(d) The independent evaluator shall report to the Governor, the Office of the Legislative Analyst, the Superintendent of Public Instruction, the State Board of Education, the Secretary for Education, and the chairs of the education policy committees in both houses of the Legislature, in accordance with the following schedule:

(1) Preliminary report on field testing by July 1, 2000.

(2) First annual report by February 1, 2002.

(3) Regular biennial reports by February 1 of even-numbered years following 2002.

60856. After adoption and the initial administrations of the high school exit examination the State Board of Education, in consultation with the Superintendent of Public Instruction, shall study the appropriateness of other criteria by which high school pupils who are regarded as highly proficient but unable to pass the high school exit examination may demonstrate their competency and receive a high school diploma. This criteria shall include, but is not limited to, an exemplary academic record as evidenced by transcripts and alternative tests of equal rigor in the academic areas covered by the high school exit examination. If the State Board of Education determines that other criteria are appropriate and do not undermine the intent of this chapter that all high school graduates demonstrate satisfactory academic proficiency, the board shall forward its recommendations to the Legislature for enactment.

SEC. 6. The sum of two million two hundred fifty thousand dollars ($2,250,000) is hereby appropriated to the Superintendent of Public Instruction in accordance with the following schedule:

(a) The sum of two million dollars ($2,000,000) is hereby appropriated from the Federal Trust Fund, from GOALS 2000 funds, for the purpose of developing a high school exit examination pursuant to Section 60850 of the Education Code.

(b) The sum of two hundred fifty thousand dollars ($250,000) is hereby appropriated from the General Fund to provide support services related to the high school exit examination established pursuant to Section 60850 of the Education Code.

SEC. 7. Sections 1 and 2 of the act adding this section shall become operative on January 1, 2000.

SEC. 8. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant

to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

CHAPTER 2

An act to amend Section 44277 of, to add Sections 42239.1 and 42239.2 to, to add Chapter 16 (commencing with Section 53025) to Part 28 of, to add Chapter 11 (commencing with Section 92850) and Chapter 12 (commencing with Section 92855) to Part 57 of, and to add Article 2 (commencing with Section 99220) to Chapter 5 of Part 65 of, the Education Code, relating to education, making an appropriation therefor, and declaring the urgency thereof, to take effect immediately.

[Approved by Governor March 29, 1999. Filed with Secretary of State March 29, 1999.]

The people of the State of California do enact as follows:

SECTION 1. Section 42239.1 is added to the Education Code, to read:

42239.1. (a) For the 1999–2000 fiscal year and each fiscal year thereafter, each school district shall be entitled to reimbursement for pupil attendance in intensive reading programs offered pursuant to Article 1 (commencing with Section 53025) of Chapter 16 of Part 28 of the Education Code in an amount equal to 10 percent of the district's total enrollment in kindergarten and grades 1 to 4, inclusive, for the prior fiscal year multiplied by 120 hours, multiplied by the hourly rate for the current fiscal year determined pursuant to subdivision (c) of Section 42239 reduced by the deficit factor described in Section 42238.145. This amount shall be provided in addition to the amount provided pursuant to Section 42239.

(b) When expending funds received pursuant to this section a school district shall give first priority for the purpose specified in paragraph (1) of subdivision (c) of Section 53027.

SEC. 1.3. Section 42239.2 is added to the Education Code, to read:

42239.2. (a) Notwithstanding any other provision of law, the Superintendent of Public Instruction shall allocate a minimum of six thousand seven hundred sixty-six dollars ($6,766) for supplemental summer school programs established pursuant to Article 1 (commencing with Section 53025) of Chapter 16 of Part 28, from funds appropriated therefor in each school district for which the prior fiscal year enrollment was less than 500 units of average daily attendance and that offers at least 1,500 hours of supplemental summer school instruction. A school district for which the prior fiscal

year enrollment was less than 500 units of average daily attendance that offers less than 1,500 hours of supplemental summer school offerings shall receive a proportionate reduction in its allocation.

(b) Minimum allocations for supplemental summer school programs required pursuant to subdivision (a) shall be adjusted for inflation in the 2000–01 fiscal year, and each fiscal year thereafter, in accordance with Section 42238.1.

(c) For purposes of this section a charter school is a schoolsite and is not a school district.

SEC. 1.5. Section 44277 of the Education Code is amended to read:

44277. The Legislature recognizes that effective professional growth must continue to occur throughout the careers of all teachers, in order that teachers remain informed of changes in pedagogy, subject matter, and pupil needs. In enacting this section, it is the intent of the Legislature to establish professional growth requirements that give individual teachers a wide range of options to pursue as well as significant roles in determining the course of their professional growth.

(a) The minimum requirements for maintaining the validity of the clear multiple or single subject teaching credential pursuant to Section 44251 shall be both of the following:

(1) Successful service as a classroom teacher or successful service authorized by a services credential. The minimum length of service shall be equivalent to one-half of a school year.

(2) Completion of an individual program of professional growth as prescribed in this section and by the commission.

(b) An individual program of professional growth shall consist of a minimum of 150 clock hours of participation in activities that are aligned with the California Standards for the Teaching Profession that contribute to competence, performance, or effectiveness in the profession of education and the teacher's classroom assignments. Acceptable activities shall be defined by the commission to include, among other acceptable activities, the completion of courses offered by regionally accredited colleges and universities, including instructor-led interactive courses delivered through online technologies; participation in professional conferences, workshops, teacher center programs, staff development programs, or a California Reading Professional Development Program operated pursuant to Article 2 (commencing with Section 99220) of Chapter 5 of Part 65; service as a mentor teacher pursuant to Section 44496; participation in school curriculum development projects; participation in systematic programs of observation and analysis of teaching; service in a leadership role in a professional organization; and participation in educational research or innovation efforts. Employing agencies and employees' bargaining agents may negotiate to agree on the terms of programs of professional growth

within their jurisdictions, provided that the agreements shall be consistent with this section.

(c) An individual program of professional growth shall be developed and planned by the holder of a clear teaching credential.

(d) Effective January 1, 1991, an individual program of professional growth may include a basic course in cardiopulmonary resuscitation, which includes training in the subdiaphragmatic abdominal thrust (also known as the "Heimlich maneuver") and meets or exceeds the standards established by the American Heart Association or the American Red Cross for courses in that subject. A teacher's participation in this training option shall count towards the minimum 150 clock hours required to satisfy the professional growth requirements.

(e) Before a holder of a clear teaching credential commences or amends an individual program of professional growth, a school principal, a mentor teacher provided for in Section 44496, or other district designee shall certify to the credential holder that the planned program or amendment complies with this section and with regulations of the commission.

(f) A clear teaching credential shall be deemed to remain valid so long as the holder of the credential, at five-year intervals, submits to the commission verification by a school principal, a mentor teacher, or other district designee that the holder has satisfied the minimum requirements specified in subdivision (a). In the absence of adequate verification, the commission shall invalidate the credential. Verification by a school principal, a mentor teacher, or other district designee shall be independent of any evaluation of the performance of the holder of the clear teaching credential that is conducted for the purpose of determining the credential holder's employment status. The arbitrary refusal of a school principal, a mentor teacher, or other district designee to verify completion of an individual program of professional growth meeting the requirements of this section and commission regulations shall constitute grounds for an appeal as prescribed in Section 44278.

SEC. 2. Chapter 16 (commencing with Section 53025) is added to Part 28 of the Education Code, to read:

CHAPTER 16. READING PROGRAMS

Article 1. Elementary School Intensive Reading Program

53025. This article shall be known and may be cited as the Elementary School Intensive Reading Program.

53027. (a) A school district that maintains any of kindergarten or grades 1 to 4, inclusive, may operate a program that provides multiple, intensive reading opportunities for pupils in any one or combination of kindergarten and grades 1 to 4, inclusive, including appropriate support to address the needs of English language

learners. Funding for the program established pursuant to this article shall be provided pursuant to Section 42239.1.

(b) Pupils shall remain eligible for participation in the program established pursuant to this article for three calendar months after completing grade 4.

(c) The purposes of the program established pursuant to this article include, but are not limited to, both of the following:

(1) To provide pupils who are experiencing difficulty learning to read with increased instructional opportunities.

(2) To provide stimulating and enriching opportunities for all pupils to increase their reading skills and enhance their enjoyment of reading.

(d) (1) Instruction provided pursuant to the program established pursuant to this article shall be consistent with the standards for a comprehensive reading instruction program that is research-based, as described in subparagraphs (A) and (B) of paragraph (4) of subdivision (b) of Section 44259, and shall include all of the following components:

(A) The study of organized, systematic, explicit skills, including phonemic awareness, direct, systematic explicit phonics, and decoding skills.

(B) A strong literature, language and comprehension component with a balance of oral and written language.

(C) Ongoing diagnostic techniques that inform teaching and assessment.

(D) Early intervention techniques.

(2) Instruction provided pursuant to the program established pursuant to this article shall be consistent with state-adopted academic content standards and with the curriculum framework on English language arts adopted by the State Board of Education.

53029. (a) Except as provided in subdivision (b), intensive reading instruction provided pursuant to this article shall be offered four hours per day for six continuous weeks during the summer or when school is not regularly in session.

(b) Due to facilities constraints or for other educational reasons, a school district may offer intensive reading instruction before school, after school, on Saturdays, or during intersession, or in a combination of summer school, after school, Saturday, or intersession instruction. Services may be provided to pupils during the regular instructional day if the instruction is delivered by a certificated employee, provided that the employee is not the pupil's regular classroom teacher, and does not result in the pupil being removed from regular classroom instruction. Instruction provided pursuant to this section shall fulfill the requirements of subdivision (a) of Section 44830 and of Section 44831. Other service providers should have appropriate training in the teaching of reading.

(c) Notwithstanding Section 49550 or any other provision of law, a school district that operates a program pursuant to this article is not

required to provide a meal or snack to pupils participating in the program.

53031. The Superintendent of Public Instruction, with input from an advisory committee, shall evaluate the program established pursuant to this chapter on or before November 1, 2000. If funds are needed for this purpose, it is the intent of the Legislature that funds be appropriated for this purpose in the annual Budget Act.

Article 2. Governor's Reading Award Program

53050. This article shall be known, and may be cited as the Governor's Reading Award Program, to be administered by the state Secretary for Education on behalf of the Governor.

53053. A school district that maintains any of kindergarten or grades 1 to 8, inclusive, may apply to the state Secretary for Education for an award pursuant to this article for each school within the district that meets criteria developed pursuant to Section 53055.

53055. The state Secretary for Education, in cooperation with an advisory committee consisting of teachers, parents, and educators, shall develop criteria for the receipt of an award pursuant to this article. The criteria may include, but not necessarily be limited to, the completion by pupils at the applicant school of age-appropriate books and pages. The criteria shall be based on school quartiles of pupils eligible for free or reduced-cost meals through the school lunch program of the United States Department of Agriculture.

53057. (a) Grant awards made pursuant to this article shall not exceed five thousand dollars ($5,000) per school and shall be used to further the academic program of the school.

(b) It is the intent of the Legislature that at least 400 schools receive grant awards pursuant to this article in every fiscal year.

(c) The state Secretary for Education shall annually provide a list of schools that receive grant awards to the State Department of Education. Upon receipt of the list, the State Department of Education shall apportion funding to school districts for allocation to individual schools.

Article 3. Public Involvement Reading Campaign

53075. The state Secretary for Education shall contract for the development and establishment of a public involvement campaign to inform Californians that promoting reading in the public schools as a key to success in life is the responsibility of all Californians. The campaign shall address, but not necessarily be limited to, promoting family reading activities, encouraging private sector support for child literacy programs, and publicizing the importance of reading skills for academic success.

Elected officials and declared candidates for partisan public office may not appear in promotional materials for the reading campaign.

SEC. 3. (a) The Legislature finds and declares all of the following:

(1) The Commission on Teacher Credentialing, in its Statewide Teacher Recruitment Plan, estimated that California will need an additional 250,000 to 300,000 teachers over the next decade. The anticipated shortage of teachers is expected to be especially acute in urban areas.

(2) A decade ago, the University of California prepared over 10 percent of the teachers in California. That percentage has now declined to fewer than 5 percent of the teachers in the state.

(3) The California State University has as its primary mission to prepare the majority of teachers in the state and has, in recent years, sought to respond effectively to increased demand for teachers in the state's public schools. It is imperative that the University of California increase its role in preparing teachers to better complement the work of the California State University and to help meet the demand for highly capable and fully qualified teachers. It is the intent of the Legislature that the University of California have a goal of preparing a minimum of 2,200 teachers on or before July 1, 2003, which would approximately double the number of teachers prepared by the University of California in 1998–99.

(4) Teaching is a very challenging career that demands expertise in a wide variety of areas including, but not limited to, linguistics, developmental psychology, multiple academic subject matters, and pedagogy. As such, effective teacher preparation should include an interdisciplinary approach that draws on faculty expertise from across the campus.

(b) It is the intent of the Legislature, in enacting Section 4 of this act, to establish a highly competitive teacher scholarship program within the University of California that will make teaching a more attractive and visible option for the most talented university students to pursue.

SEC. 4. Chapter 11 (commencing with Section 92850) is added to Part 57 of the Education Code, to read:

CHAPTER 11. GOVERNOR'S TEACHER SCHOLARS PROGRAM

92850. The Regents of the University of California are requested to develop a Governor's Teacher Scholars Program, to operate, commencing July 1, 2000, at the Berkeley and Los Angeles campuses, and at additional University of California campuses, as deemed appropriate by the University, in accordance with all of the following:

(a) Prior to July 1, 2000, the university shall develop all of the following:

(1) A rigorous teacher preparation program that prepares teachers to work in schools with high percentages of low income or English language learners and that culminates in the award of a master's degree.

(2) Begin recruiting highly talented students who wish to become teachers.

(3) Conduct a fundraising effort to provide full scholarships to participants in the program.

(b) When the program is fully operational, a total of 400 students shall be selected to participate in the program. At least 100 of these students shall be enrolled at each of the Los Angeles and Berkeley campuses.

(c) Participants in the program shall receive full scholarships, funded through private donations and other sources, to cover the participants' cost of the program. These scholarships shall be limited to university fees charged to resident students and mandatory campus-based fees.

(d) Participants in the program shall be required to make a commitment to teach for at least four years in a California public elementary or secondary school eligible to be designated, within the meaning of subdivision (e) of Section 69613, for participants in the Assumption Program of Loans for Education.

(e) Participants who leave classroom teaching service before their four-year commitment is completed shall repay that portion of their scholarship assistance that is equal to the proportion of the four-year commitment that has not been completed.

92851. This chapter shall not apply to the University of California unless and until the Regents of the University of California act, by resolution, to make it applicable.

SEC. 5. (a) The Legislature finds and declares all of the following:

(1) Recent research on effective schools found that a strong principal is an essential component in school success.

(2) Evidence from school districts around California indicates that they are experiencing a growing shortage of available personnel to serve as principals, partially as a result of the demanding nature of the profession.

(3) Leading a schoolsite as a principal is a very challenging career that demands expertise in a wide variety of areas including, but not limited to, business management, legal issues, leadership skills, and curriculum and instruction. As such, effective administrator preparation should embody an interdisciplinary approach that draws on faculty expertise from across the campus.

(b) It is the intent of the Legislature, in enacting Section 6 of this act, to establish a highly competitive principal scholarship program within the University of California that will make a principalship a more attractive and visible option for the most talented individuals to pursue.

SEC. 6. Chapter 12 (commencing with Section 92855) is added to Part 57 of the Education Code, to read:

CHAPTER 12. GOVERNOR'S PRINCIPAL LEADERSHIP INSTITUTE

92855. The Regents of the University of California are requested to develop a Governor's Principal Leadership Institute, to operate, commencing July 1, 2000, at the Berkeley and Los Angeles campuses of the university, in accordance with all of the following:

(a) Prior to July 1, 2000, the university shall develop a rigorous two-year administrator preparation program that culminates in the award of at least a master's degree and which coursework shall apply to a doctoral degree, begin recruiting highly talented individuals who wish to become school principals, and conduct a fundraising effort to provide full scholarships to participants in the program.

(b) The university shall collaborate with existing principal professional development programs in establishing and administering the program.

(c) The program shall be interdisciplinary and shall draw upon the faculty expertise of a wide variety of professional schools, including, but not necessarily limited to, the schools of education, law, and business or management at the participating campuses.

(d) When the program is fully operational, a total of 400 students, composed of 200 students at each participating campus, shall be selected to participate in the program.

(e) Participants in the program shall receive full scholarships, funded through private donations and other sources, to cover the participants' cost of the program. These scholarships shall be limited to university fees charged to resident students and mandatory campus-based fees.

(f) Participants in the program shall be required to make a commitment to serve four years as a principal, vice-principal, or in another administrative role, at a public elementary or secondary school.

(g) Participants who leave administrative service before their four-year commitment is completed shall repay that portion of their scholarship that is equal to the proportion of the four-year commitment that has not been completed.

92856. This chapter shall not apply to the University of California unless and until the Regents of the University of California act, by resolution, to make it applicable.

SEC. 7. (a) The Legislature finds and declares all of the following:

(1) The California Subject Matter Projects provide a model for the effective delivery of discipline-specific professional development to teachers in kindergarten and grades 1 to 12, inclusive.

(2) The California Subject Matter Project model is based on intersegmental collaboration drawing on the academic resources and expertise of college and university faculty and leading teachers in kindergarten and grades 1 to 12, inclusive.

(3) The principal goal of the California Subject Matter Projects is to improve the academic achievement of students to meet or exceed expected levels of performance measured against state standards.

(4) The California Subject Matter Projects develop professional relationships among participants that create ongoing opportunities for teacher learning and research.

(5) The California Reading and Literature Project, with sites on two campuses of the University of California, nine campuses of the California State University, and one independent university campus, has achieved excellent results in pilot projects focused specifically on the instruction of reading in kindergarten and grades 1 to 3, inclusive, linking the experience of outstanding classroom teachers with the research and resources of the larger educational community and consistent with the purpose of Section 6 of this act.

(b) It is the intent of the Legislature that the University of California, in partnership with the California State University and the independent universities and colleges, expand the capacity of the California Subject Matter Projects to provide professional development to teachers in kindergarten and grades 1 to 12, inclusive, pursuant to Section 8 of this act.

SEC. 8. Article 2 (commencing with Section 99220) is added to Chapter 5 of Part 65 of the Education Code, to read:

Article 2. California Reading Professional Development Institutes

99220. The Regents of the University of California are requested to jointly develop with the Trustees of California State University and the independent colleges and universities, the California Reading Professional Development Institutes, to be administered by the university, in partnership with the California State University and with private, independent universities in California, in accordance with all of the following criteria:

(a) In June 1999, the University of California and its institutes' partners shall commence instruction for up to 6,000 participants who either provide direct instruction in reading to pupils in kindergarten or in grade 1, 2, or 3, or who supervise beginning teachers of reading.

(b) (1) The institutes shall provide instruction for school teams from each participating school. These school teams shall include both beginning and experienced teachers and the schoolsite administrator, with the majority of the team composed of beginning teachers.

(2) Criteria and priority for selection of participating school teams shall include, but not necessarily be limited to, all of the following:

(A) Schools whose pupils' reading scores are at or below the 40th percentile on the Star 9 reading achievement test.

(B) Schools with a high number of new, underprepared, and noncredentialed teachers.

(C) Schools with a full complement of team members as outlined above.

(D) School teams committed to participate in the Elementary School Intensive Reading Program established pursuant to Article 1 (commencing with Section 53025) of Chapter 16 of Part 28 for a minimum of three years.

(c) (1) The institutes shall provide instruction in the teaching of reading in a manner consistent with the standard for a comprehensive reading instruction program that is research-based, as described in subparagraphs (A) and (B) of paragraph (4) of subdivision (b) of Section 44259, and shall include all of the following components:

(A) The study of organized, systematic, explicit skills including phonemic awareness, direct, systematic explicit phonics, and decoding skills.

(B) A strong literature, language and comprehension component with a balance of oral and written language.

(C) Ongoing diagnostic techniques that inform teaching and assessment.

(D) Early intervention techniques.

(2) Instruction provided pursuant to the program established pursuant to this article shall be consistent with state-adopted academic content standards, and with the curriculum framework on English language arts adopted by the State Board of Education.

(d) Each participant in the institutes shall receive a stipend of one thousand dollars ($1,000).

(e) In order to provide maximum access, the institutes shall be offered on multiple university and college campuses widely distributed throughout the state. Instruction at the institutes shall consist of an intensive, sustained training period of no less than 40 hours during the summer or during an intersession break, and shall be supplemented, during the following school year, with no fewer than the equivalent of five additional days of instruction and schoolsite meetings, held on at least a monthly basis, to focus on the academic progress of that school's pupils in reading.

(f) It is the intent of the Legislature that a local education agency or postsecondary institution that offers an accredited program of professional preparation consider providing partial and proportional credit toward satisfaction of the reading course requirement to an enrolled candidate who satisfactorily completes a California Reading Development Institute program, if the program has been certified by the Commission on Teacher Credentialing as meeting reading preparation standards.

(g) "Beginning teachers," for purposes of this article, are teachers with three or fewer years of teaching experience.

99221. This article shall not apply to the University of California unless and until the Regents of the University of California act, by resolution, to make it applicable.

SEC. 9. (a) (1) The sum of eighty-three million dollars ($83,000,000) is hereby appropriated from the General Fund for the purposes of the act adding this section in accordance with the following schedule:

(A) The sum of seventy-five million dollars ($75,000,000) to the State School Fund for allocation to school districts by the Superintendent of Public Instruction for purposes of the Elementary School Intensive Reading Program established pursuant to Article 1 (commencing with Section 53025) of Chapter 16 of Part 28 of the Education Code.

(B) The sum of two million dollars ($2,000,000) to the Superintendent of Public Instruction for allocation to school districts for purposes of the Governor's Reading Award Program established pursuant to Article 2 (commencing with Section 53050) of Chapter 16 of Part 28 of the Education Code.

(C) The sum of six million dollars ($6,000,000) for transfer to the State School Fund for allocation by the Superintendent of Public Instruction to school districts to fund the stipends of participants in the California Reading Professional Development Institutes established pursuant to Article 2 (commencing with Section 99220) of Chapter 5 of Part 65 of the Education Code.

(2) For the purposes of making computations required by Section 8 of Article XVI of the California Constitution, the amounts appropriated in paragraph (1) of this subdivision of this section shall be deemed to be "General Fund revenues appropriated to school districts," as defined in subdivision (c) of Section 41202 of the Education Code for the 1999–2000 fiscal year and be included within the "total allocations to school districts and community college districts from General Fund proceeds of taxes appropriated pursuant to Article XIII B," as defined in subdivision (e) of Section 41202 of the Education Code for the 1999–2000 fiscal year.

(b) The sum of eleven million dollars ($11,000,000) is hereby appropriated, without regard to fiscal years, from the General Fund for allocation in accordance with the following schedule:

(1) Five hundred thousand dollars ($500,000) to the Regents of the University of California for the purposes of planning the academic program of, recruiting participants for, and scholarship fundraising for, the Governor's Teacher Scholars Program established pursuant to Section 92850 of the Education Code.

(2) Five hundred thousand dollars ($500,000) to the Regents of the University of California for the purposes of planning the academic program of, recruiting participants for, and scholarship fundraising for, the Governor's Principal Leadership Institute established pursuant to Section 92855 of the Education Code.

(3) Six million dollars ($6,000,000) to the University of California for the purpose of administering the California Reading Professional Development Institutes established under Article 2 (commencing with Section 99220) of Chapter 5 of Part 65 of the Education Code.

(4) Four million dollars ($4,000,000) to the state Secretary for Education for purposes of contracting for the development and establishment of a public involvement reading campaign pursuant to Article 3 (commencing with Section 53075) of Chapter 16 of Part 28 of the Education Code.

SEC. 10. Paragraphs (1) to (3), inclusive, of subdivision (b) of Section 9 of this act shall not become operative unless and until the Regents of the University of California adopt a resolution within the meaning of Sections 92851, 92856, and 99221 of the Education Code, as applicable.

SEC. 11. This act is an urgency statute necessary for the immediate preservation of the public peace, health, or safety within the meaning of Article IV of the Constitution and shall go into immediate effect. The facts constituting the necessity are:

In order to allow the University of California to establish the California Reading Professional Development Institutes and to provide instruction commencing in June 1999, to allow the university adequate time to develop the teacher and administrator preparation programs pursuant to this act prior to July 1, 2000, and to allow for the immediate establishment of reading development programs, it is necessary that this act take effect immediately.

CHAPTER 3

An act to add Chapter 6.1 (commencing with Section 52050) to Part 28 of the Education Code, relating to school performance, and making an appropriation therefor.

[Approved by Governor April 5, 1999. Filed with Secretary of State April 5, 1999.]

The people of the State of California do enact as follows:

SECTION 1. Chapter 6.1 (commencing with Section 52050) is added to Part 28 of the Education Code, to read:

CHAPTER 6.1. PUBLIC SCHOOLS ACCOUNTABILITY ACT OF 1999

Article 1. Legislative Findings and Intent

52050. This chapter shall be known and may be cited as the Public Schools Accountability Act of 1999.

52050.5. The Legislature finds and declares all of the following:

(a) The purpose of the California public school system is to provide for the academic development of each pupil and prepare each pupil, to the extent of his or her ability, to become a lifelong

learner, equipped to live and succeed within the economic and societal complexities of the 21st century.

(b) It is in the interest of the people and the future of this state to ensure that each child in California receives a high quality education consistent with all statewide content and performance standards, as adopted by the State Board of Education, and with a meaningful assessment system and reporting program requirements.

(c) Recent assessments indicate that many pupils in California are not now, generally, progressing at a satisfactory rate to achieve a high quality education.

(d) To remedy this, the state is in need of an immediate and comprehensive accountability system to hold each of the state's public schools accountable for the academic progress and achievement of its pupils within the resources available to schools.

(e) Any promising and effective accountability system must be based upon a constructive and collaborative process that seeks to include stakeholders in the accountability process.

(f) Any promising and effective accountability system requires the active involvement of parents and guardians, pupils, educators, community leaders, school boards, and schoolsite teams.

(g) The statewide school accountability system must encourage the active participation of parents and guardians, pupils, educators, and the local community in improving pupil achievement.

(h) The statewide accountability system must be easily accessible and understandable to parents and others.

(i) The statewide accountability system must include rewards that recognize high achieving schools as well as interventions and, ultimately, sanctions for schools that are continuously low performing.

(j) It is also the intent of the Legislature that the comprehensive and effective school accountability system primarily focus on increasing academic achievement.

(k) To achieve better pupil performance, it is the intent of the Legislature that any school accountability system do all of the following:

(1) Encourage teacher preparation that allows teachers to develop the ability to inspire pupils to become lifelong learners.

(2) Encourage teacher preparation and consistent ongoing professional development that serves to develop competency in content and pedagogy and that allows teachers to effectively involve themselves in promoting school accountability.

(3) Encourage the involvement of the community and its stakeholders in the accountability system.

(4) Encourage local community involvement in providing support for education and identifying causes of pupil failure and designing programs for remediation.

(5) Approach accountability with an attitude of collaboration, encouragement, and correction.

(6) Utilize the state infrastructure to support schools, school districts, and county offices of education in their efforts to improve pupil achievement and progress.

(7) Encourage each local community to support and sustain high-quality educational programs and to build the capacity of educators and schools to succeed in educating every pupil.

(8) Encourage active involvement of parents and guardians in the development and implementation of school accountability systems.

Article 2. Public School Performance Accountability Program

52051. The Public School Performance Accountability Program is hereby established and shall consist of the following three component parts:

(a) The state Academic Performance Index, to be known as the API.

(b) The Immediate Intervention/Underperforming Schools Program.

(c) The Governor's High Achieving/Improving Schools Program.

52051.5. For purposes of this chapter, all references to schools shall include charter schools.

52052. (a) By July 1, 1999, the Superintendent of Public Instruction, with approval of the State Board of Education, shall develop an Academic Performance Index, to be used to measure performance of schools, especially the academic performance of pupils, and demonstrate comparable improvement in academic achievement by all numerically significant ethnic and socioeconomically disadvantaged subgroups within schools. A numerically significant ethnic or socioeconomically disadvantaged subgroup is a subgroup that constitutes at least 15 percent of a school's total pupil population and consists of at least 30 pupils. The index shall consist of a variety of indicators currently reported to the State Department of Education including, but not limited to, the results of the achievement test administered pursuant to Section 60640, attendance rates for pupils and certificated school personnel for elementary schools, middle schools, and secondary schools, and the graduation rates for pupils in secondary schools. The pupil data collected for the API that comes from the achievement test administered pursuant to Sections 60640 and 60644 and the high school exit examination, when fully implemented, shall be disaggregated by special education status, English language learners, socioeconomic status, gender and ethnic group. Only the test scores of pupils enrolled in a school district for one year or more may be included in the test results reported in the API. Results of the achievement test and other tests specified in subdivision (b) shall constitute at least 60 percent of the value of the index. Before including high school graduation rates and attendance rates in the index, the Superintendent of Public Instruction shall determine the

extent to which the data is currently reported to the state and the accuracy of the data. If the Superintendent of Public Instruction determines that accurate data for these indicators is not available, the Superintendent of Public Instruction shall report to the Governor and the Legislature by September 1, 1999, and recommend necessary action to implement an accurate reporting system.

(b) Pupil scores from the following tests, when available and when found to be valid and reliable for this purpose, shall be incorporated into the API:

(1) The assessment of the applied academic skills matrix test development pursuant to Section 60604.

(2) The nationally normed test as augmented pursuant to paragraph (1) of subdivision (f) of Section 60644.

(3) The high school exit examination.

(c) Based on the API, the Superintendent of Public Instruction shall develop, and the State Board of Education shall adopt, expected annual percentage growth targets for all schools based on the their API baseline score as measured in July 1999. Schools are expected to meet these growth targets through effective allocation of available resources. The minimum percentage growth target shall be 5 percent annually. However, the State Board of Education may set differential growth targets based on grade level of instruction and may set higher growth targets for the lowest performing schools because they have the greatest room for improvement.

(d) Upon adoption of state performance standards by the State Board of Education, the Superintendent of Public Instruction shall recommend, and the State Board of Education shall adopt, a statewide API performance target that includes consideration of performance standards and represents the proficiency level required to meet the state performance target. When fully developed, schools may either meet the state target or meet their growth targets to be eligible for the Governor's Performance Award Program as set forth in Section 52057.

(e) Beginning in June 2000, the API shall be used for both of the following:

(1) Measure the progress of schools selected for participation in the Immediate Intervention/Underperforming Schools Program pursuant to Section 52053.

(2) Rank all public schools in the state for the purpose of the High Achieving/Improving Schools Program pursuant to Section 52056.

(f) Only comprehensive high schools, middle schools, and elementary schools that have a population of 100 or more pupils may be included in the API ranking.

(g) By July 1, 2000, the Superintendent of Public Instruction, with the approval of the State Board of Education, shall develop an alternative accountability system for schools with fewer than 100 pupils, and for schools under the jurisdiction of a county board of education or a county superintendent of schools, community day

schools, and alternative schools, including continuation high schools and independent study schools.

52052.5. The Superintendent of Public Instruction shall establish a broadly representative and diverse advisory committee to advise the Superintendent of Public Instruction and the State Board of Education on all appropriate matters relative to the creation of the Academic Performance Index and the implementation of the Immediate Intervention/Underperforming Schools Program and the High Achieving/Improving Schools Program. Members of the advisory committee shall serve without compensation for terms not to exceed two years. The State Department of Education shall provide staff to the advisory panel.

Article 3. Immediate Intervention/Underperforming Schools Program

52053. (a) The Immediate Intervention/Underperforming Schools Program is hereby established. By August 15, 1999, the Superintendent of Public Instruction, with the approval of the State Board of Education, shall invite schools that scored below the 50th percentile on the achievement tests administered pursuant to Section 60640 both in the spring of 1998 and in the spring of 1999 to participate in the Immediate Intervention/Underperforming Schools Program. A school invited to participate may take any action not otherwise prohibited under state or federal law and that would not require reimbursement by the Commission on State Mandates to improve pupil performance.

(b) The total number of schools participating in the program shall be 430. Unless subdivision (d) applies, schools that apply will be selected based on the order in which they apply within ranks of deciles, not to exceed 86 per decile, within the following grade level categories:

(1) No more than 301 elementary schools.

(2) No more than 78 middle schools.

(3) No more than 52 high schools.

(c) The 86 schools selected within each decile range pursuant to subdivision (b) shall proportionately represent elementary, middle, and high schools and shall provide statewide proportionate geographic representation of urban and rural schools.

(d) If fewer than the number of schools in any grade level category apply, schools that scored below the 50th percentile in those grade level categories that did not apply for the program shall randomly be selected by the Superintendent of Public Instruction, with the approval of the State Board of Education, to participate based on their proportional representation in the state until the number of schools in each grade level category set forth in subdivision (b) is achieved.

(e) If more than the requisite number of schools apply for any grade level category, the Superintendent of Public Instruction shall select an array of schools that reflect a broad range of academic performance of schools that scored below the 50th percentile, until the number of schools in each grade level category set forth in subdivision (b) is achieved.

(f) A school selected to participate on or before September 1, 1999, shall be awarded a planning grant from funds appropriated pursuant to paragraph (1) of subdivision (a) of Section 2 of the act adding this section in the amount of fifty thousand dollars ($50,000). A school selected to receive federal funds pursuant to paragraph (2) of subdivision (a) of Section 2 of the act adding this section shall be awarded an implementation grant in an amount of at least fifty thousand dollars ($50,000) pursuant to Public Law 105-78.

(g) Schools receiving funding under paragraph (2) of subdivision (a) of Section 2 of the act adding this section shall comply with Public Law 105-78.

(h) Schools selected for participation in the program shall be notified by the Superintendent of Public Instruction no later than September 1 of each year.

52053.5. (a) The Superintendent of Public Instruction shall develop, and the State Board of Education shall approve, the minimum qualifications for external evaluators that shall include, but may not be limited to, recent successful professional, managerial or governing board experience in improving school achievement, and the ability to assist the school to systematically align curriculum, instruction, and assessment. The external evaluators shall also have demonstrated experience in working with diverse populations. With the approval of the State Board of Education, the Superintendent of Public Instruction shall develop and disseminate an application process by which to establish a list of external evaluators that meet the minimum qualifications. The list of approved external evaluators may include private sector experts, institutions of higher education, county offices of education, and educational consortia.

(b) The Superintendent of Public Instruction shall develop, and the State Board of Education shall approve, the standards and criteria to be applied by external evaluators in carrying out their duties. The standards and criteria shall include, but are not limited to, the following areas:

(1) Governing board policies.
(2) Curriculum management.
(3) Fiscal management.
(4) Parental and community involvement.
(5) Personnel management.
(6) Facilities management.

52054. (a) By October 1 of the year that the school is selected to participate, the governing board of a school district having jurisdiction over a school selected for participation in the program

shall contract with an external evaluator from the list of external evaluators and shall appoint a broad-based schoolsite and community team, consisting of a majority of nonschoolsite personnel. In a school that has a limited-English-proficient pupil population that constitutes at least 40 percent of the total pupil population, an external evaluator shall have demonstrated experience in working with a limited-English-proficient pupil population. Not less than 20 percent of the members of the team shall be parents or legal guardians of pupils in the school.

(b) By November 15 of the year that the school is selected to participate, the selected external evaluator shall solicit input from the parents and legal guardians of the pupils of the school. At a minimum, the evaluator shall do all of the following:

(1) Inform the parents and legal guardians, in writing, that the school has been selected to participate in the Immediate Intervention/Underperforming Schools Program due to its below-average performance.

(2) Hold a public meeting at the school, in cooperation with the principal, to which all parents and legal guardians of pupils in the school receive a written invitation. The invitation to the meeting may be combined with the written notice required by paragraph (1).

(3) Solicit, at the public meeting, the recommendations and opinions of the participating parents and legal guardians of pupils in the school regarding actions that should be taken to improve the performance of the school. These opinions and recommendations shall be considered by the external evaluator and the community team in the development of the action plan pursuant to this section.

(4) Notify all parents and legal guardians of pupils in the school of their opportunity to provide written recommendations of actions that should be taken to improve the performance of the school which shall be considered by the external evaluator and the community team in the development of the action plan pursuant to this section. Notice required by this subdivision may be combined with the written notice required by paragraph (1).

(c) By December 15 of the year that the school is selected to participate, the selected external evaluator shall complete a review of the school that identifies weaknesses that contribute to the school's below average performance and makes recommendations for improvement.

(d) By March 15 of the year that follows the year the school is selected to participate, the external evaluator and the schoolsite and community team selected pursuant to subdivision (a) shall develop an action plan to improve the academic achievement of the pupils enrolled at the school. The action plan shall include percentage growth targets at least as high as the annual growth targets adopted by the State Board of Education pursuant to Section 52052. The action plan shall include an expenditure plan and shall be of a scope that does not require expenditure of funds in excess of those provided

pursuant to this article or otherwise available to the school. The action plan may not be of a scope that requires reimbursement by the Commission on State Mandates for its implementation.

(e) At a minimum, the action plan shall do all of the following:

(1) Review and include the school and district conditions identified in the school accountability report card pursuant to Section 33126.

(2) Identify the current barriers at the school and district toward improvements in pupil achievement.

(3) Identify schoolwide and districtwide strategies to remove these barriers.

(4) Review and include school and school district crime statistics, in accordance with Section 628.5 of the Penal Code.

(5) Examine and consider disaggregated data regarding pupil achievement and other indicators to consider whether all groups and types of pupils make adequate progress toward short-term growth targets and long-term performance goals. The disaggregated data to be included and considered by the plan shall, at a minimum, provide information regarding the achievement of English learners, economically disadvantaged pupils, and other groups of pupils, by race, ethnicity, and gender.

(6) Set short-term academic objectives pursuant to Section 52052 for a two-year period that will allow the school to make adequate progress toward the growth targets established for each participating school for pupil achievement as measured by all of the following to the extent that the data is available for the school:

(A) The achievement test administered pursuant to Section 60640.

(B) Graduation rates for grades 7 to 12, inclusive.

(C) Attendance rates for pupils and school personnel for elementary, middle, and secondary schools.

(D) Any other indicators approved by the State Board of Education.

(f) The school action plan shall focus on improving pupil academic performance, improving the involvement of parents and guardians, improving the effective and efficient allocation of resources and management of the school, and identifying and developing solutions that take into account the underlying causes for low performance by pupils.

(g) The team, in the development of the action plan, shall consult with the exclusive representatives of employee organizations, where they exist.

(h) Upon its completion, the action plan shall be submitted to the governing board of the school districts for its approval. After the plan is approved, but no later than April 15 of the year that follows the year the school is selected to participate, the plan shall be submitted to the Superintendent of Public Instruction with a request for funding in the form prescribed by the Superintendent of Public Instruction.

(i) Not later than May 15 of the year next following the year in which a school is selected for participation, the State Board of Education shall review and approve or disapprove the school's request for funding, based on the recommendation of the Superintendent of Public Instruction. In conjunction with its approval of a request for funding to implement a school's action plan, the State Board of Education may waive all or any part of any provision of this code, or any regulation adopted by the State Board of Education, controlling any of the programs listed in clause (i) of subparagraph (B) of paragraph (1) of subdivision (a) of Section 54761 and Section 64000 if the waiver does not result in a decrease in the instructional time otherwise required by law or regulation or an increase in state costs and is determined to be consistent with subdivision (a) of Section 46300.

52054.5. A school whose application is approved on or before June 15 of the year following the year in which a school is selected for funding shall receive a grant for implementing the program, in each fiscal year that it participates in the program, in an amount up to two hundred dollars ($200) per pupil enrolled in the school, with a minimum allocation of fifty thousand dollars ($50,000) per schoolsite. A school that applies after June 15 may receive a grant for implementing the program if funds are appropriated for this purpose in the Budget Act. As a condition of receiving this funding, a participating school or the school district having jurisdiction over that school shall match the amount of state funding from any new or existing sources of funding. To help meet this matching requirement, a participating school and the governing board of the school district having jurisdiction over that school shall receive maximum flexibility in the expenditure of any new or existing categorical funds not otherwise prohibited by state or federal law and shall redirect for the purposes of their academic improvement plan new or existing categorical or general purpose funds.

52055. The governing board of a school that fails to meet its annual short-term growth target within 12 months following receipt of funding pursuant to Section 52054.5 shall hold a public hearing at a regularly scheduled meeting to ensure that members of the school community are aware of the lack of progress. The governing board of the school district shall, upon consultation with the external evaluator and the schoolsite and community team selected pursuant to Section 52054, choose from a range of interventions for the school, including reassignment of school personnel to the extent authorized by law, negotiation of site-specific amendments to collective bargaining agreements, or other changes deemed appropriate, in order to continue implementing the action plan approved pursuant to Section 51054, and to make progress toward meeting the school's growth targets.

52055.5. (a) Following 24 months after receipt of funding pursuant to Section 52054.5, a school that meets or exceeds its growth

target each year shall receive a monetary or nonmonetary award, under the Governor's Performance Award Program, as set forth in Section 52057. Funds received from this program shall be used at the school's discretion.

(b) Following 24 months after receipt of funding pursuant to Section 52054.5, a school that has not met its performance goals, but demonstrates significant growth, as determined by the State Board of Education, shall continue to participate in the program for an additional year and to receive funding in the amount specified in Section 52054.5.

(c) A school that does not meet its performance goals within 24 months after receipt of funding pursuant to Section 52054.5 and has failed to show significant growth, as determined by the State Board of Education, shall be deemed a low-performing school. Notwithstanding any other provision of law, the Superintendent of Public Instruction shall assume all the legal rights, duties, and powers of the governing board with respect to that school. The Superintendent of Public Instruction, in consultation with the State Board of Education and the governing board of the school district, shall reassign the principal of that school subject to the findings in subdivision (e). In addition to reassigning the principal, the Superintendent of Public Instruction, in consultation with the State Board of Education, shall, notwithstanding any other provision of law, do at least one of the following:

(1) Revise attendance options for pupils to allow them to attend any public school in which space is available. If additional attendance options are made available, nothing in this option shall be construed to require either the sending or receiving school district to incur additional transportation costs.

(2) Allow parents to apply directly to the State Board of Education for the establishment of a charter school and allow parents to establish the charter school at the existing schoolsite.

(3) Under the supervision of the Superintendent of Public Instruction, assign the management of the school to a college, university, county office of education, or other appropriate educational institution. However, the Superintendent of Public Instruction may not assume the management of the school.

(4) Reassign other certificated employees of the school.

(5) Renegotiate a new collective bargaining agreement at the expiration of the existing collective bargaining agreement.

(6) Reorganize the school.

(7) Close the school.

(d) In addition to the actions listed in subdivision (c), the Superintendent of Public Instruction, in consultation with the State Board of Education, may take any other action considered necessary or desirable against the school district or the school district governing board, including appointment of a new superintendent or suspension

of the authority of the governing board with respect to the school or schools identified pursuant to subdivision (c).

(e) Before the Superintendent of Public Instruction may take any action against a principal pursuant to subdivision (c), the Superintendent of Public Instruction or a designee of the superintendent shall hold a public hearing on the matter in the school district and make both of the following findings:

(1) A finding that the principal had the authority to take specific enumerated actions that would have helped the school meet its performance goals.

(2) A finding that the principal failed to take specific enumerated actions pursuant to paragraph (1).

(f) An action taken pursuant to subdivision (c), (d), or (e) shall not increase local costs or require reimbursement by the Commission on State Mandates.

(g) An action taken pursuant to subdivision (c), (d), or (e) shall be accompanied by specific findings by the Superintendent of Public Instruction and the State Board of Education that the action is directly related to the identified causes for continued failure by a school to meet its performance goals.

Article 4. High Achieving/Improving Schools Program

52056. (a) The High Achieving/Improving Schools Program is hereby established. Commencing in June 2000, and every June thereafter, the Superintendent of Public Instruction, with approval of the State Board of Education, shall rank all public schools based on the Academic Performance Index established pursuant to Section 52052. The schools shall be ranked in decile categories by grade level of instruction provided and shall include three categories: elementary, middle, and high school. Commencing in June 2001, the rankings shall indicate the target annual growth rates of schools, the actual growth rates attained by the schools, and how growth rates compare schools that have similar characteristics. For purposes of this section, similar characteristics include, but are not limited to, the following characteristics, insofar as data is available from the State Department of Education's data: pupil mobility, pupil ethnicity, pupil socioeconomic status, percentage of teachers who are fully credentialed, percentage of teachers who hold emergency credentials, percentage of pupils who are English language learners, average class size per grade level, and whether the schools operate multitrack year-round educational programs. The Superintendent of Public Instruction shall annually publish these rankings on the Internet.

(b) Commencing in July 2000, and every July thereafter, all schools shall report their ranking, including a description of the components of the ranking, in their annual school accountability report card pursuant to Sections 33126 and 35256.

(c) Commencing in July 2000, and every July thereafter, the governing board of each school district shall discuss the results of the annual ranking at a regularly scheduled meeting.

52056.5. Commencing with the 2000–01 fiscal year, a school that fails to meet annual state growth targets established pursuant to Section 52052 may, as determined by the Superintendent of Public Instruction with the approval of the State Board of Education, be subject to the Immediate Intervention/Underperforming Schools Program pursuant to subdivisions (e) and (f) of Section 52053, and Sections 52053.5, 52054, 52054.5, 52055, and 52055.5.

52057. (a) The State Board of Education shall establish a Governor's Performance Award Program to provide monetary and nonmonetary awards to schools that meet or exceed API performance growth targets established pursuant to Section 52052, and demonstrate comparable improvement in academic achievement by all numerically significant ethnic and socioeconomically disadvantaged subgroups within schools.

(b) All schools, including schools participating in the Immediate Intervention/Underperforming Schools Program are eligible to participate in the Governor's Performance Award Program. The manner and form in which the monetary and nonmonetary awards are given shall be established by the Superintendent of Public Instruction and approved by the State Board of Education. The monetary awards shall be made available on either a per pupil or per school basis, not to exceed one hundred fifty dollars ($150) per pupil enrolled and subject to funds appropriated in the annual Budget Act. A school that continues to show improvement in successive years is eligible to receive annual bonuses.

(c) In addition to or in substitution of monetary awards, the Superintendent of Public Instruction may establish, upon approval by the State Board of Education, nonmonetary awards that may include, but are not limited to, classification as a distinguished school, listing on a published public school honor roll, and public commendations by the Governor and the Legislature.

(d) A school that is eligible to participate in the Governor's Performance Award Program may request the State Board of Education to waive, all or any part of any provision of this code, or any regulation adopted by the State Board of Education, controlling any of the programs listed in clause (i) of subparagraph (B) of paragraph (1) of subdivision (a) of Section 54761 and Section 64000, and the board may grant the request if the waiver does not result in a decrease in the instructional time otherwise required by law or regulation or an increase in state costs and is determined to be consistent with subdivision (a) of Section 46300.

(e) A school that demonstrates significant growth shall be granted maximum flexibility in its expenditure of any new or existing categorical funds not otherwise prohibited under state or federal law to enable the school to continue improvement in pupil performance.

52058. (a) By January 31, 2002, each school district with schools participating in the Immediate Intervention/Underperforming Schools Program established pursuant to Section 52053 shall submit to the Superintendent of Public Instruction an evaluation of the impact, costs, and benefits of the program as it relates to the school district and the schools under its jurisdiction that are participating in the program and whether or not the schools met their growth targets, with an analysis of the reasons why the schools have or have not met those growth targets. Costs to develop and submit the evaluation shall be funded with resources provided pursuant to Article 3 (commencing with Section 52053).

(b) By January 15, 2000, the Superintendent of Public Instruction shall develop, and the State Board of Education shall approve, the guidelines for a request for proposal for an independent evaluator as described in this subdivision. By September 1, 2000, the Superintendent of Public Instruction shall contract with an independent evaluator to prepare a comprehensive evaluation of the implementation, impact, costs, and benefits of the Immediate Intervention/Underperforming Schools Program and the High Achieving/Improving Schools Program. The preliminary results of the evaluation shall be disseminated to the Legislature, the Governor, and interested parties no later than March 31, 2002, with a final report no later than June 30, 2002. The final report shall include recommendations for necessary or desirable modifications to the programs established pursuant to this chapter.

(c) The evaluations shall consider all of the following:

(1) Pupil performance data, including, but not limited to, results of assessments used to determine whether or not schools have made significant progress towards meeting their growth targets.

(2) Program implementation data, including, but not limited to, a review of startup activities, community support, parental participation, staff development activities associated with implementation of the program, percentage of fully credentialed teachers, percentage of teachers who hold emergency credentials, percentage of teachers assigned outside their subject area of competence, the accreditation status of the school if appropriate, average class size per grade level, and the number of pupils in a multitrack year-round educational program.

(3) (A) Pupil performance data, and its impact on the API, for each of the following subgroups:

(i) English language learners.

(ii) Pupils with exceptional needs.

(iii) Pupils that qualify for free or reduced price meals and are enrolled in schools that receive funds under Chapter 1 of the federal Elementary and Secondary Education Act of 1965, as amended by the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (P.L. 100-290).

(B) Information concerning individual pupils may not be disclosed in the process of preparing pupil performance data pursuant to this subdivision.

(d) The Superintendent of Public Instruction shall recommend and the State Board of Education shall approve a schedule for biennial evaluations of the programs established pursuant to this chapter, subsequent to the evaluation required by this section. The biennial evaluations shall be submitted, with appropriate recommendations, by June 30 of every odd-numbered year, commencing with the year 2003.

SEC. 2. (a) The sum of one hundred ninety-three million two hundred thousand dollars ($193,200,000) is hereby appropriated according to the following schedule:

(1) Sixty-three million seven hundred four thousand dollars ($63,704,000) from the General Fund to the Superintendent of Public Instruction for allocation to school districts for purposes of providing funding for planning and grants for implementing the Immediate Intervention/Underperforming Schools Program as set forth in Article 3 (commencing with Section 52053) of Chapter 6.1 of Part 28 of the Education Code.

(2) Thirty-two million four hundred forty-six thousand dollars ($32,446,000) from the Federal Trust Fund to the Superintendent of Public Instruction for allocation to school districts for purposes of providing funding for planning and grants for implementing the Immediate Intervention/Underperforming Schools Program as set forth in Article 3 (commencing with Section 52053) of Chapter 6.1 of Part 28 of the Education Code.

(3) Ninety-six million one hundred fifty thousand dollars ($96,150,000) from the General Fund to the Superintendent of Public Instruction for allocation to school districts that meet or exceed performance growth targets established by the board pursuant to the High Achieving/Improving Schools Program as set forth in Article 4 (commencing with Section 52056) of Chapter 6.1 of Part 28 of the Education Code. Funds appropriated pursuant to this paragraph that have not been allocated by June 30, 2000, shall be available for allocation and expenditure for purposes of this paragraph in the 2001–02 fiscal year.

(4) Nine hundred thousand dollars ($900,000) from the General Fund to the Superintendent of Public Instruction to provide support services related to programs established by the Public Schools Accountability Act of 1999 pursuant to Chapter 6.1 (commencing with Section 52050) of Part 28 of the Education Code.

(b) For the purposes of making the computations required by Section 8 of Article XVI of the California Constitution, the appropriation made by paragraphs (1) and (3) shall be deemed to be "General Fund revenues appropriated for school districts," as defined in subdivision (c) of Section 41202 of the Education Code, for the 1999–2000 fiscal year, and included within the "total allocations

to school districts and community college districts from General Fund proceeds of taxes appropriated pursuant to Article XIII B," as defined in subdivision (e) of Section 41202 of the Education Code, for the 1999–2000 fiscal year.

SEC. 3. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

CHAPTER 4

An act to amend Sections 44662 and 44664 of, to add Section 44498 to, to add Article 4.5 (commencing with Section 44500) to Chapter 3 of Part 25 of, and to repeal Article 4 (commencing with Section 44490) of Chapter 3 of Part 25 of, the Education Code, relating to teachers, and making an appropriation therefor.

[Approved by Governor April 6, 1999. Filed with Secretary of State April 6, 1999.]

The people of the State of California do enact as follows:

SECTION 1. It is the intent of the Legislature to establish a teacher peer assistance and review system as a critical feedback mechanism that allows exemplary teachers to assist veteran teachers in need of development in subject matter knowledge or teaching strategies, or both.

It is further the intent of the Legislature that a school district that operates a program pursuant to Article 4.5 (commencing with Section 44500) of Chapter 3 of Part 25 of the Education Code coordinate its employment policies and procedures for that program with its activities for professional staff development, the Beginning Teacher Support and Assessment Program, and the biennial evaluations of certificated employees required pursuant to Section 44664.

SEC. 2. Section 44498 is added to the Education Code, to read:

44498. (a) When a school district notifies the Superintendent of Public Instruction that it plans to implement a program pursuant to Article 4.5 (commencing with Section 44500), this article shall not apply to that school district.

(b) This article shall become inoperative on July 1, 2001, and, as of January 1, 2002, is repealed, unless a later enacted statute that is

enacted before January 1, 2002, deletes or extends the dates on which it becomes inoperative and is repealed.

SEC. 3. Article 4.5 (commencing with Section 44500) is added to Chapter 3 of Part 25 of the Education Code, to read:

Article 4.5. California Peer Assistance and Review Program for Teachers

44500. (a) There is hereby established the California Peer Assistance and Review Program for Teachers. The governing board of a school district and the exclusive representative of the certificated employees in the school district may develop and implement a program authorized by this article that meets local conditions and conforms with the principles set forth in subdivision (b).

(b) The following principles, at a minimum, shall be included in a locally developed program authorized by this article:

(1) A teacher participant shall be a permanent employee in a school district with 250 or greater units of average daily attendance or a permanent or probationary employee in a school district with fewer than 250 units of average daily attendance and volunteer to participate in the program or be referred for participation in the program as a result of an evaluation performed pursuant to subdivision (b) of Section 44664. In addition, teachers receiving assistance may be referred pursuant to a collectively bargained agreement.

(2) Performance goals for an individual teacher shall be in writing, clearly stated, aligned with pupil learning, and consistent with Section 44662.

(3) Assistance and review shall include multiple observations of a teacher during periods of classroom instruction.

(4) The program shall expect and strongly encourage a cooperative relationship between the consulting teacher and the principal with respect to the process of peer assistance and review.

(5) The school district shall provide sufficient staff development activities to assist a teacher to improve his or her teaching skills and knowledge.

(6) The program shall have a monitoring component with a written record.

(7) The final evaluation of a teacher's participation in the program shall be made available for placement in the personnel file of the teacher receiving assistance.

44501. A consulting teacher participating in a program operated pursuant to this article shall meet locally determined criteria and each of the following qualifications:

(a) The consulting teacher shall be a credentialed classroom teacher with permanent status or, in a school district with an average daily attendance of less than 250 pupils, a credentialed classroom teacher who has completed at least three consecutive school years as

an employee of the school district in a position requiring certification qualifications.

(b) The consulting teacher shall have substantial recent experience in classroom instruction.

(c) The consulting teacher shall have demonstrated exemplary teaching ability, as indicated by, among other things, effective communication skills, subject matter knowledge, and mastery of a range of teaching strategies necessary to meet the needs of pupils in different contexts.

44502. (a) The governance structure of a program designed pursuant to this article shall include a joint teacher administrator peer review panel that shall select consulting teachers, review peer review reports prepared by consulting teachers, and make recommendations to the governing board of a school district regarding participants in the program, including forwarding to the governing board the names of individuals who, after sustained assistance, are not able to demonstrate satisfactory improvement.

(b) The majority of the panel shall be composed of certificated classroom teachers chosen to serve on the panel by other certificated classroom teachers. The remainder of the panel shall be composed of school administrators chosen to serve on the panel by the school district.

(c) The panel's procedures for selecting consulting teachers, at a minimum, shall require the following:

(1) Consulting teachers shall be selected by the majority vote of the panel.

(2) The selection process shall include provisions for classroom observation of the candidates for consulting teacher by the panel.

(d) The panel shall also annually evaluate the impact of the district's peer assistance and review program in order to improve the program. This evaluation may include, but is not limited to, interviews or surveys of the program participants. The panel may submit recommendations for improvement of the program to the governing board of the school district and to the exclusive representative of the certificated employees in the school district, if the certificated employees in the district are represented by an exclusive representative.

44503. (a) The governing board of a school district that accepts state funds for purposes of this article agrees to negotiate the development and implementation of the program with the exclusive representative of the certificated employees in the school district, if the certificated employees in the district are represented by an exclusive representative. In a school district in which the certificated employees are not represented, the school district shall develop a Peer Assistance and Review Program for Teachers consistent with this article in order to be eligible to receive funding under this article.

(b) Functions performed pursuant to this article by certificated employees employed in a bargaining unit position shall not constitute

either management or supervisory functions as defined by subdivisions (g) and (m) of Section 3540.1 of the Government Code.

(c) Teachers who provide assistance and review shall have the same protection from liability and access to appropriate defense as other public school employees pursuant to Division 3.6 (commencing with Section 810) of Title 1 of the Government Code.

(d) It is the intent of the Legislature that school districts be allowed to combine, by mutual agreement, their programs of peer assistance and review with those of other school districts.

(e) Not more than 5 percent of the funds received by a school district for the Peer Assistance and Review Program for Teachers may be expended for administrative expenses.

44504. (a) Except as provided in Section 44505, the California Peer Assistance and Review Program for Teachers shall become fully operational on July 1, 2001, on which date it shall completely replace the California Mentor Teacher Program established pursuant to Chapter 1302 of the Statutes of 1983 and set forth in Article 4 (commencing with Section 44490). This article is applicable to all school districts that elect to receive state funds for the California Peer Assistance and Review Program for Teachers. Commencing with the 2001–02 fiscal year, funding shall only be made available for purposes authorized by this article. A school district that elects to participate in the program established pursuant to this article shall certify to the Superintendent of Public Instruction that it has implemented a Peer Assistance and Review Program for Teachers pursuant to this article.

(b) A school district that does not elect to participate in the program authorized under this article by July 1, 2001, is not eligible for any apportionment, allocation, or other funding from an appropriation for the program authorized pursuant to this article or for any apportionments, allocations, or other funding from funding for local assistance appropriated pursuant to Budget Act Item 6110-231-0001, funding appropriated for the Administrator Training and Evaluation Program set forth in Article 3 (commencing with Section 44681) of Chapter 3.1 of Part 25, from an appropriation for the Instructional Time and Staff Development Reform Program as set forth in Article 7.5 (commencing with Section 44579) of Chapter 3, or from an appropriation for school development plans as set forth in Article 1 (commencing with Section 44670.1) of Chapter 3.1 and the Superintendent of Public Instruction shall not apportion, allocate, or otherwise provide any funds to the district pursuant to those programs.

(c) Commencing February 1, 2002, a school district that elects not to participate in the program authorized under this article shall report annually at a regularly scheduled meeting of the governing board of the school district on the rationale for not participating in the program.

44505. (a) Between July 1, 1999, and June 30, 2000, a school district may notify the Superintendent of Public Instruction that it

plans to implement, commencing July 1, 2000, a Peer Assistance and Review Program for Teachers pursuant to this article. Upon receipt of the notification by the school district, the Superintendent of Public Instruction shall apportion to the school district an amount equal to the number of mentor teachers that the state funded for the district in the 1999–2000 fiscal year pursuant to Article 4 (commencing with Section 44490) multiplied by two thousand eight hundred dollars ($2,800). The school district may use the funds apportioned pursuant to this section for activities necessary to implement the Peer Assistance and Review Program for Teachers.

(b) Between July 1, 2000, and May 31, 2001, a school district may notify the Superintendent of Public Instruction that it plans to implement, commencing July 1, 2001, a Peer Assistance and Review Program for Teachers pursuant to this article. On or before June 29, 2001, the Superintendent of Public Instruction shall apportion to every school district that provides this notification an amount equal to the number of mentor teachers that the state funded for the school district in the 1999–2000 school year pursuant to Article 4 (commencing with Section 44490) times a maximum of one thousand dollars ($1,000).

(c) The maximum amount of funds available for apportionment to school districts by the Superintendent of Public Instruction for allocation pursuant to subdivision (b) shall be the amount appropriated pursuant to subdivision (a) of Section 6 of the act adding this section, minus any funds apportioned by the Superintendent of Public Instruction to school districts pursuant to subdivision (a) as of June 30, 2000.

(d) A school district may use funds apportioned pursuant to this section for activities necessary to implement the Peer Assistance and Review Program for Teachers.

44506. (a) The state funding for this article subsequent to the 1999–2000 fiscal year is subject to an appropriation in the annual Budget Act. It is the intent of the Legislature that the funding for the program for the 2000–01 fiscal year be at least equal to the 1999–2000 fiscal year appropriation for Article 4 (commencing with Section 44490) plus the amount apportioned pursuant to Section 44505.

(b) If a school district elects to implement a Peer Assistance and Review Program for Teachers after June 30, 2000, but before July 1, 2001, it is the intent of the Legislature that the school district's state apportionment for fiscal year 2000–01 be at least equal to the dollar amount the district received in the 1999–2000 fiscal year for purposes of Article 4 (commencing with Section 44490).

(c) A school district that receives funds for purposes of this article may also expend those funds for any of the following purposes:

(1) The Marian Bergeson Beginning Teacher Support and Assessment System as set forth in Article 4.5 (commencing with Section 44279.1) of Chapter 2.

(2) The California Pre-Internship Teaching Program as set forth in Article 5.6 (commencing with Section 44305) of Chapter 2.

(3) A district intern program as set forth in Article 7.5 (commencing with Section 44325) of Chapter 2.

(4) Professional development or other educational activities previously provided pursuant to Article 4 (commencing with Section 44490) of Chapter 3.

(5) Any program that supports the training and development of new teachers.

44507. Subject to the availability of funding in the annual Budget Act, the Superintendent of Public Instruction shall contract with an independent evaluator on or before December 15, 2002, to prepare a comprehensive evaluation of the implementation, impact, cost, and benefit of the California Peer Assistance and Review Program for Teachers. The evaluation shall be delivered to the Legislature, the Governor, and interested parties on or before January 1, 2004.

44508. For purposes of this article, "school district" includes a county office of education.

SEC. 4. Section 44662 of the Education Code is amended to read:

44662. (a) The governing board of each school district shall establish standards of expected pupil achievement at each grade level in each area of study.

(b) The governing board of each school district shall evaluate and assess certificated employee performance as it reasonably relates to:

(1) The progress of pupils toward the standards established pursuant to subdivision (a) and, if applicable, the state adopted academic content standards as measured by state adopted criterion referenced assessments.

(2) The instructional techniques and strategies used by the employee.

(3) The employee's adherence to curricular objectives.

(4) The establishment and maintenance of a suitable learning environment, within the scope of the employee's responsibilities.

(c) The governing board of each school district shall establish and define job responsibilities for certificated noninstructional personnel, including, but not limited to, supervisory and administrative personnel, whose responsibilities cannot be evaluated appropriately under the provisions of subdivision (b) and shall evaluate and assess the performance of those noninstructional certificated employees as it reasonably relates to the fulfillment of those responsibilities.

(d) Results of an employee's participation in the Peer Assistance and Review Program for Teachers established by Article 4.5 (commencing with Section 44500) shall be made available as part of the evaluation conducted pursuant to this section.

(e) The evaluation and assessment of certificated employee performance pursuant to this section shall not include the use of publishers' norms established by standardized tests.

(f) Nothing in this section shall be construed as in any way limiting the authority of school district governing boards to develop and adopt additional evaluation and assessment guidelines or criteria.

SEC. 5. Section 44664 of the Education Code is amended to read:

44664. (a) Evaluation and assessment of the performance of each certificated employee shall be made on a continuing basis, at least once each school year for probationary personnel, and at least every other year for personnel with permanent status. The evaluation shall include recommendations, if necessary, as to areas of improvement in the performance of the employee. If an employee is not performing his or her duties in a satisfactory manner according to the standards prescribed by the governing board, the employing authority shall notify the employee in writing of that fact and describe the unsatisfactory performance. The employing authority shall thereafter confer with the employee making specific recommendations as to areas of improvement in the employee's performance and endeavor to assist the employee in his or her performance. When any permanent certificated employee has received an unsatisfactory evaluation, the employing authority shall annually evaluate the employee until the employee achieves a positive evaluation or is separated from the district.

(b) Any evaluation performed pursuant to this article which contains an unsatisfactory rating of an employee's performance in the area of teaching methods or instruction may include the requirement that the certificated employee shall, as determined necessary by the employing authority, participate in a program designed to improve appropriate areas of the employee's performance and to further pupil achievement and the instructional objectives of the employing authority. If a district participates in the Peer Assistance and Review Program for Teachers established pursuant to Article 4.5 (commencing with Section 44500), any certificated employee who receives an unsatisfactory rating on an evaluation performed pursuant to this section shall participate in the Peer Assistance and Review Program for Teachers.

(c) Hourly and temporary hourly certificated employees, other than those employed in adult education classes who are excluded by the provisions of Section 44660, and substitute teachers may be excluded from the provisions of this section at the discretion of the governing board.

SEC. 6. There is hereby appropriated for the 1999–2000 fiscal year the sum of one hundred twenty-five million eighty-two thousand dollars ($125,082,000) according to the following schedule:

(a) The sum of forty-one million eight hundred thousand dollars ($41,800,000) from the General Fund to the Superintendent of Public Instruction for the purposes of Section 44505 of the Education Code.

(b) The sum of eighty-three million two hundred thousand dollars ($83,200,000) from the General Fund to the Superintendent of Public

Instruction for the purposes of Article 4 (commencing with Section 44490) of Chapter 3 of Part 25 of the Education Code.

(c) The sum of eighty-two thousand dollars ($82,000) is hereby appropriated from the General Fund to the Superintendent of Public Instruction to provide support services related to the program established pursuant to Section 44500 of the Education Code.

SEC. 7. Notwithstanding Section 17610 of the Government Code, if the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code. If the statewide cost of the claim for reimbursement does not exceed one million dollars ($1,000,000), reimbursement shall be made from the State Mandates Claims Fund.

CHAPTER 5

An act relating to teaching credentials.

[Approved by Governor April 12, 1999. Filed with Secretary of State April 12, 1999.]

The people of the State of California do enact as follows:

SECTION 1. (a) It is the intent of the Legislature in enacting the act adding this section to evaluate the reliability and validity of the content of the California Basic Education Skills Test (CBEST) in order to ensure that teachers employed by California public schools are measured by a proper assessment of basic competency in areas of reading, writing, and mathematics, and that the passing score is set at an appropriate level.

(b) The Commission on Teacher Credentialing shall review the state basic skills proficiency test to evaluate the test's content validity, reliability, and passing scores. The Commission on Teacher Credentialing shall submit a written report pertaining to the review of the test, including any findings and recommendations, to the Legislature, the Governor, and the State Board of Education on or before January 1, 2001.

CONTENTS

PREFACE

Digests

The Summary Digest consists of a short summary of each law enacted, and of each constitutional amendment, concurrent or joint resolution adopted by the Legislature in 1999.

The text of the Summary Digest is arranged numerically by chapter number.

Superior numbers following the title refer to a Governor's Message affecting that law. These are printed after the digests in the ''Digest Chapters Superior Numbers'' section.

Cross Reference Tables

Cross reference tables are arranged numerically by bill or resolution number and indicate the chapter number of each.

New General Laws

Lists new general laws passed in the year 1999 which do not specifically amend, add to, or repeal any existing code or general law.

Index

A subject matter index to all measures, including constitutional amendments and resolutions, is included.

Statutory Record

This edition of the Summary Digest includes a statutory record for 1999. Superior numbers following the *Effect* refer to a special condition affecting that section.

Cumulative statutory records for 10-year periods, 1989–1998, 1979–1988, 1969–1978, 1959–1968 and 1949–1958, and for the 16-year period, 1933–1948, are published in separate volumes, which supplement the original statutory record, 1850–1932, published in 1933.

EFFECTIVE DATES

Regular Session

The 1999–2000 Regular Session convened on December 7, 1998, and the interim study recess commenced on September 10, 1999. Statutes enacted in 1999, other than those taking immediate effect, will become effective January 1, 2000. In absence of other considerations, the provisions of a statute become operative on the date it takes effect. Digests indicate statutes taking immediate effect.

An urgency statute, and a statute calling an election, providing for a tax levy, or making an appropriation for the usual current expenses of the state may take effect immediately. Such a statute becomes *effective* on the date it is filed with the Secretary of State.

However, any statute may, by its own terms, delay the *operation* of its provisions until the happening of some contingency, until a specified time, or until a vote of the electors at a statewide election. Also, a later statute or a general provision in a particular code may delay the operation of a statute to a time after its effective date.

The effective date of a joint or concurrent resolution is the date it is filed with the Secretary of State.

A constitutional amendment proposed by the Legislature and adopted by the people takes effect the day after the election unless the measure provides otherwise.

Extraordinary Sessions

An urgency statute enacted at a special session of the Legislature takes effect immediately, as outlined above, and the same rules apply with respect to a delayed *operative date*. A nonurgency statute takes effect on the 91st day after adjournment of the special session at which the bill was passed. The effective date of a concurrent resolution is the date it is filed with the Secretary of State.

The 1999–2000 First Extraordinary Session convened on January 19, 1999, and adjourned *sine die* on March 26, 1999. Statutes enacted at an extraordinary session, other than those taking immediate effect, will become effective on the 91st day after adjournment. The 91st day after adjournment is June 25, 1999.

DIGESTS OF STATUTES ENACTED IN 1999

1999–2000 REGULAR SESSION

BILL CHAPTERS

Ch. 1 (SB 1) Sher. Beverage containers.

(1) The existing California Beverage Container Recycling and Litter Reduction Act requires a distributor of specified beverage containers to pay a redemption payment to the Department of Conservation, for each beverage container, as defined, sold or transferred, for deposit in the California Beverage Container Recycling Fund. The money in the fund is continuously appropriated to the department to pay refund values, processing payments, and for other purposes.

Under the act, the department is required to calculate a processing fee for each beverage container with a specified scrap value, which is required to be paid by beverage manufacturers for each beverage container sold or transferred to a dealer. Prior to January 1, 1999, a processing fee was required to be imposed annually only if the scrap value for the material was less than the cost of recycling, and to be reduced, as specified, and, after January 1, 1999, a processing fee is required to be established pursuant to different criteria.

Under prior law, the department, until January 1, 1999, was permitted to expend $18,500,000 of the moneys in the fund for the payment of handling fees, and $5,000,000, until January 1, 1999, for payments for curbside programs.

The bill would reenact the prior method of calculating the processing fee and would extend those provisions until January 1, 2000. The bill would require the processing fee and processing payment calculation imposed by this bill to apply retroactively to beverage containers sold or redeemed on or after January 1, 1999.

This bill would extend the authorization to expend these funds for handling fees and curbside programs until January 1, 2000, thereby making an appropriation.

The bill would require the payments of handling fees to supermarket sites and payments to curbside programs to apply retroactively to containers redeemed or collected on or after January 1, 1999.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 2 (SB 49) Johnson. Elections: regular election dates.

Former law included among various established regular election dates the first Tuesday after the first Monday in June of each year. That date was deleted as a regular election date by legislation enacted in 1998 and operative January 1, 1999.

This bill instead would establish the first Tuesday after the first Monday in June of each odd-numbered year as a regular election date.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 3 (SB 138) O'Connell. State Highway Patrol: memorandum of understanding.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of a memorandum of understanding entered into between the state employer and Unit 5—California Association of Highway Patrolmen, and would provide that the provisions of that memorandum of understanding that require the expenditure of funds shall become effective pursuant to the approval of the Legislature contained in the bill.

(2) The State Civil Service Act requires that a general reemployment list be maintained for each class of state civil service employees consisting of the names of all persons who have occupied positions with probationary or permanent status in the class and who have been legally laid off or demoted in lieu of layoff. The act requires that for state employees in State Bargaining Unit 5, 6, 8, or 16, a general reemployment list be maintained for each entry level class listing the names of all persons who have occupied positions with probationary or permanent status in the class and who have been legally laid off, demoted in lieu of layoff, or transferred in lieu of layoff.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require that for state employees in State Bargaining Unit 5 the general reemployment list be maintained for each class, rather than for each entry level class.

Under the State Civil Service Act, the State Personnel Board is required to establish for each class of state civil service employees the length of the probationary period. The act generally requires that a state civil service employee serve a probationary period of 6 months, unless the board establishes a longer period of not more than one year. Under the act, the probationary period that a state employee in State Bargaining Unit 6, 8, or 16 is required to serve upon appointment is not less than 6 months nor more than 2 years.

This bill would specify that the probationary period that a state employee in State Bargaining Unit 5 is to serve upon appointment is not less than 6 months nor more than 2 years.

(3) The Public Employees' Retirement Law prescribes retirement benefits for patrol members.

This bill would increase the service allowance limitation from 80% to 85% for members of State Bargaining Unit 5 who retire on and after January 1, 1999, and would establish a new retirement option consisting of a partial distribution of the present value of the actuarial amount of retirement allowances for those members. The bill would also provide increased basic death benefits for specified survivors of state members.

(4) Existing law, the State Employees' Dental Care Act, provides dental care plan coverage to public employees and annuitants meeting the eligibility requirements prescribed by the Board of Administration of the Public Employees' Retirement System. Existing law provides that notwithstanding particular provisions of the act, state employees in State Bargaining Unit 6 may receive a percentage of the employer's contribution payable for annuitants if the employees are credited with 10 years of state service.

This bill would also provide that state employees in State Bargaining Unit 5 may receive a percentage of the employer's contribution payable for annuitants if the employees are credited with 10 or more years of state service.

(5) The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 4 (SB 412) Burton. State employees: memoranda of understanding.

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of an unspecified memorandum of understanding entered into between the state employer and a specified employee organization, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 5 (SB 609) Burton. State employees: memoranda of understanding.

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of memoranda of understanding entered into between the state employer and specified employee organizations, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

The bill would also declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 6 (AB 22) Longville. Elections: regular election dates.

Former law included among various established regular election dates, the first Tuesday after the first Monday in June of each year. That date was deleted as a regular election date by legislation enacted in 1998 and operative January 1, 1999. Legislation enacted and effective February 4, 1999, restored the first Tuesday after the first Monday in June as a regular election date of each odd-numbered year.

This bill would make technical changes to those provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 7 (AB 288) Wesson. County employee retirement: benefits.

The County Employees Retirement Law of 1937 prescribes the definition of "compensation" and "compensation earnable" for purposes of calculating retirement benefits for certain Los Angeles County employees.

This bill would authorize the board of supervisors to elect to exclude specified cafeteria or flexible benefit plan contributions from these definitions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 8 (SB 93) Chesbro. Income and bank and corporation taxes: IRS restructuring and reform.

The Personal Income Tax Law and the Bank and Corporation Tax Law impose taxes on income and, among other things, provide for specified conformity to federal income tax laws. In this connection, the federal Internal Revenue Service Restructuring and Reform Act of 1998 provides for, among other things, changes to the way the Internal Revenue Service (IRS) is organized, additional taxpayer rights, including a shifting of the burden of proof, and changes to the rules as to how taxes are computed.

This bill would provide for specified conformity to that federal act with respect to early withdrawals of certain amounts converted from IRAs to Roth IRAs, the determination of the 5-year holding period with respect to the conversion of the Roth IRAs, certain ordering rules to determine amounts that are withdrawn in the case where a Roth IRA contains conversion amounts and other contributions, corrections of erroneous conversions and due dates pertaining to Roth IRAs, and clarification of the contribution limit to a Roth IRA.

This bill would apply these changes to taxable years beginning on or after January 1, 1998.

This bill would take effect immediately as a tax levy.

Ch. 9 (SB 1303) Solis. Unemployment compensation benefits: freezing weather.

Existing law provides that an individual is considered "unemployed" for the purpose of eligibility for unemployment compensation benefits if for any week of less than full-time work, the wages payable to the individual for that week, when reduced by $25 or 25% of the wages payable, whichever is greater, do not equal or exceed the individual's unemployment weekly benefit amount. Existing law provides for the calculation of unemployment benefits.

This bill would provide that an individual who has been laid off from work or who is unable to commence work as a direct result of the freezing weather conditions in December 1998, as specified, shall be considered "unemployed" for the purpose of eligibility for unemployment compensation benefits if for any week of less than full-time work, the wages payable to the individual for that week, when reduced by $200, do not equal or exceed the individual's unemployment weekly benefit amount. This bill would require the payment of unemployment compensation to an individual under these circumstances in a weekly amount equal to his or her weekly benefit amount less the amount of wages in excess of $200 payable for that week, with benefits subject to the regular one-week waiting period. This bill would be limited to residents of a county with an unemployment rate in excess of 13% that is covered by a specified order of the Federal Emergency Management Agency.

This bill would provide for repeal of these provisions on August 7, 1999.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that unemployment compensation benefits are paid from the Unemployment Fund, a continuously appropriated special fund. By expanding benefits payable from the fund, this bill would make an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 10 (SB 104) Brulte. Postgovernment employment: restrictions.

Existing provisions of the Political Reform Act of 1974 prohibit a designated employee of a state administrative agency, among others, from representing any other person before any state administrative agency or officer or employee for which he or she worked for 12 months before leaving employment if the appearance or communication is for the purpose of influencing administrative action, as defined, among other things. The act exempts from these provisions an officer or employee of another state agency, board, or commission if the appearance or communication is for the purpose of influencing legislative or administrative action on behalf of the state agency, board, or commission.

This bill would expand the exemption to include an official holding an elective office of a local government agency if the appearance or communication is for the purpose of influencing legislative or administrative action on behalf of the local government agency.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^{2}/_{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^{2}/_{3}$ vote.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 11 (SB 108) Ortiz. State employees: memoranda of understanding.

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of memoranda of understanding entered into between the state employer and the California State Employees Association and the California Association of Professional Scientists, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 12 (SB 1257) Burton. State employees: compensation.

(1) The Budget Act of 1998 appropriated $360,479,000 from the General Fund for expenditure to augment state employee compensation and $4,370,000 from unallocated special funds for expenditure to augment the state employer's health benefit costs.

This bill would appropriate $35,824,000, as scheduled, in augmentation of these Budget Act appropriations.

(2) Section 8 of Article XVI of the California Constitution requires that the moneys applied by the state for the support of school districts and community colleges shall not be less than a specified percentage of General Fund revenues.

This bill would declare that a specified amount appropriated by this bill is to be applied toward the minimum funding requirements for the 1998–99 fiscal year for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(3) This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual and current expenses of the state.

Ch. 13 (SB 1273) Burton. State employees: memoranda of understanding.

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of memoranda of understanding entered into between the state employer and the Association of California State Attorneys and the Professional Engineers in California Government, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 14 (AB 839) Maldonado. State employees: memorandum of understanding.

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions that require the expenditure of funds of a memorandum of understanding entered into between the state employer and a specified employee organization, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

The bill would also declare that it is to take effect immediately as an urgency statute.

Ch. 15 (SB 264) Schiff. Instructional materials.

(1) Existing law, known as the Schiff-Bustamante Standards-Based Instructional Materials Program, provides for the apportionment of funds to school districts for the purchase of instructional materials in the core curriculum that are aligned to content standards for pupils in kindergarten and grades 1 to 12, inclusive. Existing law requires that the instructional materials for pupils in kindergarten and grades 1 to 8, inclusive, be adopted by the State Board of Education using criteria developed subsequent to the adoption of content standards.

This bill would require that the instructional materials for pupils in kindergarten and grades 1 to 8, inclusive, be adopted by the State Board of Education using criteria aligned to the adopted content standards.

(2) The Schiff-Bustamante Standards-Based Instructional Materials Program provides for the apportionment of funds to school districts for the purchase of instructional material in the core curriculum, which is not limited to mathematics.

Existing law, the Budget Act of 1998, appropriates $250,000,000 for instructional materials in mathematics.

This bill would authorize, notwithstanding the provisions in the Budget Act of 1998 or any other provision of law, the $250,000,000 appropriated by the Budget Act of 1998 to be expended for the purposes of the Schiff-Bustamante Standards-Based Instructional Materials Program, thereby making an appropriation.

(3) The Schiff-Bustamante Standards-Based Instructional Materials Program requires the State Department of Education to apportion funds appropriated for purposes of the program on the basis of an equal amount per pupil enrolled in public elementary schools and high schools, excluding summer school, adult, and regional occupational program and center enrollment, during the preceding fiscal year. Existing law provides that this method of allocation, using enrollment instead of average daily attendance, shall not be construed as a precedent for future allocation methods for instructional materials or for any other education program.

Existing law, the Budget Act of 1998, provides that funds appropriated by that measure for instructional materials for mathematics shall instead be allocated on the basis of an equal amount per unit of average daily attendance, rather than on the basis of an equal amount per pupil.

This bill would require, notwithstanding the provisions in the Budget Act of 1998 or any other provision of law, that funding for instructional materials in mathematics be

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

allocated to school districts and county offices of education on the basis of an equal amount per pupil enrolled in public elementary schools and high schools, excluding the enrollment of summer school, adult education programs, and regional occupation centers and programs, in the prior fiscal year, thereby making an appropriation.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 16 (SB 279) Dunn. Prisons.

Existing law provides that if a prisoner has a severe mental disorder that is not in remission or cannot be kept in remission without treatment and it was a factor in the commission of one of a list of specified crimes for which the prisoner was sentenced to prison, and the prisoner has been in treatment for the severe mental disorder for 90 days or more within the year prior to the prisoner's parole or release, the prisoner, as a condition of his or her parole, shall be treated by the State Department of Mental Health. The crimes to which this provision applies include arson of a structure, forest land, or property that causes great bodily injury and crimes in which the prisoner used force or violence, or caused serious bodily injury, as defined.

This bill would add to the list of crimes which may qualify such a person, for treatment by the State Department of Mental Health (1) the actual or attempted arson of a structure, forest land, or property where the act posed a substantial danger of physical harm to others, and (2) a crime in which the perpetrator expressly or impliedly threatened another with the use of force or violence likely to produce substantial physical harm in such a manner that a reasonable person would believe and expect that the force or violence would be used. These provisions would apply to any person committed for treatment by the State Department of Mental Health on or after July 1, 1986.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 17 (SB 307) Rainey. Redevelopment plans.

The existing Community Redevelopment Law imposes specified time limitations on redevelopment plans, prohibits an agency from paying indebtedness or receiving property taxes after 10 years from the termination of the plan, and authorizes the extension of those time limitations in certain instances if prescribed procedures are followed, including extending for up to 10 years a 20-year time limit on the establishment of specified loans, advances, and indebtedness based upon substantial evidence of blight that cannot be eliminated without additional debt. Existing law authorizes a legislative body to amend a redevelopment plan adopted prior to January 1, 1994, that has a shorter limitation than authorized by law to extend the limitation, not to exceed those specified time limitations, by adoption of an ordinance on or after January 1, 1999, but on or before December 31, 1999, without complying with those prescribed procedures.

This bill would, with respect to extending for up to 10 years a 20-year time limit on the establishment of specified loans, advances, and indebtedness based upon substantial evidence of blight that cannot be eliminated without additional debt, prohibit the use of the authority to extend a shorter limitation by adoption of an ordinance on or after January 1, 1999, but on or before December 31, 1999, without complying with those prescribed procedures.

The bill would specify that its provisions do not constitute a change in, but are declaratory of, existing law.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 18 (SB 100) Burton. Political parties: primaries: delegate returns.

Existing law provides that all properly registered voters may vote for their choice at any primary election for any candidate for each public office, regardless of political affiliation and without a declaration of political faith or allegiance. Existing law requires elections officials to send to the Secretary of State the election returns for all persons voted for at the presidential primary as delegates to national conventions.

Existing law requires each voter to be furnished an official primary ballot at a primary election. Existing law requires the official primary ballot to contain the names of all candidates for nonpartisan and partisan offices and measures to be voted for at the primary election.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would impose a state-mandated local program by requiring elections officials to report the results at the presidential primary for candidates for President to whom delegates of a political party are pledged according to the number of votes each candidate received from all voters and separately according to the number of votes each candidate received from voters affiliated with each political party qualified to participate in the presidential primary election, and from voters who have declined to affiliate with a qualified political party. The bill would require the elections official to adopt procedures and tabulate the ballots separately.

Existing law requires the Secretary of State to compile the election returns for various public offices and measures and make those results immediately available to the public.

This bill would expressly require the Secretary of State to compile and make the election returns of the presidential primary reported by the elections officials available to any person or organization upon request.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that no reimbursement shall be made from the State Mandates Claims Fund for costs mandated by the state pursuant to this act, but would recognize that local agencies and school districts may pursue any available remedies to seek reimbursement for these costs.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 19 (SB 231) Committee on Local Government. Validations.

This bill would enact the First Validating Act of 1999, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 20 (SB 301) Committee on Rules. Secretary of Senate and Chief Clerk of Assembly: notarial duties.

Existing law provides for the appointment and commission of notaries public and authorizes specified public officers and officials to perform services performed by notaries public relating to the acknowledgment and proof of execution of instruments. Existing law also provides for the offices of Secretary of the Senate and the Chief Clerk of the Assembly and authorizes those officers to administer and certify oaths.

This bill would authorize the Secretary of the Senate and the Chief Clerk of the Assembly to perform the services of acknowledgment and proof of execution of instruments in accordance with the provisions of law governing the performance of notarial services by public officers.

Ch. 21 (SB 1240) Burton. Maternal and child health: food program: vendors.

Existing law authorizes the State Department of Health Services to conduct a statewide program, to be known as the Special Supplemental Food Program for Women, Infants, and Children, for providing nutritional food supplements to low-income pregnant women, low-income postpartum and lactating women, and low-income infants and children under 5 years of age, who have been determined to be at nutritional risk by a health professional, based on criteria established by the department.

Existing law requires the department, under any program established pursuant to these provisions, to authorize retail food vendors, by written agreement, to accept nutrition coupons, and requires the department to establish specified criteria to limit the number of retail food vendors with which the department enters into agreements. The specified criteria includes the prices the vendor charges for foods in relation to other stores in the area.

This bill would instead include among the specified criteria the prices the vendor charges for foods in relation to other peer groups, as defined. The bill would require the department to authorize retail food vendors, by written agreement, to also accept

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

reimbursement, according to the system developed by the department, in addition to food coupons.

Existing law requires the department to ensure that, at a minimum, an authorized vendor take specified actions with respect to the programs.

This bill would include among these specified actions that a vendor accept up to the maximum allowable department reimbursement as payment in full for the maximum allowable quantity of food listed on the food instrument, and comply with department rules of vendor authorization, reimbursement, and monitoring that control program food costs, maximize participant access, and ensure program integrity.

The bill would also require the department to administer these provisions and to adopt minimum standards and regulations.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 22 (SB 24) Committee on Public Safety. Vehicles.

(1) Existing law makes it a crime to drive a vehicle while under the influence of alcohol, any drug, or a combination of alcohol and any drug. Existing law also makes it a crime to drive a vehicle with a blood-alcohol content equal to or greater than a specified percentage or to drive a vehicle when addicted to the use of any drug (DUI offenses). Under the provisions of Chapter 118 of the Statutes of 1998 (SB 1186), operative on July 1, 1999, these DUI provisions will be reorganized, without substantive change. Other chapters of the Statutes of 1998 made various changes to certain of the same DUI statutes affected by the reorganized provisions.

This bill would correct certain cross-references and would provide clarifying cross-references and renumbering to these reorganized provisions. The bill would also make technical and conforming changes to certain of the DUI provisions affected by other chapters of the Statutes of 1998. The bill would delete certain duplicative provisions. These technical and clarifying changes and the changes described in (4) would become operative on July 1, 1999, the operative date of the reorganized provisions.

(2) Existing provisions of the Insurance Code provide that a person is qualified to purchase a Good Driver Discount policy if the driver, among other things, during the previous 7 years has not been convicted of specified violations of the Vehicle Code and the Penal Code.

This bill would add to those violations specified former sections of the Vehicle Code.

(3) Existing law requires the Department of Motor Vehicles to notify the registered owner of each vehicle of the date that the registration renewal fee of the vehicle is due, as specified. Existing law also provides for the removal and impoundment of a vehicle with a vehicle registration expiration in excess of 6 months.

This bill would require the department when providing the registered owner with any final notice of delinquent registration to include a warning that failure to properly register the vehicle may result in the vehicle's removal and impoundment.

(4) Existing law authorizes peace officers and certain regularly employed and salaried employees engaged in traffic control matters of local agencies to remove vehicles under specified circumstances, including vehicles found in certain public places with a registration expiration date in excess of 6 months, before the date it is found. However, as to occupied vehicles with a registration expiration date in excess of 6 months, only a peace officer may remove the vehicle.

This bill would revise these provisions to also authorize the removal of a vehicle that is operated in certain places with a registration expiration date in excess of 6 months.

(5) Existing law authorizes the Department of Motor Vehicles to issue restricted drivers' licenses to persons following their convictions of DUI offenses if those persons comply with specified conditions including enrollment and participation in, and completion of licensed alcohol and other drug education and counseling services programs, or the installation and maintenance of ignition interlock devices, or both.

This bill would require the department to terminate the restrictions and to suspend or revoke, as specified, the person's privilege to operate a motor vehicle upon notification from the program that the person has failed to comply with the program's requirements. The bill would make conforming changes.

The bill would also require the department to suspend a person's driving privilege for one year if the person is subject to the above ignition interlock device restriction and is

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

convicted of operating a vehicle without a functioning ignition interlock device. The bill would make conforming changes.

The bill would require each person who is subject to an ignition interlock device restriction to have serviced, at least every 60 days, the device, as specified. The bill would require the installer who services these devices to notify the court if the device indicates that the person has attempted to remove, bypass, or tamper with the device, or if the person fails 3 or more times to comply with any requirement for the maintenance or calibration of the device. Because, under existing law, a violation of these provisions is a crime, this bill would impose a state-mandated local program by creating a new crime.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 23 (SB 47) Sher. Hazardous substance account: extension.

(1) Under prior law, the Carpenter-Presley-Tanner Hazardous Substance Account Act, which was repealed on January 1, 1999, with certain exceptions, imposed liability for hazardous substance removal or remedial actions and required the Department of Toxic Substances Control to adopt, by regulation, criteria for the selection and for the priority ranking of hazardous substance release sites for removal or remedial action under the act. The act required the department or, if appropriate, a California regional water quality control board, to prepare or approve remedial action plans for each listed site and provided for an arbitration process for the apportionment of liability for removal or remedial actions. The act authorized the department to expend the funds in the Toxic Substances Control Account in the General Fund, upon appropriation by the Legislature, to pay for, among other things, removal and remedial actions related to the release of hazardous substances. However, certain provisions of the act, including the Johnston-Filante Hazardous Substance Cleanup Bond Act of 1984 and related provisions, will not be repealed until the date when the bonds issued and sold pursuant to the bond act have been paid and the General Fund reimbursed.

Among other things, the act annually appropriated $5,000,000 from the Hazardous Substance Clearing Account to pay the principal of, and interest on, bonds issued and sold pursuant to the bond act and continuously appropriated $1,000,000 from the Toxic Substances Control Account to the department as a reserve account for emergencies. The act also continuously appropriated certain funds deposited in a subaccount for removal and remedial actions at a specific site and funds in a subaccount established by the Controller for site operation and maintenance. The act authorized a person to apply to the State Board of Control for compensation of a loss caused by the release of a hazardous substance, and provided that any person who knowingly gives, or causes to be given, any false information as a part of a claim for compensation is guilty of a misdemeanor.

This bill would repeal, reenact, and revise the act, thereby extending the effect of the act indefinitely. This bill would revise the term "operation and maintenance" and would define the terms "response," "respond," "response action," and "site."

The bill would direct the department or California regional water quality board to require a responsible party who is required to comply with operation and maintenance requirements to demonstrate and maintain financial assurance, in a specified manner, except as specified. The bill would require the remedial action plan to evaluate each alternative remedial action considered and rejected by the department or a regional board and to include specified information regarding those alternatives. The bill would require the department to issue orders for removal or remedial actions to the largest manageable number of potentially responsible parties, after considering specified factors, and would exempt certain determinations made by the department, when issuing those orders, from judicial review. The bill would require that any response action taken or approved pursuant to the act be based upon, and be no less stringent than, specified federal regulations and state statutes, regulations, and policies, and would

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

require a health or ecological risk assessment prepared in conjunction with such a response action to meet specified criteria and include specified assumptions.

The bill would require the department and the regional board to provide specified information to the affected community and to develop a public participation work plan, and would provide for the establishment of community advisory groups under specified conditions. The bill would authorize a community advisory group to request a technical assistance grant for a site. The department and the State Water Resources Control Board would be required to create 2 community service offices, by July 1, 2000, to perform specified duties.

The bill would require the Attorney General, at the request of the department, to recover, pursuant to state or federal law, any costs incurred by the department or regional board in carrying out the act. The bill would exempt certain owners of property from liability for groundwater releases, except as specified.

The bill would require the department to propose a final administrative or judicial expedited settlement with potentially responsible parties who have contributed a minimal amount of hazardous substances to a site.

The bill would establish the Orphan Share Reimbursement Trust Fund in the State Treasury and would authorize the administrator of the fund to expend the money in that fund, upon appropriation by the Legislature, for specified purposes, including the reimbursement of the orphan share of a site, as defined. The bill would provide that the provisions establishing the fund and the related provisions would not become operative until the operative date of a statute that becomes operative on or after January 1, 2000, creates a position in state government known as the Administrator of the Orphan Share Reimbursement Trust Fund to be appointed by the Governor and subject to confirmation by the Senate, and either appropriates funds to implement those provisions or establishes a revenue source for the fund, or both. The bill would provide for the suspension of the operation of those provisions under specified conditions.

The bill would make an appropriation by reenacting the continuous appropriations specified above. The bill, by reenacting the act, would also extend that misdemeanor provision, thereby imposing a state-mandated local program by creating a new crime.

The bill would provide that any action taken pursuant to the former act by the department, a California regional water quality control board, or any other state or local agency, would remain in effect on and after January 1, 1999, and be subject to the act, as reenacted by this bill. The bill would provide that it does not terminate, affect, or modify any proceeding, order, or agreement issued or entered into by the department, the regional board, by any other state or local agency pursuant to the former act or any rights or obligations arising out of a bond issue and that the reenacted act would apply retroactively, on and after January 1, 1999, to those proceedings, orders, agreements, or bonds.

The bill would require that funds expended by the department to pay the costs of carrying out actions to remove hazardous substances from sites of illegal drug laboratories during the period from January 1, 1999, until the effective date of the bill, to be paid from a specified appropriation made in the Budget Act of 1998, and would provide for the transfer of a specified amount of funds expended by the department from that appropriation.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 24 (SB 133) Kelley. Local capital investment incentives: qualified manufacturing facilities.

Existing law authorizes cities and counties to pay capital investment incentive amounts to a requesting proponent of a qualified manufacturing facility. A "qualified manufacturing facility" is defined for these purposes to include a facility that is operated by a business described in specified provisions of the Standard Industrial Classification Manual published by the United States Office of Management and Budget, 1987 edition.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill additionally would include within this definition a facility operated by a business engaged in the recovery of minerals from geothermal resources.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 25 (SB 463) Committee on Appropriations. Claims against the state: appropriation.

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate $1,255,178.62 from various funds, as specified, to the Executive Officer of the State Board of Control to pay claims accepted by the State Board of Control in accordance with a schedule that identifies various funds and accounts from which the payments are to be made.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 26 (SB 1205) Escutia. Housing: governmental assistance.

Existing law prescribes requirements for an owner of a housing development to give notice to tenants of the proposed termination or prepayment of governmental assistance, and requires an owner to give specified entities an opportunity to purchase the development upon terms that represent a bona fide intention to sell.

This bill would provide that the owner is deemed in compliance with those notice requirements when the owner decides to sell or dispose of the property if, prior to July 1, 1999, the owner has accepted such a bona fide offer. The bill would revise certain conditions that must be met by a qualified purchaser and revise the definition of an assisted housing development for that purpose.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 27 (AB 266) Longville. County employee retirement: contributions.

The County Employees Retirement Law of 1937 provides that contributions shall not be deducted from the salary of members having credit for 30 years' service provided the member was a member on March 7, 1973.

The bill would provide that any member having credit for 30 years' continuous service in the retirement association of San Bernardino County would not have contributions deducted from the member's salary.

Ch. 28 (AB 270) Floyd. Horse racing.

(1) Under existing law, the California Horse Racing Board may authorize an association conducting a racing meeting to accept wagers on the results of out-of-state harness or quarter horse features or stakes races, and with the board's approval and the concurrence of the horsemen's organization contracting with the association, other designated harness or quarter horse races, if the authorization complies with specified provisions of federal law, the wagering is offered only within the inclosure and only within 36 hours of the running of the out-of-state feature race, the association conducts at least 7 live races and imports no more than 4 races on live racing days, and, on days when live races are not being conducted, the purse in the out-of-state race is $100,000 or more.

This bill would limit this provision to harness and quarter horse associations, and would provide that the board may authorize these associations to accept wagers on up to 6 out-of-state or out-of-country harness or quarter horse races on any given live racing day, and, subject to specified conditions, to import additional races if only one breed is being raced on a given live racing day, the purse amount from which, after the usual deductions, including the portion for the racing association, would be distributed equally in the form of purses for harness and quarter horse horsemen. This bill would also delete the requirement that races imported under this provision be feature races or stake races with a purse of $100,000 or more.

(2) Under existing law, all revenues distributed to the state as license fees from horse racing are required to be distributed in the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

By providing for the importation of additional out-of-state and out-of-country races, this bill would authorize additional wagering, and would increase the amount of continuously appropriated license fees, thereby making an appropriation.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 29 (AB 1261) Committee on Agriculture. California Sheep Commission.

Existing law establishes the California Sheep Commission and prescribes the powers and duties of the commission, which include regulating and promoting the sheep industry in California. Existing law requires the Secretary of Food and Agriculture, not later than April 1, 1999, or as soon thereafter as possible, to establish a list of producers eligible to vote on the implementation of those provisions.

Under existing law, if the provisions governing the commission are implemented, the commission would be required on January 1 of each year, or as soon thereafter as possible, to establish assessments on wool marketed by producers, as specified.

This bill would specify that these assessment provisions apply to wool that was removed from sheep after December 31, 1998.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 30 (SB 16) Burton. Public works: prevailing wages.

(1) Existing law requires the body awarding any contract for public work to include in the contract specifications a requirement requiring the payment of travel and subsistence payments to each workman needed to execute the work, as those payments are defined in the applicable collective bargaining agreements.

This bill would repeal this provision.

(2) Existing law requires, except for public works projects of $1,000 or less, that workers employed on public works be paid not less than the general prevailing rate of per diem wages for work of a similar character in the locality that the public work is performed, and not less than the general prevailing rate of per diem wages for holiday and overtime work fixed, as provided in specified provisions. Existing law requires the body awarding a contract for public work to obtain from the Director of Industrial Relations the general prevailing rate for holiday and overtime work in the locality in which the public work is to be performed. Existing law specifies that the holidays upon which the prevailing rate of per diem wages shall be paid need not be specified by the awarding body but shall be all holidays recognized in the collective bargaining agreement.

This bill would provide that the holidays upon which the prevailing rate of per diem wages shall be paid shall be all holidays recognized by the applicable collective bargaining agreement and that if the prevailing rate is not based on a collectively bargained rate, the holidays upon which the prevailing rate shall be paid shall be as provided by a specified provision of existing law.

This bill would specify the methodology that the Director of Industrial Relations is to use to determine the general prevailing rate of per diem wages in the locality in which the public work is to be performed, including the rate for holiday and overtime work.

(3) Existing law requires that the representative of any craft, classification, or type of worker needed to execute a public works contract entered into with the state to file with the Department of Industrial Relations fully executed copies of collective bargaining agreements for the particular craft, classification, or type of work involved for the purposes of determining the per diem wages.

This bill would require the representative to file with the department an executed statement of the collectively bargained wage rates for the particular craft, classification, or type of work involved. The bill would provide that employer payments for per diem wages are deemed to include apprenticeship or other training programs authorized by an existing provision of law so long as the cost of training is reasonably related to the amount of the contributions.

Ch. 31 (AB 234) Lowenthal. Criminal history information: access by public housing authority.

Existing law authorizes local law enforcement agencies to furnish state summary criminal history information for the purpose of screening prospective residents and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

prospective and current staff of a regional, county, city, or other local public housing authority, at the request of the chief executive officer of the authority or his or her designee, upon a showing by the authority that it operates housing at which children under the age of 18 years reside or operates housing for persons categorized as aged, blind, or disabled.

This bill would also provide that a public housing authority would be entitled to receive criminal summary history information upon a showing by the authority that the authority manages a Section 8 housing program.

Ch. 32 (AB 323) Baldwin. Counties: oversight committees.

Existing law prohibits a member of a county treasury oversight committee from securing employment with bond underwriters, bond counsel, security brokerages or dealers, or financial services firms during the period that the person is a member of the committee or for three years after leaving the committee.

This bill instead would prohibit a person who is a member of the committee from securing employment with, or being employed by, any of these employers with whom the county treasurer is doing business or for one year after leaving the committee.

Ch. 33 (AB 468) Baugh. Bail.

Existing law authorizes a local law enforcement agency to furnish to a licensed bail agent or bail bond licensee, upon request, an individual's known aliases and other specified information upon specified conditions, including the condition that the information be from the record of a person for whom a bench warrant has been issued.

This bill would amend the above condition by requiring in the alternative, that the information be from the record of a person for whom a bail forfeiture has been ordered.

Ch. 34 (AB 223) Wiggins. Property tax revenue shifts: exclusions: fire districts.

Existing property tax law requires the county auditor, in each fiscal year, to allocate property tax revenue to local jurisdictions in accordance with specified formulas and procedures, and generally requires that each jurisdiction be allocated an amount equal to the total of the amount of revenue allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, and that jurisdiction's portion of the annual tax increment, as defined. Existing property tax law also reduces the amounts of ad valorem property tax revenue that would otherwise be annually allocated to the county, cities, and special districts pursuant to these general allocation requirements by requiring, for purposes of determining property tax revenue allocations in each county for the 1992–93 fiscal year, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance with certain formulas. It requires that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund in that county for allocation to school districts, community college districts, and the county office of education. It also limits the initial reduction amount that may be so calculated and transferred with respect to a special district to no more than 40% of that district's property tax revenues or 10% of that district's total annual revenues. For purposes of applying these limits with respect to a special district, including a fire department, that provides fire protection or fire suppression services in a county that contracts with the state to protect state responsibility areas, existing law specifies that the district's total annual revenues do not include the total amount of all funds that are appropriated to that district pursuant to certain statutory provisions.

This bill would clarify the application of this exclusion to a special district in a county that contracts with the state for the protection of state responsibility areas and in a county that does not so contract, and would specify that this exclusion, as amended by a specified legislative act, should not be construed to affect the exclusion as it existed prior to those amendments.

Ch. 35 (AB 542) Reyes. Employment Development Department: federal funds: employment service program administrative costs.

(1) Existing law permits the state, upon appropriation by the Legislature, to requisition specified funds in the account of the state in the federal Unemployment Trust

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Fund for use to pay expenses incurred for the administration of unemployment compensation.

This bill would appropriate $1,867,000 from the Unemployment Fund from moneys requisitioned from the federal Unemployment Trust Fund for use, subject to the limitations of specified federal law, for administrative costs of the Employment Development Department employment service program. The appropriation would apply only to expenses obligated during the period commencing with the effective date of this act and ending June 30, 2000.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 36 (SB 98) Alarcon. Vehicles: fees: air pollution.

(1) The Lewis-Presley Air Quality Management Act requires the South Coast Air Quality Management District to establish a program to encourage participation in projects to increase the utilization of clean-burning fuels.

This bill would require the south coast district to establish an Office of Technology Advancement to administer the clean-burning fuels program and to establish an advisory group, as specified, to make recommendations regarding the program, technology advancement, and pollution reduction. The bill would also require the south coast district, on or before March 1 of each year, to prepare and submit to the Legislative Analyst and to specified committees of the Legislature, a report that contains specified information regarding the program. By imposing new duties on the south coast district, the bill would impose a state-mandated local program.

(2) Existing law, until August 1, 1999, authorizes the south coast district to impose a $1 fee on the renewal of registration of motor vehicles in the district, to fund the program.

This bill would extend that motor vehicle registration fee authority until January 1, 2005. The bill would make other conforming changes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 37 (SB 55) O'Connell. State Department of Education.

Under existing law, there is in state government a State Department of Education and the department is responsible for various ongoing activities involving the public schools.

This bill would appropriate $3,240,000 from the General Fund to the State Department of Education as follows: (1) $3,000,000 in augmentation of the Budget Act of 1998 for executive management and special services and (2) $240,000 in augmentation of the Budget Act of 1998 for the purpose of supporting the adoption of instructional materials in the 1998–99 fiscal year.

This bill would also, notwithstanding any other provision of law, authorize the Director of Finance to make a loan from the General Fund to the State Department of Education in an amount not to exceed $2,500,000 for the purpose of assisting the department to meet cash needs resulting from the delay in receipt of reimbursements in the 1998–99 fiscal year and would provide that interest charges on the loan shall be waived.

This bill would declare that it is to go into immediate effect as an appropriation for the usual current expenses of the state.

Ch. 38 (AB 264) Mazzoni. Redevelopment: Hamilton Army Airfield.

The existing Community Redevelopment Law requires redevelopment agencies that receive tax-increment revenues and that have adopted redevelopment plans or amended redevelopment plans to include new territory, after January 1, 1994, to make specified payments to local taxing entities that are affected by activities of the redevelopment agencies. Existing law expresses the intent of the Legislature that these payments are necessary to alleviate the financial burden and detriment that affected taxing entities may incur as a result of the adoption of a redevelopment plan, that the payments will benefit redevelopment project areas, and that the payments are the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

exclusive payments that are required to be made by a redevelopment agency to affected taxing entities during the term of a redevelopment plan.

Existing law, until January 1, 2001, recognizes the City of Novato as the single local base reuse entity for purposes relating to reuse planning for the Hamilton Army Base, which is also known as the former Hamilton Air Force Base for purposes of existing law that authorizes a local agency, by ordinance, to allow graduated compliance of buildings on former military bases with building regulations or standards.

This bill would authorize the redevelopment agency of the City of Novato to pay to other specified agencies any amounts of money that in the redevelopment agency's determination are appropriate to alleviate any financial burden or detriment caused to those other agencies by the Hamilton Field Redevelopment Project.

Ch. 39 (AB 316) Machado. County retirement: benefits: cost-of-living adjustments.

The County Employees Retirement Law of 1937 prescribes alternative optional cost-of-living adjustments for retirement benefits.

This bill would authorize boards of supervisors to elect to provide an additional prefunded 1% increase in the present cost-of-living adjustment for each full 3% annual increase in the cost of living over the existing maximum cost-of-living adjustment factor. These increases would be used to offset any existing accumulated carryover cost-of-living adjustment balances.

Ch. 40 (AB 335) Mazzoni. State Teachers' Retirement System: class size.

Existing law, until July 1, 2002, exempts the compensation earned by a member of the State Teachers' Retirement System from specified postretirement compensation limitations if, among other requirements, the member is employed by a school district to provide direct classroom instruction in newly created grades kindergarten to 3 or temporarily fill a position in grades 4 to 12 that was vacated due to a teacher transferring to a classroom in grades kindergarten to 3 within the same district to meet the objectives of the Class Size Reduction Program.

This bill would revise the employment requirements applicable to the above described exemption to require that the member be employed by the school district to provide direct classroom instruction in classrooms created pursuant to specified provisions of existing law regarding class size reduction or to temporarily fill a position that was vacated due to a transfer pursuant to those provisions.

Existing law, until July 1, 2002, provides that, upon written request, a member who retired on or before July 1, 1996, and who, within a specified period of time, terminated his or her service retirement allowance and returned to employment that qualifies for the exemption described in existing law described above may cancel his or her reinstatement and return to retirement status as if the service retirement allowance had not been terminated.

This bill would delete this provision.

This bill would provide that the changes made by the bill would apply to the 1999–2000 school year and subsequent school years.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 41 (AB 432) Leach. Real estate brokers: advertisements.

Existing law requires licensed real estate brokers, in connection with any advertisement soliciting borrowers or potential investors, to disclose in those advertisements, among other things, the license information telephone number established by the Department of Real Estate.

This bill would repeal that particular disclosure requirement in connection with advertisements soliciting borrowers or potential investors.

Ch. 42 (AB 455) Ashburn. County employees' retirement.

The County Employees Retirement Law of 1937 limits the application of specified alternative retirement allowance calculations and provides that in Kern County these limitations are only applicable to persons who first became members of the retirement system on and after January 1, 1996.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would change that date to January 1, 1994.

Ch. 43 (AB 1132) Ackerman. Civil actions: noticed motions.

Existing law provides that all moving and supporting papers in a civil action are generally required to be served and filed at least 15 calendar days before the time appointed for the hearing, all papers opposing a motion are required to be filed with the court and served on each party at least five court days before the time appointed for the hearing, and all reply papers are to be filed with the court and served on the parties at least two court days before the hearing. Existing law provides, however, that if the notice is served by mail in this state, the required 15-day period of notice is increased by 5 days, and if the notice is served by mail out of state or outside of the United States, the required 15-day period of notice is extended by 10 and 20 days, respectively. Existing law also provides that if the notice is served by facsimile transmission or a method of overnight delivery, the 15-day period of notice is increased by 2 court days.

This bill would revise these provisions by requiring a party to serve and file all moving and supporting papers at least 21 calendar days before the hearing, would provide that all papers opposing a motion are to be filed and served at least 10 calendar days before the hearing, and would provide that all reply papers are to be filed and served at least 5 calendar days before the hearing, as specified. The bill would also revise the above described provisions regarding the extension of time for service of notice by mail, facsimile, or overnight delivery by providing that the specified days of extension are calendar days.

Ch. 44 (AB 1209) Committee on Health. Medi-Cal: disproportionate share hospitals.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. The Medi-Cal program provides for a special methodology of reimbursement of disproportionate share hospitals, as defined, for the provision of inpatient hospital services. Under the Medi-Cal program, the department is required to make supplemental payments to certain disproportionate share hospitals, based on specified criteria. Payments are made from defined intergovernmental transfers that are paid into the Medi-Cal Inpatient Payment Adjustment Fund, as required, with this fund being continuously appropriated for specified purposes.

Existing law determines the methodology of reimbursement for disproportionate share hospitals for the 1999–2000 payment adjustment year, based on projections regarding the federal medical assistance percentage for federal financial participation purposes that will be applicable to Medi-Cal program expenditures with respect to the 2000 federal fiscal year.

This bill would revise some of the factors used to calculate the rate of reimbursement for disproportionate share hospitals described above and would make related changes. This bill would also require the State Department of Health Services to take all necessary steps to arrange for publication of any public notices that are required or appropriate under federal or state law, in order to ensure an effective date for the bill of no later than June 30, 1999, for federal medicaid purposes. The bill would provide that the costs of publishing any notice through a private vendor shall be recovered by the department from the Medi-Cal Inpatient Payment Adjustment Fund. By requiring moneys continuously appropriated from the Medi-Cal Inpatient Adjustment Fund to be allocated for this new purpose, the bill would make an appropriation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 45 (SB 166) Baca. Property tax revenue transfers: County of San Bernardino and City of Chino Hills.

Existing law establishes various procedures for the negotiated exchange of property tax revenues between jurisdictions in a county in the event of a jurisdictional change.

This bill would, subject to certain requirements and limitations, authorize the County of San Bernardino and the City of Chino Hills to enter into a written agreement for the annual transfer from that county to that city of a specified percentage of certain additional ad valorem property tax revenues, attributable to certain classes of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

improvements to commercial or industrial properties that are identified in the agreement.

This bill would make legislative findings and declarations as to the necessity for a special statute.

Ch. 46 (SB 314) Kelley. Metropolitan water districts.

The Metropolitan Water District Act authorizes a metropolitan water district to provide, sell, and deliver water at wholesale for municipal and domestic uses and purposes, and surplus water not needed or required for domestic or municipal uses within the district for beneficial purposes.

This bill would provide that, for the purposes of the act, any water purchased at the uniform rate or rates established by a district for domestic or municipal uses and used for beneficial purposes within that district shall be deemed to be water for domestic and municipal uses and not surplus water.

Ch. 47 (SB 364) Perata. Transportation: State-Local Transportation Partnership Program.

Existing law requires the Department of Transportation, until July 1, 1999, to implement the State-Local Transportation Partnership Program pursuant to specified procedures that allow the state to contribute a share to fund certain local transportation projects.

This bill, notwithstanding the expiration of the program, would extend the authority to let construction contracts for certain projects under the program until June 30, 2000, and would require that funds appropriated for those projects be expended not later than June 30, 2003.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 48 (SB 447) Dunn. Discovery: inspection demands.

Existing law provides that any party may obtain discovery, as specified, by inspecting documents, tangible things, and land or other property that are in the possession, custody, or control of any other party to the action.

This bill would provide that any party may propound a supplemental demand for inspection to inspect any later acquired or discovered documents, tangible things, or land or other property that are in the possession, custody, or control of the party on whom the demand is made, under specified conditions, and would also provide that on motion, for good cause shown, the court may grant leave to a party to propound an additional number of supplemental demands for inspection, as specified.

Ch. 49 (SB 1165) Sher. Expedited judicial review.

Existing law provides for judicial review of decisions by a local public agency regarding the issuance, revocation, suspension, or denial of a business or other permit.

This bill would set forth an expedited procedure for judicial review of decisions by a local public agency regarding the issuance, revocation, suspension, or denial of a permit involving expressive conduct protected by the First Amendment to the United States Constitution, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 50 (SB 160) as amended, Peace. 1999–2000 Budget. [1]

This bill would make appropriations for support of state government for the 1999–2000 fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 51 (AB 1113) Florez. School safety.

(1) Existing law establishes the School Violence Prevention Grant Program, a statewide grant program coordinated through county offices of education and school districts for school violence prevention programs.

This bill would establish the School Safety and Violence Prevention Act, a statewide program to be administered by the Superintendent of Public Instruction, who would allocate funds to school districts that maintain any of grades 8 to 12, inclusive, that certify

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the funds will be used as required by this act. Funds allocated pursuant to this program would be expended for purposes that include, but are not limited to, providing conflict resolution personnel, providing on-campus communication devices, establishing staff training programs, and establishing cooperative arrangements with law enforcement agencies.

(2) This bill would also establish the School Violence Prevention and Response Task Force consisting of the Superintendent of Public Instruction, the Attorney General, the Director of the Office of Criminal Justice Planning, the Secretary for Education, and 12 individuals representing educators, health care practitioners, and members of the law enforcement community, each with expertise in school-based crisis prevention and response. The bill would require the task force to perform various duties, including, among others, analyzing and evaluating current statutes and programs in the area of school-based crisis prevention and response, and making appropriate policy recommendations on how to enhance state and local programs and training to adequately prepare school districts and county offices of education to meet the challenges stemming from disruptive and violent acts, or both, on or near school campuses. The bill would require the task force to report its findings and recommendations to the Legislature and the Governor on or before April 10, 2000.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 52 (AB 1114) Steinberg. Certificated Staff Performance Incentive Act.

Existing law, the National Board for Professional Teaching Standards Certification Incentive Program, awards grants to school districts for the purpose of providing one-time $10,000 merit awards to teachers who are employed by school districts or charter schools, are assigned to teach in California public schools, and have attained certification from the National Board for Professional Teaching Standards. Existing law establishes the Public School Performance Accountability Program that consists in part of a state Academic Performance Index, known as the API.

This bill would establish the Certificated Staff Performance Incentive Act for the purpose of awarding one-time performance bonuses to certificated teachers and other certificated school employees in eligible underachieving schools where the academic performance of pupils significantly improves beyond a minimum percentage growth target. The bill would require the State Board of Education to establish criteria for determining the eligibility of schools to receive the awards and to determine the amount to be allocated to a school based on the number of teachers and other certificated staff eligible to receive an award, not to exceed $25,000 per full-time equivalent certificated staff.

The bill would provide the award program would only be implemented if funds are appropriated for these purposes in the annual Budget Act. The bill would require the Superintendent of Public Instruction to allocate funds to school districts and charter schools that have certified that they satisfy certain eligibility requirements, and to notify the exclusive representative of the teachers and other certificated staff in each district of the availability of the funds. The bill would require the governing board of the school district, upon receiving an allocation for the purpose of making awards, to negotiate individual teacher and other certificated staff salary award amounts with the exclusive representative of the teachers and other certificated staff. The bill would provide for the amount of awards in the event that an agreement is not reached between the governing board of the school district and the exclusive representative of the teachers and other certificated staff.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 53 (AB 1117) Calderon. Teacher salaries.

Under existing law, the governing board of each school district is generally required to establish the compensation paid to persons in public school service that require certification.

This bill would permit the governing board of a school district, the county superintendent of schools, or the county boards of education, in the 1999–2000 fiscal year, to increase the lowest salary on the salary schedule for a certificated employee that meets certain requirements by designating as the lowest salary on the salary schedule an

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

amount not to exceed $32,000. This bill would set forth procedures for providing per-pupil incentives to local educational agencies for providing this increase.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 54 (AB 1535) Florez. Prison construction.

Existing law authorizes the construction of correctional facilities, as specified, and authorizes the necessary funding for specified construction to be obtained through lease-purchase financing methods.

This bill would authorize the Department of Corrections to construct and establish a maximum security prison, together with a Level I support services facility, in the vicinity of Delano to be known as the California State Prison-Kern County at Delano II, as specified. This bill would appropriate $24 million from the General Fund for site acquisition and other costs, and authorize $311.5 million for construction of the prison to be provided through lease-purchase arrangements, subject to certain findings being made, as specified. The bill would also make activation of the prison contingent upon provision by the department of 9,000 therapeutic drug treatment slots or similar modalities. The bill would also provide that up to $4 million will be available for local mitigation costs, as specified. This bill would also appropriate $15.5 million from the General Fund for additional parole officers. The bill would also provide that the Director of Finance, upon request by the Director of Corrections and upon legislative notification, may redirect certain funds appropriated in the Budget Act.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 55 (AB 616) Oller. Municipal utility districts: bid requirements.

The Municipal Utility District Act requires the purchase of supplies and materials by a municipal utility district to be let by contract to the lowest responsible bidder when the expenditure is in excess of $20,000, or, in any district with a population of 250,000 or more, in excess of $50,000, as prescribed, with annual adjustments to those dollar limits.

This bill, with respect to a district with a population below 250,000, would generally increase that $20,000 figure to $25,000. The bill , until January 1, 2003, with respect to all districts, would require the purchase of a vehicle to be by contract let to the lowest responsible bidder if the expenditure required exceeds $50,000.

Ch. 56 (AB 262) Runner. Local sales and use taxes: revenue sharing contracts.

The California Constitution authorizes the Legislature to allow counties, cities and counties, and cities to enter into contracts to apportion between them those revenues derived from any local sales and use tax that is collected for them by the state, provided that any contract for that purpose is approved by a majority of the voters voting on the issue in each subject jurisdiction. Existing statutory law implements this constitutional authority with respect to contracts for the sharing of revenues derived from local taxes imposed under the Bradley-Burns Uniform Local Sales and Use Tax Law. Notwithstanding that constitutional authority, the California Constitution also authorizes counties, cities and counties, and cities, with the approval of $^2/_3$ of the governing body of each affected jurisdiction but without the necessity of approval by the voters, to enter into contracts to apportion revenues derived from local taxes imposed under the same law.

This bill would establish this latter authorization in statutory form.

Ch. 57 (AB 1536) Robert Pacheco. Banks: extension of credit.

Existing state law provides that no bank shall acquire, hold, extend credit on the security of, or extend credit for the purpose of acquiring or carrying, any security of the bank or of any controlling person of the bank. An "extension of credit" for these purposes is defined in Regulation O of the Federal Reserve Board as in effect July 1, 1995.

This bill would, instead, refer to Regulation O, as amended from time to time.

Ch. 58 (SB 113) Kelley. Manufacturing Enhancement Areas: tax credits.

The Personal Income Tax Law and the Bank and Corporation Tax Law provide a credit against the taxes imposed by those laws to a qualified taxpayer for hiring a qualified disadvantaged individual for employment in a Manufacturing Enhancement Area.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would make specified clarifying changes to those provisions.

Ch. 59 (SB 223) Kelley. Infrastructure financing: Salton Sea Authority.

Existing law authorizes counties and cities to form infrastructure financing districts, in accordance with a prescribed procedure, to finance public capital facilities utilizing a method of tax increment financing.

This bill would authorize the Salton Sea Authority, a joint powers authority, to utilize this law to form an infrastructure financing district to fund the construction of, and purchasing electrical power for, projects for the reclamation and environmental restoration of the Salton Sea.

Ch. 60 (SB 328) Alpert. Real property: liability.

Existing law establishes specified, alternative remedies with respect to specified real property security which is environmentally impaired, as defined, and where the borrower's obligations to the secured lender are in default. It also establishes an action for breach of contract with respect to real property which is the subject of a written warranty, indemnity, covenant, or promise relating to hazardous substances. These remedies and this action are not subject to the one-form-of-action limitation in other provisions of existing law. Existing law also authorizes the appointment of a receiver to enable defined secured lenders to enter and inspect real property security for hazardous substances. The alternative secured creditor's remedies and the breach of contract action provided by these provisions of existing law only apply to loans, extensions of credit, guaranties, or other obligations secured by real property made, renewed, or modified between January 1, 1992, and January 1, 2000.

This bill would delete the January 1, 2000, limitation.

Ch. 61 (SB 485) Rainey. California Industrial Development Financing Act.

(1) The California Industrial Development Financing Act provides cities and counties with the authority to pass ordinances, and redevelopment agencies with the authority to pass resolutions, establishing industrial development authorities that are empowered to issue industrial development revenue bonds under terms and conditions specified in the act.

This bill would provide a public agency with the power to transact any business or exercise any powers of an industrial development authority under the act without having to establish an authority and would provide that references in the act to authority and board shall mean public agency and governing body, respectively.

(2) The act provides that property acquired pursuant to certain of its provisions shall be suitable for, or shall evidence an obligation respecting, certain uses and activities.

This bill would add commercial uses in an enterprise zone or commercial activities in an empowerment zone and enterprise community to that list of authorized uses and activities.

Ch. 62 (SB 629) Kelley. County water authorities.

Existing law provides for the formation of county water authorities and grants specified powers to those entities, including the authority to provide, by resolution or ordinance, for all matters that are necessary for the proper administration of those authorities. Existing law authorizes the legislative body of a local public agency, by ordinance, to make any violation of an ordinance enacted by the agency subject to an administrative fine or penalty, as prescribed.

This bill would authorize the board of directors of an authority to adopt regulations regarding its facilities, property, and rights-of-way. The bill would authorize the board of directors, by ordinance, to make a violation of those regulations subject to an administrative fine, as specified. The bill would require the board of directors to set forth, by ordinance or resolution, the administrative procedures that govern the imposition, enforcement, collection, and administrative review by the authority of those administrative fines in accordance with specified provisions of law, except as otherwise specified.

Ch. 63 (SB 901) Knight. Local agencies: spheres of influence: City of Lancaster.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law declares the intent of the Legislature to expand temporarily the City of Lancaster's sphere of influence to include Edwards Air Force Base and adjacent territory, and to allow the city to expend specified funds outside the city limits but within its temporary sphere of influence to promote commercial space efforts, to retain and create commercial space jobs, and to develop commercial space infrastructure on and around the base. Existing law further specifies that the Legislature deems the City of Lancaster's sphere of influence to include designated territory, and prohibits the Los Angeles County Local Agency Formation Commission from disapproving the city's expenditures for improvements and services as specified. These provisions are repealed as of January 1, 2000.

This bill would extend the repeal date of these provisions to January 1, 2002. It would additionally revise the types of city expenditures that may not be disapproved by the commission.

Ch. 64 (AB 10) Correa. Bank and corporation taxes: minimum franchise tax.

The Bank and Corporation Tax Law generally imposes a franchise tax on corporations doing business within the limits of this state, including a minimum franchise tax on specified banks and corporations, except as provided, and provides, for income years beginning on or after January 1, 1999, for a minimum franchise tax of $500 for the 2nd taxable year for any corporation, except as specified, that has gross receipts, less returns and allowances reportable to this state, of less than $1,000,000 for the income year. The reduced tax applies to any corporation that is a qualified new corporation, as defined, incorporated on or after January 1, 1999.

This bill would provide that for income years beginning on or after January 1, 2000, every corporation, except as specified, that qualifies to do business in this state on or after January 1, 2000, shall not be subject to the minimum franchise tax for its first and second taxable years.

The Bank and Corporation Tax Law provides that a corporation that incorporates under the laws of this state or qualifies to transact interstate business in this state shall prepay a specified minimum franchise tax of $800, except as provided. That law also provides that, for income years commencing on or after January 1, 1999, the amount of the prepaid minimum franchise tax for a qualified new corporation, as defined, shall be $300, unless its gross receipts, as specified, or its tax liability, exceeds specified amounts.

This bill would provide that every corporation that incorporates under the laws of this state or qualifies to do business in this state on or after January 1, 2000, and before January 1, 2001, shall not be subject to the prepayment of that minimum franchise tax, except as provided. This bill would eliminate the prepayment of minimum franchise tax provisions on January 1, 2001, except as provided.

This bill would take effect immediately as a tax levy.

Ch. 65 (AB 1102) Jackson. Environmental protection.

(1) Existing law authorizes the Governor, with respect to the California Environmental Protection Agency, to appoint not more than 3 deputies to the Secretary for Environmental Protection.

This bill would provide that one of those deputies shall be a deputy secretary for law enforcement and counsel and another deputy shall be a deputy secretary for external affairs. The bill would prescribe the duties and responsibilities of those deputies.

(2) Existing law requires a business or entity to obtain various environmental permits prior to undertaking any project that may have an impact on the environment.

This bill would require the secretary to establish permit assistance centers throughout the state to provide businesses and other entities with assistance in complying with the laws and regulations implemented by the boards, departments, and offices within the agency. The bill would also require the secretary to establish an electronic on-line permit assistance center, known as the "California Government-On Line to Desktops" (CALGOLD) program, to be available through the Internet to provide a business or entity with assistance in complying with those laws and regulations.

The bill would also require the secretary to establish no more than 8 pilot projects for the purpose of evaluating whether and how the use of an environmental management system, as defined in the bill, increases, among other things, public health and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

environmental protection, over the protections provided through the issuance, enforcement, and monitoring of any permit, requirement, authorization, standard, certification, or other approval issued by a federal, state, regional, or local agency for those purposes. The bill would authorize the secretary to develop evaluation and monitoring parameters for the evaluation and to develop a model memorandum of understanding to be entered into by the secretary and any regulated entity that agrees to participate in a pilot project. Under the bill, the secretary would be required to submit quarterly reports to the Governor and the Legislature on the status of the pilot projects. The bill would provide for the repeal of the latter provisions on January 1, 2002.

Ch. 66 (AB 1103) Lempert. Government.

(1) Existing law establishes the Upper Newport Bay Ecological Reserve Maintenance and Preservation Fund in the State Treasury and appropriates $200,000 annually from the General Fund to the maintenance and preservation fund for expenditure by the Department of Fish and Game for purposes relating to the maintenance and preservation of the Upper Newport Bay Ecological Reserve.

This bill would provide that the money in that fund is continuously appropriated to the department for purposes related to the maintenance and preservation of the Upper Newport Bay Ecological Reserve.

(2) Existing law authorizes the Department of Boating and Waterways to make loans to cities, counties, and districts for the planning, acquisition, construction, improvement, maintenance, or operation of small craft harbors and facilities in connection with those harbors, and connecting waterways.

This bill would require the department, to the greatest extent possible, to adhere to customary commercial practices to ensure that those loans are adequately secured and that they are repaid consistent with the terms of the loan agreement. The bill would require the department to develop weighing and ranking criteria to qualify and prioritize these public loans. The bill would prohibit loans from being made from funds appropriated in the Budget Act of 1999 for this purpose until certain requirements have been reviewed and approved by the Department of Finance, as specified.

(3) Existing law authorizes the Department of Boating and Waterways to adopt regulations to implement provisions of law governing the making of loans directly to private recreational marina owners for the development, expansion, and improvement of boating facilities.

This bill would require, rather than authorize, the department to adopt regulations and would require that the regulations include the development of weighing and ranking criteria. The bill would prohibit loans from being made from funds appropriated in the Budget Act of 1999 for this purpose until the loan approval standards have been approved by the Department of Finance.

(4) Under existing law, all money in the Harbors and Watercraft Revolving Fund is required to be available, upon appropriation by the Legislature, for expenditure by the Department of Boating and Waterways and the Department of Parks and Recreation for specified purposes.

This bill would require the money also to be available, upon appropriation by the Legislature, to the State Water Resources Control Board for boating-related water quality regulatory activities.

(5) Existing law, the Carpenter-Presley-Tanner Hazardous Substance Account Act (California Superfund), imposes liability for hazardous substance removal or remedial actions and authorizes the use of funds in the Department of Toxic Substances Control Account in the General Fund, upon appropriation by the Legislature, to pay for, among other things, removal and remedial actions related to the release of hazardous substances. The act also continuously appropriates certain funds received from a settlement agreement that are deposited in a subaccount for removal and remedial actions at a specific site and funds in a subaccount established by the Controller for site operation and maintenance.

This bill would create the Stringfellow Insurance Proceeds Account in the State Treasury, to be administered by the Director of Toxic Substances Control, and would require the funds recovered in connection with the Stringfellow Superfund Site to be deposited in the account, including any interest earned upon the money deposited in the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

account. The bill would provide that the funds deposited in the account are available, upon appropriation by the Legislature, for expenditures related to the Stringfellow Superfund Site, pursuant to a specified agreement, and would provide for the expenditure of the recovered funds if the agreement is terminated. The bill would also provide for related matters.

(6) Existing law authorizes the State Air Resources Board to require air pollution control districts or air quality management districts to impose additional permit fees on nonvehicular sources within their jurisdiction, to be expended only for the purposes of recovering the costs of additional state programs related to nonvehicular sources. Under existing law, the state board is required to submit a report to the Legislature, on or before January 1 of each year, concerning those fees. These provisions will become inoperative on July 1, 1999, and will be repealed on January 1, 2000.

This bill, instead, would extend the operation of those provisions indefinitely. The bill would impose a state-mandated local program by continuing the authorization to require districts to impose those fees.

(7) Existing law authorizes the Director of Conservation to establish the California State Mining and Mineral Museum, by making a collection of typical geological and mineralogical specimens, and models, drawings, and descriptions of the mechanical appliances used in mining and metallurigical processes and geology.

This bill would transfer the museum, including all assets, exhibits, and materials from the Department of Conservation to the Department of Parks and Recreation for ownership and operation, as provided.

(8) Existing law, with respect to concession contracts entered into on or after October 1, 1994, authorizes the Director of Parks and Recreation, if the director determines that it is in the best interests of the state, to award contracts authorizing occupancy of any portion of the state park system for a period of more than 2 years, to the best responsible person or entity submitting a proposal, subject to specified conditions. Existing law, for purposes of those provisions, defines the phrase "best responsible person or entity submitting a proposal" to mean the person or entity submitting a proposal, as determined by specific standards established by the department, that will operate the concession in the best interests of the state and the public.

This bill would specify that the department's standards for "best responsible person or entity submitting a proposal" require that the person or entity submitting a proposal demonstrate a history of compliance with applicable federal and state labor laws, including laws relating to wages, hours, and working conditions, and the right of employees to organize and participate in collective bargaining.

The bill would provide that, notwithstanding the prescribed bidding process, the department may negotiate an agreement of up to 2 years duration to extend the hotel concession contract in existence on January 1, 1999, for the Columbia State Park.

(9) Prior Budget Acts have authorized the expenditure of funds for the operation and support of the Department of Parks and Recreation, and the California Conservation Corps.

This bill would prescribe procedures for the operation and funding of the department and the corps during the 1999–2000 fiscal year, as specified, and would prescribe related matters.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(11) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 67 (AB 1105) Jackson. State government.

(1) Existing law establishes the Department of Consumer Affairs to regulate and license the various professional and vocational occupations in the state. Existing law requires every board under the jurisdiction of the department to submit to the Director

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of Consumer Affairs, by December 31, 1999, its method for ensuring that every licensing examination administered by or pursuant to contract with the board is subject to periodic evaluation.

This bill instead would require that the submission be made by December 1, 1999, and by December 1 of each subsequent year. This bill would also require the department to compile information regarding these evaluations and submit it to the Legislature by September 30 of each year. It would make related changes in this regard.

This bill would also require the department to develop, in consultation with the boards, programs, bureaus, and divisions under its jurisdiction, and the Osteopathic Medical Board of California and the State Board of Chiropractic Examiners, a policy regarding examination development and validation, and occupational analysis. It would require the department to finalize and distribute this policy by September 30, 1999, to each of the boards, programs, bureaus, and divisions under its jurisdiction and the Osteopathic Medical Board of California and the State Board of Chiropractic Examiners, and to submit this policy in draft form to the Legislature for review at least 30 days prior to that date.

(2) The Performance and Results Act of 1993, among other things, requires the Department of Finance to develop a performance-based budgeting pilot project. Existing law also authorizes the Department of Consumer Affairs to accept gifts and donations without approval by the Director of Finance. Those provisions are to remain in effect only until the effective date of the Budget Act of 1999, or June 30, 1999, whichever occurs later.

This bill would specify that this is also the intent of the State Government Strategic Planning and Performance Review Act, would delete the authorization for the Department of Consumer Affairs to accept gifts and donations without approval of the Director of Finance, and would extend the effective date of these provisions until the effective date of the Budget Act of 2000, or June 30, 2000, whichever occurs later. The bill would also require the department to end its participation in the performance-based budgeting pilot project and to transition its budgeting and accounting systems during the 1999–2000 fiscal year to conform with systems prescribed by the Department of Finance, as specified.

(3) Existing law sets forth the licensing requirements for acupuncturists, including passage of a practical examination of the required skills.

This bill would revise that provision to require that in order to be issued a license to practice acupuncture an applicant must pass a written examination, as specified.

(4) Under existing law, the parties to certain civil actions in specified courts are required to submit to judicial arbitration, as specified, prior to trial.

This bill would impose a state-mandated local program by requiring 4 superior courts selected by the Judicial Council to participate, as a pilot program, in early mediation of civil cases, as specified. The bill would require the Judicial Council to report to the Legislature and to the Governor regarding the pilot program, as specified, on or before January 1, 2003. The pilot program would be repealed on January 1, 2004.

(5) Existing law grants to the California Science Center specified authority, including the authority to construct, operate, and lease a stadium, arena, pavilion, or other building that is to be used for the holding of athletic contests, exhibitions, and other public meetings.

This bill would authorize the California Science Center, with the approval of the Director of General Services, to enter into a long-term lease agreement with the Los Angeles Unified School District to convert the state armory and surrounding land in or near Exposition Park to a demonstration mathematics and science-based school, as prescribed.

(6) Existing law, operative until July 1, 1999, establishes in the Reserve for Economic Uncertainties a Disaster Response-Emergency Operations Account, which is continuously appropriated, to be used for response activities and recovery activities, as defined. Existing law limits authorizations under these provisions for acquisitions, relocations, and environmental mitigations for needs that are a direct consequence of the January 1997 floods or any flood-related emergency that is declared by the Governor on or before January 1, 1999.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would (a) extend the operative date of these provisions to July 1, 2002, thus resulting in an appropriation by continuing a continuously appropriated fund, (b) delete references to response activities and recovery activities and instead refer to activities that occur within 365 days after a declaration of emergency by the Governor and activities that occur after the 365th day after a declaration of emergency by the Governor, and (c) delete the flood-related limitation applicable to the use of these funds for acquisitions, relocations, and environmental mitigations.

(7) Existing law provides that state armories in specified cities and counties shall be made available to these counties or any city in these counties for the purpose of providing temporary shelter for homeless persons during specified periods of each year, as a temporary measure until March 15, 1999, to allow adequate time for government entities in these counties to develop other suitable homeless shelter arrangements.

This bill would delete the March 15, 1999 time restriction, thus extending the program established under these provisions indefinitely.

(8) Existing law establishes in the State Treasury, the Stephen P. Teale Data Center Revolving Fund (TDC Fund), a continuously appropriated fund, for the payment of expenses incurred by the Stephen P. Teale Data Center. Existing law specifies the funds that comprise the TDC Fund, including all moneys received into the State Treasury from any source whatever in payment of electronic data processing services or other services rendered by the data center.

This bill would authorize the Stephen P. Teale Data Center to establish rates and collect payments from state agencies for providing services to those agencies. The bill would require all money received by the data center pursuant to this provision be deposited in the Stephen P. Teale Data Center Revolving Fund and would provide that the methodology for computing costs and billing rates is subject to the approval of the Director of Finance. The bill would authorize the data center to require monthly payments in advance by client agencies, based on estimated billings, but would authorize a state agency to make payments pursuant to an alternative schedule agreed to by the applicable state agency and the data center.

(9) Existing law sets forth various deadlines for procedures in civil actions subject to trial court delay reduction rules, as specified.

This bill would make an exception to those deadlines for complex cases, to remain in effect only until January 1, 2004.

(10) Existing law sets forth the duties of the Judicial Council, as specified.

This bill would require the Judicial Council, on or before October 30, 2002, to submit a report to the Legislature and the Governor regarding the effectiveness of the Centers for Complex Litigation established pursuant to the Budget Act of 1999, as specified.

(11) Existing law establishes a motor vehicle (smog check) inspection and maintenance program, administered by the Department of Consumer Affairs, which requires inspection of motor vehicles biennially upon registration, and at other times as specified. Existing law exempts from the biennial inspection, any motor vehicle 4 or less model-years old.

This bill would authorize the department to expand that exemption to include any motor vehicle that is up to 6 or less model-years old.

(12) Under existing law, motor vehicles of 4 or less model-years old that are exempt from the biennial smog check inspection are subject to an annual smog abatement fee of $4.

This bill would provide that if the Department of Consumer Affairs exempts from the biennial inspection, motor vehicles that are 5 or 6 model-years old, the department may also subject those exempted vehicles to the $4 annual smog abatement fee. The bill would authorize the department to also subject specified other vehicles exempted from the biennial smog check requirement, to the $4 annual smog abatement fee.

(13) Existing law requires the Department of Consumer Affairs to offer a low-income repair assistance program to eligible individuals based on a maximum level of 175% of the federal poverty level, as provided. Existing law provides for the program to offer repair cost assistance to those eligible individuals upon payment of a specified copayment.

This bill would raise the low-income threshold level to 185% of the federal poverty level. The bill would also expand the repair assistance program to offer assistance to an

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

owner of a motor vehicle that is directed to a test-only facility and fails the smog check inspection. The bill would require the department to impose a copayment on those individuals that is at least equivalent to the copayment imposed on low-income individuals under the program. The bill would authorize the department to increase its contribution toward the repair of a motor vehicle under the program, if the department determines that the expenditure is cost-effective.

(14) Existing law establishes the High Polluter Repair or Removal Account in the Vehicle Inspection and Repair Fund and provides that money in the account shall be available for, among other purposes, voluntary accelerated retirement of high-polluters.

This bill would authorize the Department of Consumer Affairs to specify the amount of money that shall be paid to an owner of a high-polluting motor vehicle who voluntarily retires the vehicle.

(15) The bill would declare the intent of the Legislature that, if the $300 smog impact fee imposed on motor vehicles previously registered in another state is ruled unconstitutional or unenforceable by an appellate court or the California Supreme Court, the repair assistance program described in (13) above and any voluntary vehicle retirement program implemented by the Department of Consumer Affairs not be supported through the General Fund.

(16) Under existing law, the Department of Housing and Community Development administers the Family Housing Demonstration Program, under which it may make loans from the continuously appropriated Family Housing Demonstration Account to sponsors for purposes of assisting the development of community housing and congregate housing developments. Existing law contains findings and declarations of the Legislature relating to the need for this program. Under this existing program, "congregate housing" is defined as a new or rehabilitated large multibedroom structure in which 2 to 10 households share specified household responsibilities.

This bill would change the name of the program to the Families Moving to Work Program and would substitute revised findings and declarations of the Legislature relating to the program and revise the definition of congregate housing to delete the restriction with respect to the maximum number of households that may share common facilities and responsibilities.

(17) Under the existing Family Housing Demonstration Program, the Department of Housing and Community Development is required to implement the program after adopting specified rules and regulations.

This bill would repeal this requirement.

(18) Under the existing Family Housing Demonstration Program, the housing component of a community housing development is required to include specified features and criteria, among which is that between 20% and 30% of the assisted units in the development must be occupied by elderly persons or households with the balance required to be available to families with children. The jobs and economic development component of a community housing development is required to include specified features and criteria, among which is that the sponsor is required to propose and implement a job placement and training program for residents to be implemented within 18 months of initial occupancy.

This bill would delete the percentage of assisted units that must be available to elderly persons in a community housing development. The bill also would require the sponsor of the community housing development to develop a job placement and training program for residents to be implemented upon initial occupancy. The bill would make other revisions to the jobs and economic development component.

(19) Under existing law, the Department of Housing and Community Development is required to base an award of funds from the Family Housing Demonstration Account on a ranking of applications occurring at least once every 3 months until there are insufficient funds available to commit according to that ranking and prescribes characteristics of projects that are required to be given priority.

This bill would delete the requirement that the ranking occur once every 3 months and would add to those projects to be given priority, projects that are reasonable in cost.

(20) Under existing law, the Department of Housing and Community Development is required to monitor the construction and operation of the community housing developments developed pursuant to the Family Housing Demonstration Program in

NOTE: Superior numbers appear as a separate section at the end of the digests.

order to ensure compliance with loan conditions, contract obligations, and the program and any regulations adopted pursuant to it.

This bill would authorize the department to enter into a contract with a local public agency to monitor the operation of community housing developments and congregate housing developments.

(21) Under the existing Family Housing Demonstration Program, regulatory agreements with respect to community housing developments are required to contain specified binding provisions.

This bill would clarify that certain of these provisions are applicable to congregate housing developments as well, and would add a requirement that the agreement contain provisions that would encourage an eligible household to occupy a unit that is constructed with funds under the program for no more than 5 years.

(22) Under existing law, the Department of Housing and Community Development was authorized until June 30, 1992, to adopt, amend, or repeal emergency regulations to implement the Family Housing Demonstration Program with respect to loans made with housing bond revenues.

This bill would repeal these provisions and instead exempt any rule, policy, or standard of general application developed by the department in implementing the program from specified provisions of the Administrative Procedure Act.

(23) Under existing law, the Department of Housing and Community Development is required to make awards from the Family Housing Demonstration Account in the Rental Housing Construction Fund for purposes of assisting the development of community housing developments.

This bill would delete that requirement and instead authorize the department to make those awards from that account, which the bill would rename the Families Moving to Work Account. The bill would delete a specified formula for the apportionment of money available for loans in the account between congregate housing and community housing developments.

(24) Existing law, until January 1, 2002, establishes a Homebuyer Down Payment Assistance Program and a Rental Assistance Program to provide assistance in the amount of the applicable school facility fee on affordable housing developments. Existing law appropriates $160,000,000 to the School Facilities Fee Assistance Fund which is continuously appropriated to the Department of General Services for the purposes of these programs, allocates 25% of that amount for those programs in each of 4 fiscal years commencing with 1998–99, and requires the department to contract with the California Housing Finance Agency for the administration of these programs and for allocation of these funds.

This bill instead would allocate a specified portion of $160,000,000 for those purposes in each fiscal year from 1998–99 to 2002–03, and would repeal the authority for those programs on January 1, 2003. The bill would require repayments, interest, and other moneys accruing to the fund to be returned to the fund and to be available for allocation by the California Housing Finance Agency to those housing assistance programs. The bill would also revise the criteria for granting assistance pursuant to those programs, as specified.

(25) Existing law prescribes the powers and duties of the Public Utilities Commission.

This bill would prohibit the commission from considering or requiring, in determining qualified bidders, or in awarding contracts, that any facilities be located within a particular area of the state, or within geographical proximity of any particular area of the state.

(26) Existing law providing for the administration of franchise and income tax laws requires each city that maintains, or has access to, a computerized system, as described, to annually furnish to the Franchise Tax Board specified information for businesses subject to tax in the preceding fiscal year.

This bill would repeal that requirement.

(27) The existing Performance and Results Act of 1993 requires the Department of Finance to develop a performance budgeting pilot project, in accordance with specified principles, involving 4 state departments, including the Department of General Services and the Department of Consumer Affairs. Existing law sets forth the conditions pursuant to which the Department of General Services, notwithstanding existing statutes and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

regulations, is required or authorized, among other things, to carry out specified functions relating to state personnel matters, to prepay vendors when it is cost-beneficial to the department, to accept gifts and donations of real property without approval by the Director of Finance, and to procure goods from the private sector even though the goods may be available through the Prison Industry Authority. These provisions of existing law remain in effect until the effective date of the Budget Act of 1999 or June 30, 1999, whichever occurs later.

This bill would reenact the provisions relating to the Department of General Services. This bill would specify that these provisions shall remain in effect only until the effective date of the Budget Act of 2000 or July 1, 2000, whichever occurs later.

(28) Existing law establishes the State Energy Resources Conservation and Development Commission in the Resources Agency, and specifies the powers and duties of the commission.

This bill would require the commission to conduct a public process to prepare a transition plan report and an operational plan report concerning the transfer of energy efficiency programs from the Public Utilities Commission to the State Energy Resources Conservation and Development Commission, and to submit these reports to the Legislature by January 1, 2000.

(29) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(30) The bill would declare that it is to take effect immediately as an urgency statute. However, certain provisions of the bill, referred to in (16) to (23) above, would become operative only if an appropriation is made for purposes of these provisions in the Budget Act of 1999 or in another statute enacted during the 1st calendar year of the 1999–2000 Regular Session and the bill would provide that these provisions shall be funded exclusively with funds appropriated thereby.

Ch. 68 (AB 1109) Committee on Budget. Budget Act of 1998: contingencies or emergencies.

The Budget Act of 1998 appropriated $5,000,000 from the General Fund, unallocated special funds, and unallocated nongovernmental cost funds for expenditure for contingencies or emergencies upon written authorization from the Director of Finance. The Budget Act of 1998 also appropriated $2,500,000 for loans to state agencies for contingencies and emergencies, upon terms to be prescribed by the Department of Finance, but which may not be made repayable from a future legislative appropriation.

This bill would appropriate $1,021,500,000, as scheduled, in augmentation of these Budget Act appropriations. This bill would authorize the Director of Finance to withhold authorization for the expenditure of funds appropriated in the bill until preliminary estimates of potential deficiencies are verified.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual current expenses of the state.

Ch. 69 (AB 1120) Havice. Personal income taxes: qualified small business stock.

The Personal Income Tax Law provides that gross income does not include 50% of any gain from the sale or exchange of qualified small business stock, as defined, held for more than 5 years, that was acquired at its original issuance on or after August 10, 1993, and before January 1, 1999.

This bill would delete the January 1, 1999, limitation, thereby extending the exclusion indefinitely.

This bill would take effect immediately as a tax levy.

Ch. 70 (SB 585) Chesbro. Clinical laboratories.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides that clinical laboratory examinations classified as physician-performed microscopy under specified federal regulations governing clinical laboratories may be performed by licensed physicians and surgeons, as specified.

This bill would expand that category of persons who may perform those clinical laboratory examinations to include licensed nurse practitioners, licensed physician assistants, certified nurse midwives, and licensed dentists. The bill would also make technical changes.

Ch. 71 (AB 1116) Ducheny. English Language Acquisition Program.

Existing law requires, with certain exceptions, that children in California public schools to be taught English by being taught in English.

This bill would establish the English Language Acquisition Program for pupils enrolled in grades 4 to 8, inclusive. The bill would require local educational agencies, as defined, participating in the program to conduct assessments, provide an instructional program, provide supplemental instructional support, and coordinate available services and funding. The bill would require the Superintendent of Public Instruction to annually allocate to each participating local educational agency $100 for each pupil participating in the program and a one-time $100 allocation for pupils in kindergarten or grades 1 to 12, inclusive, who are reclassified to English-fluent status.

The bill would also request that the Regents of the University of California develop English Language Development Professional Institutes to instruct personnel from schools participating in the English Language Acquisition Program in English language instruction, and would require each participating team member to receive a $1,000 stipend.

This bill would, if funds for this purpose are appropriated in the annual Budget Act, require the California Research Bureau of the California State Library to convene a broadly diverse group to examine the available research on English language acquisition by English language learners.

Ch. 72 (AB 1118) Reyes. Postsecondary education: systemwide fees: Graduate Assumption Program of Loans for Education.

(1) Existing law provides for a public postsecondary educational system in this state, which consists of the University of California, the California State University, and the California Community Colleges.

Existing law requires systemwide fees charged to resident undergraduate students at the University of California and the California State University to be reduced for the 1998–99 fiscal year by 5% below the level charged during the 1997–98 fiscal year, and, for the 1999–2000 fiscal year, to be at the same level as for the 1998–99 fiscal year.

This bill would require systemwide education and registration fees charged to resident undergraduate students at the University of California and the California State University for the 1999-2000 fiscal year to be reduced by 5% below the level charged for those resident students for the 1998–99 fiscal year.

(2) Existing law establishes the Assumption Program of Loans for Education, under which an applicant enrolled in a participating institution of postsecondary education, or who agrees to participate in a qualifying teacher training program, is eligible to receive a loan assumption warrant upon completing a specified period of teaching in a public elementary or secondary school. Existing law provides that, for the 1998–99 school year, and each school year thereafter, the Student Aid Commission is required to issue warrants for the assumption of up to 4,500 loans under this program.

This bill would require the commission to issue warrants for the assumption of up to 5,500 loans each school year, commencing with the 1999–2000 school year. The bill would require, beginning with the 2000–01 school year, and each school year thereafter, the commission to issue up to 100 of those warrants for the assumption of student loans for applicants who agree to teach in school districts serving rural areas.

(3) Existing law establishes the Graduate Assumption Program of Loans for Education, under which an applicant enrolled in a participating institution of postsecondary education, and who agrees, upon graduation, to teach full-time at a California college or university, is eligible to receive a conditional warrant for loan

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

assumption, to be redeemed pursuant to a prescribed procedure upon becoming employed as a full-time teacher at a California college or university.

The bill would make persons who render the equivalent of full-time service by teaching part-time at more than one California college or university eligible to participate in the program.

(4) Existing law establishes the fee charged per unit per semester charged to resident undergraduate students at the California Community Colleges at $13, except that for the 1998–99 and 1999–2000 academic years the fee per unit per semester is $12.

This bill would reduce this fee to $11 per unit per semester, effective with the fall term of the 1999–2000 academic year.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 73 (SB 838) Figueroa. Vocations: Pharmacy Law.

Existing law, the Pharmacy Law, requires all nonresident pharmacies to register with the Board of Pharmacy of the State of California.

This bill would specify that the board may register a nonresident pharmacy that is organized as a limited liability company in the state in which it is licensed.

Ch. 74 (AB 1121) Nakano. Vehicle license fee: offset.

The Vehicle License Fee Law establishes, in lieu of any ad valorem property tax upon vehicles, an annual license fee for any vehicle subject to registration in this state in the amount of 2% of the market value of that vehicle, as specified. Existing law permanently offsets the amount of the vehicle license fee for each subject vehicle by 25%, and, subject to specified contingencies with respect to fiscal year projections of General Fund revenues, provides for the implementation of similar, superseding offsets of 35%, 46.5%, 55%, and 67.5% to apply to specified future calendar years.

This bill would, for vehicle license fees with a final due date during the 2000 calendar year, require an offset percentage of 35%.

This bill would take effect immediately as a tax levy.

Ch. 75 (AB 1428) Kaloogian. Taxation: documentary transfer tax.

Existing law authorizes counties and cities and counties to impose a documentary transfer tax at a specified rate upon deeds, instruments, or other writings by which specified property is transferred. Existing law exempts from the imposition of that tax, for any realty held by a partnership, the transfer of an interest in a partnership under specified conditions.

This bill would additionally make that exemption applicable to an entity treated as a partnership for federal income tax purposes.

This bill would also preclude the imposition of that tax by reason of any transfer between an individual or individuals and a legal entity or between legal entities that results solely in a change in the method of holding title to the realty and in which proportional ownership interests in the realty, whether represented by stock, membership interest, partnership interest, cotenancy interest, or otherwise, directly or indirectly, remain the same immediately after the transfer.

Ch. 76 (SB 688) Burton. Vehicle license fees: offset: internationally registered vehicles.

The Vehicle License Fee Law establishes, in lieu of any ad valorem property tax upon vehicles, an annual license fee for any vehicle subject to registration in this state in the amount of 2% of the market value of that vehicle, as specified. For vehicle license fees with a final due date on or after January 1, 1999, existing law establishes a permanent offset in the amount of 25% and, subject to specified contingencies with respect to fiscal year projections of General Fund revenues, provides for the implementation of similar, superseding offsets of 35%, 46.5%, 55%, and 67.5% to be applied to specified future calendar years.

This bill would deem vehicle license fees, due in 1998 on or before December 31 of that year with respect to an internationally registered vehicle, to have had a final due date during the 1999 calendar year. This bill would state the intent of the Legislature with respect to that provision, and would require the Department of Motor Vehicles to apply

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the motor vehicle license fee offsets resulting from this bill to motor vehicle license fees that will become due and payable in 1999 with respect to internationally registered vehicles.

This bill would take effect immediately as a tax levy.

Ch. 77 (SB 705) as amended, Sher. Personal income taxes: bank and corporation taxes: research and development.

The Personal Income Tax Law and the Bank and Corporation Tax Law, by reference to a specified federal statute, allow a credit against taxes imposed by those laws for increasing research expenses, as defined. In general, the amount of the credit under both laws is equal to 11% of the excess of the qualified research expenses, as defined, for the taxable or income year over the base amount and, in addition, for purposes of the Bank and Corporation Tax Law, 24% of the basic research payments, as defined. The term "base amount" means the product of the average annual gross receipts of the taxpayer for each of the specified years preceding the taxable or income year and the fixed-base percentage, as defined, but in no event less than 50% of the qualified research expenses for the taxable or income year.

This bill would, under both laws, for each taxable or income year beginning on or after January 1, 1999, provide that the credit for increasing research expenses shall be equal to 12% of the qualified research expenses.

This bill would take effect immediately as a tax levy.

Ch. 78 (AB 1115) Strom-Martin. Education. [2]

(1) Existing law provides a deficit factor for the revenue limit of each county superintendent of schools.

This bill would provide that the revenue limit for the 1999–2000 fiscal year for each county superintendent of schools shall be reduced by a 8.628% deficit factor.

(2) Under existing law, on or before June 30, 1999, the State Department of Education is required to develop prekindergarten learning development guidelines. The development of these guidelines is required to be funded from funds appropriated for this purpose in the Budget Act of 1998. The guidelines are required to focus on preparing 4- and 5-year-old children for kindergarten. The guidelines are required to be articulated with the academic content and performance standards adopted by the State Board of Education for kindergarten and grades 1 to 12, inclusive.

This bill would require the State Department of Education in future expenditure plans for quality improvement activities to include funding for periodically updating and distributing the guidelines, and providing education, outreach, and training services to implement the guidelines. The bill would require child and development programs for migrant families, state preschool, and general child care and development programs to use the guidelines.

(3) Under existing law, the Department of Finance and the Department of General Services are required to approve or disapprove annual child care and development program contract funding terms and conditions and contract face sheets submitted by the State Department of Education not more than 30 working days from the date of submission, unless unresolved conflicts remain between the Department of Finance, the State Department of Education, and the Department of General Services.

This bill would require alternative payment child care systems, as defined, to be subject to rates established in the Regional Market Rate Survey of California Child Care Providers and would require the State Department of Education to contract to conduct and complete the annual Regional Market Rate Survey. The bill would require the Department of Finance to provide to the State Department of Education the State Median Income amount for a 4-person household in California based on the best available data, and would require the State Department of Education to adjust its fee schedule for child care providers to reflect this updated state median income.

(4) Existing law establishes the After School Learning and Safe Neighborhoods Partnerships Program to serve pupils in kindergarten and grades 1 to 9, inclusive, at participating elementary, middle, and junior high schoolsites.

This bill would provide that the program is also established to serve pupils at charter schoolsites.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) Under existing law, there is the California State Summer School for Mathematics and Science created to establish a multidisciplinary mathematics and science program to enable pupils with demonstrated academic excellence in mathematics and science to receive intensive training in these subjects. The summer school is governed by the State Board of Education and required to provide a training ground for pupils who wish to study advanced mathematics or science or to pursue careers that require a high degree of mathematics or scientific training. This program is repealed on January 1, 2004.

This bill would instead provide that the program is established to provide academic development to enable pupils with demonstrated academic excellence in mathematics and science to receive intensive educational enrichment in these subjects and an opportunity for pupils who wish to study advanced mathematics or science or to pursue careers that require a high degree of skills and knowledge mathematics or science. This bill would request that the Regents of the University of California to operate the summer school, and would make conforming changes to this program transferring its operation and governance from the State Board of Education to the Regents of the University of California. The bill would continue the summer school indefinitely. The bill would appropriate $1,000,000 to the University of California for purposes of the summer school that was appropriated from the General Fund to the State Board of Education.

(6) Under the Academic Improvement and Achievement Act, the Superintendent of Public Instruction is required to recommend, and the State Board of Education is required to adopt, criteria and regulations for the implementation of the act. This act defines ''qualifying school'' to mean a comprehensive high school that provides instruction in any of grades 9 to 12, inclusive, with a percentage of pupils who graduate from the school and are eligible for admission to the California State University or the University of California in the following year that is below the statewide average according to information from the California Postsecondary Education Commission. The act requires local educational agencies to be invited to apply to receive funds for qualifying schools, subject to an appropriation of funds for this purpose, and provides that funds allocated may not exceed $100 per pupil, nor shall be less than $20,000 at a qualifying school in any single fiscal year.

This bill would delete the requirement to adopt regulations. The bill would revise the definition of ''qualifying school'' to mean a comprehensive high school that provides instruction in any of grades 9 to 12, inclusive, with a percentage of pupils who graduate from the school and enroll in the California State University or the University of California in the following year that is below the statewide average according to information from the commission. The bill would delete the requirement that a minimum of $20,000 be allocated to a qualifying school.

(7) Under existing law, the Controller is required during each fiscal year commencing with the 1980–81 fiscal year, to transfer from Section A of the State School Fund such sums, in addition to the sums accruing from other sources, that provide in Section A of the State School Fund for apportionment during the fiscal year a total amount per pupil in average daily attendance during the preceding fiscal year credited to all elementary, high, and unified school districts and to all county superintendents of schools in the state, as certified by the Superintendent of Public Instruction, of $180.

This bill would require the Controller, commencing with the 1999–2000 fiscal year, to also transfer additional amounts necessary to meet computed apportionments of general-purpose funding for charter schools. This provision would become inoperative on July 1, 2002, and would be repealed on January 1, 2003.

(8) Existing law, the California Public School Library Protection Act, requires the State Department of Education to issue to qualifying school districts grants for the purpose of improving school libraries. Existing law, the California Public School Library Act of 1998, provides for the transfer of certain funds appropriated in the annual Budget Act to the California Public School Library Protection Fund for apportionment to school districts for the support of a districtwide school library plan and for expenditure for library resources.

This bill would establish the California Classroom Library Materials Act of 1999, and would require the act to be administered by the Superintendent of Public Instruction. The bill would authorize any school district that maintains a kindergarten or any of grades 1 to 4, inclusive, to apply for this funding under the act, and would authorize

NOTE: Superior numbers appear as a separate section at the end of the digests.

charter schools to apply for funding on their own behalf or through their chartering entity. The bill would require, as a condition of receiving funding under the act, school districts to develop a districtwide kindergarten and grade 1 to grade 4, inclusive, classroom library plan and to receive certification of the plan from the governing board of the school district. The bill would impose certain requirements regarding the development of the plan, including a means of preventing loss, damage, or destruction of materials.

