local program.

(2) Existing law provides for the definition, sentencing, sentence enhancement, and terms of parole for various crimes. Section 12022.53 of the Penal Code enacted in 1997 and effective January 1, 1998, creates a sentence enhancement for use of a firearm in the commission of certain crimes.

This bill would revise the following provisions to reflect this enhancement: sentence enhancement for felonies against a member of a protected class, circumstances leading to life imprisonment for associated felony sex offenses, life imprisonment considerations in connection with determinate sentencing, judicial application of consecutive sentence enhancements, restrictions on eligibility for parole, prohibitions on plea bargaining, mandated enhancement of default bail amount minimums, prohibition of the accumulation of credit on the term of imprisonment, expansion of mental health treatment requirements as a condition of parole, expanded restrictions on the geographic placement of parolees in relation to victims and witnesses, restrictions on eligibility for worktime credits in relation to reimprisonment upon revocation of parole, expanded public access to juvenile proceedings, provisions applicable to trial of a minor as an adult, and restrictions on eligibility for drug treatment programs in lieu of criminal sentence.

This bill also would state the intent of the Legislature that provisions enacted during the 1997-98 Regular Session relating to sentence enhancement for injuries or deaths caused by the operation of illicit drug manufacturing labs, as well as the applicability of specific enhancements in connection with determinate sentencing, are declaratory of existing law and do not preclude prosecution under, or application of, enumerated provisions of law, except that these enhancements do not apply to violations of other provisions of law involving great bodily injury or death, but which do not involve the manufacture of methamphetamine or phencyclidine.

(3) Existing law requires the imposition of a 3-year sentence enhancement for convictions of specified drug offenses. Existing law also authorizes imposition of enhanced penalties for prior convictions from a foreign jurisdiction under specified conditions.

This bill would specify that a prior conviction from another jurisdiction qualifies for use under the above 3-year enhancement provision if it meets the specified conditions. The bill would also include a statement of legislative intent that this amendment is intended to be declaratory of existing law.

(4) Existing law provides for enhancement of criminal sentences where great bodily injury has been inflicted in the commission of certain violent felonies. Existing law provides that these enhancements shall not be imposed in addition to certain enhancements imposed under existing law for the use of a firearm in the commission of a felony.

This bill would, in addition to great bodily injury, include death as a basis for sentence enhancement, and would instead provide that the enhancements for the commission of felonies where great bodily injury has been inflicted in the commission of certain violent felonies shall not be imposed in addition to a narrower class of enhancements, namely those imposed under existing provisions in the commission of a felony where a firearm is intentionally and personally discharged, causing great bodily injury or death.

The bill would include statements of intent indicating that this change is technical and nonsubstantive in nature.

(5) This bill also would make technical, nonsubstantive changes to various provisions of existing law.

(6) This bill, by imposing new sentencing, custodial, and postcustodial requirements, would increase the duties of prosecutors and other local law enforcement personnel. By imposing additional duties on local agencies, it would impose a state-mandated local program.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(8) This bill would incorporate additional changes in Section 368 of the Penal Code proposed by AB 880, AB 1955, and SB 1715, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(9) This bill would incorporate additional changes in Section 422.75 of the Penal Code proposed by AB 1999, to be operative if AB 1999 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(10) This bill would incorporate additional changes in Section 1170.11 of the Penal Code proposed by SB 334, to be operative if SB 334 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(11) This bill would incorporate additional changes in Section 1192.7 of the Penal Code proposed by AB 357, to be operative if AB 357 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(12) This bill would incorporate additional changes in Section 1269b of the Penal Code proposed by SB 2139, to be operative if SB 2139 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(13) This bill would incorporate additional changes in Section 3003 of the Penal Code proposed by AB 1646, to be operative if AB 1646 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(14) This bill would incorporate additional changes in Section 3057 of the Penal Code proposed by AB 1444, to be operative if AB 1444 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(15) This bill would incorporate additional changes in Section 12022.53 of the Penal Code and Sections 676 and 707 of the Welfare and Institutions Code proposed by AB 1290, to be operative if AB 1290 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

(16) This bill would take effect immediately as an urgency statute.

Ch. 937 (AB 2785) Richter. Department of Fish and Game: claims.

(1) Existing law specifies the duties and authority of the Department of Fish and Game.

This bill would appropriate \$9,176,000 from the General Fund to a special account in the Special Deposit Fund created by the bill to compensate certain claimants, including the City of Portola and Plumas County, with respect to the Lake Davis Northern Pike Eradication Project. The bill would specify the applicable procedures for processing those claims, including the processing of individual claims by the office of the Attorney General.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 938 (SB 1754) Johannessen. Motor vehicles.

(1) Existing law establishes a motor vehicle inspection and maintenance (smog check) program, administered by the Department of Consumer Affairs; requires inspection of motor vehicles upon initial registration, biennially upon renewal of registration, upon transfer of ownership, and in certain other circumstances; and requires all motor vehicles that are registered in designated areas of the state to biennially obtain a certificate of compliance or noncompliance with motor vehicle emission standards, except for certain exempted motor vehicles.

This bill would permit every motor vehicle subject to the inspection program to be pretested, as defined. The bill would also require information contained in the renewal of registration notice to notify the owner of the vehicle of the right to have the vehicle pretested.

(2) Existing law authorizes motor vehicles to be equipped with various turn signal and pilot indicators, as specified.

This bill, in addition, would authorize motor vehicles to be equipped with not more than two exterior-lighted data monitors that transmit information to the driver of the vehicle regarding the efficient or safe operation, or both the efficient and safe operation, of the vehicle, as specified.

Ch. 939 (AB 910) Cardenas. Prostate cancer.

Existing law requires the State Department of Health Services to develop a standardized written summary to be printed and made available by the Medical Board of California to physicians and surgeons concerning procedures with regard to medically viable and efficacious alternative methods of treatment of prostate cancer.

This bill would establish the Prostate Cancer Fund in the State Treasury to be expended by the department, upon appropriation by the Legislature, for the Prostate Cancer Screening Program, which would be established in the department, to provide screening, medical referral, assistance, and other activities relating to prostate cancer. The bill would require the program to be applicable to all uninsured men 50 years of age and older and to certain uninsured men between 40 and 50 years of age. The bill would require the department to adopt regulations to implement the program, but would specify that the program would not be implemented unless and until funds are appropriated for this purpose in the annual Budget Act.

Ch. 940 (SB 1646) Ayala. High school athletic injuries.

Existing law, with certain exceptions, requires the governing board of any educational institution, as defined, to provide medical and hospital insurance for injuries to members of athletic teams. Existing law authorizes the governing board of any school district maintaining a junior high school or a high school to provide or make available medical, ambulance, and hospital services for pupils of the district injured while participating in athletic activities.

This bill would, if funding is made available, request the University of California to design a study and conduct a representative sampling of pupil injuries from participation in high school athletic events over a period of 3 school years commencing with the 2000-01 school year. The bill would require that the data be compiled and analyzed so as to permit valid conclusions to be drawn and recommendations to be made for, including, but not limited to, the actual statewide frequency of injuries and reinjuries, methods for creating intervention programs to decrease the incidence of injuries, possible methods for decreasing health care costs due to improper evaluation and care of athletic injuries, and developing an athletic safety plan.

This bill would require an executive summary, key findings, conclusions, and recommendations be disseminated to all public high schools and be submitted to the Legislature and the State Board of Education by December 1, 2003.

This bill would provide that the annual General Fund costs of the program shall not exceed \$75,000 and would apply to the University of California only if its participation is approved by resolution of the Regents of the University of California.

Ch. 941 (AB 191) Napolitano. School facilities.

Existing law, the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (hereafter the Greene Act), authorizes the State Allocation Board (hereafter the board) to apportion state funding to applicant school districts for designated school facilities construction purposes. Existing law requires the board to grant first priority for construction funds to a school district with a substantial enrollment in multitrack year-round schools requesting state funding for 50% of the cost of a project, and second priority to school districts with a substantial enrollment in multitrack year-round schools requesting state funding for the entire cost of a project.

This bill would, notwithstanding any other provision of law to the contrary, permit a school district that has, within the previous 24-month period, constructed or otherwise acquired school facilities with 100% local funding, as defined, to apply for funding under the Greene Act for the construction of a gymnasium or multipurpose room. The bill would require the project to be accorded the funding priority status of a project for which funding is requested for only 50% of the cost if the board determines that the schoolsite does not have adequate facilities in that regard and would require the board to grant the school district a credit against its local matching share requirement of up to 50% of the costs of the project or the total local funds expended on the school facilities funded by 100% local funds within the immediately preceding 24-month period, whichever is less.

Ch. 942 (SB 1370) Polanco. Education: summer school funding.

(1) Existing law requires the governing board of each school district that maintains any or all of grades 7 to 12, inclusive, to offer summer school instructional programs for pupils assessed as not meeting the district's adopted standards of proficiency in basic skills. Under existing law, school districts receive apportionments for summer school based generally on summer school attendance, adjusted for various factors. Under

existing law, generally, a school district's maximum entitlement for reimbursement for pupil attendance in summer school programs offered for mathematics, science, English as a second language, or other core academic areas designated by the Superintendent of Public Instruction is an amount equal to 5% of the district's total enrollment for the prior fiscal year multiplied by 120 hours, multiplied by the hourly rate for the current fiscal year, as determined pursuant to specified provisions.

This bill would, commencing in the 1998-99 fiscal year, except as otherwise provided by specified provisions, make a school district's maximum entitlement for reimbursement for pupil attendance in those summer school programs an amount equal to 7% of the district's total enrollment for the prior fiscal year multiplied by 120 hours, multiplied by the hourly rate for the current fiscal year. The bill would require the Superintendent of Public Instruction to reallocate to any school district any unexpended balance of the appropriations made for the current fiscal year for core academic summer school programs, as prescribed, to fund any shortfall in funding needed to provide supplemental instructional services offered under this bill. The bill would require the superintendent, if funds are not needed for that purpose, to reallocate to any school district any unexpended balance for reimbursement for actual pupil attendance in specified summer school programs. The bill would prohibit any district from receiving reimbursement for pupil attendance in summer school programs in excess of 10% of the district's enrollment for the prior fiscal year, multiplied by 120 hours, multiplied by the hourly rate for the current fiscal year.

The bill would appropriate \$75,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to school districts for the purposes of supplemental instructional programs established pursuant to specified provisions added by AB 1639 of the 1997-98 Regular Session. The bill would appropriate \$30,000,000 from the General Fund to the State Department of Education to augment a specified item of appropriation in the Budget Act of 1998 to provide remedial instruction in pupils in grades 7 to 9, inclusive, who have been retained or identified as being at risk of retention pursuant to specified provisions. The bill would appropriate \$94,146,000 from the General Fund to the Superintendent of Public Instruction for allocation to school districts, county offices of education, and other agencies receiving funding under a specified item of appropriation in the Budget Act of 1998 for providing cost-of-living adjustments and enrollment growth funding, to be distributed to each program that is funded under that item in a specified amount. For the purposes of making the computations required by Section 8 of Article XVI of the California Constitution, the funds appropriated by the bill would be deemed to be "General Fund revenues appropriated to school districts," as defined, and included with the "total allocations to school districts and community college districts from General Fund proceeds of taxes appropriated pursuant to Article XIII B," as defined, for the 1998-99 fiscal year.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 943 (SB 1866) Hughes. Compton Unified School District: extended school year.

Existing law, to be repealed on January 1, 2001, alters the calculation of the average daily attendance of pupils for whom compulsory full-time education means a school year consisting of 219 schooldays to reflect the difference between a longer school year and the school year for other pupils in the elementary schools identified by the State Department of Education in the Compton Unified School District. Existing law withholds a specified amount from the district's apportionment if the district fails to operate its school for 219 days for specified pupils.

This bill would repeal these provisions and would, instead, require the determination of average daily extended year attendance for pupils in kindergarten and grades 1 to 12, inclusive, in extended year classes in the Compton Unified School District's 3 lowest performing schools to be in accordance with a prescribed formula, and would require the school district to provide prescribed minutes of pupil instruction and to waive certain staff development rights as a condition of receipt of funds pursuant to this provision.

Existing law, to be repealed on January 1, 2001, requires the State Department of Education to identify the 3 lowest performing elementary schools in the Compton Unified School District for the purposes of extending the school year. Existing law

requires the Compton Unified School District to test all pupils in kindergarten and grades 1 to 5, inclusive, in its 3 lowest performing elementary schools.