The bill would establish a fund in the State Treasury to be known as the Business Organizations and Opportunities for Kids Fund to be administered by the State Librarian in consultation with the Superintendent of Public Instruction. The bill would require moneys donated by private entities for the purchase of classroom reading materials to be deposited in this fund. The bill would provide that moneys in that fund are available for expenditure only upon an appropriation in the annual Budget Act or other act.

The bill would require funds apportioned for purposes of the act to be apportioned to schools in an equal amount per unit of average daily attendance reported in the second principal apportionment of the prior fiscal year for kindergarten or any of grades 1 to 4, inclusive, and would require schoolsites to expend the funds to purchase grade-level appropriate reading materials.

(9) Existing law, as amended by Chapter 1 of the 1999–2000 First Extraordinary Session to become operative January 1, 2000, requires the governing board of each school district maintaining any or all of grades 7 to 12, inclusive, to offer summer school instructional programs for pupils enrolled in those grades who do not demonstrate sufficient progress toward passing the exit examination required for high school graduation. Existing law also authorizes the governing board of any school district that offers certain summer school instructional programs to offer summer school programs for instruction in mathematics, science, and other core academic areas.

This bill would authorize school districts to provide this instruction during the summer, after school, Saturday, or during intersession, or in any combination of summer, after school, Saturday, or intersession instruction, but in addition to the regular schoolday and would apply these provisions to charter schools, thereby imposing a state-mandated local program.

(10) Existing law authorizes the governing board of each school district maintaining any or all of grades 2 to 6, inclusive, to offer programs of direct, systematic, and intensive supplemental instruction to pupils enrolled in grades 2 to 6, inclusive, with low mathematics, reading, or written expression scores to allow those pupils to achieve proficiency in standards adopted by the State Board of Education.

The bill would apply those provisions to charter schools.

(11) Existing law limits a school district's maximum entitlement for reimbursement for pupil attendance in core curriculum area summer school programs and vocational work experience summer school to be an amount equal to 7% of the district's total enrollment for the prior fiscal year multiplied by 120 hours, multiplied by the hourly rate for the current fiscal year.

This bill would revise the manner in which summer school attendance is calculated and apply these provisions to charter schools.

(12) Under existing law, the California Constitution requires a minimum level of funding for school districts and community college districts.

This bill would provide that if, as the result of an audit or review, as defined, a local education agency is required to repay as apportionment significant audit exception the total amount of disallowed apportionment claims be subtracted from the allocation that the local educational agency would otherwise receive pursuant to this constitutional provision.

This bill would provide for the establishment of a repayment plan for a district with disallowed apportionment claims by the Superintendent of Public Instruction and the Director of Finance.

(13) Under existing law, for the 1990–91 fiscal year and each fiscal year thereafter, allocations calculated to be applied by the state for the support of school districts and community colleges is required to be distributed in accordance with certain calculations. This provision does not apply to the fiscal years 1992–93 to 1998–99, inclusive.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that this provision does not apply to fiscal year 1999–2000.

(14) Under existing law, the Superintendent of Public Instruction is required to compute an inflation adjustment in accordance with a formula for the 1986–87 fiscal year and each fiscal year thereafter.

This bill would revise the formula for the 1999–2000 fiscal year, and each fiscal year thereafter.

This bill would also provide that the revenue limit for each school district shall be reduced by an 6.996% deficit factor, for the 1999–2000 fiscal year.

(15) Under existing law, the county superintendent of instruction is required to compute an amount for each school district's summer school attendance in accordance with a specified formula.

This bill would require the county superintendent of instruction to compute an amount for each charter school's summer school attendance in the same manner, thereby imposing a state-mandated local program.

(16) Existing law requires that a person to be employed in a position not requiring certification qualifications, except a secondary school pupil employed in a temporary or part-time position by the governing board of the school district having jurisdiction over the school attended by the pupil, to be fingerprinted for purposes of a criminal history check by the Department of Justice.

This bill would require the Department of Justice to process all requests from a school district, an employer, or a human resources agency for criminal history information on a volunteer to be used in a school pursuant to the provisions that relate to persons employed by a school district that do not require certification qualifications.

(17) Existing law authorizes the Commission on Teacher Credentialing to set a fee for the issuance and renewal of teaching and service credentials that may not exceed $70 and to charge a single fee, not to exceed the charge for a single supplemental credential, for all supplemental credentials applied for at the same time.

This bill would authorize the commission to waive those fees for first-time teaching credential applicants subject to funds being appropriated expressly for this purpose in the annual Budget Act.

(18) Existing law sets forth a formula for computing the amount that a school district may be reimbursed for the costs of its voluntary program designed to remedy the harmful effects of racial segregation. Existing law provides that, commencing with the 1998–99 fiscal year and each fiscal year thereafter, the amount that the Sacramento City Unified School District may be reimbursed for the costs of its voluntary desegregation program shall not exceed the amount in excess of $^1/_5$ of the audited desegregation cost approved by the Controller and actually incurred in the 1990–91 fiscal year, reduced by the federal desegregation reimbursement of $3,096,989 received in the 1990–91 fiscal year, as adjusted for inflation and changes in enrollment, as specified.

This bill would provide that notwithstanding this provision, commencing with the 1998–99 fiscal year, the Sacramento City Unified School District's level of reimbursement shall be calculated based on actual reimbursements received for its 1998–99 voluntary desegregation audited claim.

(19) Under existing law, each fiscal year, the Superintendent of Public Instruction is required to provide each eligible school district, county office of education, and charter school applying for a grant under the Instructional Time and Staff Development Reform Program with a staff development allowance of $270 per day for up to 3 days, for each certificated classroom teacher and $140 per day for up to one day for each classified classroom instructional aide and certificated teaching assistant who participates in staff development instructional methods.

This bill would require that these amounts be adjusted annually commencing in the 1999–2000 fiscal year by a specified inflation adjustment and would include conflict resolution as curriculum that may be included in staff development.

(20) Under existing law, school districts are apportioned state funds for home-to-school transportation and special education transportation in accordance with specified formulas.

This bill would provide that a charter school is eligible for funding pursuant to, and shall comply with all requirements of, these provisions and that for purposes of these provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(21) Under existing law, the Superintendent of Public Instruction is required to apportion to each charter school for each fiscal year (1) from funds appropriated to Section A of the State School Fund for apportionment for that fiscal year, an amount for each unit of regular average daily attendance in the charter school that is equal to the current fiscal year base revenue limit for the school district to which the charter petition was submitted, (2) for each pupil enrolled in the charter school who is entitled to special education services, the state and federal funds for special education services for that pupil that would have been apportioned for that pupil to the school district to which the charter petition was submitted, and (3) funds for specified categorical education programs to the extent that any pupil enrolled in the charter school is eligible to participate.

This bill would delete this provision.

(22) Under existing law, the full apportionment received by the basic aid district, as defined, under certain circumstances, is required to be provided to a charter school, and with respect to any pupil of a charter school located within a basic aid school district who resides in a district other than a basic aid district, the Superintendent of Public Instruction, commencing with the 1998–99 fiscal year, is required to calculate for that school an apportionment of state funds that provides 70 percent of the district revenue limit calculated that would have been apportioned to the school district of residence for any average daily attendance credited.

This bill would repeal this provision.

(23) Under existing law, notwithstanding the provision discussed above, commencing with the 1999–2000 school year and only upon adoption of regulations, charter school operational funding is required to be equal to the total funding that would be available to a similar school district serving a similar pupil population. However, a charter school is not required to be funded as a necessary small school or a necessary small high school, nor receive revenue limit funding that exceeds the statewide average for a school district of a similar type.

This bill would repeal this provision.

(24) This bill would revise the method for funding charter schools. It would require the Superintendent of Public Instruction to annually compute a general-purpose entitlement, as defined, and a categorical block grant amount, as defined, for each charter school. The bill would provide that general-purpose entitlement funding may be used for any public school purposes determined by the governing body of the charter school.

(25) This bill would provide that a charter school may be deemed to be a local educational agency for purposes of special education funding and compliance with applicable federal law.

(26) Under the High-Risk First-Time Offenders Program, the Superintendent of Public Instruction is required to apportion to each county office of education or school district that operates a program, in addition to funds from all other sources and subject to the limitation specified in the Budget Act or other statute, $3,000 per year for each unit of average daily attendance reported at the annual apportionment for pupil attendance in a program.

This bill would authorize the Superintendent of Public Instruction to provide an apportionment for startup costs under specified conditions during the 1st year that a county office of education or a school district operates a High-Risk First-Time Offenders Program.

(27) Under the Transitioning High-Risk Youth Program, the Superintendent of Public Instruction is required to apportion to each county office of education or school district that operates a program, in addition to funds from all other sources and subject to the limitation specified in the Budget Act or other statute, $3,000 per year for each unit of average daily attendance reported at the annual apportionment for pupil attendance in a program.

This bill would authorize the Superintendent of Public Instruction to provide an apportionment for startup costs under specified conditions during the 1st year that a county office of education or a school district operates a Transitioning High-Risk Youth Program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(28) Under existing law, in addition to funds from all other sources, the Superintendent of Public Instruction is required to apportion to each school district that operates a community day school $4,000 per year, and for each county office of education that operates a community day school $3,000 per year, for each unit of average daily attendance reported at the annual apportionment for pupil attendance at community day schools.

This bill would require that this amount be adjusted annually commencing in the 1999–2000 fiscal year for inflation by a specified calculation.

(29) Under existing law, there is a County Office Fiscal Crisis and Management Assistance Team that consists of persons having extensive experience in school district budgeting, accounting, data processing, telecommunications, risk management, food services, pupil transportation, purchasing and warehousing, facilities maintenance and operation, and personnel administration, organization, and staffing.

This bill would establish the California School Information Service, administered by the County Office Fiscal Crisis and Management Assistance Team, which would be authorized to hire a program administrator. The California School Information Services program administrator would be required to submit to the State Board of Education a plan to administer, coordinate, and manage the development and implementation of an electronic statewide school information system to address current problems of information exchange.

(30) Under existing law, the State Department of Education is required, on behalf of the state, to participate in a specified federal child care food program, and may not terminate its participation in the program unless the Legislature authorizes the termination.

This bill would require the State Department of Education, to the extent permitted by federal law, to adopt regulations to establish eligibility requirements for participation in the child care food program and to impose penalties and sanctions for noncompliance by sponsoring organizations and would authorize the department to establish contracts effective for periods of 12 months or less for sponsoring organizations meeting the department's high-risk profile.

(31) Existing law provides that parents or guardians of pupils enrolled in public school have specified rights and should have specified opportunities with regard to the education of their children. Existing law requires, upon approval by the State Board of Education, the State Department of Education to make materials that describe a comprehensive partnership at schools that involves parents and guardians of pupils in the public schools of California on or before December 31, 1999, and requires these materials to include information about the possible roles of each parent or guardian, and of each teacher, principal, and other school personnel in fostering and participating in parent involvement activities and programs.

This bill would establish the Parental Involvement Grant Program and would require the Superintendent of Public Instruction to administer this program. The bill would authorize any school district or charter school that maintains a kindergarten or any of grades 1 to 12, inclusive, to apply on behalf of a school for funding under the program if the schoolsite council submits an application and a plan that contains certain elements, including, among others, a plan for a program that facilitates significant involvement of parents in their children's education. The bill would require the plan developed by the schoolsite council to be reviewed and approved by the governing board of the school district or in the case of a charter school, a specified local educational agency, and to be submitted to the State Department of Education together with the application for funding pursuant to this program. The bill would require the Superintendent of Public Instruction, in any fiscal year in which funds are appropriated for making parental involvement grants pursuant to this program, to administer the application process and to award one-time grants, on a competitive basis, in the amount of $25,000.

(32) Under existing law, a school district that elects to continue to operate a class size reduction program in grades 10 to 12, inclusive, is eligible to receive $135 per pupil certified pursuant to this chapter as it read on July 1, 1998, except that total funding shall not exceed the amount received by the school district for the program for grades 10 to 12, inclusive, in the 1997–98 fiscal year.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would increase that amount to $165 per pupil, adjusted annually commencing in the 2000–01 fiscal year by a specified inflation adjustment, except that total funding would not be permitted to exceed the amount received by the school district for the program for grades 10 to 12, inclusive, in the 1997–98 fiscal year.

(33) Under existing law, the Superintendent of Public Instruction is required to apportion to each applicant district an amount equal to $135 per unit of full-year equivalent enrollment for special education pupils enrolled in special education classes on a full-time basis and the number of pupils enrolled in necessary small schools that receive specified funding if the district certifies an average class size of 20 pupils and not more than 22 pupils in each participating class at each participating school.

This bill would instead provide for an apportionment of $165 per unit of full-year equivalent enrollment for these pupils if the district certifies an average class size of 20 pupils and not more than 22 pupils in each participating class at each participating school, adjusted annually commencing in the 2000–01 fiscal year for inflation.

(34) Under existing law, there is the Elementary School Intensive Reading Program, and the Governor's Reading Award Program. The Superintendent of Public Instruction, with input from an advisory committee, is required to evaluate these programs on or before November 1, 2000.

This bill would instead require the evaluation of these programs on or before November 1, 2001.

(35) Existing law provides for various programs to serve individuals with exceptional needs, as defined.

This bill would prohibit the Superintendent of Public Instruction from allocating state funds to offset the federal funds withheld.

(36) Under existing law, an individual with exceptional needs, who is eligible to receive special educational instruction, related services, or both, is required to receive educational instruction, services, or both, at no cost to his or her parents or, as appropriate, to him or her.

This bill would require the Superintendent of Public Instruction to send a notice to each member of the governing board of a local education agency within 30 days of the superintendent's receipt of notification by the federal government that a local educational agency is not in compliance with the Individual's with Disabilities Education Act or Section 504 of the Rehabilitation Act of 1973, or when the Superintendent of Public Instruction determines that the local educational agency is not in compliance with any other special education provision, with a description of those services required by the statute with which the local educational agency is not in compliance. Upon receipt of the notification, the governing board would be required to address the issue of noncompliance at a regularly scheduled public hearing.

(37) Under existing law, for the 1998–99 fiscal year, the Superintendent of Public Instruction is required to make computations to determine the amount of funding for each special education local plan area, including computations to determine the inflation adjustment for the fiscal year in which the computation is made.

This bill would revise that inflation adjustment.

(38) Under existing law, in order to mitigate the effects of any declining enrollment, commencing in the 1998–99 fiscal year, and each fiscal year thereafter, the Superintendent of Public Instruction is required to calculate allocations to special education local plan areas based on the average daily attendance reported for the special education local plan area for the fiscal year in which the computation is made or the prior fiscal year, whichever is greater, adjusted for any loss or gain of average daily attendance reported for the special education local plan area due to a reorganization or transfer of territory in the special education local plan area.

This bill would revise that calculation.

(39) Under existing law, the State Board of Education is required to complete the adoption of the portion of pupil assessments that meets certain objectives and that yields valid, reliable estimates of school performance, school district performance, and statewide performance of pupils that, in grades 4, 5, 8, and 10, assess basic academic skills and incorporate the use of direct writing assessment and other assessments of applied academic skills, in the core curriculum areas of reading, writing, and mathematics by December 31, 1999, and the board is required to complete the adoption of that portion

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of pupil assessments for these pupils in the core curriculum areas of history/social science and science by December 31, 2000.

The bill would instead require the board to adopt performance standards not later than July 15, 2000, and require the board to complete the adoption of the pupil assessments in the core curriculum areas not later than November 15, 2000.

(40) Under the Standardized Testing and Reporting Program, known as the STAR Program, the Superintendent of Public Instruction is required to apportion funds, to enable school districts to administer to each of its pupils in grades 2 to 11, inclusive, the achievement test designated by the State Board of Education. The State Board of Education is required to establish the amount of funding to be apportioned, which is up to $8 per test administered to a pupil in grades 2 to 11, inclusive.

This bill would provide, instead of up to $8 per test, that an adjustment to the amount of funding apportioned per test may not be valid without the approval of the Director of Finance, would require that these requests be submitted in writing to the director and the chairpersons of the fiscal committees of the Legislature with accompanying material justifying the proposed adjustment, and would require the director to approve or disapprove the amount within 30 days of receipt of the request and notify the chairpersons of the fiscal committees of the Legislature.

(41) Under the STAR Program, to be eligible for consideration, a test publisher is required to meet certain conditions, including, but not limited to, to provide disaggregated scores, based on limited-English-proficient status and non-limited-English-proficient status, provide disaggregated scores by pupil gender, and to provide disaggregated scores based on whether pupils are economically disadvantaged or not.

This bill would require a test publisher to agree in writing to also provide disaggregated scores for pupils who have individualized education programs and are enrolled in special education, to the extent required by federal law. The bill would also require a school district to be reimbursed by the publisher for unexpected expenses incurred due to the late delivery of testing materials.

(42) Under existing law, the Superintendent of Public Instruction is required to review existing tests that assess the English language development of pupils whose primary language is a language other than English. These tests are required to include, but not be limited to, an assessment of achievement of these pupils in English reading, speaking, and written skills.

This bill would require the Superintendent of Public Instruction, not later than August 15, 1999, to release a request for proposals for the development of this test or series of tests. The bill would require the State Board of Education, not later than September 15, 1999, to select a contractor or contractors for the development of the test or series of tests, to be available for administration during the 2000–01 school year. The bill would also require the State Board of Education, not later than July 1, 1999, to approve standards for English language development for pupils whose primary language is other than English.

(43) Under existing law, the Board of Governors of the California Community Colleges are required to develop criteria and standards for the purposes of making the annual budget request for the California Community Colleges to the Governor and the Legislature, and for the purpose of allocating the state general apportionment revenues. Annual revenue adjustments are required to be made to reflect cost changes, using the Implicit Price Deflator for State and Local Government Purchases of Goods and Services for the United States as published by the United States Department of Commerce, and using the ratio for the 4th calendar quarter of the latest available year to the 4th calendar quarter of the prior year rounded up to the 100th.

This bill would instead require the board of governors to use the same factor as required for school districts.

(44) Under existing law, the California Community Colleges Economic Development Program becomes inoperative on June 30, 1999, and as of January 1, 2000, is repealed.

This bill would extend this program until January 1, 2001.

(45) Under existing law, the fee for filing a notice of appeal in a civil case appealed to a court of appeal is $250 and the fee for filing a petition for a writ within the original civil jurisdiction of a court of appeal is $250.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would increase these amounts to $265.

(46) Under existing law, the $50 of each fee collected in a civil case by the clerk of each court of appeal for filing a notice of appeal is required to be paid into the State Treasury for deposit in a special account in the General Fund known as the California State Law Library Special Account. Existing law provides that this provision is repealed on January 1, 2000.

This bill would increase the fee to $65 and would extend this provision until January 1, 2005, thereby imposing a state-mandated local program by extending the duties of the clerk of each court of appeals.

(47) Existing property tax law requires the county auditor, in each fiscal year, to allocate property tax revenue to local jurisdictions in accordance with specified formulas and procedures, and generally requires that each jurisdiction be allocated an amount equal to the total of the amount of revenue allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, and that jurisdiction's portion of the annual tax increment, as defined. Existing property tax law also reduces the amounts of ad valorem property tax revenue that would otherwise be annually allocated to the county, cities, and special districts pursuant to these general allocation requirements by requiring, for purposes of determining property tax revenue allocations in each county for the 1992–93 and 1993–94 fiscal years, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance with certain formulas. It requires that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund in that county for allocation to school districts, community college districts, and the county office of education.

This bill would require, for the 1999–2000 fiscal year and each fiscal year thereafter, that if, after making these prescribed allocations, a county auditor determines that there are still additional funds to be allocated, that those funds be allocated to the county, cities, and special districts in proportion to the amounts of ad valorem property tax revenue otherwise required to be shifted from those local agencies to the county's Educational Revenue Augmentation Fund for the relevant fiscal year. This bill would, for the 1999–2000 fiscal year, condition the operation of this allocation provision upon an appropriation, as provided, in the Budget Act of 1999. By imposing new duties in the allocation of ad valorem property tax revenues, this bill would impose a state-mandated local program. However, this bill would provide that no reimbursement is required by these provisions for a specified reason.

(48) Under existing law, there is in the Department of the Youth Authority a correctional education authority for the purpose of carrying out the education and training of wards committed to the youth authority.

This bill would provide that for purposes of receiving state funds pursuant to subdivision (b) of Article XVI of the California Constitution (Proposition 98), the correctional education authority is a state agency and is only entitled to state funding for direct instructional services provided to wards attending a course of study. The bill would prohibit the authority from receiving state funds unless the funds are specifically appropriated to the Youth Authority for direct instructional services, and would provide that the authority may not receive additional funds from the State Department of Education under any other program.

(49) Under existing law, $5,000,000 is appropriated from the General Fund to the Library of California Board to fund the startup phase of the Library of California for expenditure in the 1998–99 fiscal year.

This bill would authorize expenditure of these funds in the 1998–99 and 1999–2000 fiscal years, thereby making an appropriation.

(50) This bill would require, notwithstanding any other provision of law, that the state funds for revenue limits to school districts, county superintendents of schools, and charter school operational funding certified to the Controller in the 2000–01 fiscal year do not exceed certain amounts as determined by statute.

(51) This bill would provide that, notwithstanding any other provision of law, the cost-of-living adjustment for certain items of the Budget Act of 1999 is 1.41% and would provide that these funds are in lieu of the amounts that would otherwise be appropriated.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(52) This bill would reappropriate $15,471,000 from the Proposition 98 Reversion Account to the Superintendent of Public Instruction for allocations in various amounts on a one-time basis to various school districts for specified purposes.

(53) This bill would appropriate $973,400 from the General Fund to the Superintendent of Public Instruction for allocation in various amounts to school districts on a one-time basis for specified purposes. These funds would be applied toward the minimum funding requirements for school districts and community colleges imposed by Section 8 of Article XVI of the California Constitution.

(54) This bill would appropriate $134,000,000 from the General Fund to the Superintendent of Public Instruction for allocation on a one-time basis to school districts and charter schools, and would require the Superintendent of Public Instruction to allocate these funds in specified amounts to school districts and charter schools on an enrollment basis for kindergarten and grades 1 to 8, inclusive, and grades 9 to 12, inclusive. These funds would be applied toward the minimum funding requirements for school districts and community colleges imposed by Section 8 of Article XVI of the California Constitution.

(55) This bill would appropriate $1,000,000 from the General Fund to the Superintendent of Public Instruction for allocation to the 5 Challenger Learner Centers, and would require that each center be allocated an equal amount.

(56) This bill would provide that the unencumbered balance as of June 30, 1999, in the 1997 Omnibus Education Trailer Bill or reimbursement of state-mandated local cost claims submitted by local education agencies is reappropriated to the Controller for the reimbursement of these claims for fiscal years 1995–96 to 1999–2000, inclusive.

(57) The bill would reappropriate $3,320,000 from the Proposition 98 Reversion Account to the Chancellor of the California Community Colleges for various purposes.

(58) This bill would appropriate $10,000,000 from the General Fund to the Controller for transfer to Section B of the State School Fund for the purpose of providing one-time grants to community college districts for the 1999–2000 fiscal year for the purpose of one-time expenditures on high priority projects for instructional equipment, library materials replacement, technology infrastructure, scheduled maintenance, and special repairs. The bill would require these funds to be allocated in an average amount per actual statewide full-time equivalent student enrollment reported for the 1998–99 fiscal year. These funds would be applied toward the minimum funding requirement for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution for the 1998–99 fiscal year.

(59) Existing law requires, and provides a mechanism for, reimbursement of certain school district costs associated with compliance with desegregation plans or orders and voluntary integration programs.

This bill would appropriate $2,000,000 from the General Fund to the State Controller to provide for the unfunded costs for Sacramento City Unified School District's 1998–99 voluntary integration program. The bill would require the funds appropriated by these provisions to be counted toward the state's minimum funding obligation pursuant to Section 8 of Article XVI of the California Constitution for the 1998–99 fiscal year.

(60) This bill would appropriate a total of $6,724,097 from the General Fund to the State Controller, for allocation to school districts for costs associated with school desegregation pursuant to a prescribed schedule for the 1994–95 and the 1995–96 fiscal years.

This bill would require the funds appropriated by these provisions to be counted towards the state's minimum funding obligation pursuant to Section 8 of Article XVI of the California Constitution for years prior to the 1998–99 fiscal year to the extent that obligations remain.

(61) This bill would appropriate $200,000 from the General Fund to the University of California for violence prevention studies.

(62) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(63) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 79 (AB 1662) Leonard. Booking fees: annual appropriation. [3]

Existing law authorizes a county to impose, among other fees with respect to criminal justice services, a booking fee upon other local agencies and colleges and universities for county costs incurred in processing or booking persons arrested by employees of those entities and brought to county facilities for booking or detention.

This bill would continuously appropriate up to $50,000,000 annually from the General Fund to the Controller commencing with the 1999–2000 fiscal year for allocation to cities for reimbursement for actual booking and processing costs paid to counties. This amount would be increased annually by 2% commencing with the 2000–01 fiscal year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 80 (AB 1135) Ashburn. School employees: resignations.

Existing law prohibits the resignation of a school employee from taking effect after the close of the school year during which the governing board of a school district receives the resignation.

This bill would, notwithstanding the above, authorize an employee and the governing of a school district to agree that a resignation will be accepted at a mutually agreed upon date not later than 2 years beyond the close of the school year during which the resignation is received by the board.

Ch. 81 (AB 1482) Alquist. Stray animals: impounding requirements: operative date.

Under existing law, on and after July 1, 1999, any stray dog or cat impounded by a public pound or specified shelter will be required to be held for at least 4 or 6 business days, as specified, before being killed. Under existing law, on and after July 1, 1999, and until July 1, 2001, any animal relinquished to a public pound or specified shelter by its owner will be required to be held for at least 2 full business days, as specified, before being euthanized.

This bill would provide that, until July 1, 2000, a public agency that had a contract with another public or private entity to provide or receive animal shelter or animal pound holding services on January 1, 1999, by resolution, may comply with specified holding periods that were in effect on June 30, 1999, if specified conditions are met. This bill would also require public notice and findings of fact, as described, as to the basis for the resolution. Additionally, the bill would require a plan to be adopted within 60 days of the resolution to establish a schedule of implementation, as prescribed. The bill would also require flexible hours for any facility operating under a resolution.

The bill would declare that it would take effect immediately as an urgency statute.

Ch. 82 (SB 132) Brulte. Community college districts.

(1) Existing law provides that a proposal to form a new community college district from that portion of an existing community college district that has not less than 6,500 and not more than 7,000 full-time equivalent students and that contains an existing community college campus, which is located in a county other than the county in which the headquarters of the existing community college district is located, which is 50 or more miles from any other campus in the existing community college district, and which has not less than 1,200 and not more than 1,500 full-time equivalent students in the 1997–98 fiscal year, shall become final upon the approval of the board of governors, without the approval of the voters at an election, in accordance with a prescribed procedure.

This bill would authorize a community college district formed under these provisions to contract with another district for the performance of services. The bill would specify procedures for the disposition of funds authorized for, appropriated to, or apportioned to, a community college district formed under these provisions.

The bill would impose a state-mandated local program by requiring the existing community college district and a new community college district established under these

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

provisions to enter into an agreement providing for specified matters relating to the formation of a new community college district.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 83 (SB 966) Committee on Judiciary. Maintenance of the codes.

Existing law directs the Legislative Counsel to advise the Legislature from time to time as to legislation necessary to maintain the codes.

This bill would restate existing provisions of law to effectuate the recommendations made by the Legislative Counsel to the Legislature for consideration during 1999, and would not make any substantive change in the law.

Ch. 84 (AB 1661) Torlakson. Local government relief.

Existing law establishes the California Infrastructure and Economic Development Bank in the Trade and Commerce Agency with specified authority, including the authority to make loans to sponsors in connection with the financing of a project and the authority to engage the services of private consultants to render professional and technical assistance.

This bill would provide that nothing in these authorizations regarding the bank shall be construed to extend or limit the authority of the bank with respect to personal services contracts beyond provisions that are otherwise specified for state agencies using personal services contracts.

Existing law requires the bank to establish criteria, priorities, and guidelines for the selection of projects to receive assistance from the bank. Existing law also requires the legislative body of a sponsor to make certain findings, by resolution, prior to submitting a project to the bank for consideration.

This bill would add a requirement that a finding be made that the project is consistent with the criteria, priorities, and guidelines established by the bank.

The bill would also provide that from the funds appropriated in Item 2920-111-0001 of the Budget Act of 1999, $425,000,000 shall be available for financial assistance, including, but not limited to, leveraged revolving fund loans, to local government sponsors for public development facilities. The bill would further prohibit the bank from making any single loan in excess of 10% of the combined amount of this appropriation and an appropriation made to the bank in the Budget Act of 1998 unless approved by the board of directors of the bank and the Director of Finance provides notice to the Joint Legislative Budget Committee.

Existing law requires the bank, not later than November 1 of each year, to submit a report of specified activities to the Governor and the Joint Legislative Budget Committee.

This bill would require this report to be submitted on a quarterly basis during the 1999–2000 fiscal year and the 2000–01 fiscal year.

Existing property tax law requires the county auditor, in each fiscal year, to allocate property tax revenue to local jurisdictions in accordance with specified formulas and procedures, and generally requires that each jurisdiction be allocated an amount equal to the total of the amount of revenue allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, and that jurisdiction's portion of the annual tax increment, as defined. Existing property tax law also reduces the amounts of ad valorem property tax revenue that would otherwise be annually allocated to the county, cities, and special districts pursuant to these general allocation requirements by requiring, for purposes of determining property tax revenue allocations in each county for the 1992–93 and 1993–94 fiscal years, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

with certain formulas. It requires that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund in that county for allocation to school districts, community college districts, and the county office of education.

This bill would, for the 2000–01 fiscal year and each fiscal year thereafter, modify these reduction and transfer provisions by limiting the total reduction and transfer amount for all the local agencies in each county to the corresponding total amount for the 1999–2000 fiscal year. This bill would require that the revenues not allocated to the county's Educational Revenue Augmentation Fund as a result of this limitation be instead allocated among the local agencies in the county, as provided. By imposing new duties in the annual allocation of ad valorem property tax revenues, this bill would impose a state-mandated local program.

This bill would also provide that the moneys appropriated pursuant to a specified line item in the Budget Act of 1999 be allocated (1) 1/2 to counties, and then among the local agencies in each county, in accordance with specified requirements and formulas applied to reduction and transfer amounts implemented for the 1998–99 fiscal year, and (2) 1/2 among the cities and the counties in accordance with the relative populations of the cities and unincorporated areas of counties. By providing for state revenues to be allocated in specified amounts to specified recipients, this bill would make an appropriation.

Existing property tax law requires a county auditor to annually calculate the property tax administrative cost shares attributable, as provided, to the local jurisdictions in the county and the county's Educational Revenue Augmentation Fund. Existing law also provides for a county's recovery of those cost shares, except for those cost shares calculated with respect to school entities or a county's Educational Revenue Augmentation Fund.

This bill would, for the 2000–01 fiscal year and each fiscal year thereafter, require the Legislature to subvene an amount sufficient to reimburse counties for the property tax administrative cost shares calculated for school entities as defined by a specified provision, and would establish procedures to be followed in allocating this amount from the General Fund among the counties in each subject fiscal year.

This bill would state the intent of the Legislature with respect to the impact upon certain legal claims and future measures of certain of the provisions of this bill. This bill would also provide that certain of its provisions shall not become operative unless an amendment to the California Constitution, meeting certain requirements, is approved by the statewide electorate during the 2000 calendar year.

This bill would also state the intent of the Legislature, and would require the Director of Finance to make certain adjustments, with respect to ensuring that the modifications required by this bill and earlier acts to property tax revenue allocations do not have a net fiscal impact on school districts or community college districts, or upon the state's obligation under the California Constitution to provide funding to those districts.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 85 (AB 1660) Shelley. State government.

(1) Existing law requires the Department of Insurance to develop and implement a coordinated approach to gather, review, and analyze the archives of affected insurance groups, and other archives and records, using onsite teams and an oversight committee, to provide for research and investigation into insurance policies, unpaid insurance claims, and related matters of victims of the Holocaust or of the Nazi-controlled German government or its allies, and the beneficiaries and heirs of those victims, and for losses arising from the activities of the Nazi-controlled German government or its allies for insurance policies issued before and during World War II by insurers who have affiliates or subsidiaries authorized to do business in California.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would rename the oversight committee the Holocaust Era Insurance Claims Oversight Committee (hereafter the oversight committee). The bill would provide for the appointment of 7 persons to the oversight committee, 4 by the Governor, and one each by the President pro Tempore of the Senate, the Speaker of the Assembly and the Commissioner of Insurance. The bill would add to the duties of the oversight committee with respect to specified activities regarding Holocaust era insurance claims in which the department is involved.

(2) Existing law limits expenditure of the funds in the Motor Vehicle Account in the State Transportation Fund to specific purposes relating to the administration and enforcement of laws regulating the use, operation, or registration of vehicles operated on the highways. Those funds may also be used for certain highway and mass transit guideway purposes.

This bill, until June 30, 2000, or until the day after execution of the transfers specified below, whichever date is first, would authorize money in the account that is derived from specified revenue resources to be used for any general governmental purpose, upon appropriation.

The bill would require the Controller to transfer prescribed sums from the State Highway Account to the General Fund and the Motor Vehicle Account upon the determination that certain conditions have occurred. The bill would also require the Controller to transfer a prescribed sum from the Motor Vehicle Account to the General Fund upon determining that certain other conditions have occurred.

(3) Under federal law, the Secretary of Commerce is required to take a decennial census of population, as defined as population and housing, and matters relating to population and housing, every 10 years.

This bill would establish the California Complete Count Committee for the purpose of developing and implementing a plan to maximize the number of persons of this state that participate in the 2000 federal decennial census of population. The committee would consist of 9 members, to be appointed as specified. The committee would be authorized to enter into contracts with individuals or entities as necessary for the development or implementation of the plan. The committee would be required to implement the plan no later than February 15, 2000, and to continue to implement the plan through September 1, 2000. The committee would cease to exist on December 31, 2000.

Ch. 86 (SB 711) Burton. Governmental functions.

(1) Legislation pending before the Governor would make various provisions for the prevention of school violence.

This bill would revise the designation of those provisions.

(2) Legislation pending before the Governor would make findings and declarations with regard to the federal decennial census and state the intent of the Legislature to increase participation in the 2000 federal decennial census.

This bill would prevent the operation of and would repeal these provisions.

(3) Legislation pending before the Governor would create the California Complete Count Committee relating to federal decennial census.

This bill would delete the authority to establish this committee.

(4) Legislation pending before the Governor would prohibit counties from receiving certain local assistance funds unless certain conditions are complied with.

This bill would correct erroneous cross-references in that provision.

(5) Existing federal law provides for the conduct of a decennial census of the population of every state.

This bill would request the Governor to appoint a task force to make recommendations on how to maximize the number of Californians counted in the 2000 census and to implement a census outreach program.

Ch. 87 (AB 532) Lempert. Human milk.

Existing law provides that the procurement, processing, distribution, or use of whole blood, plasma, blood products, and blood derivatives for specified purposes constitutes the rendition of a service, and not a sale of the whole blood, plasma, blood products, or blood derivatives for any purpose.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would apply similar provisions to the procurement, processing, distribution, or use of human milk for human consumption.

Ch. 88 (AB 1049) Aanestad. Health insurance: disability insurers.

Existing law provides for the regulation of disability insurers by the Insurance Commissioner.

This bill would require every disability insurer that covers hospital, medical, or surgical expenses and that reviews and approves the medical necessity or appropriateness of requests by providers prior to, or concurrently with, the provision of health care services to insureds, to prominently indicate on each insured's identification card whether a separate telephone number must be called to verify eligibility for benefits and coverage. This bill would also require the insurer to provide a specified notice to the insured in this regard.

Ch. 89 (SB 626) Chesbro. Lake County Flood Control and Water Conservation District.

(1) The Lake County Flood Control and Water Conservation District authorizes the board of supervisors of the Lake County Flood Control and Water Conservation District to establish zones within the district.

This bill would authorize the board of supervisors to modify and dissolve zones within the district in accordance with prescribed procedures.

(2) The act requires the board of the district to appoint a commission and authorizes the board to delegate any or all of its powers to the commission.

This bill would repeal that provision.

(3) The act authorizes the board of the district to levy ad valorem taxes or assessments upon real property in the district or in the zones of the district in accordance with prescribed provisions.

This bill would revise those provisions and would provide that the district may levy and collect special taxes and benefit assessments in the district or any zone of the district pursuant to specified provisions of law.

(4) The act authorizes the board to impose assessments, in accordance with specified provisions, to pay for the costs of operation and maintenance of certain works or improvements that have been constructed by the state or the federal government.

This bill would revise those provisions and would authorize the board to impose special taxes and benefit assessments to pay for those costs, as prescribed.

Ch. 90 (AB 1682) Honda. Human services.

Existing law provides for the county-administered In-Home Supportive Services (IHSS) program, under which qualified aged, blind, and disabled persons are provided with services in order to permit them to remain in their own homes and avoid institutionalization.

Existing law provides until June 30, 1998, that the reimbursement of counties meeting certain conditions shall not be reduced for the state share of the nonfederal costs for the administration of the In-Home Supportive Services program.

This bill would extend the operative period of that provision until June 30, 2001.

Existing law permits services to be provided under the IHSS program either through the employment of individual providers, a contract between the county and an entity for the provision of services, the creation by the county of a public authority, or a contract between the county and a nonprofit consortium.

Existing law provides that when any increase in provider wages or benefits is negotiated or agreed to by a public authority or nonprofit consortium, the county shall use county-only funds to fund both the county's share and the state's share, including employment taxes, of any increase in IHSS costs, unless otherwise provided for by law.

This bill would delete this provision, and would, instead, provide that the annual costs for any public authority or nonprofit consortium shall be shared by the state and county according to provisions of existing law.

The bill would also authorize counties to designate funds to be used to increase provider wages and benefits for the provision of IHSS services through a nonprofit consortium or public authority or through a 3-year contract with various providers, and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

would provide for the reimbursement of any county that expends county funds in an amount at least equal to the reduction during the fiscal year in the county's share of cost that results from federal financial participation in services provided to medically needy aged, blind, and disabled persons, for the cost of the increase in wages and benefits that exceeds the reduction in the county share of cost.

This bill would require each county to act as, or establish, an employer for in-home supportive service personnel for purposes of provisions of statutory law regarding employer-employee relations and would require the department to establish a timetable for implementation of that requirement. This bill would also require each county that has not established a public authority for the provision of IHSS services to establish an advisory committee and would require the advisory committee in each county to provide recommendations on certain modes of service to be utilized in the county for in-home supportive services.

Because counties are responsible for administration of the IHSS program and participate in the funding of that program, this bill, by requiring counties to appoint an advisory committee, would result in a state-mandated local program.

Existing law provides that any county may contract on a nonexclusive basis with any qualified individual, organization, entity, or entities to provide or arrange for in-home supportive services, and specifies that the contracts may provide for a mode of service delivery under which the contractor is financially at risk for providing all in-home supportive services identified as necessary by the county to enrolled beneficiaries in the county.

This bill would repeal that provision.

Existing law establishes limits on the number of hours of services that may be provided to eligible recipients under the IHSS program.

This bill would revise those limitations.

Existing law provides for the establishment of the Sales Tax Account in the continuously appropriated Local Revenue Fund for the allocation of sales and use tax revenues to local government, includes the In-Home Supportive Services Registry Model Subaccount in the Sales Tax Account of that fund, and provides that money in the In-Home Supportive Services Registry Model Subaccount shall be available for allocation by the Controller for purposes of funding the provision of in-home supportive services through a county contract with a nonprofit consortium or a public authority created for that purpose.

This bill would eliminate the In-Home Supportive Services Registry Model Subaccount from the Sales Tax Account in the Local Revenue Fund, and would transfer any funds in the account to the General Fund.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 91 (SB 710) Burton. IHSS: budget trailer.

Existing law provides for the county-administered In-Home Supportive Services (IHSS) program, under which qualified aged, blind, and disabled persons are provided with services in order to permit them to remain in their own homes and avoid institutionalization.

Existing law permits services to be provided under the IHSS program either through the employment of individual providers, a contract between the county and an entity for the provision of services, the creation by the county of a public authority, or a contract between the county and a nonprofit consortium.

Legislation pending before the Governor provides that when any increase in provider wages or benefits is negotiated or agreed to by a public authority or nonprofit

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

consortium, the annual costs for any public authority or nonprofit consortium shall be shared by the state and county according to provisions of existing law.

This bill would provide instead that the county shall use county-only funds to fund both the county's share and the state's share, including employment taxes, of any increase in IHSS costs, except as otherwise provided in this bill.

Legislation pending before the Governor would provide for the reimbursement of any county that expends county funds in an amount at least equal to the reduction during the fiscal year in the county's share of cost that results from federal financial participation in services provided to medically needy aged, blind, and disabled persons, for the cost of the increase in wages and benefits that exceeds the reduction in the county share of cost.

This bill would delete that proposed statute.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 92 (AB 1104) Migden. Water quality: waste discharge requirements and penalties.

(1) Under existing law, the State Water Resources Control Board and the California regional water quality control boards are among the principal agencies with primary regulatory authority over water quality.

This bill, under specified circumstances, would authorize the state board, a regional board, or a publicly owned treatment works (POTW) to require a discharge or industrial discharger, as defined, subject to its jurisdiction to complete a prescribed pollution prevention plan. The bill would authorize a regional board to require a POTW to complete a pollution prevention plan with specified components, thereby imposing a state-mandated local program. The bill would require the state board or regional board to solicit comments from the public on a pollution prevention plan prepared pursuant to these provisions and to address the public comments when determining what schedule of actions to establish. The bill would authorize a POTW to require pollution prevention plans as part of the pretreatment requirements applicable to significant industrial users. The bill would require the state board or a regional board to prescribe effluent limitations as part of the waste discharge requirements of a POTW for specified substances.

(2) Existing law subjects any person who violates prescribed provisions of the Clean Water Act or the Porter-Cologne Water Quality Control Act to civil liability, as prescribed.

This bill would require liability to be assessed in connection with a violation of those provisions at a level that recovers the economic benefits, if any, derived from the acts that constitute the violation. The bill would require a mandatory minimum penalty of $3,000 to be assessed under prescribed circumstances. The bill would provide that negligence on the part of the state or the United States is not a defense to liability for any discharge caused by the discharger's own negligence. The bill would require the State Water Resources Control Board to report annually to the Legislature regarding its enforcement activities, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 93 (SB 709) Committee on Budget and Fiscal Review. Waste discharge requirements and penalties.

(1) Under existing law, the State Water Resources Control Board and the California regional water quality control boards are among the principal agencies with primary regulatory authority over water quality.

This bill, under specified circumstances, would authorize the state board, a regional board, or a publicly owned treatment works (POTW) to require a discharger subject to its jurisdiction to complete and implement a prescribed pollution prevention plan. The

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

bill would authorize the state board or a regional board to require a POTW to complete and implement a pollution prevention plan with specified components, thereby imposing a state-mandated local program. The bill would authorize the state board, a regional board, or a POTW to require a discharger to comply with the pollution protection plan after providing an opportunity for comment at a public proceeding with regard to that plan. The bill would require a regional board to prescribe effluent limitations as part of the waste discharge requirements of a POTW for specified substances. The bill would authorize a POTW with an approved pretreatment program to conduct specified inspections and assess prescribed penalties.

(2) Existing law subjects any person who violates prescribed provisions of the Clean Water Act or the Porter-Cologne Water Quality Control Act to civil liability, as prescribed.

This bill would require liability to be assessed in connection with a violation of those provisions at a level that recovers the economic benefits, if any, derived from the acts that constitute the violation. The bill would require a mandatory minimum penalty of $3,000 to be assessed under prescribed circumstances. The bill would require the state board to report annually to the Legislature regarding its enforcement activities, as specified.

(3) The bill would specify that certain provisions of the bill prevail over provisions in Assembly Bill 1104.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 94 (AB 676) Brewer. Property taxation: Legislative Analyst: study.

Under existing law, the revenues from property taxes are apportioned to counties based on a specified formula.

This bill would require the Legislative Analyst to prepare a report to the Legislature presenting alternatives for restructuring the property tax allocation system in a manner consistent with specified goals.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 95 (SB 27) Burton. State finances.

(1) Existing law authorizes the Controller to discharge any state agency or employee from accountability for the collection of taxes, licenses, fees, or money if the debt is uncollectible or the amount of the debt does not justify the cost of its collection. Existing law also authorizes a state agency not to collect these moneys if the amount involved is $250 or less and the amount owed is uncollectible or does not justify the cost of collection. The Controller is authorized to adopt rules and regulations to permit state agencies to retain overpayments made to those agencies where a demand for refund is not made within 6 months after the refund becomes due.

This bill would grant this authority to the State Board of Control instead of the Controller.

(2) Under existing law, as set forth in the annual Budget Act, funds are appropriated for the support of various state government entities.

This bill would require, for each of the fiscal years 1999–2000 to 2008–09, inclusive, unless the loan is paid off earlier, that the Controller transfer to the General Fund, from a specified fund, an amount equal to 10% of an amount that was loaned in 1998 to fund certain contributions to the Public Employees Retirement System.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 96 (SB 198) Kelley. Lake Cuyamaca Recreation and Park District: lease agreements.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) The existing Lake Cuyamaca Recreation and Park District Act authorizes the Lake Cuyamaca Recreation and Park District Board, whenever the district board determines, by a $^{4}/_{5}$ vote of its entire membership, that it is necessary to enter into a long-term lease agreement for services or property from any person, firm, or corporation to provide adequate recreational facilities and services within the district, to enter into such a lease agreement for a term not exceeding 40 years if approved by not less than $^{2}/_{3}$ of the voters of the district voting at an election called for that purpose and prescribes procedures for the conduct of such an election. The act further requires the district board, whenever a long-term lease agreement is entered into pursuant to the act, to establish on the records of the district a Lease Agreement Redemption Fund from which all rental or other consideration for the lease shall be paid, and requires the supervising authority of the district to annually levy a special lease agreement tax to be deposited into the fund, as provided. The act prescribes procedures for the execution of lease agreements entered into by the district if the district dissolves by operation of law, as specified.

This bill would eliminate those provisions requiring voter approval for the district board to enter into a long-term lease agreement and prescribing procedures for a district election. The bill would also eliminate those provisions requiring the establishment of a Lease Agreement Redemption Fund and prescribing procedures for the execution of lease agreements entered into by the district if the district dissolves by operation of law.

(2) The existing Mello-Roos Community Facilities Act of 1982 authorizes the formation of community facilities districts, and the issuance of bonds and levying of special taxes thereunder, to finance designated public and utility facilities and services.

This bill would authorize the district to levy a special tax pursuant to that act.

(3) The bill would authorize the District Boards of the Valley-Wide Recreation and Park District and the Coachella Valley Recreation and Park District each to maintain a local checking account or savings account, or both a checking account and savings account, upon approval of the Board of Supervisors of Riverside County, and to transfer funds to those accounts for distribution and payment of ongoing operational expenses, salaries, and debt obligations from accounts that the board of supervisors may establish in the Riverside County Treasury for those districts for those purposes.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 97 (SB 290) Kelley. County water agencies: indebtedness.

(1) The County Water Authority Act authorizes the formation of county water authorities. The act authorizes a county water authority to incur a specified debt by contract and requires, among other things, any proposal to purchase, lease, or otherwise acquire rights, privileges, or services by contract, the compensation of which is payable over a period exceeding 20 years, to be approved by the voters of that authority.

This bill would, instead, require any proposal by a county water authority to purchase, lease, or otherwise acquire rights, privileges, or services by contract, the compensation of which is payable over a period that exceeds 40 years, to be approved by the voters of that authority. The bill would subject a proposal to lease, purchase, or otherwise acquire rights, privileges, or services by contract, the compensation of which is payable over a period that exceeds 20 years but is not more than 40 years, to referendum. By imposing additional duties on local public agencies, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 98 (SB 469) Poochigian. Exempt assets: Roth IRAs.

Existing law provides that, among other assets, specified private retirement plans and individual retirement annuities or accounts are exempt from the enforcement of money judgments, subject to certain conditions and limitations. Existing law provides similar exemptions from the debtor's bankruptcy estate in cases under federal bankruptcy law.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specify that individual retirement accounts known as "Roth IRAs," established and qualified under specified provisions of the Internal Revenue Code of 1968, shall be subject to those exemptions.

Ch. 99 (SB 557) Peace. Highways: relinquishment: State Highway Routes 54 and 144.

(1) Existing law requires the California Transportation Commission to relinquish to any city or county any portion of any state highway within the city or county that has been deleted from the state highway system by legislative enactment. Those relinquishments become effective upon the first day of the next calendar or fiscal year, whichever first occurs after the effective date of the legislative enactment.

This bill would authorize the commission to relinquish to the City of El Cajon a specified portion of State Highway Route 54, upon terms and conditions the commission finds to be in the best interests of the state. The relinquishment would become effective immediately following the commission's approval of the terms and conditions of the relinquishment. The portion of State Highway Route 54 relinquished as specified would cease to be a state highway on the effective date of the relinquishment.

The bill would authorize the commission to relinquish State Highway Route 144, as described, to the City of Santa Barbara, upon a determination by the commission that it is in the best interests of the state to do so, and if the city has agreed to accept the relinquishment. The relinquishment would be made upon terms and conditions approved by the commission and would be effective on the day immediately following the commission's approval of those terms and conditions.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 100 (SB 594) Morrow. Vehicle registration: military spouse exemption.

Under existing law, any nonresident owner of a vehicle registered in a foreign state who is a member of the armed forces of the United States on active duty within this state, and any resident owner of a vehicle registered in a foreign state who is a member of the armed forces of the United States returning from active duty in a foreign state is allowed to operate the vehicle in this state without securing California registration if specified conditions are satisfied.

This bill would extend this exemption to a vehicle owned by the spouse of a member of the armed forces of the United States if the same specified conditions are satisfied.

Ch. 101 (SB 601) Karnette. Transportation: transit districts: purchase contracts: competitive negotiation.

Existing law authorizes certain transit districts, county transportation commissions, and other transportation entities to purchase specified electronic equipment and apparatus, and specialized rail transit equipment by competitive negotiation, as defined, pursuant to specified procedures and limited by certain conditions.

This bill would extend that authority to all transit agencies, as defined, and would expand the authority to include purchasing buses and passenger ferries.

Ch. 102 (SB 634) Kelley. Eminent domain.

Existing law specifies the time period within which various documents must be exchanged in eminent domain proceedings absent an agreement thereto. It also specifies the time period in which the plaintiff must file its final offer of compensation and in which the defendant must file its final demand for compensation.

This bill would revise these time periods, as specified.

Ch. 103 (SB 886) McPherson. Transportation: passenger rail service: Monterey County.

Existing law authorizes the Department of Transportation to enter into contracts with the National Railroad Passenger Corporation under specified provisions of federal law to provide commuter and intercity passenger rail services.

Existing law authorizes the Transportation Agency of Monterey County to contract for the operation of rail service in Monterey County and for connections with rail service in adjacent and neighboring counties and cities.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the agency to be a party to any contract entered into, as specified, between the department and the National Railroad Passenger Corporation for passenger rail service along the San Francisco-San Jose-Monterey corridor.

Ch. 104 (SB 923) Johnston. Urban American River Parkway: in-line skating.

(1) Under existing law, the Urban American River Parkway Preservation Act, the Legislature adopted the American River Parkway Plan, which is composed of specified management plans adopted by the County of Sacramento and the City of Sacramento, so as to provide coordination with local agencies in the protection and management of the diverse and valuable natural land, water, native wildlife, and vegetation of the American River Parkway.

This bill would require the plan to be amended to permit in-line skating on the parkway on a trial basis until January 1, 2001, under any terms and conditions that may be established by the Board of Supervisors of the County of Sacramento and the City Council of the City of Sacramento. The bill would require the Sacramento County Department of Parks and Recreation to monitor the trial period for in-line skating in the parkway and to report its findings to the board of supervisors and the city council. The bill would, if the board of supervisors and the city council determine that the trial period is successful, authorize the addition of in-line skating to the list of permitted recreational uses for the parkway. By imposing new duties on local governments with respect to amending the management plans that serve as the basis of the American River Parkway Plan, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 105 (SB 1286) Mountjoy. Airports: funding: repayment.

Under the State Aeronautics Act, if an airport for which payments have been made from the Aeronautics Account ceases to be open to the general public for more than one year, the public entity to which those payments were made is required to pay to the state, for deposit in the account, an amount computed by the Department of Transportation, as prescribed. The act provides that the computation shall not include certain payments made by the department, if, upon the request of the public entity that owns and operates the airport, the department determines that the airport is not necessary to the system of public airports in this state.

This bill would require the department, when making this determination, to consider various specified factors concerning the airport. The bill would make other technical, nonsubstantive changes.

Ch. 106 (AB 289) Leonard. Vehicle registration.

Existing law generally requires every owner of a vehicle to maintain the registration card with the vehicle for which it is issued, except under certain circumstances.

This bill would make another exception by not requiring the card to be maintained with the vehicle when the vehicle is left unattended.

Ch. 107 (AB 411) Davis. Local planning: housing elements.

Existing law requires every city, county, and city and county to revise the housing element of its general plan as frequently as is appropriate, but not less than every 5 years, to reflect the results of the periodic review of the housing element. Existing law also provides that specified councils of governments shall complete the 3rd and 4th revisions of the housing elements of their general plans by specified dates.

This bill would extend the deadlines by which local governments within the regional jurisdiction of the San Diego Association of Governments are required to complete the 3rd revision of the housing elements of their general plans from June 30, 1999, to December 31, 1999.

The bill would declare that it is to take effect immediately as an urgency statute.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 108 (AB 566) Havice. After School Learning and Safe Neighborhoods Partnerships Program.

Existing law establishes the After School Learning and Safe Neighborhoods Partnerships Program to create incentives for establishing after school enrichment programs for pupils in kindergarten and grades 1 to 9, inclusive, at participating schoolsites. Existing law authorizes a local education agency or a city, county, or nonprofit organization in partnership with a local education agency or agencies to apply to establish a program, and requires the State Department of Education to select participants from among the applicants.

This bill would authorize programs established pursuant to these provisions to be conducted upon the grounds of a community park or recreational area if the park or recreational area is adjacent to the schoolsite.

Ch. 109 (AB 904) Alquist. Transportation: Santa Clara County Transit District: contracting.

Existing law requires the contracts of the Santa Clara County Transit District for the purchase of supplies, equipment, and materials for amounts greater than $25,000 to be let to the lowest responsible bidder, except for purchase contracts for certain electronic equipment and specialized rail transit equipment, which may be awarded by a specified competitive negotiation process.

This bill would authorize the district to let a design-and-build contract, as defined, for any project for a transit center or station, transit park-and-ride lot, bus and light rail maintenance facility, or administrative office building, or any combination of those, upon approval by the board of directors of the district, and as specified.

Ch. 110 (AB 1371) Granlund. Transactions and use tax: Town of Yucca Valley.

Existing law authorizes various local governmental entities, in accordance with certain limitations and approval requirements, to levy transactions and use taxes in accordance with the procedures and requirements set forth in the Transactions and Use Tax Law.

This bill would additionally authorize the Town of Yucca Valley, subject to the approval of $^{2}/_{3}$ of the voters voting on the issue at an election, to levy a transactions and use tax pursuant to the Transactions and Use Tax Law at a rate of 0.25%, or a multiple thereof, not to exceed 1%, for purposes of funding transportation and park repair, replacement, construction, and reconstruction.

This bill would make legislative findings and declarations as to the necessity of a special statute.

Ch. 111 (SB 359) Knight. Peace officers: exemptions: reserve officers.

(1) Under existing law, specified reserve officers have the powers of a peace officer upon compliance with certain conditions that include, among other things, completion of the basic training course for deputy sheriffs and police officers prescribed by the Commission on Peace Officer Standards and Training.

This bill would require that a reserve officer who has previously satisfied specified training requirements and has been serving as a level I or II reserve officer in one law enforcement agency be deemed to remain qualified as to Commission on Peace Officer Standards and Training requirements even though that reserve officer accepts a new appointment at the same level in another law enforcement agency.

(2) Existing law provides exemptions regarding the possession of short-barreled shotguns and short-barreled rifles to regular, salaried, full-time members of a police department, regular, salaried, full-time peace officer members of a police department, and regular, salaried, full-time peace officers who are employed by any of specified law enforcement agencies. These exemptions apply when the peace officer is on duty and the use of these weapons is authorized by the agency and is within the course and scope of his or her duties.

This bill would delete the "regular, salaried, full-time" designation from those provisions and apply the exemptions to any peace officer member of a police department or law enforcement agency, thereby including reserve officers within the exemptions. The bill also would include among the conditions where these exemptions apply the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

completion of a training course in the use of specified weapons certified by the Commission on Peace Officer Standards and Training.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 112 (SB 1163) Ortiz. Security officers.

Existing law establishes various categories of peace officers and other public officers, and specifies their duties and powers.

This bill would provide that a police security officer is a public officer, and not a peace officer, employed by the chief of police of a city whose primary duty is the security of locations or facilities as directed by the chief. These officers would have the authority to carry or possess a firearm, baton, and other safety equipment and weapons, as specified.

Existing law requires each sheriff's security officer to satisfactorily complete a specified course of training within 90 days of assuming his or her duties.

The bill, with respect to a sheriff's security officer completing a specified course of training, would require that the training be completed prior to the officer being assigned to perform his or her duties and would apply this provision to a police security officer.

Ch. 113 (AB 1469) Committee on Public Safety. Punishment: work furlough programs.

Existing law, repealed by its own terms as of January 1, 1999, did all of the following:

(1) Provided procedures that, among other things, authorize a board of supervisors that implements a work furlough program, electronic home detention program, or county parole program, as specified, to prescribe a program administrative fee and an application fee, that includes equipment and supervision costs, to be charged by the administrator based on the prisoner's ability to pay.

(2) Exempted privately operated home detention programs from specified maximum limits on the administrative fee prescribed by the board of supervisors to be paid by each home detention participant.

(3) Required, among other things, the administrator of a work furlough or home detention program, as specified, to ensure that these fee provisions are contained in any contract with a private agency or entity to provide specified program services.

(4) Prohibited the administrator of a program specified in (1) above from considering the prisoner's ability to pay for purposes of granting or denying participation in any of the programs and provided that this provision does not prohibit the administrator from verifying certain information relating to the prisoner's employment.

This bill would reenact these provisions.

Ch. 114 (SB 1248) Johannessen. Residential care facilities for the elderly: terminally ill residents: waiver.

Existing law provides for the licensure and regulation of residential care facilities for the elderly by the State Department of Social Services.

Existing law prohibits any person who requires 24-hour skilled nursing or intermediate care, or who is bedridden, other than for a temporary illness or for recovery from surgery, from being a resident at a residential care facility for the elderly.

Existing law authorizes the waiver of this prohibition to allow a resident who has been diagnosed as terminally ill to remain in the facility when certain requirements are met, including that the resident has resided in the facility for a period of at least 6 months prior to a physician's authorization for hospice services.

This bill would delete the requirement that the resident has resided in the facility for a period of at least 6 months prior to a physician's authorization for hospice services.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 115 (AB 177) Papan. Filing fee surcharge: children's waiting rooms.

Existing law sets forth the total filing fee for filing specified pleadings, motions, and papers in superior court, as specified.

This bill would state that it is the policy of the state that each court shall endeavor to provide a children's waiting room in each courthouse for children whose parents or guardians are attending a court hearing as a litigant, witness, or for other court purposes as determined by the court; and would provide that to defray that expense, in any county

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

having established a children's waiting room or that elects to establish such a service, the board of supervisors may, after giving notice and holding a public hearing on the proposal, impose a surcharge of not less than $2 and not more than $5 for the filing of specified pleadings, motions, and papers in superior court, which surcharge would be in addition to the total filing fee or any other authorized fee, but which shall be required to be paid by a party only once in any action. The bill would also provide for the disposition of such surcharges. These provisions would be repealed on January 1, 2010, unless that date is deleted or extended by later legislation. The bill would also set forth the intent of the Legislature with respect to the use of the surcharge for these children's waiting rooms.

Ch. 116 (AB 947) Lempert. County employees: retirement: benefits.

The County Employees Retirement Law of 1937 authorizes San Mateo County to provide optional safety status for specified probation officers.

This bill would authorize the board of supervisors to adopt the definition of final compensation utilizing the highest year salary.

Ch. 117 (AB 1289) Baugh. Personal income taxes: health insurance deduction.

The Personal Income Tax Law, by reference to specified federal statutes, for taxable years beginning on or after January 1, 1999, allows a deduction for 40% of the amount paid or incurred during the taxable year by a self-employed individual for insurance that constitutes medical care for the taxpayer and his or her spouse and dependents. Existing federal law incrementally increases that deduction to certain percentage rates. Under federal law, a 60% deduction is allowed for taxable years beginning in calendar year 1999 through 2001, a 70% deduction is allowed for taxable years beginning in calendar year 2002, and a 100% deduction is allowed for taxable years beginning in calendar year 2003 or thereafter.

This bill would conform the deduction allowed under the Personal Income Tax Law to the applicable federal percentage of the amount paid or incurred for taxable years beginning on or after January 1, 1999.

This bill would take effect immediately as a tax levy.

Ch. 118 (SB 357) Ortiz. Dissolution of marriage: attorneys' fees.

Existing law requires, upon the commencement of proceedings for dissolution or nullity of marriage or legal separation of the parties, that the summons contain a temporary restraining order restraining both parties from, among other things, transferring, encumbering, hypothecating, concealing, or otherwise disposing of any property, except as specified. This restraining order, however, does not preclude the use of community property for the payment of fees to retain an attorney in the proceeding.

This bill would provide that the restraining order also does not preclude the use of quasi-community property or a party's own separate property for the payment of fees and costs to retain an attorney in the proceeding ; but would require that any party who uses community or quasi-community property or the other party's separate property for that purpose shall account to the community or the other party for that use.

Ch. 119 (AB 594) Cardenas. Real property transfer disclosures: exception.

Existing law exempts transfers by a fiduciary in the course of the administration of a decedent's estate, guardianship, conservatorship, or trust from specified residential real property transfer disclosure requirements.

This bill would provide that this exemption would not apply to a transfer if the trustee is a natural person who is sole trustee of a revocable trust and he or she is a former owner of the property or an occupant in possession of the property within the preceding year.

Ch. 120 (SB 674) Ortiz. Childhood sexual abuse: time of commencing action.

Existing law specifies the time in which an action for recovery of damages suffered as a result of childhood sexual abuse, as defined, must be commenced. Chapter 1032 of the Statutes of 1998, among other things, amended the law to delineate the actions based upon childhood sexual abuse to which these provisions are applicable.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that those amendments shall apply to any action commenced on or after January 1, 1999, and to any action filed prior to January 1, 1999, and still pending on that date, including any action or causes of action which would have been barred by the laws in effect prior to January 1, 1999. However, this provision also declares that it is not intended to revive actions or causes of actions as to which there has been a final adjudication prior to January 1, 1999.

Ch. 121 (SB 1250) Escutia. Restitution.

Under existing law, a person convicted of a crime is required to make restitution to any victim in the amount of the economic losses suffered by a victim as a result of the criminal conduct. Existing law additionally authorizes the victim to enforce the restitution order as a civil money judgment and obtain access to the criminal defendant's financial records and information regarding his or her assets. Additionally, costs incurred under this existing procedure by the victim in attempting to collect under the restitution order are recoverable from the criminal defendant.

Existing law requires the defendant, in any case in which a restitution order may be entered, to prepare and file a disclosure identifying all assets owned or controlled by the defendant as of the date on which the defendant was arrested, as well as other information relating to the defendant's financial resources. This financial disclosure is available to the victim. Existing law also makes it a misdemeanor for any defendant to willfully state, on the required financial disclosure form, any material matter that he or she knows to be false, unless this conduct is punishable as perjury or another provision of law provides for a greater penalty.

Existing law additionally provides that these provisions shall become operative on January 1, 2000, unless an extension of specific provisions of former law is granted by the Judicial Council following an application by the majority of the judges of a court. The extension, with respect to the provisions of former law, may be for any period of time set by the Judicial Council, not exceeding January 1, 2002.

If this procedure is employed, these provisions of former law would require, in lieu of the specific procedures summarized above that would otherwise apply, that a restitution order be fully enforceable by a victim as if the restitution order were a civil judgment, and enforceable in the same manner as is provided for the enforcement of any other money judgment. The former provisions require a victim to have access to all resources available under the law to enforce the restitution order. Also under these former provisions, any portion of a restitution order that remains unsatisfied after a defendant is no longer on probation or parole is enforceable by the victim pursuant to these provisions, victims and the State Board of Control are required to notify the court whenever a restitution order is satisfied, and a restitution order or restitution fine that was imposed pursuant to a specified Penal Code provision by the municipal court or by the superior court in a county where there is no municipal court, may be enforced in the same manner as a money judgment in a limited civil case.

In addition under both former and existing law the court is required to impose a restitution fine and an order of restitution. The fine must be imposed unless no court finds compelling and extraordinary reasons for not doing so, and states those reasons on the record. In addition, the court is required to impose an order of restitution in every case in which the victim suffered economic loss. The amount of the order must be of an amount sufficient to fully reimburse the victim or victims for every determined economic loss incurred as the result of the defendant's criminal conduct, including specified types of expenses. For purposes of this provision, victim is defined to include the immediate surviving family of the actual victim and to include other specified entities.

This bill would specify that mental health therapy expenses are included in the specified expenses to be considered when determining the amount of economic loss for purposes of imposing an order of restitution.

Ch. 122 (AB 1311) Romero. Vehicles: driver's license violations program.

Existing law imposes specified sentencing and fine sanctions upon persons found guilty of violating provisions prohibiting the driving of vehicles without a license, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill, until January 1, 2004, would authorize the district attorneys of certain counties, with the approval of the board of supervisors, to establish a pilot program for persons who plead guilty or no contest or are convicted of violations of specified provisions prohibiting driving without a valid driver's license. Under the program, and subject to the approval of the court, the district attorney would be allowed to enter into a written agreement with a person in a case involving a violation of the specified provisions in which the person would agree to the following, in lieu of the imposition of a county jail sentence: (1) a home detention program utilizing an electronic monitoring program, as specified, for not less than the minimum jail sentence, and not more than the maximum jail sentence, provided for a violation of the specified provisions, and (2) a class or classes relating to driving without a valid driver's license, as specified.

The bill would authorize the district attorney to recover fees for the program from participants or to provide for recovery of fees from participants by a private entity operating the program under contract, subject to a fee schedule and subject to fee modification or waiver based on the participant's financial position. The bill would prohibit a person from being denied participation in the program due to that person's inability to pay for the program.

The bill would require the district attorney of every county that elects to participate in the pilot program to prepare and submit a report to the Legislature concerning that county's participation in the program.

Ch. 123 (AB 671) Campbell. Private Investigator Act: exemption from licensure.

Exiting law requires a private investigator, as defined, engaged in business as a private investigator, to be licensed under the Private Investigator Act.

This bill would expressly exempt from licensure a person or business engaged in conducting objective observations of consumer purchases of products or services in the public environments of a business establishment by the use of a preestablished questionnaire as long as the person or business entity does not engage in any other activity that requires licensure as a private investigator. The bill would permit the questionnaire to include objective comments. The bill would require an employer to provide an employee with a copy of the questionnaire, following specified procedures, if the questionnaire is used as a basis, but not the sole basis, for possible disciplinary action against or discharge of an employee. The bill would require licensure if a questionnaire of the person or business is used as the sole basis for evaluating an employee's work performance.

Ch. 124 (AB 775) Calderon. Workers' compensation: medical care.

(1) Existing law requires an employer to provide health care to injured employees for injuries and diseases compensable under the law relating to workers' compensation. Existing law requires the Administrative Director of the Division of Workers' Compensation to biennially adopt and revise an official medical fee schedule.

This bill would require that a workers' compensation insurer, third-party administrator, or other entity that requires a treating physician to obtain either utilization review or prior authorization in order to diagnose or treat compensable injuries or diseases ensure the availability of those services from 9 a.m. to 5:30 p.m. Pacific coast time of each normal business day. The bill would define normal business day.

(2) Existing workers' compensation law requires an employer to make payment for medical services rendered by an employee's treating physician after receipt of certain required reports, and requires that payment for medical treatment provided or authorized by the treating physician be made by the employer within 60 days after receipt of each separate, itemized billing, together with any required reports.

This bill would refer to payment for medical treatment provided or authorized by the treating physician selected by the employee or designated by the employer. It would also provide that if the billing or a portion thereof is contested , denied, or considered incomplete, the physician shall be notified, in writing, that the billing is contested , denied, or considered incomplete, within 30 working days after receipt of the billing by the employer. The bill would require a notice that a bill is incomplete to state all the additional information required to make a decision.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 125 (AB 1341) Granlund. Land surveying.

Existing law, the Professional Land Surveyors' Act, defines the practice of land surveying for purposes of licensing and regulation, and exempts certain persons, including certain state and local public employees, as specified, from these licensing and regulatory provisions.

This bill would additionally exempt any state, county, city, or city and county public safety employee investigating any crime or infraction for the purpose of determining or prosecuting a crime or infraction. It would also provide that the exemption shall not permit a public safety employee to offer or perform land surveying for any purpose other than determining or prosecuting a crime or infraction.

Ch. 126 (AB 1576) Committee on Health. Children and family health programs.

(1) The California Children and Families First Act of 1998 establishes the California Children and Families First Program, funded by certain surtaxes imposed on the sale and distribution of cigarettes and tobacco products and deposited into the California Children and Families First Trust Fund Account, to be used for the implementation of comprehensive early childhood development and smoking prevention programs. Existing law requires that funds in the account be distributed to those counties that elect to participate in the program by creating county commissions and meeting other criteria.

This bill would rename that program the California Children and Families Program. This bill would also define "relevant county" for purposes of the program.

(2) An initiative measure, the act provides that it may be amended only by a vote of $^{2}/_{3}$ of the membership of both houses of the Legislature and that all amendments to the act shall be to further the act and must be consistent with its purposes.

This bill, in conformance with those requirements, would declare that its provisions further the act and are consistent with its purposes.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 127 (AB 618) Margett. Horse racing: promotional payments.

Existing law generally prohibits a person licensed to conduct a racing meeting from paying any horse owner, or any agent, person, or organization representing horse owners, purses, or any other type of consideration, except as expressly provided in the Horse Racing Law. Existing law likewise prohibits any horse owner, or any agent, person, or organization representing horse owners, from receiving, soliciting, or obtaining these funds. Existing law also defines certain exceptions from these prohibitions, including payments by a fair in connection with promotional contests or sponsorship contributions.

This bill would add an exception to these prohibitions for a payment by a licensed harness racing association in the northern zone, or by any fair, in connection with promotional contests or sponsorship contributions.

Ch. 128 (AB 202) Knox. Firearms.

Existing law regulates the sale of firearms and prohibits the sale of certain specified firearms, but does not otherwise limit the number of firearms that a qualified person may purchase.

This bill would make it a misdemeanor or a felony for any dealer to deliver a pistol, revolver, or other firearm capable of being concealed upon the person following notice from the Department of Justice that, within the preceding 30-day period, the purchaser has made another application to purchase that concealable firearm. The bill also would provide that, except as specified, any person who makes an application to purchase more than one concealable firearm within any 30-day period is guilty of either an infraction or misdemeanor depending upon the number of violations committed by that person. By creating new crimes, this bill would impose a state-mandated local program.

This bill also would make conforming changes to other provisions of law.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 129 (SB 23) Perata. Firearms: assault weapons.

(1) Existing law makes it a misdemeanor for any person to manufacture, cause to be manufactured, import into this state, keep or offer for sale, give, lend, or possess specified weapons and explosives.

This bill would make it a misdemeanor or a felony, beginning January 1, 2000, for any person, except as provided, to manufacture, import into the state, keep or offer for sale, give, or lend any large-capacity magazine. A large-capacity magazine would be defined to mean any ammunition feeding device with the capacity to accept more than 10 rounds. By expanding the definition of, and increasing the penalty for, a crime, this bill imposes a state-mandated local program.

(2) Existing law requires imposition of a longer term of imprisonment on any person convicted of assault with a deadly weapon, and for enhanced terms of imprisonment for a person convicted of a felony, if that person was either armed with, or personally used, an assault weapon or machinegun, as defined, in the commission of, or attempted commission of that felony.

Existing law makes it a crime to engage in specified activities regarding assault weapons and regulates the lawful possession of those weapons. Existing law defines the term "assault weapon" by, among other things, designating a list of specified semiautomatic firearms.

This bill would further define the term "assault weapon" by providing descriptive definitions concerning the capacity and function of the weapon. These expanded definitions would specifically apply to the above-mentioned increased term and enhancement provisions and to related provisions. By expanding the definition of a crime, this bill would impose a state-mandated local program.

(3) Existing law makes it a crime, punishable either as a felony or a misdemeanor, for any person to possess any assault weapon, as defined. However, if a person charged with a first-time violation of that offense presents proof that he or she lawfully possessed the assault weapon within a specified period, and has since registered the weapon or relinquished it, the offense is punishable as an infraction, if the person has also complied with specified conditions. Existing law also provides a period of forgiveness to persons in possession of an assault weapon during a specified period under specified conditions. In addition, existing law exempts specified law enforcement agencies from the prohibition against possession, purchase, or sale of assault weapons.

This bill would make it an infraction, punishable by a fine up to $500, for a first-time violation of the above-mentioned offense, if the offender was found in possession of no more than 2 firearms in compliance with specified provisions and proves that he or she lawfully possessed the assault weapon prior to the date it was defined as an assault weapon under the proposed provision set forth in (2). This bill would also add an additional period of forgiveness for persons in possession of assault weapons, as defined, pursuant to the proposed provision set forth in (2), to extend to the one-year period after the weapon was defined as an assault weapon under that proposed provision. By defining a new crime, this bill would impose a state-mandated local program. The bill would also exempt certain additional off-duty and certain retired law enforcement personnel from the prohibition against possession, purchase, or sale of assault weapons.

(4) Existing law requires any person who lawfully possesses an assault weapon, as defined, prior to specified periods, to register that weapon with the Department of Justice, within a specified period of time.

This bill would require any person who lawfully possessed an assault weapon prior to the date it was defined as an assault weapon pursuant to the proposed provision mentioned in (2) above, to register the weapon within one year of the effective date of that provision.

(5) Existing law requires the Department of Justice to conduct a public education and notification program regarding the registration of assault weapons, the limited forgiveness period of the registration requirement and the consequences of nonregistration.

This bill would require that the public education and notification program include the new definition of assault weapons discussed in paragraph (2) above.

(6) The bill would state legislative intent.

(7) The bill would provide that its provisions are severable.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(8) This bill would incorporate additional changes in Section 12020 of the Penal Code proposed by SB 359, to be operative if SB 359 and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 130 (AB 459) Ackerman. Trust companies: investments.

Existing law authorizes a trust company to invest or reinvest in the securities or other interests of any fund for which the trust company or its affiliate is providing specified investment or management services. The trust company is required to provide written notice to certain persons at least 30 days prior to an initial investment.

This bill instead requires that notice to be provided within 30 days before or after the initial investment.

Ch. 131 (AB 1119) Committee on Budget. Claims against the state: appropriation.

Existing law requires the State Board of Control to report to the Legislature when there is no sufficient appropriation available for the payment of a claim against the state allowed by the board.

This bill would appropriate $1,603,769.45 from various funds, as specified, to the Executive Officer of the State Board of Control to pay claims accepted by the board in accordance with a schedule that identifies various funds and accounts from which the payments are to be made.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 132 (AB 1484) Maldonado. Heritage Ranch Community Services District.

Existing law authorizes the creation of community services districts for the performance of various specified public and utility services.

This bill would grant limited authority to the Heritage Ranch Community Services District to acquire, construct, improve, upgrade, maintain, or operate storage tanks and related facilities to provide petroleum to the district, its inhabitants, and visitors.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 133 (AB 1633) Floyd. School facilities: disabled veteran business enterprises.

Existing law, the Leroy F. Greene School Facilities Act of 1998, among other things, establishes the continuously appropriated 1998 State School Facilities Fund, appropriates money to school facilities funds from which the State Allocation Board may apportion to school districts for school facility purposes.

This bill would require any school district using funds allocated pursuant to the act for the construction or modernization of a school building, to have a participation goal of not less than 3% per year, of the overall dollar amount expended each year to the school district for disabled veteran business enterprises.

Ch. 134 (AB 60) Knox. Employment: overtime.

Existing law provides that 8 hours of labor constitute a day's work unless it is otherwise expressly stipulated by the parties to a contract.

This bill would delete the authority of parties to otherwise expressly stipulate the number of hours that constitute a day's work. The bill would provide that, except for an employee working pursuant to an alternative workweek schedule, as specified, hours worked in excess of 8 hours in one day, hours worked in excess of 40 hours in one workweek, and the first 8 hours worked on the 7th day of work in a given workweek are to be compensated at the rate of no less than 1 $^{1}/_{2}$ times the regular rate of pay of an employee. Under the bill, hours worked in excess of 12 hours in one day as well as hours worked in excess of 8 hours on any 7th day of a workweek are to be compensated at the rate of no less than twice the regular rate of pay of an employee. Employees working

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

pursuant to an alternative workweek schedule under other specified provisions of this bill would be exempt from these requirements.

This bill would make an employer, or other person acting on behalf of an employer, subject to prescribed civil penalties for the violation of prescribed provisions of the Labor Code or provisions regulating hours and days of work of wage orders of the Industrial Welfare Commission. The bill would authorize the Labor Commissioner to issue citations for violations of prescribed provisions of the Labor Code regulating the payment of wages for overtime work and provisions regulating hours and days of work in wage orders of the commission and would prescribe a procedure by which the cited employer or other person may contest the proposed assessment of a civil penalty.

Under existing law, work performed in the necessary care of animals, crops, or agricultural lands is exempt from specified regulation under the above provisions, including the standard for compensation at an overtime rate for work in excess of 8 hours per day.

This bill instead would exempt persons employed in an agricultural occupation, as defined in the wage order of the Industrial Welfare Commission relating to agricultural occupations, with a prescribed exception, from specified regulation under the Labor Code.

Under an existing statute, any employer who intends to use a flexible scheduling technique, as permitted by wage order of the commission, is required to make full written disclosure to the affected employees concerning certain matters of the flexible schedule, as specified. Existing wage orders of the commission specify the rate of overtime compensation required to be paid to an employee for work in excess of 40 hours per week. Other existing provisions of those wage orders provide that no employer is in violation of those overtime provisions if the employees of the employer have adopted a voluntary written agreement that satisfies specified criteria.

This bill would repeal that statute and instead codify the authority of the employees of an employer to adopt an alternative workweek schedule that permits work by affected employees for no longer than 10 hours per day within a 40-hour workweek without the payment to the affected employees of an overtime rate of compensation when approved by at least $^{2}/_{3}$ of the affected employees in a work unit by secret ballot. The bill would provide that an employee working more than 8 hours, but not more than 12 hours, in a day pursuant to an alternative workweek schedule is required to be paid an overtime rate of compensation of no less than 1 $^{1}/_{2}$ times the regular rate of pay of the employee for work in excess of the regular hours established by that schedule and for work in a workweek in excess of 40 hours per week and an overtime rate of compensation of no less than double the regular rate of pay of the employee for any work in excess of 12 hours per day and work in excess of 8 hours on days worked beyond the regularly scheduled workweek under the agreement.

The bill would declare null and void certain alternative workweek schedules adopted pursuant to specified wage orders of the Industrial Welfare Commission.

Existing wage orders of the commission prohibit an employer from employing an employee for a work period of more than 5 hours per day without providing the employee with a meal period of not less than 30 minutes, with the exception that if the total work period per day of the employee is no more than 6 hours, the meal period may be waived by mutual consent of both the employer and employee.

This bill would codify that prohibition and also would further prohibit an employer from employing an employee for a work period of more than 10 hours per day without providing the employee with a second meal period of not less than 30 minutes, with a specified exception.

The bill would provide that, if an employer approves the written request of an employee to make up work time that is lost as a result of a personal obligation of the employee, the hours of that makeup work time, if performed in the same workweek in which the time was lost, may not be counted towards computing the total number of hours worked in a day for purposes of specified overtime requirements, except for hours in excess of 11 hours of work in one day or 40 hours in one workweek. The bill would require an employee to provide a signed written request for each occasion he or she makes that request. The bill would prohibit an employer from encouraging or otherwise soliciting an employee to make that request.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing wage orders of the commission provide that no person employed in an administrative, executive, or professional capacity is required by those wage orders to be compensated for overtime work. Those existing wage orders define an employee as employed in an administrative, executive, or professional capacity if, among other things, the employee is engaged in work that is primarily intellectual, managerial, or creative, and which requires exercise of discretion and independent judgment and the employee receives compensation of not less than a specified amount per month.

This bill would authorize the Industrial Welfare Commission to establish exemptions, with specified limitations, from the requirement that premium pay be paid for overtime work for executive, administrative, and professional employees, provided that the employee is primarily engaged in the duties which meet the test of the exemption and the employee earns a monthly salary equivalent to no less than 2 times the state minimum wage for full-time employment. The bill would require the commission to conduct a review of the duties that meet the test of this exemption and authorize the commission to hold a public hearing, to be conducted no later than July 1, 2000, to adopt or modify regulations relating to duties that meet the test of the exemption without convening a wage board.

The bill would authorize the Industrial Welfare Commission to review, retain, or eliminate exemptions from the hours requirements that were contained in a valid wage order in effect in 1997 and would authorize the commission to establish additional exemptions therefrom for the health or welfare of employees in any occupation, trade, or industry until January 1, 2005.

Under existing law, employment in which the hours of work do not exceed 30 hours in a week or 6 hours in a day are exempt from the general provisions of the Labor Code relating to the hours and days that constitute a workday and a workweek, and related provisions.

This bill would clarify that the exemption applies to the requirements for a day's rest within a period of 7 days of labor and the prohibition against requiring an employee to work more than 6 days in 7.

Existing provisions of the Labor Code contain specific workday and workweek requirements relating to employees of ski establishments, employees of licensed hospitals, and stable employees engaged in the raising, feeding, or management of racehorses. Existing law also exempts employers engaged in specified commercial fishing enterprises from the minimum wage and maximum hour provisions of existing law.

This bill would repeal those provisions as of July 1, 2000.

This bill would require the Industrial Welfare Commission, prior to July 1, 2000, to conduct a review of wages, hours, and working conditions in the ski industry, commercial fishing industry, and health care industry, and for licensed pharmacists, outside salespersons, and stable employees in the horse racing industry. The bill would authorize the commission, based upon that review, to convene a public hearing to adopt or modify regulations at that hearing pertaining to those industries without convening wage boards. The bill would provide that the hearing be concluded by July 1, 2000.

The bill also would require the Industrial Welfare Commission, at a public hearing, to adopt wage, hours, and working conditions orders consistent with this measure without convening wage boards, which orders shall be final and conclusive for all purposes. Additionally, the commission would be authorized to adopt regulations consistent with this measure necessary to provide assurances of fairness regarding the conduct of employee workweek elections, employee disclosures, employee requests to the Labor Commissioner to review designations of work units, and processing of employee petitions as provided for in this measure or under any wage order of the commission.

Additionally, the bill would authorize the Industrial Welfare Commission to adopt or amend orders relating to break periods, meal periods, and days of rest.

Since violation of these provisions would, under existing law, constitute a misdemeanor, the bill would impose a state-mandated local program.

The bill also would make other technical and conforming changes and would declare null and void specified wage orders of the Industrial Welfare Commission relating to these provisions and temporarily reinstate specified prior orders of the commission.

This bill would further require the Industrial Welfare Commission to study the extent to which alternative workweek schedules are used in California with a cost-benefit

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

analysis and to report the results of the study and recommendations to the Legislature by July 1, 2001.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 135 (AB 584) Aroner. East Bay Regional Park District contracts: supplies, materials, and labor.

Existing law authorizes the general manager of a park or open-space district, with the approval of the board of directors of the district, to bind the district, without advertising and without written contract, for the payment for supplies, materials, or labor for new construction of any building, structure, or improvement in an amount not to exceed $25,000 or for any other purpose in an amount not to exceed $10,000.

This bill would, instead, authorize the general manager of a park or open-space district with the approval of the board of directors of the district, to bind the district in accordance with board policy, and without advertising, for the payment for those supplies, materials, or labor in the amounts specified above for new construction of any such building, structure, or improvement, or for any other purpose, and would, with regard to the East Bay Regional Park District increase the maximum amount for all of the above purposes to $25,000.

The bill would make legislative findings and declarations relating to the need for special legislation.

Ch. 136 (SB 11) Schiff. Sexually violent predators.

Under existing law, whenever the Director of Corrections determines that an individual who is in custody, and who is either serving a determinate prison sentence or whose parole has been revoked, may be a sexually violent predator, the director is required to refer the person for evaluation by the State Department of Mental Health. If the State Department of Mental Health determines that the person is a sexually violent predator, the Director of Mental Health is required to forward a request for a petition for commitment to be filed by the county in which the person was convicted of the offense for which the person was committed to the jurisdiction of the Department of Corrections.

This bill would provide that a petition may be filed if the individual was in custody pursuant to his or her determinate prison term, parole revocation term, or hold placed for an evaluation under specified provisions of law at the time the petition is filed, and shall not be dismissed on the basis of a later judicial or administrative determination that the custody was unlawful if the unlawful custody was the result of a good faith mistake of fact or law. This bill would provide that it applies to any petition filed on or after January 1, 1996. This bill would provide that this provision is declaratory of existing law.

This bill would require the Department of Justice, in cooperation with the Youth and Adult Correctional Agency and the State Department of Mental Health, to report certain information to the Legislature on or before January 1, 2002.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 137 (SB 84) Costa. Enterprise zones: expansion areas.

The Enterprise Zone Act provides for the designation of enterprise zones by the Trade and Commerce Agency, according to specified criteria, pursuant to which certain entities within each zone may receive regulatory, tax, and other incentives for economic and employment development and private investment. An enterprise zone located in a city or the unincorporated area of a county may be expanded into an adjacent city or cities if, among other things, the agency finds that specified conditions exist. Among those conditions is that land included within the proposed expansion area must be zoned for industrial or commercial use.

This bill would authorize the inclusion of nonindustrial or noncommercial land under certain conditions. It would, in the case of the Counties of Fresno and Kern, authorize

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the expansion of an enterprise zone located in a city or in the unincorporated area of the county into an adjacent unincorporated area of the county.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 138 (SB 309) Baca. Court security services: San Bernardino County.

(1) Existing law provides for the consolidation of services provided by the sheriff's office and the marshal's office with respect to the courts in San Bernardino County.

This bill would repeal those provisions and would instead authorize the Board of Supervisors of San Bernardino County to commence public hearings regarding the consolidation of court services in San Bernardino County no later than 30 days after the effective date of this bill, concurrent with an advisory election among the judges of the consolidated courts of the county. The bill would also provide that the board of supervisors may elect to abolish the marshal's office in San Bernardino County assigning the duties of court services to the office of the sheriff. If the board of supervisors elects to abolish the marshal's office the duties and staff of the marshal's office would be merged into the sheriff's department. The bill would provide that if the board determines to abolish the marshal's office and transfer the duties of the marshal's office to the sheriff's office, the abolishment of the office and the transfer of those duties must be completed within 30 days of that determination. The bill would also specify the method for the assignment of bailiffs and the employment of personnel of the marshal's office and the sheriff's office following any abolition and consolidation.

(2) Existing law requires, commencing on July 1, 1999, and thereafter, the trial courts of each county in which court security services are otherwise required by law to be provided by the sheriff's department to enter into an agreement with the sheriff's department that was providing court security services as of July 1, 1998, regarding the provision of court security services.

This bill would require, commencing on July 1, 1999, and thereafter, the trial courts of San Bernardino County in which court security was provided by the marshal's office as of July 1, 1998, to enter into an agreement regarding the provision of court security services with the successor sheriff's department if the marshal's office is abolished, thus establishing a state-mandated local program.

However, rather than the above changes, this bill would only make the changes to Section 77212.5 of the Government Code, as proposed by SB 1196, if SB 1196 is enacted and becomes effective prior to this bill.

(3) The bill would state that these provisions constitute necessary special legislation.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 139 (SB 407) Alpert. Medical waste: disposal.

Existing law requires a person generating or treating medical waste to ensure that the medical waste is treated by one of certain methods, thereby rendering it solid waste, as defined, prior to disposal. Existing law permits discharge of medical waste to a public sewage system if the medical waste is liquid or semiliquid and meets other specified conditions.

This bill would revise the conditions required for disposal of medical waste to a public sewage system, including an authorization to treat a medical waste that is a specified type of biohazardous waste by chemical disinfection if certain requirements are met.

Ch. 140 (SB 186) Costa. Low-speed vehicles.

(1) Under existing law, no person may drive, move, or leave standing upon a highway, or in an offstreet public parking facility any motor vehicle unless it is registered and the appropriate fees have been paid under the Vehicle Code, except as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would add to those exceptions a low-speed vehicle, as defined.

(2) Under existing law, the Vehicle Code sets forth provisions governing manufacturers, transporters, dealers, and salespersons of vehicles.

This bill would revise these provisions to make it unlawful and a violation of the Vehicle Code for these persons to sell a low-speed vehicle without disclosing to the buyer the vehicle's maximum speed and the potential risks of driving a low-speed vehicle. Thus, the bill would create a new crime, thereby imposing a state-mandated local program.

(3) Existing law authorizes local authorities to permit golf carts to be used on highways adjacent to a golf course and in real estate developments, as specified.

This bill, for these purposes, would specify that a "golf cart" includes a low-speed vehicle.

(4) Existing law governs the operation of motor vehicles, but does not include provisions specifically governing the operation of low-speed vehicles.

This bill would specify that a low-speed vehicle is subject to all the provisions applicable to a motor vehicle, and that the driver of a low-speed vehicle is subject to all the provisions applicable to the driver of a motor vehicle or other vehicle, when applicable, by the Vehicle Code or any other code, with the exception of those provisions which, by their very nature, can have no application. The bill would make other related changes. In addition, the bill would prohibit the operator of a low-speed vehicle from operating the vehicle on any roadway with a speed limit in excess of 35 miles per hour, except as provided. Because a violation of these provisions would be a crime, the bill would impose a state-mandated local program.

(5) Existing law requires (a) every vehicle that is subject to registration under the Vehicle Code to be equipped at all times with at least one reflector so maintained as to be plainly visible at night from all distances within 350 feet to 100 feet from the vehicle when directly in front of the lawful upper headlamp beams, and (b) every vehicle, other than a motorcycle, that is manufactured and first registered on or after January 1, 1965, under the Vehicle Code, to be equipped at all times, with at least 2 reflectors that are plainly visible at night from all distances specified in (a).

This bill would exempt low-speed vehicles from the provisions specified in (b) above.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 141 (AB 1240) Ashburn. California Central Valley International Trade Center.

Existing law establishes various programs to promote economic and business development.

This bill would declare that it is the intent of the Legislature (1) that the California Central Valley International Trade Center in Tulare County coordinate and work cooperatively with other ongoing international trade efforts in the Central Valley, and (2) that funding for the center for specified purposes be appropriated in the annual Budget Act or in another measure. The bill would make related legislative findings and declarations.

Ch. 142 (AB 1322) Oller. Concealed weapons licenses.

Existing law authorizes the sheriff of a county or the chief or other head of a municipal police department of any city or city and county to issue a license to carry a concealed firearm upon proof of specified criteria, including that the person applying is either a resident of, or spends a substantial period of time in the applicant's principal place of employment or business within, the county or a city within the county when application is made to the sheriff, or the applicant is a resident of the city when application is made to a police chief. Under existing law, a license issued pursuant to these provisions is valid for any period of time not to exceed 2 years from the date of the license, except that if the licensee's place of employment or business was the basis for issuance of the license pursuant to these provisions, the license is valid for any period of time not to exceed 90 days. If the applicant is a judge, court commissioner, or magistrate, the license is valid

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

for any period of time not to exceed 3 years. Existing law also authorizes the sheriff of a county or the chief or other head of a municipal police department of any city or city and county to issue a license to carry a concealed firearm to a person who has been deputized or appointed as a reserve peace officer upon proof of specified criteria. Under existing law, the license is valid for a period not to exceed 4 years from the date of the license but becomes invalid upon conclusion of the person's appointment, if not already expired or invalid under other provisions of law.

This bill would provide, in addition, that a license to carry a concealed firearm issued to a custodial officer who is an employee of the sheriff is valid for any period of time not to exceed 4 years from the date of the license but becomes invalid upon conclusion of the person's employment as a custodial officer, if not already expired or invalid under other provisions of existing law.

Ch. 143 (AB 1459) Wiggins. Agricultural products: processors licensing: fees.

Under existing law, pertaining to the processing of farm products, processors and cash buying processors, as those terms are defined, are required to be licensed and to pay to the Department of Food and Agriculture an annual license application fee in accordance with a specified schedule determined by the annual dollar volume of business based on farm product volumes. The department is required to reevaluate that fee structure in fiscal years 1998–99 and 1999–2000 and to submit a report to the Legislature within 60 days subsequent to June 30, 2000, which shall include, but not be limited to, a summary of the fees paid and services utilized by the various commodity groups covered.

This bill, instead, would require the report to include, but not be limited to, a summary of the fees paid by commodity and dollar volume, an analysis of whether the fee structure is appropriate to overall program revenues, and the volume of services utilized by the major commodity groups covered.

Ch. 144 (AB 1634) Committee on Revenue and Taxation. Taxation: unemployment insurance benefits: wages.

Existing unemployment insurance law requires each employer to file a report of wages paid to his or her workers and to furnish to each employee a written statement showing, among other things, the total amount of wages.

This bill would require the report and statement to include the total amount of wages subject to personal income tax, as provided.

Ch. 145 (AB 846) Ackerman. Uniform Principal and Income Act.

Existing law, the Revised Uniform Principal and Income Act, requires a trust to be administered, as specified, with due regard to the respective interests of defined income beneficiaries and defined remainder beneficiaries.

This bill would repeal these provisions and enact the Uniform Principal and Income Act.

Ch. 146 (AB 1107) Cedillo. Health Care.

Existing law establishes the California Registered Nurse Education Program, within the Minority Health Education Professions Foundation, under which persons from demographically underrepresented groups or persons who agree in writing prior to graduation to serve in an eligible county health facility or a health manpower shortage area, may apply for awards to assist students in completing nursing programs meeting specified standards.

Existing law creates the Registered Nurse Education Fund, to be used for the purposes of this program. This fund contains a $5 assessment, which is collected by the Board of Registered Nursing at the time of the biennial registered nursing licensure renewal.

Under existing law, provisions establishing the California Registered Nurse Education Program and the licensure renewal assessment collected for that purpose would be repealed on January 1, 2000.

This bill would extend the duration of these provisions until January 1, 2003.

Under existing law, the California Early Intervention Services Act, various state departments provide coordinated services to infants and toddlers with disabilities and their families.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, the act will repeal on January 1, 2000.

This bill would indefinitely extend the duration of these provisions.

Existing law establishes various programs administered by the State Department of Health Services to assist minority populations and underserved areas.

This bill would establish the Office of Multicultural Health in the department in order to perform specified functions.

Existing law establishes the Breast Cancer Control Program, which provides early breast cancer detection services for uninsured and underinsured women.

This bill would, until July 1, 2000, establish the Breast Cancer Treatment Program, to be administered by an eligible private nonprofit organization contracting with the State Department of Health Services, for the purpose of providing breast cancer treatment services to uninsured and underinsured women with incomes at or below 200% of the federal poverty level, to the extent funds are available for that purpose.

Existing law requires the Rural Health Policy Council to develop and administer a competitive grants program for health delivery projects in rural areas. Existing law requires the Office of Statewide Health Planning and Development to administer funds appropriated for this purpose by the Budget Act of 1998. Under existing law, these provisions become inoperative on July 1, 1999, and are repealed on January 1, 2000.

This bill would instead require the office to administer funds appropriated for this purpose by any act. This bill would provide that upon appropriation, the funds may be expended in the fiscal year of the appropriation or the subsequent fiscal year. This bill would delete the dates upon which these provisions would become inoperative and be repealed.

Existing law requires the Maternal and Child Health branch of the State Department of Health Services to administer a comprehensive shelter-based services grant program to battered women's shelters.

Existing law requires the department, in implementing this program, to consult with an advisory council which would remain in existence until January 1, 1998.

This bill would extend the date of the existence of this advisory council to January 1, 2003.

Under existing law, persons are required to be immunized against specified communicable diseases prior to admission to daycare institutions or schools. Existing law requires immunization against hepatitis B for all students unconditionally entering or unconditionally advancing to the 7th grade level on or after July 1, 1999.

This bill would require the State Department of Health Services, in consultation with, the Trustees of the California State University, and the Regents of the University of California, to adopt and enforce regulations relating to the immunization of first-time enrollees at the institutions against the hepatitis B virus.

The bill would require, with prescribed exceptions, the Trustees of the California State University, and the Regents of the University of California, to the extent the regents act by resolution to make this bill applicable to the university, require that first-time enrollees who are 18 years of age or younger provide proof of full immunization against the hepatitis B virus, prior to enrollment.

Existing law creates the Healthy Families Program, administered by the Managed Risk Medical Insurance Board, to arrange for the provision of health care services to children older than 12 months and less than 19 years of age who meet certain criteria, including having a gross household income equal to or less than 200% of the federal poverty level, and meeting the citizenship and immigration status requirements established by federal law. Existing law requires families with children participating in the program to pay specified family contribution amounts.

The bill would expand coverage to include families with an annual or monthly household income greater than 200% of the federal poverty level by use of an income disregard provision for income between 200 and 250%, inclusive, of the federal poverty level, and specified Medi-Cal income deductions for income over 250% of the federal poverty level. The bill would modify eligibility under the program to include children less than 12 months of age in a family. The bill would permit a minor to apply for coverage on behalf of his or her child, and on behalf of herself or himself if emancipated or not living with a natural or adoptive parent, legal guardian, or caretaker relative, foster parent, or stepparent. The bill would provide that a child who is a qualified alien, as

NOTE: Superior numbers appear as a separate section at the end of the digests.

defined in federal law and who is otherwise eligible for participation in the program, shall not be denied eligibility based on the child's date of entry into the United States. The bill would not require federal financial participation for qualified aliens in the 1999–2000 budget year, but would require that participation in subsequent fiscal years.

Existing law requires applicants for the Healthy Families Program who apply for the purchasing pool to pay the first month's family contribution to be eligible to participate in the program. Existing law requires subscribers and purchase credit members of the Healthy Families Program to pay monthly contributions. Existing law provides a 4th consecutive month of coverage with no family contribution required if an applicant pays 3 months of required family contributions in advance.

This bill would permit a family contribution sponsor to pay all of the annual required family contributions at the time of application, but would not permit a family contribution sponsor to receive the free months of coverage provided to applicants. The bill would require the Managed Risk Medical Insurance Board to determine who may be family contribution sponsors and to provide a mechanism for sponsorship.

Existing law permits initial treatment, as specified, up to 30 days prior to the effective date of coverage under the Healthy Families Program.

This bill would permit initial treatment up to 90 days prior to the effective date of coverage.

Existing law continuously appropriates money from the Healthy Families Fund for purposes of implementation of the Healthy Families Program.

This bill, by liberalizing various eligibility criteria for participation within this program and thereby covering a new pool of participants, would make the moneys in this continuously appropriated fund available for a new or expanded purpose, and would thereby result in an appropriation.

Existing law, the Robert W. Crown California Children's Services Act, provides for treatment services for physically defective or handicapped persons under the age of 21 years. Existing law limits eligibility to families with an adjusted gross income of $40,000 or less. Existing law requires a family to pay an annual enrollment fee for the California Children's Services program, except as specified. Existing law requires a county expenditure for services to handicapped children of the county, as specified.

This bill would permit children enrolled in the Healthy Families Program who have a California Children's Services program (CCS program) eligible medical condition, and whose families do not meet the financial eligibility requirements of the CCS program, to receive CCS program benefits. The bill would exempt these families from the annual enrollment fee. The bill would waive county expenditures for services to these children, and would make corresponding changes in the Healthy Families Program to require the state to pay the expenditures from designated state and federal funds.

Under existing provisions of the Healthy Families Program, operative until July 1, 2003, the State Department of Health Services, in conjunction with the Managed Risk Medical Insurance Board, the County Medical Services Program board, and the Rural Health Policy Council, may develop and administer up to 5 demonstration projects in rural areas that are likely to contain a significant level of uninsured children, including seasonal and migratory worker dependents, to fund rural collaborative health care networks to alleviate unique problems of access to health care in rural areas through grants to entities that meet the criteria and standards for eligibility established by the State Department of Health Services, in conjunction with the Managed Risk Medical Insurance Board and Rural Health Policy Council.

This bill would require that, subject to appropriation by the Legislature, these grant funds be used for purchasing equipment, making capital expenditures, and providing infrastructure.

The Personal Income Tax Law, by reference to specified federal statutes, for taxable years beginning on or after January 1, 1999, allows a deduction for 40% of the amount paid or incurred during the taxable year by a self-employed individual for insurance that constitutes medical care for the taxpayer and his or her spouse and dependents. Existing federal law incrementally increases that deduction to certain percentage rates. Under federal law, a 60% deduction is allowed for taxable years beginning in calendar year 1999 through 2001, a 70% deduction is allowed for taxable years beginning in calendar year

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

2002, and a 100% deduction is allowed for taxable years beginning in calendar year 2003 or thereafter.

This bill would conform the deduction allowed under the Personal Income Tax Law to the applicable federal percentage of the amount paid or incurred for taxable years beginning on or after January 1, 1999.

Under existing law, the State Department of Developmental Services contracts with regional centers for the provision of services and supports to persons with developmental disabilities.

Existing law requires the department, when approving regional center contracts, to ensure that regional center staffing patterns demonstrate that direct service coordination is the highest priority.

Existing law also requires that these contracts have consumer-to-staff ratios that reflect an overall average of 62 consumers to each staff member.

Existing law also requires that a regional center assign a service coordinator, who shall be responsible for implementing, overseeing, and monitoring each client's individual program plans.

This bill would enact specified regional center service coordinator-to-consumer ratios. It would require, by December 15, 1999, the department to make recommendations to the Legislature regarding the core staffing formula used to allocate operations funding to regional centers, and would require each regional center to provide the department with service coordinator caseload data.

The bill would also require that the regional centers provide the consumer, or where appropriate, his or her parents, legal guardian or conservator or authorized representative, with written notification of any permanent change in the assigned service coordinator within 10 business days.

Under existing law, certain persons with developmental disabilities are placed in state developmental centers operated by the State Department of Developmental Services.

This bill would require the department to develop policies and procedures, by no later than 30 days following the effective date of the Budget Act of 1999, at each developmental center, for the notification of appropriate law enforcement agencies in the event of a forensic client walkaway or escape.

Existing law contains provisions governing rates for community care facilities serving persons with developmental disabilities.

This bill would require that, for the 1999–2000 fiscal year, the rate schedule for these facilities be increased July 1, 1999, based upon the amount appropriated in the Budget Act of 1999 for that purpose, and that effective January 1, 2000, any funds available from cost-of-living adjustments in the Supplemental Security Income State Supplementary Payment for the 1999–2000 fiscal year be used to further increase these rates.

Existing law requires the State Department of Mental Health to identify, from mental health block grant funds provided by the federal government, the maximum amount that federal law and regulation permit to be allocated to cities and counties according to a specified formula.

This bill would authorize the department, in consultation with the California Mental Health Directors Association, to utilize funding from the Substance Abuse and Mental Health Services Administration Block Grant, awarded to the department, above the funding level provided in federal fiscal year 1998, for the development of innovative mental health programs for identified target populations, upon appropriation by the Legislature.

Existing law contains provisions governing placement of persons with developmental disabilities.

This bill would provide that when an individual charged with a violent felony has been committed to the State Department of Developmental Services, due to a finding of incompetency to stand trial, for placement in a secure treatment facility, the department shall give priority to placing the individual at Porterville Developmental Center prior to placing him or her at any other developmental center which has been designated as a secure treatment facility.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which basic health care services are provided to qualified low-income persons.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, a child is eligible to receive Medi-Cal benefits if the child meets certain deprivation requirements.

This bill would revise those requirements, effective March 1, 2000.

Existing law requires the department, not later than July 1, 1998, to create and implement a simplified application package for children, pregnant women, and infants.

This bill would require the department, by July 1, 2000, to create and implement a simplified application package for children, families, and adults applying for Medi-Cal. It would also require the department, by July 1, 2000, to revise the quarterly reporting form for Medi-Cal beneficiaries to be as simple as possible to complete.

Under existing law, counties are responsible for the implementation of eligibility determinations under the Medi-Cal program.

By extending the eligibility for benefits under the Medi-Cal program and modifying the eligibility determination process, this bill would increase the responsibilities of the counties in the administration of the Medi-Cal program, and would result in a state-mandated local program.

Existing law requires the State Department of Health Services to exercise its option under federal law authorizing states to use income and resource methodologies that are less restrictive than the methodologies used under the state plan meeting certain eligibility standards for families with dependent children to expand eligibility under the Medi-Cal program, to the extent federal financial participation is available.

This bill would specify that the department shall exercise that option by exempting all resources, commencing August 1, 1999, if federal financial participation is available.

Under existing California law, any alien who is otherwise eligible for Medi-Cal services, but who does not meet specified requirements relating to residency status, is only eligible for care and services that are necessary for the treatment of an emergency medical condition and medical care directly related to the emergency and for medically necessary pregnancy-related services. However, the federal Personal Responsibility and Work Opportunity Reconciliation Act of 1996 makes any alien who is not a qualified alien, as defined, ineligible for federal public benefits, including medical assistance under the federal medicaid program for assistance other than care and services necessary for the treatment of an emergency medical condition. Federal law also prohibits a state from providing defined state public benefits to certain aliens, unless state legislation is enacted subsequent to the effective date of the act, August 22, 1996.

This bill would provide that any alien who is otherwise eligible for Medi-Cal services, but who does not meet specified requirements relating to residency status, is eligible for medically necessary pregnancy-related services.

Under existing law, counties are responsible for determining eligibility for Medi-Cal benefits. By making certain aliens eligible for Medi-Cal benefits, this bill would increase county responsibilities in making eligibility determinations, and would result in a state-mandated local program.

Under existing state law, certain aliens ineligible for the full scope of Medi-Cal benefits are eligible to receive long-term care benefits.

This bill would provide that any alien who is otherwise eligible for Medi-Cal services, but who does not meet the requirements to receive the full scope of Medi-Cal benefits due to his or her alien status, shall be eligible for long-term care services.

Since the bill would affect the eligibility of persons for programs administered by local agencies and school districts, it would constitute a state-mandated local program.

Existing law, operative until July 1, 2000, provides for the State-Only Family Planning Program, in order to provide family planning comprehensive clinical services to eligible low-income persons.

This bill would indefinitely extend the duration of this program. The bill would also establish a program, within the Medi-Cal program, known as the Family Planning Access, Care, and Treatment (Family PACT) Waiver Program, to provide comprehensive clinical family planning services to any person whose family income is not in excess of 200% of the federal poverty level, to be operational only if a waiver is obtained from the federal government. It would repeal the provisions establishing this program on the first day of the month following 30 days after the date that a written notification is submitted to specified legislative committee chairpersons by the Department of Finance stating that the program is no longer cost-effective.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would also, if this waiver is received for this program, add certain services to those provided under the State-Only Family Planning Program.

The bill would also appropriate $5,000,000 to the State Department of Health Services for purposes of the Partnership for Responsible Parenting Program.

Under existing law, persons who are at least 21 years of age, but who have not attained the age of 65 years, and who are patients in an institution of mental diseases are eligible to receive outpatient services under the Medi-Cal program.

This bill would permit eligible persons to receive ancillary outpatient services regardless of whether federal financial participation is available.

Existing law requires the department to adopt regulations establishing payment rates for nursing facilities.

This bill would require the department, commencing August 1, 1999, to increase the Medi-Cal reimbursement for level A and level B nursing facilities to provide funds for salaries, wages, and benefits increases for direct care staff, as defined, and would require these facilities to provide these increases to their direct care staff.

Existing law also requires the department to adopt regulations setting forth the minimum number of equivalent nursing hours per patient day required in skilled nursing and intermediate care facilities.

The bill would require, commencing January 1, 2000, that the minimum number of actual nursing hours per patient required in skilled nursing facilities be 3.2 hours. It would also require that, commencing January 1, 2000, the minimum number of nursing hours per patient day in skilled nursing facilities be determined without regard to the doubling of nursing hours, as described.

Existing law provides that a party that incurs a forfeiture or a loss in the nature of a forfeiture by reason of failure to comply with an obligation may be relieved from the forfeiture by making full compensation to the other party, except in cases of grossly negligent, willful, or fraudulent breach of duty.

This bill would provide that this relief does not apply to Medi-Cal reimbursement or prior authorization.

Existing law permits the State Department of Health Services, in conjunction with the Managed Risk Medical Insurance Board, to conduct pilot outreach and education projects, through the allocation of grant funds or a competitive process, to entities with experience in serving uninsured children, Medi-Cal beneficiaries, or in providing services to low-income families.

This bill would, instead, require the department, in conjunction with the board, to award contracts to community-based organizations to help families learn about, and enroll in, the Medi-Cal program and the Healthy Families Program, and other health care programs for low-income children.

Existing law establishes the California Children's Services Program, in order to provide services to qualified children with disabilities.

Existing law prohibits, with specified exceptions, and until August 1, 2000, services covered under that program from being incorporated into specified contracts entered into under the Medi-Cal program.

This bill would extend this date until August 1, 2005.

Existing law establishes the continuously appropriated Medi-Cal Medical Education Supplemental Payment Fund for allocation to university teaching hospitals and major nonuniversity teaching hospitals and the continuously appropriated Large Teaching Emphasis Hospital and Children's Hospital Medi-Cal Medical Education Supplemental Payment Fund for allocation to large teaching emphasis hospitals and children's hospitals.

Existing law establishes that the funds are inoperative June 30, 1999, and repealed January 1, 2000.

This bill would extend those dates by a period of one year, and by extending the operative period of a continuously appropriated fund, this bill would make an appropriation.

Existing law provides that one of the services offered under the Medi-Cal program is dental services, subject to utilization controls.

This bill would provide that when entering into contracts with health care service plans that provide comprehensive dental benefits to Medi-Cal beneficiaries on an at-risk

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

basis, the department may require that the health care service plans pay for the costs of the administrative and regulatory oversight required to monitor the contract compliance terms of the agreement with the department.

Existing law, until January 1, 2000, provides for the provision of drugs that are reimbursed through the Medi-Cal program without prior authorization when they are on an approved list of contract drugs.

This bill would extend until January 1, 2001, provisions for the use of a list of contract drugs for purposes of the Medi-Cal program.

Existing law, until January 1, 2000, authorizes the State Department of Health Services to enter into contracts with manufacturers of single-source and multiple-source drugs under the Medi-Cal program, and specifies procedures for the implementation of that authority.

This bill would extend that authority to January 1, 2001.

Under the Medi-Cal program, the State Department of Health Services is required, until January 1, 2000, to take all appropriate steps to ensure that transitional inpatient days are included in the payment adjustment program, as specified.

This bill would extend that requirement until January 1, 2001.

Existing law authorizes Medi-Cal reimbursement, until January 1, 2000, for transitional inpatient care, as defined, in general acute care hospitals and other specified health facilities.

This bill would extend that authorization until January 1, 2001.

Under existing law, the State Department of Health Services is required to evaluate and make recommendations regarding the effectiveness and safety of the transitional inpatient care program, by January 1, 1999.

This bill would instead require that evaluation be made by January 1, 2000.

Under the Medi-Cal program, the department is required to make supplemental payments to certain disproportionate share hospitals based on specified criteria. Payments are made from defined intergovernmental transfers that are paid into the Medi-Cal Inpatient Payment Adjustment Fund, as required, with this fund being continuously appropriated for specified purposes. Existing law authorizes moneys in the fund to be used for transfers to the Health Care Deposit Fund in the amount of $114,757,690 for the 1998–99 fiscal year and each fiscal year thereafter.

This bill would authorize, instead, transfers to the Health Care Deposit Fund in the amount of $84,757,690 for the 1999–2000 fiscal year and each fiscal year thereafter, and would require the department to implement this reduction in a specified manner. By changing the amount of moneys transferred for purposes of the Health Care Deposit Fund from the continuously appropriated Inpatient Payment Adjustment Fund, the bill would result in an appropriation.

Existing law provides that the board of supervisors of a county that contracted with the State Department of Health Services pursuant to a specified provision of law during the 1990–91 fiscal year and any county with a population under 300,000, as determined in accordance with the 1990 decennial census, by adopting a resolution to that effect, may elect to participate in the County Medical Services Program for state administration of health care services to eligible persons in the county.

Existing law provides for the State-Only Family Planning program, under which family planning services are provided to eligible individuals.

This bill would authorize the department, upon reliable evidence of fraud or willful misrepresentation by a provider under these programs, to collect any overpayment identified through an audit or examination from any provider or withhold payment for any goods or services owing to the provider.

The bill would also provide for disenrollment, in accordance with specified limitations, for providers and prohibit enrollment for applicants for provider status, found to have committed fraud or abuse.

Existing law provides that counties and the state shall share the risk for cost increases of the County Medical Services Program not funded through other sources according to specified parameters.

This bill would revise those risk-sharing requirements for the 1999–2000 fiscal year.

Existing law establishes the Community Challenge Grant Program, administered by the State Department of Health Services, in order to provide community challenge

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

grants to reduce the number of teenage and unwed pregnancies. The provisions of this program are operative until July 1, 1999, and would be repealed on January 1, 2000.

Existing law also establishes the State-Only Family Planning Program, in the department, to provide comprehensive clinical family planning services to low-income men and women.

This bill would extend the duration of the Community Challenge Grant Program for one year, but would condition program implementation on receipt of federal financial participation pursuant to a federal waiver received under the State-Only Family Planning Services Program.

Existing law establishes various tobacco use prevention programs funded through moneys derived from the Cigarette and Tobacco Products Surtax Fund and administered by the State Department of Health Services and the State Department of Education.

This bill would make moneys appropriated for purposes of these programs by the Budget Act of 1999 available without regard to fiscal years until July 1, 2002.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 147 (AB 1111) Aroner. Social services.

Existing law authorizes the Director of General Services to acquire facilities currently leased and occupied by the Health and Welfare Data Center at 3301 S Street and at 1651 Alhambra Boulevard in Sacramento through the use of specified debt instruments that may be issued by the State Public Works Board.

This bill would repeal that authority of the director.

Existing law, the Drug Court Partnership Act of 1998, administered by the State Department of Alcohol and Drug Programs, provides for the award of grants to counties that develop and implement drug court programs that meet eligibility requirements. Existing law provides that the grants shall be to provide funding for 4 years, subject to appropriations in the Budget Act.

This bill would revise that provision to categorize grants awarded using funds appropriated in the Budget Act of 1998 and the Budget Act of 1999.

Under existing law, the State Department of Alcohol and Drug Programs is responsible for administering a Drug Court Partnership program for the purpose of demonstrating the effectiveness of drug courts.

This bill would establish the Comprehensive Drug Court Implementation Act of 1999 to be administered by the department to provide grants to counties in which the county alcohol and drug program administrator and the presiding judge in the county develop and submit a specified plan for local drug court systems, based on certain criteria.

The bill would state the intent of the Legislature that it be funded by an appropriation in the annual Budget Act and would provide that 5 percent of any amount appropriated is available to the department and the Judicial Council to administer the program.

Existing law permits the Department of Justice to charge a fee to cover the costs of services relating to the provision of criminal background information on operators, managers, and certain employees, of day care facilities.

This bill would, commencing January 1, 2000, prohibit that department and the State Department of Social Services from charging a fee for the processing of fingerprints, with certain exceptions, when funds for those purposes are appropriated for that purpose in the annual Budget Act.

Existing law establishes, until January 1, 2002, the Employment Training Fund, into which are deposited unemployment insurance contributions from employers, levied and collected at a specified rate, for the purpose of funding, subject to appropriation by the Legislature, employment training programs administered by the Employment Training

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Panel. Existing law authorizes the Legislature to appropriate from the fund $20,000,000 in the Budget Act of 1997 and $20,000,000 each year thereafter for training programs designed for workers who are current or recent recipients of benefits under the CalWORKs program pursuant to a specified provision of law.

This bill would repeal the authority of the Legislature to appropriate from the fund $20,000,000 each year after the Budget Act of 1997 for those purposes, and would instead authorize the Legislature to appropriate $5,000,000 in the Budget Act of 1999 for those purposes. This bill would also authorize the Legislature to appropriate from the fund $30,000,000 in the Budget Act of 1999 to fund the local assistance portion of welfare-to-work activities under the CalWORKs program, as specified.

Existing law, operative until August 7, 1999, provides that an eligible individual who has been laid off from work or who is unable to commence work as a direct result of the freezing weather conditions in December 1998, as specified, shall be considered "unemployed" for the purpose of eligibility for unemployment compensation benefits if for any week of less than full-time work, the wages payable to the individual for that week, when reduced by $200, do not equal or exceed the individual's unemployment weekly benefit amount, and the individual resides in a county that has an unemployment rate in excess of 13% and that is covered under the terms of Order 1267-DR of the federal Emergency Management Agency relative to the freezing weather of December, 1998.

This bill would revise that limitation to eliminate the requirement that the county of residence has an unemployment rate in excess of 13%.

Existing law provides that unemployment compensation benefits are paid from the Unemployment Fund, a continuously appropriated special fund. By expanding benefits payable from the fund, this bill would make an appropriation.

Existing law specifies methods by which the Multipurpose Senior Services Program may be expanded.

This bill would revise those methods.

Existing federal law establishes the Independent Living Program for foster youth to be administered by counties with federal and state funds.

This bill would require, on or before July 1, 2000, the State Department of Social Services, in consultation with county and state representatives, foster youth, and advocates, to develop statewide guidelines for the implementation of the federal Independent Living Program, and define the outcomes for the program and the characteristics of foster youth enrolled in the program for data collection purposes.

The bill would also require each county department of social services to include in its annual Independent Living Program report certain information relating to federal and state funds allocated for implementation of the program and other information relating to characteristics of foster youth. The imposition of these new requirements on counties would create a state-mandated local program.

Existing law provides for the California Work Opportunity and Responsibility to Kids (CalWORKs) program, under which each county provides cash assistance and other benefits to qualified low-income families. Each county is required to pay a share of the cost of both aid grant and administrative costs for the CalWORKs program.

Existing law establishes a schedule for the payment of cash assistance benefits under the CalWORKs program, including the payment of a nonrecurring special need payment of $30 a day for the costs of temporary shelter, and certain other homeless assistance benefits.

This bill would increase that special need payment to $40 per day. This bill would revise time limitations on receipt of certain homeless assistance benefits, and would authorize a county to require that a recipient of certain homeless assistance benefits who qualifies for benefits under specified circumstances a second time in a 24-month period shall participate in a homelessness avoidance case plan as a condition of eligibility for homeless assistance benefits.

Existing law, the Kinship Guardianship Assistance Payment (Kin-GAP) Program, operative on July 1, 1999, provides for financial assistance to children who, after being adjudged dependent children of the juvenile court, are placed in legal guardianship with a relative, at specified rates, and requires the State Department of Social Services to adopt emergency regulations to establish and administer, and apply for any necessary federal waivers to implement and any available federal funds for, the program. Existing

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

law allocates the costs of the program, less available federal funds, equally between the state and the counties and continuously appropriates money from the General Fund for allocation to counties for the state's share of the costs.

This bill would delay the operative date of the Kin-GAP Program to January 1, 2000.

The bill would exclude income to the child from the Kin-GAP program from consideration of income to the kinship guardian for purposes of determining the kinship guardian's eligibility for other aid programs, unless required by federal law.

Existing law provides for the determination of eligibility for aid under the continuously appropriated CalWORKs program, on the basis of assistance units, and specifies that every assistance unit shall include an eligible child, the caretaker relative of an otherwise eligible child who is not otherwise receiving CalWORKs benefits because he or she is receiving benefits under the federal program for benefits for aged, blind, or disabled or foster care payments.

This bill would specify that for children receiving Kin-GAP payments, there shall be paid, under the CalWORKs program, an amount of aid equal to the rate specified for children under the Kin-GAP program.

This bill would include the caretaker of a child who is not receiving CalWORKs aid because the child is receiving Kin-GAP payments within the scope of those persons who are included in the CalWORKs assistance unit.

Existing law continuously appropriates money for the CalWORKs program, and, by revising standards of eligibility for aid under the CalWORKs program, this bill would increase the amount continuously appropriated for the program and would result in an appropriation.

The existing provisions of the Kin-GAP program limit the rate paid under that program to not more than 85% of the AFDC-FC rate.

This bill would revise that rate to equal the rate for children placed in a licensed or approved home under the AFDC-FC program. By revising the rate of payment under the Kin-GAP program, this bill would, to the extent it increases the amount continuously appropriated for the program, therefor result in an appropriation.

This bill would authorize the State Department of Social Services to exempt children in receipt of Kin-GAP benefits from any CalWORKs requirement so long as the exemption would not jeopardize federal financial participation in the payment.

The bill would impose reporting requirements on the department regarding Kin-GAP Program outcomes.

Because this bill would create new duties for county agencies in the administration of the Kin-GAP program, it would impose a state-mandated local program.

Existing law under the Aid to Families with Dependent Children–Foster Care (AFDC-FC) program provides a schedule of reimbursement rates for group homes and foster family agencies, and for payments on behalf of a child living with a parent who receives foster care benefits.

This bill would revise the schedule of reimbursement rates.

Because state funds are continuously appropriated to pay for a portion of county costs under the AFDC-FC program, the bill would constitute an appropriation.

Existing law provides for the State Supplementary Program for the Aged, Blind, and Disabled (SSP), which requires the State Department of Social Services to contract with the United States Secretary of Health and Human Services to make payments to SSP recipients to supplement supplemental security income (SSI) payments made available pursuant to the federal Social Security Act.

Existing law requires that, to the extent permitted by federal law, the state SSP payment schedules in effect on June 30, 1995, as adjusted, shall be decreased for certain counties by 4.9% in order to reflect regional variations in housing costs.

This bill would repeal that requirement.

Because state funds are continuously appropriated to pay for SSP grant costs, the bill would constitute an appropriation.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Existing law provides that, except to the extent required by federal law, if, as of May 15, 1999, the projected costs for the 1998-99 fiscal year for outpatient drug abuse services,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

as described, exceed $45,000,000 in General Fund moneys, outpatient drug free services, as defined in state regulations, shall not be a Medi-Cal benefit as of July 1, 1999.

This bill would, instead, provide that if, as of May 15, 2000, the projected costs for outpatient drug abuse services exceed $45,000,000 for that fiscal year, outpatient drug free services shall not be a benefit as of July 1, 2000.

This bill would enact provisions relating to funding for perinatal and other Medi-Cal services.

Existing law requires the department, through September 1999, to make child support incentive payments to counties that meet specified requirements.

This bill would specify the manner in which funds appropriated for that purpose may be allocated.

Existing law specified the allocation of funds appropriated in the Budget Act for counties for the support of administrative activities undertaken by the counties to provide CalWORKs benefits.

This bill would, commencing with the 2000–01 fiscal year, revise the method of allocating those funds, would require the State Department of Social Services and the County Welfare Directors Association to develop the specific components of the budget methodology, and would require the Welfare Reform Steering Committee to review the efficacy of the proposed methodology and make recommendations for modifications to the methodology.

Existing law authorizes adult protective services to include investigations, needs assessment, the use of a multidisciplinary personnel team in order to obtain information and records necessary for adult protective services, a system in which reporting can occur on a 24-hour basis, emergency shelter, and adult respite care. Existing law also specifies the members of the multidisciplinary personnel team.

Existing law also requires the provision of enhanced adult protective services provisions that, commencing with the 1999–2000 fiscal year, to be implemented only to the extent funds for this enhancement are provided in the annual Budget Act, and requires adult protective services to include the above protective actions, and requires each county to establish an emergency response adult protective services program.

This bill would specify that the investigation of allegations of elder and dependent abuse under the enhanced adult protective services program and the case management of elder and dependent adult abuse cases shall be performed by county merit system civil service employees, and would authorize a county adult protective service agency to use contracted telephone answering service after normal working hours and on weekends and holidays.

Because this bill would create new duties for county agencies in the administration of the enhanced adult protective services program, it would impose a state-mandated local program.

Existing law requires the Office of the State Foster Care Ombudsperson to perform various functions and duties with respect to providing children who are placed in foster care with a means to resolve issues related to their care, placement, or services.

This bill would authorize the office to establish, in consultation with a committee of interested individuals, regional or local foster care ombudsperson offices for the purposes of expediting investigations and resolving complaints.

Existing law requires each county to provide child welfare services to children in foster care.

This bill would require the State Department of Social Services to establish a program of public health nursing in the child welfare services program.

Existing law, operative until July 1, 2000, requires the State Department of Social Services to establish a food assistance program for certain immigrants residing in this state.

Existing law, operative until July 1, 2000, requires the department to establish and supervise a county-administered program to provide cash assistance to aged, blind, and disabled legal immigrants who are noncitizens.

This bill would extend indefinitely, and revise eligibility and application requirements for, these programs.

Because each county is required to administer this program, the bill would constitute a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would include a battered immigrant spouse, child, or parent or child of a battered immigrant or a Cuban or Haitian immigrant within the scope of those persons who are eligible for state food assistance benefits.

Existing law provides a formula for the allocation of funding to independent living centers for individuals with disabilities.

This bill would revise and recast the method of calculating and allocating that funding.

Existing law provides for a State Independent Living Advisory Council.

This bill would rename the council to be the State Independent Living Council.

Existing law establishes the Habilitation Services Program administered by the Department of Rehabilitation, under which supported employment and other services are provided to persons with developmental disabilities. Under existing law, provisions relating to the submission and approval of proposals for funding of those services would be repealed on January 1, 2000.

This bill would extend those provisions for one year. This bill would also revise the rate setting provisions of the program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 148 (SB 708) Committee on Budget and Fiscal Review. Human services.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

Under legislation pending before the Governor, the department would be required, commencing August 1, 1999, to exercise a state option allowable under federal law governing the Medi-Cal program to exempt all resources from inclusion in determining Medi-Cal eligibility, if federal financial participation is available.

This bill would eliminate this requirement.

Legislation pending before the Governor provides that ancillary outpatient services shall be provided to any eligible individual aged 21 years or over, but who has not yet attained the age of 65 years, and who resides in an institution for mental diseases, regardless of the availability of federal financial participation.

This bill would repeal this provision on July 1, 2000.

Legislation pending before the Governor contains provisions relating to eligibility for long-term care services for certain aliens under the Medi-Cal program.

This bill would also repeal and reenact eligibility requirements for those services.

The bill would appropriate $600,000 from the General Fund, and $600,000 from the Federal Trust Fund to the State Department of Health Services for increased Medi-Cal fraud prevention activities.

Existing law, operative until July 1, 2000, requires each county to operate a county-administered program to provide cash assistance to aged, blind, and disabled legal immigrants who are noncitizens.

Legislation pending before the Governor would indefinitely extend this program and would revise eligibility requirements.

This bill would further revise eligibility requirements for this program.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 149 (SB 308) Escutia. Nurses.

Existing law authorizes the Board of Registered Nursing to establish fee schedules in connection with the issuance of licenses for registered nurses, not to exceed certain amounts. These provisions authorize a biennial fee to be paid upon the filing of an application for renewal of the license for registered nurses. Existing law authorizes a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

separate additional $5 assessment at the time of the biennial licensure renewal. This latter provision is repealed as of January 1, 2000.

This bill would delete the repeal of the provisions authorizing the imposition of the $5 separate assessment at the time of the biennial licensure renewal, thereby extending that authority indefinitely.

Existing law requires the Office of Statewide Health Planning and Development to establish the Minority Health Professions Education Foundation and prescribes the powers of the foundation, to include soliciting and receiving funds from various entities for the purpose of providing financial assistance in the form of scholarships or loans to students from various underrepresented minority groups, as defined.

Existing law establishes within the office a Minority Health Professions Education Fund, a continuously appropriated fund, to provide scholarships and loans to students from underrepresented minority groups who are accepted to or enrolled in schools of medicine, dentistry, nursing, or other health professions, and to fund the Geriatric Nurse Practitioner and Clinical Nurse Specialist Scholarship Program. Existing law authorizes the foundation to recommend to the director the disbursement of private sector moneys deposited in the fund.

This bill would rename the Minority Health Professions Education Foundation and the Minority Health Professions Education Fund as the Health Professions Education Foundation and the Health Professions Education Fund, respectively. The bill also would delete references to "underrepresented minority groups" and refer instead to "underrepresented groups," as defined, for these purposes.

Existing law establishes within the Minority Health Professions Education Foundation, the Registered Nurse Education Program which provides procedures under which persons either from demographically underrepresented groups or who agree in writing prior to graduation to serve in an eligible county health facility or a health manpower shortage area, as defined, may apply for awards under the program. Existing law requires the foundation to solicit the advice of representatives of certain organizations and entities in developing the program.

This bill would restrict participation in the program to persons who agree in writing prior to graduation to serve in an eligible county health facility or a health manpower shortage area. The bill would require the foundation to solicit the advice of representatives who reflect the demographic diversity of California in developing the program.

Under existing law, the Registered Nurse Education Program and the Geriatric Nurse Practitioner and Clinical Nurse Specialist Scholarship Program would be repealed on January 1, 2000.

This bill would delete those repeal dates, thereby extending those programs indefinitely.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 150 (SB 35) Baca. Court fees.

Existing law authorizes a surcharge on civil filing fees of up to $50, as specified by the board of supervisors, with respect to actions filed in the municipal or superior court in the City and County of San Francisco, to be used solely for courthouse construction and renovation, as specified, and authorizes a similar surcharge on certain civil filings in superior court in Riverside County to be used for specified courthouse construction purposes.

This bill would authorize a similar surcharge of no more than $35 on specified civil filing fees in the Superior Court of San Bernardino County to be used for courthouse construction, as specified.

Ch. 151 (SB 819) Sher. El Camino Hospital District.

Existing law, the Local Health Care District Law, provides for the formation of local health care districts, and authorizes a district to transfer, at fair market value, any part of its assets to one or more corporations to operate and maintain the assets, subject to certain requirements, including the approval of a majority of the voters of the district in certain circumstances. Existing law also authorizes the transfer of a district's assets, for

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the benefit of the communities served by the district, in the absence of adequate consideration, subject to certain requirements.

This bill would impose similar requirements on the transfer of assets by El Camino Hospital, a nonprofit public benefit corporation that owns and operates El Camino Hospital pursuant to a transfer of assets from the El Camino Hospital District under the above-described provisions. This bill would declare that, due to the unique circumstances applicable to El Camino Hospital, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

Ch. 152 (SB 196) Brulte. School finance.

(1) Existing law requires any amounts received by a county superintendent of schools for revenue limit purposes from the average daily attendance of pupils enrolled in community schools to be expended only for community school purposes. Existing law requires any county superintendent of schools operating county juvenile court schools, county group home and institutions schools, or community schools to maintain an account in their general fund, known as the juvenile court and community school account, and to deposit all funds derived from these programs in that account for expenditure for specified related purposes.

This bill would require that any amounts received by a county superintendent of schools for revenue limit purposes from the average daily attendance of pupils enrolled in community schools to be expended only for the same purposes as authorized for expenditure from the juvenile court and community school account.

(2) Existing law enacted in 1998 reappropriated $3,030,000 from the Proposition 98 Reversion Account to the Superintendent of Public Instruction.

This bill would increase this amount to $3,100,000 by appropriating $70,000 to the Pasadena Unified School District for support of the Pasadena Youth Center.

(3) Existing law appropriates $16,969,000, without regard to fiscal year, from the General Fund to the Superintendent of Public Instruction to implement the model budget and accounting systems. In order for a school district or county office of education to receive funds for this purpose, the school district or county office of education is required to request disbursement and the request is required to be received by the State Department of Education by June 30, 1999.

This bill would change the date that the request is required to be received by the State Department of Education to September 30, 1999.

(4) Existing law enacted in 1997 appropriates $2,000,000 from the General Fund to the State Department of Education, in augmentation of the appropriations made in the Budget Act of 1997, for allocation to school districts for home-to-school transportation. Existing law requires the Superintendent of Public Instruction, in allocating that amount, to give highest priority to districts that have both (1) a total cost per mile for the 1996–97 fiscal year for home-to-school transportation of between 100% and 115% of the statewide average cost and (2) either weather-related conditions, or terrain-related conditions, that vary substantially from those of other districts that the superintendent determines may be classified as high-impact, high-efficiency districts.

This bill would make an appropriation by requiring the Superintendent of Public Instruction to allocate funds from the appropriation for home-to-school transportation first to school districts that both (1) have a total cost per mile for the 1996–97 fiscal year for home-to-school transportation that exceeds the statewide average cost per mile, rather than a cost between 100% and 115% of the statewide average cost, and (2) weather-related or terrain-related conditions, without regard to whether the districts may be classified as high-impact, high-efficiency districts. Following this allocation, if funds remain, the bill would require the Superintendent of Public Instruction to augment funding allocated to school districts eligible for a supplemental apportionment for home-to-school transportation for reasons other than weather-related or terrain-related conditions. The bill would require that the appropriation be included in the amounts appropriated by the state in the 1997–98 fiscal year for the purpose of meeting the state's minimum funding obligation to school districts and community college districts under Section 8 of Article XVI of the California Constitution for that

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

fiscal year. The bill would also delete language stating that this appropriation is in augmentation of appropriations made in the Budget Act of 1997.

(5) Existing law enacted in 1996 appropriates $4,000,000 to the Superintendent of Public Instruction for the purpose of establishing the Discovery Science Center in Orange County for the 1996–97 fiscal year. Existing law requires the center to be an 80,000 square foot, hands-on, interactive learning facility.

This bill would instead require the Discovery Science Center to be up to 80,000 square feet in area.

(6) To the extent that the funds appropriated by this bill are allocated to a school district or a community college district, those funds would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

(7) Existing law appropriates funds in the Budget Act of 1997 for adult education and remedial education services for participants in the Greater Avenues for Independence (GAIN) program.

This bill would reappropriate the unencumbered balance as of June 30, 1999, of the funds appropriated in the Budget Act of 1997 for those identified programs for allocation on a one-time basis for the purpose of providing school districts an opportunity to apply for additional authorized units of adult education average daily attendance to support the development of site information systems.

(8) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 153 (SB 544) Karnette. School district reorganization: Palos Verdes Peninsula and Los Angeles Unified School Districts.

Existing law requires each person subject to compulsory full-time education to attend the school in which the residency of either the parent or legal guardian is located, subject to specified exceptions.

Existing law, commencing with the 1999–2000 school year, makes the area of Eastview in Los Angeles County, which is currently part of the Los Angeles Unified School District, an optional attendance area by authorizing parents and legal guardians who reside in that area to make an election for each pupil when the pupil enters elementary school and middle school as to whether that pupil will attend schools in the Palos Verdes Peninsula Unified School District or the Los Angeles Unified School District.

The bill would clarify that those provisions are applicable to all pupils who reside in the area of Eastview in Los Angeles County regardless of whether the pupil previously attended a private school. It would revise the procedure for making an election as to which school district the pupil will attend.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 154 (SB 1068) Escutia. School districts: year-round schools: grant program.

Existing law establishes the Year-Round School Grant Program to provide financial assistance to school districts operating or implementing multitrack year-round educational programs.

This bill would require the State Department of Education to conduct a study of the grant program to develop an equitable method of phasing out the program over a multiyear period. The bill would require the department to complete the study and present its findings to the Legislature on or before July 1, 2000.

Ch. 155 (SB 97) Burton. Health facilities.

Existing law provides for the licensure of health facilities, as defined, by the State Department of Health Services. Under existing law, violation of those licensing provisions, or willful or repeated violation of the related rules or regulations, is a misdemeanor.

Existing law prohibits certain health facilities, known as long-term health care facilities, from discriminating or retaliating against a patient or employee of those long-term health care facilities because the patient or employee presents a grievance or complaint, or initiates or cooperates in an investigation or proceeding by a governmental entity, relating to the care, services, or conditions at those long-term health care facilities,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

except as provided. Existing law makes violation of this prohibition subject to a civil penalty of not more than $10,000.

Existing law provides that discriminatory treatment of an employee, as described, or discriminatory treatment of a patient, within specified time periods of that patient's or employee's presentation of a grievance or complaint, or initiation or participation in an investigation or proceeding, raises a rebuttable presumption that the discriminatory action was retaliatory. Existing law provides that willful violation of this provision is an infraction punishable by a fine of not more than $10,000. Existing law provides that a person who has been discriminated against under these provisions is entitled to specified remedies.

This bill would impose similar prohibitions on health facilities other than long-term health care facilities, except that violation would be subject to a civil penalty of not more than $25,000 and willful violation would be a misdemeanor punishable by a fine of not more than $20,000. By creating a new crime, this bill would impose a state-mandated local program.

The bill would prohibit its provisions from applying to an inmate of a state correctional facility or an inmate housed in a local detention facility.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 156 (AB 1412) Wildman. Public employees.

Under the Reporting of Improper Governmental Activities Act, a state employee is prohibited from using his or her authority or influence to intimidate, threaten, coerce, or command any person for the purpose of interfering with the right of that person to disclose an improper governmental activity to the State Auditor.

This bill would prohibit any state or local governmental employee from interfering with the right of any person to disclose an improper governmental activity to an investigating committee of the Legislature.

Ch. 157 (AB 1483) Granlund. Public employees: peace officers: employee organizations.

Existing law grants certain peace officers a right to be represented by a group composed entirely of other peace officers. This provision has been interpreted to apply only to those persons designated as peace officers under specified sections of the Penal Code at the time the provision was amended in 1971.

This bill would provide that, for the purposes of the above provision and for San Bernardino County only, no distinction shall be made between a position designated as a peace officer position at the time of the enactment of the 1971 amendments to this provision, and a welfare fraud investigator or inspector position designated as a peace officer position at any time after the enactment of the 1971 amendments to this provision.

Ch. 158 (SB 50) Johnson. Political Reform Act of 1974: campaign statements.

Under the existing Political Reform Act of 1974, specified elected officers, candidates, and committees are required to file campaign statements that cover campaign activity occurring during certain time periods of an election campaign.

This bill would require candidates for elective office being voted upon at a statewide direct primary election held in March of an even-numbered year and any other election held on the same day as that election, their controlled committees, certain general purpose committees primarily formed to support or oppose those candidates, and certain slate mailer organizations to file certain campaign statements on specified dates. The bill also would establish dates for filing primary election campaign statements for the March election period.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing these criminal penalties on persons who violate the provisions of the bill.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^{2}/_{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^{2}/_{3}$ vote.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 159 (SB 380) Haynes. Republican Party National Convention: selection of delegates.

Existing law provides procedures relating to the selection of delegates by the Republican Party to the party's national convention.

This bill would make those provisions applicable to the selection of delegates to the Republican Party National Convention to the extent that the constitution, bylaws, and rules of the Republican Party do not provide otherwise. The bill would require the California Republican Party to notify the Secretary of State of material changes in the constitution, bylaws, and rules of the Republican Party relating to selection of delegates to the Republican Party National Convention.

Under existing law, a new Republican county central committee is elected in each county at each statewide direct primary election. Under existing law, members of the county central committees are elected from supervisor districts or Assembly districts and continue to serve until the election and qualification of the members of the new county central committees.

This bill would require, commencing with the March 7, 2000, statewide direct primary election, except for the County of Orange, that members of Republican county central committees elected from odd-numbered Assembly districts be elected for terms ending on the 2nd statewide direct primary election following that election and that members from even-numbered Assembly districts be elected for terms ending on the first statewide direct primary election following that election. After the March 7, 2000, election, the bill would require that members of those Republican county central committees be elected at every 2nd statewide direct primary election to replace members whose terms are expiring. This bill would authorize a county central committee member to run at the next election in a renumbered district even though his or her term has not expired, when district boundaries are redrawn and renumbered in accordance with the decennial census.

This bill would provide that members of the Republican county central committees may serve after the expiration of their terms until the election and qualification of the new members replacing them on the committees.

Existing law requires a Republican county central committee to take specific actions at its first organizational meeting.

This bill would require, after each election, an organizational or reorganizational meeting to take place within 30 days after new county central committee members receive certificates of election.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 160 (SB 558) Baca. County employee retirement benefits.

The County Employees Retirement Law of 1937 provides that the development of heart trouble by specified safety members shall be presumed to arise out of and in the course of employment.

This bill would prescribe a similar presumption in the case of the development of cancer by a safety member, firefighter member, or member active in law enforcement, which presumption would extend beyond the termination of services, as specified.

Ch. 161 (SB 670) Rainey. County employees retirement: death benefits.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The County Employees Retirement Law of 1937 contains alternative death benefits provisions that are operative in any county when adopted by a majority vote of the board of supervisors.

This bill would make those provisions operative by a majority vote of the board of retirement of any county.

Ch. 162 (SB 434) Johnston. Charter schools.

(1) Existing law, the Charter School Act of 1992, permits teachers and parents to petition the governing board of a school district to approve a charter school that would operate independently from the existing school district structure.

This bill would require a charter school to offer, at a minimum, a specified number of minutes of instruction for the appropriate age levels, to maintain written, contemporaneous records that document all pupil attendance and to make these records available for audit and inspection. The bill would require a charter school to certify that its pupils have participated in the state testing programs in the same manner as other pupils attending public schools as a condition of apportionment of state funding. The bill would also require a charter school that provides independent study to comply with statutory requirements and implementing regulations adopted thereunder that relate to independent study. The bill would require the State Board of Education to adopt regulations that apply these provisions to charter schools, including regulations that concern the qualifications of instructional personnel. The new requirements for charter schools described in this paragraph would impose a state-mandated local program.

(2) Existing law prohibits a local education agency from claiming state funding for the independent study of a pupil, whether characterized as home study or otherwise, if the agency has provided any funds or other thing of value to the pupil or his or her parent or guardian that the agency does not provide to pupils who attend regular classes or to their parents or guardians.

This bill would make this prohibition applicable to charter schools and would prohibit a charter school from claiming state funding for the independent study of a pupil, whether characterized as home study or otherwise, if the charter school has provided any funds or other thing of value to the pupil or his or her parent or guardian that a school district could not legally provide to a similarly situated pupil of the school district or to his or her parent or guardian.

(3) Existing law requires community school and independent study average daily attendance to be claimed by school districts and county superintendents of schools only for pupils who are residents of the county in which the apportionment claim is reported or pupils who are residents of a county immediately adjacent to the county in which the apportionment claim is reported.

This bill would apply this provision also to charter schools.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 163 (SB 911) Figueroa. Emergency care: automatic external defibrillator: acquisition and liability.

Existing law provides immunity from civil liability to any person who, in good faith and without compensation or the expectation of compensation, renders emergency care at the scene of an emergency. Existing law expressly provides immunity from civil liability to any person who completes a designated cardiopulmonary resuscitation (CPR) course and who, in good faith, renders emergency cardiopulmonary resuscitation at the scene of an emergency, without the expectation of receiving compensation for providing the emergency care.

This bill would provide immunity from civil liability to (1) any person who, in good faith and not for compensation renders emergency care or treatment by the use of an

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

automated external defibrillator at the scene of an emergency, has completed a basic CPR and automated external defibrillator (AED) use course that complies with regulations adopted by the Emergency Medical Services (EMS) Authority and the standards of the American Heart Association or the American Red Cross for CPR and AED use, (2) a person or entity who provides CPR and AED training to a person who renders emergency care pursuant to (1), and (3) a physician who is involved with the placement of an AED and any person or entity responsible for the site where an AED is located if that physician, medical authority, person, or entity has complied with certain requirements. The bill would provide that its protections shall not apply in the case of personal injury or wrongful death that results from the gross negligence or willful or wanton misconduct of the person who renders emergency care or treatment by the use of an AED.

Existing law, the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act, authorizes the Emergency Services Authority to establish minimum standards for the training and use of automatic external defibrillators by individuals not otherwise licensed or certified for the use of the device.

This bill would require any person who acquires an automatic external defibrillator to comply with specified requirements in the bill.

Ch. 164 (AB 109) Knox. Employment: sick leave.

Existing law does not require an employer to permit an employee to use sick leave to attend to the illness of a child, parent, or spouse of the employee.

This bill would require an employer who provides sick leave, as defined, for employees to permit an employee to use in any calendar year accrued sick leave, in an amount not less than the amount earned during 6 months' employment, to attend to the illness of a child, parent, or spouse of the employee. The bill would apply to the state, political subdivisions of the state, and municipalities.

This bill would prohibit an employer from denying the use of sick leave or from discharging, threatening to discharge, demoting, suspending, or in any manner discriminating in the terms and conditions of employment against, an employee for using, or attempting to exercise the right to use, sick leave to attend to the illness of a child of the employee.

This bill would provide that any employee aggrieved by a violation of the bill is entitled to reinstatement and actual damages or one day's pay, whichever is greater, and to appropriate equitable relief, as specified. The bill would require the Labor Commissioner, upon receipt of an employee's complaint, to invoke administrative procedures or seek judicial remedies to recover wages, penalties, and other compensation on behalf of aggrieved employees. Alternatively, the bill would authorize an employee to bring a civil action for remedies provided in these provisions and would authorize an award of reasonable attorney's fees to an employee who prevails in the action. The bill would declare that its rights and remedies are nonexclusive.

Ch. 165 (AB 114) Florez. Disaster relief: freeze.

Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the board's approval. With respect to certain counties that have adopted reassessment ordinances and have been declared by the Governor to be in a state of disaster as a result of certain events, existing law provides for state allocations of the estimated amounts of the reductions in property tax revenues resulting in certain fiscal years from reassessments under those ordinances. Existing law also continuously appropriates, without regard to fiscal years, moneys in the Special Fund for Economic Uncertainties for purposes of funding these state allocations.

This bill would provide for similar state allocations with respect to property tax revenue reductions, resulting from a reassessment ordinance, incurred by a county that was declared by the Governor to be in a state of disaster as a result of a freeze occurring in California in the winter of 1998–99. By requiring moneys continuously appropriated from the Special Fund for Economic Uncertainties to be allocated for the new purpose

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of reimbursing these counties for these property tax revenue reductions, this bill would make an appropriation.

The Personal Income Tax Law and the Bank and Corporation Tax Law provide for the carryover to specified taxable or income years of specified losses sustained as a result of various disasters occurring in California in an area determined by the President of the United States to warrant specified federal assistance, or proclaimed by the Governor to be in a state of disaster.

This bill would extend these provisions to losses sustained as a result of a freeze or any other related casualty that occurred in California in the winter of 1998–99. This bill would also authorize a taxpayer to make an election to claim a deduction for those losses on the tax return for the preceding year.

This bill would contain legislative findings and declarations as to the statewide public purpose of this bill.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 166 (AB 332) Oller. Mammoth Community Water District.

The County Water District Law authorizes the creation of county water districts and grants to those districts specified powers, including the authority to acquire, store, use, and distribute water and to perform other acts necessary to obtain sufficient water in the district for present and future beneficial uses.

This bill would authorize the Mammoth Community Water District, which is subject to that district law, to acquire property and construct, maintain, operate, sell, and lease facilities, including wells, plants, and pipes for the distribution of heated water or steam that are necessary to develop, extract, and distribute geothermal water resources to provide space heating for facilities within the boundaries of the district. The bill would authorize the district to finance the acquisition of property and the construction of facilities for this purpose by utilizing financing methods that are available to the district under that district law to finance water facilities, and to exercise other authority, as prescribed.

Ch. 167 (AB 744) McClintock. Juvenile court records: sealing and destruction.

Existing law authorizes a minor, who has been the subject of a petition to adjudge him or her a ward of the court or has been cited to appear or taken before a probation or law enforcement officer, to petition the court for the sealing of his or her records, which petition may be filed 5 years after the jurisdiction of the juvenile court terminated; if no juvenile court petition was filed, 5 years after the minor was cited or taken before a probation or law enforcement officer; or after the minor reaches the age of 18 years. Under existing law, the petition to seal the records may be granted, after a hearing, if the court makes specified findings.

This bill would add new provisions regarding the sealing of juvenile court records that would be applicable in those cases where a minor is detained, arrested, or cited but no accusatory pleading or petition is filed, or in those cases where an accusatory pleading or petition is filed but is not sustained. The bill would, in those cases, require the law enforcement agency and probation officer to seal a minor's records, as specified, upon a determination by them, in specified circumstances, or by the court, following a specified hearing or motion, that the minor is factually innocent, as specified. The bill would also require, in certain cases, the issuance of a written declaration to the minor regarding his or her factual innocence, as specified, and would specify procedures and timeframes to be followed by law enforcement and other agencies with respect to the sealing and destruction of juvenile court records. Because this bill would impose new duties on court personnel and law enforcement and other local agencies, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The California Constitution requires that any statute that would cause relevant evidence to be excluded in any criminal proceeding or in any trial or hearing of a juvenile for a criminal offense must be approved by a $^{2}/_{3}$ vote of the Legislature.

Ch. 168 (SB 63) Solis. Preferential vehicle lanes: occupancy level: State Highway Route 10.

Existing law authorizes the Department of Transportation to authorize or permit exclusive or preferential use of highway lanes for high-occupancy vehicles, as specified.

This bill would require the department to establish those lanes on the San Bernardino Freeway, and to set the minimum occupancy level on those lanes at 2 persons, including the driver. The bill would require the department, on or before January 1, 2001, to complete and prepare an operational study concerning the use of the lanes and report to the Legislature.

The bill would provide that the provisions of the bill shall become inoperative on July 1, 2001, and as of January 1, 2002, are repealed, unless a later enacted statute deletes or extends those dates.

Ch. 169 (SB 155) Knight. Highways: Safety Enhancement-Double Fine Zones.

(1) Existing law, until January 1, 2000, requires the Department of Transportation, in consultation with the Department of the California Highway Patrol, to develop specified pilot projects to designate and identify certain highway segments as "Safety Enhancement-Double Fine Zones" and impose increased fines for traffic violations occurring within these zones. Existing law requires the department to report to the Legislature on January 1, 1998, on the results of these pilot projects and requires the department or local authorities, with respect to highways under their respective jurisdictions, to place and maintain certain warning signs in the designated zones.

This bill would extend the dates specified above to January 1, 2004, as to the specified pilot projects and to January 1, 2003, as to the date of the report, and would require the department to update the January 1, 1998, report, and to include in the report, in consultation with the Department of the California Highway Patrol, recommendations of specific criteria for designation of a highway as a Safety Enhancement-Double Fine Zone.

The bill would also require the department to develop pilot projects that would be administered, in part, by certain local authorities, for designated portions of State Highway Route 101, State Highway Route 138, and State Highway Route 152. The bill thereby would create a state-mandated local program by imposing additional duties upon those local authorities.

The bill would make conforming changes in other provisions of existing law.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 170 (SB 517) Johnson. Horse racing: charity days distributions.

Existing law requires each licensed racing association to designate a certain number of racing days to be conducted as charity days for the purpose of the distribution of the net proceeds therefrom to beneficiaries. Existing law also requires that distributing agents for, and beneficiaries of, these proceeds be exempt or entitled to exemption from state and federal income taxes, but allows a racing association, whose board of trustees or directors is precluded by its articles of incorporation, bylaws, or by contract from

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

receiving compensation for services in the capacity of trustee or director, to act as its own distributing agent , upon approval of the California Horse Racing Board.

This bill would allow any racing association to act as its own distributing agent upon approval of the board, if it meets minimum allocation and distribution requirements, as specified.

Ch. 171 (SB 545) Dunn. Credit: notice.

Existing law requires charge card issuers to make specified disclosures in any charge card application form or preapproved written solicitation for a charge card mailed to a consumer who resides in this state, except as specified. One of these disclosures is any fee that may be assessed for an extension of credit by the charge card issuer to a charge cardholder where the extension of credit is not a credit sale and where the charge cardholder receives the extension of credit through the use of a preprinted check, draft, or similar credit device provided by the charge card issuer to obtain an extension of credit.

This bill would, as of July 1, 2000, require any preprinted check or draft provided by a charge card issuer as an extension of credit to a cardholder to have an affixed attachment notifying the cardholder that use of the check or draft constitutes a charge against the person's credit account, notifying the cardholder of the annual percentage rate and calculation of finance charges associated with the use of the check or draft, and notifying the cardholder whether the finance charges are triggered immediately upon use of the check or draft.

Ch. 172 (SB 803) Karnette. Highways: relinquishment: Routes 19 and 160.

Existing law requires the California Transportation Commission to relinquish to any city or county any portion of any state highway within the city or county that has been deleted from the state highway system by legislative enactment.

This bill would authorize the commission to relinquish to the City of Downey the portion of State Highway Route 19 located between Gardendale Street and Telegraph Boulevard within the city, upon terms and conditions the commission finds to be in the best interests of the state. The relinquishment would become effective immediately following the commission's approval of the terms and conditions of the relinquishment. The portion of State Highway Route 19 relinquished as specified would cease to be a state highway on the effective date of the relinquishment.

The bill also would authorize the commission, upon its determination that it is in the best interest of the state and upon terms and conditions approved by the commission, to relinquish any portion of State Highway Route 160 in Sacramento County from mile post 35.0 to mile post 47.0 to a city in which that segment is located, if the city has agreed to accept the relinquishment. The relinquishment would be effective on the day immediately following the date of the commission's approval of the terms and conditions of the relinquishment.

Ch. 173 (SB 855) Haynes. Recycled water.

(1) The Water Recycling Act of 1999 requires the rate for, and conditions of, recycled water service to be established by contract between a public agency retail water supplier and the customer, if there is no rate in effect for recycled water service within the service area of that supplier and prescribes certain other requirements relating to recycled water service rates established by a public agency retail water supplier on and after January 1, 1999.

This bill would allow a customer to request, in writing, a retail water supplier to enter into an agreement or adopt recycled water rates in order to provide recycled water service to the customer. The bill would require the public agency retail water supplier, by certified mail return receipt requested, to submit a written offer to the customer not later than 120 days from the date on which the retail water supplier receives the written request from the customer. The bill would require the rate and conditions for recycled water service to be established by contract between the retail water supplier and the customer, if no rate is in effect for recycled water service within the service area of a retail water supplier, not later than 120 days from the date of the customer's request for a contract, or, by resolution or ordinance by the retail water supplier, not later than 120

NOTE: Superior numbers appear as a separate section at the end of the digests.

days from the date of the customer's written request for an ordinance or resolution. By imposing duties on public agency retail water suppliers, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 174 (SB 431) Alarcon. 51st District Agricultural Association.

Existing law authorizes the 51st District Agricultural Association to sell approximately 7.2 acres of land, as described, the proceeds of which are required to be used only for the acquisition of land for use as a permanent fairground site, with limited exceptions.

This bill would revise this provision to also authorize the proceeds from the sale of this property to be used to lease and improve real property for a permanent fairground site.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 175 (AB 239) Kaloogian. Estates and trusts.

(1) Existing case law provides that a right to jury trial in a civil matter exists only where that right existed at common law; jury trials in probate proceedings were unknown to common law. Existing statutory law specifies that there is no right to a jury trial in proceedings under the Probate Code concerning the administration of a decedent's estate, except as otherwise expressly provided in the Probate Code.

This bill would revise existing statutory law to specify that there is no right to a jury trial in proceedings under the Probate Code, except as otherwise expressly provided in the Probate Code.

(2) Existing law requires a petition for court authorization of specified medical treatment for a ward or conservatee to include specified information. Existing law requires the court, upon the filing of the petition, to notify the attorney of record for the ward or conservatee or appoint the public defender or private counsel to consult with and represent the ward or conservatee. It also authorizes a hearing on the petition to be held pursuant to an order of the court prescribing the notice to be given.

This bill would specify additional information to be included in the petition, and would revise the notice requirements, as specified.

(3) Under existing law, a court may authorize or require a conservator to take a proposed action for specified purposes, including the exercise or surrender of the right of the conservatee to revoke a revocable trust under specified conditions.

This bill would include within these purposes, the exercise or surrender of the right of the conservatee to modify a revocable trust under specified conditions.

(4) Under existing law, a trust instrument may by amended in order to qualify a decedent's estate for the charitable estate tax deduction under federal law in any case in which all parties interested in the trust have submitted written agreement to the proposed changes or written disclaimer of interest.

This bill would delete the written agreement or disclaimer requirement.

Ch. 176 (AB 540) Machado. Malpractice actions: architects, engineers, or surveyors.

Existing law requires the attorney for the plaintiff or cross-complainant in any action arising out of the professional negligence of an architect, professional engineer, or land surveyor to file a certificate declaring either that the attorney has consulted and received an opinion from an architect, professional engineer, or land surveyor, licensed to practice in this state or in any other state, or that the attorney was unable to obtain that consultation for specified reasons.

This bill would require the certificate to be served in addition to being filed.

Ch. 177 (AB 552) Thompson. Outpatient settings: general anesthesia.

Existing law, until January 1, 2000, permits a physician and surgeon to administer general anesthesia in the office of a licensed dentist, for dental patients, whether or not the dentist has been certified to perform general anesthesia, if the licensed physician and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

surgeon holds a valid general anesthesia permit issued by the Board of Dental Examiners of California. It also requires payment of a fee for issuance of the permit, requires onsite inspection and evaluation, and requires automatic suspension of the permit for a physician and surgeon who has failed an onsite inspection and evaluation, except as prescribed.

Existing law, until January 1, 2000, requires the Medical Board of California to inform the Board of Dental Examiners of California whether the applicant is a licensed physician and surgeon and to verify and inform the Board of Dental Examiners of California whether the applicant has successfully completed a postgraduate residency training program in anesthesiology recognized by the American Council on Graduate Medicine.

Existing law declares that a violation by the dentist of related provisions constitutes unprofessional conduct and authorizes the Board of Dental Examiners of California to take prescribed actions.

Existing law, until January 1, 2000, provides that a violation of those provisions and of provisions relating to general anesthesia by a physician and surgeon may constitute unprofessional conduct under the Medical Practice Act, and is grounds for suspension or revocation of the general anesthesia permit issued by the Board of Dental Examiners of California. It also requires the Board of Dental Examiners of California to refer the matter to the Medical Board of California for its consideration as unprofessional conduct and for further action under the Medical Practice Act. It also provides that a suspension or revocation of a physician and surgeon's permit by the Board of Dental Examiners shall not constitute a disciplinary proceeding or action except to permit the initiation of an investigation or disciplinary action by the Medical Board of California.

The bill would extend the repeal date of the provisions that are repealed on January 1, 2000, until January 1, 2002. By extending the period increased moneys will be deposited in a continuously appropriated fund, this bill would make an appropriation.

Ch. 178 (AB 562) Cardenas. School facilities: funding priorities.

Existing law, the Leroy F. Greene School Facilities Act of 1998 (Greene Act), authorizes the State Allocation Board to provide state per-pupil funding for school facilities. The Greene Act authorizes allocation of state funds, matched by local funds, for new construction and modernization, and authorizes application for funding in certain hardship cases. The Greene Act requires the board to establish and publish any procedures and policies in connection with the administration of the Greene Act.

Existing law requires the board to adopt regulations to develop a mechanism to rank approved applications for new construction funding to determine the priority of approved applications when state funds are insufficient.

This bill would , instead, require the board to adopt the priority regulations to rank approved applications if either (1) the total state funds necessary for funding all approved projects exceed the total state funds actually in the 1998 State School Facilities Fund for allocation for this purpose, or (2) the actual amount of the unallocated proceeds of state bonds available on or after July 1, 2000, for new construction is $300,000,000.

Ch. 179 (AB 861) Campbell. Seismic safety standards.

Existing law requires the Department of General Services to supervise the design and construction of certain school buildings to ensure that plans and specifications comply with specified structural safety standards and to ensure that the work of construction has been performed, in accordance with the approved plans and specifications, for the protection of life and property. Existing law also requires the Department of General Services to pass upon and approve or reject all plans for the construction, and in some cases, the alteration of any school building subject to those provisions, and to inspect the school buildings and the work of construction or alteration that in its judgment is necessary or proper for the enforcement of these requirements and the protection of the safety of students, instructors, and the public. These requirements are part of the body of law known as the Field Act.

Existing law also requires the governing board of each community college district, when a specified examination of the structural condition of any school building of the district has revealed that the building is unsafe for use, to have prepared an estimate of the cost necessary to make repairs to the building that are necessary, or, if necessary, to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

reconstruct or replace the building so that, when repaired or reconstructed, the building will meet structural safety standards established in accordance with law.

This bill would authorize a community college district to acquire for use any facility previously used by the United States military and closed by action of the federal Defense Base Closure and Replacement Commission if the governing board of the district finds that specified conditions of the Field Act have been met.

Ch. 180 (AB 1258) Strom-Martin. Public health: agricultural homestay establishments.

The California Uniform Retail Food Facilities Law regulates sanitary standards in retail food establishments.

This bill would expand the definition of "restricted food service transient occupancy establishment" to include an agricultural homestay establishment. Because local health agencies are partially responsible for enforcement of the law's provisions, the expansion of the law constitutes a state-mandated local program.

Because existing law makes a violation of any of its provisions a misdemeanor, by creating a new crime, this bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 181 (AB 1489) Maldonado. Length of vehicles: extensions.

Existing law limits the length of vehicles and combinations of vehicles coupled together. Under existing law, any extension or device used to increase the carrying capacity of a vehicle is generally included in measuring the length of a vehicle. However, extensions of not more than 18 inches in length on the last vehicle in a combination of vehicles transporting loads are not included in measuring the length when the vehicles are loaded.

This bill would not include, in measuring the length, an 18-inch extension on the front of the first trailer and the rear of the last vehicle when the vehicles are loaded and are on highways, other than those highways designated by the United States Department of Transportation as national network routes.

Ch. 182 (SB 333) Schiff. Santa Monica Mountains Conservancy Advisory Committee: membership.

Existing law creates the Santa Monica Mountains Conservancy Advisory Committee, consisting of 17 members, as prescribed, including 6 representatives of local governments, and specifies that 9 members of the advisory committee are required to constitute a quorum for the transaction of any business of the advisory committee.

This bill would increase to 12 the number of representatives of local governments on the advisory committee, thereby increasing the membership of the advisory committee to 23, and would require that the 6 additional members be appointed by various city councils. The bill would increase to 12 the number of members of the advisory committee that are required to constitute a quorum.

Ch. 183 (SB 363) Figueroa. Automotive insurance: coverage for damaged child safety restraint systems.

Existing law describes the coverage required to be provided by various policies of automobile insurance.

This bill would require every policy of automobile liability insurance, and every policy that provides automobile collision coverage, automobile physical damage coverage, or

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

uninsured motorist property damage coverage to provide coverage for the replacement of a child passenger restraint system that was in use by a child during an accident for which the policy is liable.

Ch. 184 (SB 392) Chesbro. Property tax revenue allocations: redevelopment agency share: apportionment.

The Community Redevelopment Law authorizes the establishment of redevelopment agencies in communities in order to address the effects of blight, as defined, in those communities. Existing law also authorizes a redevelopment plan adopted pursuant to that law to provide for an allocation to the relevant redevelopment agency of a portion of those ad valorem property tax revenues derived with respect to a redevelopment project. Existing property tax law also establishes certain parameters with respect to the subtraction of a redevelopment agency's share of ad valorem property tax revenues from those revenues otherwise allocated to other local jurisdictions within a redevelopment project area.

This bill would clarify the process by which incremental property tax revenues to be allocated to a redevelopment agency are withdrawn from those revenue shares allocated to other local jurisdictions in a redevelopment project area. This bill would make legislative findings and declarations that these provisions are declaratory of existing law, and would deem to be correct any apportionment of property tax revenues made for any fiscal year prior to the effective date of the bill that is inconsistent with the clarifications made by this bill.

Ch. 185 (SB 394) McPherson. Aquatic nuisance species.

(1) Existing law contains provisions designed to prevent the introduction and spread of aquatic nuisance species, as defined, into any river, estuary, bay, or coastal area through the exchange of ballast water of vessels prior to entering those waters. Existing law requires the Department of Fish and Game to adopt a ballast water control report form consistent with the form developed by the United States Coast Guard. Existing law requires operators of all vessels that have the capacity to take on or discharge ballast water to complete and return the form as a condition of using the waters of this state. These provisions are to be repealed on January 1, 2000.

This bill would extend these provisions until January 1, 2004. Since a violation of these provisions is an infraction under existing law, the bill would impose a state-mandated local program by continuing in existence a crime that would otherwise be repealed.

(2) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the department to carry out the Fish and Game Code. Because this bill would continue existing duties imposed on the department until January 1, 2004, the bill would make an appropriation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 186 (SB 439) Poochigian. Insurance: fire and casualty broker-agents and life agents.

Existing law imposes certain continuing education requirements on persons licensed either as life agents or casualty broker-agents, but not as both.

This bill would make certain technical nonsubstantive changes in that provision.

Ch. 187 (SB 641) Lewis. Title insurance.

Existing law provides that a domestic title insurer is any title insurer organized under California law, and a foreign title insurer is any title insurer organized under the laws of any other jurisdiction.

Existing law requires every domestic title insurer, as to its title insurance department, to be subject to and to comply with all requirements of the insurance laws and the rules and regulations of the Insurance Commissioner. Existing law authorizes a domestic title insurer to invest its assets apportioned to its title insurance department, and the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

accumulations therefrom, in the manner in which the assets of title insurers are allowed by state law to be invested.

This bill would make those provisions governing a domestic title insurer's title insurance department also applicable to a foreign title insurer's title insurance department. It would also make other technical changes.

Ch. 188 (SB 770) McPherson. DeLaveaga Park Property: conveyances: recreational use.

Under existing law, the state owns or leases real property within the so-called DeLaveaga Park Property in the City of Santa Cruz, as described in Exhibit A attached to a decree issued May 27, 1898, by the Superior Court for the City and County of San Francisco, and is generally obligated to use that real property for a camp of instruction for the National Guard. The state is obligated to reconvey the real property, which it received from the City of Santa Cruz and the County of Santa Cruz in 1901, to the city when it is no longer necessary for use as a camp of instruction, subject only to the condition that the real property be used by the city in perpetuity for public recreational purposes. A portion of the state-owned property has been leased to the City of Santa Cruz pursuant to the June 29, 1967, Lease Exchange Agreement between the state and the city and is used by the city as part of the DeLaveaga Golf Course. The city also leased real property within the DeLaveaga Park Property to the state pursuant to that agreement.

This bill would express legislative intent with regard to the DeLaveaga Park Property and would require the real property within the DeLaveaga Park Property owned by the state to be used for a National Guard camp of instruction and, if that use is determined by the Adjutant General to be no longer necessary for that purpose, would require the Department of General Services to reconvey the real property to the city, to be used in perpetuity for public recreational purposes. The bill would direct the department to convey to the city its fee interest in that portion of the DeLaveaga Park Property currently leased to the city to be used as a municipally owned public golf course for as long as the city determines and, thereafter, used, in perpetuity, as a municipally owned public recreational area, if the city simultaneously conveys in fee to the state the portion that is currently leased to the state, to be used for public recreational purposes. The bill would require that the DeLaveaga Park Property revert to the possession, control, and ownership of the state if any of the conditions for the use of that real property are violated.

Ch. 189 (SB 1266) Knight. Selective Service Act: registration: high school.

Existing law authorizes school districts to appoint prescribed staff, including, but not limited to, police reserve officers, administrative advisors, and legal counsel.

This bill would provide that a governing board of a school district should, but is not required to, make every reasonable effort to appoint a selective services registrar for each high school, who may be a school employee or a school volunteer who is 18 years of age or older, to help pupils subject to the federal Military Selective Service Act enrolled in the high school register in accordance with that act.

Ch. 190 (SB 651) Burton. Registered pharmacists.

Existing law generally requires an employee to be paid an overtime rate of compensation for work in excess of 8 hours per day. Existing wage orders of the Industrial Welfare Commission exempt persons employed in an administrative, executive, or professional capacity from, among other things, that requirement.

This bill would provide that a person employed in the practice of pharmacy is not exempt from coverage under any provision of the wage orders of the commission, unless he or she individually meets the criteria established for exemption as executive or administrative employees. The bill also would provide that no person employed in the practice of pharmacy may be subject to any exemption from coverage under the orders of the commission established for professional employees.

Under the existing Pharmacy Law, the California State Board of Pharmacy is established to administer and enforce the regulations that govern the licensure and practice of registered pharmacists.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would prohibit the board from adopting or amending any rule or regulation that conflicts with the limitations on the commission added by the bill.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Existing provisions of law require the Director of Health Services to establish the rate of reimbursement for providers under the Medi-Cal program, and specifies that the rate of reimbursement for pharmacists shall be reduced by 50¢ per prescription, effective January 1, 1995.

This bill would require that the reimbursement of pharmacists for each prescription claim through the Medi-Cal program shall be increased by 25¢ on January 1, 2000, and by an additional 15¢ on July 1, 2002.

Ch. 191 (AB 1) Aanestad. School finance: necessary small schools: necessary small high schools.

Under existing law, a unified school district that is the only school district in a county, that received specified amounts of federal Forest Reserve funds and that has fewer than 4,501 units of average daily attendance, is eligible to receive apportionments for necessary small schools and necessary small high schools. The provision that establishes this eligibility becomes inoperative on July 1, 1999, and as of January 1, 2000, is repealed.

This bill would instead provide that the provision that establishes this eligibility becomes inoperative on July 1, 2002, and as of January 1, 2003, is repealed and would require a school district that receives apportionments pursuant to this provision to report to the State Department of Education and the Department of Finance by July 1, 2001, concerning the district's plan to address the district's need for additional funding when this section is repealed.

This bill would declare that its provisions would become effective immediately as an urgency statute.

Ch. 192 (AB 263) Gallegos. Hospital facilities: California Building Standards Commission: regulatory submissions.

The Alfred E. Alquist Hospital Facilities Seismic Safety Act of 1983 establishes, under the jurisdiction of the Office of Statewide Health Planning and Development, a program of seismic safety building standards for certain hospitals built on and after March 7, 1973. The act requires the office to submit information regarding seismic standards and procedures to the California Building Standards Commission, and provides that these submissions shall be deemed as emergency regulations and adopted as such.

This bill would require that, until January 1, 2001, all regulatory submissions to the California Building Standards Commission made by the office pursuant to provisions relating to state responsibilities for seismic safety in hospitals and hospital owner responsibilities be deemed to be emergency regulations and adopted as such.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 193 (AB 268) Cedillo. Museum of Chinese American History: Italian Hall: funding.

The Budget Act of 1998 appropriates funds to the Department of Parks and Recreation for local assistance grants.

This bill would make state funding for the permanent site for the Museum of Chinese American History and for the restoration of the Italian Hall, both in Los Angeles, contingent upon funding in the Budget Act of 1999.

Ch. 194 (AB 699) Wiggins. Veterans' home: nonresident veterans: outpatient services.

Existing law provides for the establishment and operation of the Veterans' Home of California, Yountville, for aged and disabled veterans who are eligible for hospitalization or domiciliary care in a veterans' facility in accordance with the rules and regulations of the United States Department of Veterans Affairs, and who are bona fide residents of this state at the time of application. The home is under the management and control of the Department of Veterans Affairs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the Department of Veterans Affairs to arrange by contract or any other form of agreement with the United States Department of Veterans Affairs for the purpose of (1) authorizing veterans, collateral dependents, or other beneficiaries authorized by the United States Department of Veterans Affairs, who are not residents of the Veterans' Home of California, Yountville, to receive outpatient medical services at that home, (2) establishing rates for reimbursement from the federal government to the State of California for outpatient services rendered by the Veterans' Home of California, Yountville, to those patients, and (3) allowing outpatient care and reimbursement, as prescribed, at the veterans' home located at Barstow, California, and any veterans' home constructed on or after January 1, 2000.

Ch. 195 (AB 1019) Strickland. Minors: volunteer construction services.

Under existing state law, minors are prohibited from being employed or permitted to work in certain occupations that are excluded from federal regulations promulgated under the Fair Labor Standards Act of 1938, as amended, that specify conditions for employment of minors.

This bill would require the Division of Labor Standards Enforcement to review existing state and federal restrictions on participation of minor volunteers in construction projects, as specified, and to report its findings to the Legislature by April 1, 2000.

Ch. 196 (AB 1140) Villaraigosa. Income taxes: returns: filing requirements.

Existing income tax laws require every individual taxable under the Personal Income Tax Law that has certain amounts of adjusted gross income, or gross income, to make a return to the Franchise Tax Board.

This bill would require the board to recompute those amounts to take into account the effect of the dependent credit and the senior exemption credit, as provided.

Ch. 197 (AB 1238) Committee on Agriculture. Eggs.

(1) Existing law requires the Secretary of Food and Agriculture to appoint a Shell Egg Advisory Committee consisting of 7 members, 6 of whom are selected by the secretary from egg handlers.

This bill would require the secretary to appoint 2 alternates who may serve in the absence of any of the egg handler representatives on the committee.

(2) Existing law makes it unlawful for an egg handler to sell, offer for sale, or expose for sale eggs that are packed or graded for human consumption unless certain requirements are met. Existing law makes it unlawful for an egg handler, as defined, to sell, offer for sale, or expose for sale eggs that are packed for human consumption unless each container intended for sale to the ultimate consumer is labeled with, among other information, a "sell-by date" and the identification number of the plant of origin, except as prescribed.

This bill would provide that these provisions do not apply to eggs that are packaged for export and that the "sell-by date" requirement does not apply to eggs that are packaged for interstate commerce.

The bill would require the Department of Food and Agriculture, in consultation with the Shell Egg Advisory Committee, to establish a plant identification numbering system and to assign identification numbers to all egg handling facilities. The bill would authorize an egg handling facility that is inspected by the United States Department of Agriculture, and to which a federal plant identification number has been assigned, to use that federal identification number, the identification number assigned by the Department of Food and Agriculture, or both, for the purposes of complying with that container labeling requirement.

(3) Existing law, commencing on January 1, 1998, and until January 1, 2000, requires, with certain exceptions, raw shell eggs to be stored and displayed at or below a specified ambient temperature. Existing law makes a violation of this requirement a misdemeanor.

This bill would delete the January 1, 2000, date, thereby continuing the provision indefinitely, and thereby imposing a state-mandated local program by continuing the above-described crime.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 198 (AB 1249) Committee on Agriculture. Produce dealers and agents of farm products processors: licensing.

(1) Existing law sets forth procedures governing the licensure by the Department of Food and Agriculture of produce dealers and agents of farm products processors. Under these provisions of existing law, if an application for a license indicates, or the department determines during the application review process, that the applicant had previously applied for a license and the application was denied within the last year, the department is required to cease further review of the application until one year has elapsed from the date of the notification of the denial or from the effective date of the decision and order of the department upholding a denial.

This bill, instead, under the above circumstances, would require the department to cease further review of the application until 30 days have elapsed from the date of the notification of the denial or from the effective date of the decision and order of the department upholding a denial.

(2) The above provisions of existing law specify that an applicant whose application is incomplete shall be given written notice that a failure to complete the application within 30 calendar days shall result in denial of the application.

This bill, instead, would require the written notice to specify that a failure to complete the application within 60 calendar days shall result in denial of the application.

(3) The above provisions of existing law specify that if any licensee does not apply for the renewal of a preexisting license on or before the date of expiration of the license, a penalty of $25 shall be added to the fee. Existing law also provides that that penalty is applicable only during the 30-day period immediately following the license expiration date and shall entitle the applicant to 30 days from the date of the penalty payment to complete the application. If the application is not completed within that time, the application is required to be deemed denied and all fees retained by the Secretary of Food and Agriculture.

This bill, instead, would specify that the $25 penalty shall be paid within 30 days immediately following the license expiration date and that payment of the penalty shall entitle the applicant to 60 days from the date of the penalty payment to complete the application. If the application is not completed within that time, the application shall be deemed denied and all fees retained by the department. In addition, the bill would specify that if the penalty is not paid within the 30-day period, any application for renewal of a preexisting license shall be treated as a new application.

Ch. 199 (AB 1582) Florez. Agriculture: grape crusher processors: grape concentrate: reporting.

The Clare Berryhill Grape Crush Report Act of 1976 requires every processor who crushes grapes in this state to furnish to the Secretary of Food and Agriculture reports on the total number of tons of grapes purchased by the processor in California during the preceding crush within each grape-pricing district and information concerning the final prices, as specified. A violation of these provisions is a crime.

This bill would revise those reporting requirements to also require the reporting of the total number of tons of grapes purchased and crushed that will be marketed as grape concentrate. The bill would prohibit any action, including civil and criminal penalties, to be taken against a person, as specified, based on the reporting of grape concentrate pursuant to these provisions. The bill also would restrict the release of information by the secretary in that regard, as specified. The bill would define "estimated equivalent tons" for purposes of the bill. The bill would also make nonsubstantive, technical changes in those provisions.

Ch. 200 (AB 1694) Committee on Revenue and Taxation. Ad valorem taxation: fire detection systems.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975–76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. The California Constitution authorizes the Legislature to exclude from classification as "new construction" the construction or installation on or after November 7, 1984, of fire safety improvements that include a fire detection system. Existing statutory law implementing this exclusion defines a "fire detection system" to include any system or appliance intended to, among other things, activate an alarm or signal. It also specifies that a fire detection system includes any system that serves additional functions, but limits the exemption to that portion that is for fire detection purposes.

This bill would expand this exclusion to specify that a fire detection system includes, as provided, all equipment used to transmit fire alarm activations and related signals to a remote location.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

This bill would take effect immediately as a tax levy.

Ch. 201 (SB 36) Baca. Veterans' preference: local agencies.

Under the State Civil Service Act, veterans of the armed forces who take an entrance examination for state employment are allowed extra points by virtue of their status as veterans.

This bill would require any city, county, or city and county, general law or chartered, when it has established a civil service system, to implement a veterans' preference system by January 1, 2002, or adopt a resolution identifying reasons that the local agency does not do so.

Ch. 202 (SB 219) Peace. Court proceedings.

Existing law establishes the priority of allowed unsecured claims for specified wages, salaries, or commissions to the extent of $2,000 for each individual and allowed unsecured claims for specified contributions to an employee benefit plan to the extent of the number of employees covered by the plan multiplied by $2,000 less a specified amount.

This bill would limit claims for wages, salaries, or commissions to specified claims, and would increase the $2,000 limit and multiple to $4,300.

Existing law provides that an assignee of any general assignment for the benefit of specified creditors may recover any transfer or property of the assignor that meets certain requirements. Existing law exempts from this recovery a transfer of a security interest in property acquired by the assignor to the extent that the security interest secures new value, as specified, and is perfected within 10 days after the security interest attaches.

This bill would revise this exemption to include the above-described security interest that is perfected within 20 days after the security interest attaches.

This bill would also exempt a transfer to the extent that it was a bona fide payment of a debt to a spouse, former spouse, or child of the debtor, as specified.

This bill would also substantially incorporate the changes to Section 1204 of the Code of Civil Procedure proposed by SB 914, contingent upon that bill's prior enactment.

Ch. 203 (SB 603) Speier. Remittances and interest.

Existing law authorizes the Franchise Tax Board to accept payment by credit card for taxes, interest, penalties, and fees, if specified conditions are met.

This bill would remove the present restrictions regarding payments by credit card, and instead would permit these payments to be made by credit cards at that time and under those conditions as the Franchise Tax Board may prescribe. This bill would also require the Franchise Tax Board and any other state agency accepting payment by credit card

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to notify each eligible payer of that fact, and to provide, as specified, for billing statements that allow for payment by credit card.

Under existing law, the Franchise Tax Board is authorized to abate interest on unpaid taxes that is attributable to errors or delays caused by an officer or employee of the Franchise Tax Board in the performance of a ministerial or managerial act.

This bill would also permit the abatement of interest accruing from a deficiency based on a final federal determination of tax for the same period that interest was abated on the related federal deficiency under specified provisions of the Internal Revenue Code.

Ch. 204 (SB 826) Sher. Air pollution: bay district: motor vehicle fee revenues.

(1) Existing law requires specified motor vehicle fee revenues generated in the Bay Area Air Quality Management District to be subvened to the bay district and used for specified purposes, including, until January 1, 2000, the implementation of bicycle facility improvement projects.

This bill would delete the January 1, 2000, date for using those revenues for bicycle facility improvement projects, thereby requiring the continued use of those funds for that purpose beyond that date. The bill also would include, within the purposes for which those revenues are required to be expended, the implementation of low-emission and zero-emission vehicle programs, demonstration projects in telecommuting, and the design and construction of physical improvements that support specified development projects, thereby creating a state-mandated local program by imposing new duties on the bay district.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 205 (SB 830) Karnette. Employees of reorganized school districts.

Existing law authorizes the reorganization of school districts and provides for the disposition of the assets and obligations of reorganized school districts. With regard to persons employed by reorganizing school districts in positions not requiring certification qualifications, existing law requires that the reorganization not affect the rights of these persons to retain the salary, leaves, and other benefits that they would have had if the reorganization had not occurred. Existing law also requires that, when a portion of the territory of any district becomes part of another district, employees regularly assigned to perform their duties in the territory affected become employees of the acquiring district, and further requires that an employee regularly assigned by the original district to any school in the district be an employee of the district in which the school is located.

This bill would, with respect to reorganizations commenced on or after January 1, 2000, authorize an employee in these instances, in a manner consistent with relevant provisions of existing law and with any applicable collective bargaining agreement, to elect to accept a vacant position, for which he or she qualifies, that the first district elects to fill ; to fill, by exercise of his or her rights of seniority, a position, for which he or she qualifies, in the first district; or to have his or her name entered on a reemployment list of the first district.

Ch. 206 (SB 946) Vasconcellos. Classroom environment: pilot project.

Existing law requires any driver's license issued to a person under 18 years of age to be issued pursuant to a specified provisional licensing program.

This bill would require the Department of Motor Vehicles to conduct a pilot project to compare the effectiveness of driver education programs conducted in a nonclassroom environment with those conducted in a classroom-based environment for persons under the age of 18 years, as specified. The bill, among other things, would specify that persons participating in this pilot project who meet the course requirements for a certificate of completion shall be deemed to have complied with the driver's education requirements for a provisional driver's license.

The bill would require the department to complete a study concerning the pilot project and to report to the Legislature not later than May 31, 2003, except as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would repeal these provisions on January 1, 2004, unless a later enacted statute that is enacted on or before January 1, 2004, deletes or extends that date.

Ch. 207 (SB 954) Karnette. Public cemetery districts: public cemetery authorities: construction standards.

Existing law authorizes a public cemetery district to maintain a cemetery or cemeteries and to acquire, construct, improve, maintain, and repair a columbarium for the placement of cremated human remains.

Existing law permits a cemetery authority to operate a cemetery.

This bill would require that the construction or repair of columbariums comply with specified standards.

Ch. 208 (SB 1024) Johnson. Political Reform Act of 1974: online disclosure.

Existing provisions of the Political Reform Act of 1974 require specified candidates for public office and committees supporting or opposing candidates or ballot measures periodically to file reports with the Secretary of State and certain local officials setting forth information concerning contributions they received and expenditures they made during the specified reporting period. Existing provisions of the act also require lobbyists, lobbying firms, and lobbyist employers periodically to file specified reports and statements with the Secretary of State. Existing law also requires the Secretary of State to develop and implement a process whereby reports and statements, that are required under the act to be filed with the Secretary of State, including those by controlled committees of elected state officers that receive contributions, and any other committees, lobbyists, lobbying firms, and lobbyist employers, could be filed electronically and viewed by the public at no cost on an online disclosure system by way of the largest nonproprietary, cooperative public computer network.

This bill would require the Secretary of State to disclose online an index of the identification numbers of every person, entity, or committee obligated to make a disclosure pursuant to the provisions described above. This index would be required to be updated monthly except for the 6-week period preceding any statewide regular or special election, during which period the index would be required to be updated weekly.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^{2}/_{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^{2}/_{3}$ vote.

Ch. 209 (SB 1056) Johannessen. Vehicles: emission reduction devices.

Existing law establishes the High Polluter Repair or Removal Account in the Vehicle Inspection and Repair Fund and provides that all money in the account is available, upon appropriation, to the Department of Consumer Affairs and the State Air Resources Board to establish and implement a program for the repair or replacement of high polluting vehicles.

This bill would require the state board to review and assess the potential cost-effectiveness of specified emissions reduction devices that are intended for installation in light-duty motor vehicles and to consider the results of that assessment in determining whether an emission reduction device is a cost-effective means of emission reduction, as compared to vehicle retirement programs.

Ch. 210 (SB 1062) Poochigian. The California Water Plan.

Existing law requires the Department of Water Resources to update, every 5 years, The California Water Plan, which is the plan for the control, protection, conservation, development, and utilization of the water resources of the state.

This bill would require the department to establish a prescribed advisory committee to assist the department in the updating of the plan. The bill would require the department, in connection with the updating of the plan, to include in the plan a discussion of various strategies, including those strategies relating to the development of new water storage facilities, water conservation and recycling, desalination,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

conjunctive use, and water transfers, that may be pursued to meet the future water needs of the state, as prescribed. The bill would make related legislative findings and declarations.

Ch. 211 (SB 1089) Bowen. Post traumatic stress disorder education and training program.

Existing law generally regulates services for the care of children, including vesting the State Department of Social Services with various responsibilities relating to the placement and care of children in the state foster care system. Existing law requires the department to select and award a grant to a private nonprofit or public entity to establish and implement statewide coordinated training programs for county child protective service social workers that address critical issues affecting the well-being of children. Existing law specifies the subjects to be included in that training.

This bill would require the department to include post traumatic stress disorder in children among the subjects covered by the training programs.

Ch. 212 (SB 1092) O'Connell. Conditional sales contracts: motor vehicles.

Existing law requires specified conditional sale contracts for the sale of motor vehicles to contain specified disclosures. Existing law defines "cash price" for purposes of these provisions to mean the amount for which the seller would sell and transfer to the buyer unqualified title to the motor vehicle described in the contract, if the property were sold for cash, as specified, and includes, among other things, the cash price of accessories or services related to the sale.

This bill would revise the definition of "cash price" to also include payment of a prior credit or lease balance remaining on property being traded in. It would also revise the disclosure requirements with regard to property being traded in, as specified.

This bill would also repeal a provision of existing law that requires a conditional sale contract executed after June 30, 1994, to contain a notice pursuant to a repealed provision of law.

Ch. 213 (SB 1124) Vasconcellos. Brokerage contracts.

Existing law generally describes the requirements for entering into a valid contract.

This bill would provide that an application by a prospective customer to enter into a brokerage agreement with a broker-dealer, as defined, shall be deemed to be a valid contract if the application is transmitted by the customer to the broker-dealer electronically , is accompanied by the prospective customer's electronic or digital signature, and is accepted by the broker-dealer.

This bill would also require an application that is transmitted electronically to comply with all applicable federal and state securities laws and regulations relating to disclosures to prospective customers, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 214 (SB 1159) Sher. Electrical restructuring: electric service: changes.

(1) Existing law prohibits any change in the aggregator or supplier of electric power for any small commercial customer from being made until the change has been verified, as prescribed.

This bill would require specific procedures for a confirmation of change made via a telephone transaction, an Internet transaction, or a written transaction. The bill would require an aggregator or provider of electric power to keep a record of a confirmation for 2 years from the date of that confirmation, and to make those records available, upon request, to the customer and the Public Utilities Commission in the course of certain commission investigations. Because a violation of these provisions would be a crime, the bill would impose a state-mandated local program by creating a new crime.

The bill would authorize the commission to require third-party verification for all residential changes described above if certain findings are made.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 215 (SB 1230) Burton. Income taxes: designations: California Peace Officer Memorial Foundation.

Under existing income tax laws, taxpayers are allowed to contribute amounts in excess of their tax liability for the support of specified funds.

This bill would additionally allow taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the California Peace Officer Memorial Foundation Fund, which would be created by this bill. It would require money in that fund, upon appropriation by the Legislature, to be allocated to the California Peace Officer Foundation for the building and maintaining of a memorial to California peace officers as specified.

The bill would require the Franchise Tax Board to revise the form of tax returns to provide for the designation and would allow, upon appropriation by the Legislature, the Franchise Tax Board and the Controller to receive a portion of the funds designated to cover costs incurred in collecting and administering the funds.

The bill would provide that these provisions shall remain in effect only until January 1, 2006, unless a later enacted statute enacted before January 1, 2006, deletes that date. However, the bill would also provide that these provisions are deleted for taxable years beginning on or after January 1 of the calendar year in which the Franchise Tax Board estimates by September 1 that the contributions made on returns filed in that calendar year will be less than $250,000.

Ch. 216 (SB 1245) Hayden. Compensation: World War II slave and forced labor.

(1) Existing law authorizes actions to recover wages, but requires various actions to be brought within specified periods of time.

This bill would authorize any World War II slave labor victim or World War II forced labor victim, or heir of the victim, to bring an action in superior court to recover compensation , as defined, from any entity or successor in interest thereof, for whom the labor was performed, either directly or through a subsidiary or affiliate. It would provide that any action brought under these provisions shall not be dismissed for failure to comply with the applicable statute of limitation, provided the action is commenced on or before December 31, 2010.

(2) This bill would also set forth findings, intent, and a requirement that the Treasurer and the Public Employees' Retirement Fund and the State Teachers' Retirement Fund monitor investments in businesses that owe compensation to victims of slave labor.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 217 (AB 343) Campbell. Local agency finance: commercial paper: investments and borrowing.

(1) Existing law sets forth the various types of investments in which a local agency may invest the money belonging to or in custody of the agency, including its surplus money. Purchases of commercial paper for these purposes may not exceed 15% of the agency's surplus money which may be invested. An additional 15%, or a total of 30% of the agency's money or money in its custody, may be invested in commercial paper. The additional 15% may be so invested only if the dollar-weighted average maturity, as defined, of the entire amount does not exceed 31 days.

This bill instead would authorize counties to make purchases of commercial paper for these purposes that may not exceed 40% of the county's surplus money that may be invested, without the requirement that the dollar-weighted average maturity of the entire amount not exceed 31 days. It would additionally specify that no more than 10% of the county's surplus money that may be invested may be invested in the outstanding paper of any single issuing corporation.

(2) Existing law requires the legislative body of a local agency to discuss, consider, and deliberate each decision that involves borrowing in the amount of $100,000 or more as a separate item of business on the agenda of its meeting.

This bill would provide that for this purpose "borrowing" does not include bank overdrafts.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 218 (AB 1486) Maldonado. Horse racing: racing dates.

Existing law generally provides that, with the exception of mixed breed and combined fair racing meetings, the maximum number of racing days that may be allocated to the California Exposition and State Fair or to a county or district agricultural association or citrus fruit fair shall be 14 days each year, concurrent with the period in which general fair activities are conducted, but that any fair racing association that conducted racing in the central or southern zones prior to January 1, 1980, shall be entitled to be allocated up to 3 weeks of racing. Existing law also provides that nothing in these provisions shall diminish the authority of the California Horse Racing Board to establish racing dates.

This bill would additionally require the board to take public testimony and make all determinations on the allocation of racing dates during a public hearing. It would also require all discussions of allocating racing dates by the board or its subcommittees to be conducted during a public hearing.

Ch. 219 (SB 263) Perata. Horse racing: imported races.

(1) Existing law provides that, during the calendar period of its racing meeting, a thoroughbred racing association or fair may distribute the audiovisual signal and accept wagers on out-of-state and out-of-country thoroughbred races without regard to the amount of purses and without the consent of the horsemen's organization, provided that the total number of races imported statewide in any given year does not exceed the total number of races imported in 1998. Existing law also provides that no more than 20 races may be imported on any given day when live thoroughbred racing is being conducted, except in the case of races commencing after specified times that are imported with the permission of specified associations or fairs that are then conducting live racing.

This bill would increase that 20 race limitation to no more than 23 imported races, but would except from that limitation races commencing after specified times that are imported with the permission of specified associations; races imported that are part of the race card of certain prominent races; races imported into the northern zone when there is no live racing being conducted in that zone; and races imported into the combined central and southern zones when there is no live racing being conducted in those combined zones.

(2) Under existing law, all revenues distributed to the state as license fees from horse racing are required to be deposited in the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes.

This bill would authorize additional wagering, and would increase the amount of continuously appropriated license fees, thereby making an appropriation.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 220 (AB 302) Floyd. Public works: prevailing wages.

(1) Existing law defines the term "public works" for purposes of requirements regarding the payment of prevailing wages, the regulation of working hours, and the securing of workers' compensation for public works projects. Existing law further requires that, except as specified, not less than the general prevailing rate of per diem wages be paid to workers employed on public works and imposes misdemeanor penalties for a violation of this requirement.

Existing law provides that for the purposes of provisions of law relating to the payment of prevailing wages, "public works" means, among other things, the hauling of refuse from a public works site to an outside disposal location with respect to contracts involving any state agency, including the California State University and the University of California.

This bill would revise the definition of "public works" for these purposes to include the hauling of refuse from a public works site to an outside disposal location with respect to contracts involving any political subdivision of the state, thereby requiring the payment of prevailing wages in connection with all such contracts involving any local public entity.

Because the violation of prevailing wage requirements by local public entities when engaged in these public works projects would result in the imposition of misdemeanor penalties, this bill would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 221 (SB 143) Burton. Attorneys: discipline.

Existing law provides for disciplinary actions against attorneys.

Existing law imposes various duties on attorneys, including the duty to cooperate and participate in any disciplinary investigation or other regulatory or disciplinary proceeding pending against the attorney. However, existing law provides that this requirement shall not be construed to deprive an attorney of any privilege guaranteed by the Fifth Amendment to the Constitution of the United States or any other constitutional or statutory privileges.

This bill would also provide that this provision shall not be construed to require an attorney to cooperate with a request that requires the attorney to waive any constitutional or statutory privilege or to comply with a request for information or other matters within an unreasonable period of time in light of the time constraints of the attorney's practice. It would also provide that any exercise by an attorney of any constitutional or statutory privilege shall not be used against the attorney in a regulatory or disciplinary proceeding against him or her.

Existing law provides that an attorney complained against shall be given reasonable notice and opportunity to exercise various defense rights.

This bill would require the notice and opportunity to also be fair and adequate, and would specify that the rights include the right to exercise any right guaranteed by the State Constitution or the United States Constitution, including the right against self-incrimination.

The bill would also require the State Bar to compile specified disciplinary statistics relating to who is prosecuted, and to issue a written report on or before June 30, 2001, to the Senate and Assembly Judiciary Committees. The bill would provide that procedures used in the disciplinary process shall ensure that resources of the State Bar are used fairly and equitably in the investigation and prosecution of complaints against all attorneys. It would also provide, as specified, that disciplinary proceedings shall not be brought in disproportionate numbers against attorneys practicing as solo practitioners or in small law firms, as defined, or partnerships, as compared to proceedings brought against attorneys practicing in large law firms. It would prohibit the report from being used as a defense or mitigating factor in any disciplinary proceeding against an attorney.

Existing law requires the Supreme Court to appoint to the State Bar Court a presiding judge, no fewer than 7 hearing judges, and any additional judges as may be authorized by the Legislature.

This bill instead would require, as of November 1, 2000, that the Supreme Court appoint the presiding judge to the State Bar Court and that 5 hearing judges also be appointed, 2 of whom would be appointed by the Supreme Court, one by the Governor, one by the Senate Committee on Rules, and one by the Speaker of the Assembly.

Existing law establishes a Review Department of the State Bar Court that consists of, among others, one Lay Judge and one Review Department Judge.

This bill instead would provide, as of November 1, 2000, for 2 Review Department Judges appointed by the Supreme Court. The bill also would revise the provision authorizing the Board of Governors of the State Bar to provide a rule regarding the review of decisions other than decisions issued by the Review Department of the State Bar Court.

The bill additionally would make technical conforming changes.

Ch. 222 (SB 26) Escutia. Employment: age discrimination.

Existing law makes it an unlawful employment practice for an employer to refuse to hire or employ, or to discharge, dismiss, reduce, suspend, or demote, any individual over the age of 40 on the ground of age, under specified circumstances. In Marks v. Loral Corp. (1997) 57 Cal.App.4th 30, the court held that existing law permits an employer to choose

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

employees with lower salaries, even though this may result in choosing younger employees.

This bill would declare the Legislature's rejection of the opinion in Marks v. Loral Corp., supra, and state that the opinion does not affect existing law in any way, including, but not limited to, the law pertaining to disparate treatment. The bill would also declare the intent of the Legislature that, among other things, the use of salary as the basis for differentiating between employees when terminating employment may be found to constitute age discrimination if use of this criterion disproportionately affects older workers as a group.

Ch. 223 (AB 1598) Battin. Geothermal resources: regulation.

Under existing law, the operation of geothermal resources wells is subject to orders and other regulatory and enforcement actions taken by the State Oil and Gas Supervisor.

This bill would, notwithstanding specified provisions giving the supervisor specific regulatory and enforcement powers regarding geothermal resources, authorize the supervisor to make formal or emergency orders or undertake any other action that the supervisor determines to be necessary for the protection of life, health, property, or natural resources, if the supervisor determines that an emergency exists.

Ch. 224 (AB 787) Dickerson. Commercial vehicles: driver's license endorsements: exemption.

Existing law generally requires the driver of a commercial vehicle to obtain a driver's license endorsement issued by the Department of Motor Vehicles.

This bill would exempt a driver issued a restricted firefighter's license and driving a vehicle operated for the purpose of hauling compressed air tanks for breathing apparatus that do not exceed 2,500 pounds from that endorsement requirement.

Ch. 225 (AB 1414) Papan. Fair Political Practices Commission: administration.

Under the existing Political Reform Act of 1974, the Fair Political Practices Commission has primary responsibility for the impartial, effective administration and implementation of the act.

This bill would prohibit the commission from taking any action to implement the act that would abridge freedom of speech or deny due process of law or the equal protection of the laws.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^{2}/_{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^{2}/_{3}$ vote.

The bill would declare that it would go into effect immediately as an urgency statute.

Ch. 226 (AB 761) Briggs. Medi-Cal: disproportionate share providers.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

Under existing law, the State Department of Health Services is required to make supplemental payments to certain outpatient disproportionate share hospitals based on specified criteria.

Under existing law, each hospital contracting to provide services under the Medi-Cal program pursuant to a selective provider contract that meets the criteria contained in the state medicaid plan for disproportionate share hospital status is eligible to negotiate with the commission for distributions from the Emergency Services and Supplemental Payments Fund.

This bill would create the continuously appropriated Small and Rural Hospital Supplemental Payments Fund, from which distributions may also be made in accordance with provisions similar to those governing the Emergency Services and Supplemental Payment Fund.

Ch. 227 (AB 1161) Soto. Medi-Cal: nursing facilities.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. Services provided under the Medi-Cal program include skilled nursing and intermediate care facility services provided by nursing facilities.

Existing law requires the department and any nursing facility, at the time of either application for Medi-Cal benefits or of the assessment of the resources of a married couple when one spouse is institutionalized, prior to admitting any person, to provide a clear and simple statement, in writing, to the applicant or recipient, to his or her spouse, and to his or her responsible relative, explaining how Medi-Cal eligibility requirements affect their separate and community property.

This bill would no longer require this statement to be provided to a responsible relative, but would require it to be provided to the legal representative or agent, if any, of the applicant or recipient. It would also revise the statement to explain the resource and income requirements of the Medi-Cal program including, but not limited to, certain exempt resources, certain protections against spousal impoverishment, and certain circumstances under which an interest in a home may be transferred without affecting Medi-Cal eligibility.

Ch. 228 (AB 1697) Committee on Aging and Long-Term Care. Income taxes: designations: senior citizens.

Under the Personal Income Tax Law, taxpayers are allowed until January 1, 2000, to contribute amounts in excess of their tax liability for the support of the California Fund for Senior Citizens.

This bill would extend the operation of those contribution provisions until January 1, 2005.

Ch. 229 (AB 128) Granlund. Vehicles: schoolbus, youth bus, and paratransit vehicle driver certificates.

(1) Existing law requires applicants for an original certificate to drive a schoolbus, school pupil activity bus, youth bus, or general public paratransit vehicle to be fingerprinted by the Department of the California Highway Patrol, as specified, on a form provided or approved by the Department of Motor Vehicles for submission to the Department of Justice utilizing the Applicant Expedite Service.

Existing law also requires upon implementation of an electronic fingerprinting program with terminals located statewide and managed by the Department of Justice, that the Department of Justice provide that information to the Department of the California Highway Patrol.

This bill would allow these applicants to be fingerprinted by utilizing an electronic fingerprinting system. The bill would provide that the applicants may also be fingerprinted by a public law enforcement agency, a school district, or a county office of education utilizing an electronic fingerprinting system with terminals managed by the Department of Justice.

(2) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 230 (AB 159) Floyd. Vehicles: dealers: licenses.

(1) Existing law requires every person, except as specified, who applies for a vehicle dealer's license to take and successfully complete a written examination.

This bill would specify that this requirement applies to an applicant for a dealer's license for the purpose of transacting sales of used vehicles on a retail or wholesale basis only and would expressly exclude, in addition to persons who are currently excluded, an applicant for an automobile dismantler's license, an applicant for a motorcycle-only dealer's license or an employee of that dealer, and an applicant for a trailer-only dealer's license or an employee of that dealer.

(2) Under existing law, it is unlawful for a vehicle dealer, as defined, to, among other things, advertise the total price of a vehicle, including all costs to the purchaser at the time of sale, except for specified costs, including fees for a certification of compliance or noncompliance not exceeding $45.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would recast these exclusions by excluding from the total advertised price of the vehicle, emission testing fees, not exceeding $50, and the actual fees changed for the certificates pursuant to statute. This bill would make conforming changes.

Ch. 231 (AB 182) Ackerman. Invasion of privacy: concealed cameras.

Existing law makes it a misdemeanor for anyone to look through a hole or opening or view, by means of any instrumentality, into the interior of a room, where the occupant has a reasonable expectation of privacy, with the intent to invade that privacy.

This bill would make it a misdemeanor to secretly videotape, film, photograph, or record by electronic means, another, identifiable person under or through his or her clothing, for the purpose of viewing the body of, or the undergarments worn by, that other person, without the consent or knowledge of that other person, with the intent to arouse, appeal to, or gratify the lust, passions, or sexual desires of that person and invade the privacy of that other person, under circumstances in which the other person has a reasonable expectation of privacy. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 232 (AB 183) Washington. Vehicles: registration fees.

Existing law, in addition to the other fees imposed for the registration of a vehicle, imposes, with certain exceptions, an additional fee of $1, and continuously appropriates the money to fund local programs relating to vehicle theft crimes. These provisions are to be repealed as of January 1, 2000.

This bill would require each participating county to submit a specified quarterly report to the Department of the California Highway Patrol which would be required to prepare an annual report for the Legislature and participating counties.

The bill would extend the repeal date to January 1, 2005, and would, thus, extend the fee and continuous appropriation to that date, thereby making an appropriation. The bill would make conforming changes.

Ch. 233 (AB 191) Dickerson. Personal property: unclaimed.

Under existing law, the board of supervisors of any county or the governing body of any city may, by ordinance, provide that any bicycle or toy, or both, in the possession of the county sheriff or city police department which have been unclaimed for at least 60 days may, instead of being sold at public auction, be turned over to the probation officer, welfare department, or to specified charitable or nonprofit organizations for use in any program or activity designed to prevent juvenile delinquency.

This bill would provide that this authorization would apply to all unclaimed personal property that has been unclaimed for at least 90 days with a value of no more than $500. It would require that prior to turning over the property the police or sheriff's department must notify the owner, if his or her identity is known or can be reasonably ascertained, by mail, telephone, or by means of a notice published in a newspaper of general circulation, that it possesses the property and where it may be claimed. Because this bill would increase the duties of local law enforcement, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 234 (AB 246) Cunneen. Instruction: sex education.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires that all public elementary, junior high, and senior high school classes that teach sex education and discuss sexual intercourse shall emphasize that abstinence from sexual intercourse is the only protection that is 100% effective against unwanted teenage pregnancy, sexually transmitted diseases, and acquired immune deficiency syndrome (AIDS) when transmitted sexually.

This bill would impose a state-mandated local program by requiring that factual information presented in the course materials and instruction be medically accurate, as defined, and free of racial, ethnic, and gender biases.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 235 (AB 713) Firebaugh. Motor vehicle lease contracts: translation.

Existing law requires any person engaged in a trade or business who negotiates primarily in the Spanish language orally, or in writing, in the course of entering into, among other things, a lease contract for a motor vehicle or a loan or extension of credit secured other than by real property, or unsecured, for use primarily for personal, family or household purposes, to deliver to the party of that contract or agreement and prior to the execution thereof, a Spanish language translation of the contract or agreement, as specified.

Existing law generally regulates lease contracts for motor vehicles, as specified, and prescribes the contents of those contracts. Existing law makes the knowing and willful violation of these regulations a misdemeanor.

This bill would require, as of January 1, 2001, any prospective assignee that provides a lessor under a lease contract for a motor vehicle with any preprinted form for use as a lease contract to also provide the lessor, upon the request of the lessor, with a Spanish language translation of the preprinted form. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 236 (AB 739) Pescetti. Elder abuse: reporting requirements.

Existing law provides for the reporting of actual or suspected physical or other abuse, as defined, of an elder or dependent adult by specified persons and entities and imposes various requirements on state and local agencies in processing, investigating, and reporting on these reports. Violation of those provisions is a misdemeanor.

Existing law also provides that a mandated reporter is not required to report a suspected instance of abuse of an elder or dependent adult in specified circumstances.

This bill would limit that exemption from mandatory reporting requirements to a physician and surgeon, a registered nurse, or a psychotherapist and would revise the circumstances in which the mandated reports is not required to report an instance of abuse.

Because this bill would expand the definition of a crime and would increase the reporting duties of local officials, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 237 (AB 1011) Dickerson. Junction School District.

(1) Existing law, Section 44 of Chapter 204 of the Statutes of 1996 (hereafter Section 44), appropriated $387,000,000 from the General Fund to the Superintendent of Public Instruction for the purposes of providing funds to each regular school in the state for the 1996–97 fiscal year. Existing law requires the use of these funds to be proposed by each school's schoolsite council, schoolwide advisory group, or school support group and approved by the governing board of the school district prior to expenditure of the funds.

This bill would make an appropriation by providing, notwithstanding Section 44 or any other provision of law, that the Junction School District may be reimbursed for expenditures from funds appropriated pursuant to Section 44, regardless of whether the use of the funds was proposed or approved by the schoolsite council, schoolwide advisory group, or school support group prior to expenditure.

(2) This bill would declare that, due to the unique circumstances applicable to Junction School District, a general statute within the meaning of specified provisions of the California Constitution cannot be made applicable and a special statute is necessary.

Ch. 238 (AB 509) Calderon. Insurance: automotive lubricant product warranties.

Existing law defines automobile insurance to include any warranty or guaranty that promises service, maintenance, parts replacement, repair, money, or any other indemnity in the event of loss or damage to a motor vehicle or any part thereof from any cause.

This bill would exclude from that definition an agreement promising repair or replacement of a motor vehicle or part thereof subsequent to a mechanical or electrical breakdown, where the repair or replacement is at either no cost or a reduced cost for the agreement holder, if the obligor is a manufacturer of motor vehicle lubricants, treatments, fluids, or additives, subject to certain specified conditions.

Ch. 239 (AB 706) Torlakson. Community warning systems: donor organizations: immunity.

Existing law provides that a nonprofit public benefit corporation that has donated in whole or in part a community warning system to a county of the ninth class, known as a donor organization, is immune from suit and claims of liability for any injury arising out of the design, development, installation, maintenance, operation, and use of a community warning program or community warning system. Immunity under these provisions does not apply to the management, operation, or maintenance of a community warning system by a donor organization after a donor organization donates a community warning system to a county of the ninth class, except that operation or maintenance of a stationary terminal for communications and operations in accordance with the direction of, or under contract with, a county of the ninth class does not constitute the management, operation, or maintenance of a community warning system.

This bill instead would provide that immunity under these provisions does not apply to the management, operation, or maintenance of a community warning system by a donor organization after a donor organization donates a community warning system to a county of the ninth class, but that immunity shall apply to (1) the installation by a donor organization of alert receiver equipment and initiation box equipment, or (2) the operation or maintenance, or both, by a donor organization of stationary terminal equipment and related initiation box equipment, and alert receiver equipment, or both (1) and (2), for communications and operations, provided that the installation, operation, or maintenance, or all of these, by the donor organization is undertaken without compensation, and in accordance with the direction of, or under contract with, a county of the ninth class, whether before or after the donation.

Ch. 240 (AB 1130) Ashburn. Fruits, nuts, and vegetables: standards.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires the Secretary of Food and Agriculture to create an industry-funded standardization program for fruits, nuts, and vegetables. It is unlawful to violate provisions of this law.

This bill would extend the repeal date of these provisions for 5 years to January 1, 2005. Because a violation of these provisions would be a crime, this bill would impose a state-mandated local program by continuing the existence of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 241 (AB 1379) Granlund. Funeral directors and embalmers.

Existing law requires the Funeral Directors and Embalmers Program to adopt regulations requiring continuing education for funeral directors and embalmers.

This bill would delete the requirement to adopt these continuing education regulations.

Existing provisions of the Funeral Directors and Embalmers Law require the holding in trust of money or securities furnished under a preneed funeral contract. None of the trust corpus may be used for payment of any commission or other expenses of trust administration.

This bill would authorize a trustee to pay taxes on the earnings of any such trust, as specified. Additionally, it would prohibit any of the trust corpus being used for the payment of taxes on the earnings of the trust.

Since a violation of the Funeral Directors and Embalmers Law with respect to preneed funeral arrangements is a crime punishable as a felony or a misdemeanor, this bill would expand the scope of an existing crime and would thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 242 (AB 1617) Havice. Trade and Commerce Agency: international trade: report and plan.

Existing law sets forth the duties of the Trade and Commerce Agency in the development of foreign trade opportunities in the state, including the oversight of overseas trade offices through the California Office of Foreign Trade in the agency.

This bill would require the agency, with input from the academic, private, and public sectors, to review the state's international trade programs and prepare and submit to the Governor and the Legislature both a report of its findings and a plan for improving the coordination, cost effectiveness, and capability of the state's international trade programs to increase the state's international competitiveness. The bill would specify that the agency shall not expend any amount in excess of $50,000 for the one-time, additional costs that may result from the implementation of these provisions. The bill would require the report and plan to be submitted to the Governor and the Legislature within 90 days of the effective date of this bill.

Ch. 243 (AB 1622) Thomson. Surplus state property: lease: City of Vacaville.

Existing law authorizes the Director of General Services, with the consent of the Department of Corrections, to let to the City of Vacaville for a public purpose, for a period not to exceed 20 years, specified real property, and authorizes the renewal of the lease upon its expiration for an additional period not to exceed 20 years.

This bill would extend the period for which the lease would be authorized, and the period for which it may be renewed, to 40 years.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 244 (SB 313) Figueroa. Debit cards: cardholder liability.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, a cardholder may be liable for the unauthorized use of a credit card under specified conditions, and, if liable, not in an amount that exceeds $50.

This bill would limit a defined debit cardholder's liability to $50 under specified circumstances.

Ch. 245 (SB 130) Hayden. Firearms: safety devices.

Existing law generally regulates the transfer and possession of firearms.

This bill would establish the Aroner-Scott-Hayden Firearms Safety Act of 1999 (the act).

This bill would require that, except as provided, effective January 1, 2002, all firearms sold or transferred in this state, or manufactured in this state, be accompanied by a firearms safety device approved by the Department of Justice.

This bill would require the Attorney General, not later than January 1, 2000, to begin development of minimum safety standards for firearms safety devices that are designed to reduce the risk of unintentional injury by firearms. The bill would also provide that the Attorney General report to the Legislature regarding the standards by January 1, 2001, and that the standards be effective January 1, 2002.

The bill would require the Department of Justice, effective January 1, 2001, to certify laboratories to test child safety devices, and would authorize the Department of Justice to charge the laboratories a fee not exceeding the costs of certification. The bill would also require the department to notify the manufacturer or dealer of the department's determination regarding whether the firearms safety device may be sold in this state. The bill would further require the department, not later than July 1, 2001, to compile, publish, and maintain a roster listing all safety devices that have been tested as described above, have been determined by the department to meet the standards for child safety devices, and that may be sold in this state.

This bill would require any packaging or other descriptive material that accompanies a firearm sold or transferred or manufactured in this state, to bear a label with a specified warning. The bill would also require the warning label be affixed to the firearm if the firearm is sold, transferred or delivered in this state without accompanying packaging.

This bill would authorize the Attorney General to recall any gun safe or firearms safety device sold in this state after January 1, 2002, that does not conform to specified provisions of the act.

This bill would require each lead law enforcement agency investigating an incident to report specified information to the State Department of Health Services in connection with unintentional or self-inflicted gunshot wounds sustained by children after the effective date of the act.

This bill would provide that any violation of specified provisions of the act would be punishable by a fine of $1,000. A second violation of those provisions would be punishable by a fine of $1,000 and would render a licensed manufacturer, or a licensed California dealer ineligible to manufacture or sell firearms for 30 days in this state. A third violation of those provisions would render a licensed manufacturer, or a licensed California dealer permanently ineligible to manufacture, or sell firearms in this state.

By creating a new crime, this bill would impose a state-mandated local program.

This bill would declare that the act does not relieve any person from liability to any other person as may be imposed pursuant to common law, statutory law, or local ordinance.

This bill would declare that the act does not apply to the commerce of certain firearms, as specified.

The bill would authorize the Department of Justice to require a firearm dealer to charge a firearm purchaser or transferee a fee not to exceed $1 for each firearm transaction for the purpose of supporting various department program costs, as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 246 (AB 106) Scott. Firearms: safety devices.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law generally regulates the transfer and possession of firearms.

This bill would establish the Aroner-Scott-Hayden Firearms Safety Act of 1999 (the act).

This bill would require that, except as provided, effective January 1, 2002, all firearms sold or transferred in this state, or manufactured in this state, be accompanied by a firearms safety device approved by the Department of Justice.

This bill would require the Attorney General, not later than January 1, 2000, to begin development of minimum safety standards for firearms safety devices that are designed to reduce the risk of unintentional injury by firearms. The bill would also provide that the Attorney General report to the Legislature regarding the standards by January 1, 2001, and that the standards be effective January 1, 2002.

The bill would require the Department of Justice, effective January 1, 2001, to certify laboratories to test child safety devices, and would authorize the Department of Justice to charge the laboratories a fee not exceeding the costs of certification. The bill would also require the department to notify the manufacturer or dealer of the department's determination regarding whether the firearms safety device may be sold in this state. The bill would further require the department, not later than July 1, 2001, to compile, publish, and maintain a roster listing all safety devices that have been tested as described above, have been determined by the department to meet the standards for child safety devices, and that may be sold in this state.

This bill would require any packaging or other descriptive material that accompanies a firearm sold or transferred or manufactured in this state, to bear a label with a specified warning. The bill would also require the warning label be affixed to the firearm if the firearm is sold, transferred or delivered in this state without accompanying packaging.

This bill would authorize the Attorney General to recall any gun safe or firearms safety device sold in this state after January 1, 2002, that does not conform to specified provisions of the act, as specified.

This bill would require each lead law enforcement agency investigating an incident to report specified information to the State Department of Health Services in connection with unintentional gunshot wounds sustained by children after the effective date of the act.

This bill would provide that any violation of specified provisions of the act would be punishable by a fine of $1,000. A second violation of those provisions would be punishable by a fine of $1,000 and would render a licensed manufacturer, or a licensed California dealer ineligible to manufacture or sell firearms for 30 days in this state. A third violation of those provisions would render a licensed manufacturer, or a licensed California dealer permanently ineligible to manufacture, or sell firearms in this state.

By creating a new crime, this bill would impose a state-mandated local program.

This bill would declare that the act does not relieve any person from liability to any other person as may be imposed pursuant to common law, statutory law, or local ordinance.

This bill would declare that the act does not apply to the commerce of certain firearms, as specified.

The bill would authorize the Department of Justice to require a firearm dealer to charge a firearm purchaser or transferee as specified, a fee not to exceed one dollar for each firearm transaction. The fee would be for the purpose of supporting various department program costs related to the act, as specified. The fees would be deposited into a special account created by this bill, to be available upon appropriation for purposes of the program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 247 (AB 295) Corbett. Firearms: gun show promoters.

Existing law provides, with specified exceptions, that it is an offense to bring or possess, among other things, a firearm within any state or local public building.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, in addition, provide an exception for guns brought to gun shows, as specified. By changing the definition of a crime, this bill would impose a state-mandated local program.

Existing law prohibits a person from promoting or otherwise organizing a gun show or event, as defined, unless that person possesses a valid certificate of eligibility. Existing law requires specified information regarding participants who will sell or transfer firearms at a gun show to be provided to local law enforcement within specified time limits. A violation of these provisions is a misdemeanor, and renders a person ineligible for a certificate of eligibility for a period of one year, as specified.

This bill would define a licensed gun show promoter as a person who has obtained a certificate of eligibility, and would require a licensed gun show promoter to pay an annual fee of $85 to the Department of Justice. This bill would require additional information regarding participants who will sell or transfer firearms at a gun show to be provided to the Department of Justice and local law enforcement within other specified time limits. This bill would also provide that failure by a firearms dealer to provide specified information needed by the promoter, or failure by the promoter to supply certain information, as specified, would result in the dealer being prohibited from participating in the gun show or prohibit the gun show from commencing, respectively.

Existing law generally regulates the transfer or sale of firearms at gun shows.

This bill would, (1) require contracts between gun show producers and gun show vendors, (2) impose certain requirements upon vendors in connection with the sale and display of firearms and ammunition at a gun show, as specified, (3) prohibit, except for gun show vendors, peace officers and security personnel, any person at a gun show from simultaneously possessing ammunition and a firearm, (4) require the posting of specified notices in regard to enforcement of firearms sales, (5) require each vendor to provide specified information regarding persons working in the vendor's display area to be kept by the show producer, (6) require all firearms brought onto the premises to be checked and tagged, as specified, (7) provide that no minor shall be admitted to, or be permitted to remain at, a gun show or event unless the minor is accompanied by the minor's parent, grandparent, or legal guardian at all times while at the gun show or event, and (8) provide that a violation of these provisions shall be an infraction or misdemeanor, as specified, thereby creating a new crime and a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 248 (SB 15) Polanco. Firearms.

Existing law makes it a misdemeanor or felony to manufacture or cause to be manufactured, import into the state, keep for sale, offer or expose for sale, give, lend, or possess specified weapons, but not including an unsafe handgun.

This bill, commencing January 1, 2001, would make it a misdemeanor to manufacture or cause to be manufactured, import into the state for sale, keep for sale, offer or expose for sale, give, or lend any unsafe handgun, except as specified. By creating new crimes, this bill would impose a state-mandated local program.

This bill additionally would require every person licensed to manufacture firearms pursuant to federal law who manufactures firearms in this state and every person who imports into the state for sale, keeps for sale, or offers or exposes for sale any firearm to certify under penalty of perjury that every model, kind, class, style, or type of pistol, revolver, or other firearm capable of being concealed upon the person that he or she manufactures or imports, keeps, or exposes for sale is not a prohibited unsafe handgun. By expanding the crime of perjury, this bill would impose a state-mandated local program.

The bill also would require any pistol, revolver, or other firearm capable of being concealed upon the person manufactured in this state, imported into the state for sale, kept for sale, or offered or exposed for sale, to be tested by an independent laboratory certified by the Department of Justice to determine whether that pistol, revolver, or other firearm capable of being concealed upon the person meets or exceeds specified

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

standards defining unsafe handguns. The bill would require the Department of Justice to certify laboratories for this purpose on or before January 1, 2001.

The bill also would require the Department of Justice, on and after January 1, 2001, to compile, publish, and thereafter maintain a roster listing all of the pistols, revolvers, and other firearms capable of being concealed upon the person that are not unsafe handguns by the manufacturer, model number, and model name. The bill would specify that its provisions do not apply to the sale, loan, or transfer of any pistol, revolver, or other firearm capable of being concealed upon the person listed as a curio or relic. The bill would authorize the department to charge every person in this state who is licensed as a manufacturer of firearms pursuant to federal law, and any person in this state who manufactures or causes to be manufactured, imports into the state for sale, keeps for sale, or offers or exposes for sale any pistol, revolver, or other firearm capable of being concealed upon the person in this state, an annual fee not exceeding the costs of preparing, publishing, and maintaining the roster and the costs of research and development, report analysis, firearms storage, and other program infrastructure costs necessary to implement the bill.

The bill would state the intent of the Legislature that the Department of Justice pursue an internal loan from special fund revenues available to the department to cover startup costs for the unsafe handgun program established pursuant to the bill. The bill would require the department to repay any loan with the proceeds of fees collected under that program within 6 months.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 249 (AB 189) Ackerman. Bank and corporation taxes: limited liability companies.

The Bank and Corporation Tax Law provides that in the case of a limited liability company the term "tax" includes a specified tax and fee.

This bill would delete an erroneous reference to a limited liability company classified as a partnership.

Ch. 250 (AB 197) Ackerman. Limited partnerships and limited liability companies: conversion.

Existing provisions of the California Revised Limited Partnership Act govern limited partnerships. Limited liability companies are regulated pursuant to the Beverly-Killea Limited Liability Company Act.

This bill would specify a comprehensive scheme for the conversion of limited partnerships and limited liability companies into an other business entity (defined to include a corporation, business trust, and real estate investment trust), or a foreign limited partnership or a foreign limited liability company, as applicable, subject to certain conditions. The bill would also specify certain service of process requirements with respect to the merger or conversion of partnerships to other business entities and the surviving domestic or foreign business entities.

Ch. 251 (AB 213) Romero. California State University: trustees.

Existing law establishes the California State University and provides for the administration of the university by the Trustees of the California State University. Existing law provides for the membership of the Trustees of the California State University to include 5 specified ex officio members, 16 appointive members appointed by the Governor and subject to confirmation by the Senate, a student member appointed by the Governor, and a faculty member appointed by the Governor. Existing law requires that the Governor appoint the student member for a 2-year term from a list of not more than 5 persons furnished by student representatives of each of the universities and colleges of the California State University.

This bill would increase the number of student members of the Trustees of the California State University to 2. The bill would require that the term of one of these

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

student members commence in an even-numbered year and that the term of the other student member commence in an odd-numbered year. The bill would require that the student members be appointed from lists furnished by the governing board of any statewide student organization that represents the students of the California State University and the student body organizations of the campuses of the California State University. The bill would authorize a student member who graduates from his or her college or university on or after January 1 of the 2nd year of his or her term of office to serve the remainder of the term. The bill would provide that during the first year of a student member's term, a student member shall be a member of the board, authorized to fully participate in discussion and debate at all meetings of the board and its committees, but not authorized to vote. The bill would provide that if a student member resigns from office or a vacancy is otherwise created in that office during the second year of a student member's term, the remaining student member shall immediately assume the office created by the vacancy and all of the participation privileges of the second-year student member, including the right to vote, for the remainder of that term.

Ch. 252 (AB 352) Migden. Professional licensing.

Existing law establishes the Board of Behavioral Sciences in the Department of Consumer Affairs for the purpose of licensing and regulating clinical social workers.

Existing law requires other state boards that are responsible for licensing and regulating various occupations and professions to create and maintain a central file containing the names of all persons who hold a license, certificate, or similar authority from that board. That file includes, among other things, written reports containing disciplinary information, as specified.

This bill would make those provisions applicable to the Board of Behavioral Sciences.

Ch. 253 (AB 410) Lempert. Escrow agents.

Existing law, the Escrow Law, provides for the licensure and regulation of escrow agents. Every person licensed pursuant to that law is required to participate as a member of the Escrow Agents' Fidelity Corporation (Fidelity Corporation).

This bill would limit that membership requirement to those persons engaged in the business of receiving escrows in certain types of transactions. It would limit Fidelity Corporation coverage to loss of trust obligations with respect to those transactions and would require escrow agents to provide indemnity coverage with respect to other transactions, as specified. The bill would require the deposit of escrow funds into certain types of accounts and financial institutions, as specified. The bill would require that under certain circumstances an escrow agent maintain separate escrow trust accounts.

Existing law provides that a willful violation of the Escrow Law is a crime punishable as either a felony or misdemeanor.

By establishing new requirements for escrow agents, the violation of which would be a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 254 (AB 451) Maddox. Counterfeiting: computer systems.

(1) Existing law provides that every person who makes, or knowingly has in his or her possession, any apparatus made use of in counterfeiting current coins or bills is punishable by imprisonment in the state prison for 2, 3, or 4 years; and that apparatus must be destroyed.

This bill, to be known and cited as the "Officer Don Burt Act of 1999," would provide that if the counterfeiting apparatus used to violate the above provision is a computer, computer system, or computer network, the apparatus or machine shall be subject to forfeiture, as specified, except as provided. The bill would make conforming changes to the forfeiture provision. By revising the penalties for an existing crime, this bill would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law provides that any computer, computer system, computer network, or any software or data, owned by the defendant, that is used during the commission of specified offenses shall be subject to forfeiture, as specified.

This bill would add to the list of offenses for which a computer, computer system, computer network, or any software or data used in the commission of the offense would be subject to forfeiture. This bill would clarify a provision setting forth an exemption for any person who accesses his or her employer's computer system, computer network, computer program, or data when acting within the scope of his or her lawful employment and would provide an exemption, in addition, for any person who accesses his or her employer's computer system, computer network, computer program, or data when acting outside of his or her lawful employment if there is no injury or if the value of supplies or computer services used does not exceed $100. By increasing the penalties for existing crimes, this bill would impose a state-mandated local program.

This bill would also provide that forfeiture would not apply to property used solely in the commission of an infraction. The bill would provide that forfeiture would not apply to the property of a minor's parent or guardian where the property was located in the family's primary residence during the commission of the crime, and the parent or guardian has made full restitution, as specified. The bill would authorize a court to exercise its discretion to deny forfeiture where the court finds the defendant or juvenile, as specified, is not likely to use the property otherwise subject to forfeiture for future illegal acts.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 255 (AB 478) Cox. Insurance: surplus line brokers: certificates.

(1) Existing law requires certificates evidencing the placement of insurance with an eligible nonadmitted insurer to be in the name of the issuing surplus line broker and to contain specified provisions and disclosures. Existing law requires a certificate of insurance or verification of insurance provided as evidence of insurance in lieu of an actual policy of insurance to contain specified statements relating to the fact the certificate or verification is not an insurance policy, and does not amend, extend, or alter the coverage afforded by the policies listed in the certificate or verification.

This bill would define a "surplus line broker certificate" and would exempt surplus line broker certificates from the provision of law that requires a certificate of insurance or verification of insurance to contain specified statements relating to the fact that the certificate or verification is not an insurance policy, and does not amend, extend, or alter the coverage afforded by the policies listed in the certificate or verification.

(2) Existing law prohibits a surplus line broker from placing any coverage with a nonadmitted insurer unless the nonadmitted insurer meets specified requirements, including providing the Insurance Commissioner with specified documents.

This bill would require in that regard that every nonadmitted insurer provide a list of all California surplus line brokers authorized by the insurer to issue policies on its behalf in California, and any additions to or deletions from that list.

Ch. 256 (AB 617) Campbell. Telephone corporations: customer right of privacy.

Under existing law, the disclosure of any information by an interexchange telephone corporation, a local exchange telephone corporation, or a radiotelephone utility, in good faith compliance with the terms of a state or federal court warrant or order or administrative subpoena issued at the request of a law official or other federal, state, or local governmental agency for law enforcement purposes, is a complete defense against specified civil actions relating to the right of privacy. Existing law defines the term "radiotelephone utility" for that purpose to mean any public utility licensed by the Federal Communications Commission pursuant to specified federal regulations and certificated by the Public Utilities Commission to provide one-way or two-way or one-way and two-way radiotelephone services in this state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would replace "radiotelephone utility" with "a provider of commercial mobile radio service " and would define "commercial mobile radio service", for purposes of these provisions.

Ch. 257 (AB 693) Machado. Structural pest control: solicitation by unlicensed persons.

(1) Existing law provides that it is unlawful for any unlicensed individual or unregistered business entity to engage or offer to engage in the practice of structural pest control, as defined. Existing law also provides, however, that the practice of structural pest control does not include price quotations given by unlicensed employees on behalf of a registered company in response to a request for that information. Existing law also provides that any violation of the law governing structural pest control is a crime and subject to specified criminal penalties.

This bill would authorize an unlicensed person to solicit pest control work on behalf of a structural pest control company, provided that the company is registered and the unlicensed individual does not perform or offer to perform any act for which an operator, field representative, or applicator license is required. This bill would define solicitation in this context to mean the introduction of consumers to a registered company and its services, the distribution of advertising literature, and the setting of appointments on behalf of a licensed operator or field representative.

This bill would additionally provide that it is unlawful for an unlicensed individual soliciting pest control work on behalf of a registered pest control company to perform or offer to perform any act for which an operator, field representative, or applicator license is required, and for sole proprietorships to engage in the practice of structural pest control unless registered in accordance with specified provisions of law. This bill would also provide that it is unlawful for an unlicensed individual to offer opinions or make recommendations concerning the need for structural pest control work. The bill would specify the applicability of certain penalties.

Because this bill would expand the activities or practices that are unlawful under the provisions of law governing structural pest control, it would expand the definition of a crime and thereby would impose a state-mandated local program.

This bill would also make technical, nonsubstantive changes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 258 (AB 755) Corbett. Public works contracts: County of Alameda.

The Local Agency Public Construction Act establishes procedures for bidding and awarding of contracts by counties. Certain counties, including the County of Alameda, may follow alternative procedures for projects that do not exceed $50,000,000.

This bill would provide that, notwithstanding the $50,000,000 limitation, the County of Alameda is authorized to award a contract in excess of $50,000,000 for the design and construction of the Alameda County Juvenile Justice Complex.

Ch. 259 (AB 799) Keeley. County peace officers: retirement: Monterey County.

The Public Employees' Retirement Law prohibits any contract or contract amendment between the Public Employees' Retirement System and any contracting agency from providing different retirement benefits for any subgroup within specified local membership classifications, including county peace officers. County peace officers are defined to include, among others, the sheriff, specified officers or employees of the sheriff's office, and specified employees in the district attorney's office of a contracting agency.

This bill would authorize the County of Monterey to provide pension and other benefits , as specified, to certain sworn personnel in the sheriff's and district attorney's offices, according to specified formulas, which benefits would be different from the benefits provided to other county peace officers. The bill would provide for the repeal of these provisions on January 1, 2002.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 260 (AB 845) Maddox. Insurance Commissioner: cease and desist orders.

Existing law specifies the powers and duties of the Insurance Commissioner with respect to regulation and licensing of the business of insurance. Under various provisions, the commissioner is authorized to issue a cease and desist order against persons engaged in certain unlawful activities.

This bill would provide that the commissioner has the authority to issue a cease and desist order against any person acting as, or holding himself, herself, or itself out as, an insurance agent or broker without being so licensed, and against any person holding out that person as transacting, or transacting, the business of insurance without having been issued a certificate of authority. The commissioner would be authorized to issue the cease and desist order without holding a hearing prior to issuance of the order, and to impose a civil penalty of up to $5,000 for each day the order is violated. The bill would permit a person against whom a cease and desist order is issued to request the commissioner for a hearing on the order, and to have a review of the hearing proceedings and the order, both pursuant to the Administrative Procedure Act.

Ch. 261 (AB 951) Wiggins. Bay pilots.

(1) Existing law provides for retirement benefits for pilots for the Bays of San Francisco, San Pablo, and Suisun and specified inland waters and for the purposes of that law distinguishes between service as a pilot and service as an inland pilot. To determine an inland pilot's full years of service for retirement benefit purposes, any periods of service that an inland pilot has performed as a pilot is required to be added to any service time performed as an inland pilot after January 1, 1993.

This bill would permit any periods of service that an inland pilot has performed as a pilot to be added to service time performed as an inland pilot after January 1, 1987. The bill would make related changes.

(2) Existing law establishes a program for licensing of pilots for the Bays of San Francisco, San Pablo, and Suisun, administered by the Board of Pilot Commissioners. Existing law specifies the rates for pilotage for vessels entering or leaving those bays through the Golden Gate, including $7.35 per draft foot of the vessel's deepest draft and fractions of a foot pro rata and an additional charge of 64.88 mills per high gross registered ton, adjusted by the board, as prescribed.

This bill would increase the rate to $8.11 per draft foot and the additional charge to 73.01 mills per high gross registered ton. The bill would provide for a decrease in the mill rate once the number of licensed pilots is reduced to 60 and an increase in the mill rate for any subsequent increase in the number of pilots. The bill also would provide for an incremental rate of additional mills per high gross registered ton as is necessary and authorized by the board to recover the pilots' costs of obtaining new pilot boats.

Existing law also imposes a board operation surcharge of 7.5% of pilotage fees, to be deposited in the Board of Pilot Commissioners' Special Fund and used to support the board, and imposes an additional charge for pension benefits payable to a fiduciary agent, as specified. The fund is continuously appropriated for the payment of the compensation and expenses of the board, its officers and employees, and the pilot training programs.

This bill would increase rates imposed pursuant to these provisions, incrementally, on January 1, 2000, January 1, 2001, and January 1, 2002, as specified.

(3) Existing law requires the board to adopt a schedule of pilotage rates for those operations that are not provided for in (1).

This bill would increase these rates, incrementally, on January 1, 2000, January 1, 2001, and January 1, 2002, as specified.

(4) Because the bill would increase the amount of money deposited in a continuously appropriated fund, the bill would make an appropriation.

Ch. 262 (AB 1018) Cox. Freeway service authority: Sacramento Area Council of Governments: bikeways: callboxes.

(1) Existing law authorizes the establishment of a service authority for freeway emergencies in counties, as specified. The Sacramento Area Council of Governments may function as the service authority in the Counties of Sacramento, Yolo, Yuba, Sutter, and San Joaquin upon the adoption of specified resolutions by the counties and cities, and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to act as the service authority for any county that is not already a member of the council if the resolution is adopted by that county and the cities within that county.

This bill would revise those provisions to instead authorize the council to act outside the 5-county area in another county that is not within another multicounty service authority.

(2) The California Bicycle Transportation Act provides for the establishment of bikeways, as defined, and provides for funding from the Bicycle Transportation Account and the Bikeway Account in the State Transportation Fund.

This bill would authorize the Sacramento Area Council of Governments, as a service authority, to purchase, operate, and maintain callboxes on class 1 bikeways.

Ch. 263 (AB 1051) Kaloogian. Estates: claims.

(1) Existing law governs the disposition of community and quasi-community property.

This bill would establish a presumption that the transfer of community and quasi-community property to a revocable trust is an agreement that those assets retain their character in aggregate for purposes of any division provided by the trust.

(2) Existing law provides for the administration of decedents' estates and the administration of claims against an estate.

This bill would eliminate the requirement that a creditor of an estate establish that his or her attorney had no actual knowledge of the administration of the estate in order to establish liability upon the part of the personal representative for failure to notify the creditor of the administration of the estate; revise the requirements for notifying a creditor of the allowance or rejection of his or her claim; and make technical changes.

(3) Existing law requires a creditor who files a claim during the administration of a decedent's estate to file before the expiration of the later of either 4 months after the date letters of administration are first issued or 60 days after the date notice of administration is given to the creditor, if notice is at least 60 days prior to the expiration of a specified one-year statute of limitations.

This bill would delete the requirement that the notice be at least 60 days prior to the expiration of the one-year statute of limitations.

Ch. 264 (AB 1404) Dutra. California Housing Finance Agency: bonds.

Existing law sets forth various powers and duties of the California Housing Finance Agency in conjunction with the financing of housing. Under existing law, the agency is authorized to issue revenue bonds in an amount not exceeding $6,750,000,000 outstanding at any time, exclusive of indebtedness incurred to refund or renew bonds previously issued by the agency, the proceeds of which are used to finance housing developments and other residential structures.

The bill would make an appropriation by increasing by $2,200,000,000 the authorization of bonds to be issued by the agency, which under existing provisions of law are required to be deposited in the continuously appropriated California Housing Finance Fund.

Ch. 265 (SB 103) Johannessen. Dog bites: penalties.

Existing law provides, except as specified, that when any person owns or has custody or control of a dog trained to fight, attack, or kill, and, if as a result of that person's failure to exercise ordinary care, the dog bites a human being on 2 separate occasions, or on one occasion causing substantial physical injury, that person is guilty of a misdemeanor.

This bill would provide that the offense is punishable as a felony or misdemeanor. This bill would impose a state-mandated local program by increasing local prosecution costs.

This bill would also provide that the above-described provisions of law do not apply to a veterinarian, an on-duty animal control officer, or peace officer assigned to a canine unit.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 266 (SB 232) Committee on Local Government. Validations

This bill would enact the Second Validating Act of 1999, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 267 (SB 233) Committee on Local Government. Validations.

This bill would enact the Third Validating Act of 1999, which would validate the organization, boundaries, acts, proceedings, and bonds of the state and counties, cities, and specified districts, agencies, and entities.

Ch. 268 (SB 287) Baca. Law enforcement officers: arrest of foreign nationals.

Existing law requires every law enforcement agency in California to fully cooperate with the United States Immigration and Naturalization Service regarding any person who is arrested if he or she is suspected of being present in the United States in violation of federal immigration laws.

This bill would require California law enforcement agencies to ensure that policy or procedure and training manuals incorporate language based on the provisions of the 1963 Vienna Convention on Consular Relations Treaty. The bill also would require every peace officer, upon the arrest and booking or detaining of a foreign national for more than 2 hours, to advise the foreign national that he or she has a right to communicate with an official from the consulate of his or her country, except as specified. The bill additionally would require the peace officer or a pertinent official of his or her agency or department to follow prescribed procedures in notifying and accommodating the consular officers at the consulate of the arrestee. Because this bill would implement a federal act, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 269 (SB 614) Morrow. Highways: permanent road division: formation.

(1) Article XIII D of the California Constitution, which was added pursuant to the approval by the electorate of Proposition 218 at the November 5, 1996, general election, generally requires that assessments, fees, and charges be submitted to property owners for approval or rejection after the provision of a written notice and the holding of a public hearing. The Proposition 218 Omnibus Implementation Act prescribes specific procedures and parameters for local jurisdictions in complying with Article XIII D of the California Constitution.

Existing law authorizes the board of supervisors of a county, by resolution, to form a permanent road division. Existing law prescribes procedures for protesting the proposal and for a hearing thereon, and specifies conditions under which an election is required.

This bill would authorize a board of supervisors to form a permanent road division without reference to a specific road project, as specified, and to create zones within the division for specific permanent road projects, with differing special taxes or parcel charges. The bill would require the board of supervisors to comply with specified notice, hearing, and protest requirements.

(2) Existing provisions of the Government Code set forth provisions governing the boundaries of cities, counties, and other agencies.

This bill would exempt from these boundary requirements any zones within permanent road divisions where the zones are formed for a specific permanent road project.

Ch. 270 (AB 224) Knox. Workers' compensation: peace officers: disability.

(1) Under existing law, certain peace officers and other specified public employees are entitled to leave of absence without loss of salary in lieu of temporary disability or maintenance allowance payments while disabled by injury or illness arising out of and in the course of their duties.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would extend that provision to specified peace officers employed on a regular, full-time basis by a county of the first class.

(2) This bill would make legislative findings and declarations as to the necessity for a special statute.

Ch. 271 (AB 814) Committee on Public Employees, Retirement and Social Security. County employees' retirement: service credit for uncompensated leave.

Under the County Employees Retirement Law of 1937, a member who returns to active service after an uncompensated leave of absence due to illness may receive service credit for the period of the absence, up to 12 months, if specified conditions are met.

This bill would allow a member, who wishes to apply for a nonservice-connected disability retirement allowance, to receive service credit for the period of an uncompensated leave of absence due to illness, up to 12 months, if specified conditions are met. The bill's provisions would be applicable only if adopted by the county board of supervisors.

Ch. 272 (AB 1528) Strom-Martin. State employee benefits.

Existing law authorizes the appointing power of a state agency to expend not more than $75 for a certificate, plaque, or memento to be presented to an employee or a retired employee who has completed 25 or more years of state service.

This bill would raise that amount to $90 and, beginning January 1, 2005, and every 5 years thereafter, would authorize the Director of Personnel Administration to adjust this limit to reflect the average rate of inflation.

(1) Existing law provides that nonrepresented state employees are eligible for industrial disability leave benefits for up to 52 weeks within a 2-year period.

This bill would clarify the application of that eligibility period to enhanced industrial disability leave benefit provisions.

(2) The Public Employees' Medical and Hospital Care Act, provides health benefits plan coverage to public employees and annuitants meeting the eligibility requirements prescribed by the Board of Administration of the Public Employees' Retirement System. The act defines the term "employee" for these purposes. The act also provides a special definition of "eligible employee" as it applies to state employees in State Bargaining Unit 8 or 16.

This bill would delete state employees in State Bargaining Unit 8 from the application of the special definition of "eligible employee" for purposes of the act.

(3) The State Employees' Dental Care Act, provides dental care plan coverage to public employees and annuitants meeting the eligibility requirements prescribed by the Board of Administration of the Public Employees' Retirement System. Existing law provides that notwithstanding particular provisions of the act, state employees in State Bargaining Unit 6, 8, or 16 may receive a percentage of the employer's contribution payable for annuitants if the employees are credited with 10 years of state service.

This bill would delete a provision making the application of that limitation retroactive to specified employees in State Bargaining Unit 16.

(4) The bill would incorporate additional changes to Section 22754 of the Government Code, made by this bill and AB 211 to take effect if both bills are enacted and this bill is enacted last.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 273 (SB 1301) Kelley. Smog check: remote sensing equipment.

Existing law establishes a motor vehicle inspection and maintenance (smog check) program, administered by the Department of Consumer Affairs, that requires inspection of vehicles biennially upon renewal of registration and at certain other times, as specified. Existing law authorizes the department to conduct a pilot program to except from the biennial smog check requirement those vehicles that may be jointly determined by the department and the State Air Resources Board to warrant exception, as provided.

This bill would require the department, on or before June 30, 2000, as part of the pilot program, to evaluate standards for the operation of remote sensing equipment, evaluate the need to certify individuals who operate that equipment, and evaluate the need to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

license entities that provide remote sensing services under the direction of the department.

Ch. 274 (SB 943) Dunn. Property taxation.

Existing property tax law provides for the levy of an annual ad valorem tax on personal property, with certain exceptions, based upon the full value of that property. Existing property tax law, until January 1, 2000, permits local agencies, excluding school districts, to rebate property tax revenue received from economic revitalization manufacturing property, as defined, for a period of 5 fiscal years from the date the property was placed in service, commencing with the 1994–95 fiscal year. Economic revitalization manufacturing property is defined as tangible personal property meeting certain requirements.

The Personal Income Tax Law and the Bank and Corporation Tax Law allow to qualified taxpayers a manufacturing investment credit against taxes imposed by those laws in an amount equal to 6% of the amount paid or incurred during the taxable or income year for qualified property that is placed in service in this state and, in general, includes specified types of tangible personal property used in connection with manufacturing activities.

This bill would revise the definition of economic revitalization manufacturing property to also require that it is property described as "qualified property" for purposes of the manufacturing investment tax credit under the Personal Income and Bank and Corporation Tax Laws. This bill would extend the repeal date until January 1, 2003.

This bill would require the Legislative Analyst to report to the Legislature, on or before January 1, 2002, with respect to these property tax rebate provisions.

Ch. 275 (AB 65) Ducheny. Indian Child Welfare Act.

Existing federal law, contained in the Indian Child Welfare Act, specifies that an Indian tribe shall have exclusive jurisdiction, except in specified cases, over any custody proceeding involving an Indian child, as defined, and specifies procedures and rights applicable to state court proceedings involving an Indian child.

This bill would direct the courts to strive to promote the stability and security of Indian tribes and families and to comply with the Indian Child Welfare Act in all Indian child custody proceedings, as specified, and would require that the federal act be applied in those proceedings if the tribe determines that an unmarried person, who is under the age of 18 years, is a member of the tribe or is eligible for membership and is a biological child of a member of a tribe. The bill would also require state and local authorities to transfer child custody proceedings to the tribe within a specified period in cases where an Indian child has been removed from parental custody by those authorities and the tribe has exclusive jurisdiction, as specified.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 276 (AB 116) Mazzoni. Basic instructional materials: commercial brand name, product, corporate or company logo.

(1) Existing law requires all instructional materials adopted by any governing board for use in schools to be accurate, objective, and current, and suited to the needs and comprehension of pupils.

This bill would also require instructional materials to use proper grammar and spelling, except as specified.

(2) Under existing law, the State Board of Education is required to adopt basic instructional materials for use in kindergarten and grades 1 to 8, inclusive, for school district governing boards. Existing law requires the state board, in reviewing and adopting or recommending for adoption basic instructional materials, to ensure that, in its judgment, the basic instructional materials are consistent with the criteria and the standards of quality prescribed in the state board's adopted curriculum framework, comply with certain statutory requirements and the state board's guidelines for social content, are factually accurate and incorporate principles of instruction reflective of current and confirmed research, adequately cover the subject area for the grade level or levels for which they are submitted, and meet certain other criteria.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would add to these criteria, a determination by the state board that these basic instructional materials, do not contain materials, including illustrations, that provide unnecessary exposure to a commercial brand name, product, or corporate or company logo. This bill would further provide that basic instructional materials, including illustrations, that contain a commercial brand name, product, or corporate or company logo may not be used unless the board makes a specific finding, including among others, that the use of the commercial brand name, product, or corporate or company logo is appropriate. The bill would require the State Board of Education to give publishers the opportunity to modify instructional materials that do not comply with these provisions. The bill would provide that nothing in those provisions shall be construed to prohibit the publishers of instructional materials from including whatever corporate name or logo on the instructional materials that is necessary to provide basic information about the publishers, to protect its copyright, or to identify 3rd party sources of content. The bill would also permit the State Board of Education to adopt regulations that provide for other exceptions to those provisions. The bill would require the Superintendent of Public Instruction to develop, and the State Board of Education to adopt, guidelines to implement those provisions.

This bill would also prohibit the governing board of a school district from adopting basic instructional materials, and other instructional materials required to be legally and socially compliant, including illustrations, that provide any exposure to a commercial brand name, product, or corporate or company logo that is inconsistent with guidelines or frameworks adopted by the state board and would provide that the governing board may not adopt basic instructional materials, and other instructional materials required to be legally and socially compliant, including illustrations, that contain a commercial brand name, product, or corporate or company logo unless the governing board makes a specific finding that the use of the commercial brand name, product, or corporate or company logo in the instructional materials is appropriate.

Ch. 277 (AB 134) Thomson. Transportation: bicycles.

(1) Existing law requires lights shown by official traffic control signals to apply to drivers of vehicles and pedestrians.

This bill, until January 1, 2005, would apply color-lighted bicycle symbols, as specified in the bill, shown by official traffic control signals, to the above provisions. The bill would authorize those bicycle signals to be used only at locations that meet specified standards adopted by the Department of Transportation. The bill also, until January 1, 2005, would include operators of bicycles within the scope of the provisions. Because this bill would expand the scope of an existing crime, the bill would impose a state-mandated local program.

(2) Existing law allows cities and counties to adopt ordinances or resolutions governing the licensing and registration of bicycles. Existing law sets forth a fee schedule for license and registration certificates.

This bill would double the amounts on the fee schedule for license and registration certificates.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 278 (AB 168) Ackerman. Transportation: funding: Orange County.

Existing law apportions funds to each county from the Highway Users Tax Account in the State Transportation Fund for county road projects.

However, with regard to Orange County, $1,916,667 is apportioned during each calendar month commencing with July 1, 1997, and ending June 30, 2013, to the Orange County Transportation Authority instead of the county, with the remaining apportionments paid to the county.

This bill would authorize the authority to participate in a funding exchange program whereby the authority would exchange with the Department of Transportation funds apportioned and paid to the authority as specified above for certain state funds

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

appropriated to the department. The bill would impose certain conditions upon the exchange of funds.

The bill would provide that its provisions shall become inoperative on June 30, 2003, and would be repealed on January 1, 2004, unless a later enacted statute deletes or extends those inoperative and repeal dates.

Ch. 279 (AB 292) Davis. Teachers.

Under existing law, there is the California Beginning Teacher Support and Assessment System, administered jointly by the Commission on Teacher Credentialing and the Superintendent of Public Instruction. Existing law requires the commission and the superintendent to approve the most cost-effective programs of support and assessment and to ensure that programs meet the Standards of Quality and Effectiveness for Beginning Teacher Support and Assessment and support beginning teachers in meeting the competencies described in the California Standards for the Teaching Profession.

Under existing law, participation in the California Beginning Teacher Support and Assessment System is voluntary for teachers, school districts, and county offices of education, and participation by certificated employees may not be made a condition of employment.

This bill would express the intent of the Legislature to encourage the governing boards of school districts to review and consider the performance based teacher assessment methodology of the National Board for Professional Teaching Standards as a model for local district evaluation standards and procedures.

Existing law, commonly known as the Stull Act, requires the governing board of a school district to establish standards of expected pupil achievement at each grade level in each area of study and to establish and define job responsibilities for certificated noninstructional employees. Existing law requires that the governing board of a school district evaluate and assess certificated employee performance as it reasonably relates to, among other things, instruction techniques, adherence to curricular objectives, and pupil progress. Existing law requires a school district to develop and adopt guidelines for the purpose of this evaluation and assessment.

This bill would authorize the governing board of a school district to include in the guidelines, with the agreement of the exclusive representative of the certificated employees of the district, standards from the National Board for Professional Teaching Standards or the California Standards for the Teaching Profession if the standards to be included are consistent with the Stull Act.

Ch. 280 (AB 396) Havice. Highways: outdoor advertising.

The Outdoor Advertising Act regulates the placement of advertising displays adjacent to and within specified distances of highways that are part of the national system of interstate and defense highways and federal-aid highways. The act, except as specified, prohibits any advertising display from being placed or maintained on property adjacent to a section of a freeway that has been landscaped if the advertising display is designed to be viewed primarily by persons traveling on the main-traveled way of the landscaped freeway.

This bill would additionally exempt from that prohibition a nonconforming display erected by certain described cities, if the display meets prescribed conditions.

The bill would make legislative findings and declarations.

Ch. 281 (AB 457) Scott. School employees: sex offense: definition.

(1) Existing law requires the Commission on Teacher Credentialing to deny any application for the issuance of a credential made by an applicant who has been convicted of a violent or serious felony, as defined.

This bill would also require the commission to deny any application for the issuance of a credential made by an applicant that has been convicted of one of the offenses that would require revocation of a credential.

(2) Existing law defines "sex offense" for purposes of various provisions relating to the employment of school employees including, among others, provisions that prohibit school districts from employing or retaining in employment persons in public school service who have been convicted of, or who have been convicted following a plea of nolo

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

contendere to charges of, a sex offense and require a school district and county office of education to immediately place upon compulsory leave of absence an employee who is charged with a sex offense. Among the offenses constituting a sex offense are the sexual exploitation of a child and the employment or use of a minor to perform prohibited sexual acts.

This bill would add to the offenses constituting a sex offense other offenses relating to the depiction of a minor personally engaging in or personally simulating sexual conduct, as defined. By adding these offenses to those offenses defined as a sex offense, the bill would prohibit a school district from employing or retaining in employment persons in public school service who have been convicted of, or who have been convicted following a plea of nolo contendere to charges of, an offense added by this bill to those defined as a sex offense and require a school district and county office of education to immediately place upon compulsory leave of absence an employee who is charged with an offense added by this bill to those defined as a sex offense, thereby imposing a state-mandated local program.

(3) Existing law authorizes a county or city and county board of education, except where that service is provided by a school district authorized to register certification documents, to issue temporary certificates for the purpose of authorizing salary payments to certified employees whose credential applications are being processed or to personnel employed in children's centers or other preschool educational programs whose permit applications are being processed.

This bill would prohibit a county or city and county board of education from issuing a temporary certificate to an applicant whose teaching credential is revoked or suspended.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 282 (AB 467) Torlakson. Traffic violator school operator: requirements.

Under existing law, in order to qualify as a traffic violator school operator, a person is required to meet specified criteria in order to be issued a traffic violator school operator's license issued by the Department of Motor Vehicles, including having worked for an established California traffic violator school as an instructor for a period of not less than 500 hours of actual inclass instruction.

This bill would alternatively allow for the work requirement, to be achieved by working for an established commercial driver training and education program operated by a bona fide labor organization.

Ch. 283 (AB 712) Firebaugh. California State University: disciplinary actions against employees.

Existing law establishes the California State University and authorizes the operation of its various campuses under the administration of the Trustees of the California State University. Existing law sets forth a procedure for employee discipline that contemplates, under specified conditions, the dismissal, demotion, suspension, or reassignment of an employee. Under that procedure, an employee may answer a notice of reassignment, or may appeal a dismissal, suspension, or demotion, within 20 days.

This bill would extend the period allowed for an answer or appeal to 30 days.

Ch. 284 (AB 808) Strom-Martin. Spousal support.

Existing law requires the court to consider the age and health of the parties, among other circumstances, in ordering spousal support.

This bill would require the court when considering the age and health of the parties to include in that consideration emotional distress resulting from domestic violence

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

perpetrated against the supported party by the supporting party where the court finds documented evidence of a history of domestic violence, as specified.

Ch. 285 (AB 968) Ducheny. California State University: Program for Education and Research in Biotechnology.

Existing law establishes the California State University and authorizes the operation of its various campuses under the administration of the Trustees of the California State University.

This bill would express legislative findings and declarations regarding the California State University Program for Education and Research in Biotechnology. The bill would express legislative intent to provide additional state funding, if state revenues allow, to the program at a level that will maintain and enhance its role in the preparation of the work force in this industry.

Ch. 286 (AB 1137) Strom-Martin. Week of the School Administrator.

Existing law authorizes the governing board of a school district to employ an individual in an administrative position if that individual meets certain criteria including, among other things, that he or she holds a valid teaching credential.

This bill would designate the first full week of March of each year as "Week of the Administrator" and would encourage schools, school districts, and county superintendents of schools to observe the week with public recognition of the contribution that school administrators make to successful pupil achievement.

Ch. 287 (AB 1668) Knox. Certificated school employees: salary payment.

Existing law authorizes each salary payment for a certificated school employee for any calendar month to be made on the last working day of the month and prohibits it from being paid earlier than the last working day of the month and later than the 5th day of the succeeding calendar month except for salary payments of teachers employed for less than full time in classes for adults, in a day or evening high school, or in a special day or evening class maintained in connection with an elementary school who are required to be paid on or before the 10th day of the succeeding calendar month for services performed during the preceding calendar month. Existing law authorizes each salary payment for a certificated employee to be made on the last working day of the payroll period and prohibits it from being paid earlier than the last working day of the payroll period and later than the 8th working day of the following payroll period if the school district provides for the payment of the salary once each 2 weeks, twice a month, or once each 4 weeks.

Existing law requires a school district to pay a certificated employee for performing teaching or other services in addition to his or her regular teaching duties or at a summer school maintained by the district for those services either in one lump sum or at an hourly, daily, biweekly, quadriweekly, or monthly rate of pay. If the pay is in one lump sum, existing law requires the district to pay the employee within 10 days after the termination of the services. If the pay is at an hourly, daily, biweekly, quadriweekly, or monthly rate, existing law requires the district to pay the employee within 10 days after the end of each calendar month or pay period during which the services are performed.

This bill would require, if the above-described salary payments are not made timely, the amount of the salary payment due to be increased by an amount of interest determined by a specified method in the Revenue and Taxation Code with respect to the unpaid amount for each day of delay.

This bill would also provide that a certificated employee of a school district who qualifies for a salary increase is required to be paid the increased salary not later than 3 regular pay periods or 3 months, whichever is longer, after the employee files proper documentation where required for the increase. The bill would require that all amounts due the employee resulting from the salary increase and not paid to the employee at the time that the employee actually received the increase be paid within 20 business days of the date that the employee actually received the salary increase.

Ch. 288 (SB 791) Perata. Wine safety fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires each licensed winegrower or wine blender and each importer of wine to pay to the Department of Alcoholic Beverage Control prescribed annual fees, to be repealed as of January 1, 2000, to be deposited in the Wine Safety Fund for the purposes of better enabling the State Department of Health Services to carry out and supervise a testing program to ensure that levels of lead in wine sold in this state remain within applicable tolerances.

This bill would specify that the costs of the testing program that the fees are required to cover shall include the reimbursement for the wholesale cost of any wine tested.

The bill would express the intent of the Legislature to appropriate the moneys in the Wine Safety Fund in equal amounts of $55,300 over 5 years to the State Department of Health Services for purposes of the testing program.

Ch. 289 (SB 963) Monteith. Sales and use taxes: exemptions: drugs or medicines.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax, including an exemption for drugs or medicines, the primary purpose of which is the prevention or control of disease, that are administered to animal life the products of which ordinarily constitute food for human consumption.

This bill would additionally exempt as drugs or medicines oxygen that is administered to animal life the products of which ordinarily constitute food for human consumption.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 290 (SB 979) McPherson. Outdoor wood-burning ovens.

Existing law, the California Uniform Retail Food Facilities Law, establishes sanitation standards for retail food facilities and requires the State Department of Health Services and primarily local agencies to enforce its provisions. Existing law makes violation of these provisions a crime.

Existing law, with certain exceptions, requires each food establishment to be fully enclosed, with one of these exceptions being for open-air barbecue facilities that meet specified requirements.

This bill would also exempt from the enclosure requirement outdoor wood-burning ovens that meet food preparation and safety requirements applicable to open-air barbecue facilities.

By increasing the enforcement duties of local health agencies, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 291 (SB 1014) Poochigian. Property tax exemption: newly planted trees and vines.

The California Constitution exempts from property taxation fruit and nut trees until 4 years after the season in which they were planted in orchard form and grapevines until 3 years after the season in which they were planted in vineyard form. Existing statutory law implementing these exemptions specifies that any fruit- or nut-bearing tree or any

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

grapevine, severely damaged during the exemption period by the December 1990 freeze so as to require pruning to the trunk or bud union to establish a new shoot as a replacement for the damaged tree or grapevine, is to be considered a new planting in orchard or vineyard form.

This bill would modify this statutory provision to also apply to any fruit-or nut-bearing tree that was similarly damaged during the December 1998 freeze.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

This bill would take effect immediately as a tax levy.

Ch. 292 (SB 1055) Bowen. Solid waste: tires.

The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. The California Tire Recycling Act, which is a part of the waste management act, requires every person who purchases a new tire from a retail seller of new tires to pay a disposal charge of 25¢ per tire to the seller.

This bill would require that the board or its contractors be permitted reasonable access to property on which waste tires are unlawfully stored to perform cleanup, abatement, or remedial work, as prescribed, if an order setting liability has been obtained by the board, or by its designee, against the property owner, and the board finds there is a significant threat to public health or the environment.

The bill would also require the board, in conjunction with the annual State Budget submitted to the Legislature, to submit to the appropriate policy and fiscal committees of the Legislature, a report that describes the expenditures proposed to be made for that fiscal year by the board for grants, loans, and contracts under the tire recycling program.

Ch. 293 (SB 1093) Johnston. Department of General Services: Stephen P. Teale Data Center.

Existing law generally authorizes the Director of General Services to hire, lease, lease-purchase, or lease with the option to purchase any real or personal property for the use of any state agency, if the director deems the hiring or leasing is in the best interest of the state. Existing law prohibits the director from entering into a lease-purchase agreement that involves office space, unless specifically authorized to do so by the Legislature.

This bill would authorize the director to exercise the option to purchase 137,275 of net usable square feet of data center , office space , and appurtenances set forth in the lease for 3101 Gold Camp Drive in Rancho Cordova, California, for a price not to exceed $47,000,000 for use by the Stephen P. Teale Data Center. The State Public Works Board would be authorized to issue revenue bonds, negotiable notes, or negotiable bond anticipation notes to finance the acquisition of the facilities by exercise of the option to purchase. The bill would specify that funds derived from the interim and permanent financing or refinancing of these facilities are continuously appropriated for the purposes of this bill.

Ch. 294 (SB 1122) Alarcon. Seismic safety: schools: earthquake hazards.

Existing law sets forth the duties of the Office of Emergency Services in planning and coordinating disaster mitigation and response efforts in the state.

This bill would require the office, in cooperation with the State Department of Education, the Department of General Services, and the Seismic Safety Commission, to develop an educational pamphlet for use by grades K-14 personnel to identify and mitigate the risks posed by nonstructural earthquake hazards. It would further require the office to print and distribute the pamphlet to the governing board of each school district and community college district in the state, along with a copy of the current edition of the office's school emergency response publication.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill also would require the office to make these publications available to private elementary or secondary schools, upon request, and on the Internet, as soon as feasible.

The bill would appropriate $75,000 from the General Fund to the office for the purposes of the bill.

Ch. 295 (SB 1260) Hayden. Los Angeles Unified School District.

(1) Existing law authorizes the governing board of a school district to subpoena witnesses to appear before it in certain circumstances, including circumstances relating to the expulsion of pupils and to ascertain damage due to an emergency. Existing law provides that a person who testifies falsely under oath is guilty of perjury.

This bill would authorize the Los Angeles Unified School District's Director of the Internal Audit and Special Investigations Unit to, until January 1, 2001, subpoena witnesses, administer oaths or affirmations, take testimony, and compel the production of all information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence deemed material and relevant to any inquiry or investigation undertaken by the director in the performance of his or her duties. The bill would require, if the director determines that there is reasonable cause to believe that an employee or outside agency has engaged in any illegal activity, to report the nature and details of that activity on a timely basis to the local district attorney or the Attorney General. By expanding the class of people subject to the crime of perjury, this bill would impose a state-mandated local program. The bill would require the director to submit an interim report to the Legislature by July 1, 2000, and a final report by December 1, 2000, as to the use and effectiveness of the subpoena power in the successful completion of his or her duty. The bill would declare that, due to the unique circumstances applicable to the Internal Audit and Special Investigations Unit, a statute of general applicability cannot be enacted within the meaning of subdivision (b) of Section 16 of Article IV of the California Constitution.

The bill would declare that it would take effect immediately as an urgency statute.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 296 (AB 1323) Floyd. Public employees' retirement: calculation of benefits.

Under the Public Employees' Retirement Law, the retirement allowance of a state member who retires or dies on or after July 1, 1991, is based on the member's highest annual compensation during his or her last 12 months of employment. With respect to members who retired or died prior to that date, the allowance is based on the highest average annual compensation during their last 36 months of employment.

This bill would provide that the retirement allowances for specified former legislative employees who retired in January, February, or March 1991 shall be recalculated based on any such employee's highest average annual compensation during any 12-month consecutive period of employment.

Ch. 297 (SB 813) Murray. Fair Political Practices Commission: decisions.

Existing law authorizes the Fair Political Practices Commission (commission), whenever it determines that there is probable cause for believing the Political Reform Act of 1974 has been violated, to hold a hearing to determine if the violation has occurred, and authorizes the commission to take specified actions upon a determination based on the hearing that a violation has occurred. Existing law establishes the Administrative Procedures Act, and requires that hearings of state agencies required to be held under that act be conducted by administrative law judges. Existing law makes the Administrative Procedures Act applicable to enumerated state agencies, including, among others, the commission.

This bill would require that, whenever the commission rejects the decision of an administrative law judge, it state the reasons in writing for rejecting the decision.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^{2}/_{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^{2}/_{3}$ vote.

Ch. 298 (AB 381) Cardoza. Serious felonies: plea bargaining.

Existing law, amended by initiative statute, prohibits plea bargaining in any case in which the indictment or information charges any serious felony, as defined. The initiative statute provides that any amendment of its provisions by the Legislature shall require a $^{2}/_{3}$ vote of the membership of each house.

This bill would add the offense of false imprisonment to the definition of a "serious felony" for purposes of the prohibition.

Because it would amend an initiative statute, the bill would require a$^{2}/_{3}$ vote.

By including the crime of false imprisonment in the definition of a "serious felony," the bill would increase the costs of prosecuting that crime and thereby impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 299 (AB 613) Wildman. Employment: JESF and TIPP programs.

Existing law establishes the Joint Enforcement Strike Force on the Underground Economy (JESF) and requires the strike force to perform certain duties, including, among other duties, facilitating the development and sharing of information by the participating agencies necessary to combat the underground economy, developing methods to pool, focus, and target the enforcement resources of the participating agencies in order to deter tax evasion and maximize recoveries from blatant tax evaders and violators of cash-pay reporting laws, and reducing enforcement costs wherever possible by eliminating duplicative audits and investigations.

Under existing law, the Division of Labor Standards Enforcement operates a program known as the Targeted Industries Partnership Program (TIPP) that focuses on the garment and agricultural industries and works to ensure the enforcement in those industries of state and federal laws pertaining to labor and to health and safety in the workplace.

This bill would require the Department of Industrial Relations to include the janitorial and building maintenance industry within the TIPP commencing in the 1999–2000 fiscal year, and within the JESF commencing in the 2000–01 fiscal year.

Ch. 300 (AB 847) Campbell. School impact fees: exemption: disabled persons.

Existing law generally authorizes the governing board of a school district to levy a fee, charge, dedication, or other requirement upon construction undertaken within the boundaries of the district for the purpose of funding the construction or reconstruction of school facilities. Existing law subjects to this authority residential construction, other than new residential construction, if the resulting increase in assessable space exceeds 500 square feet.

This bill would establish an exemption from this application of authority for new construction that qualifies for a specified exclusion from property tax reappraisal for construction, or an installation or modification, that makes a dwelling more accessible to a severely and permanently disabled person.

Ch. 301 (AB 1336) Washington. Peace officers: housing authority police departments: training.

(1) Existing law requires the Commission on Peace Officer Standards and Training to adopt rules establishing minimum standards relating to physical, mental, and moral fitness that shall govern the recruitment of any of specified groups of peace officers. The

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

commission is also required to adopt rules establishing minimum standards for training specified groups of peace officers.

This bill would additionally include housing authority police departments of the City of Los Angeles and the City of Oakland among these groups of peace officers.

(2) Existing law provides that no allocation shall be made from the Peace Officers' Training Fund to a local governmental agency if the agency was not entitled to receive funding under any of certain specified provisions regulating the allocation of funds from the Peace Officers' Training Fund for training expenses, as those provisions read on December 31, 1989.

This bill would provide notwithstanding this limitation, that the housing authority police departments of the City of Los Angeles and the City of Oakland, shall be entitled to receive the above funding. Because this bill would make additional entities eligible to receive state funds payable from the Peace Officers' Training Fund, which is a continuously appropriated fund, it would make an appropriation.

Ch. 302 (AB 1395) Correa. Public works: prevailing wages.

Existing law requires that, except for public works projects of $1,000 or less, not less than the general prevailing rate of per diem wages for work of a similar character in the locality in which the public work is performed, and not less than the general prevailing rate of per diem wages for holiday and overtime work, as provided in specific provisions, be paid to all workers employed on public works. Under existing law, the Division of Labor Standards Enforcement of the Department of Industrial Relations is authorized to conduct investigations to determine if the prevailing wage provisions have been violated.

This bill would require the Division of Labor Standards Enforcement, during an investigation, to keep confidential the name of any employee who reports a violation and any other information that may identify the employee.

Ch. 303 (AB 1540) Vincent. Animals: willful abandonment.

Existing law makes it a misdemeanor to willfully abandon any domestic dog or cat.

This bill instead would apply this prohibition to any animal. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

The bill would make this provision inapplicable to the release or rehabilitation and release of native California wildlife pursuant to statute or regulations of the California Department of Fish and Game.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 304 (SB 142) Baca. Schools: facilities.

Existing law, the Field Act, requires approval of plans relating to the structural safety of school buildings and for owned and leased relocatable buildings to be used for school purposes. Existing law authorizes the State Allocation Board to grant, and provides for extensions of, certain waivers for noncompliant buildings.

This bill would, notwithstanding any provision of law to the contrary, extend until January 1, 2001, any waiver granted by the State Allocation Board to a school district for occupancy of a nonconforming existing private building acquired for conversion for use as a school building that had not expired prior to January 1, 2000, if work to make the building a conforming structure commenced prior to January 1, 2000, but had not been completed by that date.

Ch. 305 (SB 258) Ortiz. Firefighters: employment by cities and counties.

(1) Existing law authorizes a fire protection district or the fire department of a county or city, including a charter city, to appoint as a member or officer any person who was serving as a civilian federal firefighter of any United States military installation within the state, who was terminated as a consequence of the closure of the military installation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would limit this provision to the appointment of permanent career civilian federal firefighters terminated as a consequence of the closure, downsizing, or realignment of a federal military installation.

(2) Existing law authorizes the California Firefighter Joint Apprenticeship Program to prepare and circulate a list of civilian federal firefighters eligible for appointment.

This bill would authorize that program to administer, prepare, and circulate a list of permanent career civilian federal firefighters eligible for appointment.

Ch. 306 (SB 319) Burton. Joint Enforcement Strike Force on the Underground Economy: citations.

(1) Existing law authorizes the Labor Commissioner until January 1, 2000, to designate, authorize, and train an employee of any agency participating in the Joint Enforcement Strike Force on the Underground Economy to issue citations and to issue and serve a penalty assessment order, pursuant to specified provisions.

This bill would extend that authority to January 1, 2006.

(2) Existing law, until January 1, 2000, authorizes the activities of the Joint Enforcement Strike Force on the Underground Economy.

This bill would extend that authority to January 1, 2006.

Ch. 307 (SB 522) C. Wright. State employee benefits.

The Legislators' Retirement Law and the Public Employees' Retirement Law authorize members to participate in supplemental contributions programs.

This bill would delete those provisions and would establish a separate supplemental contributions program for eligible employees. The bill would create the Supplemental Contributions Program Fund and would continuously appropriate all moneys in that fund to the Board of Administration of the Public Employees' Retirement System to carry out the purposes of the program.

Ch. 308 (SB 805) McPherson. Migrant farm labor centers.

Existing law authorizes the Department of Housing and Community Development to contract with local public and private nonprofit agencies to provide housing services, including shelter, education, sanitation, and day care services for migratory agricultural workers, through the development, construction, reconstruction, rehabilitation, or operation of a migrant farm labor center. Existing law also authorizes the operation of a migrant farm labor center for an extended period beyond 180 days if specified conditions are met.

This bill would revise those specified conditions and would require the department to approve the operation of a center for an extended period and would appropriate $60,000 from the General Fund to the department for the Office of Migrant Services to fund, during the 1999–2000 fiscal year, the extended occupancy periods authorized by the bill.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 309 (SB 1022) Johnston. Automobile insurance: good driver discount: representative of insurer.

(1) Existing law requires agents or representatives representing insurers under common ownership, management, or control to provide good driver coverage, which is required to be sold to eligible persons pursuant to certain provisions enacted by Proposition 103, at the lowest rates applicable within the common ownership, management, or control group.

This bill would define the term "representative" for purposes of this provision of law. Because this bill would clarify the persons required to provide good driver coverage required under Proposition 103, it would amend Proposition 103, and thus, would require a $^{2}/_{3}$ vote for enactment.

(2) Existing law, Proposition 103, specifies that a notice of cancellation of a policy of automobile insurance may be based, among other reasons, on a substantial increase in the hazard insured against. Existing provisions of law relative to automobile insurance that are separate from, and not enacted in furtherance of, Proposition 103, specify that a notice of cancellation of a policy of automobile insurance is effective only if it is based

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

on one or more specified reasons, but do not specify as a reason a substantial increase in the hazard insured against.

This bill would add to these separate provisions of law that a substantial increase in the hazard insured against is a reason for a notice of cancellation.

Ch. 310 (SB 1073) Committee on Public Employment and Retirement. State employees.

(1) The State Civil Service Act requires that a subpoena for attendance at a hearing under the act or a subpoena duces tecum for production of documents be issued by the state agency or presiding officer at the request of a party.

This bill instead would require the State Personnel Board or its authorized representative to issue the subpoena or subpoena duces tecum.

(2) Under the act, all orders and decisions of the board are binding on appointing powers.

This bill would specify that board orders and decisions are also binding on all parties to a proceeding before it. The bill would also revise the procedure available to the board for responding to noncompliance with a board order.

(3) Under the act, any person receiving state public assistance under the Aid to Families with Dependent Children program is required to receive priority for a seasonal class position that does not require an examination.

This bill instead would refer to persons receiving assistance under the CalWORKs program and would include entry level nontesting class positions in its provisions for priority consideration.

(4) Under the Public Employees' Retirement Law, the head of an agency may make an application for disability retirement for an employee, but may not separate that employee from state service unless the Board of Administration of the Public Employees' Retirement System determines that the employee should be retired.

This bill would require an appointing power, if it concludes from a medical examination that an employee is unable to perform the work of his or her present position or any other positions in the agency and the employee is eligible and does not waive the right to retire for disability, to file an application for disability retirement on the employee's behalf. Upon filing the application, the appointing power would be authorized to remove the employee from the job and place the employee on involuntary leave status while the application is pending.

(5) The act requires state agencies to establish an upward mobility program.

This bill would revise these requirements, including classes of eligible employees and available programs.

Ch. 311 (SB 1185) Johnston. Genetic characteristics: definition.

(1) Existing law prohibits discrimination in employment based on an individual's medical condition, which is defined to include genetic characteristics. Existing law also prohibits discrimination in the enrollment of health care service plans, self-insured employee welfare benefit plans, and life and disability income insurance plans on the basis of an individual's genetic characteristics, and defines "genetic characteristics" for these purposes.

This bill would recast and rephrase the definition of "genetic characteristics" for these purposes.

(2) Existing law imposes prohibitions on the disclosure of the results of a test for a genetic characteristic contained in an applicant or enrollee's medical records by a health care service plan.

This bill would specify that "genetic characteristic," as used in these prohibitions, has the same meaning as that set forth in the provisions governing discrimination in the enrollment of health care service plans.

Ch. 312 (SB 1208) Committee on Elections and Reapportionment. Elections procedures.

(1) Existing law authorizes a pupil to be excused from school for specified reasons and allowed to complete assignments and tests missed as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would also authorize a pupil to be excused for the purpose of serving as a member of a precinct board for an election.

(2) Existing law requires the Secretary of State to notify candidates on the presidential primary ballot that they may withdraw their name no later than the 64th day prior to the presidential primary. The Secretary of State is also required to perform various other duties relating to notification of elections officials and candidates at least 59 or 64 days before the presidential primary.

This bill would instead authorize the withdrawal of a candidate's name from a presidential primary ballot, and require that the Secretary of State perform these duties, at least 68 days before a presidential primary.

(3) Existing law specifies the form of the certificate of the Secretary of State showing candidates nominated or selected at the primary election.

This bill would require this certificate also to designate the justices of the Supreme Court or the courts of appeal to appear on the general election ballot, as specified.

(4) Existing law requires that the name of each candidate for a Peace and Freedom Party county central committee appear on the ballot if the candidate has filed specified nomination papers or qualified to have his or her name printed on the direct primary ballot as a candidate for a partisan public office.

This bill would provide that if an elections official finds that the number of candidates nominated for a Peace and Freedom Party central committee does not exceed the number to be elected, the names of the candidates would not be printed on the ballot and the county board of supervisors would be required to declare the nominees elected.

(5) Existing law provides a procedure for holding elections to fill a vacancy on a governing board of a special district.

This bill would revise these election procedures.

(6) Existing provisions of the Elections Code and the Political Reform Act of 1974 require the state ballot pamphlet to contain specified information on each state ballot measure, including an analysis by the Legislative Analyst.

This bill would also require the state ballot pamphlet to contain a summary statement prepared by the Legislative Analyst that provides a concise summary of the general meaning and the effect of "yes" and "no" votes for each state measure.

(7) The bill would also make changes in elections procedures on the counting of hyphenated words, specify the type size on county and city initiative petitions, and make nonsubstantive changes in provisions relating to election procedures. By changing the duties of local government officers and employees with respect to election procedures, the bill would impose a state-mandated local program.

(8) Existing law requires the Secretary of State, at specified times in the election cycle, to conduct a drawing of letters of the alphabet to produce a randomized alphabet for the purpose of determining the order of candidates in all elections.

This bill would omit references in this provision to a June primary election.

(9) Existing law requires each county elections official to prepare separate sample ballots for members of each political party.

This bill would allow the county elections official to prepare a combined sample ballot in order to facilitate the timely production and distribution of sample ballots.

(10) The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^{2}/_{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^{2}/_{3}$ vote.

(11) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 313 (SB 1296) Polanco. Property and liability insurance: automobile insurance.

Existing law requires an insurer to provide the reasons for nonrenwal of an automobile insurance policy and a residential property or individual liability policy. Existing law prohibits an insurer from nonrenewal of an automobile insurance policy or a residential property or individual liability policy for specified reasons.

This bill would prohibit an insurer on and after January 1, 2000, from refusing to renew one of those kinds of policies solely on the grounds that a claim is pending under the policy. This prohibition, as it relates to residential property or individual liability policies, would not apply to claims made under coverage for loss or damage caused by an earthquake.

Existing law requires a policy of automobile liability insurance to contain certain provisions. Existing law also authorizes an insurer and a named insured to agree that the coverage under an automobile liability policy does not apply nor accrue to the benefit of any insured or any 3rd-party claimant while a motor vehicle is being used or operated by a natural person or persons designated by name, subject to limited exceptions.

This bill would provide that an agreement between an insurer and a named insured to exclude coverage under a policy of automobile liability insurance while a motor vehicle is being used or operated by a natural person or persons designated by name applies to all coverage provided by the policy and is sufficient to delete uninsured motorist coverage for damages caused by an uninsured motor vehicle when that designated person or persons is operating the insured vehicle.

Ch. 314 (SB 1297) Schiff. Reciprocal insurers: unlawful rebates.

Existing law governing the business of insurance authorizes persons to exchange reciprocal or interinsurance contracts with one another providing insurance, other than life, title, mortgage, mortgage guaranty, or insolvency insurance, among themselves against insurable losses. Existing law makes it unlawful for any reciprocal or interinsurance exchange, its attorney, agent, or broker, to give or offer to a subscriber an allowance, gift, setoff, or payment as an inducement to secure an exchange of indemnities, except in certain cases of savings or credits to be returned to a subscriber pursuant to a power of attorney or reciprocal or interinsurance contract.

This bill would repeal those provisions making it unlawful to give or offer inducements to secure an exchange of indemnities.

Ch. 315 (AB 160) Alquist. Personal income taxes: contributions: Alzheimer's disease.

The Personal Income Tax Law allows taxpayers, until January 1, 2000, to contribute amounts in excess of their tax liability for the support of the California Alzheimer's Disease and Related Research Fund. Existing law provides that if these provisions are continued indefinitely they, nevertheless, would be repealed in any calendar year in which the Franchise Tax Board estimates that the minimum contribution amount will be less than a prescribed amount as annually adjusted.

This bill would extend the operation of those contribution provisions to January 1, 2005. This bill would also, for taxable years beginning in 2000, repeal those contribution provisions in any calendar year in which the Franchise Tax Board estimates that the minimum contribution amount will be less than the prescribed amount as annually adjusted.

Ch. 316 (AB 342) Cox. Automobile dismantlers: definition.

Existing law makes it a crime for any person to act as an automobile dismantler without meeting specified license or permit requirements. By definition, the owner of any premises or property used in conjunction with any agricultural, farming, mining, ranching, or motor vehicle repair business is exempted from the definition of automobile dismantler.

This bill would limit that exemption from the definition of automobile dismantler to the owners or operators of the businesses listed above, as modified, if the businesses do not sell parts, except for use in dismantler or specified businesses that engage in reducing

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the vehicles to their component materials. By limiting the exemption, the bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

This bill would also make conforming changes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 317 (AB 1465) Machado. Multiple employer welfare arrangements: filing requirements.

Existing law governing the business of insurance provides for the certification by the Insurance Commissioner of self-funded or partially self-funded multiple employer welfare arrangements. In general, multiple employer welfare arrangements permit employer members of trade associations to create trust funds for the purpose of offering and providing health care benefits to their employees. Existing law requires each of these arrangements to file with the commissioner an audited financial statement and an actuarial opinion, within 4 months and 15 days after the end of each fiscal year. Existing law provides for the repeal of these provisions dealing with multiple employer welfare arrangements on January 1, 2001.

This bill would instead require that the filing of an audited financial statement and an actuarial opinion be made no later than May 15th of each calendar year or 4 months and 15 days after the end of each fiscal year not on a calendar year basis. This bill would also extend from January 1, 2001, to January 1, 2004, the general repealer of these provisions dealing with multiple employer welfare arrangements, and would require the Department of Insurance, in consultation with the Department of Corporations, to conduct an evaluation of multiple employer welfare arrangements and report to the Legislature and the Governor by January 1, 2002.

Ch. 318 (AB 341) Cox. Professions and vocations: background checks.

Existing law regulating private patrol operators requires any employee who performs the function of a security guard who is not currently registered with the Bureau of Security and Investigative Services to submit an application, 2 classifiable fingerprint forms, and the appropriate registration fee. Existing law provides that the fee for processing fingerprints for all registrations and licenses is that amount charged the bureau by the Department of Justice.

This bill would specify that the 2 existing fingerprint cards be submitted to the Department of Justice with one classifiable fingerprint card to be forwarded to the Federal Bureau of Investigation. The bill would exempt from certain of these requirements currently employed full-time peace officers and certain reserve officers, as specified. It additionally would provide for submission of fingerprints to the FBI for purposes of a background check with respect to repossessors, locksmiths, private investigators, alarm company licensees, and employees thereof. It would authorize the regulatory entity to impose a fee for the processing of fingerprint cards submitted by applicants, and the fees would be deposited into various regulatory funds or accounts therein, some of which are continuously appropriated. The bill would therefore make an appropriation.

The bill would incorporate additional changes to Section 7506.5 of the Business and Professions Code proposed by SB 378 to become operative only if both bills amend that section and are enacted and become effective on or before January 1, 2000, and this bill is enacted after SB 378.

Ch. 319 (AB 969) Papan. Debt collectors.

Existing law prohibits certain actions by debt collectors in connection with the collection of consumer debts.

This bill would also require debt collectors to comply with specified provisions of federal law in connection with the collection of consumer debts, except as specified.

Ch. 320 (AB 1413) Shelley. Highways: outdoor advertising.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The Outdoor Advertising Act regulates the placement of advertising adjacent to and within specified distances of highways that are part of the national system of interstate and defense highways and federal aid highways including prohibiting the placement of advertising displays adjacent to, or within specified distances of, those highways without a permit, as prescribed.

This bill would exempt from that prohibition advertising displays located in the City and County of San Francisco on street furniture, as defined, if the advertising display meets specified conditions, and would require the city and county to provide indemnity to the state against any liability with regard to the placement of the advertising display, as specified. The bill would include a related statement of legislative intent.

The bill would require that its provisions become inoperative not later than 60 days from the date the Director of Transportation receives notice from the federal Secretary of Transportation that future operation of those provisions will result in a reduction of the state's share of federal highway funds pursuant to a specified provision of federal law. The bill would require the director, upon receipt of the specified notice, to notify in writing the Secretary of State and the City and County of San Francisco of that receipt. The provisions of the bill would be repealed on January 1 immediately following the date that the Secretary of State receives the specified notice from the director.

Ch. 321 (AB 1578) Cunneen. Park and open-space districts.

Existing law authorizes the East Bay Regional Park District to exchange up to a maximum of 40 acres of district-owned real property in any calendar year for other real property, and requires that any real property so acquired by the district be adjacent to other real property owned by the district.

This bill would make those provisions also applicable to the Midpeninsula Regional Open Space District.

Existing law authorizes a park or open-space district to contribute money, in those amounts as the board of directors of the district may by resolution find to be proper, to the California State Park Commission or to any municipality, county, or other public corporation within or outside of the district for specified purposes relating to park management, whenever in the judgment of the board of directors the acquisition or improvement is so located and planned as to be of benefit to the district.

This bill would authorize a district to provide grant funds to a private or nonprofit entity for those purposes relating to park acquisitions and improvements and would correct an obsolete reference in those provisions.

Ch. 322 (SB 282) Kelley. Utility service rates: rural areas.

Existing law requires the Public Utilities Commission to submit to the Governor an annual report containing a complete account of its transactions and proceedings for the preceding fiscal year. Existing law requires the Public Utilities Commission to develop, publish, and annually update an annual work plan access guide that describes the scheduled ratemaking proceedings and other decisions that may be considered by the commission during the calendar year, as prescribed. Existing law establishes the State Energy Resources Conservation and Development Commission, with powers and responsibilities as prescribed.

The bill would require the Public Utilities Commission to include in the annual work plan access guide a statement that specifies activities that the Public Utilities Commission proposes to reduce the costs of, and rates for, energy, including electricity, and for improving the competitive opportunities for state agriculture and other rural energy consumers. The bill would require the Public Utilities Commission to include in the annual report submitted to the Governor a statement that specifies the activities and achievements of the Public Utilities Commission in reducing the costs of, and rates for, energy, including electricity, for state agriculture and other rural energy consumers.

The bill would require the State Energy Resources Conservation and Development Commission to study the causes of high rates for electrical service to agriculture and to compare agricultural electric rates with certain other rates, as prescribed. The bill would authorize the State Energy Resources Conservation and Development Commission to recommend strategies for reduction of service costs, and identify factors affecting agricultural rates, as prescribed. The bill would require the State Energy Resources

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Conservation and Development Commission, on or before September 1, 2000, to prepare and submit to the Legislature a report that details its findings and conclusions pursuant to these provisions.

The bill would make related legislative findings and declarations.

Ch. 323 (SB 351) Figueroa. Mobilehome parks: fees.

Existing law prohibits a homeowner from being charged a fee for other than rent, utilities, and incidental reasonable charges for services actually rendered. Existing law prohibits a homeowner from being charged a fee for services actually rendered that are not listed in the rental agreement unless he or she has been given at least 60 days' written notice thereof.

Existing law requires the mobilehome park management to meet with homeowners, their representatives, or both concerning any proposed change to the mobilehome park rules and to give 10 days' advance written notice of the meeting to each homeowner. Once this requirement has been satisfied, the change may be adopted as specified above.

This bill would prohibit any amendment to the rules or regulations that would create a new fee that has not been agreed upon by the homeowners and management in the rental agreement or lease. The bill would include a statement of legislative intent.

Ch. 324 (SB 382) Haynes. Housing: older persons.

The Unruh Civil Rights Act prohibits business establishments from discriminating on the basis of sex, color, race, religion, ancestry, national origin, or disability, or in the sale or rental of housing, based on age, except as specified. The act defines a "qualified permanent resident" for purposes of exempting certain senior citizen housing.

This bill would revise those provisions relating to housing discrimination to delete a requirement that a qualified permanent resident of a senior citizen housing development have, or be expecting, an ownership interest. The bill would include specified dependent children as qualified permanent residents in provisions that apply to counties other than the County of Riverside to conform to provisions that only apply in that county. The bill would extend until January 1, 2001, an exemption for accommodations constructed before February 8, 1982.

Ch. 325 (SB 459) Johnson. Franchise Investment Law: sale of franchises: exemption.

Existing law, the Franchise Investment Law, provides that it is unlawful for any person to offer or sell in this state any franchise unless the offer has been registered or exempted. Existing law makes certain exemptions from certain provisions of the act.

This bill would exempt from the registration requirement of the act any offer or sale of a franchise if the franchise involves the adding of a new product or service line to the existing business of a prospective franchisee, subject to certain specified requirements.

Ch. 326 (SB 476) Chesbro. Mobilehomes: liquified petroleum gas sales.

Existing law prohibits the management of a mobilehome park from charging a fee for other than rent, utilities, and incidental reasonable charges for services actually rendered. Existing law also requires management to post in a conspicuous place the prevailing residential utilities rate schedule as published by the serving utility if management provides both master meter and submeter service of utilities to a homeowner. Existing law provides that in the absence of a rental agreement to the contrary, the park management may elect to bill a homeowner separately for utility service fees and charges assessed by the utility for services provided to or for spaces in the park. These utility fees and charges are not deemed to be included in the rent for the space.

This bill would prohibit the management of a mobilehome park from charging the mobilehome owners and tenants within a park more than 110% of the actual price paid by the management of the park for liquified petroleum gas if the management of the park does not permit the purchase of liquified petroleum gas for use in the mobilehome park from any other source other than the mobilehome park management. The management of a mobilehome park would also be required to post the actual price paid by management for liquified petroleum gas sold by it.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 327 (SB 531) Baca. Public Utilities Commission: complaints.

The Public Utilities Act requires the Public Utilities Commission, on and after July 1, 1999, to publish specified information on its Internet site, including, but not limited to, decisions and resolutions, general orders, the Rules of Practice and Procedure of the commission, rulings in proceedings, and a docket card for each proceeding listing documents in the case.

This bill would require the commission, on or after July 1, 2001, to establish procedures to permit the submission of informal complaints through electronic means, as defined, in accordance with prescribed provisions. The bill would require the commission, on or before January 1, 2002, to provide on its Internet web site the means by which consumers may submit informal complaints through electronic means. The bill would provide that its provisions may not be implemented, and no information technology-related preparatory work may be undertaken prior to July 1, 2001, without the concurrence of the commission and the authorization of the Department of Information Technology. The bill would make related legislative findings and declarations and a statement of legislative intent.

Ch. 328 (SB 665) Sher. Underground storage tanks.

(1) Existing law generally regulates the storage of hazardous substances in underground storage tanks and requires underground storage tanks that are used to store hazardous substances and are installed after January 1, 1984, to meet certain requirements concerning secondary containment. Existing law defines the terms "hazardous substance" and "person" for purposes of these provisions.

This bill would make technical revisions to those definitions.

(2) Under the existing Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, owners and operators of petroleum underground storage tanks are required to establish and maintain evidence of financial responsibility for taking corrective action and compensating 3rd parties for bodily injury and property damage arising from operating an underground storage tank. Existing law requires every owner of an underground storage tank to pay a storage fee for each gallon of petroleum placed in the tank. The fees are required to be deposited in the Underground Storage Tank Cleanup Fund. The money in the fund may be expended by the State Water Resources Control Board, upon appropriation by the Legislature, for various purposes, including payment of a California regional water quality control board's or local agency's corrective action costs, and the payment of claims to aid owners and operators of petroleum underground storage tanks who take corrective action to clean up unauthorized releases from those tanks. Existing law provides that the fund may sue and be sued in its own name.

This bill would make a statement of legislative intent regarding the construction of the act. The bill would revise the definition of the terms "claim," "site," and "tank" for purposes of the act and would define the term "adjudicative proceeding" for purposes of the act. The bill would delete the authorization for the fund to sue and be sued in its own name.

(3) Existing law requires the board to pay a claim for regulatory technical assistance to a property owner or operator who meets specified requirements and who is otherwise eligible for reimbursement.

This bill would revise that requirement by limiting the amount of such a claim to $3,000 per occurrence to an eligible owner or operator and would provide that technical assistance only includes assistance in the preparation and submission of a claim, as specified.

(4) Existing law requires the board to determine an applicant's eligibility for a claim for corrective action costs and to notify the applicant of this determination within 60 days of the receipt of the claim application, and if a claimant requests a review of that determination, the board is required to render a decision within 30 days. The board is required to issue all decisions on a claim for corrective action costs and third-party costs within 90 days after submission.

This bill would revise the procedures for making determinations on claims for corrective action costs and third-party compensation costs, and would specify procedures for filing a petition for review, with regard to an unpaid claim. The bill would specify the standard for judicial review of a final decision by the board, and would

NOTE: Superior numbers appear as a separate section at the end of the digests.

provide for related matters. The bill would specify procedures for the review of a work plan for corrective action and the preapproval of corrective action costs, based upon specified factors.

(5) Existing law specifies the conditions under which a corrective action site may be closed, specifies a uniform closure letter, and authorizes the board to require closure of a tank case under the jurisdiction of a regional board or local agency that is implementing the local oversight program. Existing law authorizes the board to suspend corrective action or investigation work at a site that is not an emergency site, except for specified activities.

This bill would authorize the board to recommend closure of a tank case that is under the jurisdiction of a local agency that is not implementing the local oversight program, would specify procedures for the review of the board's decision to require closure, and would revise the contents of the uniform closure letter. This bill would impose a state-mandated local program by imposing new duties upon the local agencies that implement the act.

The bill would instead prohibit the board from suspending specified activities at a site, would revise the definition of emergency site for purposes of such a suspension, and would require the board to adopt regulations with regard to specifying the conditions for an emergency site. The bill would prohibit the board from suspending a corrective action or investigation until the effective date of those regulations.

The bill would prohibit the board from reimbursing a claimant for any eligible cost for which the claimant has been, or will be, compensated by another party, except as specified, and would make a statement of legislative intent that this prohibition is declaratory of existing law.

(6) Existing law requires the board to develop a system for storing and retrieving data regarding petroleum discharge from underground storage tanks. The board is required to remove a site from the data base when no residual contamination remains.

This bill would instead require the board to designate a site included in the data system as having no residual contamination if the board makes a specified determination. The bill would also define the term "residual contamination" for purposes of the designation of a site in that data base.

(7) The bill would correct obsolete references and delete obsolete provisions.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 329 (SB 1274) Costa. Animal rendering.

(1) Existing law specifies that no "agricultural processing activity, operation, facility, or appurtenances thereof," as defined, that are conducted or maintained for commercial purposes, as specified, shall be or become a nuisance, private or public, due to any changed condition in or about the locality after it has been in continuous operation for more than 3 years if it was not a nuisance at the time it began.

This bill would add to that definition of "agricultural processing activity, operation, facility, or appurtenances thereof" rendering plants and collection centers required to be licensed under the provisions of the bill, as specified.

(2) Existing provisions of the Food and Agricultural Code regulate horsemeat and pet food and set forth definitions for this purpose, including "rendering," which is defined to mean "the conversion of packinghouse waste, dead animal carcasses, and kitchen grease into industrial fats and oils inedible for human consumption and other products inedible for human consumption."

This bill would redefine the term "rendering" to mean "the recycling, processing, and conversion of animal and fish byproducts and carcasses from the meat, poultry, and seafood industries, as well as used kitchen grease into fats, oils, and proteins that are used primarily as feed in the animal, poultry, and pet food industries."

(3) Existing law requires every person engaged in the business of rendering to obtain a license from the Secretary of Food and Agriculture for each rendering plant and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

collection center operated. Existing law also sets forth criminal penalties for violating these and other related provisions, as specified, regulating horsemeat and pet food.

This bill instead would require every person engaged in the business of rendering to obtain a license from the Department of Food and Agriculture for each rendering plant, and every person engaged in the business of operating a collection center to obtain a license from the department for each collection center operated. The bill would make other related changes. Because the bill would expand the scope of existing crimes, by requiring persons engaged in the business of operating collection centers to be licensed by the department and to come within the provisions of law regulating horsemeat and pet food, the bill would create a state-mandated local program.

(4) Existing law authorizes the Secretary of Food and Agriculture, in lieu of any civil action and in lieu of seeking prosecution, to levy a civil penalty against a person who violates certain of these provisions, or any regulation adopted, in an amount not to exceed $1,000.

Existing law also specifies that before a civil penalty is levied, the person charged with the violation shall receive notice of the nature of the violation and shall be granted an opportunity to be heard, which shall include the right to review evidence and the right to present evidence on his or her own behalf.

This bill would change this latter provision to delete the provision that the person charged shall be granted the opportunity to be heard, and would provide, instead, that before a civil penalty is levied, the person charged with the violation shall receive notice of the nature of the violation and shall be granted the opportunity to review the department's evidence and to present written argument and evidence to the department as to why the civil penalty should not be imposed or should be reduced. The bill would specify that these provisions do not require the department to conduct either a formal or informal hearing, and that instead the department may dispose of the matter upon review of the documentation presented.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 330 (AB 71) Cunneen. High-occupancy vehicle lanes: low-emission vehicles.

(1) Existing law authorizes the Department of Transportation, with respect to highways under its jurisdiction, to authorize or permit the exclusive or preferential use of highway lanes for high-occupancy vehicles.

This bill would require the Department of Transportation whenever it authorizes or permits exclusive or preferential use of highway lanes or highway access ramps for high-occupancy vehicles, to also extend the use of those lanes or ramps to vehicles that have been issued distinctive decals, labels, or other identifiers because the vehicles meet (1) California's ultra low-emission vehicle (ULEV) standards beginning July 1, 2000, and through December 31, 2003, or (2) California's super ultra-low emission vehicle (SULEV) standards on and after January 1, 2004, and through December 31, 2007, for exhaust emissions, as specified, and (3) the federal inherently low-emission vehicle (ILEV) evaporative standard, as defined in federal regulations, regardless of vehicle occupancy or ownership.

In addition, for the purpose of implementing these provisions, the bill would require the Department of Motor Vehicles to make available for issuance distinctive decals, labels, or other identifiers for vehicles described above that clearly distinguishes them from other vehicles. The Department of the California Highway Patrol would be required to specify the placement and design of the decals, labels, or other identifiers. The bill would require the Department of Motor Vehicles to include a summary of the provisions relating to the distinctive decals, labels, or other identifiers on each motor vehicle registration renewal notice or on a separate insert, as specified.

(2) The bill would prohibit any person from operating or owning a vehicle that displays a decal, label, or other identifier if that identifier was not issued to that vehicle.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Because a violation of this prohibition would be a crime, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) The bill would provide that its provisions shall remain in effect only until January 1, 2008, and as of that date are repealed, unless a later enacted statute deletes or extends that date.

Ch. 331 (AB 89) Cedillo. Arrest: public officers.

Existing law authorizes certain persons who are not peace officers to exercise powers of arrest if they have completed a specified training course.

This bill would extend that authority to persons regularly employed as investigators by the Department of Transportation for the City of Los Angeles, as specified. This bill would specify that these persons are not peace officers for purposes of imposing an enhanced punishment for the crime of assault and battery committed against peace officers.

Ch. 332 (AB 588) Cardenas. Pupil expulsion.

Existing law requires the governing board of each school district to establish rules and regulations governing procedures for the expulsion of pupils. Existing law requires those procedures to include, but not necessarily be limited to, entitling the pupil to a hearing, within 30 schooldays after the date the principal or superintendent of schools determines that the pupil has committed any of certain enumerated acts, to determine whether the pupil should be expelled. Existing law requires written notice of the hearing to be forwarded to the pupil at least 10 calendar days prior to the date of the hearing, and requires this notice, among other things, to include notice of the opportunity for the pupil or the pupil's parent or guardian to appear in person or employ and be represented by counsel.

This bill would clarify, for purposes of those provisions, that counsel refers to legal counsel and would define legal counsel as an attorney or lawyer who is admitted to the practice of law in California and is an active member of the State Bar of California. The bill would also provide, for purposes of those provisions, notice of the opportunity for the pupil or the pupil's parent or guardian to appear in person or to be represented by a nonattorney adviser, and would define a nonattorney adviser as an individual who is not an attorney or lawyer, but who is familiar with the facts of the case, and has been selected by the pupil or pupil's parent or guardian to provide assistance at the hearing. The bill would also clarify that nothing in those provisions is intended to require a pupil or the pupil's parent or guardian to be represented by legal counsel or by a nonattorney adviser at the hearing.

By requiring school districts to provide notice of the right to be represented by a nonattorney adviser, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 333 (AB 637) Migden. Youth Authority.

Existing law, the Youth Authority Act, governs the commitment of juvenile offenders to the Department of the Youth Authority. The act states that the purpose of those provisions is to protect society from the consequences of criminal activity and, to that end, training and treatment shall be substituted for retributive punishment.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would revise that statement to provide that community restoration, victim restoration, and offender training and treatment shall be substituted for retributive punishment.

Ch. 334 (AB 704) Honda. Ad valorem taxation: taxpayer reporting.

The California Constitution authorizes the Legislature to provide for taxation of tangible personal property and to exempt or classify personal property for differential taxation. Statutory law requires each person owning taxable personal property with an aggregate cost of $100,000 or more to file a signed property statement with the county assessor. The statement must be filed each year between the lien date and 5 p.m. on the last Friday in May, or between the lien date and any earlier time chosen by the assessor.

This bill would instead provide that the statement must be filed annually between the lien date and 5 p.m. on April 1. This bill would provide a penalty for statements not filed by May 7 which deadline would be extended when weekends, holidays, or office closures occur. Because this change in the filing deadline would require administrative changes by county assessors, it would impose a state-mandated local program.

This bill would permit a property statement to be amended and would require certain information to be provided by the assessor, thereby also imposing a state-mandated local program.

The bill would make related changes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 335 (AB 972) Ducheny. Court consolidation: San Diego County Marshal's Office.

Existing law provides for the appointment of a marshal for San Diego County and sets forth the powers and duties of that office. Existing law also authorizes the consolidation of court-related services in San Diego County.

This bill would repeal the above provisions and, instead, provide that the marshal's office in San Diego County shall be abolished on or after January 1, 2000, and all personnel of the abolished office shall merge into a bureau maintained as a separate organizational unit within the sheriff's department upon the adoption of a resolution by the board of supervisors, as specified. The bill would also declare that it constitutes necessary special legislation regarding San Diego County. By imposing additional duties on the sheriff's department, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 336 (AB 1079) Robert Pacheco. Immigration consultants.

(1) Under provisions of law repealed effective January 1, 1998, an immigration consultant was required to notify the Secretary of State's office within 30 days of any change of name, address, telephone number, or agent for service of process.

This bill would reinstate this requirement.

(2) Existing law requires anyone engaging in the business or acting in the capacity of an immigration consultant to post a bond with the Secretary of State of $25,000. Existing law repeals this provision on January 1, 2000, unless a statute is enacted that deletes or extends that date.

This bill would delete the January 1, 2000 repeal date, and would increase the bond requirement to $50,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law provides for a civil penalty to be imposed on anyone violating the provisions regulating immigration consultants, and for a criminal penalty for violating any of these provisions with exceptions for certain required disclosures or prohibited translations.

This bill would eliminate these exceptions to criminal sanction, thereby creating new crimes and imposing a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 337 (AB 1279) Scott. Postsecondary education: study of doctoral education.

Existing law establishes the various segments of the higher education system in the state. These segments include the University of California, which is administered by the Regents of the University of California, the California State University, which is administered by the Trustees of the California State University, the California Community Colleges, which are administered by the Board of Governors of the California Community Colleges, and various private and independent colleges and universities. Existing law establishes the California Postsecondary Education Commission as an entity responsible for coordinating public, independent, and private postsecondary education in California and providing independent policy analysis and recommendations to the Legislature and the Governor on postsecondary education issues.

This bill would require the California Postsecondary Education Commission to conduct a study to determine the current capacity for applied joint doctorates in the state, as specified. The bill would require the commission to complete and transmit copies of the study to the Governor and to the appropriate education policy and fiscal committees of the Legislature on or before June 30, 2000.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 338 (AB 1586) Florez. Public safety officers: Procedural Bill of Rights.

The Public Safety Officers Procedural Bill of Rights Act provides that no punitive action, nor denial of promotion on grounds other than merit, shall be undertaken by any public agency without providing the public safety officer with an opportunity for administrative appeal.

This bill would prohibit a public safety officer from being required by his or her employing public safety department or any other public agency, as a condition of employment, to consent to the use of his or her photograph or identity as a public safety officer on the Internet for any purpose if the officer reasonably believes that the disclosure may result in a threat, harassment, intimidation, or harm to that officer or his or her family. The bill would permit the officer to notify the department or agency to cease or desist from that disclosure and to seek an injunction and a civil penalty for unauthorized use after receipt of the notice to cease and desist.

Ch. 339 (AB 1692) Committee on Consumer Protection, Governmental Efficiency and Economic Development. Administrative adjudication: decisions.

Under existing law relating to administrative adjudication, a contested case that is brought by an agency may either be heard before the agency itself or by an administrative law judge who prepares a proposed decision that may be adopted by the agency as the decision in the case. If the proposed decision is not adopted in whole or in part by the agency, it may decide the case itself.

This bill would revise the procedural requirements that are applicable if a contested case is originally heard before the agency itself and revise the procedure and requirements applicable if a contested case is originally heard by an administrative law judge.

Ch. 340 (SB 56) Solis. Employment: time off to appear in court.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes a person who believes that he or she has been discharged or discriminated against in violation of any provision of the Labor Code under the jurisdiction of the Labor Commissioner to file a claim with the Division of Labor Standards Enforcement within 30 days of the violation. Existing law prohibits the discharge or other discrimination against an employee for taking time off from work to serve as a juror or witness, providing the employee gives reasonable notice to the employer of the anticipated absence. Additionally, existing law provides that an employee who has been discharged or discriminated against in violation of these provisions is entitled to reinstatement and reimbursement of lost wages and benefits. The failure of an employer to rehire or restore an eligible employee constitutes a misdemeanor.

This bill would revise and expand the prohibition to prohibit retaliation as well as discrimination and specify that the prohibition would be applicable to an employee, including, but not limited to, an employee who is a victim of crime. The bill also would prohibit employers from discharging, discriminating, or retaliating against employees who are victims of domestic violence and who take time off to appear in court to obtain or attempt to obtain any relief to help ensure the health, safety, or welfare of a domestic violence victim or his or her child, if the employee gives the employer reasonable notice, as specified. The bill would authorize an employee who is a victim of domestic violence to file a claim with the division within one year of the violation for a violation of the bill. By revising and expanding the scope of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 341 (SB 105) Burton. State retirement systems: Northern Ireland.

The California Constitution provides that the Legislature may by statute prohibit retirement board investments where it is in the public interest to do so and providing that the prohibition satisfies specified fiduciary standards.

This bill would require the Teachers' Retirement Board and the Board of Administration of the Public Employees' Retirement System, respectively, to annually investigate and report to the Legislature on the extent to which United States and international corporations operating in Northern Ireland, in which their system assets are invested, adhere, in compliance with the law applicable in Northern Ireland, to the principles of nondiscrimination in employment and freedom of workplace opportunity.

This bill would require those retirement boards to compile a list of domestic and international corporations that do business in Northern Ireland, and in whose stocks or obligations it has invested, and determine whether each corporation on the list has, during the preceding year, taken substantial action, in compliance with the law applicable in Northern Ireland, designed to lead toward the achievement of specified goals.

This bill would also require those retirement boards, whenever feasible and consistent with their fiduciary responsibility, to support shareholder resolutions designed to encourage domestic and international corporations in which it has invested to pursue, in compliance with the law applicable in Northern Ireland, a policy of affirmative action in Northern Ireland.

Ch. 342 (SB 144) Schiff. State Bar: membership fees.

Existing law establishes the State Bar. The Board of Governors of the State Bar has broad responsibilities for the State Bar's operation and function, including, among other things, administration of the State Bar, admission to the practice of law, and disciplinary authority over its members.

This bill would revise various provisions relating to the State Bar.

(1) Existing rules and regulations of the State Bar provide for the creation of, and specify the functions and activities of, the Conference of Delegates, which represents

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

locally based general bar associations. Existing rules and regulations of the State Bar also provide for advisory organizations of the State Bar known as sections.

This bill would provide that the Conference of Delegates of the State Bar and State Bar sections shall not be funded with mandatory fees after January 1, 2000, but would authorize the State Bar to provide the Conference of Delegates and State Bar sections with administrative and support services, subject to full reimbursement, as specified.

(2) Existing law imposes various duties on attorneys. Among other things, it requires attorneys to cooperate and participate in any disciplinary investigation or other regulatory or disciplinary proceeding pending against the attorney.

This bill would provide that this requirement shall not be construed to require an attorney to cooperate with a request that requires the attorney to waive any constitutional or statutory privilege or to comply with a request for information or other matters within an unreasonable period of time in light of the time constraints of the attorney's practice, as specified.

Existing law provides that a person complained against in a disciplinary action of the State Bar shall be given a reasonable notice and have a reasonable opportunity to exercise various rights, including the right to defend, to receive exculpatory evidence, to be represented by counsel, and to examine and cross-examine witnesses.

This bill would also provide that the notice and rights shall be fair and adequate, as well as reasonable, and would also specify that the person has a right to exercise any right guaranteed by the California or United States Constitution, including the right against self-incrimination.

(3) Existing law requires the State Bar to request the California Supreme Court to adopt a rule authorizing a mandatory continuing legal education program. Existing law establishes minimum hours of participation, and exempts various persons from the requirement.

This bill would reduce the required hours, would eliminate the exemption for retired judges, would encourage the use of low-cost programs, would set forth findings, and would make related changes.

(4) Existing law, until January 1, 1998, required the Board of Governors of the State Bar to establish annual membership fees for active members based on the amount of time the member has been practicing law, as specified. Existing law also provides for additional fees.

This bill would provide for an annual fee not exceeding $318. This provision would be repealed on January 1, 2001.

The bill would also require the invoice for the annual fee to provide each member the option of deducting $5 from the annual fee if the member elects not to support lobbying and related activities, and would prohibit the Board of Governors of the State Bar from expending a sum exceeding the number of members paying the $5 fee, multiplied by $5.

The bill would require the Board of Governors of the State Bar to adopt a rule to permit members whose income from the practice of law is less than a specified amount to presumptively qualify for a waiver of a portion of the annual membership fees based on hardship.

Existing law requires the Board of Governors of the State Bar to prepare an annual financial statement for the State Bar, which is required to be certified under oath by the President and the Treasurer of the State Bar to the Chief Justice of the Supreme Court.

This bill would require the Board of Governors of the State Bar to contract with a nationally recognized independent public accounting firm to conduct an audit of the State Bar's financial statement for each fiscal year beginning after December 31, 1998. It would require the financial statement to be certified under oath by the Treasurer of the State Bar, and a copy of the audit and the financial statement to be submitted within 120 days of the close of the fiscal year to the Board of Governors of the State Bar, the Chief Justice of the Supreme Court, and the Assembly and Senate Committees on Judiciary. It would also require the Board of Governors of the State Bar to contract with the Bureau of State Audits to conduct a performance audit of the State Bar's operations from July 1, 2000, through December 31, 2000, inclusive, and would require a copy of the performance audit to be submitted by May 1, 2001, to the Board of Governors of the State Bar, the Chief Justice of the Supreme Court, and the Assembly and Senate Committees on Judiciary. It would require that the Board of Governors contract with the Bureau of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

State Audits every 2 years thereafter to conduct a performance audit of the State Bar's operations for the respective fiscal year, commencing with January 1, 2002, to December 31, 2002, inclusive, and would require a copy of the performance audit to be submitted within 120 days of the close of the fiscal year for which the audit was performed to the Board of Governors of the State Bar, the Chief Justice of the Supreme Court, and the Assembly and Senate Committees on Judiciary. It would authorize the Bureau of State Audits to contract with a 3rd party to conduct these performance audits.

The bill would prohibit the State Bar from awarding a contract for goods, services, or both, for an aggregate amount in excess of $50,000, except pursuant to specified provisions of the Public Contract Code. The bill would make related changes. It would also provide that its provisions shall become operative only if SB 143 of the 1999–2000 Regular Session is enacted.

Ch. 343 (SB 185) Peace. Billing practices: individual marital status.

Existing law governing businesses and professions prescribes various special business regulations.

This bill would add special business regulations making it unlawful for any business to use words expressly referencing an individual's marital status as part of the individual's mailing address on a billing statement, related correspondence, enclosing envelope, or any solicitation for new business. It would exempt from this prohibition the use of the prefixes "Mr.," "Mrs.," "Ms.," or "Miss." It would prescribe certain civil penalties for any violation of these provisions.

Ch. 344 (SB 210) Committee on Judiciary. Courts: unification.

The California Constitution provides for the establishment of superior and municipal courts, as specified, in each county. SCA 4 of the 1995–96 Regular Session, as approved by the voters on June 2, 1998, provides for the abolition of municipal courts within a county, and for the establishment of a unified superior court for that county, upon a majority vote of superior court judges and a majority vote of municipal court judges within the county; provides for the qualification and election of the judges; and revises the number of jurors required in certain civil actions. Existing law makes various statutory changes to implement and conform to the unification of trial courts pursuant to the constitutional amendment.

The bill would make further conforming, technical, and implementing changes to effectuate the constitutional amendment.

The bill would state that it is to take effect immediately as an urgency statute.

Ch. 345 (SB 248) Lewis. Industrial loan companies.

Existing law permits an industrial loan company to make loans, and to acquire or discount obligations having a term in excess of 7 years secured solely or primarily by real property, as specified, provided that all of the loans and obligations in excess of 7 years do not exceed in the aggregate 70% of its total assets.

This bill would delete that authority.

Existing law prohibits an industrial loan company from receiving deposits.

This bill would specify that the prohibition pertains only to demand deposits, as defined.

Existing law authorizes an industrial loan company to make loans to, or to purchase any obligation from, persons who do not reside or have a place of business in this state not to exceed 20%, in the aggregate, of a company's total assets. Upon application and approval of the Commissioner of Financial Institutions, the company may increase its loans to, or purchases of obligations from, those persons to not exceed 40%, in the aggregate, of the company's total assets.

This bill would increase those percentage levels to 25% and 50%, respectively. It would also, with respect to certain application requirements, require additional information, as specified.

A willful violation of the Industrial Loan Law is a crime. In expanding the provisions of that law with respect to certain application requirements, the bill would enlarge the scope of that crime and impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 346 (SB 518) Schiff. Dependent children.

Under existing law, absent a writ or order of a reviewing court providing otherwise, a judgment or court order allowing, or eliminating restrictions against, removal of a minor from the state are stayed by operation of law for 30 days from the entry of the judgment or order.

This bill would shorten that period to 7 days with respect to a judgment or order of the juvenile court in a dependency hearing, and would make related, technical changes.

Existing law sets forth the purposes of provisions relating to dependent children.

This bill would additionally state that those provisions ensuring the confidentiality of proceedings and records are intended to protect the privacy rights of the child.

Ch. 347 (SB 579) Dunn. Finance lenders.

The California Finance Lenders Law provides for licensing and regulation by the Commissioner of Corporations of persons engaged in the business of making consumer or commercial loans. Under these provisions, a licensed lender generally may not take a deed of trust, mortgage, or lien upon real property as security for a consumer loan if the principal amount of the loan is less than $5,000.

This bill would provide that a licensed lender may not take a deed of trust, mortgage, or lien upon real property as security for a consumer loan except if the loan is for a bona fide principal amount of $5,000 or more. This bill would define "bona fide principal amount" for the purpose of determining whether a consumer or commercial loan amount exceeds a regulatory ceiling, as specified.

This bill would make other related changes.

Ch. 348 (SB 685) Monteith. Taxation: administration.

The Katz-Harris Taxpayers' Bill of Rights Act provides for a Taxpayers' Right Advocate and requires the Franchise Tax Board to mail various notices to taxpayers.

This bill would require the Franchise Tax Board to provide a taxpayer with written notice, as provided, of a state tax lien under either the Personal Income Tax Law or Bank and Corporation Tax Law, and require the Taxpayers' Rights Advocate to establish procedures for administrative review as described in that notice. This bill would also prohibit the Franchise Tax Board from levying upon any property or property right unless that board has provided the relevant taxpayer with written notice of certain administrative review rights, and would require the Taxpayers' Rights Advocate to establish procedures for this administrative review. This bill would further provide that if the Franchise Tax Board holds in abeyance the collection of a liability imposed under the Personal Income Tax Law or related administrative provisions, that is final and otherwise due and payable, for a period in excess of 6 months from the date the hold is first placed on the account, the board shall mail to the taxpayer a final notice of tax due prior to issuing a levy or filing a notice of state tax lien to collect the amount due.

Ch. 349 (SB 689) Johnston. Conflicts of interest.

(1) Existing law prohibits certain public officials and employees from being financially interested in any contract made by them in their official capacity, or by any body or board of which they are members. An officer is not deemed to be interested in a contract entered into by a body or board of which the officer is a member if the member has only a remote interest in the contract and other requirements are met. A remote interest is required to be publicly disclosed and thereafter the public body may authorize, approve, or ratify the contract in question, but the officer is disqualified from voting.

This bill would define as an additional remote interest that of a person receiving salary, per diem, or reimbursement for expenses from a government entity.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law further provides that an officer or employee shall not be deemed to be interested in a contract if his or her interest is any of specified interests, including that of compensation for employment with a governmental agency other than the governmental agency that employs the officer or employee, provided that the interest is disclosed to the body or board at the time of consideration of the contract and the interest is noted in its official record.

This bill would revise that interest to be that of a person receiving salary, per diem, or reimbursement for expenses from a government entity unless the contract directly involves the department of the government entity that employs the officer or employee.

Ch. 350 (SB 786) Schiff. Punishment.

Existing law provides that every person convicted in any other state, government, country, or jurisdiction of an offense that is punishable in this state by imprisonment in state prison is punishable as if the prior conviction had occurred in this state when convicted of a subsequent crime in this state. Existing law specifies that the application of this provision includes, but is not limited to, all statutes that provide for enhancements for prior convictions and prior prison terms.

This bill additionally would include in this application a term of imprisonment based upon a prior conviction or prior prison term and further require that an offense specified as a prior felony conviction by reference to a specific code section include any prior felony conviction under any predecessor statute of that specified offense that includes all of the elements of that specified offense. This bill also would specify that application of the latter provision includes, but is not limited to, all statutes that provide for an enhancement or a term of imprisonment based upon a prior conviction or a prior prison term.

This bill would make a conforming change.

The bill also would provide that it is intended to be declaratory of existing law as established by the holding set forth in People v. Butler (1998) 68 Cal. App. 4th 421.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 351 (SB 829) Figueroa. Gambling establishments: provisional licenses.

(1) Existing law provides that every person who is required by statute or regulation to hold a state gambling license shall obtain the license prior to engaging in the activity or occupying the position with respect to which the license is required.

This bill would provide that, except as otherwise provided by statute or regulation, every person who is required by statute or regulation to hold a state gambling license shall obtain the license prior to engaging in the activity or occupying the position with respect to which the license is required.

(2) Existing law requires applicants for state gambling licenses, approvals, and permits to make various disclosures, and provides that the division shall furnish applicants with supplemental forms for the purpose of providing information on the applicant's personal history, habits, character, criminal record, financial affairs, and other matter.

This bill would require applicants to additionally submit 2 sets of fingerprints on forms supplied by the division, and would authorize the division to submit one fingerprint card to the United States Federal Bureau of Investigation.

(3) Existing law generally provides that the California Gambling Control Commission, in consultation and cooperation with the Division of Gambling Control, is vested with the authority to approve or deny gambling licenses on specified grounds. Existing law also provides, however, that persons who had held or applied for a valid registration issued pursuant to the law in effect prior to the effective date of the act shall be deemed to hold a provisional license, as defined, until summoned by the division to apply for a gambling license under the act. Existing law also provides that if the division does not so summon a person holding a provisional license prior to December 31, 1998, it shall, upon the request of the holder of the provisional license, and upon the payment of specified fees, extend the provisional license until December 31, 1999.

This bill would authorize the division to extend a provisional license, if, prior to the expiration of that license, the holder requests an extension, all applicable fees are paid,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

and the provisional licensee's gambling establishment is located in a jurisdiction with a gambling ordinance that complies with the Gambling Control Act.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 352 (SB 933) Poochigian. Property taxation: new construction.

The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975–76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred.

Existing statutory provisions implementing this constitutional authority define "newly constructed" and "new construction" for those purposes.

This bill would provide that the terms "newly constructed" and "new construction" do not include the improvement, upgrade, or replacement of an underground storage tank that is required to be improved, upgraded, or replaced to comply with federal, state, and local regulations on underground storage tanks. This bill would also provide that the reconstruction of an underground storage tank for these same compliance purposes is to be considered normal maintenance or repair if, after that reconstruction, the tank is substantially equivalent to the prior structure in size, utility, and function.

The bill would take effect immediately as a tax levy.

Ch. 353 (SB 1161) Committee on Judiciary. Offers to compromise.

Under existing law, any party may serve an offer in writing, not less than 10 days prior to the commencement of trial or arbitration, upon any other party to the action to allow judgment to be taken or an award to be entered in accordance with the terms and conditions stated at that time. Existing law provides that if the offer is rejected and the offering party obtains a more favorable result at trial or arbitration, the court or arbitrator, in its discretion, may require the other party to pay the offering party's costs of the services of expert witnesses, as specified, actually incurred and reasonably necessary in preparation for trial or arbitration of the case.