This bill would authorize the Compton Unified School District commencing for the 1998–99 school year to identify other low performing schools in the district and would make pupils in kindergarten and grades 1 to 12, inclusive, in those schools eligible for extended school year instruction.

The bill would require the office of the Legislative Analyst to evaluate, or contract for an independent evaluation of, the effectiveness of the extended school year.

This bill would provide that these provisions shall be implemented as if they were in effect for the entire 1998–99 fiscal year, and would repeal these provisions on January 1, 2001.

This bill would declare that it is to take effect immediately, as an urgency statute.

Ch. 944 (AB 190) Napolitano. Elder abuse: statute of limitations.

Existing law provides, with regard to specified criminal offenses which are punishable by imprisonment in the state prison and which involve fraud, the breach of a fiduciary obligation, or misconduct in office by a public official, that the applicable statute of limitations for these crimes does not begin to run until the crime is discovered.

This bill would additionally provide that the applicable statute of limitations does not begin to run until the crime is discovered with reference to crimes that involve the commission of theft or embezzlement upon an elder or dependent adult.

Existing law provides for limitations on time concerning when a criminal complaint may be filed, based on the seriousness of the charged offense and how long ago the charged offense allegedly occurred. Generally, offenses which may be punished by imprisonment in the state prison must be charged within 3 years of the commission of the offense, offenses which involve a breach of fiduciary duty or fraud must be charged within 4 years, and any offense which is not punished by state imprisonment must be charged within one year.

This bill would provide that, notwithstanding these general limits, with regard to crimes associated with elder abuse and neglect, as set forth in a specific section, prosecutions for offenses not involving theft or embezzlement may be brought at any time within 5 years of the commission of the offense.

Ch. 945 (AB 2686) Mazzoni. Community care facilities: residential care facilities for persons with chronic life-threatening illnesses: residential care facilities for the elderly: exemptions.

Existing law provides for the licensure of community care facilities, residential care facilities for persons with chronic life-threatening illnesses, and residential care facilities for the elderly by the State Department of Social Services and exempts certain entities from those provisions.

This bill would also exempt from those provisions any housing project for elderly or disabled persons, or both, that meets specified federal requirements, and where supportive services are made available to residents under certain circumstances.

Ch. 946 (SB 2199) Lockyer. Elder and dependent adult abuse.

(1) Existing law, the Elder Abuse and Dependent Adult Civil Protection Act, sets forth provisions for the reporting of actual or suspected physical or other abuse, as defined, of an elder or dependent adult by specified persons and entities, including care custodians, and imposes various requirements on state and local agencies in processing, investigating, and reporting on these reports.

This bill, among other things, would broaden and redefine “abuse,” “adult protective services,” “neglect,” and “care custodian” for purposes of these provisions, would change references from “fiduciary abuse” to “financial abuse,” and would revise provisions relating to the reporting of abuse by an adult protective services agency to a local law enforcement agency or the long-term care ombudsman program.

(2) Existing law imposes specified requirements on a mandated reporter, as defined, with respect to the observation and reporting of physical abuse of an elder or dependent adult. Violation of these provisions is a misdemeanor.

This bill would revise these provisions, would expand the definition of mandated reporters, and would include abandonment, isolation, financial abuse, and neglect as reportable abuse for purposes of these requirements. By expanding the definition of a crime, this bill would impose a state-mandated local program.

(3) Existing law authorizes adult protective services to include investigations, needs assessment, the use of a multidisciplinary personnel team in order to obtain information and records necessary for adult protective services, a system in which reporting can occur on a 24-hour basis, emergency shelter, and adult respite care. Existing law also specifies the members of the multidisciplinary personnel team.

This bill would enact enhanced adult protective services provisions that, commencing with the 1999–2000 fiscal year, would be implemented only to the extent funds for this enhancement are provided in the annual Budget Act. These provisions would require, rather than authorize, adult protective services to include the above protective actions, would add a public guardian to the members of the multidisciplinary personnel team, and would require each county to establish an emergency response adult protective services program containing specified requirements. The imposition of these new requirements on counties would create a state-mandated local program.

(4) Existing law specifies that any personnel of a multidisciplinary team that receives specified information relating to elder or dependent adult abuse is under the same obligations and subject to the same confidentiality penalties as the person disclosing or providing that information.

This bill would specify that these provisions are also applicable to any personnel of an agency that receives this information.

(5) This bill would require the Director of Social Services to adopt regulations to implement the provisions of this bill by no later than January 31, 2000, and would authorize the State Department of Social Services to implement these provisions through an all county letter or similar instructions from the Director of Social Services until that date.

(6) This bill would incorporate additional changes in Section 15630 of the Welfare and Institutions Code, proposed by AB 1780, to be operative only if AB 1780 and this bill are both chaptered and become effective January 1, 1999, and this bill is chaptered last.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 947 (AB 2510) Strom-Martin. Disaster relief.

Under the Natural Disaster Assistance Act, the state share for any eligible project is limited to no more than 75% of total state eligible costs except for certain occurrences for which the state share may be 100% of total state eligible costs.

This bill would add to those occurrences for which the state share may be 100% of total state eligible costs, the winter storms and flooding that occurred from February 1, 1998, to April 30, 1998, inclusive.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 948 (SB 409) Alpert. Libraries.

Existing law, the California Library Services Act (act), establishes the California Library Services Board and provides that its duties include, among other things, adopting rules, regulations, and general policies relating to the implementation of the act. The State Librarian is the chief executive officer of the board and administers the act. Under the act, a library system, constituted as specified, receives an annual allowance for the improvement and maintenance of coordinated reference service support to the

members of the system. A library system, any public library, or any combination of public libraries is authorized to apply for funds for special services programs, as defined. Each member library of a system is reimbursed for interlibrary loans between member libraries of the system, as specified. Each library system is required to apply for funds for intrasystem communications and delivery and for planning, coordination, and evaluation of overall systemwide services. Each system is required to establish an administrative council and an advisory board, each with specified duties. Under the act, the California Library Services Board is authorized to establish and administer state reference centers responsible for answering reference requests that cannot be met by systems and libraries authorized under the act.

This bill would revise and recast the act by enacting the Library of California Act under which services would be augmented and regional networks established. The bill would provide for a transition period from the California Library Services Act services and funding to the Library of California Act services and funding. This bill would repeal the California Library Services Act upon completion of the transition, and would provide that this bill would control in case of conflict during the transition period.

This bill would appropriate \$5,000,000 from the General Fund to the Library of California Board, established by its provisions, for startup costs under the act, including, but not limited to, telecommunication and infrastructure costs.

Ch. 949 (SB 645) Polanco. Child abuse.

(1) Existing law sets forth specified conditions of abuse and neglect pursuant to which a child may be declared a dependent child of the juvenile court.

This bill would provide that whenever allegations of physical or sexual abuse of a child come to the attention of the local law enforcement agency or local child welfare department, and the child is taken into protective custody, the department or agency may, as soon as practically possible, consult with a specified medical practitioner and, if deemed appropriate, shall cause the minor to undergo a physical examination by a licensed medical practitioner, as provided. The bill would require the agency or department, whenever possible, to ensure that the examination takes place within 72 hours of the time the child was taken into protective custody or, where the allegations are made while the child is in custody, within 72 hours of the time the allegations are made.

This bill also would require that whenever a dependent child may be placed in the home of a relative, or the home of any prospective guardian or other person who is not a licensed or certified foster parent, the court or county social worker placing the child shall cause a criminal record check to be conducted by an appropriate governmental agency, with respect to any person over the age of 18 years living in the home and on any other person over the age of 18 years known to the placing entity who may have significant contact with the child, as specified. The bill would provide that a criminal record check may also be conducted on any person over the age of 14 years living in the home who the county social worker believes may have a criminal record. The bill would require the social worker to visit the home to ascertain the appropriateness of the placement prior to placing a child in the home of a relative of the child, or the home of any prospective guardian or other person who is not a licensed or certified foster parent, and would require the county social worker to cause a check of the Child Abuse Index to be requested from the Department of Justice, as specified.

The bill would also require the county social worker to cause a fingerprint clearance check to be conducted through the Department of Justice, and would prohibit the placement of a child in a home on the basis of the information received pursuant to that check under certain conditions.

Because this bill would require increased duties of local officials, the bill would impose a state-mandated local program.

The bill would also require the State Department of Social Services to report specified information to the Legislature by January 1, 2002, regarding the placement of foster children with relatives.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates

Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 950 (SB 1415) Burton. Chabot Observatory and Science Center: Lewis Center for Educational Research.

Existing law does not contain any provision relating to the Chabot Observatory and Science Center or the Lewis Center for Educational Research.

This bill would make various legislative findings and declarations relative to the Chabot Observatory and Science Center, a joint powers agency created by the City of Oakland, the Oakland Unified School District, and the East Bay Regional Park District, and the Lewis Center for Educational Research, which began as a public educational facility under the Apple Valley Unified School District in 1990 and is home to a California public school, grades K-12, operated by the High Desert "Partnership in Academic Excellence" Foundation.

This bill would appropriate from the General Fund a sum not to exceed \$5,000,000 to the joint powers agency to fund the completion of a new Chabot Observatory and Science Center facility and its science education programs and a sum not to exceed \$2,000,000 to the town of Apple Valley for a grant to the foundation to purchase land and build the new Lewis Center for Earth Science. The bill would also require the Legislative Analyst to review and report to the Legislature on the use of those funds upon completion of the facilities.

Ch. 951 (AB 2217) Villaraigosa. California Arts Council: appropriation.

The Budget Act of 1998 (Chapter 324 of the Statutes of 1998) made appropriations for support of state government for the 1998-99 fiscal year.

This bill would amend and supplement the Budget Act of 1998 by making an appropriation of \$2,500,000 to the California Arts Council for allocation to the Simon Weisenthal Center in accordance with specified provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 952 (AB 639) Alby. Defense conversion.

(1) Existing law classifies students as residents or nonresidents for purposes of paying fees at postsecondary educational institutions.

This bill would entitle a student and his or her parent to resident classification if the student's parent is a federal civil service employee who has moved to this state as a result of a military mission realignment action that involves the relocation of at least 100 employees.

(2) Under existing law, the Trade and Commerce Agency consists of specified offices and the California State World Trade Commission.

This bill would provide that the work of the agency includes the Office of Military Base Retention. The bill would also state the intent of the Legislature that the state role in military base reuse, conversion, and retention be consolidated in the agency.

(3) Existing law requires the council to provide a central clearinghouse for all base reuse, community assistance and training funding, regulations, application procedures, defense conversion funding, and input and information from businesses, industry representatives, labor, local government, and communities.

The bill would require the Trade and Commerce Agency to establish a Defense Retention Grant Program to assist affected communities with grants at specified levels.

(4) Existing law, known as the Community Redevelopment Law, authorizes the establishment of redevelopment agencies in communities to address the effects of blight, as defined, in areas of those communities known as project areas. The Community Redevelopment Law requires that not less than 20% of tax increment funds that are allocated to the agency be used by the agency for the purposes of increasing, improving, and preserving the community's supply of low- and moderate-income housing available at affordable housing cost, as defined, to persons and families of low or moderate income, as defined, and very low income households, as defined, unless a finding is made by the

legislative body of the community, as specified. Existing law generally restricts the authority of a redevelopment agency to use moneys in its Low and Moderate Income Housing Fund outside the agency's territorial jurisdiction.

This bill would express various findings and declarations of the Legislature with regard to the need for the retention of the Travis Air Force Base within the County of Solano. The bill would authorize the redevelopment agencies for the County of Solano and the Cities of Fairfield, Suisun, and Vacaville to expend their tax increment funds, including those moneys deposited in their low- and moderate-income housing funds, as specified, outside their territorial jurisdictions, subject to prescribed findings, conditions and limitations. This bill would provide that these funds may be used, as specified, to develop housing in Fairfield, Suisun, or Vacaville, and to implement the Travis Air Force Base Retention Program through the formation of a separate joint powers entity, as specified. The bill would declare that the use of tax-increment funds for the purposes specified in these provisions shall be conclusively deemed to be a benefit to the project area in which the funds were generated. The bill would repeal those provisions on January 1, 2001, except as specified.

(5) The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

This bill would declare that, due to the unique circumstances within the County of Solano and the Cities of Fairfield, Suisun, and Vacaville relating to the issue of the retention of the Travis Air Force Base that the bill is intended to remedy, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 953 (AB 2782) Keeley. State Appropriations: Budget Act of 1998.