This bill would additionally authorize the court or arbitrator, in its discretion, to require the party rejecting the offer to pay the offering party's costs of services of expert witnesses, as specified, actually incurred and reasonably necessary during trial or arbitration of the case, as specified.

Ch. 354 (SB 1171) Johnson. Public accommodations.

Existing law regulates the operations of a hotel, inn, boardinghouse, or lodginghouse, as specified. Existing law also prohibits unfair competition, as specified.

This bill would authorize an innkeeper to evict a guest who stays beyond the contractual period, as specified. This bill would also authorize a hotel, as defined, to prohibit the distribution of handbills on the premises, as specified, and would make a prohibited distribution of handbills on the premises punishable by a civil penalty as unfair competition under existing law.

Existing law makes it a misdemeanor for a person, and every agent or officer of any corporation, carrying on business as an innkeeper to refuse, without just cause, to receive and entertain any guest.

This bill would make certain exceptions with respect to guests who are minors, as specified.

Ch. 355 (SB 1288) Murray. Motor vehicle inspection and maintenance program.

(1) Existing law establishes a motor vehicle inspection and maintenance (smog check) program that, among other things, requires all motor vehicles, except for certain exempt vehicles, that are registered in designated areas of the state to biennially obtain a certificate of compliance or noncompliance with motor vehicle emission standards. Existing law provides that a certificate of compliance or noncompliance shall be valid for 90 days, except that if the certificate is issued to a licensed automobile dealer, the certificate shall be valid for 180 days.

This bill, until January 1, 2002, instead, would provide that a certificate issued to a licensed motor vehicle dealer shall be valid for a 2-year period, or until the vehicle is sold

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

and registered to a retail buyer, whichever occurs first. The bill would specify that a licensed motor vehicle dealer is responsible for having a smog check inspection performed on, and a certificate of compliance or noncompliance issued for, every motor vehicle offered for retail sale. Because other provisions of law would make a violation of this requirement a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 356 (AB 880) Dutra. Emergency services: communications.

Under the California Emergency Services Act, the Office of Emergency Services, under its director, is required to coordinate the emergency activities of all state agencies in connection with a state of emergency.

This bill would require the office to procure mobile communication translators to enable mutual-aid emergency response agencies to communicate effectively while operating on incompatible frequencies. The office would be required to implement these provisions to the extent that funds are appropriated for that purpose.

Ch. 357 (AB 1399) Wayne. State civil service: demonstration projects.

Existing law authorizes the State Personnel Board, directly or through agreement or contract with one or more agencies and other public and private organizations, to conduct and evaluate demonstration projects to determine whether a specified change in personnel management policies or procedures would result in improved state personnel management. Existing law prohibits supervisory employees from being included in a demonstration project unless there has been an opportunity for the employees and employee organizations to meet and confer with the employer.

This bill would instead prohibit supervisory employees from being included in a demonstration project unless there are written agreements with respect to the project between the affected state agency and all verified supervisory employee organizations that represent supervisory employees covered by the project.

Ch. 358 (SB 77) Murray. Workers' compensation: death benefits: statute of limitations.

Existing law specifies the time period within which various proceedings may be commenced under provisions of law relating to workers' compensation. In general, a proceeding to collect death benefits is required to be commenced within one year from the date of death or, in some cases, from the last furnishing of benefits. However, no proceedings may be commenced more than 240 weeks from the date of injury.

This bill would enact the Cliff Ojala Death Benefits Act, which would require that a proceeding to collect those benefits for the death of a health care worker, public safety employee, or certain correctional peace officers from an HIV-related disease be commenced within one year from the date of death, provided that certain events have occurred.

The bill would make legislative findings and declarations.

Ch. 359 (SB 286) C. Wright. Residential care facilities for the elderly.

Existing law provides for the licensure of residential care facilities for the elderly by the State Department of Social Services. Existing law requires the department to secure a criminal record on the applicant and specified persons, including certain volunteers or any staff person or employee who has frequent and routine contact with the clients, before issuing a license to any person or persons to operate or manage a residential care facility for the elderly.

This bill would apply the criminal record clearance requirements to a staff person, volunteer, or employee whether or not they have frequent and routine contact with the clients. The bill would exempt from the criminal record clearance requirement, under specified circumstances, certain friends and family members, volunteers, 3rd-party contractors and other business professionals, licensed or certified medical professionals,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

and other specified individuals. The bill would also extend application of the criminal record clearance requirements to certain officers of the governing body of the applicant and other persons with a financial interest in the applicant.

Ch. 360 (SB 742) Brulte. Secretary of State: Local Government Records Program.

Existing law authorizes the governing body of a county or city, with the consent of the Secretary of State, to transfer to the Secretary of State for inclusion in the State Archives official items that it deems have historic interest or value and that are in the custody of any officer or county or city.

This bill would require the Secretary of State to establish the Local Government Records Program, to be administered by the State Archives, for the purpose of establishing guidelines for local government records retention and providing archival support to local agencies in this state. The bill would require the Secretary of State to establish, publish, update, and maintain on a permanent basis guidelines for local government records retention. The bill would provide that the program is primarily responsible for the performance of specified functions.

This bill would appropriate $40,000 to the Secretary of State's office to carry out this program.

Ch. 361 (AB 563) Honda. Sales and use taxes: exemptions: animal shelter or nonprofit animal welfare organization: transfer of animal.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax.

This bill would enact the Pet Adoption Sales and Use Tax Relief Act of 1999, which would exclude from the terms "sale" and "purchase," and thereby exempt from state and local sales and use taxes, any animal when transferred by a city, county, city and county, or other local government animal shelter or nonprofit animal welfare organization, as specified, to an individual for use as a pet.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 362 (SB 497) Rainey. Redevelopment law: major violations: actions.

The Community Redevelopment Law requires a redevelopment agency to file with the Controller and present to its legislative body an annual report within 6 months of the end of the agency's fiscal year containing an independent financial audit that includes an opinion of the agency's compliance with laws, regulations, and administrative requirements governing the activities of the agency, and subjects officers of the agency to specified monetary forfeitures for failure to comply. The Controller is required to compile and annually publish reports of the financial transactions of each community redevelopment agency. Existing law provides for the filing of a writ of mandate to compel the performance of a duty by a public entity.

This bill would require the agency to inform the legislative body of any major violations, as defined, of the Community Redevelopment Law based on the independent financial audit, and would require the Controller to compile, on or before April 1 of each year, a list of the agencies that appear to have major violations. The bill would also require the Controller to determine, on or before June 1 of each year, whether the agency has corrected the major violation. If the Controller determines that agencies have not corrected major violations, the bill would require the Controller to send a list of those

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

agencies and their major violations to the Attorney General for action pursuant to the bill. The bill would require the Attorney General to determine whether to file an action to compel compliance with these provisions. The bill would require the court to conduct specified hearings and if it finds good cause to believe there is any uncorrected major violation, to order the agency to comply within a specified period and to prohibit, by order, specified actions by the agency until the court determines that the violation is corrected, at which time the court may dissolve the order.

Ch. 363 (AB 154) Cunneen. Criminal law.

Existing law provides for a motion to disqualify a district attorney from performing an authorized duty, and provides that the motion may not be granted unless the evidence shows that a conflict of interest exists that would render it unlikely that the defendant would receive a fair trial.

The bill would revise procedural requirements applicable to the motion. It would require the notice to be made at least 10 court days before the motion is heard. It also would require the motion to set forth grounds for disqualification, and be supported by affidavits. The bill would authorize the district attorney or Attorney General to file affidavits in opposition, and would require the court to review those affidavits and determine whether or not an evidentiary hearing is necessary. It would also provide that if the motion is brought at or before the preliminary hearing, it may not be renewed in the trial court on the basis of facts that were raised or could have been raised at the time of the original motion.

Ch. 364 (AB 376) Floyd. Weights and measures: device repair: service agencies.

(1) Existing law provides a comprehensive scheme for the regulation of device repairmen, defined as persons who engage in the business of installing, adjusting, servicing, or repairing commercial weighing or measuring devices, as defined. Existing law makes it unlawful to engage in that business unless registered with the Director of Food and Agriculture, as specified.

This bill would revise and recast those regulatory provisions and, among other things, provide for the registration of service agencies, defined to mean any person that repairs a commercial device, designed to be used for determining weight or measure. The bill would set forth certain registration requirements for service agencies, provide for a written examination for the licensing of service agents on and after January 1, 2001, establish a 7-member advisory committee, and prescribe the grounds and procedures for the denial, suspension, or revocation of a service agency's registration. The bill would require prescribed fees to accompany an application for service agency registration and would require those fees to be deposited in the Department of Food and Agriculture Fund, a continuously appropriated fund, thereby making an appropriation. Because, under existing law, a violation of these requirements would be a crime, the bill would impose a state-mandated local program by creating new crimes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 365 (SB 342) McPherson. Bipartisan Commission on the Political Reform Act.

The existing Political Reform Act of 1974, an initiative measure, prescribes various limitations and reporting requirements respecting, among other things, political campaign contributions. Existing law provides for the Bipartisan Commission on the Political Reform Act of 1974 with a prescribed membership. The commission is required to investigate and assess the effect of the Political Reform Act of 1974 on core political speech protected by the First Amendment to the United States Constitution, and on candidates for public office, campaign committees, the voters, state and local officials, and public employees, including the act's effect upon communications to and from public officials. The commission is required to review any ballot measures affecting the Political Reform Act of 1974 and to assess the impact of independent expenditure committees. The commission is required to report to the Legislature, by October 1, 1999,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

its findings and any recommendations to further the goals of the act. Commission members are entitled to receive $100 per diem compensation for attendance at meetings. These provisions relating to the commission are repealed on January 1, 2000, unless extended by statute.

This bill would extend that repeal date to January 1, 2001, and would extend the date on or before which the commission is required to report its findings to the Legislature to June 30, 2000.

Under existing law, no more than 3 members of the commission may be attorneys at law who devote more than 10% of their professional practice time to legislative, political campaign, or other politically related activities.

This bill would limit that restriction to members of the commission who are appointed by elected officials.

Ch. 366 (AB 184) Davis. Employment: hazardous materials safety data filing.

Under existing provisions of the Hazardous Substances Information and Training Act, the Director of Industrial Relations is required to prepare and amend, as prescribed, a list of hazardous substances and make that list available to manufacturers, employers, and the public. Existing law requires the manufacturer of any hazardous substance on that list to provide a specified material safety data sheet (MSDS) to direct purchasers of the hazardous substance. Under existing law, the manufacturer is responsible for preparing the MSDS. Existing law also requires the preparer of an MSDS to provide the Department of Industrial Relations with a copy of the MSDS on each hazardous substance it manufactures.

This bill would authorize the preparer to transmit the MSDS to the department in either paper or electronic form and would establish the responsibility for the protection of trade secret information contained in a MSDS that is filed electronically.

The bill would require the department to implement a system, for the period of January 1, 2002 to January 1, 2003, inclusive, enabling electronic MSDS filings and require the department to evaluate the effectiveness of the electronic filing format on relevant parties. The bill would prohibit implementation of its provisions before July 1, 2001, unless otherwise authorized pursuant to a specified executive order.

Ch. 367 (AB 207) Thomson. Invasion of privacy: recording communications: harassment.

Under existing law, nothing in provisions prohibiting the wiretapping of, eavesdropping on, or recording of confidential communications between cordless, cellular, or landline telephones, as specified, prohibits one party to a confidential communication from recording the communication for the purpose of obtaining evidence reasonably believed to relate to the commission by another party to the communication of the crime of extortion or other specified crimes.

This bill would provide, in addition, that notwithstanding those provisions, and in accordance with federal law, upon the request of a victim of domestic violence who is seeking a domestic violence restraining order, a judge issuing the order may include a provision in the order that permits the victim to record any prohibited communication made to him or her by the perpetrator. The bill would require the Judicial Council to amend its domestic violence prevention application and order forms in accordance with the provisions of the bill.

Ch. 368 (AB 669) Vincent. Election procedures.

Existing law provides that a voter using an absentee ballot may, prior to the close of the polls on election day, vote the ballot at the offices of the elections official and requires the voter to vote the ballot in the presence of any officer of the elections official or in a voting booth, as specified.

This bill would authorize elections officials to provide electronic voting devices for this purpose provided that sufficient devices are provided to include all ballot types in the election.

Ch. 369 (AB 1106) Committee on Human Services. Developmental services: regional center alternatives for service delivery.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires services to be provided to persons with developmental disabilities through the State Department of Developmental Services, and through regional centers with whom the department contracts to provide, or arrange for the provision of, services.

Under existing law, regional centers may explore and implement described regional center service delivery alternatives under certain conditions. Existing law provides for the repeal of these provisions relating to alternative service delivery on January 1, 2000.

This bill would delete that repeal date, thereby extending the authorization for use of service delivery alternatives by regional centers.

Ch. 370 (AB 1170) Frusetta. Fairs.

(1) Existing law generally provides that all revenues distributed to the state as license fees from horse racing are to be deposited into the Fair and Exposition Fund and are continuously appropriated to the Department of Food and Agriculture for various regulatory and general governmental purposes. Existing law also provides that any unallocated balance in the fund is appropriated without regard to fiscal years for allocation by the Secretary of Food and Agriculture for capital outlay to California fairs, for fair projects involving public health and safety, major and deferred maintenance, for fair projects required due to any emergency, physical changes to the fair site, or need to protect the fair property or installation, and for the acquisition or improvement of any property or facility that will serve to enhance the operation of the fair.

This bill would provide that a portion of the money subject to allocation by the secretary under these provisions may be allocated to California fairs for general operational support. By authorizing the expenditure of continuously appropriated funds for a new or expanded purpose, this bill would make an appropriation.

(2) Existing law provides that it is the intent of the Legislature that the moneys to be allocated by the secretary be used primarily for those fairs whose sources of revenue may be limited.

This bill would make this intent language applicable only to the portion of the moneys allocated for general operational support.

(3) Existing law provides that the 22nd District Agricultural Association may expend up to $500,000 annually for the operation of a fair from the money received by the district from a lease of district property for horse racing purposes. Existing law also provides that any money received by the district in excess of this amount may either be expended in furtherance of a specified master plan, accumulated for that purpose, or transferred to the General Fund upon executive order of the Director of Food and Agriculture.

This bill would provide that the district may expend up to $750,000 annually for the operation of a fair, and that any funds thereby received in excess of this amount may be allocated as provided for in existing law.

Ch. 371 (SB 1247) Escutia. CalWORKs: electronic benefits transfer.

Existing law provides for the California Work Opportunity and Responsibility to Kids (CalWORKs) program, under which each county provides cash assistance and other benefits to qualified low-income families.

Existing law permits a county to elect to deliver CalWORKs benefits through the use of an electronic benefits transfer system.

This bill would require that when CalWORKs benefits are delivered pursuant to electronic benefits transfers, benefits shall be staggered over a period of 3 calendar days, unless a county requests a waiver from the department and the waiver is approved, or except in cases of hardship.

Existing law requires counties to provide multiple electronic benefits transfer cards to adult members of a household or assistance unit under certain circumstances.

This bill would instead require counties to provide one card to each adult member of a household or assistance unit.

Since the bill would impose requirements on each county, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 372 (SB 1304) Committee on Environmental Quality. Environmental laboratories.

Existing law authorizes the certification and regulation of environmental laboratories by the State Department of Health Services. Existing law also requires the department to adopt regulations governing the administration of these provisions, including, among other things, regulations regarding application criteria for acceptance and approval of 3rd-party laboratory accreditation organizations.

This bill would revise these provisions to require laboratories to obtain a certificate pursuant to statutory requirements, and would further authorize those laboratories to apply for accreditation under the National Environmental Laboratory Accreditation Program (NELAP). This bill would revise references to 3rd-party laboratory accrediting organizations to instead refer to approved 3rd-party laboratory accrediting organizations (ATPLAO's). This bill would define additional terms relating to certification and accreditation of environmental laboratories and ATPLAO's. This bill would require that NELAP accreditation by another jurisdiction be recognized for out-of-state laboratories with regard to certain program activities.

This bill would require the department, when NELAP standards are adopted by the National Environmental Laboratory Accreditation Conference (NELAC), to adopt or amend the regulations relating to environmental laboratories as necessary to enable California environmental laboratories to participate in the National Environmental Laboratory Accreditation Program.

Existing law provides that a certificate issued by the department expires 24 months from the date of issuance unless renewed.

This bill would provide that the period of accreditation of a NELAP accredited laboratory shall be 12 months, and would require notification of the accrediting authority of changes in location or laboratory director.

This bill would revise the standards for the acceptance and approval of approved 3rd-party laboratory accrediting organizations (ATPLAO's), and would revise the authority of the department to adopt regulations regarding, among other things, NELAP accreditation, and accreditation of ATPLAO's. This bill would clarify and revise the required time periods for certain notifications relating to sale of a laboratory, change of location, or change of the director, and regarding forfeiture of certificates.

This bill would revise the grounds for denial and the procedures for denial, suspension, or revocation of laboratory certificates or NELAP accreditation. This bill would require laboratories that apply for NELAP accreditation to pay, at the time of application, and annually thereafter, a base fee and fees for each field of testing for which the laboratory seeks accreditation, and would authorize the adjustment of those fees in accordance with specified provisions of existing law.

Existing law authorizes the department and its duly authorized representatives to enter and inspect certified laboratories, and provides that it is a misdemeanor for any person to prevent, interfere with, or attempt to impede in any way, such an inspection.

This bill would also authorize the denial or revocation of a certification, or NELAP reaccreditation for refusing entry for an announced or unannounced inspection or refusal of permission to inspect records during normal business hours.

Existing law requires certified laboratories to analyze performance evaluation samples when applying for certification or renewal of certification.

This bill would require the immediate revocation of the certification or NELAP accreditation of a laboratory that submits proficiency testing samples generated by another laboratory as its own. This bill would require NELAP accredited laboratories to analyze proficiency testing samples not less than twice a year.

Existing law authorizes the imposition of criminal penalties for certain offenses relating to certified laboratories.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would make those penalties applicable to NELAP accredited laboratories, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 373 (AB 74) Strom-Martin. Transportation: State Rail Plan.

Existing law requires the Department of Transportation to prepare a 10-year rail passenger program biennially for submission to the Legislature, the Governor, the Public Utilities Commission, and the California Transportation Commission. The plan is required to include prescribed elements.

This bill, instead, would require the department to submit a State Rail Plan consisting of a passenger rail element and a freight rail element and would prescribe the items required to be included in each element.

Ch. 374 (AB 117) Mazzoni. School district governing boards: contracts.

Under existing law, the governing board of a school district may initiate and carry on any program, activity, or may otherwise act in any manner that is not in conflict with or inconsistent with, or preempted by, any law and that is not in conflict with the purposes for which school districts are established.

This bill would prohibit the governing board of a school district from entering into a contract that grants exclusive advertising rights, or grants the right to the exclusive sale of carbonated beverages, throughout the district to a person, business, or corporation unless the governing board of the school district has adopted a policy after a public hearing to ensure that the district has internal controls in place regarding the expenditure of public funds. The bill would also prohibit the governing board from entering a contract that prohibits a school district employee from disparaging the goods or services of the party contracting with the board. The bill would prohibit the governing board of a school district from entering into a contract, or from permitting a school within the school district from entering into a contract, for an electronic product or service that requires the dissemination of advertising to pupils unless the governing board of the school district enters into the contract at a noticed public hearing, provides written notice to parents or guardians of pupils regarding that the advertising will be used in the classroom, permits a parent to request that the pupil not be exposed to the program containing the advertising, and makes certain findings that the electronic product or service is or would be an integral component of the education of pupils and that the school district cannot afford to provide the electronic product or service unless it contracts to permit dissemination of advertising to pupils.

This bill would allow a school district to sell advertising products, or services on a nonexclusive basis.

Ch. 375 (AB 261) Lempert. Pharmacists.

Existing law authorizes a pharmacist to perform certain procedures or functions as part of the care provided by a health care facility, a licensed home health agency, a licensed clinic, as specified, or a provider under contract with a health care service plan, in accordance with policies, procedures, or protocols of that facility, home health agency, licensed clinic, or health care service plan. Those policies, procedures, or protocols must meet specified standards.

This bill would additionally authorize a pharmacist to perform those procedures or functions in accordance with the policies, procedures, or protocols of a physician. The bill would also revise the standards for those policies, procedures, and protocols to require that, at a minimum, they require that the medical records of the patient be available to both the patient's prescriber and the pharmacist and that the procedures to be performed by the pharmacist relate to a condition for which the patient has first been seen by a physician. The bill would also make a conforming change.

Ch. 376 (AB 327) Gallegos. Vehicles: license plates: lien sales.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides procedures for the sale of a vehicle at a lien sale and makes that sale void unless the lienholder complies with those procedures and other provisions relating to liens.

This bill would require, following the sale of a vehicle at a lien sale, the lienholder to remove and destroy the vehicle's license plates and, within 5 days of that sale, submit a completed notice of "Release of Liability" form to the Department of Motor Vehicles, which the department would be required to retain that form for 2 years.

Ch. 377 (AB 339) Runner. Rim of the Valley Trail Corridor: boundary revisions.

Existing law required the Santa Monica Mountains Conservancy to prepare a coordinated trail development plan and recreational access program for the Rim of the Valley Trail Corridor, as specified, and to submit the plan and program to specified committees of the Legislature not later than June 30, 1990, and authorized the conservancy to make minor boundary changes in the Rim of the Valley Trail Corridor in the form of maps and descriptions to be included in the plan and to be submitted to the Secretary of State not later than July 31, 1990.

This bill would provide that, if the conservancy determines, based on relevant scientific information and land use planning studies, that a revision of the boundaries of the Rim of the Valley Trail Corridor in the vicinity of Placerita Canyon State Park east of State Route 14 is necessary, the executive director of the conservancy would be required to prepare and file with the Secretary of State, the Assembly Committee on Natural Resources, and the Senate Committee on Natural Resources and Wildlife, a revised map showing the changes in the boundaries of the Rim of the Valley Trail Corridor. The bill would specify that nothing in those provisions shall be interpreted to affect any portion of Elsmere Canyon, or to have an effect on the decisions whether or not to permit Elsmere Canyon as a solid waste facility, as specified.

Existing law provides that the State Coastal Conservancy has the prime responsibility for carrying out projects identified in certified local coastal programs for jurisdictions within the coastal zone portion of the Santa Monica Mountains Zone.

This bill would provide that notwithstanding those provisions, the provisions added by the bill would not affect the jurisdiction of the coastal conservancy.

Ch. 378 (AB 405) Knox. Highways: construction: contracts.

Existing law authorizes the Department of Transportation to make and enter into, in the manner provided by law, any contracts required for the performance of its duties.

This bill would authorize the department to conduct a pilot project to let design-sequencing contracts, as defined, for the design and construction of no more than 6 transportation projects, to be selected by the Director of Transportation. The bill would require the department to prepare a yearly status report on its contracting methods, procedures, costs, and delivery schedules and, upon completion of all design-sequencing contracts, to establish a peer review committee for preparation of a report for submittal to the Legislature that describes and evaluates the pilot project. The bill would require the design-sequencing contracts to be awarded in accordance with specified procedures.

The bill would specify that its provisions shall become inoperative on July 1, 2004, and as of January 1, 2005, would be repealed.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 379 (AB 422) Steinberg. Instructional materials: disabled students.

Under existing law, a publisher or manufacturer of instructional materials offered for adoption or sale in California is required to comply with specified requirements, including providing to the state, at no cost, the right to transcribe, reproduce, and distribute the material in braille, large print, recordings, or other accessible media for use by pupils with visual disabilities. This right includes computer diskette versions of instructional materials if made available to any other state, and those corrections and revisions as may be necessary.

This bill would require every individual, firm, partnership or corporation publishing or manufacturing printed instructional materials, as defined, for students attending the University of California, the California State University, or a California Community College to provide to the university, college, or particular campus of the university or

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

college, for use by students at no additional cost and in a timely manner, any printed instructional material in unencrypted electronic form upon the receipt of a written request, provided that the university or college complies with certain conditions.

This bill would require that the computer files or electronic versions of printed instructional material maintain their structural integrity, as defined, be compatible with commonly used braille translation and speech synthesis software, and include corrections and revisions as may be necessary.

This bill would authorize the Chancellor of the California Community Colleges, the Chancellor of the California State University, and the President of the University of California to each establish one or more centers within their respective segments to process requests for electronic versions of instructional materials, as prescribed.

This bill would also require an individual, firm, partnership or corporation that publishes or manufactures nonprinted instructional materials for students attending the University of California, the California State University, or a California Community College to provide computer files or other electronic versions of the nonprinted instructional materials for use by students, subject to the same conditions for printed instructional materials, when technology is available to convert these nonprinted instructional materials to a format that maintains the structural integrity of the nonprinted instructional material that is compatible with braille translation and speech synthesis software.

This bill would provide that willful failure to comply with these requirements would be subject to sanctions under the law relating to full and equal access of disabled persons to public accommodations.

Ch. 380 (AB 423) Dutra. Fire protection: roofing materials.

(1) Existing law requires every new structure, and every existing structure when 50% or more of the roof area is reroofed within a one-year period, to have a fire retardant roof covering that is at least class A, B, or C, as specified. The State Building Standards Commission was required to incorporate these requirements by publishing them on January 1, 1995, as an amendment to the California Building Standards Code.

This bill instead would require the entire roof covering of every existing structure where more than 50% of the total roof area is replaced within any one-year period, every new structure, and any roof covering applied in the alteration, repair, or replacement of the roof of every existing structure, to be a fire retardant roof covering that is at least class A, B, or C, as specified. It would require the commission to incorporate these requirements by publishing them as an amendment to the California Building Standards Code.

(2) Existing regulations of the Insurance Commissioner relating to adjustment and settlement of certain losses based on replacement cost require that when a loss requires replacement of items and the replaced items do not match in quality, color, or size, the insurer shall replace all items in the damaged area so as to conform to a reasonably uniform appearance.

This bill would require the commissioner to accept the use of fire retardant wood roofing that meets the requirements described in (1) above as meeting that replacement requirement.

Ch. 381 (AB 471) Scott. Teacher credentialing.

Existing law requires the governing board of a school district to employ for positions requiring certification qualifications only persons who possess the qualifications for those positions. Existing law authorizes the Commission on Teacher Credentialing to waive provisions governing the preparation or licensing of educators for certain purposes, including to provide a credential candidate additional time to complete a credential requirement, to allow a school district or school to implement an education reform or restructuring plan, and when deemed appropriate by the commission. Existing law authorizes the commission to issue or renew emergency teaching or specialist permits if certain conditions are met and requires the holder of an emergency permit, among other things, to participate in ongoing training, coursework, or seminars designed to prepare the individual to become a fully credentialed teacher or other educator in the subject area in which he or she is assigned to teach or serve.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the commission to report annually to the Legislature and the Governor on the number of classroom teachers who received credentials, internships, and emergency permits in the previous fiscal year and to make this report available to school districts and county offices of education to assist them in the recruitment of credentialed teachers. The bill would also require the commission to include in the report the total number of teacher credentials recommended by all accredited teacher preparation programs authorized by the commission and that number broken down by the type of institution making the recommendation.

This bill would authorize the commission to approve a school district request for the assignment of an individual pursuant to the commission's waiver and emergency permit authority if the district has made reasonable efforts to recruit a fully prepared teacher, as defined, for the assignment with first priority given to candidates who will complete initial preparation requirements within a matter of months and second priority to a candidate who is enrolled in an approved internship program in the region of the school district. If a suitable individual who meets either of those 2 priorities is not available to the school district, the bill would then authorize a school district, as a last resort, to request approval for the assignment of a person who does not meet that criteria.

Ch. 382 (AB 501) Nakano. Criminal procedure: career criminal prosecutions.

Existing law authorizes the court to grant a continuance of a criminal trial only for good cause, and convenience of the parties does not in itself constitute good cause. Existing law also requires the superior court, when scheduling a trial date at an arraignment in cases of specified offenses, to make reasonable efforts to avoid setting that trial on the same day that another trial is set involving the same prosecuting attorney.

In addition, under existing law, a prosecutor assigned a criminal case that is prosecuted under the Career Criminal Prosecution Program is required to make all reasonable efforts to reduce the time between the arrest for and disposition of the charge, perform all court appearances on that particular case, and is prohibited from negotiating a plea agreement with the defendant except in limited circumstances.

This bill would require the superior court when scheduling a trial date at an arraignment in a case prosecuted pursuant to the Career Criminal Prosecution Program, to make reasonable efforts to avoid setting the trial on the same day that another trial is set involving the same prosecuting attorney. This bill would also expand the grounds for good cause for a continuance of a trial to include a case prosecuted pursuant to the Career Criminal Prosecution Program where the prosecuting attorney assigned to the case has a hearing in that court or another court on a different case. Under these conditions, the bill would authorize the court to grant only one continuance per case, not to exceed 10 days.

This bill would incorporate additional changes in Section 1050 of the Penal Code proposed by SB 69, to be operative if SB 69 and this bill are both enacted and become effective on or before January 1, 2000, and both bills are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 383 (AB 526) Zettel. Hearsay exceptions: elder and dependent adults.

Existing law, the hearsay rule, generally excludes from evidence a statement that was made other than by a witness while testifying at a hearing if that statement is offered to prove the truth of the matter stated.

This bill would create an exception to the hearsay rule for certain statements of specified elder and dependent adults who are victims of abuse, as specified.

Ch. 384 (AB 535) Reyes. Telecommunications: services.

Existing law requires telephone corporations to provide specified customer and subscriber services.

This bill would require a local exchange service provider that offers and charges for pay per use features that do not require an access code to be dialed to activate the service to provide a new residential subscriber, including an existing residential customer ordering an additional line, during the verbal service order process, with information about those features. The bill would require the representatives of a provider to offer that subscriber blocking options for these features. The bill would require a local exchange

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

service provider that offers these features to advise an existing residential subscriber who inquires about the features, or who seeks a bill adjustment for the inadvertent or unauthorized use of those per use custom calling features, that the features can be blocked, and to inquire as to whether the subscriber would like to block any or all of the features. The bill would require a local exchange service provider that offers these features to provide a prescribed notice to all existing residential subscribers not later than May 1, 2000, describing all features provided on a per use basis, the charge for each activation, any additional charges, and detailed information about the ability to block these features. The bill would provide that a local exchange service subscriber that has not blocked per use features is entitled to a one-time bill adjustment, as specified.

Ch. 385 (AB 577) Honda. Credit unions.

Existing law, the California Credit Union Law, provides for the regulation of credit unions by the Commissioner of Financial Institutions. Existing law provides that a credit union organized and duly qualified as a credit union in another state may become a credit union organized and operating under the laws of this state if in compliance with certain specified requirements.

This bill would specifically state that a credit union doing business in this state is not prohibited from expanding or doing business in other states, countries, or foreign jurisdictions.

The bill would require the Commissioner of Financial Institutions to submit to the appropriate policy committees in each house of the Legislature on or before January 30, 2000, recommendations for a comprehensive statutory framework to permit foreign credit unions to operate in this state and to provide for the regulation and supervision of foreign credit unions operating in this state.

Ch. 386 (AB 685) Thomson. Accessibility standards: blind and visually impaired.

Existing law imposes various requirements relating to access to buildings by persons with disabilities, including provisions in the California Building Standards Code, and makes the issuance of a building permit subject to compliance with those standards.

The bill would require that all detectable warning products and directional surfaces installed after January 1, 2001, be approved by an independent entity selected by the Department of General Services, Division of the State Architect, in consultation with the Department of Housing and Community Development when the products and surfaces may be mandated for use in residential housing, and that the Division of the State Architect impose fees to recover administrative and code development costs, as necessary, to develop standards and administer the registration and approval program. The fees would be paid by manufacturers of detectable warning products and directional surfaces.

Ch. 387 (AB 762) Briggs. Property tax deferral: temporary reimbursement.

Existing law authorizes a county board of supervisors to provide by ordinance for the reassessment of property that is damaged or destroyed, without fault on the part of the assessee, by a major misfortune or calamity, upon the application of the assessee or upon the action of the county assessor with the board's approval. In a county that has adopted a reassessment ordinance and has been proclaimed by the Governor to be in a state of emergency, existing law authorizes an owner of substantially damaged property, reassessed pursuant to the county's ordinance, to apply to the county assessor for the deferral of (a) the next property tax installment due on the regular tax roll after the relevant disaster, and (b) unpaid, nondelinquent current year taxes on the supplemental property tax roll. Existing law provides, in accordance with specified procedures, for the state's reimbursement of a county for amounts of tax deferred with respect to damaged properties under this authority, and for a county's return to the state of reimbursed amounts after that county's collection of the deferred taxes. Existing law also continuously appropriates, without regard to fiscal years, moneys in the Special Fund for Economic Uncertainties for purposes of funding these state reimbursements. Existing law additionally authorizes a county to adopt an ordinance providing for a second deferral of a previously deferred regular property tax installment with respect to a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

substantially damaged property, and for the first deferment of the next following regular property tax installment with respect to the same property. Existing law prohibits the application of existing reimbursement and return provisions to tax amounts that are deferred by a county pursuant to this additional authority.

This bill would, as provided, apply current state reimbursement and county return provisions to amounts of property tax on the regular property tax roll with respect to damaged property that is the subject of additional assessor deferrals pursuant to ordinance. By requiring moneys continuously appropriated from the Special Fund for Economic Uncertainties to be allocated for the new purpose of reimbursing counties for these additional tax deferrals, this bill would make an appropriation. This bill would also make nonsubstantive, clarifying changes.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 388 (AB 802) Dutra. Insurance policies: disclosure of finance charges.

Existing law requires any person engaged in business as an insurance agent or broker and who participates in the arrangement of a premium financing agreement and accepts compensation for arranging, directing, or performing services in connection with the premium financing agreement, to disclose to the insured, in a manner and form established by the Insurance Commissioner, the amount of that compensation, as specified.

This bill would require the amount of any periodic finance charge imposed for the coverage purchased and the annual percentage rate associated with those charges to be disclosed in the policy itself, or if arranged pursuant to a separate premium financing agreement in the premium financing agreement itself, and in the premium finance billings, with certain exceptions.

Ch. 389 (AB 810) Thomson. School finance: school attendance alternatives.

Existing law requires, as a condition for the receipt of school apportionments from the state school fund, that the governing board of a school district adopt rules and regulations establishing a policy of open enrollment within the district for residents of the district. Existing law requires a selection policy for a school that receives requests for admission in excess of the capacity of the school to ensure that selection of pupils to enroll in the school is made through a random, unbiased process but permits the policy to provide priority for attendance to siblings of children already in attendance in that school.

This bill would permit the policy also to provide priority to children whose parent or legal guardian is assigned to that school as his or her primary place of employment.

Ch. 390 (AB 939) Brewer. School facilities deferred maintenance.

Existing law establishes the State School Deferred Maintenance Fund which is continuously appropriated for the purposes for which it is established. Existing law requires the State Allocation Board to apportion, from the State School Deferred Maintenance Fund, a specified amount of funds to school districts on a 50% matching basis, to the extent funds are available.

This bill would require a governing board of a school district to discuss proposals and plans for expenditure of funds for the deferred maintenance of school district facilities at a regularly scheduled public hearing, and would require the board to report to the Legislature by March 1, in any year that the school district does not set aside prescribed funds for facility deferred maintenance, with copies to the Superintendent of Public Instruction, the State Board of Education, the Department of Finance, the State Allocation Board, and the public. By establishing these additional requirements, this bill would impose a state-mandated local program.

This bill would make a technical, nonsubstantive conforming change related to the reorganization of related provisions pursuant to Chapter 227 of the Statutes of 1996.

This bill would make technical changes to conform with AB 148 to be operative only if (1) AB 148 contains certain provisions, and (2) AB 148 is enacted and becomes effective on or before January 1, 2000.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 391 (AB 942) Dutra. State Housing Law: enforcement.

(1) The State Housing Law authorizes a city or county enforcement agency to issue an order or notice to repair a building to the owner if the building is maintained in a manner that violates any provisions of this act, the building standards published in the State Building Standards Code, or any other rule or regulation promulgated pursuant to the act, and the violations are so extensive and of a nature that the health and safety of the residents or the public is substantially endangered.

This bill would require that a copy of the order or notice be provided either (a) by both posting a copy of the order or notice in a conspicuous place on the property and by first-class mail to each affected residential unit or (b) by posting the copy in a conspicuous place on the property and in a prominent place on each affected residential unit. The bill would also require that the order or notice contain specified information. By increasing the duties of local enforcement officials, the bill would impose a state-mandated local program.

(2) Existing law also requires that tenants in a residential building be provided notice of any violation of the provisions specified in (1) above that affects the health and safety of the occupants and renders the building untenantable, as well as be provided notice of an order of the code enforcement agency issued after inspection declaring a dwelling substandard, an enforcement agency's decision to repair or demolish, or the issuance of a building or demolition permit following the abatement order of an enforcement agency. This notice may be provided either by first-class mail to each affected unit or by posting a copy of the notice in a prominent place on the affected residential unit.

This bill instead would require this notice to be provided by posting a copy of the notice in a conspicuous place on the property.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 392 (AB 1062) Margett. Special education.

Existing law prohibits a diploma, certificate, or other document, except transcripts and letters of recommendation, from being conferred on a pupil as evidence of completion of a prescribed course of study or training, or of satisfactory attendance, unless the pupil has met the standards of proficiency in basic skills prescribed by the governing board of the high school district, or equivalent thereof. Existing related regulations require the award of a diploma to an individual with exceptional needs who meets public agency requirements for completion of a prescribed course of study and adopted proficiency standards.

This bill would authorize the award of a certificate or document of educational achievement to an individual with exceptional needs who meets certain criteria. The bill would also require that an individual with exceptional needs who meets the criteria for a certificate or document of educational achievement is eligible to participate in any graduation ceremony and any school activity related to graduation in which a pupil of similar age without disabilities would be eligible to participate.

The bill would require the Advisory Commission on Special Education, on or before July 1, 2000, to report to the State Board of Education, the Superintendent, the Legislature, and the Governor on the practice of awarding certificates or documents of educational achievement and diplomas to individuals with exceptional needs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 393 (AB 1234) Shelley. State bodies: open meetings: notice: violations.

(1) The Bagley-Keene Open Meeting Act requires, among other things, that notice of regular meetings of a state body be given to any person who requests that notice in writing.

This bill would require notice of a regular meeting of a state body also to be made available on the Internet, and would require the written notice to include the address of the Internet site where required notices are made available.

(2) Under the act, notice for special meetings of a state body is required to be provided to persons requesting that notice, and to be provided to the general public by placing it on appropriate electronic bulletin boards or other appropriate mechanisms, whenever the state body has the electronic capability necessary to do so. A state body holding a special meeting is required to make a specified finding in regard to the need for the special meeting.

This bill would delete the provisions regarding the placing of notice of a special meeting on electronic bulletin boards, and instead would require notice of the special meeting, and the finding in regard to the need for the special meeting, to be made available on the Internet. It would require the written notice to specify the address of the Internet site where required notices are made available.

(3) In the case of an emergency meeting by a state body, the act requires the presiding officer of the state body, or a designee thereof, to provide notice of the emergency meeting by telephone, if telephone services are functioning, to newspapers of general circulation and radio or television stations that have requested notice of meetings, one hour prior to the emergency meeting. The minutes of an emergency meeting and other specified information are required to be posted for a minimum of 10 days in a public place as soon after the meeting as possible.

This bill would also require notice of the emergency meeting to be made available on the Internet as soon as is practicable after the decision to call the emergency meeting has been made, and would require the minutes of the meeting to be made available on the Internet for a minimum of 10 days.

(4) This bill would provide that the provisions described in (1) to (3), inclusive, shall not be implemented until July 1, 2001, unless otherwise authorized by the Department of Information Technology pursuant to a specified executive order.

(5) The act authorizes the Attorney General, the district attorney, or any interested party to commence an action by mandamus, injunction, or declaratory relief for the purpose of stopping or preventing violations or threatened violations of the act, or to determine the applicability of the act to actions or threatened future actions by members of a state body.

This bill instead would authorize these actions for the purpose of stopping or preventing violations or threatened violations of the act, or determining the applicability of the act to past actions or threatened future actions by members of a state body.

The act also authorizes any interested person to commence such an action for the purpose of obtaining a judicial determination that an action taken by a state body in violation of certain provisions of the act is null and void. An action seeking such a judicial determination is required to be filed within 30 days of the date the action was taken.

This bill would change that filing period to 90 days.

This bill would declare the intent of the Legislature in making these changes to the act to supersede the decision of the California Supreme Court in Regents of the University of California v. Superior Court (Molloy) (1999) 20 Cal.4th 509.

Ch. 394 (AB 1546) Granlund. Local agency firefighters.

Existing law requires that whenever a fire protection district or a city fire department is dissolved or its territory is decreased in size by consolidation, merger, incorporation, annexation or other reasons and the fire agency taking over the duties of that district or department decides to hire more firefighters, the fire agency shall give first choice for those positions to firefighters at comparable ranks of the dissolved or decreased agency.

This bill would instead apply this requirement to special districts and joint powers agencies that provide fire protection as well as city fire departments.

Ch. 395 (SB 120) Ortiz. Hazardous substances.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes the Department of Toxic Substances Control to expend the money in the Toxic Substances Control Account in the General Fund, upon appropriation by the Legislature, to pay for, among other things, removal and remedial actions related to the release of hazardous substances and the oversight of removal and remedial actions. Existing law authorizes the Attorney General to recover from the liable person, as defined, the costs incurred and payable from the account for removal or remedial actions to a hazardous substance release. Existing law requires a liable party who establishes, by a preponderance of evidence, that only a portion of those costs are attributable to that party's actions, to only pay for that portion of those costs.

This bill would prohibit the department from making any determination that a response action at the Western Pacific Avenue site in Sacramento is complete, until after the City of Sacramento has completed its land use planning process and all response actions necessary to conform to the approved land use plan are complete. The bill would exempt from this prohibition, any portion of the site acquired by the Sacramento Regional Transit District, in accordance with specified environmental documents.

Ch. 396 (SB 139) Johnson. Accidental death: concealment.

(1) Under existing law, every person who, having knowledge of the actual commission of a crime and under specified circumstances compounds or conceals that crime, is guilty of a crime punishable as follows:

(a) By imprisonment in the state prison, or in a county jail not exceeding one year, where the crime was punishable by death or imprisonment in the state prison for life.

(b) By imprisonment in the state prison, or in a county jail not exceeding 6 months, where the crime was punishable by imprisonment in the state prison for any other term than for life.

(c) By imprisonment in a county jail not exceeding 6 months, or by a fine not exceeding $1,000, where the crime was a misdemeanor.

This bill would provide that every person who, having knowledge of an accidental death, actively conceals or attempts to conceal that death, shall be punished by imprisonment in a county jail for not more than one year, or by a fine of not less than $1,000 nor more than $10,000, or by both that fine and imprisonment. Because this bill would create a new crime, it would impose a state-mandated local program.

The bill also would define the phrase "to actively conceal an accidental death."

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 397 (SB 176) Knight. School attendance.

(1) Existing law authorizes the governing board of any school district to admit pupils residing in another school district to attend any school in that district. Existing law authorizes school districts of residence to limit the number of pupils newly transferring out each year based upon the district's average daily attendance. Existing law credits the school district of choice, as to pupils admitted to the school district under this authority, with a corresponding increase in average daily attendance for state apportionment purposes. Existing law prohibits the school district of residence from adopting policies that block or discourage pupils from applying for a transfer and permits the parent or guardian of a pupil who is prohibited from transferring to appeal the decision to the county board of education. Existing law provides that the governing board of a school district may, but is not required to, accept interdistrict transfers, and requires a governing board that elects to accept transfers to adopt a resolution to ensure that pupils admitted under the policy are selected through a random, unbiased process that prohibits an evaluation of whether or not the pupil should be enrolled based upon his or her academic or athletic performance. Existing law provides that either the pupil's school district of residence, upon notification of the pupil's acceptance to the school district of choice, or the school district of choice may prohibit the transfer of a pupil under this article or limit the number of pupils so transferred if the governing board of the district determines that the transfer would negatively impact the court-ordered

NOTE: Superior numbers appear as a separate section at the end of the digests.

desegregation plan of the district or the voluntary desegregation plan of the district that meets certain criteria or the racial and ethnic balance of the district.

Under existing law, those provisions become inoperative on July 1, 2000, and are repealed as of January 1, 2001.

This bill would instead provide that these provisions become inoperative on July 1, 2003, and are repealed as of January 1, 2004. By extending the appeal duties of the county board of education under these provisions, this bill would impose a state-mandated local program.

This bill would require, on or before July 1, 2002, the Superintendent of Public Instruction to report to the Governor and the Legislature on the effectiveness of these provisions and to make recommendations regarding their continuation or modification.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 398 (SB 493) Figueroa. Taxpayer contributions: Birth Defects Research Fund.

Provisions relating to the administration of personal income taxes allow individual taxpayers to contribute amounts in excess of their tax liability for the support of specified funds.

This bill would additionally allow taxpayers to designate on their tax returns that a specified amount in excess of their tax liability be transferred to the Birth Defects Research Fund, which would be created by this bill. However, the bill would provide that a voluntary contribution designation for this fund shall not be added on the tax return until another voluntary contribution designation is removed, or until taxable years beginning on or after January 1, 2002, whichever occurs first.

This bill would provide that all money contributed to the fund pursuant to these provisions would be subject to appropriation by the Legislature, as specified.

This bill would also provide that these voluntary contribution provisions are repealed on January 1 of the fifth taxable year following the taxable year the fund first appears on the tax return. The provisions are repealed for taxable years beginning on or after January 1 of the calendar year in which the Franchise Tax Board estimates by September 1 that the contributions made on returns filed in that calendar year will be less than $250,000, and an adjusted amount for subsequent taxable years.

Ch. 399 (SB 1226) Johannessen. Dependent children: status review hearings.

(1) Existing law requires that reunification services be provided to the parent or guardian of a child who is removed from his or her custody on the basis of abuse or neglect. These services need not be provided under certain circumstances, including where the court has ordered a permanent plan of adoption, guardianship, or long-term foster care for any sibling or half-sibling of the child for specified reasons.

This bill would instead provide that those services need not be provided where the court ordered termination of reunification services for the sibling or half-sibling of the child for specified reasons.

(2) Existing law provides that at the status review hearing held 6 months after the initial dispositional hearing regarding a dependent child, the court is required to order the return of the child to the physical custody of his or her parent or guardian unless the court finds, by a preponderance of the evidence, that the return of the child to his or her parent or guardian would create a substantial risk of detriment to the safety, protection, or physical or emotional well-being of the child. Existing law provides that the social worker has the burden of establishing that detriment, and that the failure of the parent or guardian to participate regularly in court-ordered treatment programs shall be prima facie evidence that return would be detrimental.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that the failure of the parent or guardian to participate regularly and make substantive progress in court-ordered treatment programs would constitute prima facie evidence that return of the child to the physical custody of his or her parent or guardian would be detrimental to the child, as specified.

This bill would incorporate additional changes in Sections 361.5 and 366.21 of the Welfare and Institutions Code proposed by both AB 645 and AB 740, to be operative if this bill and one or more of the other bills are enacted and become effective January 1, 2000, and this bill is enacted last.

Ch. 400 (SB 1309) Baca. Teacher credentialing: emergency permits.

Existing law requires the Commission on Teacher Credentialing to establish standards for the issuance and renewal of teacher credentials and authorizes the commission to waive provisions governing the preparation or licensing of educators for certain purposes, including to provide a credential candidate additional time to complete a credential requirement, to allow a school district or school to implement an education reform or restructuring plan, and when deemed appropriate by the commission. Existing law authorizes the commission to issue or renew emergency teaching or specialist permits if certain conditions are met and requires the holder of an emergency permit, among other things, to participate in ongoing training, coursework, or seminars designed to prepare the individual to become a fully credentialed teacher or other educator in the subject area in which he or she is assigned to teach or serve.

This bill would require the commission to regularly notify local education agencies of the various provisions in current law that allow the assignment of personnel when a fully qualified teacher is not available and a substitute has served for the maximum days permitted by law.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 401 (AB 241) Cunneen. Hazardous waste codes.

(1) Existing law required the Department of Toxic Substances Control to revise, on or before December 31, 1998, the hazardous waste code identification system established in specified regulations so as to meet certain requirements, including requiring hazardous wastes regulated under the federal Resources Conservation and Recovery Act of 1976 (RCRA) to be identified by the RCRA hazardous waste code section, requiring hazardous wastes that are identified pursuant to the RCRA hazardous waste identification criteria, but that are not regulated under RCRA, to be identified by the RCRA code, and requiring non-RCRA hazardous waste to be identified by an identification code system consistent with the RCRA hazardous waste code system.

This bill would delete the requirement that the revised code identification system require hazardous wastes that are identified pursuant to the RCRA hazardous waste identification criteria, but that are not regulated under RCRA, to be identified by a RCRA code, and would instead prohibit the revised code system from requiring non-RCRA hazardous wastes to be identified by a RCRA hazardous waste code. The bill would also delete obsolete provisions regarding the procedures for the revision of those regulations.

(2) Existing law requires the department to allow for a reasonable transition period, not to exceed one year, for the public to comply with the revised hazardous waste code system. Existing law also requires the department to adopt a specified regulatory procedure for the amendment of specified permits, registrations, licenses, and certifications.

This bill would instead require the department to determine an operative date for the regulations establishing the revised system, which would be required to be set at a date no later than 3 years after the date the regulations are adopted and would allow the department to extend the operative date for up to an additional 2 years. The bill would require the regulatory procedure to apply to facilities on the operative date of the revised hazardous waste code system.

Ch. 402 (AB 734) Romero. Community colleges: finance.

Existing law establishes the California Community Colleges under the administration of the Board of Governors of the California Community Colleges. Existing law authorizes

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the establishment of community college districts under the administration of community college governing boards, and authorizes these districts to provide instruction at community college campuses throughout the state. Existing law requires the Chancellor of the California Community Colleges to calculate the revenue level of each community college district in accordance with a prescribed procedure.

This bill would require the Board of Governors of the California Community Colleges to report to the Legislature and the Governor on prescribed issues relating to community college financing, and to attempt to provide this report on or before January 15, 2000.

Ch. 403 (AB 791) Thomson. Healing arts: pain management.

Existing law regulates the practice of medicine, and sets forth curriculum requirements for all applicants for a physician's and surgeon's license.

This bill would add pain management and end-of-life care to the curriculum requirements for persons entering medical school on or after June 1, 2000.

Existing law provides for the licensure and regulation of health facilities by the State Department of Health Services. Under existing law, violation of these provisions is a misdemeanor.

This bill would require every health facility licensed pursuant to these provisions, as a condition of licensure, to include pain as an item to be assessed at the same time as vital signs are taken. By changing the definition of a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 404 (SB 637) Baca. Veterans .

(1) Existing law provides for the making of appointments to state civil service positions and specifies preferences for the appointment of disabled veterans' outreach program representatives in the following order: (a) a disabled veteran of the Vietnam era, (b) any other disabled veteran, and (c) any veteran.

This bill would revise that order of preference to (a) any disabled veteran and (b) any veteran. In addition, the bill would specify that for these purposes, "disabled veteran" and "veteran" have the same meaning as those terms are defined in a specified provision of federal law relating to the employment and training of veterans.

(2) Existing law establishes various educational benefits for dependents of veterans who were killed during military service or totally disabled, as specified.

Existing law entitles a veteran's dependent, who attained eligibility for benefits while under 21 years of age, to receive certain educational benefits until he or she attains the age of 27 years or until the training is no longer needed, whichever occurs first. Existing law excludes dependent widows from this limitation. Existing law, which is to be repealed on January 1, 2000, also excludes a veteran's spouse from this limitation.

This bill would delete the January 1, 2000, repeal date regarding a veteran's spouse, thereby excluding for an indefinite period a veteran's spouse from the above limitation for educational benefits.

Ch. 405 (AB 187) Hertzberg. Grant Information Act of 1999.

The Citizen Complaint Act of 1997 requires state agencies to make available on their Internet websites, on or before July 1, 1998, or within 6 months of the establishment of such a site, whichever is later, a plain-language form through which individuals can register complaints or comments relating to the performance of that agency. Existing law requires the Internet website to provide instructions on filing the complaint electronically, or the manner in which to download, complete, and mail the complaint to the state agency, or both.

This bill would establish the Grant Information Act of 1999 to authorize state agencies to make available on the Internet a listing of all grants administered by that agency, which would include specified information and provide instructions on filing grant applications electronically, or on the manner in which to download, complete, and mail

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

grant applications to the state agency, or both. This bill would authorize each state agency to make available on the Internet any printed grant application form used by the agency to award grants that are administered by that agency. This bill would not be implemented until July 1, 2001, unless otherwise authorized by the Department of Information Technology pursuant to a specified executive order.

Ch. 406 (AB 253) Thomson. Licensing.

Under existing law, all applicants for licensure as a marriage and family therapist who are pursuing a master's or doctor's degree are required to complete certain coursework as part of their graduate studies, with specified exceptions.

This bill would require an applicant, after January 1, 2001, to complete coursework in psychological testing and psychopharmacology, as specified. The bill would also provide that these provisions in no way expand or restrict the scope of licensure of a marriage and family therapist.

Ch. 407 (AB 653) Hertzberg. Residential mortgage lending.

Existing law defines a real estate broker to include persons who solicit borrowers or lenders for or negotiate loans or collect payments or perform services for borrowers or lenders or note owners in connection with loans secured directly or collaterally by liens on real property or on a business opportunity.

This bill would exclude from that definition persons employed by a real estate broker who, on behalf of the broker, assist the broker in meeting the broker's obligations to its customers in residential mortgage loan transactions, where the lender is an institutional lender, provided the employee does not participate in any negotiations between the principals. It would require a broker to exercise reasonable supervision and control over the activities of these unlicensed employees.

The California Residential Mortgage Lending Act regulates the making of residential mortgage loans by specified entities. Among other things, a residential mortgage lender licensed under the act may provide brokerage services to a borrower, as specified. A licensee is restricted to a percentage level of brokerage services.

This bill would delete that restriction.

Existing provisions of the act relative to authorizing brokerage services for borrowers, including a requirement that the Secretary of the Business, Transportation and Housing Agency conduct a study on or before December 31, 1999, on particular matters relating to those services, are to become inoperative June 30, 2001.

This bill would change the termination date of these brokerage services provisions to June 30, 2005, thus extending their operation and thereby maintaining the specific provisions requiring the preparation of the study. It would require preparation of an additional report on or before December 31, 2002, as specified.

Ch. 408 (AB 811) Keeley. Electrical restructuring.

The Public Utilities Act requires the Public Utilities Commission to recover uneconomic costs associated with electrical deregulation, including transition costs, as defined, to be allocated as prescribed. The act requires that individual customers not experience rate increases as a result of the allocation of transition costs.

This bill would require the commission to implement a methodology whereby the Power Exchange energy credit for a customer with a meter, installed on or after June 30, 2000, that is capable of recording hourly data is required to be calculated based on the actual hourly data for that customer. For customers with meters, as prescribed, installed before June 30, 2000, the bill would require the energy credit, on a one-time basis before June 30, 2000, to be based on either the actual hourly data for the customer or the average load profile for that customer class, as prescribed. This bill would require recovery of any costs of implementing the methodology of energy credit payment to be recoverable through rates for that customer class. The bill would provide that the methodology shall not result in any shifts in cost between customer classes and shall be consistent with a specified provision of existing law.

Ch. 409 (AB 925) Hertzberg. Conservatorships: statewide registry.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law sets forth a comprehensive body of law relating to conservatorship, whereby a conservator may be appointed for a person who is unable to properly provide for his or her personal needs for physical health, food, clothing, or shelter, or who is substantially unable to manage his or her own financial resources or resist fraud or undue influence, as provided. Existing law sets forth a comprehensive body of law relating to guardianship of the person or estate of a minor.

This bill would require the Department of Justice to maintain a Statewide Registry, to make all information in the registry available to the court for any purpose, and to make certain information available to the public on request. The bill would require all persons who wish to serve as a conservator or guardian or who are currently serving as a conservator or guardian to register or re-register with the Statewide Registry, except as provided. It would also require these conservators and guardians to file a signed declaration containing specified information. A person who asserts, pursuant to this provision, the truth of any material information which he or she knows to be false would be guilty of a misdemeanor punishable as specified. By creating a new crime, the bill would impose a state-mandated local program. The bill would authorize the Department of Justice to charge a reasonable fee to persons registering and re-registering with the Statewide Registry for the cost of that registration, and would require it to issue a certificate of registration. The bill would prohibit a court from appointing a person as a conservator or guardian unless that person is registered with the Statewide Registry, except as provided. The bill would provide liability for a civil penalty for specified fraudulent acts of a conservator or guardian. The bill would authorize trustees to register with the Statewide Registry. The bill would require a court clerk to forward a copy of any complaint filed with that court to the registry. By increasing the duties of local officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 410 (AB 1108) Committee on Human Services. Adult residential care facility: hospice care.

Existing law provides for the licensure and regulation of community care facilities, including residential facilities, by the State Department of Social Services.

Existing law defines a residential facility as a family home, group care facility, or similar facility determined by the director, for 24-hour nonmedical care of persons in need of personal services, supervision, or assistance essential for sustaining the activities of daily living or for the protection of the individual.

This bill would authorize a residential facility that provides care to adults to obtain a waiver from the department to allow a resident who has been diagnosed as terminally ill by his or her physician or surgeon to remain in the facility when certain conditions exist.

Ch. 411 (AB 1433) Granlund. Certified nurse assistants.

Existing law provides for the certification of nurse assistants.

Existing law requires a health care practitioner to disclose his or her name and practitioner's license status in a specified manner. Under existing law, it is unlawful for any person to use the title "nurse" in reference to himself or herself and in any capacity with certain exceptions. Existing law provides that these provisions do not prohibit a certified nurse's aide from using his or her title.

This bill would instead provide that the above-described provisions do not prohibit a certified nurse assistant from using his or her title.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would require the State Department of Social Services, State Department of Mental Health, and the State Department of Health Services to develop and implement policies to ensure that health care practitioners in licensed facilities are in compliance with the above described provisions, as specified, and would require those departments to verify compliance through periodic inspections of the facilities.

Ch. 412 (AB 1454) Committee on Insurance. Hazard insurance.

Existing law prohibits a lender from requiring a borrower, as a condition of receiving or maintaining a loan secured by real property, to provide hazard insurance coverage against risks to the improvements, as defined, on that real property in an amount exceeding the replacement value of the improvements on the property.

This bill would require the lender, as of July 1, 2000, to disclose this fact to the borrower in writing, as soon as practicable, but before execution of any note or security document.

Ch. 413 (AB 1456) Scott. Credit insurance: rates.

Existing law governing insurance provides for the regulation of credit life insurance and credit disability insurance. Existing law requires the Insurance Commissioner to adopt regulations by January 1, 1994, specifying prima facie rates based upon presumptive loss ratios for each class of credit life, credit disability, joint life, and joint disability insurance, as specified.

This bill would extend from January 1, 1994, to January 1, 2001, the time requirement for the commissioner to adopt these rules, would change the rate requirements, as specified, and would expand the scope of the rules to also include credit unemployment, credit property, joint credit unemployment, and joint credit property insurance. This bill would require the commissioner to annually make available to the public actual annual loss ratios under these provisions. It would also make several related changes.

Ch. 414 (AB 1499) Lowenthal. Elder and dependent abuse reporting: training.

Existing law requires mandated reporters to report instances of abuse of elder or dependent adults.

This bill would specify that long-term health care facilities or communitycare facilities that provide care to adults shall provide training to their staff in recognizing and reporting elder and dependent adult abuse.

Ch. 415 (SB 60) Hayden. Metropolitan Water District of Southern California.

(1) The Metropolitan Water District Act authorizes the formation of metropolitan water districts and specifies the powers and purposes of a district.

This bill would require the Metropolitan Water District of Southern California to place increased emphasis on sustainable, environmentally sound, and cost-effective water conservation, recycling, and groundwater storage and replenishment measures, as prescribed, and, commencing February 1, 2001, to prepare and submit to the Legislature a prescribed annual report relating to water conservation. The bill would make related legislative findings and declarations.

The bill would require the district, in cooperation with specified entities, to participate in considering programs of groundwater recharge and replenishment, watershed management, habitat restoration, and environmentally compatible community development utilizing the resource potential of the Los Angeles River, the San Gabriel River, or other southern California rivers, including stormwater runoff from these rivers.

The bill would prohibit the district, and its member public agencies, from expending any public money for contracting with any private entity or person to undertake research or investigations with regard to the personal backgrounds or the statements of economic interest of, or the campaign contributions made to, elected officials who vote on public policies affecting the district, or advocacy groups or interested parties who may have matters pending before the board of the district or its member public agencies.

The bill would require the district to establish and operate an Office of Ethics and to adopt rules relating to internal disclosure, lobbying, conflicts of interest, contracts, campaign contributions, and ethics for application to its board members, officers, and employees, as prescribed. The rules would be required to address certain matters and would be required, for any association of individuals or entities that includes board

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

members, officers, or employees of the district, or of a member public agency, which association is known by a name other than the Metropolitan Water District of Southern California or the name of a member public agency of the district, to prohibit any association structure or identification that is likely to mislead the public as to the association's true identity, its source of funding, or its purpose. The bill would require the office to adopt those rules for approval by the board of directors, to educate the board, staff, and contractors concerning those rules, and to investigate complaints concerning the violation of those rules. The bill would require the office to propose, and the board to adopt, a schedule of penalties for violations of those rules by board members, officers, staff, or contractors. The bill would prescribe related matters.

By imposing additional duties on the district, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 416 (SB 134) Kelley. State government.

(1) Existing law provides that any person who maliciously or for commercial purposes uses or allows to be used any reproduction or facsimile of the Great Seal of the State in any manner whatsoever is guilty of a misdemeanor.

This bill would authorize the Golden Museum Store located in Sacramento and the Capitol Bookstore and Gift Shop located in the rotunda of the restored State Capitol Building, to use the Great Seal of the State for commercial purposes.

(2) Existing law requires the Secretary of State to administer, protect, develop, and interpret the Secretary of State and State Archives Building Complex for the use, education, and enjoyment of the public and authorizes the Secretary of State to enter into an operating agreement with a private, nonprofit, tax-exempt organization, currently known as the California Archives Foundation, as a public-private partnership, for the purpose of developing, administering, interpreting, and managing the State Archives Museum and related public services and for the purpose of acquiring and managing the funding for these programs and services.

Existing law also requires the Board of Trustees of the California Archives Foundation to submit an audit report to the Secretary of State annually, with copies to the Director of Finance and the Chairs of the Joint Legislative Audit Committee and the Joint Legislative Budget Committee, and requires an annual foundation business plan, and any proposed formal amendments to the plan, to be submitted to the Director of Finance and the Chair of the Joint Legislative Budget Committee by specified dates.

This bill would revise and recast these provisions to replace the California Archives Foundation with the Golden State Museum Public Benefit Corporation and would authorize the Secretary of State to designate any Assistant Secretary of State to serve on the board of trustees of the corporation. The bill would also require the corporation to operate the Golden State Museum under an operating agreement with the Secretary of State, delete the provisions relating to the public-private partnership of the California Archives Foundation and the State Archives, and authorize the corporation to support the programs and operations of the State Archives.

The bill would also make technical and conforming changes to these provisions.

Ch. 417 (SB 208) Polanco. Child abuse: dependency proceedings.

Under existing law, where a court in a dependency hearing finds that an injury, injuries, or detrimental condition sustained by a minor is of a nature as would ordinarily not be sustained except as the result of the unreasonable or neglectful acts or omissions of either parent, the guardian, or other person who has the care or custody of the minor, that evidence constitutes a presumption that the minor may be declared a dependent child of the court, as specified. Existing law, known as the Child Abuse and Neglect Reporting Act, requires a county probation department or welfare department, among others, to report by telephone and in writing to the district attorney, and others, every known or suspected instance of child abuse, as defined, subject to specified exceptions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, where a court in a dependency hearing finds that either a parent, a guardian, or any other person who resides with, or has care or custody of a minor who is the subject of the dependency petition, has been previously convicted of sexual abuse, as defined, in this or another state; has been found in a prior dependency hearing, as specified, to have committed an act of sexual abuse; or is required, as a result of a felony conviction, to register as a sex offender, that finding shall be prima facie evidence that the subject minor is a dependent child and is at substantial risk of abuse or neglect. The bill would provide that the prima facie evidence constitutes a presumption affecting the burden of producing evidence.

The bill would also provide that, where the dependency court believes that a child has suffered criminal abuse or neglect, the court may direct a representative of the child protective agency to take specified actions pursuant to the Child Abuse and Neglect Reporting Act.

The bill would make related legislative findings.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 418 (SB 490) Kelley. Veterinary medicine: records.

(1) Existing law regulates the practice of veterinary medicine. Among other provisions, a veterinarian is required to keep a written record of all animals receiving veterinary services and to provide a summary of those records to the owners of the animals receiving services upon request. Any person who violates, or who aids or abets in violating, provisions governing veterinary medicine is guilty of a misdemeanor.

This bill would prohibit a veterinarian from disclosing information concerning an animal receiving veterinary care, the client responsible for that animal, or the veterinary care provided to an animal except under specified circumstances. By creating a new crime, the bill would impose a state-mandated local program.

(2) Existing law specifies certain licensing and vaccination requirements for dogs in rabies areas.

This bill would provide that all information obtained from a dog owner by compliance with the provisions relating to rabies control is confidential to the dog owner and proprietary to the veterinarian, and may not be released except as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 419 (SB 526) Kelley. Coachella Valley Mountain Conservancy.

(1) Existing law establishes the Coachella Valley Mountains Conservancy to acquire and hold, in perpetual open space, mountainous lands surrounding the Coachella Valley, as provided. Existing law provides for the conservancy to be administered by a governing board of 20 voting members, as specified, and authorizes the board to adopt regulations governing the public's use of the conservancy lands. Existing law provides that a violation of those regulations is a misdemeanor.

This bill would provide for the conservancy to additionally acquire and hold, in perpetual open space, natural community conservation lands, defined as all lands within the territory of the conservancy, the preservation of which is necessary to implement a natural community conservation plan, as provided. The bill would increase the number of voting members on the governing board to 21 by making the Regional Director for the Pacific West Region of the National Park Service an additional member of the board. By expanding the territory of the conservancy and thereby expanding the governing board's authority to create new crimes, the bill would impose a state-mandated local program.

The bill would authorize the conservancy to award grants to cities, counties, resource conservation districts, or nonprofit organizations, as provided, in order to further the conservancy's purposes.

(2) Under existing law, the acquisition of real property or interests in real property by the conservancy is subject to the Property Acquisition Law, except as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would require the conservancy, in addition to complying with that law, to consult with an advisory committee prior to the acquisition of property or the taking of other actions in furtherance of the Coachella Valley natural community conservation plan, habitat conservation plan, or similar program, as prescribed.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 420 (SB 636) Sher. Hazardous waste: management: incineration.

(1) Existing law requires the Department of Toxic Substances Control to develop and adopt, by regulation, criteria and guidelines for the identification of hazardous wastes.

This bill would provide that in any case where the department proposes to make a determination that a waste meets one or more of those criteria and guidelines, but that it is not necessary to manage the waste as a hazardous waste for a specified reason, the department shall issue a public notice of that proposed determination, as specified.

(2) Existing law authorizes the department to plan and construct a model incineration facility for the disposal of hazardous waste if the department makes specified findings and the Legislature, in a subsequent act, appropriates or otherwise makes available the funds necessary to plan and construct the model incineration facility.

This bill would repeal that authorization to plan and construct a model incineration facility.

Ch. 421 (SB 681) Speier. Vehicles: accidents: clearing highway.

(1) Existing law requires the driver of any vehicle involved in an accident resulting in damage to any property, including vehicles, to immediately stop the vehicle at the scene of the accident.

This bill would recast that provision to instead allow a driver involved in an accident resulting only in damage to any property to move the vehicle, if possible, off the main lanes of the highway to a safe location within the immediate vicinity of the accident unless that action would create a traffic hazard or cause injury to any person. The bill would specify that moving the vehicle in accordance with this provision does not affect the question of fault.

(2) Existing law authorizes, under certain circumstances, the governmental agency responsible for the maintenance of a street or highway on which certain material has been deposited to remove the material and collect, by civil action, if necessary, the actual cost of the removal operation in addition to any other damages authorized by law from the person made responsible for depositing the material. Existing law authorizes a member of the Department of the California Highway Patrol to direct a responsible party to remove the certain aggregate material from a highway when that material has escaped or been released from a vehicle.

Existing law provides that a public entity is liable for injury proximately caused by an act or omission of an employee of the public entity within the scope of his or her employment if the act or omission would, apart from this provision, have given rise to a cause of action against that employee.

This bill would provide that the government agency, the department, or the employees or officers of those agencies, may not be held liable for any damage to material, to cargo, or to personal property caused by a negligent act or omission of the employee or officer when the employee or officer is acting within the scope and purpose of the provisions specified above authorizing removal of materials from the highway. The bill would specify that nothing in this provision affects the establishment of liability for gross negligence or willful misconduct purposes, and that these provisions apply to the negligent performance of a ministerial act and does not affect liability under any provision of law.

Ch. 422 (SB 750) Johnston. Delta Protection Act.

The existing Delta Protection Act establishes the Delta Protection Commission and requires the commission, among other things, to review and maintain a comprehensive

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

long-term resource management plan for land uses within the primary zone of the delta, as defined. For purposes of the act, the term "local government" is defined to mean the Counties of Contra Costa, Sacramento, San Joaquin, Solano, and Yolo, and the Cities of Sacramento, Stockton, Tracy, Antioch, Pittsburg, Isleton, Lathrop, Brentwood, Rio Vista, and West Sacramento.

This bill would revise that definition of "local government" to also include the City of Oakley and any other cities that may be incorporated in the future in the primary zone.

Ch. 423 (SB 930) Hughes. Credit cards.

Existing law prohibits issuance of a credit card except in response to an oral or written request or application, or as a renewal of, or in substitution for, an accepted credit card. Existing law requires a cardholder to be liable for the unauthorized use of a credit card only if specified conditions are met, including the condition that the unauthorized use occurs before the card issuer has been notified that an unauthorized use of the credit card has occurred or may occur as the result of loss, theft, or otherwise.

This bill would require a credit card issuer that mails an offer or solicitation to receive a credit card and, in response, receives a completed application for a credit card that lists an address that is different from the address on the offer or solicitation or receives a change of address request and a request for an additional card, as specified, to verify the change of address as specified. The bill would provide that the consumer to whom the offer or solicitation is made would not be liable for the unauthorized use of the credit card if the credit card issuer does not verify the change of address prior to the issuance of the credit card, except as specified. The bill would provide for these provisions to become operative on July 1, 2000.

This bill would also, after certain dates, prohibit a person who accepts credit cards for the transaction of business from printing more than the last 5 digits of the credit card account number or the expiration date upon any receipt provided to the cardholder, subject to an exception.

Ch. 424 (SB 1090) Schiff. Trusts: charitable corporations: private professional trustees.

(1) Existing law provides that a nonprofit charitable corporation may be appointed as a guardian or conservator of a person or estate.

This bill would specify that a nonprofit charitable corporation may also be appointed as a trustee of a trust.

(2) Existing law prohibits the court from appointing a private professional conservator or private professional guardian unless specified information is filed with the county clerk under penalty of perjury.

This bill would prohibit the court from appointing a private professional trustee, as defined, unless specified information is filed with the county clerk under penalty of perjury. By extending the class of persons required to file statements under penalty of perjury, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 425 (SB 1099) Knight. California Defense Retention and Conversion Act of 1999.

Existing law provides for various activities in regard to defense conversion and military base retention and reuse efforts in the state.

This bill would enact, until January 1, 2007, the California Defense Retention and Conversion Act of 1999, to establish the California Defense Retention and Conversion Council in the Trade and Commerce Agency. The bill would set forth the membership and duties of the council in regard to defense retention and conversion and military base reuse activities in the state, including specified activities developed by the former California Defense Conversion Council. This bill would require the council to prepare a study considering strategies for the long-term protection of lands adjacent to military

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

bases and to submit to the Governor and the Legislature a report on the study with any recommendations. It would require the Trade and Commerce Agency to establish a Defense Retention Grant Program, with input and assistance from the council.

Ch. 426 (AB 243) Wildman. Bail fugitive recovery persons.

Existing law regulating the issuance of bail bonds requires any person advertising or engaging in the business of executing, delivering, or furnishing bail bonds to hold a bail agent's license, a bail permittee's license, or a bail solicitor's license, as specified, issued by the Insurance Commissioner.

This bill would provide for the regulation of bail fugitive recovery persons, defined as a person given written authorization by a bail or depositor of bail and contracted to investigate, surveil, locate, and arrest a bail fugitive and any person employed to assist the bail or depositor of bail to investigate, surveil, locate, and arrest a bail fugitive. This bill would require that bail fugitive recovery persons be at least 18 years of age and complete 2 power of arrest courses, as specified. This bill would require that a person authorized to apprehend a bail fugitive notify local law enforcement of their intent to apprehend a bail fugitive no more than 6 hours prior to attempting to apprehend a bail fugitive, except as specified. This bill would prohibit a person authorized to apprehend a bail fugitive from forcibly entering a premises for that purpose, except pursuant to certain existing provisions of law governing arrest by a private person. The bill would require any person authorized to apprehend a bail fugitive to carry a certification of completion of required courses and training programs.

Because this bill states that any person who is not in compliance with, or who violates, these provisions is guilty of a misdemeanor punishable, as specified, this bill would create a new crime, thereby imposing a state-mandated local program.

The bill would make related changes. It would also declare that it shall remain in effect only until January 1, 2005, unless a later enacted statute deletes or extends that date.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 427 (SB 157) Johnston. High Technology Theft Apprehension and Prosecution Program: effective date.

Existing law establishes the High Technology Theft Apprehension and Prosecution Program, which generally provides funds for programs that enhance the capacity of local law enforcement and prosecutors to deter, investigate, and prosecute high technology related crimes. Existing law also provides that the program is effective until January 1, 2000.

This bill would extend the effective date of the program to January 1, 2003, and provide that as of that date the program is repealed, unless a later enacted statute, that is enacted before January 1, 2003, deletes or extends that date.

Ch. 428 (SB 820) Sher. Electronic transactions.

Existing law contains provisions regulating contracts and requires certain contracts to be in writing and signed. Existing law contains certain special provisions applicable to electronic transactions, such as provisions relating to electronic funds transfer, but does not generally set forth the effect of transactions entered into electronically.

This bill would enact the Uniform Electronic Transactions Act. It would generally apply to electronic transactions, except that it would not apply to the creation and execution of wills and testamentary trusts, and would not apply to certain other transactions.

The bill would provide that a record or signature may not be denied legal effect or enforceability solely because it is in electronic form. The bill would provide that a contract may not be denied legal effect or enforceability solely because an electronic record was used in its formation. It would provide that if a law requires a record to be in writing, or if a law requires a signature, an electronic record satisfies the law. The bill would enact related provisions. The bill would authorize the provision of written

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

information by electronic record. The bill would set forth provisions governing changes and errors, the effect of electronic signatures, and admissibility in evidence.

Ch. 429 (AB 186) Hertzberg. Local elections: districts.

Existing law requires county boards of supervisors and the city councils of general law and charter cities that elect members by or from districts following each decennial federal census, and using that census as a basis, to adjust the boundaries of the supervisorial and council districts so that the districts shall be as nearly equal in population as may be. In establishing the boundaries of the districts, the county board of supervisors or the city council of a general law city is expressly authorized by existing law to give consideration to the topography, geography, and cohesiveness, contiguity, integrity, and compactness of territory, and community of interests of the districts.

This bill would provide that in establishing the boundaries of a district of a charter city, the city council may give consideration to topography, geography, and cohesiveness, contiguity, integrity, and compactness of territory, and community of interests of the districts. The bill would require the county board of supervisors or the city council of a general law city or the governing body of a charter city to hold at least one public hearing on any proposal to adjust those boundaries prior to a public hearing at which the board or council votes to approve or defeat the proposal. By creating additional duties on those local agencies in establishing the boundaries of those districts and in holding public hearings, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that the Legislature finds there is no mandate contained in the bill that will result in costs incurred by a local agency or school district for a new program or higher level of service which require reimbursement pursuant to these constitutional and statutory provisions.

Ch. 430 (AB 893) Alquist. Long-term care facilities: consumer information.

Existing law regulates the operation of skilled nursing facilities, under the direction of the State Department of Health Services. Existing law requires the State Department of Health Services to maintain a consumer information service including certain information regarding long-term care facilities and their communities.

This bill would require the department to provide the information on the Internet, and to include certain information in the department's long-term health care facility profiles. It would appropriate $100,000 from the General Fund to the department to enable the department to implement these provisions on or before July 1, 2002.

Ch. 431 (AB 1616) Havice. Office of Economic Research: duties: tax strategies and international trade.

Existing law generally sets forth the duties of the Office of Economic Research in the Trade and Commerce Agency in gathering, analyzing, and providing information on the economy of the state.

Existing law requires the Secretary of Trade and Commerce to report annually to the Governor and the Legislature on various aspects of the Trade and Commerce Agency and its programs.

This bill would additionally require the office (1) to monitor, on an ongoing basis, the incentives offered by other states to attract or retain businesses and to provide that information, as specified, and (2) to respond to inquiries by persons in industry, business, commerce, or other governmental units concerning international trade information in the state.

Ch. 432 (SB 437) Rainey. State Teachers' Retirement System: benefits.

The State Teachers' Retirement Law formerly provided that eligibility for certain benefits was affected by the remarriage of a surviving spouse.

This bill would authorize surviving spouses of deceased members who previously lost entitlement to benefits due to remarriage to resume benefit payments on or after January 1, 2000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 433 (SB 658) Karnette. Political Reform Act of 1974: campaign statements: electronic filing.

The existing Political Reform Act of 1974 (the act) provides that a city general purpose committee is required to file campaign statements in connection with a statewide direct primary held in March of an even-numbered year, and any other election held on that same day as that election, unless it has made contributions or independent expenditures totaling $500 or more during the period July 1 through September 30.

This bill instead would require one of those committees to file those campaign statements in connection with those elections, unless it has not made contributions or independent expenditures totaling $500 or more during the period July 1 through September 30.

Existing provisions of the act require specified candidates for public office and committees supporting or opposing candidates or ballot measures to periodically file reports with the Secretary of State and certain local officials setting forth information concerning contributions they received and expenditures they made during the specified reporting period. Existing provisions of the act also require lobbyists, lobbying firms, and lobbyist employers to periodically file specified reports and statements with the Secretary of State.

Existing law requires the Secretary of State, in consultation with the Fair Political Practices Commission, to develop an online filing process for the purposes of filing statements and reports with the Secretary of State pursuant to the act, to develop a system that provides for the online transfer of data, as specified, to make all data filed online available, as specified, and to report to the Legislature on the implementation of the online filing and disclosure requirements. Under existing law, once all state-mandated development, procurement, and oversight requirements are met, the Secretary of State must make public its availability to accept reports and filings online. Existing law requires the Secretary of State to implement an online disclosure program in connection with the June 2000 ballot and specified lobbying activities.

This bill would, in addition, require the Secretary of State to develop a prescribed electronic filing process for those purposes, to make public the availability of that electronic filing process, and to determine and publicly disclose when the electronic disclosure system is operating effectively. The bill would specifically require the information to be disclosed on the Internet.

This bill would require the filing process and disclosure of information to be done both online and electronically. The bill would authorize an appropriation made to the Secretary of State for the purposes of developing the existing online disclosure system to also be expended for the purposes of developing the electronic disclosure system, and would thereby make an appropriation.

Existing law requires the Secretary of State to commence online disclosure with the first preelection statement filed for the period ending March 17, 2000. Existing law specifies the entities subject to those provisions as any candidate, committee, or other persons who are required, as specified, to file statements, reports, or other documents in connection with a state elective office or state measure appearing on the June 2000 ballot, and general purpose committees, as specified, receiving contributions to support or oppose candidates for any elective state office or state measure appearing on the June 2000 ballot.

This bill would instead require the Secretary of State to commence online and electronic disclosure with the first preelection statement filed in connection with the 2000 statewide direct primary election.

Existing law requires, beginning on July 1, 2000, and for all applicable reporting periods thereafter, that specified persons file online with the Secretary of State.

This bill would also specify that the entities subject to provisions pertaining to online and electronic filings include appellate court and Supreme Court candidates and officeholders.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^{2}/_{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^{2}/_{3}$ vote.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law makes a violation of the act subject to administrative, civil, and criminal penalties.

This bill would impose a state-mandated local program by imposing those criminal penalties on certain persons who violate provisions of the bill.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 434 (SB 737) Committee on Insurance. Small employer health insurance: enrollment of dependents.

Existing law provides for licensing and regulation of health care service plans by the Commissioner of Corporations, and provides for licensing and regulation of disability insurers by the Insurance Commissioner. Existing law requires health care service plans and disability insurers to comply with certain provisions governing health care coverage for eligible employees and dependents of small employers, which are defined to be employers that have between 2 and 50 employees. Under these provisions, eligible employees who decline enrollment at the time of the initial enrollment period, but who subsequently request enrollment in the health benefit plan (defined as "late enrollees"), may generally be excluded from coverage for a period not to exceed 12 months from the date of the application for coverage, as specified.

This bill would provide that an individual is not a "late enrollee" for these purposes if the individual is an eligible employee who previously declined coverage under an employer health benefit plan and who has subsequently acquired an eligible dependent through marriage, birth, adoption, or placement for adoption, and who enrolls for coverage on his or her behalf and on behalf of his or her dependent within 30 days following the date of marriage, birth, adoption, or placement for adoption. This bill would require that the effective date of coverage in that instance be the first day of the month following the date of receipt of the completed request for enrollment in the case of marriage, or the date of birth, or the date of adoption or placement for adoption, whichever applies. This bill would require an employer to provide notification of these special enrollment rights to an employee at or before the time the employee is offered an opportunity to enroll in plan coverage.

This bill would also provide that an individual is not a "late enrollee" for these purposes if the individual is an eligible employee who previously declined coverage for himself or herself or his or her dependents under an employer health benefit plan because the dependents were covered by other health coverage. This bill would provide a special open enrollment opportunity for the eligible employee in this case if his or her dependents have lost or will lose coverage under that other health coverage. This bill would require that the effective date of coverage in that instance be the first day of the month following the date of receipt of the request for enrollment. This bill would require an employer to provide notification of these special enrollment rights to an employee at or before the time the employee is offered an opportunity to enroll in plan coverage.

Existing law provides that a willful violation of the provisions governing health care service plans is a crime. Because a violation of the bill's requirements with respect to a health care service plan would be a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 435 (AB 560) Oller. Wildlife: mountain lions.

Proposition 117, an initiative measure approved by the voters at the June 5, 1990, primary election, enacted the California Wildlife Protection Act of 1990. Among other things, the act made the mountain lion a specially protected mammal. The act prohibits

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the Legislature from changing the special protection of that mammal except by a $^{4}/_{5}$ vote of the membership of both houses of the Legislature and then only consistent with, and in furtherance of, the purposes of the act.

The act authorizes the Department of Fish and Game to remove or take any mountain lion, or authorize an appropriate local agency with public safety responsibility to remove or take any mountain lion, that is perceived to be an imminent threat to public health or safety.

This bill would, instead, authorize the department to remove or take, or authorize an appropriate local agency with public safety responsibility to remove or take, any mountain lion that is perceived to be an imminent threat to public health or safety or that is perceived by the department to be an imminent threat to the survival of any threatened, endangered, candidate, or fully protected sheep species. The bill would state the legislative finding and declaration that this change is consistent with, and furthers the purposes of, the California Wildlife Protection Act of 1990.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 436 (AB 124) Ackerman. Speech-Language Pathology and Audiology Board.

Existing law provides that a supervising speech-language pathologist employed or contracted for by a public school may hold either a valid and current license issued by the board, or a valid, current, and professional clear clinical or rehabilitative services credential in language, speech, and hearing issued by the Commission on Teacher Credentialing.

The bill would additionally provide that a supervising speech-language pathologist employed or contracted for by a public school may instead hold a credential authorizing service in language, speech, and hearing issued by the Commission on Teacher Credentialing if it is not issued on an emergency permit or waiver requirement basis.

Existing law provides that the practice of an applicant who is obtaining his or her required professional experience be unrestricted, as specified, provided the applicant's required professional experience application has been approved by the board.

The bill would require that an applicant who is obtaining his or her required professional experience must have been issued a temporary license, as specified.

Existing law provides for the provisions enacting the Speech-Language Pathology and Audiology Board, under the jurisdiction of the Medical Board of California, to become inoperative on July 1, 1999, and for repeal of these provisions as of January 1, 2000. Existing law also provides for provisions of the Business and Professions Code to continuously appropriate the moneys in the Speech-Language Pathology and Audiology Board Fund.

This bill would extend the inoperative date to July 1, 2002, and the repeal date to January 1, 2003, thus making an appropriation by extending the duration of the continuous appropriation.

Existing law provides that the Speech-Language Pathology and Audiology Board shall not renew any license or registration on or after January 1, 2001, unless the applicant certifies to the board that he or she has completed in the preceding 2 years not less than the minimum number of professional development hours, as specified, and requires the professional development services to be obtained from institutions of higher learning, nonprofit educational or professional associations, or other entities approved by the board.

The bill would provide that the above specified professional development requirements are applicable on and after January 1, 2002, and would additionally provide that on and after January 1, 2001 and until January 1, 2002, the board shall not renew any license or registration unless the applicant certifies to the board that he or she has completed after April 12, 1999, and prior to his or her renewal date in 2001, not less than the minimum number of professional development hours. The bill would provide that continuing professional development service may be obtained from accredited institutions of higher learning, organizations approved as providers by specified entities, or providers approved by the board. It would exempt institutions of higher learning and providers approved by the specified entities from fees that the board may otherwise charge continuing education providers.

The bill would additionally authorize the board to issue a temporary license for a period to be determined by the board to an applicant who is obtaining his or her required

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

professional experience, and would further require the board to deem a person who holds a valid certificate of clinical competence in speech-language pathology or audiology issued by the National Council on Professional Standards in speech-language pathology and audiology to have met the educational requirements set forth for speech-language pathologists or audiologists, as specified.

Ch. 437 (AB 198) Ackerman. Legal entities: organization and operation.

Existing provisions of law provide for the merger of 2 or more corporations.

This bill would authorize corporations, including nonprofit corporations and cooperative corporations to merge directly with any other business entity defined to mean a domestic or foreign limited liability company, limited partnership, general partnership, business trust, real estate investment trust, unincorporated association, other than a nonprofit association, or a domestic reciprocal insurer organized after 1974 to provide medical malpractice insurance. The bill would revise and recast other provisions, would enact related provisions with respect to merger authority that are applicable to partnerships, limited partnerships, and limited liability companies, and would make various technical and other related changes.

This bill would incorporate additional changes to Sections 15679.1 and 17600 of the Corporations Code proposed by AB 197, to be operative only if this bill and AB 197 are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 438 (AB 221) Wildman. Lasers: obstructing a peace officer.

Existing law provides that every person who, except in self-defense, knowingly draws or exhibits a laser scope, as defined, that projects a colored target on a person in a threatening manner against that person with specific intent to cause a reasonable person apprehension or fear of bodily harm is guilty of a misdemeanor, punishable by imprisonment in a county jail for up to 30 days.

This bill would revise this provision to apply to the situation where a person aims or points a laser scope at another person instead of knowingly draws or exhibits a laser scope that projects a colored target on a person. The bill would delete the element of apprehension. The bill also would include a laser pointer in this provision and further provide that any person who aims or points a laser scope or laser pointer at a peace officer with the specific intent to cause the officer apprehension or fear of bodily harm and who knows or reasonably should know the person at whom he or she is aiming or pointing is a peace officer, is guilty of a misdemeanor punishable by imprisonment in a county jail for a term not exceeding 6 months. The bill additionally would provide that any person who commits a second or subsequent violation of either offense is guilty of a misdemeanor punishable by imprisonment in a county jail for a term not to exceed one year. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 439 (AB 514) Thomson. Solid waste: biomass conversion.

The existing California Integrated Waste Management Act of 1989 regulates the handling and management of solid waste. The act is administered by the California Integrated Waste Management Board, and requires the board to implement various programs related to the management of solid waste. The act requires each city, county, and regional agency, if any, to develop a source reduction and recycling element of an integrated waste management plan that includes a prescribed implementation schedule showing how the city, county, or regional agency will divert materials from solid waste disposal through source reduction, recycling, and composting activities. The act defines biomass conversion as meaning the controlled combustion of specified materials, when separated from other solid waste and used for producing electricity or heat, but excludes, from that definition, among other things, the controlled combustion of pulp or paper materials.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would revise the definition of biomass conversion to instead include the controlled combustion of nonrecyclable pulp or nonrecyclable paper materials, as defined, and exclude the controlled combustion of recyclable pulp or recyclable paper materials.

Ch. 440 (AB 545) Robert Pacheco. Hearing aid dispensers.

Existing law establishes, within the jurisdiction of the Division of Licensing of the Medical Board of California, the Hearing Aid Dispensers Examining Committee, that is charged with administering the laws relating to the practice of fitting and selling hearing aids. The law authorizing the committee became inoperative July 1, 1999, and is repealed January 1, 2000. Existing law requires 4 members of the committee to be public members, one of whom must be a licensed audiologist, and 3 members to be engaged in fitting or selling hearing aids.

This bill would (1) transfer the powers and duties of the committee to the Director of Consumer Affairs and (2) establish the Hearing Aid Dispensers Advisory Commission, within the jurisdiction of the Department of Consumer Affairs, which commission would consist of 3 licensed hearing aid dispensers and 4 members of the public, as specified, and would perform those duties delegated to it or authorized by the director, as specified.

Ch. 441 (AB 583) Papan. Internet escrow agents.

Existing law, the Escrow Law, provides that it is unlawful for any person to engage in business as an escrow agent within this state unless by means of a corporation licensed to do so.

This bill would make provisions of the Escrow Law applicable to an Internet escrow agent, defined as any person engaged in the business of receiving escrows for deposit or delivery over the Internet, as specified.

This bill would make related changes. Among other things, the bill would define "within the state" for purposes of determining the application of the Escrow Law to a transaction to include specified activities.

With respect to rules and regulations adopted by the Commissioner of Corporations under the Escrow Law, the bill would authorize the commissioner to waive requirements, as specified.

The bill would make conforming changes.

Since a willful violation of the Escrow Law is subject to a fine and misdemeanor or felony imprisonment, this bill would expand the scope of that crime and impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 442 (AB 634) Wildman. Local agencies: redevelopment: use of funds and delegation.

(1) The Community Redevelopment Law requires a redevelopment agency to present annually an audit report to its legislative body, and requires the agency to expend or encumber excess surplus, as defined, in its Low and Moderate Income Housing Fund.

This bill would require a redevelopment agency to submit to its legislative body any audit undertaken by another governmental agency; would revise the information required to be included in the annual report, including requiring the report to include a calculation of the excess surplus in the fund; and would revise the definition of excess surplus to exclude the unspent portion of the proceeds of bonds or indebtedness and related income. The bill would require the legislative body to review those reports and take appropriate action, thereby creating a state-mandated local program.

The bill would require the Department of Housing and Community Development to develop and periodically revise the methodology to be used in the calculation of excess surplus, as specified.

By imposing these new requirements on local agencies, the bill would create a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would provide that when a decision, determination, or other action by the agency or legislative body is required by the Community Redevelopment Law, neither the agency nor the legislative body shall delegate the obligation to decide, determine, or act to another entity unless a provision in this law specifically provides for that delegation.

The bill would make other clarifying and nonsubstantive technical changes.

(2) Existing law requires the county auditor, upon request of a redevelopment agency, to provide a statement each fiscal year concerning the allocation of taxes to the redevelopment agency and other agencies.

This bill would require that statement to specify the gross amount of tax-increment revenue allocated to the redevelopment agency and any payments to other taxing agencies, thereby imposing a state-mandated local program.

(3) This bill would incorporate additional changes in Section 33080.2 of the Health and Safety Code proposed by SB 497, to be operative if SB 497 and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 443 (AB 790) Honda. Sales and use tax.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. The sales taxes due under these provisions are generally the obligation of the seller of the personal property. The seller must file a return with the State Board of Equalization and pay all taxes due.

This bill would require the board to make publicly available each quarter a list of the 12 largest tax delinquencies in excess of $1,000,000. The quarterly list would contain specified identifying information about the delinquencies. The board would be required to remove certain delinquencies that meet specified criteria within 5 business days, including among others those where payment arrangements have been made or a bankruptcy proceeding has been initiated.

This bill would repeal these provisions on January 1, 2005.

Ch. 444 (AB 794) Corbett. Subpoenas: personal records.

(1) Existing law provides for a subpoena duces tecum for the production of various kinds of defined personal records pertaining to a consumer, maintained by a witness, as defined. Existing law also provides for the procedure to subpoena employment records. These provisions also require that the date specified on a subpoena duces tecum for the production of personal records or employment records be not less than 15 days from the date the subpoena is issued.

This bill would revise and expand the definition of "personal records" and "employment records" to include electronic data and expand the definition of "witness" to include various health care professionals and postsecondary schools, as specified.

The bill would delete the requirement that the date specified on the subpoena duces tecum for the production of personal records or employment records be not less than 15 days from the date the subpoena is issued. The bill would also provide that when a subpoena duces tecum commands the production of business records for copying, specific information identifiable only to the deponent's records system shall not be required. The bill would make other changes with respect to the production of business and employment records for inspection or copying.

(2) Existing law requires any party who subpoenas medical records in a workers' compensation proceeding to send a copy of the subpoena to all parties of record in the proceeding, as specified.

This bill would make that provision applicable to any records.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 445 (AB 840) Kuehl. Child custody.

Existing law provides that custody should be granted according to the best interest of the child in a specified order of preference in which preference is first given to granting custody to both parents jointly or to either parent.

This bill would provide that there is a presumption, rebuttable as specified, that an award of sole or joint physical or legal custody of a child to a person who has perpetrated domestic violence, as defined, against the other party seeking custody of the child or against the child or the child's siblings within the previous 5 years is detrimental to the best interest of the child. The bill would provide that the presumption does not apply in cases in which both parents are perpetrators of domestic violence.

Ch. 446 (AB 1013) Scott. State employees.

(1) Existing law contains various provisions relating to civil service and employer-employee relations between the state and its employees, and contains comparable provisions that apply to state employees in State Bargaining Unit 5, 6, 8, 16, or 19.

This bill, among other things, would repeal certain of those provisions relating to minor discipline, layoffs, reinstatements, probationary periods, salary ranges and adjustments, holidays, transfers, application of the Administrative Procedure Act in the adoption of regulations, and demonstration projects as those provisions apply to State Bargaining Units 16 and 19, and would repeal certain of those provisions relating to broadbanding as those provisions apply to State Bargaining Unit 16.

This bill would create in the State Treasury the State Employee Scholarship Fund, a continuously appropriated fund, to establish a program for career advancement to assist eligible state employees to participate in educational programs. The fund would be administered by the Department of Personnel Administration. The bill would provide that moneys in the fund shall be allocated from the amount negotiated in memoranda of understanding between the state and recognized employee organizations, and appropriated by the Legislature for the 2000–01 fiscal year. The fund would cease to exist on June 30, 2001, unless the existence of the fund is extended by statute and that statute is enacted and becomes effective prior to that date.

(2) Existing provisions governing the Public Employees' Retirement System authorize certain state safety members to irrevocably elect to remain subject to the miscellaneous or industrial service benefit and contribution rate, as specified. The Public Employees' Retirement Fund is continuously appropriated for the payments required to be made to members of the system.

This bill would specify that a member who made that election may elect to be subject to the state safety formula on or after January 1, 2000, as specified. Because the bill would enlarge the class of persons eligible for that formula, it would make an appropriation.

(3) Existing provisions governing the Public Employees' Retirement System prohibits state employees, as specified, from receiving any portion of the employer's contribution with respect to health care benefits unless they are credited with 10 years of state service at retirement.

This bill would revise the state employees to whom those provisions apply, and enact a similar restriction with respect to dental benefits, as specified.

(4) Existing law, the Public Employees' Medical and Hospital Care Act, provides health benefits plan coverage to public employees and annuitants meeting the eligibility requirements prescribed by the Board of Administration of the Public Employees' Retirement System. Existing law revises the definition of "eligible employee" for the purposes of the act as it applies to state employees in State Bargaining Units 8 and 16, and revises the definition of "eligible family member" for the purposes of the act as it applies to state employees in State Bargaining Units 8, 16, and 19.

This bill would repeal these revised definitions of "eligible employee" and "eligible family member."

(5) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would approve provisions of specified memoranda of understanding entered into between the state employer and specified employee organizations, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that any provision in a memorandum of understanding approved by any section of this bill, and which requires the expenditure of funds, shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, all or any part of the memorandum of understanding may be declared null and void by any affected employee organization.

(6) This bill would appropriate $200,000 from the General Fund for transfer to the State Employee Scholarship Fund to provide for the establishment and administration of the state employee scholarship program.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 447 (AB 1251) Committee on Agriculture. Animal diseases.

(1) Existing law requires the Secretary of Food and Agriculture, whenever he or she discovers any case of contagious or infectious disease that affects any animals in the state, to quarantine the diseased animals and, when necessary, other animals upon the same land or premises.

This bill, instead, would require the State Veterinarian, subject to the state administrative adjudication provisions of the Government Code, to impose a quarantine upon a population of domestic animals or food products from animals, as specified.

(2) Existing law makes it unlawful for any person to import any swine into the state, except for immediate slaughter, unless the person procures a health certificate prior to shipment or movement of the swine. Existing law, by regulation, requires an import permit for the importation of swine, as prescribed. Existing law authorizes the Secretary of Food and Agriculture to adopt regulations to control or eradicate prescribed swine diseases by taking specified action and makes any person that willfully and knowingly violates those regulations guilty of a misdemeanor.

This bill would instead make it unlawful for any person to import any swine into this state except for immediate slaughter unless the person procures a health certificate and an import permit from the Department of Food and Agriculture prior to the shipment or movement of the swine. The bill also would make it unlawful for any person to import any swine into this state for immediate slaughter unless the person procures an import permit from the department prior to the shipment or movement of the swine. Because, under existing law, a violation of these provisions would be a crime, the bill would impose a state-mandated local program. The bill would require any person requesting an import permit to identify the premises, as defined, of the swine prior to the shipment of the swine into the state.

The bill would authorize the department to impose an administrative penalty not to exceed $100 per individual animal for each violation of specified regulations relating to the control of prescribed swine diseases. In addition, the bill would provide that a willful and knowing violation of these regulations is a crime, punishable as an infraction by a fine of not more than $100 per animal for each violation, a misdemeanor, or a felony. The bill would authorize the department, after notice and hearing, to revoke a prescribed license granted by the department to a person conducting business as a packer, stockyard, dealer, agent, or any individual that receives, transports, or deals with the marketing of swine or swine products that violates specified provisions of law relating to the regulation of swine and would declare that a previous violation of those provisions is sufficient cause for the revocation of that license.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 448 (AB 1290) Davis. Warranties: motor vehicle manufacturers.

Under the existing Tanner Consumer Protection Act, it is presumed that a reasonable number of attempts have been made to conform a new motor vehicle to the applicable express warranties if within one year from delivery to the buyer or 12,000 miles on the odometer of the vehicle, whichever occurs first, either (1) the same nonconformity, as defined, has been subject to repair 4 or more times by the manufacturer or its agents and the buyer has at least once provided a specified notice to the manufacturer or (2) the vehicle is out of service by reason of repair of nonconformities by the manufacturer or its agents for a prescribed period.

This bill would extend the applicability of the presumption to when either (1) or (2) occurs within 18 months from delivery to the buyer or 18,000 miles on the odometer, whichever occurs first.

Ch. 449 (AB 1471) Havice. Vehicles: air bags: inflatable restraint systems: prohibitions.

Existing law does not prohibit the installation or reinstallation, or the distribution or the sale of any previously deployed air bag that is part of an inflatable restraint system.

This bill would prohibit any person from engaging in these activities if the person knows that the air bag was previously deployed, and would make a violation of this prohibition a misdemeanor, thereby imposing a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 450 (AB 1477) Committee on Agriculture. Agriculture: nursery stock.

(1) Existing law requires nursery stock sellers to be licensed by the Department of Food and Agriculture. Existing law requires the Secretary of Food and Agriculture to establish the minimum license fee in an amount not to exceed $100 and authorizes the secretary to fix the minimum license fee at an amount that is less than $100.

This bill, instead, and until July 1, 2005, would require the secretary to establish the minimum license fee at an amount not to exceed $180, and would authorize the secretary to fix the minimum license fee at an amount that is less than $180.

(2) Existing law requires, as an additional license fee, an acreage fee in an amount to be established by the secretary for land used in the production, storage, or sale of nursery stock in excess of one acre, which the secretary determines is necessary to carry out these provisions of, or any portion of, the Food and Agricultural Code. Existing law also specifies that the total acreage fee shall not be less than $25 nor more than $500, for each licensee.

The bill would raise this maximum total acreage fee, which the secretary establishes, from $500 to $900 for land used in the production, storage, or sale of all nursery stock in excess of one acre. In addition, the bill would exempt from this acreage fee prescribed licensees.

Ch. 451 (AB 1487) Maldonado. State implementation plan: district revisions.

Existing law, the federal Clean Air Act, requires the state to adopt and submit to the United States Environmental Protection Agency, a state implementation plan designed to attain and maintain national ambient air quality standards. Under existing law, the State Air Resources Board is designated as the state agency responsible for the preparation of the state implementation plan. Existing law also requires each air pollution control district or air quality management district that has been designated a nonattainment area for state ambient air quality standards to prepare and submit to the state board a plan for attaining and maintaining those standards.

This bill would require the state board to publish on a quarterly basis, or on a more frequent basis if necessary, a list of each district's rules or rule amendments that are submitted during that quarter to the United States Environmental Protection Agency as revisions to the state implementation plan.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 452 (AB 1512) Briggs. Produce: mislabeling.

Existing provisions of the Food and Agricultural Code, which make it unlawful for any person to mislabel any fruit, nut, or vegetable, as specified, including any container of any fresh or dried fruit, nut, or vegetable, also specify that those provisions do not require the obliteration of old markings or labels on (1) used containers that are not closed if the markings or labels are clearly inapplicable to the contents, or (2) on unlidded containers in which the produce is not packed, unless there is deception as to the contents, quality, or area of production.

This bill instead would revise these latter provisions to specify that the mislabeling provisions require the obliteration of incorrect or unauthorized labels or markings prior to commercial reuse of containers and does not require the obliteration of old markings or labels by a grower employing a used container solely to transport, and not for display or sale, that grower's own agricultural products to or from, or both to and from, a certified farmers' market.

Ch. 453 (AB 1687) Committee on Banking and Finance. Nonprofit and consumer cooperative corporations.

Existing law provides for the formation and regulation of various types of nonprofit corporations, including nonprofit public benefit corporations, nonprofit mutual benefit corporations, and nonprofit religious corporations. Existing law also provides for the formation and regulation of certain corporations for specific purposes, including consumer cooperative corporations.

This bill would revise various provisions relating to these corporations. It would, under certain conditions:

(1) Provide that any reduction of the number of classes of directors does not remove any director prior to expiration of the director's term of office.

(2) Provide that the damages recoverable from a director for approving an illegal distribution of property shall be the fair market value of that property, and provide that the damages recoverable for any illegal distribution shall also include interest and reasonably incurred costs of appraisal or other valuation.

(3) Deny retroactive effectiveness to the merger of a California corporation into a foreign corporation.

(4) Permit the resignation of agents for service of process when the agents disclaim appointment and permit the resignation of officers and directors improperly appointed.

(5) Require the corporations to inform members, upon request, of actions taken by other members at meetings.

(6) Modify filing requirements otherwise applicable on the dissolution of a corporation if an election to dissolve is made by vote of all the members or by the board of a corporation that does not have members.

(7) Require the Secretary of State to refuse to file articles for a corporation containing references in its name to the industrial loan business unless the corporation is authorized to be engaged in that business.

(8) Require an agreement of merger, if memberships in a corporation are to be canceled without consideration as a result of the merger, to contain a provision to that effect.

The bill would make other related changes.

Ch. 454 (SB 72) Murray. Lawyers: financial services.

Existing law regulating the practice of law establishes that properly adopted rules of professional conduct are binding upon all members of the State Bar. These rules provide that lawyers may enter into business transactions with their clients or acquire pecuniary interests adverse to their clients if certain prerequisites, including the client's informed written consent, are met.

This bill would authorize a lawyer, while acting as a fiduciary, to sell financial products to any client who is an elder or dependent adult with whom he or she has or has had an attorney-client relationship within the preceding 3 years, if the transaction is fair and reasonable to the client and the lawyer provides that client with a written disclosure that includes certain information about the financial product and the terms of the proposed sale, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that an injured client may sue for civil damages and other civil remedies. It would also provide for an additional award if certain specified conditions are met. This bill would provide that a violation of these provisions would be cause for discipline by the State Bar.

Ch. 455 (SB 331) C. Wright. Sales and use taxes: artwork.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property.

This bill would require the State Board of Equalization, on or before January 15, 2000, to report to the Legislature on the sales or use tax reported on certain returns or assessed in certain audits attributable to transactions of graphic artists, cartoonists, illustrators, commercial photographers, and advertising agencies.

Ch. 456 (SB 378) Kelley. Collateral recovery.

Existing law, the Collateral Recovery Act, licenses and regulates persons engaged in the business of repossessing personal property. A violation of that act, including certain specific provisions thereof, is a misdemeanor.

This bill would authorize, within existing resources, the Commissioner of Financial Institutions, the Commissioner of Corporations, and the Director of the Department of Motor Vehicles to each designate employees to investigate and report on violations of the act by the licensees of their respective departments.

Existing law provides that repossession agency licenses are subject to cyclical renewal and expire one year following the date of issuance or assigned renewal date.

This bill would, instead, provide for expiration of an original repossession agency license one year following the date of issuance, unless renewed. A renewal would expire in 2 years, as specified.

Existing law requires employees of licensees to be registered under the act.

This bill would additionally require those persons contracting with licensees to be registered. The bill would make related and conforming changes.

Existing law provides that the renewal fee for a repossession agency license may not exceed $475 annually.

This bill would provide, instead, that the renewal fee may not exceed $715 biennially.

Existing law requires applicants for repossessor qualification certification to meet and substantiate certain specified experience requirements.

This bill would require an applicant to certify as to the completion of those requirements, a violation of which is an existing crime. In expanding the scope of an existing crime, the bill would impose a state-mandated local program.

Existing law authorizes a city, county, or city and county, or state agency to impose a charge equal to its administrative costs for the removal, impound, storage, or release of properly impounded vehicles. That charge may be collected at the time of vehicle release.

This bill would, instead, limit the collection of that charge from only the registered owner or his or her agent.

Existing law, for purposes of regulation under the Vehicle Code, defines a "tow truck" and provides that persons licensed as a repossession agency may utilize a tow truck when repossessing vehicles.

This bill would exclude a repossessor's tow vehicle from the definition of "tow truck." It would also define a "repossessor's tow vehicle" as one used exclusively in the course of the repossession business.

Existing law requires that there be conspicuously displayed on both the right and left side of a tow truck or an automobile dismantler's tow vehicle used to tow or carry vehicles, a sign showing, among other things, the name of the company or the owner or operator of the tow truck or automobile dismantler's tow vehicle.

This bill would also make that requirement applicable to a repossessor's tow vehicle. It would also make related changes and state legislative intent.

The bill would incorporate additional changes to Section 7506.5 of the Business and Professions Code proposed by AB 341 to become operative only if both bills amend that section and are enacted and become effective on or before January 1, 2000, and this bill is enacted after AB 341.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 457 (SB 401) Karnette. State employees.

(1) Existing law requires the State Personnel Board, except with respect to state employees in State Bargaining Unit 16 or 19, to develop objective criteria for determining the application to state civil service positions of the state safety membership category of the Public Employees' Retirement System (PERS), to determine, upon the request of the Department of Personnel Administration or an employee organization, which classes of positions meet the criteria, and to report thereon to the Legislature with the related signed memorandum of understanding. Existing law requires the department, with respect to state employees in State Bargaining Unit 16 or 19, to determine which classes or position meet the elements of the criteria for state safety category of membership in the PERS.

This bill would require the department, with respect to state bargaining units that have agreed to these provisions in a memorandum of understanding between the state employer and the recognized employee organization, to determine which classes or positions meet the elements of the criteria for the state safety category of members in PERS.

(2) Existing law authorizes the Department of Personnel Administration to provide for annual leave benefits with respect to each officer and employee excluded from the definition of state employee for the purposes of the Ralph C. Dills Act, which regulates state employer-employee relations. The California Code of Regulations authorizes employees who are excluded from the definition of state employee for the purposes of that act to make an irrevocable election, in lieu of earning sick leave and vacation benefits, to participate in the annual leave program and requires newly appointed employees to this class as of November 1, 1995, to be placed in the annual leave program.

This bill would make a conforming change to provisions of existing law regarding annual leave to provide that the provisions are applicable to employees who are excluded from the definition of state employee for the purposes of the act.

(3) Existing law provides that participation in the annual leave program by employees in any state bargaining unit for which a memorandum of understanding has been agreed to by the state employer and a recognized employee organization and has been approved by the Legislature is subject to conditions set forth in a specified provision of existing law.

This bill would repeal that provision of existing law and instead authorize these state employees to participate in the annual leave program subject to the appropriate memorandum of understanding.

(4) Under existing law, the Department of Personnel Administration succeeds to, and is vested with, the duties, purposes, responsibilities, and jurisdiction exercised by the State Personnel Board with respect to the administration of the Personnel Classification Plan. Existing law prohibits a person from being assigned to perform the duties of any class other than that to which his or her position is allocated, except for the temporary assignment or loan of employees within an agency or between agencies for not to exceed 2 years or between jurisdictions for not to exceed 4 years for specified purposes.

This bill would make a technical change by correcting a cross-reference to conform to existing law.

(5) Existing law provides that a state officer or employee who is entitled to temporary disability indemnity under existing provisions of law governing workers' compensation as a result of an industrial accident occurring during a period of employment for which he or she is not earning sick leave credit shall have sick leave credit of one day for each completed month of service during the time he or she is not earning sick leave credit.

This bill would provide that these state officers or employees who are entitled to temporary disability indemnity or vocational rehabilitation maintenance allowance shall earn sick leave and vacation leave or annual leave as though the employee was working. The bill would authorize a state officer or employee who is receiving temporary disability of vocational rehabilitation maintenance allowance to supplement the payments with

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

any form of leave credits provided the supplementation does not exceed the employee's full pay less mandatory withholdings.

(6) Existing law, the Public Employees' Retirement Law, establishes the Public Employees' Retirement System, and sets forth the provisions for its administration and the delivery of benefits to its members. The state's employer contributions to the Public Employees' Retirement Fund are continuously appropriated from the General Fund and other funds in the State Treasury. Existing law includes employees in State Bargaining Unit 16 or 19 whose classifications or positions are found to meet specified state safety criteria within the classifications of state safety officers, if the Department of Personnel Administration has agreed to their inclusion.

This bill would include state employees in state bargaining units that have agreed in a memorandum of understanding between the state employer and the recognized employee organization that the classifications or positions of these state employees are found to meet specified state safety criteria within the classifications of state safety officers, if the Department of Personnel Administration has agreed to their inclusion. To the extent that the bill would enlarge the class of persons eligible for state safety membership, it would make an appropriation by increasing the state's contribution to the Public Employees' Retirement Fund.

(7) The Public Employees' Retirement Law authorizes the surviving spouse or eligible children of certain state members who die prior to retirement with 20 years or more of state service to receive a specified monthly allowance in lieu of the basic death benefit, as defined.

This bill would revise the amount of that monthly allowance, as specified, and would provide that survivors who are receiving the current allowance shall receive the revised allowance on and after January 1, 2000.

(8) Existing law, the Public Employees' Medical and Hospital Care Act, provides health benefits plan coverage to public employees and annuitants meeting the eligibility requirements prescribed by the Board of Administration of the Public Employees' Retirement System. Existing law revises the definition of "eligible employee" for the purposes of the act as it applies to state employees in State Bargaining Units 8 and 16, and revises the definition of "family member" for the purposes of the act as it applies to state employees in State Bargaining Unit 5.

This bill would repeal the revised definitions of "eligible employees" and "family member."

(9) Under the Public Employees' Medical and Hospital Care Act and the State Employees' Dental Care Act, an annuitant, as defined, may enroll or continue his or her enrollment in an approved health benefits plan and dental care plan without discrimination as to premium rates or benefits coverage. However, a family member receiving the survivor's monthly allowance described above may elect to be covered or continue to be covered by those plans only upon payment of the total premium cost plus 2%.

This bill would repeal those provisions regarding the payment of premiums by those family members and instead would include those family members within the definition of an "annuitant" for purposes of plan coverage under those acts.

(10) Existing law governing preretirement death benefits under the Public Employees' Retirement System provides that notwithstanding the requirement that a state member attain the minimum age for voluntary service retirement in his or her last employment preceding death, upon the death of a state member on or after January 1, 1993, who is credited with 20 years or more of state service, the surviving spouse, or eligible children if there is no eligible spouse, may receive a monthly allowance in lieu of the basic death benefit, as specified.

This bill would revise the applicable conditions and amounts payable under this provision.

(11) Existing law, with specified exceptions, provides that all contracts entered into by any state agency for the hiring or purchase of a variety of goods and services, including equipment, supplies, textbooks, and repair or maintenance, are void unless approved by the Department of General Services. Contracts entered into by the Department of Personnel Administration for employee benefits, occupational health and safety, training

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

services, or a combination thereof, for state employees in State Bargaining Unit 8 or 16 are exempt from this approval requirement.

This bill would apply the exemption to contracts entered into by the Department of Personnel Administration for employee benefits, occupational health and safety, training services, or a combination thereof, for state employees in state bargaining units that have agreed to this provision in a memorandum of understanding.

(12) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions of specified memoranda of understanding entered into between the state employer and specified employee organizations, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that any provision in a memorandum of understanding approved by any section of this bill, and which requires the expenditure of funds, shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, all or any part of the memorandum of understanding may be declared null and void by any affected employee organization.

(13) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 458 (SB 804) Perata. Transportation: rail feeder bus service.

Existing law authorizes the Department of Transportation to contract with common carriers, as defined, or with any other entity to provide feeder services to or from rail passenger terminals or intercity bus transportation.

The bill would require the department or its successor in interest to encourage the National Railroad Passenger Corporation (Amtrak) and motor carriers of passengers, as defined, to undertake specific actions and would authorize the department or its successor in interest to provide funding to Amtrak for the purpose of entering into a contract with a motor carrier of passengers for the intercity transportation of passengers over regular routes, if, among other things, the motor carrier is not a public recipient of governmental assistance, as defined in federal law, except as specified, and the service is provided only for trips where passengers have had prior movement by rail or will have subsequent movement by rail.

The bill also would authorize the department to provide funding to Amtrak for the purpose of entering into a contract with a motor carrier of passengers to transport Amtrak passengers on buses operated on a route, if the buses are operated by the motor carrier as part of a regularly scheduled, daily bus service that has been operating consecutively without an Amtrak contract for 12 months immediately prior to contracting with Amtrak.

Ch. 459 (SB 809) O'Connell. Licensing.

Under existing law, the Board of Behavioral Sciences provides for the licensure and regulation of marriage, family, and child counselors, as well as clinical social workers, including the denial, revocation, or suspension of a license due to unprofessional conduct. Under existing law, the Respiratory Care Board of California provides for the licensure and regulation of respiratory care practitioners, and specifies causes for the denial, revocation, or suspension of a license on specified grounds. Under existing law, the Board of Psychology provides for the licensure and regulation of psychologists, including the denial, revocation, or suspension of a license on specified grounds.

This bill would require an accusation brought against such a licensee, pursuant to a specific provision of the Government Code, to be filed within 3 years from the date the board discovers the alleged act or omission that is the basis for disciplinary action, or within 7 years from the date the alleged act or omission that is the basis for disciplinary

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

action occurred, whichever occurs first subject to certain tolling provisions. The bill would state that it applies to all accusations filed on or after January 1, 2000.

These requirements, however, would not apply if the accusation filed against a licensee, as specified, alleges the procurement of a license by fraud or misrepresentation.

Ch. 460 (SB 1200) Poochigian. Disabled access to public accommodations.

(1) The Planning and Zoning Law provides that when a provision under that law requires notice of a public hearing, the notice shall be given in a specified manner and may be given in any other manner that the local agency deems necessary or desirable.

This bill, in addition, would provide that whenever a hearing is held regarding a permit for a drive-through facility or the modification of an existing drive-through facility permit, the local agency shall incorporate, where necessary, notice procedures to the blind, aged, and disabled communities in order to facilitate their participation in any hearing on, or appeal of the denial of, a drive-through facility permit. By increasing the duties of local agencies, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 461 (AB 18) Villaraigosa. Bond: parks, water, and coastal protection act.

(1) Under existing law, programs have been established pursuant to bond acts for, among other things, the development and enhancement of state and local parks and recreational facilities.

This bill would enact the Safe Neighborhood Parks, Clean Water, Clean Air, and Coastal Protection Bond Act of 2000 (the Villaraigosa-Keeley Act) which, if adopted, would authorize, for the purpose of financing a program for the acquisition, development, improvement, rehabilitation, restoration, enhancement, and protection of park, recreational, cultural, historical, fish and wildlife, lake, riparian, reservoir, river, and coastal resources, as specified, the issuance, pursuant to the State General Obligation Bond Law, of bonds in the amount of $2,100,000,000.

(2) The bill would require the Secretary of State to submit the bond act to the voters at the March 7, 2000, statewide general election.

(3) The bill would require that, to the extent permitted by federal law, if the Camp Pendleton Marine Base in the County of San Diego ceases to be used as a federal facility, it be converted to an open-space area of greenbelt administered by the Department of Parks and Recreation.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 462 (AB 178) Torlakson. Development: financial assistance: relocation.

Existing law permits a redevelopment agency, under specified circumstances, to pay all or part of the costs of land, or the installation and construction of any structure or other improvement that is publicly owned within or without a project area. Existing law prohibits a redevelopment agency from providing any form of direct assistance to an automobile dealership on a parcel not previously developed for urban use, or a development on a parcel of 5 acres or more not previously developed for urban use that would generate sales and use taxes, except as specified.

This bill, until January 1, 2005, would further prohibit a redevelopment agency, and would prohibit a city or county, from providing any form of financial assistance to an automobile dealership or big box retailer, or a business entity that sells or leases land to an automobile dealership or big box retailer, that is relocating from the territorial jurisdiction of one community, or city or county, to the territorial jurisdiction of another community, or city or county, but within the same market area, unless the receiving community, or city or county, offers the other community, or city or county, a contract that apportions sales tax generated by the dealership or retailer between the 2 communities, or cities or counties, as specified, and the agency, or city or county, holds a public hearing and adopts a resolution making specified findings relating to whether or not a contract has been approved.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the California Research Bureau to report to the Governor and the Legislature on or before January 1, 2004, regarding the implementation of its provisions.

Ch. 463 (AB 41) Wesson. Income and bank and corporation taxes: deficiency protest.

Existing law provides for the administration of income and bank and corporation taxes. That law provides that a claim for refund shall be filed within specified timeframes if any tax has been paid or overpaid, as specified.

This bill would provide that a payment of taxes by making a deposit in the nature of a cash bond to stop the running of interest, as specified, shall not be considered a payment for purposes of a claim for refund or an action until specified events occur, as provided.

Ch. 464 (AB 417) Floyd. Property tax revenue shifts: exclusions: fire districts.

Existing property tax law requires the county auditor, in each fiscal year, to allocate property tax revenue to local jurisdictions in accordance with specified formulas and procedures, and generally requires that each jurisdiction be allocated an amount equal to the total of the amount of revenue allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, and that jurisdiction's portion of the annual tax increment, as defined. Existing property tax law also reduces the amounts of ad valorem property tax revenue that would otherwise be annually allocated to the county, cities, and special districts pursuant to these general allocation requirements by requiring, for purposes of determining property tax revenue allocations in each county for the 1992–93 fiscal year, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance with certain formulas. It requires that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund in that county for allocation to school districts, community college districts, and the county office of education. It also limits the initial reduction amount that may be so calculated and transferred with respect to a special district to no more than 40% of that district's property tax revenues or 10% of that district's total annual revenues. For purposes of applying these limits with respect to a special district, including a fire department, that provides fire protection or fire suppression services in a county that contracts with the state to protect state responsibility areas, existing law specifies that the district's total annual revenues do not include the total amount of all funds that are appropriated to that district pursuant to certain statutory provisions.

This bill would clarify that this exclusion applies to a special district, regardless of whether the county contracts with the state for the protection of state responsibility areas, and would specify that this exclusion, as amended by a specified legislative act, should not be construed to affect the exclusion as it existed prior to those amendments.

Ch. 465 (AB 819) Committee on Public Employees, Retirement and Social Security. State Teachers' Retirement System: benefits.

The State Teachers' Retirement Law provides supplemental benefits for members whose allowances are subject to limitations imposed by Section 415 of the Internal Revenue Code.

This bill would delete those provisions and would establish a replacement benefit program. The bill would create the Teachers' Replacement Benefits Program Fund in the State Treasury, and would continuously appropriate moneys in the fund without regard to fiscal years to pay benefits and administrative expenses.

Ch. 466 (AB 1148) Dickerson. Timber harvesting: payments.

Under existing law, all funds received by the state from the federal government, the expenditure of which is administered through or under the direction of any state agency, is required to be deposited in the Federal Trust Fund.

This bill would require that any federal funds received by the state as a result of federally administered timber harvesting be deposited in the fund and, when due to counties, be allocated by the Controller under specified criteria regarding payment time, electronic transfer, interest on retained funds, and notification of anticipated payments.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The provision that would require the state to pay interest on retained funds to eligible counties would constitute an appropriation.

Ch. 467 (AB 1364) Migden. Recycling Market Development Loan Program.

The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. Under existing law, a local governing body is authorized, either by ordinance or resolution, upon the recommendation of the appropriate land use planning agency, to propose eligible parcels of property within its jurisdiction as a recycling market development zone. Existing law creates the Recycling Market Development Revolving Loan Subaccount in the Integrated Waste Management Account and continuously appropriates the funds deposited in the subaccount to the board for the purpose of providing loans for purposes of the Recycling Market Development Revolving Loan Program. Existing law authorizes the board to make low-interest loans to local governing bodies and private business entities within a recycling market development zone from money in the subaccount for specified purposes, and authorizes the board, upon appropriation by the Legislature in the annual Budget Act, to expend money in the subaccount for the administration of the recycling loan program. Existing law prohibits the term of any loan from exceeding 10 years, and prohibits the board from financing more than $^1/_2$ of the cost of a project, or financing more than $1,000,000 for loans to the project, whichever is less. Existing law establishes specified requirements for those loans. Existing law authorizes the board to participate on a pilot basis in the Capital Access Loan Program and authorizes the board to participate in other state and federal lending programs that leverage funds based upon the ongoing success of the pilot program.

Existing law makes the provisions regarding the proposal for market development zones, the creation of the subaccount, and expenditures therefrom, inoperative on July 1, 2006, and repeals those provisions as of January 1, 2007.

This bill would reorganize and recast those provisions and in doing so, would delete the repeal of the provision authorizing a local government body to propose recycling market development zones and the provision specifying that the board's participation in the Capital Access Loan Program be on a pilot basis. The bill would authorize the board to operate both inside and outside the recycling market development zones for purposes of participating in the Capital Access Loan Program or in any other program that leverages subaccount funds.

This bill would instead prohibit the term of a loan from exceeding 10 years when collateralized by assets other than real estate, or not more than 15 years when partially or wholly collateralized by real estate. The bill would prohibit the board from financing more than $^3/_4$ of the cost of each project, or from financing more than $2,000,000 for each project, whichever is less.

The bill would authorize the board to expend the money in the subaccount to make loans to local governing bodies, private businesses, and nonprofit entities within recycling market development zones, or in areas outside zones where specified partnerships exist with other public entities.

Ch. 468 (AB 1506) Florez. State finance.

(1) Existing law specifies the types of securities that are eligible for the investment of surplus state funds, including commercial paper of prime quality that meets certain criteria and negotiable certificates of deposit.

This bill would add alternative criteria that commercial paper of prime quality and negotiable certificates of deposit may meet to be eligible as an investment security for surplus state funds.

(2) The State General Obligation Bond Law requires, with respect to bids on the public sale of state general obligation bonds pursuant to public announcement by the Treasurer, that each bid be in writing and signed by the bidder and sealed, and accompanied by the deposit of a certified check or cashier's check for $^1/_2$ of 1% of the par value of the bonds offered for sale.

This bill instead would require each bid to be submitted to the Treasurer in the form and by the means specified by the Treasurer by public announcement. The bill would

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

require the Treasurer to require a deposit, as specified, of $^1/_2$ of 1% of the principal amount of the bonds offered for sale, and to specify the form of the deposit, which may be a cashier's check, a surety bond, or a wire transfer of funds, or a combination thereof. It would also make various conforming changes.

(3) This bill would incorporate additional changes in Section 16754.3 of the Government Code proposed by SB 997, to be operative if SB 997 and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 469 (AB 1655) Hertzberg. Occupational safety and health standards: variances: assessments.

Existing law authorizes employers to apply to the Occupational Health and Safety Standards Board (the board) for a permanent variance from an occupational safety and health standard, order, special order, or portion thereof, upon a showing of an alternate program, method, practice, means, device, or process that will provide equal or superior safety to employees. Existing law requires the board to issue those variances, after opportunity for an investigation, if it determines on the record, after an investigation where appropriate and a hearing, that the proponent of the variance has demonstrated by a preponderance of the evidence that certain conditions relating to the safety and health of employees are met.

This bill would require the Occupational Safety and Health Standards Board, on or before April 1, 2000, to report to the Legislature on the nature and the extent of investigations conducted pursuant to those provisions.

Existing law authorizes the levy and collection of assessments from employers to fund the Cal-OSHA targeted inspection and consultation programs. This authorization will be repealed on January 1, 2000, unless extended by statute.

This bill would delete the January 1, 2000, repeal date for the above authorization for employer assessments.

Ch. 470 (AB 1688) Papan. Securities.

Existing law regulates the ownership and sale of, and investment in, securities registered on a national security exchange, as provided by federal law.

The bill would incorporate and make applicable to securities listed on the National Market System of the NASDAQ Stock Market various provisions of state law relating to the following: the purchase of dissenting shares in connection with a corporate reorganization; the suspension of over-the-counter trading by agents and broker-dealers; a conflict of interest code for pilots involving the ownership of tugboats; the composition of reserves required to be maintained by entities executing or assuming continuing care contracts; the submission of disclosure statements by hazardous waste control applicants; authorized excess funds investments for domestic life insurers; and authorized investments by certain governmental retirement systems in common and preferred stock, as specified.

Ch. 471 (SB 164) Johnston. Reparation payments: state income tax exclusion and Medi-Cal and state student financial aid eligibility.

(1) Under existing law, and to the extent required by federal law, certain reparation payments made by the federal government to redress injustices done to United States citizens and resident aliens of Japanese ancestry interned during World War II are not considered income or resources for the purposes of determining eligibility for Medi-Cal and public assistance benefits or the amount of those benefits.

This bill would, to the extent that federal financial participation is available, prohibit reparation payments made by the Canadian government to persons of Japanese ancestry interned in Canada during World War II from being considered as income or resources for purposes of determining eligibility to receive Medi-Cal benefits or the amount of these benefits. It would, to the extent that federal financial participation is available, where reparation payments have been converted to another form, prohibit amounts of otherwise excess nonexempt resources equal to the amount of these reparation payments received by the individual or inherited by the spouse of the individual, or both, from being considered as resources in determining eligibility for Medi-Cal. It would also, to the extent that federal financial participation is available, exempt reparation payments

NOTE: Superior numbers appear as a separate section at the end of the digests.

and amounts of resources equal to the amount of reparation payments, received by the deceased Medi-Cal beneficiary or inherited by the deceased spouse of that beneficiary, or both, from estate recovery by the State Department of Health Services.

Since eligibility for Medi-Cal benefits is determined by county welfare departments, this bill would impose a state-mandated local program on counties implementing its provisions.

(2) Under existing law, specified resources are exempt from consideration in determining an applicant's financial need for state student assistance.

This bill would also require that, to the extent that federal financial analysis methodology incorporates this exemption, income received as reparation payments from the federal government on or after October 1, 1990, or as reparation payments from the Canadian government, shall not be considered in determining an applicant's financial need for state student assistance.

(3) The existing Personal Income Tax Law provides for various exclusions from gross income.

This bill would also exclude from gross income reparation payments made by the Canadian government to persons of Japanese ancestry interned in Canada during World War II.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 472 (SB 249) Johannessen. Veterans: farm and home purchases: life or disability insurance.

Under existing law, the Veterans' Farm and Home Purchase Act of 1974, if the Department of Veterans Affairs enters into a master agreement with one or more insurance companies to provide life or disability insurance coverage for the purchasers of farms and homes from the department, the agreement is required to provide that the life insurance will be offered to purchasers who are disabled solely as a result of their qualifying military service and to nondisabled purchasers on an equal basis. Existing law also specifies that no purchaser shall be denied coverage solely because that purchaser has a qualifying military service-connected disability at the time of the application. Existing law also requires the life or disability insurance to be a form of group life or group disability insurance.

This bill would require the Secretary of Veterans Affairs to conduct a study of the life and disability insurance coverage that is being provided for the purchasers of farms and homes under the act to determine what other life and disability insurance is available that would provide equal or better coverage and a more equitable or lower cost to the purchasers. The bill would require that copies of the study, which study would be required to be conducted using existing resources of the department, be submitted to the Senate Committee on Veterans Affairs and the Assembly Committee on Veterans Affairs on or before January 1, 2000.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 473 (SB 574) Dunn. Mobilehome Park Purchase Fund.

Existing law authorizes the Department of Housing and Community Development to make loans from the Mobilehome Park Purchase Fund to mobilehome park residents or resident organizations to finance conversion of the parks to resident ownership. The Mobilehome Park Purchase Fund is continuously appropriated to the department for the purpose of providing these loans and for related administrative costs.

This bill would authorize those loans to also be made to qualified nonprofit housing sponsors and local public entities for the conversion of parks to ownership by those nonprofit sponsors or local public entities. The bill would require a local public entity

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

purchasing a mobilehome park under these provisions to transfer the park to a nonprofit housing sponsor or resident organization that has converted, or plans to convert, the park to resident ownership within 3 years, subject to specified conditions. The bill would authorize those funds to be used to relocate a mobilehome park under specified conditions but would prohibit the use of those funds to relieve a park owner of any responsibility for covering the costs of mitigating the impacts of a park closure, as specified, or to facilitate the purchase of a park by a qualified nonprofit corporation or local public entity from a public entity that had acquired the park prior to the loan commitment under these provisions.

This bill would extend indefinitely provisions formerly applicable only to mobilehome park acquisitions from June 1 to August 1, 1993, that limit certain conditions that the department may place on the disbursement of funds for the acquisition by a local government of a mobilehome park for conversion to resident ownership.

This bill would make an appropriation by authorizing the expenditure of money in the Mobilehome Park Purchase Fund for a new purpose.

Ch. 474 (SB 583) Baca. Public Employees' Retirement System.

The Public Employees' Retirement Law requires the assets and liabilities arising out of contracts with school employers to be merged.

This bill would authorize the creation of separate risk pools for local and school miscellaneous, local safety, and school safety members, as specified, and would authorize the assets and liabilities of contracting agencies and school districts participating in the same risk pool to be combined for purposes of setting employer contribution rates.

The Public Employees' Retirement Law provides that a person receiving service credit in another publicly funded retirement system may not be a member of the Public Employees' Retirement System as to that service and prohibits a person from receiving service credit for the same service in 2 publicly funded retirement systems. That law also provides, however, that participation in a deferred compensation plan or money purchase pension plan and trust, as specified, shall not be deemed membership in another publicly funded retirement system or preclude concurrent participation and service credit in the PERS plan and those specified other plans.

This bill would additionally provide that participation in a supplemental defined benefit plan maintained by the employer that meets specified criteria shall not be deemed membership in another publicly funded retirement system or preclude concurrent participation and service credit in the PERS defined benefit plan and that plan if specified conditions exist.

Existing law provides that if a member's combined benefits under the PERS plan and another benefit plan maintained by the employer exceed limits specified in federal law, the benefits payable under the PERS plan shall be reduced.

This bill would instead provide that if a member's combined benefits under the PERS plan and other defined benefit plans maintained by the employer exceed federal limits, the benefits payable under the other defined benefit plan shall be reduced.

Ch. 475 (SB 654) Schiff. DNA and forensic identification.

(1) Existing law, part of the DNA and Forensic Identification Data Base and Data Bank Act of 1998, requires any person who is convicted of, or pleads guilty or no contest to, any specified crime, or is found not guilty by reason of insanity of any of the specified crimes, to provide 2 specimens of blood, a saliva sample, right thumbprints, and a full palm print impression of each hand for law enforcement identification analysis. The act also requires any person who is required to register as a sex offender because of the commission, or attempt to commit, any specified felony offense, or who is convicted of murder or felony assault and battery, and who is committed to a term of imprisonment in the state prison, a county jail, or any institution under the jurisdiction of the Department of the Youth Authority, granted probation, or released from a state hospital for which he or she was committed as a mentally disordered sex offender, to provide samples.

This bill would revise the latter provision by deleting references to any person who is convicted of murder or felony assault and battery, by requiring samples from any person who is or was committed to a state hospital as a mentally disordered sex offender, and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

by clarifying the type of required samples. With respect to the former provision, the bill would delete exceptions provided for lewd and lascivious conduct and various forms of disorderly conduct, and revise the reference to murder. This bill would also require the prosecuting attorney, at sentencing or disposition, to verify in writing that the samples described above are required by law, and that they have been taken, or are scheduled to be taken before the release of the defendant. The bill also would require the abstract of judgment issued by the court to indicate that the court has ordered the person to comply with the requirements of this provision and that the person shall be included in the state's DNA and Forensic Identification Data Base and Data Bank program and be subject to the DNA and Forensic Identification Data Base and Data Bank Act of 1998. By increasing the duties of local law enforcement entities, the bill would impose a state-mandated local program.

(2) Existing law authorizes a biological sample obtained from a suspect in a criminal investigation for the commission of any crime to be analyzed for forensic identification profiles, including DNA profiles, by the DNA Laboratory of the Department of Justice, which is accredited by the ASCLD/LAB, or any crime laboratory designated by the Department of Justice that is accredited by the ASCLD/LAB. Existing law also provides that nothing in the section precludes laboratories meeting Technical Working Group on DNA Analysis Methods (TWGDAM) guidelines.

This bill would provide that the accreditation specified in this provision may also be furnished by any certifying body approved by the ASCLD/LAB and likewise that the requirement that all laboratories contributing DNA profiles for inclusion in California's DNA Data Bank be accredited by the ASCLD/LAB include as an alternative any certifying body approved by the ASCLD/LAB. This bill would provide, in addition, that nothing in the provisions summarized in this paragraph precludes laboratories from meeting Scientific Working Group on DNA Analysis guidelines.

(3) Existing law provides that DNA and other forensic identification information shall be released only to law enforcement agencies at the request of the agency, except as specified. Under existing law, this information shall be available to defense counsel upon court order. Existing law also prohibits any of these provisions from precluding a court from ordering appropriate discovery.

This bill would specify that the latter provision applies to criminal defense counsel and that the court order be made pursuant to a specified provision of law. The bill would specify that the court is to order discovery pursuant to a certain provision of law.

(4) Existing law authorizes the population data base and data bank of the DNA Laboratory of the Department of Justice to be made available to and searched by the FBI and any other agency participating in the FBI's CODIS System.

This bill would authorize any other agency participating in any other national law enforcement data bank system to access the population data base and data bank of the DNA Laboratory of the Department of Justice.

(5) Existing law requires any local public DNA laboratory that collects DNA typing information to comply with and be subject to all of the rules, regulations, and restrictions of the DNA and Forensic Identification Data Base and Data Bank Act of 1998, and to follow the policies of the DNA Laboratory of the Department of Justice.

This bill instead would require any local public DNA laboratory that produces DNA profiles of known reference samples for inclusion within the permanent files of the state's DNA Data Bank program to comply with and be subject to all of the rules, regulations, and restrictions of the DNA and Forensic Identification Data Base and Data Bank Act of 1998 and to follow the policies of the DNA Laboratory of the Department of Justice.

(6) This bill would make additional conforming changes.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 476 (SB 965) Leslie. School volunteers.

Existing law authorizes an employer to request from the Department of Justice records of all convictions or any arrest pending adjudication involving certain offenses of a person who applies for a volunteer position in which he or she would have supervisory or disciplinary power over a minor.

Existing law authorizes the Department of Justice to provide subsequent arrest notification service to certain agencies authorized to receive state summary criminal history information to assist in fulfilling employment, licensing, or certification duties upon the arrest of any person whose fingerprints are maintained on file at the Department of Justice as the result of an application for licensing, employment, or certification.

This bill would authorize a school district, county office of education, and private school to request that the Department of Justice provide subsequent arrest notification service. The bill would require the Department of Justice to comply with these requests.

Ch. 477 (SB 1195) Hayden. South Coast Air Quality Management District: particulate matter: reporting: air quality management plan.

(1) Existing law, the Lewis-Presley Air Quality Management Act, requires the South Coast Air Quality Management District to make specified forecasts, reports, and notifications regarding pollutant levels, as prescribed.

This bill would additionally require the south coast district, commencing July 1, 2001, to include in those forecasts, reports, and notifications prescribed information regarding levels of particulate matter 2.5 microns or smaller (PM2.5) that exceed a certain concentration, thereby imposing a state-mandated local program.

(2) The act requires the south coast district to adopt a plan to achieve state and federal ambient air quality standards, as specified.

This bill would require the south coast district, within one year from the date that a new federal ambient air standard for PM2.5 is adopted, to make a preliminary assessment of the nature of PM2.5 in the South Coast Air Basin, and to revise its air quality management plan to include a discussion of how the south coast district's current strategy and ozone plan will assist the South Coast Air Basin to make progress in achieving compliance with the 24-hour federal ambient air standard. The bill would require the south coast district board, on or before December 31, 2001, and every 3 years thereafter, in conjunction with a public health organization or agency, to prepare a report on the health impacts of particulate matter air pollution, thereby imposing a state-mandated local program.

(3) This bill would incorporate additional changes to Section 40451 of the Health and Safety Code, proposed by SB 25, to be operative only if SB 25 and this bill are both chaptered on or before January 1, 2000, and this bill is chaptered last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 478 (AB 196) Kuehl. Child support enforcement.

Existing law designates the State Department of Social Services as the single organizational unit to administer the state plan for securing child and spousal support and determining paternity and sets forth the department's duties and functions for this purpose.

This bill would recast those provisions. The bill would establish a Department of Child Support Services to administer all services and perform all functions necessary to establish, collect, and distribute child support. The bill would designate the Department of Child Support Services as the single organizational unit to administer the state plan for securing child and spousal support, medical support, and determining paternity.

Existing law requires each county to maintain a single organizational unit within the office of the district attorney to be responsible for establishing, modifying, and enforcing child support obligations and specifies various duties and the authority of the district attorney for these purposes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill, instead, would require each county to establish a county department of child support services referred to as the local child support agency, to which the Department of Child Support Services has delegated or with which the department has contracted, to secure child and spousal support, medical support, and determine paternity in a county pursuant to these provisions. Because this bill would impose new duties upon counties, it would impose a state-mandated local program.

Existing law provides for the collection of child support obligations by the Franchise Tax Board.

This bill would require the Franchise Tax Board to implement augmented child support collection activities, and would revise child support collection procedures.

Existing law requires each employer to file with the Director of Employment Development a report of contributions and report of wages paid to his or her workers as prescribed.

This bill would require, effective July 1, 2000, any service-recipient, as defined, who makes or is required to file designated tax returns with the federal Internal Revenue Service to provide to the Employment Development Department certain information.

Existing law provides for the funding of various means of providing incentives for county child support collection efforts and limiting the use of excess incentive funds paid to counties.

This bill would repeal those provisions.

This bill would also make conforming changes and delete obsolete provisions of law.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 479 (AB 150) Aroner. California Child Support Automation System.

Existing law requires the California Health and Human Services Agency and the State Department of Social Services to develop a linked statewide automated consortium-based data-processing and information retrieval system for the purpose of child support enforcement, provides for the implementation of specified data systems, and provides for the participation of eligible county consortiums.

Existing law also requires that California's child support automation system meets federal automation requirements and subjects the state to the payment of penalties for any failure to meet these requirements by specified dates pursuant to federal law.

This bill would require the state agency designated as the single state agency responsible for operating the child support enforcement program, through the Franchise Tax Board as its agent, to be responsible for procuring, developing, implementing, and maintaining the operation of the California Child Support Automation System in all California counties.

The bill would also specify the procedures by which each county would pay the nonfederal share of the administrative expenses of the program and would allocate to each county, except Los Angeles County, a proportionate reduction in the payment of these costs based on the payment of any federal penalty for the failure of the child support automation system to meet federal automation requirements. It would provide that money from the General Fund would be used to supplant the reduction to state funding as a result of the federal penalty, up to 100% of the reduction, subject to conditions specified by the department and the Department of Finance, and subject to the appropriation of funds in the annual Budget Act. By requiring counties to participate in the program, the bill would result in a state-mandated local program.

This bill would appropriate $95,500,000 from the General Fund to the State Department of Social Services for the state payment of penalties, otherwise allocated to each county, being held in abeyance pursuant to the bill. It would also appropriate $6.6 million from the General Fund to the Franchise Tax Board for purposes of implementing and administering this bill.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would provide for the reallocation of funds appropriated in the 1999 Budget Act for purposes of this act, and, by providing for the reallocation of those funds, this bill would result in an appropriation.

The bill would provide for the reversion of certain unexpended and unencumbered child support incentive funds to the General Fund.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 480 (SB 542) Burton. Child support enforcement.

Existing law provides for the implementation and administration of procedures for securing child and spousal support and determining paternity and sets forth the duties and functions of specified state and local entities for this purpose.

This bill would recast those provisions and would make conforming changes to reflect those recast provisions.

Ch. 481 (SB 252) Kelley. Highway tolls: transit service: demonstration program.

Existing law authorizes the San Diego Association of Governments (SANDAG), in cooperation with the Department of Transportation, to conduct a demonstration program pursuant to which single-occupant vehicles are allowed to use the high-occupancy vehicle (HOV) lane on a specified portion of Interstate Highway Route 15 (I-15) for a fee. Existing law requires the level of service in these HOV lanes to be Service B, as adopted by the Transportation Research Board, or the level of service of an HOV lane without single-occupant vehicles. The authorization for this demonstration program will be repealed on January 1, 2000.

This bill would change the level of service in these HOV lanes from Service B, as adopted by the Transportation Research Board, or the level of service of an HOV lane without single-occupant vehicles, to Service C or D, as specified. In addition, the bill would extend the repeal date for this demonstration program to January 1, 2002.

Existing law requires SANDAG, upon completion of the demonstration program, to submit a report to the Legislature on its findings, conclusions, and recommendations concerning the program.

This bill would require the report to be submitted on or before January 1, 2000.

The bill also would make technical, nonsubstantive changes.

Ch. 482 (AB 1218) Keeley. Vehicles: right-of-way: yielding: transit buses.

(1) Existing law requires a driver to yield the right-of-way to an approaching authorized emergency vehicle that is sounding a siren and has at least one lighted lamp exhibiting red light.

This bill would, in the Santa Cruz Metropolitan Transit District, the Orange County Transportation Authority, the Alameda-Contra Costa Transit District, and the Santa Clara County Transit District, require the driver of a vehicle to yield the right-of-way to a transit bus if (a) the bus has entirely exited an active traffic lane to board or deboard passengers at a designated bus stop, and is attempting to reenter the lane from which it exited, (b) directional signals on the bus are flashing to indicate that the bus is preparing to merge with traffic, and (c) the bus is equipped with a yield right-of-way sign, as specified, on the left rear of the bus. This bill would require that the Commissioner of the California Highway Patrol report on the effectiveness of the right-of-way with recommendations, as prescribed, on or before December 31, 2002. The bill also would require an education program in the affected areas and would establish a base fine of $35 for a violation, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The provisions of the bill would be applicable to a district only if the governing board of the district approves a resolution requesting that those provisions be made applicable to it.

Because a failure to yield as required would be an infraction, the bill would impose a state-mandated local program by creating a new crime.

The requirements of the bill would terminate on January 1, 2003.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 483 (AB 76) Keeley. Marine resources.

(1) Existing law provides that each member of the Fish and Game Commission shall receive $100 for each day of actual service performed in carrying out his or her official duties pursuant to law and limits the amount of this compensation for any one commissioner to $500 for any one calendar month. These expenses are paid out of the continuously appropriated Fish and Game Preservation Fund.

This bill would require the commission, based on its strategic planning process, to submit recommendations to the Legislature, on or before July 1, 2000, regarding the time commitment required for service on the commission, compensation of the commissioners, and other matters the commission deems appropriate.

(2) Existing law requires the commission to form a marine resources committee, which is required to report to the commission on its activities and make recommendations on all marine resource matters considered by the commission.

This bill would require the members of the committee to be members of the commission.

(3) Existing law, which is to be repealed on January 1, 2000, delineates the general regulatory powers of the commission, including, among other things, the authority to establish, extend, shorten, or abolish open seasons and closed seasons, establish, change, or abolish bag limits and possession limits, and establish and change areas of territorial limits for their taking. That law also authorizes any regulation adopted pursuant to those provisions to supersede any section of the Fish and Game Code under specified circumstances.

This bill would extend those provisions to January 1, 2003. Since a violation of a regulation adopted by the commission is a misdemeanor under existing law, the bill would impose a state-mandated local program by continuing in existence, until January 1, 2003, crimes that otherwise would be repealed.

(4) Existing law authorizes the commission, or any person appointed by the commission to conduct a hearing, to cause the deposition of witnesses, as prescribed, and to compel the attendance of witnesses and the production of documents and papers. Existing law requires all meetings of a state body to be open and public, with specified exceptions, but specifies that nothing in that law prohibits a state body from holding a closed session to deliberate on a decision to be reached in a proceeding required to be conducted pursuant to specified provisions of existing law governing administrative adjudication or similar provisions of law.

This bill would specify that any deliberation conducted by the commission, or by any person appointed by the commission to conduct hearings, is deemed to be a proceeding required to be conducted pursuant to the law governing administrative adjudication or similar provision of law.

(5) Existing law generally governs the establishment of fishery management plans, except for fishery management plans governing the white seabass fishery. Other existing law governs fishery management plans specifically for the white seabass fishery.

This bill would repeal the law specifically governing the white seabass fishery, and would incorporate provisions pertaining to that fishery into the law governing fishery management plans generally. The bill would make conforming changes.

(6) Existing law makes it unlawful to take abalone for commercial purposes in specified fish and game districts, and imposes a moratorium on the taking, possessing, or landing of abalone for commercial or recreational purposes in ocean waters of the state

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

south of a line drawn due west magnetic from the center of the mouth of San Francisco Bay, including all islands offshore the mainland of California.

The bill would allow a registered aquaculturist to collect abalone for broodstock, notwithstanding those provisions, in accordance with specified requirements.

(7) Existing law continuously appropriates the money in the Fish and Game Preservation Fund to the Department of Fish and Game to carry out the Fish and Game Code and to the commission for the payment of the compensation and expenses of the commissioners and employees of the commission. Because this bill would continue, until January 1, 2003, existing duties imposed on the commission that otherwise would be repealed, the bill would make an appropriation.

The bill would authorize regulations that the commission adopts to implement a fishery management plan or plan amendment for that fishery to make inoperative, in regard to that fishery, any fishery management statute that applies to that fishery, including, but not limited to, statutes that govern allowable catch, restricted access programs, and time, area, and methods of taking.

The bill would authorize the commission, on and after January 1, 2000, to adopt regulations as it determines necessary to regulate all emerging fisheries, all fisheries for nearshore fish stocks, and all fisheries for white seabass, as specified.

(8) Existing law defines "restricted access," with regard to a marine fishery, as a fishery in which the number of persons who may participate, or the number of vessels that may be used in taking a specified species of fish is limited by statute or regulation.

This bill would include within that definition a fishery in which the catch allocated to each fishery participant is limited by statute or regulation.

(9) Existing law requires the Director of Fish and Game to report annually to the commission on the status of sport and commercial marine fisheries managed by the state, as specified.

This bill would require each restricted access program to be reviewed at least every 5 years for consistency with the policies of the commission on restricted access fisheries.

(10) Existing law requires the commission to adopt a fishery management plan for the nearshore fishery on or before January 1, 2002, if funds are appropriated for that purpose in the annual Budget Act or pursuant to any other law.

This bill would require that plan to be consistent with the Nearshore Fisheries Management Act.

(11) Existing law requires any person taking, possessing aboard a boat, or landing any species of nearshore fish stock for commercial purposes to possess a valid nearshore fishing permit issued to that person that has not been suspended or revoked, and requires that, when using a boat to take nearshore fish stocks, at least one person aboard the boat shall have a valid nearshore fishery permit. Existing law provides that nearshore fishing permits are revocable and specifies that the fee for a nearshore fishing permit is $125.

This bill would instead require any person taking, possessing aboard a boat, or landing any species of nearshore fish stock for commercial purposes to possess a valid nearshore fishery permit issued to that person that has not been suspended or revoked, but would instead allow those actions when using a boat to take nearshore fish stocks, if at least one person aboard the boat has a valid nearshore fishery permit.

(12) Existing law provides that, when a fishery is closed or restricted due to specified reasons, the policy of the department and the commission is to assist and foster the development of alternative fisheries or alternative fishing gear, consistent with specified policies regarding the closure or restriction of commercial fishing.

This bill would instead require those policies to be consistent with all of the provisions governing fishery management plans, sport fishing, and commercial fishing.

(13) Existing law does not prohibit the taking of basking sharks for commercial purposes.

This bill would authorize the commission to adopt regulations to manage basking sharks, and would prohibit the taking of a basking shark commercially unless the commission adopts regulations for that activity and the taking is in accordance with those regulations. Because a violation of this prohibition would be a crime, pursuant to other provisions of law, the bill would impose a state-mandated local program by creating a new crime.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(14) Existing law prohibits the use of gill nets or trammel nets for commercial purposes, except under a revocable, nontransferable permit issued by the department, and prohibits the department from issuing new gill net or trammel net permits under that provision, except to those persons who applied prior to January 1, 1986, to take the examination for a gill and trammel net permit.

This bill would delete that exception for the issuance of new permits to those persons who apply prior to January 1, 1986.

(15) Existing law prohibits the use of gill nets and trammel nets, from December 15 to May 15, inclusive, within two nautical miles of Point Loma in San Diego County or San Mateo Point in Orange County or within one nautical mile of Point La Jolla in San Diego County, Dana Point in Orange County, or Point Fermin, Point Vicente, Palos Verdes Point, or Point Dume in Los Angeles. Existing law allows set gill nets to be used south of the Coronado-San Diego Bridge to take mullet (Mugil cephalus) only under a specified permit.

This bill would repeal those provisions.

(16) Existing law allows bait nets to be used to take fish for bait in specified districts.

This bill would authorize the commission, upon the recommendation of the department, to adopt regulations governing the use of bait nets.

(17) The bill would make other technical, clarifying, and conforming changes.

(18) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 484 (AB 384) Jackson. Sales and use taxes: prepayments.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides that, under specified circumstances, the State Board of Equalization may require any person whose sales and use tax liability exceeds a specified amount to prepay that tax liability. Existing law provides for a prepayment amount and due date for the first, third, and fourth calendar quarters different than for the second calendar quarter.

This bill would revise the prepayment requirements for the 2nd calendar quarter. The bill would make related changes.

Ch. 485 (AB 404) Kuehl. Estate taxes: satisfaction.

Existing law requires the Controller to examine and settle the accounts of all persons indebted to the State of California and to direct and superintend the collection of all money due the state.

This bill would direct the Department of General Services to accept a deed on behalf of the Controller's office in lieu of foreclosure for the 160 acres of specified real property located in the County of Los Angeles and in lieu of the estate taxes and interest due as a result of the default in payments for the purchase of the property by the Mountains Recreation and Conservation Authority on March 26, 1996.

The bill would also authorize the Department of Parks and Recreation to exchange or sell the real property, as specified.

Ch. 486 (AB 517) Maldonado. Escrow companies: Fidelity Corporation: request for hearing.

Existing law provides for the licensing of escrow agents by the Department of Corporations, and requires licensees to participate as members of the Escrow Agents' Fidelity Corporation, a nonprofit corporation established to pay members for loss of trust obligations, as specified.

Existing law provides that a member or successor in interest aggrieved by any action or decision of the Escrow Agents' Fidelity Corporation may appeal to the Commissioner of Corporations within 30 days from the action or decision by filing a written request for a hearing.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would revise various of those procedures and requirements and provide instead for the filing of a written request for a hearing with the commissioner, as specified.

Ch. 487 (AB 528) Papan. Revenue bonds: joint powers authorities.

Under existing law, any agency, commission, or board provided by a joint exercise of powers agreement may issue revenue bonds to pay the cost and expenses of acquiring or constructing a project as defined, or conducting a program for any of various enumerated purposes.

This bill would specify that the issuance of specified joint powers authority revenue bonds of designated joint powers authorities for designated transportation and water facilities and the use of bond proceeds to finance these projects are valid.

Ch. 488 (AB 538) Wayne. Public beaches: bacteriological standards.

Existing law sets forth duties and responsibilities of the State Water Resources Control Board.

This bill, in addition, would require the state board, on or before September 30, 2000, in conjunction with the State Department of Health Services and a panel of experts established by the state board, to develop source investigation protocols for use in conducting source investigations of storm drains that produce exceedences of specified bacteriological standards.

The bill also would require the state board, on or before March 31, 2001, in conjunction with the State Department of Health Services, to report to the Legislature on the methods by which it intends to conduct sources investigations of storm drains that produce exceedences of bacteriological standards established, as specified.

Ch. 489 (AB 771) Briggs. Vehicles: driver's licenses: identification cards: photographs and physical characteristics.

Under existing law, a driver's license or identification card is required to bear a fullface engraved picture or photograph of the licensee or applicant and other information concerning the licensee or applicant, including information pertaining to the licensee's or applicant's physical characteristics. The Department of Motor Vehicles is authorized to sell information from its records, with specified exceptions.

This bill would prohibit the department from distributing or selling, unless requested by the licensee or applicant, the licensee's or applicant's picture or photograph or any information pertaining to the licensee's or applicant's physical characteristics to any private individual, other than the licensee or applicant, or to any firm, copartnership, association, or corporation, except as specified.

Ch. 490 (AB 831) Leach. Limited liability companies: formation.

Existing provisions of the Beverly-Killea Limited Liability Company Act authorize the creation of, and govern the activities of, limited liability companies. Existing law generally provides that the members of a limited liability company are personally liable under a judgment of a court or for any debt, obligation, or liability of the company under the same or similar circumstances and to the same extent as a shareholder of a corporation, except with respect to the failure to hold meetings or to observe certain formalities at meetings under specified conditions. Existing law also generally requires limited liability companies to have 2 or more members.

This bill would permit limited liability companies to have one member, and would provide that the members of a limited liability company are subject to the common law of alter ego liability.

Ch. 491 (AB 848) Kuehl. Coastal development permits: temporary, nonrecurring movie, television and commercial production sets.

The existing California Coastal Act of 1976 requires any person wishing to perform or undertake any development in the coastal zone, as defined, to obtain a coastal development permit, except as provided. The act requires the California Coastal Commission to hear appeals brought with respect to actions taken on a coastal development permit application, as prescribed.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the governing body of a local government with a certified local coastal program to elect to delegate the commission as the appropriate authority to process and issue a coastal development permit for a temporary, nonrecurring location set for a motion picture, television, or commercial production project in the coastal zone. The bill would authorize the governing body of a local government to designate the commission as the processing and permitting authority on a project-by-project basis and to designate the local coastal administrator or other designee as the decisionmaking authority to decide projects that will be transmitted to the commission for processing and permitting. The bill would specify related matters regarding the processing of these coastal development permit applications by the commission.

Ch. 492 (AB 855) Cardenas. Child care and development programs.

(1) Existing law establishes the Child Care and Development Services Loan Guaranty Fund and the Child Care and Development Facilities Direct Loan Fund in the State Treasury which are continuously appropriated funds, to be used for the purpose of guaranteeing and providing loans for the purchase, development, construction, expansion, or improvement of licensed child care and development facilities. Under existing law, facilities eligible for loan guaranty programs include, among others, full-day and part-day child care and development facilities and family day care homes serving more than 6 children.

This bill would instead provide that facilities eligible for loan guaranty programs include licensed full-day and part-day child care and development facilities and family day care homes.

(2) Existing law sets forth the purposes for which loans and loan guarantees for improvements may be used.

This bill would also authorize loans and loan guarantees for improvements to be used for the expansion or preservation of existing child care operations and would require the Department of Housing and Community Development to determine whether the improvements are necessary.

(3) Existing law provides priority for loan guarantees and direct loans to facilities that serve households with incomes not exceeding 75% of the local median income.

This bill would define a "lower income" family for the purposes of providing program priorities as a family with an adjusted monthly income that is at or below 75% of the state median income.

(4) Existing law places certain restrictions on loan guarantees and direct loans to family child care homes serving more than 6 children and requires a family child care home provider to provide evidence from the community care licensing division that the repairs, renovations, or additions are required to maintain the license or obtain a license for more than 6 children.

This bill would delete these provisions.

(5) Existing law requires the Department of Housing and Community Development to adopt regulations for serving family day care homes efficiently including making loans available from the Child Care and Development Facilities Direct Loan Fund to local microenterprise loan funds and other lenders who may relend the funds to eligible family day care home providers.

This bill would provide that a loan to a family day care home provider shall not be subject to a 50% investment restriction.

(6) Under existing law, the interest rate of a loan may vary based on the ability of the borrower to repay the loan, but is required to be reasonable and designed to obtain prompt and full repayment of the loan by the borrower.

This bill would instead require the interest rate for a direct loan to be set at the time of application, fixed for the term of the loan, and set at a rate equivalent to the Surplus Money Investment Fund rate in effect on December 31 of the preceding calendar year.

Ch. 493 (AB 873) Committee on Human Services. Rehabilitative services: assistive technology.

Existing law requires independent living centers to perform various functions and duties with respect to providing assistance to individuals with disabilities, including providing services and referrals regarding transportation, job development, equipment

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

maintenance and evaluation, training in independent living skills, mobility assistance, and communication assistance.

This bill would include assistive technology among the services and referrals required to be provided by independent living centers. The bill would also require assistive technology activities to involve collaboration with the Department of Rehabilitation and the nonprofit contractor selected to implement the federal law relating to assistive technology, which would be required to serve as the framework for offering assistance to individuals with disabilities.

Ch. 494 (AB 963) Gallegos. Automotive products: coolants and antifreeze.

(1) Existing law requires the Department of Food and Agriculture to establish specifications for engine coolants and antifreeze, and prediluted engine coolants and prediluted antifreeze that promote the public safety in the operation of motor vehicles. Existing law prohibits the department from prescribing specifications that are less restrictive than the minimum specifications recommended by the American Society for Testing and Materials.

This bill also would require the department, on or before January 2002, to establish specifications for recycled engine coolants and antifreeze and recycled prediluted engine coolants and antifreeze that promote the public safety in the operation of motor vehicles if the American Society for Testing and Materials adopts standards for recycled engine coolants and antifreeze. Because, under existing law, a violation of those standards and specifications would be a misdemeanor, the bill would impose a state-mandated local program.

For the above purposes, the bill would revise the definition of "prediluted engine coolant" or "prediluted antifreeze." The bill also would require the department to adopt testing procedures and to specify a virgin reference coolant that it finds is recognized as standard in the industry.