This bill would appropriate \$11,100,000 from the General Fund for specified purposes, in accordance with a prescribed schedule.

Ch. 954 (AB 2812) Committee on Higher Education. Education: 1998 Higher Education Omnibus Act.

(1) Existing law requires the Student Aid Commission to establish a Loan Study Council. Existing law requires the council to review the activities and policies of the Federal Family Education Loan Program and to advise the commission of its findings and recommendations.

This bill would change the name of the Loan Study Council to the Loan Advisory Council.

(2) Existing law requires the Student Aid Commission to submit an annual audited financial report on the operations of the trust to the Governor, the Controller, the State Auditor, and the Legislature by August 1.

This bill would instead require the Student Aid Commission to submit the annual audited report by September 30.

(3) Existing law establishes the Golden State Scholarshare Trust Act, pursuant to which, under regulations adopted by the Student Aid Commission, participants invest money in the Golden State Scholarshare Trust for the benefit of a specific beneficiary for the advance savings for the beneficiary's higher education expenses, as defined, at certain postsecondary educational institutions.

This bill would amend several definitions of terms for the purposes of the Golden State Scholarshare Trust Act to conform with definitions in federal law. The bill would authorize moneys to be invested for these purposes by a state or local government agency. The bill would also authorize the Student Aid Commission to issue emergency regulations for the purpose of the Golden State Scholarshare Trust Act in accordance with procedures prescribed in the Administrative Procedure Act.

(4) Existing law provides that the headquarters of members of all boards and all other employees shall be determined and fixed by the Department of Personnel Administration. Existing law provides that the headquarters of the Board of Governors of the California Community Colleges and the chief executive officer are in Sacramento.

This bill would require, notwithstanding existing law, the Board of Governors of the California Community Colleges to designate the headquarters for its employees, except the chief executive officer.

(5) Under existing law, the governing board of a community college district may establish auxiliary organizations, as defined, for the purpose of providing supportive services and specialized programs for the general benefit of its college or colleges.

This bill would enable the Board of Governors of the California Community Colleges to establish auxiliary organizations for the purpose of providing supportive services and specialized programs for the general benefit of the mission of the California Community Colleges. The bill would require that any agreement between the Board of Governors of the California Community Colleges and an auxiliary organization established under this provision shall provide full reimbursement from the auxiliary organization to the board for any services performed by employees of the board under the direction of, or on behalf of, the auxiliary organization.

(6) Existing law regulates the amount of fees that a community college may charge for parking.

This bill would permit a community college governing board to require payment of a parking fee at a campus in excess of established limits for the purpose of funding the construction of on-campus parking facilities if certain conditions are met.

(7) Existing law authorizes the governing board of the Butte Community College District to require the payment of a fee to recover transportation costs incurred by the district or reduce fares for common carriers or municipally owned transportation services.

This bill would extend this authority to every community college district and make related changes.

(8) Existing law provides that the governing board of a community college district that includes within its boundaries one or more counties, each of which has a population of 250,000 or less, may provide transportation services to students and employees and may require students and employees who use district transportation services to pay a fee to offset these costs. Existing law authorizes the governing boards of Pasadena and Santa Monica community colleges to require payment of a parking fee in excess of the amount otherwise permitted to be charged.

This bill would repeal these provisions.

(9) Existing law sets forth the requirements for eligibility for appointment or reappointment to the personnel commission of a community college district, including, but not limited to, the requirement that the person be a registered voter and resident within the territorial jurisdiction of the community college district and that the person be a known adherent to the principle of the merit system, as defined.

This bill would make technical, nonsubstantive changes in this provision.

(10) Existing law establishes the California State University and authorizes the Trustees of the California State University to carry out prescribed duties with respect to the administration of the university.

This bill would authorize the Trustees of the California State University to acquire, when it is in the best interests of the state, real property with revenues generated by the parking and housing programs of the California State University.

(11) Existing law requires that revenues received by the Trustees of the California State University from motor vehicle parking facilities, as well as from all parking facilities existing as of a specified date, be transmitted to the Treasurer and deposited in the State Treasury to the credit of the State University Parking Revenue Fund.

This bill would instead authorize the trustees to transmit these revenues to the Treasurer and require that, if the revenues are transmitted, these revenues are to be deposited in the State Treasury to the credit of the State University Parking Revenue Fund.

(12) Existing law authorizes the Trustees of the California State University to acquire pursuant to the Property Acquisition Law, or by lease or other means, real property on which it may construct and improve student health centers. Existing law authorizes the trustees to prescribe a fee for the acquisition, construction, and improvement of these student health facilities. Existing law generally requires that the revenues received by

the trustees from the facilities fee be transmitted to the Treasurer and deposited in the State Treasury to the credit of the State University Facilities Revenue Fund.

This bill would instead authorize the trustees to transmit these revenues to the Treasurer and require that, if the revenues are transmitted, these revenues are to be deposited in the State Treasury to the credit of the State University Facilities Revenue Fund.

(13) Existing law generally requires the Trustees of the California State University to transmit any revenues received by the trustees from extension programs, special session, and other self-supporting instructional programs to the Treasurer and deposited in the State Treasury to the credit of the State University Continuing Education Revenue Fund.

This bill would instead authorize the trustees to transmit these revenues to the Treasurer and require that, if the revenues are transmitted, these revenues are to be deposited in the State Treasury to the credit of the State University Continuing Education Revenue Fund.

(14) Existing law requires the chief fiscal officer of each campus of the California State University to deposit into and maintain in local trust accounts or in other trust accounts governed in accordance with specified provisions, or to deposit in the continuously appropriated California State University Trust Fund, moneys received in connection with gifts, bequests, devises, and donations; student loans or scholarship funds; advance payment for anticipated expenditures or encumbrances in connection with federal grants or contracts; room, board, and similar expenses of students enrolled in the international program of the university; cafeteria replacement funds; miscellaneous receipts in the nature of deposits; fees and charges for specified services, materials, and facilities; and fees and charges for instructionally related activities as defined by the Trustees of the California State University.

This bill would add to the funds that are required to be deposited into local trust accounts or into the California State University Trust Fund fees for parking, for health facilities or health services, for extension programs, special sessions, and other self-supporting instructional programs; revenue received from the California State Lottery Education Fund; and moneys received for research, workshops, conferences, institutes, and special projects. Because this bill would authorize the deposit of additional funds into the California State University Trust Fund, a continuously appropriated fund, it would make an appropriation.

(15) Existing law authorizes the Trustees of the California State University to transfer money from one special fund to another special fund or to the General Fund in order to meet the commitments of the California State University if the transferred moneys are returned to the special fund of origin in time to fulfill the purposes of the special fund. Existing law defines special fund, for these purposes, to exclude any fund subject to the State University Revenue Bond Act of 1947.

This bill would instead provide that the definition of special fund for these purposes includes any fund subject to the State University Revenue Bond Act of 1947. The bill would specify that this provision does not authorize any transfer or loan of money that would impair a contractual obligation of the trustee.

(16) Existing law establishes the Department of Personnel Administration for purposes of managing the nonmerit aspects of the state's personnel system. Existing law defines "employee" or "state employee" for purposes of those provisions to include employees of the California Maritime Academy.

This bill would exclude employees of the California Maritime Academy from that definition.

(17) Existing law requires the Student Aid Commission to set annual contribution limits and minimum and maximum investment levels relating to higher education expenses, and provides that the maximum annual contribution be set at a certain amount.

This bill would delete references to annual contribution limits.

Ch. 955 (SB 1517) Committee on Appropriations. Claims against the state: appropriation.

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate \$2,216,863.41 from the General Fund to the Executive Officer of the State Board of Control to pay claims accepted by the State Board of Control in accordance with a schedule that identifies various funds and accounts from which the payments are to be made.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 956 (SB 1518) Committee on Appropriations. Judgments and settlement claims against the state: appropriation.

Existing law requires the Attorney General to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state.

This bill would appropriate \$3,680,929.16 from the General Fund, as scheduled, to the Attorney General to pay specified judgments.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 957 (SB 2045) Greene. School facilities construction.

Pursuant to existing law, the Leroy F. Greene State School Building Lease-Purchase Law of 1976 (hereafter the Greene Act), the State Allocation Board (hereafter the board) is authorized to apportion state funding to applicant school districts for designated school facilities construction purposes. Existing law requires the board to grant first priority for construction funds to a school district with a substantial enrollment in multitrack year-round schools requesting state funding for 50% of the cost of a project, and second priority to school districts with a substantial enrollment in multitrack year-round schools requesting state funding for the entire cost of a project.

Existing law, notwithstanding these provisions, requires that, with certain exceptions, a project be accorded first priority if certain conditions are met, including, but not limited to, the requirement that the district document that it has incurred bonded indebtedness in an amount not less than 95% of the bonding capacity of the district, and that the district agree that all unexpended bonding capacity of the district, and all funding made available from prescribed sources, including, but not limited to, the Mello-Roos Community Facilities Act of 1982, and the Planning and Zoning Law, shall apply toward the district's 50% share of the costs of the project.

This bill would, instead, require the district to agree to apply 95% of the unexpended bonding capacity of the district, and would delete the provision limiting this amount to 50% of the cost of the project.

This bill would require the district, except as specified, to agree to apply developer fees toward the cost of projects for which the district requests Greene Act funding, would limit this provision to 50% of the cost of any project, and would exempt fees needed for interim housing for capital outlay purposes for modernization and new construction projects, school district administration capital outlay projects, and capital outlay projects for transportation needs.

This bill would include funding pursuant to the Mello-Roos Community Facilities Act of 1982, within the definition of bonded indebtedness for the purposes of the requirement that the district document that it has incurred bonded indebtedness in an amount not less than 95% of the bonding capacity of the district.

The bill would delete the reference to funding pursuant to the Planning and Zoning Law from the requirement that the district agree that certain funding be made available for the district's 50% share of the costs of the project.

This bill would authorize the board to recalculate program allowances and apportionments pursuant to these provisions.

Ch. 958 (SB 2128) Johnston. Highways: airspace leases.

Existing law authorizes the Department of Transportation to lease airspace under the interchange of Route 4 and Route 5 in San Joaquin County to any city, county, or other political subdivision, or any state agency, for emergency shelter or feeding program purposes.

This bill would authorize the department, on or after July 1, 1999, to lease airspace under the interchange of Route 4 and Sutter Street in San Joaquin County to any city, county, or other political subdivision, or any state agency, for feeding program purposes. The bill would require the lease to be for \$1 per month, with an administrative fee of not

more than \$500 per year. The bill would authorize the lease to be renewed under certain conditions.

Ch. 959 (AB 2259) Aguiar. Sex offender registration: disclosure.

(1) Existing law requires persons convicted of specified sex offenses to register with local law enforcement agencies upon their discharge, parole, or release from confinement and to update that registration annually or upon a change of residence address, and makes any willful violation of the registration requirements a crime. Existing law authorizes a peace officer to disclose specified information to specified persons and agencies to protect the public, if the officer reasonably suspects that a child or other person may be at risk from a person who is required to register as a sex offender. A law enforcement agency is also authorized to advise the public of the presence in the community of a high-risk sex offender, as defined.

This bill would impose a duty upon every person required to register as a sex offender, who applies or accepts a position as an employee or volunteer with any person, group, or organization, where the registrant would be working directly and in an unaccompanied setting with minor children on more than an incidental and occasional basis, or have supervision or disciplinary power over minor children, to disclose his or her status as a registered sex offender, upon application or acceptance of the position, to that person, group, or organization. Failure to comply with this disclosure requirement would be a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 960 (AB 2680) R. Wright. Sex offender registration.

(1) Existing law specifies that when a crime is punishable, in the discretion of the court, by imprisonment in the state prison or by fine or imprisonment in a county jail, it is a misdemeanor for all purposes under specified circumstances.

This bill would declare that nothing in this provision authorizes a judge to relieve a defendant of the duty to register as a sex offender if the defendant is charged with an offense for which registration as a sex offender is required, and for which the trier of fact has found the defendant guilty.

(2) Existing law requires the Department of Corrections, 15 days before the scheduled release date of a person who is required to register as a sex offender for the conviction of any specified sex offense, or who is sentenced to an enhanced term for prior sex offense convictions, to provide to local law enforcement certain information regarding the person.

This bill would generally extend the application of this provision by removing limitations with respect to the age of the victim of the specified sex offenses, and including additional offenses, including, but not limited to, kidnapping or assault with the intent to commit a specified sex offense, felony sexual battery, and rape in concert. The bill would delete the notification requirement with respect to any person who is sentenced to an enhanced term for prior sex offense convictions or as a habitual sexual offender or habitual child molester.