(2) Existing law, until January 1, 2000, or 150 days from the date of the adoption of prescribed standards by the American Society for Testing and Materials, whichever occurs first, authorizes the Department of Food and Agriculture to grant a variance from the chloride standard adopted for recycled engine coolants and antifreeze if certain requirements are met.

This bill, instead, would extend those provisions to January 1, 2003.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 495 (AB 982) Ducheny. Water quality: total maximum daily loads.

Under the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board and the California regional water quality control boards are the principal state agencies with regulatory authority over water quality. Under the federal Clean Water Act, each state is required to identify those waters for which prescribed effluent limitations are not stringent enough to implement applicable water quality standards and to establish, with regard to those waters, total maximum daily loads, subject to the approval of the United States Environmental Protection Agency, for certain pollutants at a level necessary to implement those water quality standards.

This bill would require the state board to convene an advisory group or groups to assist in the evaluation of program structure and effectiveness as it relates to the implementation of the requirements of a specified provision of the federal Clean Water Act and applicable federal regulations. The bill also would require the state board to report, on or before November 30, 2000, and annually thereafter until November 20, 2002, to the Legislature on the structure and effectiveness of its water quality program as it relates to that provision of the federal Clean Water Act. The bill, in addition, would require the state board, on or before November 30, 2000, to assess and report to the Legislature on the state board's and the regional board's current surface water quality monitoring programs, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 496 (AB 992) Wayne. Solid waste disposal sites: cleanup.

(1) The existing California Integrated Waste Management Act of 1989 required the California Integrated Waste Management Board, on January 1, 1994, to initiate a program for the cleanup of solid waste disposal sites and for cleanup of solid waste at codisposal sites where no responsible party is available to pay for timely remediation, and where cleanup is needed to protect public health and safety or the environment. Existing law provides that all expenses incurred by the board in carrying out the program shall be paid from the Solid Waste Cleanup Trust Fund. Existing law provides that the board may not expend more than $300,000 annually for administration of the program and may not expend more than $5,000,000 from the trust fund in any fiscal year.

This bill would eliminate those monetary limitations, but would instead prohibit the board from expending more than 5% of the amount appropriated for the program to administer the program, unless a different amount is otherwise appropriated to administer the program in the annual Budget Act.

(2) Existing law authorizes the board, in administering the program, to expend funds for specified purposes, including providing loans to responsible parties who make a specified demonstration regarding loan repayment, and providing matching grants to local governments. The board is also authorized to provide grants to certified local enforcement agencies to abate illegal disposal sites.

This bill would instead authorize the board to expend funds to provide loans to private parties that make that demonstration and to provide matching grants to public entities. The bill would additionally authorize the board to provide grants to all public entities, rather than only certified local enforcement agencies, for the abatement of illegal disposal sites.

The bill would make other nonsubstantive changes.

Ch. 497 (AB 1047) Firebaugh. AIDS: drug treatments.

Existing law requires the State Department of Health Services to establish a program to provide drug treatments to persons infected with HIV. Existing law requires the department to develop, maintain, and update a list of drugs to be provided under the program. Existing law requires the department to establish uniform standards of financial eligibility for the drugs under the program.

This bill would require the program to make available to any eligible person any antiviral drug that is approved by the federal Food and Drug Administration for treatment of HIV or AIDS, prescribed by the beneficiary's medical care provider, and approved by the AIDS Drug Assistance Program Medical Advisory Committee of the Office of AIDS, subject to certain determinations and analysis by the department. The bill would require any antiviral drug approved for addition to the formulary of the program to be available to patients covered by the program within 30 days of the office being notified by the drug's manufacturer of the approval.

This bill would also require the Office of AIDS within the department to report certain information regarding the program's administration to the Legislature by October 1, 2000.

Ch. 498 (AB 1081) Calderon. Insurance: surplus lines.

Existing law generally requires an insurer to be admitted in order to transact business in California, but permits insurance to be transacted through nonadmitted insurers in various instances, including through a surplus line broker.

Existing law provides that before any nonadmitted foreign or alien insurer may file any pleading in any action, suit, or proceeding instituted against it, the insurer shall either procure a certificate of authority to transact insurance or file a bond in the action. However, this requirement does not apply when the insurance is exempt from requirements regulating insurance by nonadmitted insurers, or when the insurer has lawfully transacted surplus line insurance, as specified, and the insurer has appointed an agent for the service of process. In that case, the court is permitted to require the insurer to file a bond unless it makes a showing that it has sufficient assets.

Existing law also provides, until January 1, 2000, that the restrictions as to filing suits by nonadmitted foreign or alien insurers do not apply to the above-mentioned categories of insurance and, in addition, those restrictions do not apply to insurance procured by

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the insured from a nonadmitted insurer and insurance determined to be eligible for placement with a nonadmitted insurer and to be exempt by the Insurance Commissioner, as specified, or if the contract is governed by and is in compliance with the laws of the state in which the contract was issued. Existing law also provides, until January 1, 2000, that an insurer need not file a bond if at the time the insurer files any pleading in any action, suit, or proceeding instituted against it, the insurer is an eligible surplus line insurer, as specified, or with respect to a dispute arising out of certain contracts of reinsurance, the reinsurer has complied with specified requirements.

This bill would delete the January 1, 2000, repeal date applicable to these provisions.

Ch. 499 (AB 1092) Lowenthal. Alcoholic beverages: licenses.

Under existing law, the Department of Alcoholic Beverage Control is authorized to place reasonable restrictions upon retail licensees or any licensee in the exercise of retail privileges in various situations.

This bill would also permit the department to place reasonable restrictions on these licensees if the department adopts conditions requested by a local governing body.

Ch. 500 (AB 1151) Leach. Vessels.

Existing law requires the operator of any vessel involved in an accident who knows or has reason to know that the accident resulted in the injury, death, or disappearance of any person to fulfill specified duties relating to furnishing information, reporting the accident to law enforcement, and rendering assistance. Existing law provides that a person who violates these requirements shall be punished by imprisonment in the state prison or in a county jail for not more than one year, or by a fine of not more than $10,000, or by both that imprisonment and fine.

This bill would specify that if a fine is imposed for a violation of any of those requirements, the fine shall be not less than $1,000.

Ch. 501 (AB 1164) Aanestad. Gasoline vapor recovery control systems.

Existing law requires the State Air Resources Board to identify equipment defects in systems for the control of gasoline vapors resulting from motor vehicle fueling operations, as specified.

This bill would require the executive officer of the state board to identify and list those defects. The bill would also require the executive officer to review that list at a public workshop on or before January 1, 2001, and at least once every 3 years thereafter, to determine whether the list requires updating, as provided. The bill would authorize the executive officer to initiate a public review of the list upon a written request that demonstrates the need for the review, as specified.

Ch. 502 (AB 1210) Strom-Martin. Marine resources: commercial fishing: Bodega Marine Life Refuge.

(1) Under existing law, commercial fishermen are subject to specified landing receipt requirements under specified circumstances.

This bill would impose landing receipt requirements on certain commercial fishermen, as specified, including maintaining an accurate tally sheet of sales and recording the total of daily sales at the completion of sales for that day on a landing receipt as an alternative to making a landing receipt for each individual sale.

(2) Existing law requires a weighmaster, as defined, to obtain a license from the Department of Food and Agriculture prior to performing the duties of a weighmaster, and to comply with other specified requirements regarding weights and measures.

This bill would specify that certain commercial fishermen shall not be considered weighmasters for purposes of those requirements.

(3) Existing law requires any person in possession of a salmon with a missing adipose fin, upon request by an authorized agent or employee of the Department of Fish and Game, to immediately relinquish the head of the salmon to the state for recovery of any coded-wire tag.

This bill would make it unlawful to intentionally conceal, cull, or release into the waters, a salmon with a missing adipose fin that is otherwise legal to possess, thereby imposing a state-mandated local program by creating a new crime. The bill would

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

require a commercial fisherman selling his or her own catch to the ultimate consumer, upon request by an authorized agent or employee of the department, to immediately make available all fish in his or her possession for inspection and sampling.

(4) Under existing law, a herring permit may be issued to 2 individuals if the individuals are married or are partners in a partnership, and meet specified requirements. Existing law provides that a herring permit may be transferred to one of the partners to be held thereafter in that partner's name only if that partner has not less than 10 experience points as computed pursuant to a specified formula and there has been a death or retirement of the other partner, or other specified circumstances exist.

This bill would provide that in the event of the death of one of the partners, where the partnership existed for longer than 6 months but less than 3 years and the surviving partner does not meet the minimum experience points to qualify for a transfer, the permit may be transferred on an interim basis for a period of not more than 10 years to the surviving partner if an application is submitted to the department within 1 year of the deceased partner's death and the surviving partner participates in the fishery for the purpose of achieving the minimum number of points to be eligible for the permit transfer.

(5) Existing law provides for marine life refuges, established for marine resources protection and scientific study.

This bill would authorize the Director of Fish and Game to appoint the Director of the Bodega Marine Life Refuge. The bill would specify the authority of the marine life refuge director. The bill would make it unlawful to enter the marine life refuge for specified purposes without authorization, or to anchor or moor a vessel in the refuge without authorization, with a specified exception, thereby imposing a state-mandated local program by creating a new crime.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 503 (AB 1229) Committee on Agriculture. Agricultural land conservation: districts.

(1) Existing law, the Agricultural Land Stewardship Program Act of 1995, establishes a program for grants from the Department of Conservation to local governments and nonprofit organizations, subject to prescribed requirements and in accordance with prescribed procedures, for the acquisition of agricultural conservation easements, as defined, and for incidental costs, as specified. The act specifies that an "agricultural conservation easement" or "easement" means an interest in land, less than fee simple, that represents the right to prevent the development or improvements of the land, as specified, for any purpose other than agricultural production, and requires that an agricultural conservation easement be granted by the owner of a fee simple interest in land to a local government or nonprofit organization, for the program. The act defines an "applicant" to mean a city, county, or nonprofit organization that applies for a grant to acquire an agricultural easement.

This bill would rename the program to the California Farmland Conservancy Program, and require that an easement also be granted by the owner of a fee simple interest in land to a resource conservation district, or to a regional park or open-space district or regional park or open-space authority that has the conservation of farmland among its stated purposes, as prescribed by statute, or as expressed in the district's or authority's locally adopted policies, for the program. The bill would revise the definition of "applicant," as specified, and would add a definition of "resources conservation district" for purposes of the act. The bill would provide that, with a specified exception, an easement may, at the request of the landowner, establish provisions that are more restrictive than those provided in the act. The bill would prescribe various requirements for the termination and repurchase of an easement, and the distribution of moneys received in connection with the termination of an easement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would authorize the department to accept donations of funds if the department is the designated beneficiary of the donation and it agrees to use the funds for program purposes in a county specified by the donor, and to establish a payment system for the purchase of agricultural conservation easements that is mutually satisfactory to the department and the seller of the easement, if full payment is secured. The bill would prescribe various other related matters.

(2) Existing law creates the Agricultural Land Stewardship Program Fund, and authorizes the deposit of money into the fund from gifts, donations, proceeds from the sale of general obligation bonds, funds appropriated therefor by the Legislature, federal grants or loans, or other sources, and makes those moneys available, upon appropriation by the Legislature, for the implementation of the program.

This bill would rename that fund to the California Farmland Conservancy Fund, and would instead provide that moneys in the fund may be expended, upon appropriation by the Legislature in the annual Budget Act, for the purposes of the program, but would require that moneys deposited into the fund from federal grants, and gifts and donations that are designated and required by the doner to be used exclusively for the purposes of the program, be continuously appropriated to the department for expenditure for the purposes of the program, thereby making an appropriation.

Ch. 504 (AB 1291) Corbett. Seismic improvements.

(1) The California Constitution generally limits ad valorem taxes on real property to 1% of the full cash value of that property. For purposes of this limitation, "full cash value" is defined as the assessor's valuation of real property as shown on the 1975–76 tax bill under "full cash value" or, thereafter, the appraised value of that real property when purchased, newly constructed, or a change in ownership has occurred. The California Constitution authorizes the Legislature to exclude from "new construction" requiring reappraisal the construction or installation in existing buildings of certain seismic retrofitting improvements or improvements utilizing earthquake hazard mitigation technologies. Statutory law implementing this authority excludes only those projects completed on or after January 1, 1991, and before July 1, 2000. These statutory provisions are repealed by their own terms as of July 1, 2000.

This bill would revise the definition of "seismic retrofitting improvements" and would eliminate the repeal of the exclusion as of July 1, 2000.

By requiring local officials to administer this reappraisal exclusion on an ongoing basis, this bill would impose a state-mandated local program.

(2) Under existing law, the Seismic Safety Commission is authorized to use up to 1% of the proceeds of bonds issued and sold pursuant to the Earthquake Safety and Public Buildings Bond Act of 1990 for specific research and development purposes.

This bill would appropriate $145,000 from the Earthquake Safety and Public Buildings Rehabilitation Fund of 1990 to the commission for programs pursuant to these provisions.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(4) Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

Ch. 505 (AB 1357) Wesson. Parks and recreation: Kenneth Hahn State Recreation Area: study.

Existing law establishes parks and recreation areas in the state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the Secretary of the Resources Agency, in conjunction with the Director of Parks and Recreation, not later than November 1, 2000, to conduct a study of the feasibility and desirability of expanding the Kenneth Hahn State Recreation Area to include all, or a substantial portion, of the Baldwin Hills area of the County of Los Angeles in order to provide for the creation of a major urban park to serve the entire Los Angeles area. The bill would require that the study be incorporated into any master plan that is prepared for the expansion of the Kenneth Hahn State Recreation Area.

Ch. 506 (AB 1403) Soto. South Coast Air Quality Management District.

(1) Existing law requires notice of the time and place of any public hearing scheduled by the South Coast Air Quality Management District Board to adopt, amend, or repeal any rule or regulation relating to an air quality objective, to be mailed to every person who filed a written request for notice and to any person that the south coast district believes to be interested in the proposed rule or regulation.

This bill would require the south coast district board to convene a task force to review, and assist in updating, the district's data base, on or before July 1, 2000, to ensure that specified small businesses located within the district are included on the district's mailing list. The bill would require the district, on and after July 1, 2000, to mail notices to each affected small business and local or regional authority within the district of any public workshop scheduled by the south coast district to consider the adoption, amendment, or repeal of any district rule or regulation that may affect that small business or local or regional authority.

This bill would require the south coast district board to establish a small business advisory group to provide guidance to the district board in implementing the bill. The bill would provide that, to the extent that the requirements of the bill duplicate or overlap with the requirements of other specified laws, the district may combine or consolidate its activities in order to promote efficiency and nonduplication of effort.

By imposing new duties on the south coast district, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 507 (AB 1435) Briggs. Agriculture: navel and Valencia oranges.

Existing law provides for a Navel and Valencia Orange Advisory Committee in the Department of Food and Agriculture for the purpose of, among other things, overseeing the implementation of an inspection program pertaining to standards for orange maturity and freeze damage as provided by statute or regulation. Existing law requires producers of navel and Valencia oranges that are grown in this state and prepared for fresh market in certain counties of the state to pay an assessment based upon the number of cartons shipped. The assessment is for the purpose of conducting an inspection program in certain counties in the state.

This bill, in addition, would authorize an assessment of these producers not to exceed 2 mills per carton to fund a program within the department to provide the industry with a state crop estimating service and an acreage survey.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 508 (AB 1676) Committee on the Judiciary. Stipulated reversals of judgment.

Existing law authorizes an appellate court to reverse a trial court judgment upon the stipulation of the parties, as specified.

This bill would prohibit an appellate court from reversing or vacating a duly entered judgment upon an agreement or stipulation of the parties unless the court finds that there is no reasonable possibility that the interests of nonparties or the public will be adversely affected by the reversal, and that the reasons of the parties for requesting reversal outweigh the erosion of public trust that may result from the nullification of a judgment and the risk that the availability of stipulated reversal will reduce the incentive for pretrial settlement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 509 (SB 33) Peace. Public Utilities Commission: president: advisers.

Existing law requires the members of the Public Utilities Commission to elect one of their number president of the commission and requires the president to preside at all meetings and sessions of the commission. Existing law authorizes the commission to appoint an attorney and an executive director to the commission, as specified, and requires the attorney and executive director to perform duties that the commission may require. Under existing law, the executive director is responsible for the commission's executive and administrative duties, including, but not limited to, directing the operations and affairs of the commission. Existing law authorizes the Governor to appoint one adviser for each member of the commission upon the request of the commission member and prohibits the total number of advisers exempt from civil service from exceeding 5.

This bill would require the Governor to designate the president of the commission from among its members. The bill would require the president to direct the executive director, the attorney, and other staff of the commission, except for the staff of the division which represents the interests of public utility customers and subscribers in commission proceedings, in the performance of their duties, in accordance with commission policies and guidelines. This bill would specify that the attorney and executive director may be directed in their duties by a vote of the commission, as prescribed. The bill would require the president to preside at all meetings and sessions of the commission. The bill, until January 1, 2003, would authorize the Governor to appoint up to 2 advisers for each member of the commission upon the request of the commission member and would prohibit the total number of advisers exempt from civil service from exceeding 10. The bill would require the commission to seek funding for staffing in accordance with that appointment provision through the annual Budget Act.

Ch. 510 (SB 96) Peace. Electrical restructuring: Independent System Operator: Power Exchange.

(1) The existing restructuring of the electrical services industry provides for the authorization of direct transactions between electricity suppliers and end use customers and for the creation of an Independent System Operator and a Power Exchange. An Electricity Oversight Board is also created to, among other things, oversee the Independent System Operator and the Power Exchange, and to determine the composition and terms of service and to appoint the members of the governing boards of the Independent System Operator and the Power Exchange. The Electricity Oversight Board is the appeal board for majority decisions of the Independent System Operator governing board.

This bill would revise specified provisions relating to the Independent System Operator and the Power Exchange, and to the duties of the Electricity Oversight Board. The bill would require the Independent System Operator and the Power Exchange to each be administered by a governing board appointed by the Electricity Oversight Board until an agreement with a participating state is in effect. The bill would authorize the Electricity Oversight Board to decline to confirm the appointments of specified members of the governing boards of the Independent System Operator and the Power Exchange, and would specify that the board has the exclusive right to approve procedures and qualifications for those governing board members, all of whom would be required to be electricity consumers, as specified. The bill would make the Electricity Oversight Board the appeal authority for majority decisions of the governing board of the Independent System Operator only with respect to prescribed matters, that would be subject to California's exclusive jurisdiction. The bill would impose prescribed requirements regarding the bylaws of the Independent System Operator and the Power Exchange.

(2) Existing law governing electrical restructuring states the intent of the Legislature that California enter into a compact with western region states, and that the compact should require the publicly and investor-owned utilities located in those states that sell energy to California retail customers to adhere to enforceable standards and protocols to protect the reliability of the interconnected regional transmission and distribution systems.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would repeal that intent provision, and, instead, state the intent of the Legislature to provide for the evolution of the Independent System Operator and the Power Exchange into regional organizations to promote the development of regional electricity transmission markets in the western states and to improve the access of consumers served by the Independent System Operator and the Power Exchange to those markets. The bill would state that the preferred means by which that voluntary evolution should occur is through the adoption of a regional compact or other comparable agreement, as described.

Ch. 511 (SB 152) Johannessen. Deputy Secretary of Veterans Homes.

Existing law provides for the establishment and operation of the California veterans home at various sites for aged and disabled veterans who meet certain eligibility criteria. Existing law requires each California veterans home to be under the management and control of the Department of Veterans Affairs and, subject to the policies adopted by the Board of Veterans Affairs and the direction of the Secretary of Veterans Affairs, to be administered by an administrator.

This bill would require the Governor to appoint, in addition to the secretary, a Deputy Secretary of Veterans Homes to serve at the pleasure of the secretary, to be responsible for the administration of all sites of the California veterans homes, for the purpose of overseeing and monitoring all aspects of medical care that is being provided to men and women veterans who are residents at any California veterans home.

Ch. 512 (SB 187) Hughes. Home improvement contracts.

Existing provisions of the Unruh Act prohibit a retail installment contract from containing specified provisions.

This bill would prohibit a provision in a retail installment contract for a home improvement, as defined, under which the seller takes a security interest, other than a mechanics' lien, in the buyer's principal residence where the buyer is 65 years of age or older. A violation of the prohibition would be a misdemeanor, thereby imposing a state-mandated local program.

Existing law prohibits a home improvement goods or services contract of $5,000 or less from providing for a security interest in real property, except for a mechanic's lien or other interest that arises by operation of law, and provides that any lien in violation of that prohibition is void and unenforceable. Existing law also prohibits a person or entity making a loan secured by a mortgage on real property from paying a contractor the proceeds of a loan that provides funding for goods or services pursuant to a home improvement goods or services contract of more than $5,000, except by specified methods.

This bill would provide that a violation of these provisions would make the person or entity liable for actual damages, that an intentional violation would make the person or entity liable for 3 times the contract price for the home improvement, and that the person or entity would be liable to a senior citizen or disabled person, as defined, for an additional award up to $5,000.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 513 (SB 317) Leslie. Financial institutions: consumers: Year 2000 Problem.

Existing law provides for the regulation of various financial institutions by the Department of Financial Institutions, including, but not limited to, banks, savings and loan associations, credit unions, and industrial loan companies.

This bill would enact the "California Consumers Y2K Financial Protection Act." The bill would require financial institutions regulated by the Department of Financial Institutions that have a Year 2000 Problem, not to impose any fee, charge, or penalty on a consumer as a result of the financial institution's Year 2000 Problem, and to reimburse a consumer for any fee, charge, or penalty imposed by 3rd parties as a result of the problem, as specified. This bill would require the department to enforce the provisions

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of the bill. This bill would not apply to those transactions that occur prior to the disruption of financial or data transfer operations by a Year 2000 Problem. The bill's provisions would be repealed as of January 1, 2002.

Ch. 514 (SB 367) Dunn. Court filings: electronic transmission.

Existing law authorizes the Judicial Council to adopt rules permitting the filing of papers by facsimile transmission.

This bill would authorize a trial court to adopt local rules of court permitting electronic filing and service of documents, as specified. The bill would further require the Judicial Council, by January 1, 2003, to adopt uniform rules of court for these purposes, as specified, which conform to the same conditions.

Existing law authorized a court to accept credit card payments upon approval of the board of supervisors.

This bill would make that authorization subject, instead, to the approval of the Judicial Council, would make the approval of credit card fees imposed by courts subject to Judicial Council approval. The bill would also authorize the Judicial Council to enter into specified agreements with credit card companies.

The bill would also make a statement of legislative intent.

Ch. 515 (SB 481) Baca. Commerce: Inland Empire Distribution Center.

Existing law requires the Trade and Commerce Agency to be the principal state agency responsible for, among other things, coordinating federal, state, and local relationships in economic development.

This bill would require the agency, in consultation with the Ports of Long Beach and Los Angeles, the Southern California Association of Governments, the San Bernardino Associated Governments, the Federal Maritime Administration, and representatives from the railroad industry, the private sector, colleges and universities, and other interested parties, as specified, to study the efficiency and economic benefits of establishing an Inland Empire Distribution Center, as compared to the distribution system that is currently in existence in the Inland Empire, and quantify any efficiencies and economic benefits that would result from establishing that new distribution center.

The bill would require the agency to prepare and submit to the Legislature, not later than July 1, 2001, a report detailing the findings made under the study.

The bill would authorize the agency to promulgate a request for proposals for completion of the study and report by one or more entities that are experts in the area and submit the resulting report in satisfaction of the specified reporting requirement. The bill would require the request for proposals to require any entity awarded the grant to provide funds to match, on a dollar-for-dollar basis, the amount provided under the grant.

The bill would repeal the above provisions on January 1, 2002.

Ch. 516 (SB 482) Baca. Petroleum underground storage tanks: loans.

Existing law requires the Trade and Commerce Agency to conduct a program to make loans to persons to upgrade, replace, or remove petroleum underground storage tanks to meet applicable local, state, or federal standards and to take corrective actions. Existing law provides that these provisions shall become inoperative on December 22, 1999, and are repealed as of January 1, 2000.

This bill would extend the operation of these provisions to January 1, 2002, when they would be repealed.

Ch. 517 (SB 534) Dunn. Mobilehomes and manufactured homes.

Existing law makes provisions for the disclosure of specified information upon the transfer of residential real property applicable to the resale of a manufactured home or mobilehome, which are classified as personal property, on or after January 1, 2000.

This bill would revise and recast these disclosure requirements. Among other things, the bill would provide for a transfer disclosure form to be used for specified manufactured homes and mobilehomes, and would make related changes. It would also make technical changes in those provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would also incorporate changes made by AB 594 to Section 1102.2 of the Civil Code if both bills become operative and this bill becomes operative last.

Ch. 518 (SB 555) Karnette. Arson: registration.

Existing law defines the crime of aggravated arson, and specifies costs to be included in calculating property damage for purposes of those provisions. The provisions relating to calculating property damage cease to have effect on January 1, 1999.

This bill would extend the operation of the above-described provisions to January 1, 2005, as specified. By extending the operative effect of an existing crime, this bill would create a state-mandated local program.

Existing law requires a convicted arsonist, as specified, to register with certain local officials where he or she resides and makes it a misdemeanor to fail to register.

This bill would, in addition, subject persons convicted of aggravated arson to the provisions described above. By expanding the scope of an existing crime, this bill would impose a state-mandated local program. The bill would also recast the provisions of law specifying the conditions requiring registration, and specify the length of time persons are subject to the registration requirements.

Existing law provides a procedure whereby a defendant may be relieved from the penalties and disabilities resulting from the offense for which the person was convicted, as specified.

This bill would provide that, for a person required to register pursuant to the provisions of law described above due to a misdemeanor conviction, if the person is granted relief pursuant to the procedure described above, the person would also be relieved of the requirement to register.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 519 (SB 653) Karnette. Alameda Corridor Industrial Reclamation Act of 1999.

Existing law sets forth the duties of the Trade and Commerce Agency in overseeing economic and community development efforts in the state.

This bill would enact until January 1, 2002, the Alameda Corridor Industrial Reclamation Act of 1999 to establish a program with the same geographic boundaries as the Alameda Corridor Transportation Authority's Job Training and Development Program, and to authorize the Community Development Commission of Los Angeles County to implement the program, at its option. The program would develop and implement a plan to foster re-industrialization of the Alameda Corridor region.

This bill would appropriate $135,000 from the General Fund to the Trade and Commerce Agency for allocation to the commission for the purposes of the bill, upon the provision of a 100% local match.

Ch. 520 (SB 700) O'Connell. Mobilehome parks: inspections.

(1) Existing law provides that manufactured homes, mobilehomes, commercial coaches, and floating homes sold or used within the state are subject to annual registration and the payment of fees to the Department of Housing and Community Development unless they are installed on a foundation system as either a fixture or an improvement to real property.

This bill would make technical, nonsubstantive changes to these provisions.

(2) The Mobilehome Parks Act requires certain local enforcement agencies to enter and inspect all mobilehome parks once every 8 years, as specified, and to submit a report to the Department of Housing and Community Development on the status of the mobilehome park inspection program prior to March 1, 1999. The department is required to submit a similar report on the inspection program to the Senate Committee on Local Government, the Senate Select Committee on Mobile and Manufactured Homes, and the Assembly Committee on Housing and Community Development by May 1, 1999. Existing law provides that these provisions shall remain in effect only until January 1, 2000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill instead would require the local enforcement agencies to enter and inspect all mobilehome parks once every 7 years, and to submit status reports to the department by specified dates, thereby imposing a state-mandated local program. The bill would prescribe additional inspection criteria and procedures for serious health and safety violations. The bill would require the department to submit specified reports to legislative committees.

The bill would extend the period during which these provisions are effective to January 1, 2007.

(3) The act sets specified fees relating to annual operating permits with regard to incidental camping areas of mobilehome parks. These fees are paid to the department and deposited in the Mobilehome Parks Revolving Fund, which is a continuously appropriated fund. A provision of the act, operative until January 1, 2000, sets an annual fee of $4 per lot and requires the revenues derived from this fee to be used exclusively for the inspection of mobilehome parks and mobilehomes to determine compliance with the act.

This bill would extend the operation of the provision requiring payment of the annual fee of $4 per lot until January 1, 2007. Because the bill would, by extending the period during which payment of this fee would be required, cause additional fees to be paid into the continuously appropriated Mobilehome Parks Revolving Fund, the bill would make an appropriation.

(4) The bill would require the Department of Housing and Community Development to convene a task force on the mobilehome park inspection program prior to January 1, 2000. However, the provisions of the bill, other than those governing the task force, would not become operative until January 1, 2000.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(6) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 521 (SB 981) Polanco. Public construction projects.

(1) Existing law prohibits agency officials, in the case of a public building or construction contract, from obtaining a surety bond or insurance contract that may be obtained by a bidder, contractor, or subcontractor on the project. Certain agencies and projects are exempt from this prohibition and existing law permits a public agency to utilize owner-controlled or wrap-up insurance programs if specified conditions are met. Existing law also exempts a school district from this prohibition for a construction or renovation project and authorizes the district to use owner-controlled or wrap-up insurance if the district determines that the prospective bidders meet minimum occupational safety and health qualifications and the use of this insurance will maximize the expenditure of public funds in conjunction with the exercise of appropriate risk management.

This bill would repeal the existing prohibition regarding a public agency obtaining a surety bond or insurance contract in connection with a public building or construction contract, reenact a prohibition against a state or local governmental agency requiring the bidder to obtain a surety bond or insurance in connection with the project from a particular surety or insurance company, agent, or broker, and authorize the use of owner-controlled or wrap-up insurance on a project for which the total cost exceeds $50,000,000 if the agency meets certain conditions and certifies that it has made certain determinations.

(2) Under the Local Agency Public Construction Act, school districts must comply with specified procedures in bidding and awarding contracts.

This bill would provide that a contract for the addition of air-conditioning to 150 schools in the Los Angeles Unified School District shall be deemed to have complied with the procedures required by the act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 522 (SB 997) Brulte. State general obligation bonds.

(1) Under the State General Obligation Bond Law, the finance committee for a bond issuance is required to adopt a resolution that includes, among other things, the rate of interest that the bonds to be issued shall bear.

This bill would authorize the finance committee to specify that the bonds may pay a variable interest rate, as prescribed in the resolution, as long as no more than 20% of the aggregate principal amount of all outstanding bonds bear a variable interest rate. The bill would make other conforming changes to provisions that relate to general obligation bonds.

(2) Under the State General Obligation Bond Law, all of the provisions of that law, with specified exceptions, are applicable to the issuance of refunding bonds. Existing law provides that state general obligation bonds are to be sold by the Treasurer either by sealed bids to the bidder whose bid will result in the lowest interest costs or by negotiated sale upon the Treasurer making certain findings.

This bill would authorize the sale of refunding bonds by negotiated sale if the Treasurer determines that it is in the best interest of the state to do so.

(3) This bill would incorporate additional changes in Section 16754.3 of the Government Code proposed by AB 1506, to be operative only if AB 1506 and this bill are both chaptered and become effective January 1, 2000, and this bill is chaptered last.

Ch. 523 (SB 1178) Figueroa. Petroleum franchises: franchise dealers fair practices.

Existing law prohibits a petroleum franchisor from requiring a franchisee to purchase only those tires, batteries, and other automotive accessories sold by the franchisor.

This bill would include motor oil within that prohibition.

Existing law provides that a violation of the franchise dealers fair practices provisions by a franchisor's executive, representative, or agent is subject to a civil penalty of up to $50,000.

This bill would increase that penalty amount to an amount of up to $100,000.

Existing law prohibits a franchisor from withholding consent to sale, transfer, or assignment of the franchise unless the franchisor demonstrates any of certain criteria.

This bill would require the franchisor to demonstrate that criteria in writing to the franchisee within 45 days of receiving the application, or required paperwork, from the buyer. It specifies as certain additional criteria a prohibition on withholding consent to a sale, transfer, or assignment of the franchise for the purpose of diminishing the market value of the franchise, or a sale, transfer, or assignment to another person because that other person is of foreign origin or is non-English speaking as long as the prospective franchisee is able to adequately communicate with the franchisor and the appropriate federal, state, and local governmental agencies concerning matters of management, operations, environmental compliance, and public safety.

Ch. 524 (SB 520) Johnson. Metropolitan Water District of Southern California.

(1) The Metropolitan Water District Act provides for the formation of metropolitan water districts and grants specified powers to those districts.

This bill, until January 1, 2005, would require the Metropolitan Water District of Southern California, on or before February 1, 2000, and each February 1 thereafter, to submit to the Legislature a report that includes a description of the complaints and other communications submitted to the district from member public agencies that allege unethical, unauthorized, or illegal activities by the district against any member public agency or the public in the previous calendar year. The bill would require the district to include in the report a description of the actions taken by the district in response to the complaints and litigation. By imposing reporting duties on the district, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 525 (AB 78) Gallegos. Health care coverage: Department of Managed Health Care.

Existing law provides for the implementation of programs for the provision of managed health care by the Department of Corporations.

This bill would transfer responsibility for the implementation of those programs to the Department of Managed Care in the Business, Transportation, and Housing Agency, established pursuant to the bill, and would make conforming changes.

The bill would also establish in the Department of Managed Care an Advisory Committee on Managed Care to assist and advise the Director of the Department of Managed Care on various issues.

The bill would also establish in the department an Office of Patient Advocate, in order to provide educational material to plan enrollees and to render advice and assistance to enrollees.

Ch. 526 (SB 19) Figueroa. Medical records: confidentiality.

Existing law, known as the Confidentiality of Medical Information Act, prohibits the disclosure of medical information, as defined, by providers of health care, as defined, including certain health care service plans, except in specified circumstances. Unauthorized disclosure that results in economic loss or personal injury to a patient is a misdemeanor. Existing law provides for licensure and regulation of health care service plans by the Commissioner of Corporations.

This bill would revise the definition of providers of health care, and make the prohibitions on disclosure of medical information applicable also to all health care service plans, and contractors, as defined. The bill would expressly prohibit (1) negligent disposal or destruction of medical information and (2) the intentional sharing, sale, or use of medical information for any purpose not necessary to provide health care services to the patient, except as otherwise authorized. The bill would permit disclosure of medical information for purposes of encoding or encrypting data, governmental reporting and chronic disease management programs, as specified.

The bill would provide that violation of the act would be grounds for suspension of revocation of a health care service plan's license and would create a right of action to recover damages, as specified, for any individual whose confidential information or records are negligently released and would additionally provide for specified administrative and civil penalties. The bill would also prohibit a provider of health care or a health care service plan and its contractors from requiring a patient, as a condition to receiving health care services, to sign an authorization, release, or consent, or waiver permitting the disclosure of any medical information subject to confidentiality protections provided by law. The bill would authorize a health care service plan or disability insurer to require disclosure of the medical information as a condition of the medical underwriting process.

The bill would require every health care service plan to have policies and procedures in place to protect the security of medical information, as specified. The bill would additionally require every health care service plan, on and after July 1, 2001, to provide enrollees, upon request, with a written statement describing how the plan maintains the confidentiality of medical information, as specified.

Existing provisions of the Insurance Information and Privacy Protection Act regulate certain practices by insurers and, for that purpose, include health care service plans, within the definition of insurance.

This bill would delete this provision, and would make related changes.

By changing the definition of a crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 527 (AB 416) Machado. Personal information: disclosure.

Existing law prohibits the disclosure of medical information by providers of health care, as defined, without the patient's prior authorization, except in specified circumstances. However, existing law permits the disclosure of specified personally identifiable information by those providers unless the patient specifically requests in writing to the contrary. A violation of these provisions that results in economic loss or personal injury to a patient is punishable as a misdemeanor. In addition, a patient whose medical information is used or disclosed in violation of these provisions is subject to civil penalties.

This bill would prohibit health care providers from releasing specified medical information created regarding an individual as a result of that person's participation in outpatient treatment with a psychotherapist, as defined, unless the person or entity requesting the information submits a written request, signed by the requester as specified. Since a violation of this provision that results in economic loss or personal injury to a patient would be punishable as a crime, the bill would impose a state-mandated local program. The bill would include a statement of findings and declarations.

This bill would also make further changes to the above provision relating to confidentiality of medical information concerning outpatient psychotherapy consistent with, and contingent upon, the enactment of SB 19.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 528 (AB 892) Alquist. Health care service plans: hospice care.

(1) Existing law requires each health care service plan to provide basic health care services, as specified.

This bill would include, on or after January 1, 2002, as a basic health care service, hospice care that at a minimum shall be equivalent to that provided pursuant to the federal Medicare program, as specified. The bill would require the Commissioner of Corporations to adopt regulations for hospice care, as specified. The bill would require an annual report by the commissioner each January 15th, commencing in the year 2002, of changes in federal regulations that require a change in state regulations for hospice care.

(2) Existing law makes a violation of any provision of the Knox-Keene Health Care Service Plan Act of 1975 a crime. This bill, by increasing the requirements for basic health care services, would change the scope of that crime, and thus would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 529 (SB 260) Speier. Health care coverage: risk-bearing organizations: financial solvency.

Existing law regulates health care coverage in a variety of contexts, including (a) the Knox-Keene Health Care Service Plan Act of 1975, under which health care service plans are regulated by the Commissioner of Corporations, (b) the Medi-Cal Act, administered by the State Department of Health Services under which qualified low-income persons are provided with health care services, (c) the Healthy Families Program, administered by the Managed Risk Medical Insurance Board, which arranges for the provision of health care services, including dental and vision care, to eligible children.

Legislation is pending that would transfer the functions and duties of the Department of Corporations and the Commissioner of Corporations, with respect to the regulation of health care service plans, to the Department of Managed Care and the Director of the Department of Managed Care.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would establish the Financial Solvency Standards Board, within the Department of Managed Care, composed of 8 members, one of whom is the Director of the Department of Managed Care and 7 of whom are appointed by the director. It would require the board to take specified actions with regard to financial solvency and standards affecting the delivery of health care services.

The bill, until January 1, 2002, would prohibit a license with waivers or limited license, on or after January 1, 2000, from being issued to any person for provision of, or the arranging, payment, or reimbursement for the provision of, health care services to enrollees of another plan under certain risk-assuming contracts. It would also prohibit any licensed health care service plan, on and after January 1, 2000, from contracting with any person, with certain exceptions, for the assumption of financial risk with respect to certain health care services and any other form of global capitation.

This bill would require every contract between a health care service plan and a risk-bearing organization, as defined, that is issued, amended, renewed, or delivered in this state on or after July 1, 2000, from including certain provisions concerning the risk-bearing organization's administrative and financial capacity, which would be effective as of January 1, 2001. The bill would require the Director of the Department of Managed Care to adopt regulations on or before June 30, 2000, with respect to, among other things, a process for reviewing or grading risk-bearing organizations based on specified criteria, and would require the director to investigate and take enforcement action against a health care service plan that fails to comply with these prescribed requirements. It would also prohibit a contract between a risk-bearing organization and a health care service plan that is issued, amended, delivered, or renewed in this state on or after July 1, 2000, from including any provision that requires a provider to accept rates or methods of payment specified in contracts with health care service plan affiliates or nonaffiliates unless the provision has been first negotiated and agreed to between the health care service plan and the risk-bearing organization.

Since a violation of the provisions relating to health care service plans is a crime, this bill, by creating new crimes, would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 530 (AB 215) Soto. Health care coverage.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Commissioner of Corporations and makes the willful violation of these provisions subject to criminal sanction.

The bill, until January 1, 2002, would prohibit a license with waivers or limited license, on or after January 1, 2000, from being issued to any person for provision of, or the arranging, payment, or reimbursement for the provision of, health care services to enrollees of another plan under certain risk-assuming contracts. It would also prohibit any licensed health care service plan, on and after January 1, 2000, from contracting with any person, with certain exceptions, for the assumption of financial risk with respect to certain health care services and any other form of global capitation.

Since a willful violation of the provisions applicable to health care service plans is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 531 (AB 12) Davis. Health care coverage: second opinions.

Under existing law, the Knox-Keene Health Care Service Plan Act of 1975, health care service plans are regulated by the Commissioner of Corporations. Existing law provides

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

that disability insurers are regulated by the Insurance Commissioner. Willful violation of the law regulating health care service plans is a crime.

Existing law requires health care service plans and certain disability insurers to file a written policy describing the manner in which the plans or insurers determine if a 2nd medical opinion is medically necessary and appropriate.

This bill would require a health care service plan and certain disability insurers to provide or authorize a 2nd opinion by an appropriately qualified health care professional if requested by an enrollee or an insured, or a participating or contracting health professional who is treating an enrollee or insured. The bill would also specify reasons for a 2nd opinion to be provided or authorized if, among other things, any one of 5 specified conditions occurs. The bill would also specify the mechanism for obtaining a 2nd opinion and the eligible providers for rendering a 2nd opinion.

This bill would also require an authorization or denial to be provided in an expeditious manner and would prescribe the conditions under which a second opinion must be rendered within 72 hours, would require that the plan or insurer file timelines for responding to requests for 2nd opinions, as described, by July 1, 2000, with the appropriate state agency, and would require that the timelines be made available to the public upon request. This bill would not apply to health care service plan contracts that provide benefits to enrollees through preferred provider contracting arrangements and that do not limit 2nd medical opinions, to disability insurers that do not limit 2nd medical opinions, or to certain other specialized types of health insurance.

By changing the definition of a crime regarding health care service plans, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 532 (AB 39) Hertzberg. Health care coverage: contraceptive drugs.

(1) Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, a willful violation of any of these provisions is punishable as either a felony or a misdemeanor.

Existing law requires that health care service plans provide coverage for certain benefits and services.

This bill would require every group health care service plan contract, and every individual health care service plan contract, amended, renewed, or delivered on or after January 1, 2000, except for a specialized health care service plan contract, to provide coverage, under terms and conditions applicable to other benefits, for a variety of federal Food and Drug Administration approved prescription contraceptive methods. This bill would authorize certain religious employers, as defined, to request a health care service plan contract without coverage for those contraceptive methods in certain circumstances.

By changing the definition of the crime applicable to health care service plans, this bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 533 (AB 55) Migden. Health care coverage: independent medical review.

Under existing law, the Knox-Keene Health Care Service Plan Act of 1975, health care service plans are regulated by the Department of Corporations. Existing law provides for the regulation of insurance, administered by the Commissioner of Insurance.

Existing law requires every health care service plan to establish and maintain a grievance system approved by the department under which enrollees and subscribers may submit their grievances to the plan. Under existing law, after participating for at

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

least 60 days in, or completing, the plan's grievance process, an enrollee or subscriber may submit the grievance or complaint to the department for review.

Existing law requires every health care service plan and disability insurer to establish a reasonable external, independent review process to examine coverage decisions regarding experimental or investigational therapies for individual enrollees or insureds who have a terminal condition and meet certain specified criteria.

This bill would require every health care service plan contract that is issued, amended, renewed, or delivered in this state on or after January 1, 2000, to provide an enrollee, effective January 1, 2001, with the opportunity to seek an independent medical review whenever health care services have been denied, modified, or delayed by the plan or by one of its contracting providers if the decision was based on a finding that the proposed services are not medically necessary. The bill would establish, commencing January 1, 2000, an independent medical review system whereby requests for reviews shall be conducted by an independent medical review organization, as specified. Under this bill, an enrollee would not pay any application or processing fee. The bill would require that the costs of the independent medical review process be paid by an assessment on health care service plans. The bill would enact other related provisions.

The bill would also provide for a similar independent medical review system to be established in the Department of Insurance for review of similar decisions by disability insurers.

Under existing law, a willful violation of the provisions governing health care service plans is a crime. By changing the definition of the crime applicable to these plans, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 534 (AB 88) Thomson. Health care coverage: mental illness.

Under existing law, a disability insurer or health care service plan may not discriminate based on race, color, religion, national origin, ancestry, marital status, or sexual orientation. A disability insurer or health care service plan is also prohibited from refusing to insure a person or from charging a different premium or rate because of that person's blindness.

This bill would require a health care service plan contract or disability insurance policy issued, amended, or renewed on or after July 1, 2000, to provide coverage for the diagnosis and medically necessary treatment of severe mental illnesses, as defined, of a person of any age, and of serious emotional disturbances of a child, under the same terms and conditions applied to other medical conditions. This bill would allow a health care service plan or disability insurer to provide the required mental health coverage through a separate specialized health care service plan or mental health plan subject to certain conditions, as specified. The bill would exempt from the provision relating to a health care service plan contract, a contract between the State Department of Health Services and a health care service plan for enrolled Medi-Cal beneficiaries. The bill would exempt certain insurance policies from these provisions.

Because a willful violation of the provisions relating to health care service plans is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 535 (AB 285) Corbett. Health care coverage: medical advice services.

Under existing law, the Knox-Keene Health Care Service Plan Act of 1975, health care service plans are regulated by the Department of Corporations. Under existing law, the willful violation of these provisions is a crime. Existing law also provides for the regulation of insurers by the Department of Insurance.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require every health care service plan, and every disability insurer that provides coverage for hospital, medical, and surgical expenses, that provides, operates, or contracts for telephone medical advice services to require that the staff employed to provide the services hold a valid license, registration, or certification, in any of specified health professions. The bill would require that a physician and surgeon be available to the telephone medical advice service on an on-call basis at all times the service is advertised to be available.

The bill would prohibit a health care service plan and certain disability insurers from operating, or contracting with an in-state or out-of-state telephone medical advice service to operate, a telephone medical advice service unless the service is registered as provided under the bill and if certain other conditions are met.

Existing law provides for the licensure, certification, or regulation of physicians and surgeons and other health care professionals by various boards under the jurisdiction of the Department of Consumer Affairs.

This bill would provide for the registration of telephone medical advice services with the department and would authorize the Director of Consumer Affairs to set fees for this purpose. The bill would prohibit, on and after January 1, 2000, an in-state or out-of-state business entity from providing telephone medical advice services to a patient at a California address unless the person is registered with the department.

The bill would also impose various related duties upon health care service plans and disability insurers, as well as the state agencies charged with their regulation.

Because this bill would change the requirements of health care service plans, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 536 (SB 21) Figueroa. Health care service plans: duty of care.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Commissioner of Corporations. Willful violation of those provisions is a crime.

This bill would require that a health care service plan or managed care entity, for services rendered on or after January 1, 2001, have a duty of ordinary care to provide medically appropriate health care service to its subscribers and enrollees where the health care service is a benefit provided under the plan.

The bill would make a health care service plan or managed care entity liable for any and all harm legally caused by the failure to exercise ordinary care in the arranging for the provision of, or denial of, health care services in specified circumstances.

The bill would set forth prohibitions regarding health care service plans or managed care entities seeking indemnity from the requirements of this provision and would make any provisions to the contrary in a contract with providers void and unenforceable. The bill would make any waiver of certain provisions in the bill contrary to public policy, unenforceable, and void.

This bill would also require that a person may not maintain a cause of action against a health care service plan unless he or she has exhausted the procedures provided by any applicable independent medical review system or independent review system, with certain exceptions. This provision would only become operative if SB 189 and AB 55 are enacted on or before January 1, 2000.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 537 (SB 5) Rainey. Health care benefits: breast cancer services.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Existing law provides for the licensure and regulation of disability insurers that cover hospital, medical, or surgical expenses by the Insurance Commissioner. Existing law provides that a willful violation of the law regulating health care service plans is punishable as either a felony or a misdemeanor.

Under existing law, every health care service plan contract and every group policy of disability insurance or self-insured employee welfare benefit plan that provides for the surgical procedure known as a mastectomy, that is issued, amended, delivered, or renewed in this state on or after July 1, 1980, is required to include coverage for prosthetic devices or reconstructive surgery, subject to specified conditions.

This bill would, instead, require health care service plan contracts, except specialized health care plan contracts, and certain policies of disability insurance providing coverage for hospital, medical, or surgical expenses, that are issued, amended, delivered, or renewed on or after January 1, 2000, to provide coverage for screening for, diagnosis of, and treatment for, breast cancer. The bill would prohibit the denial of enrollment or coverage solely due to a family history of breast cancer, or because of one or more diagnostic procedures for breast disease where breast cancer has not developed or been diagnosed. The bill would require coverage of screening and diagnosis of breast cancer consistent with generally accepted medical and scientific evidence upon the referral of an enrollee's or insured's participating physician.

Existing law provides that every individual or group health care service plan contract, individual or group policy of disability insurance, and self-insured employee welfare benefit plan that is issued, amended, or renewed after January 1, 1991, and that includes coverage for mastectomy and prosthetic devices and reconstructive surgery incident to mastectomy, shall be deemed to provide coverage for mammography for screening or diagnosis purposes upon referral by a participating nurse practitioner, participating certified nurse midwife, or participating physician.

This bill would, instead, provide that a health care service plan contract, except a specialized health care service plan contract, that is issued, amended, delivered, or renewed on or after January 1, 2000, shall be deemed to provide coverage for mammography for screening or diagnostic purposes upon referral by a participating nurse practitioner, participating certified nurse midwife, or participating physician, providing care to the patient and operating within the scope of practice provided under existing law. This bill would enact similar provisions applicable to every individual or group policy of disability insurance and self-insured employee welfare benefit plan.

Because a willful violation of the bill's provisions applicable to health care service plans would be a crime, this bill would impose a state-mandated local program by imposing a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 538 (SB 41) Speier. Disability insurance: contraceptive coverage.

Existing law governing disability insurance imposes certain requirements relating to coverage for certain benefits and services.

This bill would require certain individual and group policies of disability insurance that are issued, amended, delivered, or renewed on or after January 1, 2000, to provide coverage, under the same terms and conditions applicable to other benefits, for a variety of federal Food and Drug Administration approved prescription contraceptive methods, subject to exemption for religious employers, as specified.

Ch. 539 (SB 59) Perata. Health care coverage.

(1) Existing law provides for the regulation of health care service plans by the Department of Corporations and for the regulation of disability insurers by the Department of Insurance. Existing law requires a health care service plan to disclose the process used by the plan to authorize or deny health care services, to the Commissioner

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of Corporations, health care providers under contract with the plan, and enrollees, as specified, and establishes the criteria used by plans to determine whether to authorize or deny health care services. Existing law requires a health care service plan and a disability insurer to include within its disclosure form and evidence or certificate of coverage a statement describing how participation may affect the choice of physicians. Existing law provides that a willful violation of provisions regulating health care service plans is a crime.

This bill would instead require a health care service plan to disclose the process the plan, its contracting provider groups, or any entity with which the plan contracts for services, uses to authorize, modify, or deny health care services, to health care providers, enrollees, or to any other person or organization upon request, and would revise the criteria or guidelines used by plans, or any entities with which plans contract for utilization review or utilization management functions, to determine whether to authorize, modify, or deny health care services.

This bill would enact additional provisions applicable to a health care service plan and any entity with which it contracts for services, that prospectively, retrospectively, or concurrently reviews and approves, modifies, delays, or denies, based on medical necessity, requests by providers prior to, retrospectively, or concurrent with, the provision of health care services to enrollees or other specified entities. It would require that those decisions be made within specified timeframes. These provisions would not apply to certain decisions made for the care or treatment of the sick who depend upon prayer or spiritual means for healing in the practice of religion. The bill would also enact similar provisions applicable to a disability insurer that prospectively, retrospectively, or concurrently reviews and approves, modifies, delays, or denies, based on medical necessity, requests by providers prior to, retrospectively, or concurrent with, the provision of health care services to insureds, or other specified entities. It would require that those decisions be made within specified timeframes. Because a violation of the bill's requirements with respect to health care service plans would be a crime, this bill would create a state-mandated local program by creating a new crime.

This bill would also make legislative findings and declarations in this regard.

(2) Existing law provides for the Medi-Cal program to provide health coverage for low-income persons.

This bill would require the State Department of Health Services to develop a simple form to be used by Medi-Cal managed care plans in order to notify an enrollee of a denial, termination, delay, or modification in benefits, as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 540 (SB 64) Solis. Health insurance: management and treatment of diabetes.

(1) Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, a willful violation of any of these provisions is punishable as either a felony or a misdemeanor. Existing law provides for the regulation of policies of disability insurance administered by the Insurance Commissioner.

Existing law requires that health care service plans and disability insurers provide coverage for certain benefits and services. Existing law also requires that disability insurers offer coverage for diabetic day care self-management education programs.

This bill would require all policies and plans, except as specified, issued, amended, delivered, or renewed on and after January 1, 2000, that cover hospital, medical, or surgical expenses, to provide coverage for specified equipment and supplies for the management and treatment of diabetes as medically necessary. This bill would also require those policies and plans that cover prescription drugs to also include specified prescription medications for the treatment of diabetes if the items are determined to be medically necessary. It would also require all policies and plans to provide self-management training, education, and medical nutrition therapy in this regard.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Since a willful violation of the bill's coverage-related requirements with respect to health care service plans would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 541 (SB 148) Alpert. Health care coverage: phenylketonuria (PKU).

Existing law provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Willful violation of those provisions is a crime. Existing law also provides for the regulation of disability insurance by the Insurance Commissioner.

This bill would require, on and after July 1, 2000, every health care service plan contract, except a specialized health care service plan contract, and specified policies of disability insurance, issued, amended, delivered, or renewed in this state that provide coverage for hospital, medical, or surgical expenses, to provide coverage for the testing and treatment of phenylketonuria (PKU) under the terms and conditions of the plan or policy, as the case may be, as provided under the bill.

Since a violation of the provisions regulating health care service plans would be a crime, this bill would impose a state-mandated local program by expanding the scope of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 542 (SB 189) Schiff. Health care coverage: grievances: independent medical review.

(1) Under existing law, the Knox-Keene Health Care Service Plan Act of 1975, health care service plans are regulated by the Department of Corporations. Existing law separately provides for the regulation of insurance, including disability insurance, administered by the Commissioner of Insurance.

Existing law requires every health care service plan and disability insurer to establish a reasonable external, independent review process to examine coverage decisions regarding experimental or investigational therapies for individual enrollees or insureds who have a terminal condition and meet certain specified criteria.

This bill would revise this criteria to instead require that the enrollee or insured have a life-threatening or seriously debilitating condition.

(2) Existing law requires that the external, independent review of a health care service plan or disability insurer under these provisions meet certain criteria, including that the health care service plan or disability insurer contract with one or more impartial, independent, accredited entities which in turn are required to select an independent panel.

Existing law provides that the enrollee shall not be required to pay for the external, independent review and requires that the costs of the review be borne by the health care service plan or disability insurer.

This bill would require the Department of Corporations to contract with one or more impartial, independent, accredited entities for purposes of the external, independent review process, rather than the plan or insurer. The bill would require the plan or insurer to reimburse the department for costs associated with the contract.

(3) Existing law requires every health care service plan to establish and maintain a grievance system approved by the department under which enrollees and subscribers may submit their grievances to the plan. Under existing law, after participating for at least 60 days in, or completing, the plan's grievance process, an enrollee or subscriber may submit the grievance or complaint to the department for review.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require health care service plans to provide subscribers and enrollees with written responses to grievances, and would provide that a grievance may be submitted to the department by an enrollee or subscriber after participating in the plan's grievance process for 30 days. The bill would require the department to respond to each grievance in writing within 30 days.

(4) This bill would also include provisions which shall only become operative if AB 55 of the 1999–2000 Regular Session is enacted on or before December 31, 2000, and establishes a specified independent medical review system.

(5) Under existing law, a willful violation of the provisions governing health care service plans is a crime. By changing the definition of the crime applicable to these plans, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 543 (SB 205) Perata. Health coverage: cancer screening tests.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Under existing law, willful violation of any of these provisions is punishable as either a felony or a misdemeanor. Existing law also provides for the regulation of policies of disability insurance administered by the Insurance Commissioner.

Existing law requires health care service plans and disability insurers to provide coverage for certain benefits and services.

This bill would require that every health care service plan contract, except for a specialized health care service plan, and disability insurance policies or contracts, with specified exceptions, that cover hospital, medical, or surgical expenses, that are issued, amended, delivered, or renewed on or after July 1, 2000, be deemed to provide coverage for all generally medically accepted cancer screening tests, subject to all terms and conditions that would otherwise apply.

Since a willful violation of the provisions applicable to health care service plans is a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 544 (SB 349) Figueroa. Emergency services and care.

Existing law provides for the regulation of health facilities, including general acute care hospitals and acute psychiatric hospitals. For purposes of these provisions, existing law defines emergency services and care as medical screening, examination, and evaluation by a physician, or, to the extent permitted by applicable law, by other appropriate personnel under the supervision of a physician, to determine if an emergency medical condition or active labor exists and, if it does, the care, treatment, or surgery by a physician necessary to relieve or eliminate the emergency medical condition, within the capability of the facility.

This bill would define emergency services and care to include additional screening, examination, and evaluation by a physician, or other personnel to the extent permitted by applicable law and within the scope of their licensure and clinical privileges, to determine if a psychiatric emergency medical condition exists as provided under the bill. The bill would provide that this definition of emergency services and care shall not apply to services provided under managed care contracts with the Medi-Cal program to the extent those services are excluded from coverage under the contract.

This bill would state that these provisions defining emergency services and care are a clarification of the definition of emergency services and care and a clarification of an existing responsibility and not the addition of a new responsibility. This bill would also

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

provide that those provisions defining emergency services and care do not affect the scope of licensure or clinical privileges for clinical psychologists or other medical personnel.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans administered by the Commissioner of Corporations. Willful violation of any of these provisions is a crime.

Existing law requires a health care service plan to reimburse providers for emergency services and care provided to its enrollees until the care results in stabilization of the enrollee, except under certain conditions, and requires the health care service plan to assume responsibility for the care of the patient if there is a disagreement between the plan and the provider regarding the need for necessary medical care. For purposes of this provision, emergency services and care is as defined under the provisions governing health facilities.

This bill, as discussed above, would change the definition of emergency care and services. Since the willful violation of the provisions governing a health care service plan is a crime, this bill would impose a state-mandated local program by changing the definition of a crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 545 (SB 559) Brulte. Health care providers: preferred rates.

Existing law, the Knox-Keene Health Care Service Plan Act of 1975, provides for the licensure and regulation of health care service plans by the Department of Corporations. Under existing law, a willful violation of health care service plan requirements is a crime. Existing law also provides for the regulation of insurers by the Department of Insurance.

This bill, effective July 1, 2000, with respect to contracts providing for the payment of preferred reimbursement rates by payors for health care services rendered by health care providers, would impose certain disclosure and related requirements on contracting agents, as defined, who sell, lease, assign, transfer, or convey a list of contracting providers and their contracted preferred reimbursement rates to other payors or contracting agents. This bill would impose certain requirements on payors who seek to pay a preferred reimbursement rate, and would provide that the failure to comply with these requirements renders the payor liable to pay the nonpreferred rate, as specified. This bill would define "payor" for these purposes to generally include a health care service plan, a specialized health care service plan, a disability or liability insurer, a workers' compensation insurer, an employer, or any other 3rd party that is responsible to pay for health care services provided to beneficiaries by health care providers. This bill would enact other related provisions.

Because a willful violation of the bill's requirements with respect to health care service plans would be a crime, this bill would impose a state-mandated local program by creating a new crime.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 546 (AB 283) Longville. Highways: property acquisition: county cooperation.

Existing law authorizes a county board of supervisors, by resolution passed by a $^{4}/_{5}$ vote, to proceed to acquire any real property or interest that has been determined both to promote the interests of the county and to be necessary for state highway purposes, and is recommended by the Department of Transportation. Existing law authorizes the acquisition to be by eminent domain and provides that the specified resolution is the only preliminary procedure required prior to the commencement of condemnation proceedings.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, following the adoption of the resolution and based on that resolution, authorize the department to condemn the same property or interest that is described in both the resolution and the department's recommendation.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 547 (AB 390) Scott. Adoption assistance.

Existing law provides for the payment, by the State Department of Social Services and counties, of cash assistance to eligible families that adopt eligible children, and bases the amount of the payment on the needs of the child and the resources of the family to meet those needs.

Existing law specifies what county shall be responsible for determining a child's eligibility under the Adoption Assistance Program and for providing financial aid.

This bill would revise the responsibility of counties with respect to children relinquished for adoption prior to a determination of eligibility to make the county in which the relinquishing parent resides responsible for the eligibility determination and for providing financial aid.

This bill would revise the adoptive program eligibility standards and would revise the basis for determining the negotiated amount of the adoption assistance cash benefits. The bill would also revise references to renewal of the adoption assistance agreement to refer instead to a reassessment of the child's needs.

Existing law requires the department to determine when an adoption assistance overpayment has been made to an adoptive family when a child has not received services for which the adoption assistance benefits were authorized and to recover overpayment of adoption assistance benefits.

This bill would recast that requirement to specify that the adoption overpayments would result if the adoptive parents are no longer legally responsible for the support of the child, the child is no longer receiving support from the adoptive parents, or the adoptive family has committed fraud.

By increasing the responsibilities of counties, this bill would result in a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 548 (AB 1052) Jackson. Child Care Initiative Project.

Existing law establishes the California Child Care Initiative Project to expand the role and functions of resource and referral agencies to aid communities in increasing their capability in the number of child care spaces available and the quality of child care services offered. Existing law requires the Superintendent of Public Instruction to allocate all state funds appropriated for the California Child Care Initiative Project for the purpose of making grants to selected child care resource and referral agencies. Under existing law, the provisions establishing the project become inoperative on June 30, 2000, and, as of January 1, 2001, are repealed.

This bill would delete the repeal provision.

Ch. 549 (AB 1215) Thomson. Emergency medical services.

Existing law, the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act, requires the state Emergency Medical Services Authority to adopt, after approval of the commission, minimum standards for the training and scope of practice of an emergency medical technician-paramedic (EMT-P). Existing law requires that each application for licensure or licensure renewal of an EMT-P include the applicant's social security number to establish the applicant's identity and criminal convictions, if any.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require each application for licensure or licensure renewal to include one fingerprint card from all applicants and an additional fingerprint card from applicants who have not continuously resided in the state for the previous 7 years or when the authority has credible evidence that the applicant has a criminal history outside of California. The bill would require these latter fingerprints to be submitted to the Department of Justice to be forwarded to the Federal Bureau of Investigation. The bill would authorize the authority to charge a fee for services related to these fingerprinting and criminal record checks.

Under the Emergency Medical Services System and the Prehospital Emergency Medical Care Personnel Act, each county may designate an emergency medical services agency (local EMS agency) for the establishment and administration of an emergency medical services program in the county, administered by the medical director. Existing law sets forth several grounds under which the medical director, in accordance with regulations adopted by the authority, may deny, suspend, or revoke a certificate, or for which the medical director may place a certificate holder on probation.

This bill would revise this provision to authorize the medical director to deny, suspend, or revoke a certificate, or place a certificate holder on probation, in accordance with specified regulations.

The Administrative Procedure Act contains provisions governing the conduct of administrative adjudication and rulemaking proceedings of state agencies.

This bill would require the authority to ensure that the local EMS agency's disciplinary policies and procedures are at least as effective in protecting the due process rights of any EMT-I or EMT-II certificate holder as those in the Administrative Procedure Act and would require that proceedings of the authority against any EMT-P license or licenseholder be in accordance with the Administrative Procedure Act. Because this bill would increase the duties of the local EMS authority with regard to disciplinary policies and procedures, this bill would impose a state-mandated local program.

Existing law sets forth certain actions that subject an EMT-P to administrative sanctions.

This bill would add unprofessional conduct as provided under the bill to the list of actions that would subject an EMT-P to administrative sanctions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 550 (SB 275) Committee on Local Government. 1999 Local Agency Omnibus Act.

(1) Existing law provides that in order to be considered a legally qualified candidate for certain county and judicial offices, a person is required to file specified documents.

This bill would add to those offices requiring the filing of those documents the offices of county treasurer, county tax collector, and county treasurer-tax collector.

(2) Existing law authorizes a county board of supervisors to enact an ordinance adopting continuing education requirements for the office of county treasurer, county tax collector, or county treasurer-tax collector within the discipline of treasury management or public finance or both.

This bill would also permit the continuing education requirements to be within the disciplines of public administration, governmental accounting, or directly related subjects.

(3) Existing law requires the county treasurer to file with the county board of supervisors a monthly report of funds received and disbursed.

This bill would authorize a county auditor to file those reports if the county treasurer and county auditor have a written agreement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) Existing law requires the county auditor and the city treasurer to file a written report on or before September 1 each year with the Supplemental Law Enforcement Oversight Committee and the local governing body detailing and summarizing allocations from the county's or city's Supplemental Law Enforcement Services Fund, as applicable for the entire preceding year. Existing law requires local officials to hold a public hearing in September in each year that the Legislature appropriates money to the fund for the purpose of considering requests for money from the fund.

This bill instead would require the report to be filed on or before the date of the duly noticed public hearing.

(5) Existing law authorizes the legislative body of a city to impose appropriate and reasonable control of the use or appearance of neighboring private property within public view of places, buildings, structures, works of art, and other objects having a special character or special historical or aesthetic interest or value.

This bill would make corrective, technical changes in that provision.

(6) Under existing law, when the executive officer of a local agency formation commission determines that it is not feasible to hold a meeting of the special district selection committee for the purpose of selecting the special district representatives to the commission or for filling a vacancy, the executive officer may conduct the selection process by delivering the necessary papers, or sending them by certified mail, to each independent special district.

This bill would additionally authorize this selection process to be conducted by electronic mail.

(7) Existing law requires the executive officer of a local agency formation commission to mail a copy of the commission's resolution of its determinations concerning a proposed change of organization or reorganization to the chief petitioners, if any, each affected local agency whose boundaries would be changed, and the conducting authority.

This bill would authorize the executive officer to transmit the resolutions by electronic mail.

(8) Under existing law, when a local agency formation commission is requested to amend or reconsider a resolution making determinations, the deadline for filing certain actions is tolled during the time it takes the commission to act on the request.

This bill would toll the time for filing any action during the time it takes the commission to act on the request.

(9) Existing law specifies the proceedings necessary to form a community services district.

This bill would correct a technical error in that provision.

(10) Existing law requires that on or before October 1, the planning agency of each city or county shall annually report to its legislative body, the Office of Planning and Research, and the Department of Housing and Community Development on the status of its general plan and progress in its implementation.

This bill would correct an obsolete cross-reference in that provision.

(11) Existing law authorizes cities and counties to adopt zoning ordinances including content neutral zoning ordinances, regulating the time, place, and manner of operation of sexually oriented businesses, subject to specified conditions.

This bill would make a technical nonsubstantive change to those provisions.

(12) Under existing law, the failure of a development project applicant to submit complete or adequate information under the Permit Streamlining Act may be grounds for disapproving the project.

This bill would correct an obsolete cross-reference in that provision.

(13) Existing law permits cities and counties to establish fees for processing tentative, final, and parcel subdivision maps and related procedures.

This bill would correct obsolete cross-references in that provision.

(14) Under existing law, the legislative body of a city or county is required to provide specified notice of a pending approval or disapproval of a final subdivision map by the official to whom that authority has been delegated.

This bill instead would require that the notice be given by the clerk of the legislative body.

(15) Existing law specifies the time period for which rights exist that are conferred by a vesting tentative map.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would correct obsolete cross references to that provision in other provisions of the Subdivision Map Act.

(16) Under existing law, in any year that the net county benefit for Ventura County between the property taxes allocated to cities by the county and the state money received by the county under the Trial Court Funding Program is less than $5,262,500, the county receives a special subvention from vehicle license fee revenues.

This bill instead would establish a subvention of vehicle license fee revenues to Ventura County equal to 60% of the property tax revenue allocated to no and low property tax cities.

(17) Existing law provides for the establishment of the Ventura Regional Sanitation District, and further provides that the board of directors shall be the governing board of the district. Existing law also provides for an independent special district committee, composed of the presiding officers of specified independent special districts.

This bill would redesignate the independent special district committee as the special district committee, and would revise the membership requirements for that committee.

(18) Existing law requires the State Fire Marshal to adopt regulations and standards on or before September 1, 1999, to control the quality and installation of burglar bars and safety release mechanisms and prohibits, on and after October 1, 1999, the installation, marketing, distribution, offer for sale, or sale of those items if they have not been approved by a testing laboratory recognized by the State Fire Marshal.

This bill would specify that the burglar bars and safety release mechanisms are for emergency escape/rescue windows or doors, require that the regulations be adopted on or before January 1, 2000, and provide that the prohibition against unapproved items shall commence on July 1, 2000.

(19) The Fire Protection District Law requires fire districts to adopt budgets conforming to specified state regulations.

This bill would correct an obsolete reference to those regulations.

(20) Existing law authorizes the cancellation of property taxes and special taxes imposed to pay for bonds in certain situations where the property was acquired by a city through foreclosure.

This bill would also permit these procedures for tax cancellation to be applied to property acquired through foreclosure by counties, cities and counties, special districts, school districts, and joint powers agencies.

(21) Existing law generally requires those agencies affected by a proposed jurisdictional change to negotiate, in accordance with specified procedures, an exchange of property tax revenues to reflect the changes in service area obligations that will result from the jurisdictional change. The process of negotiation, mediation, and arbitration concludes no more than 150 days after the initiation of proceedings for the jurisdictional change before the local agency formation commission.

This bill instead would require negotiation, mediation, and arbitration to be concluded no more than 150 days after the auditor provides specified property tax information to the local agencies.

(22) This bill would declare that it is to take effect immediately as an urgency statute but would also provide that all but specified provisions of the bill shall become operative on January 1, 2000.

Ch. 551 (SB 516) Haynes. Needy families: job training.

Existing law implements federal welfare-to-work grant program provisions provided pursuant to the federal Balanced Budget Act of 1997 (P.L. 105-33). Existing law requires the Employment Development Department to distribute 85% of these federal grant funds to private industry councils or alternate local administrative entities designated by the Governor, as specified, and to distribute the remaining 15% of these federal funds, at the direction of the Governor, to state and local projects that will assist in moving eligible program participants into unsubsidized employment.

Existing law requires that those remaining 15% of federal funds be distributed to employers, private nonprofit organizations, and for-profit and public entities, and that proposals submitted for state and local projects include, at a minimum, comments by the local private industry council or alternate local administrative entity, and the county welfare department, for a stated purpose.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would delete the references to "at a minimum" in the requirement that proposals submitted for state and local projects include comments by the local private industry council or alternate local administrative entity, and the county welfare department, and would provide for an exception to that requirement if one of those entities is an applicant for grants under those provisions.

This bill would require the Employment Development Department and the State Department of Social Services, for purposes of fully implementing this program and the CalWORKs program, to initiate, by July 1, 2000, the adoption of regulations interpreting a specified provision of federal law regarding state options in connection with the provision of welfare services by charitable, religious, or private organizations.

Ch. 552 (SB 543) Bowen. Children: psychotropic medication: foster care.

Existing law requires that the case plan of a child when he or she is placed in foster care, to the extent available and accessible, include the health and education records of the child, as specified. Existing law requires that at the time a child is placed in foster care the child's health and education records be reviewed and updated and supplied to the foster parent or foster care provider with whom the child is placed.

This bill would revise these provisions by requiring the case plan for each child and specified court reports and assessments to include a health and education summary, as specified, for each child. The bill would require the child protection agency to provide the caretaker with a current summary, as specified. The bill would also require the child's caretaker to maintain information regarding the minor's health and education, and would require the child protection agency or its designee to inquire of the caretaker whether there is any new information to be added to the child's summary. The bill would also require the court, at the initial hearing, to direct each parent to provide the child protective agency complete health and education information, including specified information regarding the child's parents. To the extent that these requirements would increase the duties of local public employees, this bill would impose a state-mandated local program.

This bill would also provide that if a child is adjudged a dependent child of the juvenile court and the child is taken from the physical custody of the parent, only a juvenile court judicial officer shall have authority to make orders regarding the administration of psychotropic medications for that child, except that juvenile court may issue a specific order delegating this authority to a parent upon making findings on the record that the parent poses no danger to the child and has the capacity to authorize psychotropic medications. The bill would also authorize a court to permit the administration of psychotropic medication to the child only as specified, and would require the Judicial Council to adopt rules of court and develop appropriate forms for these purposes on or before July 1, 2000. It would also provide, however, that these provisions do not supersede local court rules regarding a minor's right to participate in mental health decisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 553 (AB 279) Wayne. Workers' compensation: failure to pay compensation.

Existing law governing workers' compensation requires every employer except the state to secure the payment of compensation in one or more of several specified ways, including the procurement of workers' compensation insurance.

Existing law makes it a misdemeanor, punishable by imprisonment in the county jail not to exceed 6 months, or by a fine of $1,000, or both for an employer to fail to secure the payment of compensation when the employer knew, or because of his or her knowledge or experience should be reasonably expected to have known, of the obligation to secure the payment of compensation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would instead make the willful failure to secure the payment of compensation a misdemeanor, punishable by either a fine of up to $10,000 or imprisonment in the county jail not to exceed one year, or both. By changing the definition of, and increasing the punishment for, a crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 554 (AB 633) Steinberg. Labor: garment manufacturing.

Existing law requires every person engaged in the business of garment manufacturing, as defined, to register with the Labor Commissioner and to pay an initial registration fee of $150 and an annual renewal fee of $100. Existing law imposes certain other requirements on garment manufacturers, and provides for administration and enforcement of the garment manufacturing provisions by the Labor Commissioner.

This bill would substantially revise the existing law on state regulation of garment manufacturing. The bill would revise the definition of garment manufacturing to authorize the Department of Industrial Relations to adopt regulations to include additional operations and practices in the apparel industry that are consistent with the garment manufacturing registration provisions. The bill would also authorize the department to adopt and amend regulations to clarify and refine that statutory definition. The bill would add a new definition of "contractor" and revise the definition of "person." The bill would revise the existing law for setting the registration and renewal fees for persons in garment manufacturing to require the fees to be set in the aggregate to recover costs of administration of the law and to be based on an applicant's annual volume, but to be not less than $250 nor more than $1,000, in the case of a contractor, or $2,500, in the case of other registrants.

Existing law requires the commissioner to deposit $25 of each registrant's annual registration fee into a separate account and requires that the funds in the separate account be disbursed only to persons damaged by a registrant where damages exceed the limits of a registrant's bond.

This bill would increase the amount of each registrant's annual registration fee deposited into the separate account to $75, thereby making an appropriation. The bill would revise these provisions to authorize the commissioner to disburse the funds to persons damaged by failure of a garment manufacturer, jobber, contractor, or subcontractor to pay wages or benefits. The bill would provide that a person engaged in garment manufacturing who contracts with an unregistered or unbonded person for garment manufacturing shall be deemed an employer of the contractor's employees and shall be jointly liable with the contractor for the payment of wages to the contractor's employees, and would specify the process by which this liability may be enforced.

Nothing in existing law makes garment manufacturers liable for guaranteeing payment of wages to employees of their contractors.

This bill would impose that liability to the extent of requirements for payment of the minimum wage and overtime compensation. The bill would prescribe a claims procedure by which an aggrieved employee may enforce a claim for unpaid wages against the contractor and the garment manufacturer contracting with the contractor. The bill would require the Labor Commissioner to investigate these claims, hold meet-and-confer conferences and hearings, and issue decisions and awards, as specified. The bill would also authorize the Labor Commissioner to enforce this guarantee in the same manner as proceeding against the employer, with or without a complaint being filed, subject to the procedures specified in the bill. The bill would authorize the Labor Commissioner to revoke the registration of any garment manufacturer that fails to pay a wage award issued pursuant to the bill. The bill would make the successor of a garment manufacturer primarily engaged in sewing or assembly of garments for other persons, and that owes wages, also liable for payment of those wages under specified circumstances, but this provision would not apply to the wage guarantee obligation established by the bill. The bill would make conforming related changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes the Division of Labor Standards Enforcement of the Department of Industrial Relations to confiscate any garment or wearing apparel assembled or partially assembled by a person who has not complied with the garment manufacturing registration requirements and requires the division to notify the manufacturer and contractor of the removal and the location of the confiscated goods.

This bill would, with a specified exception, authorize the division to confiscate the means of production, including equipment and property, from unregistered garment manufacturers if the garment manufacturer is a contractor that has been subject to a previous confiscation within the prior 5 years. The bill would require the proceeds of sales of the equipment or property to be deposited into a Back Wages and Taxes Account, which the bill would create in the General Fund, and would authorize the Labor Commissioner, upon appropriation, to use moneys in the account to pay back wages owed to garment workers and taxes.

Existing law does not make the successor, to an employer primarily engaged in sewing or assembly of garments for other persons engaged in the business of garment manufacturing, liable for unpaid wages owed to the predecessor's employees.

This bill would impose that liability under prescribed conditions.

Ch. 555 (SB 400) Ortiz. Public Employees' Retirement System: benefits.

(1) Under the Public Employees' Retirement Law, retirement allowances for school members are calculated, in part, based on the highest average compensation earnable during a consecutive 3-year period.

This bill would instead base that calculation on the highest average compensation earnable during a consecutive 12-month period.

(2) The Public Employees' Retirement Law defines "state peace officer/firefighter" in terms of employees employed by specified state departments in specified job classifications and provides higher retirement benefit formulas and higher employer and employee contribution rates for state peace officer/firefighter members than for state miscellaneous members.

This bill would add the Sergeants-at-Arms of each house of the State Legislature, excluding the Chief Sergeant-at-Arms, within the state peace officer/firefighter membership category.

(3) The Public Employees' Retirement Law establishes retirement formulas, known as the Second Tier and the modified First Tier, that are applicable to specified members of the system.

This bill would provide that state miscellaneous and state industrial members hired or returning to state service, as specified, on or after January 1, 2000, shall be subject to First Tier benefits unless they elect to be subject to Second Tier benefits; authorize members subject to Second Tier benefits to elect to become subject to First Tier benefits and contribution rates, thereby making an appropriation; and provide that members subject to modified First Tier benefits shall become subject to First Tier benefits, as specified. The bill would also establish the means for members subject to Second Tier benefits, who are employed by the state on or after January 1, 2000, to elect to have their former Second Tier service converted to First Tier service.

(4) The Public Employees' Retirement Law prescribes a 2% at age 60 retirement formula for state miscellaneous, university, state industrial and school members.

This bill would make that formula inapplicable to those members employed by the state on or after January 1, 2000, except as specified, and would instead prescribe a 2% at age 55 retirement formula, as specified. The bill would also provide a 1 to 6%, inclusive, retirement allowance increase for certain retired state and school members, as specified, and make related technical changes.

(5) The Public Employees' Retirement Law prescribes a 2% at age 50 retirement formula for members of the California Highway Patrol and specified local safety members, a 2.5% at age 55 retirement formula for state peace officer/firefighter members and specified local safety members, and a 2% at age 55 retirement formula for state safety members and specified local safety members, all subject to maximum benefit limitations based on specified percentages of final compensation.

This bill would make those formulas inapplicable to those state members who are employed by the state on or after January 1, 2000, and would instead prescribe a 3% at

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

age 50 retirement formula for members of the California Highway Patrol and a 3% at age 55 for state peace officer/firefighter members and certain local safety members, as specified; provide an enhanced retirement formula for state safety members, as specified; and make related technical changes. The bill would also modify the maximum benefit limitations, as specified.

(6) The Public Employees' Retirement Law, as amended by Chapter 3 of the Statutes of 1999, provides preretirement death benefits for the surviving spouse or children, or both, as specified, of state members and specified school members not covered by the federal Social Security Act and provides that a surviving spouse becomes eligible for certain of these benefits when he or she attains the age of 62 years and meets other specified criteria.

This bill would decrease the surviving spouse's eligibility age to 60 years, would modify the method for funding these benefits, and would repeal these benefits on January 1, 2010.

(7) The bill would provide that the operation and application of certain of its provisions would be subject to specified conditions and limitations.

(8) This bill would incorporate additional changes to Sections 20391, 20677, 21337, 21362, 21363, 21369, 21572, 21573, and 21581 of the Government Code proposed by AB 99, AB 232, AB 813, SB 234, SB 339, SB 800, and SB 401, as applicable, to take effect if this bill and those bills, as specified, are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 556 (AB 555) Reyes. Farm labor vehicles.

(1) Under existing law, all vehicles used by a farm labor contractor, as defined, for the transportation of individuals in his or her operation as a farm contractor, and not owned by that contractor, are required to be registered with the Labor Commissioner.

This bill would expand the scope of this registration requirement to include all farm labor vehicles used for the described purposes. The bill would require the Labor Commissioner, commencing on April 1, 2000, to quarterly provide the Commissioner of the California Highway Patrol with a listing of all registered vehicles. The bill would delete a requirement in existing law that a farm labor contractor using a vehicle not owned by that contractor do so only on a fixed fee basis and not upon a rental based upon a percentage of that contractor's earnings.

(2) Existing law requires the Department of the California Highway Patrol to adopt regulations designed to promote the safe operation of farm labor vehicles, as described, including, vehicular design, equipment, passenger safety, and seating. Existing law also prohibits any person from driving any farm labor vehicle, as described, unless there is displayed therein a specified certificate issued by the department stating, among other things, that the vehicle complies with applicable regulations relating to construction, design, and equipment.

This bill would impose upon the owner of the farm labor vehicle and a farm labor contractor, under described circumstances, the responsibility of these inspection requirements. The bill would prohibit the operation of a farm labor vehicle by the owner or the farm labor contractor, under described circumstances, without the issuance of the certificate.

The bill would prohibit any person from operating a farm labor vehicle on a highway unless both headlamps required under existing law are lighted, regardless of the time of day.

Because a violation of these provisions would be a crime, the bill would impose a state-mandated local program.

The bill would require the department, in cooperation with county and local farm bureaus, to provide a program to educate growers and farmers and farm labor vehicle owners and drivers regarding farm labor vehicle certification requirements, including certification requirements for farm labor vehicle drivers.

(3) Existing law makes it a misdemeanor for any person to operate a farm labor vehicle in violation of specified provisions of law punishable by a $500 nonsuspendable fine if the violation was willfully committed.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would increase the described fine for willful violations to $1,000 and would additionally impose a $500 nonsuspendable fine for each passenger in the vehicle not to exceed a total fine of $5,000 for each violation.

The bill would expand the definition of the specified crime to include an owner or farm labor contractor who knowingly allows the operation of a farm labor vehicle when the person should have known of the violation, and thereby would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 557 (AB 1165) Florez. Farm labor vehicles: safety belts.

(1) Existing law requires the registration card for a vehicle to contain, on its face, the date issued, the name and residence address or business address of the owner and of the legal owner, if any, and certain vehicle identification information.

This bill, additionally, would require the vehicle registration card of every farm labor vehicle, as defined, to contain the words, "Farm Labor Vehicle," in conjunction with the vehicle identification information.

The bill would prohibit the department from issuing or renewing the registration of a farm labor vehicle unless the owner of the vehicle has provided the department with verification, as specified, that the farm labor vehicle inspection described below has been performed.

(2) Existing law prohibits any person from operating a motor vehicle, as defined, on a highway unless that person and all passengers 16 years of age or over are properly restrained by a safety belt.

This bill would expand the definition of "motor vehicle," for purposes of the safety belt provision, to include a farm labor vehicle, and would thereby impose a state-mandated local program by expanding the definition of a crime.

(3) Existing law requires the Department of the California Highway Patrol to adopt regulations designed to promote the safe operation of farm labor vehicles relating to vehicular design, equipment, passenger safety, and seating. The department is required to inspect every farm labor vehicle at least once annually to ascertain whether its construction, design, and equipment comply with all provisions of law.

This bill would require the department to develop, by regulations, specifications for a specified display sticker to be displayed on every farm labor vehicle, and would require those regulations to require every owner or operator of a farm labor vehicle to request the scheduling of the specified inspection, for a farm labor vehicle that has a current inspection certificate, not later than 4 weeks prior to the expiration date of the certificate, and for initial inspections, not later than 3 business days prior to the requested inspection date. The bill would prohibit the owner or operator of a farm labor vehicle from operating that vehicle without the proper certification requirements.

The bill would require that, on or before May 1, 2000, every farm labor vehicle issued an inspection certificate, as specified, between October 1, 1998, and October 1, 1999, be equipped at each passenger position with a seat belt assembly conforming to specified federal regulations.

The bill would prohibit the department, on or after October 1, 1999, from issuing an initial inspection certificate, as specified, to any vehicle that is not equipped with the required seatbelt assembly at each passenger position.

The bill would require the owner of a farm labor vehicle to maintain all required seatbelt assemblies and seatbelt assembly anchorages in good working order for the use of passengers.

The bill would prohibit any person from operating a farm labor vehicle on a highway unless that person and all passengers are properly restrained by a seatbelt assembly that conforms to these provisions.

The bill would require the department to adopt regulations to implement these provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Because a violation of these provisions would be a crime, the bill would impose a state-mandated local program.

The bill would require the department to develop an "800" telephone number system to facilitate public reporting of violations of specified provisions relating to farm labor vehicles, and to publicize the number, as specified.

(4) The bill also would require the department to prepare and submit to the Legislature on specified dates reports that evaluate the implementation of this bill and the effectiveness of its provisions in improving the safety of farm labor vehicles.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(6) The bill would appropriate $1,750,000 from the Motor Vehicle Account in the State Transportation Fund to the Department of the California Highway Patrol for the purpose of increasing the number of special California Highway Patrol officers charged with enforcing laws prohibiting illegal transportation of agricultural workers, including enforcement of the requirement that farm labor vehicles be equipped with safety belts.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 558 (SB 1011) Polanco. Unemployment compensation benefits: extension: freezing weather.

Existing law provides unemployment compensation benefits for qualified eligible unemployed individuals of a maximum of 26 times the individual's weekly benefit amount, as defined. It also provides extended unemployment compensation benefits for qualified eligible individuals who had specified earnings and provides federal-state extended unemployment compensation benefits for qualified eligible individuals who had specified earnings.

This bill would provide extended unemployment compensation benefits, with respect to claims made on or before July 31, 2000, for an additional 26 times an individual's weekly benefit amount for any qualified eligible unemployed individual who has been laid off from work, is unable to commence work, or is otherwise unemployed as a direct result of freezing weather conditions which occurred in this state in December 1998 when an individual has exhausted or is otherwise ineligible for other state or federal unemployment compensation benefits, as specified. It would provide that in the event an individual becomes eligible for federal-state extended unemployment compensation benefits prior to August 8, 1999, that individual shall become ineligible for extended unemployment compensation benefits under these provisions to the extent he or she is eligible for and receives federal-state extended unemployment benefits. Unemployment compensation benefits are paid from the Unemployment Fund, a continuously appropriated fund, and thus by providing additional benefits, this bill would make an appropriation.

This bill would also allow an eligible individual to use an alternative base period, as specified, to calculate benefits for certain claims on or after August 8, 1999. It would provide that the provisions of the bill concerning an alternative base period shall be inapplicable in the event that the Director of the Employment Development Department makes a determination, after a public hearing, that the earning levels of freeze-affected individuals have not been significantly reduced as a result of freeze-related unemployment, layoffs, or underemployment during the 1999 calendar year.

This bill would also make certain legislative findings and declarations with respect to the severe freezing conditions which occurred in California.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 559 (SB 798) Burton. Highways: relinquishment: Route 101.

(1) Existing law requires the California Transportation Commission to relinquish to any city or county any portion of any state highway within the city or county that has been deleted from the state highway system by legislative enactment.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would relinquish to the City and County of San Francisco (city) a specified portion of State Highway Route 101 and would specify that the Department of Transportation retains jurisdiction over another specific portion of Route 101.

The bill would require the city to utilize any proceeds from the disposition or use of excess right-of-way for the purpose of designing, constructing, developing, and maintaining the Octavia Street Project, as defined, until the city's share of the costs of that project are paid in full or funded from other sources. The bill would impose specific duties on the city and the department with regard to implementing the Central Freeway Replacement Project, as defined.

Because the bill would require the city to undertake certain duties with respect to the Central Freeway Replacement Project, the bill would impose a state-mandated local program.

The bill would require the department to follow certain procedures if an alternative to the Octavia Street Project is adopted by the voters in the general municipal election of November 1999.

The bill would set forth certain related legislative findings.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 560 (SB 227) Alpert. Water quality: nonpoint source pollution.

The Porter-Cologne Water Quality Act governs the coordination and control of water quality in the state, and includes provisions relating to nonpoint source pollution. The California Coastal Act of 1976 imposes certain restrictions on development in the coastal zone of the state. The California Coastal Commission, pursuant to the coastal act, has specified duties with regard to the federally approved California Coastal Management Program.

This bill would require the State Water Resources Control Board, on or before February 1, 2001, and in consultation with the regional boards, the California Coastal Commission, and other appropriate state agencies and advisory groups, as necessary, to prepare a detailed program for the purposes of implementing the state's nonpoint source management plan, as specified. The bill would require the state board, on or before August 1 of each year, and in consultation with the commission and other appropriate agencies, to submit to the Legislature and make available to the public, copies of prescribed state and regional board reports that contain information related to nonpoint source pollution and that the state or regional boards were required to prepare in the previous fiscal year and a summary of the information set forth in those reports, as specified.

Ch. 561 (AB 59) Cedillo. Elder or dependent adults: abuse: protective orders.

(1) Existing law sets forth procedures under which a person who has suffered harassment or an employer whose employee has suffered unlawful violence or a credible threat of violence from an individual may seek a temporary restraining order and an injunction and under which protective orders to prevent domestic violence may be ordered. Under existing law, any intentional and knowing violation of these orders is a misdemeanor.

This bill would make any intentional or knowing violation of the protective orders authorized by this bill as described in (2) a misdemeanor. Because the bill would create a new crime, it would impose a state-mandated local program.

(2) Existing law authorizes the award, by courts, of attorney's fees and costs where it is proven by clear and convincing evidence that a defendant is liable for abuse of an elder or dependent adult, and that the defendant has been guilty of recklessness, oppression, fraud, or malice in the commission of the abuse.

This bill would set forth procedures under which an elder or dependent adult in immediate and present danger of abuse may seek protective orders.

(3) Existing law, contained in the Domestic Violence Prevention Act, authorizes a judicial officer to issue an ex parte emergency protective order when a law enforcement

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

officer asserts reasonable grounds to believe that an immediate and present danger exists for domestic violence or abduction of a child. The act also authorizes the court to issue a protective order, as defined, either ex parte or after a hearing, to restrain any person to prevent a recurrence of domestic violence.

This bill would revise the grounds for the issuance of an ex parte emergency protective order to include circumstances in which an elder or dependent adult in an immediate and present danger of abuse and would limit those grounds with respect to financial abuse to circumstances in which law enforcement asserts reasonable grounds to believe that physical or emotional harm would otherwise result to the petitioner.

Existing law authorizes an emergency protective order to include certain specific orders.

This bill would revise the scope of the orders that may be included in an emergency protective order respecting elder and dependent adults.

(4) Existing law requires the Department of Justice to maintain a Domestic Violence Protective Order Registry, as specified.

This bill would include the issuance of a protective order issued for the protection of an elder or dependent adult who has suffered abuse within the scope of those orders for which the Department of Justice is required to be notified immediately.

By expanding the duties of the law enforcement personnel in reporting the orders to the Department of Justice, this bill would result in a state-mandated local program.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

This bill would incorporate additional changes in Section 6380 of the Family Code, proposed by AB 825, to be operative only if AB 825 and this bill are both chaptered and become effective January 1, 2000, and this bill is chaptered last.

This bill would incorporate additional changes in Section 273.6 of the Penal Code, proposed by SB 218, to be operative only if SB 218 and this bill are both chaptered and become effective January 1, 2000, and this bill is chaptered last.

Ch. 562 (AB 72) Florez. State Highway Route 46: emergency improvements.

Existing law requires the Department of Transportation to improve and maintain the state highways.

This bill would require the Director of Transportation, on or before January 15, 2000, to submit a report to the Legislature identifying emergency improvements involving either negligible or no expansion of highway capacity, that may be constructed prior to specified scheduled improvements, with the intent to prevent or mitigate an emergency situation on a specified portion of State Highway Route 46.

The bill would provide that an emergency improvement identified pursuant to the bill may not result in the delay of, or have an adverse impact on, projects that are scheduled in the state transportation improvement program or a regional transportation improvement program outside the jurisdiction of the Kern County Regional Transportation Agency or in the State Highway Operations Pavement Protection Program. The provisions of the bill would be repealed on June 1, 2001.

Ch. 563 (AB 140) Hertzberg. Prevention of terrorism.

Existing law proscribes various acts of terrorism.

This bill would enact the Hertzberg-Alarcon California Prevention of Terrorism Act to make it a crime for any person, with specified exceptions, to possess, develop, manufacture, produce, transfer, acquire, or retain any weapon of mass destruction, as defined. The bill would also penalize the use of a weapon of mass destruction against a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

person, an animal, the food or water supply, crops, or public natural resources; and the knowing threat to use, with specified intent, or attempt to develop or use, a weapon of mass destruction. With specified exceptions, the bill would furthermore make it a crime to possess restricted biological agents, as defined. The bill would require a peace officer who encounters any of the restricted biological agents to immediately notify and consult with a local public health officer to ensure proper consideration of any public health risk. By creating new crimes and expanding the duties of local peace officers and public health officers, this bill would impose a state-mandated local program.

The bill would also make it a crime, punishable as either a felony or a misdemeanor, for any person to knowingly threaten to use a weapon of mass destruction, as specified, and resulting in an isolation, quarantine, or decontamination effort. By creating a new crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 564 (AB 157) Reyes. Crime prevention.

Existing law authorizes the County of Tulare to develop within a specified period the Rural Crime Prevention Demonstration Project to be administered by the county district attorney's office pursuant to a joint powers agreement with the county sheriff's office for a 3-year period. The parties to the agreement are required to establish a rural crime task force that is required to develop crime control techniques, encourage timely reporting of crimes, and evaluate the results of these activities. The staff for the project is selected by the sheriff and the district attorney as specified. The provisions authorizing the project are repealed as of January 1, 2000.

This bill would instead declare that the County of Tulare has developed the above-named project and that the parties to the agreement have formed a task force. The bill would authorize the Counties of Tulare, Fresno, Kern, Kings, Madera, Merced, San Joaquin, and Stanislaus to develop the Rural Crime Prevention Program, modeled on the above-described Rural Crime Prevention Demonstration Project, as specified. The bill would provide that it is the intent of the Legislature that the $3,541,000 appropriated in the Budget Act of 1999 for the purposes of this program be allocated among the counties, as specified. The bill would further provide that the Legislative Analyst shall, by December 31, 2000, prepare and submit to the Legislature a detailed cost-benefit analysis of the entire program, and that $100,000 shall be appropriated for this purpose. The bill would further provide that the title shall become inoperative on June 30, 2000, and that provisions authorizing the program shall be repealed as of January 1, 2001.

Ch. 565 (AB 180) Havice. International trade: public-private trade development organizations.

Existing law provides that the Trade and Commerce Agency shall be the principal state agency to, among other things, respond to inquiries and provide statistics on the economy, visitor attractions, and international trade.

This bill would, to the extent funds are made available for this purpose, require the agency to work to develop a statewide alliance of public-private trade development organizations, if determined to be feasible by the agency. The organizations would be authorized to undertake specified tasks in the development of trade opportunities in the state, under the leadership of the agency. The bill would authorize the agency to adopt regulations concerning implementation of these provisions. The bill would also require the Secretary of Trade and Commerce to report to the Governor and the Legislature on the implementation of these provisions no later than December 31, 2001.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 566 (AB 208) Knox. Murder: punishment.

(1) Existing law provides that the penalty for a defendant who is found guilty of murder in the first degree is death, imprisonment in the state prison for life without the possibility of parole, or imprisonment in the state prison for a term of 25 years to life. If one or more special circumstances is found to be true, a defendant who is found guilty of murder in the first degree shall be punished by death or imprisonment in the state prison for life without the possibility of parole.

Existing law also provides that the penalty for first degree murder is imprisonment in the state prison for life without the possibility of parole if (1) the victim is the operator or driver of a public transportation vehicle used for the transportation of persons for hire or a station or ticket agent for the entity providing this transportation, (2) the victim was intentionally killed while engaged in the performance of his or her duties, (3) the defendant knew or reasonably should have known that the victim was a person so engaged, and (4) a special circumstance to this effect has been charged and found to be true.

This bill would provide that the penalty for a defendant who is found guilty of murder in the first degree is imprisonment in the state prison for life without the possibility of parole if the victim was intentionally killed because of the victim's disability, gender, or sexual orientation or because of the defendant's perception of the victim's disability, gender, or sexual orientation, and this allegation has been charged and found to be true. The bill would prohibit the court from striking that allegation, except in the interest of justice, and would require the court to state its reasons in writing for doing so. By defining an additional circumstance that would be punishable by life imprisonment without the possibility of parole, this bill would impose a state-mandated local program.

(2) Existing law, with regard to so-called hate crimes, prescribes various punishments for criminal acts committed "because of" a person's race, color, religion, ancestry, national origin, disability, gender, or sexual orientation. Existing law, as interpreted by the California Supreme Court, further provides that the phrase "because of," as used in hate crime statutes, means the bias motivation must have been a cause in fact of the offense, and that when multiple concurrent causes exist, the bias motivation must have been a substantial factor in bringing about the offense.

This bill would define "because of" for purposes of the provision described in (1) to conform with the decisions of the California Supreme Court and would provide that the definition is declaratory of existing case law.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 567 (AB 236) Honda. Property tax revenue allocations: Counties of Santa Barbara and Santa Clara.

Existing property tax law provides for the annual allocation of property tax revenues in each county in accordance with property tax revenue apportionment factors that are determined for each recipient jurisdiction in accordance with a specified formula.

This bill would, except as otherwise specified, deem to be correct those property tax revenue apportionment factors that were applied in allocating property tax revenues in the County of Santa Clara for the Santa Clara County Central Fire Protection District for each fiscal year from the 1988–89 fiscal year through the 1996–97 fiscal year. The bill would also deem correct those property tax apportionment factors that were applied in allocating property tax revenues for specified fire protection districts in the County of Santa Barbara for the 1993–94 fiscal year through and including the 1996–97 fiscal year. This bill would, however, require property tax revenue apportionment factors applied in allocating property tax revenue in the Counties of Santa Barbara and Santa Clara for the 1997–98 fiscal year, and each fiscal year thereafter, to be determined on the basis of property tax revenue apportionment factors for prior fiscal years that have been corrected or adjusted as would be required if those prior apportionment factors had not been deemed correct by this bill.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing property tax law requires the county auditor, in each fiscal year, to allocate property tax revenue to local jurisdictions in accordance with specified formulas and procedures, and generally requires that each jurisdiction be allocated an amount equal to the total of the amount of revenue allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, and that jurisdiction's portion of the annual tax increment, as defined. Existing property tax law also reduces the amounts of ad valorem property tax revenue that would otherwise be annually allocated to the county, cities, and special districts pursuant to these general allocation requirements by requiring, for purposes of determining property tax revenue allocations in each county for the 1992–93 and 1993–94 fiscal years, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance with certain formulas. It requires that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund in that county for allocation to school districts, community college districts, and the county office of education.

This bill would deem to be correct those transfers to the Educational Revenue Augmentation Fund of the County of Santa Clara made by specified fire districts in that county for each fiscal year through the 1996–97 fiscal year. This bill would, however, require property tax apportionment factors applied in allocating property tax revenue to these districts for the 1997–98 fiscal year, and each fiscal year thereafter, to be determined on the basis of apportionment factors for prior fiscal years that have been corrected or adjusted as would be required if those prior apportionment factors had not been deemed correct by this bill.

This bill would make legislative findings and declarations as to the necessity for special statutes.

Ch. 568 (AB 301) R. Wright. Public Utilities Commission: rules: petition.

Under existing law, the Public Utilities Commission adopts Rules of Practice and Procedure, and the commission is required to submit amendments, revisions, or modifications by the commission of those rules to the Office of Administrative Law for review, as prescribed.

This bill would require the commission to permit interested persons to petition the commission to adopt, amend, or repeal a regulation, as specified, including a requirement that the commission amend the rules, on or before July 1, 2001, to provide more specific procedures for handling a petition. The bill would appropriate $136,345 from the Public Utilities Commission Reimbursement Account to the commission to reimburse the commission for those costs incurred in implementing the above provisions. The bill would make a statement of legislative intent relating to the construction of the terms "interested persons" and "regulation," as used in those provisions, and to the petitions described above.

Ch. 569 (AB 313) Zettel. Crimes enhancements.

(1) Existing law provides for a one-year sentence enhancement if certain crimes are committed against a person 65 years of age or older, or against a person who is blind, a paraplegic, or a quadriplegic, or a person who is under the age of 14 years.

This bill would also provide for that enhancement if the crime is committed against a person who is deaf or developmentally disabled. It would revise the list of crimes that are subject to that enhancement, among other things, to include penetration of the genital or anal opening of another by force of violence.

(2) Existing law provides that any person who has a prior conviction of any of the above-mentioned offenses who commits one of those crimes against a person who is 65 years of age or older, or against a person who is blind, deaf, developmentally disabled, a paraplegic, or a quadriplegic, or against a person who is under the age of 14 years shall receive a 2-year enhancement.

This bill would provide for the 2-year enhancement if the person is convicted of one of those crimes and has a previous conviction of one of those crimes against a person 65 years of age or older, or against a person who is blind, deaf, developmentally disabled, a paraplegic, or a quadriplegic, or against a person who is under the age of 14 years.

The bill would set forth a statement of intent.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) By imposing new enhancements on existing crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 570 (AB 476) Ackerman. Bail: procedure.

(1) Existing law requires that if a verdict is rendered against a defendant who is out on bail, he or she may be remanded to the proper officer to await the judgment of the court.

This bill would require that if a verdict is rendered against a defendant who is free on bail, the defendant be remanded to the proper officer to await the judgment of the court unless the court, upon consideration of specified criteria, concludes that the evidence supports the court's decision to allow the defendant to remain out on bail. By increasing the duties of local officials, this bill would impose a state-mandated local program.

(2) Under existing law, the court is authorized to grant a motion to vacate a forfeiture of bail only if the motion is made within a 180-day period and is heard within 30 days of the expiration of that 180-day period. Existing law also authorizes a surety or depositor of bail to file a motion, based upon good cause, to extend the 180-day period of time, not exceeding 180 days from its order.

This bill would provide instead, that a motion to vacate a forfeiture of bail that is filed within the 180-day period, may be heard within 30 days of the expiration of that 180-day period. The court would be authorized to extend the 30-day period upon a showing of good cause and to require that the moving party provide 10 days prior notice to the applicable prosecuting agency as a condition to granting the motion.

(3) Existing law bars a court or magistrate from accepting any person or corporation as a surety on bail if any summary judgment against that person or corporation remains unpaid after the expiration of 20 days following service of notice of the entry of the summary judgment, unless an action or proceeding is initiated to determine the validity of the order of forfeiture or summary judgment.

This bill would increase the time period in the provision summarized above to 30 days.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 571 (AB 491) Scott. Firearms.

(1) Existing law requires the Attorney General to maintain a registry of specified information concerning pistols, revolvers, and other firearms capable of being concealed on the person and to include in the registry specified data provided to the Department of Justice on the Dealers' Record of Sale.

This bill would require the Attorney General, at the written request of any person listed in the registry as the owner of a firearm through a Dealers' Record of Sale prior to 1979, to store and keep that record electronically and to provide the person written notice of its compliance with the request.

This bill would also incorporate additional changes in Section 11106 of the Penal Code proposed by SB 29, to be operative only if that bill and this bill are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

(2) Existing law generally provides that it is a misdemeanor for any person to carry a concealed firearm. Under specified circumstances, carrying a concealed firearm is punishable as a felony. One of these circumstances includes a person who is not in lawful possession of the firearm. "Lawful possession" is defined to mean a person who owns the firearm or has permission of the owner or a person with apparent authority.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would punish as a misdemeanor or a felony, carrying a concealed firearm if both the pistol, revolver, or other firearm capable of being concealed upon the person and the unexpended ammunition capable of being discharged from that firearm are in the immediate possession of the person or are readily accessible, or the firearm is loaded, as defined by law, where the person in possession is not the registered owner of the firearm, as specified. This bill would allow a peace officer to arrest a person for violating this provision if the officer had probable cause to believe the person was not the registered owner of the firearm and the other elements of this offense exist. The bill would also redefine the term "lawful possession" to mean one who lawfully owns or has permission of the lawful owner. In addition, the bill would require the district attorney of each county to submit an annual report to the Attorney General consisting of profiles of persons charged with felonies or misdemeanors under this concealable firearm provision. Under the bill, the Attorney General would be required to submit an annual report to the Legislature compiling all of the reports submitted by the district attorneys. By increasing the punishment for a crime and increasing the duties of local officials, this bill would impose a state-mandated local program.

(3) Existing law provides that every person who carries a loaded firearm on his or her person or in a vehicle while in any public place or on any public street, as specified, is guilty of a misdemeanor except in specified circumstances where this offense is punishable as a felony.

This bill would punish as a misdemeanor or a felony, possession of a loaded pistol, revolver, or other firearm capable of being concealed upon the person where the person in possession is not the registered owner of the firearm, as specified. The bill would allow a peace officer to arrest a person for violating this provision if the officer had probable cause to believe the person was not the registered owner of the firearms and the other elements of this offense exist. The bill would also incorporate in this provision the changes described in (2) above regarding the definition of "lawful possession" and the requirement imposed upon the district attorney.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 572 (AB 872) Alquist. Transportation: regional and local project funds: allocation and transfer.

Existing law authorizes a local agency to enter into an agreement with the appropriate transportation planning agency, the California Transportation Commission, and the Department of Transportation to use its own funds to develop, purchase right-of-way, and construct a project within its jurisdiction if the project is included in the adopted state transportation improvement program and funded from specified sources. The department is required to reimburse the local agency for the amount expended pursuant to the agreement from funds allocated by the commission for the project in the year it was scheduled in the state transportation improvement program, as specified.

This bill would authorize a regional or local entity to expend its own funds for any component of a transportation project within its jurisdiction that is included in the current fiscal year's state transportation improvement program and for which the commission has not made an allocation. The amount expended would be authorized to be reimbursed by the state, subject to annual appropriation by the Legislature, if (1) the commission makes an allocation for, and the department executes a fund transfer agreement for, the project during the same fiscal year as when the regional or local expenditure was made; (2) expenditures made by the regional or local entity are eligible for reimbursement in accordance with state and federal laws and procedures; and (3)

NOTE: Superior numbers appear as a separate section at the end of the digests.

the regional or local entity complies with all legal requirements for the project, as specified.

The bill would require the department and a local or regional entity to execute an agreement to transfer funds for a project within 90 days from the date on which the commission approves an allocation for the project, if no deficiencies that require clarification by a local or regional entity are identified in the preaward audit for the project and the project is included in an adopted state transportation improvement program.

The bill would require the department, on July 1, 2000, and annually thereafter, to compile information and report to the Legislature on the number of projects for which an agreement to transfer funds was executed and on all projects for which an agreement was not executed within the period provided and the reasons therefor, and a description of any actions taken by the department during the prior fiscal year to streamline, expedite, and simplify the department's process for executing the specified agreements to transfer funds.

The bill would require the department to implement systems that allow rapid access to funds made available under executed agreements to transfer funds. The bill would require the Controller to develop a system that provides access to those funds by electronic transfer of funds, as specified.

Ch. 573 (AB 926) Cedillo. Job training: at-risk youth.

Existing law appropriates, in augmentation of the Budget Act of 1998, $1,250,000, to the Employment Development Department to support certain at-risk youth employment demonstration projects conducted by private, nonprofit entities in specified job training service delivery areas.

This bill would, in addition, require that those funds be expended pursuant to certain guidelines and requirements regarding, among other things, the procurement by funding recipients of private matching funds, the demonstration of significant employer involvement in the relevant projects, the awarding of projects through a competitive bid process, and the satisfaction of specified criteria in the provision of relevant services. This bill would also require that a specified amount of these funds be allocated to the job training service delivery area of the City and the County of Sacramento. By changing the requirements for expenditure of an existing appropriation, the bill would make an appropriation.

This bill would also require the department to submit a report to the Legislature and the Governor, on or before January 1, 2003, detailing certain information with respect to projects funded under these provisions, and would require the department's annual report to the Legislature on the effectiveness of specified job preparation and training programs to also detail the effectiveness of the at-risk youth demonstration projects funded under these provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 574 (AB 1110) Committee on Budget. Claims against the state: appropriation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Existing statute establishes procedures for making that reimbursement and authorizes the Legislature to suspend a mandated program by not funding it in the State Budget for any fiscal year.

Existing law also requires the Controller, in the event that there are insufficient revenues to fund all of the state-mandated claims approved by the Controller, to report immediately this deficiency to the Legislature for additional appropriation, and requires that any additional appropriation include an amount necessary to reimburse any interest due to eligible claimants.

This bill would appropriate $149,041,136 from the General Fund and the State Transportation Fund to the Controller. From the General Fund, $106,089,000 would be allocated for the payment of claims by local agencies and school districts for reimbursement of state-mandated local costs, $5,000,000 would be allocated to provide reimbursement to local agencies of costs incurred for the period of July 1, 1998, through August 20, 1998, for those state-mandated local programs that were not suspended

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

pursuant to statute for this time period, and $37,385,136 would be allocated to pay for other specified prior year deficiencies, including interest. From the State Highway Account in the State Transportation Fund, $567,000 would be allocated for reimbursement of other state-mandated local costs.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 575 (AB 1163) Steinberg. California Unity Center: appropriation.

The Budget Act of 1998 appropriates funds for the support of state government and contains an appropriation to the California Arts Council for local assistance to be allocated to various museums in this state.

This bill would appropriate $500,000 to the California Arts Council for local assistance to be allocated to the City of Sacramento, on a matching basis, for the purposes of assisting the city in the planning and development of a California Unity Center in Sacramento.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 576 (AB 1193) Leonard. Sex offender registration.

(1) Existing law requires certain persons, including any person convicted of any specified sexual offense, for the rest of his or her life while residing or located within California, to register with the chief of police or the sheriff, as specified, and with the chief of police of a campus of the University of California, the California State University, or community college if the person is residing or located upon the campus or in any of its facilities, within 5 working days of coming into, or changing his or her residence or location within, any city, county, or city and county, or campus. Any person required to register as a sex offender pursuant to this provision is also required to update his or her registration information at least annually. The failure to register or update the registration is a crime.

This bill, commencing November 25, 2000, would make these provisions applicable to out-of-state residents who are employed in California or enrolled in an educational institution on a full-time or part-time basis. The bill also would require any person who is required to register as a sex offender who has more than one residence address or location at which he or she regularly resides or is located, to register in each of the jurisdictions in which he or she regularly resides or is located, and when all of the addresses or locations are within the same jurisdiction, to provide the registering authority with all of the addresses or locations where he or she regularly resides or is located. By expanding the scope of an existing crime and increasing the registration duties of local law enforcement officials, this bill would impose a state-mandated local program.

(2) Under existing law, the registration information required to be provided pursuant to the above provisions in (1) includes copies of adequate proof of residence. If the person required to register does not have any proof of residence, he or she shall be allowed to register, but is required to furnish proof of residence within 30 days. The failure to furnish proof of residence within the 30-day period is a misdemeanor punishable by imprisonment in a county jail for not exceeding 6 months, or by a fine not exceeding $1,000, or both that imprisonment and fine.

This bill would provide that the failure to furnish proof of residence within the 30-day period is a misdemeanor punishable by imprisonment in a county jail for not exceeding 6 months. By increasing the punishment for a crime, this bill would impose a state-mandated local program.

(3) Existing law authorizes a person required to register as a sex offender pursuant to the provisions in (1) to petition for a certificate of rehabilitation and pardon, and relieves that person, except for specified persons, of any further duty to register as a sex offender upon obtaining a certificate of rehabilitation, unless the person is in custody, on parole, or on probation. Existing law requires the persons excepted from operation of this provision to obtain a full pardon before they may be relieved of the duty to register as a sex offender.

Under existing law, the period of rehabilitation constitutes a period of 5 years plus an additional period of time which, in general, is 2 additional years for offenses that do not carry a life sentence.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, except as specified, the period of rehabilitation is 5 years plus 5 additional years in the case of a person convicted of an offense for which sex offender registration is required.

This bill would make technical changes to these provisions that conform to other provisions of law and delete obsolete cross-references to other provisions of law.

This bill would incorporate additional changes in Section 290 of the Penal Code proposed by SB 341, SB 1275, and AB 1340, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 577 (AB 1274) Frusetta. Political Reform Act of 1974: civil action.

Under the existing Political Reform Act of 1974 a person who violates the reporting requirements specified in the act or makes or receives a contribution, gift, or expenditure in violation of specified provisions of the act is liable in a civil action brought by the civil prosecutor or by a person residing within the jurisdiction. Under these provisions of the act, before filing a civil action, a person must first file with the civil prosecutor a written request for the civil prosecutor to commence the action. The civil prosecutor then is required to respond within 40 days after receipt of the request, indicating whether he or she intends to file a civil action. If the civil prosecutor files suit within 40 days thereafter, no other action may be brought unless the action brought by the civil prosecutor is dismissed without prejudice as specified.

This bill would instead provide that if the civil prosecutor indicates that he or she intends to file a civil action and files suit within 120 days from receipt of the written request to commence the action, no other action may be brought unless the action brought by the civil prosecutor is dismissed without prejudice. If the civil prosecutor indicates within 120 days from receipt of the written request to commence the action that he or she will not file a civil action, the person requesting the action may proceed to file the civil action. The bill also would toll the statute of limitations applicable for commencing a civil action under these provisions, as specified, but only for a civil action brought by the person who requested the civil prosecutor to commence the action.

The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^{2}/_{3}$ vote of each house and compliance with specified procedural requirements.

This bill, which would declare that it furthers the purposes of the act, would therefore require a $^{2}/_{3}$ vote.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 578 (AB 1587) Scott. Firearms.

(1) Existing law provides that no person who has been taken into custody or admitted to a designated facility because that person is a danger to himself, herself, or others shall own, possess, control, receive, or purchase, or attempt to own, possess, control, receive, or purchase any firearm for a period of 5 years after the person is released from the facility unless, upon petition to the superior court, the person is found by a preponderance of the evidence likely to use firearms in a safe and lawful manner.

This bill instead would provide that the person may request a hearing from the court and provide that the People of the State of California shall bear the burden of showing by a preponderance of the evidence that the person would not be likely to use firearms in a safe and lawful manner. If the court at the hearing finds that the people have not

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

met their burden, or the district attorney declines or fails to go forward at the hearing, the court would be required to order that the person not be subject to the 5-year prohibition on the ownership, control, receipt, possession, or purchase of firearms.

(2) Existing law provides that no person who has been certified for intensive treatment related to mental disorder or impairment by chronic alcoholism may own, possess, control, receive, or purchase, or attempt to own, possess, control, receive, or purchase any firearm for a period of 5 years unless upon petition to the superior court the person is found by a preponderance of the evidence likely to use firearms in a safe and lawful manner, as described above.

This bill would permit the person to petition the superior court of his or her county of residence that he or she may own, possess, control, receive, or purchase a firearm and would prescribe the procedures for a hearing on the petition.

(3) This bill would declare that it is to take effect immediately, as an urgency measure.

Ch. 579 (SB 6) Rainey. Reports of missing persons.

Existing law imposes certain requirements on local police and sheriff's departments relating to reports of missing persons, and requires that if the missing person is under 12 years of age, or there is evidence that the missing person is at risk, the local department must broadcast a bulletin, in its jurisdiction, without delay. Existing law also provides that after July 1, 1995, these requirements are only operative if the governing body of the local agency adopts a resolution expressly making these requirements operative.

This bill would require instead that a bulletin be broadcast without delay if the missing person is under 16 years of age. It would also delete the provision of existing law concerning the adoption of a resolution, provide instead that the above requirements would not be operative if the governing body of the local agency adopts a resolution expressly making those requirements inoperative.

Ch. 580 (SB 69) Murray. Criminal procedure: continuances.

Existing law specifies the procedures by which a motion to continue any hearing in a criminal proceeding, including the trial, may be made. Continuances may be granted only upon a showing of good cause, which includes, but is not limited to, cases involving murder, allegations of sexual assault, child abuse, or domestic violence where the prosecuting attorney assigned to the case has another criminal proceeding in progress in that or another court.

This bill would add cases involving allegations of stalking, as defined, to those cases in which a continuance may be granted in a criminal proceeding. The bill would only authorize one continuance in a stalking case and would require that any continuance granted under the above provision be for the shortest time possible, not to exceed 10 court days.

This bill would incorporate additional changes in Section 1050 of the Penal Code proposed by AB 501, to be operative if AB 501 and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 581 (SB 110) Peace. Energy conservation: power facility and site certification.

(1) Existing law, the Warren-Alquist State Energy Resources Conservation and Development Act, requires the State Energy Resources Conservation and Development Commission to certify sufficient sites and related facilities that are required to provide a supply of electric power sufficient to accommodate projected demand for power statewide. The act requires the commission to prepare and distribute a specified draft electricity report setting forth its findings and conclusions regarding the electric utilities' forecasts, and requires that the 5- and 12-year forecasts or assessments established by the commission serve as the basis for planning and certification of electric transmission or thermal powerplant facilities.

This bill would eliminate the requirement that those 5- and 12-year forecasts established by the commission serve as the basis for the planning and certification of electric transmission and thermal powerplant facilities.

(2) The existing act requires the commission, every 2 years, to transmit to the Governor and the Legislature a comprehensive report designed to identify emerging

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

trends related to energy supply, demand, and conservation and public health and safety factors, and to provide the basis for state policy and actions in relation thereto, including specified information.

This bill would make various changes with regard to the information and analyses to be contained in that report, as specified.

This bill would also require a report with recommendations and a work plan to be submitted, as prescribed, on or before March 31, 2000, concerning data collection in the restructured electricity market. The bill also would require the commission to file a report every 2 years commencing July 1, 2001, concerning the environmental performance of the electric generation facilities, as prescribed.

The act requires that an application for certification of a power facility submitted to the commission pursuant to the act contain specified information that the commission may require by regulation. The act also requires that the commission prepare a written decision after a public hearing on an application for certification, which contains specified information.

This bill would make various changes with respect to the information required to be provided in an application for certification, and to be contained in the commission's written decision concerning the application, as prescribed.

(3) The existing act prohibits the commission from certifying any facility contained in the application for certification, unless it makes specified findings relating to conformity of the proposed facility with an integrated assessment of need for the new facility.

This bill would eliminate that prohibition.

(4) The existing act authorizes the commission to exempt from those certification requirements thermal powerplants with a generating capacity of up to 100 megawatts and modifications to existing generating facilities that do not add capacity in excess of 100 megawatts, if the commission finds that no substantial adverse impact on the environment or energy resources will result from the construction or operation of the proposed facility or from the modification, and that generating capacity will not be added that is substantially in excess of the integrated assessment of need for new resource additions, as determined.

This bill would eliminate, for purposes of that exemption, the requirement that the commission find that generating capacity will not be added that is substantially in excess of the integrated assessment of need for new resource additions, as determined.

The act would require the Secretary of the Resources Agency, by January 1, 2001, to review the facility certification program to determine whether that program meets specified criteria for state regulatory programs under the California Environmental Quality Act, and if the secretary determines the regulatory program meets those criteria, the bill would require the secretary to continue the certification of the program. The bill would also, under those circumstances, require the commission to amend the regulatory program from time to time, as necessary to permit the secretary to continue to certify the program.

The bill would also make various related conforming changes and legislative findings and declarations.

(5) Existing law requires the commission not to certify a facility that does not meet applicable standards unless the commission determines the facility is required for public necessity.

This bill would require the commission to consider specific factors in making this determination.

(6) Existing law establishes an application and certification process for siting and licensing thermal electric powerplants.

This bill would require that the commission prepare a report to the Governor and the Legislature on or before March 31, 2000, identifying improvements in this process and making recommendations, as prescribed. The commission immediately may implement any administrative recommendations.

Ch. 582 (SB 621) Sher. Forest resources: timber harvesting plans.

(1) Existing law, the Z'berg-Nejedly Forest Practice Act of 1973, specifies that rules and regulations adopted or revised pursuant to the act shall become effective on the next

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

January 1 that is not less than 30 days from the date of approval of those rules or regulations by the Office of Administrative Law, except as provided.

This bill would, until January 1, 2001, instead provide that those rules and regulations shall become effective on either the next January 1 or July 1 that is not less than 30 days from the date of approval of those rules or regulations by the office.

(2) The act prohibits a person from conducting timber operations on timberland unless a timber harvesting plan has been prepared by a registered professional forester and has been submitted to the Department of Forestry and Fire Protection and approved by the director or by the state board.

This bill would impose additional civil penalties for violations of the act, as prescribed, and would require the consideration of all relevant circumstances pertaining to a violation when determining the amount of that penalty, and corrective action, if any, required to be taken by the violator.

The bill would authorize any party who is aggrieved by a final order issued by the board pertaining to a violation to obtain a review of the order in the superior court in the county in which the violation occurred by filing a petition for a writ of mandate in the court within a specified time period. By imposing new duties on local governments with respect to the review of the imposition of a civil penalty by the superior court, the bill would impose a state-mandated local program.

(3) The bill would provide that the violation of any rule or regulation adopted by the board pursuant to the act prescribing any procedural requirement that does not result in, or cause, any environmental damage, and is not a violation of specified provisions regulating forest practices, is an infraction punishable by the imposition of specified fines, as provided. The bill would require the board to designate those rules and regulations that prescribe procedural requirements of which a violation does not result in, or cause, environmental damage.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 583 (AB 531) Soto. Service stations.

(1) Existing law requires every service station in this state to provide, during operating hours, water, compressed air, and a gauge for measuring air pressure, to the public for use in servicing any passenger or commercial vehicle, as defined. Existing law provides that the failure of an owner or manager of a service station to have adequate water and air facilities for use by the public for 5 consecutive working days constitutes a rebuttable presumption that the owner or manager has intentionally violated these provisions. An intentional violation of these provisions is an infraction punishable by a fine not to exceed $50 per day.

This bill would require that these air and water services be made available at no cost to customers who purchase motor vehicle fuel, as defined. The bill would require service stations to place and maintain a specified sign regarding these services.

The bill would create a specified enforcement system by which consumers may report complaints via a toll-free customer complaint telephone number to the Division of Measurement Standards. The bill would provide that upon inspection, or upon notice of a complaint, employees of the division would be empowered to investigate complaints and issue citations, punishable by a fine of $250 per valid complaint, unless the citation is challenged in court. The issuance of a citation would be precluded if the air and water equipment is in good working order upon initial inspection, or if the air and water equipment is repaired to the satisfaction of the inspecting entity within 10 working days of that initial inspection. The bill would also exempt from the issuance of a citation air and water equipment that is the target of repeated vandalism, as specified.

This bill would state legislative findings and declarations with regard to free access to air and water services, would require the division to submit a specified report to the Legislature by March 1, 2001. By creating a new crime punishable as an infraction, this bill would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 584 (AB 606) Jackson. Victims of crimes: payments.

(1) Existing law provides for the indemnification of victims of specified types of crimes for specified types of expenses. Among these expenses are outpatient psychiatric, psychological, or other mental health counseling related expenses which became necessary as a direct result of the crime. These counseling services may only be reimbursed if provided by specified individuals. Indemnification is made under these provisions from the Restitution Fund, which is continuously appropriated to the State Board of Control for these purposes.

This bill would, until January 1, 2004, require the board to conduct a pilot program to provide reimbursement for grief, mourning, and bereavement services provided by a person certified as a child life specialist, and to report to the Legislature by January 31, 2003, on this pilot program.

This bill would additionally authorize a cash payment or reimbursement to an adult victim of domestic violence for specified expenses incurred in relocating, not to exceed $2,000. In the case of a victim of a crime that occurred in the victim's residence, it would authorize a cash payment not to exceed $1,000 for the expense of installing or increasing residential security, and in the case of a victim who is permanently disabled as a direct result of the crime, a cash payment not to exceed $5,000 for the expense of renovating or retrofitting his or her residence or vehicle, subject to specified conditions. The bill would authorize the board to delegate to local victim witness centers the authority to grant and disburse specified emergency awards.

By providing for new uses for a continuously appropriated fund, this bill would make an appropriation.

(2) Existing law requires a court to require a criminal defendant to pay restitution, which is to be made to the Restitution Fund to the extent that the victim of the crime has received assistance from the State Board of Control.

This bill would require a court to order a criminal defendant to pay restitution to be deposited in the Restitution Fund for mental health counseling expenses and other types of expenses for which the bill would provide payments to the victim of a crime. It would additionally incorporate changes to these provisions made by Chapter 121 of the Statutes of 1999.

Ch. 585 (AB 850) Torlakson. Amusement rides: safety.

Under existing law, amusement rides, as defined, are required to be operated under a permit issued by the Division of Occupational Safety and Health of the Department of Industrial Relations. The existing statutory definition of "amusement ride," for purposes of these provisions, excludes the operation of amusement devices of a permanent nature.

This bill would establish the Permanent Amusement Ride Safety Inspection Program (the program). This bill would define "permanent amusement ride" for the purposes of the program to mean mechanical devices, aquatic devices, or a combination of devices, of a permanent nature that carry or convey passengers, as specified. The bill would exclude slides, playground equipment, and other equipment from that definition.

This bill would exclude certain parks and entities from the program, including, among others, playgrounds operated by a school or local government, museums, skating rinks, live animal shows, and permanent amusement rides operated at a private event, as specified. This bill would define "qualified safety inspector" for the purposes of the program to mean a person approved by the division as (1) a qualified safety inspector for permanent amusement rides who holds a valid license as a professional engineer issued by this state or equivalent license issued by another state or (2) a person who has demonstrated to the division that he or she has a minimum of 5 years of experience in the amusement ride field, as specified, takes continuing education courses, and has completed at least 80 hours of education from a school approved by the division for

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

amusement ride safety. The bill would require a qualified safety inspector to be certified by the division and to be recertified every 2 years after the initial certification.

This bill would require each owner of a permanent amusement ride to submit a certificate of compliance on an annual basis to the division that includes, among other things, a written declaration, executed by a qualified safety inspector, stating that within the preceding 12-month period, the permanent amusement ride was inspected by the inspector and that the permanent amusement ride is in material conformance with the program and any rules adopted by the division.

This bill would prohibit any person from operating a permanent amusement ride that has been inspected by a qualified safety inspector or a division inspector and found to be unsafe, until all necessary repairs and modifications, or both, have been completed.

This bill would provide that the qualified safety inspector making the written declaration may be an in-house, full-time safety inspector employed by the owner of the permanent amusement ride, an employee or agent of the insurance underwriter or insurance broker of the amusement ride, an employee or agent of the manufacturer of the ride, or an independent consultant or contractor.

This bill would provide that a person may operate a permanent amusement ride only if at the time of that operation a minimum level of insurance insures the owner or operator against liability arising out of use of the ride, a bond is posted in that amount, or the owner is self-insured in a manner established by the division.

This bill would require that the owner of a permanent amusement ride provide specified training to its employees on the safe operation and maintenance of amusement rides.

This bill would require persons who operate permanent amusement rides to report immediately by telephone to the division each known accident that results in the death of, or serious injury to, any person that results from the failure, malfunction, or operation of the permanent amusement ride, as specified. The bill would authorize a division inspector to inspect any amusement ride after the report of an accident to the division.

This bill would authorize the division to inspect the records for a permanent amusement ride or the ride, or both.

The bill would authorize the division to order cessation of operation of a permanent amusement ride that is determined after inspection to be hazardous or unsafe and would prohibit operation of the ride until these conditions are corrected to the satisfaction of the division.

This bill would authorize the division to fix and collect all fees necessary to cover the cost of administration of the program by charging fees to each person or entity receiving the division's services, as specified. The bill would also provide that if the division determines that any owner or operator of a permanent amusement ride has willfully or intentionally violated this part or any rule or regulation promulgated under this part and that violation results in a death or serious injury, the division shall impose on that owner or operator a civil penalty of not less than $25,000 and not more than $70,000.

This bill would authorize the division to adopt rules and regulations necessary for the administration of the program and to employ qualified safety inspectors.

This bill would provide that these provisions relating to annual division inspections do not apply to any permanent amusement ride or rides that are located within a county or other political subdivision of the state that, as of April 1, 1998, has adopted the provisions of the 1994 Uniform Building Code providing for the routine inspection of permanent amusement rides by the county or other political subdivision of the state, provided those inspections meet or exceed specified standards and that the county or political subdivision does not suspend, revoke, or otherwise vacate its provisions.

Ch. 586 (SB 926) Speier. Personal information: supermarkets.

Existing law regulates various consumer marketing practices, as specified.

This bill would enact the Supermarket Club Card Disclosure Act of 1999. The act would prohibit a club card issuer from requiring an applicant for a supermarket club card to provide a driver's license or social security account number as a condition of obtaining the card. The act would also prohibit a club card issuer from selling or sharing personal identification information regarding cardholders, except as specified. The bill would also set forth various applicable definitions, and make any violation punishable as "unfair

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

competition" pursuant to specified provisions of the Business and Professions Code. The bill would provide that its provisions are to become operative on July 1, 2000.

Ch. 587 (AB 537) Kuehl. Discrimination.

(1) Existing law provides that it is the policy of the State of California to afford all persons in public schools and postsecondary institutions, regardless of their sex, ethnic group identification, race, national origin, religion, or mental or physical disability, equal rights and opportunities in the educational institutions of the state.

Existing law makes it a crime for a person, whether or not acting under color of law, to willfully injure, intimidate, interfere with, oppress, or threaten any other person, by force or threat of force, in the free exercise or enjoyment of any right or privilege secured to him or her by the Constitution or laws of this state or by the Constitution or laws of the United States because of the other person's race, color, religion, ancestry, national origin, disability, gender, or sexual orientation, or because he or she perceives that the other person has one or more of those characteristics.

This bill would also provide that it is the policy of the state to afford all persons in public school and postsecondary institutions equal rights and opportunities in the educational institutions of the state, regardless of any basis referred to in the aforementioned paragraph.

(2) Existing law prohibits a person from being subjected to discrimination on the basis of sex, ethnic group identification, race, national origin, religion, color, or mental or physical disability in any program or activity conducted by any educational institution or postsecondary educational institution that receives, or benefits from, state financial assistance or enrolls students who receive state student financial aid.

This bill would also prohibit a person from being subjected to discrimination on the basis of any basis referred to in paragraph (1) in any program or activity conducted by any educational institution or postsecondary educational institution that receives, or benefits from, state financial assistance or enrolls students who receive state student financial aid.

(3) This bill would state that it does not require the inclusion of any curriculum, textbook, presentation, or other material in any program or activity conducted by an educational institution or a postsecondary educational institution and would prohibit this bill from being deemed to be violated by the omission of any curriculum, textbook, presentation, or other material in any program or activity conducted by an educational institution or a postsecondary educational institution.

To the extent that this bill would impose new duties on school districts and community college districts, it would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 588 (AB 26) Migden. Domestic partners.

(1) Existing law sets forth the requirements of a valid marriage, and specifies the rights and obligations of spouses during marriage.

This bill would provide that a domestic partnership shall be established between 2 adults of the same sex or, if both persons are over the age of 62 and meet specified eligibility criteria, opposite sexes, who have a common residence and meet other specified criteria and would provide for the registration of domestic partnerships with the Secretary of State. The bill would also specify procedures for the termination of domestic partnerships. The bill would prohibit a person who has filed a Declaration of Domestic Partnership from filing a new declaration until at least 6 months has elapsed from the date that a Notice of Termination of Domestic Partnership was filed with the Secretary of State in connection with the termination of the most recent domestic

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

partnership, except where the previous domestic partnership ended because one of the partners died or married.

The bill would require the Secretary of State to prepare forms for the registration and termination of domestic partnerships, distribute these forms to each county clerk, and require the Secretary of State to establish, by regulation, and charge fees for processing these forms. The bill would require these forms to be available to the public at the office of the Secretary of State and each county clerk. A Declaration of Domestic Partnership would be required to be accompanied by a specified declaration of veracity. Violation of this requirement would be a misdemeanor. By creating a new crime and by increasing the duties of the county clerk, the bill would impose a state-mandated local program.

The bill would also preempt, on and after July 1, 2000, any local ordinance or law that provides for the creation of a domestic partnership, as specified, except that a local jurisdiction may retain or adopt policies or laws that offer rights to domestic partners within the jurisdiction and impose duties that are in addition to the rights and duties established by state law, as specified.

(2) Existing law does not specify requirements concerning patient visitation in all health facilities.

This bill would require a health facility to allow a patient's domestic partner and other specified persons to visit a patient, except under specified conditions.

(3) The existing Public Employees' Medical and Hospital Care Act authorizes the Board of Administration of the Public Employees' Retirement System to provide health benefits plan coverage to state and local public employees and annuitants and their family members.

This bill would authorize the state and local employers to offer health care coverage and other benefits to domestic partners, as defined, who have submitted certificates of eligibility or Declarations of Domestic Partnership to the board.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, with regard to certain mandates, no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 589 (SB 1148) Burton. Housing discrimination: restrictive covenants.

(1) Existing law prohibits discrimination in housing through restrictive covenants based on race, color, religion, sex, familial status, marital status, disability, national origin, or ancestry. The Davis-Stirling Common Interest Development Act regulates common interest developments and defines the declarations and other governing documents that govern the operation of common interest developments and the associations that manage common interest developments.

This bill would provide that no declaration or other governing document shall include a restrictive covenant in violation of these provisions, and would require the board of directors of an association that manages a common interest development, without approval of the owners, to amend any declaration or other governing document that includes a restrictive covenant prohibited by these provisions. The bill would also authorize specified persons to bring a civil action for injunctive relief to enforce this prohibition against including restrictive covenants, if after written notice an association fails to delete the restrictive covenant within 30 days.

The bill would also provide, operative January 1, 2001, that the existence of a restrictive covenant constitutes prohibited discrimination, regardless of whether the covenant is accompanied by a statement that it is repealed or void.

The bill would require a county recorder, title insurance company, escrow company, real estate broker, real estate agent, or association that provides a declaration, governing documents, or deed with respect to a common interest development to any person, to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

place a cover page over the document or a stamp on the first page of the document containing a specified statement with respect to prohibited restrictive covenants. By increasing the duties of county recorders, the bill would impose a state-mandated local program.

The bill would require the county recorder to remove any blatant racial restrictive covenant contained in any recorded document, upon application, as specified. The bill would make it a misdemeanor to file a document for the express purpose of adding a racially restrictive covenant, thereby imposing a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

(3) This bill would incorporate additional changes in Section 12955 of the Government Code proposed by SB 1098 and AB 1670, to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 590 (SB 1098) Burton. Residential real property: rent control: tenant rights: discrimination.

(1) The Costa-Hawkins Rental Housing Act authorizes an owner of residential real property to establish the initial and all subsequent rental rates for a dwelling or a unit if any one of specified facts is true and the initial rental rate for a dwelling or unit where a residential rent control ordinance applies, except where, among other conditions, the previous tenancy has been terminated pursuant to notice by the owner or upon a change in the terms of the tenancy.

This bill would specify that termination or nonrenewal of a specified rent limitation contract with a governmental agency constitutes a change in the terms of the tenancy for that purpose, and would require 90 days' written notice to the tenant of the termination.

The bill would revise provisions making inapplicable the owner's authority to establish the rental rate when a citation has been issued for code violations, and for a 3-year period when an owner terminates or fails to renew a contract or recorded agreement with a governmental agency that provides for a rent limitation, except as specified.

The bill would provide that a person entering real property during certain hours or circumstances, when invited by the occupant, to provide tenants' rights information or to participate in a specified association, shall not be civilly or criminally liable for trespass.

(2) The Fair Employment and Housing Act prohibits housing discrimination on the basis of race, color, religion, sex, marital status, national origin, ancestry, familial status, or disability.

This bill would, until January 1, 2005, prohibit discrimination under that act on the basis of a person's source of income, the failure to account for the aggregate income of coresidents, or the failure to exclude a government rent subsidy from that portion of the rent to be paid by the tenant in assessing his or her eligibility for rental housing.

(3) This bill would incorporate additional changes in Section 12955 of the Government Code proposed by SB 1148 and AB 1670, to be operative if this bill and one or both of the other bills are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 591 (AB 1670) Committee on Judiciary. California Civil Rights Amendments of 1999.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law prohibits business establishments from discriminating against, boycotting or blacklisting, or refusing to buy from, sell to, or trade with any person because of the race, creed, religion, color, national origin, sex, or disability of any person or the person's partners, members, stockholders, directors, officers, managers, superintendents, agents, employees, business associates, suppliers, or customers.

This bill would additionally prohibit these forms of discrimination (1) because of a perception that any of those persons have one or more of the above characteristics or (2) because the person is associated with a person who has, or is perceived to have, any of those characteristics.

Existing law prohibits denial of benefits under, or discrimination against any person in, any program or activity funded or financially assisted by the state on the basis of ethnic group identification, religion, age, sex, color, or physical or mental disability. Existing law specifies a hearing procedure for determining violations and requires curtailing state funding for any contractor, grantee, or local agency found to be in violation.

This bill would make these provisions and regulations adopted thereunder enforceable by a civil action for equitable relief.

Existing provisions of the California Fair Employment and Housing Act declare as a civil right the opportunity to seek, obtain, and hold employment without discrimination on specified bases.

This bill would declare as a civil right the opportunity to seek, obtain, and hold housing without discrimination on specified bases or any arbitrary basis prohibited by the Unruh Civil Rights Act. The bill would also revise the definition of discrimination for the purposes of these provisions to include harassment in connection with housing accommodations.

Existing provisions of the California Fair Employment and Housing Act make it an unlawful employment practice for employers, including employer agents, among others, to harass an employee or applicant because of specified bases. Under existing law, harassment of an employee or applicant by other than an employer agent or supervisor is unlawful only if the employer, or its agents or supervisors, knows or should have known of the harassment and fails to take immediate and appropriate corrective action.

This bill would add a definition of "supervisor" to the act and expand the act's provisions on harassment to make them applicable to harassment of persons providing services pursuant to a contract, as defined. The bill would provide that the definition of "supervisor" that it would add is declaratory of existing law.

Nothing in the California Fair Employment and Housing Act makes it an unlawful employment practice to require testing for a genetic characteristic.

This bill would make it an unlawful employment practice for an employer or other entity to require testing for a genetic characteristic. This bill would also make it an unlawful employment practice to make, in connection with prospective employment, any inquiry as to, or a request for information regarding, the physical fitness or physical or mental condition of an applicant, except as specified.

Existing provisions of the California Fair Employment and Housing Act prohibit discrimination based on specified bases.

This bill would provide that those bases include a perception that the person has any of those characteristics or is associated with a person who has, or is perceived to have, any of those characteristics.

Nothing in the California Fair Employment and Housing Act makes it an unlawful employment practice to refuse to provide a reasonable accommodation for a pregnant female employee during the pregnancy.

This bill would make it an unlawful employment practice for an employer to refuse to provide a reasonable accommodation requested by an employee, with the advice of her health care provider, for conditions related to pregnancy, childbirth, or related medical conditions.

In any civil action brought under the California Fair Employment and Housing Act the court, with certain exceptions, is authorized to award the prevailing party reasonable attorney's fees and costs.

This bill would additionally authorize the court to award the prevailing party his or her expert witness fees.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, the respondent named in an administrative accusation under the California Fair Employment and Housing Act brought for damages for emotional injuries or for an administrative fine may elect to transfer the proceedings to a court. Existing law authorizes the court in those actions to grant specified relief.

This bill would additionally authorize the relief granted by the court to include a requirement that the employer conduct prescribed training.

Existing provisions of the California Fair Employment and Housing Act limit the total amount of damages that may be awarded by the Fair Employment and Housing Commission for nonpecuniary loss and administrative fines to $50,000 per aggrieved person per respondent.

This bill would increase this limitation to $150,000.

This bill would additionally make technical and conforming changes to provisions of the California Fair Employment and Housing Act.

This bill would specify that the changes it would make in types of discrimination prohibited by the Unruh Civil Rights Act, and in certain of the definitional provisions of the California Fair Employment and Housing Act, are declaratory of existing law.

This bill would incorporate the changes in Section 12926 of the Government Code proposed by Senate Bill 1185, if that bill is enacted and this bill is enacted last.

This bill would incorporate the changes in Section 12955 of the Government Code proposed by Senate Bill 1098, Senate Bill 1148, or both, if either or both of those bills are enacted and this bill is enacted last.

Ch. 592 (AB 1001) Villaraigosa. Fair employment and housing.

(1) Under the California Fair Employment and Housing Act, it is unlawful to engage in specified discriminatory employment practices, including hiring, promotion, and termination on the basis of race, religious creed, color, national origin, ancestry, physical handicap, medical condition, marital status, sex, or age. The act also makes it unlawful to engage in specified discriminatory practices in housing accommodations on the basis of race, color, religion, sex, marital status, national origin, ancestry, familial status, or disability.

This bill would amend the act to include sexual orientation, as defined, within the unlawful bases for discrimination in employment and housing accommodations.

(2) Under existing law codified in the Labor Code, discrimination or different treatment in any aspect of employment or opportunity for employment, as specified, and with certain exceptions, based on actual or perceived sexual orientation, is prohibited.

This bill would repeal the provision of the Labor Code that expresses that prohibition.

(3) This bill would incorporate additional changes in Sections 12921, 12926, 12930, 12940, and 12955 of the Government Code to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 593 (SB 733) Poochigian. California State University: Kenneth L. Maddy Institute.

Existing law establishes the California State University under the administration of the Trustees of the California State University. Existing law authorizes the operation of the various campuses of the university, including California State University, Fresno.

This bill would establish the Kenneth L. Maddy Institute as a part of the public administration program of the College of Social Sciences at California State University, Fresno. The institute would provide training for leadership in government, and would prepare students and elected officials for public service, as specified. The bill would appropriate $1,100,000 from the General Fund to the Trustees of the California State University for allocation as an endowment for the institute.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 594 (AB 1041) Strickland. Ronald Reagan Presidential Library: special interest license plates.

Existing law requires the Department of Motor Vehicles to issue special interest license plates, as specified, to any person, to be displayed in lieu of regular license plates.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would add a Ronald Reagan Presidential Library special interest license plate to the special interest license plate program. The bill would require the additional funds collected by the issuance of those special interest license plates to be deposited into the Ronald Reagan Presidential Library Account, created by the bill, in the General Fund to be used by the Ronald Reagan Presidential Foundation, upon appropriation, to fund the Ronald Reagan Presidential Library.

Ch. 595 (AB 539) Papan. Workers' compensation: cancer: firefighters and peace officers.

Existing workers' compensation law provides that in the case of active firefighting members of certain state and local fire departments and in the case of certain peace officers, a compensable injury includes cancer that develops or manifests itself during the period while the firefighter or peace officer demonstrates that he or she was exposed, while in the service of the public agency, to a known carcinogen, as defined, and that the carcinogen is reasonably linked to the disabling cancer. Existing law establishes a presumption that the cancer in these cases is presumed to arise out of and in the course of employment, unless controverted by other evidence.

This bill would delete the requirement for the affected firefighter or peace officer to demonstrate that the carcinogen is reasonably linked to the disabling cancer. The bill instead would provide that the presumption may only be controverted by evidence that the primary site of the cancer has been established and that the carcinogen to which the member has demonstrated exposure is not reasonably linked to the disabling cancer. This bill would also define cancer to include leukemia for these purposes. These changes would apply to claims for benefits filed or pending on or after January 1, 1997.

Ch. 596 (AB 1564) Strom-Martin. Economic development: rural assistance: community development block grants.

(1) Existing law provides for various programs for the development of economic opportunities in rural areas of the state.

This bill would establish the California Rural Policy Task Force within the Office of Planning and Research in the Governor's office, to be composed of specified state officers, or their representatives. It would require the task force to oversee the mobilization and effective delivery of the state's resources to rural California, and to establish committees and hold hearings for these purposes. It would further require the task force to report annually to the Governor and the Legislature on its efforts in implementing these provisions, and to report to the Legislature by July 1, 2000, on the delivery of community development block grant funds.

The bill would require each state agency and department represented on the task force to develop by July 1, 2000, a plan that identifies programs and resources that can be targeted for rural areas in respect to the activities of that agency or department.

The bill would establish the Rural California Technical Assistance Program in the Trade and Commerce Agency. It would require the program, through 2 regional contracts for $50,000 each with public or private nonprofit organizations, to provide technical assistance to local governments and tribal governments in accessing resources from a broad range of funding sources, and in the preparation of applications and other documents, as may be required, and would set forth the duties of the contractors under the program. The bill would appropriate $125,000 from the General Fund to the agency for this purpose.

The bill would repeal the above provisions on January 1, 2003, unless a later enacted statute extends that date.

(2) Under existing law, the Department of Housing and Community Development allocates federal community development block grant funds to cities and counties, as prescribed.

This bill would authorize jurisdictions to submit multiyear proposals.

(3) Existing law required the Director of Planning and Research to adopt by December 31, 1994, a rural economic growth strategy, as specified.

This bill would repeal these provisions.

Ch. 597 (AB 1464) Florez. Rural development.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Existing law provides for various rural development programs in the state.

This bill would set forth the authority and duties of the Rural Development Council , within the Trade and Commerce Agency, the purpose of advocating and recommending programs that foster community sustainability and community and economic development initiatives in rural, nonurban, and nonmetropolitan areas of California. The council would consist of members with up to 27 votes. Twenty of these members would be appointed by the Governor, the Speaker of the Assembly, and the Senate Committee on Rules, the state director of the United States Department of Agriculture, Rural Development would also be urged to sit as a member, and various state and federal government representatives would be authorized to serve on the council. Two Members of the Assembly and 2 Senators would serve in an advisory capacity . The council would have specified powers and duties.

The bill would create the Rural Development Fund within the State Treasury to promote and assist in rural development efforts across the state.

(2) Existing law required the Director of Planning and Research, in consultation with the Governor's Interagency Council on Growth Management and an advisory committee composed of rural landowners and citizens, to adopt a rural economic growth strategy, on or before December 31, 1994, to encourage a healthy, self-sustaining rural economy and society, among other things.

This bill would repeal these provisions.

(3) This bill would appropriate $15,000 from the General Fund to the Trade and Commerce Agency for specified 1999–2000 fiscal year reimbursement costs for the council.

Ch. 598 (AB 61) Cardoza. Rural Development Export Act of 1999.

Existing law establishes the California Office of Export Development within the California State World Trade Commission, and sets forth the duties of the office in strengthening the state's activities in marketing its agricultural, manufacturing, and service industries overseas.

Existing law also establishes the California Export Finance Office within the California State World Trade Commission, and sets forth the duties of the office in expanding employment and income opportunities for Californians through increased exposure of California goods, services, and agricultural commodities, by providing actual and potential California exporters with information and technical assistance on export opportunities and exporting techniques, and financial assistance in support of export transactions.

This bill would enact the Rural Development Export Act of 1999. It would require the California Office of Export Development to develop a program to be known as the Rural Export Strategy, to include specified outreach activities. It would require that the strategy be developed in collaboration with, and use available resources of, relevant agencies, organizations, and businesses that serve or are located within rural California, or both, and include a cost-effective mechanism to educate the staff in California's overseas trade offices about products and services available from the state's rural communities.

This bill would require the Rural Export Strategy to include provisions describing how the California Export Finance Office can be more accessible and more utilized by rural businesses. It would also require the strategy to be submitted to the California State World Trade Commission.

This bill would appropriate the sum of $50,000 from the General Fund to the Office of Export Development for the purposes of the bill.

Ch. 599 (SB 1269) Alpert. Toxic chemicals: private enforcement actions.

The existing Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) prohibits any person, in the course of doing business, from knowingly and intentionally exposing any individual to a chemical known to the state to cause cancer or reproductive toxicity without giving a specified warning, or from discharging or releasing such a chemical into any source of drinking water, except as specified.

The act imposes civil penalties upon persons who violate those prohibitions, and provides for the enforcement of those prohibitions by the Attorney General, a district

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

attorney, or specified city attorneys or prosecutors, and by any person in the public interest, if that private action is commenced more than 60 days after the person has given notice of the violation that is the subject of the action to the Attorney General, the district attorney, any city attorney in whose jurisdiction the violation is alleged to have occurred, and to the alleged violator, and the violation is not being prosecuted, as specified.

This bill would require any person bringing an action in the public interest to notify the Attorney General that such an action has been filed, and would require such a person, after the action is either subject to a settlement or a judgment, to submit to the Attorney General a reporting form that includes the results of that settlement or judgment and the final disposition of the case. The bill would also require a person bringing an action in the public interest to submit to the Attorney General a report that includes information on any corrective action being taken as a part of the settlement or resolution of the case. The bill would require the Attorney General to develop a reporting form, for purposes of these requirements, that specifies the information to be reported, including the date the action was filed, the nature of the relief sought, the amount of the settlement or civil penalty assessed, and any other information the Attorney General deems appropriate.

The bill would require the Attorney General to maintain a record of that information and to make this information available to the public.

The bill, in conformance with the requirements of Proposition 65, would make a legislative finding and declaration that the bill would further the purposes of the act.

Ch. 600 (SB 515) Chesbro. Waste management.

(1) The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program. The act requires each city, county, city and county, and regional agency, if any, to develop a source reduction and recycling element of an integrated waste management plan containing specified components. Existing law also requires each city, county, and city and county to adopt a nondisposal facility element consistent with the implementation of the source reduction and recycling element. Existing law requires the nondisposal facility element, and any amendments to the element, to be appended to the source reduction and recycling element when that element is included in the integrated waste management plan.

This bill would authorize, rather than require, the nondisposal facility element to be appended to the source reduction and recycling element.

Existing law defines terms for purposes of the act and requires the board to adopt regulations that define "rural area" in a manner that establishes criteria and conditions applicable only to counties and cities located in those areas of the state that are rural in character, including those counties and cities that are located in agricultural or mountainous areas of the state and geographically distant from markets for recyclable materials.

This bill would delete the requirement that the board adopt regulations that define "rural area." The bill, instead, would define "rural area," in statute for purposes of the act, to mean those counties and cities located in agricultural or mountainous areas of the state and located outside the Department of Finance's Primary Metropolitan Statistical Areas. The bill would revise the definition of "rural city" for purposes of the act.

(2) Existing law requires that recycled materials and inert waste removed from the waste stream, and not disposed of in a solid waste landfill, not be included for the purpose of assessing specified fees.

This bill would specify, until January 1, 2002, the meaning of inert waste for the purposes of this provision.

This bill would declare that this definition does not affect specified provisions relating to the use of solid waste for beneficial reuse in the construction and operation of a solid waste landfill, relating to specified diversion requirements, and relating to the authority of the Integrated Waste Management Board to permit, adopt standards, or otherwise regulate specified aspects of solid waste management.

Ch. 601 (SB 274) Johannessen. Hazardous materials: Shasta Cascade Hazardous Materials Response Team.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides for the regulation of hazardous waste under the hazardous waste control laws by the Department of Toxic Substances Control and specified local agencies.

This bill would appropriate $140,000 from the Toxic Substances Control Account to the Department of Toxic Substances Control for allocation to the County of Shasta for the purchase of emergency response equipment for the Shasta Cascade Hazardous Materials Response Team.

The bill would prohibit the County of Shasta from expending more than 1% of the appropriation for administrative expenses.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 602 (SB 154) Polanco. California Arts Council: allocation to Los Angeles River Center.

(1) Under the Budget Act of 1999, $26,187,000 is appropriated from the General Fund to the California Arts Council for allocation to specified museums and cultural institutions. The Budget Act of 1999 specifies that one of these allocations, in the amount of $750,000, is to be made to El Pueblo de Los Angeles Historic Monument.

This bill would instead provide that this allocation of $750,000 be made to the Los Angeles River Center, thereby making an appropriation.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 603 (SB 42) Johnson. Property taxes: mobilehome parks.

Existing property tax law requires the reassessment of real property at fair market value upon a change in ownership and specifies those transfers of real property that constitute a change in ownership. Existing law also excludes from classification as a change in ownership any transfer, on or after January 1, 1989, of a mobilehome park to a nonprofit corporation, stock cooperative corporation, or other entity, including a governmental entity if, within 18 months after this transfer the mobilehome park, or at least 51% of the individual rental spaces in that park, are then subject to a subsequent transfer that is itself excluded by specified statutory provisions from classification as a change in ownership. Existing law extends this 18-month period to 36 months in the case of a mobilehome park for which the first transfer occurred on or after January 1, 1993.

This bill would expand both of these exclusions to also apply in the case in which the first transfer is made to a tenant-in-common ownership group, and would, for purposes of applying the 36-month time period for the subsequent transfer of a mobilehome park that was first transferred on or after January 1, 1993, specify that the execution of a purchase contract and the opening of an escrow for the transfer of a rental space in the park is deemed to be within the 36-month time period if the escrow is opened before the end of that 36-month period and remains open for no more than 6 months after the end of that period.

Section 2229 of the Revenue and Taxation Code requires the Legislature to reimburse local agencies annually for certain property tax revenues lost as a result of any exemption or classification of property for purposes of ad valorem property taxation.

This bill would provide that, notwithstanding Section 2229 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for property tax revenues lost by them pursuant to the bill.

This bill would take effect immediately as a tax levy.

Ch. 604 (SB 4) Johannessen. Northern California Veterans Cemetery.

Existing law requires the Department of Veterans Affairs, in voluntary cooperation with the Shasta County Board of Supervisors, to develop a proposal for a veterans cemetery in Shasta County that will be owned and operated by the state. Existing law also provides that that proposal shall be submitted to the Legislature by July 1, 1997.

This bill would require the department, in voluntary cooperation with the Shasta County Board of Supervisors and the boards of supervisors of other participating northern California counties, as specified, to design, develop, and construct a state-owned and state-operated Northern California Veterans Cemetery to be located in northern California. The bill also would (1) require the department to oversee and coordinate the design, development, and construction of the cemetery, (2) establish fees for interment in the cemetery of spouses and children of honorably discharged veterans,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) establish the Northern California Veterans Cemetery Master Development Fund, a continuously appropriated fund, for the design, development, construction, and equipping of the cemetery, and (4) establish the Northern California Veterans Cemetery Perpetual Maintenance Fund for the maintenance of the cemetery.

The bill would appropriate $520,000 from the General Fund, with $70,000 of that amount appropriated to the department for the oversight and coordination duties specified above and $450,000 appropriated to the Northern California Veterans Cemetery Master Development Fund for the Master Development Plan of the cemetery.

The bill would require the department to apply to the State Cemetery Grant Program of the federal Department of Veterans Affairs for a grant of not more than $6,000,000, which amount represents 100% of the estimated cost for designing, developing, constructing, and equipping the cemetery.

The bill would prohibit expenditure of the money appropriated to the department and the fund until the department has received written approval of the specified grant request and a commitment from the federal State Cemetery Grant Program that the funds appropriated under the grant are available for expenditure by the state, except that the department would be authorized to expend an amount necessary for completion of the grant proposal from the money appropriated to the fund.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 605 (AB 1635) Committee on Revenue and Taxation. Franchise and income taxes: deficiencies: actions: returns.

Existing laws pertaining to the administration of franchise and income taxes provide that the Franchise Tax Board may abate the assessment of interest in certain cases, and the taxpayer may, within 180 days after the board's notice not to abate interest, appeal the board's determination to the State Board of Equalization. Those laws also specify the requirements for bringing an action with respect to that interest.

This bill would specify that a taxpayer may bring an action after, among other things, a determination by the State Board of Equalization, including the issuance of a decision, opinion, or dismissal on a petition for rehearing, as provided.

Existing law pertaining to the administration of the Personal Income Tax Law requires, except as provided, an individual to use the same filing status that he or she used on his or her federal income tax return.

This bill would provide that the Franchise Tax Board may revise the return to reflect a correct filing status. This bill would also clarify the requirements to filing a joint nonresident return and filing status of an individual who is not required to file a federal income tax return, as provided.

Ch. 606 (AB 1473) Hertzberg. Capital outlay: state planning and funding.

Existing law requires the Director of Finance to prepare annually a report projecting the state's potential need for the financing of major capital outlay projects over a 10-year period. Existing law generally prohibits funds appropriated for capital outlay from being expended by a state agency until the Department of Finance and the State Public Works Board have approved preliminary plans for the project to be financed from the appropriation for capital outlay. Existing law also requires the Governor's Budget to contain a complete plan and itemized statement of all proposed expenditures of the state and all estimated revenues.

This bill would require the Governor, in conjunction with the Governor's Budget, to submit annually to the Legislature a proposed 5-year infrastructure plan containing specified information concerning infrastructure needed by state agencies, schools, and postsecondary institutions and a proposal for funding the needed infrastructure.

Ch. 607 (AB 1383) Thompson. Highways: Environmental Enhancement and Mitigation Projects: extension.

Existing law declares the Legislature's intent, commencing July 1, 1991, to allocate $10,000,000 annually for 10 years to the Environmental Enhancement and Mitigation Demonstration Program Fund to be used for making grants to local, state, and federal

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

agencies and nonprofit entities that undertake projects to mitigate the adverse environmental effects of existing and future transportation facilities.

This bill would require the Department of Transportation to extend the completion date to June 30, 2002, for specified Environmental Enhancement and Mitigation Projects.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 608 (AB 1342) Granlund. Real property.

(1) Existing provisions of the Professional Land Surveyors' Act require every map, plat, report, description, or other document issued by a licensed land surveyor or registered civil engineer to comply with certain record of survey requirements, as specified, whenever the map, plat, report, description, or any other document is filed as a public record.

This bill would, instead, require every map or plat issued by a licensed land surveyor or registered civil engineer to show the bearing and length of lines, scale of map and north arrow, the name and legal designation of the property depicted, and the date or time period of the preparation of the map or plat.

A violation of the act is a misdemeanor. In revising the elements of an existing crime, the bill would impose a state-mandated local program.

(2) Existing provisions of the Professional Land Surveyors' Act specify when a record of survey is not required.

This bill would also provide that a record of survey is not required when a survey is made of a mobilehome park interior lot, with certain exceptions.

(3) Existing law requires the Board for Professional Engineers and Land Surveyors, by regulation, to provide and prescribe information necessary to be included in the corner record.

This bill would require the corner record to be a single 8.5 by 11 inch sheet which may consist of a front and back page. It would also exempt from certain record of survey and corner record requirements a survey of a mobilehome park interior lot, with certain exceptions.

(4) That form provides that if the land has a descriptive name it may be described in the deed by that name.

This bill would make technical changes in the form.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 609 (AB 1243) Committee on Agriculture. Pesticides: agricultural products: marketing.

(1) Existing law sets forth provisions governing pesticides. Existing law requires various persons who engage in the business of agricultural pest control operations to be licensed or hold a certificate issued by the Department of Pesticide Regulations. Fees are imposed for the issuance of those licenses and certificates.

This bill would specifically provide a procedure for the making of refunds of specified fees by the Director of Pesticide Regulations, and would make a continuous appropriation for that purpose.

(2) Under existing law, any person whose license or certificate is revoked, or whose application for such a license or certificate is denied for reasons other than his or her failure to satisfy examination requirements, is ineligible to apply or reapply for the same kind of license or certificate for a period of 3 years from the effective date of the decision to deny or revoke the license or certificate.

This bill would specifically make the provisions applicable to prescribed persons and other licenses, as specified.

(3) Under existing law, various actions brought under specified provisions relating to pesticides are required to be brought within 2 years of the occurrence of the violation.

This bill would require the director to bring an action to collect unpaid mill assessments and delinquent fees, or an action to collect civil penalties, as specified, within 4 years.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) Under existing law, commencing July 1, 1992, the fee paid to the Secretary of Agriculture by avocado handlers for inspection and certification is not to be greater than 18¢ per hundredweight of pounds prepared for market.

This bill would reinstate the fee limitation of 25¢ per hundredweight of pounds prepared for market that was in effect from July 1, 1990, to June 30, 1992.

This bill would also authorize market orders to contain provisions for the establishment and operation of an indemnity trust fund to cover catastrophic events, as prescribed.

(5) Existing law establishes the Organic Food Advisory Board, as prescribed, to advise the Secretary of Agriculture of his or her responsibilities, as specified.

This bill would make a technical change concerning alternate members of the board.

(6) Existing law requires the Organic Food Advisory Board to promulgate regulations concerning prohibited materials, as prescribed, and refers to an organic foods production association.

This bill would revise that reference.

(7) Existing law establishes the California Walnut Commission and authorizes the commission to promote the sale of walnuts by advertising and other promotional means, to educate and instruct the wholesale and retail trade in foreign markets, to make market surveys and analyses, and to conduct marketing research.

This bill would authorize the commission to promote the sale of walnuts for the purpose of creating, maintaining, and expanding domestic and foreign markets, to educate and instruct the wholesale and retail trade in domestic markets with regard to proper methods of handling and selling walnuts, and to present facts to, and negotiate with, local, state, federal, and foreign agencies on matters that affect the walnut industry, as prescribed. The bill would authorize the commission to conduct research, to accept prescribed funds and to make contributions to other entities for the purposes of maintaining, promoting, and enhancing the walnut industry, as specified, and to collect information, and to publish and distribute a bulletin to persons subject to regulation under these provisions. The bill would revise and make additional findings and declarations concerning the maintenance and expansion of the California walnut industry. The bill would revise the definitions of prescribed terms for purposes of these provisions.

(8) Under existing law, the provisions relating to the Walnut Commission may not become operative until a referendum is conducted. To be valid, at least 40% of the producers must participate in the referendum, and either 60% or more of the producers eligible to participate vote in favor of the provisions and these producers marketed a majority of the total quantity of walnuts produced; or a majority of the eligible producers vote in favor and they marketed 60% or more of the total quantity of the walnuts produced.

This bill would require that both a majority of producers who are affiliated with a cooperative handling walnuts, and a majority of producers who are not so affiliated, as prescribed, vote in favor of the provisions.

(9) Existing law provides prerequisites in order for food to be sold as organic, to include a specified time period since a prohibited substance was applied.

This bill would eliminate these requirements for fields or management units registered, as prescribed, prior to January 1, 1995, and during the 1995 calendar year.

This bill would also make technical changes relating to lists of approved ingredients for organic food.

(10) Existing law authorizes the Director of Health Services to adopt regulations concerning prohibited substances for processing food.

This bill would expand this authority to include the adoption of administrative lists, as prescribed.

(11) Existing law requires that on or before January 1, 1994, the Secretary of Agriculture and the Director of Health Services prepare reports to the Legislature concerning enforcement activities involving organic food.

This bill would delete that requirement.

(12) Existing law requires the Director of Health Services to prepare a report concerning information collected pursuant to the registration of persons involved with organic food processing.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would make the report an annual report and require it to be submitted to the Organic Food Advisory Board.

Ch. 610 (AB 975) Ducheny. Vehicles: motorcycle safety.

(1) Existing law requires that there be levied a state penalty in an amount equal to $10 for every $10 or fraction thereof upon every fine, penalty, or forfeiture imposed and collected by the courts for criminal offenses, as specified. The funds collected from the penalty are required to be distributed with 30% to remain on deposit in the county general fund and 70% to be deposited in the State Penalty Fund.

This bill would require that an amount of not more than $250,000 per fiscal year of the moneys otherwise required to be deposited in the State Penalty Fund be available, upon appropriation, for the purposes of the motorcyclist safety program described below.

(2) Existing law requires the Commissioner of the California Highway Patrol to administer a specified motorcyclist safety program and report to the Legislature by January 15 of each year on specified subjects regarding the program. The authority to collect fees under the program is to expire on December 31, 2002, and the authority to operate the program is to expire on January 1, 2003.

This bill would provide that the report regarding the program shall be submitted to the Senate Committee on Transportation, the Assembly Committee on Transportation, and the Joint Legislative Budget Committee not later than January 15 of each year.

The bill would delete the expiration dates specified above and would thereby extend the program indefinitely.

Ch. 611 (AB 971) Olberg. Redevelopment.

(1) Existing law specifies payments of tax revenue that the redevelopment agency for the March Air Force Base Project Area is required to make to other agencies.

This bill would provide that the March Joint Powers Redevelopment Agency is not obligated to make those payments to the County of Riverside, the County Free Library Fund, and the County Fire Fund, and instead shall make payments required under a specified cooperative agreement entered into with the County of Riverside and the March Joint Powers Authority.

(2) Existing law authorizes a redevelopment plan or amendment of a plan adopted on or after July 1, 1993, with respect to a project area within or in proximity to certain military bases that are subject to closure, to use the year of adoption or the 1994–95 fiscal year as the base year for purposes relating to determining the fiscal impact on the state of adjusting the base year.

This bill would, in addition, apportion property tax revenues to the Victor Valley Economic Development Authority based upon a calculation that would change the base year for the George Air Force Base Project Area to the 1997–98 fiscal year, as provided. By imposing new duties in the apportionment of ad valorem property tax revenues, this bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 612 (AB 640) Bates. Special license plates: fee exemptions.

Existing law provides for the issuance of, among others, special license plates entitled "Pearl Harbor Survivor," "Legion of Valor," "Combat Wounded," "Purple Heart," and "PH." Persons entitled to the issuance of these special license plates are generally required to pay an additional registration fee, renewal fee, transfer fee, and replacement fee.

This bill would exempt persons entitled to the issuance of those special license plates from the payment of the above described fees. The bill would make conforming changes to the provisions governing the issuance of these special license plates.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 613 (AB 503) Pescetti. Oil spill contingency plans: grants.

Existing law, for purposes of the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, defines "marine waters" to mean those waters subject to tidal influence, except for waters in the Sacramento-San Joaquin Delta upstream from a line running north and south through the point where Contra Costa, Sacramento, and Solano Counties meet.

The act authorizes any local government with jurisdiction over, or directly adjacent to, marine waters to apply for a grant to complete, update, or revise an oil spill contingency plan element.

This bill would specify that for purposes of those provisions authorizing grants for oil spill contingency planning, "marine waters" includes the waterways used for waterborne commercial vessel traffic to the Port of Stockton and the Port of Sacramento.

Ch. 614 (AB 414) Havice. Franchise and income taxes: statute of limitations.

Existing franchise and income tax law provides that no credit or refund shall be allowed or made after a specified period of time unless before the expiration of that period a claim for refund or credit is filed by the taxpayer or the Franchise Tax Board allows a credit, makes a refund, or mails a notice of proposed assessment.

This bill would also allow a claim or refund if a claim therefor is made prior to the expiration of a period ending 4 years from the date the return was filed, if filed within the time prescribed by certain laws providing for an extension of time to file, as provided.

Ch. 615 (AB 1127) Steinberg. Employee safety: violations.

Under existing law, any person who believes that he or she has been discharged or otherwise discriminated against in violation of the Labor Code under the jurisdiction of the Labor Commissioner may file a complaint with the Division of Labor Standards Enforcement within 30 days after the occurrence of the violation.

This bill would extend from 30 days to 6 months that period of time within which a complaint may be filed with the division.

Existing law provides that the provisions of the California Occupational Safety and Health Act of 1973 (hereafter the act) have no application to, may not be considered in, and may not be admitted into, evidence in any personal injury or wrongful death action arising after January 1, 1972, except as between an employee and his or her employer.

This bill instead would provide that neither the issuance of, or failure to issue, a citation by the Division of Occupational Safety and Health (hereafter the division) has any application to, nor may be considered in, nor may be admitted into, evidence in any personal injury or wrongful death action, except as between an employee and his or her employer. The bill also would provide that Sections 452 and 669 of the Evidence Code would apply to the act and the occupational safety and health standards and orders promulgated under the Labor Code in the same manner as any other statute, ordinance, or regulation.

Existing law provides that if the division secures a complaint from an employee, the employee's representative, or an employer of the employee directly involved in an unsafe place of employment, that his or her employment or place of employment is not safe, the division is required to summarily investigate the complaint as soon as possible, but not later than 3 working days after receipt of a complaint charging a serious violation, and not later than 14 days after receipt of a complaint charging a nonserious violation. Under existing law the division is not required to respond to a complaint if it determines that either the complaint is intended to willfully harass an employer or is without reasonable basis.

This bill would require the division additionally to conduct those investigations if a complaint is received by the employee's representative, including, but not limited to, an attorney, health or safety professional, union representative, or representative of a government agency. The bill would also provide that the division is not required to respond to a complaint if, from the facts stated in the complaint, it determines that the complaint is intended to willfully harass an employer and is without any reasonable basis.

Existing law provides that every employer, and every officer, management official, or supervisor having direction, management, control, or custody of any employment, place of employment, or other employee is guilty of a misdemeanor if it, among other things,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

knowingly or negligently violates any standard, order, or special order, or any of certain provisions of law, or part thereof, authorized by the act, the violation of which is deemed to be a serious violation, as defined.

This bill would also make conforming changes to other provisions of law that impose civil and criminal penalties on employers for violation of specified occupational safety and health requirements. The bill would increase from $5,000 to $15,000 the maximum fine that may be imposed for a violation of those provisions. The bill also would increase the length of incarceration and the monetary penalties that may be imposed for a willful or repeated violation of certain employee safety standards that cause death to any employee, or cause permanent or prolonged impairment of the body of any employee. The bill also would authorize a court to impose a fine in an amount less than certain minimums specified in the bill if the court finds that it is in the interest of justice to do so and states its findings and reasons on the record.

Existing law prohibits civil penalties from being assessed against employers that are governmental agencies for violations of certain employee safety standards.

This bill would repeal that prohibition and require civil or administrative penalties against a school district, community college district, California State University, University of California, or other specified educational entities to be deposited into the Workplace Health and Safety Revolving Fund and refunded or used for specified purposes.

Existing law requires the Occupational Safety and Health Standards Board (hereafter the standards board), on or before January 1, 1995, to adopt standards for ergonomics in the workplace designed to minimize the instances of injury from repetitive motion.

This bill would reaffirm the standards board's continuing duty to adopt those standards.

By making certain violations of employee safety standards by employers subject to criminal penalties, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 616 (AB 1268) Kuehl. Labor disputes.

Existing federal law, the Norris-LaGuardia Act, among other things, limits the liability of labor unions, or officers or members thereof, for the unlawful acts of individual members except upon clear proof of actual participation in, or actual authorization or ratification of, those unlawful acts. That law also limits the authority of a court to issue a temporary or permanent injunction in a labor dispute except upon a hearing establishing specified facts and upon the filing of an undertaking, the amount thereof to be set by the court, with the undertaking to have a specified legal effect; and restricts the right to a restraining order or injunctive relief in a labor dispute, as specified.

This bill would enact similar provisions under state law.

Ch. 617 (AB 34) Steinberg. Mental health funding: local grants.

Existing law provides for the allocation of state funds to counties for mental health programs.

This bill would make various statements of legislative findings and intent regarding the need to provide sufficient funds to counties for adult mental health and related services.

Existing law requires the State Department of Mental Health to establish service standards relating to mental health services. These standards are required to include, among other things, plans for services and evaluation strategies.

This bill would also require these standards to include coordination and access to related medications, substance abuse services, housing assistance, vocational rehabilitation, and veterans' services.

This bill would require the department to select up to 3 counties or portions of counties for eligibility for demonstration grants to be used to provide comprehensive services to certain adults who are severely mentally ill. The bill would require the director to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

establish a methodology for awarding these grants and to establish a designated advisory committee.

The bill would reappropriate $10,000,000 to the State Department of Mental Health from a specified item in the Budget Act of 1999 for the purposes of grants provided for under the bill and would authorize the Department of Finance to transfer certain Budget Act funds for purposes of the bill, as provided.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 618 (AB 62) Papan. Rental car insurance limited licenses.

(1) Existing law governing insurance provides for the licensure and regulation of production agencies, including, among others, insurance agents, life agents, insurance brokers, travel insurance agents, cargo shippers' agents, and variable contract agents. Existing law makes it a crime to act or assume to act in a capacity for which a production agency license is required without having that license.

This bill would additionally create and establish fees for a new type of production agency license, called a rental car agent license, which would authorize a rental car company or the franchisee of a rental car company to offer to its customers insurance of an authorized insurer for specified types of insurance, if the insurance is offered by a representative of the licensee who is an endorsee on the license and the insurance is sold as part of a vehicle rental transaction. It would require a licensee to maintain the name of each rental car representative who is an endorsee on the license, and to annually file with the Insurance Commissioner a certification of the number of endorsees, a statement that no person other than an endorsee sells or offers insurance on its behalf, and that all endorsees have completed training as required. It would authorize the commissioner to take certain remedial measures for violations of these provisions. The bill would require a rental car agent to provide brochures to customers, as specified, relating to insurance offered, and would specify both required and prohibited conduct of a rental car agent. These provisions would become operative on January 1, 2001.

(2) By creating a new category of production agency license, this bill would expand the scope of activities for which a license is required. Thus, the bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 619 (AB 110) Baugh. Miscarriage of justice: compensation.

Existing law provides for making a claim for money or damages against the state for an injury for which the state is liable.

This bill would appropriate $620,000 from the General Fund to the Department of Justice for payment to Kevin Lee Green in order to recompense him for a miscarriage of justice and wrongful incarceration by the state. The bill would make extensive findings and declarations supporting this appropriation. The bill would provide that this compensation is tax exempt, as specified, and apply this provision to taxable years beginning on or after January 1, 1999.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 620 (AB 118) Washington. Foster care liability.

Existing law requires a claim for personal injury against a public entity, which includes the state, the Regents of the University of California, a county, city, district, public authority, public agency, and any other political subdivision or public corporation in the state, or against an employee of a public entity, to be presented not later than 6 months after accrual of the cause of action.

Existing law provides that when a claim is not filed within the 6-month period, an application for leave to present the claim within a reasonable time not to exceed one year after the accrual of the cause of action may be filed in accordance with specified provisions. Existing law provides that in computing that one-year period, the time during which the person who sustained the injury or loss is a minor shall be counted, but time

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

during which the person is mentally incapacitated and without a guardian or conservator shall not be counted.

This bill would provide that time during which a minor is a dependent of the court pursuant to certain provisions of law shall, under certain circumstances, also not be counted in that one-year period.

Existing law sets forth the policy of the Legislature with respect to foster care, including the policy that children have a right to a normal home life.

This bill would expand that policy to refer to the right to freedom from abuse.

Ch. 621 (AB 293) Wesson. Laser pointers: prohibitions on sale, possession, and use.

Existing law provides that every person who, except in self-defense, knowingly draws or exhibits a laser scope, as defined, that projects a colored target on a person in a threatening manner against that person with specific intent to cause a reasonable person apprehension or fear of bodily harm is guilty of a misdemeanor, punishable by imprisonment in a county jail for up to 30 days.

This bill would revise this provision to apply to the situation where a person aims or points a laser scope at another person instead of knowingly draws or exhibits a laser scope that projects a colored target on a person and would include a laser pointer in this revised provision. The bill would delete the element of apprehension.

The bill also would provide that any person who directs the beam from a laser pointer directly or indirectly into the eye or eyes of another person or specified service dogs or into a moving vehicle with the intent to harass or annoy the other person or service dog or the occupants of the moving vehicle, or who knowingly sells a laser pointer to a person 17 years of age or younger, unless he or she is accompanied and supervised by a parent, legal guardian, or any other adult 18 years of age or older, or any person who possesses a laser pointer on any elementary or secondary school premises unless possession of a laser pointer on elementary or secondary school premises is for a valid instructional or other school-related purpose, including employment, shall be guilty of an infraction and shall be punished by either a fine of $50 or 4 hours of community service. A 2nd or subsequent violation of any of these offenses would be an infraction for which the person shall be punished by either a fine of $100 or 8 hours of community service.

By creating new crimes, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 622 (AB 300) Corbett. Seismic safety: schools.

Existing law, commonly known as the Field Act, requires that school buildings, as defined, for use in kindergarten, and grades 1 to 14, inclusive, meet certain structural safety requirements. Under the Field Act, plans for the construction, reconstruction, or alteration of any school building must be approved by the Department of General Services.

This bill would require the Department of General Services to conduct an inventory of public school buildings that are concrete tilt-up school buildings and school buildings with nonwood frame walls that do not meet the minimum requirements of the 1976 Uniform Building Code and to submit a report to the Legislature and the Governor by December 31, 2001, summarizing its findings and making recommendations. The bill would require the Department of General Services to pursue nonstate funding of up to $500,000 for the purposes of conducting a seismic safety survey to identify the most vulnerable school buildings in the state. If the Department of General Services is not able to secure sufficient nonstate funding, the bill would require the department to seek funding from the Legislature through future Budget Acts or other legislation.

Ch. 623 (AB 466) Mazzoni. Teachers.

(1) Existing law sets forth the requirements an out-of-state applicant for the preliminary multiple or single subject teaching credential is required to meet and the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

requirements for a special education specialists credential. Existing law authorizes the Commission on Teacher Credentialing to issue a preliminary multiple or single subject teaching credential to an out-of-state applicant pending the applicant's completion of certain of the requirements for that credential, including completion of a course or examination on the various methods of teaching reading. Existing law requires an out-of-state applicant for a clear multiple or single subject credential to complete a 5th year of study.

This bill would delete the option for an out-of-state candidate for a preliminary single subject credential to complete an examination on the various methods of teaching reading and would, commencing January 1, 2000, require an out-of-state applicant for the preliminary multiple or single subject teaching credential to successfully complete a commission-approved program, course, or examination in the use of computers in the classroom and would authorize the issuance of that credential pending completion of that course or examination.

The bill would authorize the commission to issue a preliminary special education specialist instruction credential, for a period not to exceed 2 years, to a qualifying out-of-state applicant pending completion of certain requirements.

The bill would provide an out-of-state applicant for a clear multiple or single subject credential the option of completing an approved induction program instead of a 5th year of study.

(2) Existing law sets forth the minimum requirements for the preliminary multiple or single subject teaching credential. Among those requirements, commencing January 1, 2000, is the demonstration of basic competency in the use of computers in the classroom.

This bill would require that this competency be determined by either successfully completing a commission-approved program or course or successfully passing an assessment that is developed, approved, and administered by the commission.

(3) Existing law requires, commencing on January 1, 2000, an applicant for the specialist teaching credential in special education to demonstrate that he or she passed the reading instruction competence assessment before the initial issuance of that specialist teaching credential but exempts an applicant for an early childhood special education certificate from this requirement.

This bill would also exempt from that requirement an applicant for an early childhood special education credential and would provide that the requirement applies to an applicant who is not credentialed in any state.

(4) Existing law establishes the Pre-Internship Teaching Program and provides that when resources remain after funding preinterns pursuing multiple subject emergency permits, the Commission on Teacher Credentialing may issue a preintern teaching certificate instead of an emergency single subject permit to an individual employed by a school district who meets the minimum requirements for the preintern teaching certificate.

This bill would include an emergency education specialist instruction permit with the emergency single subject permit as the permits a preintern certificate may replace after funding remains.

Existing law includes in the minimum requirements for the preintern teaching certificate completion of the number of units, as set by the Commission on Teacher Credentialing, in the subject to be taught.

This bill would instead require the completion of the number of units, as set by the commission, for the multiple subject or single subject preintern teaching certificate and would add to the minimum requirements the number of units in education or the number of years of experience in special education, as set by the commission for the education specialist instruction preintern teaching certificate.

(5) Existing law requires the governing board of a school district to employ persons in public school service requiring certification qualifications. Existing law sets forth the minimum requirements for a services credential in a specialization in clinical or rehabilitative services. This credential authorizes the holder to perform, at all grade levels, the service approved by the commission as designated on the credential which may include speech, language, and hearing services.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the governing board of a school district or a county office of education to contract with or employ an individual who holds a license issued by the Speech-Language Pathology and Audiology Board and has earned a masters degree in communication disorders to provide speech and language services if that individual before employment or execution of the contract meets requirements related to the state basic skills proficiency test and has not been convicted of a violent or serious felony as defined.

(6) Existing law requires that all fees collected by the Commission on Teacher Credentialing for tests, examinations, or assessments be deposited in the Test Development and Administration Account.

This bill would appropriate $700,000 from the Test Development and Administration Account of the Teacher Credential Fund to the commission for the purpose of providing the commission with the funds needed to complete statutorily mandated test-validation studies.

(7) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 624 (AB 670) Papan. Transit districts: property acquisition.

Existing law authorizes the San Francisco Bay Area Rapid Transit District, the Santa Clara County Transit District, and the San Mateo County Transit District to take by gift, or take or convey by grant, purchase, devise, or lease, and hold and enjoy, real and personal property of every kind within or without the district necessary to the full or convenient exercise of the district's powers.

This bill would authorize those powers for those districts as necessary for, incidental to, or convenient for, transit-oriented joint development projects, as defined, that comply with the land use and zoning regulations of the city, county, or city and county in which the project is located.

The bill would extend the authority granted under the bill to any joint powers agency of which the San Mateo County Transit District is a member and for which that district serves as the managing agency.

Ch. 625 (AB 883) Committee on Rules. State property: design-build.

Existing law authorizes the Director of General Services to purchase, exchange, or otherwise acquire real property and construct facilities within the jurisdiction of the Capitol Area Plan in Sacramento for use by the State Department of Education, the State Department of Health Services, and the Department of General Services as anchor tenants on specific blocks within the Capitol area. The Department of General Services is authorized to acquire the facilities on a design-build basis, and, if it does so, to submit specified information prior to entering into an agreement.

This bill would further require the department, if it proceeds to acquire the facilities on a design-build basis, to provide the Legislature, beginning on July 1, 1999, and every 3 months thereafter, with a status report on the design-build approach and a final report when the facilities are completed. The bill would also provide that project costs for these facilities may include payments for actual moving and related expenses for the Francis House in Sacramento in an amount that may not exceed $120,000.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 626 (AB 884) Kuehl. Advance-fee talent services.

Existing law requires talent agencies, as defined, to be licensed by the Labor Commissioner prior to engaging in the occupation of seeking employment or engagements for an artist or artists.

This bill would require any contract of an advance-fee talent service, as defined, with an artist for the provision of services for an advance fee, as defined, to be a written contract containing specified provisions, including provisions governing refunds. The Labor Commissioner would be authorized to adopt regulations prescribing additional provisions required in such a contract. An advance-fee talent service would be required to file a bond or deposit of $10,000 with the Labor Commissioner. The bill would specify procedures for making claims against such a bond or deposit held by the Labor Commissioner.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would also prohibit certain acts by an advance-fee talent service. A violation of the bill would be a crime punishable as a misdemeanor. In creating a new crime the bill would impose a state-mandated local program. The bill would authorize an artist injured by the breach of a contract subject to the bill or a violation of the bill to bring an action for treble damages. The bill would authorize an award of attorney's fees to a prevailing plaintiff, and would authorize an award of punitive damages for willful violations.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 627 (AB 1232) Committee on Agriculture. Pierce Disease research.

Existing law requires the Secretary of Food and Agriculture to establish a Pest Management Research Committee to award competitive grants to conduct pest management research projects.

This bill, in addition, would appropriate $750,000 each year for 3 specified fiscal years from the General Fund to the secretary for the purpose of funding, on a competitive basis, Pierce Disease research. The bill also would specify that the appropriation for each year shall become operative only upon an annual commitment during that year of at least $250,000 in private contributions from the California viticulture and enology industry.

In addition, the bill would require the secretary to appoint an advisory task force consisting of scientific experts, including, but not limited to, university researchers and agricultural representatives, for the purpose of advising the secretary on research to control and eradicate Pierce Disease.

The bill would repeal these provisions on January 1, 2005.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 628 (AB 1318) Bates. Transportation: federal-aid highway funds: nonfederal share.

Existing federal law requires the federal share payable on any federal-aid highway project to be 90% of the total cost, except as specified. Certain federal provisions require states to provide a nonfederal share. States are authorized to use certain toll revenues as a credit toward the nonfederal share. California is also authorized to use private entity expenditures for construction of certain toll roads as a credit toward the nonfederal share.

This bill would prohibit using the specified funds and expenditures as a credit toward the nonfederal share for any project that is not within the county or counties in which the toll facility is located, unless the Department of Transportation determines that there is no project within that county or counties for which the credit may be used. The bill would require the department to obtain specific project proposals for use of the credit from the regional transportation planning agencies and county transportation commissions of the county or counties in which the toll facility is located and contingency project proposals for use of the credit outside the county or counties in which the toll facility is located should the department make the determination specified above.

The bill would prohibit certain county share allocations from being increased or reduced as a consequence of any toll revenues or private agency expenditures that are utilized as a credit toward the nonfederal share of any federally funded project.

Ch. 629 (AB 1332) Lowenthal. Nonhazardous waste: determination.

Existing law requires the Department of Toxic Substances Control to adopt, by regulation, criteria and guidelines for the identification of hazardous waste and requires any waste that conforms to a criteria adopted by the department to be managed in accordance with the hazardous waste control laws.

This bill would require the department to develop and implement a comprehensive training, education, and enforcement program to increase awareness of the requirements governing the determination on whether a waste is hazardous and to enforce those requirements, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 630 (SB 399) Ortiz. State employees: State Bargaining Units 1, 3, 4, 11, and 15.

(1) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions of specified memoranda of understanding entered into between the state employer and the California State Employees Association, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that provisions of any memorandum of understanding approved by any section of this bill that require the expenditure of funds, shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer and the affected employee organization shall meet and confer to renegotiate the affected provisions.

(2) Existing law prescribes normal contribution rates for state miscellaneous and state industrial members of the Public Employees' Retirement System.

This bill would provide that the normal contribution rate applicable to those members in State Bargaining Units 4 and 15 from January 1, 2000, to August 31, 2000, shall be determined pursuant to a memorandum of understanding.

(3) Existing law authorizes the Department of Personnel Administration to prescribe regulations and conditions with respect to the administration of employee training in general and authorizes the department to include specified elements as conditions for receiving training.

This bill would create in the State Treasury the State Employee Scholarship Fund, a continuously appropriated fund, to establish a program for career advancement to assist eligible state employees to participate in educational programs. The fund would be administered by the Department of Personnel Administration. The bill would provide that moneys in the fund shall be allocated from the amount negotiated in memoranda of understanding between the state and recognized employee organizations, and appropriated by the Legislature for the 2000–01 fiscal year. The fund would cease to exist on June 30, 2001, unless the existence of the fund is extended by statute and that statute is enacted and becomes effective prior to that date.

This bill would appropriate $200,000 from the General Fund for transfer to the State Employee Scholarship Fund to provide for the establishment and administration of the state employee scholarship program.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 631 (SB 450) Speier. Physicians and surgeons: advertising: plastic surgery.

Existing law prohibits licensed physicians and surgeons and doctors of podiatric medicine from including in any advertising a statement that he or she is certified or eligible for certification by a board or association unless that board or association meets specified criteria. Violation of this prohibition is a misdemeanor.

This bill would require physicians and surgeons and doctors of podiatric medicine who are certified by a board or association meeting that specified criteria and who so specify in any advertising to include in that advertising the full name of the certifying board, as specified. The bill would make another related change. The bill would also provide that a physician and surgeon or doctor of podiatric medicine licensed by the Medical Board of California who knowingly and intentionally violates these provisions may be cited and assessed an administrative fine, as specified. By changing the definition of a crime, this bill would impose a state-mandated local program.

Existing law specifies the fees for certification as a physician and surgeon.

This bill would provide for the waiver of that fee for a physician and surgeon, or in the case of renewal, a doctor of podiatric medicine, who certifies that the sole purpose for seeking renewal or restoration of licensure is unpaid service to the needy, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would also require the board to adopt extraction and postoperative care standards in regard to liposuction procedures performed by a physician and surgeon outside of a general acute care hospital, as defined, and would further provide that a violation of these standards constitutes unprofessional conduct.

This bill would incorporate additional changes in Section 651 of the Business and Professions Code proposed by SB 836, to be operative if this bill and AB 836 are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 632 (SB 713) Burton. State Teachers' Retirement System: benefits.

Under the State Teachers' Retirement Law, retired members, option beneficiaries, and surviving spouses of the Defined Benefit Program, as defined, receive monthly allowances that are subject to supplementary increases to preserve their purchasing power, as specified.

This bill would establish minimum annual allowance amounts payable to specified retired members, option beneficiaries, and surviving spouses, which amounts would vary according to the member's years of credited service, subject to specified exclusions and exceptions. The bill would appropriate $750,000 from the Teacher's Retirement Fund to pay the administrative costs of implementing these provisions.

Ch. 633 (SB 800) Dunn. Public Employees' Retirement System: local safety members.

The Public Employees' Retirement Law limits retirement allowances of local safety members to 75% of final compensation.

This bill would increase that limit to 85% for local safety members who retire on and after January 1, 2000.

This bill would incorporate additional amendments to Section 21362 of the Government Code proposed by SB 400, contingent upon the prior enactment of that bill.

This bill would incorporate additional amendments to Section 21363 of the Government Code proposed by AB 813, SB 400, or both, contingent upon the prior enactment of one or both of those bills.

This bill would incorporate additional amendments to Section 21369 of the Government Code proposed by SB 400, contingent upon the prior enactment of that bill.

This bill would incorporate additional amendments to Section 21370 of the Government Code proposed by AB 813, contingent upon the prior enactment of that bill.

Ch. 634 (SB 955) Escutia. Child welfare services: out-of-home care.

Under the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, payments are made to foster care providers, including group homes, in accordance with specified rate reimbursement provisions.

This bill would increase reimbursement rates for certain group home providers for the 1999–2000 fiscal year.

Because funds are continuously appropriated from the General Fund to pay a share of the cost of AFDC-FC payments, the bill would constitute an appropriation.

Because each county is required to pay for a share of the cost of the AFDC-FC payments, the bill would create a state-mandated local program.

Existing law provides for the establishment and support of a public system of statewide child welfare services and requires all counties to have sole responsibility for the operation of the child welfare services program.

This bill would establish various goals with respect to serving the needs of children who are alleged to be abused or neglected and would require the state and the State Department of Social Services to encourage the development of approaches to child protection that include taking specified actions in order to achieve these goals. It would further require the department to report to the Legislature on the results of these new provisions by January 1, 2002.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 635 (SB 1019) Vasconcellos. Public officers: Santa Clara County.

Existing law defines a custodial officer as a public officer, not a peace officer, employed by a law enforcement agency of specified counties, who has specified authority and responsibility. The duties of this custodial officer may include the serving of warrants, court orders, writs, and subpoenas in a detention facility or under circumstances arising directly out of maintaining custody of prisoners and related tasks.

This bill would include Santa Clara County among the specified counties and would authorize custodial officers employed by the Santa Clara County Department of Corrections to perform certain additional duties that also may be performed at the Santa Clara Valley Medical Center under specified circumstances. This bill would provide that these provisions do not authorize a custodial officer to carry or possess a firearm when the officer is not on duty and express the intent of the Legislature regarding the purpose of these provisions.

The bill would declare that it is to take effect immediately, as an urgency statute.

Ch. 636 (SB 1031) Hughes. Student financial aid: Student Aid Commission: Federal Family Education Loan Program.

(1) Existing law establishes the Student Aid Commission as the primary state agency for the administration of state-authorized student financial aid programs available to students attending all segments of postsecondary education. Existing state law authorizes the State of California to participate in the Federal Family Education Loan Program for eligible postsecondary students and their parents and its various component programs. Existing law authorizes the commission to establish an auxiliary organization as a nonprofit public benefit corporation for the purpose of providing operational and administrative services for the commission's participation in the Federal Family Education Loan Program. Existing law requires that the operations of the auxiliary organization be conducted in conformity with an operating agreement approved annually by the commission.

This bill, on and after January 1, 2002, would authorize the operating agreement to be conducted in conformity with an operating agreement approved by the commission for a period not to exceed 5 years.

(2) Existing law provides for participation by the State of California in the Federal Family Education Loan Program. Existing law specifies that one of the purposes for California's participation in the federal program is to provide a source of loans to eligible students in order to assist them in meeting educational costs at eligible schools of their choice.

This bill would additionally specify that one of the purposes for California's participation in the federal program is to provide a source of loans to eligible students, regardless of their domicile or the location of the educational institutions they attend, to assist them in meeting educational costs.

(3) Existing law establishes the State Guaranteed Loan Reserve Fund and requires the deposit of all money received from federal, state, or local governments, or from other private or public sources, for the purposes of California's participation in the Federal Family Education Loan Program in that fund.

This bill would abolish the State Guaranteed Loan Reserve Fund and instead establish the Federal Student Loan Reserve Fund and the Student Loan Operating Fund for the deposit of funds for the purposes of the federal program. The bill would deem the contents of the Federal Student Loan Reserve Fund to be the property of the federal government and the contents of the Student Loan Operating Fund to be the property of the Student Aid Commission, acting on behalf of the State of California. The bill would

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

provide that the contents of the Federal Student Loan Reserve Fund and the Student Loan Operating Fund are continuously appropriated for the purposes of the bill.

Ch. 637 (SB 1121) Alarcon. California Debt Limit Allocation Committee: rental housing.

(1) Existing law establishes the membership of the California Debt Limit Allocation Committee and requires the Treasurer to serve as the chairperson of the committee and requires the office of Treasurer to provide any administrative assistance and support staff that is needed for the committee to operate.

This bill would also require the office of Treasurer to provide an executive director for the committee and would authorize the committee to authorize the executive director to enter into contracts on behalf of the committee.

(2) Existing law establishes various programs under the Department of Housing and Community Development, including the California Housing Rehabilitation Program for the development of low-income and multifamily rental housing in the state.

This bill would create the Multifamily Housing Program under the department to provide a standardized set of program rules and features applicable to all housing types based on the existing California Housing Rehabilitation Program. The bill would provide financial assistance in the form of a deferred payment loan to fund projects for, among other things, the development and construction of new, and rehabilitation, or acquisition and rehabilitation, of existing, transitional or rental housing developments. The bill would establish a project selection process for loans for these projects.

The bill would also require a regulatory agreement between the department and the housing sponsor and would set up a default reserve fund to protect the department's security interest in any project funded under these provisions.

(3) Existing law establishes the Families Moving to Work Program administered by the Department of Housing and Community Development as a component of the Rental Housing Construction Program.

This bill would require the Families Moving to Work Program to be administered as a component of the Multifamily Housing Program, and would make related changes. The bill would require specified funds transferred by the Budget Act of 1999 to the Housing Rehabilitation Loan Fund to be used for the Multifamily Housing Program. Because that fund is continuously appropriated for specified purposes, this bill would make an appropriation by expanding the purposes of the fund.

(4) Existing law contains provisions relating to assisting the development of community housing developments.

This bill would repeal those provisions.

Ch. 638 (SB 1147) Leslie. Resources: bonds: parks, water, clean air, and coastal protection act.

(1) AB 18 of the 1999–2000 Regular Session, which has been adopted by the Legislature, would enact the Safe Neighborhood Parks, Clean Water, Clean Air, and Coastal Protection Bond Act of 2000 (the Villaraigosa-Keeley Act), which would authorize, for the purpose of financing a program for the acquisition, development, improvement, rehabilitation, restoration, enhancement, and protection of park, recreational, cultural, historical, fish and wildlife, lake, riparian, reservoir, river, and coastal resources, as specified, the issuance, pursuant to the State General Obligation Bond Law, of bonds in the amount of $2,100,000,000.

This bill would revise certain provisions of AB 18, as adopted by the Legislature.

(2) The bill would provide that if both this bill and AB 18 of the 1999–2000 Regular Session are chaptered, specified sections of the Public Resources Code added by this bill would prevail over and supersede those sections of the same number of the Public Resources Code as added by AB 18. The bill would require the Secretary of State to submit the sections added to the Public Resources Code by this bill to the voters at the March 7, 2000, statewide general election, as part of the bond act.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 639 (SB 1156) Sher. San Francisco Bay Area Conservancy Program Account: appropriation.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law establishes the San Francisco Bay Area Conservancy Program administered by the State Coastal Conservancy, for the purpose of addressing specified resources and recreational goals for the San Francisco Bay Area in a coordinated, comprehensive, and effective way. Existing law creates the San Francisco Bay Area Conservancy Program Account in the State Coastal Conservancy Fund, for the purpose of depositing and disbursing funds for the administration and implementation of the program. Existing law requires that the money in the account be segregated into 2 subaccounts; the first of which is required to contain funds that are appropriated by the Legislature for the purposes of the program; the second of which contains funds that are derived from all other sources, exclusive of federal funds, including private donations, fees and penalties, and local government contributions, for the purposes of the program.

This bill would require that the funds in the second subaccount be continuously appropriated to the State Coastal Conservancy, without regard to fiscal year, for expenditure for the purposes of the program, thereby making an appropriation.

Ch. 640 (SB 1186) Ortiz. Rice straw.

(1) Existing law, the Connelly-Areias-Chandler Rice Straw Burning Reduction Act, among other things, required the State Air Resources Board and the Department of Consumer Affairs, on or before September 1, 1992, to establish an advisory committee to develop a list of priority goals for the development of alternative uses of rice straw for the purpose of developing feasible and cost-effective alternatives to rice straw burning.

This bill would require the State Air Resources Board, in consultation with the Department of Food and Agriculture, on or before January 1, 2001, and in cooperation with specified others, to prepare and submit to the Legislature recommendations for ensuring consistency and predictability in the supply of rice straw for cost-effective uses, as provided.

(2) This bill would provide that specified funds appropriated pursuant to the Budget Act of 1998 to the state board for purposes of developing rice straw demonstration projects, which were not encumbered or otherwise expended during the 1998 fiscal year, shall be available for encumbrance by the state board during the 1999–2000 fiscal year for purposes of the rice straw demonstration project.

Ch. 641 (SB 1196) Morrow. Court consolidations: marshal's office.

(1) Existing law authorizes the consolidation of court-related services in various counties.

This bill would authorize the Board of Supervisors of each of the Counties of Merced, Orange, and Shasta to commence public hearings regarding the consolidation of court services in the county, and would provide that an election among the judges of the consolidated courts of the county may be conducted concurrently in order to provide an advisory recommendation on the abolition of the marshal's office and the transferring of court-related services within the county to the sheriff's department. The bill would also provide that the Board of Supervisors may elect to abolish the marshal's office in the county assigning the duties of court services to the office of the sheriff. If the board of supervisors elects to abolish the marshal's office, the duties and staff of the marshal's office would be merged into the sheriff's department. The merger of the departments would be required to occur pursuant to the board's determination, and to be concluded no later than July 1, 2000. The bill would also specify the method for the assignment of bailiffs in specified counties and the methods of employment of personnel of the marshal's office and the sheriff's office following any abolition and consolidation. The bill also would provide for the abolition of the San Diego County Marshal's Office and the creation of a bureau in the San Diego County Sheriff's Office under which court security services and the service of civil and criminal process would be consolidated, upon the adoption of a resolution by the board of supervisors on or after January 1, 2000, as specified.

(2) Existing law requires, commencing on July 1, 1999, and thereafter, the trial courts of a county of the seventh class in which court security was provided by the marshal's office as of July 1, 1998, to enter into an agreement with the sheriff's department regarding the provision of court security services if the marshal's office is abolished.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require, commencing on July 1, 1999, and thereafter, the trial courts of all counties in which court security was provided by the marshal's office as of July 1, 1998, to enter into an agreement regarding the provision of court security services with the successor sheriff's department if the marshal's office is abolished, thus establishing a state-mandated local program.

(3) The bill would state that these provisions constitute necessary special legislation.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(5) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 642 (SB 1207) Polanco. Gambling: slot machines.

Existing state law generally prohibits the possession or keeping of slot machines. For that purpose, a slot machine includes a machine that may be readily converted into an operable slot machine. Existing state law authorizes the sale, transportation, storage, and manufacture of gambling devices if only for interstate or foreign commerce, but prohibits the display of those devices to the general public.

Existing federal law prohibits the transportation of any gambling device to a state, but not if the state has enacted a law providing for the exemption of the state from the provisions of that provision, as specified.

This bill would provide that it is lawful for any person to transport and possess any slot machine or device for display at a trade show, conference, or convention being held within this state, but only if the slot machine or device is adjusted to render the machine or device inoperable. It would declare that this provision is intended to constitute a state exemption as provided in the above-mentioned federal law.

Ch. 643 (AB 1679) Committee on Local Government. Local Government Omnibus Act of 1999.

(1) Existing law requires the Commission on State Mandates to adopt procedures to receive claims of state-mandated local costs.

This bill would impose additional procedural requirements on the commission with regard to initial reimbursement claims, parameters, guidelines, reduced claims, and claiming instructions. The bill would also revise the deadlines for submitting claims to the commission.

(2) Existing law authorizes the county board of supervisors by a $^{4}/_{5}$ vote to take various actions concerning the leasing, subleasing, and management of property.

This bill would additionally authorize the San Bernardino County Board of Supervisors by a $^{4}/_{5}$ vote to directly enter into a lease involving all or any part of county-owned, leased, or managed property devoted for agricultural purposes.

(3) Existing law requires that one copy of a county charter proposal or change in the charter ratified by the voters be recorded in the office of the county recorder and filed in the office of the county elections official with other specified documents. A copy of a city or city and county charter proposal or change in the charter ratified by the voters is required to be filed with the recorder of the county in which the city is located or the recorder of the city and county.

This bill would additionally require the filing of those documents with the Secretary of State.

(4) Existing law prescribes the types of investments in which a local agency may invest its funds. One of these investment types is medium-term notes of a maximum term of 5 years maturity issued by domestic corporations or depository institutions.

This bill would define "medium-term notes" for this purpose as all corporate and depository institution debt securities of a specified maturity and rating.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) Existing law repeals on January 1, 2000, an authorization for a city or county to permit windows in dwellings to open into areas designed and built as passive solar energy collectors.

This bill would delete this repealer, thereby extending this authority indefinitely.

(6) Existing law authorizes the district board of an air pollution control district or of an air quality management district to establish, by regulation, a permit system that requires, except as provided, that before any person builds, erects, alters, replaces, operates, or uses any article, machine, equipment, or other contrivance that may cause the issuance of air contaminants, the person obtain a permit to do so from the air pollution control officer of that district. Existing law provides that if a permit is denied, the applicant, within 10 days after receipt of the notice of denial, may request the hearing board of the district to hold a hearing on whether the permit was properly denied. Existing law also provides that within 10 days of any decision or action pertaining to the issuance of a permit by a district, or within 10 days after mailing, or after publication and mailing, as specified, of a notice of issuance of a permit, any aggrieved person who participated in the action before the district may request the hearing board of the district to hold a public hearing to determine whether the permit was properly issued.

This bill would extend those 10-day time periods to 30 days.

(7) Existing law provides for the allocation of property tax revenues to special districts according to specified formulas.

This bill would revise the formula for determining the total annual revenues of a special district that provides fire protection or fire suppression services. This provision would not become operative if AB 417 is enacted, as specified.

(8) Under existing law, the board of supervisors of a county is authorized to establish an authority for specific purposes and to impose a transactions and use tax of 0.25% or 0.5% if, among other things, the ordinance is approved by a majority of the voters voting on the issue.

This bill instead would provide that the vote to approve the ordinance shall be in the amount that is otherwise required by law.

Ch. 644 (AB 530) Papan. Local government finance.

Under existing law, funds that belong to, or are in the custody of, a local agency or local agency moneys that are not required for the immediate necessity of the local agency may be invested in any of several specified investments, including reverse repurchase agreements.

This bill would additionally authorize the legislative body of a local agency to invest the funds in securities lending agreements subject to the conditions similar to investing funds in reverse repurchase agreements.

This bill would incorporate additional changes in Sections 53601 and 53635 of the Government Code proposed by AB 1679, to be operative if AB 1679 and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 645 (AB 658) Washington. School safety.

Existing law establishes the School Safety and Violence Prevention Act, a statewide program administered by the Superintendent of Public Instruction, who, pursuant to the act, allocates funds to school districts that maintain any of grades 8 to 12, inclusive, that certify the funds will be used as required by the act. Funds allocated pursuant to this program are required to be expended for purposes that include, but are not limited to, providing conflict resolution personnel, providing on-campus communication devices, establishing staff training programs, and establishing cooperative arrangements with law enforcement agencies.

This bill would change the name of the School Safety and Violence Prevention Act to the Carl Washington School Safety and Violence Prevention Act. The bill would also authorize county offices of education to participate in the program established pursuant to that act.

This bill would appropriate $1,000,000 from the General Fund to the Superintendent of Public Instruction for allocation exclusively to county offices of education for the purposes of funding the activities and full participation of those offices in the Carl Washington School Safety and Violence Prevention Act and would require these funds

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

to be available to county offices of education in the same manner that funds are made available to school districts pursuant to that act. The funds appropriated by this bill would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

This bill would declare that it would take effect immediately as an urgency statute.

Ch. 646 (AB 1600) Committee on Education. Education.

(1) Existing law provides for the adoption of the merit system for classified county school employees in certain circumstances. A county office of education adopting the merit system is required to cause a personnel commission to be appointed in a prescribed manner.

This bill would authorize any personnel commission in a county of a third class to, upon meeting certain requirements, adopt a regulation providing for the appointment of one or more alternate members of the personnel commission.

(2) Existing law defines various terms for purposes of the Child Care and Development Services Act, including the term "cost." Under existing law, the term "cost" includes amounts for licensable facilities in the community served by a child care program, including lease payments or depreciation and payments of principal and interest on loans incurred to acquire, rehabilitate, or construct licensable facilities.

This bill would provide that the term "cost" also includes down payments for licensable facilities in the community served by a child care program.

(3) Existing federal law requires the State Department of Education to report information to the federal government regarding the expenditure of funding pursuant to the federal Child Care and Development Fund, including the social security number of the head of household of family units that receive services funded thereby.

This bill would authorize the Superintendent of Public Instruction to require the collection and submission of social security numbers of heads of households, and other information as required, from public and private agencies contracting with the State Department of Education, including local educational agencies.

(4) Existing law requires county welfare departments and alternative payment programs to provide certain data regarding child care usage and demand by recipients of the CalWORKs Program to the State Department of Education or the State Department of Social Services and the local planning council, on a quarterly basis.

This bill would instead require county welfare departments and alternative payment programs to provide the data on a monthly basis, thereby imposing a state-mandated local program.

(5) Under existing law there is a Educational Telecommunication Fund, which becomes inoperative on January 1, 2000.

This bill would continue the fund until January 1, 2001.

(6) Existing law requires notice of an election for the sale of bonds of school districts and community college districts to include the maximum number of years, not to exceed 25, for which the bonds may run.

This bill would instead require notice of an election for the sale of bonds of school districts and community college districts to include the maximum number of years, not to exceed 40, for which the bonds may run.

(7) Existing law, the California Public School Library Act of 1998, provides funding through the continuously appropriated California Public School Library Protection Fund to school districts for library resources.

This bill would provide that a county office of education may receive funding commencing in the 1999–2000 fiscal year under the act, thereby making an appropriation.

(9) Under existing law, upon approval by the governing board of the school district to proceed with the issuance of certificates for participation revenue bonds or to enter into any agreement for certain financing school construction pursuant, the school district is required to notify the county superintendent of the school district to provide the repayment schedules for that debt obligation, and evidence of the ability of the school district to repay that obligation, to the county auditor, the county superintendent, the governing board, and the public.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that prior to the delivery of the notice, neither the county nor any of its officers have any responsibility for the administration of the schools indebtedness and that failure to comply with other requirements does not affect the validity of the indebtedness.

(10) Under the California Public School Library Act of 1998, as a condition of receiving funding under for the establishment and maintenance of school libraries, school districts are required to develop a districtwide school library plan and the local school district governing board is required to certify approval of the plan. In developing the plan, school districts are encouraged to include school library media teachers.

This bill would apply these provisions to county offices of education.

(11) Existing law establishes the School Safety and Violence Prevention Act, whereby funds are allocated to school districts on the basis of enrollment.

This bill would provide that the funds be allocated on the basis of prior year enrollment as reported by the California Basic Educational Data System. The bill would provide that the number of schoolsites in each district that receive funding under the act would be equal to the number of county-district-school codes for that school district. The bill would also require the Superintendent of Public Instruction to report annually regarding the use of funds under the act.

(12) Existing law authorizes the governing board of a school district to make photographic or microfilm copies of any records of the district.

This bill would authorize the governing board of a school district also to make electronic copies of any records of the district.

(13) Existing law, which becomes operative January 1, 2000, requires the governing board of each district maintaining any or all of grades 7 to 12, inclusive, to offer, and authorizes a charter school that maintains any or all of those grades to offer, summer school instructional programs for pupils enrolled in those grades who do not demonstrate sufficient progress toward passing the high school exit examination.

Existing law requires the governing board of each district maintaining any or all of grades 2 to 9, inclusive, to offer, and authorizes a charter school maintaining any or all of those grades to offer, programs of direct, systematic, and intensive supplemental instruction to pupils enrolled in those grades who have been retained. Existing law also authorizes each charter school and the governing board of each district maintaining any or all of grades 2 to 6, inclusive, to offer programs of direct, systematic, and intensive supplemental instruction to pupils enrolled in those grades with low mathematics, reading, or written expression scores to allow those pupils to achieve proficiency in standards adopted by the State Board of Education.

Existing law authorizes the governing board of any school district that offers summer school instructional programs, and a charter school, to offer summer school programs for instruction in mathematics, science, or other core academic areas.

Under existing law, these 3 types of educational services are required to be offered during the summer, after school, on Saturdays, or during intersession, or in a combination of summer school, after school, Saturday, or intersession instruction.

This bill would also permit the educational services to be offered before school.

(14) Existing law provides for the provision of transportation services by school districts and contains provisions that govern the minimum training required for drivers to obtain or renew a certificate to operate a school pupil activity bus, transit bus, schoolbus, and farm labor vehicles.

This bill would repeal and reenact these provisions and would make technical, nonsubstantive changes in those provisions. This bill would provide that one of these provisions would not become operative if AB 15 of the 1999–2000 Regular Session is chaptered and adds a particular section to the Education Code.

(15) Under existing law, a local education agency may be required to repay an apportionment significant audit exception resulting from an audit or review, which may not be waived by the State Board of Education.

This bill would authorize the State Board of Education to consider and act upon requests to retroactively waive any provision of the Education Code or any regulation adopted by the State Board of Education that is the basis of an apportionment significant audit if the request was received in writing by the State Department of Education prior to July 7, 1999.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(16) Under existing law, for the 1998–99 school year, a school district may request the State Board of Education to provide a waiver of instructional time requirements under specified conditions.

This bill would instead provide that a school district may make the request on or before October 31, 1999, and the State Board of Education may provide, a waiver of instructional time requirements if the conditions are met.

(17) Existing law authorizes the Covina Valley Unified School District to conduct an experimental kindergarten program.

This bill would delete this provision.

(18) Existing law requires the Superintendent of Public Instruction to annually compute a general-purpose entitlement, as defined, and a categorical block grant amount, as defined, for each charter school.

This bill would make technical clarifying changes to these funding provisions. The bill would require the superintendent to compute average daily attendance for these purposes utilizing a statutory formula, would permit a charter school in its first year of operation to be eligible for an advanced apportionment based on an estimate of average daily attendance, and would revise the method for calculating a sponsoring school district's average daily attendance.

(19) Existing law requires the governing board of each school district to approve, on a form prescribed by the Superintendent of Public Instruction, an annual statement of all receipts and expenditures of the district for the preceding fiscal year.

This bill would delete a duplicative provision requiring the statement to be in the form prescribed by the Superintendent of Public Instruction.

(20) Existing law authorizes the establishment of community day schools for pupils in kindergarten or any of grades 1 to 12, inclusive, who are expelled, probation referred, or referred by a school attendance review board. Existing law prohibits a community day school serving kindergarten or grades 1 to 12, inclusive, from being situated on the same site as an elementary, middle, junior high, comprehensive senior high, opportunity, or continuation school unless it is certified that no satisfactory alternative facilities are available. Certifications regarding the unavailability of these facilities for community day schools serving kindergarten or any of grades 1 to 6, inclusive, may be made by any school district, but certifications regarding the unavailability of these facilities for community day schools that serve any of grades 7 to 12, inclusive, or grades 7 to 9, inclusive, may be made only by districts with 2,500 or fewer units of average daily attendance.

This bill would provide that, if a school district is organized as a district that offers instruction in kindergarten and grades 1 to 8, inclusive, the governing board may establish a community day school program for kindergarten and grades 1 to 8, inclusive, upon a $^{2}/_{3}$ vote of the board and would authorize those school districts to make the aforementioned certification without regard to the number of units of average daily attendance. The bill would provide that a charter school may not receive funding as a community day school unless it meets all of the conditions of apportionment.

(21) Under existing law, the California Mentor Teacher Program will become inoperative on July 1, 2001, and will be repealed as of January 1, 2002. Existing law establishes the California Peer Assistance and Review Program for Teachers, which will become fully operational on July 1, 2001, to replace the California Mentor Teacher Program.

Existing law provides that, when a school district notifies the Superintendent of Public Instruction that it plans to implement a program pursuant to the California Peer Assistance and Review Program for Teachers, the California Mentor Teacher Program will no longer apply to that district.

This bill would require the superintendent to continue to apportion funding to the school district pursuant to the California Mentor Teacher Program for the 1999–2000 and 2000–01 fiscal years. The bill would also modify the formula for the amount the Superintendent of Public Instruction is required to apportion to school districts participating in the California Peer Assistance and Review Program for Teachers.

This bill would require that California Mentor Teacher Program funding allocated but unclaimed by individual local education agencies at the end of the 1998–99 and the 1999–2000 fiscal years be offset from program funds advanced for the succeeding fiscal year, provided sufficient funds are available. The bill would provide that mentor teacher

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

support funding that has been claimed, but remains unexpended, may be carried over and used for the purposes of the California Peer Assistance and Review Program for Teachers, thereby making an appropriation.

The bill would also require the Superintendent of Public Instruction to determine a base funding rate for the California Peer Assistance and Review Program for Teachers commencing in the 2001–02 school year.

(22) Existing law requires the State Department of Education to administer a program of staff development grants to reimburse school districts and county offices of education for teachers to take mathematics courses at institutions of higher education in California.

This bill would instead authorize funding for mathematics courses at institutions of higher education, regardless of whether the institutions of higher education are in California.

(22.5) Under existing law, the Superintendent of Public Instruction is required to annually compute a general-purpose entitlement, funded from a combination of state aid and local funds, for each charter school that elects to be funded in this manner.

This bill would provide for certain apportionments in the 1999–2000, 2000–01, and 2001–02 fiscal years to be made to those charter schools that elect not to be funded pursuant to this general-purpose entitlement.

(23) Existing law establishes a pilot grant program, administered by the State Department of Education, for the award of grants to cover the costs of advanced placement examination fees.

This bill would authorize the State Department of Education to enter into a contract with the provider of advanced placement examinations.

(23) Existing law establishes the School-Based Program Coordination Act. Under existing law, schools that participate in school-based coordinated categorical programs are required to develop a school plan.

This bill would require the school plan to include the proposed expenditure of funds available to the school through the federal Improving America's Schools Act of 1994 and its amendments.

(24) Existing law relating to special education requires the Superintendent of Public Instruction to notify each member of the governing board of a local education agency when the superintendent determines that the local educational agency is not in substantial compliance with pertinent laws.

This bill would instead require the superintendent to notify members of the governing board of a local educational agency when the superintendent determines the local educational agency is not in substantial compliance with pertinent laws.

(25) Existing law establishes the Demonstration Scholarship Act of 1973.

This bill would repeal the Demonstration Scholarship Act of 1973.

(26) Existing law requires the State Department of Education to identify and analyze trends in school crime.

This bill would also require the department to analyze trends in school crime.

(27) Existing law provides that any organization, agency, or institution receiving obsolete instructional materials must certify to the governing board that it agrees to use the materials for educational purposes and agrees not to charge any person or organization using the materials.

This bill would delete this provision.

(28) Under existing law, for the 1994–95 fiscal year and each fiscal year thereafter, in order to be eligible to receive funds available for instructional materials on alcohol and drug education, the governing board of a school district is required to take specified actions.

This bill would instead provide that for the 1999–2000 fiscal year and each fiscal year thereafter the governing board is required to take these actions to receive these funds. The bill would also provide that the governing board of a school district is eligible to receive funds available for the purposes of this article for the 1994–95 fiscal year to the 1998–99 fiscal year, inclusive, whether or not the governing board took the required actions.

(29) Existing law appropriates $32,446,000 from the Federal Trust Fund to the Superintendent of Public Instruction for allocation to school districts for purposes of

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

providing funding for planning and grants for implementing the Immediate Intervention/Underperforming Schools Program.

This bill would instead provide that the amount would be allocated for purposes of implementing comprehensive school reform pursuant to federal law, thereby making an appropriation.

(30) Existing law reappropriates $15,471,000 from the Proposition 98 Reversion Account to the Superintendent of Public Instruction, including $2,000,000 for allocation to provide matching grants to school districts for the improvement or replacement of schoolsite playground equipment and $250,000 for allocation to the Los Angeles Unified School District for the Los Angeles High School for the Arts and the California Academy of Math and Science.

This bill would provide that the $2,000,000 would be allocated to the Superintendent of Public Instruction for allocation to the school districts. The bill would also provide that the $250,000 would be allocated to the Los Angeles County Office of Education and the Long Beach Unified School District instead of the Los Angeles Unified School District.

(31) The Budget Act of 1999, among other things, appropriated $4,506,000 to the State Department of Education for local assistance for specialized secondary programs.

This bill would reduce this appropriation to $4,462,000.

(32) The Budget Act of 1999, among other things, appropriated $1,799,000 to the State Department of Education for local assistance for instructional materials to provide an adjustment for increases in average daily attendance at a rate of 2.49%.

This bill would revise that percentage to 1.47.

(33) This bill would provide that Section 39831.5 of the Education Code, as added by this bill, would not become operative if AB 1573 is chaptered and becomes operative and amends and renumbers Section 38048 of the Education Code.

(34) This bill would provide that certain of its provisions would apply to the entire 1999–2000 fiscal year regardless of the effective date of this bill.

(35) The appropriations made by this bill would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 or Article XVI of the California Constitution.

(36) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 647 (AB 1573) Strom-Martin. Vehicles: schoolbuses.

(1) Existing law requires that pupils, as prescribed, who receive home-to-school transportation, receive specified schoolbus safety instruction once each school year.

This bill would add a specified training subject to the required safety instruction.

(2) Existing law exempts a schoolbus driver from the flashing red signal lights and stop signal arm requirements at locations identified by a school district, in consultation with the Department of the California Highway Patrol, that are determined to present a unique traffic hazard due to roadway design or proximity to an intersection, or where special education pupils are boarding or pupils may require assistance to board or unload the schoolbus or school pupil activity bus.

This bill, instead, would exempt a schoolbus driver from the flashing red signal lights and stop signal arm requirements at specified locations, including locations determined by a school district, with the approval of the department, to present a traffic or safety hazard, and excluding locations where pupils are loading or unloading from a schoolbus and must cross a highway or private road upon which the schoolbus is stopped.

(3) This bill would authorize the Department of the California Highway Patrol to impose the above described signal requirements, as specified, at any location where the department determines that the activation is necessary for the safety of school pupils loading or unloading from schoolbuses. Because a violation of this department-imposed

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

requirement would be a crime, the bill would impose a state-mandated local program by expanding the scope of an existing crime.

(4) Existing law provides that the driver of a vehicle upon a highway with separate roadways need not stop upon meeting or passing a schoolbus that is upon the other roadway.

This bill would recast this provision to provide that a driver of a vehicle upon a divided highway or multiple-lane highway, as defined, need not stop upon meeting or passing a schoolbus that is upon the other roadway.

(5) Existing law provides that the driver of a vehicle need not stop upon meeting or passing a schoolbus that is stopped at an intersection or place where traffic is controlled, as specified.

This bill would delete that provision.

(6) Existing law requires a schoolbus driver to undertake certain courses of action when the bus is stopped on a highway or private road for the purpose of loading or unloading pupils at a location where traffic is not controlled by a traffic officer or official traffic control signal.

This bill would delete the official traffic control signal exception for certain of those courses of action. Because this would have the effect of expanding the scope of an existing crime, the bill would impose a state-mandated local program.

(7) The bill would require the Department of the California Highway Patrol to undertake a specific study regarding flashing red lights and stop signal arms and to report the results of that study to the Legislature on or before January 1, 2005.

(8) This bill would incorporate additional changes in Section 38048 of the Education Code proposed by AB 15, to become operative only if both bills are enacted and become operative on or before January 1, 2000, and this bill is enacted last.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(10) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 648 (AB 15) Gallegos. Schoolbuses: passenger restraint systems: seats.

(1) Existing law requires the State Board of Education to adopt regulations relating to the use of schoolbuses by school districts and others.

This bill would require the board to adopt regulations to require a passenger in a schoolbus equipped with passenger restraint systems, as specified, to use a passenger restraint system so that the passenger is properly restrained.

(2) Existing law requires, at least once in each school year, all pupils in prekindergarten, kindergarten, and grades 1 to 8, inclusive, who receive home-to-school transportation to receive safety instruction, as specified.

This bill would require safety instruction in the use of passenger restraint systems, as specified.

(3) Existing federal law requires seatbelts for schoolbuses that have a gross vehicle weight of 10,000 pounds or less and establishes other seating and crash protection standards, as specified.

This bill would require that schoolbuses manufactured on or after January 1, 2002, and purchased or leased for use in California have a "passenger restraint system," as specified, at all designated seating positions, unless specifically prohibited by the National Highway Transportation Safety Administration. Because a violation of this provision would be a crime, the bill would impose a state-mandated local program by creating a new crime. The bill would provide that no person, school district, or organization, with respect to a schoolbus equipped with passenger restraint systems pursuant to the above requirement, may be charged for a violation of the Vehicle Code or any regulation adopted thereunder requiring a passenger to use a passenger restraint system, if a passenger on the schoolbus fails to use or improperly uses that system. The bill would make a related statement of legislative intent.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) Existing law requires the department to complete a study by March 1, 1987, on the appropriateness of requiring that all type one schoolbuses or school pupil activity buses be equipped with a set of safety belts for each passenger.

This bill would repeal that obsolete provision of law.

(5) This bill would incorporate additional changes in Section 38048 of the Education Code proposed by AB 1573, to become operative only if both bills are enacted and become operative on or before January 1, 2000, and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 649 (AB 838) Longville. Local agencies.

(1) Under existing law, 2 or more public agencies, by agreement, may exercise any power common to the contracting parties.

This bill would include a joint powers authority as a public agency that may itself be a member of a joint powers authority. The bill would also authorize a joint powers authority to issue refunding bonds to refund revenue bonds of a member local agency of the authority.

(2) Existing law authorizes a joint powers agency to issue bonds in order to purchase obligations of, or to make loans to, local agencies, to finance the local agencies' unfunded actuarial pension liability, or to purchase, or to make loans to finance the purchase of, delinquent assessments or taxes levied on the secured tax roll by the local agencies, the county, or any other political subdivision of the state.

This bill would authorize a joint powers authority to issue bonds in order to purchase and acquire, by sale, assignment, pledge, or other transfer, any and all right, title, and interest of any local agency in and to the enforcement and collection of delinquent and uncollected property taxes, assessments, and other receivables that have been levied by or on behalf of the local agency and placed for collection on the secured, unsecured, or supplemental tax roll and would authorize local agencies to sell, assign, pledge, or otherwise transfer these amounts to the joint powers authority in accordance with specified terms and conditions.

The bill would also provide that the powers conferred by these provisions are complete, additional, and cumulative and that the authorized agreements need not comply with the requirements of any other laws applicable to the same subject matter, except as otherwise required by these provisions.

(3) Existing property tax law requires the county auditor, in each fiscal year, to allocate property tax revenue to local jurisdictions in accordance with specified formulas and procedures, and generally requires that each jurisdiction be allocated an amount equal to the total of the amount of revenue allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, and that jurisdiction's portion of the annual tax increment, as defined. Existing property tax law also reduces the amounts of ad valorem property tax revenue that would otherwise be annually allocated to the county, cities, and special districts pursuant to these general allocation requirements by requiring, for purposes of determining property tax revenue allocations in each county for the 1992–93 and 1993–94 fiscal years, that the amounts of property tax revenue deemed allocated in the prior fiscal year to the county, cities, and special districts be reduced in accordance with certain formulas. It requires that the revenues not allocated to the county, cities, and special districts as a result of these reductions be transferred to the Educational Revenue Augmentation Fund in that county for allocation to school districts, community college districts, and the county office of education. In the case of a county that first implemented in the 1993–94 fiscal year a specified alternative method for the distribution of ad valorem property tax revenues, existing law also decreases the reduction and transfer amount of that county for that same fiscal year by the additional amount of ad valorem property tax revenue allocated in that fiscal year to educational entities, as defined, as a result of the county's implementation of that alternative distribution method.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would modify this reduction and transfer offset by including a county's Educational Revenue Augmentation Fund within the definition of an educational entity and would add provisions governing the calculation of the reduction and transfer offset for a county of the 16th class. The bill would also revise the allocations for the 1999–2000 fiscal year only not to exceed $8,239,000 as appropriated in the Budget Act of 1999. By imposing new duties with respect to the allocation of ad valorem property tax revenues in the current and prior fiscal years, this bill would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 650 (AB 31) Reyes. Teacher training: rural area schools: Assumption Program of Loans for Education.

Existing law establishes an assumption program of loans for education under which an applicant enrolled in a participating institution of postsecondary education, or an applicant who agrees to participate in a teacher trainee or teacher internship program, and who further agrees to obtain a teaching credential in subject areas that are designated as current or projected shortage areas or to provide classroom instruction in schools that serve large populations of pupils from low-income families, is eligible to receive a conditional warrant for loan assumption, to be redeemed pursuant to a prescribed procedure upon becoming employed as a teacher. Existing law requires 60% of the warrants distributed each year to be awarded to applicants who agree to obtain a teaching credential in subject areas that are designated as current or projected shortage areas, and 40% to be awarded to applicants who agree to obtain teaching credentials in any shortage area and to provide classroom instruction in schools that serve large populations of pupils from low-income families.

This bill would require, within these percentages, a proportional number of warrants to be issued to applicants who agree to provide classroom instruction in a school district serving a rural area.

Existing law requires the Commission on Teacher Credentialing to annually distribute a minimum of 2,000 awards to applicants who agree to obtain a teaching credential in mathematics or science.

This bill would repeal that provision.

This bill would incorporate additional changes in Sections 69612, 69612.5, 69613, 69613.1, 69615.4, and 69615.6 of the Education Code proposed by SB 131, to be operative if SB 131 and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 651 (SB 131) Baca. Teacher training: Assumption Program of Loans for Education.

Existing law establishes an Assumption Program of Loans for Education under which an applicant enrolled in a participating institution of postsecondary education, or an applicant who agrees to participate in a teacher trainee or teacher internship program, and who further agrees to obtain a teaching credential in subject areas that are designated as current or projected shortage areas or to provide classroom instruction in schools that serve large populations of pupils from low-income families, is eligible to receive a conditional warrant for loan assumption, to be redeemed pursuant to a prescribed procedure upon becoming employed as a teacher. Existing law provides that, for the 1999–2000 school year, and each school year thereafter, the Student Aid Commission is authorized to issue warrants for the assumption of up to 5,500 loans under this program.

This bill would, commencing with the 2000–01 school year, extend the Assumption Program of Loans for Education to applicants who agree to provide classroom instruction in school districts with a high percentage of teachers holding emergency permits. The bill would provide that, in the 2000–01 school year and each school year thereafter, warrants for the assumption of student loans for applicants who agree to teach in school

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

districts with a high percentage of teachers holding emergency permits would be issued in a quantity determined by the Legislature in the annual Budget Act, notwithstanding the limit of 5,500 loans. The bill would require the Superintendent of Public Instruction to furnish to the Student Aid Commission a list of schools with a high percentage of teachers holding emergency permits and would require the list to be established according to criteria determined by the Superintendent of Public Instruction.

The bill would authorize the commission to recommend an annual limit under this section that is higher than 5,500 and submit that recommendation to the Legislative Analyst for review and comment. The bill would state the intent of the Legislature that the amount appropriated for purposes of this provision in the Budget Act reflect consideration of the information provided by the commission and the Legislative Analyst.

This bill incorporates additional changes in Sections 69612, 69612.5, 69613, 69613.1, 69615.4, and 69615.6 of the Education Code, proposed by AB 31, to be operative if AB 31 and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 652 (SB 240) Speier. Child support: enforcement.

Existing law precludes state professional licensing agencies from issuing or renewing a license if the licensee is on a list, maintained by the district attorney, of persons who have not complied with support orders and precludes the Secretary of State from appointing or commissioning a notary public if the applicant is on that list.

This bill would require any board regulating a professional license, the State Bar, and the Department of Real Estate to require a licensee to provide the social security number of each individual listed on the license and any person who qualifies a license and would revise the definition of licensee for these purposes to include, for licenses issued to an entity that is not an individual person, any individual who is either listed on a license or who qualifies a license. Because the list of persons who have not complied with support orders would be expanded to include additional individuals, this bill would impose a state-mandated local program by increasing the duties of local child support agencies.

Existing law, known as the Family Law Facilitator Act, requires each superior court to maintain an office of the family law facilitator to provide specified services in actions or proceedings for temporary or permanent child support, spousal support, or health insurance. Those services include, but are not limited to, providing educational materials relating to those actions or proceedings.

This bill would provide that the family law facilitator shall not represent or have an attorney-client relationship with any party and that all communications between a family law facilitator, or all persons employed by or working with the facilitator, and the parties shall be confidential. The bill would require all persons employed by or working with the facilitator to make no public comment, as specified, to receive copy of the Canons of Judicial Ethics, and to sign an acknowledgement of the Canons of Judicial Ethics, as specified. The bill would also authorize superior courts, by local rule, to impose further duties on family law facilitators concerning child support issues, as specified. By imposing new duties on court personnel, this bill would create a state-mandated local program.

The bill would also declare the Legislature's intent to increase funding for family law facilitators.

Existing law imposes various duties upon district attorneys in connection with the enforcement of child support obligations and requires district attorneys enforcing child support obligations to refer child support delinquencies, as defined, to the Franchise Tax Board for collection. Existing law also authorizes those district attorneys also to refer child support obligations that are not child support delinquencies to the Franchise Tax Board for collection.

This bill would instead impose those duties on local child support agencies, as provided.

Existing law requires the Department of Justice to maintain the California Parent Locator Service and Central Registry which collects and disseminates information, as specified, with respect to parents, putative parents, spouses, and former spouses. Existing law authorizes the California Parent Locator Service and Central Registry to receive

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

from cable television corporations and public utilities, to the extent permitted by federal law, customer service information, as specified.

This bill would require the service and registry to request and to receive from cable television corporations, providers of electronic digital pager communication, and providers of cellular telephone services, to the extent permitted by federal law, customer service information in accordance with provisions of existing law.

The bill would appropriate $705,000 from the General Fund to the State Department of Social Services for purposes of the bill, as specified.

This bill would also incorporate certain provisions contained in AB 196 and SB 542, if those bills are enacted.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 653 (AB 380) R. Wright. Support orders: modification: set aside: enforcement.

(1) Existing law establishes procedures and time limits for granting a party relief from a default, judgment, dismissal, or other order on specified grounds in any civil action and for granting a party relief from a judgment, or any part thereof, on specified grounds in proceedings for dissolution or nullity of marriage or legal separation of the parties. Existing law also provides procedures for the modification or termination of child, family, and spousal support orders.

This bill would authorize the court to set aside a support order, or any part thereof, on the grounds of fraud, perjury, or lack of notice, as specified and would establish procedures and time limits therefor.

(2) Existing law provides that an order for child support may be made retroactive to the date of the filing of the notice of motion or order to show cause, subject to specified provisions of federal law.

This bill would instead provide that those orders may be made retroactive to the date of the filing of the petition or other first pleading, except as specified.

(3) Existing law provides that, if an order decreasing or terminating support is entered retroactively, the support obligee shall not be obligated to repay any amounts paid pursuant to the prior order that are in excess of the amounts due pursuant to the retroactive order.

This bill would instead provide that, in those circumstances, the support obligee may be obligated to repay those excess amounts, on terms ordered by the court after consideration of specified factors.

(4) Existing law provides that, for purposes of computing the minimum level of child support, no deduction from income shall be granted if specified aid payments are being made to the child or children of the parent seeking the deduction, even if the payments are being received by the other parent.

This bill would repeal that provision.

(5) In proceedings against an individual for failure to sufficiently provide for the support of his or her children or spouse, existing law authorizes the court to suspend the proceedings or sentence, at specified times in the proceedings, if the defendant enters into an undertaking conditioned upon the defendant paying support, as specified.

This bill would authorize the court, at those specified times in the proceedings and upon similar conditions, to suspend the proceedings or sentence in a contempt action against an individual for failure to comply with a court order for payment of child, family, or spousal support.

(6) Existing law declares that, if a family is granted aid under the CalWORKs program as a result of the absence of a parent from the family home, the noncustodial parent shall reimburse the county for the amounts of unpaid support specified in the support order

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

or, in the absence of an order, the amount that would have been specified in the order for the period of separation or desertion.

This bill would, in the absence of a support order, limit that recovery by the county to the amount that would have been specified in an order for support, for a period not to exceed one year prior to the date of the filing of the complaint or petition.

(7) Existing law requires the district attorney, in specified child support cases, to provide to the Department of Social Services a list of persons who are not in compliance with a support order or judgment; which list is then provided by the department to all state boards that issue licenses, as defined, for the purpose of withholding issuance or renewal of any license to any person named on the list, until a release is issued by the district attorney. If a license applicant believes his or her name should be deleted from the list, existing law specifies procedures for judicial review of that issue in the superior court.

This bill would authorize the judicial review to be conducted by the municipal court, in counties in which there is a municipal court, if specified criminal proceedings are pending against the applicant in that court at the time review is sought.

(8) Existing law provides that an action may be brought by the district attorney to obtain or enforce a child support obligation on behalf of a parent who has requested or is receiving support enforcement services of the district attorney. In those actions, a default judgment may be entered against a defendant who fails to answer or otherwise appear within a specified time. Existing law also provides that when a parent makes an application for child support services, the applicant shall provide the district attorney with a statement of arrearages, if any are owed. Existing law provides procedures for the district attorney to review the amount of arrearages alleged in that statement.

This bill would establish, as of a specified date, procedures and remedies if a person claims that a default judgment has been entered, or enforcement actions have been taken, against him or her in error due to mistaken identity, as specified. Filing a false claim of mistaken identity would be punishable as a misdemeanor. If the district attorney rejects a person's claim of mistaken identity, or fails to provide the remedies specified, the bill would provide that the person would be entitled to file a court action to obtain that relief. The bill would also impose additional requirements on district attorneys regarding service of process on defendants in support establishment and enforcement actions.

(9) The bill would declare that the act shall be referred to as the Child Support Enforcement Fairness Act of 2000 and would make related findings and declarations.

(10) The bill would provide that certain of its provisions would be operative in the Family Code if AB 196 is enacted and becomes operative, otherwise those provisions would become operative in the Welfare and Institutions Code.

(11) This bill would incorporate additional changes to Section 7575 of the Family Code proposed by SB 240, to take effect if both bills are enacted and become operative on or before January 1, 2000, and this bill is enacted last.

(12) Because this bill would create a new crime and would impose new duties on local personnel, it would create a state-mandated local program.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 654 (AB 370) R. Wright. Child support.

Under existing law, certain state agencies and each county are required to perform various functions with respect to support enforcement and collection.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes notices of support delinquency to be issued under certain conditions and in accordance with certain requirements.

This bill would require that a delinquency notice issued by a state or local government agency state the date upon which the amount of the delinquency was calculated and notify the support obligor that the amount calculated may or may not include accrued interest, and would provide that this notice requirement shall not be imposed until the local child support agency has instituted the California Child Support Automation system, as defined. The bill would also require that the support obligor be notified of his or her right to an administrative determination of arrears by requesting that the local child support agency review the arrears. The bill would prohibit the state agency from suspending enforcement of any arrearages as a result of the obligor's request for an administrative determination of arrears, except under specified circumstances.

Because the bill would impose additional duties on local agencies, the bill would constitute a state-mandated local program.

Existing law requires the district attorney, in cases in which the custodial parent is a recipient of benefits under the California Work Opportunity and Responsibility to Kids (CalWORKs) program, to keep a list of persons against whom a court order for support has been rendered and who are out of compliance with the order.

Existing law permits, and in some cases requires, state licensing boards to suspend licenses or to refuse to issue a license or license renewal to these persons.

Existing law requires the district attorney to mail to a support obligor on the list of noncompliant obligors and the appropriate licensing board a release when the obligor is in compliance with the court order.

This bill would require any board that has received a release from a district attorney to process that release within 5 business days of its receipt.

This bill would also incorporate certain changes made to child support provisions made by AB 196 and SB 542, if either or both of those bills are enacted during the 1999–2000 Regular Session.

This bill would also incorporate additional changes relating to child support made by SB 240, if both bills are enacted, and certain other conditions are met.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 655 (SB 1308) Committee on Business and Professions. Healing arts: licensees.

(1) Existing law requires various boards in the Department of Consumer Affairs to provide information concerning the status of licensees on the Internet.

This bill would require these boards to provide this information on the Internet on or after July 1, 2001, except as otherwise provided, and would extend the applicability of this requirement to the Board of Psychology.

Existing law requires various boards in the Department of Consumer Affairs to maintain a central file of the names of all persons who hold a license, certificate, or similar authority to provide an individual historical record for each licensee with respect to certain crimes or judgments, and requires certain reports concerning those licensees.

This bill would extend those provisions to the Board of Psychology and the Board of Behavioral Sciences. The bill would also make conforming changes regarding the names of the above-described boards.

(2) Existing law, administered by the Board of Dental Examiners, governs the practice of dentistry, and makes it unlawful for any person to engage in the practice of dentistry unless that person has a valid license or permit. Existing law generally provides that any person who practices dentistry or offers to practice dentistry, as defined, without a license, or when the license has been revoked or suspended is guilty of a misdemeanor for the first offense, and guilty of a felony for the 2nd or subsequent offense. However,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

under certain conditions, students of dentistry or dental hygiene are exempt from this requirement.

Existing law also authorizes groups of 3 or more dentists to practice under a fictitious name.

Existing law authorizes a person whose license, certificate, or permit to practice dentistry has been revoked or suspended, or who has been placed on probation, to petition for reinstatement or modification of the penalty.

Existing law provides that every person to whom a special permit to practice dentistry is issued is entitled to practice in the specialty field in which he or she has been examined by the Board of Dental Examiners at the dental college at which he or she is employed and its affiliated institutions, as specified. Existing law requires an examination by the board for a special permit to test the fitness of the applicant to practice the specialty recognized by the board.

This bill would change the name of the Board of Dental Examiners to the Dental Board of California and make multiple changes with respect to dentistry, among which are the following: setting forth additional exemptions from provisions making it unlawful to practice dentistry without a license for students of registered dental assisting, registered dental assisting in extended functions, and registered dental hygiene in extended functions; revising the above-described provisions relating to special permits to entitle every person to whom a special permit is issued to practice in the specialty or discipline in which he or she has been examined by the board at the dental college at which he or she is employed and its affiliated institutions; and authorizing a person whose license, certificate, or permit was surrendered pursuant to a stipulated settlement as a condition to avoid a disciplinary administrative hearing to petition for reinstatement or modification of penalty.

The bill would also permit individuals or pairs of dentists to practice under fictitious names.

The bill also would require licensed dentists and health care facilities to comply with a request for the dental records of a patient that is accompanied by the patient's written authorization, as specified. This bill would impose various civil penalties for failure to comply.

The bill would make failure to comply with a court order, issued in the enforcement of a subpoena, mandating the release of records to the board, a misdemeanor, thereby imposing a state-mandated local program by creating a new crime.

The bill would provide that any person who willfully, under circumstances or conditions which cause or create risk of specified physical or mental harm or death, practices or attempts to practice, or advertises or holds himself or herself out as practicing dentistry without a valid, unrevoked, and unsuspended certificate to practice dentistry is guilty of a crime, punishable by imprisonment in a county jail for up to one year. By creating a new crime, the bill would impose a state-mandated local program.

(3) Existing law governs the practice of podiatric medicine.

This bill would make technical changes to these provisions.

(4) Existing law governs the practice of midwifery, and provides for the examination and licensing of midwives.

This bill would authorize the Division of Licensing to conduct those examinations but authorize the division to contract for the administration of the examination, as specified, and make related changes with respect to the fee for the examination.

(5) Existing law regulates the practice of nursing, including a diversion program for registered nurses subject to disciplinary action. Existing law establishes diversion evaluation committees to administer the diversion program.

Existing law also provides for the licensure of vocational nurses and psychiatric technicians by the Board of Vocational Nursing and Psychiatric Technicians. Existing law provides that the board shall include 3 members of the public appointed by the Governor.

This bill would revise various provisions of the diversion program. Among other changes, the bill would require a diversion evaluation committee to report the name and license number of a registered nurse who is terminated from the program and who presents a threat to the public or his or her own health and safety to the board's enforcement program. The bill would make changes regarding the confidentiality

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

provisions of the diversion program, including setting forth circumstances under which a nurse shall be deemed to have waived his or her right to confidentiality.

The bill would also increase the fees for licensing vocational nurses and psychiatric technicians. The bill would also specify that the number of public members of the board appointed by the Governor is 4.

(6) Existing law provides for the licensure of physicians and surgeons. Existing law imposes various examination and educational requirements for licensure. Existing law specifically prohibits an applicant for examination who fails to pass any part or parts of the written examination after 2 attempts from being reexamined until the applicant completes additional appropriate medical instruction, as specified.

This bill would revise some of the examination requirements, would delete certain provisions regarding passing scores on a specified examination, and would delete the provisions against reexamination after 2 attempts to pass the written examination, as specified above. It would expand provisions that authorize the substitution of postgraduate education and training to remedy deficiencies in medical school education and training, so that certain provisions are not limited to persons who graduated from medical school prior to 1986.

The bill would delete a requirement of an oral examination for an applicant to practice medicine only in connection with a faculty position. The bill would delete provisions that authorize hospital service prior to being notified of the score on required examinations.

(7) Existing law governs the practice of speech-language pathology and audiology.

This bill would make technical changes to those provisions.

(8) Existing law imposes various fees in connection with the registration of dispensing opticians and the issuance of certificates to dispense contact or spectacle lenses, and provides for a reduced initial fee if the license will expire in less than one year.

This bill would eliminate provisions for the reduced fee.

(9) Existing law, the Acupuncture Licensure Act, regulates the practice and licensure of acupuncture and establishes the Acupuncture Board to enforce and administer these provisions.

This bill would require the board to establish standards for the approval of tutorial programs in acupuncture, as specified. The bill would require that an applicant for renewal of a license submit proof of completing continuing education requirements and impose a delinquency fee if a license is not renewed prior to, rather than within 30 days after, expiration. The bill would also make technical and clarifying changes to these provisions.

(10) Existing law provides for the regulation of the practice of pharmacy.

This bill would revise the definition of "dangerous drug or device" to include drugs or devices bearing the statement "Rx only" and also would revise the definition of "wholesaler."

(11) Existing law prohibits false or misleading labels on prescriptions.

This bill would permit false labels when necessary for clinical or investigational drug programs, or if necessary to treat the patient. The bill would require records to be maintained for 3 years. Since a violation of the pharmacy law is a crime, the bill would impose a state-mandated local program by expanding a crime.

The bill would revise the instances in which a pharmacist may perform skin puncture in the performance of patient assessment procedures.

The bill would require applicants for registration as a pharmacy technician to be high school graduates or to possess a general education development equivalent, and revise the conditions under which a pharmacy technician student may participate in an externship.

The bill would also provide for the cancellation of licenses not renewed within 60 days by the board, rather than by operation of law.

(12) Existing law provides for the regulation and licensure of marriage, family and child counselors and social workers.

This bill would require notification of name changes to the Board of Behavioral Sciences and make technical nonsubstantive changes.

(13) Existing law provides for the Health Quality Enforcement Section within the Department of Justice, to prosecute proceedings against licensees and applicants within the jurisdiction of the Medical Board of California.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide for that section to prosecute licensees and applicants within the jurisdiction of the Board of Psychology.

(14) Existing law requires the Department of Justice to establish the Controlled Substance Utilization Review and Evaluation System, as a 3-year pilot project, expiring July 1, 2000.

This bill would expand the purposes to include statistical analysis, education, and research, and would extend the program until July 1, 2003, as specified.

(15) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 656 (SB 1306) Committee on Business and Professions. Professional and vocational licenses: regulatory boards and officers.

Existing law creates in the Department of Consumer Affairs a Board for Professional Engineers and Land Surveyors to administer the Professional Engineers Act and the Professional Land Surveyors' Act, the State Board of Accountancy for the certification and regulation of accountants in this state, and a Contractors' State License Board to administer the Contractors' State License Law, and, in those instances respectively, enacts related regulatory provisions. Existing law provides that these provisions and related administrative provisions shall become inoperative on July 1, 2000, and shall be repealed as of January 1, 2001, except with respect to the State Board of Accountancy, in which case the provisions shall become inoperative July 1, 2001, and shall be repealed as of January 1, 2002.

This bill would delete the relevant years in which those provisions would become inoperative and be repealed, and would extend those dates for a period of one year.

The bill would provide that whenever a regulatory program of a board within the Department of Consumer Affairs is subject to review by the Joint Legislative Sunset Review Committee and is taken over by the department, it shall be designated as a "bureau."

Ch. 657 (AB 1677) Committee on Consumer Protection, Governmental Efficiency and Economic Development. Professions and vocations.

Existing law provides for the licensure of accountants by the State Board of Accountancy in the Department of Consumer Affairs and provides that provisions establishing the board shall become inoperative on July 1, 2001.

This bill would revise certain license renewal provisions for accountants, extend the operation of the provisions establishing the board until July 1, 2002, and make certain technical changes.

Existing law establishes the Board of Behavioral Sciences and requires it to administer and enforce the law regulating the practice of marriage, family and child counseling and clinical social work. Existing law requires that an applicant for a clinical social worker license demonstrate specified experience as a prerequisite to examination, including experience gained under the supervision of a licensed mental health professional.

This bill would require that the experience gained under the supervision of a licensed mental health professional be provided by a person acceptable to the board. The bill would define unprofessional conduct as applied to those licensees of the board to include a failure to keep records consistent with sound clinical judgment, the standards of the profession, and the nature of the services being rendered. The bill would also revise provisions relating to professional corporations for those professions, and would recast and make various technical and clarifying changes to provisions relating to those professions.

Existing law requires a declaration of specific instructions to be signed and dated by a person arranging for a cremation and the funeral director.

This bill would additionally authorize an employer or agent of a funeral establishment in charge of arranging or prearranging the cremation to sign that declaration. The bill would make related and technical changes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

A violation of the Funeral Directors and Embalmers Law is a misdemeanor. In enlarging the scope of persons subject to the requirements of that law and thereby increasing the number of persons potentially subject to criminal sanction for violating those requirements, the bill would impose a state-mandated local program.

Existing law authorizes the transportation of deceased human remains, without a permit, by an officer of a medical college if the remains have been donated to the medical college.

This bill would specifically authorize that transportation of deceased human remains within and between counties.

Existing law provides that the right to control the disposition of remains of a deceased person, the location and conditions of interment and arrangements for funeral goods and services, unless otherwise specified by a decedent, vests in certain persons, in a specific order.

This bill would recast this provision.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 658 (AB 891) Alquist. Health care decisions.

Existing law, the Power of Attorney Law, among other things, governs and regulates durable powers of attorney for health care, as specified. Existing law also establishes the Natural Death Act, providing that an adult person has a right to make a written declaration instructing his or her physician to withhold or withdraw life-sustaining treatment in the event of a terminal condition or permanent unconscious condition if that person is unable to make those decisions for himself or herself, among other provisions.

This bill, operative July 1, 2000, would repeal the provisions regarding durable powers of attorney for health care under the Power of Attorney Law, repeal the Natural Death Act, and revise and recast these provisions as part of a new act, the Health Care Decisions Law. This law would provide for the creation, form, and revocation of advance health care directives, and for the manner of making health care decisions for patients without surrogates. The bill would also make various related and conforming changes.

Because this bill would create a new crime, it would impose a state-mandated local program.

This bill would also make changes to Section 7100 of the Health and Safety Code proposed by AB 1677 to take effect if both bills are enacted and amend this section and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 659 (SB 355) Hughes. Peace officers: community colleges and school districts.

(1) Existing law defines or describes certain peace officers who are authorized to respond to domestic violence calls or act in domestic violence cases, as specified, or are deemed eligible for a course or courses of instruction in the handling of domestic violence complaints.

This bill would include among these peace officers any member of a California Community College police department and any person employed as a member of a police department of a school district. The bill also would require that these departments notify the sheriff or police chief of the city in whose jurisdiction the departments are located of any protection order served by the departments with respect to domestic violence incidents. Because this bill would increase the duties performed by a local agency, it would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law provides that a judicial officer may issue an ex parte emergency protective order where a peace officer, as defined, has reasonable grounds to believe that a person is in immediate and present danger of stalking.

This bill would expand these provisions to include community college and school district police, as specified. The bill also would require any of these police who request this emergency protective order to also notify the sheriff or police chief of the city in whose jurisdiction the college or school district of the police is located after issuance of the order. Because this bill would increase the duties performed by a local agency, it would impose a state-mandated local program.

(3) Existing law authorizes a court to issue emergency protective orders in specified situations.

This bill would permit a court to issue an emergency protective order to community college and school district police if a specified memorandum of understanding exists and the police officer asserts that there is a demonstrated threat to campus safety. Because the bill would increase the duties performed by local officials, it would impose a state-mandated local program.

(4) Existing law provides circumstances under which, among others, community college and school district peace officers may take custody of a firearm or other deadly weapon.

This bill would require any of these officers who takes custody of a firearm or other deadly weapon under these circumstances to deliver the firearm within 24 hours to the city police department or county sheriff's office in the jurisdiction where the college or school is located.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 660 (SB 563) Speier. Battery: domestic partners.

Existing law provides that the infliction of corporal injury resulting in a traumatic condition by any person upon his or her spouse, cohabitant, or the mother or father of his or her child is a felony.

This bill would expand the list of specified persons for purposes of this provision to include a former spouse, or a former cohabitant. By changing the definition of an existing crime, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 273.5 of the Penal Code proposed by SB 218, to be operative if SB 218 and this bill are both enacted and become effective on or before January 1, 1999, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 661 (AB 825) Keeley. Domestic violence: protective and restraining orders.

(1) Existing law requires the Department of Justice to maintain a Domestic Violence Protective Order Registry, as specified.

This bill would rename that registry the Domestic Violence Restraining Order System, and require forms for certain protective and restraining orders to be adopted by the Judicial Council and approved by the Department of Justice. The bill would provide that only protective and restraining orders on these forms may be transmitted to the Department of Justice, except as specified. The bill, however, would also provide that a protective or restraining order issued by a court that is not on the specified forms would not be, in and of itself, unenforceable. The bill would also make clarifying changes

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

regarding the validity and enforceability of protective and restraining orders issued by courts other than the courts of this state.

The bill would impose a state-mandated local program by requiring specified protective and restraining orders to be issued only on these forms.

(2) The bill would incorporate additional changes to Section 6380 of the Family Code made by this bill and AB 59, to take effect only if this bill and AB 59 are both enacted and this bill is enacted last.

(3) The bill would incorporate additional changes to Section 6380.5 of the Family Code, made by this bill and SB 218, to take effect only if this bill and SB 218 are both enacted and this bill is enacted last.

(4) The bill would incorporate additional changes to Section 836 of the Penal Code made by this bill and SB 218, to take effect only if this bill and SB 218 are both enacted and this bill is enacted last.

(5) The bill would incorporate additional changes to Section 213.5 of the Welfare and Institutions Code, made by this bill and AB 1671, to take effect only if this bill and AB 1671 are both enacted and this bill is enacted last.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 662 (SB 218) Solis. Domestic violence.

(1) Existing law requires every written proceeding in a judicial court to be in the English language.

This bill would declare that nothing in this section prohibits a court from issuing an unofficial translation of a court order in a language other than English. It would also require the Judicial Council, by July 1, 2001, to make available in other languages, specified forms relating to domestic violence.

(2) Existing law provides that when a court makes a protective order and both parties are present in court, the court shall inform both the petitioner and the respondent of the terms of the order, including notice that the respondent is prohibited from purchasing or receiving or attempting to purchase or receive a firearm, and including notice of the penalty for a violation.

This bill would provide that, in addition, the court would be required to inform the respondent that the respondent is prohibited from owning, possessing, or attempting to own or possess a firearm.

(3) Existing law authorizes a court, after notice and a hearing, to issue an order requiring a restrained person to participate in appropriate counseling, as specified, and batterer's treatment counseling.

This bill would, instead, authorize the court, after notice and a hearing, to order a restrained person to participate in a batterer's program that has been approved by the probation department as meeting the standards stated in a specified provision of law. The bill would also provide that the courts shall, in consultation with local domestic violence shelters and programs, develop a resource list of referrals to appropriate community domestic violence programs and services to be provided to each applicant for such an order.

(4) Existing law prohibits a person subject to a specified protective order from owning or possessing a firearm while that order is in effect and if prohibited by that order. The court is authorized to order a person subject to a protective order to relinquish any firearm in that person's immediate possession or control as specified upon a determination by a preponderance of the evidence that the restrained person is likely to use or display or threaten to use a firearm in any further act of violence. A violation of a protective order issued pursuant to this provision is punishable as a misdemeanor by imprisonment in a county jail not to exceed one year, or by a fine not to exceed $1,000, or by both that fine and imprisonment.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would instead prohibit a person subject to a specified protective order from owning, possessing, purchasing, or receiving a firearm while the order is in effect and that the order shall so state on its face. The bill would also eliminate the need for the court to make the above-mentioned factual determination by a preponderance of the evidence, and would instead require the court to order the restrained person to relinquish any firearm in that person's immediate possession or control, as specified. Additionally, a violation of a protective order issued pursuant to the above provision instead would be punishable as either a misdemeanor or a felony. By increasing the punishment for a crime, this offense would impose a state-mandated local program.

(5) Existing law authorizes a court to grant an exemption from the firearm relinquishment provisions of a restraining order if the firearm is required by the restrained person's employment.

This bill would authorize the court to allow a peace officer to continue to carry a firearm, either on or off duty, if his employment and personal safety depends on the ability to carry a firearm, and the court finds by a preponderance of the evidence that the officer does not pose a threat of harm. This bill would require that prior to making that finding, the court shall require a psychological evaluation of the peace officer.

(6) The Maternal and Child Health Branch of the State Department of Health Services is required to fund at least one agency to conduct a statewide evaluation of the services funded through a specified provision of law.

This bill would make a technical conforming change.

(7) Existing law punishes certain kinds of contempt of court as misdemeanors, among them the willful disobedience of any process or lawfully issued court order. Existing law also provides a higher level of punishment for certain other types of contempt.

This bill would expand the list of kinds of contempt of court punishable as a misdemeanor to include willful disobedience of lawfully issued out-of-state court orders and orders pending trial that are made at the request of a party alleging domestic violence. This bill would also add provisions defining as contempt of court knowingly owning, possessing, purchasing, or receiving a firearm in violation of certain protective orders, except as noted, and provide for punishment of this kind of contempt of court consistent with other provisions of the Penal Code. By expanding the definition of a crime, this bill would impose a state-mandated local program.

(8) Existing law makes it a felony for any person to willfully inflict upon a child any injury resulting in a traumatic condition.

This bill would make technical changes.

(9) Existing law requires that if probation is granted to any person who is convicted of willfully inflicting a traumatic condition, as defined, on a person with a specified domestic relationship to that person, and the person has previously been convicted of one prior violation of that offense within a specified period of time, the court must impose as a condition of probation, imprisonment in a county jail for not less than 96 hours. If the person is convicted of that offense and has been convicted of 2 or more prior violations of that offense within a specified period of time, the court must impose as a condition of probation, imprisonment in the county jail for not less than 30 days.

This bill would require instead that where probation is granted to a defendant who has previously been convicted of one violation of the above offense or other specified offenses, the court must impose conditions of probation specified for crimes of domestic violence and imprisonment in a county jail for not less than 15 days; and for a defendant who has been convicted of 2 or more prior convictions of the above offense or other specified offenses, the court must impose those same conditions of probation specified for crimes of domestic violence and imprisonment in a county jail for not less than 60 days. By increasing the punishment for a crime, this bill would impose a state-mandated local program.

(10) Existing law makes it a felony for any person convicted of willfully inflicting upon his or her spouse or other specified domestic partner, a corporal injury resulting in a traumatic condition. If a person was convicted of that offense within 7 years prior to the current offense, the court is required to impose, as a condition of probation, imprisonment in a county jail for not less than 96 hours and participation in and successful completion of a batterer's treatment program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law also requires that if probation is granted to a person convicted under that same provision, as a condition of probation, he or she must be imprisoned in a county jail for not less than 15 days and participate in and successfully complete a batterer's treatment program. However, if probation is granted to a person who has been convicted of that offense who has had 2 or more prior convictions of that offense with 7 years, it must be a condition of probation that he or she be imprisoned in a county jail for not less than 60 days and that he or she participate in and successfully complete a batterer's treatment program.

This bill would delete these 2 provisions of law relating to the granting of probation.

(11) Existing law punishes as a crime any intentional and knowing violation of a protective order or other order, as defined.

This bill would amend the above provision by expanding the list of specified orders to include any order issued by another state as recognized under a specified provision of law relating to out-of-state orders and orders requiring the relinquishment of a firearm. This bill would also amend this provision by defining the punishment for knowingly owning, possessing, purchasing, or receiving a firearm in violation of a protective order or other order, except as provided. By expanding the definition of a crime, this bill imposes a state-mandated local program.

(12) Existing law gives discretion to a peace officer who is responding to a call alleging a violation of a domestic violence protective or restraining order as specified and who has probable cause to believe that the person subject to the order has notice of the order and has committed an act in violation of that order, to arrest that person without a warrant and take him or her into custody whether or not the violation took place in the presence of the arresting officer.

This bill would instead require that the peace officer must, consistent with a specified provision relating to law enforcement response to domestic violence, make a lawful arrest under the above circumstances. By increasing the duties of local officials, this bill would impose a state-mandated local program.

(13) Existing law requires that when service is made on a minor, it must be made on the minor's parent, guardian, conservator, or similar fiduciary, or other specified persons.

This bill would authorize the court having jurisdiction of the case to appoint a guardian ad litem to receive service of a subpoena of the child and to produce the child in court.

(14) Existing law authorizes a county to establish an interagency domestic violence death review team to assist local agencies in identifying and reviewing domestic violence deaths. However, existing law prohibits the disclosure of confidential and privileged information that is relevant to a domestic violence death review team.

This bill would authorize disclosure by the domestic violence review team to members of that team of otherwise confidential or privileged information regarding the victim or any other information deemed relevant, to members of that team. The bill would also authorize the disclosure of specified types of information to a domestic violence death review team, notwithstanding other provisions of law including the lawyer-client privilege, the psychotherapist-client privilege, the domestic violence victim-counselor privilege, and the sexual assault victim-counselor privilege.

The bill would also authorize domestic violence death review teams to collect and summarize data regarding the statistical occurrence of specified circumstances of deaths resulting from domestic violence.

(15) Existing law authorizes specified law enforcement officers who are at the scene of a family violence incident involving a threat to human life or physical assault, to take temporary custody of any firearm or other deadly weapon in plain sight or discovered pursuant to a consensual search. This provision also defines the terms "abuse," "family violence," and "family or household member."

This bill instead would replace the term "family violence" with the term "domestic violence," would delete the above-mentioned definitions and would replace them with definitions of the terms "abuse" and "domestic violence" that track the definitions of those terms in the Family Code.

(16) Existing law authorizes a court, upon a good cause belief that harm to, or intimidation or dissuasion of a victim or witness has occurred or is reasonably likely to occur, to issue specified protective orders. Existing law also prohibits any person from purchasing or receiving, or attempting to purchase or receive, a firearm knowing that

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

he or she is subject to a protective order, as defined, in specified provisions of law, or by a temporary restraining order or injunction issued pursuant to specified provisions of law. A violation of this prohibition is punishable as a misdemeanor or a felony. However, receipt of a firearm as part of the disposition of community property is exempt from this prohibition and penalty.

This bill would include in the definition of the above offense, the above provision authorizing a protective order upon a good cause belief of harm, intimidation, or dissuasion of a victim or witness. The bill would also delete the community property exemption. By expanding the definition of a crime, this bill would impose a state-mandated local program.

This bill would also make it a misdemeanor for every person to own or possess a firearm knowing that he or she is subject to a protective order, temporary restraining order, or injunction as specified, punishable by imprisonment in a county jail not to exceed one year, by a fine not to exceed $1,000, or by both that fine and imprisonment. This bill would further provide that when a court grants probation for a firearms violation of a protective order as described above, probation shall be consistent with provisions of the Penal Code regarding probation for domestic violence. By creating a new crime, this bill would impose a state-mandated local program.

This bill would also require the Judicial Council to provide notice on all protective orders that the respondent is prohibited from owning, possessing, purchasing, or receiving a firearm while the order is in effect, in addition to other information.

(17) The bill would incorporate additional changes to Section 6380.5 of the Family Code made by this bill and AB 825, to take effect only if this bill and AB 825 are both enacted and this bill is enacted last.

(18) The bill would incorporate additional changes to Section 273.5 of the Penal Code, made by this bill and SB 563, to take effect only if this bill and SB 563 are both enacted and this bill is enacted last.

(19) The bill would incorporate additional changes to Section 273.6 of the Penal Code made by this bill and AB 59, to take effect only if this bill and AB 59 are both enacted and this bill is enacted last.

(20) The bill would incorporate additional changes to Section 12028.5 of the Penal Code, made by this bill and SB 355, to take effect only if this bill and SB 355 are both enacted and this bill is enacted last.

(21) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 663 (AB 1475) Soto. Highways: Safe Routes to School construction program.

Existing law requires that certain federal transportation funds received by the state be spent on specified transportation programs authorized under federal law. The funds are required to be made available for use in approximately equal amounts on state highways and on local roads.

This bill would require the Department of Transportation, in consultation with the Department of the California Highway Patrol, to establish and administer a "Safe Routes to School" construction program pursuant to authority granted under specified federal law and to use federal transportation funds for construction of bicycle and pedestrian safety and traffic calming projects.

The bill would require the department to make grants available to local governmental agencies under the program based on the results of a statewide competition that requires submission of proposals for funding and rates those proposals on specified factors.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would require the specified federal transportation funds to be made available so that not less than $1,000,000 be used for construction grants and the remaining funds for use in approximately equal amounts on state highways, local roads, and the program that the bill would create.

The bill would require the department to undertake a specified study and to report to the Legislature on or before December 31, 2001.

The provisions of the bill would remain in effect only until January 1, 2002, and as of that date would be repealed unless a later enacted statute, that is enacted before that date deletes or extends that date.

Ch. 664 (SB 1262) O'Connell. Student financial aid: Golden State Scholarshare Trust Act.

(1) Existing law establishes the Golden State Scholarshare Trust Act, pursuant to which, under regulations adopted by the Student Aid Commission, participants invest money in the Golden State Scholarshare Trust for the benefit of a specific beneficiary for the advance savings for the beneficiary's higher education expenses, as defined, at certain postsecondary educational institutions. Existing law establishes the Scholarshare Investment Board, which consists of the Treasurer, the Director of Finance, and the chief executive officer of the commission.

This bill, instead, would include on the board a member of the Student Aid Commission appointed by the Governor, rather than the chief executive officer of the commission, and would add as board members the Secretary of Education, a member of the public appointed by the Governor, a representative from a California public institution of higher education appointed by the Senate Committee on Rules, and a representative from a California independent college or university or a state-approved college, university, or vocational/technical school appointed by the Speaker of the Assembly. The bill would require the board to appoint an administrator of the program, who would serve at the pleasure of the board.

The bill also would require the board, rather than the commission, to adopt regulations, and to undertake other duties, applicable to the Golden State Scholarshare Trust Act.

The bill would provide that regulations adopted by, and contracts entered into by, the commission for purposes of the act are deemed to be regulations adopted by, and contracts entered into by, the board and that these contracts may be amended when authorized by the board.

The bill would make related technical changes.

(2) The existing Golden State Scholarshare Trust Act prohibits the overall maximum investment level for a designated beneficiary from exceeding the amount equivalent to the maximum estimated qualified higher education expenses, as defined, that can be incurred by a beneficiary to obtain a baccalaureate degree at an institution of higher education in California in 4 years, as specified.

This bill would amend the Golden State Scholarshare Trust Act to increase to 5 years the period of undergraduate study on which the calculation of maximum estimated qualified higher education expenses is based.

(3) Existing provisions of the Golden State Scholarshare Trust Act require that each participation agreement entered into by a participant in the scholarshare program require the participant to agree to invest a specific amount of money in the trust for a specific period of time for the benefit of a specific beneficiary, and require that a change in beneficiaries may only be made prior to the date of admission of any beneficiary under a participation agreement by an institution of higher education.

This bill would delete these provisions.

(4) Existing provisions of the Golden State Scholarshare Trust Act establish procedures for the payment of qualified higher education expenses, as defined, from trust funds and for the execution of participation agreements under the act.

This bill would authorize administrators of the scholarshare program to develop a method to make payment of qualified higher education expenses directly to beneficiaries in a manner consistent with applicable federal requirements. The bill would authorize custodians under the California Uniform Transfers to Minors Act to enter into participation agreements under the act in accordance with regulations adopted by the board.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(5) The bill would prohibit public funds and funds available under the program from being expended to pay for, and would prohibit the board from entering into any agreement that provides for, the appearance of any elected official or declared candidate for public office in any paid advertisement promoting the program.

Ch. 665 (SB 1252) Peace. Private security services.

Existing law provides for the licensure and regulation of persons engaged in private security services, including persons engaged as private patrol operators. Existing law requires that the business of each licensee be operated under the active direction, control, charge, or management, in this state, of the licensee, if he or she is qualified, or the person who is qualified to act as the licensee's manager, if the licensee is not qualified.

This bill would additionally require any licensee conducting business in this state whose primary office is located outside the state to maintain an office in this state operated under the active direction, control, charge, or management of a qualified manager, and to maintain at the office in this state all records required under the provisions governing private security services and under rules adopted by the Bureau of Security and Investigative Services.

Existing law makes it a crime to violate any of the provisions governing private security services which relate to private patrol operator licensure. By adding to those provisions new requirements regarding the maintenance by licensees, including private patrol operators, of an office in the state and the retention of records at that office, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 666 (SB 1233) Chesbro. Alcoholic beverages: tied-house restrictions.

The Alcoholic Beverage Control Act contains limitations on sales commonly known as "tied-house" restrictions, which generally prohibit a manufacturer, winegrower, manufacturer's agent, California winegrower's agent, rectified, distiller, bottler, importer, or wholesaler from furnishing, giving, or lending any money or other thing of value to any person engaged in operating, owning, or maintaining any off-sale licensed premises.

This bill would provide that for purposes of these provisions, the listing of the names, addresses, telephone numbers or e-mail addresses, or both, or web site addresses, of two or more unaffiliated off-sale retailers selling the products produced, distributed or imported by a nonretail industry member in response to a direct inquiry from a consumer received by telephone, by mail, by electronic Internet inquiry or in person does not constitute a thing of value or prohibited inducement to the listed off-sale retailer, if specified conditions are met.

Ch. 667 (SB 1118) Alarcon. Schools and community colleges: governing boards.

Under existing law, whenever an election is ordered, the governing board of a district or the board or officer authorized by the Education Code to make such designations is required, not less than 123 days prior to the date set for the election, to specify the date and purpose of the election. At least 120 days prior to the date specified for the holding of any school election, the county superintendent of schools is required to deliver to the county clerk or registrar of voters, if such office has been established in the county where the election is to be held, copies of the order of election and the formal notice of election. Delivery of a copy of the formal notice of election to the county clerk or registrar of voters is required at least 120 days prior to the date of the election.

This bill would instead require that, in the case of an election on a measure, the order of election, the specification of the date and purpose of the election, and the formal notice of election, be made at least 88 days prior to the date of the election. This bill would impose a state-mandated local program to the extent that this requirement imposes a higher level of service.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides for various state bond acts that provide for the issuance, pursuant to the State General Obligation Bond Law, of bonds and the expenditure of the proceeds therefrom to aid the school districts and the California Community Colleges for, among other things, the construction and equipping of educational facilities.

Under existing law, the bonds of a school district or community college district are required to be issued and sold by the board of supervisors of the county, the county superintendent of schools that has jurisdiction over the district, or the community college district governing board, where appropriate, as soon as possible following receipt of a resolution duly adopted by the governing board of the school district or community college district.

This bill would provide, notwithstanding this provision, that the board of supervisors of any county may provide by resolution that the governing board of a school district or a community college district within the county superintendent's jurisdiction, and which has not received a qualified or negative certification in its most recent interim report, may issue and sell bonds on its own behalf and would require the governing board of a school district or community college district that issued bonds or refunding bonds payable from ad valorem taxes to transmit the authorizing resolution and debt service schedule to the county auditor and county treasurer.

Under existing law, bonds are required to be sold at a public sale and at a price at, above, or below par, as the legislative body determines.

This bill would allow school district and community college district bonds to be sold at public or private sale.

Under existing law, if the board of supervisors deems it for the best interests of the school district or community college district named in the petition that unsold bonds be cancelled, the board is required to make and enter an order in the minutes of its proceedings that the unsold bonds are cancelled, and upon the entry of the order the bonds and the vote by which they were authorized to be issued ceases to be of any validity.

This bill would provide that with respect to any bonds authorized at a school district election on November 5, 1991, and thereafter cancelled without having been issued, the board of supervisors is authorized to order the cancellation annulled upon a finding that the issuance of the bonds is in the best interest of the district, and issue the bonds subject to all the terms and limitations of the original authorization.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 668 (SB 1115) Chesbro. Lyme disease: advisory committee and information service.

Existing law imposes various functions and duties on the State Department of Health Services with respect to the administration and oversight of various disease and prevention programs.

This bill would create the Lyme Disease Advisory Committee in the State Department of Health Services composed of, but not limited to, 5 members from specified groups and appointed by the Director of Health Services. The bill would require the department, among other things, to establish a Lyme disease information program. It would also require the committee to advise and make recommendations to the department regarding certain subjects relating to Lyme disease. The bill would further require the department to provide certain information to the Occupational Safety and Health Standards Board, and would authorize the board to determine which employees should be required to receive the vaccine for Lyme disease as a condition of employment.

Ch. 669 (SB 475) Dunn. Long-term care insurance: rate guide: data collection.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires every policy or certificate for long-term care insurance to include a provision for retaining the policy or certificate after the first year and permitting changes in coverage that would either lower or increase premiums. Existing law requires an issuer of long-term care insurance, or where an agent is involved, the agent, to present an applicant with a long-term care insurance personal worksheet.

This bill would require the Insurance Commissioner to annually prepare a consumer rate guide for consumers for long-term care insurance, as specified. The bill would specify the dates and methods for distributing the consumer rate guide. The bill would require each insurer to provide, and the Department of Insurance to collect, specified data on long-term care policies and certificates, including all policies, whether issued by the insurer or purchased or acquired from another insurer, in the United States, on or after January 1, 1990. The bill would provide that the data collected are public records open to members of the public for inspection, unless they are a trade secret as defined. The bill would require insurers to include in the premium section of long-term care insurance personal worksheets information, as specified, on any increases or requests for increases in rates of prior policies sold in any state by the insurer.

Ch. 670 (SB 1003) Vasconcellos. Adult protective services program: emergency response.

Existing law requires each county through its emergency response adult protective services program to respond immediately to reports of imminent abuse or danger to an elder or dependent adult and to respond to other reports of danger to an older or dependent adult within 10 calendar days of the report or as soon as practicably possible.

This bill would provide that an immediate or 10-day in-person response is not required when the county makes a specified determination, and documents, that the elder or dependent adult is not in imminent danger and that an immediate or 10-day in-person response is not necessary. This bill would make this provision inoperative on January 1, 2001, and would require the State Department of Social Services to submit a report regarding those cases to the Legislature on or before April 1, 2001.

This bill would revise the dates by which the department is required to adopt certain regulations relating to elder and dependent adult care.

Ch. 671 (SB 976) Perata. Retired judges: benefits.

Under the Judges' Retirement Law, a judge may elect various optional settlements, one of which consists of the right to have a retirement allowance paid him or her until his or her death and if he or she dies before he or she receives the amount of his or her accumulated contributions at retirement, to have the balance at death paid to his or her surviving spouse or estate.

This bill would add his or her surviving adult children as elective recipients of the balance paid at death under this optional settlement.

Under the Judges' Retirement Law, if a judge, following retirement for disability, engages in the practice of law or other gainful occupation, other than a public office, his or her retirement allowance is reduced by a specified amount until he or she reaches the age of 70. However, if that judge holds a public office while less than 70 years of age, his or her retirement allowance ceases permanently.

Under this bill, the reduction in retirement allowance would apply until the judge reaches service retirement age and the retirement allowance of a judge who holds a public office following retirement for disability would not cease but would, instead, be subject to that reduction. The bill would also provide that the retirement allowance of a judge would cease if he or she, following retirement for disability, engages in the practice of law or other gainful occupation that requires duties substantially similar to those he or she was found unable to perform due to his or her disability.

Under the Judges' Retirement Law and the Judges' Retirement System II Law, specified benefits are provided to the surviving spouse of a judge who dies in office at a time when the judge was eligible for service retirement.

This bill would provide alternative benefits for those surviving spouses that would be payable if specified conditions exist at the time of the judge's death and the judge, at any time while in office, made an irrevocable election to be subject to the bill's provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under the Judges' Retirement System II Law, certain benefits are provided to the surviving spouse of a retired judge who retired for service and elected to receive a specified allowance.

This bill would also provide those benefits to the surviving spouse of a retired judge who retired for disability and was receiving a monthly allowance, as specified.

Ch. 672 (SB 974) Speier. Vehicle auction.

(1) Existing law prohibits a licensed vehicle dealer, when advertising one or more specific auction events, from advertising that a vehicle will be auctioned to the public unless specified information pertaining to the vehicle and the auction is disclosed in the advertisement. Existing law also prohibits the advertisement of vehicles seized by public agencies or authorities unless specific additional information is disclosed in the advertisement, and provides that it is unlawful for an auctioning dealer to fail to provide specified information on the day of the auction regarding a vehicle seized by a public agency or authority.

This bill would apply the above restrictions and prohibition to a dealer when conducting an auction of vehicles to the public.

The bill would additionally require disclosing in the advertisement whether a buyer's fee, as defined, will be charged to a purchaser, in addition to the accepted auction bid price, and, if the fee is a set amount, the dollar amount of that fee, and if the buyer's fee is not a set amount, the advertisement shall state the formula or percentage used to calculate the fee.

The bill would prohibit including in the total price of an auctioned vehicle any costs to the purchaser at the completion of the sale, except as specified.

The bill would prohibit a holder of a dealer's license, when conducting an auction, from charging a buyer's fee unless that dealer delivers to any person permitted to submit bids, and at a time prior to accepting bids from that person, a specified disclosure statement that is signed by the person.

The bill would specifically prohibit a dealer conducting an auction from failing to comply with or violating certain provisions of the Vehicle Code, Civil Code, Commercial Code, or Penal Code pertaining to auctions or any law administered by the State Board of Equalization relating to the auctioneering business.

Because a violation of these provisions is a misdemeanor under existing law, the bill would impose a state-mandated local program by expanding the scope of that crime.

The bill would grant a person who purchases a vehicle sold through a dealer at an auction of vehicles open to the general public the same rights and remedies against the dealer who conducts the auction sale as if that dealer were an owner and seller of the auctioned vehicle. The bill would provide that the purchaser's rights or remedies are in addition to any rights or remedies he or she may otherwise have against the owner of a vehicle sold at a public auto auction. The bill would provide for indemnification of the dealer by the consigning owner of a vehicle for any liability resulting from misrepresentations or other misconduct by the consignor. The bill would prohibit waiving or modifying the purchaser's rights and remedies set forth under this paragraph by an agreement or by recharacterization of the transaction.

(2) Existing law requires any dealer engaging in a consignment with an owner, who is not licensed in a specified vehicle-related occupation under the Vehicle Code, and the consignment is not otherwise prohibited by that code, to execute a consignment agreement as prescribed.

This bill would exempt specified consignment agreement requirements when a dealer conducts retail auction sales of vehicles on behalf of a fleet owner, as defined.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 673 (SB 951) Hayden. State employees: disclosure of improper activities.

(1) Under the Reporting of Improper Governmental Activities Act, the State Auditor is authorized to conduct an investigative audit upon receiving confirmation that an

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

employee or state agency has engaged in an improper governmental activity. A state employee, including a University of California employee, is prohibited from using his or her official authority or influence to intimidate, threaten, coerce, or command a person in order to interfere with the right of that person to make a disclosure under the act.

This bill would rename the act as the "California Whistleblower Protection Act." The bill would also revise the protection afforded to persons who make a disclosure to include persons who make a protected disclosure, as defined, or refuse to obey an illegal order and would provide that a protected disclosure includes disclosure to anyone of information that may evidence an improper governmental activity or evidence any condition that may significantly threaten the health or safety of employees or the public if the disclosure was made for the purpose of remedying the condition. The bill would also provide that nothing in the bill is intended to supersede or limit the right to make a privileged publication in an official proceeding with regard to information provided under the act. The bill would make conforming changes with respect to the California State University and the University of California. Violation of the prohibition against interfering with the right of an employee to make a disclosure is a crime. Thus, this bill would impose a state-mandated local program by expanding the scope of an existing crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 674 (SB 939) Monteith. Emergency medical services: county funding.

Existing law requires certain counties, and authorizes all other counties, to provide penalty revenue funding for emergency medical services, as specified.

This bill would specify that a county shall not be required to provide an amount for these purposes in excess of the penalty assessment receipts authorized for this purpose.

The bill would also specify that it shall become operative only if SB 623 is enacted and takes effect, in which case it shall become operative at the same time SB 623 becomes operative.

Ch. 675 (SB 934) Burton. Taxation: credit unions.

Existing federal law exempts a federally chartered credit union from all state and local taxation other than ad valorem property taxes.

The Bank and Corporation Tax Law imposes a franchise tax on financial corporations, including state-chartered credit unions, but provides that the tax is in lieu of all other state and local taxes and licenses, with certain exceptions. That law also exempts specified classes of entities from the franchise and income taxes imposed by that law, but does not exempt state-chartered credit unions from those taxes.

This bill would additionally exempt from those franchise and income taxes any state-chartered credit union. This bill would also continue the exemption of state-chartered credit unions from all other state and local taxes and licenses, with certain exceptions.

This bill would take effect immediately as a tax levy.

Ch. 676 (SB 678) Polanco. State property: access: telecommunications.

Existing law authorizes the Director of General Services, with the approval of the state agency concerned, to grant and convey in the name of the state, easements and rights-of-way across real property belonging to the state not used for highway rights-of-way, for those purposes and upon the consideration and subject to the conditions, limitations, restrictions, and reservations the director determines to be in the interest of the state. Existing law requires all revenue received in connection with the granting and conveying of those easements and rights-of-way, including charges made for administrative costs, to be deposited in the General Fund for appropriation as prescribed.

This bill would additionally authorize the director, with the approval of the state agency concerned, to negotiate in the name of the state, access to state-owned property,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

not used for highway purposes, for those purposes and subject to those conditions, limitations, restrictions, and reservations determined by the director to be in the interest of the state. The bill would require the director to determine the amount of consideration for, and the means of, access. The bill would require the Director of Transportation to similarly negotiate access to state-owned highway rights-of-way and to make similar determinations regarding consideration for access. The bill would require any payments for a grant or conveyance through land or facilities controlled by the Department of Transportation to be deposited in the State Transportation Fund.

This bill would require the director to establish, not later than July 1, 2000, an interagency committee on state-owned property for the purpose of evaluating the use of that property for telecommunications and information technology services by private parties. The committee would be chaired by the director and would include the Director of Transportation, the Director of Information Technology, the Director of the Health and Human Services Data Center, the Director of the Teale Data Center, and the Director of Water Resources, or their designees, a representative from the University of California, and a representative from the California State University.

The bill would require the committee to convene a telecommunications and information technology advisory council for the purpose of obtaining input and insight from the private sector. The bill would require the committee to prepare and submit a final report to the Legislature and the Governor on or before January 1, 2004.

Provisions governing the interagency committee, the telecommunications and information technology advisory council, and the final report would be repealed on January 1, 2005.

Ch. 677 (SB 669) Polanco. Local emergency telephone systems: Public Utilities Commission.

(1) Existing law, the Warren-911-Emergency Assistance Act, directs the Communications Division of the Department of General Services to consult regularly with specified agencies, officials, and entities to accomplish its responsibilities with respect to the establishment by local agencies of 911 telephone service.

This bill would direct the Communications Division also to consult for that purpose with a local representative from a city and a local representative from a county.

(2) Existing law provides for various programs relating to telephone corporations to be administered by the Public Utilities Commission, and paid for in the utility rates authorized by the commission.

This bill would, under the Public Utilities Act, create 6 advisory boards to advise the commission regarding the implementation, development, and administration of specified programs, and to carry out the programs pursuant to the commission's direction, control, and approval. The bill would require the commission to determine the number and qualifications of the members of each advisory board, as specified, and would prescribe certain matters of organization and procedure for each advisory board. The bill would require each advisory board to submit an annual budget to the commission for approval, and a report describing the activities of the advisory board, as prescribed. The bill would create a fund in the State Treasury for each advisory board, and would require the commission, on or before July 1, 2000, to report to the Governor and the Legislature regarding a transition plan for programs associated with those funds. The bill would limit the expenditure of moneys appropriated from the specified funds, as prescribed. The bill would require telephone corporations to submit to the commission approved rate revenues for transfer by the commission to the Controller for deposit in the appropriate fund as created by the bill. The bill would require any unexpended revenues collected prior to the operative date of the bill to be deposited in the appropriate fund, as specified. The bill would require the commission to conduct financial audits of the revenues for each of the funds, and to conduct compliance audits with regard to each program, as specified. Because, under the act, a violation of those provisions would be a crime, the bill would impose a state-mandated local program by creating new crimes.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 678 (SB 638) Alpert. English learners.

Existing law relating to English language education for immigrant children, with certain exceptions, requires that all children in California public schools be taught English by being taught in English, and in particular, requires that all children be placed in English language classrooms. Existing law requires that children who are English learners be educated through sheltered English immersion during a temporary transition period, not normally to exceed one year. Existing law provides for waiver of these requirements with the annual prior written informed consent of the parent or guardian.

This bill would require each school district to assess the English language development of each pupil to determine the level of proficiency. The bill would require the school district to establish procedures based upon guidelines and criteria developed by the State Board of Education for conducting the assessment and for the reclassification of a pupil from English learner to proficient in English.

This bill would, commencing with the 2000–01 school year, require the assessment to be conducted upon initial enrollment, and annually, thereafter, until the pupil is designated as English proficient.

Existing law requires the Superintendent of Public Instruction to review existing tests that assess the English language development of pupils whose primary language is other than English, and to determine which tests meet prescribed criteria or to develop such a test. The law requires the State Board of Education to approve related standards.

The bill would require the assessment of a pupil pursuant to the bill to primarily utilize the English language development test identified or developed by the Superintendent of Public Instruction, and in the interim would require the use of a test developed by the school district or by the State Department of Education. The bill would require test results to be made available to the public on the State Department of Education Internet site. The bill would require the reclassification procedures to utilize multiple criteria in determining whether to reclassify a pupil as proficient in English, including, but not limited to, assessment of language proficiency using an objective assessment instrument, including, but not limited to, the English language development test, teacher evaluation, parental opinion and consultation, and comparison of the pupil's performance in basic skills against an empirically established range of performance in basic skills based upon the performance of English proficient pupils of the same age.

By establishing new requirements for English language assessment and for reclassification of pupils by school districts, this bill would impose a state-mandated local program.

The bill would declare that it is supplementary to, rather than amendatory of, the English Language In Public Schools Initiative Statute (Proposition 227).

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 679 (SB 623) Speier. Maddy Emergency Medical Services Fund: use of fees.

(1) Existing law authorizes a county to establish a Maddy Emergency Medical Services Fund (Maddy Fund) to be used to reimburse physicians and hospitals for patients who do not make payment for emergency medical services and for other emergency medical services purposes as determined by each county. Existing law requires each county establishing the fund to report to the Legislature annually on the implementation and status of the fund.

This bill would require the report of the county to include additional information. The bill would require the county, upon request, to make available to any member of the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

public the report required under these provisions and a public listing of physicians and hospitals that have received reimbursement from the fund and the amount of the reimbursement. The bill would require the public listing to be compiled semiannually. Because this bill would increase the duties of counties that have established the Maddy Fund, the bill would impose a state-mandated local program.

(2) Existing law requires the fee collected from persons attending a traffic violator school or any other court-supervised program of traffic safety instruction to be deposited in accordance with law in the general fund of the county.

This bill would, in those counties that have established a Maddy Fund, require an amount equal to a specified sum to be deposited by the county treasurer in the Maddy Fund. Because this would increase the level of service imposed on county treasurers, the bill would create a state-mandated local program. The bill would provide that nothing in the bill shall be interpreted in a manner that would result in either of the following: (a) The utilization of penalty assessment funds that had been set aside, on or before January 1, 2000, to finance debt service on a capital facility that existed before January 1, 2000; or (b) the reduction of penalty assessment revenues that had been pledged, on or before January 1, 2000, as a means of financing a facility approved by a county board of supervisors but the facility, on January 1, 2000, is not under construction.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 680 (SB 586) Costa. School finance: equalization adjustments.

Existing law requires the Superintendent of Public Instruction to make certain computations to determine the amount to be allocated for direct services and other purposes provided by county superintendents of schools and to determine each county superintendent's revenue limit for county superintendent responsibilities and direct services. Existing law sets forth a method for equalizing the revenue limits for county offices of education for the 1995–96 fiscal year.

This bill would repeal, as of January 1, 2000, the existing formulas for determining each county superintendent's revenue limit for county superintendent responsibilities and services. The bill would require the Superintendent of Public Instruction to apportion equalization funding for the 1999–2000 fiscal year to certain county offices of education in prescribed amounts. The bill would make a conforming change to existing law regarding the computations to be made by the Superintendent of Public Instruction to determine the amounts to be allocated for direct and other services provided by county superintendents of schools.

Ch. 681 (SB 430) Alarcon. Local fees and charges.

Existing law provides procedures for counties and other local agencies to increase or decrease fees and charges.

This bill would provide that in addition to any other remedy provided by law, the legislative body of a city, county, or city and county may collect any fee, cost, or charge incurred in the abatement of public nuisances and in the enforcement of state and local housing, building, and zoning laws, codes, and regulations with respect to construction or land use activities, except as specified, if the fee, cost, or charge has not been paid within 45 days of notice, by making the amount of any unpaid fee, cost, or charge a proposed lien against the property that is the subject of the enforcement activity. The bill would require the legislative body to provide the property owner with written notice in plain language of the proposed lien, a description of the basis for the amounts comprising the lien, and an opportunity to appear and be heard before recording the lien.

Ch. 682 (SB 419) Speier. Dairy products.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law sets forth provisions governing the marketing of milk and milk products.

This bill, until January 1, 2002, would require the Division of Marketing Services within the Department of Food and Agriculture (1) to conduct a Consumer Milk Price Survey, and a public information program for the purpose of reporting the retail price of milk, as specified, and (2) to report to the Legislature on or before June 30, 2001, concerning the effect of these provisions on retail milk prices and on consumer awareness of retail milk prices. The bill would require the division to design a notice promoting the use of the Consumer Milk Price Survey Program's web site and toll-free telephone number. The bill would require grocers to post that notice, as specified, and would prohibit the imposition of sanctions for the failure to post. The bill also would require the department on or before March 30, 2001, to report to the Legislature on the operation of the program, including comments on the program from consumers and those associated with the production and the sale of milk.

Ch. 683 (SB 418) Polanco. Public utilities: transition property.

Existing law authorizes the issuance of rate reduction bonds by a financing order of the Public Utilities Commission if the commission determines that the issuance of those bonds in relationship to transition costs, would reduce rates that certain customers would have paid if the financing order had not been adopted. Existing law also makes financing orders in relation to rate reduction bonds binding on the commission.

This bill would authorize the commission to order a fair and reasonable credit to ratepayers of any excess rate reduction bond proceeds, as defined.

Ch. 684 (SB 397) Ortiz. Public Employees' Retirement System: benefits.

The Public Employees' Retirement Law, until January 1, 1999, authorized contracting agencies to elect, pursuant to specified procedures, to grant additional service credit to local members under specified circumstances.

This bill would renew that authority and would additionally require those contracting agencies to provide public disclosure, as specified, prior to making that election.

Ch. 685 (SB 395) Hughes. Teacher credentialing.

Existing law permits a teacher with a basic teaching credential to be assigned to provide specially designed content instruction delivered in English, as defined, to limited-English-proficient pupils only if certain conditions are met, including that the teacher be, as of January 1, 1995, a permanent employee of a school district, a county office of education, or a school administered under the authority of the Superintendent of Public Instruction and that the teacher complete 45 clock hours of staff development in methods of specially designed content instruction delivered in English before January 1, 2000.

This bill would extend the January 1, 1995, date by which a teacher would be required to be a permanent employee to January 1, 1999, and would extend the January 1, 2000, deadline for the completion of the required staff development to January 1, 2005.

Existing law permits a teacher who is awarded a certificate of completion of staff development in methods of specially designed content instruction delivered in English to be assigned to provide instruction for English language development, as defined, in a self-contained classroom only if the teacher has certain experience or additional staff development.

This bill would authorize a teacher who completes staff development in methods of specially designed content instruction delivered in English to provide that instruction and instruction for English language development in any departmentalized teaching assignment consistent with the authorization of the teacher's basic credential. The bill would require a teacher who completes that staff development to receive a certificate of completion from the commission upon submitting an application, a staff development verification form and payment of a fee.

Existing law requires the Commission on Teacher Credentialing, in consultation with the Superintendent of Public Instruction, to establish guidelines for the provision of staff development that allows a teacher with a basic teaching credential to be assigned to provide to limited-English-proficient pupils specially designed content instruction delivered in English and instruction in English language development.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require those guidelines to be aligned to the teacher preparation leading to the issuance of a certificate commonly known as the CLAD and would prohibit this alignment from resulting in any increase in the number of hours of required staff development. The bill would require the Commission on Teacher Credentialing to review staff development programs in relation to the guidelines and standards and to report to the Legislature on the status of the staff development programs and certification process.

Ch. 686 (SB 390) Alpert. Water quality.

(1) Under the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board and the California regional water quality control boards are among the principal agencies with authority over water quality. Under the act, generally, persons discharging waste are required to file with the appropriate regional board a report of the discharge and the discharge is subject to waste discharge requirements prescribed by that regional board. Under the act, persons are generally prohibited from initiating a new discharge of waste, or making any material changes in any discharge of waste, prior to the filing of the waste discharge report, and after the filing of that report unless waste discharge requirements have been prescribed or, under certain circumstances, 120 days have elapsed since the filing of that report. The act authorizes the regional boards to waive these requirements as to a specific discharge or type of discharge.

This bill would authorize the regional boards, on and after January 1, 2000, to waive these requirements as to a specific discharge or type of discharge if the waiver is not against the public interest. The bill would allow waivers to be renewed but would prohibit the regional boards from issuing waivers for specific types of discharges that exceed 5 years in duration. The bill would require the regional boards and the state board to require compliance with the conditions pursuant to which waivers are granted. The bill would require the regional boards, prior to renewing any waiver for a specific type of discharge, to review the terms of the waiver policy at a public hearing, and to determine at that hearing whether the discharge for which the waiver policy was established should be subject to general or individual waste discharge requirements. The bill would provide that a waiver in effect on January 1, 2000, shall remain valid until January 1, 2003, unless the regional board terminates that waiver prior to that date. The bill would authorize a regional board to renew, in 5-year increments, waivers that were valid on January 1, 2000, and granted an extension until January 1, 2003, and not otherwise terminated.

(2) The act provides that a person may be liable civilly in accordance with prescribed provisions if that person intentionally or negligently violates prescribed orders, or, in violation of prescribed requirements, intentionally or negligently discharges waste, or causes waste to be deposited where it is discharged, into the waters of the state and creates a condition of pollution or nuisance, or causes or permits any oil or residuary product of petroleum to be deposited in the waters of the state, except in accordance with the act.

This bill, in addition, would provide that a person may be liable civilly in accordance with those prescribed provisions if that person, in violation of a waiver condition or certification, intentionally or negligently discharges waste, or causes waste to be deposited where it is discharged, into the waters of the state and creates a condition of pollution or nuisance.

The bill would make legislative findings and declarations relating to the adequacy of fees imposed by the state board.

Ch. 687 (SB 387) Alpert. Oil spill prevention.

(1) Existing law, known as the Lempert-Keene-Seastrand Oil Spill Prevention and Response Act, prohibits the operation of a nontank vessel, as defined, of 300 gross registered tons or greater in the marine waters of the state unless the owner or operator prepares and submits an oil spill contingency plan to the administrator for oil spill response, in accordance with prescribed procedures and requirements, and the plan is approved. Existing law prohibits a nontank vessel, required to have a contingency plan, from entering marine waters of the state unless the owner or operator has provided to the administrator evidence of financial responsibility that demonstrates the ability to pay

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

at least $300,000,000 to cover damages caused by a spill, and the owner or operator has obtained a certificate of financial responsibility from the administrator for the vessel.

This bill would authorize the administrator for oil spill response to establish a lower standard of financial responsibility for nontank barges and marine construction vessels, as defined in the bill, that is not less than the expected costs from a reasonable worst case oil spill into marine waters. The bill would also revise the definition of the term "reasonable worst case spill" for purposes of those nontank barges and marine construction vessels.

The changes made by the bill would remain in effect only until January 1, 2001, and as of that date would be repealed, on which date existing law would again become operative.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 688 (SB 361) Dunn. Postsecondary education: cross-enrollment.

Existing law establishes a cross-enrollment program, whereby a student enrolled in any campus of the California Community Colleges, the California State University, or the University of California who meets certain requirements may enroll without formal admission or payment of additional fees in a maximum of one course per academic term at a campus of either of the other systems on a space available basis at the discretion of the appropriate campus authorities on both campuses. Existing law requires the California Postsecondary Education Commission to prepare a report, based on information received on or before June 30, 1998, from the public postsecondary segments, on the program and to submit this report, with recommendations, to the Governor and the Legislature on or before December 1, 1998. Under existing law, the chapter that establishes the cross-enrollment program remains in effect only until January 1, 2000, and as of that date is repealed.

This bill would extend the deadlines for the reports of the public postsecondary segments and the commission to June 30, 2002, and December 1, 2002, respectively. The bill would require that, if in the determination of the commission, the cross-enrollment program appears to be underutilized, the report include the comments of the commission with respect to the reasons for the underutilization and options for increasing participation in the program. The bill also would extend the repeal date of the chapter that establishes the cross-enrollment program until January 1, 2004.

Ch. 689 (SB 251) Knight. Public postsecondary education: children of deceased or disabled veterans.

Existing law prohibits any state-owned college, university, community college, or other school from charging any tuition or fees to certain dependents or survivors of veterans, including any child of any veteran of the United States military who has a service-connected disability, has been killed in service, or has died of a service-connected disability, where the annual income of the child, including the value of any support received from a parent, does not exceed $7,000.

This bill would instead provide that the maximum income of a child who would not be charged mandatory systemwide tuition or fees under this provision would be the national poverty level, as defined, as most recently calculated by the Bureau of the Census of the United States Department of Commerce, rather than $7,000.

The bill would provide that the waiver of mandatory systemwide tuition or fees under these provisions would apply for each academic year during which a student applies for the waiver, and not apply for a prior academic year. The bill would also provide that the waiver of mandatory systemwide tuition or fees under these provisions would apply only to a person who is determined, pursuant to existing law, to be a resident of California.

The bill would provide that none of its provisions would apply to the University of California except to the extent that the Regents of the University of California, by appropriate resolution, make a provision applicable.

Ch. 690 (SB 115) Solis. Environmental justice.

Under existing law, the Office of Planning and Research serves the Governor and his or her Cabinet as staff for long-range planning and research, and is the comprehensive state planning agency. Existing law, the California Environmental Quality Act, requires

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the office to prepare, and the Secretary of Resources to certify and adopt, guidelines for use in implementing the act.

Existing law establishes the California Environmental Protection Agency, which is responsible for enhancing the state's protection of the environment.

This bill would provide that the office is the coordinating agency in state government for environmental justice programs. The bill would require the Director of Planning and Research to consult with the secretaries of specified state agencies, and other parties to coordinate the office's efforts and, share specified information with certain federal agencies, and review and evaluate other federal information, as provided. The bill would define "environmental justice" to mean the fair treatment of people of all races, cultures, and incomes with respect to the development, adoption, implementation, and enforcement of environmental laws and policies. The bill would require the California Environmental Protection Agency to take specified actions in designing its mission for programs, policies, and standards within the agency, and to develop a model environmental justice mission statement for boards, departments, and offices within the agency, by January 1, 2001.

Ch. 691 (AB 1693) Cardoza. Migrant children: service regions.

Existing law requires the Superintendent of Public Instruction to establish the service regional system as the primary method for the delivery of education and other related services to migrant children. Existing law requires the superintendent to review and approve plans for the establishment of service regions and to incorporate certain criteria in the approval of regional plans including that regional service centers are to be located in areas with high concentrations of migrant and seasonal agricultural workers and fishermen. Existing law requires any changes in regional boundaries for the subsequent fiscal year to be made and approved by December 31 of the current year.

This bill would provide that the reorganization of service regions shall not affect the rights to retain salary, leaves, and other benefits of persons employed in positions that do not require certification and would require that, among other things, an employee of a service region that is included in any other service region shall become the employee of the new service region if the new service region has an equivalent vacant position that the new service region elects to fill. The bill would require a service region that employs individuals pursuant to these provisions to do so on a seniority basis. To the extent the bill would require a new service region or regional service center operated by local educational agencies to employ persons from another service region, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 692 (AB 1689) Floyd. Employment: wage claims.

Under existing law, the Labor Commissioner or his or her representatives are authorized to take assignments of certain claims for enforcement, including wage claims.

This bill would authorize the Labor Commissioner or his or her representatives to take assignments of claims for loss of wages due to employer demotion, suspension, or discharge for lawful conduct occurring during nonworking hours away from the employer's premises. The bill would make legislative findings, including findings that the bill is necessary to protect employee civil rights.

Ch. 693 (AB 1595) Migden. Cigar labeling.

Existing law contains various provisions regarding the prevention of tobacco use.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require each manufacturer, as defined, or importer of cigars to place, or cause to be placed, one of 3 specified warning labels on each retail package of cigars packaged for sale after September 1, 2000, and shipped for distribution in California.

The bill would authorize the imposition of penalties for violations of that requirement and would authorize actions to be brought by the Attorney General or by district attorneys, city attorneys of cities with a population greater than 750,000, and city prosecutors with the consent of the district attorney.

The bill would also provide that it does not affect certain pending lawsuits.

Ch. 694 (AB 1574) Corbett. First degree murder: torture.

Existing law, as amended by initiative statute, provides that murder that is committed in the perpetration of, or attempt to perpetrate, certain offenses, is murder of the 1st degree. The initiative statute provides that any amendment of its provisions by the Legislature shall require a $^{2}/_{3}$ vote of the membership of each house.

This bill would additionally provide that murder committed in the perpetration of, or attempt to perpetrate, torture, is also murder of the first degree. By changing the definition of an existing crime, the bill would impose a state-mandated local program. Because it would amend an initiative statute, the bill would require a $^{2}/_{3}$ vote of the membership of each house of the Legislature.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 695 (AB 1557) Migden. Clinical laboratories: unlicensed personnel.

Existing law regulates clinical laboratories. These provisions require, among other things, that individuals be licensed to perform various laboratory tests. However, certain provisions specifically authorize an unlicensed person employed by a licensed clinical laboratory to perform venipuncture or skin puncture for the purpose of withdrawing blood for test purposes, upon specific authorization from a licensed physician and surgeon, if that unlicensed person meets specified requirements. Existing law also authorizes the State Department of Health Services to authorize by regulation unlicensed laboratory personnel to perform skin tests for specific diseases, venipuncture, arterial puncture, or skin puncture for the purposes of withdrawing blood or for test purposes, as specified.

Existing law authorizes an unlicensed person employed by a public health department as a venereal disease case investigator to perform venipuncture or skin puncture for the purpose of withdrawing blood for test purposes, as specified.

This bill would require the department to adopt regulations by January 1, 2001, for becoming a "certified phlebotomy technician," would require unlicensed persons employed by a clinical laboratory or by a public health department who perform venipuncture or skin puncture to obtain certification pursuant to these regulations to perform the above-specified acts on and after the effective date of those regulations, and would authorize the department to charge fees not to exceed $25 for application and renewal of these certificates. The bill would not require unlicensed persons employed by a clinical laboratory who are performing these duties on the effective date of these regulations to be certified pursuant to these regulations until 3 years after the effective date of those regulations. The bill would also provide that the department may adopt regulations to issue a separate certificate to unlicensed persons employed by a clinical laboratory who only perform skin puncture tests.

The bill would also make related changes.

Ch. 696 (AB 1549) Torlakson. Central Contra Costa Sanitary District: elections: district board members.

Existing law provides for the formation of sanitary districts and the election of board members as officers of the district.

This bill would authorize the directors of the Central Contra Costa Sanitary District to be elected either by divisions or at large, if approved by the voters of the district at

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

a general or special election after the directors adopt a resolution placing the question on the ballot, or the voters of the district submit a petition requesting the directors to adopt a resolution placing the question on the ballot. This bill would establish the requirements and procedures for submitting a petition, adjusting district boundaries, and holding the election.

The California Constitution provides that a local or special statute is invalid in any case if a general statute can be made applicable.

The bill would declare that, because of the unique circumstances applicable to Central Contra Costa Sanitary District, a statute of general applicability cannot be enacted within the meaning of subdivision (b) of Section 16 of Article IV of the California Constitution.

By changing the duties of local election officials, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 697 (AB 1530) Longville. Elections: precinct vote results.

(1) Existing law requires elections officials to keep an accurate list of all voters who have received and voted an absentee ballot at each election, as specified. This bill would require the list of voters who have received and voted an absentee ballot to include the election precinct of the voter.

Existing law authorizes a vote tabulating device to be located at any place within the state approved by the elections official of the county or other political subdivision using the device.

This bill would require that, for any statewide election or certain special elections conducted on or before June 1, 2000, votes cast by absentee ballot and votes cast at the polling place be tabulated by precinct. The bill would require election results to be made available to the Legislature and appropriate legislative committees for use in connection with district reapportionment, as specified. This bill would repeal those provisions as of January 1, 2001.

(2) Existing law requires the county elections official in each county to compile and make available to the Legislature, as prescribed, certain elections information, including, among other things, lists showing the elections returns for each precinct.

This bill would also require the elections returns for each precinct to reflect the vote total for all ballots cast, including both absentee ballots and ballots cast at polling places.

(3) By imposing additional duties upon county elections officials, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 698 (AB 1476) Dutra. Year 2000 liability.

Existing law provides that any person that discloses information regarding the Year 2000 Problem, as defined, or any potential solutions to the problem are not liable for damages in any tort action brought against that person regarding the Year 2000 Problem, except as specified.

This bill would provide that no state statute may be construed to limit damages or liability, afford greater protection to defendants in Year 2000 Problem actions, or provide a greater degree of protection from joint or several liability than is afforded a specified

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

federal law regarding limits upon liability for Year 2000 Problems, except as specified. The bill would prohibit a state agency from imposing a civil fine on a small business for a violation of an administrative rule or regulation or noncriminal statute as a result of a Year 2000 Problem suffered by the small business if specified conditions are met. The bill would provide for these provisions to become inoperative on July 1, 2001.

Ch. 699 (AB 1407) Wesson. Alcoholic beverage licenses: auction sales: event permit: limited liability companies: license transfers: tied-house restrictions.

(1) The Alcoholic Beverage Control Act allows a retail off-sale licensee with annual United States auction sales revenues of at least $5 hundred million to sell wine at an auction and deliver that wine to any purchaser at the auction from the vendor's licensed premises or any other storage facility under specified conditions.

This bill would make that provision also applicable to a retail off-sale licensee with annual wine auction sales revenues of at least $5 million.

(2) The Alcoholic Beverage Control Act authorizes the issuance of an event permit to any licensee under an on-sale general license authorizing at specified events the sale of beer, wine, and distilled spirits only for consumption on property adjacent to the licensed premises and owned or under the control of the licensee, as specified.

This bill would authorize those events to be held no more frequently than one day in any single calendar quarter, instead of once in any single calendar quarter. This bill would also provide a similar authorization to any licensee under an on-sale beer and wine license.

This bill would require any event authorization to be approved by the appropriate local law enforcement agency, thereby creating a state-mandated local program.

(3) The Alcoholic Beverage Control Act sets forth procedures for applications for alcoholic beverage licenses by limited liability companies and requires limited liability companies to maintain a register of ownership interests available for inspection by the Department of Alcoholic Beverage Control.

Existing law authorizes the Department of Alcoholic Beverage Control to issue temporary permits to transferees of licenses to operate premises during the pendency of the transfer process.

This bill would correct erroneous and obsolete cross-references in these provisions.

(4) Existing provisions of the Alcoholic Beverage Control Act, known as "tied-house" restrictions, generally prohibit manufacturers, winegrowers, bottlers, importers, wholesalers, and others from performing certain activities, with specified exceptions. Existing law allows any winegrower, wine blender, beer manufacturer, brandy manufacturer, distilled spirits manufacturer, distilled spirits manufacturer's agent, rectifier, distilled spirits wholesaler, and beer and wine wholesaler, or their authorized agents, to perform certain services for off-sale retail licensees at or on the premises of the off-sale retail licensee with the licensee's permission relating to stacking, rotating, servicing, and taking inventory of stock.

This bill would expand the permitted services relating to the rotation, rearrangement, and stocking of wine or distilled spirits owned or sold by the licensee.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 700 (AB 1393) R. Wright. Low-income electric and gas customers.

(1) The Public Utilities Act requires the Public Utilities Commission to establish a program of assistance to low-income electric and gas customers, which is referred to as the California Alternate Rates for Energy or CARE program.

This bill would require the electric corporations and gas corporations that participate in the CARE program to administer low-income energy efficiency and rate assistance programs, as described, subject to commission oversight. The bill would require the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

administrators of the program to undertake certain functions and would allow the commission to require these participating corporations to competitively bid, to the extent practical, service delivery components of these programs. The bill would require the bidding criteria to recognize specified factors, subject to commission modification. The bill would make conforming changes. The bill would set forth the intent of the Legislature regarding community service providers.

Because a violation of the act is a crime, this bill would impose a state-mandated local program by creating new crimes.

(2) Existing law requires the commission to require an electric or gas corporation to perform home weatherization services, as defined, for low-income customers, as determined by the commission.

This bill would revise the definition of "weatherization."

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 701 (AB 1353) Committee on Health. Medi-Cal: disproportionate share provider hospitals.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

The Medi-Cal program provides for a special methodology of reimbursement of disproportionate share hospitals for the provision of inpatient hospital services.

Existing law generally defines a disproportionate share hospital as a hospital that has disproportionately higher costs, volume, or services related to the provision of services to Medi-Cal or other low-income patients than the statewide average.

Existing law provides for supplemental reimbursement of eligible disproportionate share providers for funding capital projects.

This bill would revise the eligibility criteria that are required to be met in order to qualify for the supplemental reimbursement.

Ch. 702 (AB 1334) Lowenthal. Law enforcement: peace officer training.

Existing law provides for the 13-member Commission on Peace Officer Standards and Training appointed by the Governor, after consultation with, and with the advice of, the Attorney General and with the advice and consent of the Senate.

Existing law also requires that racial, gender, and ethnic diversity be considered for all appointments to the commission and peace officer members of the commission meet specified requirements.

This bill would increase the membership of the commission to 14 members by increasing the number of members who are peace officers with the rank of sergeant or below from 3 to 4.

Ch. 703 (AB 1284) Jackson. Stalking.

Existing law provides that before a person who is arrested for specified crimes may be released on bail for an amount more or less than the scheduled amount for the offense, or on the person's own recognizance, a hearing must be held.

This bill would add to the list of specified crimes, intimidating a witness or victim, or making terrorist threats, as specified.

This bill would also require the county sheriff to give notice of the release on bail of any person arrested on a charge of stalking to the prosecuting attorney's office. By imposing additional duties on local law enforcement agencies, this bill would impose a state-mandated local program.

This bill would also require the offender to provide certain information regarding addresses and telephone numbers of the offender to the court, as specified. The bill would also require, unless good cause is shown, as conditions of release on bail for a person charged with stalking, that the person not initiate contact with the alleged victim, as

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified, possess any firearms or other deadly or dangerous weapons, and that the offender obey all laws.

This bill would also declare findings of the Legislature.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 704 (AB 1282) Jackson. Teacher credentialing.

Existing law requires the Commission on Teacher Credentialing to establish standards and procedures for the initial issuance and renewal of teacher credentials. Existing law requires the Superintendent of Public Instruction to adopt an appropriate state test to measure proficiency in certain basic skills, and requires each applicant to an approved credential program unless otherwise exempted, to take the state basic skills proficiency test. Existing law requires the commission to establish the amount of the fee charged to individuals being tested not to exceed $30 in the 1982–83 fiscal year, $35 in the 1983–84 fiscal year, and $40 in subsequent fiscal years.

This bill would provide that subsequent to January 1, 2002, the fee shall be set by the commission to recover the costs of examination administration and development, unless the costs are recovered by appropriations from another source of funds. The bill would require the commission to make improvements to increase access to the state basic skills proficiency test and to improve exam-related services provided to candidates for teaching credentials. This bill would require the commission to adopt these improvements in consultation with the Department of Finance and to report all improvements to the Legislature.

Ch. 705 (AB 1259) Strom-Martin. Human services: pilot program.

Existing law provides for various health and social services for eligible individuals.

Existing law requires Placer County and Solano County, with the assistance of the appropriate state departments, to implement a pilot program in Placer County and Solano County, upon approval by that county, for the funding and delivery of services and benefits through an integrated and comprehensive county health and human services system.

This bill would, until January 1, 2005, authorize Humboldt County, Mendocino County, and Alameda County to implement a similar program for the funding and delivery of services and benefits through an integrated and comprehensive county health and human services system subject to certain limitations.

Ch. 706 (AB 1236) Battin. Maintenance of criminal provisions.

(1) Existing law, as amended by initiative statute, makes it a felony or a misdemeanor for any person to knowingly dispose, transport, burn, incinerate, cause to be disposed, transported, burned, or incinerated, treat, or store any hazardous waste, or who reasonably should have known that he or she was disposing, transporting, burning, or incinerating, any hazardous waste, at a facility that does not have a specified permit, or at any unauthorized point. If that act caused great bodily injury or a substantial probability that death could result, the person may be punished by imprisonment in the state prison for up to 36 months. The initiative statute provides that any amendment of its provisions by the Legislature shall require a $^2/_3$ vote of the membership of each house.

This bill would instead provide that the person may be punished by an additional term of imprisonment in the state prison for one, 2, or 3 years under these circumstances. The bill would make other technical, nonsubstantive changes to these provisions. Because it would amend an initiative statute, the bill would require a $^2/_3$ vote.

(2) Existing law lists and categorizes, for reference purposes only, all sentence enhancements by schedules based on the length of the term of imprisonment imposed by each sentence enhancement. Existing law declares the intent of the Legislature to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

amend this provision as necessary to accurately reflect current sentence enhancement provisions.

This bill would update this provision to include new sentence enhancement provisions and delete obsolete provisions.

(3) Existing law provides that a habitual child molester, as defined, shall be punished by 25 years in the state prison.

This bill would delete this provision.

(4) This bill would make technical changes that conform to and consolidate other provisions of law, delete language that is duplicative of other provisions of law, and correct cross-references to other provisions of law.

(5) This bill would incorporate additional changes in Section 803 of the Penal Code proposed by SB 1307, to be operative if SB 1307 and this bill become effective on or before January 1, 2000, and this bill is enacted last.

(6) This bill would provide that one of the changes in Section 1170.11 of the Penal Code proposed by the bill shall become operative only if AB 313 is enacted and becomes effective on or before January 1, 2000.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 707 (AB 1222) Kuehl. Corrections.

Existing law establishes the Interstate Corrections Compact Act and the Western Interstate Corrections Compact Act which authorize states to enter into contracts with other party states for the confinement of inmates on behalf of the sending state in institutions situated within a receiving state. Any court, agency, or officer of this state with the authority to commit or transfer an inmate to any institution for confinement may commit or transfer that inmate to any institution within or without this state if this state has entered into a contract for the confinement of inmates in that institution pursuant to a compact under one of the above acts.

This bill would prohibit, except as authorized by California statute, any city, county, city and county, or private entity from causing to be brought into, housed in, confined in, or detained in this state any person sentenced to serve a criminal commitment under the authority of any jurisdiction outside of California. The bill also would express the intent of the Legislature that this provision neither prohibits nor authorizes the confinement of federal prisoners in this state.

Ch. 708 (AB 1206) Wesson. Roadway construction contractors: licensure.

Existing law, the Contractors' State License Law, defines the term contractor to be a person who undertakes certain specified types of work.

This bill would extend the definition of contractor to include persons who engage in the preparation and removal of roadway construction zones, lane closures, flagging, or traffic diversions. It would define a specialty contractor to include persons performing that work, and would require persons performing that work, on or after January 1, 2001, to hold an appropriate specialty contracting license. The bill would state legislative intent with regard to the performance of this work by licensed contractors who do not hold the specialty license for performing that work, and would provide an exemption from testing for this type of specialty license if the person certifies under penalty of perjury that certain conditions have been satisfied. By expanding the scope of the existing crime of perjury, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 709 (AB 1136) Strom-Martin. School facilities: pupil safety: classroom telephones.

Existing law, the Field Act, requires school buildings, as defined, to meet various safety specifications. Existing law, the Leroy F. Greene School Facilities Act of 1998 (Greene Act), provides funding to school districts to finance the construction, as defined, of school facilities. Existing law, the State Relocatable Classroom Law of 1979, requires the State

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Allocation Board to lease portable classrooms to qualifying school districts and county superintendents of schools. The State Relocatable Classroom Law of 1979 authorizes any qualifying school district, or under a joint powers agreement between any combination of one or more school districts or county superintendents of schools, to purchase portable classrooms.

This bill, so as to enhance pupil safety, would require, commencing with applications submitted on or after January 1, 2000, any school district applying for funding pursuant to the Greene Act to include in its plans and specifications for the construction or fabrication of a new or modernized school building, as defined, that includes the construction or fabrication of new or modernized classrooms, a hard-wired connection to a public switched network in each new or modernized classroom.

This bill would require, commencing with leases entered into on or after January 1, 2000, the plans and specifications for portable classrooms funded under the State Relocatable Classroom Law of 1979 to include a provision for a telephone in each portable classroom. The bill would provide that these requirements may be met by utilizing wireless technology equal to a hard-wired connection to a public switched telephone network.

Ch. 710 (AB 1067) Margett. Teacher credentialing.

(1) Existing law requires the Commission on Teacher Credentialing to immediately revoke the teaching or services credential of a person when the person's conviction of a violation, or attempted violation, of any one or more of certain offenses, including causing, encouraging, or contributing to the delinquency of persons under 18 years of age becomes final.

This bill would add certain offenses regarding assaulting a child under 8 years of age by a custodian of that child and infliction of cruel or inhuman corporal punishment upon a child, to these offenses.

(2) Existing law defines "sex offense" for purposes of various provisions relating to the employment of school employees. Among the offenses constituting a sex offense is any offense involving lewd and lascivious conduct under the provision that prohibits causing, encouraging, or contributing to the delinquency of persons under 18 years of age.

This bill would provide that a conviction of causing, encouraging, or contributing to the delinquency of persons under 18 years of age when it involves lewd and lascivious conduct or any offense committed or attempted in any other state or against the laws of the United States which, if committed or attempted in this state, would have been punished as one or more of certain offenses, is a conviction that, upon becoming final, requires the Commission on Teacher Credentialing to immediately revoke the credential of the person so convicted.

(3) Existing law requires the commission to deny any application for the issuance of a credential made by an applicant who has been convicted of a violent or serious felony, as defined.

This bill would also require the commission to deny any application for the issuance of a credential made by an applicant that has been convicted of one of the offenses that would require revocation of a credential.

Ch. 711 (AB 1059) Ducheny. Teachers.

Existing law requires the Commission on Teacher Credentialing (commission) to perform specified duties relating to the issuance of teacher credentials. Existing law authorizes the commission to issue certificates that authorize the holder to provide specified services to limited-English-proficient pupils.

This bill would require the Commission on Teacher Credentialing to ensure, by July 1, 2002, that an accredited program of professional preparation satisfies standards established by the commission for the preparation of teachers for all pupils, including English language learners. The standards would be required to be based upon an independent job analysis of the essential knowledge, skills, and abilities needed by all classroom teachers to develop English language skills while maintaining academic progress across the curriculum and to take into account existing standards and test specifications for the Crosscultural, Language and Academic Development certificate. The bill would require the commission to provide candidates for teaching credentials,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

including candidates prepared in other states, with an examination route to fulfill the requirements for essential preparation to teach English language learners.

The bill would prohibit the commission, commencing July 1, 2003, from issuing a preliminary teaching credential to an applicant unless the applicant satisfies the standards and requirements established by this bill or has an authorization to provide services to English language learners issued by the commission.

The bill would require an approved program of beginning teacher induction, commencing July 1, 2003, to satisfy standards established by the commission and the Superintendent of Public Instruction for beginning teacher induction for teachers for all pupils, including English language learners. The standards would be required to incorporate the essential knowledge, skills, and abilities needed for first-year and second-year certificated teachers to apply effective instructional strategies that assist pupils to develop English language proficiency while maintaining academic progress across the curriculum.

The bill would also prohibit the commission, commencing July 1, 2005, from initially issuing a professional clear teaching credential to an applicant unless the applicant satisfies the standards and requirements required under an approved program of beginning teacher induction or has an authorization to provide services to English language learners issued by the commission.

The bill would entitle a candidate for a teaching credential to earn and receive the credential by fulfilling the standards and requirements for the credential that were in effect when the candidate entered an accredited preparation program or an approved induction program.

The bill would require the commission to report to the education policy committees regarding the implementation of those provisions.

Ch. 712 (AB 1055) Villaraigosa. Playground equipment and facilities.

(1) Existing law requires all public agencies operating playgrounds, including a state agency, city, county, city and county, and district, to upgrade their playgrounds by replacement or improvement as necessary to satisfy specified regulations to the extent state funds are made available specifically for the purpose through state bonds or other means. Existing law also requires all other entities operating playgrounds open to the public to upgrade their playgrounds by replacement or improvement, as necessary to satisfy specified regulations, on or before January 1, 2000.

This bill would extend to January 1, 2003, the date on or before which entities, excluding public agencies, operating playgrounds open to the public are required to upgrade their playgrounds by replacement or improvement to satisfy specified regulations. It would also exempt certain foster and child care providers from these provisions.

The bill would require playgrounds installed between specified dates to be upgraded to satisfy criteria in certain federal guidelines. The bill would provide that before October 1, 2000, all public agencies and other entities operating playgrounds open to the public shall have a playground inspector conduct an inspection to aid compliance with applicable requirements, as specified.

(2) Existing law requires the State Department of Health Services, in consultation with specified other agencies and entities to adopt regulations for the design, installation, maintenance, inspection, supervision where appropriate, and training of personnel involved in the design, installation, and maintenance, of playgrounds, as described, either operated by public agencies, including state agencies, cities, counties, school districts, and other districts, or operated by any entity where the playground is open to the public.

This bill would enact the Playground Safety and Recycling Act of 1999, which would establish, until July 1, 2003, the playground safety and recycling grant program, administered by the California Integrated Waste Management Board, to provide grants for the purpose of improving or replacing playgrounds, as defined, to local agencies, if specified conditions for eligibility are met, including specified requirements that the grant funds will be used for the improvement, installation, or replacement of equipment or facilities through the use of recycled materials.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would authorize the California Integrated Waste Management Board to adopt emergency regulations, as prescribed, to implement the bill. The bill would create the Playground Safety and Recycling Account in the State Treasury. The bill would authorize moneys in the account to be expended, upon appropriation by the Legislature, for the purposes of the program and for the administrative costs incurred by the board in administering the program. The bill would be implemented with funds appropriated for deposit in the account or otherwise made available.