(3) Existing law provides that an appeal from a judgment of conviction does not stay the execution of the judgment or order granting probation in any case other than where sentence of death has been imposed, unless the trial, reviewing, or appellate court, in its discretion, so orders.

This bill would prohibit the court from staying any duty to register as a sex offender.

(4) Existing law requires a person convicted of a specified sex offense or the attempt to commit any specified sex offense, to register with a local law enforcement agency upon his or her discharge, parole, or release from confinement and to update that registration annually or upon a change of residence address.

This bill would require any local law enforcement agency that does not register sex offenders during regular daytime business hours on a daily basis, to notify the regional

parole office for the Department of Corrections and the Department of the Youth Authority, of the times, days, and locations that the agency is available for registration of sex offenders pursuant to the above provision. The bill would also require every parolee who is required to register as a sex offender to provide proof of registration to his or her parole agent within 6 working days of release on parole. By expanding the duties of local officials, this bill would impose a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 961 (SB 1976) Mountjoy. Sexually violent predators.

(1) Existing law provides that every person committed to a public or private mental health facility as a mentally disordered sex offender, who escapes from or who escapes while being conveyed to or from that mental health facility, is punishable by imprisonment in the state prison or in a county jail not to exceed one year.

This bill would, with respect to a person committed to a mental health facility as a sexually violent predator, require the medical director or person in charge of the facility to promptly notify either the Department of Corrections' Sexually Violent Predator Parole Coordinator or local law enforcement officials upon the escape. This bill, to the extent it increases the duties of local officials, would impose a state-mandated local program.

(2) Existing law provides that Atascadero State Hospital shall be used whenever a person is committed to a secure facility for mental health treatment as a sex offender and is placed in a state hospital under the direction of the State Department of Mental Health.

This bill would provide that Atascadero State Hospital shall be used for this purpose only until a permanent housing and treatment facility is available, and would provide that a permanent facility for the housing and treatment of persons committed for mental health treatment shall be located on a site or sites determined by the Director of the State Department of Mental Health and the Director of Corrections, with subsequent approval by the Legislature. The bill would direct the State Department of Mental Health to operate this facility, and would provide that, absent direct authorization by the Legislature, only mentally disordered sex offenders shall be treated therein.

(3) Under existing law, whenever the Director of Corrections determines that an individual who is in custody, and who is either serving a determinate prison sentence or whose parole has been revoked, may be a sexually violent predator, the director is required to refer the person for evaluation by the State Department of Mental Health, as specified. If the State Department of Mental Health determines that the person is a sexually violent predator, the Director of Mental Health is required to forward a request for a petition to be filed for commitment to the county in which the person was convicted of the offense for which the person was committed to the jurisdiction of the Department of Corrections. Copies of the evaluation reports are required to be made available to the county-designated attorney who may file a petition for commitment.

This bill would provide that the county-designated attorney shall notify the State Department of Mental Health of its decision regarding the filing of a petition for commitment within 15 days of making that decision.

(4) Existing law provides that a judge of the superior court shall review the petition for commitment and determine whether there is probable cause to believe that the individual named in the petition is likely to engage in sexually violent predatory criminal behavior upon his or her release.

This bill would require the court to notify the State Department of Mental Health of the outcome of the probable cause hearing by forwarding to the department a copy of the minute order of the court within 15 days of the decision.

(5) Existing law requires a judge of the superior court to review any petition submitted by an agency requesting an urgency review in cases where an inmate's parole

or temporary parole hold will expire before a probable cause hearing is conducted and to determine whether there is probable cause to believe that the individual named in the petition is likely to engage in sexually violent predatory criminal behavior upon his or her release.

This bill would provide that in no event shall more than 10 referrals be made to a superior court in any 30-day period for this purpose except upon agreement of the presiding judge of the court, the district attorney, the public defender, the sheriff, and the Director of Mental Health.

By requiring increased duties and responsibilities of local officials, this bill would impose a state-mandated local program.

(6) Existing law provides that a person subject to commitment as a sexually violent predator is entitled to specified rights, including a trial by jury.

This bill would provide that the court shall notify the State Department of Mental Health of the outcome of the trial by forwarding to the department a copy of the minute order of the court within 72 hours of the decision.

(7) Existing law requires a person who is determined to be a sexually violent predator to be committed for 2 years to the custody of the State Department of Mental Health for appropriate treatment and confinement in a secure facility, as specified. Existing law also provides that, until January 1, 1999, this 2-year term of commitment commences on the date upon which the court issues the initial order of commitment and is not reduced by any time spent in a secure facility prior to the order of commitment.

This bill would instead provide for the automatic repeal of these provisions relating to the date of commencement and term of the 2-year commitment period on July 1, 2001, at which time these provisions, minus the provision prohibiting the reduction of the term of commitment by any time spent in a secure facility prior to the order of commitment, would become operative.

(8) Existing law provides that if the court orders the immediate release of a sexually violent predator, the State Department of Mental Health shall notify the sheriff or chief of police, or both, and the district attorney, who has jurisdiction over the community in which the person is scheduled to be released at the time of release.

This bill would instead require the court to notify the Department of Corrections' Sexually Violent Predator Parole Coordinator, and require the Department of Corrections to notify the State Department of Mental Health, as well as the other officials cited above, when the court orders the immediate release of a sexually violent predator. The bill also would provide that when the department makes any recommendation to the court concerning either the release or commitment of a sexually violent predator, it shall, at least 15 days in advance of making its recommendation, notify specified local law enforcement officials (a) where the person may be released, (b) where the person last resided, or (c) in the county which filed for the person's civil commitment. The bill would provide that if a person is otherwise subject to parole, he or she shall remain in physical custody for a period not to exceed 72 hours or until parole arrangements are made by the Department of Corrections' Sexually Violent Predator Parole Coordinator, whichever is sooner. The bill would provide for the facilitation of timely parole arrangements, as specified.

(9) Existing law authorizes a sheriff or chief of police to notify appropriate persons upon the impending release of a sexually violent predator.

This bill would expand this authorization to allow for notification to appropriate persons of the disposition of a sexually violent predator upon notice from the State Department of Mental Health of its recommendation to the court in connection with a commitment hearing.

(10) Existing law requires a sheriff or chief of police to notify requesting parties of the impending release of a sexually violent predator, but allows disclosure of the community in which the person will be placed only if it is (a) in the county of a requesting witness, victim, or family member, or (b) within 25 miles of the actual residence of a requesting witness, victim, or family member.

This bill would provide that any person requesting notice shall be informed of the identity of the court considering the conditional release, recommitment hearing, or review of commitment status. The bill would also allow victims, witnesses, and family

members who request notification to be informed of the community where the person is scheduled to be placed if their actual residence is within 100 miles of that community.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, with regard to an identified mandate, no reimbursement is required by this act for a specified reason.

With regard to other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(12) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 962 (SB 1397) Brulte. Income taxes: exclusions: Swiss bank claims.

The Personal Income Tax Law allows various exclusions in computing the income that is subject to the taxes imposed by that law, including an exclusion for any amount received as compensation in any taxable year by a taxpayer pursuant to the German Act Regulating Unresolved Property Claims, as specified.

This bill would additionally exclude from taxation under that law any amount received by a taxpayer who is a Holocaust victim or the heir or beneficiary of a Holocaust victim as a result of a settlement of claims against any entity or individual for any recovered asset.

Existing law provides that, to the extent required by federal law, certain reparation payments received by United States citizens and resident aliens of Japanese ancestry who were interned during World War II shall not be considered as income or resources for purposes of determining eligibility to receive Medi-Cal or public assistance benefits or the amount of those benefits. Public assistance benefits include the county-administered CalWORKs program and the State Supplementary Program for the Aged, Blind, and Disabled.

This bill would exempt, for purposes of determining eligibility for public assistance and Medi-Cal benefits, certain amounts received by holocaust victims.

Since state funds are continuously appropriated to pay for the cost of public assistance benefits, and since this bill would increase the amount of assets which certain individuals would be able to possess for purposes of determining eligibility for public assistance programs, the bill would constitute an appropriation.

Since the bill would impact the eligibility of recipients for CalWORKs benefits, and since each county is required to pay for a share of the cost of aid grants under this program, the bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 963 (SB 1530) Hayden. Insurance practices: suspension for nonpayment of claims.

Under existing law, it is an unfair claims practice for an insurer to knowingly or with frequency fail to attempt in good faith to effectuate prompt, fair, and equitable settlements of claims in which liability has become reasonably clear. Existing law provides for civil penalties and administrative sanctions for violations.

This bill would provide that if an insurer or any affiliate of an insurer has failed to pay any valid claim from Holocaust survivors, as defined, the certificate of authority of the insurer shall be suspended until the insurer, or its affiliates, pays the claim or claims.

Under existing law, the Insurance Commissioner and the Department of Insurance have various duties with respect to the investigation of insurers.

This bill would require the department to develop and implement a coordinated approach to gather, review, and analyze the archives of affected insurance groups, and other archives and records, using onsite teams and an oversight committee, to provide for research and investigation into insurance policies, unpaid insurance claims, and related matters of victims of the Holocaust or of the Nazi-controlled German government or its allies, and the beneficiaries and heirs of those victims, and for losses arising from the activities of the Nazi-controlled German government or its allies for insurance policies issued before and during World War II by insurers who have affiliates or subsidiaries authorized to do business in California. The bill would also provide that the department has an affirmative duty to play an independent role in representing the interests of Holocaust survivors.

Existing law provides that if an insurer is unable to locate and deliver a Proposition 103 rebate, the funds attributable to the rebate escheat to the state and are required to be transferred to the Insurance Fund to be used to repay a specified loan that was made to the Insurance Fund.

This bill would also provide for the transfer of \$4,000,000 of that money to the Insurance Fund for expenditure for the above purposes for the 1998–1999 fiscal year relating to Holocaust claims, and would provide that the money is appropriated to the Insurance Commissioner for that purpose. For subsequent fiscal years the bill would provide that the funding of these provisions would be subject to the Budget Act, and based on a plan for reimbursement of department expenses submitted by the commissioner, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 964 (SB 1644) M. Thompson. Oil spills: nontank vessels.

(1) Under existing law, the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, tanker vessels entering the state are requested to submit a vessel contingency plan to the administrator for oil spill response at least 3 days prior to entering state waters, and to comply with specified requirements.

This bill would prohibit the operation of a nontank vessel, as defined, of 300 gross registered tons or greater in the marine waters of the state unless the owner or operator has an oil spill contingency plan prepared, submitted, and approved in accordance with prescribed procedures and requirements.

The bill would require each owner or operator of a nontank vessel on or before September 1, 1999, to prepare an oil spill contingency plan for that vessel, and submit the plan to the administrator for review and approval, as prescribed.

The bill would require the administrator to adopt regulations and guidelines to implement the requirements of the bill, as prescribed. The bill would require the vessel owner or operator to provide evidence of financial responsibility to the administrator, as described.

The bill would authorize the administrator to impose an administrative civil penalty of up to \$100,000 upon the owner or operator of a vessel who violates the contingency plan or financial responsibility requirements imposed by the bill, except as specified. The bill would also provide that an owner or operator who knowingly and intentionally violates those requirements is guilty of a misdemeanor and subject to a criminal penalty, thereby imposing a state-mandated local program by creating a new crime.

The bill would provide for a nonprofit maritime association that provides spill response services pursuant to a statewide spill response plan approved by the administrator, and its officers, directors, members, and employees, to have limited liability, as prescribed.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 965 (AB 2765) Committee on Public Employees, Retirement and Social Security. State Teachers' Retirement System: generally.

(1) The State Teachers' Retirement Law prescribes the rights and benefits of members of the State Teachers' Retirement System.

This bill would make technical, nonsubstantive changes in various provisions of that law.

(2) Existing law defines the term regular interest for purposes of various calculations and charges.

This bill would revise that term and would require the board to annually adopt that rate.

(3) Existing law requires the system's governing board upon the recommendation of the actuary, to adopt mortality and other tables and interest rates.

This bill would instead require the board to adopt certain information and would delete the actuary recommendation requirement.

(4) Existing law limits postretirement school employment.

This bill would permit retired members to be employed by school districts to meet the objectives of the Class Size Reduction Program.

(5) Existing law requires a quarterly report on assets to be submitted to the Legislature.

This bill would delete that requirement.

(6) Existing law authorizes assessment of penalties against employers for late reports or unacceptable forms of not less than \$500.

This bill would delete that limitation.

(7) Existing law provides that the employee contribution rate to the State Teacher's Retirement System Cash Balance Plan shall not exceed the employer contribution rate.

This bill would provide that the employee rate may exceed the employer rate but that the employer contribution vote may not be less than 4%.

(8) Existing law authorizes school governing boards to encourage retirements by providing additional service credit and provides until July 1, 2000, that certain types of postretirement school employment is exempted from postretirement school employment limitations.

This bill would extend that exemption to July 1, 2003.

(9) Pursuant to existing law, the Board of Administration of the Public Employees' Retirement System administers an agreement with the federal government for social security coverage of employees of the state and the political subdivisions thereof which contract for coverage. The existing law authorizes each school district, from July 1, 1990, to July 1, 1993, and the State Teachers' Retirement System, on and after July 1, 1993, to apply to the Board of Administration of the Public Employees' Retirement System for elections among their respective certificated employees who are members of the State Teachers' Retirement System for the election of Medicare coverage of those certificated employees who elect it. The existing law also makes certain of these provisions inoperative on July 1, 1999, and repeals them as of January 1, 2000.

This bill would extend the repeal date of certain of these provisions from January 1, 2000, to January 1, 2005.

(10) This bill would also provide that its amendments to Sections 22601.5, 22602, 22604, 26301, 26400, 26401, 26504, 27410, and 22601.5 of the Education Code shall not become operative, and shall be repealed on January 1, 1999, if SB 2085 of the 1997-98 Regular Session is enacted prior to this bill and amends those sections.

(11) This bill would incorporate additional changes in Section 23203 of the Education Code made by SB 2126 contingent upon the prior enactment of SB 2126, as specified.

(12) This bill would also provide that its amendment of Section 27405 of the Education Code would be contingent upon the enactment of SB 2085.

(13) This bill would also provide that the form of its proposed amendments to Section 22664 of the Education Code is contingent upon the enactment of SB 2126.

Ch. 966 (AB 1150) Prenter. State Teachers' Retirement System: benefits.

The State Teachers' Retirement Law prescribes a 2% at age 60 retirement allowance.

This bill would incrementally increase that percentage to 2.40% at age 63 for members who retire for service on and after January 1, 1999. The bill contains a statement of legislative findings and declarations.

The bill would become operative only if AB 1102, AB 2804, and SB 1528 are all also enacted and become operative.

Ch. 967 (AB 2804) Committee on Public Employees, Retirement and Social Security. Public retirement systems: benefits.

(1) Existing law provides a continuous appropriation from the General Fund to the Teachers' Retirement Fund of an amount equal to 4.3% of the annual total creditable compensation for purposes of meeting certain obligations and benefit costs.

This bill would change that appropriation on July 1, 1999, to 3.102% of the annual total creditable compensation. The bill would require another additional specified continuous annual appropriation to be made from the General Fund to the Teachers' Retirement Fund commencing on October 1, 1998, and require those funds to be first transferred to eliminate unfunded actuarial liabilities on or before June 30, 2027. The bill would require specified additional employer contributions to be paid on account of liabilities for sick leave credit benefits and would repeal provisions requiring additional employer contributions for specified retirement allowance increases. The bill would make legislative findings and declarations regarding the provisions.

(2) The bill would become operative only if AB 1102, AB 1150, and SB 1528 are all enacted and become operative.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 968 (SB 1528) Schiff. State Teachers' Retirement System: health insurance.

The State Teachers' Retirement Law prescribes retirement and disability benefits for school employees and their families.

This bill would require the Teachers' Retirement Board to conduct a study, as specified, assessing how to develop a process to contract for health insurance, including vision and dental care, for members, beneficiaries, children, and dependent parents. This bill would also appropriate \$200,000 from the Teachers' Retirement Fund to the board to develop a plan for these purposes, and if implemented, require the board to reimburse the Teachers' Retirement Fund this sum.

Ch. 969 (SB 1913) Ayala. Office of the Inspector General.

Existing law establishes the office of the Inspector General, to be housed and supported by the Youth and Adult Correctional Agency, and prescribes the responsibilities of that office. Existing law authorizes the office of the Inspector General to receive communications from any individual employed by any department, board, or authority who believes he or she may have information that may describe a variance from departmental investigatory policies and procedures.

This bill would revise and recast these provisions by specifying that the office of the Inspector General shall be independent, and would require the Youth and Adult Correctional Agency, in consultation with the Commission on Correctional Peace Officer Standards and Training and the Inspector General, to establish a certification program for investigators of the office of the Inspector General, the Youth and Adult Correctional Agency, the Department of the Youth Authority, the Department of Corrections, the Board of Corrections, the Youthful Offender Parole Board, and the Board of Prison Terms. The bill also would require the Inspector General to establish a toll-free public telephone number to be posted at specified locations for the purpose of identifying any alleged wrongdoing by any public safety employee.

The bill additionally would authorize the State Controller, at the request of the Department of Finance, to transfer positions and funds, as appropriated in the Budget Act of 1998, from the Youth and Adult Correctional Agency to the Department of Corrections and the Department of the Youth Authority for purposes of the internal affairs operations of those departments, thereby making an appropriation. Under the bill, all funds appropriated and positions created for support of the office of the Inspector General in the Budget Act of 1998, would be required to be transferred, upon approval of the Department of Finance, to the office of the Inspector General created by these provisions. The bill also would require the Department of Corrections, the Department of the Youth Authority, and the office of the Inspector General to submit a deficiency request to the Department of Finance pursuant to the Budget Act of 1998.

Ch. 970 (AB 2802) Committee on Consumer Protection, Governmental Efficiency and Economic Development. Professions and vocations.

Existing law provides for the licensure, regulation, and discipline of various professions and vocations. These provisions are administered by boards and examining committees established within the Department of Consumer Affairs.

This bill would change the names of the Board of Funeral Directors and Embalmers and the Cemetery Board to the Funeral Directors and Embalmers Program and the Cemetery Program, respectively, each to be administered by the Department of Consumer Affairs.

This bill would authorize each bureau and program under the direct authority of the Director of Consumer Affairs to synchronize the renewal dates of licenses granted to applicants with more than one license issued by the bureau or program. It would also establish a standard "abandonment date" for applications that have been returned to the applicant as incomplete, and would abolish grace periods during which no fees are assessed in connection with the renewal of licenses.

This bill would change the name of the Arbitration Review Program to the Arbitration Certification Program.

This bill would prohibit a registered nurse from petitioning to reinstate a license that has been revoked while the nurse is subject to an order of registration as a sex offender, rather than as a mentally disordered sex offender.

This bill would require that hearing aid dispensers who renew their licenses after their expiration, pay a delinquency fee.

This bill would revise certain provisions dealing with the process for appealing citations issued for violation of the Barbering and Cosmetology Program's rules and regulations.

This bill would revise provisions relating to the registration of private patrol operators and alarm company employees. This bill would require private patrol operators, and officers and employees thereof, to wear a uniform that is distinctive, and that includes a department approved patch on each shoulder and a department approved badge or cloth patch on the upper left breast of the uniform. This bill would revise certain provisions relating to the grounds for disciplinary action against funeral directors and embalmers.

This bill would revise and add certain registration provisions for automotive repair dealers. This bill would delete the requirement that the State Athletic Commission issue performance cards to all boxers who fight in California.

This bill would add the Division of Investigation to those agencies authorized to be given information relevant to an incident of elder or dependent adult abuse.

This bill would extend the sunset date of the Board of Guide Dogs for the Blind from January 1, 1999, to July 1, 2002, and would delete an obsolete reference to a related pilot project.

This bill would increase the renewal periods for licenses and registrations issued by the Bureau of Security and Investigative Services.

This bill would prescribe certain standards pursuant to which the department may hold and manage conserved cemetery trust funds.

This bill would make additional technical and conforming changes.

This bill would incorporate additional changes in Sections 7685.2 and 9741 of the Business and Professions Code, proposed by AB 1705, to be operative only if AB 1705 and this bill are both chaptered and become effective on January 1, 1999, and this bill is chaptered last.

Ch. 971 (AB 2721) Miller. Healing arts licensees: unprofessional conduct: acupuncture licensees.

(1) Existing law provides for the regulation of various enumerated healing arts professionals and specifies certain acts as constituting unprofessional conduct.

This bill would specifically provide that any person who is licensed, certified, registered, or otherwise regulated under those provisions and who engages in, or who aids or abets in, a violation of certain prostitution related crimes occurring in the work premises of, or the work area under the direct professional supervision or control of, that person is guilty of unprofessional conduct, and subject to disciplinary action against his

or her license. The bill would also provide for the imposition of a civil penalty that may be assessed and recovered in a civil action brought by any district attorney and, upon recovery, to be paid to the treasurer of the county in which the judgment was entered.

(2) The Acupuncture Licensure Act provides for the licensing and regulation of any person who practices acupuncture or holds himself or herself out as practicing or engaging in the practice of acupuncture. The Acupuncture Committee of the Division of Licensing of the Medical Board of California is responsible for administering the act.

The Acupuncture Licensure Act requires an acupuncturist to post his or her license in a conspicuous location in his or her place of practice at all times, and requires a duplicate license to be posted for each additional location.

This bill would additionally require registration with the Acupuncture Committee of all places of practice of a licensee within 30 days of licensure and of all changes in location of places of practice within 30 days of the change. The bill would make related changes, including the addition of certain transition provisions that would apply in the reduction of the membership of the committee, or a successor board or entity, from 11 to 9 members.

This bill would also make certain technical changes correcting obsolete references to various boards and committees within the department.

Ch. 972 (SB 989) Sher. State Board of Forestry.

Under existing law, there is in the Department of Forestry and Fire Protection the State Board of Forestry.

This bill would change the name of the board to the State Board of Forestry and Fire Protection.

The bill would incorporate amendments to Section 61601.25 of the Government Code contained in SB 1649, with the amendments to be operative only if that section is amended by SB 1649 and this bill is enacted after SB 1649.

The bill would incorporate amendments to Section 42311.2 of the Health and Safety Code contained in AB 1740, with the amendments to be operative only if that section is amended by AB 1740 and this bill is enacted after AB 1740.

Ch. 973 (SB 1825) Committee on Judiciary. Superior and municipal courts.

Existing law sets forth the number, classification, and compensation of employees of the various superior and municipal courts. Existing law authorizes the superior court, with the approval of the board of supervisors, to establish additional titles and pay rates, and to appoint and employ additional commissioners, officers, assistants, and other employees as it deems necessary, as specified. Existing law also requires superior and municipal courts of each county to adopt a coordination plan that takes into consideration the standards adopted by the Judicial Council, which include the use of blanket cross-assignments allowing judges to hear cases within the jurisdiction of another court, the coordinated, joint use, sharing or merger of court support staff among trial courts, and the unification of trial courts within a county to the extent permitted by the California Constitution.

This bill would impose a state-mandated local program by revising the number, classification, and compensation, as applicable, of employees of the Superior Courts of Los Angeles and Orange Counties, and of the Municipal Courts of Contra Costa, Fresno, Glenn, Humboldt, Imperial, Kings, Los Angeles, Madera, Merced, Monterey, Orange, San Diego, San Luis Obispo, Santa Barbara, and Santa Clara Counties. The bill would make similar changes affecting the shared staffing in the Superior and Municipal Courts of Calaveras, El Dorado, Lake, Marin, Mendocino, Nevada, San Mateo, Siskiyou, Tulare, and Ventura.

The bill would also increase the number of court commissioners who may be appointed by the judges of Fresno County and revise the compensation for those positions.

The bill would make additional changes to Sections 74368 and 74370 of the Government Code contingent upon the prior enactment of AB 2406.

Ch. 974 (AB 2150) Brewer. Depositions: computer-assisted transcription.

Existing law requires that a party serve notice of a deposition, and specifies the contents of that notice.

This bill would require the deposition notice to state any intention to record the testimony by stenographic method through the instant visual display of the testimony and would require that this notice also be given to the deposition officer. The bill would also require that any offer to provide this instant access or to provide rough draft transcripts which is accepted prior to, or offered at, the deposition, shall be made by the deposition officer at the deposition to all parties attending the deposition.

This bill would incorporate additional changes to Section 2025 of the Code of Civil Procedure proposed by AB 1094 and SB 2145, to become operative only if this bill and one or both of the other bills are enacted and this bill is enacted last.