(3) Existing law appropriates $2,000,000 to the Superintendent of Public Instruction, for allocation on a one-time basis, to provide matching grants to school districts for the purpose of improving or replacing schoolsite playground equipment to meet state-mandated playground safety standards.

This bill would require the Superintendent of Public Instruction to enter into a memorandum of understanding with the board for purposes of allocating that $2,000,000, consistent with the Playground Safety and Recycling Act established by the bill.

Ch. 713 (AB 1014) Cardoza. School instructional gardens.

Existing law sets forth the various authorized classes or courses of instruction for public schools.

This bill would establish the Instructional School Gardens Program for the promotion, establishment, and support of instructional school gardens, to be administered by the State Department of Education through the allocation of grants to applicant school districts and county offices of education and the provision of technical assistance to school districts and county offices of education.

This bill would require the California Integrated Waste Management Board to give preferential consideration during its annual discretionary grant funding process to providing an appropriate level of funding to the program and would provide that the program would be implemented only if funds become available from private donations, special fund money, or federal money, or any combination thereof, for those purposes.

Ch. 714 (AB 991) Papan. Internet access: line sharing.

Under the Public Utilities Act, the Public Utilities Commission has the authority to regulate public utilities, including telephone corporations.

This bill would enact the California High Speed Internet Access Act of 1999. The bill would require the Public Utilities Commission to monitor and participate in a specified proceeding of the Federal Communications Commission addressing whether to require incumbent local exchange carriers, as defined, to permit interconnection by competitive data local exchange carriers, as defined, at any technically feasible point, to permit those competitive local exchange carriers to provide high bandwidth data services over telephone lines with voice services provided by incumbent local exchange carriers. The bill would require the Public Utilities Commission, if the Federal Communications Commission adopts an order on or before January 1, 2000, with regard to that specified federal proceeding, to comply with, and implement, in a manner that the Public Utilities Commission determines to be appropriate, that order, as prescribed, consistent with state and federal law, within 90 days from the date that the rules adopted by that order are published in the Federal Register. The bill would require the Public Utilities Commission, if the Federal Communications Commission does not adopt an order on or before January 1, 2000, with regard to that specified federal proceeding, to examine the technical, operational, economic, and policy implications of interconnection, and, if the Public Utilities Commission determines it to be appropriate, to adopt rules to require incumbent local exchange carriers in this state to permit competitive local exchange carriers to provide high bandwidth data services over telephone lines with voice services provided by incumbent local exchange carriers. The bill would make related legislative findings and declarations and statements of legislative intent.

Ch. 715 (AB 964) Aroner. Earthquake insurance.

(1) Existing law governing the California Earthquake Authority prohibits an insurer from participating in the authority unless every insurer affiliated with that insurer, as defined, or under common control with that insurer, as defined, also participates in the authority.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide, until January 1, 2004, that if a person, directly or indirectly, owns, controls, holds with the power to vote, or holds proxies representing less than 33% of the voting securities of an insurer that writes earthquake insurance, but does not write homeowners or dwelling fire insurance in the state, and the insurer became part of an affiliated group which includes one or more participating insurers as a result of an acquisition or merger which occurred after the effective date of the provisions governing the authority, then the insurer is not required to participate in the authority even though an insurer affiliated with it or under common control with it does participate in the authority, provided the insurer does not transact residential earthquake insurance business with agents exclusively appointed or employed by the participating insurer. This bill would impose reporting requirements on the exempted insurer and the Insurance Commissioner related to this exemption.

(2) Existing law establishes the Earthquake Loss Mitigation Fund, which may be used to supply grants and loans or loan guarantees to dwelling owners who wish to retrofit their homes to protect against earthquake damage. Existing law requires the operational rules of that fund to be a part of the authority's plan of operations.

This bill would require the authority, on or before July 1, 2000, to establish in the operational rules of the Earthquake Loss Mitigation Fund, a plan for the expedited expansion of the residential retrofit program statewide, as specified.

(3) Existing law provides a premium discount or credit, as specified, to policyholders of authority-issued policies of residential earthquake coverage who have retrofitted their homes to withstand earthquake shake damage, as specified.

This bill would require the authority, on or before July 1, 2000, to issue a report to the Legislature on the status of the Earthquake Loss Mitigation Fund, the residential retrofit program, and the application of the retrofit premium discount or credit, as specified.

Ch. 716 (AB 936) Reyes. Health care coverage: Medicare supplement coverage.

Existing law provides for the licensure and regulation of health care service plans by the Commissioner of Corporations. A willful violation of the law regulating health care service plans is a crime. Existing law provides for the regulation of insurance by the Insurance Commissioner.

Existing law sets forth circumstances under which an individual who is 65 years of age or older and enrolled in a designated Medicare program is entitled to a guaranteed open enrollment with regard to health care service plans offering contracts to supplement Medicare and Medicare supplement insurers.

This bill would entitle an individual who was previously enrolled in, but whose coverage was terminated by, a Medicare managed care plan, between September 1, 1998, and December 31, 1998, and after January 1, 1999, to specified additional periods of open enrollment.

This bill would include similar provisions, which would only become operative if this bill and SB 764 are enacted on or before January 1, 2000, and SB 764 repeals specified provisions of existing law.

By changing the requirements of health care service plans, this bill would change the definition of a crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 717 (AB 930) Calderon. Alcohol and drug programs: narcotic treatment programs.

Existing law authorizes the State Department of Alcohol and Drug Programs to perform certain licensing and inspection duties and to establish minimum criteria for the operation of methadone and levoalphacetylmethadol (LAAM) programs for the treatment of narcotic addicts.

This bill would require the department to perform these licensing and inspection duties and to establish and enforce the minimum criteria for narcotic treatment programs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes the department to conduct annual inspections of all narcotic treatment programs established and licensed under these provisions. Existing law requires the department, after conducting an inspection, to provide an inspection report describing any program deficiencies to the licensee, the program to submit to the department a corrective action plan, and the department to conduct a subsequent onsite inspection.

This bill would require the annual inspections of these narcotic treatment programs to include the evaluation of input regarding concerns about the narcotic treatment program. The bill would require the department to provide an inspection report to the licensee within 30 days of the completed onsite review, the licensee to submit a corrective action plan within 30 days of receipt of the inspection report, the program to implement all corrective actions contained in the plan within 30 days of approval by the department of the corrective action plan, and the department to conduct subsequent inspections of the program.

This bill would require the department to impose a civil penalty of $100 a day for a narcotic treatment program that fails to submit a corrective action plan or to timely implement any corrective action when it has been found to not be in compliance with applicable laws and regulations.

Existing law specifies various other duties of the department with regard to narcotic treatment programs.

This bill would revise some of these duties to include studying and evaluating and providing advice, consultation, and technical assistance to narcotic treatment programs regarding the programs' adherence to all applicable laws and regulations and the impact of the programs on the communities in which they are located.

Existing law authorizes the director to deny the application for initial issuance of a license to provide narcotic treatment services if certain conditions exist with regard to the applicant, or any partner, officer, director, or 10% or greater shareholder.

This bill would add to the conditions under which an application may be denied that the applicant or program violated any of the laws or regulations governing narcotic treatment programs that relate to the health and safety of patients, the local community, or the general public with respect to any other license issued to that applicant to provide narcotic treatment services. The bill would require the department to deny the application for initial licensure under these conditions unless the department makes certain determinations regarding the correction of deficiencies in the other licensed narcotic treatment programs.

Existing law authorizes the department to suspend or revoke any license issued under these provisions, or deny an application to renew a license or modify the terms and conditions of a license upon certain grounds, including the violation by the licensee of the laws and regulations governing narcotic treatment programs that relate to the health and safety of the patients or the general public, or the repeated violation of the laws and regulations governing narcotic treatment programs.

This bill would revise the grounds for these discretionary departmental actions and would require, rather than authorize, the department to suspend or revoke a license or deny an application under these provisions for violations that present an imminent danger of death or severe harm to any participant of the program or a member of the general public.

Existing law authorizes the department to cease review of an application for a license to provide narcotic treatment services if certain conditions exist. Under this provision, the department may cease review if the applicant was denied a license under the provisions regulating narcotic treatment programs within the preceding year.

This bill would require the department to cease review of an application for a license under these provisions. The bill would also require the department to cease review if the applicant had a license suspended under these provisions within the preceding year.

Existing law authorizes the director to issue an order that prohibits a narcotic treatment program from admitting new patients or providing patients with take-home dosages of a replacement narcotic drug when the director makes certain determinations.

This bill would require the department to issue the order prohibiting the specified acts.

Existing law authorizes the department to vacate the order prohibiting the specified acts when the program submits a corrective action plan that reasonably addresses the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

deficiency or substantially conforms to the required action set out in the order. Under existing law, the department order is vacated when the department accepts a corrective action plan or fails to reject a plan within 10 working days after the receipt of the plan.

This bill would authorize the department to vacate the order when the corrective action plan submitted by the program both reasonably addresses the deficiency and substantially conforms to the required action set out in the order. The bill would provide that the department order is vacated upon acceptance by the department of a corrective action plan only if the department also ensures substantial conformity with the required action set out in the order.

Existing law authorizes the director to issue an order temporarily suspending a narcotic treatment program license prior to any administrative hearing under certain circumstances.

This bill would require the department, when the outcome at a hearing held subsequent to the temporary suspension is adverse to the licensee, to suspend a narcotic treatment program's license under this provision, as provided.

Ch. 718 (AB 636) Migden. School facilities.

Existing law, the California School Finance Authority Act, establishes the California School Finance Authority for the purpose of assisting school districts and community college districts by providing financing for working capital and capital improvements.

Existing law authorizes the authority, pursuant to an agreement with a participating district, to make secured or unsecured loans to, or purchase secured or unsecured loans from, a participating district for any of prescribed purposes.

This bill would, in addition, authorize the authority to purchase the rights to and possibilities regarding funding for school facilities approved by the State Allocation Board pursuant to the Greene Act of 1998, including amounts apportioned and funded and amounts approved but not yet funded, and would make conforming changes.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 719 (AB 656) Scott. Nurse assistants: training programs.

Existing law requires skilled nursing or intermediate care facilities to adopt a training program for nurse assistants that meets standards established by the State Department of Health Services. Under existing law, applicants for certification as a certified nurse assistant are required to meet certain qualifications, including completion of an approved training program.

This bill would require the department to convene a work group of specified composition to develop recommendations on ways to expand the availability of both training programs and nurse assistants available for hire in the state. This bill would require those recommendations to be submitted to the department by July 1, 2001.

Existing law sets forth requirements for renewal of certificates issued to certified nurse assistants. Under existing law, a certificate that is not renewed within 4 years after its expiration may not be renewed except upon completion of a certification program unless certain conditions are met.

This bill would reduce that time period to 2 years and revise the conditions for renewal of certificates.

Existing law requires the department to maintain a list of approved training programs for nurse assistant certification, and to include certain information on the list. Existing law also requires the department to inspect a representative sample of the training programs.

This bill would add to the information that is required to be included on the list of programs, and would require the department to examine the passage rate for trainees from each program, and to require each program to maintain an average 60% test score passage rate, calculated over a 2-year period.

Existing law specifies the content of approved training programs.

This bill would revise the content and required hours for those programs. This bill would further require the Chancellor of the California Community Colleges to provide the department with a process for approval of college credit, and would require the department to make that information available to training programs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would incorporate additional changes in Section 1337.3 of the Health and Safety Code, proposed by AB 1160, to become operative only if AB 1160 and this bill are both chaptered and become effective January 1, 2000, and this bill is chaptered last.

Ch. 720 (SB 1237) Escutia. Insurance: claims: dispute resolutions.

(1) Existing law prohibits insurers from engaging in unfair claims settlement practices, and provides for sanctions against insurers who engage in unfair claims settlement practices with respect to third parties entitled to coverage under a policy of liability insurance by means of administrative sanctions against the insurer.

This bill would provide that an insurer shall act in good faith toward and deal fairly with third-party claimants. It would provide that if an insurer engages in unfair claims settlement practices with respect to a third-party claimant, the third-party claimant would generally have the right, upon meeting certain conditions, to assert a cause of action against the insurer, except as specified.

(2) Existing law generally provides for the determination of civil disputes by civil court actions, but contains provisions for alternative dispute resolution procedures, such as arbitration and judicial arbitration.

This bill would provide that where the amount in controversy is for either a dollar amount that does not exceed $50,000, or is within policy limits if the policy limits do not exceed $50,000, a claimant and the insurer may resolve the claim by arbitration pursuant to a written arbitration agreement, as specified. The bill would provide that if the parties agree to submit a claim to, and participate in, arbitration, the insurer shall be conclusively presumed to have complied with the duty to act in good faith toward and deal fairly with third-party claimants specified above.

Ch. 721 (AB 1309) Scott. Insurance.

(1) Existing law requires employers that elect to be self-insured for workers' compensation liabilities to obtain a certificate of consent to self-insure from the Director of Industrial Relations, as specified. Existing law also requires private employers that cease to be self-insured to discharge their continuing obligations to secure the payment of workers' compensation that accrued during the period of self-insurance by complying with various procedures, including the deposit and maintenance of a security deposit with the director for accrued liability. Under these provisions, an employer that ceases to be self-insured may alternatively discharge this obligation by purchasing a special excess workers' compensation insurance policy, and an employer that does so must maintain the required security deposit for a period of 3 years after the policy is issued, unless the insurer issuing the policy posts a financial guarantee bond with the director.

This bill would provide that certain of the provisions relating to an employer that ceases to be a self-insured employer also apply to public employers. It would provide that any employer, who is currently self-insured or who has ceased to be self-insured, may choose to discharge, without recourse or liability to the Self-Insurers Security Fund, its continuing obligations as a self-insurer, by purchasing a special excess workers' compensation insurance policy, in accordance with existing provisions of law regarding the transfer of liability to insurers and subject to certain approvals and rate filing requirements, as specified. The bill would provide that the provisions relating to the security deposit only apply to private self-insured employers. The bill would also delete provisions relating to the issuance of a financial guarantee bond and instead provide that in order for the special excess workers' compensation policy to discharge the obligation of a private employer to maintain a security deposit with the director, the policy shall provide coverage for all claims arising out of that liability for the applicable period, and to the extent the policy does not provide coverage for all claims, the employer shall maintain with the director the required security deposit for a period of 3 years after the issuance date of the policy. This bill would require the director to adopt regulations reasonably necessary to implement these provisions.

(2) Existing law prohibits insurers from engaging in unfair claims settlement practices, and provides for sanctions against insurers who engage in unfair claims settlement practices with respect to coverage under a policy of liability insurance by means of administrative sanctions against the insurer. SB 1237 of the 1999–2000 Regular Session, the Fair Insurance Responsibility Act of 2000 or "FAIR," would provide that an

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

insurer shall act in good faith toward and deal fairly with 3rd-party claimants. It would provide that if an insurer engages in unfair claims settlement practices with respect to a 3rd-party claimant, the 3rd-party claimant would generally have the right, upon meeting certain conditions, to assert a cause of action against the insurer, except as specified. It would permit binding arbitration for specified personal injury claims.

This bill would make changes to the provisions of SB 1237 if SB 1237 becomes operative. Among those changes would be the elimination of the use of verdict amounts as evidence of insurer bad faith; restricting 3rd-party bad faith actions to individuals for bodily injury, as defined, wrongful death, or property damage resulting from an incident involving a motor vehicle; providing for a defense, as specified; limiting the prospective effect of that bill's new 3rd-party rights as to prior accidents, events, occurrences, or losses; and revising the presumption regarding insurer good faith and fair dealing arising from the submission of relevant claims to arbitration.

The bill would require the State Auditor to study the effects of FAIR, and to deliver his or her report to the Governor and the Legislature on or before January 1, 2005.

Ch. 722 (SB 441) Chesbro. Motorized scooters.

(1) Existing law governs the operation of motor vehicles and bicycles, but does not include provisions specifically governing the operation of motorized scooters.

This bill would set forth provisions specifically governing the operation of motorized scooters, as specified. The bill would exempt a person who operates a motorized scooter from the provision of existing law that requires persons operating motorized bicycles or mopeds to obtain a class M2 driver's license or endorsement. The bill would exclude violations concerning the operation of a motorized scooter from the requirement that court clerks report Vehicle Code violations to the Department of Motor Vehicles. In addition, the bill would prohibit a person from, among other things, operating a motorized scooter (a) upon a highway while under the influence of an alcoholic beverage or any drug, or under the combined influence of an alcoholic beverage or any drug, (b) upon a highway or other street where bicycles are prohibited, (c) without wearing a helmet as specified, (d) when the operator is under the age of 16 years, and (e) on any vehicular crossing, unless the department by signs indicates that motorized scooters are permitted upon all or any portion of the vehicular crossing. The bill would authorize the Department of Transportation and local authorities to prohibit or restrict the use of the freeways or any portion thereof by any person operating a motorized scooter. Because a violation of these provisions would be a crime, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 723 (AB 194) Longville. Vehicles: offenses: court clerk: forwarding records.

(1) Under existing law, every court clerk is required to forward to the Department of Motor Vehicles an abstract of the record of any person convicted of a violation of the Vehicle Code. However, existing law provides certain exceptions to this requirement including convictions of the offenses of drinking any alcoholic beverage in a motor vehicle, or possessing, storing, or keeping an open alcoholic beverage container in a motor vehicle, as specified.

This bill would delete the above described exceptions when committed by the driver of the motor vehicle from the reporting requirements, thereby requiring the clerks to report these additional convictions to the department, and thus imposing a state-mandated local program by increasing the duties imposed on court clerks.

The bill would make conforming changes.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 724 (AB 1650) Committee on Transportation. Transportation.

(1) Under existing law, the powers and duties of the Department of Transportation include the duty of preparing an annual report that discusses the accomplishments of the California Transportation Research and Innovation Program and to submit that report to the Legislature not later than August 1st.

This bill would delete that duty.

(2) Existing law authorizes the board of directors of the San Francisco Bay Area Rapid Transit District (BART) to provide, by ordinance or resolution, that each director of the district shall be paid a sum that shall not exceed $1,000 for each month served subject to attendance requirements. Existing law provides for reduced compensation of members who miss board meetings and committee meetings, except as specified.

This bill would provide for a $100 reduction from the stipend for failure to attend each meeting of a committee on which the member serves if the member attends all scheduled and noticed regular board meetings.

(3) Existing law creates the Santa Clara County Transit District and prescribes the powers and duties of that district.

This bill would change the name of the district to the Santa Clara Valley Transportation Authority and would make conforming changes in related provisions of existing law.

(4) Under existing law, each member of the Santa Clara County Transit District Board is required to receive compensation in an amount determined by the board, not to exceed $50 for attending each board meeting and committee, and not to exceed $300 in any month.

This bill would increase the amount per meeting from $50 to $100 and would increase the monthly maximum from $300 to $400.

(5) The Bay Area County Traffic and Transportation Funding Act authorizes each member of a transportation authority created under the act in certain San Francisco Bay area counties to be compensated at the rate of $50 for each day attending the business of the authority, but not more than $100 in any month, excluding certain traveling and personal expenses.

This bill would increase the daily compensation to $100 and the maximum monthly compensation to $400.

(6) Existing law authorizes the Metropolitan Transportation Commission to impose a tax on the sale of gasoline within the region under its jurisdiction of not more than $0.10 per gallon, subject to certain conditions, including that the commission adopt a regional transportation expenditure plan prior to imposing the tax and that the measure imposing the tax be submitted to the voters of the region. Existing law requires that projects meet certain regional transportation needs in order to be included in the plan, such as to fund seismic retrofitting of transportation facilities, except toll bridges.

This bill would delete the toll bridges exclusion.

The bill would require the measure submitted to the voters to be set forth separately from state and local measures and to include certain language advising the voters of the authority the measure would provide. The bill would require the costs of submitting the measure to the voters to be reimbursed from general transportation funds if the measure is not approved.

(7) Under existing law, if a commercial vehicle, as defined, is modified or additions are made, as specified, at a cost of $2,000 or more, the owner of that vehicle is required to report that modification or addition to the Department of Motor Vehicles. Operative on January 1, 2000, the amount of the modification or addition that requires the reporting will be reduced from $2,000 to $200.

This bill would delay, until January 1, 2001, the operative date of the provision providing for a reduced amount, thereby continuing the $2,000 modification or addition threshold reporting requirement until that date.

(7.5) Existing law authorizes the Department of Transportation to lease specified real property in the City of San Diego to a city, county, or other political subdivision or another state agency for emergency shelter or feeding program purposes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would authorize the department to lease the specified property for the additional purpose of establishing a day care center for children.

(8) Existing law lists the highways included in the California freeway and expressway system.

This bill would add State Highway Route 11 to the California freeway and expressway system, would modify the description of the portion of State Highway Route 142 that is included in that system, would delete State Highway Route 274 from the system, and would allow for the relinquishment of a portion of State Highway Route 91 to the Cities of Hermosa Beach, Lawndale, Manhattan Beach, and Redondo Beach if the cities agree to it.

(9) Existing law provides descriptions of the routes in the state highway system.

This bill would modify the descriptions of State Highway Routes 18, 44, 66, 83, 142, 259, and 330 to delete references to State Highway Route 30, which has been deleted from the state highway system.

(10) Existing law continuously appropriates specified sums from revenues derived from certain taxes imposed on motor vehicle fuel for allocation to counties for various highway purposes, including a sum equal to the total of all reimbursable costs of snow removal on county roads, as specified, or $5,500,000, whichever is less.

This bill would increase the $5,500,000 amount to $7,000,000, thereby making an appropriation by increasing the amount of money available for snow removal.

(11) Existing law governs the operation of motor vehicles and bicycles, but does not include provisions specifically governing the operation of motorized scooters.

This bill would define "motorized scooter" for purposes of the Vehicle Code and would require every manufacturer of motorized scooters to provide a disclosure to buyers that advises buyers that their existing insurance policies may not provide coverage for these scooters and that they should contact their insurance company or insurance agent to determine if coverage is provided. The disclosure would be required to be printed as specified and to contain certain language relating to insurance requirements.

(12) Existing law makes it unlawful to willfully fail or refuse to comply with any lawful order or any peace officer, as defined, when that peace officer is in uniform and is performing duties under the Vehicle Code.

This bill would specify that it is unlawful to fail or refuse to comply with any lawful out-of-service order, as defined, that complies with certain federal regulations and is issued by a peace officer, as specified.

(13) Existing law, until January 1, 2000, authorizes the filing of a certificate of nonoperation after the expiration of the registration of a vehicle, as specified.

This bill would delete the repeal date specified above, thus extending indefinitely the authority to file the specified certificate of nonoperation.

(14) Existing law authorizes any member of a county board of supervisors, in any county of over 20,000 square miles in area and 2,855 miles of maintained county roads, to apply to the Department of Motor Vehicles for regular series license plates for that vehicle, as specified.

This bill would revise that authorization to make it applicable to any county of over 20,000 square miles.

(15) Existing law authorizes the Department of Motor Vehicles to hold driver's license suspension or revocation hearings upon demand and requires the department to issue subpoenas at the request of any party before commencing the hearing.

This bill would authorize the subpoenas to be served by first-class mail.

The bill would authorize hearing decisions to be modified at any time after issuance to correct mistakes or clerical errors.

(16) Existing law imposes certain sanctions on drivers of commercial motor vehicles for specified violations of law.

This bill would prohibit any driver from operating a commercial motor vehicle for a period of 60 days if the Department of Motor Vehicles determines, after a hearing, that the person falsified information on his or her application for a driver's license in violation of federal regulation.

The bill would prohibit any driver from operating a commercial motor vehicle for a period of 90 days if the person is convicted of a first violation of an out-of-service order, as specified. The bill would provide for additional sanctions for subsequent violations.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would authorize the department to suspend, revoke, or cancel the privilege of any person to operate a commercial motor vehicle, as specified, upon receipt of a duly certified abstract of the record of any court that the person has been convicted of certain offenses.

The bill would include certain provisions prohibiting evading a pursuing peace officer to a list of offenses requiring a suspension or revocation of the privilege to operate a commercial motor vehicle.

(17) Existing law requires the driver of an overtaken vehicle to give way in favor of the overtaking vehicle on audible signal or the momentary flash of headlights by the overtaking vehicle.

This would specify that the driver of the overtaken vehicle is not required to drive on the shoulder of the highway in order to allow the overtaking vehicle to pass.

(18) Existing law makes it an infraction for any person to drive a vehicle upon a highway with certain established speed limits at a speed greater than those limits, to drive a vehicle upon a highway at a speed greater than 65 miles per hour, and to drive certain vehicles upon a highway at a speed greater than 55 miles per hour.

This bill would make it a misdemeanor for any person to operate a commercial motor vehicle, as defined, upon a highway at a speed exceeding a maximum speed limit established under the Vehicle Code by 15 miles per hour or more. The bill would make a violation of this provision subject to certain sanctions relating to drivers of commercial motor vehicles. The bill would impose a state-mandated local program by creating a new crime.

(19) Existing law sets forth provisions governing sentencing for persons convicted of driving while under the influence of an alcoholic beverage or drug (DUI) in a water vessel, and specifies that for these purposes certain offenses shall be a separate violation of a DUI offense.

This bill would add specified sanction provisions of the Vehicle Code to these provisions.

(20) Existing law requires every towed vehicle to be coupled to the towing vehicle or tow truck by specified means.

This bill would require 2 safety chains in addition to the primary restraining system when a towed vehicle is coupled to a tow truck.

The bill would also require vehicles being transported on a slide back carrier or conventional trailer to be secured in a specified manner.

Because a violation of the Vehicle Code under existing law is a crime, this bill would expand that crime, thereby imposing a state-mandated local program.

(21) Existing law requires every motor carrier of property, as defined, to provide adequate protection against liability for the payment of damages in certain amounts, except as specified. The operator of a for-hire tow truck who meets this requirement is authorized to perform emergency moves at the direction of a peace officer irrespective of the load carried aboard the vehicle being moved.

This bill would define "emergency move" for purposes of existing law and would specify that any transportation of property by an operator of an operator of a for-hire tow truck that is not an emergency move is subject to the provision in existing law requiring protection against liability, including a requirement that the for-hire tow truck operator have a level of liability protection that is adequate for the commodity being transported by the towed vehicle or combination of vehicles.

(22) Existing law requires motor carriers and drivers to comply with the controlled substance and alcohol use and testing requirements of federal law.

This bill would include transportation requirements of federal law and would require transit agencies receiving certain federal financial assistance to comply with the controlled substance and alcohol use and testing requirements under federal law. Because a violation of these requirements is a crime, this bill would impose a state-mandated local program by expanding the scope of that crime.

(23) Existing federal regulations authorize special agents of the Federal Highway Administration to perform inspections of commercial motor vehicles and declare and mark those vehicles as "out of service" under certain circumstances.

This bill would make it a misdemeanor for any employer to violate an out-of-service order that complies with those federal regulations or knowingly require or permit a

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

driver to violate or fail to comply with that out-of-service order. The bill would impose a state-mandated local program by creating a new crime.

(24) Existing law authorizes the arresting officer to either give a person 10 day's notice to appear in court or take the person before a magistrate when the person is arrested for certain listed offenses.

This bill would expand the specified list of offenses to include a violation of an out-of-service order, as specified.

(25) Existing law authorizes a court to order a person issued a notice to appear for a traffic violation to attend a traffic violator school, in lieu of adjudicating the offense.

This bill would prohibit a court from ordering a person to attend traffic violator school in lieu of adjudicating an offense if the notice to appear was for a serious traffic violation, as defined, that occurred in a commercial motor vehicle.

(26) Existing law limits buses and motorcoaches to a width of 102 inches with an exception for certain vehicles up to 104 inches.

This bill would, until January 1, 2002, authorize a width exemption up to 106 inches to accommodate ski equipment as prescribed. This bill would impose prescribed requirements with respect to the operation of the motor coaches and buses. Because of the violation of these provisions would be an infraction, the bill would create a new crime and thus impose a state-mandated local program. The bill would also require the Department of the California Highway Patrol in consultation with the Department of Transportation, to conduct a study on the operation of those vehicles.

(27) Chapter 1159 of the Statutes of 1993, among other things, appropriated the sum of $500,000 to the Department of Transportation for allocation to the City of Coronado for an automatic vehicle identification system on the San Diego-Coronado Bridge.

This bill would reappropriate that amount to the department for that purpose.

(28) The bill would make various technical, clarifying changes in existing law.

(29) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 725 (AB 1584) Machado. Safe Drinking Water, Clean Water, Watershed Protection, and Flood Protection Act; water resources.

Under existing law, various bond acts have been approved by the voters to provide funds for water projects, facilities, and programs.

This bill would enact the Safe Drinking Water, Clean Water, Watershed Protection, and Flood Protection Act which, if adopted, would authorize, for purposes of financing a safe drinking water, water quality, flood protection, and water reliability program, the issuance, pursuant to the State General Obligation Bond Law, of bonds in the amount of $1,970,000,000. The bill would also provide for the use of prescribed bond funds, and funds repaid to the state pursuant to certain loan contracts, for specified programs established by this act.

The bill would require the Secretary of State to submit the bond act to the voters at the March 7, 2000, statewide direct primary election.

The bill would amend a provision relating to the calculations of the interest rate to be applied to certain loans from the State Water Pollution Control Revolving Fund.

The bill would require the Imperial Irrigation District, the Coachella Valley Water District, and the Metropolitan Water District of Southern California to sign and adopt a prescribed quantification agreement on or before October 15, 1999, and, if the districts do not do so, would require the Governor or his sole designee to promulgate a quantification settlement by January 1, 2000, as specified. The bill would impose specified duties on the Governor with respect to the agreement or settlement.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 726 (SB 3) Rainey. California Reading and Literacy Improvement and Public Library Construction and Renovation Bond Act of 2000.

Existing law establishes the California Library Construction and Renovation Bond Act of 1988, which authorized the issuance pursuant to the State General Bond Law of bonds

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

in the amount of $75,000,000 for the purpose of financing a special library construction and renovation program.

This bill would enact the California Reading and Literacy Improvement and Public Library Construction and Renovation Bond Act of 2000, which would authorize the issuance pursuant to the State General Bond Law of bonds in the amount of $350,000,000 for the purpose of financing a library construction and renovation program administered by the State Librarian.

The bill would provide for submission of the bond act to the voters at the statewide primary election on March 7, 2000, and would become operative upon adoption by the voters at that election.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 727 (AB 1391) Hertzberg. Forensic laboratories.

Existing law requires the State Auditor to conduct an assessment of the needs of existing forensic science laboratories, and to submit a report to the Legislature on the needs assessment by January 1, 1999.

This bill would enact the Hertzberg-Polanco Crime Laboratories Construction Bond Act of 1999, which would, upon approval by the voters at the March 7, 2000, primary election, authorize the issuance and sale of bonds in the total amount of $220,000,000 to be used for the construction, renovation, and infrastructure costs of new local forensic laboratories and the remodeling of existing local forensic laboratories and related administrative costs, and to reimburse the General Obligation Bond Expense Revolving Fund. The bill would create the Forensic Laboratories Capital Expenditure Fund in the State Treasury. The bill would also create the Forensic Laboratories Authority within the Department of Justice, which would be comprised of 7 members, including the Attorney General, the State Director of Crime Laboratories, 5 members who would be appointed by the Governor, with the advice and consent of the Senate. The bill would prescribe the powers and duties of the authority, and provide for repeal of the provisions establishing the authority on January 1, 2010.

The bill would establish procedures for applications for funding the construction and renovation of local forensic laboratories.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 728 (SB 630) Dunn. Veterans' homes.

Existing law establishes a Veterans' Home of California, Yountville, and authorizes the Department of Veterans Affairs to establish and construct a 2nd home located at Barstow and on 3 additional sites in southern California. Existing law authorizes the California Veterans Board to issue revenue bonds, negotiable notes, or negotiable bond anticipation notes for the construction of homes at these 3 additional locations.

This bill would enact the Veterans' Homes Bond Act of 2000 which, upon approval of the state electorate, would authorize, for purposes of financing a plan for the design and construction of veterans' homes in the state, the issuance, pursuant to the State General Obligation Bond Law, of bonds in the amount of $50,000,000. This bill would give first priority to funding construction or renovation of the veterans' homes described in specified provisions of existing law.

The bill would provide for submission of these provisions to the voters at the March 7, 2000, statewide primary election in accordance with specified law.

Upon the adoption by the voters at the March 7, 2000, statewide primary election of the Veterans' Bond Act of 2000, as specified above, the bill also would limit the existing authority to issue revenue bonds, negotiable notes, or negotiable bond anticipation notes as described above, to the issuance of those bonds and notes only for the construction of the veterans home at the 2nd site after the construction of the 1st site at Barstow is completed and opened.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 729 (SB 664) Alpert. San Diego ferry service: San Diego-Coronado Bridge.

(1) The Mills-Alquist-Deddeh Act specifies allowable claims for local transportation funds that may be filed with the transportation planning agency.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would allow cities within the County of San Diego to file claims with the transportation planning agency to provide commuter ferry service on San Diego Bay for the purpose of serving peak period commute trips for pedestrians and bicycles, as specified. Because this would increase the level of services required of transportation planning agencies, this bill would impose a state-mandated local program.

(2) Existing law creates the San Diego Metropolitan Transit Development Board in San Diego County. Provision is made, on an annual basis and at the time of the annual apportionment, for an assessment of each member jurisdiction based on a percentage of its apportionment equal to the percentage of its 1983–84 fiscal year apportionment claimed for support of regional transit services or 5% of its annual apportionment, whichever is greater.

The bill would delete a requirement in existing law that the specified assessment formula remain in effect for a minimum of 3 fiscal years, would delete authority for the formula to be amended after the expiration of those 3 years, would delete authority for a specified regional transit advisory service to review the formula and recommend appropriate changes to the board and the pertinent jurisdictions, and, instead, would authorize the board to adopt and amend, on an annual basis, an assessment formula for funding regional services. The bill would exempt this board action from the application of the weighted vote procedures in existing law. The bill would require the board to consider the transit needs and revenue for the next 5-year period including certain specific factors. The bill would prohibit the formula from providing for an assessment for any city that is greater than 50% of that city's annual apportionment for support of regional services. The bill would require the regional transit service advisory committee to review, on an annual basis, the assessment formula and submit to the board any recommended changes to the formula that are based on the specified factors.

The bill would delete a requirement in existing law for the board to establish certain reserves at the request of specified cities or the county.

This bill would require the board, for the 1999–2000 fiscal year only, to proportionately assess each jurisdiction within the board's area, as described, for the costs of commuter ferry service with the total aggregate amount assessed not to exceed $120,000.

To the extent that these provisions would increase the level of service required of the board or the regional transit service advisory committee, the bill would impose a state-mandated local program.

(3) Existing law requires the revenue from any tolls imposed on the San Diego-Coronado Bridge to be used first for expenses related to the collection of tolls and operation of the bridge.

This bill would specify that expenses related to the collection of tolls include, but are not limited to, the installation and operation of an automated toll collection system, if that system is installed by the San Diego Association of Governments. The bill would make conforming changes.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 730 (SB 1275) Schiff. Sex offender registration: required information.

(1) Existing law requires persons convicted of specified sex offenses to register with local law enforcement agencies upon their discharge, parole, or release from confinement and to update that registration annually or upon a change of residence address. The information required to be given by the offender is determined by the Department of Justice, and includes the offender's residence address.

This bill would require the offender to provide, in addition, the name and address of his or her employer and to update that information annually or upon a change of employment. By increasing the duties of local officials, this bill would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law requires the Department of Justice to continually compile specified identifying information regarding a person who is required to register as a sex offender and who was convicted of a specified offense. The department is also required to operate a "900" telephone number that members of the public may use to call and inquire whether a named individual is listed in that information registry. The department is authorized to release certain information under specified conditions to members of the public but is prohibited from disclosing the street address or criminal history of a listed person except as specified.

This bill would also prohibit the department from disclosing to a member of the public under the above provision the name or address of the listed person's employer.

This bill would incorporate additional changes in Section 290 of the Penal Code proposed by SB 341 and AB 1193 and 1340, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

This bill would also incorporate additional changes in Section 290.4 of the Penal Code proposed by AB 1340, to be operative if that bill and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 731 (SB 25) Escutia. Environmental health protection: children.

(1) Existing law requires the State Air Resources Board to adopt ambient air quality standards in consideration of specified factors, including public health effects, as provided, and to specify threshold levels for health effects in listing substances determined to be toxic air contaminants. Existing law requires the Office of Environmental Health Hazard Assessment, upon request of the state board, to evaluate the health effects of and prepare recommendations regarding specified substances which may be or are emitted into the ambient air and that may be determined to be toxic air contaminants. Under existing law, the state board's request is required to be in accordance with an agreement that ensures that the office's workload in implementing these provisions will not be increased over that budgeted for the 1991–92 fiscal year, as provided.

This bill would eliminate the requirement for that agreement, and would impose specified requirements on the state board and the office generally relating to the protection of infants and children from environmental health hazards. The bill would require the state board, not later than December 31, 2000, to review all existing health-based ambient air quality standards to determine whether the standards adequately protect the health of the public, including infants and children, and to revise the highest priority air quality standard determined to be inadequate, not later than December 31, 2002. The bill would require the office, by July 1, 2001, to establish a list of up to 5 specified toxic air contaminants that may cause infants and children to be especially susceptible to illness. The bill would require the state board to review and, as appropriate, revise any control measures adopted for those toxic air contaminants, to reduce exposure to those toxic air contaminants, as provided.

(2) Existing law requires the South Coast Air Quality Management District to notify all schools in the South Coast Air Basin whenever any federal primary ambient air quality standard is predicted to be exceeded.

This bill would also require the south coast district to notify day care centers in that basin, to the extent feasible and upon request. The bill would create a state-mandated local program by imposing new duties on the south coast district.

(3) The bill would create the Children's Environmental Health Center within the Environmental Protection Agency to, among other things, serve as chief advisor to the Secretary for Environmental Protection and to the Governor on matters within the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

jurisdiction of the agency relating to environmental health and environmental protection as it relates to children.

(4) This bill would incorporate additional changes to Section 40451 of the Health and Safety Code, proposed by SB 1195, to be operative only if SB 1195 and this bill are both chaptered on or before January 1, 2000, and this bill is chaptered last.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 732 (SB 1091) Ortiz. Governor's residence.

Existing law requires that proceeds from the sale of a specified parcel be deposited in a special account and held for the purpose of providing a suitable residence for the Governor.

This bill would create the Governor's Permanent Residence Commission with a specified membership to consider the needs, design criteria, site selection, and funding of a suitable residence for the Governor. The bill would require the commission to consult with the Department of the California Highway Patrol and various leaders, members, staff, and others and to make preliminary recommendations to the Governor and the Legislature by January 1, 2000, and final recommendations by June 30, 2000. The bill would also create the Governor's Residence Account in the General Fund and transfer any existing funds in the Governor's Mansion Account to the new account.

This bill would make the provisions governing the commission inoperative as of June 30, 2000, and would repeal these provisions as of January 1, 2003.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 733 (AB 290) Steinberg. Design-Build: Leland Stanford State Historical Park.

Existing law vests control of the state park system in the Department of Parks and Recreation, which includes various parks and facilities.

This bill would authorize the Director of Parks and Recreation to contract for the construction for the preservation and restoration of the Leland Stanford Mansion State Historical Park and related facilities using a design-build process that the Director of General Services is authorized to use. The bill would establish additional requirements for the design-build process. The bill would incorporate a provision of existing law that provides that a person who certifies as true any material matter that he or she knows to be false is guilty of a misdemeanor. By changing the definition of an existing crime, the bill would impose a state-mandated local program. The bill would require the director to submit a report to the Joint Legislative Budget Committee as specified.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 734 (AB 33) Soto. School-parent compacts: Parent/Teacher Involvement Program.

Existing law requires the governing board of each school district to adopt a policy on parent involvement.

Existing law also establishes the Parental Involvement Grant Program, which is administered by the Superintendent of Public Instruction. The program requires any school district that maintains kindergarten or any of grades 1 to 12, inclusive, to apply on behalf of a school for funding under that program if the schoolsite council of the school submits an application, including a parent involvement plan, that meets certain requirements, upon certification that a significant percentage of the parents of the pupils

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

at the applicant school have signed compact agreements regarding parental participation, as described.

This bill would delete the provisions that establish the Parent/Involvement Grant Program, and instead establish the Nell Soto Parent/Teacher Involvement Program, pursuant to which the Superintendent of Public Instruction would allocate grants to schools in accordance with prescribed criteria, for the purpose of strengthening communication between schools and parents, as a means of improving pupil academic achievement. The program would include teacher participation in home visits or community meetings. The bill would provide that nothing in the program be construed to supersede any valid restraining order, protective order, or order for custody or visitation issued by a court of competent jurisdiction.

Existing law requires the governing board of each school district that receives certain federal funds to establish a parent involvement program that includes home activities, strategies, and materials that can be used to assist and enhance the learning of children.

This bill would establish the Teresa P. Hughes Family-School Partnership Award and Grant Program, to be administered by the State Department of Education. This bill would require the grant of nonmonetary awards and funds to applicant school districts and county offices of education for schools that establish or expand family outreach programs that meet prescribed participation criteria. The bill would require the nonmonetary awards to be in the form of a plaque or sign and the grants of funds not to exceed $15,000 per schoolsite.

Existing law requires the governing board of each school district to adopt a policy on parent involvement. Existing law provides that the parents and guardians of pupils enrolled in public schools have the right and should have the opportunity as mutually supportive and respectful partners in the education of their children within the public schools, to be informed by the school about matters relating to the education of their children, and to participate in the education of their children. Existing law requires the governing board of each school district to develop jointly with parents and guardians, and to adopt, a policy that outlines how parents or guardians of pupils, school staff, and pupils may share the responsibility for continuing the intellectual, physical, emotional, and social development and well-being of pupils at each schoolsite.

This bill would establish the Tom Hayden Community-Based Parent Involvement Grant Program, whereby state funds would be allocated to school districts for the purposes of contracting with nonprofit community-based organizations through a grant program, to be administered by the State Department of Education, to offer training courses for parents and guardians of schoolage children to enhance their involvement in public education. The bill would provide for a grant amount, not to exceed $40,000 per schoolsite.

The bill would appropriate, without regard to fiscal year, $20,000,000 from the General Fund to the Superintendent of Public Instruction for allocation for the purposes of the programs established pursuant to its provisions. From that amount, the bill would allocate $15,000,000 for the purpose of establishing the Nell Soto Parent/Improvement Grant Program, $2,500,000 for the purpose of establishing the Teresa P. Hughes Family-School Partnership Award and Grant Program, and $2,500,000 for the purpose of establishing the Tom Hayden Community-Based Parent Involvement Program.

The funds appropriated by this bill would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

Ch. 735 (SB 366) Alpert. Pupil testing.

Under the Leroy Greene California Assessment of Academic Achievement Act, the State Board of Education is required to adopt statewide performance standards in the core curriculum areas of reading, writing, mathematics, history-social science, and science based on the recommendations made by a contractor or contractors no later than July 15, 2000.

This bill would delete the date by which the State Board of Education is required to adopt statewide performance standards in these core curriculum areas.

This bill would require the State Board of Education to adopt a performance standards system that includes performance levels, performance level descriptors, test

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

administration data from the applicable board adopted tests, and exemplars of pupil performance that exemplify the content and performance standards. The bill would require the State Board of Education to ensure that the performance standards system is aligned to the state's academically rigorous content and performance standards.

Existing law requires the State Department of Education and the publisher of the achievement test that is part of the STAR Program to make the grade, school, school district, and state results available on the Internet by June 30 of each year in which the achievement test is administered.

This bill would instead require the test publisher to make the results available to the State Department of Education by July 8 of each year, require that the individual pupil results also be made available, and require the State Department of Education to make the grade, school, school district, and state results available on the Internet by July 15 of each year in which the achievement test is administered.

Under the STAR Program, the State Board of Education is required to designate a single statewide achievement test in grades 2 to 11, inclusive. Existing law authorizes the State Department of Education to develop a standard agreement, subject to the approval of the State Board of Education, that all test publishers are required to use. Under existing law, to be eligible for consideration, test publishers are required, among other things, to enter into this standard agreement with each school district in the state that includes, among other things, the requirement that the publisher post a performance bond.

This bill would instead require the department to develop, and the State Board of Education to approve, a contract for these purposes. The bill would recast these provisions to require a test publisher to enter into the contract with the State Department of Education instead of with each school district and to require test publishers to provide valid and reliable individual pupil and aggregate scores in certain content areas.

This bill would delete the requirement of a performance bond and would make conforming changes.

This bill would exempt these contracts from requirements applicable to certain public contracts, would prescribe the contents of the contracts, would expand the law authorizing closed sessions related to pupil tests, would delete provisions authorizing the State Board of Education to adopt related regulations, and would make conforming changes.

This bill would require the State Board of Education to annually establish the amount of funding to be apportioned to school districts and to annually establish the amount per test administered that each publisher shall be paid pursuant to the contracts.

This bill would, commencing in the 1999–2000 school year, and each school year thereafter, and contingent upon a determination by the Director of Finance that funds are available to make an adjustment to funds apportioned to school districts for purposes of the testing program, require the test publisher to make available a reading list on the Internet, require the reading list to include an index that correlates ranges of pupil reading scores on the English language arts portion of the achievement test to titles of materials that would be suitable for pupils to read in order to improve their reading skills, and require the test publisher to make available, for purchase by school districts, a report that provides a numerical distribution of the reading scores of all pupils in California who took the test and reading lists that can be distributed to pupils based on the ranges of scores on the English language arts portion of the test and the age of the pupil.

This bill would provide that certain statutory changes made by the bill do not apply to the 1999 STAR Program and would require the 1999 STAR Program be governed by specified statutes as they existed on January 1, 1999.

This bill would incorporate changes in Sections 60641 and 60643 of the Education Code proposed by AB 144 to be operative only if AB 144 and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 736 (SB 267) Lewis. Charter schools: funding.

Existing law establishes the Charter School Revolving Loan Fund in the State Treasury, as a continuously appropriated fund, to loan money to school districts for charter schools and requires the Superintendent of Public Instruction to deposit $114,000

NOTE: Superior numbers appear as a separate section at the end of the digests.

from the federal Public Charter School Program grant funds awarded to the State Department of Education for 1996–97 and, appropriated in the Budget Act of 1996, into the Charter School Revolving Loan Fund. Existing law authorizes additional federal Public Charter School Program grant funds appropriated in the Budget Act of 1996 to be transferred by the Superintendent of Public Instruction to the Charter School Revolving Loan Fund. Existing law authorizes loans from money in the Charter School Revolving Loan Fund for use by charter schools in the first year in which it enrolls pupils in an amount not to exceed $50,000.

This bill would delete the continuous appropriation, would delete the references to specific items of appropriation, as they pertain to federal Public Charter School Program grant funds, and would require funds appropriated to the fund to remain available for the purposes of the fund until reappropriated or reverted by the Legislature through the Budget Act or any other act. The bill would authorize loans to be made from the Charter School Revolving Loan Fund directly to certain charter schools, as well as to the chartering authority for charter schools, and would provide that a loan to a chartering authority, or to a charter school, shall not exceed $250,000. Under existing law, a chartering authority may be a school district, a county board of education, or the State Board of Education.

Existing law requires the Controller to make loan repayment deductions from apportionments during each of the 2 successive fiscal years.

This bill would, instead, require repayment of the full amount loaned to the chartering authority or charter school to be deducted by the Controller in equal annual amounts over a number of years agreed upon between the loan recipient and the State Department of Education, not to exceed 5 years for any loan and would make conforming changes.

This bill would, notwithstanding other provisions of law, authorize a loan to be made directly to a charter school only in the case of a charter school that is incorporated, and would require the chartering authority to, also, be liable for repayment of the loan in the case of default by the charter school.

Existing law, with certain exceptions, requires an agency sponsoring a charter school to exclude the attendance of pupils in the charter school for the purposes of computing eligibility for funding of categorical and other programs of the sponsoring agency.

This bill would, instead, require that a sponsoring school district's average daily attendance be calculated pursuant to a formula, which would provide an adjustment for pupils attending charter schools.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 737 (AB 1242) Lempert. Teacher credentialing: California Preliminary (CAP) credential.

Existing law requires the Commission on Teacher Credentialing to charge examination fees that are sufficient to recover the costs of developing and administering examinations for teachers to demonstrate competence in the skills necessary to instruct limited-English-proficient pupils and to earn a certificate of bilingual-crosscultural competence.

This bill would, in addition to the fees collected pursuant to the above, authorize the commission to establish and collect fees to recover its costs for the administration of any assessment of teaching competence adopted by the commission, unless the costs are recovered by appropriations from another source.

Existing law authorizes the Commission on Teacher Credentialing to issue an eminence credential to any person who has achieved eminence in a field of endeavor taught or service practiced in the public schools of California. This credential authorizes teaching or the performance of services in the public schools in the subject, subject area, or service, and at the level or levels, approved by the commission as designated on the credential.

This bill would require the commission, until January 1, 2005, upon the recommendation of the governing board of a school district, to issue a California Preliminary (CAP) credential to any person who displays knowledge and expertise in a subject area as demonstrated by the qualifications of possession of a postbaccalaureate or graduate degree in one of a number of specified subjects, 5 or more full-time

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

equivalent years of practice in the field for which the postbaccalaureate or graduate degree was awarded, and basic skills proficiency. This credential would be a preliminary single subject teaching credential and would authorize teaching in the subject or subject area, or the performance of services, approved by the commission and designated on the credential. The bill would require the governing board of the school district electing to recommend a person for a CAP credential to enroll candidates for the CAP credential in a preservice training program that is aligned with the California Standards for the Teaching Profession and to develop an individual program of professional preparation consisting of no less than 150 hours of study for each candidate to pursue professional development. The bill would require each recipient of the CAP credential to complete the preservice training program before providing classroom instruction. The credential would be issued initially for a 2-year period upon completion of certain requirements and could be renewed for an additional 2-year period upon completion of certain requirements, after which the holder would be eligible for a professional clear teaching credential.

The bill would require the commission to report to the Legislature by February 1, 2004, on the number of credentials issued in each subject, the retention rates of candidates who receive a CAP credential, and recommendations for improvement to the program.

Ch. 738 (AB 420) Wildman. Community colleges: faculty.

(1) Existing law requires that a person employed to teach adult or community college classes for not more than 60% of the hours per week of a full-time employee having comparable duties, excluding substitute service, be classified as a temporary employee and not become a contract employee.

This bill would require the California Postsecondary Education Commission to conduct a comprehensive study of the part-time faculty, employment, salary, and compensation patterns, as specified, of the California Community Colleges. The bill would require the commission to release its preliminary findings regarding the study to the Legislature and the Governor by March 31, 2000, and would require the completed study to be transmitted to the Legislature and the Governor by July 1, 2000.

(2) Existing law requires the governing board of each community college district to adopt and cause to be printed and made available to each academic employee a schedule of salaries to be paid.

This bill would require the schedule of salaries to be paid to be based on a uniform allowance for years of training and years of experience, thereby increasing the responsibilities of community college district governing boards and imposing a state-mandated local program.

(3) Existing law establishes the Part-Time Community College Faculty Health Insurance Program for the purpose of providing a state incentive program to encourage community college districts to offer health insurance for part-time faculty. Existing law defines "part-time faculty," for the purposes of the program, as any faculty member whose teaching assignment in 2 or more community college districts equals or exceeds the cumulative equivalent of a minimum full-time teaching assignment.

This bill would revise that definition by deleting the requirement that the faculty member teach in 2 or more districts and would define the term, instead, to mean any faculty member whose teaching assignment equals or exceeds 40% of the cumulative equivalent of a minimum full-time teaching assignment.

Under existing law, a part-time faculty member and his or her eligible dependents are eligible to participate in the program no earlier than the commencement of the faculty member's 3rd consecutive semester of teaching or 4th consecutive quarter of teaching where the quarter system is used, as specified.

This bill would delete that limitation.

Under existing law, if a part-time faculty member is employed by more than one community college district, and both or all of the community college districts for whom he or she works offers health insurance pursuant to the program, the employee is required to select only one district to provide health insurance coverage.

This bill would repeal that provision.

(4) Existing law authorizes the governing boards of community college districts to provide compensation for office hours to part-time faculty.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would state that this provision does not preclude compensation under the Community College Part-Time Faculty Office Hours Program for paid office time for each 20% of a full-time load, or fraction thereof, as defined by the community college district.

Under existing law, if a governing board of a community college district establishes a program to provide part-time faculty office hours, those hours may not be applied toward the 60% hours per week requirement for determining part-time faculty status.

This bill would additionally provide that those office hours may not be counted toward the hours per week of teaching adult or community college classes for purposes of acquiring eligibility for tenure or for purposes of fulfilling any probationary hour requirements.

(5) The bill would provide that changes made to the Part-time Community College Faculty Health Insurance Program and the Community College Part-time Faculty Office Hours Program by the bill shall not affect any part-time health insurance program or office hour program in effect on January 1, 2000.

(6) The bill would make specified provisions of the bill operative in any fiscal year only if funds are appropriated for purposes of the bill in the annual Budget Act or in another measure. The bill would require the chancellor to prorate the funds among the community college districts affected by the bill if the amount appropriated in the annual Budget Act or in another measure is insufficient to fully fund those provisions.

(7) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(8) The bill would appropriate $500,000 from the General Fund to the Board of Governors of the California Community Colleges in augmentation of a specified item of the Budget Act of 1999 for purposes of the Part-Time Community College Faculty Health Insurance Program. The funds appropriated by this bill would be applied toward the minimum funding requirements for school districts and community college districts imposed by Section 8 of Article XVI of the California Constitution.

Ch. 739 (SB 117) Murray. Transportation facilities: Environmental Enhancement and Mitigation Program Fund.

Existing law states that it is the intent of the Legislature, commencing July 1, 1991, to allocate $10,000,000 annually for 10 years to the Environmental Enhancement and Mitigation Demonstration Program Fund. Under these provisions, local, state, and federal agencies and nonprofit entities may apply for and receive grants, as specified, for environmental enhancement and mitigation projects related to the environmental impact of modifying existing transportation facilities or for the design, construction, or expansion of new transportation facilities.

This bill would delete the 10-year limitation of the existing law and instead would specify that it is the intent of the Legislature to allocate $10,000,000 annually to the fund which would be renamed the Environmental Enhancement and Mitigation Program Fund. The bill also would make related changes.

The bill also would require the California Transportation Commission, on or before December 31 of each year, to provide the Assembly Committee on Budget and the Senate Committee on Budget and Fiscal Review with a list of projects funded from the program during the previous fiscal year, as specified.

Ch. 740 (SB 159) Johnston. State Teachers' Retirement System: health care benefits.

Under existing law, the State Teachers' Retirement System provides retirement, disability, and survivor benefits to members of the system and their beneficiaries.

This bill would require the system to develop a program to provide health care benefits to members of the system and to their beneficiaries, children, and dependent parents,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

as defined, and would require the costs incurred by the system to be paid by allocations from the Teachers' Retirement Fund as appropriated for that purpose. Implementation of the program would require enactment of a specific statute.

The bill would also appropriate $625,000 from the Teachers' Retirement Fund to develop a program pursuant to the bill.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 741 (SB 429) Monteith. County health services.

Existing law provides that the Hospital Services Account in the Cigarette and Tobacco Products Surtax Fund is available for appropriation for payment to public and private hospitals for the treatment of hospital patients who cannot afford to pay for that treatment and for whom payment for hospital services will not be made through private coverage or by any program funded in whole or in part by the federal government.

Existing law provides for the allocation of money derived from the Hospital Services Account to each county contracting with the State Department of Health Services under the County Medical Services Program, also known as a CMSP county, and to a county that administers its own county health services program, also known as a MISP county.

Existing law requires as a condition of a county receiving funding under these provisions that each county and noncounty hospital, among other things, maintain the same number and classification of emergency room permits and trauma facility designations as existed on January 1, 1990.

Existing law provides that if San Luis Obispo County or Stanislaus County discontinues the provision of acute inpatient care services they may surrender their emergency room permits without penalties if, in the alternative, designated requirements are met, including, delivering specific alternative services.

This bill would add new requirements, related to the system of delivering alternative services, for San Luis Obispo County and Stanislaus County to act pursuant to this provision. This bill would provide that if these counties meet the designated requirements they shall be eligible to receive county funding pursuant to these provisions in the manner specified in the bill.

Ch. 742 (SB 491) Johnston. Structured settlements: transfers.

Existing law permits a judgment awarded by a court for damages for personal injury in resolution of a tort claim, or an award for permanent disability for personal injuries subject to the workers' compensation law, to be paid in periodic payments rather than a lump-sum payment, which is known as a structured settlement.

This bill would require a transfer of structured settlement payment rights entered into on or after January 1, 2000, to be preceded by a specified disclosure and to include notice to all other interested parties. It would also require a transfer of structured settlement payment rights to comply with specified conditions, including conditions as to fairness and compliance with law. It would prohibit the inclusion of various provisions in an agreement for the transfer of structured settlement payment rights and would make an agreement void and unenforceable if a prohibited provision is included. It would require the filing of a copy of the transfer agreements with the Attorney General, as specified, and would authorize the Attorney General to charge a reasonable fee for filing a copy of those agreements. It would exempt from these provisions, blanket loan agreements in which the lender takes a security interest in the borrower's assets to secure the loan.

Ch. 743 (SB 514) Chesbro. Health care coverage: rural areas: PERS.

The existing Public Employees' Medical and Hospital Care Act provides, for each state employee or annuitant living where there is not available a competitive health maintenance organization and a fee-for-service health plan is the only option, state employer contributions on the basis of the PERS Care premiums.

This bill would delete that provision and establish the Rural Health Care Equity Trust Fund to be administered by the Department of Personnel Administration to provide subsidies and reimbursements, as specified, for certain health care premiums and health care costs incurred by state employees and annuitants in rural areas on or after January 1, 2000, as defined. The provisions of the bill would cease to be operative on January 1, 2005, or earlier, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 744 (SB 584) Chesbro. Primary health care services: rural areas.

Existing law requires the department to contract and cooperate with local government agencies and voluntary nonprofit organizations in connection with the development of local health programs for seasonal agricultural and migratory workers.

Existing law also requires the department to provide grants or loans for the operation of health services development projects in underserved rural areas.

This bill would enact provisions applicable to both of these programs that would require grants for up to 3 years to be made by the department to eligible, private, nonprofit, community-based primary care clinics for purposes of implementing these programs.

The bill would establish payment procedures and grantee reporting requirements applicable to both programs.

The bill would provide that these provisions would become operative on July 1, 2000.

The bill would appropriate $1,653,000 from the Physician Services Account in the Cigarette and Tobacco Products Surtax Fund to the State Department of Health Services for expanded access to primary care clinics.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 745 (SB 606) O'Connell. Hazardous waste: transportation: recycling.

(1) Existing law requires any person generating hazardous waste that is transported, or submitted for transportation, for offsite handling, treatment, storage, disposal, or any combination thereof, to complete a manifest prior to the time the waste is transported or offered for transportation and to submit the manifest to the Department of Toxic Substances Control. A generator is required to submit to the department, within 30 days from the date of transport, a legible copy of each manifest used.

This bill would exempt the generator copy of the manifest from the requirement that it be submitted to the department for any waste transported in compliance with specified procedures, if the generator, transporter, and facility are all identified by the same EPA identification number on the hazardous waste manifest, except as specified.

(2) Existing law allows used oil to be manifested for transportation under a modified manifesting procedure, which may be used only by a registered hazardous waste hauler and with the consent of the generator.

This bill would revise that provision to apply to hazardous waste transporters and would additionally include, within that modified manifesting procedure, antifreeze, oil/water separation sludge, and parts cleaning solvent, pursuant to specified requirements. The bill would require a hazardous waste transporter that transports, or intends to transport, these hazardous wastes pursuant to this modified manifesting procedure, to include a specified statement in the transporter's application for registration.

(3) Existing law requires the department to adopt a list of specified hazardous wastes that the department finds are economically and technologically feasible to recycle. The department is allowed to list a hazardous waste as recyclable only if it makes a specified determination. Existing law authorizes the department, whenever any waste on the list is disposed of by a person, to request, and the producer or disposer of that waste is required to supply the department with, a specified statement. Under existing law, if, after receipt of the statement, the department makes specified findings, the disposer of the hazardous waste is required to recycle the hazardous waste. A violation of the laws regulating hazardous waste is a crime.

This bill would instead require the department to prepare and adopt, by regulation, a list, and on or before January 1, 2002, and when appropriate thereafter, to revise, by regulation, a list of wastes that are feasible to recycle either onsite or at an offsite commercial hazardous waste recycling facility in the state.

The bill would authorize the department, whenever any hazardous waste on the list is transported offsite for disposal, to require the generator of that waste to supply the department with a formal, complete, and detailed statement justifying why the waste was not recycled. The bill would require the department to give priority to sending the request to specified generators.

The bill would require the department, by July 1, 2000, to establish an advisory committee, consisting of representatives of specified businesses and organizations, to

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

advise the department on the development of the regulations required or authorized by these recycling requirements and on the department's implementation of those requirements.

The bill would require the department to establish a procedure, by January 1, 2002, to verify the disposal of a listed hazardous waste of and to adopt regulations, by January 1, 2002, to perform specified duties regarding the exchange of hazardous waste.

The bill would require the department, if it finds the recycling of the hazardous waste to be feasible, to require the generator to recycle any of the hazardous waste to which the finding of the department applies and would also subject a generator who does not comply with such a notice to a specified fee.

(4) Existing law defines "used oil" for purposes of the provisions regulating the handling of used oil and provides specified standards of purity for recycled oil, including a specified amount of total polychlorinated biphenyls (PCBs). Existing law requires any person who generates, receives, stores, transfers, transports, treats, or recycles used oil to comply with the hazardous waste control law, except as specified. A generator claiming used oil is exempt from regulation by the department is required to ensure that the used oil is tested and certified as being in compliance with specified standards before the used oil is transported from the generator location. A violation of the laws regulating used oil is a crime.

This bill would require a generator of used oil that is not a used oil collection center or a household waste collection facility, which transfers used oil to a used oil recycling facility, to certify to the transporter that the used oil meets the definition of used oil and does not contain more than a specified concentration of PCBs. The bill would impose a specified amount of liability upon a generator who submits a false certification.

(5) Since a violation of the bill's requirement concerning recyclable hazardous waste and used oil would be a crime, the bill would impose a state-mandated local program by creating a new crime.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 746 (SB 717) Peace. Workers' Compensation Administration Revolving Fund.

Existing law establishes a system of workers' compensation to pay for injuries to workers. Existing law, until January 1, 1999, provided for the establishment of the Workers' Compensation Administration Revolving Fund, with money in the fund to be available, upon appropriation, to fund a portion of the costs of administering the workers' compensation program.

This bill would reestablish the Workers' Compensation Administration Revolving Fund as a special account in the State Treasury. Money in the fund could be expended by the Department of Industrial Relations, upon appropriation, for the administration of the workers' compensation program. The money in the fund would consist of assessments on employers. The bill would provide that costs of the program would be shared between the General Fund and those assessments, as specified.

Ch. 747 (SB 741) Alpert. Immunizations: varicella (chickenpox).

Existing law requires county health officers to organize and maintain a program to make immunizations available to certain persons. Existing law states the intent of the Legislature to provide a means for the eventual achievement of immunization against certain childhood diseases. Under existing law, persons exposed to those childhood diseases may be temporarily excluded from school until a determination is made by the local health officer that the person is no longer at risk of developing the disease.

This bill would add varicella (chickenpox) to the list of childhood diseases for which the Legislature intends the eventual achievement of immunization. Because the bill would add to the duties of certain county officers it would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law prohibits the governing authority of a school or other institution from unconditionally admitting any person as a pupil of any private or public elementary or secondary school, child care center, day nursery, nursery school, family day care home, or development center, unless prior to his or her first admission to that institution he or she has been fully immunized against various diseases.

This bill would add varicella (chickenpox) to the list of diseases effective July 1, 2001, except with regard to pupils who were admitted before July 1, 2001, and would authorize the State Department of Health Services to adopt emergency regulations to implement this requirement.

This bill would specify that the provisions relating to varicella (chickenpox) would be operative only to extent funds for these purposes are appropriated in the annual Budget Act.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 748 (SB 765) Schiff. Biological specimens.

Existing law sets forth procedures governing the operation of clinical laboratories. A violation of these provisions constitutes unprofessional conduct.

This bill would require, commencing July 1, 2000, every person licensed under specified provisions of existing law that regulate health care professionals who collects human biological specimens for clinical testing or examination to secure those specimens as specified.

The bill would also require, on and after January 1, 2001, clinical laboratory employees, agents, and couriers who retrieve biological specimens located in a specified public place that are not secured in a locked container, as defined, to notify the licensee by attaching a specified form to the container and to mail a copy of the form to the Department of Consumer Affairs, as specified.

This bill would require the State Department of Health Services to develop, and provide to all licensed clinical laboratories, a form in triplicate for the above-described notifications.

The changes made by the bill would be contingent upon the enactment of AB 1558 adding Section 2244 to the Business and Professions Code, in which event they will become operative at the same time as AB 1558.

Ch. 749 (SB 816) Escutia. Physician assistants and nurse practitioners.

Under existing law, a physician assistant may administer or provide medication to a patient, or transmit orally, or in writing on a patient's record or in a transmittal order, a prescription from his or her supervising physician and surgeon to a person who may lawfully furnish the medication or medical device, as specified. Existing law prohibits a physician assistant from administering or providing a drug or medical device or transmitting a prescription for a drug or medical device, except as specified, without an order from a supervising physician and surgeon for the particular patient.

This bill would add provisions defining a "drug order" as a prescription issued and signed by a physician assistant acting as an individual practitioner, as specified, and would provide that the order be treated in the same manner as a prescription from the supervising physician. The bill would require advance approval from a supervising physician prior to a physician assistant administering, providing, or issuing a delegated prescription for Schedule II through Schedule V controlled substances.

The bill would require all physician assistants who are authorized by their supervising physicians to issue delegated prescriptions for controlled substances to register with the United States Drug Enforcement Administration (DEA), as specified.

Existing law authorizes a nurse practitioner to furnish drugs or medical devices, as specified, pursuant to standardized procedures.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would add provisions defining a "drug order" as an order for medication which is dispensed to or for an ultimate user, issued by a nurse practitioner as an individual practitioner, as specified, would provide that the order be treated in the same manner as a prescription of the supervising physician and surgeon, and would require all nurse practitioners who are authorized pursuant to these provisions to furnish or issue drug orders for controlled substances to register with the United States Drug Enforcement Administration. The bill would set forth the intent of the Legislature, and make conforming changes.

Ch. 750 (SB 847) Vasconcellos. Marijuana Research Act of 1999.

Existing law, the Compassionate Use Act of 1996, prohibits any physician from being punished, or denied any right or privilege, for having recommended marijuana to a patient for medical purposes. The act prohibits the provisions of law making unlawful the possession or cultivation of marijuana from applying to a patient, or to a patient's primary care giver, who possesses or cultivates marijuana for the personal medical purposes of the patient upon the written or oral recommendation or approval of a physician. Existing law establishes a Research Advisory Panel to study and approve research projects concerning marijuana or hallucinogenic drugs.

This bill would establish the Marijuana Research Act of 1999.

The bill would provide that the Regents of the University of California, if they elect to do so, may implement a 3-year program, to be called the California Marijuana Research Program, under which funds would be provided for studies intended to ascertain the general medical safety and efficacy of marijuana and, if found valuable, to develop medical guidelines for the appropriate administration and use of marijuana.

The bill would provide that it shall be implemented only to the extent that funding for its purposes is appropriated by the Legislature in the annual Budget Act.

Ch. 751 (SB 1009) Ortiz. Cancer research.

Under existing law, the State Department of Health Services is responsible for the administration and oversight of various health care programs.

Existing law establishes the Cancer Research Fund in the State Treasury, provides that the moneys in the fund shall be expended for purposes of cancer research, as defined, and provides that the State Department of Health Services may contract with nonprofit organizations, foundations, or public entities to administer the Cancer Research Program.

Existing law requires the program to be administered in accordance with certain principles, including, but not limited to, the requirement that the department work closely with, and seek the advice of, the Cancer Research Council, consisting of 16 members.

This bill would revise the procedures for administration of the program and would limit the allocation of funds according to a formula for the use of funds for various specified types of cancer research.

Ch. 752 (SB 1048) Murray. Kenneth Hahn State Recreation Area: advisory committee: master plan.

(1) Existing law requires the Department of Parks and Recreation to develop, operate, and maintain state parks and recreation areas.

This bill would declare the intent of the Legislature in enacting this bill to provide for the planning of the expansion of the Kenneth Hahn State Recreation Area, and the development of related facilities in the Baldwin Hills area of Los Angeles County. The bill would also require the Secretary of Resources to establish an advisory committee to assist in the development of a master plan for the planning and expansion of the Kenneth Hahn State Recreation Area, and would require that the advisory committee consist of representatives from state and local government, and the communities served by the expansion and development project. The bill would require the secretary, in conjunction with the Director of Parks and Recreation, not later than January 1, 2002, to prepare and submit to the Legislature a master plan for the expansion and development of the Kenneth Hahn State Recreation Area that is designed to accomplish specified goals.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) The Budget Act of 1999 allocates $4,000,000 for the Kenneth Hahn State Recreation Area.

This bill would authorize the expenditure, at the direction of the Secretary of Resources, of $500,000 of that amount for the development of the master plan required pursuant to the bill, thereby making an appropriation.

Ch. 753 (SB 1077) Burton. Insurance: agents and brokers.

Existing law requires, with certain exceptions, that an insurer provide an insurance broker-agent 120 days' advance notice prior to terminating or amending a written agency or written brokerage contract with the broker-agent if the contract has been in effect for at least one year.

This bill would add an additional exception providing that the 120 days' advance notice requirement does not apply if the broker-agent transferred ownership, control, or servicing of policies written with the insurer to another insurer or other specified entities.

Existing law provides that an insurer is not required to renew any policy of insurance if a broker-agent is no longer the broker-agent of record with respect to the policy or in various other situations, as specified.

This bill would provide that an insurer is also not required to compensate a terminated broker-agent under these circumstances. This bill would also provide that an insurer is not required to renew any policy of insurance or compensate a terminated broker-agent if the broker-agent has transferred ownership, control, or servicing of policies written with the insurer to another insurer or an entity owned or controlled by another insurer or to an entity owning or controlling another insurer. This bill would make other related changes to these provisions.

This bill would make other technical, nonsubstantive changes.

Ch. 754 (SB 1105) Chesbro. Health: youth pregnancies.

Existing law establishes the Community Challenge Grant Program, administered by the State Department of Health Services, in order to provide community challenge grants to reduce the number of teenage and unwed pregnancies. The provisions of this program are operative until July 1, 2000, and would be repealed on January 1, 2001.

Existing law conditions implementation on receipt of federal financial participation pursuant to a federal waiver received under the State-Only Family Planning Services Program.

This bill would eliminate this requirement.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 755 (SB 1107) Sher. Operator certification program: water distribution systems.

(1) Existing law requires all persons responsible for the supervision or operation of water treatment plants to be certified by the State Department of Health Services. Existing law authorizes the department to take certain administrative action with regard to a water treatment operator or water treatment operator-in-training certificate.

This bill would require the department to examine and certify persons as to their qualifications to supervise or operate a water distribution system. The bill would authorize the department to take designated administrative actions with regard to a water distribution operator certificate.

The bill would require all persons who are in responsible charge of the water distribution system of a community water system or a nontransient noncommunity water system to possess a valid and current water distribution operator certificate of the appropriate grade in accordance with regulations.

(2) Existing law authorizes the department to establish fee schedules for the issuance and renewal of these operator certificates sufficient to recover all costs incurred in the administration of regulatory provisions.

This bill would authorize the department to establish fee schedules for the replacement and reinstatement of certificates under these provisions and for the continuing education of certificate holders. The bill would establish in the State Treasury the Drinking Water Operator Certification Special Account into which fees collected for

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

purposes of the certification and examination of water treatment operators, water treatment operators-in-training, and water distribution operators would be deposited.

(3) Existing law authorized any person employed as a water treatment plant operator on the date provisions authorizing the regulation of water treatment plant operators became effective to be issued an appropriate certificate provided that the person provided evidence of certain qualifications acceptable to the director as prescribed by regulations.

This bill would, instead, require that an appropriate certificate be issued to a person employed as a water distribution operator if the water system employing the operator has applied for the certificate within one year after the adoption of regulations implementing these provisions.

This bill would require the department to evaluate the water distribution operator certification program of the California-Nevada Section of the American Water Works Association (CNAWWA) and issue an appropriate water distribution operator certificate for those certified operators that have satisfied the provisions regulating water distribution system operators.

The bill would require, on or after the effective date of regulations implementing the bill's water distribution system operator regulatory provisions, that certificates issued by certification programs of other states be recognized as valid and sufficient as provided under the bill.

(4) Existing law requires that all preentry and postentry educational programs under these operator provisions be tailored to the needs of all segments of the population without respect to race, color, or creed.

This bill would repeal this provision.

(5) Existing law requires the department to establish the level of skill, knowledge, and experience necessary to supervise and operate a water treatment facility. Existing law requires the department to establish criteria to classify the type of water treatment plants.

This bill would, instead, authorize the department to approve courses of instruction provided by educational institutions, professional associations, public agencies, or private agencies for purposes of qualifying persons for initial certification, certification renewal, and recertification as a water treatment operator, water treatment operator-in-training, or water distribution operator. The bill would authorize the department to adopt specified rules, regulations, and certification standards with regard to these operators and to water treatment plants and water distribution systems.

(6) Existing law sets forth definitions governing the California Safe Drinking Water Act and the provisions governing water treatment plant operators.

This bill would add to these definitions for purposes of existing provisions regulating water treatment operators, water treatment operators-in-training, and water treatment plants and for purposes of provisions of the bill that would regulate water distribution operators and water distribution systems.

(7) Existing law specifies certain requirements of any person who operates a public water system.

This bill would revise this provision to provide that any person who owns a public water system shall ensure that the system meets certain requirements and the bill would add to those requirements that the public water system comply with specified operator certification programs. The bill also would set forth requirements for any person who owns a community water system or a nontransient noncommunity water system.

(8) Existing law requires the Director of Health Services to adopt regulations and certification standards for purposes of the operation of water treatment plants.

This bill would repeal these provisions.

Ch. 756 (SB 1119) Alarcon. Pollution control: financing: capital access.

(1) The existing California Pollution Control Financing Authority Act establishes the California Pollution Control Financing Authority, with specified powers and duties, and authorizes the authority to approve financing for projects, as defined, to prevent or reduce environmental pollution, including projects to remediate environmental pollution, and projects for soil excavation and removal, and construction, operation, and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

maintenance of systems that extract, contain, or treat groundwater, soil vapor, gas, or leachate.

This bill would expressly include, as an eligible project, payment of the cost to remediate environmental pollution by a de minimis or de micromis responsible party, in accordance with the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). The bill would revise the definition of "project" for purposes of the act to conform with these provisions.

(2) The existing act establishes the California Pollution Control Financing Authority to provide financial assistance for pollution control facilities. Existing law establishes the Capital Access Loan Program, which is administered by the authority, and defines the term "financial institution," for purposes of that program, as a federal or state-chartered bank, savings association, credit union, or a consortium of these entities. Existing law provides, for the purpose of the definition of the term "qualified loan," that the loan may be made in the form of a line of credit, in which case the amount of the loan is required to be considered as the maximum amount that can be drawn against the line of credit.

This bill would revise the definition of the term financial institution to include not-for-profit community development financial institutions and would specify that a consortium of financial institutions may include a nonfinancial corporation, if the percentage of capitalization by all nonfinancial corporations in the consortium does not exceed 49%. The bill would instead require a participating financial institution to specify the amount of the line of credit to be covered under the program, which may be equal to the maximum commitment under the line of credit or be an amount less than that maximum commitment.

This bill would additionally authorize the authority to take specified actions to facilitate the development of a secondary market for a loan enrolled in the program by providing security for that loan.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 757 (SB 1128) Speier. Medi-Cal: provider reimbursement.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

The Medi-Cal program provides for a special methodology of reimbursement of disproportionate share hospitals for the provision of inpatient hospital services.

Existing law generally defines a disproportionate share hospital as a hospital that has disproportionately higher costs, volume, or services related to the provision of services to Medi-Cal or other low-income patients than the statewide average.

Existing law provides for supplemental reimbursement of eligible disproportionate share providers for funding capital projects.

This bill would authorize a distinct part of an acute care hospital providing specified services and meeting certain requirements to receive, in addition to the rate of payment that the facility would otherwise receive for skilled nursing services, supplemental reimbursement for capital projects as provided under the bill.

Ch. 758 (SB 1210) Baca. Sales and use taxes: exemptions: returnable and nonreturnable containers.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law provides various exemptions from that tax, including an exemption for returnable and nonreturnable containers under specified conditions.

This bill would add an exemption for containers when sold or leased to persons who place food products for human consumption in the container for shipment, provided the food products will be sold, whether in the same container or not, and whether the food products are remanufactured or repackaged prior to sale.

This bill would state the Legislature's intent in enacting the bill.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemptions from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 759 (SB 1221) Schiff. Historical resources: Historic Property Maintenance Fund.

Existing law provides for the development, repair, and maintenance of historical landmarks and registered points of historical interest in the state.

This bill would establish the Historic Property Maintenance Fund in the Treasury, and would require that 50% of the revenue collected by the Department of Transportation in each fiscal year from rental receipts from a federally designated historic property, or from property listed as a state historical resource, that is owned by the Department of Transportation and located in a freeway right-of-way corridor, less any amount transmitted in lieu of property tax to a city, county, or city and county, as required by law, be deposited into the fund. The bill would authorize the expenditure of moneys in the fund by the Department of Transportation, upon appropriation by the Legislature, to pay for costs associated with the maintenance and operation of historic property. The bill would specify that any moneys deposited into the fund are in addition to, and are not intended to supplant or replace, any existing funds that are currently available to any state agency for the operation and maintenance of historical resources.

Ch. 760 (SB 1228) Vasconcellos. Rental vehicles: airports.

Existing law regulates the advertisement of vehicle rental company rates and generally requires that a rental company advertise and charge a rate that includes the entire amount, except taxes and mileage, and prohibits additional fees, including the imposition of airport fees and charges.

This bill would require rental car companies doing business with specified customers at the San Jose International Airport to impose an additional fee for the purpose of providing an airport-mandated common use busing system for the movement of passengers between the terminal and an interim car rental facility until the commencement of the collection of the next described fee. The bill would require the companies to impose an additional fee for the purpose of financing, designing, or constructing either consolidated rental car facilities or a common use transportation system, or both, if certain conditions are met, and would require additional disclosures in advertising and contracts by rental car companies imposing that fee, or by any person or entity other than a rental car company, including a passenger carrier or a seller of travel services, that advertises or quotes a rate for a car rental subject to a surcharge. The bill would provide that authorization to impose the fee would expire no later than 20 years from the date that the amount of the first fee is collected. The bill would make legislative findings and declarations as to the necessity for a special statute.

Ch. 761 (AB 139) Havice. State employees: State Bargaining Unit 7.

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions of a specified memorandum of understanding entered into between the state employer and the California Union of Safety Employees, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that provisions of the memorandum of understanding approved by this bill that require the expenditure of fund shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer and the affected employee organization shall meet and confer to renegotiate the affected provisions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 762 (AB 136) Mazzoni. Drug paraphernalia: clean needle and syringe exchange projects.

Existing law makes it a misdemeanor to furnish drug paraphernalia, knowingly, or under circumstances when one reasonably should know, that it will be used to inject or introduce into the human body a controlled substance.

This bill would exempt from criminal prosecution public entities and their agents and employees who distribute hypodermic needles or syringes to participants in clean needle and syringe exchange projects authorized by the public entity pursuant to a declaration of a local emergency due to the existence of a critical local public health crisis.

Ch. 763 (AB 87) Floyd. California Special Supplementary Food Program for Women, Infants, and Children.

Existing law, the California Special Supplementary Food Program for Women, Infants, and Children, authorizes the State Department of Health Services to conduct a statewide program for providing nutritional food supplements to low-income pregnant, postpartum, and lactating women, and infants and children under 5 years of age, who have been determined to be at nutritional risk by a health professional.

Existing law requires the department, under this program, to authorize retail food vendors, by written agreement, to accept nutrition coupons.

Under existing law, the Health and Welfare Agency Data Center is required to manage the implementation of a statewide electronic benefits transfer system that would apply to, among other programs, the Food Stamp Program.

This bill would authorize the State Department of Health Services to implement an electronic benefits transfer system for the California Special Supplemental Food Program for Women, Infants, and Children, except that implementation of the system would be conditioned upon completion by the department of a feasibility study and provision of funding for the system in the annual Budget Act.

Ch. 764 (AB 75) Strom-Martin. State agency recycling: waste diversion: community service districts.

(1) The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program to which cities, counties, and regional agencies, as defined, are subject. The act requires the board to implement various state programs designed to encourage the reduction of solid waste.

This bill would require each state agency, as defined, on or before July 1, 2000, to develop and adopt, in consultation with the board, an integrated waste management plan.

The bill would require each state agency and each large state facility, as defined, to divert at least 25% of the solid waste generated by the state agency or large state facility from landfill disposal or transformation facilities by January 1, 2002, and at least 50% by January 1, 2004. The bill would authorize the board to establish, until January 1, 2006, a source reduction, recycling, and composting requirement that would be an alternative to the 50% reduction required under the bill. The board would also be authorized to grant single or multiyear extensions from these diversion requirements, until January 1, 2006. The board would be required to develop and adopt, by February 15, 2000, collection, storage, and loading requirements for recyclable materials. The bill would require each state agency to submit an annual report to the board regarding solid waste reduction. The board would be authorized to adopt regulations, that would be operative until January 1, 2006, regarding the granting of alternative reduction requirements or extensions. The bill would also prescribe related matters.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law requires each city, county, and regional agency to submit a report to the board summarizing its progress in achieving specified waste diversion requirements.

This bill would require each community service district, as defined, to provide the city, county, or regional agency in which it is located, information on the programs implemented by the district and the amount of waste disposed and diverted within the district. By imposing new duties on the districts, the bill would impose a state-mandated local program.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 765 (AB 63) Ducheny. Office of Binational Border Health.

Under existing law, the State Department of Health Services generally regulates issues of public health. Under existing federal law, the United States-Mexico Border Health Commission exists to address specified issues relating to border health.

This bill would create the state Office of Binational Border Health, to facilitate cooperation between California and Mexican health officials and health professionals to reduce the risk of disease in the California border region. The bill would require the office to convene a voluntary community advisory group of representatives of border community-based stakeholders to develop a strategic plan, and would require the office to report its resulting recommendations to the California members of the federal commission, and to prepare an annual border health status report for submission to the Director of Health Services, the Legislature, and the Governor.

Ch. 766 (AB 435) Corbett. Workers' compensation: medical records: disclosure.

(1) Existing law provides that medical information and records that are obtained as a result of a claim for workers' compensation are exempt from the Confidentiality of Medical Information Act.

This bill would provide that the exemption is not available with respect to the disclosure or use of medical information regarding the human immunodeficiency virus (HIV) without a patient's prior authorization unless the patient is an injured worker claiming to be infected with or exposed to the virus through an exposure incident arising out of and in the course of employment. The bill would express legislative intent relating to the above changes that would be made by the bill.

(2) Existing law requires an insurer to discuss all elements of the claim file in a workers' compensation claim that affect the employer's premium, except as specified.

This bill would prohibit, with certain exceptions, the disclosure to an employer of medical information about an employee who has filed a workers' compensation claim.

(3) Existing law makes a violation of the Confidentiality of Medical Information Act which results in economic loss or personal injury to a patient a crime.

This bill, by including medical records and information subject to the Confidentiality of Medical Information Act that previously were excluded, would broaden the scope of that crime, and thus would impose a state-mandated local program.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 767 (AB 409) Dickerson. Disabled veterans: contracts.

(1) Existing provisions of the Military and Veterans Code specify disabled veterans participation goals for professional bond services and state contacts and set forth definitions for these purposes.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would revise the definitions of "administering agency," "awarding department," and "contract," for the above purposes, as specified.

(2) Existing provisions of the Military and Veterans Code require any state governmental entity that awards contracts for professional bond services to have annual statewide participation goals of not less than 3% for disabled veteran business enterprises, as defined.

This bill would require a business concern, which qualified as a disabled veteran business enterprise prior to the death or certification of a permanent medical disability of the disabled veteran who is a majority owner of that business concern, to be deemed to be, solely for purposes of any contract entered into before that death or certification, a disabled veteran business enterprise for a period not to exceed 3 years after the date of that death or certification of a permanent medical disability, if the business concern is inherited or controlled by the spouse or child of that majority owner, or by both of those persons.

(3) Existing provisions of the Public Contract Code governing public contracts (a) require any state agency, department, officer, or other governmental entity that awards contracts for construction, certain professional services, materials, supplies, equipment, alteration, repair, or improvement to have, among other goals, annual statewide participation goals of not less than 3% for disabled veteran business enterprises, and (b) require a state governmental entity, in awarding a contract to the lowest responsible bidder, to consider the efforts of a bidder to meet, among other goals, disabled veteran business enterprise goals, and (c) require the awarding department to award the contract to the lowest responsible bidder meeting or making good faith efforts to meet those goals, as described.

This bill would add similar provisions to the Military and Veterans Code (a) to require any state agency, department, officer, or other governmental entity that awards contracts for construction, certain professional services, materials, supplies, equipment, alteration, repair, or improvement to have annual statewide participation goals of not less than 3% for disabled veteran business enterprises, and (b) to require a method of monitoring adherence to these goals, as specified.

(4) Existing law requires the Office of Small and Minority Business and each awarding department to report annually to the Governor and the Legislature on the level of participation by disabled veteran business enterprises, as specified.

This bill (a) would require the Department of Veterans Affairs to appoint an advocate to undertake specified responsibilities relating to the implementation of annual statewide participation goals, and (b) would require the Office of Small and Minority Business to work in conjunction with the advocate in making that annual report to the Governor and the Legislature.

Ch. 768 (AB 427) Scott. Insurance: delinquency proceedings.

(1) Existing law generally prohibits, with specified exceptions, any state agency from employing, without the prior written consent of the Attorney General, any legal counsel other than the Attorney General in any matter in which the agency is interested. This general prohibition specifically applies to the Department of Insurance in insurance delinquency proceedings.

This bill would provide that this prohibition also applies to any state commissioner or officer. The prohibition would also apply with respect to any matter in which the state agency, commissioner, or officer is a party as a result of office or official duties.

(2) Existing law provides for proceedings in cases of insolvency and delinquency of insurance companies and authorizes the Insurance Commissioner to appoint and employ special deputy commissioners, clerks, and assistants in this regard.

The bill would provide that any person appointed by the Insurance Commissioner to serve in the capacity of chief executive officer of the department's Conservation and Liquidation Office shall be subject to Senate confirmation.

Ch. 769 (AB 496) Leach. Public records: health care service plans.

(1) Under the California Public Records Act, certain public records are required to be made available for public inspection.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would exempt from public disclosure, for a period of 3 years after the contract is fully executed, the records of a health care service plan governed by a county board of supervisors that relate to provider rate or payment determinations, allocation or distribution methodologies for provider payments, formulae or calculations for these payments, and contract negotiations with health care providers for alternative rates. However, the bill would provide that these exemptions shall not prevent access to any records by the Joint Legislative Audit Committee, or by the Department of Corporations in the exercise of specified powers.

(2) Existing law, the Ralph M. Brown Act, relating to open meetings of legislative bodies of local agencies, provides that any writings distributed to all or a majority of the members of a legislative body in connection with a matter subject to discussion or consideration at a public meeting are disclosable public records under the California Public Records Act unless specifically exempted.

The bill would provide that the transmission of specified health care service plan information or records to the board of supervisors does not constitute a waiver of exemption from disclosure.

(3) The Ralph M. Brown Act requires that the meetings of the legislative body of a local agency be conducted openly, with specified exceptions.

This bill would provide that a county board of supervisors as the governing body of a health plan may hold a closed session solely for discussion or taking action on health plan trade secrets.

Ch. 770 (AB 738) Davis. State employees.

(1) Existing law establishes the Child Care Fund to encourage the development of child care programs for dependent children of state employees and is administered by the Department of Personnel Administration. The funds are allocated to the Child Care Fund from the amount appropriated in the annual Budget Act for employee compensation and were available for expenditure through June 30, 1991.

This bill would create the Work and Family Fund in the State Treasury, a continuously appropriated fund, to establish and maintain work and family programs for state employees and to be administered by the Department of Personnel Administration. The bill would provide that the moneys in the fund shall be allocated from the amount negotiated in memoranda of understanding between the state and the recognized employee organization, and appropriated by the Legislature, for the 2000–01 fiscal year and subsequent fiscal years. The fund would cease to exist on June 30, 2005, and any balance in the fund would revert to the General Fund, unless the existence of the fund is extended by statute and that statute is enacted and becomes effective prior to that date.

(2) Existing law requires a state, school, or school safety member, whose effective date of retirement is within 4 months of separation from employment with the employer that granted sick leave credit, to be credited at his or her retirement with 0.004 year of service credit for each unused day of sick leave, as specified.

This bill would provide that a state member, whose effective date of retirement is within 4 months of separation from employment with the state, shall be credited at his or her retirement with 0.0004 year of service credit for each unused day of educational leave, as specified.

(3) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions of specified memoranda of understanding entered into between the state employer and the California State Employees Association, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that any provision in a memorandum of understanding approved by any section of this bill, and which requires the expenditure of funds, shall not take effect unless funds for these provisions are specifically appropriated by the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, all or any part of the memorandum of understanding may be declared null and void by any affected employee organization.

(4) This bill would appropriate five hundred thousand dollars ($500,000) from the General Fund for transfer to the Work and Family Fund to provide for the establishment and administration of the work and family program initiatives.

(5) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 771 (AB 731) Wesson. County employee retirement: fund transfers: securities.

The County Employees' Retirement Law of 1937 authorizes security custodian services to be performed by trust companies and banks within this state.

This bill would authorize boards to have these services performed by trust companies and banks not within the state.

Ch. 772 (AB 705) Aroner. Transport escort services: registration.

Existing law does not provide for the registration of transport escort services, as defined.

This bill would provide for the registration of transport escort services as child care providers under the trustline registry established by the State Department of Social Services. Specifically, it would require a transport escort service, defined as any person, partnership, association, or corporation that accepts financial compensation or other consideration to accompany or transport minors who are residents of this state to any residential facility or institution located outside the state, to first provide certain information to the minor's parents, custodial parent, or legal guardian and to verify in writing that the information was received. The bill would require the transport escort service to obtain permission from the minor's parents, custodial parent, or legal guardian prior to transporting or accompanying the minor. A violation of the bill's requirements would subject a transport escort service to civil action and would also be a crime punishable as a misdemeanor by fine or imprisonment, as specified. By creating a new crime, the bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 773 (SB 207) Peace. Infrastructure financing districts: border zone.

(1) Under existing law, redevelopment agencies are authorized to pay the principal of, and interest on, indebtedness incurred to finance or refinance redevelopment, from a portion of property tax revenues diverted from other taxing agencies. The portion of taxes diverted is the amount attributable to increases in assessed valuation of property in the redevelopment project area subsequent to establishment thereof. This method of financing is commonly known as "tax increment" financing and is specifically authorized by Section 16 of Article XVI of the California Constitution.

Existing law also authorizes counties and cities to form infrastructure financing districts, in accordance with a prescribed procedure, to finance public capital facilities utilizing a similar method of tax increment financing.

This bill would similarly authorize counties and cities to create infrastructure financing districts in the border development zone, as defined, to finance public works in the Mexican border region.

Because county officers would be responsible for the division of taxes under the bill, the bill would impose a state-mandated local program in the case of districts formed by cities, but the bill would require all infrastructure financing districts to reimburse those county costs.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 774 (SB 177) Peace. San Francisco Bay: public utilities.

(1) Existing law contains legislative findings and declarations regarding the further filling of San Francisco Bay and certain waterways, including that the nature, location, and extent of any fill should be such that it will minimize harmful effects to the bay area, as provided.

This bill would include within those harmful effects that are to be minimized, other conditions affecting the environment, as provided.

(2) The Public Utilities Act authorizes certain public utilities to condemn property, as prescribed.

This bill would amend the act to prohibit a telephone corporation from condemning any property on an airport, as prescribed, unless that property is necessary to provide telecommunications services as a carrier of last resort seeking to serve an unserved area. The bill would amend the act to prohibit specified public utilities that offer competitive services from condemning any property for the purpose of competing with another entity in the offering of those competitive services, unless the Public Utilities Commission finds, pursuant to a petition or complaint filed by the public utility, an adjudication hearing in accordance with specified provisions of the act governing hearings and judicial review, and a public hearing in the local jurisdiction that would be affected by the proposed condemnation, as prescribed, that such an action would serve the public interest. This bill would exempt specified entities, as prescribed. Condemnation actions necessary solely to meet a commission-ordered obligation to serve would be excepted from these requirements, as prescribed. The bill would require specified utilities or their affiliates or subsidiaries to give notice, as prescribed, if they intend to install telecommunications equipment on property acquired by eminent domain, as prescribed. The bill would authorize the commission to make such a finding if, in the determination of the commission, either of specified conditions is met. The bill would require the commission to develop procedures to facilitate access for affected property owners to eminent domain proceedings pursuant to those provisions, and to facilitate the participation of those owners in those proceedings. The bill would specify matters relating to certain existing provisions of the Code of Civil Procedure governing eminent domain proceedings. The bill would prohibit a public utility from entering into any exclusive access agreement with the owner or lessor of, or a person controlling or managing, a property or premises served by the public utility, or from committing or permitting any other act, that would limit the right of any other public utility to provide service to a tenant or other occupant of the property or premises.

Because a violation of the act is a crime, this bill would impose a state-mandated local program by creating a new crime.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 775 (SB 243) McPherson. Recreational property: attorney's fees.

Existing law requires the State Board of Control to allow a claim for reasonable attorney's fees incurred by an owner of any interest in real property or a public entity as a defendant in a specified civil action claiming damages if the owner gives permission to the public to enter or use the property pursuant to a specified agreement regarding recreational trail use or if the public entity gives permission to the public to enter or use the property for recreational purposes, not to exceed a total of $100,000 per fiscal year.

This bill would also require the State Board of Control to allow a claim for reasonable attorney's fees incurred by an owner of any interest in real property or a public entity as a defendant in a specified civil action seeking to restrict or prevent public use of the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

property if the owner or public entity gives permission to the public to enter the property pursuant to a specified agreement regarding recreational use. The bill would also limit the total sum of these and the above claims for attorney's fees to $200,000 per fiscal year.

Ch. 776 (SB 339) Burton. State employees: compensation.

The Budget Act of 1999 appropriated $113,500,000 from the General Fund, $97,100,000 from unallocated special funds, and $97,100,000 from unallocated nongovernmental cost funds for expenditure to augment state employee compensation.

This bill would appropriate $601,220,000, as scheduled, for the purposes of state employee compensation and the state employer's health benefit costs, in augmentation of these Budget Act appropriations.

This bill would declare that it is to take effect immediately as a statute providing an appropriation for the usual and current expenses of the state.

Ch. 777 (SB 635) Sher. Primary drinking water standards.

Existing law, the Calderon-Sher Safe Drinking Water Act of 1996, requires the State Department of Health Services to adopt regulations covering water testing, the monitoring of contaminants, the frequency and method of sampling and testing, the reporting of results, and other matters as may be necessary to determine and ensure the quality of domestic water supplies.

Existing law requires the Office of Environmental Health Hazard Assessment to perform a risk assessment and, based upon that risk assessment, to adopt a public health goal for contaminants in drinking water based exclusively on public health considerations for each drinking water contaminant regulated, or proposed to be regulated, by the department pursuant to a primary drinking water standard.

This bill would instead require the office to prepare and publish an assessment of the risks to public health posed by each contaminant for which the department proposes a primary drinking water standard and would require the risk assessment to contain an estimate of the level of the contaminant in drinking water that is not anticipated to cause or contribute to adverse health effects, or that does not pose any significant risk to health, that would be known as the public health goal for the contaminant. The bill would also revise the criteria upon which the public health goal for each contaminant would be based. This bill would require the office to post certain information about the risk assessments on its Internet web page, and would establish procedures for submission of comments, data, studies, or other written information by interested persons.

Existing law requires the Office of Environmental Health Hazard Assessment to adopt a public health goal for certain drinking water contaminants by January 1, 1999, and for all remaining drinking water contaminants for which a primary drinking water standard has been adopted by the department by no later than December 31, 1999.

This bill would require that the office publish, rather than adopt, those goals and would extend the date by which the goal for the remaining drinking water contaminants shall be published to December 31, 2001.

Ch. 778 (SB 615) Burton. State employees: State Bargaining Units 5 and 6.

(1) Under existing law, the normal rate of contribution to the Public Employees' Retirement System for patrol members, as defined, is 8% of the compensation in excess of $863 per month.

This bill, with respect to members of State Bargaining Unit 5, would require the state to pay those employee contributions until June 30, 2001, at which time those members would make contributions at the rate of 1.5% of the compensation in excess of $863 per month, and the state would pay the balance, thereby making an appropriation.

(2) The Public Employees' Retirement Law prescribes a service retirement formula for state peace officer/firefighters and provides that the retirement allowances for state peace officer/firefighter members may not exceed 75% of final compensation, or 85% of final compensation for members in State Bargaining Units 6 and 8. SB 400, if enacted, would modify the service retirement formula for peace officer/firefighter members.

This bill would, contingent upon the enactment of SB 400, provide that those patrol members in State Bargaining Unit 5 who were previously classified as peace officer/firefighter members shall have their prior peace officer/firefighter service

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

credited, at no cost to the members, under the modified formula. The bill would also increase the retirement allowance limitation to 90% for peace officer/firefighter members.

(3) Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions of specified memoranda of understanding entered into between the state employer and specified employee organizations, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that any provision in a memorandum of understanding approved by any section of this bill that requires the expenditure of funds shall not take effect unless funds for these provisions are appropriated by the Legislature, and would provide that if funds for these provisions are not appropriated by the Legislature, all or any part of the memorandum of understanding may be declared null and void by any affected employee organization.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 779 (SB 807) Committee on Agriculture and Water Resources. Water.

(1) The Cortese-Knox Local Government Reorganization Act of 1985 generally prohibits a city or district from providing new or extended services outside its jurisdiction without prior written approval of the local agency formation commission, but excepts from that prohibition contracts or agreements solely involving the provision of surplus water to agricultural lands.

This bill would modify that exception to include contracts or agreements solely involving the provision of surplus water to agricultural lands and facilities, including, but not limited to, incidental residential structures. The bill would allow a local agency formation commission to authorize a city or district to provide new or extended services outside its jurisdictional boundaries and outside its sphere of influence to respond to an existing or impending threat to the public health or safety of the residents of the affected territory if certain requirements are met.

(2) Existing law defines the term "groundwater basin" for the purposes of specified provisions that authorize local agencies to establish a program for the management of groundwater.

This bill would revise that term to exclude a basin in which the average well yield, excluding domestic wells that supply water to a single-unit dwelling, is less than 100 gallons per minute.

(3) Existing law, until January 1, 2000, requires the San Joaquin River Management Program to be administered, as prescribed, for the benefit of the San Joaquin River.

This bill would extend the effective date of those provisions until January 1, 2002.

(4) Under existing law, the Department of Water Resources is required to develop and implement a prescribed program of flood control projects. Existing law defines "local public agency" for the purpose of those provisions.

This bill would make technical corrections in that definition.

(5) Existing law, with certain exceptions, requires the San Benito County Water Conservation and Flood Control District to let all contracts for any improvement or unit of work, if the cost of the work exceeds $5,000, to the lowest responsible bidder or bidders in accordance with prescribed procedures and related requirements.

This bill would revise these provisions to apply to contracts for any improvement or unit of work, if the cost of work exceeds $30,000, rather than $5,000. The bill would authorize the board of the district to let contracts for any improvement or unit of work, if the cost of work is $30,000 or less, without advertising for bids in accordance with procedures adopted by the board. The bill would make related changes.

(6) The Porter-Cologne Water Quality Control Act requires the State Water Resources Control Board, upon reviewing a prescribed order adopted by a California

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

regional water quality control board, to take into consideration specified factors in determining the amount of civil liability to impose.

This bill would correct a statutory cross-reference set forth in that provision.

(7) The County Water District Law, until January 1, 2000, authorizes the Contra Costa Water District to issue bonds in accordance with specified existing law to finance land acquisition and facilities for water, as prescribed.

This bill would extend the effective date of that provision until January 1, 2003.

(8) The California Water District Law authorizes a water district, formed pursuant to the California Water District Act, by resolution, to provide that a penalty not in excess of 10% shall be added to water, standby, facility, or other charges.

This bill would provide that a district shall establish the period or date after which those charges will become delinquent.

(9) The California Water Storage District Law requires the Department of Water Resources to appoint a person to the board of a water storage district under certain circumstances.

This bill would transfer those apportionment duties to the board of supervisors, thereby imposing a state-mandated local program.

The bill would provide that actions or proceedings, based on the alleged invalidity or irregularity of a deed executed by a county treasurer to a water storage district or based on the alleged ineffectiveness of the deed to convey absolute title to the property, may be commenced only within 180 days after the recordation of the deed.

The bill would also provide that actions or proceedings, based on the alleged invalidity or irregularity of any agreement of sale, deed, lease, or option executed by a water storage district in connection with land deeded to it by a county treasurer or based on the alleged ineffectiveness of the instrument to convey or affect the title to the land described in it, may be commenced only within 180 days after the execution of the instrument by the district.

(10) The Municipal Water District Law of 1911, until January 1, 2000, prohibits a standby assessment or availability charge levied in any improvement district situated within the San Luis Rey Municipal Water District from exceeding a specified amount and requires the proceeds of such an assessment or charge to be used as prescribed.

This bill would extend the effective date of that provision until January 1, 2005.

(11) The Sacramento County Water Agency Act creates the Sacramento County Water Agency and prohibits the agency from transferring the title to real property, water rights, or waterworks without a vote of the voters of the district at an election held for that purpose. The act also establishes a water advisory commission consisting of 7 members appointed in a prescribed manner.

This bill would delete the provision requiring a vote of the district voters prior to the transfer of the agency's real property, water rights, or waterworks. The bill would revise the provision relating to the establishment of a water advisory commission by, instead, requiring the agency to establish that commission only if a specified groundwater management zone is formed.

(12) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(13) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 780 (SB 822) Escutia. Tobacco product settlement.

Existing law provides for various programs for the reduction in the inappropriate use of cigarettes and tobacco products.

Under existing law, certain tobacco product manufacturers have entered into an agreement with the federal government and participating states regarding the allocation of funds on the basis of tobacco products sold within each state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would specify that any tobacco product manufacturer selling cigarettes to consumers within the state shall either become a participating manufacturer under the terms of the settlement agreement entered into by the states and certain tobacco manufacturers and perform its financial obligations under the settlement, or place an amount of funds, calculated on the basis of units of tobacco products sold, into an escrow fund. The bill specifies that the funds in the escrow fund shall be used to pay a judgment or settlement on any released claim against the tobacco product manufacturer by the state or be released to the tobacco product manufacturer in certain circumstances. The bill would authorize the Attorney General to bring a civil action on behalf of the state against any tobacco product manufacturer that fails to place the funds into escrow, and would specify penalties for any knowing violation of the requirement to place the funds into escrow.

Ch. 781 (AB 931) Calderon. Electricians: apprenticeship standards.

Existing law provides for apprenticeship programs within the Division of Apprenticeship Standards in the Department of Industrial Relations.

This bill would require the division, on or before January 1, 2001, to establish and validate minimum standards for the competency and training of electricians, as defined, through a system of testing and certification; establish fees necessary to implement those requirements; and establish and adopt regulations for enforcement purposes; and on or before March 1, 2000, to establish an advisory committee and panels, as specified. Discrimination for or against any person based upon union or nonunion membership would be prohibited. These requirements would not be applicable with respect to electrical connections under 100 volt-amperes, or to persons performing specified electrical work.

Ch. 782 (SB 941) Speier. Insurance: licensees.

(1) Existing law provides for licensing of various types of insurance agents by the Insurance Commissioner, including fire and casualty broker-agents and life agents. Existing law authorizes the commissioner to issue restricted licenses in certain cases, and to suspend or revoke licenses, as specified.

This bill would require the commissioner, at the time any original or renewal application for any license issued under the Insurance Code shows a conviction of a felony involving dishonesty or breach of trust, or a conviction of a violation of a certain federal statute involving insurance activities affecting interstate commerce, to either deny the application or give written consent to the applicant or licensee to engage in the business of insurance, as specified.

(2) Existing law authorizes the commissioner, without hearing, to deny an application for a license upon a final judgment of conviction of the applicant of a felony or of certain misdemeanors, including a judgment following a plea of nolo contendere. Existing law also authorizes the commissioner, without hearing, to deny an application for a license if the applicant had a previous application for a license denied, or had a previously issued license suspended or revoked for cause, in the last 5 years.

This bill would allow the commissioner to also deny an application, without hearing, upon a plea of guilty or nolo contendere by the applicant with respect to these crimes, but would require the commissioner, upon petition by the applicant, to vacate an order based upon a plea that does not at any time result in a judgment of conviction. This bill would also authorize the commissioner to deny a license, without hearing, if the applicant had any previous application for any professional, occupational, or vocational license denied by any licensing authority, or had any previous license in that regard suspended or revoked, in the last 5 years, as specified.

(3) Existing law authorizes the commissioner, by regulation, to require licensees acting as insurance agents or brokers to maintain certain records.

This bill would provide that these records shall be open to inspection or examination by the commissioner at all times, and that a licensee subject to these provisions may be required to furnish the information contained in those records to the commissioner.

(4) Existing law authorizes the commissioner to allow a licensee to elect to pay an alternative monetary penalty, not to exceed $1,000 for each offense, $5,000 in the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

aggregate for all offenses involved in any one proceeding, or as otherwise specified, in lieu of a license suspension or other permitted license action.

This bill would instead provide that the alternative monetary penalty may not exceed $4,000 for each offense or $20,000 in the aggregate for all offenses in any one proceeding, or as otherwise specified. It would also provide for reimbursement of the commissioner's costs and make other related changes, as specified.

(5) Existing law provides that the commissioner may issue an order, upon making certain findings, suspending a subject person from his or her office or employment with a production agency and from further participation in any manner in the conduct of the business of the insurer or production agency. Existing law defines "subject person" for these purposes to mean any director, officer, or employee of a production agency, any natural person who participates in the management or control of the business of a production agency, or any person licensed as a producer.

This bill would modify the definition of "subject person" to mean any person who has participated or may participate in any manner in the business of a production agency, or any person licensed as a producer. This bill would require the commissioner to issue that order, and would modify the required findings.

(6) This bill would enact other related provisions.

Ch. 783 (AB 1012) Torlakson. Transportation: project delivery: funding.

(1) Existing law generally authorizes the Department of Transportation to plan, design, construct, operate, and maintain those transportation systems that the Legislature has made, or may make, the responsibility of the department.

This bill would require the Director of Transportation, until June 30, 2003, to establish 4 transportation project delivery advisory teams in certain regional districts of the department to assist expeditious delivery of transportation projects. Each team would include, at a minimum, the regional district director, the executive director of each agency responsible for approval of each county's submission to the state transportation improvement program, the executive director of the regional or metropolitan transportation planning organization in the regional district, and other members, to be nominated by the entities to be represented not later than a specified date. The bill would require each team to provide a report identifying how transportation project delivery could be accelerated by changes in federal, departmental, regional, or local agency programs or procedures, changes in federal, state, or local law, or any other strategies that could be taken to accelerate implementation of transportation improvements. The bill would require the report to be submitted not later than a specified date to the Governor, the Legislature, and specified other persons.

The bill would require the department to provide staff support for a management information system committee consisting of representatives of the department, the California Transportation Commission, the Department of Information Technology, counties, cities, the agencies responsible for approving each county's submission to the state transportation improvement program, and the designated, multicounty regional transportation planning agencies. The bill would require the committee to develop a plan for a management information system for project monitoring and project delivery purposes. The department would be required to submit the plan to the Governor and Legislature not later than a specified date.

(2) Existing law prescribes a 4-year process for estimating the amount of state and federal funds to be available for transportation projects in the state, and for appropriating and allocating the available funds to those projects.

This bill would add an advance project development element to that process.

(3) Existing law authorizes the department, upon the application of the governing authority of any county, city, or other governmental agency, to perform certain work relating to highways for that authority or agency and accept moneys for that work for deposit in the Treasury to the credit of any state fund that the department designates.

This bill would require that funds received by the department as reimbursement for any work performed by the department under contract or other agreement for any local agency or entity or for any other state agency or state entity, as specified, be deposited in the Transportation Reimbursable Work Account which the bill would create in the State Transportation Fund.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would continuously appropriate the money in the account to the department for the purpose of funding the performance of reimbursable work by the department.

The bill would prohibit the department from making expenditures from the account unless the department has determined that it has sufficient resources to complete both the reimbursable project and all projects under the state transportation improvement program in a timely manner.

(4) Existing law requires the funds in the State Highway Account in the State Transportation Fund to be programmed, budgeted, and expended to maximize the use of federal funds based on a specified sequence of priorities. Existing law also requires state operations expenditure amounts of the department for interregional and regional transportation improvement projects to be listed as specified, but states that those amounts, other than those for the acquisition of right-of-way and construction, shall not be subject to allocation by the commission.

Existing law also authorizes a local jurisdiction to advance a project included in the state transportation improvement program to an earlier fiscal year through the use of its own funds. Under these provisions, existing law authorizes a local agency to enter into an agreement with the appropriate transportation planning agency, the department, and the commission to use its own funds to develop, purchase right-of-way for, and construct a transportation project within its jurisdiction if the project is one that is included in the adopted state transportation improvement program, funded as specified, and pursuant to specified requirements.

This bill would also authorize the commission to advance unallocated funds in the State Highway Account, in the form of loans, to transportation planning agencies, county transportation commissions, transit districts, and local transportation authorities for the advancement of projects eligible under the state transportation improvement program that are included within an adopted regional transportation plan. Thus, by making money in the State Highway Account available for a new purpose, the bill would make an appropriation. The bill also would set forth procedures governing the advancing of these funds and would require the commission to adopt guidelines and procedures governing these provisions not later than specified dates.

The bill would require the commission to begin operation of the loan program not later than a specified date.

(5) Existing law prohibits projects from being included in the interregional transportation improvement program or a regional transportation improvement program without a complete project study report or a major investment study. Projects included in those transportation improvement programs are considered for incorporation in the state transportation improvement program.

This bill would require the commission to adopt, not later than January 30, 2000, guidelines for a process to expedite compliance with the requirement that a project study report be prepared in order for a project to be considered for inclusion in the state transportation improvement program, as specified.

(6) Existing law requires that all federal and state funds to be allocated by the commission be programmed in accordance with certain formulas.

This bill would require the department to be responsible for closely monitoring the use of federal transportation funds and would provide procedures for monitoring the use of those funds.

(7) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 784 (AB 724) Dutra. State government: Year 2000 Problem Good Government Omnibus Act of 1999.

(1) This bill would enact the Year 2000 Problem Good Government Omnibus Act of 1999.

(2) Existing law sets forth the requirements for the practice of pharmacy in the state, including the filling and refilling of prescriptions by licensed pharmacists.

This bill would provide that during the period commencing December 1, 1999, and ending February 1, 2000, a pharmacist may refill any refillable prescription subject to the number and terms of authorized refills, upon request of the person on whose behalf the prescription was written, except as specified. It would specify terms for reimbursement

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of claims under certain circumstances. This provision would become inoperative on February 1, 2000, and would be repealed on January 1, 2001.

(3) Under the California Prompt Payment Act, the maximum time from state agency receipt of a claim for reimbursement for health care services by specified types of Medi-Cal providers to issuance of a warrant for payment is 45 calendar days, including not more than 30 calendar days for the state agency to submit a correct claim schedule to the Controller, and not more than 15 calendar days for the Controller to issue the warrant. Under the act, a state agency may dispute a claim submitted by a provider for reasonable cause.

This bill would include, as reasonable cause, a computing or accounting failure related to the Year 2000 Problem and make other revisions to the act in relation to the Year 2000 Problem.

The bill would also authorize the state to print or post electronically within December 1999 checks and other claims that would otherwise occur on or after January 1, 2000, and to hold these payments until the normal issue date that is on or after January 1, 2000.

(4) Existing law sets out the various responsibilities of the Department of General Services and state agencies in overseeing and implementing state contracting procedures and policies.

This bill would enact the Year 2000 Problem Vendor Compliance and Information Practices Policy to authorize any public entity to submit a written request for information regarding the Year 2000 Problem to any contractor who is under contract to provide, or was at any time under contract to provide, specified projects, materials, supplies, equipment, services, or real property.

(5) The California Public Records Act requires that upon request, an exact copy of a public record subject to disclosure under the act be provided unless impracticable to do so.

This bill would specify that for these purposes, it may be considered impracticable to provide an electronic copy of a record due to the actuality of a Year 2000 Problem or resulting from a diversion of resources or personnel by the agency in good faith, to address the Year 2000 Problem. This provision would apply only to a state agency that is given specific approval by the Department of Information Technology to cite this provision as a reason for noncompliance with a specified provision of the California Public Records Act. This provision would remain operative until June 30, 2001, and would be repealed on January 1, 2002.

(6) The California Emergency Services Act provides for mitigation and response efforts to events including states of emergency, as defined, and local emergencies, as defined, and includes sudden and severe energy shortages, as defined, within those emergencies covered under these provisions. The act sets forth the duties of the Office of Emergency Services in overseeing these efforts.

This bill would include complications resulting from the Year 2000 Problem within the definitions of the terms "state of emergency" and "local emergency" under these provisions, and would include a rapid unforeseen shortage of energy resulting from the Year 2000 Problem within the definition of the term "sudden and severe energy shortage" for these purposes. It would additionally require the Office of Emergency Services to serve as the central agency in state government for the emergency reporting of all disasters and sudden and severe energy shortages related to, or potentially related to, the Year 2000 Problem and to coordinate the notification of the appropriate state and local administering agencies that may be required to respond to those situations as they arise.

(7) The California Emergency Services Act requires the Governor to coordinate the State Emergency Plan and programs necessary for the mitigation of the effects of an emergency in this state. The act also requires the Governor to establish contingency plans for various disasters.

This bill would authorize state agencies that are authorized to implement a disaster, contingency, or business continuity plan to use volunteer workers.

(8) Existing law establishes in state government the Department of Information Technology to provide leadership, guidance, and oversight of information technology in state government.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would make a legislative finding and declaration that the identification and remediation of the Year 2000 Problem is the top priority information technology project for the state as specified by executive order. This bill would also declare the intent of the Legislature to isolate Year 2000 Problem remediation as the top information technology priority for all state agencies and departments and to establish new dates of completion that are not in conflict with Year 2000 Problem remediation for all statutorily mandated automation and information technology systems that are not crucial to public health or safety.

This bill would authorize each state agency or department and political subdivision of the state to isolate any of its automated applications, computer hardware, or networking devices from nonproprietary networks, input streams, power sources, or other devices from 3 a.m. on December 31, 1999, to 12 p.m. on January 1, 2000, inclusive, if specified determinations have been made.

(9) Existing law prescribes the amount of vacation credits that state employees receive based on years in state service and requires the Department of Personnel Administration to provide by rule for the regulation and accumulation of vacations by civil service employees.

This bill would require until January 1, 2002, an employee to carry over more vacation credits than otherwise prescribed if the employee is prevented from taking vacation because the employee is assigned to work related to the Year 2000 Problem.

(10) The State Civil Service Act prescribes various rules and procedures for the hiring and assignment of state employees.

This bill would require the State Personnel Board and the Department of Personnel Administration to establish a Year 2000 Problem Worker Pool to fill the needs of various appointing powers for temporary help regarding Year 2000 Problem remediation.

(11) Existing law requires state agencies, with respect to certain electronic data collected, to retain the source of information according to specified criteria, and requires certain state entities to provide specified information by means of posting on the Internet by specified dates.

This bill would require these entities to retain this electronically collected data, and provide this information by means of posting on the Internet, on or after July 1, 2001, unless otherwise authorized by the Department of Information Technology pursuant to a specified executive order. With respect to the provision of information on the Internet, this requirement would not become operative as to certain entities within the Department of Consumer Affairs if SB 1308 is enacted, as specified.

(12) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 785 (AB 813) Committee on Public Employees, Retirement and Social Security. Public Employees' and Judges' Retirement Systems: benefits: administration.

(1) Under the Public Employees' Retirement Law, if a member retires from both the Public Employees' Retirement System and from a county retirement system, the member's highest final compensation from either system may be used to calculate his or her retirement allowance if the member retires from both systems concurrently. Existing law also provides that if a member on deferred retirement from PERS retires from a county retirement system between the ages of 50 and 55, when that member subsequently becomes eligible to retire from PERS, the member shall be deemed to have retired from both systems concurrently for purposes of computing final compensation.

This bill would instead provide that when a member on deferred retirement from PERS retires, at any eligible age, from a reciprocal county retirement system, he or she shall be deemed to have retired from both systems concurrently for purposes of computing final compensation.

(2) Under existing law, if a member of the Public Employees' Retirement System goes on an unpaid or military leave of absence for 6 or more months, the member can request a refund of his or her accumulated contributions.

This bill would repeal these provisions.

(3) Under the Public Employees' Retirement Law, a member of State Bargaining Unit 6 who retires on or after January 1, 1999, may elect to receive a lump-sum distribution of up to 50% of the actuarial present value of his or her retirement allowance.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law also provides a formula for calculation of retirement benefits for a member who retires after being reinstated from service or disability retirement.

This bill would provide that the lump-sum distribution shall be not less than 20% of the actuarial present value of the member's retirement allowance and would also specify that the portion of the member's retirement allowance that is subject to survivor continuance benefits may not be distributed as, or a portion of, the lump-sum distribution. The bill would also make the formula for retirement benefits following reinstatement applicable to a member who retires following reinstatement from a service or disability retirement when the member elected the lump-sum distribution.

(4) Under the Public Employees' Retirement Law, contracting public agencies may elect one of specified formulas for calculation of retirement allowances for local safety members.

This bill would provide that 2 of the specified formulas shall not be available to local safety employees of public agencies who enter into contracts after January 1, 2000.

(5) Existing law, the Public Employees' Retirement Law, provides that those officers and employees who are members of State Bargaining Unit 16 or 19 and whose classifications or positions are found to meet specified state safety criteria shall be included within the classification of state safety officers, if the Department of Personnel Administration has agreed to their inclusion.

This bill would authorize those officers and employees who are so included in that classification, and specified retirees and beneficiaries, to elect to receive credit under that classification for their past Second Tier retirement service, as specified.

(6) The Judges' Retirement System II Law prescribes specified annual cost-of-living increases for the monthly service retirement allowances of retired judges and provides that a judge's account is credited monthly with interest at a rate equal to the net earning rate achieved by the retirement system fund on its investments during the preceding fiscal year.

This bill would provide those cost-of-living increases for judges' disability retirement allowances, clarify that the interest rate shall not be less than zero, and make other technical changes.

(7) Under the Public Employees' Medical and Hospital Care Act, the member of the Board of Administration of the Public Employees' Retirement System who is an officer of a life insurer may not vote on whether the board shall approve a health benefit plan or contract with a carrier.

This bill would permit that board member to vote on those matters so long as he or she has no financial interest therein, as specified.

(8) This bill would make other technical changes.

(9) The bill would incorporate additional changes to Section 20391 of the Government Code, made by this bill and SB 400 to take effect only if both bills are enacted and this bill is enacted last.

(10) The bill would incorporate additional changes to Section 21363 of the Government Code, made by this bill and SB 400 and SB 800 to take effect only if this bill and either or both of the other bills are enacted and this bill is enacted last.

(11) The bill would incorporate additional changes to Section 21370 of the Government Code, made by this bill and SB 800 to take effect only if both bills are enacted and this bill is enacted last.

Ch. 786 (SB 340) Baca. Alcoholic beverages: minors: license revocations: off-sale licensees: applications and acknowledgment.

The Alcoholic Beverage Control Act prohibits the sale of alcoholic beverages to, or the purchase of alcoholic beverages by, persons under the age of 21 years, and imposes penalties in that regard, but permits minors to be used as decoys in the enforcement of these provisions. Existing law requires that, after the completion of each minor decoy program, the law enforcement agency using the decoy shall notify licensees of the results of the program.

This bill would require the notification to be given to the licensees within 72 hours.

Under existing law, the Department of Alcoholic Beverage Control may revoke a license for a 3rd violation of provisions relating to selling alcoholic beverages to minors within any 36-month period.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no violation of these provisions may be considered unless it has become final.

The Alcoholic Beverage Control Act prohibits a clerk from making a sale of alcoholic beverages unless the clerk executes, under penalty of perjury, on the first day he or she makes that sale, an application and acknowledgment, on a form prepared by the department, that includes at a minimum a summary of certain requirements and prohibitions in the act, as specified.

The bill would permit nonprofit organizations and licensees to obtain videotapes and other training materials on the Licensee Education on Alcohol and Drugs (LEAD) program, as specified.

Ch. 787 (AB 749) Wesson. Alcoholic beverage control: minors: penalties: controlled substances: destruction.

(1) The Alcoholic Beverage Control Act makes it a misdemeanor for any person under the age of 21 years to purchase any alcoholic beverage or consume any alcoholic beverage in any on-sale premises. Existing law provides that any person who violates that provision shall be punished by a fine of $250, or not less than 24 hours or more than 32 hours of community service, or a combination thereof as determined by the court.

This bill would provide that a 2nd or subsequent violation would be punishable by a fine of not more than $500 or community service, as specified, or a combination of fine and community service as determined by the court.

(2) The Alcoholic Beverage Control Act provides that any person under the age of 21 years who attempts to purchase any alcoholic beverage from a licensee, or the licensee's agent or employee, is guilty of an infraction. The act further provides, with respect to this infraction, that a first violation is punishable by a fine of not more than $100 and for subsequent violations, a fine of $250 or community service.

This bill would increase the penalty for a first violation by requiring as an alternative or in combination with the fine between 24 and 32 hours of community service, as determined by the court. This bill would also revise the community service alternative for subsequent violations.

(3) The Alcoholic Beverage Control Act provides that any person under the age of 21 years who presents to a licensee any false identification for the purpose of ordering or purchasing or attempting to order or purchase alcoholic beverages is guilty of a misdemeanor, and subject to a fine of at least $250, or specified community service, or both.

This bill would provide that a 2nd or subsequent violation would be punishable by a fine of not more than $500 or community service, as specified, or a combination of fine and community service, as the court deems just.

(4) The Alcoholic Beverage Control Act makes it a misdemeanor for a person under the age of 21 years to have in his or her possession any alcoholic beverage on any street or highway or in any public place or place open to the public.

This bill would make a first violation of that provision punishable by a fine of at least $250 or between 24 and 32 hours of community service. The bill would make a 2nd or subsequent violation a misdemeanor punishable by a fine of not more than $500, 36 to 48 hours of community service, and would provide that any grant of probation shall include the fine and not less than 50 hours of community service.

(5) Existing law provides that alcoholic beverages, when seized for forfeiture as specified, may be disposed of by the Department of Alcoholic Beverage Control, as specified.

This bill would provide that controlled substances, instruments, or paraphernalia seized by the department may only be disposed of pursuant to a court order for destruction.

(6) Existing law provides that a court order for the destruction of controlled substances, instruments, or paraphernalia, as specified, may be carried out by a police or sheriff's department, the Department of Justice, or the Department of the California Highway Patrol.

This bill would provide that, in addition, a court order for the destruction of controlled substances, instruments, or paraphernalia, as specified, may be carried out by the Department of Alcoholic Beverage Control.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(7) This bill would impose a state-mandated local program by changing the penalties for these crimes.

(8) The Alcoholic Beverage Control Act prohibits the sale of alcoholic beverages to, or the purchase of alcoholic beverages by, persons under the age of 21 years, and imposes penalties in that regard, but permits minors to be used as decoys in the enforcement of these provisions. Existing law requires that, after the completion of each minor decoy program, the law enforcement agency using the decoy shall notify licensees of the results of the program.

This bill would require the notification to be given to the licensees within 72 hours.

(9) Existing law establishes certain general operating standards that are applicable, as provided, to the licensed premises of certain retailers of alcoholic beverages, the violation of which is punishable as a misdemeanor.

This bill would impose a state-mandated local program by requiring these retail licensees who sell or rent video recordings to arrange them in a specified manner, a violation of which would be an infraction.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 788 (AB 1355) Havice. San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy.

(1) Existing law authorizes various conservancies to acquire, manage, and conserve public lands in the state.

This bill would establish the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy to acquire and manage public lands within the San Gabriel River and its tributaries, the Lower Los Angeles River and its tributaries, and the San Gabriel Mountains.

(2) The bill would become operative only if SB 216 of the 1999–2000 Regular Session is enacted and becomes operative on or before January 1, 2000.

Ch. 789 (SB 216) Solis. San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy.

(1) Existing law authorizes various conservancies to acquire, manage, and conserve public lands in the state.

This bill would establish the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy to acquire and manage specified lands within the main San Gabriel Basin, the San Gabriel River and its tributaries, the Lower Los Angeles River and its tributaries, and the San Gabriel Mountains, and would prescribe the management, powers, and duties of the conservancy, as specified.

(2) This bill would become operative only if this bill is chaptered after AB 1355 of the 1999–2000 Regular Session.

Ch. 790 (AB 547) Longville. Elections: nomination papers: costs.

Existing law authorizes signatures to be obtained on a nomination paper for the purpose of qualifying a candidate to seek election at a primary election. Existing law provides for the appointment of persons to circulate those nomination papers.

This bill would delete the requirement that those persons be appointed to circulate those nomination papers.

Existing law provides that on and after January 1, 1996, all expenses authorized and necessarily incurred in the preparation for and conduct of elections proclaimed by the Governor to fill a vacancy in the office of Senator or Member of the Assembly, or to fill a vacancy in the office of United States Senator or Representative in the United States House of Representatives are to be paid by the state. Existing law repeals this provision on January 1, 2000.

This bill would extend the date of the repeal of that provision to January 1, 2005.

Ch. 791 (SB 350) Murray. Presidential primary delegates and alternates.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law required delegates and alternates for the Democratic presidential primary in 1992 to be selected by caucuses at specified times and dates and in a specified manner, in coordination with the presidential primary.

Existing law directs that the presidential primary be held on the first Tuesday in March in any year evenly divisible by the number 4, including, for example, the year 2000.

This bill would require that delegates and alternates for the Democratic presidential preference primary be selected by caucuses in specified numbers and at specified times and dates and in a specified manner, in coordination with the date established for the presidential primary. The bill would establish Tuesday, March 7, 2000, as the date for the next presidential preference primary.

Under existing law, the Secretary of State is required to issue a certification of delegate to each person selected as a delegate or an alternate delegate to the Democratic Party National Convention. The delegates certified are required to be the final delegates as filed and determined by the official canvass.

This bill would repeal those provisions.

Under existing provisions of law relating to the selection of officers of Republican Party county central committees, at a committee's first organizational meeting, a committee is required to organize by selecting a chairperson, a secretary, and any other officers and committees as it deems necessary for carrying on the affairs of the committee. After each election, an organizational or reorganizational meeting is required to take place within 30 days after new county central committee members receive certificates of election.

This bill would revise these procedures with respect to the Central Committee of the County of Orange to require its members to assume office and hold an organizational meeting on the first Monday in December of each even-numbered year.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 792 (AB 743) Keeley. State employment: supervisors.

Under existing law, supervisory employees have the right to form, join, and participate in the activities of supervisory organizations of their own choosing for the purposes of representation on all matters of supervisory employer-employee relations.

This bill would provide that supervisors of state employees represented by State Bargaining Unit 5, 6, or 8 shall receive salary and benefits changes that are at least generally the economic equivalent to the salary and benefits granted to employees they supervise. The bill would require that the determination of the specific benefits that supervisors of state employees represented by State Bargaining Unit 5, 6, or 8 shall receive be made through a meet and confer process.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 793 (AB 612) Jackson. Armories: homeless shelters.

Existing law requires the Military Department to make certain state armories available to specified cities and counties for use by homeless persons for emergency shelter purposes as a temporary measure to allow adequate time for governmental entities to make other homeless shelter arrangements. The Budget Act of 1999 requires $635,000 to be used for temporary emergency shelter during the 1999–2000 winter, and transfers $2,000,000 to the Emergency Housing and Assistance Fund administered by the Department of Housing and Community Development for homeless shelter and services.

This bill would appropriate $1,365,000 in augmentation of the Budget Act of 1999, and would allocate $592,000 to the Military Department for shelters at armories, and $772,500 to the Department of Housing and Community Development for transfer to the Emergency Housing and Assistance Fund.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 794 (SB 171) Escutia. Automobile insurance: lifeline policies.

Existing law requires motorists to demonstrate financial responsibility by one of various means, including an automobile liability insurance policy. Existing law specifies minimum coverages for the policy. Existing law requires insurers to participate in a plan, commonly known as the California Automobile Assigned Risk Plan, to provide automobile insurance to those otherwise unable to obtain coverage.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require insurers that participate in the assigned risk plan to also participate in a pilot program established by the Insurance Commissioner for the County of Los Angeles to offer, until January 1, 2004, a low-cost automobile insurance policy. The bill would provide that the low-cost policy would provide coverage of $10,000 for liability for bodily injury or death to one person, subject to a cumulative limit of $20,000 for all persons, and $3,000 for liability for damage to property. The bill would also provide that the low-cost policy would satisfy the financial responsibility laws.

This bill would specify annual rates offered initially under the pilot program, until the time as the rates are adjusted in accordance with procedures established in the bill. The bill would also specify certain surcharges to be added to the base rate in certain cases.

The bill would also provide that certain financial responsibility requirements do not apply in the County of Los Angeles on and after January 1, 2004.

Ch. 795 (SB 914) Sher. Contractors: express trust funds: liens.

(1) Existing law provides that a contractor, or a qualifying individual acting in the capacity of a contractor, shall provide a bond or deposit, as specified, for the benefit of homeowners and other persons, including express trust funds, that are damaged by the licensee, but provides that liability on the bond to an express trust fund is limited to the difference between the actual loss to the fund and the amount realized from the proceeds of any other bond required under a collective bargaining agreement.

This bill would modify these provisions to apply to both fringe benefits and other specified forms of compensation, and would provide that the liability of a bond to an express trust fund is limited to actual employer payments required to be made on behalf of employees as part of their overall compensation, without regard to whether the work was performed on a public or private work. This bill would make additional conforming changes.

(2) Existing law provides that, in an action against a contractor's bond or deposit, the claim of any employee for wages and fringe benefits shall be a preferred claim, but provides that a claim to recover fringe benefits must be brought within 6 months from the date the delinquencies were discovered and no later than 2 years from when the contributions were due.

This bill would delete the requirement that the claim of any employee for wages and fringe benefits be a preferred claim, and would expand the claim period applicable to claims for fringe benefits to also apply to claims for wages.

(3) Existing law provides that specified persons, including laborers, as defined, who contribute labor, skill, or services to a work of improvement, shall have a mechanic's lien upon the property so improved.

This bill would, for purposes of the mechanic's lien law, include in the definition of "laborer" any person or entity, including an express trust fund, to whom a portion of the compensation of a laborer is paid, pursuant to an agreement with the laborer or the laborer's collective bargaining agent, and would provide that the fund shall be entitled to assert the same rights and claims as the laborer, as specified. This bill would also make related conforming changes.

(4) Existing law provides that an express trust fund that is established pursuant to a collective bargaining agreement to collect supplemental fringe benefits shall have a lien on particular real property covered by a wage agreement in the amount of the supplemental fringe benefit payments it is owed by the payor.

This bill would apply these provisions to express trust funds created by both collective bargaining agreements and employment agreements, and would provide that this lien provision applies to the total compensation of a laborer, including both fringe benefits and other specified forms of compensation, and that an express trust fund shall be entitled to assert the same rights and claims as the laborer to the extent of the total compensation owing for that work of improvement.

(5) Existing law requires express trust funds to provide subcontractors, upon demand, with a statement of fringe benefit payments, as specified.

This bill would repeal that provision.

This bill would state findings and declarations of the Legislature as to the bill's purpose.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 796 (AB 1453) Committee on Insurance. Earthquake insurance: mediation: retrofit program.

(1) Existing law, until January 1, 2000, requires the Department of Insurance to establish a pilot program for the mediation of the disputes between insured complainants and insurers arising out of the Northridge Earthquake of 1994 or any subsequent earthquake.

This bill would extend this termination date until January 1, 2005. It would require the Insurance Commissioner to report to the Governor and the Legislature by August 1, 2004, on whether the pilot program should be extended and on other specified matters.

(2) Existing law, until July 1, 2000, requires the Department of Insurance to provide grants and loans to help pay for the retrofitting of high-risk residential dwellings owned or occupied by low- and moderate-income households. Existing law appropriated $4,400,000 from the California Residential Earthquake Recovery Fund to the Department of Insurance to fund both the grant and loan program and its administration by the department.

This bill would appropriate an additional $3,400,000 for the program and its administration and would extend the authorization to expend the moneys appropriated for the program and the existence of the program itself until July 1, 2003.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 797 (SB 211) Solis. Employment.

Under existing provisions of the California Fair Employment and Housing Act, a person filing a complaint for an unlawful practice with the Department of Fair Employment and Housing is required to file within one year, except that the period for filing may be extended an additional 90 days if a person allegedly aggrieved first obtains knowledge of the facts after one year after their occurrence. The act provides, with certain exceptions, that an "employer" subject to the unlawful practices provisions of the act includes any person regularly employing 5 or more persons, or any person acting, directly or indirectly, as an agent of an employer, or the state or any political or civil subdivision thereof, and cities. For purposes of provisions defining unlawful employment practices related to mental disability, the act defines "employer" to mean any person regularly employing 15 or more persons, or any person directly or indirectly acting as an agent of such an employer, and also includes the state and municipalities and political subdivisions of the state.

This bill would provide that, for purposes of this act, there is a rebuttable presumption that "employer" includes any person or entity identified as the employer on the employee's Federal Form W-2 (Wage and Tax Statement). The bill also would extend the time for filing a complaint with the department for an alleged unlawful practice for an additional one year following a rebutted presumption of employer identity in order to allow the person allegedly aggrieved by an unlawful practice to make a substitute identification of the actual employer.

Ch. 798 (AB 64) Ducheny. Public beach restoration.

Under existing law, the Department of Boating and Waterways has powers and duties pertaining to beach erosion control, beach stabilization, and beach repair and restoration.

This bill would establish the California Public Beach Restoration Program, to be administered by the department, for specified public beach enhancement purposes.

The bill would require the department and the State Coastal Conservancy to jointly prepare and submit to the Legislature, not later than January 1, 2002, a report detailing the restoration, nourishment, and enhancement activities undertaken through the program, evaluating the need for public beach restoration projects, the effectiveness of the program in addressing that need, and ways to increase natural sediment.

The bill would create the Public Beach Restoration Fund in the State Treasury and would provide that moneys in the fund are available for expenditure by the department for the purposes of the bill. The bill would become operative only to the extent that funds are appropriated in the annual Budget Act for the purposes of the bill.

Ch. 799 (SB 330) C. Wright. Sales and use taxes: exemptions: works of art.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The Sales and Use Tax Law imposes a tax on the gross receipts from the sale in this state of, or the storage, use, or other consumption in this state of, tangible personal property. That law defines a sale to include a transfer of title or possession, as specified, and provides various exemptions from that tax.

This bill would provide that a sale and purchase does not include the transfer of original drawings, sketches, illustrations, or paintings by an artist or designer at a social gathering for entertainment purposes, provided specified conditions are met.

Counties and cities are authorized to impose local sales and use taxes in conformity with state sales and use taxes. Exemption from state sales and use taxes enacted by the Legislature are incorporated into the local taxes.

Section 2230 of the Revenue and Taxation Code provides that the state will reimburse counties and cities for revenue losses caused by the enactment of sales and use tax exemptions.

This bill would provide that, notwithstanding Section 2230 of the Revenue and Taxation Code, no appropriation is made and the state shall not reimburse local agencies for sales and use tax revenues lost by them pursuant to this bill.

This bill would take effect immediately as a tax levy, but its operative date would depend on its effective date.

Ch. 800 (AB 232) Alquist. Public employees retirement.

(1) The Public Employees' Retirement Law provides for survivor continuance allowances and special death benefits to surviving spouses not to cease upon remarriage. The provisions are not applicable to contracting agencies unless elected.

This bill would make those benefits applicable to surviving spouses of deceased local members. It would revise certain provisions of the Budget Act of 1999 relating to employee benefits, operative as specified, and would make further changes in provisions contained in SB 400 contingent upon enactment of that bill. It also would make related and clarifying changes.

(2) This bill would incorporate additional changes to Sections 21572 and 21573 of the Government Code proposed by AB 99 and SB 400, as applicable, to take effect if this bill and those bills, a specified, are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 801 (AB 99) Cedillo. Public Employees' Retirement System: benefits.

The Public Employees' Retirement Law provides alternative preretirement death benefits for members not covered by the federal Social Security Act and prescribes specified member contribution rates for those benefits.

This bill would authorize contracting agencies to amend their contracts to become subject to increased preretirement death benefits for their employees and would revise the member contribution rate calculation.

This bill would incorporate additional changes to Sections 21573, 21574, and 21581 of the Government Code proposed by AB 232 and SB 400, to be operative if this bill, AB 232, and SB 400 are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 802 (SB 738) Committee on Insurance. Long-term care program.

Existing law establishes the California Partnership for Long-Term Care Pilot Program. The purpose of the program is to link private long-term care insurance and health care service plan contracts that cover long-term care with the in-home supportive services program and Medi-Cal and to provide Medi-Cal benefits to certain individuals who have income and resources above the eligibility levels for receipt of medical assistance, but who have purchased certified private long-term care insurance policies and subsequently exhausted the benefits of these private policies. The State Department of Health Services is required to serve as the lead agency in administering the pilot program and to certify long-term care policies and health care service plan contracts under the pilot program.

Existing law requires that the resource protection provided by the pilot program be effective only for long-term care policies and health care service plans delivered, issued for delivery, or renewed during an enrollment period of July 1, 1993, to June 30, 2000,

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

inclusive, or before the termination of the pilot program, whichever is sooner. Existing law also requires that an executive and legislative advisory task force be formed to provide advice and assistance in designing and implementing the pilot program.

This bill would extend the pilot program to long-term care policies and health care service plans delivered, issued for delivery, or renewed after July 1, 1993, to January 1, 2005, inclusive. The bill would eliminate the requirement that the State Department of Health Services be the lead agency for the program and would eliminate the advisory task force.

The bill would provide, in addition to the existing requirement that the State Department of Health Services certify long-term care policies and health care service plan contracts under the program, that policies issued by organizations subject to the Insurance Code be approved by the Department of Insurance, and would revise the criteria for certification and approval. This bill would also repeal a requirement that the Director of Health Services report to the Legislature annually regarding the program.

Ch. 803 (AB 472) Aroner. Public assistance: child support services.

(1) Existing law sets forth conditions under which any dissatisfied applicant for or recipient of public social services is accorded an opportunity for a state hearing.

This bill would require a custodial or noncustodial parent to be accorded an opportunity for a state hearing when any one or more of certain actions or failures to take action by the department or a state or county agency related to child support is claimed by the parent, and would require a district attorney to institute a dispute resolution process for these cases. These provisions would only be implemented to the extent that there is federal financial participation available.

The bill would require state and county agencies to comply with these hearing decisions.

Since the bill requires each county to participate in these fair hearings, the bill would constitute a state-mandated local program.

(2) Existing law requires the department to publish a booklet describing the proper procedures and processes for the collection and payment of child and spousal support. Existing law requires the district attorney to provide certain notice to recipients of child and spousal support services.

This bill would require that notice of, and information about, the child support services hearings available under the bill be provided by the district attorney in a manner specified by the bill, included in the booklet published by the department, and included in or with various forms used in actions to enforce child and spousal support obligations, to the extent federal financial participation is available.

(3) Under existing law, it is a crime for a parent of a minor child to willfully omit, without lawful excuse, to furnish necessary clothing, food, shelter, or medical attendance, or other remedial care for his or her child.

This bill would provide that the decision of a district attorney to proceed or decline to proceed against a parent under this provision shall not be subject to review in any state hearing, as described in the bill.

(4) Existing law authorizes the State Department of Social Services to approve demonstration projects in up to 3 counties to test models of child support assurance, and specifies that one of the projects shall conform to a specified design, and provides for the funding of the projects from funds continuously appropriated for the CalWORKs program.

This bill would recast that provision to authorize the approval of up to 3 child support assurance demonstration projects, and would eliminate the requirement that one of the projects conform to a specified design.

(5) Existing law requires the State Department of Social Services to develop research designs to ensure thorough evaluation of the child support assurance demonstration projects that include various factors, including the impact of welfare-to-work participation rates of custodial parents, CalWORKs participation rates and costs, paternity and child support order establishment, and other relevant information.

This bill would recast that requirement and increase the scope of factors that must be included in the research designs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(6) Existing law provides that the state share of child support assurance payments under the child support assurance demonstration project shall be paid in accordance with the continuously appropriated funding of the CalWORKs program.

This bill would specify that the State Department of Social Services, to the extent possible, shall ensure that no funding streams will be utilized to pay for child support assurance payments if use of the funding streams would cause participants to be subject to the limitations imposed on the CalWORKs program that a parent or caretaker relative shall not be eligible to receive aid for a cumulative period of more than 18 months after the individual signs, or refuses, without good cause, to sign a welfare-to-work plan, unless it is certified by the county that there is no job currently available for the recipient and the recipient participates in community service activities.

(7) This bill would also enact similar alternative provisions to those described in paragraphs (1) to (3), above, which would become operative only if either AB 196 or SB 542, or both, are enacted, and other specified conditions occur, in which case the other provisions of the bill would not become operative.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 804 (AB 515) R. Wright. Public records: in-home supportive services and personal care services.

(1) The California Public Records Act requires that public records be open to inspection at all times during the office hours of state or local agencies and provides that every person may inspect any public record, with specified exceptions.

This bill would specify that information regarding persons paid by the state to provide in-home supportive services or personal care services shall not be subject to public disclosure under the act , except that copies of names, addresses, and telephone numbers of these persons shall be made available, upon request, to an exclusive bargaining agent and to any labor organization seeking representation rights pursuant to specified provisions of law, subject to specified conditions. Requiring local governmental agencies to disclose this information would impose a state-mandated local program by creating a new duty.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(3) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 805 (AB 740) Steinberg. Dependent children: sibling groups.

Existing law requires that, when a dependent child of the juvenile court is placed in foster care, child welfare services shall be provided for up to 12 months, if the child is 3 years of age or older, or up to 6 months, if the child is under 3 years of age at the time of removal from parental custody. These time periods may be extended if the court, at the status review hearings, makes specified findings. However, if the child is under 3 years of age and the court, at the 6-month review hearing, makes other specified findings, the court may terminate those services and schedule a final hearing to terminate parental rights and free the child for adoption, appoint a legal guardian, or make other specified plans for the child's permanent placement.

This bill would provide that, for a dependent child in foster care who is a member of a sibling group in which one of the siblings is under 3 years of age, child welfare services to some or all of the members of the sibling group may be provided for only 6 months, or for a longer period if the court makes specified findings at the 6-month review hearing. The bill would authorize the court, at the 6-month review hearing, upon making

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

specified findings, to schedule the final hearing to terminate parental rights for one or more members of a sibling group.

Because this bill would expand the duties of social workers, it would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 806 (SB 377) Polanco. Criminal conduct of state employees.

Existing law provides that the State Personnel Board may refuse to examine, or after examination, may refuse to declare as eligible, or may withhold or withdraw from certification, prior to appointment, persons within specified categories.

This bill would provide as an additional category, persons who have engaged in unlawful reprisal or retaliation against other persons employed by specified state agencies.

Existing law requires any state officer or employee filing a complaint of reprisal or retaliation to have also previously filed a complaint of improper governmental activity with the Joint Legislative Audit Committee.

This bill, instead, would require the complaint of improper governmental activity to be filed with the State Auditor, or with the Inspector General, as specified.

Under existing law, an employee or officer of a public entity or an employee, officer, or agent of a private person or entity that provides a detention facility or staff for a detention facility under contract with a public entity, who engages in sexual activity with a consenting adult who is confined in a detention facility, as defined, is guilty of a misdemeanor. A second violation of that provision is a felony. "Detention facility" is defined for these purposes under existing law to include a health facility.

This bill would remove the definition of "health facility" from its present inclusion within the term "detention facility." The bill would recast existing law to provide that the above provision applies to employees of health facilities, and add the application of that provision to employees of a department, board, or authority under the Youth and Adult Correctional Agency, or a facility under contract to a department, board, or authority under the Youth and Adult Correctional Agency. The bill would also expand the definition of "sexual activity" for purposes of the provisions. By expanding the scope of a crime, this bill would impose a state-mandated local program.

The bill would provide for misdemeanor and felony punishments, as specified, for violation of certain provisions. By changing the definition of a crime, this bill would impose a state-mandated local program.

The bill would also provide that an employee of a department, board, or authority under the Youth and Adult Correctional Agency convicted of a felony under these provisions would be terminated pursuant to provisions of the State Civil Service Act, and would not be eligible to be hired or reinstated by a department, board, or authority under the Youth and Adult Correctional Agency.

Existing law provides that certain state employees who intentionally engage in acts of reprisal, retaliation, threats, or other proscribed conduct against a state employee, as specified, who has disclosed what the employee believes to be improper government activities, shall be disciplined. Existing law also provides that certain state employees who engage in the above-proscribed acts shall be liable in an action for damages, and may be liable for punitive damages and attorney's fees, as specified.

This bill would provide that the above-described provisions also apply where the proscribed conduct is directed against an employee, as defined, (1) who has disclosed or is disclosing to any employee at a supervisory or managerial level what the employee believes to be improper government activities, or (2) who has cooperated or is cooperating with any investigation of improper government activity.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would also specify the minimum discipline that the offending employee would be subject to, and define what the term "retaliation" means for purposes of the act. This bill would also declare that nothing in the act would prohibit the employing entity from making any decision exercising its authority to terminate, suspend, or discipline an employee who engages in conduct prohibited by the act.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 807 (SB 527) Speier. Automobile insurance: low-cost policies.

Existing law requires motorists to demonstrate financial responsibility by one of various means, including an automobile liability insurance policy. Existing law specifies minimum coverages for the policy. Existing law requires insurers to participate in a plan, commonly known as the California Automobile Assigned Risk Plan, to provide automobile insurance to those otherwise unable to obtain coverage.

This bill would require insurers that participate in the assigned risk plan to also participate in a pilot program established by the Insurance Commissioner for the City and County of San Francisco to offer, until January 1, 2004, a low-cost automobile insurance policy. The low-cost policy would provide coverage of $10,000 for liability for bodily injury or death to one person, subject to a cumulative limit of $20,000 for all persons, and $3,000 for liability for damage to property. The policy would satisfy the financial responsibility laws.

This bill would specify annual rates offered initially under the pilot program, until the time as the rates are adjusted in accordance with procedures established in the bill. The bill would also specify certain surcharges to be added to the base rate in certain cases.

The bill would also provide that certain financial responsibility requirements do not apply in the City and County of San Francisco on and after January 1, 2004.

Ch. 808 (AB 1432) Oller. Insurance: service of process: tax credit.

(1) Existing law requires a foreign insurer to appoint a designated agent for service of process, and deems the agent in law to be a general agent and the principal agent of the insurer in this state.

This bill would make clarifying changes including that the agent appointed may be a corporate officer of the insurer residing in this state, and that for service of process the agent is the principal agent of the insurer in this state.

(2) Existing insurance tax law requires every insurer, as defined, doing business in this state, to annually pay a tax on gross premiums, as specified, at the rates provided by law. Except as otherwise provided, the rate of tax to be applied to the basis of the annual tax in respect to each year is 2.35%.

SB 527 and SB 171 of the 1999–2000 Regular Session would provide for the issuance, until January 1, 2004, of policies of low-cost automobile insurance to certain low-income motorists in certain areas of the state.

This bill would allow as a credit against that tax an amount equal to the amount of the gross premiums tax due on account of pilot project insurance for previously uninsured motorists, as specified.

The bill would provide that the tax credit shall become operative only if SB 171 and SB 527 are also enacted and become operative on or before January 1, 2000.

Ch. 809 (AB 406) Knox. New area codes: telephone number assignment.

(1) Existing federal law provides for an administrator for California area code relief. Existing law establishes a process for that administrator and providers, as defined, to develop an area code relief plan, as prescribed.

This bill would require the Public Utilities Commission to develop and implement any measures that it determines to be available for telephone corporations that possess telephone number prefixes to efficiently allocate telephone numbers within those prefixes, as prescribed. The bill would require the Public Utilities Commission to request, and telecommunications providers to provide, certain information on telephone number

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

use. The bill would require the Public Utilities Commission to prepare and submit to the Legislature a study on that information on or before July 1, 2001. The bill would require, if authorized as prescribed, telephone corporations to return blocks of telephone numbers, as prescribed. The bill would require the Public Utilities Commission to direct the North American Numbering Plan Administrator to seek the return of blocks of numbers smaller than 10,000, as prescribed, and also to obtain specified information prior to addressing area code relief, as prescribed.

The bill would make related legislative findings and declarations.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 810 (AB 193) Cardoza. Veterans homes.

Existing law establishes a Veterans Home of California, Yountville, and authorizes the Department of Veterans Affairs to establish and construct a 2nd home located at various sites in southern California.

This bill would establish a Governor's Commission on Veterans Homes consisting of 12 appointed and ex officio members to advise the Governor and the Legislature, as specified, on the establishment of veterans homes in California. The bill would repeal these provisions as of January 1, 2002.

Ch. 811 (AB 756) Keeley. Budget Act of 1999: augmentation. [4]

Existing law, as set forth in the Budget Act of 1999, makes various appropriations for support of state government for the 1999–2000 fiscal year.

In augmentation of the Budget Act of 1999, this bill would reappropriate $3,010,000 from support of the Department of Parks and Recreation for cultural heritage projects to support of relocation and restoration of Stilwell Hall at Fort Ord and for stabilization and restoration of the Copperopolis Armory, as specified. The bill would appropriate $8,000 from the General Fund to the Department of Fish and Game for the New Hogan Lake Conservancy, as specified. The bill would also appropriate $235,000 from the General Fund to the Department of Water Resources to pay the Reclamation Board's share of preconstruction engineering and design costs relating to the Success Reservoir Enlargement Project. The bill would reappropriate $6,000,000 to the Department of Water Resources for expenditure without regard to fiscal years for various local assistance projects.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 812 (SB 989) Sher. Pollution: groundwater: MTBE.

(1) Under existing law, with specified exceptions, no person may own or operate an underground storage tank containing hazardous substances unless a permit for its operation has been issued by the local agency to the owner or operator of the tank, or a unified program facility permit has been issued by the local agency to the owner or operator of the unified program facility on which the tank is located. Existing law requires an underground storage tank permit to require compliance with certain design and construction requirements, and requires the local agency to inspect every underground tank system within its jurisdiction at least once every 3 years. Existing law imposes specified civil penalties upon owners or operators of underground storage tanks who violate certain requirements.

This bill would require the State Water Resources Control Board, on or before June 1, 2000, to initiate a specified research program to quantify the probability and environmental significance of releases from petroleum underground storage tank systems that meet certain upgrade requirements. The board would be required, by January 1, 2001, to adopt specified regulations and the board would be directed to require a tank to be fitted with under-dispenser containment or a spill containment or control system approved by the board, as specified, and to review existing enforcement authority. The bill would require a local agency to inspect every tank system at least once every year, thereby creating a state-mandated local program by imposing new duties upon local agencies. The bill would require the holder of a permit for an underground storage tank, within 60 days after receiving a specified inspection or compliance report, to file a plan to implement the compliance report or make a specified demonstration. The bill would provide for the imposition of civil liability upon an operator of an

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

underground storage tank who tampers with, or disables, automatic leak detection devices and would impose criminal penalties upon a person who intentionally takes such an action, thereby imposing a state-mandated local program by creating a new crime. The bill would require the board, in consultation with the State Department of Health Services, to develop guidelines for the investigation and remediation of MTBE and other ether-based oxygenates in groundwater and appropriate cleanup standards.

The bill also would require, on and after November 1, 2000, an owner or operator of a tank system with a single-walled component, located as specified, to implement a program of enhanced leak detection or monitoring pursuant to regulations that the board would be required to adopt.

(2) Under the existing Barry Keene Underground Storage Tank Cleanup Trust Fund Act of 1989, every owner of an underground storage tank is required to pay a storage fee for each gallon of petroleum placed in the tank. The fees are required to be deposited in the Underground Storage Tank Cleanup Fund. The money in the fund may be expended by the State Water Resources Control Board, upon appropriation by the Legislature, for various purposes, including the payment of claims of up to $1,000,000 per occurrence, including joint claims, to aid owners and operators of petroleum underground storage tanks who take corrective action to clean up unauthorized releases from those tanks. The act is repealed by its own terms on January 1, 2005.

This bill would increase the amount of a corrective action claim to $1,500,000 per occurrence, would revise the requirements for claims for regulatory assistance, and would increase the amount to $1,500,000 for joint claims. The bill would extend the operation of the act until January 1, 2011, thereby imposing a state-mandated local program by continuing the imposition of duties upon the local agencies that implement the act.

(3) Existing law authorizes the State Air Resources Board, among other things, to adopt and implement motor vehicle fuel specifications for the control of air contaminants and sources of air pollution, as specified. Existing law, however, prohibits the state board from adopting any regulation that requires the addition of any oxygenate to motor vehicle fuel unless the regulation is subject to multimedia rulemaking, as defined in existing law.

This bill would instead prohibit the state board from adopting any regulation that establishes a specification for motor vehicle fuel unless that regulation, and a multimedia evaluation conducted by affected agencies and coordinated by the state board, are reviewed by the California Environmental Policy Council. The bill would revise the procedures for the conduct of such a multimedia evaluation.

The bill would require the State Energy Resources Conservation and Development Commission, in consultation with the state board, to develop a timetable for the removal of MTBE from gasoline at the earliest possible date, consistent with a specified executive order. The bill would require the state board to ensure that specified regulations for reformulated gasoline maintain or improve upon emissions and air quality benefits achieved by other specified reformulated gasoline and are evaluated, as specified. The bill would require a city, county, or air pollution control district, upon receiving an application to construct a phase 3 reformulated gasoline project, as defined, to undertake all reasonable efforts to expedite action on the permit, thereby imposing a state-mandated local program.

The bill would also authorize the Secretary for Environmental Protection to prohibit the use of MTBE in motor vehicle fuel prior to December 31, 2002, on a subregional basis in the Bay Area Air Basin, or in any other air basin in the state, if the secretary makes specified findings.

The bill would require the commission, if it determines that specified studies do not adequately assess the ongoing supply and availability of gasoline for the state's consumers associated with the phaseout of MTBE, to submit a report to the Legislature and the Governor by July 1, 2000, concerning the impact of that phaseout on the supply and availability of gasoline.

The bill would require the board to convene a working group to review and evaluate options for the closure of certain petroleum underground storage tanks and to submit recommendations to the Secretary for Environmental Protection by January 1, 2001.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(4) The existing California Environmental Quality Act requires a lead agency, as defined, to prepare, or cause to be prepared, and certify the completion of, an environmental impact report on a project that it proposes to carry out or approve that may have a significant effect on the environment, as defined, or to adopt a negative declaration if the lead agency finds that the project will not have that effect, unless the project is exempt from the act.

This bill would, until January 1, 2003, impose certain requirements on districts and lead agencies, as defined, for purposes of that act, with regard to the processing of permits and environmental impact reports for a construction project consisting of facilities, processing units, or equipment necessary to produce Phase 3 reformulated gasoline, as defined, thereby imposing a state-mandated local program.

(5) Existing law requires a person who digs, bores, or drills a water well, cathodic protection well, or a monitoring well, or abandons or destroys a well, or deepens or reperforates a well, to file a report of completion with the Department of Water Resources within 30 days after the construction or alteration is completed. Under existing law, those reports may not be made available to the public, except to a person who obtains a written authorization from the owner of the well.

This bill would also allow a person performing an environmental cleanup study under order from a regulatory agency to obtain a report with regard to specified wells.

(6) Under existing law, until January 1, 2002, the State Department of Health Services is authorized to expend the money in the Drinking Water Treatment and Research Fund in the State Treasury to make payments to public water systems for the costs of treating contaminated groundwater and surface water for drinking water purposes, investigating contamination, acquiring alternate drinking water supplies, and for conducting research into treatment technologies. Existing law, operative June 30, 1999, requires the board to annually transfer $5,000,000, from June 30, 1999, until January 1, 2002, from the Underground Storage Tank Cleanup Fund to the drinking water fund for expenditure for those purposes, if a public drinking water well has been contaminated by an oxygenate and there is substantial evidence that the contamination was caused by a release from an underground storage tank.

This bill would extend the operation of the provision providing for the transfer of those funds from January 1, 2002, to January 1, 2010.

The bill would require the board to transfer $5,000,000 from the Underground Storage Tank Cleanup Fund to the drinking water fund, if the department makes a specified determination.

(7) Existing law, until December 22, 2005, or except as specified, requires the Trade and Commerce Agency to conduct a program to make loans to small businesses to upgrade, replace, or remove petroleum underground storage tanks to meet applicable local, state, or federal standards and to take corrective actions. Under existing law, funds in the Petroleum Underground Storage Tank Financing Account in the General Fund are continuously appropriated to the agency, without regard to fiscal year, for making these loans. Existing law specifies that the maximum amount of a loan is $750,000, but provides that, if at least $6,500,000 is not transferred to the account each fiscal year, the maximum amount of a loan is $350,000 an applicant is restricted to one loan at any one time.

This bill would delete the contingency provision thereby decreasing the maximum amount of a loan and restricting an applicant to one loan at any one time. The bill would additionally authorize the agency to conduct a grant program to assist small businesses to comply with the new requirements imposed by the bill on petroleum underground storage tanks and tanks with single-walled components that are located, as specified. The bill would specify eligibility requirements for grant applicants and the maximum amount of those grants. The bill would require the agency, on or before April 1, 2001, to submit a report to the Legislature detailing the status of the grant program.

The bill would authorize the agency to expend the money in the Petroleum Underground Storage Tank Financing Account, upon appropriation by the Legislature, to make those grants.

(8) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that no reimbursement is required by this act for specified reasons.

Ch. 813 (SB 529) Bowen. Motor vehicle fuel.

Existing law prohibits the State Air Resources Board from adopting any regulation that requires the addition of any oxygenate to motor vehicle fuel unless the regulation is subject to multimedia rulemaking, as defined.

This bill, instead, except as provided, would prohibit the state board from adopting any regulation that establishes a specification for motor vehicle fuel unless that regulation, and a multimedia evaluation conducted by affected agencies and coordinated by the state board, are reviewed by the California Environmental Policy Council. The bill would prescribe procedures for the multimedia evaluation and would provide that if the council determines that the proposed regulation will cause a significant adverse impact on public health or the environment, the council shall recommend alternative measures. Under the bill, within 60 days of receiving notice from the council of a determination of adverse impact, the state board would be required to adopt revisions to the proposed regulation, or the affected state agencies would be required to take appropriate action to mitigate the adverse impacts, as provided.

This bill would require the state board to enter into an agreement to conduct an external scientific peer review of the California Predictive Model and to submit the findings of that review to the Legislature on or before July 1, 2000.

Ch. 814 (SB 1001) Burton. Motor vehicle fuel: MTBE.

The Governor's Executive Order D-5-99 requires the State Energy Resources Conservation and Development Commission, in consultation with the State Air Resources Board, to develop a timetable for the removal of methyl tertiary-butyl ether (MTBE) from gasoline at the earliest possible date, but not later than December 31, 2002.