Ch. 975 (AB 214) Thomson. Medi-Cal managed care plans: prescribed drugs.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Under existing law, one of the methods by which Medi-Cal services are procured is through contracts between the department and managed care plans, as defined.

The Medi-Cal program is this state's version of the federal medicaid program. Federal medicaid provisions permit a state to impose prior authorization requirements for outpatient drugs covered by the program.

This bill would require a managed care plan that has prescribed drugs as one of its benefits and that contracts with the department to provide specified services for drugs that require prior authorization under the Medi-Cal program.

The bill would also require a managed care plan to permit a Medi-Cal beneficiary enrolled in the plan to continue use of a single-source drug that is part of a prescribed therapy in effect for the beneficiary immediately prior to the date of enrollment, whether or not the drug is covered by the plan, until the prescribed therapy is no longer prescribed by the contracting physician.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 976 (AB 324) Baldwin. Veterans Alzheimer's Disease and related dementia.

Existing law provides for the establishment and operation of the Veterans' Home of California at various sites for aged and disabled veterans who meet certain eligibility criteria.

This bill would provide that the Veterans' Home of California at the Barstow site may provide skilled nursing care for up to 250 residents.

Ch. 977 (AB 426) Alquist. Medi-Cal: managed care.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. Under existing law, Medi-Cal services may be provided to a beneficiary or eligible applicant by an individual provider, or through a prepaid managed health care plan, pilot project, or fee-for-service case management provider. Under existing law, each beneficiary or eligible applicant shall be provided with information as to health care options, including certain provider information. Additionally, existing law permits an applicant who chooses to enroll in a managed care plan, pilot project, or fee-for-services case management provider to indicate his or her choice of a primary care provider.

This bill would revise information regarding primary care providers and clinics participating in each health care plan that shall be provided to each beneficiary or eligible applicant for services through a health care plan, and would specify the format in which the information shall be organized.

Existing law authorizes the department to contract with various types of health care providers and entities in order to obtain Medi-Cal services through managed care arrangements. Existing law requires that various of those contracts are subject to the approval of the Department of Finance.

The bill would delete the requirement of approval by the Department of Finance of specified types of contracts.

Ch. 978 (AB 715) Figueroa. Solid waste facilities: closure: financial ability.

Existing law requires any person owning or operating a solid waste landfill, as defined, who submits a closure plan and postclosure maintenance plan to the California Integrated Waste Management Board, to also submit to the board evidence of financial ability to provide for the cost of closure and postclosure maintenance, in an amount that is equal to the estimated cost of closure and 15 years of postclosure maintenance, contained in the closure plan and the postclosure maintenance plan submitted.

This bill would provide that if the evidence of financial ability for closure, postclosure, or corrective action is demonstrated by the use of insurance, the board may approve the use of insurance if it meets specified criteria.

The bill would permit the board to require a solid waste facility operator using or proposing to use an insurance company to demonstrate financial assurance to pay a fee for the actual and necessary cost of reviewing information submitted by the operator not to exceed \$10,000, unless a higher amount is mutually agreed to by the operator and the board.

Ch. 979 (AB 984) Davis. "911" emergency response system: health care coverage.

(1) Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for licensure and regulation of health care service plans by the Commissioner of Corporations, and requires the commissioner to require each plan to use disclosure materials that provide, among other things, a description of any limitations on the patients choice of primary care or specialty care provider. Willful violation of those provisions is a crime. Existing law also provides for the regulation of policies of disability insurance by the Insurance Commissioner.

This bill would require, on or before July 1, 1999, the disclosure material to contain a statement that enrollees are encouraged to use appropriately the "911" emergency response system, as prescribed.

(2) Existing law requires that health care service plans and disability insurance policies provide coverage for certain services and treatments. Existing law requires a health care service plan, except a specialized health care service plan, to provide all basic health care services, defined to include, among other services, emergency health care services, including ambulance services and out-of-area coverage. The commissioner is authorized by rule to define the minimum scope of each basic health care service.

This bill would revise the definition of "basic health services" to provide that it includes ambulance and ambulance transport services provided through the "911" emergency response system.

(3) Existing law requires a health care service plan, or its contracting medical providers, to provide 24-hour access for enrollees and providers to obtain timely authorization for medically necessary care, for circumstances where the enrollee has received emergency services and care, as defined, and is stabilized, but the treating provider believes that the enrollee may not be transferred or discharged safely.

This bill would prohibit a health care service plan that provides basic health care services from requiring prior authorization or refusing to pay for any ambulance and ambulance transport services provided to an enrollee as a result of a "911" emergency response system request for assistance if the request was made for an emergency medical condition and ambulance transport services were required or if the enrollee reasonably believed that the medical condition was an emergency medical condition and reasonably believed that the condition required ambulance transport services.

This bill would require every disability insurance policy issued, amended, renewed, or delivered in this state, after January 1, 1999, that provides hospital, medical, or surgical coverage under specified health benefit plans that includes coverage for emergency health care services, to include coverage for medical transportation services, defined as ambulance services provided through the "911" emergency response system.

(4) Existing law requires the authority, pursuant to the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act, to develop planning and implementation guidelines for emergency medical services systems that address, among other components, transportation. Existing law requires the authority to establish regulations and make determinations that would permit a local EMS agency to implement a local plan. Existing law prohibits the regulations, standards, and guidelines

adopted by the authority and by local EMS agencies to prohibit a hospital that contracts with group practice prepayment health care service plans from providing necessary medical services for the members of the plan.

This bill would require that the rules and regulations of the authority include a requirement that a local EMS agency local plan require that in providing emergency medical transportation services to a patient that has a primary care facility designated by his or her health care service plan that the patient shall be transported to the closest appropriate medical facility, if the emergency health care needs of the patient dictate this course of action. By increasing the duties of the local EMS agency, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 980 (AB 1780) Murray. Elder abuse: reporting requirements.

Existing law defines physical abuse for purposes of reporting elder and dependent adult abuse.

This bill would expand that definition, as specified.

Existing law requires any mandated reporter, as defined, who observes in his or her professional capacity, or within the scope of his or her employment, an instance of physical abuse against an elder or dependent adult, to report the abuse under specified circumstances. The report must be made to the local ombudsman or to a local law enforcement agency if the abuse has occurred in a long-term care facility, except as specified. Failure to make a required report is punishable as a misdemeanor.

This bill would expand the definition of mandated reporter, as specified, would delete the specified circumstances under which the above report is required to be made, and would instead require that a report be made when the mandated reporter reasonably suspects that the elder or dependent adult has suffered physical abuse, abandonment, isolation, financial abuse, or neglect. The bill would also increase the penalty for failure to report in specified circumstances. Because this bill would expand the definition of, and penalties for, a crime, and increase the reporting duties of local officials, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 981 (AB 1884) Cedillo. Proceedings involving minors: interpreters.

Existing law provides for custody proceedings and other proceedings in which the best interest of a minor child are at issue.

This bill would direct the Judicial Council to create a one-year pilot project in at least 2 counties, one of which shall be Los Angeles County, to provide that in any child custody proceeding, including mediation and other proceedings, the court shall appoint an interpreter to interpret the proceedings at court expense if one or both of the parties is unable to participate fully in the proceeding due to a lack of proficiency in the English language, and the court determines that the parties are financially unable to pay the cost of an interpreter. The bill would require the Judicial Council to submit its findings and

recommendations regarding the pilot project by January 31, 2001. The bill would also declare the intent of the Legislature in this regard.

Funding for the implementation of these provisions would be pursuant to the appropriation of funds in the Budget Act.

The bill would impose a state-mandated local program by imposing a new program on courts.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 982 (AB 1942) Papan. Hospitals: consolidated licenses: disproportionate share eligibility.

Existing law provides for the licensure and regulation of health facilities, as defined, by the State Department of Health Services. Existing law prohibits the department from issuing a single consolidated license to a general acute care hospital that has 2 or more physical plants at more than one site that are more than 15 miles apart unless the hospital meets certain criteria.

This bill would authorize the department, notwithstanding the above prohibition, to issue a single consolidated license for a general acute care hospital to a hospital meeting specified criteria.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law generally defines a disproportionate share hospital as a hospital that has disproportionately higher costs, volume, or services relating to the provision of services to Medi-Cal or other low-income patients than the statewide average. Under existing law, a disproportionate share hospital meeting certain conditions is eligible to receive supplemental Medi-Cal reimbursement, the amount of which is determined in accordance with specified requirements.

This bill would provide that any children's hospital, as defined, that holds a consolidated license pursuant to the provisions of the bill may be evaluated for eligibility for payments under existing disproportionate share hospital payment provisions no earlier than July 1, 2000, using data relating to all physical plants appearing on the consolidated license. The bill would state that these provisions would only be implemented if specified requirements are met.

This bill would incorporate changes to Section 1250.8 of the Health and Safety Code made by SB 1541, which shall become operative only if both this bill and SB 1541 are chaptered and this bill is chaptered last.

Ch. 983 (AB 2286) Scott. Foster parent and caregiver adoptions.

Existing law generally regulates adoptions and requires the State Department of Social Services to establish and administer a program to encourage and promote the adoption of children eligible for the Adoption Assistance Program, as specified.

This bill would provide that, if the prospective adoptive parent of a child is either a foster parent with whom the child has lived for a minimum of 6 months or a relative caregiver with whom the child has had a significant, ongoing relationship, an assessment or home study of the prospective adoptive parent may, at the discretion of the department or licensed adoption agency, or unless a court orders otherwise, only require a criminal records check, as specified, specified determinations regarding the prospective adoptive parent's financial stability, care-giving abilities, and disciplinary practices, and interviews with specified individuals, and shall include a specified medical examination, except in a specified circumstance.

This bill would require the department or licensed adoption agency to require the adoptive parent to be provided with specified information relating to the specific needs

of the child, as specified, and would require the department to encourage adoption agencies to make adoption training programs available. The bill would also require the department to require adoption agencies to, among other things, inform the responsible placing agency when a relative caregiver or foster parent has been denied approval to adopt based on an inability of the caregiver or foster parent to provide for the health, safety, and security of the child.

By imposing additional duties upon local officials, this bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 984 (AB 2305) Runner. Health care.

(1) Existing law provides that repeated acts of clearly excessive prescribing or administering of drugs or treatment is unprofessional conduct for a physician and surgeon, dentist, podiatrist, psychologist, physical therapist, chiropractor, or optometrist. Existing law prescribes certain criminal sanctions for any person who engages in repeated acts of clearly excessive prescribing of drugs or treatment.

This bill would revise these provisions to make them applicable to repeated acts of excessive prescribing or administering of drugs or treatment. The bill would provide that no physician and surgeon in compliance with the California Intractable Pain Treatment Act shall be subject to disciplinary action for engaging in specified lawful conduct. By changing the definition of existing crimes, this bill would impose a state-mandated local program.

(2) The Medical Practice Act establishes the Medical Board of California, which reviews, through its Division of Medical Quality, the quality of medical practice carried out by physician and surgeon certificate holders under the jurisdiction of the board. It also authorizes the board to select and contract with necessary medical consultants who are licensed physicians and surgeons to assist the board in its programs.

This bill would, in addition, require that every consultant retained by the board under that provision for a given investigation of a licensee be a specialist, as defined.

(3) Existing law prohibits a health care service plan contract that covers prescription drug benefits from being issued, amended, delivered, or renewed if the plan limits or excludes coverage for a drug on the basis that the drug is prescribed for a use that is different from the use for which the drug has been approved for marketing by the federal Food and Drug Administration if the drug meets certain conditions. Willful violation of the law regulating health care service plans is a crime.

This bill would require every health care service plan contract that covers prescription drug benefits to provide coverage for appropriately prescribed pain management medications for terminally ill patients when medically necessary. The bill would also provide that coverage for different-use drugs shall be subject to a specified provision of existing law. By changing the definition of a crime, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 985 (AB 2377) Frusetta. Corporations: listed corporations: boards of directors.

Existing law authorizes a listed corporation, by amendment of its articles or bylaws, to adopt provisions to divide the board of directors into 2 or 3 classes or to eliminate cumulative voting, or both. Existing law defines a "listed corporation" for these purposes

as, among other things, a corporation with outstanding securities designated as qualified for trading as a national market system security on the National Association of Securities Dealers Automatic Quotation System if the corporation has at least 800 holders of its equity securities as of the record date of the corporation's most recent annual shareholders meeting.

This bill would authorize a listed corporation that is engaged in business limited to the operation and maintenance of a recreation venture having golf and tennis facilities and ancillary dining and beverage services to divide its board of directors into 2 classes with $\frac{1}{2}$ of the directors to be elected by the shareholders annually, as long as it has at least 600 holders of its equity securities. The bill would restrict the applicability of this provision to eligible corporations that limit each holder of its securities to 5 shares and require some of those persons to occupy dwellings immediately contiguous to the real property of the corporation, and would require an amendment of the corporation's articles or bylaws.

Ch. 986 (AB 2627) Brown. Works of improvement.

Existing law generally regulates the enforcement of mechanics' liens and the use of stop notices for private works of improvement and for public works. Existing law requires, except as otherwise agreed to in writing, the owner of a work of improvement to pay to the contractor, within 30 days following receipt of a demand for payment in accordance with the contract, any progress payment due thereunder as to which there is no good faith dispute between the parties. Existing law entitles a contractor to a penalty if any amount is wrongfully withheld in violation of this provision.

This bill would provide that if an original contractor is not paid all moneys owed pursuant to a written contract for a work of improvement within 35 days from the date payment is due pursuant to the contract, and there is no dispute as to the satisfactory performance of the contractor, the contractor has the right to serve, as specified, a 10-day stop work order that states that unless all amounts then due are paid within 10 days of notice, as specified, the contractor will stop work on the project. The bill would require the owner to notify the construction lender upon receipt of notice from the original contractor, as specified. The bill would provide that the contractor or his or her surety or subcontractor or his or her surety shall not be liable for any delays or damages that the owner may suffer as a result of the contractor serving the stop work order and subsequently stopping work for nonpayment, and would specify the contractor's or subcontractor's liability to a subcontractor or material supplier. This bill would authorize an expedited proceeding in the superior court in the county in which the project is located regarding liability for the amount not paid for work performed. The bill would also provide that it is against public policy to waive these provisions in a written contract for private work of improvement.

Ch. 987 (SB 1340) Polanco. Solid waste enterprise: indemnity obligation.

The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program.

Under the act, each county, city, or district may determine aspects of solid waste handling that are of local concern and the means by which the services are to be provided. A solid waste enterprise is a person regularly engaged in the business of providing solid waste handling services.

The act requires the diversion of solid waste from disposal, as prescribed.

This bill would impose specified restrictions on the enforceability of an indemnity obligation contained in any provision, term, condition, or requirement in an ordinance, contract, franchise, license, permit, or other entitlement or right adopted, entered into, issued, or granted, as the case may be, by a local agency for solid waste collection and handling, including the recycling, processing, or composting of solid waste, or in any request for bids or proposals in connection with any such contract or franchise.

Ch. 988 (SB 1454) Leslie. Investigative consumer reporting.

Existing law, as contained in the Investigative Consumer Reporting Agencies Act, regulates the preparation, disclosure, and use of investigative consumer reports.

Existing law defines an “investigative consumer report” as a report in which specified information on a consumer is obtained through personal interviews and defines an “investigative consumer reporting agency” as any person who, for a fee, assembles employment or insurance information, or information relating to the hiring of dwelling units concerning consumers for 3rd parties for specified purposes.

This bill would redefine an “investigative consumer report” as a report in which specified consumer information is obtained by any means, subject to an exception, and an “investigative consumer reporting agency” as any person who, for a fee, assembles any information concerning consumers for 3rd parties.

Existing law generally provides that a person may not obtain an investigative consumer report with respect to a consumer unless the person discloses in writing to the consumer that the report will be made and provides other specified information.

This bill would require, as a further condition to obtaining an investigative consumer report, that the person certify to the agency that he or she (1) has made the required consumer disclosures and (2) will provide additional specified disclosures if requested by the consumer. The bill would also require an investigative consumer reporting agency that provides an investigative consumer report to a person other than the consumer to make a copy of that report available to the consumer, as specified, for at least 60 days after the date the report is provided to the other person.

Existing law provides that consumers have the right to visually inspect all files maintained by an investigative consumer reporting agency regarding that consumer, except medical information, as defined. Existing law also provides that consumers have the right to be informed by the user of consumer information of the reasons for any adverse action taken with respect to specified insurance due to information obtained from a person other than an investigative consumer reporting agency, except that the user may withhold medical information, as defined, until the consumer obtains written authorization from the consumer’s physician.

This bill would delete both of these exceptions relating to medical information. It would also prohibit an investigative consumer reporting agency from furnishing an investigative consumer report containing that defined medical information without the consumer’s consent.

Existing law provides that investigative consumer reports may not include, among other things, any arrest records, unlawful detainer actions unless the lessor was the prevailing party, as specified, paid tax liens, or other specified items that antedate the report by more than 7 years.

This bill would revise the prohibition against inclusion of unlawful detainer actions and specify that information relating to an arrest, indictment, conviction, civil action, tax lien, or outstanding judgment may not be included in a report unless verified by the agency no more than 30 days prior to the date of the report, and adverse information obtained through a personal interview, as specified, may not be included in a report unless it is either verified by a 2nd party or the interviewee is the best source of the information.

Existing law gives consumers the right to dispute inaccurate information contained in an investigative consumer report and to bring an action to recover damages for violations of the act in an amount equal to the greater of actual damages or \$300.

This bill would add new procedures and notice requirements relating to the investigation of disputes by consumers and the deletion of information in a consumer’s file that is determined to be inaccurate. The bill would also increase the minimum amount of damages recoverable by a consumer for violations of the act from \$300 to \$2,500.

Existing law specifies that reasonable charges may be imposed upon a consumer to receive a copy of an investigative consumer report relating to that consumer, unless the copy is requested after the taking of an adverse action against the consumer based on the report, as specified.

This bill would specify the amount of fee, if any, that may be charged to a consumer to receive a copy of an investigative consumer report or other disclosures relating to that consumer. The bill would require investigative consumer reporting agencies to provide a consumer with a copy of his or her investigative consumer report, free of charge, not more often than once a year, if the consumer is unemployed, is seeking employment,

receives public welfare assistance, or believes that his or her file contains inaccurate information due to fraud.

The bill would make other related changes.

Ch. 989 (SB 1557) Johnson. Redevelopment: Tustin Marine Corps Air Station.

Existing law authorizes a redevelopment project for the Tustin Marine Corps Air Station and surrounding areas.

This bill would add to that law provisions providing that if the City of Tustin's historic preservation program is certified pursuant to federal law, the city may assume prescribed duties that are given to the state historic preservation officer for purposes of federal law relating to the protection of historic properties as it applies to the survey area created for the Tustin Marine Corps Air Station redevelopment project. The bill would require the state historic preservation officer to agree to that assumption. The bill would require the city, in assuming those duties, to determine in good faith the feasibility of permanent reuse of certain buildings, and to require mitigation for the adverse effects prior to approving any undertaking if that reuse is determined not to be feasible.

This bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 990 (SB 1744) Johnston. Job training.

Existing law establishes the State Job Training Coordinating Council.

Under existing law, the Secretary of the Health and Welfare Agency, the Secretary of the Trade and Commerce Agency, the Chancellor of the California Community Colleges, and the Superintendent of Public Instruction are required to develop and maintain an integrated state work force development plan.

This bill would instead require those persons, in collaboration with state and regional, as well as local work force education and training providers, private industry councils, and business and labor representatives, to develop a state work force development plan to create an integrated, high-quality work force development system out of the current array of job training and vocational education programs. The bill would revise provisions related to the plan, including a requirement that it be updated every five years and include specified matters, and a requirement that a final recommendation be transmitted to the Governor and the Legislature by October 1, 1999. The bill would make related changes.

Ch. 991 (SB 1980) Greene. Regulatory boards and committees.

Existing law provides for the creation of the Physical Therapy Board of California, a State Board of Optometry, the Respiratory Care Board of California, an Acupuncture Committee, and the Court Reporters Board and provides for the termination of the existence of these licensing and regulatory entities on July 1, 1999.

This bill would extend the termination date of these entities, as specified, and would make similar date changes in related provisions. It would rename the "Acupuncture Committee" the "Acupuncture Board," and revise the composition, qualifications, and appointment of the membership of various of these boards, as specified. It would authorize those boards and other regulatory entities, designated by the Department of Consumer Affairs as health-related, to adopt regulations to require licensees to display their licenses, as specified, and to inform patients as to the identity of the regulatory agency they may contact with questions or complaints about a licensee. It would require the Court Reporters Board of California to provide an assessment of its examination's low pass rate, as specified.

This bill would require the Physical Therapy Board of California to undertake a study and report to the Legislature on or before October 1, 1999, relative to alternatives for certification in order for a physical therapist to perform tissue penetration and evaluation.

This bill would revise various fees paid by certified acupuncturists to the Acupuncture Board.

Existing law provides for the licensure and regulation of respiratory care practitioners by the Respiratory Care Board and prescribes certain fees to be paid by licensees in connection with their licensure. Those fees are required to be paid into the Respiratory Care Fund, a continuously appropriated fund, to be used for specified purposes.

This bill would increase those license fees, as specified, and would provide for additional fees relating to approval of continuing education providers and other matters, and, thus, would make an appropriation. It would require the board to fix the license renewal fee so that, together with the estimated amount from revenue, the reserve balance in the board's contingent fund is equal to 6 months of annual authorized expenditures.

Ch. 992 (SB 1984) Greene. State Board of Registration for Geologists and Geophysicists.

(1) Existing law requires specified qualifications for registration as a geologist that include successfully passing a written examination.

This bill additionally would require that written examination to incorporate a national examination for geologists, and would also require passage of a supplemental California specific examination, as specified.

(2) Existing law specifies the maximum registration and renewal fees that may be fixed by the State Board of Registration for Geologists and Geophysicists and prohibits the board from increasing those fees beyond the amount fixed by the board as of January 1, 1993.

This bill would increase the maximum fee for the filing of an application for registration as a geologist or geophysicist or certification as a speciality geologist or geophysicist and for administration of the examination from \$100 to \$250 and would delete the prohibition against increasing this fee. The bill also would impose an examination fee not to exceed \$300 for each applicant for registration as a geologist and an examination fee not to exceed \$100 for each applicant for registration as a geophysicist or certification as an engineering geologist or a hydrogeologist.

(3) Existing provisions of the Business and Professions Code continuously appropriate the moneys in the Geology and Geophysics Fund, a special fund.

Because this bill would increase the amount of moneys in the fund, it would make an appropriation.

Ch. 993 (AB 561) Scott. Medi-Cal and HIV: claims.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law provides for funding of payments for Medi-Cal providers through appropriations in the annual Budget Act made to the Health Care Deposit Fund.

Existing law establishes a program to provide drug treatments to persons infected with the human immunodeficiency virus (HIV).

The bill would create the continuously appropriated Medical Providers Interim Payment Fund, for the purposes of paying Medi-Cal providers, providers of drug-treatment services for persons infected with HIV, and providers of services for the developmentally disabled, during any portion of a fiscal year, prior to September 1 of that year, in which a budget has not yet been enacted, and would appropriate, for each fiscal year in which these payments were necessary, up to \$1,000,000,000 from the General Fund, in the form of loans, and \$1,000,000,000 from the Federal Trust Fund to the Medical Providers Interim Payment Fund.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 994 (AB 1560) Scott. Health care coverage: disclosures: emergency care: reimbursement.

Existing law provides for the licensure and regulation of health care service plans by the Department of Corporations. Existing law requires each plan's disclosure form to contain prescribed information regarding the coverage provided by the plan. Existing law provides that a willful violation of the provisions governing health care service plans is subject to criminal sanction.

Chapter 23 of the Statutes of 1998, effective January 1, 1999, amends those provisions to require a plan's disclosure form to contain a notice providing enrollees and prospective enrollees with certain information, including the importance of reading the disclosure form and evidence of coverage, notice of the plan's telephone numbers, and

other information. Chapter 180 of the Statutes of 1998, effective January 1, 1999, amends those provisions to require the disclosure form to include a description of the manner in which an enrollee may request continuity of care.

This bill would change the operative date of those provisions to July 1, 1999, and would require the disclosure form to include, with respect to individual plan contracts, small group plan contracts, and any other group plan contracts for which the health care services are not negotiated, a statement that the applicant has a right to view the evidence of coverage prior to enrollment, and, if the evidence of coverage is not combined with the disclosure form, the notice would be required to specify where the evidence of coverage can be obtained prior to enrollment.

By imposing this requirement on health care service plans, this bill would impose a state-mandated local program by changing the definition of a crime.