This bill would require the commission to submit quarterly reports to the Legislature summarizing the amount of MTBE used in gasoline by each refinery during the preceding quarter and comparing that amount to the amount of MTBE used in gasoline by each refinery during the previous quarter.

Ch. 815 (SB 332) Sher. Beverage containers.

(1) The existing California Beverage Container Recycling and Litter Reduction Act requires a distributor of specified beverage containers to pay a redemption payment of 2¢ to the Department of Conservation, for each beverage container, as defined, sold or transferred, for deposit in the California Beverage Container Recycling Fund and provides for an increase in that payment, as specified. The money in the fund is continuously appropriated to the department to pay refund values, processing payments, and for other purposes. "Beverage" is defined, for purposes of the act, to include beer and other malt beverages, wine and distilled spirit coolers, carbonated mineral and soda waters, and similar carbonated soft drinks in liquid form that are intended for human consumption, but excludes from that definition 100% fruit juice to which carbonation has been added.

A violation of the act is a crime and the penalties for violations of the act are deposited in the fund.

Existing law requires each glass container manufacturer to use a 35% minimum percentage of California postfilled glass in the manufacturing of glass food, drink, or beverage containers. A manufacturer is authorized to seek a reduction or waiver of this requirement from the department.

This bill would additionally include as beverages, for purposes of the act, carbonated and noncarbonated water, noncarbonated soft drinks and sport drinks, specified noncarbonated fruit drinks, coffee and tea drinks, and carbonated fruit drinks if those products are sold in plastic, glass, bimetal, or aluminum containers in liquid, ready-to-drink form and intended for human consumption. The bill would exempt any beverage container included within the coverage of the act on January 1, 2000, from specified labeling requirements, until January 1, 2001.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would revise the definitions of the terms "handling fee," and "PET container" and would define the terms "nonprofit convenience zone recycler," "recycler" and "rural region recycler."

This bill would reduce the minimum percentage of postfilled glass to 25% if the glass container manufacturer makes a specified demonstration to the department with regard to its use of mixed color cullet, as defined.

This bill would revise the procedure for determining the commingled rate paid for containers to repeal requirements regarding the holding of a public hearing and providing information before the effective date of a new rate, would repeal the existing procedure on January 1, 2001, and would establish a new procedure, effective January 1, 2001, for the calculation of a new commingled rate that includes the requirements for a prior public hearing and providing information.

The bill would increase the amount of the redemption payment paid by distributors to 2.5¢.

(2) Existing law defines "convenience zone" for the purposes of the act and requires that every convenience zone is to be served by at least one certified recycling center, with specified operating hours. The Director of Conservation is authorized to grant an exemption from these convenience zone requirements based on specified factors, including that the nearest certified recycling center is within a reasonable distance of the convenience zone being considered for the exemption.

This bill would revise the requirements regarding the operating hours for a recycling center in a rural region and would additionally include, as a factor to be considered in issuing an exemption from convenience zone requirements, that the convenience zone has redeemed less than 60,000 containers per month in the prior 12 months and a certified recycling center is located within one mile of the convenience zone that is the subject of the exemption.

(3) Existing law requires the department to pay to a processor for every empty beverage container received by the processor from a certified recycling center or other program, the sum of the refund value, 1 $^{3}/_{4}$% of the refund value for administrative costs, and a processing payment. Existing law requires the processor to pay a certified recycling center or other program the refund value, $^{1}/_{2}$ of 1% of the refund value for administrative costs, and the processing payment. Existing law also requires a distributor of beverage containers to pay a redemption payment to the department, less $^{1}/_{2}$ of 1% for the distributor's administrative costs. The redemption payment made to the department by a distributor of beer and other malt beverages is required to be made not later than the first day of the second month following the sale.

This bill would increase the amount of administrative costs paid to the processor to 2 $^{1}/_{2}$% of the refund value, and the administrative costs paid to the recycling center to $^{3}/_{4}$ of 1% and would increase the administrative costs retained by the distributor to 1% of those administrative costs. The bill would increase the time when the redemption payment by beer and malt beverage distributors is required to be made to not later than the last day of the third month following the sale.

(4) Under the act, the department is required to calculate a processing fee for each beverage container with a specified scrap value, which is required to be paid by beverage manufacturers for each beverage container sold or transferred to a dealer. Until January 1, 2000, a processing fee is required to be imposed annually only if the scrap value for the material is less than the cost of recycling, and, after that date, a processing fee is required to be established pursuant to different criteria. Under the law in effect until January 1, 2000, the processing fee is reduced in an amount equal to 25% of the redemption payments projected to be paid by distributors of beverages sold in that container type for the previous calendar year.

This bill would revise the method of calculating the processing payment and would require the processing payment, to equal the difference between the scrap value offered to recyclers by willing purchasers and the cost of recycling containers and a reasonable financial return. The bill would require the department to use specified cost data for the January 1, 2000, processing payment calculation. The bill would require the actual processing fee to equal 65% of the processing payment, but the department would be required to adjust the amount of the processing fee, based upon the availability of funds

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

in the processing fee account for that beverage material type so the amount of the processing fee equals 25% of the processing payment.

(5) Existing law requires the department to report specified data with respect to its responsibilities under the act within 70 days of each reporting period.

This bill would extend this period to 130 days.

(6) Existing law requires the department to transfer an amount equal to 25% of the redemption payments, and all processing fees, made for glass, PET, and bimetal beverage containers to, respectively, the Glass Processing Fee Account, the PET Processing Fee Account, and the Bimetal Processing Fee Account, for making processing payments for, and reducing processing fees paid for, these container types. After setting aside funds needed for the payment to refund values and administrative fees, and for these expenditures, the department is authorized to expend $18,500,000 of the moneys in the fund, until January 1, 2001, for the payment of handling fees, and $5,000,000, for payments for curbside programs, until January 1, 2001, to expend $7,000,000 annually for grants to community conservation corps, and to expend $2,000,000 for grants to nonprofit organizations or government programs.

This bill would increase these amounts to $23,500,000 for the payment of handling fees, $15,000,000 for payment for curbside programs, and $15,000,000 for grants to community conservation corps. The bill would authorize the expenditure of $10,500,000 annually for payments to cities and counties for beverage container recycling and litter cleanup activities, and $500,000 for grants for beverage recycling and litter reduction programs, and would require the payment of $6,840,000 to the City of San Diego, for a curbside recycling pilot program that would be terminated on January 1, 2004. The bill would extend the authorization to expend these funds for handling fees indefinitely and for curbside programs until an unspecified date, thereby making an appropriation. The bill would require the director to register the operators of curbside programs, and to adopt a procedure for registration of these programs. The bill would include neighborhood dropoff programs, as defined, as being eligible for those payments for curbside programs. The bill would authorize the department to pay each curbside recycling program a quality glass incentive payment for color-sorted glass collected by the curbside recycling program, in a total of not more than $3,000,000 per calendar year until an unspecified date.

The bill would delete the requirement that the department transfer 25% of the redemption values to those accounts. The bill would instead require the department to establish separate processing fee accounts in the fund for each beverage material type, and would require the department to transfer funds equal to 75% of the processing payments and all of the processing fees to those accounts. The bill would continuously appropriate the money in those accounts to the department to make processing payments and reduce processing fees, thereby making an appropriation.

The bill would require the department to expend $10,000,000 annually, between January 1, 2000, and January 1, 2002, to undertake a statewide public education and information campaign and to provide a report to the Legislature, by January 1, 2002, on the impact of the campaign.

The bill would require the department to annually expend $300,000 until January 1, 2003, pursuant to a cooperative agreement with Keep California Beautiful, to conduct a statewide public education campaign.

The bill would specify a procedure for the proportionate reduction of certain expenditures pursuant to the act and would require the department to convene a specified advisory group before making expenditures for the statewide public education and information campaign.

The bill would create the Penalty Account in the fund, would require all civil penalties and fines collected by the department to be deposited in that account, and would require the department to transfer the existing fines and civil penalties in the fund to that account. The revenues in the account would be available to the department, only upon appropriation by the Legislature, to carry out the act. The bill would make conforming changes.

(7) Existing law requires the department to adopt guidelines and methods for paying handling fees to supermarket sites, until January 1, 2001. Existing law requires the department to convene a hearing to ensure that handling fees paid to supermarket site

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

recycling centers are not used for the purpose of engaging in unfair and predatory pricing. Existing law provides that, if the department determines there is clear and convincing evidence that a handling fee recipient has engaged in unfair and predatory pricing, the respondent is not eligible to receive handling fees for 3 months.

This bill would additionally make nonprofit convenience zone recyclers and rural region recyclers eligible to receive handling fees and would delete the repeal of the provisions governing the payment of handling fees, thereby extending those provisions indefinitely.

This bill would define the term "unfair and predatory pricing" for purposes of a new hearing procedure that this bill would establish, and would make a supermarket site that the department determines has engaged in unfair and predatory pricing, ineligible to receive handling fees after the date of that determination.

The bill would require the department to conduct an audit, by January 1, 2001, of the handling fees paid to supermarket sites.

(8) The existing California Integrated Waste Management Act of 1989, which is administered by the California Integrated Waste Management Board, establishes an integrated waste management program, including providing for recycling to reduce solid waste disposal.

This bill would require the board, in consultation with the department, not later than December 1, 2000, to prepare and submit to the Legislature a report, as prescribed, that identifies any duplication or overlap between the California Integrated Waste Management Act of 1989 and the California Beverage Container Recycling and Litter Reduction Act with respect to programs pertaining to public information and education, local government review and assistance, and recycled materials market development.

(9) Under existing law, it is unlawful for any person to weigh, measure, or count any commodity unless the person is licensed as a weighmaster. Existing law exempts recycling centers established for the redemption of empty beverage containers from the laws relating to weighmasters.

This bill would additionally exempt, from those laws, certified recycling centers that purchase empty beverage containers from the public for recycling.

(10) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

Since a violation of the requirements imposed by the bill would be a crime, the bill would impose a state-mandated local program by creating new crimes.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 816 (SB 827) Sher. Recycled materials.

(1) The State Assistance for Recycling Markets Act of 1989 requires the Department of General Services to set a goal for the purchase of recycled paper products by state agencies of at least 50% of paper products purchased. All state agencies are required to submit to the department and the California Integrated Waste Management Board a plan to meet this goal. The board was required to implement a pilot program, if adequate funds were available, from January 1, 1994, to January 1, 1997, for funding claims submitted by state agencies for providing price preferences to certain recycled paper products. The act also requires the Legislature and all state agencies to meet certain goals for the procurement or purchase of recycled products, as defined, by specified dates. The board is also authorized to establish recycled-content disclosure, recycled product-only bids, cooperative purchasing arrangements, or conduct an analysis of solid waste diversion from disposal facilities, to meet the goals for recycled products. Existing law requires the Legislature, if a recycled product costs more than the same product made with virgin material, to purchase fewer of those more costly products or apply cost savings, if any, gained from buying other recycled products towards the purchase of those more costly products.

These provisions would be repealed, under existing law, on January 1, 2001.

This bill would provide that purchasing recycled products is a requirement rather than a goal, and would delete the requirement that state agencies submit plans related to their

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

recycled paper product purchasing. The bill would also delete the provisions regarding the pilot program.

The bill would delete the repeal of those provisions, would make conforming changes, and would delete obsolete provisions.

(2) Existing law requires the State Procurement Officer, in purchasing any materials to be used in paving or paving subbase for use by the Department of Transportation and any other state agency that provides road construction and repair services, to make contracts available for items that utilize recycled materials in paving materials and base, subbase, and previous backfill material, if the price of those items is competitive for the purposes intended.

This bill, instead, would require the officer to make those contracts available unless the Director of Transportation determines that the use of the materials is not cost-effective based on specified factors.

Ch. 817 (AB 1244) Olberg. Beverage containers.

(1) The existing California Beverage Container Recycling and Litter Reduction Act requires a distributor of specified beverage containers to pay a redemption payment of 2¢ to the Department of Conservation, for each beverage container, as defined, sold or transferred, for deposit in the California Beverage Container Recycling Fund and provides for an increase in that payment, as specified. The money in the fund is continuously appropriated to the department to pay refund values, processing payments, and for other purposes.

A violation of the act is a crime and the penalties for violations of the act are deposited in the fund.

Under the act, the department is required to calculate a processing fee for each beverage container with a specified scrap value, which is required to be paid by beverage manufacturers for each beverage container sold or transferred to a dealer. Until January 1, 2000, a processing fee is required to be imposed annually only if the scrap value for the material is less than the cost of recycling, and, after that date, a processing fee is required to be established pursuant to different criteria. Under the law in effect until January 1, 2000, the processing fee is reduced in an amount equal to 25% of the redemption payments projected to be paid by distributors of beverages sold in that container type for the previous calendar year.

This bill would revise the method of calculating the processing payment and would require the processing payment to equal the difference between the scrap value offered to recyclers by willing purchasers and the cost of recycling containers and a reasonable financial return. The bill would require the department to establish a processing fee on January 1, 2000, and on and before January 1 annually thereafter, and to use specified cost data for the January 1, 2000, and January 1, 2001, processing payment calculation. The bill would require the actual processing fee to equal 65% of the processing payment, but the department would be required to adjust the amount of the processing fee, based upon the availability of funds in the processing fee account for that beverage material type so the amount of the processing fee equals 25% of the processing payment.

(2) Existing law requires the department to transfer an amount equal to 25% of the redemption payments, and all processing fees, made for glass, PET, and bimetal beverage containers to, respectively, the Glass Processing Fee Account, the PET Processing Fee Account, and the Bimetal Processing Fee Account, for making processing payments for, and reducing processing fees paid for, these container types. After setting aside funds needed for the payment to refund values and administrative fees, and for these expenditures, the department is authorized to expend $18,500,000 of the moneys in the fund, until January 1, 2001, for the payment of handling fees, and $5,000,000, for payments for curbside programs, until January 1, 2001, to expend $7,000,000 annually for grants to community conservation corps, and to expend $2,000,000 for grants to nonprofit organizations or government programs.

This bill would increase these amounts to $23,500,000 for the payment of handling fees, $15,000,000 for payment for curbside programs and neighborhood dropoff programs, and $15,000,000 for grants to community conservation corps. The bill would authorize the expenditure of $10,500,000 annually for payments to cities and counties for beverage container recycling and litter cleanup activities, and $500,000 for grants for beverage

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

recycling and litter reduction programs, and would require the payment of $6,840,000 to the City of San Diego, for a curbside recycling pilot program that would be terminated on January 1, 2004. The bill would extend the authorization to expend these funds for handling fees and for curbside programs indefinitely, thereby making an appropriation. The bill would authorize the department to pay each curbside recycling program a quality glass incentive payment for color-sorted glass collected by the curbside recycling program, in a total of not more than $3,000,000 per calendar year and would specify the criteria for the making of these payments.

(3) The bill would require the department to contract with the University of California to prepare and submit a specified report.

(4) The changes proposed by the bill would become operative only if SB 332 of the 1999–2000 Regular Session of the Legislature is enacted and becomes effective on or before January 1, 2000. The bill would also make a statement of legislative intent regarding the order of enactment of this bill and SB 332.

(5) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

Since a violation of the requirements imposed by the bill would be a crime, the bill would impose a state-mandated local program by creating new crimes.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 818 (AB 170) Firebaugh. Outdoor advertising: redevelopment districts.

The Outdoor Advertising Act regulates the placement of advertising displays along highways. The act exempts from its provisions certain advertising displays that advertise the business conducted or services rendered or goods produced or sold on the property upon which the display is placed, as specified, except provisions governing licenses and imposing regulations. The act provides an exemption from specified display restrictions for advertising displays that advertise businesses and activities developed within the boundary limits of, or as part of, an individual redevelopment agency project by authorizing those displays to be considered, with the consent of the redevelopment agency governing the project, as being on premises anywhere within the limits of the project, as specified. The exemption is conditioned on, among other things, all of the land in the project being contiguous or separated only by a public highway or public facilities developed or relocated for inclusion within the project as a part of the original redevelopment plan.

This bill would, notwithstanding those provisions, for the City of Buena Park in Orange County, the Cities of Commerce, Covina, and South Gate in Los Angeles County, and the City of Victorville in San Bernardino County, extend the exemption for redevelopment agency projects to include more than one of the agency's project area or areas, would exempt the display as being on premises if it is anywhere within the legal boundaries of the redevelopment agency's project area or areas, instead of within the limits of the project, and would delete the condition that all of the land in the project be contiguous or separated only by a public highway or public facilities.

The bill would require the governing body of a redevelopment agency within these cities, upon approving the purchase, lease, or other authorization for the erection of an advertising display, to prepare, adopt, and submit to the department an application for the issuance of a permit that, at a minimum, includes a finding that the advertising display would not result in a concentration of displays that will have a negative impact on the safety or aesthetic quality of the community. The bill also would authorize the department to deny the application only if the proposed structure would violate specified provisions of law, or if the display would cause a reduction in federal-aid highway funds.

This bill would make certain findings and declarations regarding the inapplicability of a general statute within the meaning of Section 16 of Article IV of the California Constitution.

Ch. 819 (AB 161) Alquist. Osteoporosis.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Under existing law, the State Department of Health Services is responsible for the administration and oversight of various health care programs.

This bill would establish the California Osteoporosis Prevention and Education Program within the department. The bill would appropriate $250,000 to the department from the General Fund for purposes of the bill.

Ch. 820 (AB 155) Migden. Public social services.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons.

This bill would , until April 1, 2005, and subject to the receipt of federal financial participation, require the department to adopt a federal option under which any employed individual whose countable income, determined by criteria specified in the bill, does not exceed 250% of the federal poverty level and who is disabled for specified purposes, shall be eligible for benefits under the Medi-Cal program, subject to the payment of premiums.

Because counties are required to make Medi-Cal eligibility determinations and this bill would expand Medi-Cal eligibility, the bill would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 821 (AB 145) Vincent. Insurance taxation: credit.

Existing insurance tax law requires every insurer, as defined, doing business in this state, to annually pay a tax on gross premiums, as specified, at the rates and subject to the deductions provided by law. Except as otherwise provided, the rate of tax to be applied to the basis of the annual tax in respect to each year is 2.35%. Existing law authorizes a low-income housing credit against that tax on the gross premiums of insurers.

The Personal Income Tax Law and the Bank and Corporation Tax Law allow a credit, until 2002, for specified taxable and income years in an amount equal to 20% of a qualified deposit, as defined, made into a community development financial institution, as defined.

This bill would provide a similar tax credit, until 2002, for purposes of insurance taxation.

Existing law provides that when the laws of another state or foreign country impose certain taxes or other amounts upon California insurers, or their agents or representatives, the same taxes or other amounts are imposed in this state upon the insurers, or their agents or representatives, of the other state or country doing business in this state.

This bill would allow the credit created by this bill to be allowed without any adjustment under those retaliatory tax provisions by treating the credit as a tax paid for purposes of those retaliatory taxes.

This bill would take effect immediately as a tax levy.

Ch. 822 (AB 492) Wayne. Coastal resources: public access.

Existing law requires the California Coastal Commission and the State Coastal Conservancy to implement and administer various programs related to coastal resources, including programs for coastal access.

This bill would prohibit state land, as defined, that is located between the first public road and the sea, with an existing or potential public accessway to or from the sea, or that the commission has formally designated as part of the California Coastal Trail, from being transferred or sold by the state to any private entity, unless the state retains a permanent property interest in the land adequate to provide public access to or along the sea. The

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

prohibition would not apply if the private entity is a private, nonprofit organization that exists for the purposes of preserving lands for public use and enjoyment and meets the requirements of specified provisions of existing law, or if the department or the conservancy makes specified findings at a noticed public hearing relating to the transfer or sale of the property. The bill would also permit the Department of Parks and Recreation and the conservancy to sell or transfer this state land if a public hearing is conducted and certain findings are made.

Ch. 823 (AB 458) Zettel. Child care providers.

(1) Existing law requires every licensed child day care facility to make accessible to the public a copy of any licensing report pertaining to the facility that documents a facility visit or a substantial complaint investigation. Existing law requires each child day care facility to permanently post in a facility location accessible to parents and guardians a written notice of the right to make an inspection of the facility. Existing law also requires the Community Care Licensing Division of the State Department of Social Services to regulate child care licensees through an organizational unit separate from that used to regulate all other licensing programs.

This bill would require every child care resource and referral program and every alternative payment program to advise every person who requests a child care referral of his or her right to the licensing information of a licensed child day care facility required to be maintained at the facility, and to access any public files pertaining to the facility that are maintained by the State Department of Social Services Community Care Licensing Division.

A willful or repeated violation of related provisions is a misdemeanor pursuant to existing provisions of law.

This bill would, notwithstanding those provisions, provide that the sole sanction for failure of a child care resource and referral agency or an alternative payment program to comply with the bill's requirement is that set forth in the "Funding Terms and Conditions" agreement between the affected agency or program and the State Department of Education.

(2) This bill would incorporate additional changes in Section 8202 of the Education Code, proposed by SB 1249, to be operative only if SB 1249 and this bill are both chaptered and become effective on or before January 1, 2000, and this bill is chaptered last.

Ch. 824 (AB 494) Davis. Property tax revenue allocation: County of San Diego: county free library.

Existing law requires the county auditor, in each fiscal year, to allocate property tax revenues to local jurisdictions in accordance with specified formulas and procedures, and generally requires that each jurisdiction be allocated an amount equal to the total of the amount of revenue allocated to that jurisdiction in the prior fiscal year, subject to certain modifications, and that jurisdiction's portion of the annual tax increment, as defined.

This bill would, contingent upon the approval of an authorizing resolution or ordinance by the Board of Supervisors of the County of San Diego, require the Auditor for the County of San Diego, in each of the 1999–2000, 2000–01, and 2001–02 fiscal years, to reduce the total amount of ad valorem property tax deemed allocated in the prior fiscal year to the county by an amount, specified in or determined in accordance with the authorizing resolution or ordinance, and to increase by a commensurate amount the total amount of ad valorem property tax revenue deemed allocated in the prior fiscal year to the county free library. This bill would prohibit the total amount of ad valorem property tax revenue that is reallocated in this manner from exceeding $3,000,000 in any fiscal year and $9,000,000 in total. This bill would also require the Auditor for the County of San Diego, in each of the 1999–2000, 2000–01, and 2001–02 fiscal years, to disregard these reallocations for purposes of allocating the annual tax increment.

This bill would make legislative findings and declarations as to the necessity for a special statute.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 825 (AB 549) Gallegos. Hospital mortgage insurance.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law establishes various programs to assist hospitals with the cost of construction projects.

This bill would, in conformance with legislative findings, permit the Office of Statewide Health Planning and Development, at the request of a hospital, to commission an independent study of market need and feasibility, as required for participation in federal mortgage insurance programs. The costs of a study would be paid for by the requesting hospital.

Ch. 826 (AB 510) R. Wright. Public social services: recipient reporting.

Existing law contains recipient reporting requirements for the California Work Opportunity and Responsibility to Kids (CalWORKs) program and the federal Food Stamp Program.

This bill would revise and recast recipient interview and reporting provisions under these programs, including timelines for the required frequency of reports. The bill would generally reduce the frequency of reports, but require recipients to report certain changes in information that affects the recipient's eligibility under these programs. Implementation of these new requirements would be phased in, as prescribed, with the new CalWORKs provisions being repealed on specified dates.

Because the bill imposes certain requirements on each county, the bill would constitute a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 827 (AB 600) Knox. Insurance claims of Holocaust victims.

(1) Existing law prescribes certain powers and duties of the Insurance Commissioner and of the Department of Insurance. Existing law requires the department to develop and implement a coordinated approach to gather, review, and analyze the archives of insurers and other archives and records, as specified, to provide for research and investigation into insurance policies, unpaid insurance claims, and related matters of victims of the Holocaust or the Nazi-controlled German government or its allies, and the beneficiaries and heirs of those victims, and for losses arising from the activities of the Nazi-controlled German government or its allies for insurance policies issued before and during World War II by insurers who have affiliates or subsidiaries authorized to do business in the state.

Existing law also provides that the department has an affirmative duty to play an independent role in representing the interests of Holocaust survivors, and provides that if an insurer or any affiliate of an insurer has failed to pay any valid claim from Holocaust survivors, the certificate of authority of the insurer shall be suspended until the insurer, or its affiliates, pays the claim or claims.

This bill would, in addition, enact the Holocaust Victim Insurance Relief Act of 1999, which would, among other things, require the commissioner to establish and maintain the Holocaust Era Insurance Registry, which would contain records and information relating to insurance policies issued by insurers in the state, either directly or through a related company, to persons in Europe which were in effect between 1920 and 1945. This bill would require those insurers to file or cause to be filed that information with the commissioner to be entered into the registry. It would also require those insurers to certify as true certain additional information, and would make it a crime to knowingly certify as true any material matter which the insurer knows to be false. By creating a new crime, this bill would impose a state-mandated local program. This bill would also provide for certain civil penalties for knowingly filing false information about a policy, as required by these new provisions. The bill would appropriate these civil penalties from the General Fund to the Department of Insurance to be used to aid in the resolution of Holocaust insurance claims. It would also require the commissioner to suspend the certificate of authority of any insurer that fails to comply with these requirements by the 210th day of the effective date of these provisions, and to adopt emergency rules to implement these provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing law authorizes any Holocaust victim, as defined, or heir or beneficiary of a Holocaust victim, who resides in this state and has a claim arising out of an insurance policy or policies purchased in Europe between 1920 and 1945 from a specified insurer to bring a legal action to recover on that claim in any superior court of the state for the county in which the plaintiff or one of the plaintiffs resides, which shall be vested with jurisdiction over that action until its completion or resolution. Existing law also provides that any claim of this type shall not be dismissed for failure to comply with the applicable statute of limitation if the action is commenced on or before December 31, 2010.

This bill would instead authorize those persons to bring a legal action to recover on a claim arising out of an insurance policy or policies purchased or in effect in Europe before 1945 from a specified insurer, and would change the definition of "Holocaust victim" and "insurer," as specified.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

(4) This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 828 (AB 631) Migden. Charter schools: collective bargaining.

Existing law, the Charter Schools Act of 1992, permits teachers, parents, pupils, and community members to petition a school district governing board to approve a charter school to operate independently from the existing school district structure as a method of accomplishing, among other things, improved pupil learning. Existing law, with certain exceptions, generally exempts charter schools from the provisions of the Education Code applicable to school districts.

This bill would require that provisions of existing law related to collective bargaining in public education employment apply to charter schools, thereby imposing a state-mandated local program. The bill would require the charter school charter to declare whether the charter school is the exclusive public school employer of the employees at the charter school for this purpose. The bill would require a charter school, operated by the University of California in university facilities, to declare in its charter that it is the employer of the employees at the charter school for the purposes of provisions of law relating to collective bargaining for employees of public institutions of higher education. This bill would require that, if the charter of a charter school does not specify that it would comply with statutory and regulatory provisions that govern public school employers relating to tenure and merit or civil service, then discipline and dismissal of employees would be included within the scope of representation.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

This bill would incorporate additional changes in Section 3540.1 of the Government Code proposed by AB 91, to be operative only if that bill and this bill are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 829 (AB 643) Wesson. Job training: California YouthBuild Program.

Existing law provides for the Employment Development Department to administer various job training and placement programs and services.

This bill would create the California YouthBuild Program within the Employment Development Department to help disadvantaged youth obtain education and employment skills in conjunction with the construction or rehabilitation of housing for special need populations, very low income households, and low-income households. This bill would provide for the Director of Employment Development to make grants to public or private nonprofit entities, who would recruit and select eligible participants for

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

a program. This bill would specify the requirements for participation in a program for the applicant entities and the program participants. This bill would enact other related provisions.

The bill would become operative only if funds are specifically appropriated for the California YouthBuild Program by a state budget act.

Ch. 830 (AB 598) Soto. Education technology: Commission on Technology in Learning.

(1) Existing law, the Digital High School Education Technology Grant Act of 1997, provides one-time installation grants and ongoing technology support and staff training grants to school districts and county offices of education for projects at high schools.

Existing law establishes the California Technology Assistance Project to administer a regionalized network of technical assistance to schools and school districts on the implementation of education technology. The California Technology Assistance Project is composed of regional consortia that work collaboratively with school districts and county offices of education in order to meet locally defined technology-based needs, as identified in the certified technology plans for their client school districts.

This bill would establish the Commission on Technology in Learning to make policy recommendations to the State Board of Education in areas that include statewide planning for education technology, including a statewide master plan for use of education technology in the elementary and secondary instructional program, dissemination of technology resources, and development of guidelines for ongoing comprehensive statewide evaluation of all technology, telecommunications, and distance learning programs that directly and indirectly affect California education in kindergarten and grades 1 to 12, inclusive. The bill would provide for the appointment of members of the commission.

The bill would express the intent of the Legislature that the current practice of developing education technology plans for each funding program should be replaced with a comprehensive local planning process that will enable school districts to apply for grants on an ongoing basis and assist in utilizing available education technology program and would require a school district to have a technology plan as a precondition of receiving any technology grant administered by the State Department of Education.

(2) Existing law requires the State Department of Education to assist the State Board of Education on education technology plans, practices, programs, and activities, provide statewide coordination and evaluation of technology programs and resources, and advance the use of technology in the curriculum and in the administration of elementary and secondary schools.

This bill would require the department to provide staff support to the Commission for Technology in Learning.

(3) Under the bill the commission would terminate and would have no further duties on January 1, 2003.

Ch. 831 (AB 689) Gallegos. Medi-Cal.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services.

This bill would make nonsubstantive technical changes in these provisions.

Existing law establishes the Cigarette and Tobacco Products Surtax Fund consisting of certain revenues that may only be appropriated for certain purposes.

This bill would appropriate the sum of $14,941,000 from that fund to the department to fund the Breast Cancer Early Detection Program.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 832 (AB 646) Bates. School safety: missing children.

Existing law establishes the Safe School Policing Partnership Act of 1998, to be administered by the School/Law Enforcement Partnership, for the purpose of awarding grants to school districts and county offices of education, or consortia thereof, to develop and implement plans that demonstrate a collaborative and integrated approach for implementing a system of providing safe and secure environments.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law requires each public primary and secondary school to post, at an appropriate area restricted to adults, information regarding missing children. Existing law establishes certain records requirements for enrollment and transfer of private and public school pupils.

This bill would require the law enforcement agency responsible for the investigation of a missing child to inform the school district, other local educational agency, or private school, in which the child is enrolled, that the child is missing and would authorize local law enforcement agencies to establish a process for informing schools about abducted children. The bill would require that the notice be in writing, include a photograph, if available, and be given within 10 days of the child's disappearance. The bill would require every school so notified to place a notice that the child has been reported missing on the front of each missing child's school record. If a school receives a record inquiry or request for a missing child about whom the school has been notified, the bill would require the school to immediately notify the law enforcement authorities who informed the school of the missing child's status. By establishing these additional duties for law enforcement agencies and schools, this bill would impose a state-mandated local program. The bill would also correct an obsolete cross-reference in existing law.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 833 (AB 593) Strom-Martin. Certified farmers' markets.

(1) Existing law authorizes the Secretary of Food and Agriculture to adopt regulations to encourage the direct sale by farmers to consumers of all types of certified agricultural products and noncertifiable agricultural products produced within the state and to establish qualifications for persons selling products directly to consumers if the sales involve the granting of prescribed exemptions by the secretary. Existing law authorizes the secretary to allow certified farmers' markets to establish rules and procedures that are more restrictive than, or do not violate, the provisions of state law relating to certified farmers' markets. Existing law allows any person aggrieved by the implementation of a role or procedures established by a certified farmers' market to submit a written appeal to the secretary, as specified.

This bill would allow California farmers to transport for sale and sell California-grown fresh fruits, nuts, and vegetables that they produce, directly to the public, which produce would be exempt from size, standard pack, container, and labeling requirements, at a certified farmers' market or at a retail stand located at or near the point of production, subject to specified conditions. The bill would authorize certified farmers' markets to establish rules and procedures that are more restrictive than, and do not otherwise violate, provisions of state law relating to certified farmers' markets. The bill would require the governing body of any certified farmers' market operating with more than one participating certified producer to adopt written rules and procedures pertaining to the operation of the market. The bill would require the Department of Food and Agriculture, upon request, to issue an advisory opinion as to whether, as a question of law, the rule or procedure in dispute is consistent with applicable state law, as specified. The bill would provide that the department shall not incur liability in connection with the preparation of an advisory opinion. The bill would require the department to provide for an informal hearing with regard to any grievance of a certified producer involving questions of fact, as prescribed. The bill would also provide for the mediation of disputes, as specified. The bill would prescribe related matters and would delete the appeal provisions.

(2) Existing law, until January 1, 2000, (a) requires the secretary to establish the Certified Farmers' Market Advisory Committee with prescribed membership; (b) authorizes the committee to make recommendations to the secretary on specified matters relating to the regulation of certified farmers' markets; (c) requires the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

members of the committee to serve without compensation; and (d) prescribes related matters relating to the committee.

This bill would authorize the advisory committee to make recommendations to the secretary regarding the department's budget relating to the regulation of certified farmers' markets and the assessment of fees to pay for costs incurred by the department in undertaking that regulation, as well as alternative strategies for certification and investigation methodology, and methods for industry self-regulation and commission formation. The bill would authorize the department to reimburse the members of the advisory committee for their travel expenses. The bill would delete the January 1, 2000, date, thereby continuing indefinitely those provisions relating to the advisory committee.

(3) Existing law regulates the certification of a farmers' market and a producer by a county agricultural commissioner and authorizes the imposition of a fee by that commissioner to pay for costs incurred in connection with related inspection duties, as prescribed. Existing law, until January 1, 2000, requires each certified producer to pay a state certificate fee of $10, which is required to be deposited in the Department of Food and Agriculture Fund for use by the department to undertake the regulation of certified farmers' markets, as prescribed.

This bill would authorize the department or a county agricultural commission to deny the renewal of a certified farmers' market certificate or a certified producer's certificate under certain circumstances. The bill, until January 1, 2005, additionally would require every operator of a certified farmers' market to pay to the department, on a quarterly basis, a specified fee. The money generated by the fee would be required to be deposited in the Department of Food and Agriculture Fund, to be used, upon appropriation by the Legislature, to pay for costs incurred by the department in carrying out its duties relating to certified farmers' markets, including specified actions undertaken by the department. Because, under existing law, the failure to pay the required fee would be a crime, the bill would impose a state-mandated local program by creating a new crime.

(4) Existing law, until January 1, 2000, authorizes the secretary and county agricultural commissioners to impose civil penalties, in accordance with specified procedures, on persons who violate prescribed provisions of law relating to certified farmers' markets.

This bill would extend that date to January 1, 2005.

(5) Existing law makes legislative findings and declarations relating to direct marketing of agricultural products.

The bill would modify those findings and declarations.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 834 (AB 596) Honda. Retirement: service credits.

Under existing law, members of the Public Employees' Retirement System may purchase additional service credit for specified types of service that are not otherwise eligible for service credit, as specified.

This bill would authorize those members to purchase additional service credit for up to 3 years of service as a volunteer in the Peace Corps or AmeriCorps: Volunteers In Service To America, as specified.

Ch. 835 (AB 777) Cardenas. Escheat.

Under the existing Unclaimed Property Law, prescribed deposits or accounts with a banking or financial organization escheat to the state when the owner of the deposits or accounts has not, for more than 3 years, indicated an interest in the deposit, as specified. Existing law also authorizes the withholding of reasonable service charges, as specified, for these purposes.

This bill would provide that these deposits or accounts would not escheat if the owner has, within 3 years, cashed an interest check, or owned another deposit or account that is not subject to escheat and the organization has communicated with the owner regarding that deposit or account that would otherwise escheat at the address to which

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

the banking organization has sent communications regarding the other deposit or account. The bill would also specify the requirements for service charges with respect to money orders that escheat after having been outstanding for more than 7 years.

Ch. 836 (AB 758) Thomson. Consumer credit reporting agencies.

Existing law, referred to as the Consumer Credit Reporting Agencies Act, provides that the prevailing parties in any action to recover damages in the case of a negligent or willful violation of the act shall be entitled to recover court costs and attorneys' fees.

This bill would limit the recovery of those costs and fees to the prevailing plaintiffs, except as otherwise specified. The bill would also permit a debt collector to recover reasonable attorney's fees against a plaintiff who brings an action against the debt collector to recover damages for a negligent or willful violation of the act, where the basis for the action is related to the collection of a debt and the court finds that the action was not brought in good faith.

Under existing law, transactions by mail where the credit grantor and its major credit application processing center are located outside the state are excluded from the Consumer Credit Reporting Agencies Act.

This bill would delete that exclusion.

Ch. 837 (AB 747) Dutra. Schoolsites: airports.

Existing law requires the governing board of each school district to give the Department of Transportation written notice of the proposed acquisition of a schoolsite that is within 2 miles of an existing airport runway or a planned runway, and requires the Department of Transportation to investigate the site and report to the governing board of the school district. Existing law provides that, if the recommendation of the Department of Transportation is unfavorable, the recommendation may not be overruled without express approval of the State Board of Education.

This bill would, instead, require the governing board of a school district to report to the State Department of Education and would require the State Department of Education to report to the Department of Transportation. This bill would require the Department of Transportation to investigate and report to the State Department of Education, and would require the State Department of Education, within 10 days of receiving the Department of Transportation's report to forward the report to the governing board of the school district. The bill would require the Department of Transportation to adopt regulations setting forth the criteria by which a proposed site will be evaluated.

Existing law prohibits acquisition of the site and prohibits apportionment or expenditure of state or local funds for the acquisition of that site, construction of any school building on that site, or for the expansion of any existing site to include that site, if the report does not favor acquisition of the site, unless prescribed reporting and public hearing requirements are satisfied. Existing law also prohibits an unfavorable recommendation from being overruled without the express approval of the State Allocation Board.

This bill would instead prohibit the governing board of a school district from acquiring title to the property if the report does not favor the acquisition of the property for a schoolsite or an addition to a present schoolsite. The bill would also delete the provision that allows a school district to have the recommendation of the Department of Transportation overruled by obtaining the express approval of the State Board of Education.

The bill would require, if the report does favor the acquisition of the property for a schoolsite or an addition to a present schoolsite, the governing board to hold a public hearing on the matter prior to acquiring the site.

Ch. 838 (AB 857) Rod Pacheco. County superintendents of schools.

The California Constitution provides for the election or appointment of a superintendent of schools for each county and requires the county board of education to establish the salary of the county superintendent of schools.

This bill would prohibit a county superintendent of schools from increasing his or her salary, financial remuneration, benefits, or pension in any manner or for any reason

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

without bringing the matter to the attention of the county board of education for its discussion at a regularly scheduled public meeting of the board and without the approval of the county board of education.

Existing law requires the county board of education to approve the annual budget of the county superintendent of schools before its submission to the county board of supervisors.

This bill would prohibit the county superintendent of schools from, in any manner, disposing of any item of personal property belonging to the county office of education that is worth $25,000 without obtaining an independent valuation of the property, advertising its sale, bringing the matter to the attention of the county board of education for its discussion at a regularly scheduled public meeting, and obtaining the approval of the county board of education. For disposal of property worth less than $25,000, the bill would require the county superintendent of schools to certify the value of the property in a quarterly report to be submitted to the county board of education for its review. The bill would require a revision by the county superintendent of schools of the annual budget of the county superintendent of schools in excess of $25,000 and a consultant contract for $25,000 or more that constitutes a budget revision and is entered into by the county superintendent of schools to be incorporated in the next interim financial report or other board report when the report is submitted to the county board of education for discussion and approval at a regularly scheduled public meeting of the county board of education.

Existing law authorizes the county superintendent of schools to employ persons in various capacities.

The bill would restrict the authority of a county superintendent of schools to hire consultants.

This bill would prohibit the county superintendent of schools from increasing by $10,000 or more the salary or bonus of any employee of the county office of education unless the matter is brought to the attention of the county board of education for its discussion at a regularly scheduled public meeting of the board. The bill would also prohibit the county superintendent of schools from increasing the retirement benefits of any employee of the county board of education unless the latter is brought to the attention of the county board of education for its discussion at a regularly scheduled public meeting of the board and the board approves the increase.

This bill would impose a state-mandated local program by requiring a county superintendent of schools to follow new procedures to dispose of personal property belonging to the county superintendent of schools and to make certain salary increases.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 839 (AB 879) Havice. Veterans: Deputy Secretary of Women Veterans Affairs.

Existing law provides that the statutory authority for the position of Deputy Secretary of Women Veterans Affairs is repealed on January 1, 2001.

This bill would delete that repeal provision, thereby extending this position indefinitely.

Ch. 840 (AB 900) Alquist. Peace officers: Board of Dental Examiners.

Existing law provides that the Chief of the Division of Investigation in the Department of Consumer Affairs and all investigators of that division, the Medical Board of California, and the Board of Dental Examiners have the authority of peace officers while engaged in exercising the powers granted or performing the duties imposed upon them or the division in investigating the laws administered by the various boards comprising the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

department or commencing directly or indirectly any criminal prosecution arising from any investigation conducted under these laws.

Existing law additionally requires the Director of Consumer Affairs to designate as peace officers 7 persons assigned to the investigations unit of the Board of Dental Examiners.

This bill instead would authorize the director to designate 10 persons as peace officers.

The bill additionally would authorize the director, for a period extending to July 1, 2002, to designate as peace officers an additional 7 persons who shall at the time of their designation be assigned to the investigations unit of the Dental Board of California.

The bill also would require the Dental Board of California to contract with an outside entity to conduct an independent study to examine specific matters concerning the board's operations, including the board's needs for sworn peace officer positions in its investigations unit, and to complete and submit the study to the Legislature by January 1, 2001.

The bill would appropriate $100,000 from the State Dentistry Fund to the Dental Board of California in order to conduct the study and prepare the report required by this act.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 841 (AB 923) Hertzberg. Railroad grade crossings.

(1) Under existing law, it is an infraction, punishable by a base fine of not exceeding $100 for any person to drive a vehicle to the left side of the highway at railroad grade crossings, to fail to stop at a railroad or rail transit signal or grade crossing under specified conditions, or to operate certain vehicles and fail to stop those vehicles not less than 15 feet or more than 50 feet from the nearest rail of the track before traversing the railroad crossing. Existing law provides for increased fines for subsequent convictions of these infractions.

Existing law authorizes a court in a county with a population greater than 500,000 to order any person convicted of the infractions specified above, relating to driving a vehicle to the left side of the highway at a railroad grade crossing or failing to stop at a railroad or rail transit signal or grade crossing under certain conditions, among other transit-related traffic violations, to attend a traffic school that offers, as part of its curriculum, a film on rail transit safety.

This bill would authorize a court in a county with a population greater than 500,000 to order any person to attend a traffic school that offers, as part of its curriculum, a film on rail transit safety when that person has been convicted of the infraction specified above, relating to operating certain vehicles and failing to stop those vehicles not less than 15 feet or more than 50 feet from the nearest rail of the track before traversing the railroad crossing.

The bill would change the base fine for a violation of the above described provisions regarding driving on the left side of the highway at railroad grade crossings, failing to stop at a railroad or rail transit signal or grade crossing, or operating certain vehicles and failing to stop those vehicles in the manner described above from the nearest rail of the track to a fine of $100, to a fine not exceeding $200, or to a fine not exceeding $250, depending upon the number of prior convictions for a violation or violations of these offenses.

The bill would make conforming changes.

(2) Under existing law, all fines and forfeitures imposed and collected for crimes, other than parking offenses, resulting from a filing in a court are required to be deposited with the county treasurer and distributed in accordance with a specified formula each month to the state, counties, and cities.

This bill would require, notwithstanding the specified distribution for fines, forfeitures, and assessments, that of the fines, forfeitures, and assessments collected for convictions of the transit-related infractions specified above, the first 30% be allocated by the county treasurer to a transit district or transportation commission, if the offense occurred in an area where that transit district or transportation commission provides rail transportation, or, if there is no transit district or transportation commission providing rail transportation in the area where the offense occurred, that the first 30% of the amount collected to be allocated to the general fund of the county in which the offense occurred, to be used, in either case, only for public safety and public education purposes relating to railroad

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

grade crossings, with the balance to be deposited by the county treasurer in accordance with the existing formula specified above. The bill would limit the amount expended for the specified public safety and public education purposes to the amount of fines, forfeitures, and assessments allocated pursuant to the above to the transit district, transportation commission, or county. The bill would make a similar allocation of revenues derived from fees collected from persons required or permitted to attend traffic violator schools because of convictions of these same infractions. By imposing additional administrative duties on counties, this bill would impose a state-mandated local program.

The bill would require the Public Utilities Commission, in consultation with the Department of Transportation to adopt rules and regulations prescribing uniform standards regarding the time after the warning signal begins at a railroad crossing at which traffic enforcement shall begin, after public hearings and consultation with transit districts or transportation commissions and multicounty rail transit entities, established under specified provisions of existing law, that provide rail transportation.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 842 (AB 844) Thomson. California Health Facilities Financing Authority: loans.

Under existing law, there is a California Health Facilities Financing Authority which is empowered to make loans under certain conditions from the continuously appropriated California Health Facilities Financing Fund to nonprofit corporations or associations for financing or refinancing of the acquisition, construction, or remodeling of health facilities, as defined, including hospitals.

This bill would, out of moneys in the California Health Facilities Financing Fund, authorize the authority to make loans to, or purchase loans of, any participating health institution either in connection with the financing of a project or working capital or for the refinancing of indebtedness incurred by that participating health institution.

Because the bill would expand the purposes for which a continuously appropriated fund may be used, the bill would constitute an appropriation.

Ch. 843 (AB 1099) Shelley. Elections: ballots.

Existing law provides for the numbering of state measures that are to be submitted to the voters, and the order in which these measures shall appear on the ballot.

This bill would provide that notwithstanding any other provision of law, the Secretary of State shall designate SCA 11 to appear as Proposition 1A on the ballot that is submitted to the voters at the March 7, 2000, statewide primary election.

This bill would provide that it is to take effect immediately as an urgency statute.

Ch. 844 (AB 1149) Aroner. Underground electric and communications facilities.

Under existing law, the Public Utilities Commission has regulatory authority over public utilities and, under that authority, has adopted rules for the replacement of overhead electric and communications facilities with underground facilities.

This bill would require the commission to conduct a study as to the ways to amend, revise, and improve those rules, as specified. The commission would have the authority to revise these rules without prior approval of the Legislature. The commission would be required to submit a report on the study to the Legislature on or before January 1, 2001.

Ch. 845 (AB 359) Aroner. Developmentally disabled persons: health care.

Existing law provides for the licensure and regulation of health facilities, including an intermediate care facility/developmentally disabled—nursing.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides for the Medi-Cal program, administered by the State Department of Health Services, under which qualified low-income persons are provided with health care services. One of the types of services for which Medi-Cal reimbursement is provided is long-term health care facility services, including services provided by an intermediate health care facility/developmentally disabled—nursing.

This bill would require the State Department of Health Services to establish a pilot program to provide continuous skilled nursing care, as defined, as a benefit of the Medi-Cal program, in accordance with an approved federal waiver to be developed and requested by the department no later than April 1, 2000. The bill would provide that the purpose of the pilot program is to explore more flexible models of health facility licensure to provide continuous skilled nursing care to developmentally disabled individuals in the least restrictive setting. The bill would require that not less than 10 facilities approved by the department would participate in the pilot program, and would exempt those facilities from licensure during their participation in the pilot program.

This bill would authorize the department to enter into contracts for the provision of essential administration and other services, and would exempt these contracts from certain requirements of the Public Contract Code. This bill would also authorize the department to adopt emergency regulations to implement its provisions.

This bill would also require the department to develop Medi-Cal reimbursement rates for services provided to patients needing continuous care in these facilities. The bill would further require the Director of Health Services to apply specified utilization controls to these facilities.

Ch. 846 (AB 391) Jackson. Spousal support.

Existing law directs a court to consider specified circumstances concerning the parties in ordering spousal support in a judgment of dissolution of marriage or legal separation of the parties, including the goal that the supported party shall be self-supporting within a reasonable period of time. For purposes of this provision, a reasonable period of time is generally defined to be one-half the length of the marriage. Existing law also requires the court to give a specified admonition to the parties when making that order.

Existing law provides that a marriage of 10 years or more is presumed to be a marriage of long duration, as specified.

This bill would provide an exception for a marriage of long duration from the definition of a reasonable period of time for purposes of this provision. The bill would also delete the provision requiring a court to give a specified admonition when making an order for spousal support and instead authorize the court to advise the recipient of support that he or she should make reasonable efforts to assist in providing for his or her support needs.

The bill would incorporate additional changes to Section 4320 of the Family Code made by this bill and AB 808 to take effect if both bills are enacted and this bill is enacted last.

Ch. 847 (AB 319) Thomson. County programs: funding.

Existing law requires counties to provide various health services and authorizes counties to contract with the State Department of Health Services for the provision of health services.

This bill would require the department, within 60 days of enactment of the Budget Act, to advance to a local health department, 25% of the annual General Fund allocation, subvention, or reimbursement required by a local health department for the delivery of services related to the California Children's Services Program, the Child Health and Disability Prevention Program, and HIV education and prevention services in accordance with a specified formula.

Ch. 848 (AB 282) Torlakson. Health facility construction loan insurance.

The existing California Health Facility Construction Loan Insurance Law provides, without cost to the state, an insurance program for health facility construction, improvement, and expansion loans in order to stimulate the flow of private capital into health facilities construction, improvement, and expansion, and in order to meet the need for new, expanded, and modernized public and nonprofit health facilities. Under

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

existing law, the Office of Statewide Health Planning and Development has various responsibilities in connection with this program.

This bill would revise existing law relating to the provision of health facility construction loan insurance, including declaring legislative intent to apply specified existing provisions retroactively, and requiring the office to develop a state plan and to outline any changes the plan makes to the health care industry including statements of the plan's guiding principles. This bill would also make certain conditions applicable only to borrowers that are general acute care hospitals or acute psychiatric hospitals. This bill would include the conditions under which a loan is eligible for insurance, and would require the office to develop and implement a system for assessing an applicant's relative financial risk, and to establish a maximum level of insurance risk for the projects it insures.

This bill would require the office to annually report to the Legislature the financial status of the program and to develop and maintain a formal system of monitoring borrowers, to assist the office in determining when borrowers are experiencing financial difficulties. It would also revise existing borrower reporting requirements, and sanctions applicable to borrowers that are out of compliance with the existing requirement that the borrower make reasonable assurances regarding the availability of the facility. This bill would require the office to perform a feasibility study upon the application of a borrower for insurance. The bill would require the office, in cooperation with the Attorney General, to develop and maintain a list of receivers, which may be appointed as a result of a borrower's financial difficulties, and would further require the office to establish reporting requirements for the receivers.

This bill would increase the office's authorization to insure health facility construction, improvement, and expansion loans to $3 billion, except as specified.

This bill would set forth the steps to be taken in the event of specified types of borrower default. The bill would also require the office to establish an Advisory Loan Insurance Committee, and would outline the duties of that committee.

Ch. 849 (AB 703) Lempert. Ballast water.

Existing law requires the Department of Fish and Game to adopt the International Maritime Organization's "Guidelines for Preventing the Introduction of Unwanted Aquatic Organisms and Pathogens from Ships' Ballast Water and Sediment Discharges" as the policy of the state to prevent the introduction and spread of aquatic nuisance species into any river, estuary, bay, or coastal area through the exchange of ballast water of vessels prior to entering those waters and to adopt a ballast water control report form to monitor compliance with those guidelines.

This bill, with certain exceptions, would require the master, operator, or person in charge of a vessel to employ prescribed ballast water management practices for ballast water carried into the waters of the state from areas outside the exclusive economic zone, as defined. The bill would require those persons to take certain actions to minimize the uptake and release of nonindigenous species. The bill would require the master, owner, operator, agent, or person in charge of a vessel carrying ballast water into waters of the state after operating outside the exclusive economic zone to provide the State Lands Commission, and maintain on board the vessel, specified information.

The bill would require the State Lands Commission to take samples of ballast water and sediment and to take other action to assess the compliance of any vessel with prescribed requirements. The bill would prohibit, unless required by federal law, any state agency from imposing requirements different from those contained in the bill relating to the discharge of ballast water for the purpose of limiting the introduction of nonindigenous species prior to January 1, 2004. The bill would, on or before December 1, 2002, require the State Water Resources Control Board to evaluate alternatives for managing ballast water, as specified. The bill would require the Department of Fish and Game to conduct a study relating to resident nonindigenous species populations, as prescribed. The bill would, on or before September 1, 2002, require the State Lands Commission to submit to the Legislature, and make available to the public, a report relating to ballast water. The bill would require the state board, the State Lands Commission, and the Department of Fish and Game to conduct prescribed research.

The bill would subject a person who fails to comply with the ballast water management program required to be undertaken by the bill with prescribed civil penalties. The bill

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

would require the State Lands Commission to establish fees not to exceed $1,000 per vessel, as specified. The bill would require the money generated by the imposition of the fees and the penalties to be deposited in the Exotic Species Control Fund, which the bill would create. The money in the fund, upon appropriation by the Legislature, would be available to carry out the ballast water management program, as described above.

The provisions of this bill would be repealed on January 1, 2004.

Ch. 850 (AB 254) Cedillo. Health facilities: sale of assets.

(1) Existing law requires any nonprofit corporation that is subject to the Nonprofit Public Benefit Corporation Law and is a health facility, as defined, or is a facility that provides similar health care, to provide written notice to, and obtain the written consent of, the Attorney General prior to selling or otherwise disposing of a material amount of its assets to a for-profit corporation or entity or to a mutual benefit corporation or entity. Existing law requires the Attorney General to conduct one or more public meetings prior to issuing its decision whether to consent to the proposed agreement or transaction, and, in any case, to issue its decision within 60 days of the receipt of the written notice from the public benefit corporation, subject to one additional 45-day extension if necessary to obtain certain additional information. Existing law authorizes the Attorney General to contract with outside experts and consultants to assist the Attorney General in making its determination and requires the public benefit corporation to reimburse the Attorney General for all actual, reasonable, and direct costs incurred by the Attorney General in reviewing, evaluating, and making its determination.

This bill would instead make these requirements applicable to any nonprofit corporation that is subject to the Nonprofit Public Benefit Corporation Law and operates or controls a health facility or operates or controls a facility that provides similar health care, and to any foreign nonprofit corporation that operates or controls a health facility or a facility that provides similar care.

This bill would also require the Attorney General to make available to the public in written form the notice provided by the health facility and any other information provided to it under these provisions. It would also authorize the Attorney General to conduct an additional public meeting in specified circumstances prior to issuing its decision whether to consent to the proposed agreement or transaction and would expand the circumstances under which the Attorney General may extend the 60-day period of review for an additional 45 days.

This bill would also authorize the Attorney General to contract with outside experts and consultants to assist the Attorney General in monitoring ongoing compliance with the terms and conditions of the sale or transfer of assets, and would require the public benefit corporation to reimburse the Attorney General for all actual, reasonable, and direct costs incurred by the Attorney General in monitoring that ongoing compliance.

This bill would also enact similar provisions applicable to any nonprofit corporation of the type described above that wishes to sell or otherwise dispose of a material amount of its assets to a public benefit corporation or entity. It would also make certain technical, conforming changes.

(2) Existing law provides for the licensure of health facilities, including general acute care hospitals, by the State Department of Health Services, and makes a violation of those provisions subject to criminal sanction.

Existing law prohibits any member of the board of directors of a nonprofit health facility that is required to obtain the written consent of the Attorney General under existing law prior to the sale or transfer of its assets to a for-profit corporation or entity or mutual benefit corporation or entity, who negotiates the terms and conditions of the sale or transfer of assets, from receiving financial remuneration from the purchasing entity, subject to certain exceptions.

This bill would enact a similar prohibition with regard to the sale or transfer of assets by a nonprofit public benefit corporation that owns or operates a health facility to another public benefit corporation, and would define a transfer for these purposes to include the substitution of a new corporate member or members, in certain circumstances. By creating this new prohibition in the provisions governing health facilities, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 851 (AB 181) Zettel. Child day care: public recreation program.

Existing law, the California Child Day Care Facilities Act, provides for the licensure and regulation of child day care facilities. Existing law exempts from the act certain public recreation programs, including a program operated only during hours other than normal school hours for grades K–12, inclusive, in the public school district where the program is located, or operated only during periods when students in grades K–12, inclusive, are normally not in session in the public school district where the program is located, for under 16 hours per week.

This bill would establish, upon the approval of the City Council of San Diego, a 2-year pilot project known as the "6 to 6" program in San Diego County. The pilot project would consist of an extended schoolday program, meeting specified conditions, operated by a community-based organization, child care agency, or other entity pursuant to a contract with a public school district or the City of San Diego. The bill would repeal these provisions as of January 1, 2002.

Existing law requires the Department of Justice to maintain an index of child abuse reports submitted by child protective agencies of every case investigated by the agencies of known or suspected child abuse that is determined not to be unfounded.

Existing law requires the Department of Justice to make available to the State Department of Social Services, or the county licensing agencies that have contracted with the state for the performance of specified duties related to community care facilities and day care facilities, information maintained in the Child Abuse Central Index concerning any person who is an applicant for licensure or any adult who resides or is employed in the home of an applicant for licensure, who is an applicant for employment in a position having supervisory or disciplinary power over a child or children, or who will provide 24-hour care for a child or children in a residential home or facility, as specified.

This bill would authorize the City of San Diego for purposes of evaluating employees for the "6-to-6" program to receive, and would require the Department of Justice to make available to the city, child abuse index information concerning any person who has submitted an application for employment in the "6-to-6" program.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 852 (SB 747) Burton. Peace officer training.

(1) Existing law requires, except as otherwise provided, any specified law enforcement officer who is employed after January 1, 1975, to successfully complete a training course prescribed by the Commission on Peace Officer Standards and Training (POST) before exercising the powers of a peace officer. In order to standardize the training, the commission is required to develop a training proficiency testing program, including a standardized examination that enables comparisons between presenters of the training and development of a data base for subsequent training programs. Existing law also provides that the completion of the examination is not a condition of successful completion of the required training.

This bill would provide that the purpose of the training is also to ensure competent peace officers and would require that the testing program include comparisons between presenters of the training and assessments of trainee achievement. It would limit the use of the trainees' test scores as specified, and would require the commission to take all necessary steps to maintain the confidentiality of the test scores and testing materials. The bill would delete the above-mentioned provision that the completion of the examination is not a condition of successful completion of the required training and make passing these tests a requirement of the training. By increasing the duties of local officials, this bill would impose a state-mandated local program.

(2) Existing law generally prohibits the purchase, possession, and transportation of tear gas weapons, but permits persons licensed as private investigators or private patrol

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

operators, and uniformed patrolmen employees of private patrol operators to purchase, possess, or transport any tear gas weapon, if it is used solely for defensive purposes in the course of the activity for which the license was issued and if the person has satisfactorily completed a course of instruction in the use of tear gas approved by the Commission on Peace Officer Standards and Training.

This bill would instead provide for a course of instruction in the use of tear gas approved by the Department of Consumer Affairs.

(3) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 853 (SB 832) Committee on Public Safety. Criminal law.

(1) Existing law requires that sex education courses must satisfy specified criteria including the requirement that they provide advice to pupils that it is unlawful for males or females of any age to have sexual relations with males or females under 18 years of age to whom they are not married.

This bill would make technical, conforming, nonsubstantive changes to that provision.

(2) Existing law establishes an appellate division of the superior court consisting of 3 judges, or when the Chief Justice finds it necessary, 4 judges. Only 3 judges may participate in a hearing and the concurrence of 2 judges is necessary to render a decision in every case and to transact any other business except as specified.

This bill would provide an exception to this provision by authorizing one judge of the appellate division to hear appeals from convictions of traffic infractions.

(3) Existing law establishes in the judicial branch of state government, the California Habeas Resource Center and specifies the powers and duties of the center. One of those specified duties is to file motions seeking compensation for representation and reimbursement as pursuant to federal law and to transmit those payments to a special account in the General Fund as specified.

This bill would recast that provision and require that those payments be processed via the Federal Trust Fund.

(4) This bill would make technical corrections to a provision in the Health and Safety Code relating to the issuance of a prescription in an emergency situation.

(5) Existing law specifies the qualifications for a Good Driver Discount insurance policy.

This bill would make a clarifying change in that provision by revising a cross-reference.

(6) Under existing law, it is a crime for a judicial officer, court commissioner, or referee to commit any act that he or she knows, or should have known, perverts or obstructs justice or the due administration of the laws.

This bill would delete the element of should have known and the element of perverts or obstructs the due administration of the laws from the above-described crime.

By expanding the definition of a crime, this bill would impose a state-mandated local program.

(7) Existing law makes it a misdemeanor or a felony for every person to commit any assault upon specified governmental officials or the immediate family of any of those officials, in retaliation for or to prevent the performance of the official's duties.

This bill would add commissioner, referee, or other subordinate judicial officer of any court of record to the list of officials specified in the above provision. By increasing the definition of a crime, this bill would impose a state-mandated local program.

(8) Existing law requires the Attorney General to prepare and present to the Superintendent of Public Instruction on or before June 30, 1985, a handbook containing a complete summary of California penal and civil law as specified.

This bill would repeal that provision.

(9) Existing law authorizes a water district to employ a suitable security force that has the authority and powers conferred upon peace officers as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would make technical, conforming, and nonsubstantive changes to that provision.

(10) This bill would also make technical and nonsubstantive changes to other penal-related provisions.

(11) This bill would incorporate additional changes in Section 77 of the Code of Civil Procedure proposed by SB 210, to be operative if SB 210 and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

(12) This bill would incorporate additional changes in Section 51553 of the Education Code proposed by AB 246, to be operative if AB 246 and this bill are both enacted and become effective on or before January 1, 2000, and this bill is enacted last.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 854 (SB 1282) Lewis. Vehicles: violations.

(1) Existing law requires the driver of any vehicle involved in an accident resulting in injury or death to another person to immediately stop the vehicle at the scene of the accident and to fulfill specified requirements.

Under existing law, a violation of this provision is punishable as either a felony or a misdemeanor if the violation results in death or permanent, serious injury.

This bill would recast this provision to make a violation of this provision either a felony or a misdemeanor if the accident in which the driver was involved, rather than the failure to immediately stop the vehicle at the scene of the accident and fulfill specified duties, results in death or permanent, serious injury.

(2) Under existing law, if a person submitted to a blood or urine test in connection with a lawful arrest involving an alleged driving-under-the-influence violation, the peace officer is required to forward the results of that test to the appropriate forensic laboratory, and, in turn, the forensic laboratory is required to forward the results to the Department of Motor Vehicles.

This bill would provide that any document containing data prepared and maintained in the governmental forensic laboratory computerized data base system that is electronically transmitted or retrieved through public or private computer networks to or by the department is the best available evidence of the chemical test results in all administrative proceedings conducted by the department. The bill provide that, in order to be admissible as evidence in an administrative proceeding, a document described in this paragraph shall bear a certification by the employee of the department who retrieved the document certifying that the information was received or retrieved directly from the computerized data base system of a governmental forensic laboratory and that the document accurately reflects the data received or retrieved. This bill would provide that the failure of an employee to certify in accordance with the requirements of this paragraph is not a public offense.

The bill would make a conforming change in this provision to reflect other provisions enacted in 1998 regarding driving under the influence.

(3) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 855 (SB 1025) Johnson. Political Reform Act of 1974: lobbyists, lobbying firms, and lobbyist employers: website directory.

(1) Under existing provisions of the Political Reform Act of 1974, the Fair Political Practices Commission is required to administer and enforce the act, including, among other things, the publication of manuals and instructions explaining the duties of persons and committees under the act.

This bill would require the commission to annually publish a booklet setting forth the provisions of the act with other information the commission deems pertinent to the interpretation and enforcement of the act. The bill would require the commission to distribute copies, as specified, without charge to governmental agencies upon request, and would authorize the commission to charge a pro rata fee to other persons and organizations for copies of the booklet.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(2) Existing provisions of the Political Reform Act require lobbyists, lobbying firms, and certain lobbyist employers to register and file specified information with the Secretary of State. Within 140 days of the commencement of the regular session of the Legislature, the Secretary of State is required to publish a directory of registered lobbyists, lobbying firms, and lobbyist employers.

This bill would require the Secretary of State to establish and maintain on the Internet an online version of that directory, as specified, and to update that information weekly. The bill also would require the secretary to display on the Internet a list of the specific changes made to the directory during the 7 days preceding the update. The bill would prohibit the implementation of these provisions before July 1, 2001, unless otherwise authorized by a specific executive order.

(3) Existing provisions of the Political Reform Act of 1974 require certain candidates and committees to file specified campaign statements on specified dates.

This bill would make technical changes to these provisions.

(4) This bill would incorporate additional changes in Section 84200.5 of the Government Code, proposed by SB 762, to be operative only if SB 762 and this bill are both chaptered and become effective on or before January 1, 2000, and this bill is chaptered last.

(5) The Political Reform Act of 1974, an initiative measure, provides that the Legislature may amend the act to further the act's purposes with a $^2/_3$ vote of each house and compliance with specified procedural requirements.

This bill would declare that it furthers the purposes of the act, and would therefore require a $^2/_3$ vote.

Ch. 856 (SB 836) Figueroa. Advertising: truthfulness: referral services.

Under existing law, it is unlawful for any person licensed in the healing arts to disseminate or cause to be disseminated any form of public communication, as defined, containing a false, fraudulent, misleading, or deceptive statement or claim, for the purpose of inducing the rendering of professional services or furnishing of products in connection with the licensed person's professional practice or business, as specified. Existing law provides that a violation of these provisions is a misdemeanor.

This bill would extend the applicability of this prohibition to a false, fraudulent, misleading, or deceptive image and to specified claims. By expanding the definition of an existing crime, this bill would impose a state-mandated local program.

This bill would incorporate additional changes in Section 651 of the Business and Professions Code proposed by SB 450, to be operative if this bill and SB 450 are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 857 (AB 1627) Machado. School facilities: Tracy Joint Unified School District.

Existing law, the Leroy F. Greene School Facilities Act of 1998, authorizes the State Allocation Board to apportion funds to school districts for the purposes of new school facilities construction and the modernization of school facilities. Existing law requires the State Allocation Board to determine the maximum total new school construction grant eligibility of applicant school districts. The amount is based, in part, on the baseline and ongoing school building capacity.

This bill would, notwithstanding the provision regarding baseline school building capacity, authorize a school district newly formed or reorganized pursuant to an election that occurred on or after November 4, 1998, to calculate its existing school building capacity pursuant to regulations adopted by the State Allocation Board.

This bill would deem the number of pupils enrolled at the Delta Island Elementary School at the time of determining the existing school building capacity of the Tracy Joint Unified School District to be the number of pupils housed by grade level at the Delta Island Elementary School. The bill would also deem the number of pupils enrolled at the

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Delta Island Elementary School at the time of determining the ongoing eligibility for new construction of the Tracy Joint Unified School District to be the number of pupils housed by grade level at the Delta Island Elementary School and would prohibit that number from exceeding the assumed capacity calculated pursuant to existing law. The bill would make a declaration of special circumstances concerning the annexation of the Delta Island Union Elementary School District by the Tracy Joint Unified School District.

Ch. 858 (AB 695) Mazzoni. School facilities: construction and modernization.

Existing law, the Leroy F. Greene School Facilities Act of 1998, (the Greene Act of 1998) establishes a program in which the State Allocation Board is required to provide state per-pupil funding, including hardship funding, for new school facilities construction and school facilities modernization to applicant school districts, as defined, and requires applicants to provide local matching funds.

This bill would authorize the board to adopt or amend regulations on or after January 1, 2000, to adjust the assumed capacity for each teaching station used for nonsevere or severe special day class purposes after considering the recommendations of the Legislative Analyst required pursuant to existing law, which would be implemented upon approval of the Director of Finance.

This bill would authorize the board to adopt, on or after January 1, 2001, regulations establishing assumed capacity standards, after consideration of recommendations developed by the Director of Finance, for continuation high school, community day school, county community school, and county community day school, teaching stations. This bill would require adjustments pursuant to these regulations, or any other adjustments to the existing capacity related to changes in the assumed capacity of these teaching stations to be approved by the Director of Finance prior to implementation.

Existing law permits funding under the Greene Act of 1998 for projects approved pursuant to the state school facilities funding provisions operative prior to November 4, 1998, if certain conditions are met.

This bill would require the board to adopt regulations to offset funding provided under the previous school facilities funding provisions from grants under the Greene Act of 1998.

The Greene Act of 1998 requires school districts to make all necessary repairs, renewals, and replacements, to ensure that a project is at all times kept in good repair, working order, and condition, and requires that all costs incurred for this purpose be borne by the school district. Existing law requires the applicant school district to establish a restricted account for providing moneys for ongoing and major repair of the facilities, and to agree to annually deposit at least 3% of the school district's general fund budget for a period of 20 years.

This bill would require the 3% maintenance requirement to be calculated, for the purposes of a county office of education, based upon the county office of education general fund less any restricted accounts.

Existing law relating to the formation of school facilities improvement district, authorizes the governing board of the school district to provide for and call a special bond election within the school facilities improvement district to submit to the voters a proposition on whether to incur debt and issue bonds, and prohibits elections from being held within 45 days before or after a statewide election, unless conducted at the statewide election.

This bill would repeal provisions prohibiting an election within the 45-day period before or after a statewide election, and would permit the election to be called for any date, except as specified.

Existing law provides specific dates on which elections are required to be held, but exempts certain elections from those requirements, including but not limited to, elections relating to school bonds.

This bill would specifically exempt from those provisions elections relating to school facility improvement districts.

Existing law requires the calculation of existing pupil capacity to be made on a one-time basis as a baseline for eligibility determinations, and requires each participating school district to submit to the board a one-time report of existing school building capacity.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would, notwithstanding those provisions, require a school district newly formed reorganized, or affected by reorganization pursuant to an election that occurred on or after November 4, 1998, to calculate its existing school building capacity pursuant to regulations adopted by the State Allocation Board.

Existing law sets forth the manner in which the board shall determine each applicant school district's maximum total new construction per-pupil grant eligibility.

This bill would, until January 1, 2003, authorize the board to approve a new construction supplemental apportionment not to exceed $7,500, and a modernization supplemental apportionment not to exceed $2,500, for a school having an enrollment of 2,500 or less for the prior fiscal year. The bill would require the board to adjust these amounts in 2000 and every 2 years thereafter.

Existing law, the Class Size Reduction Kindergarten-University Public Education Facilities Bond Act of 1998, (the School Bond Act of 1998) authorizes the issuance and sale of bonds and the use of the revenues, in part, for the purposes of the Greene Act of 1998.

The School Bond Act of 1998 authorizes not less than $700,000,000 to be allocated, commencing with the 1998–99 fiscal year, to assist school districts with site acquisition and facilities-related costs of kindergarten and grades 1 to 3, inclusive, that are participating in a class size reduction program pursuant to prescribed provisions of law.

Existing law requires funds not expended pursuant to these provisions to be allocated to school districts that request prescribed funding for teaching stations that were displaced.

This bill would, instead, authorize that the unexpended funds be allocated in this manner.

Existing law authorizes the governing board of a school district to impose an amount calculated pursuant to a prescribed formula in lieu of amounts that may be imposed upon residential construction pursuant to prescribed provisions of law, and with certain exceptions, requires that these amounts be expended solely on school facilities identified as being attributable to projected growth from the construction of new residential units. Existing law limits site development costs for these purposes to 2 times the amount funded by the State Allocation Board.

This bill would recast those provisions and would make this limitation applicable to expenditure of fees assessed pursuant to provisions permitting increased fees when state funds for new school construction are not available. The bill would limit site development costs for these purposes to the estimated amount that would be funded by the State Allocation Board pursuant to its regulations.

Existing law requires the governing board of a school district to conduct a facility needs analysis for this purpose, and permits its revision at any time.

This bill would require recalculation of the school building capacity for those purposes as part of any revision of the needs analysis.

Ch. 859 (AB 582) Firebaugh. Multipurpose Senior Services Program.

Existing law, the Mello-Granlund Older Californians Act, establishes the Multipurpose Senior Services Program to provide specified services to frail elderly individuals 65 years of age and older who are certifiable for placement in a nursing facility. Existing law requires the California Department of Aging to formulate criteria for approval and designation of local Multipurpose Senior Services Program sites.

This bill would revise the criteria required for approval and designation of program sites, and would specify that it is the intent of the Legislature, in enacting this program, to provide access to social and health services by providing information and outreach activities in the community.

Ch. 860 (SB 587) Burton. Alcoholic beverages.

The Alcoholic Beverage Control Act licenses and regulates beer manufacturers and wholesalers.

This bill would provide that a provision in an agreement between a beer manufacturer and a beer wholesaler for the sale and distribution of beer in this state, which restricts venue to a forum outside this state, is void with respect to any claim arising under or relating to the agreement involving a beer wholesaler operating within this state.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 861 (SB 569) Alarcon. Employment of persons with disabilities.

Existing law creates various employment programs for persons with disabilities under the jurisdiction of the Department of Rehabilitation.

This bill would establish a 3-year pilot program under which the department would be required to allocate funds to a private, nonprofit organization in Los Angeles County that has demonstrated the ability to provide assessment and vocational services to disabled clients for over a period of at least 50 years, for operation of an employment program for persons with disabilities meeting specified requirements.

This bill would appropriate $115,000 from the General Fund to the department for allocation for startup costs and first-year implementation of the program.

Ch. 862 (SB 928) Burton. Transportation: financing.

Existing law requires that all money in the State Highway Account in the State Transportation Fund derived from federal sources or from appropriations to other state agencies, or deposited in the account by local agencies or by others, be continuously appropriated to, and be available for expenditure by, the Department of Transportation for the purposes for which the money was made available. Unless otherwise expressly provided for by law, none of the balance of the money in the account may be expended until it has been specifically appropriated by the Legislature.

This bill would continuously appropriate the amounts specified in the Budget Act as having been deposited in the account from federal transportation funds and pledged by the California Transportation Commission, as specified below, to the Treasurer for the purposes of issuing federal highway grant anticipation notes, as specified, to fund transportation projects selected by the commission. The bill thereby would make an appropriation.

The bill would require the commission, in order to provide security for the repayment of the notes, to adopt a resolution dedicating and pledging any future receipts of federal transportation funds to the payment of the notes. Upon taking that action, the commission would be authorized to request the Treasurer to issue the notes.

The bill would require the Treasurer to issue the notes pursuant to the commission's resolution and would require the proceeds from the sale of the notes to be deposited in the Transportation Financing Subaccount, which the bill would create in the account. The funds in the subaccount would be available for use as directed by the commission and administered by the Department of Transportation and to pay costs associated with the issuance of the notes.

The bill would provide that the notes may not be deemed to constitute a debt or liability of the state or any political subdivision thereof, or a pledge of the full faith and credit of the state or any political subdivision thereof, but shall be paid solely from the funds and revenues pledged for that purpose.

The bill would limit the eligible projects to transportation projects that have been designated for accelerated construction by the commission.

Ch. 863 (SB 661) Alarcon. Economic development lenders.

Existing law establishes the California Industrial Development Financing Advisory Commission to, among other things, assist industrial development authorities in the planning, preparation, marketing, and sale of industrial development revenue bonds.

This bill would require until January 1, 2005, that the commission establish procedures to evaluate and certify the participation of economic development lenders, as defined, in a program that allows those lenders to recapitalize their financial resources to meet current demands of borrowers by pledging as collateral loans to the commission in exchange for cash liquidity. This bill would also require other activities to be undertaken by the commission, but only to the extent funds are appropriated by the Legislature for those purposes. This bill would give the commission the authority to issue public debt in the form of bonds, and the power to secure those bonds with the loans pledged to the commission by economic development lenders. The bill would establish the Community and Economic Development Fund in the State Treasury and provide that the fund shall be continuously appropriated to the commission for purposes of the bill. Revenue generated through the sale of bonds secured by loans pledged to the commission by economic development lenders would be available to recapitalize the Community and

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Economic Development Fund or a reserve fund. By establishing this continuously appropriated fund, and by providing the mechanism to enable moneys to flow into the fund, this bill would make an appropriation.

Ch. 864 (SB 703) Poochigian. Veterans: World War II Memorial.

(1) Previous state law authorized the construction of a memorial to all California veterans on the grounds of the State Capitol. Provisions of federal law authorize the construction of a World War II Memorial in Washington, D.C.

This bill would appropriate $1,032,000 from the General Fund to the Department of Veterans Affairs for allocation, as specified, for the construction of the World War II Memorial in Washington, D.C. in honor of Californians who served their country in that war.

(2) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 865 (SB 1302) Committee on Revenue and Taxation. Sales and use taxes: fuel taxes.

The Sales and Use Tax Law requires the filing of sales and use tax returns by sellers and other persons, as specified.

This bill would authorize the board to accept the electronic filing of those returns, and would clarify that the maximum penalty with respect to certain electronic funds transfers shall be limited to 6%.

The Sales and Use Tax Law defines a retailer engaged in business in this state to include certain retailers soliciting orders for property by means of telecommunication or television shopping systems and certain retailers having a franchisee operating under its trade name if the franchisee is required to collect the tax.

This bill would eliminate those retailers from that definition.

The Sales and Use Tax Law limits the amount the board may charge for administering a local special taxing jurisdiction's transactions and use taxes and to submit a report to the Legislature in connection thereof.

This bill would correct technical errors in those provisions and extend the time to submit that report.

The Sales and Use Tax Law provides that the sales tax prepayment rate for jet and diesel fuel shall be determined based on the sales tax prepayment rate calculated for gasoline, less $1^1/_2¢$ per gallon.

This bill would authorize an independent computation of the jet and diesel fuel sales tax prepayment rates.

The Motor Vehicle Fuel License Tax Law provides, among other things, specified exemptions from the license taxes imposed, and specified procedures regarding overpayments and refunds.

This bill would provide that a distributor who is licensed under the Motor Vehicle Fuel License Tax Law and is authorized by the board to acquire exempt motor vehicle fuel from a distributor who has furnished the requisite security, and who paid tax reimbursement to a distributor who is not authorized by the board to acquire exempt motor vehicle fuel pursuant to those security provisions, may not seek tax reimbursement from another distributor who is authorized by the board to acquire exempt motor vehicle fuel pursuant to the security provisions, but would permit the distributor to seek a refund, pursuant to a specified provision, of the tax reimbursement it paid to the distributor who is not authorized by the board to acquire exempt motor vehicle fuel.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 866 (AB 1152) Ackerman. Courts: funding: public guardians.

Existing law requires a probate court to determine the just and reasonable compensation of the public guardian, the attorney of the public guardian and the processing and filing services of the county clerk or clerk of the superior court, to be paid from the estate of a ward or conservatee.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the court, in making this determination, to consider specified factors, but would not require a public guardian to base a request for compensation upon an hourly rate.

Ch. 867 (SB 668) Sher. Uniform Child Custody Jurisdiction and Enforcement Act.

Existing law, known as the Uniform Child Custody Jurisdiction Act, specifies procedures and requirements for the exercise of jurisdiction by California courts in matters of child custody where the courts of another state may also have, or have previously exercised, jurisdiction.

This bill would repeal this act and replace it with a new act, to be known as the Uniform Child Custody Jurisdiction and Enforcement Act. This new act would alter existing law in the following areas, among others:

(1) Existing law provides that a California court has jurisdiction to make a child custody determination, as defined, by initial or modification decree, in any of specified situations, including that it is in the best interest of a child who has specified connections with this state, or that the child is physically present in the state and it is necessary in an emergency to protect the child for certain reasons.

This bill would instead provide an exclusive jurisdictional basis for making an initial child custody determination. The bill would permit a California court to assume temporary emergency jurisdiction in specified circumstances and would provide that the jurisdiction of a California court over any custody determination, other than temporary emergency jurisdiction, is exclusive and continuing until specified events occur. It would prohibit modification of a custody decision made pursuant to this uniform act by the courts of another state in the absence of specified determinations.

(2) Existing law permits a court to decline to exercise its jurisdiction if it determines that it is an inconvenient forum and a court in another state is a more appropriate forum.

This bill would revise and recast the factors to be considered by the court in determining if it is an inconvenient forum.

(3) Existing law permits a California court to decline to exercise its jurisdiction if the petitioner has wrongfully taken the child from another state or engaged in similar reprehensible conduct.

This bill would create specified exceptions to the court's right to decline to exercise its jurisdiction and authorize the court, if it so declines, to fashion appropriate remedies to ensure the child's safety and prevent a repetition of the unjustifiable conduct, as specified.

(4) Existing law requires California courts to recognize and enforce out-of-state child custody decrees subject to specified conditions and provides for the maintenance of a registry of those custody decrees and other documents by superior court clerks.

This bill would expand the provisions relating to the enforcement of out-of-state child custody decrees and would, among other things, authorize the court to issue a warrant to take physical custody of a child in specified circumstances, and authorize a district attorney to take all necessary actions to locate and return a child under certain circumstances. The bill would also revise and recast the list of documents to be included in the registry of out-of-state custody orders, require the provision of specified notice to persons who may contest the registration, as specified, and require that the registering party submit a statement under penalty of perjury that the order has not been modified.

This bill would require the Judicial Council to report to the Legislature by January 1, 2003, on the effect of the implementation of the Uniform Child Custody Jurisdiction and Enforcement Act in this state.

Because this bill would expand the crime of perjury, and because it would impose new duties on court clerks, it would create a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

NOTE: Superior numbers appear as a separate section at the end of the digests.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 868 (SB 374) Lewis. Insurance claims: priorities: life insurers.

(1) Existing law creates the California Insurance Guarantee Association and the California Life and Health Insurance Guarantee Association, which are associations established to insure the obligations of insurers that become insolvent. Existing law also sets forth the priorities for the payment of claims from the assets of insolvent insurers, including certain claims made by these associations, but excluding certain categories of claims that are not covered claims for the purposes of payment by those associations.

This bill would revise the categories of claims of these associations that are excluded from priority for payment. This bill would also add various other specified claims as eligible for payment at the end of the priority list, subject to certain conditions.

(2) Existing law defines "eligible members," for the purposes of conversion of a mutual life insurer, as those members who are of record on the insurer's adoption date and on its effective date.

This bill would delete the reference to the insurer's effective date.

(3) Existing law requires the Insurance Commissioner to adopt a regulation concerning the minimum standards applicable to the valuation of disability insurance.

This bill, with respect to life insurance, would authorize the commissioner to issue a bulletin and adopt regulations to provide tables of select mortality factors and rules for their use, and various other rules relative to the valuation of certain life insurance plans, as specified.

(4) Existing law, until January 1, 2000, provides for the regulation of the illustration of life insurance policies in order to protect consumers and foster consumer education in this regard.

This bill would delete the January 1, 2000, termination date applicable to these provisions, thereby extending these provisions indefinitely.

(5) Existing law provides that a plan of conversion adopted by a converting mutual life insurer shall include certain elements relative to the rights of certain affected parties and interests, as specified.

This bill would set forth an alternative plan of conversion that may be adopted by a converting mutual life insurer.

(6) Existing law requires the commissioner to examine a plan of conversion submitted by a mutual life insurer or mutual holding company and to take certain action with respect to the conversion. For the conversion of a mutual life insurer, the commissioner may appoint one or more consultants or legal counsel, as specified, to advise the commissioner, the costs of which are paid along with other associated costs by the mutual life insurer.

This bill would provide that these provisions also apply to the conversion of a mutual holding company.

Ch. 869 (AB 297) Thomson. Surface mining.

(1) Existing law, the Surface Mining and Reclamation Act of 1975, governs surface mining operations and reclamation of mined lands, and provides, among other things, for the submission of reclamation plans to, and issuance of permits by, lead agencies to persons engaging in surface mining operations.

This bill would provide that, until December 31, 2003, a site specific plan in conjunction and consistent with the Cache Creek Resource Management Plan shall be considered to be a functional equivalent of a reclamation plan for purposes of the act. The bill would specify that no other reclamation plan shall be required to be reviewed and approved for any excavation project that is conducted in conformance with an approved site specific plan that is consistent with the Cache Creek Resource Management Plan and the standards specified in that plan governing erosion control, channel stabilization, habitat restoration, flood control, or infrastructure maintenance, if the Cache Creek Resource Management Plan is reviewed and approved by a lead agency pursuant to the act. The bill would also provide that nothing in the bill shall preclude an enforcement

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

action if the lead agency or the director determines that a surface mining operator, acting under the authority of the Cache Creek Resource Management Plan, is not in compliance with the act.

The bill would require the department to convene a multiagency task force, including specified members, and would require the task force, not later than January 1, 2001, to recommend to the Secretary of the Resources Agency, any revisions to the act or any other provision of law necessary to incorporate regional resource management plans in the state's regulation of in-stream mine reclamation. However, the bill would provide that the department shall only convene the task force if the costs associated with the operation of the task force will not diminish the department's ability to provide reclamation plan review, financial assurance review, and field inspections, and undertake other enforcement actions and provide local assistance to cities or counties under the act.

The bill would provide that the aforementioned provisions shall not become operative until such time that the State Mining and Geology Board approves the County of Yolo implementing ordinance governing in-channel noncommercial extraction activities carried out pursuant to the Cache Creek Resource Management Plan and notifies the Secretary of State in writing of that approval.

The act also requires the Department of Conservation to have submitted a report to the Governor and the Legislature, on or before March 1, 1995, evaluating the implementation of that act.

This bill would repeal that requirement and would make conforming and technical changes.

The act requires the owner, lessor, lessee, agent, manager, or other person in charge of any mining operation of whatever kind or character within the state to forward to the Director of Conservation annually not later than a specified date, a report containing specified information relating to the mining operation.

The bill would require the board of supervisors of the county in which the Cache Creek Resource Management Plan is to be implemented to prepare that report. By requiring a local government agency to take specified actions with respect to the preparation of that report, the bill would impose a state-mandated local program.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 870 (AB 1695) Committee on Consumer Protection, Governmental Efficiency and Economic Development. State property.

Existing law requires the Department of General Services to perform various functions and duties with respect to state property.

This bill would authorize the Director of General Services to sell, exchange, lease, or transfer specified parcels of state property and rescind the existing authority of the director to sell, exchange, or lease other specified parcels of state property. This bill also would authorize the Director of Parks and Recreation to exchange a specified parcel of state property. The bill would exempt the sale, exchange, lease, or transfer of the parcels from specified provisions of the California Environmental Quality Act. This bill would designate funds into which the net proceeds are to be deposited and would require the reservation of mineral rights, as specified.

Ch. 871 (AB 1381) Steinberg. Property and Business Improvement District Law of 1994: benefits assessments.

(1) Article XIII D of the California Constitution, which was added pursuant to the approval by the voters of Proposition 218 at the November 5, 1996, general election, generally requires a specified written notice and the holding of a public hearing for new or increased assessments, fees, and charges and, under certain circumstances, requires approval by the property owners. The Proposition 218 Omnibus Implementation Act prescribes specific procedures and parameters for local jurisdictions in complying with Article XIII D of the California Constitution.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The Property and Business Improvement District Law of 1994 authorizes cities to form property and business improvement districts for the purpose of levying assessments within a business improvement area.

This bill would reorganize those provisions to require a written notice and a public hearing, as specified in the Proposition 218 Omnibus Implementation Act.

(2) Existing law requires a city council, before adopting a resolution establishing a district, to appoint an advisory board to make recommendations and reports concerning the levying of assessments, as specified.

This bill, in addition and among other things, would provide that the first report is due after the first year of operation of the district.

(3) Existing law, upon the written request of the advisory board, authorizes the city council to modify the management district plan by adopting a resolution after holding hearings on the proposed modification, as specified.

This bill instead would require one public hearing to be held prior to adopting the resolution. The bill also would require the city council, if the modification includes the levy of a new or increased assessment, to comply with specified provisions of the Government Code relating to notice, protest, and hearing requirements.

(4) Existing law prohibits the city council from changing the boundaries of the district to include any territory that will not, in its judgment, benefit by the improvement or activity. Additions of territory to the proposed boundaries of the district are prohibited unless notice has been provided to the owners of the property proposed to be added to the district, as specified.

This bill would delete those prohibitions.

(5) Existing law requires the city council to adopt a resolution of intention that states the proposed modification prior to the public hearing which is required to be held not more than 60 days after the adoption of the resolution of intent.

This bill instead would require the public hearing to be held not more than 90 days after the adoption of the resolution of intent.

Ch. 872 (AB 1154) Torlakson. School safety.

Existing law, the Interagency School Safety Demonstration Act of 1985 establishes the School/Law Enforcement Partnership comprised of the Superintendent of Public Instruction and the Attorney General, and sets forth its duties, including, but not limited to, the administration of interagency safe school programs, procedures, and activities conducted pursuant to the School Safety Act.

This bill would require the partnership to discuss with providers of telephone equipment and services, and to acquire information regarding, the availability of no-cost or reduced-cost cellular telephones and services to be provided on a statewide basis to each public school teacher for use as a classroom safety device and other school-related uses, and would require the partnership to ensure that schools are provided with this information for consideration in developing its plan.

Existing law establishes the After School Learning and Safe Neighborhoods Partnerships Program, which serves pupils in kindergarten and grades 1 to 9, inclusive, at participating elementary, middle, and junior high school sites. Under existing law, every after school program established pursuant to the program is required to operate a minimum of 3 hours a day and at least until 6 p.m. on every regular schoolday.

This bill would authorize after school programs established pursuant to the After School Learning and Safe Neighborhoods Partnerships Program for pupils in middle school or junior high school to implement a flexible attendance schedule for those pupils.

Under existing law, every school that establishes a program pursuant to the After School Learning and Safe Neighborhoods Partnerships Program is eligible to receive a 3-year renewable incentive grant for up to $5 per day per pupil.

This bill would, alternatively, authorize a school that establishes a program serving middle or junior high school pupils to elect to receive $5 per pupil for each 3 hours of pupil attendance, with a maximum total reimbursement of $25 per pupil per week.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 873 (AB 1686) Committee on Information Technology. Department of Information Technology.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Existing law provides for the development and coordination of information technology activities in the state, and for these purposes establishes the Department of Information Technology, the Hawkins Data Center, the Stephen P. Teale Data Center, which is funded by the continuously appropriated Stephen P. Teale Data Center Revolving Fund, and the Health and Welfare Agency Data Center, which is funded by the continuously appropriated Health and Welfare Agency Data Center Revolving Fund. These provisions become inoperative on July 1, 2000, and are repealed as of January 1, 2001.

This bill would extend the dates on which these provisions are to become inoperative to July 1, 2002, and are to be repealed to January 1, 2003. By continuing the existence of continuously appropriated funds, this bill would make an appropriation.

(2) Existing law renames the Health and Welfare Agency as the California Health and Human Services Agency.

This bill would correct obsolete references to the Health and Welfare Agency, rename the Health and Welfare Agency Data Center as the California Health and Human Services Agency Data Center, and rename the Health and Welfare Agency Data Center Revolving Fund as the California Health and Human Services Data Center Revolving Fund.

Ch. 874 (AB 1385) Battin. Indian tribes: tribal-state gaming compacts.

Existing federal law, the Indian Gaming Regulatory Act of 1988, hereafter IGRA, provides for the negotiation and execution of tribal-state gaming compacts for the purpose of authorizing class III gaming, as defined, on Indian lands within a state. Existing federal law does not specify which official of a state shall negotiate and execute these compacts. Existing state law provides that the Governor is the sole official organ of communication between the government of this state and the government of any other state or of the United States, but currently operative law does not specifically designate the Governor as the sole organ of communication between this state and a tribal government.

This bill would expressly ratify a number of specified tribal-state gaming compacts, and would provide that any other compact executed after September 10, 1999, is also ratified if certified by the Governor to be materially identical to one of these compacts, subject to review and possible rejection by the Legislature. The bill would require other compacts to be ratified by statute, as specified. The bill would provide that the Governor is the designated state officer responsible for negotiating and executing, on behalf of the state, tribal-state gaming compacts with federally recognized Indian tribes located within the State of California pursuant to IGRA for the purpose of authorizing class III gaming on Indian lands within this state and would provide that these provisions shall not be construed to deny the Governor's authority to have previously negotiated and executed these compacts. This bill would require the Governor, following completion of negotiations, to submit a copy of the executed compact to the Legislature for its ratification, and to the Secretary of State, who would be required to forward a copy of the executed compact and ratifying statute, if applicable, to the Secretary of Interior in accordance with a specified provision of IGRA upon his or her receipt of the statute ratifying the tribal-state compact or upon expiration of a specified review period. The bill would provide that the execution of, and the on-reservation impacts of compliance with the terms of, these compacts, shall not be deemed to constitute a project for purposes of the California Environmental Quality Act. The bill would also create a special fund within the State Treasury for the receipt and deposit of moneys derived from gambling device license fees that are received from tribes pursuant to the terms of tribal-state gaming compacts, for the purpose of making distributions to noncompact tribes, and would provide that moneys in that fund shall be available to the California Gambling Control Commission, upon appropriation by the Legislature, for expenditure for that purpose. The bill would also create a separate fund in the State Treasury for receipt and deposit of moneys received from tribes pursuant to the terms of tribal-state gaming compacts, and would provide that these moneys would be available for appropriation by the Legislature, as specified.

Ch. 875 (AB 1314) Pescetti. Public contracts: plans and specifications.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law contains various provisions relating to the bidding process for public works projects.

This bill would impose a state-mandated local program by prohibiting a local public entity, charter city, or charter county from requiring a bidder to assume responsibility for the completeness and accuracy of architectural or engineering plans and specifications on public works projects, except on clearly designated design build projects, and would make legislative findings and declarations in that regard.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 876 (AB 248) Torlakson. Natural Hazard Disclosure Statements.

Existing law requires certain information to be disclosed by transferors and their agents to prospective transferees prior to specified transfers of residential real property. Existing law also requires these transferors and their agents, when specified conditions are met, to make certain disclosures, on a form known as a Natural Hazard Disclosure Statement, if the real property to be transferred is located in an earthquake fault zone, or an area subject to flooding, fire hazards, or seismic hazards.

This bill would reorganize these provisions and make technical changes with respect to Natural Hazard Disclosure Statements. The bill would also require certain sellers of residential real property who have actual knowledge that the property is affected by or zoned to permit certain manufacturing, commercial, or airport uses to give written notice of that knowledge, as soon as practicable before transfer of title.

Ch. 877 (AB 402) Romero. Vehicles: driver's license violations pilot program.

Chapter 122 of the Statutes of 1999 (AB 1311), effective January 1, 2000, and until January 1, 2004, authorizes the district attorneys of certain counties, with the approval of the board of supervisors, to establish a described pilot program for persons who plead guilty or no contest or are convicted of violations of specified provisions prohibiting driving without a valid driver's license.

This bill would add the County of Santa Cruz to those counties authorized to establish, until January 1, 2004, the described pilot program.

Ch. 878 (AB 344) Knox. Education: academic personnel files.

Existing law requires employers to make employee personnel files available for inspection by employees, as specified.

This bill would authorize an institution of higher education to provide academic employees access to academic peer review records in a form that does not reveal the identity of any reviewer. The bill would exempt material that is part of an academic performance evaluation of an academic employee of an institution of higher education from a requirement that employers remove specified adverse material from an employee's personnel file. These provisions would only become operative if SB 172 is chaptered and becomes operative on or before January 1, 2000.

Ch. 879 (AB 635) Campbell. Food facilities.

Existing law imposes certain sanitation requirements on food facilities that are administered by the State Department of Health Services and enforced by local health officers, among others. Under existing law, a violation of any of these provisions is punishable as a misdemeanor.

Existing law requires raw eggs to be stored under specified conditions commencing January 1, 1998, and until January 1, 2000.

This bill would delete those dates thereby continuing the applicability of the requirements for egg storage indefinitely. By extending the enforcement duties

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

performed by local health officers, this bill would impose a state-mandated local program.

Existing law imposes various requirements on nonprofit charitable temporary food facilities including that all food be prepared in a food establishment or on the premises of a nonprofit charitable temporary food facility. Existing law also prohibits any food or beverage stored or prepared in a private home from being offered for sale, sold, or given away from a nonprofit charitable temporary food facility.

This bill would revise these provisions to prohibit any potentially hazardous food or beverage stored or prepared in a private home from being offered for sale, sold, or given away from a nonprofit charitable temporary food facility, and would require this food to be prepared in a food establishment or on the premises of a nonprofit charitable temporary food facility.

Existing law imposes various requirements on nonprofit charitable temporary food facilities with regard to the condition of the floors, walls, and ceilings of the facility. Existing law also requires each local enforcement agency to annually report to the department regarding the adequacy of the standards applied by specified sanitation provisions to any nonprofit charitable temporary food facilities operating within its jurisdiction, and requires the department to review these reports and confer with the California Conference of Directors of Environmental Health and with affected industry groups.

This bill would repeal the above requirements.

Existing law, until January 1, 2001, contains cooking requirements relating to ready-to-eat foods prepared from raw or incompletely cooked animal tissues.

This bill would revise these requirements and would delete that repeal date thereby continuing the applicability of these requirements indefinitely.

The bill would, among other things, revise employee food handling and food facility sanitation provisions, and would revise and recast provisions relating to mobile food preparation units, stationary mobile food preparation units, and commissaries.

By changing the definition of, and eliminating, certain existing crimes relating to retail food facilities, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

Ch. 880 (SB 652) Speier. Vehicles: financial responsibility.

(1) Existing law provides that records of the Department of Motor Vehicles are generally open to public inspection. However, with specified exceptions, any residence address in any record of the department is confidential.

This bill would provide that information regarding any motor vehicle liability insurance policy or surety bond provided to the department pursuant to the provisions below or electronically is confidential and shall not be disclosed to any person, with limited exceptions. Because a violation of this prohibition would be a crime under existing law, this bill would create a new crime, thereby imposing a state-mandated local program.

(2) Existing law requires persons who obtain confidential or restricted addresses pursuant to law to require their agents to take necessary steps to ensure confidentiality.

This bill would expand the confidentiality to any confidential or restricted information, thereby expanding the scope of an existing crime and imposing a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law requires all drivers to maintain one of various forms of financial responsibility, including liability insurance, and to provide proof of financial responsibility to a peace officer in various circumstances.

Existing law, until January 1, 2000, requires the Director of Motor Vehicles, if the operation of any of the current provisions governing financial responsibility is delayed or interrupted by the action of a state or federal court and the constitutionality of the provision is upheld by a final decision of the court, to calculate what amount of time the operation of the provision was delayed or interrupted by the court's action, add the amount calculated to January 1, 2000, to determine a new repeal date for the challenged provision, and notify the Secretary of State in writing of the new repeal date.

This bill would repeal these latter provisions, thereby extending indefinitely certain provisions of existing law relating to financial responsibility, as proposed to be revised by the bill.

(4) Under existing law, the department is required to require an applicant for renewal of a motor vehicle registration to submit a specified form, as developed by the department, regarding the applicant's motor vehicle liability insurance or provide certain documentation regarding alternative evidence of financial responsibility.

This bill instead would require the department to require each applicant for renewal of a motor vehicle registration to submit either a form approved by the department, but issued by the insurer, containing specified information, or any one of specified documents as evidence of coverage under an alternative form of financial responsibility that may be provided by the applicant.

(5) Existing law does not provide for the suspension, cancellation, or revocation of the registration of a vehicle based upon whether the registration was attained by providing false evidence of financial responsibility or upon notification by an insurance company that the required coverage has been canceled, as specified.

This bill would authorize the department to take that action and would provide a procedure for the reinstatement of a registration that has been suspended, canceled, or revoked.

(6) Under existing law, upon demand of a peace officer under specified circumstances, every person who drives upon a highway a motor vehicle that is required to be registered in this state is required to provide evidence of financial responsibility, as defined. A violation of this provision is a crime that is punishable by specified fines.

This bill would recast that provision to provide that, upon demand by a peace officer, every person who drives a motor vehicle upon a highway is required to provide evidence of financial responsibility for the vehicle that is in effect at the time the demand is made. Since the bill would expand the scope of this crime, the bill would impose a state-mandated local program. The bill would also revise the definition of "evidence of financial responsibility" for these purposes.

The bill would decrease the fines for a violation of this provision, but would require a court to impose a fine that is greater than the minimum fine provided unless the defendant has presented the court with evidence of financial responsibility, as defined, in addition to the written certificate of an insurance carrier that meets specified requirements. The bill would additionally authorize the court to issue an order directing the defendant to maintain insurance coverage satisfying the financial responsibility laws for at least one year from the date of the order.

The bill would provide that the imposition of the fine is mandatory upon conviction of a violation of the financial responsibility provision and may not be waived or suspended unless the court in its discretion reduces or waives the fine based on the defendant's ability to pay. The bill would authorize the court to direct that the fine be paid within a limited time or in installments on specified dates.

(7) Existing law makes it a crime for any person to knowingly provide false evidence of financial responsibility under specified circumstances by using certain listed false documents, imposes certain duties on the courts in connection with a conviction of that offense, authorizes the court to suspend a person's driving privilege, and allows the court to restrict the person's driving privilege rather than suspend the privilege, if the driving of a motor vehicle is required in the person's course of employment.

This bill would (a) include a false self-insurer certificate as one of the documents that apply to the above, (b) revise the duties of the court and the department in connection

NOTE: Superior numbers appear as a separate section at the end of the digests.

with a conviction of the offense, and (c) require the department, rather than the court, upon receipt of the court's abstract of conviction, to suspend the driving privilege for a one-year period, effective upon the date of the conviction.

(8) The bill would provide that its provisions shall become operative only if SB 171 and SB 527 are enacted and become operative on or before January 1, 2000.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 881 (AB 1659) Committee on Human Services. Care facilities.

Existing law requires a county to obtain an assessment and placement recommendation by a county multidisciplinary team, as defined, prior to placement of a child in an out-of-state group home facility.

This bill would require participants to have knowledge or experience in the prevention, identification, and treatment of child abuse and neglect cases, and to be qualified to recommend a broad range of services related to child abuse and neglect.

Existing law contains fingerprint requirements for foster family homes and operators and employees of community care facilities.

This bill would make various changes in these fingerprint requirements, as well as related criminal background and licensure requirements, including a requirement that applicants and employees submit a second set of fingerprints to the Department of Justice for use by the Federal Bureau of Investigation for the purpose of searching its criminal records information, and would provide for the assessment of civil penalties for violation of this requirement. It would also modify the duties of the Department of Justice and the State Department of Social Services in connection with the implementation of these provisions.

Because a violation of licensure provisions is a crime, the bill would impose a state-mandated local program.

Existing law requires that, unless the State Department of Social Services grants an exemption, a license shall be denied for the operation of a residential care facility for the elderly if specified persons have been found to have committed a crime, with certain exceptions. Among the staff persons, volunteers, or employees whose criminal convictions to which this provision applies are those who have frequent and routine contact with clients.

This bill would delete the reference to frequent and routine contact, and thus only require that these individuals have contact with clients.

Because violation of provisions relating to residential care facilities for the elderly is a crime, the bill would constitute a state-mandated local program.

Existing law, the California Child Day Care Act, requires that, prior to issuing a license or special permit to operate or manage a day care facility, the State Department of Social Services secure a criminal record to determine whether the applicant or specified employees has ever been convicted of specified crimes.

Existing law contains certain exemptions from these provisions.

This bill would revise the exemptions relating to certain volunteers.

Existing law prohibits a court from ordering the placement of certain minors in an out-of-state group home unless the court finds, in its order of placement, that specified conditions have been met.

This bill would add to those conditions a requirement that in-state facilities have been determined to be unavailable or inadequate to meet the needs of the minor.

Existing law requires the State Department of Social Services to perform initial and continuing inspection of out-of-state group homes in order to either certify that the out-of-state group home meets all licensure standards required of group homes operated in California or that the department has granted a waiver to a specific licensing standard upon a finding that there exists no adverse impact to health and safety. Existing law further requires the department to grant or deny an initial certification or a waiver by August 19, 1999.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would require the department to grant or deny an initial certification or a waiver to an out-of-state group home facility that has 6 or fewer California children placed by a county social services agency or probation department by February 19, 2000, rather than August 19, 1999.

Existing law requires that if, upon inspection, the probation officer of the county in which certain minors are adjudged wards of the court determines that an out-of-state facility or program is not licensed for the placement of minors by an agency of the state in which the minor will be placed or operates under, and is inspected pursuant to, standards comparable to the Board of Corrections for similar facilities or programs, the probation officer may temporarily remove the minor from the program or facility.

This bill would also permit temporary removal from the facility or program if it is determined that the facility or program has an adverse impact on the health or safety of the child.

Existing law establishes the Aid to Families with Dependent Children-Foster Care (AFDC-FC) program, under which, through a combination of federal, state, and local funds, payments are made to foster care providers by each county on behalf of eligible children.

Existing law provides that, except as specified, as a condition of receiving an AFDC-FC rate on or after July 1, 1999, a group home provider shall submit a copy of its most recent financial audit as a component of any rate application.

This bill would, instead, delay the date upon which this requirement would apply until July 1, 2000.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that with regard to certain mandates no reimbursement is required by this act for a specified reason.

This bill would incorporate additional amendments to Section 1569.17 of the Health and Safety Code contained in SB 286, which would become operative only if both bills are enacted and this bill is enacted after SB 286, but this bill becomes operative before SB 286.

With regard to any other mandates, this bill would provide that, if the Commission on State Mandates determines that the bill contains costs so mandated by the state, reimbursement for those costs shall be made pursuant to the statutory provisions noted above.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 882 (SB 938) Solis. Alternative payment programs.

Existing law provides for child care alternative payment programs, the purpose of which is to provide for parental choice in child care. Under existing law, alternative payment programs may provide payment to child care facilities with a majority of subsidized children if there is a lack of licensed child care facilities in the area, the facility is able to meet the special needs of a particular child, or for any other reason authorized by regulation.

This bill would instead authorize alternative payment programs to provide payment to child care facilities with 75% or more subsidized children, if at least one of the conditions required by existing law is met.

Ch. 883 (AB 329) Scott. Insurance: compensation: fees.

Existing law imposes various requirements on liability insurers and on policies issued by liability insurers.

This bill would authorize a liability insurer to review bills submitted for the defense of its insured, but would prohibit a liability insurer from compensating a reviewer based on (1) a percentage of the amount by which a bill is reduced, (2) the number of claims or cost of services for which the reviewer has denied authorization or payment, or (3) an agreement that no compensation will be due unless one or more bills are reduced for payment.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 884 (SB 940) Speier. Insurers: fees.

Existing law requires each insurer doing business in this state to pay an annual fee not to exceed $1 for each vehicle it insures, in order to fund increased investigation and prosecution of fraudulent automobile insurance claims and economic automobile theft. Revenues from the fee are available for distribution by the Insurance Commissioner to the Bureau of Fraudulent Claims of the Department of Insurance, to the Department of the California Highway Patrol, and to district attorneys, as specified.

This bill would require each insurer, until January 1, 2007, to pay an additional annual fee of 30¢ for each vehicle it insures to fund certain consumer operations of the Department of Insurance related to automobile insurance. This bill would also require the department to report to the Legislature's insurance committees on plans for use of the new revenues and on the opportunities for improving the fraud programs funded by the existing revenues, as specified.

This bill would also require each insurer, until January 1, 2007, to pay an additional annual fee, not to exceed 50¢, for each vehicle it insures, to fund the Bureau of Fraudulent Claims and an Organized Automobile Fraud Activity Interdiction Program.

Existing law establishes various fees to be charged by the Department of Insurance in connection with its licensing and regulatory activities relating to the business of insurance. Existing law authorizes the Insurance Commissioner to increase or decrease those statutory fees according to a specified procedure, and establishes limitations on the amount that fees may be increased or decreased.

This bill would require the department to annually project forward its workload for the subsequent 3 years in order to project appropriate fee levels, and to annually make adjustments to those fees, if necessary, based on actual workload experience.

Existing law also provides that any increase or decrease in those statutory fees shall be by a uniform percentage for all fees, rounded to the nearest whole dollar.

This bill would delete that provision.

This bill would provide that its provisions would become operative only if AB 1050 of the 1999–2000 Regular Session is enacted and becomes effective on or before January 1, 2000, in which case certain provisions of AB 1050 would prevail over provisions of this bill, as specified.

Ch. 885 (AB 1050) R. Wright. Insurance: fraudulent claims.

(1) Existing law permits interested persons to file a civil action for civil penalties plus an assessment, as specified, against a person who knowingly employs runners, cappers, steerers, or other persons to procure clients or patients to perform or obtain services of benefits pursuant to Workers' Compensation or to obtain services or benefits under a contract of insurance, or that will be the basis of a claim against an insured individual or his or her insurer. Existing law provides for specified percentages to be paid to persons who bring an action to collect the civil penalties. Existing law provides for a statute of limitations for fraud of 3 years from the date of discovery of the facts constituting the fraud.

This bill would provide that civil penalties are for each fraudulent claim presented to an insurance company by a defendant being sued for the civil penalties. This bill would provide that for the person filing the civil action the amount to be awarded to the person by the court from the proceeds of the action shall be at least 30% but not more than 40% if the district attorney or Insurance Commissioner intervenes and proceeds with the action, and at least 40% but no more than 50% if the district attorney or Insurance Commissioner does not intervene and proceed with the action. The bill would place a maximum on the statute of limitations for an action for the civil penalties of 8 years from the date of specified violations.

(2) Existing law makes it a crime to file or aid in the filing of false insurance claims.

This bill would require a district attorney when he or she files a criminal complaint for violation of specified Penal Code provisions relating to false insurance claims to provide specified notice to the affected insurers, the victims, and the Department of Motor Vehicles. The bill would require insurers who receive the notification to rebate any surcharges in premiums, as specified, paid by an insured victim, and for the Department of Motor Vehicles to remove any record of the underlying accident that is on the license record of a victim. By requiring the district attorney to provide notification to insurers

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

and to the Department of Motor Vehicles in these circumstances, this bill would impose a state-mandated local program. By requiring premium rebates the bill would amend Proposition 103.

(3) Existing law requires each insurer in this state to pay an annual fee to be determined by the Insurance Commissioner, but not to exceed $1 annually, for each vehicle insured under an insurance policy it issues in this state in order to fund increased investigation and prosecution efforts by district attorneys and other law enforcement agencies, including the Department of the California Highway Patrol, of fraudulent automobile insurance claims and economic automobile theft. Existing law requires the commissioner to award 51% of the assessment fees to district attorneys and requires the district attorneys to submit to the commissioner certain reports in this regard.

This bill would require the commissioner to conduct a fiscal audit of the programs administered by district attorneys under these provisions at least once every 3 years. The bill would require the cost of the fiscal audit to be shared equally between the Department of Insurance and the district attorney, thus imposing a state-mandated local program. This bill would require the Department of the California Highway Patrol to submit to the commissioner reports similar to those required of district attorneys under these provisions.

(4) Existing law requires the Medical Board of California, the Board of Chiropractic Examiners, and the State Bar to designate employees to investigate and report on possible fraudulent insurance activities. Existing law requires each of those entities to report annually to relevant legislative committees regarding their activities in this regard for the previous year.

This bill would specify the minimum contents required to be included in each of those annual reports.

(5) Existing law regulates motor vehicle theft and motor vehicle insurance fraud reporting.

This bill would establish, until January 1, 2007, a coordinated program of 3 to 10 grants for district attorneys targeted at the successful prosecution and elimination of organized automobile fraud activity, as defined. The program would be funded by the imposition on each insurer doing business in the state of an annual fee, not to exceed 50¢, to be determined by the commissioner, for each vehicle insured under an insurance policy issued by the insurer in the state. This bill would require the commissioner to adopt emergency regulations establishing the criteria to be used in awarding these grants.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

(7) This bill would declare it furthers the purposes of Proposition 103. Because this bill would amend Proposition 103, it is required to further the purposes of Proposition 103 and would require a $^{2}/_{3}$ vote for enactment.

(8) This bill would state legislative intent regarding the retroactive effect of certain of the bill's provisions as they relate to insurance claims or actions existing on January 1, 2000.

(9) This bill would provide that its provisions would become operative only if SB 940 of the 1999–2000 Regular Session is enacted and becomes effective on or before January 1, 2000.

Ch. 886 (SB 874) Escutia. Family Law Information Centers.

(1) Existing law establishes, until January 1, 2003, family law information centers in 3 pilot project courts for the purpose of providing information to unrepresented low-income family law litigants. Existing law requires, in superior courts with a family law facilitator, that in at least one pilot project court the family law facilitator staff and provide the services of the family law information center. The program is administered

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

by the Judicial Council. Under existing law, these provisions will be repealed on January 1, 2003.

This bill would revise those provisions to revise the notice to family law facilitators; to impose new duties on family law information centers and persons employed or supervised by a family law information center, thereby imposing new duties under an existing optional program; and to extend the date by which the Judicial Council is required to report its evaluation of the pilot project to the Legislature to March 1, 2003, and to extend the repeal date of the provisions to January 1, 2004.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 887 (SB 1270) Committee on Health and Human Services. Interstate adoption assistance agreements: social service regulations.

Existing law authorizes the Director of Social Services to adopt regulations, orders, and standards pertaining to the laws enforced by the State Department of Social Services.

This bill would, instead, permit the department to carry out that function.

Existing law provides for the Medi-Cal program, which is administered by the State Department of Health Services, pursuant to which medical benefits are provided to public assistance recipients and certain other low-income persons. Persons who meet the requirements of the categorically needy classification of recipients, may receive Medi-Cal benefits without meeting share of cost requirements. Those persons who, but for excess income, qualify for Medi-Cal benefits, may receive Medi-Cal benefits subject to meeting share-of-cost requirements.

This bill would include special needs children for whom medical and other necessary services or for whom adoption assistance and related services are provided under interstate compacts within the scope of persons who are eligible to receive Medi-Cal benefits under the medically needy person classification. This bill would also make changes clarifying the role of the court and other technical changes in that connection.

Existing law requires the county in which a person resides to determine a person's eligibility for Medi-Cal benefits and continued eligibility.

To the extent this bill would increase the counties' responsibilities for eligibility determination, it would impose a state-mandated local program.

Existing law requires the State Department of Social Services to administer the Adoption Assistance Program, under which aid is provided to persons adopting special needs children.

This bill would authorize the Director of Social Services and the Director of Health Services to enter into interstate agreements with agencies of other states for the protection of children on behalf of whom adoption assistance is being provided by the State Department of Social Services. The bill would also authorize the State Department of Social Services and the State Department of Health Services to establish procedures for interstate children's adoption assistance payments, including medical payments. The bill would make related changes.

This bill would state the Legislature's intent in enacting the bill.

This bill would incorporate additional changes to Section 366.3 of the Welfare and Institutions Code made by AB 658 and AB 686 to take effect if one or both bills are enacted and this bill is enacted last.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

NOTE: Superior numbers appear as a separate section at the end of the digests.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 888 (SB 1126) Costa. Criminal procedure: arraignment: audiovideo.

Existing law authorizes the Department of Corrections to establish a 3-year pilot project at more than 5 institutions that permits the initial court appearance and arraignment of a defendant in municipal or superior court to be conducted by 2-way electronic audiovideo communication in all cases where the defendant is charged with a misdemeanor or a felony and is currently incarcerated in the state prison. Existing law also provides that the provisions creating this project are repealed as of January 1, 2000, and requires the department to prepare and submit a report on the pilot project to the Legislature on or before January 1, 2000.

This bill would delete from these provisions the language that establishes a pilot project. The bill also would delete the reporting requirement and the repeal provision, thereby extending the provisions of the bill indefinitely.

Existing law establishes a pilot program to enable collaboration between the State Board of Control and judges in the counties in the program in connection with amending restitution orders. Under the program, among other things, if the hearing has not been waived, the State Board of Control determines if the cost of holding the hearing is justified.

This bill would in addition, in the case of a defendant who is incarcerated, authorize the above-described hearings to be held via 2-way audiovideo communication between the defendant and the court, as specified.

This bill also would specify that these provisions shall not be construed to prohibit an individual or district attorney's office from independently pursuing the imposition or amendment of a restitution order that may result in a hearing, regardless of whether the victim has received assistance.

The bill further would require the court to retain jurisdiction over a person subject to a restitution order for purposes of imposing or modifying restitution until such time as the losses may be determined when the economic losses of a victim cannot be ascertained at the time of sentencing.

Existing law provides for local assistance to community correctional programs.

This bill would appropriate $1,748,429 to Department of Corrections to be allocated to the City of Coalinga to provide equity regarding community correctional facility contract issues.

Existing law makes various appropriations to the Department of Corrections for various purposes related to the operation of the department and the maintenance of facilities and equipment under the control of the department.

This bill would make reappropriations from the General Fund and from the 1986 Prison Construction Fund to the department for specified purposes related to prison construction.

Ch. 889 (SB 828) McPherson. Pesticides: county agricultural commissioners: credit card costs.

Existing provisions of the Food and Agricultural Code require various persons who engage in the business of agricultural pest control operations to be registered or have permits issued by the Department of Pesticide Regulation. Under these provisions, the county agricultural commissioner of any county may adopt regulations applicable to his or her county that are supplemental to those of the Director of Pesticide Regulation which govern the conduct of pest control operations and records and reports of those operations. In addition, the county agricultural commissioner may refuse, suspend, or revoke a county registration or permit to engage in the business of agricultural pest control operations, as specified.

This bill would authorize a commissioner accepting payment for pest control registrations or services by credit card or other payment device, as specified, to impose a charge for costs incurred in connection with that form of payment and would require the commissioner to use his or her best efforts to minimize those costs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Ch. 890 (AB 1228) Committee on Agriculture. Agriculture: plant and animal pest control.

(1) Existing law authorizes the Secretary of Food and Agriculture or the Director of Pesticide Regulation to allocate annually to each county an amount determined by the secretary or the director not to exceed $^1/_3$ of the amount expended by the county during the previous fiscal year for the programs of joint responsibility under the jurisdiction of the secretary or director, as applicable.

Existing law also requires money transferred by the Controller to the Department of Food and Agriculture Fund from the Motor Vehicle Fuel Account to be expended by the Secretary of Food and Agriculture, as specified.

This bill, until July 1, 2001, would amend this latter provision to specify that, for reimbursement purposes, first priority shall be given to partially reimburse counties for the cost of carrying out those programs reported pursuant to paragraph (1) above, and second priority shall be for up to full reimbursement within the same fiscal period plus 60 days for expenditures incurred by the county in accordance with a budget approved by the department for programs dealing with high-risk pest exclusions and noxious weeds.

(2) Until July 1, 1999, the Department of Food and Agriculture was responsible under provisions of law to develop work plans for allocation of funding appropriated to the department in the Budget Act of 1998 for local assistance for agricultural plant and animal pest and disease prevention.

This bill, until July 1, 2000, would assign to the department the responsibility of developing work plans for allocation of the funding appropriated in the Budget Act to the department for local assistance for agricultural plant and animal pest and disease prevention. The bill would make related changes. The bill also would specify that, of the amount appropriated in the Budget Act to the department for local assistance for agricultural plant and animal pest and disease prevention, $5,500,000 shall be utilized solely for high-risk pest exclusion activities.

(3) Until July 1, 1999, a county agricultural commissioner was authorized under provisions of law to enter into a mutual aid agreement with other counties, as prescribed, to carry out prescribed crop, inspection, and pest management programs.

This bill would reenact these provisions without a repeal date, thereby continuing them indefinitely.

(4) The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 891 (AB 1673) Committee on Judiciary. Courts: services.

(1) Existing law specifies when a judge is deemed to serve or sit under assignment. Existing law provides for the repeal of this provision as of January 1, 2000 and for the subsequent operation of a provision delineating the law governing assignments of judges and justices.

This bill would extend the repeal of the current provision and the operation of the new provision to January 1, 2001.

(2) Existing law provides that various court services shall be provided by marshals in Madera County.

This bill would provide that the Sheriff of Madera County shall instead provide those services, and that all elected marshals in that county shall become employees of the sheriff's department on an unspecified date. By imposing new duties on the sheriff, the bill would impose a state-mandated local program.

(3) Existing law provides for the number, classification, and compensation of the officers and employees of the superior and municipal courts in Kings County, Orange County, and Los Angeles County.

Existing law provides for the unification of the municipal and superior courts, including the compensation of personnel who serve those courts.

This bill would delete various provisions for the number, classification, and compensation of specified officers and employees of the superior and municipal courts in Orange County, and provide for the number, classification, and compensation of officers and employees of the superior court in Orange County to be specified by the Executive Committee of the Superior Court. The bill would revise the number, classification, and compensation of employees of the superior and municipal courts in

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

Kings County and Los Angeles County, and of employees of the municipal courts in Kern County. The bill would also make related and technical changes.

The bill would also revise and clarify provisions governing the benefits and the terms and conditions of employment of court personnel upon unification of the municipal and superior courts in a county.

(4) Existing law prohibits the Sheriff of Humboldt County from diverting personnel or other resources allocated to the County Security Services Division by the annual budget adopted by the board of supervisors, except for emergency purposes, as specified.

This bill would delete that provision.

(5) This bill would provide that its provisions are severable.

(6) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 892 (AB 1672) Committee on Judiciary. Civil actions: eminent domain: waste management.

(1) Existing law provides, until January 1, 2003, for the registration by the county clerk of legal document assistants and unlawful detainer assistants, as specified; it also provides for the registration by the county clerk of process servers, as specified.

This bill would revise the exemptions from the registration requirement for legal document assistants, and make clarifying changes; the bill would require an application for a certificate of registration by a partnership or corporation to be accompanied by a $25,000 bond executed by a corporate surety qualified to do business in this state; however, the bill would limit the total aggregate liability on the bond to $25,000, and would require an application for a certificate of registration by a person employed by a partnership or corporation to be accompanied by a $25,000 bond only when the partnership or corporation has not posted the bond, as specified; the bill would create an exemption from the registration of felons as process servers with respect to felons who have been granted a certificate of rehabilitation, expungement, or pardon, and make conforming changes. This bill would also revise the notification and fingerprint card requirements for registration of process servers, and allow a registrant to deposit cash or a money order in lieu of a surety bond. The bill would also make clarifying changes.

(2) Existing law generally prohibits a cash or similar deposit in lieu of a surety bond after January 1, 1999.

This bill would limit that prohibition to filings with the Secretary of State.

(3) The existing eminent domain law requires a court, in an eminent domain proceeding, to give the tax collector the legal description of the property sought to be taken and direct the tax collector to certify to the court specified information regarding the property.

This bill would provide that the court in a county where both the auditor and tax collector are elected officials may select either the auditor or tax collector to perform that certification.

(4) Existing law limits taking multiple depositions of the same person, except as specified.

This bill would revise that exception.

(5) Existing law requires litigants who apply to a court to proceed in forma pauperis to provide identification to verify the applicants receipt of public assistance.

This bill would expand the means of identification for these purposes.

(6) Existing law, known as the California Integrated Waste Management Act of 1989, authorizes the California Integrated Waste Management Board, along with local enforcement agencies, to carry out specified powers and duties relating to the management of solid waste. The act authorizes the administrative imposition of civil penalties for violations of the act, and provides that any attorney authorized to act on

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

behalf of the local enforcement agency or the board may petition the superior court to impose, assess, and recover civil penalties under the act.

This bill would instead provide that an attorney authorized to act on behalf of the local enforcement agency or the board may apply, to the clerk of the appropriate court in the county in which the civil penalty was imposed, for a judgment to collect the penalty, as specified. The bill would also require the recovery of unpaid filing fees prior to the recovery of any portion of a civil penalty.

(7) Existing law requires the juvenile court to notify the director of the county mental health department of the county in which a minor resides when the court (1) finds the minor to be within the jurisdiction of the court on the basis of abuse or neglect and (2) believes the minor may need specialized mental health treatment.

This bill would make a technical change to that provision.

(8) By imposing additional duties upon local officials, this bill would create a state-mandated local program.

(9) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 893 (AB 97) Torlakson. Taxation: low-income housing.

Existing law provides, until January 1, 2000, for procedures and requirements for the allocation of state tax credit amounts among low-income housing projects.

This bill would provide that procedures and requirements for the allocation of state tax credit amounts among low-income housing projects are to remain in effect as long as related provisions of federal law are in effect.

Ch. 894 (AB 92) Floyd. Inspector General for Veterans Affairs.

Existing law provides for veterans programs, including the veterans farm and home purchase programs, and provides for veterans homes.

This bill would create the office of Inspector General for Veterans Affairs, who would be subject to the direction of the Governor, to replace the administratively created position of Internal Auditor in the Department of Veterans Affairs. The bill would require the inspector general to be appointed by the Governor, subject to Senate confirmation. The inspector general would be responsible for reviewing the operations and financial condition of each California veterans home, each veterans farm and home purchase program, and all other veterans programs supported by the state. The bill would require the inspector general to submit a report and make any recommendations he or she deems necessary for improving the operations of the veterans programs to the board on at least an annual basis and to the Legislature annually.

The bill (1) would authorize the inspector general to receive communications from any individual who believes he or she may have information that warrants a review or investigation of a veterans program, (2) would authorize, and in some instances require, the inspector general to conduct a review or investigation, (3) would require the establishment of a toll-free telephone number to report alleged wrongdoing regarding veterans programs, and (4) would set forth procedures for discipline by adverse action, as specified, for any state officer or employee who retaliates or engages in similar acts against employees who make such reports in good faith.

Ch. 895 (AB 452) Mazzoni. Long-term care programs.

Existing law provides for the licensure of residential care facilities for the elderly by the State Department of Social Services. Existing law provides for the licensure of long-term health care facilities by the State Department of Health Services.

This bill would enact the Mazzoni Long-Term Care Act of 2000. It would declare the intent of the Legislature to enact legislation to improve the state-level administration of public long-term care programs.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law provides for the California Health and Human Services Agency that consists of the State Department of Health Services, the State Department of Mental Health, the State Department of Developmental Services, the State Department of Social Services, the State Department of Alcohol and Drug Programs, the California Department of Aging, the Department of Rehabilitation, the Department of Community Services and Development, the Office of Statewide Health Planning and Development, and the State Council on Developmental Disabilities.

This bill would, until January 1, 2007, establish a Long-term Care Council within the California Health and Human Services Agency as an interdepartmental, interagency council to, among other things, coordinate long-term care policy development and program operations and develop a strategic plan for long-term care policy.

Ch. 896 (SB 662) Figueroa. Search warrants: foreign corporations.

(1) Existing law authorizes a court or magistrate to issue a search warrant for the search of a place and the seizure of property or things identified in the warrant where there is probable cause to believe that specified grounds exist. Federal law requires disclosure to a governmental entity by a provider of electronic communication service or a remote computing service of the contents of an electronic communication that is in storage, as specified, only pursuant to a warrant issued according to law.

This bill would apply to any search warrant issued by a court or magistrate allowing a search for records in the actual or constructive possession of a foreign corporation that provides electronic communication services or remote computing services to the general public, where those records would reveal specified information about a customer of that corporation. The bill would require such a foreign corporation to provide to a peace officer who has a search warrant issued by a California court, all records identified in the warrant within 5 business days of receipt, or within less time upon specified conditions. The bill would provide procedures for the foreign corporation to verify the authenticity of the records and to avoid production of the record. In addition, the bill would prohibit a cause of action against any foreign or California corporation or its officers, employees, or other specified persons for providing records in accordance with a search warrant issued pursuant to the bill. By increasing the duties of local officials, this bill would impose a state-mandated local program.

(2) Existing law prohibits a foreign corporation from transacting intrastate business without first obtaining a certificate of qualification from the Secretary of State. To obtain that certificate, the foreign corporation must file a signed statement with specified information regarding the corporation, including the name of an agent who may be served with process within this state, and an irrevocable consent to service of process as specified.

This bill would amend the provision governing irrevocable consent to service of process to include service of a search warrant issued pursuant to the provision summarized in (1) for records or documents that are located outside of this state whether or not the foreign corporation is a party or a nonparty to the matter in which the search warrant is sought.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement, including the creation of a State Mandates Claims Fund to pay the costs of mandates that do not exceed $1,000,000 statewide and other procedures for claims whose statewide costs exceed $1,000,000.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

Ch. 897 (AB 817) Committee on Public Employees, Retirement and Social Security. Legislative retirement.

Existing law establishes the state's contribution rate to the Legislators' Retirement System at 18.81 percent of the compensation paid members.

This bill would instead provide that the state's contribution rate shall be established by the actuary, and included in the Budget Act, pursuant to provisions of the Public Employees' Retirement Law. The bill would also provide that when the actuarial value

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

of assets exceeds the present value of benefits as of the most recently completed valuation, resulting in a 0 percent contribution rate for the state, the Public Employees' Retirement Board may reduce the member contribution rates.

Ch. 898 (AB 1048) Firebaugh. Homeowner associations: reporting.

(1) Under existing law, unless the governing documents impose more stringent standards, an association is required to prepare and annually distribute a pro forma operating budget that includes certain financial documents to its members.

This bill would require an association to include in the pro forma operating budget as a line item under cash reserves, the amounts of funds received from either a compensatory damage award or settlement from any person or entity for injuries to property, real or personal, arising out of any construction or design defect, and to report on the expenditure of those funds, as specified.

The bill also would provide that in lieu of providing the information described above with the pro forma operating budget, the association may include the statement in the review of the association's financial statement that is required by existing law under specified circumstances.

(2) Existing law prohibits the board of directors of the association from expending reserve funds for any purpose other than the repair, restoration, replacement, or maintenance of, major components that the association is obligated to repair, restore, replace, or maintain and for which the reserve fund was established. Existing law authorizes the temporary transfer of money from a reserve fund to the association's general operating fund under specified conditions. Existing law requires the board, if necessary, to levy a special assessment to recover the full amount of any expended funds.

This bill would revise the definition of reserve funds for purposes of the above described provisions to include funds received and not yet expended or disposed from either a compensatory damage award or settlement to an association for injuries to property arising out of any construction or design defects.

Ch. 899 (SB 538) O'Connell. Health authorities.

Existing law provides for the establishment of various health authorities for the provision of health services and for the management of specified health facilities.

This bill would authorize the Board of Supervisors of San Luis Obispo County to establish a health authority to manage, administer, and control General Hospital and the Family Care Centers, with a governing board consisting of 11 members, as provided.

Ch. 900 (SB 188) Leslie. Drugs: hospitals: physicians.

Existing law generally prohibits any person from selling or dispensing any dangerous drug, or dispensing any prescription, unless he or she is a licensed pharmacist. However, existing law permits a licensed hospital that contains 100 beds or fewer and does not employ a full-time pharmacist to purchase drugs at wholesale for administration, under the direction of a physician, to patients registered in the hospital or to emergency cases under treatment in the hospital. Existing law imposes criminal penalties for violations of these provisions.

This bill would revise the above-described exception to also permit hospitals containing 100 beds or fewer to purchase drugs at wholesale for dispensation by physicians to persons registered as inpatients of the hospital, to emergency cases under treatment in the hospital, or to outpatients of a rural hospital, as defined. The bill would impose specified restrictions on the dispensing of those drugs to outpatients. The bill would require rural hospitals, as defined, to obtain information regarding the hours of local pharmacies, as specified, and require specified hospitals that contain 100 beds or fewer to obtain the services of a pharmacist consultant to monitor and review the pharmaceutical services provided by the hospital to inpatients of the hospital and the dispensing of drugs by physicians to outpatients pursuant to the provision described above. It also would make related changes, including expansion of requirements concerning adoption of a specified written policy by health facilities. To the extent that the bill would expand the scope of an existing crime with respect to these requirements, the bill would impose a state-mandated local program.

NOTE: Superior numbers appear as a separate section at the end of the digests.

Existing law authorizes a pharmacy technician to perform nondiscretionary tasks only while assisting, and while under the direct supervision and control of, a pharmacist. Existing law authorizes a pharmacy technician to perform these duties only under the immediate, personal supervision and control of a pharmacist. Existing law requires any pharmacist responsible for a pharmacy technician to be on the premises at all times and requires the pharmacy technician to be within the pharmacist's view, except when the pharmacy technician is employed to assist in the filling of prescriptions for an inpatient of a hospital or for an inmate of a correctional facility.

This bill would require, notwithstanding the above limitations, that the California State Board of Pharmacy adopt regulations establishing conditions to permit the temporary absence of a pharmacist for breaks and lunch periods pursuant to a specified statute and the orders of the Industrial Welfare Commission without closing the pharmacy, during which time a pharmacy technician may remain in the pharmacy but may only perform nondiscretionary tasks. The bill would require the pharmacist to be responsible for a pharmacy technician and to review any task performed during the pharmacist's temporary absence.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 901 (SB 341) Figueroa. Sex offenders: juveniles.

Existing law requires certain persons, including any person convicted of specified sex offenses, for the rest of his or her life while residing or located within California, to register with the chief of police or the sheriff, as specified, and with the chief of police of a campus of the University of California, the California State University, or community college if the person is residing or located upon the campus or in any of its facilities, within 5 working days of coming into, or changing his or her residence or location within, any city, county, or city and county, or campus. Existing law makes these provisions applicable to any person who is discharged or paroled from the Department of the Youth Authority the custody to which he or she was committed after having been adjudicated for the commission or attempted commission of specified sex offenses, including kidnapping with the intent to commit specified sex offenses. Existing law also makes these provisions applicable to a person discharged from an equivalent institution in another state to which he or she was committed for an offense which, if committed or attempted in this state, would have been punishable as one of those sex offenses. The failure to register or update the registration as specified is a crime.

This bill would make changes to penalty provisions applicable to specifically include persons who have suffered juvenile adjudications as specified above. By expanding the scope of an existing crime, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would incorporate additional changes in Section 290 of the Penal Code proposed by SB 1275 and AB 1193 and 1340, to be operative if this bill and one or more of the other bills are enacted and become effective on or before January 1, 2000, and this bill is enacted last.

Ch. 902 (SB 281) Chesbro. Veterans: California veterans' homes: Morale, Welfare, and Recreation Fund.

(1) Existing law requires that a portion of the money received from the lease of real property for a golf course on the grounds of the Veterans Home of California, Yountville, commencing at the end of the first 12 months after the date the department no longer operates a driving range or that property, upon appropriation by the Legislature, be

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

made available annually to the administrator for special projects benefiting that veterans home.

This bill would repeal those provisions.

(2) Existing law requires each California veterans' home to be under the management and control of the Department of Veterans Affairs and, subject to the policies adopted by the California Veterans Board and the Secretary of Veterans Affairs, to be administered by an administrator. The administrator is required to maintain a post fund that includes any profits from operations of the Veterans' Home Exchange and post fund operations, revenue derived from the issuance of prisoner-of-war special license plates, all donations to the fund, interest earned on invested funds, funds derived from the estates of deceased members, and certain other moneys and property derived from the home, except that the moneys and properties received by the home from estate assets located outside the home in excess of $200,000 in any one calendar year are required to be paid into the General Fund.

This bill instead would require the administrator to maintain a Morale, Welfare, and Recreation Fund to include any funds derived from golf course green fees and range ball fees, in addition to the moneys and property included in the post fund under existing law.

The bill would delete the requirement that moneys and properties received by the home from estate assets located outside the home in excess of $200,000 in any one calendar year be paid into the General Fund and, instead, would require those moneys and properties to be included in the Morale, Welfare, and Recreation Fund, regardless of amount.

(3) Existing law requires the post fund to be used, at the discretion of the administrator and subject to the approval of the secretary, to provide for the general welfare of the home and its veterans, including, but not limited to, providing for operations of the Veterans' Home Exchange, motion picture theater, library, and band, and to pay for newspapers, chapel expenses, welfare and entertainment expenses, sport activities, celebrations, and any necessary insurance to protect property of the fund or the Veterans' Home Exchange, and any other activity for the benefit of the home or its members.

This bill, instead, would delete the requirement that the post fund be used for the benefit of the home and would limit the use of that money, which would be deposited in the Morale, Welfare, and Recreation Fund, for the morale, welfare, and recreation of the veterans, as specified. The bill also would prohibit expenditures from that fund for certain purposes that are unrelated to the morale, welfare, and recreation of the veterans or that may be funded from other sources. The bill would provide that appropriations from the General Fund may not be reduced for the purpose of, or to have the effect of, requiring increased expenditures from the Morale, Welfare, and Recreation Fund for those specified purposes.

This bill would require the administrator to prepare and submit to the secretary and to certain committees of the Legislature, on or before August 20 of each year, a report detailing funds received in the Morale, Welfare, and Recreation Fund and transmitted to the Controller and a report detailing expenditures from that fund.

The bill would also make a conforming change.

Ch. 903 (AB 921) Keeley. Apprenticeship programs.

Existing law establishes the California Apprenticeship Council to issue rules and regulations that establish apprenticeship standards, among other things. The council is composed of 14 members appointed by the Governor plus the Director of Industrial Relations or his or her designee, the Superintendent of Public Instruction or his or her designee, and the Chancellor of the California Community Colleges or his or her designee. The Governor's appointees include 6 representatives each from employer and employee organizations, geographically selected, and 2 representatives of the general public. This provision also provides that each member of the council shall receive $50 for each day of actual attendance at council or committee meetings together with actual and necessary traveling expenses.

This bill would provide that the Governor's appointees shall be 6 representatives each from employer organizations that sponsor apprenticeship programs and employee organizations that sponsor apprenticeship programs, geographically selected, and 2

NOTE: Superior numbers appear as a separate section at the end of the digests.

representatives of the general public. This bill would also increase the council members' per diem to $100 for each day of actual attendance at council or committee meetings together with actual and necessary traveling expenses.

Existing law requires the Chief of the Division of Apprenticeship Standards or his or her representative, among other things, to foster, promote, and develop the welfare of the apprentice and industry, improve the working conditions of apprentices, and advance their opportunities for profitable employment.

This bill would additionally require the division to randomly audit all apprenticeship programs during each 5-year period commencing January 1, 2000, to ensure compliance with specified requirements, including industry-specific training criteria that the bill would authorize the division to adopt, as specified. The authorization to adopt these criteria shall be repealed on January 1, 2003, unless a later enacted provision deletes or extends that date. The bill would require every apprenticeship program sponsor to cooperate with the division in conducting the audit. The audit reports would be presented to the California Apprenticeship Council and made public, except as specified. The chief would recommend remedial action to correct deficiencies and failure to correct them within a reasonable time would be grounds for withdrawing state approval of a program.

Existing law requires contractors on public works who employ journeymen or apprentices to contribute to a fund to administer certain apprenticeship programs, as specified.

This bill would revise those contribution requirements and would provide that, at the end of each fiscal year, the California Apprenticeship Council shall make prescribed grants to apprenticeship programs.

Existing law requires that the ratio of apprentice work to journeyman work performed on public works be not less than one hour of apprentice's work for every 5 hours by a journeyman, except as specified in the case of the land surveyor classification. A violation of this provision is punishable by a civil penalty of $50 per day of noncompliance. In the event of willful noncompliance of this provision, the Director of Industrial Relations would be required to debar the contractor, as specified.

This bill would eliminate the land surveyor exception and increase the civil penalty to $100 for each day of noncompliance. This bill would also impose a civil penalty of $300 for each day of noncompliance in the event of a subsequent violation of this provision within a 3-year period. The bill would provide that where a subcontractor is found to have violated these provisions, the prime contractor shall not be liable, unless the prime contractor had knowledge of the subcontractor's failure to comply or the prime contractor failed to comply with specified requirements with regard to the subcontract. The bill would also revise the procedure for debarment under these provisions.

Ch. 904 (AB 1187) Rod Pacheco. State special schools.

Existing law, the Assumption Program of Loans for Education, authorizes the Student Aid Commission to issue up to 2,000 conditional warrants for loan assumption to applicants who, among other things, agree to teach in a public school in the state for at least 3 consecutive academic years after obtaining a teaching credential in subject areas that are designated as current or projected shortage areas by the Superintendent of Public Instruction.

This bill would require that the list of shortage areas designated by the superintendent include the state special schools as a category separate from special education.

This bill would require the Department of Personnel Administration to conduct and complete a survey of the salaries paid to public school teachers who teach pupils with learning disabilities similar to those of pupils taught in the state special schools.

Ch. 905 (AB 1225) Ashburn. Adoptions.

Existing law provides for the payment, by the State Department of Social Services and counties, of cash assistance to eligible families that adopt eligible children, and bases the amount of the payment on the needs of the child and the resources of the family to meet those needs.

Existing law requires the State Department of Social Services or a licensed adoption agency, at the time application for adoption of a child who is potentially eligible for these

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

benefits is made, to provide the prospective adoptive family with information, in writing, on the availability of these benefits.

This bill would also require this information to be provided at the time immediately prior to finalization of the adoption decree.

Because state funds are continuously appropriated to pay for a portion of the costs of county adoption assistance payments, the bill would constitute an appropriation.

Existing law also provides that, from funds appropriated for the purpose, the state shall compensate private adoption agencies for costs of placing for adoption children eligible for the Adoption Assistance Program, not to exceed $3,500 per child adopted.

This bill would, effective July 1, 1999, increase that limitation to $5,000.

This bill would incorporate additional changes in Section 16119 of the Welfare and Institutions Code, proposed by AB 390, to be operative only if AB 390 and this bill are both chaptered and become effective on or before January 1, 2000, and this bill is chaptered last. These changes would become operative on the effective date of AB 390.

This bill would declare that it is to take effect immediately as an urgency statute.

Ch. 906 (SB 858) Hughes. Guide, signal, and service dog food allowance.

Existing law provides for the federal Supplemental Security Income (SSI) program and the State Supplementary Program for the Aged, Blind, and Disabled, under which, through a combination of federal and state funds, qualified low-income aged, blind, and disabled persons are provided with cash assistance.

Existing law provides that recipients of these programs who have a guide, signal, or service dog are eligible for a specified monthly dog food allowance.

This bill would also permit a recipient of federal social security disability insurance benefits whose income and resources are not in excess of the federal poverty level and who has a guide, signal, or service dog to receive a dog food and other special need allowance of $35 per month.

This bill would appropriate $69,000 from the General Fund to the State Department of Social Services for the implementation of this act during the period commencing January 1, 2000, and ending June 30, 2000.

Ch. 907 (AB 1231) Machado. Advertising: coupons.

Existing law governing advertising makes it unlawful to use the term "prize" or "gift" in any manner that would be untrue or misleading.

Existing law, in particular, makes it unlawful to notify any person by any means that he or she will receive a gift and that as a condition of receiving that gift he or she must pay any money, or purchase or lease, including rent, any goods or services, if one or more of certain specified conditions exist.

This bill would make it unlawful to offer a coupon, as defined, that is untrue or misleading, and would make it unlawful to offer a coupon described as "free" or as a "gift," "prize," or other similar term if (1) as a condition of receiving or utilizing the coupon the recipient is required to pay any money or purchase any goods or services to obtain or use the coupon, and (2) the majority of the sales made by the offeror or by any person who honors the coupon during the preceding year were made in connection with the use of one or more "free," "gift," or "prize," or similarly described coupons.

Existing law makes it a crime to violate any of the provisions governing advertising. By adding this new prohibition to those provisions, this bill would expand the scope of an existing crime, thereby imposing a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

This bill would also state legislative intent.

Ch. 908 (AB 990) Floyd. Sales and use tax: seller's permits.

The Sales and Use Tax Law requires each person who desires to engage in business as a seller in this state to file an application for a permit with the State Board of Equalization.

NOTE: Superior numbers appear as a separate section at the end of the digests.

If the applicant complies with the appropriate procedures, the board must grant and issue to the applicant a separate permit for each place of business.

This bill would authorize cities and counties to collect information from persons seeking to engage in the business of selling tangible personal property and to transmit that information to the board. The bill would require the board to issue permits to applicants within specified time periods. The bill would also authorize cities and counties to require each person desiring to engage in business in that jurisdiction for the purposes of selling tangible personal property to provide his or her seller's permit account number, if any. These provisions would be repealed on January 1, 2004.

This bill would require the State Board of Equalization to report to the Legislature regarding certain impacts of these provisions.

Ch. 909 (AB 1421) R. Wright. Gas and electric service.

(1) Existing law permits the Public Utilities Commission to investigate the restructuring of natural gas services, as specified, but prohibits the commission, prior to January 1, 2000, from enacting any gas industry restructuring decisions and from enforcing any natural gas restructuring decisions for core customers as considered in Rulemaking 98-01-011 enacted after July 1, 1998, but prior to August 25, 1998.

This bill would repeal that provision, and, instead, would require the commission to require each gas corporation to provide bundled basic gas service, as defined, to all core customers in its service territory unless the customer chooses or contracts to have natural gas purchased and supplied by another entity. The bill would specify that a public utility gas corporation shall continue to be the exclusive provider of revenue cycle services, as defined, in its service territory, except as specified, and would require the commission to require the distribution rate to continue to include after-meter services, as defined. The bill would make related legislative findings and declarations.

(2) Existing law relating to electrical restructuring states that nothing in those provisions prevents the commission from exercising its authority to investigate a process for the certification and regulation of the rates, charges, terms, and conditions of default service, and if the commission determines that a process for the certification and regulation of default service is in the public interest, existing law requires the commission to submit its findings and recommendations to the Legislature for approval.

This bill would require electrical corporations serving certain agricultural customers to conduct research to determine the typical simultaneous peak load of those customers and report the results of the research to the customers and the commission not later than a specified date. The bill would require the commission to consider the results of the research when setting future electric distribution rates for those customers.

(3) Because a violation by a public utility of a requirement of the commission is a crime, this bill would impose a state-mandated local program by creating new crimes.

(4) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 910 (AB 1497) Floyd. Solid waste: purchase of printer or duplicator cartridges.

The existing State Assistance for Recycling Markets Act of 1989 requires the Legislature and all state agencies to meet certain goals for the procurement or purchase of recycled products, as defined, by specified dates.

This bill would prohibit a state agency from purchasing any printer or duplication cartridge, as defined in the bill, for which the manufacturer, wholesaler, distributor, retailer, or remanufacturer places restrictions, as specified, on the recycling or remanufacturing of that cartridge by any other person, except as specified.

Ch. 911 (AB 1474) Cardoza. Vehicles: license fees and taxes: highway access limits: exception.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(1) Existing law imposes a vehicle license fee each year for the registration or renewal of registration of a vehicle and imposes other weight and registration fees on vehicles subject to registration under the Vehicle Code.

This bill would exempt from these fees, except vehicle registration fees, vehicles owned by a federally recognized Indian tribe if the vehicle is used exclusively within the boundaries of lands under the jurisdiction of the tribe, including the incidental use of that vehicle on highways within those boundaries.

(2) Existing law authorizes the establishment of limited highway access to terminals or services by the Department of Transportation and cities and counties.

This bill would exempt from established limitations of access, licensed carriers of livestock when engaged in certain activities under specified conditions and on specified portions of State Highway Route 101 that are necessary and incidental to the shipment of livestock. This exemption would be repealed on January 1, 2002.

The bill would require the Department of the California Highway Patrol, in consultation with the Department of Transportation, to conduct a study of the effect that this exemption has on public safety and report the findings of the study to the Legislature on or before July 1, 2001.

Ch. 912 (AB 1488) Machado. State employees: State Bargaining Units 14 and 15.

Existing law provides that if any provision of a memorandum of understanding reached between the state employer and a recognized employee organization representing state civil service employees requires the expenditure of funds, those provisions of the memorandum of understanding shall not become effective unless approved by the Legislature in the annual Budget Act.

This bill would approve provisions of specified memoranda of understanding entered into between the state employer and the California State Employees Association, and would provide that the provisions of any memorandum of understanding that require the expenditure of funds shall become effective even if the provisions of the memorandum of understanding are approved by the Legislature in legislation other than the annual Budget Act.

This bill would provide that provisions of any memorandum of understanding approved by this bill that require the expenditure of funds shall not take effect unless funds for these provisions are specifically appropriated by the Legislature, and would provide that if funds for these provisions are not specifically appropriated by the Legislature, the state employer and the affected employee organization shall meet and confer to renegotiate the affected provisions.

The bill would declare that it is to take effect immediately as an urgency statute.

Ch. 913 (AB 1541) Keeley. Employment discrimination: religious entities.

Existing provisions of the California Fair Employment and Housing Act prohibit various unlawful employment practices and impose certain obligations upon employers with respect to specified employment discrimination and harassment. Existing provisions of the act make it a misdemeanor for employers willfully to fail to maintain certain employment records for at least 2 years. Under existing law, employers subject to the act do not include religious associations and corporations that are not organized for private profit.

This bill would add definitions of "religious corporation" and "religious duties" to the act. The bill would expressly provide that the act does not prevent religious corporations from restricting eligibility for positions involving religious duties to adherents of that religion. The bill would impose a state-mandated local program by limiting the act's exemption for employers that are religious associations or corporations not organized for private profit to make the exemption inapplicable with respect to persons employed thereby to perform duties, other than religious duties, at a health care facility operated by the religious corporation or association at which health care is not limited to adherents of the religion that formed the association or corporation. The bill would, however, make the act inapplicable to (1) religious corporations with respect to the employment and promotion of individuals of a particular religion, and application of the employer's religious doctrines, tenets, or teachings, in any work connected with the provision of health care and (2) nonprofit public benefit corporations incorporated to provide health

---

NOTE: Superior numbers appear as a separate section at the end of the digests.

care on behalf of a religious organization with respect to employment and promotion of individuals in executive or pastoral-care positions connected with the provision of health care.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 914 (AB 1545) Correa. Health practitioners.

Under existing law, a nurse practitioner may not sign for delivery of a complimentary sample of a dangerous drug or dangerous device; may not direct a pharmacist to dispense a trade name or generic drug; use a dispensing device; or hand drugs or dangerous devices to patients in his or her office or place of practice, as specified.

This bill would authorize a nurse practitioner or, in some instances, a physician assistant, to perform the above services, and would make corresponding changes.

Ch. 915 (AB 1548) Cardoza. Environmental health: food.

Existing law, the Sherman Food, Drug, and Cosmetic Law, contains various provisions regarding the packaging, labeling, and advertising of food, drugs, and cosmetics.

Existing law requires every person upon first engaging in the manufacturing, packing, or holding of processed food in this state to immediately register with the State Department of Health Services and to pay a fee, for deposit into the Food Safety Fund, to be used by the department, upon appropriation by the Legislature, for the purposes of providing funds necessary to carry out and implement the inspection provisions of the law. Existing law also authorizes local health departments to conduct inspections of certain food processing establishments.

This bill would revise and recast these provisions. It would, among other things, provide for the inspection and reinspection of food processing facilities, as defined, and would revise the fees charged for new and renewal registrations including the imposition of different fees in specified counties. The bill would also vest the authority to conduct certain inspections in the State Department of Health Services.

Existing law imposes, until January 1, 2001, a $100 food safety fee on every person who is engaged in the manufacture, packing, or holding of processed food.

This bill would extend that fee until January 1, 2003.

By creating new crimes and revising the definition of existing crimes, this bill would impose a state-mandated local program.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 916 (AB 1570) Villaraigosa. Postsecondary education: California Postsecondary Education Commission.

Existing law, known as the Donahoe Higher Education Act, sets forth, among other things, the missions and functions of California's public and independent segments of higher education, and their respective institutions of higher education. Among other things, the act establishes the California Postsecondary Education Commission for, among other purposes, the collection of data pertinent to the planning and coordination of the higher education system of the state. The act also requires the commission to develop a comprehensive data base to ensure the comparability of data from diverse sources.

This bill would require the California Postsecondary Education Commission, in developing this comprehensive data base, to ensure that the data base supports longitudinal studies of individual students, provides the interactive use of data, and provides each of the educational segments access to the data, as specified.

NOTE: Superior numbers appear as a separate section at the end of the digests.

The bill would appropriate $424,000 from the General Fund to the commission for purposes of the development and maintenance of a comprehensive data base, as set forth in the bill.

Ch. 917 (AB 1502) Washington. Confidential funds: peace officers.

(1) Existing law authorizes a state agency to withdraw from moneys appropriated for the support of that agency a total amount not to exceed $2,000 per fiscal year for confidential purposes, without at the time furnishing vouchers and itemized statements.

This bill would authorize the Department of Corrections to similarly withdraw an amount not to exceed $10,000 per fiscal year for confidential purposes. This bill would also require the Department of Corrections to account for these moneys at the end of the fiscal year to the Controller who would be empowered to make any necessary audit. The bill would require the Department of Corrections to include a certificate describing the purpose and necessity for secrecy.

(2) Existing law provides that any member of the Law Enforcement Liaison Unit of the Department of Corrections, is a peace officer, provided that the primary duty of the peace officer shall be the investigation or apprehension of parolees, parole violators, or escapees from state institutions, the transportation of those persons, and the coordination of those activities with other criminal justice agencies.

This bill would revise this provision to confer peace officer status on any member of the Law Enforcement and Investigations Unit of the Department of Corrections, provided that the primary duties of these peace officers include among the duties specified above, the investigation or apprehension of parolees, parole violators, or specified escapees, the execution of search warrants or subpoenas, and the making of arrests. The bill also would include among these duties the coordination of these activities with any member of the Office of Internal Affairs of the Department of Corrections, as specified. This bill would also confer peace officer status on any member of the Office of Internal Affairs of the Department of Corrections, provided that the primary duties of these peace officers are criminal investigations of Department of Corrections personnel and the coordination of those activities with other criminal justice agencies.

Ch. 918 (SB 868) C. Wright. Office of the Inspector General.

(1) Existing law provides for the independent office of the Inspector General and provides that the Inspector General shall be appointed by the Governor, subject to Senate approval of that appointment. The Inspector General is responsible for reviewing departmental policy and procedures for conducting investigations and audits of investigatory practices and other audits and investigations of the Department of Corrections, the Department of the Youth Authority, the Board of Prison Terms, the Youthful Offender Parole Board, or the Board of Corrections, as requested by either the Secretary of the Youth and Adult Correctional Agency or a Member of the Legislature.

This bill would revise provisions relating to the Inspector General involving the responsibilities of the office of the Inspector General, the certification program for investigators under the Inspector General, and access by the Inspector General to, and examination or reproduction by the Inspector General of, documents or records contained on any medium by the above agencies. This bill would provide that the Inspector General, in connection with any audit or investigation, may administer oaths, certify to all official acts, and issue subpoenas, as specified. The bill would specify at length the parameters of this subpoena power. The bill would provide that the misuse of any information obtained as a result of an investigation or audit by any employee of the Inspector General may be considered grounds for disciplinary action. This bill would also provide that any person or officer who fails or refuses to permit the authorized access and examination or reproduction of documents or records by the Inspector General is guilty of a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

(2) Existing law provides for the investigation and devisement of remedies for unfair practices involving state employees, as defined, and provides for the management of the nonmerit aspects of the state's personnel system relating to state employees, as defined.

This bill would specifically include employees of the office of the Inspector General within this definition of state employee for the purposes of the above provisions.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(3) Existing law provides that effective January 1, 1988, an annual salary of $85,402 shall be paid to specified directors and commissioners of departments of the State of California.

This bill would make this salary provision applicable, in addition, to the Inspector General.

(4) Existing law provides that specified persons are peace officers whose authority extends to any place in the state provided that the primary duty of the peace officers is the enforcement of the law, as specified.

This bill would revise that provision to provide, in addition, that a peace officer, as specified above, includes deputies of the Inspector General, as specified, and any employee under the authority of the Inspector General as designated by the Inspector General, provided that the primary duty of these peace officers shall be conducting audits of investigatory practices and other audits, as well as conducting investigations, of the Department of Corrections, the Department of the Youth Authority, the Board of Prison Terms, the Youthful Offender Parole Board, or the Board of Corrections.

(5) Existing law requires the Inspector General to conduct a management review audit of any warden in the Department of Corrections, or superintendent in the Department of the Youth Authority who has held the position for more than 4 years.

This bill would require the Inspector General to conduct a management review audit following confirmation of a new warden or the appointment of a new superintendent, unless the Inspector General determines that the audit is not warranted at that time.

(6) This bill would prohibit the Inspector General from destroying certain papers and memoranda used in connection with an audit, as specified, for a period of not less than 3 years. This bill would, except as provided, make specified documents, papers and other records subject to public disclosure pursuant to existing law regarding public records.

(7) This bill would make it an offense punishable as a misdemeanor for the Inspector General or any employee or former employee thereof, or any person or business, as specified, including employees or former employees thereof, that is contracting or has contracted with the Inspector General, to divulge, except in a manner expressly permitted, records or other information, as specified, that are restricted by law from release to the public.

(8) The bill would provide that the Inspector General shall have access to, and be able to reproduce, specified records, and to examine bank records, money or other property, for an audit or investigation. Any officer or person who fails or refuses to permit access and reproduction, as specified, would be guilty of a misdemeanor. By creating a new crime, this bill would impose a state-mandated local program.

(9) This bill would provide that it is a misdemeanor for the Inspector General or any employee thereof to release information, except as provided, that is prohibited from being disclosed. By creating a new crime, this bill would impose a state-mandated local program.

(10) Existing law provides that the Inspector General is a department head for purposes of obtaining depositions and may require employees to be interviewed on a confidential basis. This bill would repeal existing law in this respect and recast and reorganize those provisions.

(11) The Public Employees' Retirement Law provides for benefits and contribution rates for peace officer members that are higher than those provided for state miscellaneous members. The state's employer contributions to the Public Employees' Retirement Fund are continuously appropriated from the General Fund and other funds in the State Treasury.

Because this bill would provide that any employee under the authority of the Inspector General as designated by the Inspector General is a peace officer, thereby including these employees within the category of peace officer members, it would make an appropriation from the General Fund and other funds in the State Treasury by increasing the state's contributions to the Public Employees' Retirement Fund for these new state peace officer members.

(12) This bill would incorporate additional changes in Section 830.2 of the Penal Code proposed by AB 1502, to be operative if AB 1502 and this bill become effective on or before January 1, 2000, and this bill is enacted last.

NOTE: Superior numbers appear as a separate section at the end of the digests.

(13) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 919 (AB 1518) Soto. CalWORKs: multidisciplinary services teams.

Existing law provides for the California Work Opportunity and Responsibility to Kids (CalWORKs) program, under which each county provides cash assistance and other benefits to qualified low-income families. Each county is required to pay a share of the cost of both aid grant and administrative costs for the CalWORKs program.

This bill would require the State Department of Social Services to develop 3-year pilot projects in Alameda County, San Bernardino County, and Ventura County, at the option of each county, to create an integrated and coordinated case management system for the delivery of services to families receiving CalWORKs benefits, through the use of multidisciplinary service teams, as defined. The teams would be permitted to share information for the purpose of ensuring the provision of appropriate health, educational, substance abuse, social, and other services. The bill would require the department to prepare a report, for submission to the Legislature by April 1, 2002, on the impact of this pilot program.

Ch. 920 (AB 1520) Leach. Bunk beds.

(1) Existing law regulates safety with respect to various consumer products, including infant cribs.

This bill would prohibit any commercial user, as defined, from remanufacturing, retrofitting, selling, contracting to sell or resell, leasing, subletting, or otherwise placing in the stream of commerce in this state a bunk bed that is unsafe for any child user, except as specified. Because a violation of this prohibition would constitute an infraction, the bill would impose a state-mandated local program by creating a new crime.

(2) The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Ch. 921 (AB 1555) Longville. Local government.

(1) Under the Cortese-Knox Local Government Reorganization Act of 1985, the local agency formation commission in a county may approve the annexation of contiguous territory to a city without an election under specified conditions.

This bill would authorize the commission to approve without an election the annexation or reorganization of an unincorporated island or unincorporated islands within city limits under specified conditions depending on whether the proceeding is initiated on or after January 1, 2000, or January 1, 2007.

(2) Existing law governing the allocation of property tax revenues between local government entities requires the revision of those allocations upon a jurisdictional change. However, under specified conditions, the merger of a subsidiary district into a city is not subject to certain provisions of law concerning the revision of those allocations.

This bill would correct a cross-reference in this exception.

Ch. 922 (AB 1558) Wildman. Practice of medicine: unprofessional conduct.

Existing law provides for the discipline of physicians and surgeons for unprofessional conduct, as specified. Existing law also provides for all moneys paid to and received by the board to be paid into the State Treasury and credited to the Contingent Fund of the Medical Board of California, which is continuously appropriated for the purposes of the board.

This bill would require a physician and surgeon who collects biological specimens for clinical testing or examination to secure or ensure that his or her employees, agents, or contractors secure those specimens in a locked container when placed in a public location outside of the custodial control of the physician and surgeon, or his or her

---