Existing law regulates health care service plans and certain insurers that cover hospital, medical, and surgical expenses, and providers, in the reimbursement of claims of providers. These provisions provide for notice requirements if the claim is contested, the accrual of interest if uncontested claims are not reimbursed as required, circumstances under which a claim is reasonably contested by the plan or insurer, and procedures for reconsideration of a contested claim.

This bill would set forth additional requirements with respect to the reimbursement of claims for services rendered to a patient who was provided emergency services and care on or after July 1, 1999.

By changing the definition of a crime relative to health care service plans, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 995 (AB 2103) Gallegos. Emergency medical services.

(1) Existing law authorizes general acute care hospitals to provide certain special services, including, but not limited to, emergency services, upon approval by the State Department of Health Services.

This bill would require any acute care hospital that provides those services to provide notice of any intended elimination or reduction of emergency services as soon as possible, but not later than 90 days prior to a planned elimination or reduction in services to the State Department of Health Services, the local government agency in charge of health services, and specified entities under contract with the hospital to provide the services, and to provide public notice in a manner likely to reach a significant number of residents of the community serviced by that facility.

This bill would require a health facility that implements an emergency medical service closure or change, to make reasonable efforts to ensure that the community served by the facility is informed.

This bill would also require the department, before approving a downgrade or closure of emergency services, to receive an impact evaluation of the downgrade or closure of emergency or critical care services upon the community and how the downgrade or closure will affect emergency services provided by other entities. The bill would require the county in which the proposed downgrade or closure will occur to ensure the completion of, and timely notification to the department of the results of, the impact evaluation, thereby imposing a state-mandated local program. This bill would authorize a county to designate the local emergency medical services agency as the agency to conduct the impact evaluation. The bill would provide that these provisions would be implemented on and after the date the county or its designated local emergency medical services agency has developed a policy specifying the criteria it will consider in conducting an impact evaluation, and would require the county or its designated local emergency medical services agency to develop the policy on or before June 30, 1999, thereby imposing a state-mandated local program. The bill would require the Emergency Medical Services Authority to develop guidelines for development of impact evaluation guidelines.

This bill would prohibit a hospital from being subject to those provisions if the department determines that the use of resources to keep the emergency center open substantially threatens the stability of the hospital as a whole, or cites the emergency center for unsafe staffing practices.

(2) Existing law provides for the licensing and certification of health facilities. Existing law authorizes a general acute care hospital to offer various special services, including emergency center services pursuant to specified requirements. In addition, existing law separately sets forth requirements for the provision of standby emergency medical services in a specifically designated area of a hospital. A violation of existing provisions of law relating to the licensing and certification of health facilities constitutes a misdemeanor.

This bill would require, on or before June 30, 1999, the department and the Emergency Medical Services Authority, in consultation with hospitals, other health care providers, and local emergency medical services agencies, to designate hospital signage requirements for a health facility holding a special permit for a standby emergency medical service located in an urban area, and would prohibit the facility from posting signs, distributing literature, or advertising that emergency services are available at the facility. Because it would change the definition of an existing crime, this bill would create a state-mandated local program.

(3) Existing law provides for the licensure and regulation of health care service plans and requires health care service plans to disclose information to plan enrollees. Willful violation of the law regulating health care service plans is a crime.

This bill would require a health care service plan, within 30 days of receiving notice that an acute care hospital intends to reduce or eliminate emergency services, to notify, or provide for the notification of, plan enrollees who have selected a medical group or independent practice association that uses a hospital that the hospital will reduce or eliminate its emergency services. By changing the definition of a crime, the bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed \$1,000,000 statewide and other procedures for claims whose statewide costs exceed \$1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 996 (AB 2764) Committee on Public Employees, Retirement and Social Security. Public employee retirement and health benefits.

(1) The Public Employees' Retirement Law authorizes local governmental agencies to contract for participation in the retirement system.

The bill would authorize contracting agencies to provide service credit for their employees' prior services.

(2) The Judges' Retirement Law authorizes a judge to purchase service credit for service as an elected state constitutional officer before becoming a judge.

This bill would authorize purchase of service credit as a federal judicial officer, as defined.

(3) The Public Employees' Medical and Hospital Care Act authorizes certain specified local agencies to amend their contracts respecting employer health benefit contributions for postretirement health benefit coverage.

This bill would make those provisions also applicable to all other contracting agencies on and after January 1, 1999.

(4) Existing law authorizes local governmental agencies to establish deferred compensation plans for their officers and employees.

This bill would require those plans to conform to the requirements of the federal Small Business Job Protection Act of 1996 (P.L. 103-188), and would authorize individually directed investments under specified circumstances.

(5) Existing law authorizes local agencies to invest moneys belonging to, or in the custody of, those agencies, but limits the kinds of those investments, as specified.

This bill would exempt the investment of funds designated for the payment of employee retiree health benefits from those limitations and would prescribe fiduciary standards for those investments.

(6) The County Employees Retirement Law of 1937 provides that various county officers and employees are eligible for safety membership.

This bill would authorize county boards of supervisors to include officers and employees whose functions clearly fall within the scope of hazardous materials services within safety membership.

(7) Existing law authorizes, as specified, contributions by the county or a district under the County Employees Retirement Law of 1937 toward the payment of all or a portion of the premiums on a policy or certificate of life insurance or disability insurance or toward the payment of all or part of the consideration for any hospital service or medical service corporation or for any combination thereof, for the benefit of any member or his or her dependents.

This bill would authorize, upon adoption of a resolution by the county board of supervisors, the board of retirement in a county of the first class to permit active members and their dependents to enroll in any plan authorized by the above described provisions.

Ch. 997 (SB 2198) Sher. Pollution: prevention and cleanup.

(1) Existing law, the Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, creates the Underground Storage Tank Cleanup Fund, and makes the fund available, upon appropriation by the Legislature, to pay for specified administrative and cleanup costs relative to releases of hazardous materials from underground storage tanks. The act is repealed by its own terms on January 1, 2005. Existing law requires every owner of an underground storage tank containing petroleum to pay a storage fee of 12 mills per gallon and requires the State Board of Equalization to deposit those fee revenues in the fund. Existing law permits the State Water Resources Control Board to annually expend up to \$5,000,000 from the fund to take certain corrective actions to public drinking water contaminated by an oxygenate, and to expend no more than \$1,000,000 of that amount to pay a public water system for the cost of treatment of a water supply. For the purposes of the act, existing law excludes certain types of devices from the term "underground storage tank."

For purposes of the provisions governing underground storage tanks, this bill would exclude from the term "underground storage tank" unburied fuel piping at marinas under specified conditions, but would provide that this exclusion would not be applicable if the board adopts certain regulations.

This bill would repeal the provisions authorizing the expenditure of those funds for those corrective actions and would instead create, in the State Treasury, the Drinking Water Treatment and Research Fund. The bill would authorize the board to annually expend up to \$5,000,000 from the Underground Storage Tank Cleanup Fund, upon appropriation by the Legislature, until June 30, 1999, for specified purposes, and would require the board to annually transfer \$5,000,000, from June 30, 1999, until January 1, 2002, from the Underground Storage Tank Cleanup Fund to the drinking water fund for expenditure for those purposes, if a public drinking water well has been contaminated by an oxygenate and there is substantial evidence that the contamination was caused by a release from an underground storage tank. The State Department of Health Services would be authorized to expend the money in the drinking water fund to make payments to public water systems for the costs of treating contaminated groundwater and surface water for drinking water purposes, investigating contamination, and acquiring alternate drinking water supplies, and would authorize the department to expend not more than \$1,000,000 for research into treatment technologies and to pay the department's administrative costs, as specified.

The bill would appropriate \$5,000,000 from the General Fund to the department for deposit in the drinking water fund, and would appropriate that amount therefrom, to carry out those purposes.

The bill would require the department to establish a Research Advisory Committee, with a specified membership, to review requests for research payments. The bill would allow the department to make payments for treatment, investigation, or alternative water supplies without requiring the public water system to first incur expenditures, if the department makes a specified determination. The bill would also specify that these payments for treatment, investigation, or alternative water supplies may be made without regard to when the contamination occurred and would require the department, when evaluating these claims submitted for payment, to consider the findings of a specified report.

(2) Existing law requires the State Air Resources Board to establish criteria for the evaluation of the effectiveness of, and permits the state board to conduct tests respecting the composition or the chemical or physical properties of, any motor vehicle fuel additive sold, or proposed to be sold, in this state.

This bill would prohibit the state board from adopting any regulation that requires the addition of any oxygenate to motor vehicle fuel unless it complies with certain conditions.

(3) Existing law required the South Coast Air Quality Management District to enter into a contract on or before April 1, 1991, with an independent firm to perform a review and analysis of the methods by which the district assesses socioeconomic impacts of district rules and regulations.

This bill would repeal that obsolete provision.

Ch. 998 (AB 2019) Kuehl. Storm water discharge.

Under existing law, point source discharges of pollutants, including storm water discharges, to surface waters require a waste discharge permit under the national pollutant discharge elimination system (NPDES). Under existing law, the State Water Resources Control Board and the California regional water quality control boards generally prescribe waste discharge requirements in connection with the discharge of waste that could affect the quality of the waters of the state. Existing law requires each person for whom waste discharge requirements have been prescribed to submit to the state board an annual fee in accordance with a prescribed schedule.

This bill would require the state board, until December 31, 2003, to reduce the annual storm water fee to \$250 in the 1999 calendar year, and to \$50 thereafter, for prescribed facilities that are subject to a general industrial storm water permit and that, in the previous year, submitted to the regional board a "no exposure certification" and qualified for a sampling and analyses exemption as described in the general permit. The bill would require the state board to notify those facilities with regard to the adoption of new or modified storm water regulations affecting those facilities. The bill would authorize the state board to submit to the Legislature, on or before January 1, 2002, as part of the 5-year review of the general industrial storm water permit, a report evaluating the fee structure for facilities with "no exposure" certification or exemptions.

The bill would require the regional boards to undertake reasonable efforts to identify dischargers of storm water that have not obtained coverage under an appropriate storm water NPDES permit. The bill would require any person that discharges, proposes to discharge, or is suspected by a regional board or the state board of discharging storm water associated with industrial activity that has not obtained coverage under an appropriate storm water NPDES permit, to submit to the regional board, within 30 days from the date on which a notice is sent by the regional board, a notice of nonapplicability that specifies the basis for not needing to obtain coverage or a specified notice of intent to obtain coverage.

The bill would require the regional boards to conduct a review of prescribed annual reports and construction certifications submitted in accordance with applicable law and to identify the dischargers that have failed to submit that annual report or construction certification required by the regional board. The bill would require the regional boards to notify those dischargers with regard to their noncompliance and the penalties therefor, as prescribed.

The bill would, with specified exceptions, require the regional boards, with regard to a discharger of storm water associated with industrial activity that fails to submit the required notice of intent to obtain coverage, to impose a civil liability administratively in an amount that is not less than \$5,000 per year of noncompliance, as prescribed. The bill would, with a specified exception, require the regional boards, with regard to a person that fails to submit the required notice of nonapplicability, to impose civil liability administratively in the amount of \$1,000, as specified. The bill would, with a specified exception, require the regional boards, with regard to a person that fails to submit an annual report or construction certification, to impose civil liability administratively, in an amount that is not less than \$1,000.

The bill would require that the money generated from the imposition of liability, as described, and the recovery of costs pursuant to the bill's provisions to be deposited, and separately accounted for, in the Waste Discharge Permit Fund. The money in the fund would be available, upon appropriation by the Legislature, to the regional boards from which the revenues were generated for the purpose of carrying out storm water programs.

The bill would require the state board, on or before May 1, 2000, and on each May 1 thereafter, to prepare and submit a report to the Legislature summarizing the enforcement actions undertaken in the previous calendar year with regard to storm water discharge and the results of those actions. The bill would require appropriate state agencies, as requested by the executive director of the state board, to provide the state board with certain information relating to facilities that are subject to the storm water program.

The bill would require the state board, on or before February 1, 2000, and on each February 1 thereafter, to prepare, and make available to the public, a prescribed report. The bill would make legislative findings and declarations.

Ch. 999 (AB 1208) Migden. Occupational safety and health: bloodborne pathogen standard.

Under existing law, the Occupational Safety and Health Standards Board may adopt occupational safety and health standards and orders, which are required to be at least as effective as federal standards for all issues for which federal standards have been adopted under the federal Occupational Safety and Health Act of 1970. Pursuant to this authority, the board has adopted a regulation containing general industry safety orders pertaining to, among other things, occupational exposure to blood or other potentially infectious materials.
